FEDERAL REGISTER

Vol. 81 Wednesday,

No. 226 November 23, 2016

Book 1 of 2 Books

Pages 84389–84694

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Resource Agency Hearings and Alternatives Development Procedures in Hydropower Licenses

AGENCY: Office of the Secretary, Agriculture; Office of the Secretary, Interior; National Oceanic and Atmospheric Administration, Commerce.

ACTION: Final rules; response to comments.

SUMMARY: The Departments of Agriculture, the Interior, and Commerce are jointly issuing final rules for procedures for expedited trial-type hearings and the consideration of alternative conditions and fishway prescriptions required by the Energy Policy Act of 2005. The hearings are conducted to expeditiously resolve disputed issues of material fact with respect to conditions or prescriptions developed for inclusion in a hydropower license issued by the Federal Energy Regulatory Commission under the Federal Power Act. The final rules make no changes to existing regulations that have been in place since the revised interim rules were published on March 31, 2015, and took effect on April 30, 2015. At the time of publication of the revised interim rules, the Departments also requested public comments on additional ways the rules could be improved. The Departments now respond to the public comments received on the revised interim rules by providing analysis and clarifications in the preamble. The Departments have determined that no revisions to existing regulations are warranted at this time.

DATES: Effective November 23, 2016.

FOR FURTHER INFORMATION CONTACT: Mona Koerner, Lands and Realty Management, Forest Service, U.S. Department of Agriculture, 202–205–0880; John Rudolph, Solicitor's Office, Department of the Interior, 202–208–3553; or Melanie Harris, Office of Habitat Conservation, National Marine Fisheries Service, 301–427–8636. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800–877–8339.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

The Departments of Agriculture, the Interior, and Commerce (the Departments) are issuing final rules to implement section 241 of the Energy Policy Act of 2005. Energy Policy Act of 2005, 109 Public Law 58, 119 Stat. 594, 674, 109 Public Law 58, 2005. Section 241 created additional procedures applicable to conditions or prescriptions that a Department develops for inclusion in a hydropower license issued by Federal Energy Regulatory Commission (FERC). Specifically, section 241 amended sections 4 and 18 of the Federal Power Act (FPA) to provide for trial-type hearings on disputed issues of material fact with respect to a Department's conditions or prescriptions; and it added a new section 33 to the FPA, allowing parties to propose alternative conditions and prescriptions.

In 2015, the Departments promulgated three substantially similar revised rules—one for each agency—with a common preamble. The revised interim rules became effective on April 30, 2015, so that interested parties and the agencies more immediately could avail themselves of the improvements made to the procedures. At the same time, the Departments requested public comment on additional ways the rules could be improved.

The Departments have reviewed the public comments received on the revised interim rules, and are providing responses to the public comments and further analysis and clarification. The Departments have determined that no changes to existing regulations are warranted in the Final Rules.

II. Background

A. Interim Final Rules

On November 17, 2005, at 70 FR 69804, the Departments jointly published interim final rules implementing section 241 of the Energy Policy Act of 2005 (EPAct), Public Law 109–58. Section 241 of EPAct amended FPA sections 4(e) and 18, 16 U.S.C. 797(e), 811, to provide that any party to a license proceeding before FERC is entitled to a determination on the record, after opportunity for an agency trial-type hearing of no more than 90 days, of any disputed issues of material fact with respect to mandatory conditions or prescriptions developed by one or more of the three Departments for inclusion in a hydropower license. EPAct section 241 also added a new FPA section 33, 16 U.S.C. 823d, allowing any party to the license proceeding to propose an alternative condition or prescription, and specifying the consideration that the Departments must give to such alternatives.

The interim final rules were made immediately effective, but a 60-day comment period was provided for the public to suggest changes to the interim regulations. The Departments stated in the preamble that based on the comments received and the initial results of implementation, they would consider publication of revised final rules.

B. Request for Additional Comment Period

In July 2009, the Hydropower Reform Coalition (HRC) and the National Hydropower Association (NHA) sent a joint letter to the three Departments, asking that an additional 60-day comment period be provided before publication of final rules. The organizations noted that they and their members had gained extensive experience with the interim final rules

since their initial comments were submitted in January 2006, and they now have additional comments to offer on ways to improve the trial-type hearing and alternatives processes. The Departments granted NHA and HRC's request. Instead of publishing final rules, the Departments published revised interim rules, effective on April 30, 2015, with a 60-day comment period.

C. Revised Interim Rules

On March 31, 2015, the Departments jointly published revised interim rules implementing EPAct section 241. 80 FR 17156. The rules and preamble addressed a few issues that remained open in the 2005 rulemaking, such as who has the burden of proof in a trial-type hearing and whether a trial-type hearing is an administrative remedy that a party must exhaust before challenging conditions or prescriptions in court. Additionally, the revised interim rules clarified the availability of the trial-type hearing and alternatives processes in the situation where a Department exercises previously reserved authority to include conditions or prescriptions in a hydropower license.

The revised interim rules went into effect on April 30, 2015, but a 60-day comment period was provided for the public to suggest changes to the revised interim regulations.

D. Comments Received

The Departments received comments on the revised interim rules from Exelon Generation Company, LLC (''Exelon'') and comments submitted jointly by the National Hydropower Association, American Public Power Association, Edison Electric Institute, and Public Utility District no. 1 of Snohomish County, Washington (''Industry Commenters''). Responses to these comments are provided below. The Departments also received a comment that is not relevant to this rulemaking and therefore does not necessitate a response. The reader may wish to consult the section-by-section analysis in the revised interim rules for additional explanation of all the regulations.

Burden of Proof

The Industry Commenters strongly disagree with the Departments' decision in the revised interim final rule to assign the burden of proof to the party requesting a hearing. See 7 CFR 1.657(a), 43 CFR 45.57(a), and 50 CFR 221.57(a). They assert that the burden of persuasion should be assigned, in accordance with § 7(d) of the Administrative Procedure Act (APA), 5 U.S.C. 556(d), to the party that is ''the proponent of [the] rule or order,'' and that the burden should be assigned to the Departments because they are the proponents of their mandatory conditions or prescriptions which they seek to attach to a licensing order as well as the alleged facts supporting those conditions or prescriptions. The Departments received these comments on the interim final rule and explained the Departments' rationale for disagreeing with the comment in the revised interim rules. 80 FR 17170–17171. For the reasons explained in the revised interim rules, the Departments do not agree with the comment and no changes to the regulations are required.

The Industry Commenters cite *Escondido Mutual Water Co.* v. *La Jolla Band of Mission Indians,* 466 U.S. 765 (1984), in support of the assertion that the Departments are the proponents. In that case the Supreme Court noted that a condition or prescription must be supported by evidence provided by the conditioning agency (or other interested parties). *Id.* at 777 nn.17, 20. The Industry Commenters assert that this is consistent with the APA requirement that the proponent of an order ''has the burden of proof.'' However, the *Escondido* case dealt with an appeal from a U.S. court of appeals' decision that § 4(e) of the FPA required FERC to accept without modification any license conditions recommended by the Secretary of the Interior. As noted by the Supreme Court, FERC's orders, including licenses, are reviewable by a U.S. court of appeals under 18 U.S.C. 825l(b), and the court of appeals, and not FERC, has exclusive authority to determine the validity of a condition or prescription in a license. 466 U.S. at 777 and 777 nn. 19, 21. Because conditions and prescriptions, and whether they are supported by substantial evidence, are only reviewable under § 825l(b), the conditions or prescriptions themselves are not the subject ''orders'' of the trial-type hearing. Rather, the subject of the hearing is the hearing requester's claim that the correct facts are different than the Department's factual basis for the conditions or prescriptions.

In a trial-type hearing, the requester seeks a decision from the ALJ upholding its claim and thus is the proponent of the order and bears the burden of persuasion. *See Schaffer* v. *Weast,* 546 U.S. 49, 62 (2005). The correctness of this position is strongly buttressed by the fact that the same conclusion was reached by all six independent ALJs who ruled on this issue prior to specifically assigning the burden of proof in the revised interim rules. No changes to the regulations are necessary.

Applicability of Rules on Reopener

The Industry Commenters state that the revised interim rules should, but do not appear to, provide for a trial-type hearing or the submission of alternative conditions or fishway prescriptions (alternatives) when an agency imposes conditions and prescriptions during the licensing proceeding, reserves its right to impose additional or modify existing conditions or prescriptions during the license term, and then exercises that reserved right. The Departments disagree with the commenter's premise that the rules do not provide for a trial type-hearing or the submission of alternatives in such a situation.

The revised interim rules provide that where a Department ''has notified or notifies FERC that it is reserving its authority to develop one or more conditions or prescriptions at a later time, the hearing and alternatives processes under this part for such conditions or prescription will be available if and when DOI exercises its authority.'' 7 CFR 1.601(c); 15 CFR 221.1(c); 43 CFR 45.1(c). Accordingly, if a Department exercises reserved authority during the license term to impose additional or modified conditions or prescriptions, the hearing and alternatives processes under this part for such conditions or prescriptions will be available.

The Industry Commenters contend that where a Department imposes new or substantially modified conditions or prescriptions under reserved authority during the license term, the Department has an obligation under the license to justify these changes based on a change in facts. This comment pertains to the justification for a Department's exercise of its reserved authority, which is beyond the scope of this rulemaking, and therefore merits no further response.

Improvements to the Hearing Timeline

The revised interim rules extended a few of the deadlines in the 2005 rules, while not adopting some commenters' recommendations that the Departments significantly expand the hearing schedule. The Industry Commenters assert that these extensions do not go far enough because the compressed timeline set out in the rules imposes extreme hardship on the parties and forces parties to limit the scope of their challenges to agency conditions and prescriptions. They contend that EPAct does not require such a condensed schedule.

Specifically, they reiterate two recommendations rejected in the revised interim rules: (1) Extending the deadline

for filing trial-type hearing requests and proposed alternative conditions or prescriptions from 30 to 45 days after a Department issues its preliminary conditions or prescriptions; see 7 CFR 1.621(a)(2)(i), 43 CFR 45.21(a)(2)(i), and 50 CFR 221(a)(2)(i), and (2) allowing for consecutive rather than concurrent 90-day hearings when there are two unconsolidated hearing requests pending for the same conditions or prescriptions, thus delaying by 90 days the issuance of a decision by the ALJ for one of the hearings. The Departments continue to reject these recommendations for the reasons stated in the revised interim rules, 80 FR 17164–65, including that adding more time to the hearing process raises a significant potential for delay in license issuance, a result Congress expressly sought to avoid in section 241 of EPAct.

The commenters also recommend a rule amendment to allow for supplementation of the exhibit and witness lists which must be filed with the hearing request. The Departments decline to make such an amendment because supplementation is already allowed. See 7 CFR 1.642(b), 43 CFR 45.42(b), and 50 CFR 221.42(b).

Another commenter recommendation is that the rules should mandate rather than merely allow consolidation of hearing requests with common issues of fact. In fact, the rules do require consolidation for all hearing requests with respect to any conditions from the same Department or any prescriptions from the same Department. See 7 CFR 1.623(c)(1) and (2), 43 CFR 45.23(c)(1) and (2), and 50 CFR 221.23(c)(1) and (2).

Regarding all other situations, certainly consolidation may be appropriate to avoid inconsistent decisions, promote economy of administration, and serve the convenience of the parties. However, especially where the commonality is minimal, allowing the requests to be processed separately may be the most economical and streamlined approach, avoiding complicating one process with the numerous, intricate issues of the other process. Consequently, the Departments decline to accept the recommendation, opting to retain the flexibility to determine the best approach based on the unique circumstances of each situation. See 7 CFR 1.623(c)(3), 43 CFR 45.23(c)(3), and 50 CFR 221.23(c)(3).

Definition of Disputed Issue of Material Fact

In the preamble to the revised interim rules, the Departments offered guidance on the types of issues which constitute disputed issues of material fact and are thus appropriate for resolution in a trial-type hearing, stating that legal or policy issues are not issues of material fact. The Industry Commenters contend that the Departments should revisit their guidance, asserting that the Departments' notion of what is a legal or policy issue is overbroad.

However, the focus of their comments is not on the relevant regulation or guidance, but on the positions taken by the Departments during previous trial-type hearings. They reference several instances in which ALJs disagreed with the Departments' litigation positions regarding what constitutes a disputed issue of material fact. The positions the Departments have taken in trial-type hearings are based on the specific facts and circumstances of the issues before the ALJ. The Departments' litigation positions are not the subject of this rulemaking; therefore, these comments do not necessitate a change to the regulations.

The commenters refer the Departments to the Departments preamble statement in the revised interim rules that '''historical facts' such as whether fish were historically present above a dam 'may be resolved based on available evidence and do not involve attempts to predict what may happen in the future.''' 80 FR 17178. The commenters assert that the ''Departments' attempt to distinguish between an 'historical fact' and matters of 'prediction' is a false dichotomy.'' The commenters reason:

> Whether a condition or prescription will, in practice, have the desired effect or achieve an agency's goals is a factual question, not a policy question. All conditions and prescriptions are attempts to achieve a future result, and thus have predictive elements. Parties often disagree with an agency whether its condition or prescription will achieve that result. An essential and fundamental element of the scientific method is prediction. . . . Scientific prediction is a tool for crafting environmental policies. Any disputed issues of material fact with regard to the science behind proposed conditions or prescriptions are appropriate for determination by the ALJ.

The Departments do not agree that the distinction between historical facts and matters of prediction is a false dichotomy. As explained in the revised interim rules, only disputed issues of material fact are appropriate for resolution in a trial-type hearing.80 FR 17177–17178. While the Departments agree that some predictive elements of a condition or prescription may represent disputed issues of material fact in a particular case, such as whether a prescription will result in the passage of fish, other predictive elements of a condition or prescription may represent legal, policy or non-material issues that are not appropriate for resolution in a trial-type hearing. The Departments continue to believe that only disputed issues of material fact are appropriate for determination by the ALJ.

The Industry Commenters also contend that disputed issues with respect to alternatives considered and rejected by a Department are material facts that should be resolved by the ALJ. They assert that if a Department, in issuing a preliminary condition or prescription, considered and rejected other potential conditions or prescriptions, the scientific justification for why those options were rejected is material.

This contention is responsive to the Departments' position in the revised interim rules that immaterial issues not appropriate for ALJ consideration include those that blur the distinction between the EPAct trial-type hearing process and the separate alternatives process created under new FPA section 33. The Departments' position and reasoning remain unchanged in this regard:

> Trial-type hearings are limited to resolving disputed issues of material fact relating to a Department's own preliminary condition or prescription. Where the hearing requester's purpose is to establish facts that may support an alternative proposed under the distinct section 33 process, but that do not otherwise affect the Department's ultimate decision whether to affirm, modify, or withdraw its preliminary prescription or condition, then the issue raised is not ''material'' to that condition or prescription.
>
> Such matters must be resolved by the relevant Department through the section 33 process, and the ALJ should not make findings that would preempt the Department's review.

80 FR 17178. Prohibition against Forum-shopping: (1) Venue selection, (2) ALJ selection.

The Industry Commenters propose changes to the regulations based on the assumption that the Departments exert undue influence over the selection of a venue for the trial-type hearing and the presiding ALJ. The Departments disagree with this assumption and therefore the proposed changes are unnecessary.

Regarding venue selection, they offer purported examples of undue influence in support of a suggested rule change requiring the ALJ to balance the convenience of the parties. The commenters point to the assignment of an ALJ in the Pacific Northwest for FERC Project No. 2206, which involved a licensee based in Raleigh, North Carolina, with counsel in Birmingham, Alabama. However, that hearing was

scheduled to take place in Charlotte, North Carolina, and was settled before a hearing was held.

The commenters also refer to the assignment of an ALJ in Sacramento, California, for FERC Project No. 2082, which involved a licensee based in Portland, Oregon, with counsel in Washington, DC However, the licensee withdrew a motion to hold the hearing in Portland after the overwhelming majority of the parties expressed to the ALJ a preference for a hearing in Sacramento during the prehearing conference. These examples do not demonstrate any undue influence.

Further, the apparent inference that the venue is determined by the location of the ALJ's office is not correct. Nor is it determined solely by balancing the convenience of the parties, as implied by the commenters suggested amendment. As pointed out in the preamble to the revised interim rules:

> the ALJ has discretion to manage hearing locations. As the ALJs have done in prior cases, the Departments expect that an ALJ will take into consideration factors such as convenience to the parties and to the ALJ, the location of witnesses, and the availability of adequate hearing facilities when determining the location of a hearing. 80 FR 17170.

The Departments conclude that no change in the rules is needed regarding hearing venue selection.

Regarding the selection of an ALJ, the Industry Commenters assert that a Department ''should not be allowed to hand pick a Department ALJ or an ALJ with a track record favorable to the Department.'' They identify two potential remedial amendments: (1) Use a lottery system to select an ALJ, or (2) preferably, use FERC ALJs instead of Department ALJs under the assumption that FERC ALJs would be more neutral and have more subject matter expertise.

The Departments disagree with the unsupported assumptions that they are exercising undue influence over the selection of ALJs or that a Department would consider ''hand picking'' an ALJ to obtain an advantage. In accordance with the mandate of 5 U.S.C. 3105, administrative law judges are assigned to cases in rotation so far as practicable, with due consideration given to the demands of existing caseloads and the case to be assigned.

The Departments also dispute the assertion that FERC ALJs are ''more neutral'' or have more germane expertise. In fact, the independence of all ALJs is protected and impartiality fostered by laws which, among other things, exempt them from performance ratings, evaluation, and bonuses (see 5 U.S.C. 4301(2)(D), 5 CFR 930.206); vest the Office of Personnel Management rather than the employing agency with authority over the ALJs' compensation and tenure (see 5 U.S.C. 5372, 5 CFR 930.201–930.211); and provide that most disciplinary actions against ALJs may be taken only for good cause established and determined by the Merit Systems Protection Board on the record after opportunity for a hearing (see 5 U.S.C. 7521). As for expertise, the Departments' ALJs have considerable experience and expertise evaluating natural resource issues similar to those which typically underlie imposition of a condition or prescription.

Furthermore, the use of FERC ALJs would require the agreement of FERC and possibly a statutory amendment. In sum, the Departments disagree with the premises of the comment regarding the selection of ALJs and conclude that no related change in the rules is necessary or desirable.

Stay of Case for Settlement

The Industry Commenters also assert that the revised interim rules should permit settlement negotiations not only for 120 days before a case is referred to an Administrative Law Judge (ALJ)—as provided in the revised interim rules—but also during the period after the ALJ has issued the decision, yet before issuance of the Department's modified conditions. The Industry Commenters add that settlement discussions should not be prohibited under ex parte principles, considering that settlements ought to be encouraged at all points in a hearing process.

Notwithstanding the Industry Commenters' assertion, the Industry Commenters also offered support for the new 120-day stay period for purposes of facilitating settlement. We agree that both the length of this period and its placement at the pre-referral stage could lead to more settlements and avoid the more formal stages of the hearing process. We also agree with the Industry Commenters that settlements should be permitted whenever reached by parties. Yet here we note that the availability of a stay period is not the only mechanism or incentive by which settlements can be facilitated, and that parties are at liberty to conduct robust and meaningful settlement discussions concurrently with the ongoing hearing process, at any stage in such process. Further, given that Congress established in EPAct a short 90-day time limit for completion of the trial-type hearing to avoid the potential for substantial delay in license issuance, it would be unworkable to provide for any additional amount of time beyond the revised interim rules' 120 day-period for a stay in proceedings in which to pursue a settlement.

Other Minor Modifications

1. Discovery

In the preamble to the revised interim rules, the Departments declined to amend the discovery provisions for the trial-type hearing in response to comments that the rules needlessly limit discovery by requiring authorization from the ALJ or agreement of the parties. The commenters recommended that the Departments adopt the approach of the FERC regulations at 18 CFR 385.402(a) and 385.403(a), which authorize discovery to begin without the need for ALJ involvement unless there are discovery disputes. Industry Commenters have reiterated these comments, further arguing that section 241 of EPAct guarantees the availability of discovery, not that such discovery must be first agreed to by the parties or authorized by the ALJ.

The Departments continue to disagree that the regulations should be changed for the reasons detailed in the preamble to the revised interim rules. See 80 FR 17168–69. In summary, the Departments' rules do allow for rapid initiation of discovery and the criteria for allowing discovery are fairly similar to those utilized by FERC and federal courts. More importantly, discovery limits are necessary in this specialized trial-type hearing context to fit within the expedited time frame mandated by section 241 of EPAct, and wide-ranging discovery should not be necessary, given the typical documentation generated during the license proceeding, including the record supporting the conditions or prescriptions.

Also, the fact that section 241 provides for ''the opportunity to undertake discovery'' does not guarantee unlimited discovery.

> It is fundamental that the scope of discovery is not limitless and is restricted by the concepts of relevancy. *United States Lines (S.A.) Inc.—Petition for Declaratory Order Re: The Brazil Agreements,* 24 S.R.R. 1387, 1388 (ALJ 1988). *See also* 4 James W. Moore et al., Moore's Federal Practice, P 26.56[1], at 26–96 (2d ed. 1993).

American President Lines, LTD v *Cyprus Mines Corp.,* 1994 FMC LEXIS 33, *31–32 (Jan. 31, 1994); see also Fed. R. Civ. P. 26(d)(1). Further, as noted by the Supreme Court, even the liberal discovery rules of the Federal Rules of Civil Procedures,

> are subject to the injunction of Rule 1 that they ''be construed to secure the just, *speedy,* and *inexpensive* determination of every action.'' To this end, the requirements of Rule 26(d)(1) that the material sought in

discovery be ''relevant'' should firmly be applied, and the . . . courts should not neglect their power to restrict discovery where ''justice requires [protection for] a party or person from annoyance, embarrassment, oppression, or undue burden or expense . . . . '' Rule 26(c). With this authority at hand, judges should not hesitate to exercise appropriate control over the discovery process.

Herbert v. *Lands,* 441 U.S. 153, 177 (1979) (emphasis in original).

The revised interim rules reasonably incorporate similar standards for discovery, see 7 CFR 1.641(b), 43 CFR 45.41(b), and 50 CFR 221.41(b), to be applied by the administrative law judges to secure the just, speedy, and inexpensive determination of each case. The Industry Commenters have not addressed how application of those standards would unduly limit discovery. Because the Departments conclude that the standards are fair and reasonable, no change in the discovery provisions is warranted.

2. Page Limitations

In preamble to the revised interim rules, the Departments declined to extend the page limits for hearing requests in response to comments requesting that the limit for describing each issue of material fact be increased from two pages to five pages and that the limit for each witness identification be increased from one to three pages. The Departments did conclude that the required list of specific citations to supporting information and the list of exhibits need not be included in the page restrictions and amended the rules accordingly. See 7 CFR 1.621(d), 43 CFR 45.21(d), and 50 CFR 221.21(d).

The Industry Commenters renew the same requests without offering any new reasons why the requests should be granted. The Departments continue to believe that the page limits are generally appropriate and provide sufficient space for parties to identify disputed issues, particularly in light of the expedited nature of the proceeding. The Departments further note that they are bound by the same page limits in submitting an answer. See 7 CFR 1.622, 43 CFR 45.22, and 50 CFR 221.22. Therefore, for the reasons stated in the preamble to the revised interim rules, the Departments decline to amend the page limitations.

3. Electronic Filing

In the preamble to the revised interim rules, the Departments rejected commenter suggestions to revise the regulations to allow parties to file documents electronically, using email or FERC's eFiling system. The Departments did agree that, in many circumstances, the electronic transmission of documents is a preferable means of providing documents to another party and revised the rules to allow for electronic *service* of documents on a party who consents to such service. However, the Departments noted that ALJ offices do not currently have the capacity or resources to accept electronically and print off the large volume of documents typically filed in connection with a trial-type hearing.

The Industry Commenters again suggest that electronic filing should be allowed at the ALJ's discretion, citing the example of a Coast Guard ALJ allowing filing by email pursuant to the agreement of the parties at a prehearing conference addressing a trial-type hearing request. For the reasons discussed in the revised interim rules, the Departments decline to adopt regulations that permit filing by email with the ALJ offices. 80 FR 17161–17612. Email is not a substitute for a dedicated electronic filing system in which administrative, information technology, and policy issues such as document management, storage, security, and access can be systematically addressed. Because none of the ALJ Offices have a dedicated system, the Departments will not authorize filing by electronic means.

Equal Consideration Statements

The Industry Commenters request that the Departments revisit their interpretation of section 33 of the Federal Power Act (FPA section 33) as described in the revised interim rules. 80 FR 17176–17177. In the revised interim rules, the Departments interpreted FPA section 33 to require a Department to prepare an equal consideration statement only when a party has submitted an alternative condition or prescription.

The commenters state that the Departments' interpretation is contrary to the plain language of section 33(a)(4) and (b)(4), which they suggest should be read to require that a Department prepare an equal consideration statement whenever a Department submits any condition or prescription, regardless of whether a party submits an alternative. The commenters assert that the Departments' contextual analysis of FPA section 33, as described in the revised interim rules, is flawed because FPA section 33 unambiguously supports the commenters' interpretation. The Departments disagree with this comment.

As the Departments explained in the revised interim rules, the requirement that the Departments prepare an equal consideration statement must be read in the context of the overall statutory scheme. 80 FR 17177. Section 33 of the FPA is titled ''Alternative Conditions and Prescriptions,'' and it sets forth a series of sequential steps for considering an alternative and reaching a final determination. Section 33(a)(l) permits any party to a hydropower license proceeding to propose an alternative condition. Under section 33(a)(2), the Secretary must accept an alternative if it ''(A) provides for the adequate protection and utilization of the reservation; and (B) will either, as compared to the condition initially [deemed necessary] by the Secretary[,] (i) cost significantly less to implement; or (ii) result in improved operation of the project works for electricity production.'' 16 U.S.C. 823d(a)(2). When evaluating an alternative, section 33(a)(3) directs the Secretary to consider evidence otherwise available concerning ''the implementation costs or operational impacts for electricity production of a proposed alternative.'' The Departments continue to believe that a contextual analysis of FPA section 33 demonstrates that section 33 requires the preparation of an equal consideration statement only when a party submits an alternative condition or prescription. No changes to the regulations are needed in response to the comment.

The commenters also disagree with the Departments' perspective, as explained in the revised interim rules, that in the absence of an alternative the Departments will generally lack sufficient information to provide a meaningful equal consideration analysis of the factors required by FPA section 33(a)(4) and (b)(4). The commenters state that ample information is available to the Departments in the licensing application at the time the Departments adopt a condition or prescription, regardless of whether any alternatives were proposed under FPA section 33. The commenters observe that ''[w]ithout this information, the Departments presumably would not have sufficient information to draft meaningful preliminary conditions and prescriptions.''

The Departments note FPA sections 4(e) and 18, which authorize the Departments to issue conditions and prescriptions, do not require the Departments to consider certain types of information otherwise required by FPA section 33 when evaluating alternatives, such as ''the implementation costs or operational impacts for electricity production of a proposed alternative.'' 16 U.S.C. 823d(a)(3). Accordingly, the

Departments generally lack related information until such time that the Departments evaluate an alternative and prepare an equal consideration statement, which occurs after the Departments prepare preliminary conditions and prescriptions.

When preparing an equal consideration statement, the Departments must evaluate ''such information as may be available to the Secretary, including information voluntarily provided in a timely manner by the applicant and other parties.'' 16 U.S.C. 823d(a)(4) and (b)(4). The revised interim rules require a proponent of an alternative to submit information necessary to evaluate the alternative and prepare an equal consideration statement pursuant to FPA section 33. While such information may or may not be available in licensing applications prepared for FERC, the Departments will generally lack sufficient information to provide a meaningful equal consideration pursuant to FPA section 33 until such time as the proponent of an alternative submits the information with an explanation of how the alternative meets the criteria set forth in FPA section 33. No changes to the regulations are needed in response to the comment.

Hearings on Modified Conditions and Prescriptions

Commenters request that the Departments address perceived loopholes in the revised interim rules that would allow the Departments to avoid trial-type hearings in three scenarios. The commenters state that the interim final rules were silent as to whether a right to a trial-type hearing exists in situations where (1) the Department issues no preliminary conditions or prescriptions, but reserves the right to submit mandatory conditions or prescriptions later in the licensing process; (2) the Department adds conditions or prescriptions that were not included with its preliminary conditions or prescriptions; or (3) the Department's modified conditions or prescriptions include factual issues or justifications that were not presented with its preliminary conditions or prescriptions. The commenters write that the revised interim rules addresses the second scenario by handling it on a case-by-case basis, but do not address the first and third scenarios. The Departments believe that the revised interim rules address all three of these scenarios and no changes to the regulations are needed. The Departments again note that in several instances, the commenters discuss specific licensing proceedings. As stated above, such proceedings are not the subject of the rulemaking and therefore, the comments about them do not necessitate a change to the regulations.

The revised interim rules address the commenters' first scenario, in which a Department issues no preliminary conditions or prescriptions, but reserves a right to submit conditions and prescriptions later in the licensing process. The Departments received comments on the interim final rules that requested the availability of a trial-type hearing when a Department reserves its authority to include conditions or prescriptions in a license. The Department responded to this comment by stating that ''under EPAct, it is only when a Department affirmatively exercises its discretion to mandate a condition or prescription that the hearing and alternatives processes are triggered. Allowing for trial-type hearings and alternatives when the agencies have not exercised this authority would be both inconsistent with the legislation and an inefficient use of the Departments' resources. Consequently, these final rules continue to provide that the hearing and alternatives processes are available only when a Department submits a preliminary condition or prescription to FERC, either during the initial licensing proceeding or subsequently through the exercise of reserved authority.'' 80 FR 17159. Thus, the revised interim rules addressed the commenters' first scenario by providing a right to a trial-type hearing only when a Department submits a preliminary condition or prescription to FERC during the initial licensing proceeding, or when a Department submits a condition or prescription to FERC through the exercise of reserved authority after FERC has issued a license.

In discussing their first scenario, the commenters' language suggests that they may not be concerned about a Department's reservation of authority to submit conditions or prescriptions, but instead may actually be concerned with the availability of a trial-type hearing when a Department issues no preliminary conditions or prescriptions, but submits conditions and prescriptions outside of the timeframe contemplated in FERC's regulations for filing preliminary conditions or prescriptions, which is ''no later than 60 days after the notice of acceptance and ready for environmental analysis.'' 18 CFR 5.23(a). See also 18 CFR 4.34(b). The Departments note that in this scenario, the Departments would not be exercising reserved authority to submit preliminary conditions or prescriptions because, as long as a licensing proceeding is pending, a Department has authority to submit conditions and prescriptions without the need to ''reserve'' its authority. A reservation of authority is only necessary for submission of conditions or prescriptions after FERC has issued a license.

The revised interim rules, when addressing whether a trial-type hearing should be held to address disputed issues of fact at the preliminary or modified condition/prescription stage, impliedly addressed the scenario where the Departments submit conditions and prescriptions outside of the timeframe for doing so in FERC's regulations. The Departments explained the circumstances under which a Department may submit a preliminary condition or prescription later in the licensing process and that the availability of the trial-type hearing process would be decided on a case-by-case basis: ''[E]xceptional circumstances may arise where facts not in existence and not anticipated at an earlier stage necessitate a new preliminary condition or prescription. This circumstance would be handled on a case-by-case basis, in coordination with FERC as necessary.'' 80 FR 17164. The Departments have continued to apply this rationale and process in the final rules.

With respect to the third scenario, the Departments received similar comments on the interim final rule that requested ''the regulations provide for trial type hearings at the modified stage if the modifications are based on new facts that did not exist or were not anticipated at the preliminary stage, or if the agency submits an entirely new condition or prescription at the modified stage.'' 80 FR 17163. The Departments responded by stating that the revised interim rules ''continue the approach taken in the interim regulations of scheduling the trial-type hearing process immediately following the issuance of preliminary conditions and prescription.'' 80 FR 17164. The Departments reasoned that this approach allows trial-type hearings to occur during FERC's licensing time frame as required by Congress, that it promotes efficiency, and that providing for trial-type hearings at the modified stage is not a reasonable or efficient use of resources. 80 FR 17163–17164. The Departments maintain this rationale in the final rules.

Industry commenters state that any final rules must provide a remedy for licensees who object to new conditions and prescriptions imposed at the modified stage, or when the Department's modified conditions or

prescriptions include factual issues or justifications that were not presented with its preliminary conditions or prescriptions. The commenters also state that the final rules must provide a standard for when a modified condition or prescription would trigger the right to a trial-type hearing. The Departments disagree with these comments. For the reasons discussed above and in the revised interim rules, the Departments will continue their approach of scheduling the trial-type hearing process immediately following the issuance of preliminary conditions and prescriptions. The Departments again acknowledge ''that exceptional circumstances may arise where facts not in existence and not anticipated at an earlier stage necessitate a new preliminary condition or prescription. This circumstance would be handled on a case-by-case basis, in coordination with FERC as necessary.'' 80 FR 17164. No changes to the regulations are needed in response to these comments.

Submissions and Acceptance of Alternatives

The Industry Commenters believe the Departments are not complying with the requirements of FPA section 33 to accept a proposed alternative if the alternative: ''(A) provides for the adequate protection and utilization of the reservation; and (B) will either, as compared to the condition initially proposed by the Secretary—(i) cost significantly less to implement; or (ii) result in improved operation of the project works for electricity production.'' 16 U.S.C. 823(a)(2). The Departments disagree with this comment. Notwithstanding this comment, the Industry Commenters do not provide proposed revisions, and the Departments do not believe any changes to the regulations are necessary.

The Industry Commenters also ''commend'' the revised interim rules for adding a new change to allow for a revised alternative within 20 days of an ALJ decision, but express the view that this time period is still ''unnecessarily short,'' given an ALJ opinion's typical length and underlying complexity. The commenters compare this timeframe to the 60-day timeframe in which the Departments may revise conditions and prescriptions, and suggest that the deadline for a revised alternative be, similarly, 60 days.

In response, the Departments note that the FPA specifically provides that the Departments will evaluate alternatives ''based on such information as may be available to the [Departments], including information voluntarily provided in a *timely* manner by the applicant and others.'' 16 U.S.C. 823d(a)(4), (b)(4) (emphasis added). To achieve a proper balance between the Congressional mandate to consider evidence otherwise available to DOI, including information *timely* submitted, and Congressional intent to avoid delays in the FERC licensing process, the Departments established a 20-day period for submittal of revised alternatives.

Exelon submitted comments concerning 43 CFR 45.74(c), which generally provides that DOI will consider information regarding alternatives provided by the deadline for filing comments on FERC's National Environmental Policy Act (NEPA) document. This provision states that ''[f]or purposes of paragraphs (a) and (b) of this section, DOI will consider evidence and supporting material provided by any license party by the deadline for filing comments on FERC's NEPA document under 18 CFR 5.25(c).'' 43 CFR 45.74(c). Paragraph (a) in 43 CFR 45.74 specifies the evidence and supporting material DOI must consider when deciding whether to accept an alternative. Paragraph (b) in 43 CFR 45.74 identifies the criteria DOI must use to evaluate whether to accept an alternative. Paragraph (c) in 18 CFR 5.25 identifies which FERC hydropower license applications require FERC to issue a draft NEPA document. As discussed below in more detail, the provision's scope is limited to *license applications* under FERC's Integrated License Application Process, as opposed to proposed amendments to existing licenses.

Exelon interpreted 43 CFR 45.74(c) as establishing a strict deadline for submittal of information regarding a proposed alternative. The commenter noted that the subsequent finalization of any conditions or prescriptions may occur much later than this deadline, sometimes because of pending applications for water quality certifications (required under section 401 of the Clean Water Act). Exelon expressed concern that a potentially substantial time gap between the NEPA comment deadline and finalization of a prescription or condition could result in the exclusion of the best and most current scientific research to inform DOI's evaluation of alternative prescriptions and conditions.

DOI does not believe that 43 CFR 45.74(c) will result in the exclusion of the best and most current scientific research to inform the Department's evaluation of alternative conditions and fishway prescriptions. DOI believes that considering information regarding alternatives submitted by any license party by the close of the FERC NEPA comment period will provide the Departments with all reasonably available information to evaluate an alternative condition or fishway prescription in accordance with Section 33 of the Federal Power Act.

Furthermore, as noted in the interim final rule, ''[g]iven the complexity of the issues and the volume of material to be analyzed in the typical case, the Departments cannot reasonably be expected to continue to accept and incorporate new information right up until the FERC filing deadline for modified conditions and prescriptions.'' 80 FR 17156, 17176. Nevertheless, the language of 43 CFR 45.74(c) only sets forth the requirement that DOI must consider pre-deadline submittals, and thus it does not preclude DOI from considering, in exceptional circumstances, evidence and supporting material submitted after the deadline.

It is not unusual for a license applicant to have authorization petitions pending at the time a Department considers an alternative. These types of pending petitions include, but are not limited to, applications for a Clean Water Act section 401 water quality certification.

As a practical matter, the parties and stakeholders share an interest in the timely submittal of evidence and supporting materials in order to ensure a robust alternatives process and avoid delays during FERC's licensing proceedings. The timely submittal of evidence under 43 CFR 45.74(c) also reflects a statutory process that prescribes specific timeframes. The EPAct avoids delay by requiring the hearing process to be completed in a 90-day timeframe and ''within the time frame established by [FERC] for each license proceeding.'' As noted in the revised interim rules, the hearing process was crafted to work within FERC's licensing timeframes. 80 FR 17156, 17163 (Mar. 31, 2015). The process for submitting, evaluating, and adopting alternatives was similarly drafted with the timeframes in mind.

Under FERC's rules, modified conditions and prescriptions, including any adopted alternatives, must be filed within 60 days after the close of FERC's NEPA comment period. 18 CFR 5.25(d). The timely submission of information under 43 CFR 45.74(c) is necessary so DOI has adequate time to consider the information and file modified conditions and prescriptions 60 days after the close of FERC's NEPA comment period.

Additionally, the FPA specifically provides that the Departments will evaluate alternatives ''based on such

information as may be available to the [Departments], including information voluntarily provided in a *timely* manner by the applicant and others.'' 16 U.S.C. 823d(a)(4), (b)(4) (emphasis added). DOI believes that 43 CFR 45.74(c) achieves the proper balance between the Congressional mandate to consider evidence otherwise available to DOI, including information *timely* submitted, and Congressional intent to avoid delays in the FERC licensing process.

Exelon also expressed concern that in instances where DOI exercises its reserved authority to include a condition or prescription in a license that FERC has previously issued, the language in 43 CFR 45.74(c), that the DOI ''will consider'' information submitted prior to the NEPA comment deadline, could potentially preclude the introduction of additional relevant and supporting information that was not submitted during the license-application-related NEPA process. As discussed above, the language of 43 CFR 45.74(c) only sets forth the requirement that DOI must consider pre-deadline submittals. Thus, it does not preclude DOI from considering evidence and supporting material submitted after the deadline in cases where FERC has issued a license and a Department exercises reserved authority. Therefore, notwithstanding Exelon's concern, paragraph (c) of 43 CFR 45.74 does not preclude the introduction of relevant information that would support a proposed alternative condition or prescription after DOI exercises its reserved authority to include a condition or fishway prescription in a FERC license.

VI. Consultation With FERC

Pursuant to EPAct's requirement that the agencies promulgate rules implementing EPAct section 241 ''in consultation with the Federal Energy Regulatory Commission,'' the agencies have consulted with FERC regarding the content of the revised interim rules. After considering post-promulgation comments, no changes were made to the revised interim final regulations in the final rules.

VII. Conclusion

These final rules have been determined to be not significant for purposes of Executive Order 12866.

OMB has reviewed the information collection in these rules and approved an extension without change of a currently approved collection under OMB control number 1094–0001. This approval expires November 30, 2018.

The Departments have reviewed the comments received in response to the revised interim rules and have determined that no change to the rules is necessary.

Accordingly, the interim rules amending 6 CFR part 1, 43 CFR part 45, and 50 CFR part 221, which were published at 80 FR 17155 on March 31, 2015, are adopted as final without change.

Dated: October 6, 2016.

Robert F. Bonnie,

Undersecretary—Natural Resources and Environment, U.S. Department of Agriculture.

Dated: September 22, 2016.

Kristen J. Sarri,

Principal Deputy Assistant Secretary—Policy, Management and Budget, U.S. Department of the Interior.

Dated: October 31, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

BILLING CODE 3411–15–P; 4310–79–P; 3510–22–P

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 457

[Docket No. FCIC–16–0003]

RIN 0563–AC52

Common Crop Insurance Regulations, Various Crop Provisions

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule with request for comments.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) amends the Small Grains Crop Insurance Provisions, Cotton Crop Insurance Provisions, Extra Long Staple Cotton Crop Insurance Provisions, Sunflower Seed Crop Insurance Provisions, Sugar Beet Crop Insurance Provisions, Hybrid Sorghum Seed Crop Insurance Provisions, Coarse Grains Crop Insurance Provisions, Safflower Crop Insurance Provisions, Popcorn Crop Insurance Provisions, Peanut Crop Insurance Provisions, Onion Crop Insurance Provisions, Tobacco Crop Insurance Provisions, Green Pea Crop Insurance Provisions, Dry Pea Crop Insurance Provisions, Rice Crop Insurance Provisions, Northern Potato Crop Insurance Provisions, Central and Southern Potato Crop Insurance Provisions, Dry Bean Crop Insurance Provisions, Hybrid Seed Corn Crop Insurance Provisions, Processing Sweet Corn Crop Provisions, Processing Bean Crop Insurance Provisions, Canola and Rapeseed Crop Insurance Provisions, Millet Crop Insurance Provisions, and Mustard Crop Insurance Provisions. The purpose of this final rule with comment is to update prevented planting coverage levels through the actuarial documents to improve actuarial considerations and coverage offered, program integrity, and to reduce vulnerability to program fraud, waste, and abuse. The changes to the Crop Provisions made in this rule are applicable for the 2017 and succeeding crop years for all crops with a 2017 contract change date on or after the effective date of the rule, and for the 2018 and succeeding crop years for all crops with a 2017 contract change date prior to the effective date of the rule.

DATES: This rule is effective November 23, 2016 However, FCIC will accept written comments on this final rule until close of business January 23, 2017. FCIC may consider the comments received and may conduct additional rulemaking based on the comments.

ADDRESSES: FCIC prefers interested persons submit their comments electronically through the Federal eRulemaking Portal. Interested persons may submit comments, identified by Docket ID No. FCIC–16–0003, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Director, Product Administration and Standards Division, Risk Management Agency, United States Department of Agriculture, P.O. Box 419205, Kansas City, MO 64133–6205.

FCIC will post all comments received, including those received by mail, without change to *http://www.regulations.gov,* including any personal information provided. Once these comments are posted to this Web site, the public can access all comments at its convenience from this Web site. All comments must include the agency name and docket number or Regulatory Information Number (RIN) for this rule. For detailed instructions on submitting comments and additional information, see *http://www.regulations.gov.* If interested persons are submitting comments electronically through the Federal eRulemaking Portal and want to attach a document, FCIC requests that the document attachment be in a text-based format. If interested persons want to attach a document that is a scanned Adobe PDF file, it must be scanned as text and not as an image, thus allowing FCIC to search and copy certain portions of the submissions. For

questions regarding attaching a document that is a scanned Adobe PDF file, please contact the Risk Management Agency (RMA) Web Content Team at (816) 823–4694 or by email at *rmaweb.content@rma.usda.gov.*

Privacy Act: Anyone is able to search the electronic form of all comments received for any dockets by the name of the person submitting the comment (or signing the comment, if submitted on behalf of an entity, such as an association, business, labor union, etc.). Interested persons may review the complete User Notice and Privacy Notice for *Regulations.gov* at *http://www.regulations.gov/#!privacyNotice.*

FOR FURTHER INFORMATION CONTACT: Tim Hoffmann, Director, Product Management, Product Administration and Standards Division, Risk Management Agency, United States Department of Agriculture, Beacon Facility, Stop 0812, Room 421, P.O. Box 419205, Kansas City, MO 64141–6205, telephone (816) 926–7730.

SUPPLEMENTARY INFORMATION:

Background

Prior to the FCIC offering coverage for prevented planting, prevented planting payments were linked to USDA program provisions such as the farmer's program yield and the target price. Adjustments to the Federal Crop Insurance Act (Act) from the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 mandated that coverage for prevented planting be a part of crop insurance policies offered under the Federal crop insurance program, as appropriate. Following these changes to the Act, FCIC incorporated preventing planting provisions into the Common Crop Insurance Basic Provisions. A 1996 study by USDA's Economic Research Service (ERS) established the basis for the original prevented planting coverage levels. The study and estimated pre-planting costs were reviewed again by ERS in 2002, and FCIC adjusted prevented planting coverage levels accordingly.

Further, the Office of Inspector General for Audit (OIG) conducted an audit on the Federal crop insurance prevented planting program for 2011–2012 and recommended RMA obtain updated pre-planting cost information, and reevaluate the current prevented planting coverage levels making adjustments consistent with the pre-planting costs for each crop.

FCIC contracted to review the prevented planting policy and determine appropriate pre-planting costs to be covered, evaluate the reasonableness of current prevented planting payments by crop and region, examine alternative methods and approaches to the program, provide alternative payment amounts as appropriate, and develop a plan for routinely updating those amounts. For some crops or crops in certain regions, the contractor suggested FCIC raise or lower the current prevented planting coverage levels. RMA shared this study with stakeholders to determine if the recommendations made sense to growers. This final rule with comment makes changes to allow for revisions to the prevented planting coverage levels, based on the contractor's findings and report, stakeholder comments in response to the contractors report, and FCIC's re-examination of the evaluation and those stakeholder comments received. This rule allows for any new percentages of prevented planting coverage that FCIC determines provides adequate protection for those costs incurred even though the crop was prevented from planting to be specified in the actuarial documents and removes them from the Crop Provisions. The rule also leaves the option for additional prevented planting coverage if offered in the actuarial documents. This will allow FCIC to expedite its update of the percentages in response to changing production conditions.

Effective Date

FCIC is exempt from all requirements in the administrative procedure provisions in 5 U.S.C. 553, which includes the 30-day effective date. This rule allows FCIC to make the changes to the Crop Provisions in time for 2017 spring planted crops. Therefore, this final rule is effective when published in the **Federal Register**.

Executive Order 12866

This rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, it has not been reviewed by the Office of Management and Budget (OMB).

Paperwork Reduction Act of 1995

Pursuant to the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the collections of information in this rule have been approved by OMB under control numbers 0563–0085, 0563–0083, and 0563–0053.

E-Government Act Compliance

FCIC is committed to complying with the E-Government Act of 2002, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Executive Order 13132

It has been determined under section 1(a) of Executive Order 13132, Federalism, that this rule does not have sufficient implications to warrant consultation with the States. The provisions contained in this rule will not have a substantial direct effect on States, or on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments.'' Executive Order 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

The Federal Crop Insurance Corporation has assessed the impact of this rule on Indian tribes and determined that this rule does not, to our knowledge, have tribal implications that require tribal consultation under E.O. 13175. If a Tribe requests consultation, the Federal Crop Insurance Corporation will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified herein are not expressly mandated by Congress.

Regulatory Flexibility Act

FCIC certifies that this regulation will not have a significant economic impact on a substantial number of small entities. Program requirements for the Federal crop insurance program are the same for all producers regardless of the size of their farming operation. For instance, all producers are required to submit an application and acreage report to establish their insurance guarantees and compute premium amounts, and all producers are required to submit a notice of loss and production information to determine the amount of an indemnity payment in the event of an insured cause of crop loss. Whether a producer has 10 acres or 1000 acres, there is no difference in the kind of information collected. To ensure crop insurance is available to small entities, the Federal Crop Insurance Act (Act) authorizes FCIC to waive collection of administrative fees from beginning farmers or ranchers and limited resource farmers. FCIC believes this waiver helps to ensure that small entities are given the same opportunities as large entities to manage their risks through the use of crop insurance. A Regulatory Flexibility Analysis has not been prepared since this regulation does not have an impact on small entities, and, therefore, this regulation is exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605).

Federal Assistance Program

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

Executive Order 12988

This rule has been reviewed in accordance with Executive Order 12988 on civil justice reform. The provisions of this rule will not have a retroactive effect. The provisions of this rule will preempt State and local laws to the extent such State and local laws are inconsistent herewith. With respect to any direct action taken by FCIC or to require the insurance provider to take specific action under the terms of the crop insurance policy, the administrative appeal provisions published at 7 CFR part 11 must be exhausted before any action against FCIC for judicial review may be brought.

Environmental Evaluation

This action is not expected to have a significant economic impact on the quality of the human environment, health, or safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

FCIC is issuing this final rule without opportunity for prior notice and comment. The Administrative Procedure Act exempts rules ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts'' from the statutory requirement for prior notice and opportunity for public comment (5 U.S.C. 553(a)(2)). However, FCIC is providing a 60-day comment period and invites interested persons to participate in this rulemaking by submitting written comments. FCIC will consider the comments received and may conduct additional rulemaking based on the comments.

List of Subjects in 7 CFR Part 457

Crop insurance, Reporting and recordkeeping requirements.

Accordingly, as set forth in the preamble, the Federal Crop Insurance Corporation amends 7 CFR part 457 as follows:

PART 457—COMMON CROP INSURANCE REGULATIONS

■ 1. The authority citation for part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(1), 1506(o).

■ 2. Amend § 457.101 as follows:
■ a. Revise the section heading;
■ b. Revise the first sentence of the introductory text; and
■ c. Revise section 13.
The revisions read as follows:

§ 457.101 Small grains crop insurance provisions.

* * * * *

The Small Grains Crop Insurance Provisions for the 2017 and succeeding crop years in counties with a contract change date of November 30, and for the 2018 and succeeding crop years in counties with a contract change date of June 30, are as follows:

* * * * *

13. Prevented Planting

In counties for which the Special Provisions designate a spring final planting date, your prevented planting production guarantee will be based on your approved yield for spring-planted acreage of the insured crop. Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 3. Amend § 457.104 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 11(b).
The revisions read as follows:

§ 457.104 Cotton crop insurance provisions.

The Cotton Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

11. Prevented Planting

* * * * *

(b) Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 4. Amend § 457.105 as follows:
■ a. Revise the first sentence of the introductory text;
■ b. Amend section 3 to remove the phrase ''(December 17 for the 1998 crop year only)''; and
■ c. Revise section 12(b).
The revisions read as follows:

§ 457.105 Extra long staple cotton crop insurance provisions.

The Extra Long Staple Cotton Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

* * * * *

(b) Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 5. Amend § 457.108 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 12.
The revisions read as follows:

§ 457.108 Sunflower seed crop insurance provisions.

The Sunflower Seed Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 6. Amend § 457.109 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 15(b).

The revisions read as follows:

§ 457.109 Sugar Beet Crop Insurance Provisions.

The Sugar Beet Crop Insurance Provisions for the 2017 and succeeding crop years in counties with a contract change date of November 30, and for the 2018 and succeeding crop years in counties with a contract change date of April 30, are as follows:

* * * * *

15. Prevented Planting

* * * * *

(b) Except in those counties indicated in section 15(a), your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 7. Amend § 457.112 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 13.

The revisions read as follows:

§ 457.112 Hybrid sorghum seed crop insurance provisions.

The Hybrid Sorghum Seed Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

13. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your amount of insurance for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 8. Amend § 457.113 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 12.

The revisions read as follows:

§ 457.113 Coarse grains crop insurance provisions.

The Coarse Grains Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 9. Amend § 457.125 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 12.

The revisions read as follows:

§ 457.125 Safflower crop insurance provisions.

The Safflower Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 10. Amend § 457.126 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 15.

The revisions read as follows:

§ 457.126 Popcorn crop insurance provisions.

The Popcorn Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

15. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 11. Amend § 457.134 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 15(a).

The revisions read as follows:

§ 457.134 Peanut crop insurance provisions.

The Peanut Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

15. Prevented Planting

(a) Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

* * * * *

■ 12. Amend § 457.135 as follows
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 15.

The revisions read as follows:

§ 457.135 Onion crop insurance provisions.

The Onion Crop Insurance Provisions for the 2017 and succeeding crop years in counties with a contract change date of November 30, and for the 2018 and succeeding crop years in counties with a contract change date of June 30, are as follows:

* * * * *

15. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your final stage production guarantee for timely planted acreage. Additional prevented planting coverage levels are not available for onions.

■ 13. Amend § 457.136 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.136 Tobacco crop insurance provisions.

The Tobacco Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. Additional prevented planting coverage levels are not available for tobacco.

■ 14. Amend § 457.137 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.137 Green pea crop insurance provisions.

The Green Pea Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 15. Amend § 457.140 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.140 Dry pea crop insurance provisions.

The Dry Pea Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

* * * * *

■ 16. Amend § 457.141 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 13.

The revisions read as follows:

§ 457.141 Rice crop insurance provisions.

The Rice Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

13. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 17. Amend § 457.142 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 12.

The revisions read as follows:

§ 457.142 Northern potato crop insurance provisions.

The Northern Potato Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 18. Amend § 457.147 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 13.

The revisions read as follows:

§ 457.147 Central and Southern potato crop insurance provisions.

The Central and Southern Potato Crop Insurance Provisions for the 2017 and succeeding crop years in counties with a contract change date of November 30, and for the 2018 and succeeding crop years in counties with a contract change date of June 30 and September 30, are as follows:

* * * * *

13. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 19. Amend § 457.150 as follows:
■ a. Revise the first sentence of the introductory text;
■ b. Amend section 4 to remove the phrase ''(December 17 for the 1998 crop year only)''; and
■ c. Revise section 14.

The revisions read as follows:

§ 457.150 Dry bean crop insurance provisions.

The Dry Bean Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 20. Amend § 457.152 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 13.

The revisions read as follows:

§ 457.152 Hybrid seed corn crop insurance provisions.

The Hybrid Seed Corn Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

13. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your amount of insurance for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 21. Amend § 457.154 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.154 Processing sweet corn crop insurance provisions.

The Processing Sweet Corn Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 22. Amend § 457.155 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.155 Processing bean crop insurance provisions.

The Processing Bean Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting

coverage if such additional coverage is specified in the actuarial documents.

■ 23. Amend § 457.161 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 14.

The revisions read as follows:

§ 457.161 Canola and rapeseed crop insurance provisions.

The Canola and Rapeseed Crop Insurance Provisions for the 2017 and succeeding crop years in counties with a contract change date of November 30, and for the 2018 and succeeding crop years in counties with a contract change date of June 30, are as follows:

* * * * *

14. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 24. Amend § 457.165 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 12.

The revisions read as follows:

§ 457.165 Millet crop insurance provisions.

The Millet Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

12. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

■ 25. Amend § 457.168 as follows:
■ a. Revise the first sentence of the introductory text; and
■ b. Revise section 15.

The revisions read as follows:

§ 457.168 Mustard crop insurance provisions.

The Mustard Crop Insurance Provisions for the 2017 and succeeding crop years are as follows:

* * * * *

15. Prevented Planting

Your prevented planting coverage will be a percentage specified in the actuarial documents of your production guarantee for timely planted acreage. When a portion of the insurable acreage within the unit is prevented from being planted, and there is more than one base contract price applicable to acreage in the unit, the lowest base contract price will be used in calculating any prevented planting payment. If you have additional levels of coverage and pay an additional premium, you may increase your prevented planting coverage if such additional coverage is specified in the actuarial documents.

Dated: November 10, 2016.

Brandon Willis,

Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410–08–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 989 and 999

[Doc. No. AMS–SC–16–0065; SC16–989–2 FR]

Raisins Produced From Grapes Grown in California and Imported Raisins; Removal of Language

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule removes language from the California raisin marketing order's minimum grade standards and the import regulations' grade and size requirements. The marketing order regulates the handling of raisins produced from grapes grown in California, and is administered locally by the Raisin Administrative Committee (committee). The change to the import regulations is required under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended. Recently, the U.S. Standards for Grades of Processed Raisins (standards) were amended to remove the word ''midget.'' This rule makes the marketing order and the import regulations consistent with the amended standards.

DATES: Effective November 25, 2016.

FOR FURTHER INFORMATION CONTACT: Maria Stobbe, Marketing Specialist, or Jeffrey Smutny, Regional Director, California Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (559) 487–5901, Fax: (559) 487–5906, or Email: *Maria.Stobbe@ams.usda.gov* or *Jeffrey.Smutny@ams.usda.gov.*

Small businesses may request information on complying with this regulation by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: *Richard.Lower@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 989, both as amended (7 CFR part 989), regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the ''order.'' The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.''

This rule is also issued under section 8e of the Act, which provides that whenever certain specified commodities, including raisins, are regulated under a Federal marketing order, imports of these commodities into the United States are prohibited unless they meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically-produced commodities.

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Orders 12866, 13563, and 13175.

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of import regulations issued under section 8e of the Act.

This rule removes the term ''midget'' from § 989.702(a) of the order and

§ 999.300(b)(1) of the import regulations. This will make the order and the import regulations consistent with the recent changes to the standards.

The committee unanimously recommended that the term ''midget'' be removed from the order at a meeting on June 26, 2014. At a subsequent meeting on August 14, 2014, the committee also unanimously recommended that the word ''midget'' be removed from the standards. As required under the Act, the import regulations must be consistent with the changes to the order. In this instance, the order must also be consistent with changes to the standards.

Paragraph (a) of section 989.702 of the order specifies minimum grade standards for packed Natural (sun-dried) Seedless (NS) raisins, requiring that ''small (midget)'' sizes of raisins shall meet U.S. Grade C tolerances with respect to pieces of stem, and underdeveloped and substandard raisins. The word ''midget'' is redundant with the term ''small,'' and its removal is insignificant.

Pursuant to the recommendation of the committee and consistent with the recent amendment of the standards, the word ''midget'' is removed from the order language.

The committee's recommendations to delete the word ''midget'' from the order and the standards necessitates a corresponding change to the import requirements.

Under the raisin import regulations, in paragraph (b)(1) of section 999.300, raisins imported into the United States are required to meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically-produced commodities, when such commodities are regulated under an order. With the removal of the word ''midget'' from both the standards and the order, removal of ''midget'' is required under the import regulations.

Removal of the word ''midget'' should not impact the application of the order or the import regulations, since the word ''midget'' is redundant and appears in parentheses after the word ''small.'' Thus, removing the word ''midget'' has no effect on interpretation of the order or the import regulations; and, therefore, has no effect on raisin importers.

The final rule removing the word ''midget'' from the standards was published in the **Federal Register** on June 23, 2016 (81 FR 40779). Thus, this rule will make the order and the import regulations consistent with the standards, as recently revised.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 3,000 producers of California raisins and approximately 24 handlers subject to regulation under the marketing order. There are approximately 52 importers of raisins as well.

The Small Business Administration defines small agricultural producers as those having annual receipts less than $750,000, and defines small agricultural service firms, such as handlers and importers, as those whose annual receipts are less than $7,500,000. (13 CFR 121.201.)

There are approximately 3,000 California raisin producers and 24 handlers subject to regulation under the marketing order. The Small Business Administration defines small agricultural producers as those having annual receipts less than $750,000, and defines small agricultural service firms, such as handlers and importers, as those whose annual receipts are less than $7,500,000 (13 CFR 121.201).

Based on shipment data and other information provided by the committee, most producers and approximately 13 handlers of California raisins may be classified as small entities. This action should not have any impact on handlers' or growers' benefits or costs.

There is very limited information on the 52 importers. This action should not have any impact on importers' costs.

This rule removes the word ''midget'' from the order regulations in section 989.702(a) and from the import regulations in section 999.300(b)(1), bringing the order and the import regulations into conformance with the recent amendment to the standards.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the order's information collection requirements have been previously approved by the Office of Management and Budget (OMB) and assigned OMB No. 0581–0178, ''Vegetable and Specialty Crops.'' No changes in those requirements as a result of this action are necessary. Should any changes become necessary, they would be submitted to OMB for approval.

This rule will not impose any additional reporting or recordkeeping requirements on either large or small raisin handlers or on raisin importers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap or conflict with this final rule.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Further, the committee's meetings were widely publicized throughout the California raisin industry and all interested persons were invited to attend the meetings and encouraged to participate in committee deliberations on all issues. Like all committee meetings, the June 26, 2014, and August 14, 2014, meetings were public meetings and all entities, both large and small, were encouraged to express their views on this issue.

A proposed rule was published in the **Federal Register** on September 16, 2016 (81 FR 63723). Copies of the rule were provided to California raisin handlers and committee members. Finally, the rule was made available through the Internet by USDA and the Office of the Federal Register. A 30-day comment period ending October 17, 2016, was provided for interested persons to respond to the proposal. One supportive comment was received. Accordingly, no changes are being made to the rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/rules-regulations/moa/small-businesses.* Any questions about the compliance guide should be sent to Richard Lower at the previously-mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

In accordance with section 8e of the Act, the United States Trade Representative has concurred with this action.

After consideration of all relevant material presented, including the information and recommendation submitted by the committee and other

available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because removal of the word ''midget'' should not impact the application of the order or the import regulations, since the word ''midget'' is redundant and appears in parentheses after the word ''small.'' Thus, removing the word ''midget'' has no effect on interpretation of the order or the import regulations; and, therefore, has no effect on handlers or raisin importers. Further, handlers are aware of this rule, which was recommended at two public meetings. Also, a 30-day comment period was provided for in the proposed rule.

List of Subjects

7 CFR Part 989

Grapes, Marketing agreements, Raisins, Reporting and recordkeeping requirements.

7 CFR Part 999

Dates, Filberts, Food grades and standards, Imports, Nuts, Prunes, Raisins, Reporting and recordkeeping requirements, Walnuts.

For the reasons set forth in the preamble, 7 CFR parts 989 and 999 are amended as follows:

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

[Docket No. USCBP–2013–0029; CBP Decision No. 16–20]

RIN 1651–AB01

The U.S. Asia-Pacific Economic Cooperation Business Travel Card Program

AGENCY: U.S. Customs and Border Protection; Department of Homeland Security.

ACTION: Final rule.

SUMMARY: This rule adopts as final, with two changes, interim amendments to the Department of Homeland Security's (DHS) regulations published in the **Federal Register** on May 13, 2014 establishing the U.S. Asia-Pacific Economic Cooperation (APEC) Business Travel Card Program. The U.S. APEC Business Travel Card Program provides qualified U.S. business travelers engaged in business in the APEC region, or U.S. Government officials actively engaged in APEC business, the ability to access fast-track immigration lanes at participating airports in foreign APEC economies.

DATES: This rule is effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Garret Conover, Office of Field Operations, (202) 325–4062, *Garret.A.Conover@cbp.dhs.gov.*

I. Background

A. The Asia-Pacific Economic Cooperation Business Travel Card Program

The United States is a member of APEC, which is an economic forum comprised of twenty-one members whose primary goal is to support sustainable economic growth and prosperity in the Asia-Pacific region.[1] One of APEC's business facilitation initiatives is the APEC Business Travel Card (ABTC) Program. The operating procedures for the ABTC Program are set out in the APEC Business Travel Card Operating Framework (APEC Framework).[2] Under the ABTC Program, APEC members can issue cards to business travelers and senior government officials who meet certain criteria. The cards provide simpler, short-term entry procedures within the APEC region.

B. U.S. Participation in ABTC

On November 12, 2011, President Obama signed the Asia-Pacific Economic Cooperation Business Travel Cards Act of 2011 (APEC Act). Public Law 112–54, 125 Stat. 550. The APEC Act authorizes the Secretary of Homeland Security, in coordination with the Secretary of State, to issue ABTCs through September 30, 2018 to any eligible person, including business persons and U.S. Government officials actively engaged in APEC business. On May 13, 2014, U.S. Customs and Border Protection (CBP) published an interim final rule (IFR) in the **Federal Register** (79 FR 27161) amending the DHS regulations to establish the U.S. ABTC Program and an application fee. *See* 8 CFR 235.13 and 8 CFR 103.7.

The IFR became effective on June 12, 2014 and on that date CBP began issuing its own ABTCs (U.S. ABTCs) to qualified U.S. citizens. As provided in the IFR, the U.S. ABTC Program is a voluntary program designed to facilitate travel for bona fide U.S. business persons engaged in business in the APEC region and U.S. government officials actively engaged in APEC business within the APEC region. To participate in the program, an individual must be an existing member, in good standing, of an eligible CBP trusted traveler program or be approved for membership in an eligible CBP trusted traveler program during the U.S. ABTC application process.[3] The application process requires the applicant to self-certify that he or she is a bona fide business person who is engaged in the trade of goods, the provision of services or the conduct of investment activities, or is a U.S. Government official actively engaged in

[1] APEC members are also referred to as 'economies' since the APEC process is primarily concerned with trade and economic issues with the members engaging each other as economic entities. The most recently updated list of members is available at the APEC Web site at *www.apec.org/About-Us/About-APEC/Member-Economies.aspx.* For simplicity, CBP will generally refer to them in the preamble of this document as APEC members.

[2] Although participating members intend to follow the operating principles and procedures outlined, the document is not legally binding. The most recent version of the APEC Framework is Version 19, dated July 7, 2015.

[3] For purposes of the U.S. ABTC Program, eligible CBP trusted traveler programs include Global Entry, NEXUS, and SENTRI.

APEC business. The applicant must also provide a signature, which appears on the face of the U.S. ABTC. CBP collects the applicant's signature at a CBP trusted traveler enrollment center.

Successful applicants receive a U.S. ABTC that enables them to access fast-track immigration lanes at participating airports in foreign APEC member economies. In order to obtain a U.S. ABTC, an individual must meet the eligibility requirements, apply in advance, pay the requisite fee and be approved as a card holder. Details about the program eligibility criteria, the application process, the fee, the benefits, and other aspects of the program, are set forth in the preamble of the IFR, 8 CFR 235.13, and 8 CFR 103.7.

II. Discussion of Comments

A. Overview

Although the interim regulatory amendments were promulgated without prior public notice and comment procedures pursuant to the foreign affairs exemption in 5 U.S.C. 553(a)(1), the IFR provided for the submission of public comments that would be considered before adopting the interim regulations as a final rule. The prescribed 30-day public comment period closed on June 12, 2014. During this time, CBP received submissions from five commenters. All five commenters were strongly in support of the U.S. ABTC Program and expressed appreciation for the introduction of the program. Nonetheless, the commenters presented ideas for how to improve the program, and one commenter noted that our calculation of a benefit accrued through the U.S. ABTC was inaccurate. CBP has grouped the issues by topic and provides responses below.

B. Discussion

1. Overseas Interviews and Signature Collection

Comment: All five of the commenters noted that many of the U.S. ABTC applicants will be U.S. business people living and working abroad, who make limited trips to the United States. The commenters asserted that requiring applicants to be physically present in the United States to obtain a U.S. ABTC will reduce the number of applicants and will limit the accessibility of the program. To address these concerns, four of the commenters recommended that CBP conduct enrollment interviews for the CBP trusted traveler programs overseas, and all five of the commenters asked that CBP provide a way for U.S. ABTC signatures to be collected abroad. The commenters suggested several different methods for CBP to conduct enrollment interviews and/or collect signatures overseas, either on a regular basis or intermittently. Their suggestions include having CBP use U.S. embassies or consulates in the Asia-Pacific region, having CBP open a regional office in Asia, or having CBP schedule appointments for interviews and/or signature collections around major U.S. regional business events, such as the annual meeting of the Asia Pacific Council of American Chambers of Commerce. The commenters remarked that conducting enrollment interviews and signature collections overseas would increase the number of applicants for U.S. ABTCs and would allow individuals to obtain a U.S. ABTC more quickly because individuals will not have to wait until they are traveling to the United States to do their interview and provide their signature.

Response: CBP appreciates the commenters' suggestions for alternative arrangements for CBP trusted traveler interviews and ABTC signature collections, but is unable to implement any of them at this time. The personal interview and signature collection process is an integral part of the CBP trusted traveler and U.S. ABTC application processes and these are done at CBP trusted traveler enrollment centers located throughout the United States. CBP does not have the facilities or resources to regularly conduct interviews and collect signatures outside CBP trusted traveler enrollment centers. Furthermore, in order to maintain the integrity of the CBP trusted traveler and ABTC programs, only CBP officers are authorized to conduct interviews, obtain signatures, and approve applications in the Global On-Line Enrollment System (GOES). These functions cannot be delegated to the Department of State or any other entity.

While CBP recognizes that some applicants may find it inconvenient to travel to the continental United States for their CBP trusted traveler program interview and U.S. ABTC signature collection, CBP would like to highlight that there are trusted traveler enrollment centers located in Hawaii and Guam. Furthermore, CBP is encouraged by the fact that there has been a steady stream of applicants thus far, indicating that many people have been able to obtain U.S. ABTCs through the current system. As of December 2015, nearly 21,000 applications have been submitted for the U.S. ABTC Program.[4]

[4] Source: Email correspondence with CBP's Office of Field Operations on February 10, 2016.

2. Appointment Scheduling for Signature Collection

Comment: Two commenters asked CBP to definitively state that an applicant does not need to schedule an appointment for signature collection if the applicant is already a member of a CBP trusted traveler program. Both commenters noted that the FAQs explicitly state that no appointment is necessary while some of the preamble language in the IFR suggests otherwise.

Response: Applicants for the U.S. ABTC Program who are already members of a CBP trusted traveler program do not need to schedule an appointment for signature collection. Applicants should be aware, however, that if they arrive at an enrollment center without an appointment, they may have to wait a considerable length of time before a CBP officer is able to process their signature. By scheduling an appointment, applicants can prevent long wait-times and allow for better time management by CBP officers at enrollment centers. As such, although appointments are not necessary, they are encouraged.

3. Benefits of the U.S. ABTC Program

Comment: One commenter indicated that the average amount of time a U.S. ABTC holder saves on account of the expedited entry procedures associated with the U.S. ABTC Program is greater than anticipated in the IFR. The commenter noted that the actual benefit to a U.S. ABTC holder is greater than the average calculated time savings of 43 minutes per trip because travelers can save a significant amount of time by arriving at the airport later and by catching flights that they would have otherwise missed if not for the U.S. ABTC Program's fast-track immigration clearance.

Response: CBP believes the weighted average time savings of approximately 43 minutes is an appropriate estimate of the time savings a U.S. ABTC holder will receive when clearing foreign immigration services using the fast-track immigration lanes. To the extent that this estimate understates the time saved by U.S. ABTC holders, the benefits of the rule will be higher. Similarly, to the extent that U.S. ABTC holders are able to catch flights they would have otherwise missed due to lengthy immigration waits, the benefits of this rule will be higher.

4. Self-Certification

Comment: One commenter asked that CBP ease the ''manner for determining business travel eligibility'' by allowing applicants to self-certify their status as a business traveler.

Response: The U.S. ABTC Program already allows for such self-certification. When applying for the U.S. ABTC, an applicant must complete and submit an application electronically through the GOES Web site. During the application process, the applicant is prompted to self-certify that he or she is a bona fide business person who is engaged in the trade of goods, the provision of services or the conduct of investment activities, or is a U.S. Government official actively engaged in APEC business, and that he or she is not a professional athlete, news correspondent, entertainer, musician, artist, or person engaged in a similar occupation. *See* 8 CFR 235.13(c)(2).

III. Conclusion—Regulatory Amendments

After careful consideration of the comments received, CBP is adopting the interim regulations published May 13, 2014 as a final rule with the following two changes. First, CBP is changing the validity period of U.S. ABTCs from three years to five years based on revisions in the APEC Framework. Second, CBP is removing all references in the U.S. ABTC regulation to suspension from the program because CBP does not use suspension as a remedial action. Further details about these changes are discussed below. DHS believes that this rule is excluded from APA rulemaking requirements as a foreign affairs function of the United States pursuant to 5 U.S.C. 553(a)(1) because it advances the President's foreign policy goal of facilitating business travel within the APEC region and allows the United States to fulfill its intent under the multilateral APEC Framework. Accordingly, these changes are exempt from notice and comment rulemaking generally required under 5 U.S.C. 553.

A. Change in Validity Period

The IFR provided that the U.S. ABTC is valid for three years or until the expiration date of the card holder's passport if that is earlier, provided participation is not terminated by CBP prior to the end of this period. *See* 8 CFR 235.13(c)(6). However, the IFR noted that any subsequent revisions to the APEC Framework that directly affect the U.S. ABTC may require regulatory changes.[5]

The most recent version of the APEC Framework (Version 19) extended the validity period of ABTCs to ''a maximum period of five years''. (APEC Framework 3.8.1). The Business Mobility Group (BMG), an APEC working group comprised of representatives from all member economies, is responsible for updating the APEC Framework. The BMG has indicated that the ABTC Program is on a trajectory towards requiring a five-year validity period for all ABTCs. Given the time constraints of some participating members' domestic procedures, however, the BMG acknowledges that it may take a significant amount of time for some members to be able to comply with this expectation. Accordingly, provision 3.8.1 of the APEC Framework allows for some variability in validity periods while member economies work towards reaching the goal of extending the validity period of new ABTCs to five years.

In keeping with the United States' intent to follow APEC's operating principles and procedures, CBP is changing the validity period for U.S. ABTCs to five years. Accordingly, CBP is revising 8 CFR 235.13(c)(6) by replacing ''3 years'' with ''five years''. Individuals who submit a U.S. ABTC application or renewal request on or after December 23, 2016 will be eligible to receive a U.S. ABTC with a five-year validity period.[6] This change in validity period does not apply to current U.S. ABTC holders, whose cards will remain valid only until the date printed on their card, subject to earlier revocation by CBP.

CBP notes that this change in validity period will be beneficial to many new U.S. ABTC holders, as they will be able to avail themselves of the program for two additional years. The extension in validity period will also be beneficial to many U.S. ABTC holders in the event that Congress extends the APEC Act.[7] Should the U.S. ABTC Program be extended, individuals who apply concurrently for the U.S. ABTC and a CBP trusted traveler program will be able to take advantage of a more streamlined renewal process. Currently, Global Entry, NEXUS, and SENTRI memberships are all valid for a period of five years, whereas the U.S. ABTC Program membership is only valid for three years. Accordingly, individuals who apply for both programs concurrently must renew their U.S. ABTCs after three years, then renew their CBP trusted traveler program membership two years later. By extending the validity period of the U.S. ABTC to five years, these individuals will be able to initiate the renewal process for both programs at the same time.

B. Removal of References to Suspension From the Program

Although 8 CFR 235.13(f) addresses situations in which an applicant may be suspended or removed from the program, CBP no longer uses suspension as a remedial action. In the event that CBP action is necessary under 8 CFR 235.13, CBP removes the U.S. ABTC holder from the program. Accordingly, CBP is removing all references to ''suspension'' and ''suspended'' from § 235.13(f) and from § 235.13 (c), (g), and (h), which also refer to ''suspension'' and ''suspended''. This change is also in line with the APEC Framework, which provides for cancellation but not suspension of ABTCs.

IV. Statutory and Regulatory Requirements

A. Executive Order 13563 and Executive Order 12866

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule is not a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget has not reviewed this rule. CBP has prepared the following analysis to help inform stakeholders of the potential impacts of this final rule.

1. Synopsis

This rule adopts as final the interim final rule establishing the U.S. ABTC Program with the following changes: It expands the validity period for new U.S. ABTCs and it removes all references to

[5] Footnote 11 of the IFR states, ''The current version of the APEC Framework is Version 17, agreed to on January 30, 2013. Any subsequent revisions to the APEC Framework that directly affect the U.S. ABTC may require a regulatory change''.

[6] If the card holder's passport will expire before the end of the validity period, CBP will issue the U.S. ABTC with a shorter validity period that matches the passport expiration date. *See* 8 CFR 235.13(c)(6).

[7] The APEC Act authorizes the Secretary to issue U.S. ABTCs only through September 30, 2018. Unless the law is amended to extend that date, CBP will not issue any new U.S. ABTCs or renew any U.S. ABTCs after September 30, 2018. U.S. ABTC holders will retain their membership in the U.S. ABTC Program for the full validity period (even if the validity period extends past September 30, 2018) unless membership is revoked earlier.

suspension from the program.[8] CBP largely adopts the economic analysis for the U.S. ABTC Program's IFR for this final rule. However, this final rule analysis incorporates recent changes to the IFR's U.S. ABTC validity period, applicant projections, application and renewal burdens, and program impacts.

Pursuant to the authorizing statute, the Secretary of Homeland Security is authorized to set a U.S. ABTC Program fee. CBP has determined that a $70 fee is necessary to recover its costs of administering the U.S. ABTC Program.[9] As shown in Table 1, initial U.S. ABTC applicants incur the $70 U.S. ABTC fee and an opportunity cost associated with obtaining a U.S. ABTC. Because participation in a CBP trusted traveler program is a prerequisite for obtaining a U.S. ABTC, individuals who are not already members of such a program need to concurrently apply for a U.S. ABTC and a CBP trusted traveler program, and pay the programs' applicable fees. CBP assumes that individuals not already in a CBP trusted traveler program will choose to join Global Entry because it, like the U.S. ABTC Program, provides expedited clearance in the air environment. The application fee for Global Entry is currently $100.[10] CBP estimates the opportunity cost to initially obtain a U.S. ABTC for those who are already members of a CBP trusted traveler program to be $73.69. CBP estimates the opportunity cost to initially obtain a U.S. ABTC for individuals who are not members of a CBP trusted traveler program to be $105.27. Accounting for application fees and opportunity costs, the total cost of initially obtaining a U.S. ABTC ranges from almost $144 for U.S. ABTC applicants who are already in a CBP trusted traveler program to $275 for U.S. ABTC applicants who are not already in a CBP trusted traveler program, as shown in Table 1. Table 1 also shows that the costs to renew U.S. ABTCs are much lower than these initial application costs. CBP will provide additional details about these estimates later in the analysis.

The U.S. ABTC Program is a voluntary program that enables card holders to access fast-track immigration lanes at participating airports in the 20 other APEC member economies.[11] CBP estimates that U.S. ABTC holders will experience a time savings of approximately 43 minutes when clearing foreign immigration services using the fast-track immigration lanes.[12] As the U.S. ABTC Program is voluntary, the perceived benefits of reduced wait time have to equal or exceed the cost of the program over five years (the new validity period of the U.S. ABTC) for new potential enrollees to determine whether the program is worthwhile. As discussed later in further detail, CBP estimates that a U.S. ABTC applicant who is already enrolled in a CBP trusted traveler program will need to take a minimum of four trips across the U.S. ABTC's five-year validity period for the benefits of the U.S. ABTC Program to exceed the costs associated with joining the program. Additionally, CBP estimates that a U.S. ABTC applicant who is not already a CBP trusted traveler member will need to take a minimum of six trips between the United States and an APEC economy over the five-year validity period for the benefits of the U.S. ABTC Program to exceed the costs associated with joining the program. Current U.S. ABTC holders will need to take even fewer trips per year for the benefits of renewing their program memberships to outweigh the costs.

TABLE 1—TOTAL COST BY APPLICANT TYPE

Applicant type	Cost category	Initial costs	Renewal costs
U.S. ABTC Applicants Already in a CBP Trusted Traveler Program.	U.S. ABTC Fee	$70	$70
	Global Entry Fee*	n/a	n/a
	U.S. ABTC Opportunity Cost†	$73.69 (1.17 hrs)	$10.53 (0.17 hrs)
Total (rounded to nearest $1)		$144	$81
U.S. ABTC Applicants *Not* Already in a CBP Trusted Traveler Program.	U.S. ABTC Fee	$70	$70
	Global Entry Fee*	$100	$100
	U.S. ABTC and Global Entry Opportunity Cost†	$105.27 (1.67 hrs)	$10.53 (0.17 hrs)
	Total (rounded to nearest $1)	$275	$181

*CBP anticipates that those U.S. ABTC applicants who must choose a CBP trusted traveler program when applying for the U.S. ABTC will choose to join Global Entry because, like the U.S. ABTC Program, Global Entry provides expedited clearance in the air environment.

†This value is based on the U.S. Department of Transportation's (DOT) guidance regarding the valuation of travel time for business travelers in 2013 U.S. dollars, adjusted to 2017 U.S. dollars using the DOT's recommended annual growth rate of one percent. Source: U.S. Department of Transportation, Office of Transportation Policy. *The Value of Travel Time Savings: Departmental Guidance for Conducting Economic Evaluations Revision 2 (2015 Update).* ''Table 4 (Revision 2-corrected): Recommended Hourly Values of Travel Time Savings.'' 2015. Available at *http://www.transportation.gov/sites/dot.gov/files/docs/Revised%20Departmental%20Guidance%20on%20Valuation%20of%20Travel%20Time%20in%20Economic%20Analysis.pdf.* Accessed February 16, 2016.

Note: There are two categories of U.S. ABTC applicants: Those who are already in a CBP trusted traveler program and those who are not. CBP does not consider the cost of joining a CBP trusted traveler program for those applicants who are already members of a CBP trusted traveler program. These applicants have already, independent of any decision to join the U.S. ABTC Program, determined that the benefits of a CBP trusted traveler program outweigh the costs associated with the program they have chosen to join.

2. Background

The U.S. ABTC Program is a voluntary program that allows U.S. citizens with U.S. ABTCs to access fast-track immigration lanes at participating airports in the 20 other APEC member economies. In order to be eligible for a U.S. ABTC, a U.S. citizen is required to be a bona fide business person engaged in business in the APEC region or a U.S. Government official actively engaged in APEC business. Additionally, the U.S. ABTC applicant must be a member in good standing of a CBP trusted traveler

[8] 79 FR 27167, May 13, 2014.

[9] CBP performed a fee study to determine the yearly costs of the program and the cost to establish the program for all relevant parties. This fee study, entitled ''Asia-Pacific Economic Cooperation Business Travel Card Fee Study,'' is posted on the docket as supplemental materials on *www.regulations.gov.*

[10] 8 CFR 103.7.

[11] Asia-Pacific Economic Cooperation, ''Member Economies.'' Available at *http://www.apec.org/About-Us/About-APEC/Member-Economies.aspx.* Accessed July 8, 2015.

[12] Based on data from Asia-Pacific Economic Cooperation. ''Reducing Business Travel Costs: The Success of APEC's Business Mobility Initiatives.'' November 2011. Available at *http://publications.apec.org/publication-detail.php?pub_id=1214.* Accessed May 23, 2012.

program or approved for membership in a CBP trusted traveler program during the U.S. ABTC application process. U.S. ABTC applicants who are not already CBP trusted traveler program members must also apply for membership to a CBP trusted traveler program with their U.S. ABTC application.[13] Since the publication of the U.S. ABTC IFR, APEC members (including the United States) endorsed increasing the validity period of the ABTC to ''a maximum period of five years.'' However, APEC's BMG has indicated that the ABTC Program is on a trajectory towards requiring a five-year validity period for all ABTCs. In keeping with the United States' intent to follow APEC's operating principles and procedures, CBP is changing the validity period for U.S. ABTCs from three years to five years (or until the expiration date of the card holder's passport if that is earlier) through this rule. With this expansion, the U.S. ABTC's validity period will now match that of CBP's trusted traveler programs.

Individuals who submit a U.S. ABTC application or renewal request on or after this final rule's effective date may be eligible to receive a U.S. ABTC with a five-year validity period. If the card holder's passport will expire before the end of the five-year validity period, CBP will issue the U.S. ABTC with a shorter validity period that matches the passport expiration date. If the card holder's CBP trusted traveler program membership expires during their U.S. ABTC's validity period, CBP may revoke the U.S. ABTC since membership in a CBP trusted traveler program is necessary for the entire duration of the U.S. ABTC. This change in validity period does not apply to current U.S. ABTC holders, whose cards will remain valid only until the date printed on their card, subject to earlier revocation by CBP. Similar to CBP trusted traveler programs, a U.S. ABTC holder will be required to renew his or her membership prior to expiration to continue enjoying the benefits of the program.

3. U.S. ABTC Applicant Categories

There are two categories of initial U.S. ABTC applicants (*i.e.,* individuals who are not renewing their U.S. ABTC membership) that CBP discusses separately in this analysis: Those who are already part of a CBP trusted traveler program and those who are not. This distinction is necessary because those applicants who are not already part of a CBP trusted traveler program will bear an additional opportunity cost and fee associated with applying for a CBP trusted traveler program to be eligible for a U.S. ABTC.

a. U.S. ABTC Applicants Who Are Already Members of a CBP Trusted Traveler Program

If an initial U.S. ABTC applicant is already a member of a CBP trusted traveler program, the applicant will have to apply for a U.S. ABTC by self-certifying, via the GOES Web site, that: He or she is an existing member in good standing in a CBP trusted traveler program; he or she is either a bona fide U.S. business person engaged in business in the APEC region or a U.S. Government official actively engaged in APEC business; and he or she is not a professional athlete, news correspondent, entertainer, musician, artist, or person engaged in a similar occupation. In addition to the self-certification, the U.S. ABTC applicant will also be required to pay the U.S. ABTC fee via the GOES Web site and visit a CBP trusted traveler enrollment center in order for his or her signature to be digitally captured for the U.S. ABTC. CBP estimates that U.S. ABTC applicants will experience an opportunity cost of 10 minutes to complete the U.S. ABTC self-certification, pay the U.S. ABTC fee, and have their signature digitally captured at an enrollment center.[14] These applicants will also experience a one-hour opportunity cost to travel to and from an enrollment center and wait to have their signature digitally captured. For the purposes of this rule, CBP does not consider the costs or benefits of joining a CBP trusted traveler program as impacts of this rule for those U.S. ABTC Program applicants who are already members of a CBP trusted traveler program. These applicants have previously, independent of any decision to join the U.S. ABTC Program, determined that the benefits of a CBP trusted traveler program outweigh the costs associated with the program they have chosen to join. They have not chosen to join the U.S. ABTC Program as a direct result of this rule.

b. U.S. ABTC Applicants Who Are Not Already Members of a CBP Trusted Traveler Program

An initial U.S. ABTC applicant who is not already a member of a CBP trusted traveler program will be required to apply for a U.S. ABTC and a CBP trusted traveler program, and self-certify that: He or she has submitted an application to a CBP trusted traveler program; he or she is either a bona fide U.S. business person engaged in business in the APEC region or a U.S. Government official actively engaged in APEC business; and he or she is not a professional athlete, news correspondent, entertainer, musician, artist, or person engaged in a similar occupation. Because these applicants would not have joined a CBP trusted traveler program if not for the U.S. ABTC Program, CBP includes the costs and benefits for these applicants to join these programs in this analysis.

CBP anticipates that those initial U.S. ABTC applicants who must choose a CBP trusted traveler program when applying for the U.S. ABTC Program will choose to join Global Entry because, like the U.S. ABTC Program, Global Entry provides expedited clearance in the air environment. As described in the Global Entry final rule, CBP estimates that a Global Entry applicant will experience an opportunity cost of 40 minutes to complete the Global Entry application in GOES.[15] When concurrently applying for a U.S. ABTC and Global Entry, CBP anticipates that the U.S. ABTC applicant will be able to complete the Global Entry application, complete the U.S. ABTC self-certification, schedule their required Global Entry enrollment interview, pay the program application fees, and have their signature digitally captured for the U.S. ABTC Program in the 40 minutes estimated for the Global Entry application.[16] Based on the Global Entry final rule, CBP estimates that Global Entry applicants also applying for a U.S. ABTC will experience an opportunity cost of one hour to travel to and from a CBP trusted traveler enrollment center and undergo the required Global Entry interview.[17]

4. Number of U.S. ABTC Applicants

In the U.S. ABTC IFR, CBP projected that 12,750 U.S. citizens would enroll in the U.S. ABTC Program within the first three years of the program's start date based on National Center for Asia-

[13] As stated in the U.S. ABTC IFR, CBP assumes that a U.S. ABTC applicant who is not already a member of a CBP trusted traveler program will concurrently apply for a CBP trusted traveler program and a U.S. ABTC.

[14] 80 FR 1650, January 13, 2015.

[15] 77 FR 5681, February 6, 2012.

[16] As described above, the self-certification only entails certifying in GOES that the U.S. ABTC applicant is an existing member in good standing in a CBP trusted traveler program or that he or she has submitted an application to a CBP trusted traveler program; that he or she is either a bona fide U.S. business person engaged in business in the APEC region or a U.S. Government official actively engaged in APEC business; and that he or she is not a professional athlete, news correspondent, entertainer, musician, artist, or person engaged in a similar occupation.

[17] 77 FR 5681, February 6, 2012.

Pacific Economic Cooperation [18] estimates.[19] Between the U.S. ABTC IFR's effective date in FY 2014 and December 2015, CBP has received nearly 21,000 initial U.S. ABTC Program applications, exceeding the IFR's projections.[20] Based on worldwide ABTC growth, CBP expects to receive new, initial U.S. ABTC applications past the first three years of the U.S. ABTC's implementation, which contrasts to the U.S. ABTC IFR's assumption that initial applicants would occur in only a three-year period.[21] To project U.S. ABTC application volumes following this final rule's implementation, CBP first uses the latest data available to determine a base value for future applications. During the first three months of FY 2016 (October 2015 to December 2015), CBP received 1,163 U.S. ABTC applications that corresponded to current CBP trusted traveler program members and 2,423 that did not.[22] CBP then extrapolates this partial-year data to the full 2016 fiscal year by multiplying the three-month totals of historical FY 2016 application data according to the applicant type (1,163 for applicants already in a CBP trusted traveler program and 2,423 for applicants not already in a CBP trusted traveler program) and multiplying each of the totals by 4 to account for 12 months, or a full year, of application volumes. Through this estimation method, CBP finds that 4,652 of the projected new, initial U.S. ABTC Program applications in FY 2016, the base year, will correspond to individuals who are already CBP trusted traveler program members, while 9,692 new, initial U.S. ABTC applications will correspond to individuals who are not already CBP trusted traveler program members (*see* Table 2).[23] CBP chose to use extrapolated FY 2016 data rather than the FY 2015 statistics as a base for future U.S. ABTC demand because the partial-year FY 2016 data indicated an increase in the second year of total U.S. ABTC applications, which is consistent with CBP expectations of program growth in this time period.

Given the newness of the U.S. ABTC Program and its subsequently limited historical data available to establish a specific longer term growth rate in U.S. ABTC applications, CBP assumes that the total number of U.S. ABTC applications projected for FY 2016 will remain the same for FY 2017 and FY 2018. Accordingly, CBP estimates that 4,652 new, initial U.S. ABTC Program applications each year from individuals who are already CBP trusted traveler program members and 9,692 new, initial U.S. ABTC applications from individuals who are not already CBP trusted traveler program members (*see* Table 2). In accordance with the U.S. ABTC's authorizing law, CBP does not plan to issue any new U.S. ABTCs or renew any U.S. ABTCs after September 30, 2018, the end of FY 2018. Unless the law is amended to extend the duration of U.S. ABTC issuance, all U.S. ABTCs will expire within a five-year validity period lasting up to September 29, 2023. Therefore, CBP does not forecast any new applications beyond FY 2018 and assumes that no new U.S. ABTCs will be issued thereafter for the purposes of this analysis. Table 2 presents the historical and projected initial applications for the U.S. ABTC Program. As Table 2 shows, CBP estimates that almost 61,000 U.S. citizens will initially apply for the U.S. ABTC Program during the period of analysis spanning from FY 2014 through FY 2018, with 21,000 applicants already possessing a CBP trusted traveler program membership and 40,000 applicants not already CBP trusted traveler program members. CBP assumes that each application signifies a single, unique applicant.

TABLE 2—HISTORICAL AND PROJECTED NUMBERS OF U.S. ABTC APPLICANTS ALREADY AND NOT ALREADY IN A CBP TRUSTED TRAVELER PROGRAM [24]

Fiscal year	Number of initial U.S. ABTC applicants already in a CBP trusted traveler program	Number of initial U.S. ABTC applicants *Not* already in a CBP trusted traveler program	Total initial U.S. ABTC applications
2014 *	2,126	2,477	4,603
2015	4,976	8,138	13,114
2016 **	4,652	9,692	14,344
2017 ***	4,652	9,692	14,344
2018 ***	4,652	9,692	14,344
Total	21,058	39,691	60,749

* Partial year of historical data spanning from the U.S. ABTC Program's effective date of June 12, 2014 to the end of FY 2014.

** Estimate based on historical data spanning from start of October 2015 to December 2015 and data extrapolated for the remaining months of FY 2016.

*** Projection.

[18] The National Center for Asia-Pacific Economic Cooperation is a U.S. business association focused on facilitating the private sector input into the APEC process.

[19] *See http://csis.org/publication/why-us-approval-apec-business-travel-card-matters.*

[20] The total U.S. ABTC applications figure represents applications received between the U.S. ABTC Program's interim effective date of June 12, 2014 through December 2015. Source: Email correspondence with CBP's Office of Field Operations on August 12, 2015 and February 10, 2016.

[21] According to APEC, the ABTC ''has experienced significant growth in recent years. The number of active card users in the year to 30 June 2015 increased by more than 15 per cent, to over 190,000, compared to around 164,000 in mid-2014.'' Source: Asia-Pacific Economic Cooperation. ''APEC Business Travel Card to be Extended to Five Years from 1 September.'' 2015. Available at *http://www.apecsec.org.sg/Press/News-Releases/2015/0728_ABTC.aspx*. Accessed March 3, 2016.

[22] *Source:* Email correspondence with CBP's Office of Field Operations on February 10, 2016.

[23] 1,163 U.S. ABTC applications corresponding to individuals who are already in a trusted traveler program received during first three months of fiscal year 2016 × 4 = 4,652. 2,423 U.S. ABTC applications corresponding to individuals who are not already in a trusted traveler program received during first three months of fiscal year 2016 × 4 = 9,692.

[24] Although the accompanying U.S. ABTC fee study includes CBP's costs related to the processing and printing of 5,000 Canadian ABTCs, CBP excludes these costs from this analysis because Canadian ABTC enrollees are not members of the U.S. ABTC Program and CBP is reimbursed for the costs associated with processing their applications.

Although CBP received nearly 21,000 initial U.S. ABTC applications between June 2014 and December 2015, the agency only processed around 18,000 applications during that time period. Of those applications processed, CBP approved 88 percent on average.[25] During FY 2016, and before the implementation of this final rule and its establishment of a new U.S. ABTC validity period in FY 2017, CBP assumes that the agency will process the backlog of U.S. ABTC Program applications as well as new applications submitted in FY 2016. This would result in the processing of 17,370 initial U.S. ABTC applications in FY 2016. CBP also assumes that the agency will approve 88 percent of these applications, which would bring the total U.S. ABTC Program membership up to 28,303 by the end of FY 2016 (*see* Table 3). For initial U.S. ABTC applications received from FY 2017 to FY 2018, CBP assumes that it would maintain a processing rate equal to its projected application rate, with 14,344 U.S. ABTC applications received and processed each year. Among the projected applications processed between FY 2017 and FY 2018, CBP believes that 88 percent will receive approvals based on the historical U.S. ABTC application approval rate. Thus, about 25,000 new individuals will become members of the U.S. ABTC Program from FY 2017 to FY 2018, as Table 3 illustrates. CBP assumes that these 25,000 individuals will generally receive U.S. ABTCs with five-year validity rates and maintain their program membership for the full validity period.

TABLE 3—PROJECTED NUMBER OF INITIAL U.S. ABTC MEMBERSHIP APPROVALS AND DENIALS

Fiscal year	Number of initial U.S. ABTC applications approved (*i.e.*, new U.S. ABTC program members)	Number of initial U.S. ABTC applications denied	Total initial U.S. ABTC applications processed
2014*	2,619	273	2,892
2015	10,398	1,401	11,799
2016**	15,286	2,084	17,370
2017***	12,623	1,721	14,344
2018***	12,623	1,721	14,344
Total	53,549	7,200	60,749

* Partial year of historical data spanning from the U.S. ABTC Program's effective date of June 12, 2014 to the end of FY 2014.
** Estimate based on historical data spanning from start of October 2015 to December 2015 and data extrapolated for the remaining months of FY 2016.
*** Projection.
Note: Estimates may not sum to total due to rounding.

Without complete data on the number of approved U.S. ABTC applications that corresponded to existing CBP trusted traveler program members, CBP assumes that all of the U.S. ABTC applications submitted between FY 2014 and FY 2018 from individuals already in a CBP trusted traveler program will correspond to an approved application in those respective application years. CBP assumes this because these applicants have already been approved for a trusted traveler program (*see* Table 2). The remaining U.S. ABTC applications approved during the period of analysis will correspond to individuals who concurrently applied, or will concurrently apply, for the U.S. ABTC program and a CBP trusted traveler program. Table 4 summarizes the number of new, initial U.S. ABTC applications approved according to applicants' CBP trusted traveler membership statuses. As illustrated, CBP estimates that 21,000 initial U.S. ABTC members are expected to already be CBP trusted traveler program members prior to applying for a U.S. ABTC between FY 2014 and FY 2018, while 32,000 are not expected to be current members of a CBP trusted traveler program during that period (*see* Table 4).

TABLE 4—PROJECTED NUMBER OF U.S. ABTC APPLICATIONS APPROVED FOR MEMBERS ALREADY AND NOT ALREADY IN A CBP TRUSTED TRAVELER PROGRAM

Fiscal year	Number of initial U.S. ABTC applications approved for members already in a CBP trusted traveler program	Number of initial U.S. ABTC applications approved for members *Not* already in a CBP trusted traveler program	Total initial U.S. ABTC applications approved (*i.e.*, U.S. ABTC program members) (from Table 3)
2014*	2,126	493	2,619
2015	4,976	5,422	10,398
2016**	4,652	10,634	15,286

[25] From June 2014 through December 2015, CBP approved 15,854 U.S. ABTC applications and denied 2,166 U.S. ABTC applications, for an approval rate of 88 percent. Source: Email correspondence with CBP's Office of Field Operations on August 12, 2015 and February 10, 2016.

TABLE 4—PROJECTED NUMBER OF U.S. ABTC APPLICATIONS APPROVED FOR MEMBERS ALREADY AND NOT ALREADY IN A CBP TRUSTED TRAVELER PROGRAM—Continued

Fiscal year	Number of initial U.S. ABTC applications approved for members already in a CBP trusted traveler program	Number of initial U.S. ABTC applications approved for members *Not* already in a CBP trusted traveler program	Total initial U.S. ABTC applications approved (*i.e.*, U.S. ABTC program members) (from Table 3)
2017***	4,652	7,971	12,623
2018***	4,652	7,971	12,623
Total	21,058	32,491	53,549

* Partial year of historical data spanning from the U.S. ABTC Program's effective date of June 12, 2014 to the end of FY 2014.
** Estimate based on historical data spanning from start of October 2015 to December 2015 and data extrapolated for the remaining months of FY 2016.
*** Projection.
Note: Estimates may not sum to total due to rounding.

As previously mentioned, the statute authorizing U.S. ABTC issuance currently expires at the end of FY 2018. Consistent with the U.S. ABTC IFR, CBP estimates that the 2,619 members approved for the U.S. ABTC Program in FY 2014 will renew their memberships in FY 2017 upon the expiration of their three-year validity periods (*see* Table 4). Likewise, CBP estimates that the 10,398 members approved for the U.S. ABTC Program in FY 2015 will renew their memberships in FY 2018 upon the expiration of their three-year validity periods (*see* Table 4). For continued program use after FY 2018, CBP estimates that the 15,286 U.S. ABTC applicants approved in FY 2016 will renew their U.S. ABTC Program memberships in FY 2018 before their initial U.S. ABTC validity periods end (*see* Table 4). As stated in the U.S. ABTC IFR, it is possible that individuals initially approved for the U.S. ABTC Program will change to a job function that does not require conducting APEC business, making them ineligible for a U.S. ABTC. In these cases, CBP assumes that the individual's replacement in that position will enroll in the U.S. ABTC Program, in lieu of the original enrollee, in order to benefit from the expedited immigration process while visiting APEC member economies. Due to the short timeframe between this final rule's implementation and the expiration of the U.S. ABTC Program, CBP does not believe that individuals who enroll in the U.S. ABTC Program between FY 2017 and FY 2018 will renew their memberships during the period of analysis. This is because CBP thinks it is unlikely that these individuals will incur U.S. ABTC application fees and time costs to get less than two years of additional U.S. ABTC use.

Table 5 shows the projected number of U.S. ABTC members who will renew their U.S. ABTC Program memberships during the period of analysis according to their current CBP trusted traveler program membership status. As illustrated, all 28,303 U.S. ABTC applicants approved for memberships prior to FY 2017 will renew their U.S. ABTC memberships by FY 2018's end. In accordance with this rule's extended U.S. ABTC validity period, these members will generally receive U.S. ABTCs that will expire within a five-year validity period lasting up to September 29, 2023. For simplicity of the analysis, CBP counts both the original U.S. ABTC holder who renews and any replacement applicants, if applicable, as a renewal in Table 5. Note that renewals are not forecasted beyond FY 2018 because the statute authorizing the U.S. ABTC expires at the end of that year.

TABLE 5—PROJECTED NUMBER OF U.S. ABTC PROGRAM MEMBERSHIP RENEWALS FOR MEMBERS ALREADY AND NOT ALREADY IN A CBP TRUSTED TRAVELER PROGRAM

Fiscal year	Number of U.S. ABTC renewals from members previously in a CBP trusted traveler program	Number of U.S. ABTC renewals from members *Not* previously in a CBP trusted traveler program	Total U.S. ABTC renewals
2014	.....	.....	.....
2015	.....	.....	.....
2016**	.....	.....	.....
2017***	2,126	493	2,619
2018***	9,628	16,056	25,684
Total	11,754	16,549	28,303

** Estimate based on historical data spanning from start of October 2015 to December 2015 and data extrapolated for the remaining months of FY 2016.
*** Projection.
Note: Estimates may not sum to total due to rounding.

5. Costs

CBP has determined that a $70 fee is necessary to recover its costs associated with the U.S. ABTC Program. These costs include the cost to issue the U.S. ABTCs and the information technology infrastructure costs, initial and recurring, required to run the U.S. ABTC Program.[26] In addition to the U.S. ABTC fee, initial U.S. ABTC applicants will also experience an opportunity cost associated with obtaining a U.S. ABTC. As previously discussed, CBP estimates that new, initial U.S. ABTC applicants who are already members of a CBP trusted traveler program will experience a 1 hour and 10-minute (70-minute) application-related opportunity cost, while U.S. ABTC applicants who are not already members of a CBP trusted traveler program will experience a 1 hour and 40-minute (100-minute) application-related opportunity cost. U.S. ABTC applicants who are not already members of a CBP trusted traveler program are required to pay another fee to join the U.S. ABTC Program—the $100 application fee associated with the Global Entry program.[27] The Department of Transportation's guidance on the valuation of travel time for air passengers estimates a business traveler's value to be $63.16 per hour.[28] Using this estimate as well as the opportunity cost and fees just described, CBP estimates that it will cost a new, initial U.S. ABTC applicant who is already a CBP trusted traveler program member approximately $144 to join the U.S. ABTC Program.[29] For new, initial U.S. ABTC applicants who are not already members of a CBP trusted traveler program, CBP estimates that it will cost approximately $275 to join the U.S. ABTC Program.[30] By applying the U.S. ABTC applicant projections according to CBP trusted traveler program membership statuses (*see* Table 2) to their respective U.S. ABTC application costs ($144 for applicants already in a CBP trusted traveler program and $275 for applicants not already in a CBP trusted traveler program), CBP finds that new, initial U.S. ABTC applicants have incurred or will incur undiscounted costs totaling $13.9 million during this rule's period of analysis (*see* Table 6).

TABLE 6—U.S. ABTC PROGRAM APPLICATION COSTS TO NEW, INITIAL APPLICANTS

[Undiscounted]

Fiscal year	Number of initial U.S. ABTC applicants already in a CBP trusted traveler program (A)	Total application cost for U.S. ABTC applicants already in a CBP trusted traveler program ($144 × A)	Number of initial U.S. ABTC applicants *Not* already in a CBP trusted traveler program (B)	Total application cost for U.S. ABTC applicants *Not* already in a CBP trusted traveler program ($275 × B)
2014	2,126	$306,144	2,477	$681,175
2015	4,976	716,544	8,138	2,237,950
2016	4,652	669,888	9,692	2,665,300
2017	4,652	669,888	9,692	2,665,300
2018	4,652	669,888	9,692	2,665,300
Total	21,058	3,032,352	39,691	10,915,025

As mentioned earlier, CBP estimates that 28,303 U.S. ABTC applicants approved for memberships prior to FY 2017 will successfully renew their U.S. ABTC memberships by FY 2018's end (*see* Table 5). However, these members will incur different renewal costs according to their initial CBP trusted traveler program membership status. U.S. ABTC members already in a CBP trusted traveler program must complete the U.S. ABTC application (*i.e.,* a self-certification) and pay the U.S. ABTC fee using GOES to renew their U.S. ABTC membership. These members will spend an estimated 10 minutes completing such renewal steps, at an opportunity cost of $10.53 per renewal.[31] This contrasts to the IFR's analysis, which assumed that individuals would incur the same time burden when initially

[26] The *Asia-Pacific Economic Cooperation Business Travel Card Fee Study* is posted in the docket for this rulemaking on *www.regulations.gov*.

[27] As previously discussed, CBP anticipates U.S. ABTC applicants who are not already members of a CBP trusted traveler program will join the Global Entry program.

[28] As previously mentioned, this value is based on the U.S. Department of Transportation's (DOT) guidance regarding the valuation of travel time for business travelers in 2013 U.S. dollars, adjusted to 2017 U.S. dollars using the DOT's recommended annual growth rate of one percent. Source: U.S. Department of Transportation, Office of Transportation Policy. *The Value of Travel Time Savings: Departmental Guidance for Conducting Economic Evaluations Revision 2 (2015 Update).* ''Table 4 (Revision 2-corrected): Recommended Hourly Values of Travel Time Savings.'' 2015. Available at *http://www.transportation.gov/sites/dot.gov/files/docs/Revised%20Departmental%20Guidance%20on%20Valuation%20of%20Travel%20Time%20in%20Economic%20Analysis.pdf.* Accessed February 16, 2016.

[29] $63.16 x (70 minutes/60 minutes per hour) = $73.69; $73.69 + $70 U.S. ABTC fee = $143.69, or $144 when rounded to the nearest dollar. CBP estimates that U.S. ABTC applicants who are already in a CBP trusted traveler program will experience an opportunity cost of 10 minutes to complete a self-certification, schedule an appointment at an enrollment center, and have their signature digitally captured. Additionally, CBP estimates these applicants will experience an opportunity cost of 1 hour (60 minutes) to travel to and from an enrollment center and wait to have their signature digitally captured. In total, CBP estimates U.S. ABTC applicants who are already members of a CBP trusted traveler program will experience an opportunity cost of 70 minutes with this rule.

[30] $63.16 x (100 minutes/60 minutes per hour) = $105.27; $105.27 + $100 Global Entry program fee + $70 U.S. ABTC fee = $275.27, or $275 when rounded to the nearest dollar. CBP estimates that U.S. ABTC applicants who are not already in a CBP trusted traveler program will experience an opportunity cost of 40 minutes to complete the Global Entry application and the U.S. ABTC self-certification, schedule their required Global Entry enrollment interview, pay the program application fees, and have their signature digitally captured for the U.S. ABTC Program. Additionally, CBP estimates these applicants will experience an opportunity cost of 1 hour (60 minutes) to travel to and from an enrollment center and complete the interview for Global Entry. In total, CBP estimates U.S. ABTC applicants who are not already members of a CBP trusted traveler program will experience an opportunity cost of 100 minutes with this rule.

[31] $63.16 hourly time for business traveler × (10 minutes/60 minutes per hour) = $10.53.

applying for or renewing a U.S. ABTC. Because the U.S. ABTC Program's initial digital signature capture requirement is generally not necessary for program membership renewal, CBP no longer believes that the time burdens to apply for and renew U.S. ABTC applications are the same. With U.S. ABTC renewals, members will not have to travel to a CBP trusted traveler enrollment center to have their signature digitally captured, thus decreasing their renewal burden assumed in the IFR. Along with the $10.53 renewal opportunity cost, U.S. ABTC applicants who were already members of a CBP trusted traveler program will be required to pay the $70 U.S. ABTC fee upon membership renewal, for a total U.S. ABTC renewal cost of approximately $81.[32] Note that CBP does not consider the costs for current CBP trusted traveler program members to renew their CBP trusted traveler program memberships because they would presumably incur those costs even in the absence of this rule.

Although CBP's trusted traveler program and U.S. ABTC Program validity periods previously differed (five years vs. three years for memberships approved before FY 2017), CBP continues to assume for the simplicity of this analysis that U.S. ABTC applicants who joined a CBP trusted traveler program exclusively for the ability to obtain a U.S. ABTC will concurrently renew their U.S. ABTC and trusted traveler program memberships during the period of analysis. As such, CBP believes that to renew their U.S. ABTC memberships, U.S. ABTC members not previously in a CBP trusted traveler program will concurrently complete the U.S. ABTC application (*i.e.,* a self-certification), Global Entry renewal, and pay the U.S. ABTC and Global Entry fees using GOES. These members will spend an estimated 10 minutes completing such renewal steps, at an opportunity cost of $10.53 per renewal.[33] This burden contrasts to the IFR's analysis, which assumed that individuals would incur the same time burden when initially applying for or renewing a U.S. ABTC. Because the initial CBP trusted traveler program interview and the U.S. ABTC Program's digital signature capture requirements are generally not necessary for program membership renewals, CBP no longer believes that the time burdens to apply for and renew U.S. ABTC applications are the same. With U.S. ABTC renewals, members will not have to travel to a CBP trusted traveler enrollment center to have their signature digitally captured or undergo another interview, thus decreasing their renewal burden assumed in the IFR. Individuals concurrently renewing their U.S. ABTC and Global Entry memberships will also be required to pay the $70 U.S. ABTC fee and the $100 fee associated with the Global Entry program, for a total U.S. ABTC and Global Entry membership renewal cost of about $181.[34]

By applying the U.S. ABTC renewal projections according to CBP trusted traveler program membership statuses (*see* Table 5) to their respective U.S. ABTC membership renewal costs ($81 for applicants already in a CBP trusted traveler program and $181 for applicants not already in a CBP trusted traveler program), CBP finds that U.S. ABTC Program members will incur a total undiscounted cost of $3.9 million to renew their memberships during the period of analysis (*see* Table 7).

TABLE 7—U.S. ABTC PROGRAM RENEWAL COSTS TO MEMBERS

[Undiscounted]

Fiscal year	Number of renewals from members previously in a CBP trusted traveler program (A)	Total renewal cost for members previously in a CBP trusted traveler program ($81 × A)	Number of renewals from members *Not* previously in a CBP trusted traveler program (B)	Total renewal cost from members *Not* previously in a CBP trusted traveler program ($181 × B)
2014	.....	.....	.....	.....
2015	.....	.....	.....	.....
2016	.....	.....	.....	.....
2017	2,126	$172,206	493	$89,233
2018	9,628	779,868	16,056	2,906,136
Total	11,754	952,074	16,549	2,995,369

Accounting for initial application and renewal costs, the total undiscounted cost of this rule is $17.9 million. In present value terms, the overall cost of this rule will range from approximately $18.1 million to $18.3 million from FY 2014 to FY 2018 (*see* Table 8). The total annualized cost of this rule over the period of analysis will equal between $3.4 million and $3.5 million. These estimates vary according to the discount rate applied.

TABLE 8—TOTAL COST OF RULE, FY 2014–FY 2018

[2017 U.S. dollars]

	3% Discount rate	7% Discount rate
Present Value Cost	$18,061,855	$18,319,248

[32] $10.53 opportunity cost to renew U.S. ABTC Program membership + $70 U.S. ABTC fee = $80.53, or $81 when rounded to the nearest dollar.

[33] $63.16 hourly time for business traveler × (10 minutes/60 minutes per hour) = $10.53.

[34] $10.53 opportunity cost to concurrently renew U.S. ABTC and Global Entry Program memberships + $100 Global Entry program fee + $70 U.S. ABTC fee = $180.53, or $181 when rounded to the nearest dollar.

TABLE 8—TOTAL COST OF RULE, FY 2014–FY 2018—Continued

[2017 U.S. dollars]

	3% Discount rate	7% Discount rate
Annualized Cost	3,504,094	3,408,535

6. Benefits

As stated earlier, the U.S. ABTC Program will enable card holders to access fast-track immigration lanes at participating airports in the 20 other APEC member economies. Although the ABTC Program is relatively new for U.S. citizens, it is a well-established program for the other APEC member economies. In an effort to quantify the benefits of the ABTC, APEC commissioned the report ''Reducing Business Travel Costs: The Success of APEC's Business Mobility Initiatives'' (APEC Report).[35] The APEC Report quantified seven key performance indicators, one of which quantifies the time savings an ABTC holder receives by using its fast-track immigration lanes. As shown in Table 9, the time savings each member economy's ABTC holders receive can vary greatly. Like in the U.S. ABTC IFR, CBP believes the weighted average time savings of approximately 43 minutes is an appropriate estimate of the time savings a U.S. ABTC holder will receive when clearing foreign immigration services using the fast-track immigration lanes. To the extent that our estimate understates the time saved by U.S. ABTC holders, the benefits of the rule will be higher. Similarly, to the extent that U.S. ABTC holders are able to catch flights they would have otherwise missed due to lengthy immigration waits, the benefits of this rule will be higher.

TABLE 9—KEY PERFORMANCE INDICATOR 4—TOTAL TIME SAVINGS CLEARING IMMIGRATION AT THE BORDER BY ABTC HOLDERS

Economy	Average time savings/ABTC holder (minutes)	ABTC holders (2011)	Total time savings by ABTC holders (minutes)
Australia	46.52	24,286	1,129,713
Brunei Darussalam	32.81	43	1,411
Chile	49.33	416	20,520
China	38.74	3,895	150,882
Hong Kong China	26.28	10,659	280,137
Indonesia	60.2	1,495	90,003

Source: Asia-Pacific Economic Cooperation. ''Reducing Business Travel Costs: The Success of APEC's Business Mobility Initiatives.'' October 2011. Available at *http://publications.apec.org/publication-detail.php?pub_id=1214*. Accessed May 23, 2012.

As previously discussed, the DOT's guidance regarding the valuation of travel time estimates a business air traveler's value to be $63.16 per hour. Using this hourly time value and the 43 minutes in time savings from the ABTC per trip, CBP estimates each U.S. ABTC holder will save approximately $45 per visit to an APEC member economy.[36] In addition to the time savings per trip to an APEC member economy, CBP estimates a new, initial U.S. ABTC applicant who is not already a CBP trusted traveler member will also save an additional 7 minutes on net, or $7 in opportunity costs, by using a Global Entry kiosk for expedited CBP clearance upon returning to the United States from an APEC economy.[37]

7. Net Benefits

Because participation in the U.S. ABTC Program is voluntary, the perceived benefits of its reduced wait times have to equal or exceed the cost of the program over five years for potential enrollees to determine whether or not the program is worthwhile to join. As previously discussed, CBP estimates that each U.S. ABTC holder will save approximately $45 per trip by using the fast-track immigration lanes in foreign APEC member economies. Although CBP is unable to estimate the number of trips each individual U.S. ABTC holder will

[35] Asia-Pacific Economic Cooperation. ''Reducing Business Travel Costs: The Success of APEC's Business Mobility Initiatives.'' November 2011. Available at *http://publications.apec.org/publication-detail.php?pub_id=1214*. Accessed May 23, 2012.

[36] $63.16 × (43 minutes/60 minutes per hour) = $45.26, or $45 when rounded to the nearest dollar.

[37] $63.16 × (7 minutes/60 minutes per hour) = $7.37, or $7 when rounded to the nearest dollar. Source: 77 FR 5681, February 6, 2012.

take to an APEC member economy, CBP can estimate the minimum number of trips a U.S. ABTC holder will have to take over the five-year U.S. ABTC validity period for the benefits of initial U.S. ABTC membership to equal or exceed the costs of initially obtaining a U.S. ABTC by using the estimated savings per trip ($45) previously described. CBP estimates that a new, initial U.S ABTC applicant who is already enrolled in a CBP trusted traveler program will need to take a minimum of four trips between the United States and an APEC member economy over five years for the benefits of the U.S. ABTC Program to exceed the costs associated with joining the program.[38] Accounting for the $45 in time savings per trip to an APEC member economy and the $7 in time savings by using a Global Entry kiosk for expedited CBP clearance upon returning to the United States from an APEC economy, CBP estimates that a new, initial U.S. ABTC applicant who is not already a CBP trusted traveler member will need to take a minimum of six trips between the United States and an APEC member economy over five years for the benefits of the U.S. ABTC Program to exceed the costs associated with joining the program and Global Entry.[39] Current U.S. ABTC holders will need to take even fewer trips per year for the benefits of renewing their program memberships to outweigh the costs.

B. The Regulatory Flexibility Act

This section examines the impact of the rule on small entities as required by the Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996. A small entity may be a small business (defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act); a small not-for-profit organization; or a small governmental jurisdiction (locality with fewer than 50,000 people). Although this rule regulates people and not businesses, a U.S. citizen is required to be either a bona fide U.S. business person engaged in business in the APEC region or a U.S. Government official actively engaged in APEC business in order to qualify for a U.S. ABTC. Therefore, CBP has considered the impact of this rule on small entities.

The U.S. ABTC Program is voluntary and has an initial application cost of approximately $144 if a U.S. ABTC applicant is a current member of a CBP trusted traveler program or approximately $275 if a U.S. ABTC applicant must concurrently apply for a U.S. ABTC and a CBP trusted traveler program. While the U.S. ABTC applicant will bear the cost associated with obtaining a U.S. ABTC, a business may voluntarily reimburse the applicant for the fee and his or her opportunity cost. CBP cannot estimate the number of small entities that will voluntarily reimburse its employees. CBP recognizes that it is possible that a substantial number of small entities will be impacted by this regulation. However, CBP does not believe an application cost of either $144 or $275, depending on whether a U.S. ABTC applicant is currently enrolled in a CBP trusted traveler program, constitutes a significant economic impact. Moreover, as previously discussed, each U.S. ABTC holder will save approximately 43 minutes, or approximately $45 in opportunity costs, per trip, while new, initial U.S. ABTC applicants who are not already CBP trusted traveler members will also save an additional 7 minutes on net, or $7 in opportunity costs, by using a Global Entry kiosk for expedited CBP clearance upon returning to the United States from an APEC economy. U.S. ABTC Program members can dedicate these time savings to productive, APEC business-related use. After approximately four or six trips to an APEC member economy, the benefits of an ABTC will exceed the full cost of obtaining a U.S. ABTC (fees + opportunity costs). CBP also notes that a one-time expense of $144 or $275, depending on whether the U.S. ABTC applicant is already enrolled in a CBP trusted traveler program, is a fraction of the cost of frequent trans-Pacific travel. Thus, CBP certifies this regulation will not have a significant economic impact on a substantial number of small entities. CBP received no public comments challenging this certification.

C. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

D. Executive Order 13132

The rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

E. Paperwork Reduction Act

The collections of information in this document will be submitted for review by OMB in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3507) under control number 1651–0121. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB. The collections of information in these regulations are contained in Title 8, Part 235 of the CFR. The revisions to OMB clearance 1651–0121 for the U.S. ABTC Program application[40] reflect the following changes:

U.S. ABTC Applications:[41]

[38] (Rounded) $143 U.S. ABTC opportunity cost and fee/$45 savings per trip = 3.2 trips.

[39] (Rounded) $45 fast-track immigration clearance savings + $7 expedited CBP clearance savings from Global Entry = $52 U.S. ABTC holder savings; (Rounded) $274 U.S. ABTC and Global Entry opportunity cost and fees/$52 U.S. ABTC holder savings = 5.3 trips.

[40] Source: U.S. Department of Homeland Security, Customs and Border Protection. Supporting Statement for Paperwork Reduction Act Submission: 1651–0121, Trusted Traveler Programs and U.S. APEC Business Travel Card. September 2015. Available at *http://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201509-1651-002*. Accessed March 29, 2016.

[41] CBP estimates that a total of 14,344 applicants will initially apply for U.S. ABTC Program membership each year (see ''Executive Order 13563 and Executive Order 12866'' section, Table 2—''Total Initial U.S. ABTC Applications'' in FY 2017). However, as described in the ''Executive Order 13563 and Executive Order 12866'' section above, an estimated 4,652 of these applicants will already be current CBP trusted traveler program members, while 9,692 will not. Because the U.S. ABTC Program application requirements differ according to an applicant's CBP trusted traveler program membership status, the U.S. ABTC application time burdens for individuals will differ. The estimated 4,652 U.S. ABTC applicants who are already CBP trusted traveler program members will incur a time burden of 10 minutes to complete the U.S. ABTC self-certification and have their signature digitally captured at a CBP trusted traveler enrollment center for their U.S. ABTC application. These U.S. ABTC application estimates account for the 4,652 individuals who are already in a CBP trusted traveler program and their related U.S. ABTC application burdens. CBP considers the remaining additional burden to the 9,692 individuals who will concurrently apply for an initial U.S. ABTC and a CBP trusted traveler program membership in the following ''Global Entry Applications'' estimates. Additionally, CBP estimates that a total of 2,619 existing U.S. ABTC Program members will choose to renew their U.S. ABTC memberships and Global Entry memberships (if they were not already in a CBP trusted traveler program at the time of their initial ABTC application) (see ''Executive Order 13563 and Executive Order 12866'' section, Table

Increase in estimated number of annual respondents: 1,643.

Increase in estimated number of annual responses: 1,643.

Estimated average time burden per response: 10 minutes (0.17 hours).

Increase in estimated total annual time burden: 279 hours.

Initial U.S. ABTC applicants who join Global Entry to meet a U.S. ABTC Program membership requirement increased the number of Global Entry applications and burden hours as follows:

Global Entry Applications: [42]

Increase in estimated number of annual respondents: 2,099.

Increase in estimated number of annual responses: 2,099.

Estimated average time burden per response: 40 minutes (0.67 hours).

Increase in estimated total annual time burden: 1,407 hours.

Approved U.S. ABTC members who joined Global Entry for their U.S. ABTC Program membership also increased the Global Entry kiosk usage rate and burden hours through their use of the kiosks for expedited CBP clearance upon returning to the United States from an APEC economy. The additional Global Entry kiosk burden hours directly resulting from the U.S. ABTC Program are as follows:

Global Entry Kiosk Use: [43]

Increase in estimated number of annual respondents: 11,106.

Increase in estimated number of annual responses: 22,212.

Estimated average time burden per response: 1 minute (0.016 hours).

Increase in estimated total annual time burden: 356 hours.

F. Privacy

DHS will ensure that all Privacy Act requirements and policies are adhered to in the implementation of this rule. In this regard, DHS has updated the Privacy Impact Assessment for the Global Enrollment System (GES) on November 1, 2016, which fully outlines processes to ensure compliance with Privacy Act protections relevant to this rule. *See https://www.dhs.gov/sites/default/files/publications/privacy-pia-cbp-ges-november2016.pdf.*

VII. Authority

This regulation is issued under the authority of 5 U.S.C. 301, 6 U.S.C. 112, 203 and 211, 8 U.S.C. 1103 and 19 U.S.C. 2, 66 and 1624, and Public Law 112–54.

List of Subjects in 8 CFR Part 235

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

Amendments to Regulations

For the reasons set forth in the preamble, the IFR amending 8 CFR 103.7(b)(1)(ii)(N) and adding a new section 235.13, which was published at 79 FR 27161 on May 13, 2014, is adopted as final with the following changes:

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

■ 1. The authority citation for part 235 continues to read as follows: 8 U.S.C. 1101 and note, 1103, 1183, 1185 (pursuant to E.O.13323, 69 FR 241, 3 CFR, 2004 Comp., p.278), 1201, 1224, 1225, 1226, 1228, 1365a note, 1365b, 1379, 1731–32; Title VII of Public Law 110–229; 8 U.S.C. 1185 note (section 7209 of Pub. L. 108–458); Public Law 112–54.

§ 235.13 [Amended]

■ 2. Amend § 235.13 as follows:

■ a. In paragraph (c)(6), first sentence, remove the number ''3'' and add in its place the word ''five'' and remove the words ''suspended or'';

■ b. Revise the paragraph (f) subject heading to read ''Denial and removal'';

■ c. In paragraph (f)(2) introductory text, first sentence, remove the words ''suspended or'';

■ d. In paragraph (f)(3), first and second sentences, remove the words ''suspension or'';

■ e. In paragraph (f)(4), remove '', suspended,'';

■ f. In paragraph (g)(1), remove all occurrences of the phrase ''denial, suspension or removal'' and add in its place ''denial or removal'' and remove the words ''date of suspension or removal'' and add in their place ''date of removal'';

■ g. In paragraph (g)(2), remove the phrase ''denial, suspension or removal'' and add in its place ''denial or removal''; and

■ h. In paragraph (h), second sentence, remove the words ''suspended or''.

Dated: November 17, 2016.

Jeh Charles Johnson,

Secretary.

[FR Doc. 2016–28177 Filed 11–22–16; 8:45 am]

BILLING CODE 9111–14–P

5— ''Total U.S. ABTC Renewals'' in FY 2017). For the purposes of this information collection, CBP includes the renewal figures in the overall U.S. ABTC application estimates because the burden for initial U.S. ABTC Program application and renewal are both assumed to be 10 minutes.

[42] Individuals interested in joining the U.S. ABTC Program who are not already CBP trusted traveler members will need to initially apply for a CBP trusted traveler program membership to meet one of the U.S. ABTC Program's membership requirements. CBP estimates that the 9,692 initial applicants who are not already in a CBP trusted traveler program will concurrently apply for the U.S. ABTC Program and CBP's Global Entry trusted traveler program, incurring a 40-minute time burden to complete the Global Entry application, complete the U.S. ABTC self-certification, schedule their required Global Entry enrollment interview, pay the program application fees, and have their signature digitally captured for the U.S. ABTC Program. These initial Global Entry application estimates account for the 9,692 individuals who are not already in a CBP trusted traveler program and their related U.S. ABTC application burdens.

[43] CBP now estimates that by the end of FY 2017, 24,520 individuals who were not already members of a CBP trusted traveler program will become joint members of the U.S. ABTC Program and Global Entry (see ''Executive Order 13563 and Executive Order 12866'' section, Table 4— ''Number of Initial U.S. ABTC Applications Approved for Members Not Already in a CBP Trusted Traveler Program'' in FY 2014–FY 2017). Due to data limitations, CBP assumes that these 24,520 U.S. ABTC Program members will use Global Entry kiosks twice per year as this is the minimum number of annual trips one of these members would have to take for the benefits of joining the U.S. ABTC Program to outweigh its costs. This translates to an additional 49,040 kiosk responses per year. These Global Entry kiosk use estimates account for the 49,040 kiosk responses and the related burdens.

FEDERAL RESERVE SYSTEM

12 CFR Part 209

[Regulation I; Docket No. R–1533]

RIN 7100–AE 47

Federal Reserve Bank Capital Stock

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors (Board) is adopting, in final form and without change, an interim final rule amending Regulation I. The final rule establishes procedures for payment of dividends by the Federal Reserve Banks (Reserve Banks) to implement the provisions of section 32203 of the ''Fixing America's Surface Transportation Act.'' The final rule sets out the dividend rates applicable to Reserve Bank depository institution stockholders and amends provisions of Regulation I regarding treatment of accrued dividends when a Reserve Bank issues or cancels Federal Reserve Bank capital stock.

DATES: This final rule is effective on January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Evan Winerman, Counsel (202–872–7578), Legal Division; or Kimberly Zaikov, Financial Project Leader (202/452–2256), Reserve Bank Operations and Payments Systems Division. Users of Telecommunication Device for Deaf (TDD) only, call (202) 263–4869.

SUPPLEMENTARY INFORMATION:

I. Overview

Regulation I governs the issuance and cancellation of capital stock by the Reserve Banks. Under section 5 of the Federal Reserve Act [1] and Regulation I,[2] a member bank must subscribe to capital stock of the Reserve Bank of its district in an amount equal to six percent of the member bank's capital and surplus. The member bank must pay for one-half of this subscription on the date that the Reserve Bank approves its application for capital stock, while the remaining half of the subscription shall be subject to call by the Board.[3]

Prior to January 1, 2016, all member banks were entitled to a six percent dividend on their paid-in capital stock. As of January 1, 2016, the ''Fixing America's Surface Transportation Act'' (''FAST Act'') [4] amended section 7(a)(1) of the Federal Reserve Act [5] to provide that stockholders with more than $10 billion in total consolidated assets shall receive a dividend on paid-in capital stock equal to the *lesser* of six percent and ''the rate equal to the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of such dividend,'' while stockholders with $10 billion or less in total consolidated assets shall continue to receive a six percent dividend. The FAST Act also provides that the Board must adjust the $10 billion threshold for total consolidated assets annually to reflect the change in the Gross Domestic Product Price Index, published by the Bureau of Economic Analysis.

On February 24, 2016, the Board published an interim final rule and request for comment in the **Federal Register** (81 FR 9082) that amends Regulation I to implement section 32203 of the FAST Act. The interim final rule allowed the Reserve Banks to continue their practice of making semi-annual dividend payments, although at a new rate for larger institutions.

In addition, Regulation I contains provisions with respect to the treatment of accrued dividends when a Reserve Bank issues new stock or cancels existing stock. These Regulation I provisions implement portions of sections 5, 6, and 9 of the Federal Reserve Act, which were not amended by the FAST Act. Section 5 provides that (1) when a Reserve Bank issues new shares to a stockholder, the stockholder must pay the Reserve Bank for accrued dividends at a monthly rate of one-half of one percent from the last dividend and, correspondingly, (2) when a stockholder reduces or liquidates its holding of Reserve Bank stock, the Reserve Bank must pay the stockholder for accrued dividends at a monthly rate of one-half of one percent from the last dividend. Similarly, sections 6 and 9(10) of the Federal Reserve Act state that, when a member bank becomes insolvent or voluntarily withdraws from Reserve Bank membership, the Reserve Bank shall pay accrued dividends on the bank's cancelled stock at a monthly rate of one-half of one percent. Prior to the amendments published in the interim final rule, Regulation I adopted the approach described in sections 5, 6, and 9(10) of the Federal Reserve Act, providing in §§ 209.4(d) and 209.4(e)(1) that dividends for subscriptions to, and cancellations of, Reserve Bank stock shall accrue at a monthly rate of one-half of one percent. As discussed below, the interim final rule adjusted the accrued dividend rates for larger institutions to be consistent with the rate adopted in the FAST Act.

II. Summary of Comments Received and Final Rule

A. Public Comments

The Board received nine comments on the interim final rule: One from a trade association representing commercial banks; one from a small commercial bank; and seven from individual members of the public. The trade association and the commercial bank expressed concerns regarding Congress's decision to lower the statutory dividend rate for banks with more than $10 billion in total consolidated assets, while other commenters supported Congress's decision. None of the commenters suggested specific changes to the text of the interim final rule.

B. Description of Final Rule

1. Dividend Payment Rate

Like the interim final rule, the final rule amends Regulation I to include a new paragraph, § 209.4(e), addressing the rate for dividend payments by the Reserve Banks. Section 209.4(e)(1)(i) implements the FAST Act provision requiring that banks with more than $10 billion in total consolidated assets receive a dividend on their Reserve Bank capital stock at an annual rate of the lesser of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of the dividend. Section 209.4(e)(1)(ii) provides that banks with $10 billion or less in total consolidated assets will continue to receive a dividend at an annual rate of six percent. Section 209.4(e)(3) provides that dividends are cumulative, as required by section 7 of the Federal Reserve Act.

Section 209.4(e)(2) provides that each dividend ''will be adjusted to reflect the period from the last dividend payment date to the current dividend payment date according to the dividend proration basis.'' Section 209.1(d)(2) in turn defines ''dividend proration basis'' as ''the use of a 360-day year of 12 30-day months for purposes of computing dividend payments.'' Thus, under the interim final rule, a semi-annual dividend payment to a stockholder with $10 billion or less in total consolidated assets continues to be calculated as three percent of paid-in capital. A semi-annual dividend payment to a stockholder with more than $10 billion in total consolidated assets would be calculated as the lesser of three percent or one-half of the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of the dividend.

2. Payment of Accrued Dividends for Subscriptions to Reserve Bank Stock

Section 5 of the Federal Reserve Act requires that member banks subscribe to new stock of the appropriate Reserve Bank whenever the member bank increases its own capital stock, so as to maintain an investment in Federal Reserve Bank stock equal to 3 percent of the member bank's capital and surplus. Banks also become member banks throughout the year.

As discussed above, section 5 of the Federal Reserve Act provides that, when a stockholder subscribes to new capital stock, it must pay for accrued dividends on that new stock at a monthly rate of one-half of one percent from the last dividend (*i.e.,* a monthly rate derived from a six percent annual rate). Prior to the amendments published in the interim final rule, Regulation I adopted the same approach. This requirement ensures that the stockholder will not be overcompensated at the next dividend payment, because the stockholder has paid in advance for the portion of the stockholder's next dividend payment attributable to the period for which the member bank did not own the stock.

Although section 5 of the Federal Reserve Act continues to provide that a stockholder should pay for accrued dividends at a monthly rate of one-half of one percent from the last dividend, section 7 of the Federal Reserve Act now provides that stockholders with more than $10 billion in total

[1] 12 U.S.C. 287.

[2] 12 CFR 209.4(a).

[3] 12 U.S.C. 287 and 12 CFR 209.4(c)(2).

[4] Public Law 114–94, 129 Stat. 1312 (2015). *See https://www.congress.gov/114/bills/hr22/BILLS-114hr22enr.pdf/.*

[5] 12 U.S.C. 289(a)(1).

consolidated assets will receive an annual dividend at the lesser of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of the dividend. Applying sections 5 and 7 literally could cause a larger stockholder to overpay for accrued dividends if it paid at a rate based on a six percent annual rate but received its next dividend payment at an annual rate *below* six percent (assuming the high yield of the 10-year Treasury note at the applicable auction was below six percent).

Like the interim final rule, the final rule reconciles the conflict between sections 5 and 7 of the Federal Reserve Act by requiring that a stockholder with more than $10 billion in total consolidated assets pay for accrued dividends at an annual rate of the lesser of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the previous dividend payment date (that is, the rate used for the previous dividend payment to stockholders with more than $10 billion in total consolidated assets), prorated to cover the period between the last dividend payment date and the date of subscription. This approach allows a larger stockholder to pay for accrued dividends at a rate that is generally close to the dividend rate the stockholder will earn at the next dividend payment. This approach also resolves the statutory conflict in favor of giving effect to the most recent Congressional act regarding the payment of dividends as provided in the FAST Act. Conversely, the interim final rule provided that stockholders with $10 billion or less in total consolidated assets will continue to pay for accrued dividends at an annual rate of six percent (prorated to cover the period between the last dividend payment date and the date of subscription), as those stockholders will continue to receive a six percent annual dividend. This approach is adopted in the final rule without change.

The final rule also provides at § 209.4(c)(3) for an adjustment at the next annual dividend if a stockholder pays for accrued dividends at a rate that is different from the annualized rate that the stockholder ultimately receives at the next scheduled dividend payment date. This adjustment equals the difference between the accrued dividends the stockholder paid for the additional subscription and the portion of the next dividend payment attributable to that additional subscription, prorated to cover the period from the last dividend payment date to the subscription date.

3. Payment of Accrued Dividends for Cancellations of Reserve Bank Stock

Section 5 of the Federal Reserve Act requires that a member bank seek redemption of its Federal Reserve Bank stock as the capital of the member bank declines, so as to maintain an investment in Federal Reserve Bank stock equal to 3 percent of the member bank's capital and surplus. Banks also relinquish membership throughout the year.

As discussed above, three provisions of the Federal Reserve Act (sections 5, 6, and 9(10)) state that, when a Reserve Bank cancels stock, the Reserve Bank shall pay the stockholder for accrued dividends at a monthly rate of one-half of one percent from the last dividend (*i.e.,* a monthly rate derived from a six percent annual rate). Prior to the amendments published in the interim final rule, Regulation I adopted the same approach. Sections 5, 6, and 9(10) of the Federal Reserve Act now conflict with section 7 of the Federal Reserve Act, which provides (following passage of the FAST Act) that stockholders with more than $10 billion in total consolidated assets will receive an annual dividend at the lesser of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of the dividend.

The final rule reconciles sections 5, 6, and 9(10) of the Federal Reserve Act with section 7 of the Federal Reserve Act by requiring the Reserve Banks to pay accrued dividends to stockholders with more than $10 billion of total consolidated assets at an annual rate of the lesser of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the date of cancellation, prorated to cover the period between the last dividend payment date and the date of cancellation. As noted above, this approach also resolves the statutory conflict between sections 5, 6, and 9(10), on the one hand, and section 7 on the other, in favor of the most recent Congressional act regarding dividends expressed in the FAST Act. Conversely, the final rule provides that, when a Reserve Bank cancels stock of a stockholder with $10 billion or less in total consolidated assets, the Reserve Bank will pay the stockholder for accrued dividends at an annual rate of six percent (prorated to cover the period between the last dividend payment date and the date of cancellation), as those stockholders will continue to receive a six percent annual dividend.

4. Total Consolidated Assets: Definition and Inflation Adjustment

The dividend rate to which a stockholder is entitled under Section 7 of the Federal Reserve Act (as amended by the FAST Act) depends on the stockholder's ''total consolidated assets.'' The final rule amends Regulation I to include a new paragraph, § 209.1(d)(3), that generally defines total consolidated assets by reference to total assets reported on the stockholder's most recent December 31 Consolidated Report of Condition and Income (Call Report).[6] When a bank joins the Federal Reserve System or when a member bank merges with another entity and the surviving bank continues to be a Reserve Bank stockholder, the bank may have never filed a year-end call report, or its most recent year-end call report may not accurately reflect the institution's size. Accordingly, the new member bank or the surviving bank must report whether its total consolidated assets exceed $10 billion in its application for capital stock, which would be shortly after the transaction or the date that the bank becomes a member bank. To that end, the final rule amends § 209.2(a) to require that a bank seeking to join the Federal Reserve System report whether its total consolidated assets exceed $10 billion in its application for capital stock. Similarly, the final rule adds a new paragraph, § 209.3(d)(3), that requires a surviving bank to report whether its total consolidated assets exceed $10 billion when it submits its next application for additional capital stock.

Section 7(a)(1)(C) of the Federal Reserve Act (added by the FAST Act) requires that the Board make an annual inflation adjustment to the total consolidated asset threshold that determines the dividend rate to which a Reserve Bank is entitled. The final rule implements this provision at § 209.4(f). The Board expects to make this adjustment using the final second quarter estimate of the Gross Domestic Product Price Index for each year, published by the Bureau of Economic Analysis.

III. Regulatory Analysis

A. Regulatory Flexibility Act Analysis

In accordance with section 604 of the Regulatory Flexibility Act (''RFA''), 5 U.S.C. 601 *et seq.,* the Board is publishing a final regulatory flexibility analysis for the final rule. The RFA

[6] The Board has also moved, without revision, the definition of ''capital stock and surplus'' to the definitions in new § 209.1(d).

generally requires an agency to assess the impact a rule is expected to have on small entities. Under size standards established by the Small Business Administration, banks and other depository institutions are considered ''small'' if they have less than $550 million in assets.[7] The RFA requires an agency either to provide a regulatory flexibility analysis or to certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The final rule implements amendments to the Federal Reserve Act that provide that Reserve Bank stockholders with more than $10 billion in total consolidated assets will receive a dividend at an annual rate equal to the lower of six percent and the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of such dividend (with such dividend prorated to cover the period between the last dividend payment date and the current dividend payment date). The final rule also provides that, if a Reserve Bank cancels stock of a stockholder with more than $10 billion in total consolidated assets, the Reserve Bank will pay the stockholder accrued dividends at an annual rate of the lesser of six percent and the high yield of the most recent 10-year Treasury note auction held prior to the date of cancellation, prorated to cover the period between the last dividend payment date and the cancellation date. Finally, the final rule provides that, if a Reserve Bank issues new stock to a stockholder with more than $10 billion in total consolidated assets, the stockholder will pay accrued dividends on such stock at an annual rate of the lesser of six percent and the high yield of the most recent 10-year Treasury note auction held prior to the previous dividend payment date (prorated to cover the period between the last dividend payment date and the subscription date). The next regular dividend payment to that stockholder would be adjusted to account for the difference between the rate at which the stockholder paid for accrued dividends and the rate at which the stockholder receives the regular dividend payment.

Under the final rule, Reserve Bank stockholders with $10 billion or less in total consolidated assets will continue to receive a dividend on their Reserve Bank stock at an annual rate of six percent (prorated to cover the period between the last dividend payment and the current dividend payment). If a Reserve Bank issues new stock to, or cancels existing stock of, a stockholder with $10 billion or less in total consolidated assets, the stockholder or the Reserve Bank would (respectively) continue to pay accrued dividends on such stock at an annual rate of six percent (prorated to cover the period between the last dividend payment date and the subscription date or the cancellation date). Additionally, the final rule continues to allow Reserve Banks to pay dividends semiannually to all stockholders, including banks with $10 billion or less in total consolidated assets. The Board received no public comments in response to the initial regulatory flexibility analysis, nor did it receive comments from the Chief Counsel for Advocacy of the Small Business Administration.

The only new requirement that the final rule imposes on stockholders with $10 billion or less in total consolidated assets is that such a stockholder must report whether its total consolidated assets exceed $10 billion when the stockholder applies for (1) new capital stock upon joining the Federal Reserve System or (2) additional capital stock upon merging with another entity. Excluding these two situations, a Reserve Bank will determine the total consolidated assets of all stockholders by reference to the stockholder's most recent December 31 Call Report. The final rule requires the Board to make an annual inflation adjustment to the $10 billion total consolidated asset threshold.

As noted above, a depository institution is ''small'' for purposes of the RFA if it has less than $550 million of assets. The final rule has no effect on small institutions. The Board expects that existing banks and banks that are in the process of organization can readily calculate their total consolidated assets to know if they are a large institution covered by the amendments. The Board currently requires that a bank file an application form with the Reserve Bank in whose district it is located if the bank wishes to join the Federal Reserve System or if the bank must increase or decrease its holding of Reserve Bank stock.[8] The Board is revising these forms to require that, when a bank applies for membership or applies for new stock after merging with another entity, the bank report whether its total consolidated assets exceed $10 billion.

The RFA requires a description of why the agency rejected any significant alternatives that would have affected the impact of the rule on small entities. In this circumstance, there is no feasible alternative to requiring that a bank in the process of organization report whether its total consolidated assets exceed $10 billion when it applies to join the System, because such banks will not have filed a Call Report before applying for membership. With respect to measuring the total consolidated assets of a surviving bank after a merger, the Reserve Banks could alternatively (1) refer to the total assets reported by the surviving bank on its most recent December 31 Call Report or (2) add the total assets of the surviving bank and the nonsurviving bank as reported on each bank's most recent December 31 Call Report. These alternative approaches to measuring total consolidated assets in the merger context would reduce the reporting burden on small entities, but they would not provide timely and accurate notice to a Reserve Bank of whether a merger has caused a surviving bank's total consolidated assets to exceed $10 billion. The Board believes that requiring surviving banks to report whether total consolidated assets exceed $10 billion when they apply for additional capital stock is a minimal reporting burden of an amount that is known by the banks and serves the intent of the FAST Act.

B. Paperwork Reduction Act Analysis

In accordance with section 3512 of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA), the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control numbers are 7100–0042 and 7100–0046. The Board reviewed the final rule under the authority delegated to the Board by OMB. The final rule contains requirements subject to the PRA. The reporting requirements are found in §§ 209.2(a) and 209.3(d)(3). The Board received no comments on the PRA analysis in the interim final rule.

The Board has a continuing interest in the public's opinions of collections of information. At any time, comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, may be sent to: Secretary, Board of Governors of the Federal Reserve System, 20th and C

[7] 13 CFR 121.201.

Streets NW., Washington, DC 20551. A copy of the comments may also be submitted to the OMB desk officer (1) by mail to U.S. Office of Management and Budget, 725 17th Street NW., 10235, Washington, DC 20503; (2) by facsimile to 202–395–6974; or (3) by email to: *oira_submission@omb.eop.gov,* Attention, Federal Reserve Board Agency Desk Officer.

Proposed Revisions, With Extension for Three Years, of the Following Information Collections

(1) *Title of Information Collection:* Applications for Subscription to, Adjustment in Holding of, and Cancellation of Federal Reserve Bank Stock.

Agency Form Number: FR 2030, FR 2030a, FR 2056, FR 2086, FR 2086a, FR 2087.

OMB Control Number: 7100–0042.

Frequency of Response: On occasion.

Affected Public: Businesses or other for-profit.

Respondents: National, State Member, and Nonmember banks.

Abstract: These application forms are required by the Federal Reserve Act and Regulation I. These forms must be used by a new or existing member bank (including a national bank) to request the issuance, and adjustment in, or cancellation of Federal Reserve Bank stock. The forms must contain certain certifications by the applicants, as well as certain other financial and shareholder data that is needed by the Federal Reserve to process the request.

Current Actions: The dividend rate to which a Reserve Bank stockholder is entitled under section 7 of the Federal Reserve Act (as amended by the FAST Act) depends on the stockholder's ''total consolidated assets.'' Section 209.2(a) requires a bank to report whether its total consolidated assets exceed $10 billion when it applies for membership in the Federal Reserve System. Section 209.3(d)(3) requires a bank to report whether its total consolidated assets exceed $10 billion when it applies for additional capital stock after merging with another entity. The Board is proposing to revise FR 2030, FR 2030a, and FR 2056 to require that a bank report whether its total consolidated assets exceed $10 billion when it applies to join the Federal Reserve System or applies for additional capital stock after merging with another entity. The proposed revisions would increase the estimated average hours per response for FR 2030 and FR 2030a by half an hour. The proposed revisions would increase the estimated average hours per response for FR 2056 by one quarter of an hour. The Board is not proposing to revise FR 2086, FR 2086A, and FR 2087. The draft reporting forms are available on the Board's public Web site at *http://www.federalreserve.gov/apps/reportforms/review.aspx.*

Estimated annual reporting hours: FR 2030: 4 hours; FR 2030a: 2 hours; FR 2056: 1,000 hours; FR 2086: 5 hours; FR 2086a: 40 hours; FR 2087: 1 hour.

Estimated average hours per response: FR 2030: 1 hour; FR 2030a: 1 hour; FR 2056: 0.75 hours; FR 2086: 0.5 hours; FR 2086a: 0.5 hours; FR 2087: 0.5 hours.

Number of respondents: FR 2030: 4; FR 2030a: 2; FR 2056: 1,333; FR 2086: 10; FR 2086a: 79; FR 2087: 1.

(2) *Title of Information Collection:* Application for Membership in the Federal Reserve System.

Agency Form Number: FR 2083, FR 2083A, FR 2083B, and FR 2083C.

OMB Control Number: 7100–0046.

Frequency of Response: On occasion.

Affected Public: Businesses or other for-profit.

Respondents: Newly organized banks that seek to become state member banks, or existing banks or savings institutions that seek to convert to state member bank status.

Abstract: The application for membership is a required one-time submission that collects the information necessary for the Federal Reserve to evaluate the statutory criteria for admission of a new or existing state bank into membership in the Federal Reserve System. The application collects managerial, financial, and structural data.

Current Actions: The dividend rate to which a Reserve Bank stockholder is entitled under Section 7 of the Federal Reserve Act (as amended by the FAST Act) depends on the stockholder's ''total consolidated assets.'' Section 209.2(a) requires a bank to report whether its total consolidated assets exceed $10 billion when it applies for membership in the Federal Reserve System. The Board is proposing to revise FR 2083A and FR 2083B to require that a bank report whether its total consolidated assets exceed $10 billion when it applies to join the Federal Reserve System. The proposed revisions would increase the estimated average hours per response by half an hour. The Board is not proposing to revise FR 2083 or FR 2083C. The draft reporting forms are available on the Board's public Web site at *http://www.federalreserve.gov/apps/reportforms/review.aspx.* The estimated annual reporting hours listed below, and the estimated average hours per response, are cumulative totals for FR 2083, FR 2083A, FR 2083B, and FR 2083C.

Estimated annual reporting hours: 207 hours.

Estimated average hours per response: 4.5 hours.

Number of respondents: 46.

Fisheries Off West Coast States; Pacific Coast Groundfish Fishery Management Plan; Commercial Sablefish Fishing Regulations and Electronic Fish Tickets

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule revises fishery monitoring and equipment requirements for all commercial groundfish fisheries. In particular, it establishes a requirement for submitting electronic fish tickets (EFT) in the limited entry fixed gear fisheries and open access fisheries. This final rule also: revises administrative procedures for limited entry permits, providing greater flexibility and efficiencies for limited entry groundfish fishery participants; requires vessels registered to Vessel Monitoring Systems (VMS) to make an initial declaration report; and makes administrative changes and clarifying edits to improve consistency of the regulations with past Pacific Fishery

Management Council (Council) actions and with the Pacific Coast Groundfish Fishery Management Plan (FMP). This action improves monitoring and administration of the limited entry sablefish primary fishery, and addresses unforeseen issues arising out of the evolution of commercial sablefish fisheries and subsequent regulations.

DATES: This rule is effective December 23, 2016, except for the amendments to § 660.212(a)(3) through (5) and § 660.312(a)(3) through (5), which will be effective January 1, 2017.

ADDRESSES: Background information and documents are available at the Pacific Fishery Management Council's Web site at *http://www.pcouncil.org/.* NMFS prepared a Final Regulatory Flexibility Analysis (FRFA), which is summarized in the Classification section of this final rule. Copies of the FRFA and the Small Entity Compliance Guide are available from William W. Stelle, Jr., Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115–0070; or by phone at 206–526–6150. Copies of the Small Entity Compliance Guide are also available on the West Coast Regional Office Web site at *http://www.westcoast.fisheries.noaa.gov/.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this final rule may be submitted to William W. Stelle, Jr., Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115–0070, and to OMB by email to *OIRA_Submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Gretchen Hanshew, 206–526–6147, *gretchen.hanshew@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Summary of Major Actions

This final rule improves the timeliness and accuracy of sablefish catch reporting in the limited entry fixed gear fisheries and open access fisheries, provides more flexibility and efficiencies for harvesters in the Shorebased Individual Fishing Quota (IFQ) Program and limited entry fixed gear fisheries, and implements several administrative and clarifying changes to monitoring and permitting provisions of regulations for all of the limited entry and open access commercial groundfish fisheries on the West Coast.

This final rule contains eight major actions, along with related minor clarifications and non-substantive changes. The first action is a new requirement for electronic fish tickets to be submitted for all commercial landings of sablefish delivered to Washington, Oregon and California fish buyers. The second action provides qualified vessel owners an opportunity to apply for an exemption to the ownership limitation of three permits in the limited entry sablefish primary fishery. The third action allows a single vessel to be simultaneously (jointly) registered to multiple limited entry permits, one of which may have a trawl gear endorsement. The fourth action prohibits vessels that have been granted an at-sea processing exemption for sablefish in the limited entry fixed gear fishery from processing sablefish at sea when that vessel is participating in the Shorebased IFQ Program. The fifth action clarifies that, consistent with FMP Amendment 6, sablefish catch in incidental open access fisheries is counted against the open access allocation, and is not deducted from the commercial harvest guideline. The sixth action requires any vessel that has a VMS registered with NMFS Office of Law Enforcement (OLE) to submit a declaration report with OLE. The seventh action updates and simplifies equipment requirements for electronic fish tickets. The eighth action clarifies existing regulatory language prohibiting the retention of groundfish species taken in the limited entry fixed gear fishery beyond the allowable quota. In addition, the action includes housekeeping changes that are intended to better align the regulations with defined terms, and to provide clarity and consistency between paragraphs.

Background

The groundfish fisheries in the exclusive economic zone (EEZ) off the west coast of the United States are managed under the FMP. The FMP was prepared by the Pacific Fishery Management Council (Council) under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) as amended by the Consolidated Appropriations Act of 2004 (Pub. L. 108–199, section 801). Regulations implementing provisions of the FMP are located at 50 CFR part 660, subparts C through G.

This final rule includes several actions that revise regulations for commercial fisheries that harvest sablefish. These regulatory changes apply to the Shorebased IFQ Program, the limited entry fixed gear fishery, which includes the limited entry sablefish primary fishery and the daily trip limit (DTL) fishery, and the open access fishery. A more detailed description of the fisheries affected by this rulemaking, and the major provisions of this action, is contained in the June 1, 2016, proposed rule (81 FR 34947).

1. Electronic Fish Ticket Requirement

This final rule includes a Federal electronic fish ticket submittal requirement for all commercial groundfish deliveries that include sablefish. An electronic fish ticket is a web-based form used to send groundfish landing data to the Pacific States Marine Fisheries Commission (PSMFC). Electronic fish tickets are used to collect information similar to the information required in state fish receiving tickets or landing receipts (henceforth referred to as paper tickets), but do not replace or change any state requirements. This requirement will improve the timeliness and accuracy of catch data for monitoring harvest relative to applicable tier limits in the limited entry fixed gear sablefish fishery and trip limits in the limited entry fixed gear and open access DTL fisheries. Electronic fish tickets have been required for IFQ species since the start of the Shorebased IFQ Program in 2011, and have allowed vessel owners/operators, buyers and dealers, and fishery managers timely access to catch information. This final rule expands the use of electronic fish tickets to the limited entry fixed gear and open access fisheries, and is expected to have similar benefits regarding timely access to catch data.

2. Exemption to Limited Entry Sablefish Permit Ownership Limitation

Regulations (§ 660.25(b)(3)(iv)(C)) state that no individual person, partnership, or corporation in combination may have ownership interest in or hold more than three permits with sablefish endorsements either simultaneously or cumulatively over the primary season (hereby referred to as ''ownership limitation''). This ownership limitation was intended to prevent concentration of harvest privileges in the Pacific coast sablefish primary fishery. However, this restriction has led to unforeseen complications because many persons, partnerships and corporations have harvest privileges in both the Alaska IFQ sablefish fishery and the Pacific coast sablefish fishery. Under the existing regulations, Alaska IFQ holders are required to have a partial ownership interest in a vessel that fishes for their IFQ. These IFQ holders are deemed to hold any Pacific Coast permits with sablefish endorsements associated with a vessel in which they have an ownership interest. This has resulted in Alaska IFQ holders being ''limited out'' in the Pacific Coast sablefish primary fishery, even though they do not benefit

from the permits associated with the vessels in which they have an interest. The Council recommended, and NMFS is implementing through this final rule, a process by which vessel owners who meet certain qualifying criteria may petition NMFS for a limited exemption to the ownership limitation, as described in detail in the preamble to the proposed rule

3. Joint Registration

Originally, the license limitation program (LLP), implemented through Amendment 6 to the FMP (57 FR 54001, November 16, 1992, see also the EA under **ADDRESSES** for more information on the LLP), allowed vessels to register both a trawl and fixed gear (longline and fishpot) endorsed permit at the same time. Subsequently, regulations were modified and no longer allow vessels to register multiple limited entry permits unless the permits are sablefish-endorsed and stacked for use in the limited entry fixed gear sablefish primary fishery. This restriction was put in place to keep trawl and fixed gear fisheries temporally separated to meet enforcement and monitoring needs. In 2004, a vessel monitoring program was implemented that allowed vessels to identify which fishery they were participating in through a declaration system, which eliminated the need for temporal separation. As part of FMP Amendment 20 trailing actions, in April 2012 the Council recommended that vessels registered to a limited entry trawl permit be allowed to simultaneously register to a limited entry fixed gear permit, also called ''joint registration.'' This final rule implements joint registration and clarifies how fishery-specific regulations still apply to vessels that are jointly registered. Joint registration is permitted in one of two configurations, which are described in additional detail in the June 1, 2016, proposed rule (81 FR 34947):

(1) Configuration A: One trawl permit and one, two, or three sablefish endorsed permits.

(2) Configuration B: One trawl permit and one limited entry fixed gear permit.

Registering a vessel to a limited entry permit with a specific endorsement often triggers certain requirements in the groundfish regulations. Joint registration is not intended to change fishing operations of groundfish fisheries or change requirements that are applicable to vessels because of the type of the endorsement(s) on the limited entry permit to which they are registered, unless otherwise described above and in the June 1, 2016, proposed rule (81 FR 34947).

4. Restrictions on At-Sea Processing of Sablefish

Processing of groundfish at-sea is prohibited for vessels fishing in the Shorebased IFQ Program or limited entry fixed gear fishery, unless exempted from that prohibition. One such exemption applies to certain vessels fishing in the limited entry fixed gear sablefish primary fishery. Those exempted vessels may freeze sablefish at-sea during the limited entry fixed gear sablefish primary fishery.

When trawl rationalization was implemented in 2011, the Council recommended that at-sea processing of groundfish in the Shorebased IFQ Program be prohibited, with limited exemptions. Regulations at § 660.112 (b)(1)(xii) prohibit at-sea processing of groundfish, and also list the exemptions that have been granted to date, including an exemption from the prohibition of at-sea processing that applies in the sablefish primary fishery. As written, those regulations grant vessels with an exemption from the prohibition of at-sea processing in the sablefish primary fishery when fishing in the Shorebased IFQ Program. However, regulations at § 660.25(b)(6)(i) only allow the sablefish at-sea processing exemption when the vessel is registered to a sablefish-endorsed limited entry permit.

Currently, because vessels cannot be registered to a sablefish-endorsed limited entry permit and a trawl-endorsed permit at the same time, Shorebased IFQ vessels cannot take advantage of the sablefish at-sea processing exemption. However, this rule's joint registration provisions would allow a vessel to register to a trawl endorsed and a sablefish endorsed limited entry permit simultaneously. If the exemption at § 660.112(b)(1)(xii)(B) is not removed, joint registration could allow vessels with an exemption from the at-sea processing prohibition for the sablefish primary fishery to also process sablefish at sea in the Shorebased IFQ Program. Consistent with the Council's recommendation, this rule removes the exemption to the prohibition of at-sea processing (at § 660.112(b)(1)(xii)(B)) that extended the limited entry fixed gear exemption in § 660.25(b)(6)(i) to vessels fishing sablefish in the Shorebased IFQ Program. Also, in light of joint registration, a clarifying sentence is added to § 660.25(b)(6)(i), stating that the at-sea processing exemption only applies to at-sea processing of sablefish caught in the limited entry fixed gear sablefish primary fishery.

During development of this rule, NMFS noted that a similar situation as the one described above may occur with the exemption from the processing-at-sea prohibition for non-whiting groundfish. When a vessel with a non-whiting exemption from that prohibition in the Shorebased IFQ Program is jointly registered, it could utilize that exemption when fishing in non-IFQ fisheries. NMFS proposed a clarifying sentence at § 660.25(b)(6)(ii), stating that the exemption only applies to processing non-whiting groundfish caught in the Shorebased IFQ Program, which is consistent with the Council's recommendation under joint registration with regards to the sablefish at-sea processing exemption. NMFS requested public comment on this issue, and received none. Therefore, the clarifying addition to § 660.25(b)(6)(ii) is included in this final rule. This final rule implements joint registration and does not allow at-sea processing of non-whiting groundfish in non-IFQ fisheries, as the exemption was granted to vessels participating in the Shorebased IFQ Program.

5. Sablefish Allocations North of 36° N. lat.

The allocation structure for sablefish north of 36° N. lat. was established in FMP Amendment 6. In April 2009, the Council recommended final preferred intersector allocations for groundfish species under Amendment 21. The Council and NMFS recommended that no change be made to the Amendment 6 allocation structure for sablefish. However, FMP Amendment 21 and its implementing regulations slightly changed the process for allocating sablefish north of 36° N. lat. (75 FR 60868, October 1, 2010). This final rule includes regulations aligning sablefish north of 36° N. lat. allocations with the Amendment 6 allocation structure, as recommended by the Council in 2009, and as described in the June 1, 2016 proposed rule (81 FR 34947).

6. Declaration Reports for Vessels Registered to a VMS Unit

In 2004, the Council and NMFS implemented a vessel monitoring program. Since 2004, all commercial fishing vessels that take and retain groundfish in federal waters, or transit through federal waters with groundfish on board, are required to have a working VMS. The VMS, along with a system of fishing declaration reporting requirements, allows for monitoring and enforcement of areas closed to fishing. With this 2004 program, NMFS type-approved hardware and software, or ''units,'' were installed on vessels in

order to meet these new program requirements for the groundfish fishery. When a VMS unit is installed on a vessel, it is registered with NMFS OLE and catalogued.

There are a number of VMS units that have registered with OLE but those vessels have never made a declaration report. This final rule includes regulation changes at § 660.13(d) that require all vessels registered to a VMS unit to submit a declaration report. Vessels registered to a VMS unit are required to submit a declaration report, regardless of fishing activities. Obtaining a declaration report from these vessels will give OLE the information necessary to monitor the activities of these vessels relative to the applicable regulations. This final rule also revises fisher declarations at § 660.13(d)(5)(iv)(A)(*24*) to include ''other.'' This category will include on-the-water activities that may not be fishing (*e.g.*, scientific research activities). NMFS anticipates vessels may make a declaration of ''other'' if they are not fishing.

7. Equipment Requirements for Electronic Fish Tickets

As described in the proposed rule, a new interface has been developed that uses the internet for both entry and submission of electronic fish ticket data. The changes to regulations at § 660.15(d) in this rule reflect the move to a web-based electronic fish ticket for all first receivers. Note that an internet connection is necessary for all steps for completion of an electronic fish ticket, from creating the new ticket through submission. To reflect these changes, the definition of ''electronic fish ticket'' at § 660.11 is also revised to reflect the web-based form used to send electronic fish ticket information to the PSMFC.

8. Prohibitions Regarding ''Take and Retain''

NMFS is replacing ''taking, retaining'' with ''taking and retaining,'' consistent with the Council's recommendations under PCGFMP Amendment 14 and described in the 2016 proposed rule. With the exception of the sablefish primary fishery, in commercial groundfish fisheries vessels may ''take'' more than a single cumulative trip limit of a species while fishing for other species, but they may not retain any species above its cumulative trip limit. The phrase ''taking, retaining'' in this context is not clear. Therefore, to better align prohibitions for enforcing trip limits with the definition of ''trip limit,'' to improve enforceability of trip limit prohibitions, and to bring consistency to regulations that apply to commercial groundfish fisheries, prohibitions at §§ 660.12(a)(6), 660.212(a)(2), and 660.212(d)(1) and (2) are revised from ''take, retain'' to ''take and retain.''

9. Related Minor Clarifications and Non-Substantive Changes

There are several outdated regulations, mis-specified cross-references, inconsistencies in terminology, and areas in need of clarification throughout the groundfish regulations that pertain to commercial sablefish fishing. For the reasons stated in the proposed rule, this rule implements all of the updates, corrections, clarifications and non-substantive edits described in the proposed rule.

Response to Comments

During the comment period of the proposed rule, NMFS received two comment letters from participants in the fishing industry in support of the proposed regulation changes to allow joint registration of trawl and non-trawl permits and the limited exemption from ownership limitation restrictions. NMFS also received a letter of comment regarding VMS equipment requirements on board fishing vessels, which are not revised in this rule, are outside the scope of this action, and, therefore, are not discussed further here. NMFS addresses other comments below:

Comment 1: Information on an electronic fish ticket will not immediately become available to quota managers because the data will need to be entered by data entry personnel who do not work over the weekend.

Response: This is an automated system, and availability of submitted electronic fish ticket data does not rely on action by system administrators. Upon submission of the electronic fish ticket by first receivers, catch information is immediately available to vessel operators, enforcement, and federal and state fishery managers.

Comment 2: The time requirement for submitting a fish ticket under the new regulation is inconsistent with some California state fish ticket and transport ticket regulations.

Response: California Department of Fish and Wildlife is in the process of developing a monitoring system that incorporates electronic tickets. While the electronic fish tickets required by this provision contain similar information as submitted on state tickets, it does not replace or change the state requirements (§ 660.11). Furthermore, any vessels participating in federal fisheries are subject to federal regulations (§ 660.2).

Comment 3: NMFS should acknowledge that interruption of internet service, equipment failures, etc. may make electronic fish tickets impractical.

Response: NMFS has implemented a system in which a web browser on any electronic device can be used to create and submit electronic fish tickets. Therefore, even allowing for possible, temporary interruptions in service or equipment problems, 24 hours is deemed an appropriate amount of time to complete the fish ticket.

Comment 4: In some situations, the fish have been both landed and transported by the vessel operator, and no paperwork has been completed because the fish buyer has not yet taken possession of them.

Response: The trigger for written documentation of the landing is not the point at which the fish buyer or the first receiver takes possession of the fish. Written documentation of the fish offloaded from a vessel is required once the fish are removed from the vessel. Any fish removed from a vessel is considered a ''landing,'' per the definition at § 660.11. If the fish removed from the vessel will not have an electronic fish ticket submitted prior to transport, the fish must be accompanied by a dock ticket (or a transportation ticket for vessels landing into California) with the information needed to complete the electronic fish ticket, per regulations at §§ 660.213 and 660.313. It is the responsibility of the vessel operator or other person taking possession of the fish upon landing to comply with the requirements to complete the dock ticket or transportation ticket.

Comment 5: Regulations for the landing of fish and requirements of the new rule will unfairly impact first receivers that are not located at a processing plant.

Response: Regulations implemented in this rule were explicitly drafted to address the fact that some first receivers are not located at processing plants, by allowing for use of dock tickets. If the first receiver is taking possession of fish outside of regular business hours, a co-signed dock ticket meets the need for documentation of agreement between the first receiver and vessel operator regarding the specifics of the landing. The dock ticket must include the electronic fish ticket number, which can be generated remotely via any device with a web browser and internet connection (*e.g.*, mobile phone), and the rest of the fish ticket can be completed and submitted from dock ticket data within 24 hours.

Comment 6: The requirement of electronic fish tickets will cause hardship to first receivers that must purchase and maintain the hardware and software needed to submit electronic fish tickets.

Response: The improved timeliness of catch data will increase the ability to manage the fishery to the benefit of all participants, offsetting the cost of equipment needed to complete electronic fish tickets. The electronic ticket portal is web-based, and can be accessed from any electronic device (such as a computer, tablet, or mobile phone) with an internet browser, allowing for increased accessibility with multiple ways to meet reporting requirements. NMFS notes that requirements for electronic fish ticket submission will include the ability of first receivers to request a temporary waiver from these requirements, enabling them to submit paper tickets on a temporary basis. Temporary waivers will be granted on a case-by-case basis by NMFS, per regulations at §§ 660.213 and 660.313.

Comment 7: Those responsible for filling out fish tickets may not have the training and technical knowledge to do so, and may be assisted by fishermen or others as is currently done for paper tickets.

Response: NMFS is providing a written compliance guide, and PSMFC staff will be available to provide training to help ensure that all first receivers are able to perform the duties required in this rule. See **ADDRESSES** for details on where to find these materials. Also, even though the first receiver must sign the fish ticket, regulations implemented in this final rule do not prohibit a first receiver from seeking technical assistance from a third party.

Changes From the Proposed Rule

The electronic fish ticket requirements in the proposed and final rule offer a new, more flexible option that allows for vessels fishing in the sablefish primary fishery to apportion their sablefish from a single landing against multiple tier limits (if the vessel is registered to multiple sablefish endorsed permits), or against their the remainder of their tier limit(s) and applicable daily trip limits. During development of the proposed rule, it was thought that the electronic fish ticket system requirements were such that, in these situations, separate and distinct electronic fish tickets would need to be filled out and submitted for each part of the landing. For example, the first ticket for the delivery would document the sablefish pounds counting toward ''Permit 13, Tier 2'' and a second ticket for the same delivery would document the sablefish pounds counting toward ''Permit 21, Tier 3.'' Therefore, if a vessel operator chose to apportion their sablefish as described above, proposed regulations required multiple fish tickets to be filled out. Each fish ticket is estimated to take approximately 10 minutes to complete and submit.

Since publication of the proposed rule, there has been further exploration of how to document portions of a single sablefish delivery against either multiple tier limits or against both tier limits and DTL limits without having to duplicate some of the information by requiring submittal of multiple electronic fish tickets. A mechanism has been developed that allows catch of sablefish to be apportioned within a single electronic fish ticket when a vessel operator wishes to take advantage of the flexibility to apportion sablefish catch between permits (*i.e.*, among sablefish tiers associated with the permits registered for use with the vessel) or between fisheries (*i.e.*, among sablefish tiers harvested in the sablefish primary fishery and the DTL fishery). Utilizing this updated approach in the electronic fish ticket system, the requirement included in the proposed rule at § 660.213(e)(2)(iii) to submit multiple electronic fish tickets for a single delivery is unnecessary.

Therefore, in this final rule, NMFS is removing the requirement at § 660.213(e)(2)(iii) to submit multiple electronic fish tickets when a vessel operator wishes to take advantage of the flexibility to apportion sablefish catch between permits or between fisheries (as described above). This final rule provides vessel operators with the same flexibilities and gives fishery managers the same permit and landing information as the proposed regulations. However, the regulations at § 660.213(e)(2)(iii) in this final rule are anticipated to relieve first receivers of some of the recordkeeping and reporting burden by slightly reducing the total number of electronic fish tickets required. As noted above, it is unknown how many vessel operators in the sablefish primary fishery will elect to use this new flexibility, therefore it is not possible to estimate exactly how much time may be saved by first receivers. However, this change from the proposed rule relieves a restriction, and is anticipated to benefit vessel operators and first receivers.

The second change from the proposed rule pertains to the definition of ''sablefish landing'' included in that rule at §§ 660.211 and 660.311. The proposed rule would have required electronic fish tickets be submitted by first receivers of all the groundfish on board the vessel if that groundfish included any amount of sablefish. During development of the final rule, it became apparent that given the definition of ''sablefish landing'' the proposed rule language could be interpreted as requiring a first receiver of fish from a landing that included sablefish to submit an electronic fish ticket regardless of whether that first receiver was buying any sablefish. If a scenario arose where the sablefish landing were divided, all of the sablefish were sold to one first receiver, and the rest of the groundfish were sold to a second first receiver, the second first receiver, who did not take possession of any sablefish, would be required to submit an electronic fish ticket for those non-sablefish groundfish species. This would be because as proposed, the electronic fish ticket requirement would have applied to any ''sablefish landing,'' or any landing that includes any amount of sablefish harvested in the limited entry fixed gear fishery. ''Landing'' is defined at § 660.11 and means the transfer or offloading of fish from any vessel. Once transfer of fish begins, all fish aboard the vessel are counted as part of the landing. Therefore, all the fish on board the vessel, even if sold to multiple first receivers, are all counted as part of the same landing. Therefore, a vessel meets the definition of having a ''sablefish landing'' when they have any amount of sablefish on board and begins the transfer of any fish from the vessel. In the above described situation, under proposed electronic fish ticket regulations and the definition of ''sablefish landing,'' both of the first receivers of fish from the sablefish landing would be required to submit an electronic fish ticket, regardless of whether the first receiver is taking possession of any amount of sablefish.

The Council's recommendation was to capture all of the landings of sablefish for more accurate and timely accounting of sablefish harvest against applicable limits in the limited entry fixed gear and open access fisheries. Implementing an electronic fish ticket requirement for first receivers of non-sablefish groundfish deliveries was not intended and does not meet this purpose. Therefore, the proposed definitions of ''sablefish landing'' (as included in the proposed rule at §§ 660.211 and 660.311) are not included in this final rule.

Instead, regulations at §§ 660.212 and 660.312 are revised to clarify that, if the landing is split, only the portion of the landing (or a delivery/offload) that

includes some amount of sablefish must be reported on an electronic fish ticket. With this revision, first receivers of a delivery that includes any amount of sablefish must report that entire delivery (both sablefish and non-sablefish groundfish) on an electronic fish ticket. First receivers of a delivery that does not include any sablefish would not be required to report via electronic fish ticket. These revisions better align with the Council's intent to improve the timeliness of sablefish catch data.

Classification

NMFS has determined that this action is consistent with the FMP, the Magnuson Stevens Conservation and Management Act, and other applicable laws.

The Office of Management and Budget (OMB) has determined that this action is not significant for purposes of Executive Order 12866.

Regulatory Flexibility Act

A final regulatory flexibility analysis (FRFA) was prepared and incorporates the initial regulatory flexibility analysis (IRFA). A summary of the significant issues raised by the public comments in response to the IRFA, and NMFS responses to those comments, and a summary of the analyses completed to support the action are included below. NMFS also prepared a Regulatory Impact Review (RIR) for this action. A copy of the RIR/FRFA is available from NMFS (see **ADDRESSES**). A summary of the FRFA, per the requirements of 5 U.S.C. 604(a) follows:

The Small Business Administration (SBA) has established size criteria for all major industry sectors in the US, including fish harvesting and fish processing businesses. A business primarily involved in finfish harvesting is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $20.5 million for all its affiliated operations worldwide (13 CFR part 121; August 17, 2015). For commercial shellfish harvesters, the other qualifiers apply and the receipts threshold is $5.5 million. For other commercial marine harvesters, for-hire businesses, and marinas, the other qualifiers apply and the receipts threshold is $7.5 million. A business primarily involved in seafood processing is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual employment not in excess of 500 employees for all its affiliated operations worldwide. For seafood dealers/wholesalers, the other qualifiers apply and the employment threshold is 100 employees. A small organization is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field. Small governmental jurisdictions are governments of cities, counties, towns, townships, villages, school districts, or special districts, with populations less than 50,000.

On December 29, 2015, NMFS issued a final rule establishing a small business size standard of $11 million in annual gross receipts for all businesses primarily engaged in the commercial fishing industry (North American Industry Classification System or NAICS 11411) for Regulatory Flexibility Act (RFA) compliance purposes only (80 FR 81194, December 29, 2015). The $11 million standard became effective on July 1, 2016, and is to be used in all NMFS rules subject to the RFA after July 1, 2016, in place of the U.S. SBA standards (described above) of $20.5 million, $5.5 million, and $7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine fishing (NAICS 114119) sectors of the U.S. commercial fishing industry.

Pursuant to the RFA, and prior to July 1, 2016, an initial regulatory flexibility analysis was developed for this regulatory action using SBA's size standards. NMFS has reviewed the analyses prepared for this regulatory action in light of the new size standard. All of the harvesting entities directly regulated by this regulatory action were considered small under the SBA's size standards, and continue to be considered small under the new NMFS standard. Thus, NMFS has determined that the new size standard does not affect analyses prepared for this regulatory action.

No significant issues were raised during public comment, and no changes were made as a result of public comments.

An estimated 99 entities are potentially impacted by this rule, including 77 receivers and up to 22 vessels/permit holding entities. All of these entities are considered small according to both the SBA guidelines and the new NMFS standards described above. This rule is not anticipated to have a substantial or significant economic impact on small entities, or place small entities at a disadvantage to large entities.

Addition of an exemption to the ownership limitation and joint registration are expected to positively benefit directly impacted small entities.

It is assumed that all first receivers have access to a personal computer or other hardware/device. However, to reduce the potential impacts on first receivers should there be a system failure, a waiver may be granted by NMFS that temporarily exempts a first receiver from the reporting requirements and allow reasonable time to resolve the electronic fish ticket system problem. The duration of the waiver will be determined on a case-by-case basis. First receivers that are granted a temporary waiver from the requirement to submit electronic fish tickets must submit on paper the same data as are required on electronic fish tickets within 24 hours of the date received during the period that the waiver is in effect.

Implementation of an electronic fish ticket improves the accuracy and timeliness of landing data and provides managers with the real time data necessary to do inseason management of the primary and daily trip limit (DTL) fisheries. It also provides enforcement with the permit-specific landings data necessary to monitor overages in the primary (tier) and DTL sablefish fisheries, and could aid in enforcement of the owner-on-board requirement.

There are no significant alternatives to the rule that accomplish the stated objectives of applicable statutes and that minimize any of the significant economic impact of the final rule on small entities. However, Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule. The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, a small entity compliance guide will be sent to all limited entry permit owners and holders, and all persons and entities that have requested information on groundfish management actions (*i.e.*, persons and entities on the West Coast groundfish email list serve), and will be posted on the NMFS West Coast Region Web site at *http://www.westcoast.fisheries.noaa.gov/.* With regards to new electronic fish ticket requirements, outreach and compliance guidance will also be available through the Pacific States Marine Fisheries Commission at *http://pacfin.psmfc.org/.*

Paperwork Reduction Act

This final rule contains the implementation of a Federal requirement for an electronic fish ticket

to capture essential fishery catch data for commercial non-trawl sablefish fisheries (every commercial fishery landing that includes any amount of sablefish) in a timely manner, which is a collection-of-information requirement subject to review and approval by OMB under the Paperwork Reduction Act (PRA). With regards to electronic fish tickets, this requirement has been approved by OMB as a new OMB collection (OMB collection 0648–0738). The public reporting burden is estimated to average 10 minutes per response. With regards to the ownership limitation exemption, this requirement has been approved by OMB as OMB collection 0648–0737. The public reporting burden is estimated to be 45 minutes per response. Send comments on the burden estimates or any other aspects of the collection of information to West Coast Region at the ADDRESSES above, by email to *OIRA_Submission@omb.eop.gov,* or by fax to (202) 395–7285.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

The PRA (44 U.S.C. 3507) requires that agencies inventory and display a current control number assigned by the Director, Office of Management and Budget (OMB), for each agency information collection. § 902.1(b) identifies the location of NOAA regulations for which OMB approval numbers have been issued. Because this final rule adds requirements for scale test report recording and maintenance, § 902.1(b) is revised to reference correctly the section resulting from this final rule.

List of Subjects

15 CFR Part 902

Reporting and recordkeeping requirements.

50 CFR Part 660

Fisheries, Fishing, and Indian fisheries.

Dated: November 15, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 15 CFR part 902 and 50 CFR part 660 are amended as follows:

Title 15—Commerce and Foreign Trade

PART 902—NOAA INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL NUMBERS

■ 1. The authority citation for part 902 continues to read as follows:

Authority: 44 U.S.C. 3501 *et seq.*

■ 2. In § 902.1, in the table in paragraph (b), under the entry ''50 CFR'', revise the entries for ''660.13'', ''660.15'', ''660.17'', ''660.25'', ''660.113'', and ''660.140'' to read as follows:

§ 902.1 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

* * * * *

(b) * * *

CFR part or section where the information collection requirement is located	Current OMB control No. (all numbers begin with 0648–)
* * * * *	
50 CFR:	
* * * * *	
660.13	–0573, –0619, and –0738.
* * * * *	
660.15	–0619 and –0738.
* * * * *	
660.17	–0619 and –0738.
* * * * *	
660.25	–0203, –0620, and –0737.
* * * * *	
660.113	–0271, –0573, –0618, –0619, and –0737.
* * * * *	
660.140	–0593, –0619, –0620, and –0737.
* * * * *	

Title 50—Wildlife and Fisheries

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.11:

■ a. Revise the definitions for ''Base permit'' and ''Electronic fish ticket'';

■ b. Add in alphabetical order the definition for ''Joint registration'';

■ c. Remove the definition for ''Stacking''; and

■ d. Add in alphabetical order the definition for ''Stacking or stacked''.

The revisions and additions read as follows:

§ 660.11 General definitions.

* * * * *

Base permit means a sablefish-endorsed limited entry permit described at § 660.25(b)(3)(i), subpart C, registered for use with a vessel that meets the permit length endorsement requirements appropriate to that vessel, as described at § 660.25(b)(3)(iii), subpart C.

* * * * *

Electronic fish ticket means a web-based form that is used to send landing data to the Pacific States Marine Fisheries Commission. Electronic fish tickets are used to collect information similar to the information required in state fish receiving tickets or landing receipts, but do not replace or change any state requirements.

* * * * *

Joint registration or jointly registered means simultaneously registering both trawl-endorsed and longline or trap/pot-endorsed limited entry permits for use with a single vessel in one of the configurations described at § 660.25(b)(4)(iv).

* * * * *

Stacking or stacked means registering more than one sablefish-endorsed limited entry permit for use with a single vessel (See § 660.25(b)(4)(iii), subpart C).

* * * * *

■ 3. In § 660.12, revise paragraph (a)(6) to read as follows:

§ 660.12 General groundfish prohibitions.

* * * * *

(a) * * *

(6) Take and retain, possess, or land more than a single cumulative limit of a particular species, per vessel, per applicable cumulative limit period, except for sablefish taken in the primary limited entry, fixed gear sablefish season from a vessel authorized to fish in that season, as described at § 660.231, subpart E.

* * * * *

■ 4. In § 660.13, revise paragraph (d) introductory text and paragraphs (d)(5)(ii) and (iii) and (d)(5)(iv)(A)(*24*) to read as follows:

§ 660.13 Recordkeeping and reporting.

* * * * *

(d) *Declaration reporting requirements*—When the operator of a vessel registers a VMS unit with NMFS OLE, the vessel operator must provide NMFS with a declaration report as specified at paragraph (d)(5)(iv) of this section. The operator of any vessel that

has already registered a VMS unit with NMFS OLE but has not yet made a declaration, as specified at paragraph (d)(5)(iv) of this section, must provide NMFS with a declaration report upon request from NMFS OLE.

(5) * * *

(ii) A declaration report will be valid until another declaration report revising the existing gear or fishery declaration is received by NMFS OLE. The vessel operator must send a new declaration report before leaving port on a trip that meets one of the following criteria:

(A) A gear type that is different from the gear type most recently declared for the vessel will be used, or

(B) A vessel will fish in a fishery other than the fishery most recently declared.

(iii) During the period of time that a vessel has a valid declaration report on file with NMFS OLE, it cannot fish with a gear other than a gear type declared by the vessel or fish in a fishery other than the fishery most recently declared.

(iv) * * *

(A) * * *

(*24*) Other, or

* * * * *

■ 5. In § 660.15, revise paragraphs (a) and (d) to read as follows:

§ 660.15 Equipment requirements.

(a) *Applicability.* This section contains the equipment and operational requirements for scales used to weigh catch at sea, scales used to weigh catch at IFQ first receivers, hardware and software for electronic fish tickets, and computer hardware for electronic logbook software. Unless otherwise specified by regulation, the operator or manager must retain, for 3 years, a copy of all records described in this section and make the records available upon request to NMFS staff or an authorized officer.

* * * * *

(d) *Electronic fish tickets.* First receivers are required to meet the hardware and software requirements below.

(1) *Hardware and software requirements.* A personal computer system, tablet, mobile device, or other device that has software (*e.g.* web browser) capable of submitting information over the internet, such that submission to Pacific States Marine Fisheries Commission can be executed effectively.

(2) *Internet access.* The first receiver is responsible for maintaining internet access sufficient to access the web-based interface and submit completed electronic fish ticket forms.

(3) *Maintenance.* The first receiver is responsible for ensuring that all hardware and software required under this subsection are fully operational and functional whenever they receive, purchase, or take custody, control, or possession of groundfish species for which an electronic fish ticket is required. ''Functional'' means that the software requirements and minimum hardware requirements described at paragraphs (d)(1) and (2) of this section are met and submission to Pacific States Marine Fisheries Commission can be executed effectively by the equipment.

(4) *Improving data quality.* Vessel owners and operators, first receivers, or shoreside processor owners, or managers may contact NMFS to request assistance in improving data quality and resolving issues. Requests may be submitted to: Attn: Electronic Fish Ticket Monitoring, National Marine Fisheries Service, West Coast Region, Sustainable Fisheries Division, 7600 Sand Point Way, NE., Seattle, WA 98115.

■ 6. In § 660.25:

■ a. Revise paragraph (b)(1)(v);

■ b. Remove paragraph (b)(3)(iv)(B);

■ c. Redesignate paragraph (b)(3)(iv)(C) as (b)(3)(iv)(B);

■ d. Revise newly redesignated paragraphs (b)(3)(iv)(B)(*3*) and (*4*);

■ e. Add new paragraph (b)(3)(iv)(C);

■ f. Revise paragraphs (b)(3)(v), (b)(4) introductory text, (b)(4)(i)(D), and (b)(4)(iii);

■ g. Redesignate paragraphs (b)(4)(iv) through (b)(4)(ix) as (b)(4)(v) through (b)(4)(x);

■ h. Add a new paragraph (b)(4)(iv);

■ i. Revise newly redesignated paragraphs (b)(4)(v)(A) and (B), (b)(4)(vi)(A) and (B), and (b)(4)(vii)(A); and

■ j. Revise (b)(6).

The revisions and additions read as follows:

§ 660.25 Permits.

* * * * *

(b) * * *

(1) * * *

(v) *Initial administrative determination (IAD).* SFD will make a determination regarding permit endorsements, renewal, replacement, change in permit ownership and change in vessel registration. SFD will notify the permit owner in writing with an explanation of any determination to deny a permit endorsement, renewal, replacement, change in permit ownership or change in vessel registration. The SFD will decline to act on an application for permit endorsement, renewal, replacement, or change in registration of a limited entry permit if the permit is subject to sanction provisions of the Magnuson-Stevens Act at 16 U.S.C. 1858(a) and implementing regulations at 15 CFR part 904, subpart D, apply.

* * * * *

(3) * * *

(iv) * * *

(B) * * *

(*3*) A partnership or corporation will lose the exemptions provided in paragraphs (b)(3)(iv)(B)(*1*) and (*2*) of this section on the effective date of any change in the corporation or partnership from that which existed on November 1, 2000. A ''change'' in the partnership or corporation is defined at § 660.11. A change in the partnership or corporation must be reported to SFD within 15 calendar days of the addition of a new shareholder or partner.

(*4*) Any partnership or corporation with any ownership interest in a limited entry permit with a sablefish endorsement or in the vessel registered to the permit shall document the extent of that ownership interest with NMFS via the Identification of Ownership Interest Form sent to the permit owner through the annual permit renewal process and whenever a change in permit owner, vessel owner, and/or vessel registration occurs as described at paragraph (b)(4)(v) and (vi) of this section. NMFS will not renew a sablefish-endorsed limited entry permit through the annual renewal process described at paragraph (b)(4)(i) of this section, or approve a change in permit owner, vessel owner, and/or vessel registration unless the Identification of Ownership Interest Form has been completed. Further, if NMFS discovers through review of the Identification of Ownership Interest Form that an individual person, partnership, or corporation owns or holds more than 3 permits and is not authorized to do so under paragraph (b)(3)(iv)(B)(*2*) of this section, the individual person, partnership or corporation will be notified and the permits owned or held by that individual person, partnership, or corporation will be void and reissued with the vessel status as ''unidentified'' until the permit owner owns and/or holds a quantity of permits appropriate to the restrictions and requirements described in paragraph (b)(3)(iv)(B)(*2*) of this section. If NMFS discovers through review of the Identification of Ownership Interest Form that a partnership or corporation has had a change in membership since November 1, 2000, as described in paragraph (b)(3)(iv)(B)(*3*) of this section, the partnership or corporation will be notified, NMFS will void any existing permits, and reissue any permits owned and/or held by that partnership or

corporation in ''unidentified'' status with respect to vessel registration until the partnership or corporation is able to register ownership of those permits to persons authorized under this section to own sablefish-endorsed limited entry permits.

* * * * *

(C) *Ownership limitation exemption.* As described in (b)(3)(iv)(B) of this section, no individual person, partnership, or corporation in combination may own and/or hold more than three sablefish-endorsed permits. A vessel owner that meets the qualifying criteria described in paragraph (b)(3)(iv)(C)(*1*) of this section may request an exemption from the ownership limitation.

(*1*) *Qualifying criteria.* The three qualifying criteria for an ownership limitation exemption are: The vessel owner currently has no more than 20 percent ownership interest in a vessel registered to the sablefish endorsed permit, the vessel owner currently has ownership interest in Alaska sablefish individual fishing quota, and the vessel has fished in the past 12-month period in both the West Coast groundfish limited entry fixed gear fishery and the Sablefish IFQ Program in Alaska. The best evidence of a vessel owner having met these qualifying criteria will be state fish tickets or landing receipts from the West Coast states and Alaska. The qualifying vessel owner may seek an ownership limitation exemption for sablefish endorsed permits registered to no more than two vessels.

(*2*) *Application and issuance process for an ownership limitation exemption.* The SFD will make the qualifying criteria and application instructions available online at *www.westcoast.fisheries.noaa.gov/fisheries/groundfish/index.html.* A vessel owner who believes that they may qualify for the ownership limitation exemption must submit evidence with their application showing how their vessel has met the qualifying criteria described at paragraph (b)(3)(iv)(C)(*1*) of this section. The vessel owner must also submit a Sablefish Permit Ownership Limitation Exemption Identification of Ownership Interest form that includes disclosure of percentage of ownership in the vessel and disclosure of individual shareholders in any entity. Paragraph (i) of this section sets out the relevant evidentiary standards and burden of proof. Applications may be submitted at any time to NMFS at: NMFS West Coast Region, Sustainable Fisheries Division, ATTN: Fisheries Permit Office—Sablefish Ownership Limitation Exemption, 7600 Sand Point Way NE., Seattle, WA 98115. After receipt of a complete application, the SFD will issue an IAD in writing to the applicant determining whether the applicant qualifies for the exemption. If an applicant chooses to file an appeal of the IAD, the applicant must follow the appeals process outlined at paragraph (g) of this section and, for the timing of the appeals, at paragraph (g)(4)(ii) of this section.

(*3*) *Exemption status.* If at any time a change occurs relative to the qualifying criteria described at paragraph (b)(3)(iv)(C)(*1*), the vessel owner to whom the ownership limitation exemption applies must notify NMFS within 30 calendar days. If such changes mean the vessel owner no longer meets the qualifying criteria, the ownership limitation exemption becomes automatically null and void 30 calendar days after the date the vessel owner no longer meets the qualifying criteria. At any time, NMFS may request that the vessel owner submit a new exemption application. If NMFS at any time finds the vessel owner no longer meets the qualifying criteria described at paragraph (b)(3)(iv)(C)(*1*) of this section NMFS will issue an IAD, which may be appealed, as described at paragraph (g) of this section.

(*v*) *MS/CV endorsement.* An MS/CV endorsement on a trawl limited entry permit conveys a conditional privilege that allows a vessel registered to it to fish in either the coop or non-coop fishery in the MS Coop Program described at § 660.150, subpart D. The provisions for the MS/CV-endorsed limited entry permit, including eligibility, renewal, change of permit ownership, vessel registration, combinations, accumulation limits, fees, and appeals are described at § 660.150. Each MS/CV endorsement has an associated catch history assignment (CHA) that is permanently linked as originally issued by NMFS and which cannot be divided or registered separately to another limited entry trawl permit. Regulations detailing this process and MS/CV-endorsed permit combinations are outlined in § 660.150(g)(2), subpart D.

* * * * *

(4) *Limited entry permit actions*—renewal, combination, stacking, joint registration, change of permit owner or vessel owner, and change in vessel registration—

(i) * * *

(D) Limited entry permits with sablefish endorsements, as described at paragraph (b)(3)(iv) of this section, will not be renewed until SFD has received complete documentation of permit ownership as required under paragraph (b)(3)(iv)(B)(*4*) of this section.

* * * * *

(iii) *Stacking limited entry permits.* ''Stacking'' limited entry permits, as defined at § 660.11, refers to the practice of registering more than one sablefish-endorsed permit for use with a single vessel. Only limited entry permits with sablefish endorsements may be stacked. Up to 3 limited entry permits with sablefish endorsements may be registered for use with a single vessel during the sablefish primary season described at § 660.231, subpart E. Privileges, responsibilities, and restrictions associated with stacking permits to fish in the sablefish primary fishery are described at § 660.231, subpart E and at paragraph (b)(3)(iv) of this section.

(iv) *Joint registration of limited entry permits*—(A) *General.* ''Joint registration'' of limited entry permits, as defined at § 660.11, is the practice of simultaneously registering both trawl-endorsed and longline or trap/pot-endorsed limited entry permits for use with a single vessel.

(B) *Restrictions.* Subject to vessel size endorsements in paragraph (b)(3)(iii), any limited entry permit with a trawl endorsement and any limited entry permit with a longline or trap/pot endorsement may be jointly registered for use with a single vessel but only in one of the following configurations:

(*1*) a single trawl-endorsed limited entry permit and one, two or three sablefish-endorsed fixed gear (longline and/or fishpot endorsed) limited entry permits; or

(*2*) a single trawl-endorsed limited entry permit and one longline-endorsed limited entry permit for use with a single vessel.

(v) * * *

(A) *General.* Change in permit owner and/or vessel owner applications must be submitted to NMFS with the appropriate documentation described at paragraphs (b)(4)(viii) and (ix) of this section. The permit owner may convey the limited entry permit to a different person. The new permit owner will not be authorized to use the permit until the change in permit owner has been registered with and approved by NMFS. NMFS will not approve a change in permit owner for a limited entry permit with a sablefish endorsement that does not meet the ownership requirements for such permit described at paragraph (b)(3)(iv)(B) of this section. NMFS will not approve a change in permit owner for a limited entry permit with an MS/CV endorsement or an MS permit that

does not meet the ownership requirements for such permit described at § 660.150(g)(3), and § 660.150(f)(3), respectively. NMFS considers the following as a change in permit owner that would require registering with and approval by NMFS, including but not limited to: Selling the permit to another individual or entity; adding an individual or entity to the legal name on the permit; or removing an individual or entity from the legal name on the permit. A change in vessel owner includes any changes to the name(s) of any or all vessel owners, as registered with USCG or a state. The new owner(s) of a vessel registered to a limited entry permit must report any change in vessel ownership to NMFS within 30 calendar days after such change has been registered with the USCG or a state licensing agency.

(B) *Effective date.* The change in permit ownership or change in the vessel holding the permit will be effective on the day the change is approved by NMFS, unless there is a concurrent change in the vessel registered to the permit. Requirements for changing the vessel registered to the permit are described at paragraph (b)(4)(vi) of this section.

* * * * *

(vi) * * *

(A) *General.* A permit may not be used with any vessel other than the vessel registered to that permit. For purposes of this section, a permit change in vessel registration occurs when, through SFD, a permit owner registers a limited entry permit for use with a new vessel. Permit change in vessel registration applications must be submitted to SFD with the appropriate documentation described at paragraph (b)(4)(viii) of this section. Upon receipt of a complete application, and following review and approval of the application, the SFD will reissue the permit registered to the new vessel. Applications to change vessel registration on limited entry permits with sablefish endorsements will not be approved until SFD has received complete documentation of permit ownership as described at paragraph (b)(3)(iv)(B)(*4*) and as required under paragraph (b)(4)(viii) of this section. Applications to change vessel registration on limited entry permits with trawl endorsements or MS permits will not be approved until SFD has received complete EDC forms as required under § 660.114, subpart D.

(B) *Application.* Change in vessel registration applications must be submitted to NMFS with the appropriate documentation described at paragraphs (b)(4)(viii) and (ix) of this section. At a minimum, a permit owner seeking to change vessel registration of a limited entry permit shall submit to NMFS a signed application form and his/her current limited entry permit before the first day of the cumulative limit period in which they wish to fish. If a permit owner provides a signed application and current limited entry permit after the first day of a cumulative limit period, the permit will not be effective until the succeeding cumulative limit period. NMFS will not approve a change in vessel registration until it receives a complete application, the existing permit, a current copy of the USCG 1270, and other required documentation.

* * * * *

(vii) * * *

(A) *General.* A permit owner may designate the vessel registration for a permit as ''unidentified,'' meaning that no vessel has been identified as registered for use with that permit. No vessel is authorized to use a permit with the vessel registration designated as ''unidentified.'' A vessel owner who removes a permit from his vessel and registers that permit as ''unidentified'' is not exempt from VMS requirements at § 660.14, unless specifically authorized by that section. When a permit owner requests that the permit's vessel registration be designated as ''unidentified,'' the transaction is not considered a change in vessel registration for purposes of this section. Any subsequent request by a permit owner to change from the ''unidentified'' status of the permit in order to register the permit with a specific vessel will be considered a change in vessel registration and subject to the restriction on frequency and timing of changes in vessel registration.

* * * * *

(6) *At-sea processing exemptions*—(i) *Sablefish at-sea processing exemption.* No new applications for sablefish at-sea processing exemptions will be accepted. As specified at § 660.212(d)(3), subpart E, vessels are prohibited from processing sablefish at sea that were caught in the sablefish primary fishery without a sablefish at-sea processing exemption. Any sablefish at-sea processing exemptions were issued to a particular vessel and that permit and vessel owner who requested the exemption. The exemption is not part of the limited entry permit. The exemption cannot be registered with any other vessel, vessel owner, or permit owner for any reason. The exemption only applies to at-sea processing of sablefish caught in the sablefish primary fishery. The sablefish at-sea processing exemption will expire upon registration of the vessel to a new owner or if the vessel is totally lost, as defined at § 660.11.

(ii) *Non-whiting at-sea processing exemption.* No new applications for non-whiting at-sea processing exemptions will be accepted. As specified at § 660.112(b)(1)(xii), subpart D, vessels are prohibited from processing non-whiting groundfish at sea that were caught in the Shorebased IFQ Program without a non-whiting at-sea processing exemption. Any non-whiting at-sea processing exemptions were issued to a particular vessel and that permit and/or vessel owner who requested the exemption. The exemption is not part of the limited entry permit. The exemption is not transferable to any other vessel, vessel owner, or permit owner for any reason. The exemption only applies to at-sea processing of non-whiting groundfish caught in the Shorebased IFQ Program. The non-whiting at-sea processing exemption will expire upon registration of the vessel to a new owner or if the vessel is totally lost, as defined at § 660.11.

* * * * *

■ 7. In § 660.55, revise paragraph (f) introductory text and paragraphs (h)(1) and (2) to read as follows:

§ 660.55 Allocations.

* * * * *

(f) *Catch accounting.* Catch accounting refers to how the catch in a fishery is monitored against the allocations described in this section. For species with trawl/nontrawl allocations, catch of those species are counted against the trawl/nontrawl allocations as explained in paragraph (f)(1) of this section. For species with limited entry/open access allocations in a given biennial cycle, catch of those species are counted against the limited entry/open access allocations as explained in paragraph (f)(1)(ii) of this section.

* * * * *

(h) * * *

(1) *Tribal/nontribal allocation.* The sablefish allocation to Pacific coast treaty Indian tribes is identified at § 660.50(f)(2). The remainder is available to the nontribal fishery (limited entry, open access (directed and incidental), and research).

(2) *Between the limited entry and open access fisheries.* The allocation of sablefish after tribal deductions is further reduced by the estimated total mortality of sablefish in research and recreational fisheries; the remaining yield (commercial harvest guideline) is

divided between open access and limited entry fisheries. The limited entry fishery allocation is 90.6 percent of the commercial harvest guideline. The open access allocation is 9.4 percent of the commercial harvest guideline and includes incidental catch in non-groundfish fisheries, or incidental open access.

* * * * *

■ 8. In § 660.60:

■ a. Revise paragraphs (h)(7) introductory text, (h)(7)(i) introductory text, (h)(7)(ii)(A), (h)(7)(ii)(B)(*1*) introductory text, and (h)(7)(ii)(B)(*2*); and

■ b. Add paragraphs (h)(7)(ii)(B)(*3*) and (h)(7)(iii).

The revisions and additions read as follows:

§ 660.60 Specifications and management measures.

* * * * *

(h) * * *

* * * * *

(7) *Crossover provisions.* Crossover provisions apply to three activities: Fishing on different sides of a management line, or fishing in both the limited entry and open access fisheries, or fishing in both the Shorebased IFQ Program and the limited entry fixed gear fishery. NMFS uses different types of management areas for West Coast groundfish management, such as the north-south management areas as defined in § 660.11. Within a management area, a large ocean area with northern and southern boundary lines, trip limits, seasons, and conservation areas follow a single theme. Within each management area, there may be one or more conservation areas, defined at §§ 660.11 and 660.70 through 660.74. The provisions within this paragraph apply to vessels fishing in different management areas. Crossover provisions also apply to vessels that fish in both the limited entry and open access fisheries, or that use open access non-trawl gear while registered to limited entry fixed gear permits. Crossover provisions also apply to vessels that are jointly registered, as defined at § 660.11, fishing in both the Shorebased IFQ Program and the limited entry fixed gear fishery during the same cumulative limit period. Fishery specific crossover provisions can be found in subparts D through F of this part.

(i) *Fishing in management areas with different trip limits.* Trip limits for a species or a species group may differ in different management areas along the coast. The following crossover provisions apply to vessels fishing in different geographical areas that have different cumulative or ''per trip'' trip limits for the same species or species group, with the following exceptions. Such crossover provisions do not apply to: IFQ species (defined at § 660.140(c), subpart D) for vessels that are declared into the Shorebased IFQ Program (see § 660.13(d)(5)(iv)(A), for valid Shorebased IFQ Program declarations); species that are subject only to daily trip limits; or to trip limits for black rockfish off Washington, as described at §§ 660.230(e) and 660.330(e).

* * * * *

(ii) * * *

(A) *Fishing in limited entry and open access fisheries with different trip limits.* Open access trip limits apply to any fishing conducted with open access gear, even if the vessel has a valid limited entry permit with an endorsement for another type of gear. Except such provisions do not apply to IFQ species (defined at § 660.140(c), subpart D) for vessels that are declared into the Shorebased IFQ Program (see § 660.13(d)(5)(iv)(A) for valid Shorebased IFQ Program declarations). A vessel that fishes in both the open access and limited entry fisheries is not entitled to two separate trip limits for the same species. If a vessel has a limited entry permit registered to it at any time during the trip limit period and uses open access gear, but the open access limit is smaller than the limited entry limit, the open access limit may not be exceeded and counts toward the limited entry limit. If a vessel has a limited entry permit registered to it at any time during the trip limit period and uses open access gear, but the open access limit is larger than the limited entry limit, the smaller limited entry limit applies, even if taken entirely with open access gear.

(B) * * *

(*1*) *Vessel registered to a limited entry trawl permit.* To fish with open access gear, defined at § 660.11, a vessel registered to a limited entry trawl permit must make the appropriate fishery declaration, as specified at § 660.14(d)(5)(iv)(A). In addition, a vessel registered to a limit entry trawl permit must remove the permit from their vessel, as specified at § 660.25(b)(4)(vi), unless the vessel will be fishing in the open access fishery under one of the following declarations specified at § 660.13(d):

* * * * *

(*2*) *Vessel registered to a limited entry fixed gear permit(s).* To fish with open access gear, defined at § 660.11, subpart C, a vessel registered to a limit entry fixed gear permit must make the appropriate open access declaration, as specified at § 660.14(d)(5)(iv)(A). Vessels registered to a sablefish-endorsed permit(s) fishing in the sablefish primary season (described at § 660.231, subpart E) may only fish with the gear(s) endorsed on their sablefish-endorsed permit(s) against those limits.

(*3*) *Vessel jointly registered to more than one limited entry permit.* Vessels jointly registered (under the provisions at § 660.25(b)(4)(iv)(B)) may fish with open access gear (defined at § 660.11) if they meet the requirements of both paragraphs (h)(7)(ii)(B)(*1*) and (*2*) of this section.

(iii) *Fishing in both the Shorebased IFQ Program and the limited entry fixed gear fishery for vessels that are jointly registered.*

(A) *Fishing in the Shorebased IFQ Program and limited entry fixed gear fishery with different trip limits.* If a vessel fishes in both the Shorebased IFQ Program and the limited entry fixed gear fishery during a cumulative limit period, they are subject to the most restrictive trip limits for non-IFQ species.

(B) *Fishing in the Shorebased IFQ Program and the limited entry fixed gear sablefish primary fishery with different trip limits.* If a vessel is jointly registered and one or more of the limited entry permits is sablefish endorsed, any sablefish landings made by a vessel declared into the limited entry fixed gear fishery after the start of the sablefish primary fishery count towards the tier limit(s), per regulations at § 660.232(a)(2), subpart E. Any sablefish landings made by a vessel declared into the Shorebased IFQ Program must be covered by quota pounds, per regulations at § 660.112(b), subpart D, and will not count towards the tier limit(s).

■ 9. In § 660.112:

■ a. Revise paragraphs (a)(3)(i) and (ii);

■ b. Remove paragraph (b)(1)(xii)(B); and

■ c. Redesignate paragraph (b)(1)(xii)(C) as (b)(1)(xii)(B).

The revisions read as follows:

§ 660.112 Trawl fishery—prohibitions.

* * * * *

(a) * * *

(3) * * *

(i) Fail to comply with all recordkeeping and reporting requirements at § 660.13, subpart C; including failure to submit information, or submission of inaccurate or false information on any report required at § 660.13(d), subpart C, and § 660.113.

(ii) Falsify or fail to make and/or file, retain or make available any and all reports of groundfish landings,

containing all data, and in the exact manner, required by the regulation at § 660.13, subpart C, or § 660.113.

* * * * *

■ 10. In § 660.113:

■ a. Revise paragraphs (a)(2) and (b)(4)(ii)(A);

■ b. Remove paragraphs (b)(4)(ii)(B) and (C) and redesignate paragraphs (b)(4)(ii)(D) through (F) as (b)(4)(ii)(B) through (D);

■ c. Revise newly redesignated paragraphs (b)(4)(ii)(C)(*5*) introductory text and (b)(4)(ii)(C)(*6*); and

■ d. Revise paragraphs (b)(4)(iii) and (v).

The revisions read as follows:

§ 660.113 Trawl fishery—recordkeeping and reporting.

* * * * *

(a) * * *

(2) All records used in the preparation of records or reports specified in this section or corrections to these reports must be maintained for a period of not less than three years after the date of landing and must be immediately available upon request for inspection by NMFS or authorized officers or others as specifically authorized by NMFS. Records used in the preparation of required reports specified in this section or corrections to these reports that are required to be kept include, but are not limited to, any written, recorded, graphic, electronic, or digital materials as well as other information stored in or accessible through a computer or other information retrieval system; worksheets; weight slips; preliminary, interim, and final tally sheets; receipts; checks; ledgers; notebooks; diaries; spreadsheets; diagrams; graphs; charts; tapes; disks; or computer printouts. All relevant records used in the preparation of electronic fish ticket reports or corrections to these reports, including dock tickets, must be maintained for a period of not less than three years after the date of landing and must be immediately available upon request for inspection by NMFS or authorized officers or others as specifically authorized by NMFS.

(b) * * *

(4) * * *

(ii) * * *

(A) Include, as part of each electronic fish ticket submission, the actual scale weight for each groundfish species as specified by requirements at § 660.15(c), and the vessel identification number. Use, and maintain in good working order, hardware, software, and internet access as specified at § 660.15(d).

* * * * *

(C) * * *

(*5*) Prior to submittal, three copies of the printed, signed, electronic fish ticket must be produced by the IFQ first receiver and a copy provided to each of the following:

* * * * *

(*6*) After review and signature, the electronic fish ticket must be submitted within 24 hours of the completion of the offload, as specified in paragraph (b)(4)(ii)(B) of this section.

* * * * *

(iii) *Revising a submission.* In the event that a data error is found, electronic fish ticket submissions must be revised by resubmitting the revised form electronically. Electronic fish tickets are to be used for the submission of final data. Preliminary data, including estimates of fish weights or species composition, shall not be submitted on electronic fish tickets.

* * * * *

(v) *Reporting requirements when a temporary waiver has been granted.* IFQ first receivers that have been granted a temporary waiver from the requirement to submit electronic fish tickets must submit on paper the same data as is required on electronic fish tickets within 24 hours of the date received during the period that the waiver is in effect. Paper fish tickets must be sent by facsimile to NMFS, West Coast Region, Sustainable Fisheries Division, 206–526–6736 or by delivering it in person to 7600 Sand Point Way NE., Seattle, WA 98115. The requirements for submissions of paper tickets in this paragraph are separate from, and in addition to existing state requirements for landing receipts or fish receiving tickets.

* * * * *

§ 660.114 [Amended]

■ 11. Amend § 660.114(b) by removing the words ''§ 660.25(b)(4)(v)'' wherever they appear and adding in their place the words ''§ 660.25(b)(4)(vi)''.

■ 12. In § 660.212, revise paragraph (a)(2), add paragraphs (a)(3) through (5), and revise paragraphs (b) and (d)(1) and (2) to read as follows:

§ 660.212 Fixed gear fishery—prohibitions.

* * * * *

(a) * * *

(2) Take and retain, possess, or land more than a single cumulative limit of a particular species, per vessel, per applicable cumulative limit period, except for sablefish taken in the limited entry fixed gear sablefish primary season from a vessel authorized to fish in that season, as described at § 660.231 and except for IFQ species taken in the Shorebased IFQ Program from a vessel authorized under gear switching provisions as described at § 660.140(k).

(3) Transport fish, if that fish includes any amount of sablefish, away from the point of landing before being sorted and weighed by federal groundfish species or species group, and recorded for submission on an electronic fish ticket under § 660.213(e). (If fish will be transported to a different location for processing, all sorting and weighing to federal groundfish species groups must occur before transporting the fish away from the point of landing).

(4) Mix fish from more than one landing, where one or more of the landings includes any sablefish, prior to the fish being sorted and weighed for reporting on an electronic fish ticket under § 660.213(e).

(5) Process, sell, or discard any fish, if that fish includes any amount of sablefish, that has not been accounted for on an electronic fish ticket under § 660.213(e).

(b) *Recordkeeping and reporting.* (1) Fail to comply with all recordkeeping and reporting requirements at § 660.13, subpart C; including failure to submit information, or submission of inaccurate or false information on any report required at § 660.13(d), subpart C, and § 660.213.

(2) Falsify or fail to make and/or file, retain or make available any and all reports of groundfish landings that include sablefish, containing all data, and in the exact manner, required by the regulation at § 660.13, subpart C, or § 660.213.

* * * * *

(d) *Sablefish fisheries.* (1) Take and retain, possess or land sablefish under the tier limits provided for the limited entry, fixed gear sablefish primary season, described in § 660.231(b)(3), from a vessel that is not registered to a limited entry permit with a sablefish endorsement.

(2) Take and retain, possess or land sablefish in the sablefish primary season, described at § 660.231(b), unless the owner of the limited entry permit registered for use with that vessel and authorizing the vessel to fish in the sablefish primary season is on board that vessel. Exceptions to this prohibition are provided at § 660.231(b)(4)(i) and (ii).

* * * * *

■ 13. In § 660.213, revise paragraph (d)(1) and add paragraph (e) to read as follows:

§ 660.213 Fixed gear fishery—recordkeeping and reporting.

* * * * *

(d) * * *

(1) Any person landing groundfish must retain on board the vessel from

which groundfish are landed, and provide to an authorized officer upon request, copies of any and all reports of groundfish landings containing all data, and in the exact manner, required by the applicable state law throughout the cumulative limit period during which a landing occurred and for 15 days thereafter. All relevant records used in the preparation of electronic fish ticket reports or corrections to these reports, including dock tickets, must be maintained for a period of not less than three years after the date of landing and must be immediately available upon request for inspection by NMFS or authorized officers or others as specifically authorized by NMFS.

* * * * *

(e) *Electronic fish ticket.* The first receiver, as defined at § 660.11, subpart C, of fish, if that fish includes any amount of sablefish, from a limited entry fixed gear vessel, is responsible for compliance with all reporting requirements described in this paragraph. Per requirements at § 660.212(a), all fish, if that fish includes any amount of sablefish, must be reported via electronic fish ticket. When used in this paragraph, submit means to transmit final electronic fish ticket information via web-based form or, if a waiver is granted, by paper form. When used in this paragraph, record means the action of documenting electronic fish ticket information in any written format.

(1) *Required information.* All first receivers must provide the following types of information: Date of landing, vessel that made the landing, vessel identification number, limited entry permit number(s), name of the vessel operator, gear type used, receiver, actual weights of species landed listed by species or species group including species with no value, condition landed, number of salmon by species, number of Pacific halibut, ex-vessel value of the landing by species, fish caught inside/outside 3 miles or both, and any other information deemed necessary by the Regional Administrator (or designee) as specified on the appropriate electronic fish ticket form.

(2) *Submissions.* The first receiver must:

(i) Include, as part of each electronic fish ticket submission, the actual scale weight for each groundfish species as specified by requirements at § 660.15(c), the vessel identification number, and the limited entry permit number. Use and maintain, for the purposes of submitting electronic fish tickets, equipment as specified at § 660.15(d).

(ii) Submit a completed electronic fish ticket(s) no later than 24 hours after the date of landing, unless a waiver of this requirement has been granted under provisions specified at paragraph (e)(4) of this section.

(iii) Sablefish from a single landing in the limited entry fixed gear sablefish primary fishery may be counted against more than one stacked permit, or against a tier limit(s) and the cumulative trip limit in the DTL fishery. For vessels with stacked limited entry sablefish permits, defined at § 660.12, sablefish may be divided for the purposes of apportioning the sablefish amongst the remaining tier limits associated with each of the stacked permits; in that instance the electronic fish ticket(s) must record all pertinent limited entry permit numbers and apportion sablefish landed against each tier limit. Per regulations at § 660.232(a)(2) a vessel may apportion sablefish catch between the remainder of its tier limit(s) and against the applicable DTL limits; in that instance the electronic fish ticket must be used to apportion sablefish landed against the tier(s) from the sablefish landed against cumulative trip limits of the DTL fishery. If sablefish is apportioned in either of the ways described in this paragraph, the electronic fish ticket must meet the process and submittal requirements specified in paragraphs (e)(iv) and (v) of this section. In addition, the owner-on-board, unless exempted under regulations at § 660.231(a)(4), must review and sign documentation of the landing, as described in paragraphs (e)(2)(iv) and (v) of this section.

(iv) If electronic fish tickets will be submitted prior to processing or transport, follow these process and submittal requirements:

(A) After completing the landing, the electronic fish ticket information must be recorded immediately.

(B) Prior to submittal of the electronic fish ticket, the information recorded for the electronic fish ticket must be reviewed by the vessel operator who delivered the fish and the port sampler, if one is present. If required by regulations at § 660.231(a)(4), the owner-on-board must also review the information recorded on the electronic fish ticket prior to submittal.

(C) After review, the receiver and the vessel operator must sign a printed hard copy of the electronic fish ticket or, if the landing occurs outside of business hours, the original dock ticket. If required by regulations at § 660.231(a)(4), the owner-on-board must also sign a printed copy of the electronic fish ticket or, if the landing occurs outside of business hours, the original dock ticket.

(D) Prior to submittal, three copies of the signed electronic fish ticket must be produced by the receiver and a copy provided to each of the following:

(*1*) The vessel operator and/or the owner-on-board,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(E) After review and signature, the electronic fish ticket must be submitted within 24 hours after the date of landing, as specified in paragraph (e)(2)(ii) of this section.

(v) If electronic fish tickets will be submitted after transport, follow these process and submittal requirements:

(A) The vessel name, limited entry permit number, and the electronic fish ticket number must be recorded on each dock ticket related to that landing.

(B) Upon completion of the dock ticket, but prior to transfer of the landing to another location, the dock ticket information that will be used to complete the electronic fish ticket must be reviewed by the vessel operator who delivered the fish. If the electronic fish ticket will report landings of sablefish in the sablefish primary fishery, the owner-on-board, unless exempted under regulations at § 660.231(a)(4), must review the information recorded on the dock ticket prior to transfer of the landing to another location.

(C) After review, the first receiver and the vessel operator must sign the original copy of each dock ticket related to that landing. If a dock ticket includes landings of sablefish in the sablefish primary fishery, the owner-on-board, unless exempted under regulations at § 660.231(a)(4), must sign the original copy of that dock ticket.

(D) Prior to submittal of the electronic fish ticket, three copies of the signed dock ticket must be produced by the first receiver and a copy provided to each of the following:

(*1*) The vessel operator and/or the owner-on-board,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(E) Based on the information contained in the signed dock ticket, the electronic fish ticket must be completed and submitted within 24 hours of the completion of the landing, as specified in paragraph (e)(2)(ii) of this section.

(F) Three copies of the electronic fish ticket must be produced by the first receiver and a copy provided to each of the following:

(*1*) The vessel operator and/or the owner-on-board,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(3) *Revising a submission.* In the event that a data error is found, electronic fish ticket submissions must be revised by resubmitting the revised form electronically. Electronic fish tickets are to be used for the submission of final data. Preliminary data, including estimates of fish weights or species composition, shall not be submitted on electronic fish tickets.

(4) *Waivers for submission.* On a case-by-case basis, a temporary written waiver of the requirement to submit electronic fish tickets may be granted by the Assistant Regional Administrator or designee if he/she determines that circumstances beyond the control of a receiver would result in inadequate data submissions using the electronic fish ticket system. The duration of the waiver will be determined on a case-by-case basis.

(5) *Reporting requirements when a temporary waiver has been granted.* Receivers that have been granted a temporary waiver from the requirement to submit electronic fish tickets must submit on paper the same data as is required on electronic fish tickets within 24 hours of the date received during the period that the waiver is in effect. Paper fish tickets must be sent by facsimile to NMFS, West Coast Region, Sustainable Fisheries Division, 206–526–6736 or by delivering it in person to 7600 Sand Point Way NE., Seattle, WA 98115. The requirements for submissions of paper tickets in this paragraph are separate from, and in addition to existing state requirements for landing receipts or fish receiving tickets.

■ 14. In § 660.231, revise paragraphs (a), (b)(1) through (3), and (b)(4) introductory text to read as follows:

§ 660.231 Limited entry fixed gear sablefish primary fishery.

* * * * *

(a) *Sablefish endorsement.* In addition to requirements pertaining to fishing in the limited entry fixed gear fishery (described in subparts C and E), a vessel may not fish in the sablefish primary season for the limited entry fixed gear fishery, unless at least one limited entry permit with both a gear endorsement for longline or trap (or pot) gear and a sablefish endorsement is registered for use with that vessel. Permits with sablefish endorsements are assigned to one of three tiers, as described at § 660.25(b)(3)(iv), subpart C.

(b) * * *

(1) *Season dates.* North of 36° N. lat., the sablefish primary season for the limited entry, fixed gear, sablefish-endorsed vessels begins at 12 noon local time on April 1 and closes at 12 noon local time on October 31, or closes for an individual vessel owner when the tier limit for the sablefish endorsed permit(s) registered to the vessel has been reached, whichever is earlier, unless otherwise announced by the Regional Administrator through the routine management measures process described at § 660.60(c).

(2) *Gear type.* During the primary season, when fishing against primary season cumulative limits, each vessel authorized to fish in that season under paragraph (a) of this section may fish for sablefish with any of the gear types, except trawl gear, endorsed on at least one of the sablefish endorsed permits registered for use with that vessel.

(3) *Cumulative limits.* (i) A vessel fishing in the primary season will be constrained by the sablefish cumulative limit associated with each of the sablefish endorsed permits registered for use with that vessel. During the primary season, each vessel authorized to fish in that season under paragraph (a) of this section may take, retain, possess, and land sablefish, up to the cumulative limits for each of the sablefish endorsed permits registered for use with that vessel. If a vessel is stacking permits, that vessel may land up to the total of all cumulative limits announced in this paragraph for the tiers for those permits, except as limited by paragraph (b)(3)(ii) of this section. Up to 3 sablefish endorsed permits may be stacked for use with a single vessel during the primary season; thus, a single vessel may not take and retain, possess or land more than 3 primary season sablefish cumulative limits in any one year. Per regulations at § 660.12(a)(6), subpart C, all other groundfish landings are subject to per vessel trip limits. In 2015, the following annual limits are in effect: Tier 1 at 41,175 (18,677 kg), Tier 2 at 18,716 lb (8,489 kg), and Tier 3 at 10,695 lb (4,851 kg). For 2016 and beyond, the following annual limits are in effect: Tier 1 at 45,053 lb (20,436 kg), Tier 2 at 20,479 lb (9,289 kg), and Tier 3 at 11,702 lb (5,308 kg).

(ii) If a sablefish endorsed permit is registered to more than one vessel during the primary season in a single year, the second vessel may only take the portion of the cumulative limit for that permit that has not been harvested by the first vessel to which the permit was registered. The combined primary season sablefish landings for all vessels registered to that permit may not exceed the cumulative limit for the tier associated with that permit.

(iii) A cumulative trip limit is the maximum amount of sablefish that may be taken and retained, possessed, or landed per vessel in a specified period of time, with no limit on the number of landings or trips.

(iv) *Incidental Pacific halibut retention north of Pt. Chehalis, WA (46°53.30′ N. lat.).* From April 1 through October 31, vessels authorized to participate in the sablefish primary fishery, licensed by the International Pacific Halibut Commission for commercial fishing in Area 2A (waters off Washington, Oregon, California), and fishing with longline gear north of Pt. Chehalis, WA (46°53.30′ N. lat.) may possess and land up to the following cumulative limits: 110 lb (50 kg) dressed weight of Pacific halibut for every 1,000 pounds (454 kg) dressed weight of sablefish landed and up to 2 additional Pacific halibut in excess of the 110-pounds-per-1,000-pound ratio per landing. ''Dressed'' Pacific halibut in this area means halibut landed eviscerated with their heads on. Pacific halibut taken and retained in the sablefish primary fishery north of Pt. Chehalis may only be landed north of Pt. Chehalis and may not be possessed or landed south of Pt. Chehalis.

(4) *Owner-on-board requirement.* Any person who owns or has ownership interest in a limited entry permit with a sablefish endorsement, as described at § 660.25(b)(3), subpart C, must be on board the vessel registered for use with that permit at any time that the vessel has sablefish on board the vessel that count toward that permit's cumulative sablefish landing limit. This person must carry government issued photo identification while aboard the vessel. This person must review and sign a printed copy of the electronic fish ticket(s) or dock ticket, as described at § 660.213(d), unless this person qualified for the owner-on-board exemption. A permit owner is qualified for the owner-on-board exemption and not obligated to be on board the vessel registered for use with the sablefish-endorsed limited entry permit during the sablefish primary season if:

* * * * *

■ 15. Section 660.232 is revised to read as follows:

§ 660.232 Limited entry daily trip limit (DTL) fishery for sablefish.

(a) *Limited entry DTL fisheries both north and south of 36° N. lat.* (1) Before the start of the sablefish primary season, all sablefish landings made by a vessel declared into the limited entry fixed gear fishery and authorized by § 660.231(a) to fish in the sablefish primary season will be subject to the restrictions and limits of the limited entry DTL fishery for sablefish specified in this section and which is governed by

routine management measures imposed under § 660.60(c), subpart C.

(2) Following the start of the primary season, all sablefish landings made by a vessel declared into the limited entry fixed gear fishery and authorized by § 660.231(a) to fish in the primary season will count against the primary season cumulative limit(s) associated with the sablefish-endorsed permit(s) registered for use with that vessel. A vessel that is eligible to fish in the sablefish primary season may fish in the DTL fishery for sablefish once that vessels' primary season sablefish limit(s) have been landed, or after the close of the primary season, whichever occurs earlier (as described at § 660.231(b)(1). If the vessel continues to fish in the limited entry fixed gear fishery for any part of the remaining fishing year, any subsequent sablefish landings by that vessel will be subject to the restrictions and limits of the limited entry DTL fishery for sablefish.

(3) Vessels registered for use with a limited entry fixed gear permit that does not have a sablefish endorsement may fish in the limited entry DTL fishery, consistent with regulations at § 660.230, for as long as that fishery is open during the fishing year, subject to routine management measures imposed under § 660.60(c), Subpart C. DTL limits for the limited entry fishery north and south of 36° N. lat. are provided in Tables 2 (North) and 2 (South) of this subpart.

(b) A vessel that is jointly registered, and has participated or will participate in both the limited entry fixed gear fishery and the Shorebased IFQ Program during the fishing year, is subject to crossover provisions described at § 660.60(h)(7), subpart C.

■ 16. In § 660.312:

■ a. Add paragraphs (a)(3) through (5);

■ b. Redesignate paragraphs (b) and (c) as (c) and (d); and

■ c. Add a new paragraph (b).

The additions read as follows:

§ 660.312 Open access fishery—prohibitions.

* * * * *

(a) * * *

(3) Transport fish, if that fish includes any amount of sablefish, away from the point of landing before being sorted and weighed by federal groundfish species or species group, and recorded for submission on an electronic fish ticket under § 660.313(f). (If fish will be transported to a different location for processing, all sorting and weighing to federal groundfish species groups must occur before transporting the fish away from the point of landing).

(4) Mix fish from more than one landing, where one or more of the landings includes any amount of sablefish, prior to the fish being sorted and weighed for reporting on an electronic fish ticket under § 660.313(f).

(5) Process, sell, or discard any fish if that fish includes any amount of sablefish, that has not been accounted for on an electronic fish ticket under § 660.313(f).

(b) *Recordkeeping and reporting.* (1) Fail to comply with all recordkeeping and reporting requirements at § 660.13, subpart C, including failure to submit information, or submission of inaccurate or false information on any report required at § 660.13(d), subpart C, and § 660.313.

(2) Falsify or fail to make and/or file, retain or make available any and all reports of groundfish landings that include sablefish, containing all data, and in the exact manner, required by the regulation at § 660.13, subpart C, or § 660.313.

* * * * *

■ 17. Section 660.313 is revised to read as follows:

§ 660.313 Open access fishery—recordkeeping and reporting.

(a) *General.* General reporting requirements specified at § 660.13(a) through (c), subpart C, apply to the open access fishery.

(b) *Declaration reports for vessels using nontrawl gear.* Declaration reporting requirements for open access vessels using nontrawl gear (all types of open access gear other than non-groundfish trawl gear) are specified at § 660.13(d), subpart C.

(c) *Declaration reports for vessels using non-groundfish trawl gear.* Declaration reporting requirements for open access vessels using non-groundfish trawl gear are specified at § 660.13(d), subpart C.

(d) *VMS requirements for open access fishery vessels.* VMS requirements for open access fishery vessels are specified at § 660.14, subpart C.

(e) *Retention of records.* Any person landing groundfish must retain on board the vessel from which groundfish is landed, and provide to an authorized officer upon request, copies of any and all reports of groundfish landings containing all data, and in the exact manner, required by the applicable state law throughout the cumulative limit period during which a landing occurred and for 15 days thereafter. All relevant records used in the preparation of electronic fish ticket reports or corrections to these reports, including dock tickets, must be maintained for a period of not less than three years after the date of landing and must be immediately available upon request for inspection by NMFS or authorized officers or others as specifically authorized by NMFS.

(f) *Electronic fish ticket.* The first receiver, as defined at § 660.11, subpart C, of fish, if that fish includes any amount of sablefish, from an open access vessel, is responsible for compliance with all reporting requirements described in this paragraph. Per requirements at § 660.312(a), all fish, if that fish includes any amount of sablefish, must be reported via electronic fish ticket. When used in this paragraph, submit means to transmit final electronic fish ticket information via web-based form or, if a waiver is granted, by paper form. When used in this paragraph, record means the action of documenting electronic fish ticket information in any written format.

(1) *Required information.* All first receivers must provide the following types of information: Date of landing, vessel that made the landing, vessel identification number, name of the vessel operator, gear type used, receiver, actual weights of species landed listed by species or species group including species with no value, condition landed, number of salmon by species, number of Pacific halibut, ex-vessel value of the landing by species, fish caught inside/outside 3 miles or both, and any other information deemed necessary by the Regional Administrator (or designee) as specified on the appropriate electronic fish ticket form.

(2) *Submissions.* The first receiver must:

(i) Include, as part of each electronic fish ticket submission, the actual scale weight for each groundfish species as specified by requirements at § 660.15(c) and the vessel identification number. Use and maintain, for the purposes of submitting electronic fish tickets, equipment as specified at § 660.15(d).

(ii) Submit a completed electronic fish ticket no later than 24 hours after the date of landing, unless a waiver of this requirement has been granted under provisions specified at paragraph (f)(4) of this section.

(iii) If electronic fish tickets will be submitted prior to processing or transport, follow these process and submittal requirements:

(A) After completing the landing, the electronic fish ticket information must be recorded immediately.

(B) Prior to submittal of the electronic fish ticket, the information recorded for the electronic fish ticket must be reviewed by the vessel operator who

delivered the fish and the port sampler, if one is present.

(C) After review, the receiver and the vessel operator must sign a printed hard copy of the electronic fish ticket or, if the landing occurs outside of business hours, the original dock ticket.

(D) Prior to submittal, three copies of the signed electronic fish ticket must be produced by the receiver and a copy provided to each of the following:

(*1*) The vessel operator,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(E) After review and signature, the electronic fish ticket must be submitted within 24 hours after the date of landing, as specified in paragraph (f)(2)(ii) of this section.

(iv) If electronic fish tickets will be submitted after transport, follow these process and submittal requirements:

(A) The vessel name and the electronic fish ticket number must be recorded on each dock ticket related to that landing.

(C) Upon completion of the dock ticket, but prior to transfer of the offload to another location, the dock ticket information that will be used to complete the electronic fish ticket must be reviewed by the vessel operator who delivered the fish.

(D) After review, the first receiver and the vessel operator must sign the original copy of each dock ticket related to that landing.

(E) Prior to submittal of the electronic fish ticket, three copies of the signed dock ticket must be produced by the first receiver and a copy provided to each of the following:

(*1*) The vessel operator,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(F) Based on the information contained in the signed dock ticket, the electronic fish ticket must be completed and submitted within 24 hours of the date of landing, as specified in paragraph (f)(2)(ii) of this section.

(G) Three copies of the electronic fish ticket must be produced by the first receiver and a copy provided to each of the following:

(*1*) The vessel operator,

(*2*) The state of origin if required by state regulations, and

(*3*) The first receiver.

(3) *Revising a submission.* In the event that a data error is found, electronic fish ticket submissions must be revised by resubmitting the revised form electronically. Electronic fish tickets are to be used for the submission of final data. Preliminary data, including estimates of fish weights or species composition, shall not be submitted on electronic fish tickets.

(4) *Waivers for submission.* On a case-by-case basis, a temporary written waiver of the requirement to submit electronic fish tickets may be granted by the Assistant Regional Administrator or designee if he/she determines that circumstances beyond the control of a receiver would result in inadequate data submissions using the electronic fish ticket system. The duration of the waiver will be determined on a case-by-case basis.

(5) *Reporting requirements when a temporary waiver has been granted.* Receivers that have been granted a temporary waiver from the requirement to submit electronic fish tickets must submit on paper the same data as is required on electronic fish tickets within 24 hours of the date of landing during the period that the waiver is in effect. Paper fish tickets must be sent by facsimile to NMFS, West Coast Region, Sustainable Fisheries Division, 206–526–6736 or by delivering it in person to 7600 Sand Point Way NE., Seattle, WA 98115. The requirements for submissions of paper tickets in this paragraph are separate from, and in addition to existing state requirements for landing receipts or fish receiving tickets.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 902

50 CFR Part 679

[Docket No. 151113999–6999–02]

RIN 0648–BF54

Fisheries of the Exclusive Economic Zone Off Alaska; Bering Sea and Aleutian Islands Management Area; American Fisheries Act; Amendment 113

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement Amendment 113 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP). This final rule modifies the management of Bering Sea and Aleutian Islands (BSAI) Pacific cod fishery to set aside a portion of the Aleutian Islands Pacific cod total allowable catch for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch for processing to a shoreside processor located on land west of 170° W. longitude in the Aleutian Islands (''Aleutian Islands shoreplant''). The harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year. This harvest set-aside provides the opportunity for vessels, Aleutian Islands shoreplants, and the communities where Aleutian Islands shoreplants are located to receive benefits from a portion of the Aleutian Islands Pacific cod fishery. The notification and performance requirements preserve an opportunity for the complete harvest of the BSAI Pacific cod resource if the set-aside is not fully harvested. This final rule is intended to promote the goals and objectives of Amendment 113, the FMP, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws.

DATES: Effective on November 23, 2016.

ADDRESSES: Electronic copies of Amendment 113 to the FMP, the Environmental Assessment (EA), Regulatory Impact Review (RIR), Initial Regulatory Flexibility Analysis (IRFA), and Finding of No Significant Impact (FONSI) prepared for this action, collectively ''the Analysis,'' and the proposed rule may be obtained from *http://www.regulations.gov* or from the NMFS Alaska Region Web site at *http://alaskafisheries.noaa.gov*.

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this rule may be submitted to NMFS Alaska Region, P.O. Box 21668, Juneau, AK 99802–1668, Attn: Ellen Sebastian, Records Officer; in person at NMFS Alaska Region, 709 West 9th Street, Room 420A, Juneau, AK; by email to *OIRA_Submission@omb.eop.gov;* or by fax to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Julie Scheurer, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background

NMFS manages the groundfish and Pacific cod fisheries in the Exclusive Economic Zone of the BSAI under the FMP. The North Pacific Fishery Management Council (Council) prepared, and the Secretary of Commerce approved, the FMP pursuant to the Magnuson-Stevens Fishery

Conservation and Management Act (Magnuson-Stevens Act) and other applicable laws. Regulations implementing the FMP appear at 50 CFR part 679. General regulations that pertain to U.S. fisheries appear at 50 CFR part 600.

NMFS published the Notice of Availability of Amendment 113 on July 19, 2016 (81 FR 46883), with comments invited through September 19, 2016. NMFS published the proposed rule to implement Amendment 113 on August 1, 2016 (81 FR 50444), with comments invited through August 31, 2016. The Secretary approved Amendment 113 on October 17, 2016. NMFS received 35 unique comments on Amendment 113 and the proposed rule from 16 different commenters. A summary of these comments and the responses by NMFS are provided under the heading ''Responses to Comments'' below. These comments resulted in two minor changes from the proposed rule. One additional change to this final rule is not in response to comments, but is an administrative change that NMFS deemed necessary for timely implementation of this final rule.

A detailed review of the BSAI Pacific cod fishery, provisions of Amendment 113, the proposed regulations to implement Amendment 113, and the rationale for these regulations is provided in the preamble to the proposed rule (81 FR 50444, August 1, 2016) and is not repeated here. The preamble to this final rule briefly reviews the regulatory changes made by this final rule.

This final rule modifies the BSAI Pacific cod fishery to set aside a portion of the Aleutian Islands Pacific cod total allowable catch (TAC) for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch to Aleutian Islands shoreplants for processing. The harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year.

Table 3 in the proposed rule preamble (81 FR 50444, August 1, 2016) describes the Overfishing Levels (OFLs), the Acceptable Biological Catches (ABCs), TACs, the Western Alaska Community Development Quota (CDQ) and non-CDQ fishery sector allocations, and seasonal apportionments of BSAI Pacific cod in 2017, the first year of implementation of this final rule. Each of these terms is described in the preamble to the proposed rule. Table 3 of the proposed rule preamble includes data from Tables 2 and 9 in the 2016 and 2017 final harvest specifications for the BSAI groundfish fisheries (81 FR 14773, March 18, 2016).

Harvesting and Processing of Pacific Cod in the Aleutian Islands

A variety of vessels using a variety of gear types harvest the Aleutian Islands Pacific cod TAC each year. Trawl catcher vessels (CVs) and trawl catcher processors (CPs) have been among the most active participants in the Aleutian Islands Pacific cod fishery. Hook-and-line CPs have consistently participated in the Aleutian Islands Pacific cod fishery. Non-trawl CVs have harvested only a very small portion of the Pacific cod from the Aleutian Islands. The proposed rule and Section 2.6.6 of the Analysis provide additional detail on the types of vessels harvesting Pacific cod in the Aleutian Islands.

Trawl CVs deliver their catch of Aleutian Islands Pacific cod to several types of processors in the Aleutian Islands: CPs acting as motherships (vessels that process Pacific cod delivered by trawl CVs); stationary floating processors anchored in specific locations that receive and process catch on board but do not harvest and process their own catch; and shoreside processing facilities that are physically located on land west of 170° W. longitude in the Aleutian Islands (defined as ''Aleutian Islands shoreplant'' in this final rule).

Currently, Aleutian Islands shoreplants that may be capable of receiving Aleutian Islands Pacific cod from CVs are located in the communities of Adak and Atka. Although the Atka shoreplant has not received and processed Aleutian Islands Pacific cod, the shoreplant in Adak has received and processed relatively large amounts of Pacific cod. The proposed rule and Section 2.7.1 of the Analysis have additional detail on the delivery and processing of Aleutian Islands Pacific cod.

Since 2008, trawl CVs have primarily delivered their catch of Aleutian Islands Pacific cod to a small group of CPs that operate as motherships. As deliveries of Aleutian Islands Pacific cod harvest from trawl CVs to CPs operating as motherships have increased in recent years, the amount of trawl CV harvest delivered to Aleutian Islands shoreplants has decreased. Additionally, CPs operating as motherships have demonstrated the capacity to process the entire TAC of Pacific cod in the Aleutian Islands in years when no Aleutian Islands shoreplant is in operation. This final rule is intended in part to mitigate the risk that CVs, Aleutian Islands shoreplants, and the communities in which they are located will be preempted from participating in the Aleutian Islands Pacific cod fishery by CPs.

The proposed rule and Section 2.6 of the Analysis provide additional description of the factors that have affected the harvesting and processing of Pacific cod in the Aleutian Islands.

Need for This Final Rule

A thorough description of the history and need for this action is provided in the proposed rule and the Analysis prepared for this action and is not repeated here. The Council adopted its preferred alternative for Amendment 113 at its October 2015 meeting.

Since 2008, Aleutian Islands fishing communities, and specifically the community of Adak and its shoreplant, have seen a decrease in the amount of Pacific cod being harvested and delivered. The amount of Pacific cod delivered to Aleutian Islands shoreplants has been highly variable, which is not conducive to stable shoreside operations. Several factors have contributed to this instability, and therefore the need for this action, including decreased Pacific cod biomass in the Aleutian Islands subarea; the establishment of separate OFLs, ABCs, and TACs for Pacific cod in the Bering Sea and the Aleutian Islands; changing Steller sea lion protection measures; and changing fishing practices in part resulting from rationalization programs that allocate catch to specific fishery participants.

This rule establishes a harvest set-aside in which a portion of the Aleutian Islands Pacific cod TAC will be available for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch to Aleutian Islands shoreplants for processing. This harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year.

The Council determined and NMFS agrees that a harvest set-aside is needed for several reasons: The TAC for Aleutian Islands Pacific cod has been significantly lower than predicted so that less Pacific cod is available for harvest; the rationalization programs, and particularly the Amendment 80 Program, have allowed an influx of processing capacity into the Aleutian Islands Pacific cod fishery; and the Aleutian Islands communities and shoreplants (Adak) have received almost all of their total first wholesale gross revenue from Aleutian Islands Pacific cod.

This final rule strikes a balance between providing protections for

fishing communities and ensuring that the fishery sectors have a meaningful opportunity to fully harvest their BSAI Pacific cod allocations by including several thresholds to prevent a portion of the Aleutian Islands Pacific cod TAC from being unharvested. This final rule will provide social and economic benefits to, and promote stability in, fishery-dependent fishing communities in the Aleutian Islands and is responsive to changes in management of the Aleutian Islands Pacific cod fishery such as rationalization programs, decreasing biomass of Pacific cod, and Steller sea lion protection measures that necessitate putting protections in place to protect other non-rationalized fisheries.

This final rule does not modify existing harvest allocations of BSAI Pacific cod to participants in the CDQ Program. This final rule does not modify existing harvest allocations of BSAI Pacific cod made to the nine non-CDQ fishery sectors defined in § 679.20(a)(7)(ii)(A). Although the nine non-CDQ sectors will continue to receive their existing harvest allocations of BSAI Pacific cod, each sector's ability to harvest a portion of its BSAI Pacific cod allocation in the Aleutian Islands may be affected by this rule.

The Aleutian Islands shoreplants in Adak and Atka currently are not processing Aleutian Islands Pacific cod. However, the protection measures and harvest set-aside in this final rule will minimize the risk of exclusion from, and maintain opportunities for participation in, the Aleutian Islands Pacific cod fishery by Aleutian Islands harvesters, shoreplants, and communities when those Aleutian Islands communities are able to accept deliveries of and process Aleutian Islands Pacific cod.

This final rule revises regulations to provide additional opportunities for harvesters to deliver Aleutian Islands Pacific cod to Aleutian Islands shoreplants. Recent Aleutian Islands Pacific cod TACs have not been sufficient to allow all sectors to prosecute the Aleutian Islands Pacific cod fishery at their historical levels. Without protections, Aleutian Islands harvesters, shoreplants, and fishing communities may be preempted from the fishery by harvests by CPs, or by harvests from CVs delivering their catch to CPs.

Because of their remote location and limited economic alternatives, Aleutian Islands communities rely on harvesting and processing of the nearby fishery resources to support and sustain the social and economic welfare of their communities. This final rule is intended to be directly responsive to National Standard 8 of the Magnuson-Stevens Act that states conservation and management measures shall take into account the importance of fishery resources to fishing communities in order to provide for the sustained participation of such communities, and to the extent practicable, minimize adverse economic impacts on such communities (16 U.S.C. 1851(a)(8)).

Overview of Measures Implemented by This Rule

This final rule modifies several aspects of the BSAI Pacific cod fishery. This final rule sets aside a portion of the Aleutian Islands Pacific cod non-CDQ TAC for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch to Aleutian Islands shoreplants. However, the harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year.

In order to implement Amendment 113, this final rule:

- Defines the term ''Aleutian Islands shoreplant'' in regulation;
- Calculates and defines the amount of the Aleutian Islands Pacific cod TAC that will be available as a directed fishing allowance (DFA) and the amount that will be available as an incidental catch allowance (ICA);
- Limits the amount of early season (from January 20 until April 1), also known as A-season, Pacific cod that may be harvested by the trawl CV sector in the Bering Sea prior to March 21 (Bering Sea Trawl CV A-Season Sector Limitation);
- Sets aside some or all of the Aleutian Islands Pacific cod non-CDQ DFA for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch for processing by Aleutian Islands shoreplants from January 1 to March 15 (Aleutian Islands CV Harvest Set-Aside);
- Requires that either the City of Adak or the City of Atka annually notify NMFS of its intent to process Aleutian Islands Pacific cod during the upcoming fishing year in order for the Aleutian Islands CV Harvest Set-Aside and the Bering Sea Trawl CV A-Season Sector Limitation to be effective in the upcoming fishing year; and
- Removes the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside if less than 1,000 metric tons (mt) of the harvest set-aside is delivered to (*i.e.,* landed at) Aleutian Islands shoreplants on or before February 28, or if the harvest set-aside is fully taken before March 15.

The following sections provide further explanation of the regulatory changes made by this rule. Additional detail about the rationale for and effect of the regulatory changes in this rule is provided in the preamble to the proposed rule and in the Analysis for this action.

Summary of Regulatory Changes

Revisions to Definitions at § 679.2

This final rule adds a definition to § 679.2 for ''Aleutian Islands shoreplant'' to mean a processing facility that is physically located on land west of 170° W. longitude within the State of Alaska (State). This definition is needed because the existing term ''shoreside processor'' in § 679.2 can include processing vessels that are moored or otherwise fixed in a location (*i.e.,* stationary floating processors), but not necessarily located on land. This new definition provides a clear and consistent term for referencing the processors located on land within the Aleutian Islands.

Revisions to General Limitations at § 679.20

This final rule adds a new paragraph (viii) to § 679.20(a)(7). This new paragraph includes the primary regulatory provisions of this final rule. The preamble to the proposed rule provides examples to aid the reader in understanding how this final rule will apply using 2017 harvest specifications for BSAI Pacific cod (81 FR 14773, March 18, 2016). For the remainder of this preamble, unless otherwise specified, all references to allocations and apportionments of BSAI Pacific cod refer to non-CDQ allocations and apportionments of BSAI Pacific cod.

Calculation of the Aleutian Islands Pacific Cod ICA and DFA

NMFS will annually specify an ICA and a DFA derived from the Aleutian Islands Pacific cod non-CDQ TAC. Each year, during the annual harvest specifications process described at § 679.20(c), NMFS will specify an amount of Aleutian Islands Pacific cod that NMFS estimates will be taken as incidental catch when directed fishing for non-CDQ groundfish other than Pacific cod in the Aleutian Islands. This amount will be the Aleutian Islands ICA and will be deducted from the Aleutian Islands non-CDQ TAC. The amount of the Aleutian Islands non-CDQ TAC remaining after subtraction of the Aleutian Islands ICA will be the Aleutian Islands DFA.

NMFS will specify the Aleutian Islands ICA and DFA so that NMFS can

clearly establish the amount of Aleutian Islands Pacific cod that will be used to determine the amount of the Aleutian Islands CV Harvest Set-Aside described in the following sections of this preamble. The specification will also provide the public with notification of the amount of the Aleutian Islands non-CDQ TAC that is available for directed fishing prior to the start of the fishing season to aid in the planning of fishery operations. The Aleutian Islands DFA is the maximum amount of Pacific cod available for directed fishing by all non-CDQ fishery sectors in all seasons in the Aleutian Islands.

Although the amount of the Aleutian Islands ICA may vary from year to year, NMFS specifies an Aleutian Islands ICA of 2,500 mt for 2017. NMFS determined that this amount will be needed to support incidental catch of Pacific cod in other Aleutian Islands non-CDQ directed groundfish fisheries. In future years, NMFS will specify the Aleutian Islands ICA in the annual harvest specifications based on recent and anticipated incidental catch of Aleutian Islands Pacific cod in other Aleutian Islands non-CDQ directed groundfish fisheries.

Bering Sea Trawl CV A-Season Sector Limitation

This final rule establishes the Bering Sea Trawl CV A-Season Sector Limitation to restrict the amount of the trawl CV sector's A-season allocation that can be harvested in the Bering Sea subarea prior to March 21. The Bering Sea Trawl CV A-Season Sector Limitation ensures that some of the trawl CV sector's A-season allocation remains available for harvest in the Aleutian Islands subarea by trawl catcher vessels that deliver their catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing. On March 21, the restriction on Bering Sea harvest by the trawl CV sector will be lifted and the remainder, if any, of the BSAI trawl CV sector's A-season allocation can be harvested in either the Bering Sea or the Aleutian Islands (if still open to directed fishing for Pacific cod) for delivery to any eligible processor for processing.

The Bering Sea Trawl CV A-Season Sector Limitation will equal the lesser of either the Aleutian Islands DFA or 5,000 mt. The Bering Sea Trawl CV A-Season Sector Limitation will be equivalent to the Aleutian Islands CV Harvest Set-Aside, as discussed in the following section of the preamble. The amount of the trawl CV sector's A-season allocation that may be harvested in the Bering Sea prior to March 21 will be the amount of Pacific cod that remains after deducting the Bering Sea Trawl CV A-Season Sector Limitation from the BSAI trawl CV sector A-season allocation listed in the annual harvest specifications (and as determined at § 679.20(a)(7)(iv)(A)(*1*)(*i*)). NMFS will annually specify in the annual harvest specifications the Bering Sea Trawl CV A-Season Sector Limitation and the amount of the trawl CV sector's A-season allocation that may be harvested in the Bering Sea prior to March 21.

The preamble to the proposed rule provides additional background on the factors that the Council and NMFS considered when determining the amount and timing of the Bering Sea Trawl CV A-Season Sector Limitation and is not repeated here.

Aleutian Islands Catcher Vessel Harvest Set-Aside

This final rule requires that some or all of the Aleutian Islands DFA be set aside for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch to Aleutian Islands shoreplants for processing. This Aleutian Islands CV Harvest Set-Aside will be available for harvest by vessels using any authorized gear type and that deliver their directed catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing. NMFS will account for harvest and processing of Aleutian Islands Pacific cod under the Aleutian Islands CV Harvest Set-Aside separate from, and in addition to, its accounting of Aleutian Islands Pacific cod catch by the nine non-CDQ fishery sectors established in § 679.20(a)(7)(ii). Because of this separate accounting, the Aleutian Islands CV Harvest Set-Aside will not increase or decrease the amount of BSAI Pacific cod allocated to any of the non-CDQ fishery sectors. The Aleutian Islands CV Harvest Set-Aside will apply from January 1 until March 15 of each year if certain notification and performance measures, described in the following section of the preamble, are satisfied.

The amount of the Aleutian Islands CV Harvest Set-Aside will be calculated as described above for the Bering Sea Trawl CV A-Season Sector Limitation. It will be an amount equal to the lesser of either the Aleutian Islands DFA or 5,000 mt. NMFS will notify the public of the Aleutian Islands CV Harvest Set-Aside through the annual harvest specifications process.

When the Aleutian Islands CV Harvest Set-Aside is set equal to the Aleutian Islands DFA and the set-aside is in effect, directed fishing for Pacific cod in the Aleutian Islands may only be conducted by vessels that deliver their catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing. Vessels that do not want to deliver their directed catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing will be prohibited from directed fishing for Pacific cod in the Aleutian Islands when the Aleutian Islands CV Harvest Set-Aside is in effect. These vessels will be permitted to conduct directed fishing for groundfish other than Pacific cod in the Aleutian Islands when the Aleutian Islands CV Harvest Set-Aside is in effect, and their incidental harvests of Pacific cod will accrue toward the Aleutian Islands ICA. CPs will be permitted to conduct directed fishing for Pacific cod in the Aleutian Islands when the Aleutian Islands CV Harvest Set-Aside side is in effect as long as they act only as CVs and deliver their directed catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing. CPs also will be permitted to retain and process Aleutian Islands Pacific cod that is caught as incidental catch while directed fishing for groundfish other than Pacific cod, and those incidental harvests of Pacific cod will accrue toward the Aleutian Islands ICA.

When the Aleutian Islands DFA is greater than 5,000 mt, and therefore the Aleutian Islands CV Harvest Set-Aside is set equal to 5,000 mt, the difference between the DFA and the Aleutian Islands CV Harvest Set-Aside will be available for directed fishing by all non-CDQ fishery sectors with sufficient A-season allocations and may be processed by any eligible processor. This difference is called the ''Aleutian Islands Unrestricted Fishery.'' In years when there is both an Aleutian Islands CV Harvest Set-Aside and an Aleutian Islands Unrestricted Fishery, vessels may conduct directed fishing for Pacific cod in the Aleutian Islands and deliver their catch to Aleutian Islands shoreplants or to any eligible processor for processing as long as the Aleutian Islands Unrestricted Fishery is open to directed fishing. CPs will be permitted to conduct directed fishing for Pacific cod in the Aleutian Islands and process that directed catch as long as the Aleutian Islands Unrestricted Fishery is open to directed fishing. NMFS will determine whether the Aleutian Islands Unrestricted Fishery is sufficient to support a directed fishery and will notify the public through a notice in the **Federal Register**.

While the Aleutian Islands CV Harvest Set-Aside is in effect, NMFS will account for Aleutian Islands Pacific cod caught by vessels against the appropriate fishery sector allocation, the ICA or the DFA, and the Aleutian

Islands CV Harvest Set-Aside. Examples illustrating this accounting are provided in the preamble of the proposed rule.

If certain notification and performance measures are met, the Aleutian Islands CV Harvest Set-Aside will be in effect from January 1 until March 15 of each year. If the entire set-aside is harvested and delivered prior to March 15, NMFS will lift the Bering Sea Trawl CV A-Season Sector Limitation and Aleutian Islands CV Harvest Set-Aside as soon as possible. The Aleutian Islands CV Harvest Set-Aside will end at noon on March 15 even if the entire set-aside has not been harvested and delivered to Aleutian Islands shoreplants.

When the set-aside ends, any remaining Aleutian Islands DFA may be harvested by any non-CDQ fishery sector with remaining A-season allocation, and the harvest may be delivered to any eligible processor. If a vessel has been directed fishing for Aleutian Islands Pacific cod, but has not yet delivered that Pacific cod for processing when the harvest set-aside is lifted, that vessel may deliver its Pacific cod to any eligible processor. If a vessel has been directed fishing for Aleutian Islands Pacific cod, but has not yet delivered that Pacific cod for processing when the Aleutian Islands Unrestricted Fishery closes, but the Aleutian Islands CV Harvest Set-Aside is still in effect, it will be required to deliver that Pacific cod to an Aleutian Islands shoreplant for processing or be in violation of the directed fishing closure.

The preamble to the proposed rule provides additional background on the factors that the Council and NMFS considered when determining the amount and timing of the Aleutian Islands CV Harvest Set-Aside and is not repeated here.

Measures To Prevent Stranding of Aleutian Islands Non-CDQ Pacific Cod TAC

Stranding is a term sometimes used to describe TAC that remains unharvested due to regulations. This final rule includes performance measures intended to prevent the stranding of Aleutian Islands non-CDQ Pacific cod TAC if the set-aside is not requested, if limited processing occurs at Aleutian Islands shoreplants, or if the Aleutian Islands CV Harvest Set-Aside is taken before March 15.

The first performance measure requires that either the City Manager of the City of Adak or the City Administrator of the City of Atka notify NMFS of the city's intent to process Aleutian Islands Pacific cod in the upcoming fishing year. If neither city notifies NMFS in accordance with regulatory requirements described below, the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside will not be in effect for the upcoming fishing year.

This final rule requires annual notification to NMFS in the form of a letter or memorandum signed by the City Manager of Adak or the City Administrator of Atka stating the city's intent to process Aleutian Islands Pacific cod in the upcoming fishing year. This signed letter or memorandum is the official notification of intent. The official notification of intent must be postmarked no later than December 8, 2016, and no later than October 31 for each year after 2016. The official notification of intent must be submitted to the NMFS Alaska Regional Administrator by certified mail through the United States Postal Service. The City Manager of Adak or City Administrator of Atka must also submit an electronic copy of the official notification of intent and the certified mail receipt with postmark via email to NMFS (*nmfs.akr.inseason@noaa.gov*) no later than December 8, 2016, and no later than October 31 for each year after 2016. Email submission of electronic copies of the official notification of intent and the certified mail receipt with postmark will provide NMFS with the timely information it needs to manage the upcoming fisheries. Email notification is in addition to notification via certified U.S. Mail and does not replace the requirement for notification through the U.S. Postal Service.

A city's notification of intent to process Aleutian Islands Pacific cod must contain the following information: Date, name of city, a statement of intent to process Aleutian Islands Pacific cod, statement of calendar year during which the city intends to process Aleutian Islands Pacific cod, and the signature of and contact information for the City Manager or City Administrator of the city whose shoreplant is intending to process Aleutian Islands Pacific cod.

On or shortly after December 8, 2016, and November 1 for each year after 2016, the Regional Administrator will send a signed and dated letter either confirming receipt of the city's notification of their intent to process Aleutian Islands Pacific cod, or informing the city that notification was not received by the deadline.

While this final rule will make the set-aside available for processing by any shoreplant west of 170° W. longitude in the Aleutian Islands, the notification requirement is required from either Adak or Atka and not another city that might have an Aleutian Islands shoreplant in the future. The Council and NMFS's rationale for this is provided in the preamble of the proposed rule.

The second performance measure removes the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside for the remainder of the A-season if less than 1,000 mt of the Aleutian Islands CV Harvest Set-Aside is delivered to Aleutian Islands shoreplants by February 28. This performance measure will lift the Aleutian Islands CV Harvest Set-Aside and make any remaining amount of the set-aside available to all participants if Aleutian Islands shoreplants are unable to process Pacific cod or if too few or no vessels decide to participate in the set-aside fishery.

The third performance measure suspends the Bering Sea Trawl CV A-Season Sector Limitation for the remainder of the year if the entire Aleutian Islands CV Harvest Set-Aside (5,000 mt in 2017) is fully harvested and delivered to Aleutian Islands shoreplants before March 15.

The preamble to the proposed rule provides additional background on the factors considered by the Council and NMFS when establishing these performance standards and is not repeated here.

Harvest Specifications Process To Announce BSAI A-Season Pacific Cod Limits Implemented by Amendment 113

During the annual harvest specifications process described in the proposed rule, NMFS will publish in the proposed harvest specifications the amounts for the Aleutian Islands ICA, DFA, CV Harvest Set-Aside, and Unrestricted Fishery, as well as the Bering Sea Trawl CV A-Season Sector Limitation, and the amount available for harvest by trawl CVs in the Bering Sea while the set-aside is in effect. These amounts will be published in a separate table to supplement the table in the harvest specifications that describes the final gear shares and allowances of the BSAI Pacific cod TAC for the upcoming year.

NMFS also will publish a notice in the **Federal Register** shortly after December 8, 2016, and November 1 for each year after 2016, announcing whether the Aleutian Islands CV Harvest Set-Aside and Bering Sea Trawl CV A-Season Sector Limitation will be in effect for the upcoming fishing year, and whether the harvest limits in the supplemental table will apply. If necessary, NMFS will publish in the **Federal Register** an adjustment of the BSAI A-season Pacific cod limits for the

upcoming year after the Council adopts the harvest specifications in December.

Amendment of the 2017 Final Harvest Specifications for the Groundfish Fishery of the BSAI

With this final rule, NMFS amends the 2017 final harvest specifications for the groundfish fishery of the BSAI by adding the following Table 8a, which specifies the Aleutian Islands ICA, DFA, CV Harvest Set-Aside, and Unrestricted Fishery, as well as the Bering Sea Trawl CV A-Season Sector Limitation. If NMFS receives timely notification of intent to process from either Adak or Atka, the harvest limits in Table 8a will be in effect in 2017.

TABLE 8A—2017 BSAI A-SEASON PACIFIC COD LIMITS IF ALEUTIAN ISLANDS SHOREPLANTS INTEND TO PROCESS PACIFIC COD

2017 Allocations under Aleutian Islands CV Harvest Set-Aside	Amount (mt)
AI non-CDQ TAC	11,465
AI ICA	2,500
AI DFA	8,965
BS non-CDQ TAC	213,141
BSAI Trawl CV A-Season Allocation	36,732
BSAI Trawl CV A-Season Allocation minus Sector Limitation [1]	31,732
BS Trawl CV A-Season Sector Limitation	5,000
AI CV Harvest Set-Aside	5,000
AI Unrestricted Fishery	3,965

[1] This is the amount of the BSAI trawl CV A-season allocation that may be harvested in the Bering Sea prior to March 21.

Changes From the Proposed Rule

NMFS made three changes to the regulatory text from the proposed rule. Two of these changes are in response to comments received on the proposed rule, and one change is made to address administration of this final rule in 2016.

First, this final rule modifies § 679.20(a)(7)(viii)(E)(*4*) in response to Comment 8. The words ''prior to'' are changed to ''on or before'' to reflect the Council's intent. See the response to Comment 8 for the complete justification for this change.

Second, this final rule modifies § 679.20(a)(7)(viii)(D) and (E) to specify that the City Manager of Adak and the City Administrator of Atka are the individuals responsible for notifying NMFS of their city's intent to process Pacific cod in the upcoming year. See the response to Comment 5 for the complete justification for this change.

Third, this final rule modifies § 679.20(a)(7)(viii) to include a separate notification deadline for 2016 for the City Manager of Adak or the City Administrator of Atka to notify NMFS of the intent to process Aleutian Islands Pacific cod in 2017. This final rule requires that the official notification of intent to process for 2017 be postmarked and emailed no later than December 8, 2016. This final rule clarifies that for all years after 2016, this annual notification must be postmarked and emailed no later than October 31.

This change is required to ensure that NMFS provides an opportunity for the City of Adak and the City of Atka to notify NMFS of their intent to process after this final rule has published. Because this final rule will publish and become effective after October 31, 2016, the City of Adak and the City of Atka could not provide timely notification to NMFS of their intent to process in 2017 without this change in the notification deadline. This change enables the cities of Adak and Atka, and vessels delivering to Aleutian Island shoreplants, to receive the benefits of this final rule in 2017 that would otherwise be foregone without this change. NMFS is providing 15 days after the publication of this rule for the City of Adak or the City of Atka to notify NMFS so that the cities have adequate time after the publication of this final rule to prepare and submit their official notification of intent.

NMFS determined that this change will not affect participants in the Aleutian Islands Pacific cod fishery in ways not previously considered and analyzed. The 2016 deadline for submitting notification of intent to process falls between the two dates considered by the Council: Prior to November 1 or prior to December 15. In considering the effect these notification deadlines, the Analysis focuses on the ability of the industry to react if there are no Aleutian Islands shoreplants operating in the upcoming fishing year, stating that selection of the earlier deadline would provide more time for the industry to make the necessary arrangements to harvest and process the non-CDQ Aleutian Islands Pacific cod DFA, and that in general, more notification concerning processing of Aleutian Islands Pacific cod in the upcoming fishing year will help to reduce the risk of unharvested non-CDQ Aleutian Islands Pacific cod TAC. Even so, the Analysis concludes that both date options would give fishery participants sufficient time to plan and prepare before the A-season begins and that ideally notice of intent to process would be provided to NMFS by a date near the end of the December Council meeting. NMFS continues to agree with the Council that October 31 is the preferred deadline of the two dates considered, and this final rule establishes October 31 as the deadline for submission of notification of intent for each fishing year after 2016. However, NMFS has determined that the notification deadline for 2016 will allow Adak and Atka an opportunity to submit notification prior to the start of the 2017 fishing year, thus providing an opportunity for the set-aside to be effective in 2017, rather than having to wait an additional year. Additionally, the 2016 notification deadline will provide fishery participants with sufficient time to plan and prepare before the A-season begins because NMFS will be able to notify fishery participants as to whether the set-aside will be in effect for 2017 prior to December 15 and prior to the end of the December Council meeting. In addition, this change is applicable only for the first year of implementation of this final rule, and will therefore have a limited and temporary effect.

Responses to Comments

NMFS received 35 unique comments on Amendment 113 and the proposed rule in 18 comment letters from 16 different commenters. The 16 commenters consisted of 2 individuals; 7 companies representing CPs; the

Alaska Department of Fish and Game; 1 fish processing company; 1 CDQ group; 2 community development corporations, 1 Aleutian Islands municipal government; and 1 non-profit conservation organization. Of the 16 commenters, 9 explicitly supported adoption of the proposed harvest set-aside. Opponents were companies representing CPs whose vessels could be restricted by this action.

In responding to these comments, when NMFS refers to Amendment 113, unless otherwise noted, NMFS means Amendment 113 and this final rule implementing Amendment 113.

General Comments

Comment 1: This action is unnecessary. When Adak has an operational plant, it received a significant portion of the Aleutian Islands Pacific cod catch without delivery requirements.

Response 1: In February 2015, the Council identified in a modified problem statement the purpose and need for protections for Aleutian Islands communities as a result of the implementation of rationalization programs, the BSAI Pacific cod TAC split, and relatively low Pacific cod abundance in the Aleutian Islands, among other factors (Section 2.2 of the Analysis). The Council stated that these factors have ''. . . increased the risk that the historical share of BSAI cod of other industry participants and communities that depend on shoreplant processing in the region may be diminished.'' The Council's rationale for its preferred alternative stated that this action ''. . . would provide benefits and stability to fishery dependent communities in the Aleutian Islands and is responsive to changes in management regimes like rationalization programs that necessitate putting protections in place to protect other non-rationalized fisheries'' (Section 2.4.3 of the Analysis). The Council's purpose and need statement, the proposed rule, and the Analysis describe the range of factors that have affected delivery patterns in the Aleutian Islands that could limit opportunities for Aleutian Islands shoreplants, harvesters delivering to Aleutian Islands shoreplants, and the communities in the Aleutian Islands. Thorough descriptions of the factors necessitating this action, and the Council's rationale are provided in the ''Need for This Proposed Rule'' section of the proposed rule and the Analysis and are not repeated here.

In years when the Adak shoreplant was not operational, the offshore processing sector (primarily CPs) was able to process the entire Aleutian Islands TAC (Section 2.7.1.2 of the Analysis), demonstrating that the offshore sector is capable of fully harvesting available catch and preempting the onshore sector's access to the fishery. Table 2–32 of the Analysis shows that prior to 2008, the majority of the Aleutian Islands Pacific cod processed by the offshore sector originated from CP harvest, but after 2008, CV deliveries of Aleutian Islands Pacific cod to CPs played a more prominent role in the offshore processing of Aleutian Islands Pacific cod. Although Aleutian Islands shoreplants operating in Adak have received Pacific cod without a harvest set-aside in the past, NMFS and the Council determined that this action is necessary to minimize the risk of diminished share of Aleutian Islands Pacific cod to Aleutian Islands communities dependent on the fishery and to provide additional stability to promote and sustain Aleutian Islands shoreplants, harvesters delivering to Aleutian Islands shoreplants, and the communities in the Aleutian Islands.

Comment 2: The proposed rule assumes that the increase in offshore processing since the implementation of rationalization programs was a major cause of instability in onshore processing in the Aleutian Islands, but this is not true. There have been long-standing challenges to the viability of shore-based processing in the Aleutian Islands such as ownership changes of Aleutian Islands shoreplants, Steller sea lion protection measures, plant insolvency, energy costs, employment challenges, market conditions, and product transportation difficulties.

Response 2: As explained in the ''Need for This Proposed Rule'' section of the preamble to the proposed rule and in Section 2.2 of the Analysis, the Council and NMFS recognize that several factors have contributed to instability in processing operations in the Aleutian Islands, including decreased Pacific cod biomass in the Aleutian Islands subarea; the establishment of separate OFLs, ABCs, and TACs for Pacific cod in the Bering Sea and the Aleutian Islands (referred to as the ''BSAI TAC split''); changing Steller sea lion protection measures; historical volatility in the Aleutian Islands shoreplant processing sector; and changing fishing practices in part resulting from rationalization programs. The Council, NMFS and this rule do not assume that rationalization programs are the primary cause of this instability, but rather, one of many contributing factors.

Comment 3: This is a wipe-out plan for cod. It will wipe out cod just as this agency did in Maine. Some other system has to be set up for economic sustainability for people in the area. Stop this plan now.

Response 3: NMFS disagrees that Amendment 113 will wipe out Pacific cod. This action will not change the TAC for Aleutian Islands Pacific cod, or conservation and management measures that ensure that harvests of Aleutian Islands Pacific cod do not exceed established OFL, ABC, or TAC limits. Aleutian Islands Pacific cod is managed to a TAC that is set at or below the ABC and the stock is neither overfished nor approaching an overfished condition (see Section 3.3 of the Analysis).

Comment 4: There is no provision in the proposed rule to remove the Aleutian Islands CV Harvest Set-Aside from the FMP and Federal regulations if no on-shore processing activity occurs for a number of years. Does the set-aside continue indefinitely? What would prompt Council re-examination?

Response 4: The commenter is correct; there is no provision in Amendment 113 or this rule that would end, or sunset, the Aleutian Islands CV Harvest Set-Aside if Aleutian Islands shoreplants are not operational for a specified number of years. However, under the performance measures established by this final rule, the Aleutian Islands CV Harvest Set-Aside is effective in a fishing year only if timely and complete notification of intent to process from the City of Adak or the City of Atka is received by NMFS. Presumably, if there is not likely to be an operational Aleutian Islands shoreplant in the upcoming fishing year, these cities would not submit a notification to NMFS. Also, in order for the set-aside to continue to be effective after February 28, a minimum of 1,000 mt of Aleutian Islands Pacific cod must be delivered to Aleutian Islands shoreplants on or before February 28. If, in the future, it appears that the Aleutian Islands CV Harvest Set-Aside is not being used, or Aleutian Islands shoreplants cannot meet the demand, the Council could consider and, if warranted, initiate an action to revise or remove the provisions of Amendment 113 and its implementing regulations.

Comment 5: The proposed rule grants *de facto* fishery management authority to municipal officials, by requiring them to provide notice to NMFS of the Aleutian Islands shoreplants intent to process Pacific cod in the upcoming year. NMFS is surrendering the determination of whether a shore plant is prepared to process Pacific cod to a community representative who is not a regulated participant in the fishery. This is granting too much power to one

individual. The city manager could use this authority to undermine certain businesses or to grant favors. Additionally, Atka does not have a city manager.

Response 5: The Council specified that the City of Adak or the City of Atka should be the entity to provide official notification to NMFS of the community's intent to process Pacific cod, but it did not specify who from Adak or Atka should provide such notification (Section 2.7.2.4 of the Analysis). The Analysis describes that if the notification requirement is implemented, NMFS could specify the person representing the city who should provide the notification.

The commenter notes that the City of Atka does not have a city manager. Technically, that is accurate: Atka has a city administrator. Title 29 of the Alaska Statutes explains the distinctions between a city manager and a city administrator. In the manager form of municipality, the city manager is the chief executive. In a strong-mayor form of municipality, the mayor is the chief executive and the city administrator can exercise powers or duties only as delegated by the mayor and city council. In either case, the role of the manager or administrator is to represent the interests of the city, city council, and mayor. The language in the final rule has been changed to reflect that the city administrator is the person responsible for providing notification to NMFS for Atka.

This type of designation is not unprecedented. For example, in an action to create Community Quota Entities (CQE) for the Halibut and Sablefish Individual Fishing Quota Program (Amendment 66 to the Gulf of Alaska FMP, 69 FR 23681, April 30, 2004), NMFS specified which governing body would be responsible for proposing a potential CQE to NMFS, depending on the governance structure of the particular community. For communities incorporated as municipalities, the governing body identified was the city council. In communities represented by tribal governments, the governing body was the non-profit entity. In similar fashion, and as described in the proposed rule for this action, NMFS determined that the city manager or administrator would be the appropriate person responsible for submitting the required notification to NMFS.

While ownership and management of fish processing facilities may change, it is likely that there will always be someone performing the role of city manager or administrator for Adak and Atka. As elected or appointed officials, these representatives are bound by oath of office to uphold the wishes of their constituents. Currently, both the City of Adak and the City of Atka execute, in good faith, waivers for the delivery requirement for Western Aleutian Islands golden king crab when sufficient processing capacity does not exist in those communities. These cities issue the waiver knowing that it is not in the communities' best interests to strand the crab resource. The notification requirement under Amendment 113 is similar, and it is not clear how the requirement to notify NMFS of the communities' intent to process Pacific cod grants too much power to the city manager or administrator. NMFS expects that the city manager or administrator will be in communication with the shoreplant manager and local fishing fleet prior to the notification deadline to ensure that the shoreplant will be able to accept deliveries of Pacific cod once the set-aside goes into effect. If, for some reason, the shoreplant does not operate as anticipated, the 1,000 mt minimum processing performance measure would not be met by February 28 and the set-aside would be lifted.

NMFS does not consider the notification requirement to be a *de facto* grant of fishery management authority to the city manager or administrator. The Council and NMFS have established the fishery management policy with regard to Aleutian Islands Pacific cod. The intent of the Council and NMFS with Amendment 113 and this final rule is to have an Aleutian Islands CV Harvest Set-Aside in place for Aleutian Islands fishing communities, and the harvesters and shoreplants that are part of those communities, to utilize. Recognizing that there may be years when Aleutian Islands shoreplants may not be operational, the notification provision was a fishery management decision by the Council and NMFS to provide for an orderly start to the fishing year and as a way to prevent the set-aside from becoming effective if neither city intends to process in the upcoming fishing year. The city manager or administrator is the person from whom NMFS will expect to receive notification of the city's intent to process Pacific cod and to whom NMFS will confirm that notification has been received. Under this final rule, the city manager or administrator is providing information to NMFS on anticipated processing activities based on knowledge gained from Aleutian Islands shoreplants in their communities. City managers and administrators are not delegated any authority to open or close fisheries, assess catch amounts, or take other actions provided in regulation. Notification is not to be confused with an active role in administering regulations. NMFS is ultimately responsible for taking any management actions once a notification has been received.

Comment 6: If this rule is implemented, NMFS will notify Adak or Atka city managers if they have not received their notifications of intent to process. This seems at odds with other programs that have notification dates, such as submission of annual cooperative notifications to NMFS. There is no regulatory language that provides for NMFS to notify the entity or person that it has not received cooperative information regarding the next year's intent to process.

Response 6: The commenter is referring to the regulatory language at (a)(7)(viii)(D)(*3*) which explains how NMFS will provide confirmation to the City Manager of the City of Adak or the City Administrator of the City of Atka if their notification of intent to process Aleutian Islands Pacific cod has been received or not. This confirmation is to let the city know that the set-aside will or will not be in effect for the upcoming year. Similarly, NMFS will publish a notice in the **Federal Register** to inform the public whether the set-aside will be in effect. NMFS will not offer these cities additional time to provide notification if it was not received by the deadline and according to the requirements stated in regulations.

Comment 7: NMFS received 11 comment letters from 9 different entities in support of Amendment 113 and its implementing regulations. In general, the comments emphasized that three interacting issues have affected the viability of shoreside operations in the Aleutian Islands: the BSAI Pacific cod biomass estimates and TAC split, Steller sea lion protection measures, and rationalization programs. The commenters noted that fish processing is the core economic driver for the communities of Adak and Atka and that these communities have been negatively impacted by prior management actions. They stressed that Aleutian Islands communities, Adak and Atka in particular, need the kind of protections that the Council has provided to communities in the Gulf of Alaska (GOA) and Bering Sea for pollock, and to GOA communities for Pacific cod by limiting the amount that can be delivered either inshore or offshore. These commenters considered stable access to at least 5,000 mt of Aleutian Islands Pacific cod from the Federal

fishery essential for maintaining viable communities in Adak and Atka. These commenters concluded that this final rule provides community protections for shorebased processing in the Aleutian Islands management area that are critical to the survival of Aleutian Islands communities.

Response 7: NMFS acknowledges the comments in support of Amendment 113. The Secretary, through her designee, the Assistant Administrator for Fisheries, approved Amendment 113 on October 17, 2016, and implements Amendment 113 with this final rule. The Secretary concluded that the Aleutian Islands CV Harvest Set-Aside in Amendment 113 is consistent with the Magnuson-Stevens Act, including the National Standards, and other applicable law.

Comment 8: The proposed regulatory language for the minimum Aleutian Islands shoreplant landing requirement at § 679.20(a)(7)(viii)(E)(*4*) states that ''if less than 1,000 mt of the Aleutian Islands Catcher Vessel Harvest Set-Aside is landed at Aleutian Islands shoreplants *prior to* February 28, then paragraphs (a)(7)(viii)(E)(*1*) for the Bering Sea Trawl CV A-season Sector Limitation and (*2*) for the Aleutian Islands CV Harvest Set-Aside will not apply for the remainder of the fishing year.'' However, the preamble to the proposed rule and the Council motion clearly state that this performance measure must be met ''by'' February 28. This change in the proposed regulatory language from the Council's motion would give Aleutian Islands shoreplants one less day to fulfill the minimum delivery requirements. This one-day difference is not insignificant to Aleutian Islands shoreplants. An average of 178 mt of Pacific cod was landed at Adak on February 28 from 2002 through 2009. Landings on February 28 represent a substantial portion of the proposed 1,000-mt minimum landing requirement performance measure. The commenters request that the proposed regulatory language at § 679.20(a)(7)(viii)(E)(*4*) be changed so that landings made ''on or before'' February 28 will count toward the performance measure threshold.

Response 8: NMFS agrees. The Council motion, the preamble to the proposed rule, the Analysis, the FMP amendment text, and the notice of availability for the FMP amendment all state that 1,000 mt must be landed ''by,'' not ''prior to,'' February 28. The proposed regulatory language was inadvertently written in a way that contradicts the Council's intent for this performance measure. Inclusion of February 28 in the minimum landings period is important and necessary. As noted in Section 2.7.2.5 of the Analysis, Aleutian Islands Pacific cod tend to aggregate in late February to early March, and these aggregations are optimal for efficient trawl fishing. NMFS has changed § 679.20(a)(7)(viii)(E)(*4*) to clarify that landings made ''on or before'' February 28, rather than ''prior to'' February 28, will be used to determine whether the minimum landings requirement has been met.

Comment 9: As a longtime, small boat, Aleutian Islands fisherman, it is vital to my longline operation and to other small and entry level vessel owners to have a stable shoreside processing facility in the Aleutian Islands. Amendment 113 will create numerous opportunities for small boats and the community of Adak.

Response 9: NMFS acknowledges the support for this action.

Comment 10: We support solutions that optimize and create sustainable social, economic, and conservation outcomes. Amendment 113 and this final rule will help the economic sustainability of Adak and Atka and will help the aspirations of the Aleut people to repopulate some of the islands of the western Aleutians. Amendment 113 and this final rule may also improve the conservation and ecosystem sustainability of the area. Giving the local inhabitants a larger financial stake in the sustainability of the local ecosystem is an important step in a long process leading to better conservation. We firmly believe that where local, and particularly Alaska Natives, have more control over resource extraction, the conservation outcome is likely to be better.

Response 10: NMFS acknowledges the comment and the support for Amendment 113 and this final rule.

Comment 11: Trawl vessels catch large quantities of vulnerable deep sea corals and sponges in the area. Shifting to other gear types in the Aleutian Islands Pacific cod fishery may help protect these vulnerable species.

Response 11: NMFS acknowledges the comment but notes that this final rule does not modify the areas or types of gear that can be used to harvest fishery resources in the Aleutian Islands.

Comment 12: There is an error in the fourth row of Table 4 in the preamble of the proposed rule. The fourth row in Table 4 refers to the ''BSAI non-CDQ TAC.'' This row should have read ''BS non-CDQ TAC.''

Response 12: NMFS agrees that the fourth row in Table 4 of the proposed rule preamble should have read ''BS non-CDQ TAC.'' The amount of Pacific cod proposed for the BS non-CDQ TAC in the fourth row of Table 4 was accurate. This final rule modifies the final 2016 and 2017 harvest specifications to add a supplemental table, Table 8a, that provides the 2017 catch limits for Pacific cod under Amendment 113 and this final rule. NMFS will publish a notice in the **Federal Register** in December 2016 if there will be any changes to these amounts. NMFS will also publish a notice in the **Federal Register** to inform the public if the Aleutian Islands CV Harvest Set-Aside and Bering Sea Trawl Catcher Vessel Sector Limitation will be in effect in 2017. Table 8a displays the correct name of the allocation and the correct amount. No changes to the regulatory text are necessary in response to this comment.

Comment 13: The agency has not followed the requisite process under the National Environmental Policy Act (NEPA). In particular, an environmental impact statement (EIS) should have been completed. The action is clearly controversial, as it has been under consideration for over 8 years in the Council process. A more thorough review might have compelled NMFS to reject this action.

Response 13: According to NEPA and Council on Environmental Quality (CEQ) regulations at 40 CFR 1502.3, an EIS is required when a fishery management action may significantly affect the quality of the human environment. Determining whether an action may significantly affect the quality of the human environment requires considerations of both context and intensity, and regulations at 40 CFR 1508.27(b) list several factors that are to be considered in evaluating the intensity of an action. One of these factors is the degree to which the effects on the quality of the human environment are likely to be highly controversial (40 CFR 1508.27(b)(4)). Before deciding whether to complete an EIS, agencies may prepare an EA to determine whether an EIS must be prepared or a finding of no significant impact (FONSI) can be made (40 CFR 1501.3 and 1508.9). If the EA results in a FONSI, an EIS is not needed.

Courts have held that an action is ''highly controversial'' when there is a substantial dispute about the size, nature, or effect of the action, or when substantial questions are raised as to whether a proposed action may cause significant degradation of some human environmental factor. Courts have also held that the existence of opposition to an action does not raise the level of controversy to the point that an EIS is required. Additionally, as stated in 40

CFR 1508.14 and in Section 3 of the Analysis, economic and social impacts by themselves are not sufficient to require the preparation of an EIS.

In accordance with NEPA and the CEQ regulations, the Council and NMFS appropriately prepared an EA for this action, which analyzes the potential effects of the action on individual resource components, as well as the potential cumulative effects. The EA was prepared using the best available scientific information. Using the information and analysis in the EA, the Council and NMFS reviewed the potential impacts of this action on the human environment as required under NEPA. After reviewing the impacts of this action, the Regional Administrator prepared and signed a FONSI, determining that the action will not result in significant impacts to the quality of the human environment, and further analysis in an EIS is not needed. NMFS determined that the action will make relatively minor changes to the timing and location of fishing for Pacific cod by vessels in the BSAI and that no significant changes in total harvests or when, where, and how fishing occurs are expected with the action.

The commenter implies that the length of time it took the Council to consider and take final action on Aleutian Islands community protection measures makes Amendment 113 and the regulations inherently controversial and therefore requires the preparation of an EIS. NMFS disagrees that the mere length of time this action was under consideration by the Council is indicative of a level of controversy that requires the preparation of an EIS. The implementation of several rationalization programs, Steller sea lion protection measures, the BSAI TAC split, and decreasing biomass of Aleutian Islands Pacific cod, all of which occurred while the Council was considering community protection measures for the Aleutian Islands, considerably changed the way in which the BSAI Pacific cod fishery was managed and conducted by participants. The Council reasonably wanted to examine and understand the effects these changes would have on the BSAI Pacific cod fishery before taking final action. After examining the effects of these changes on Aleutian Islands communities, the Council determined that the community protections that will be implemented by Amendment 113 and this final rule are warranted and necessary. The effects of this action on the quality of the human environment are not in dispute. To the extent that there has been controversy over, or opposition to, the action, the controversy or opposition has been largely related to potential economic and social impacts which do not require the preparation of an EIS.

Comments Related to the Magnuson-Stevens Act and the National Standards

Comment 14: National Standard 4 of the Magnuson-Steven Act states, ''Conservation and management measures shall not discriminate between residents of different states. If it becomes necessary to allocate or assign fishing privileges among various United States fishermen, such allocation shall be (A) fair and equitable to all such fishermen; (B) reasonably calculated to promote conservation; and (C) carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges.'' Amendment 113 and this final rule violate National Standard 4. In fact, a 2009 letter from Acting Regional Administrator Mecum to North Pacific Fishery Management Council Chair Olson noted that the proposed set-aside could violate National Standard 4's requirements that allocations be fair and equitable and do not create excessive shares. They are not fair and equitable, do not promote conservation, and would allocate an excessive share to a particular entity. The plant in Atka has never processed cod and has no historical dependency on the Federal non-CDQ Aleutian Islands Pacific cod fishery. Adak is the sole entity that will benefit from this action. Adak would receive an excessive share, *i.e.,* the entire Aleutian Islands CV Harvest Set-Aside, which is a *de facto* processor share not authorized by the Magnuson-Stevens Act.

Response 14: NMFS has determined that this action is consistent with National Standard 4. Amendment 113 and this final rule do not include any measures that discriminate between residents of different states. While Amendment 113 and this final rule establish the set-aside for vessels that deliver their catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing, any properly permitted and licensed vessel, operated by any resident of any community or state, can participate in the Aleutian Islands CV Harvest Set-Aside. Participation in the set-aside or in the Unrestricted Fishery is not premised on residency in a particular state. Participation in the BSAI Pacific cod fishery is governed by regulations that were determined to be consistent with National Standard 4 and neither Amendment 113 nor this final rule change the permitting and licensing requirements currently in place. This final rule does not preclude residents of any state from participation in any fishery in the Aleutian Islands as either a harvester or operator of an Aleutian Islands shoreplant. Appropriately licensed and endorsed vessels will still have the opportunity to prosecute the fishery, and any person wishing to operate a processing facility with the appropriate license in the area may still do so.

Amendment 113 and this final rule establish a set-aside that allocates the Aleutian Islands non-CDQ Pacific cod DFA during a portion of the A-season among those harvesting vessels that conduct directed fishing for Aleutian Islands Pacific cod and deliver their catch to Aleutian Islands shoreplants for processing and those harvesting vessels that conduct directed fishing for Aleutian Islands Pacific cod and deliver their catch for processing to any eligible processor other than Aleutian Islands shoreplants. Therefore, this allocation must be fair and equitable to all such fishermen, reasonably calculated to promote conservation, and carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges, consistent with National Standard 4. For the reasons provided below, NMFS has determined that Amendment 113 and this final rule are consistent with National Standard 4's requirements for allocations.

NMFS has determined that the set-aside is fair and equitable to all participants in the BSAI Pacific cod fishery. Vessels from all non-CDQ sectors can participate in the set-aside and each sector will continue to have access to its entire BSAI Pacific cod allocation. This action also addresses an inequity that has occurred, in part, from the establishment of rationalization programs and minimizes the risk of future inequities in the prosecution of the Aleutian Islands Pacific cod fishery. The Council and NMFS determined that the protections in Amendment 113 and this final rule are necessary to mitigate the effects of previous Council actions. Offshore processing activity has taken an increasing proportion of the Aleutian Islands Pacific cod fishery in some recent years due to a variety of factors described in the preamble to the proposed rule and in the Analysis. At the same time, the historical share of the BSAI Pacific cod fishery delivered to Aleutian Islands shoreplants has decreased.

The maximum cap of 5,000 mt for set-aside is representative of the long-term average annual amount of Pacific cod processed by Aleutian Islands shoreplants that includes years both

before and after significant changes in the BSAI Pacific cod fishery occurred. Establishing a maximum amount, rather than a percentage, for the set-aside will protect Aleutian Islands fishing communities during years of relatively low Aleutian Islands Pacific cod TAC, will ensure the set-aside remains representative of past participation levels by Aleutian Islands fishing communities, and will benefit those who do not participate in the set-aside fishery during years of relatively high Aleutian Islands Pacific cod TAC by allowing the amount allocated to the Unrestricted Fishery to increase with increases in TAC.

This action is also fair and equitable because the set-aside will be in effect only when the Aleutian Islands fishing communities it is intended to benefit are prepared and actively engaged in participation. When Aleutian Islands communities are unable to accept deliveries of Pacific cod for processing, there are mechanisms built into the final rule that will lift the set-aside and allow others to have access to the remaining harvest.

NMFS also has determined that the set-aside is reasonably calculated to promote conservation. Amendment 113 and this final rule do not modify the process for specifying OFLs, ABCs, or TACs for the Bering Sea and Aleutian Islands Pacific cod fishery, the allocation of BSAI Pacific cod to CDQ and non-CDQ fishery participants that is established in existing regulations, or the allocation of BSAI Pacific cod among non-CDQ fishery participants. NMFS will continue to manage the fishery so that harvests stay within specified and allocated amounts. Additionally, Amendment 113 and this final rule continue to promote and do not undermine the conservation measures established under the Steller sea lion protection measures, Amendment 85 allocations, and Amendment 80 rationalization.

Finally, NMFS determined that the set-aside will be carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of the Aleutian Islands Pacific cod fishery. NOAA's guidance on National Standard 4 states that ''only those measures that result in direct distributions of fishing privileges will be judged against the allocation requirements of Standard 4'' (§ 600.325(c)(1)). This final rule establishes a set-aside for any otherwise eligible vessel that conducts directed fishing for Aleutian Islands Pacific cod and delivers its catch to any Aleutian Islands shoreplant for processing. No particular individual, corporation, or other entity participating in either the set-aside or the Unrestricted Fishery will be able to acquire an excessive share of the Aleutian Islands Pacific cod fishery under Amendment 113 and this final rule. All vessels will continue to have catch attributed to their sector, and Amendment 113 and this final rule do not create any new allocations to particular individuals, corporations, or other entities fishing for Aleutian Islands Pacific cod. Additionally, Amendment 113 and this final rule do not limit participation in the set-aside to a discreet subset of vessels that meet certain criteria. As explained earlier, any properly permitted and licensed vessel, operated by any resident of any community or state, within any BSAI Pacific cod non-CDQ sector can participate in the Aleutian Islands CV Harvest Set-Aside.

The commenter asserts that Adak will receive an excessive share in violation of National Standard 4 because the shoreplant in Adak is the only processor in the Aleutian Islands that has processed Pacific cod and it therefore will receive the entire Aleutian Islands CV Harvest Set-Aside. Section 2.6.8 of the Analysis describes the two shoreplants currently in the Aleutian Islands—one in Adak and one in Atka. Although Atka has not processed Pacific cod and Adak has processed Pacific cod, this final rule does not provide a specific allocation of fishing privileges to either of these Aleutian Islands shoreplants. Amendment 113 does not provide Adak or Atka with fishing privileges in the Aleutian Islands Pacific cod fishery.

The commenter also asserts that Amendment 113 and this final rule establish a processor share or exclusive processing privilege for Adak which is not authorized by the Magnuson-Stevens Act. This aspect of Comment 14 is also expressed in Comment 18. NMFS refers the reader to its detailed response to this comment in its response to Comment 18.

Finally, the commenter refers to a letter dated January 28, 2009, from Robert D. Mecum, Acting Administrator, Alaska Region, NMFS, to Eric Olsen, then Chairman of the Council. According to the commenter, NMFS noted in this letter that the proposed set-aside could violate National Standard 4's requirement that allocations be fair and equitable and not create excessive shares. While NMFS acknowledges the letter, NMFS disagrees that the letter provides support for the claim that Amendment 113 and this final rule are inconsistent with National Standard 4.

The action under consideration by the Council when NMFS sent the letter was not the set-aside action in Amendment 113 but a different action that would have established processing sideboards on processing vessels eligible under the AFA, BSAI crab rationalization program, and BSAI Amendment 80 program that received deliveries of Pacific cod harvested in the Eastern and Central Aleutian Islands (Areas 541 and 542). Under that action, CPs, floating processors, and motherships in these programs would have been limited in the amount of CV deliveries they could receive of Pacific cod harvested in Area 541 and/or 542 on an annual basis, or prohibited from taking deliveries prior to a specific date. The 2009 letter from NMFS encourages the Council to pay particular attention to National Standard 4's prohibition against allocation of excessive shares of fishing privileges and requirement that allocation actions be reasonably calculated to promote conservation. NMFS advised the Council that if it chose to proceed with the action under consideration at that time, it would need to provide a rationale that clearly demonstrated that the action was consistent with these aspects of National Standard 4. However, NMFS also stated, ''Based on our discussions with NOAA GC, these issues do not appear to preclude the proposed action . . . .''

In developing Amendment 113, the Council considered the advice provided by NMFS and modified the action to address inordinate control concerns by conditioning the set-aside on the achievement of certain performance measures which, if not satisfied, will lift the set-aside; by capping the maximum amount of the set-aside at a level that will provide the protections and stability the Council wanted to create for Aleutian Islands fishing communities, particularly in times of relatively low Aleutian Islands Pacific cod TAC, and that will allow for the continued participation of the offshore sector; and by allowing any vessel and any Aleutian Islands shoreplant to participate in the set-aside. The Council also designed Amendment 113 and this final rule to promote conservation and to prohibit acquisition of an excessive share of fishing privileges as explained earlier in this response.

Comment 15: This action was reasonably calculated to promote conservation as required under National Standard 4 because it will reduce the amount of halibut prohibited species catch (PSC).

Response 15: NMFS acknowledges the comment. NMFS believes that the

commenter is referring to data that indicate that halibut PSC rates are much lower in the Aleutian Islands Pacific cod fishery than in the Bering Sea Pacific cod fishery (Section 2.7.2.2 of the Analysis). The commenter seems to suggest that if more fishing occurs in the Aleutian Islands relative to the Bering Sea because of this final rule, overall halibut PSC usage in the BSAI could potentially decrease. NMFS cannot predict how halibut PSC rates or overall use may change in response to this final rule, if at all. NMFS notes that this final rule will not affect the total maximum permissible amount of halibut PSC established for BSAI groundfish fisheries. As stated in the response to Comment 14, Amendment 113 and this final rule continue to promote and do not undermine the conservation measures established under existing regulations.

Comment 16: The proposed rule will result in TAC being ''stranded'' in the Aleutian Islands Pacific cod fishery and it therefore violates National Standard 1 of the Magnuson-Stevens Act because it does not promote achievement of optimal yield. The proposed rule suggests that performance measures, such as the 1,000-mt minimum landings requirement, would prevent the stranding of Aleutian Islands Pacific cod because other sectors would have access to the fishery once the harvest restrictions and delivery requirements are lifted. However, the fleet cannot adjust in the time frames proposed. The midseason announcements intended to prevent stranding a portion of the Aleutian Islands Pacific cod TAC cannot possibly be effective, given that vessels will be fishing at that time and will likely need to interrupt that fishing to prepare gear for the Aleutian Islands Pacific cod fishery. These vessels would then need to transit to the area from the Bering Sea or Gulf of Alaska. Additionally, delays between when catch is landed and reported to NMFS, and when NMFS can reopen the fishery may further reduce the amount of time available to harvest the remaining TAC while the desirable aggregations of Pacific cod are still available.

Response 16: The Council and NMFS determined that Amendment 113 and this final rule are consistent with National Standard 1. Optimum yield, as defined in the Magnuson-Stevens Act, is that amount of fish which ''will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems'' and the amount of fish which ''is prescribed as such on the basis of the maximum sustainable yield from the fishery, as reduced by any relevant economic, social, or ecological factor'' (16 U.S.C. 1802(33)(A) and (B)). Amendment 113 and this final rule do not change the optimum yield of the BSAI groundfish fisheries, which is specified in regulations as a range from 1.4 million to 2.0 million mt (§ 679.20(a)(1)(i)(A)). NMFS notes that optimum yield refers to a broad range of harvest spanning all species within the BSAI groundfish fisheries, not the TAC for a given species and area in a year. Even if the entire Aleutian Islands Pacific cod TAC were not harvested in a year, optimum yield could still be achieved, consistent with National Standard 1.

The Aleutian Islands Pacific cod OFL, ABC, and TAC, and the process by which NMFS manages the fishery to stay within those limits, will not change as a result of this action. Specifically, this final rule includes several provisions to prevent stranded Pacific cod TAC in the Aleutian Islands and should ensure full harvest of the Aleutian Islands Pacific cod DFA, thus promoting the achievement of optimum yield in the Bering Sea and Aleutian Islands groundfish fisheries. As noted in the response to Comment 14, this final rule does not limit or constrain the proportion of the TAC allocated to CDQ or non-CDQ fishery participants.

NMFS expects that vessel operators will adapt their fishing plans in a variety of ways to accommodate the Aleutian Islands CV Harvest Set-Aside, and expects that sufficient catch monitoring already exists, and notification requirements will be put into effect with this final rule, for vessel operators to predict when and if they should gear up and transit to the Aleutian Islands to fish for Pacific cod. For example, if NMFS has not received notification prior to November 1 of an Aleutian Islands city's intent to process Pacific cod, the A-season Pacific cod fishery will be available to all participants and those participants will have more than two months to prepare. In years with sufficient TAC for an Unrestricted Fishery to commence, vessels may already be fishing in the Aleutian Islands when the Aleutian Islands CV Harvest Set-Aside is lifted. In years when the Aleutian Islands TAC is low and an Unrestricted Fishery will not be available, vessel operators may choose to only fish in the Bering Sea. NMFS posts weekly landing reports by fishery to help the agency and fishery participants project when fisheries will open and close.

NMFS disagrees that delays in catch accounting will further shorten the time available for the fleet to harvest the remaining Aleutian Islands TAC if the 1,000-mt performance standard is not met on or before February 28 or if the full Aleutian Islands CV Harvest Set-Aside is harvested allowing the fishery to be opened to all participants. NMFS tracks harvests and projects when catch limits will be reached so that the announcement can be prepared and the fishery can be opened or closed, as applicable, on the appropriate date. NMFS expects to open the Aleutian Islands Pacific cod fishery as soon as necessary. For example, if Aleutian Islands shoreplants have not met the 1,000-mt performance measure by February 28, NMFS would have anticipated that in advance and be prepared to open the fishery to all eligible participants promptly on March 1 (or February 29, if a leap year). Likewise, NMFS would be prepared to lift the Bering Sea Trawl CV A-Season Sector Limitation if the full set-aside were harvested prior to March 15. The Council considered NMFS' Catch Accounting and Inseason Management protocols when selecting dates for the set-aside.

Comment 17: This final rule promotes conservation and should be viewed as a ''trailing amendment'' to the actions to establish separate Aleutian Islands and Bering Sea Pacific cod OFLs, ABCs, and TACs, and to implement new Steller sea lion protection measures. Both of these actions were implemented for conservation purposes and the Council chose to wait to enact community protections until they could determine what the effects of those actions on Aleutian Islands communities would be.

Response 17: NMFS acknowledges the comment. As stated in the response to Comment 14, Amendment 113 and this final rule continue to promote and do not undermine the conservation measures established under existing regulations, such as the BSAI TAC split and Steller sea lion protection measures.

Comment 18: This action is a violation of National Standard 8. National Standard 8 does not constitute a basis for allocating resources to a specific fishing community nor for providing preferential treatment based on residence in a fishing community. National Standard 8 applies to allocation of fishing, not processing, privileges.

Response 18: Because of their remote location and limited economic alternatives, Aleutian Islands communities rely on harvesting and processing of the nearby fishery resources to support and sustain their communities. National Standard 8 requires that conservation and

management measures take into account the importance of fishery resources to fishing communities by utilizing economic and social data that meet the requirements of National Standard 2 in order to provide for the sustained participation of such communities, and to the extent practicable, minimize adverse economic impacts on such communities (16 U.S.C. 1851(a)(8)). National Standard 8 guidelines recommend that ''. . . where two alternatives achieve similar conservation goals, the alternative that provides the greater potential for sustained participation of such communities and minimizes the adverse economic impacts on such communities would be the preferred alternative'' (50 CFR 600.345(b)(1)). The guidelines further state that ''fishing community'' means a community that is substantially dependent on or substantially engaged in the harvest or processing of fishery resources to meet social and economic needs, and includes fishing vessel owners, operators, and crew, and fish processors that are based in such communities. A fishing community is a social or economic group whose members reside in a specific location and share a common dependency on commercial, recreational, or subsistence fishing or on directly related fisheries-dependent services and industries (for example, boatyards, ice suppliers, tackle shops) (50 CFR 600.345(b)(3)). The Council and NMFS considered the importance of fishery resources to Aleutian Islands fishing communities such as Adak and Atka and determined that community protections were necessary to provide for the sustained participation of these communities in the Aleutian Islands Pacific cod fishery. The Council and NMFS determined that Amendment 113 and this final rule are therefore consistent with National Standard 8.

As discussed in the preamble to the proposed rule and in the Analysis, this final rule does not allocate processing privileges. This final rule allocates fishing privileges for Aleutian Islands Pacific cod through the establishment of a set-aside for a portion of the Aleutian Islands Pacific cod TAC available for harvest by vessels directed fishing for Aleutian Islands Pacific cod and that deliver their catch to Aleutian Islands shoreplants for a portion of the year and only if specific notification and performance requirements are met. This final rule does not change any percentage allocations of Pacific cod established under Amendment 85 to the FMP and existing regulations for the CDQ or non-CDQ fishery sectors as described in § 679.20(a)(7). This final rule does not allocate exclusive fishing privileges to a specific harvester, community, processor, or to residents of a specific community.

Under this final rule, any properly permitted and licensed vessel, operated by any resident of any community or state, can harvest the portion of the Aleutian Islands Pacific cod TAC in the Aleutian Islands CV Harvest Set-Aside. Under this final rule, catch harvested from the set-aside can be delivered to any Aleutian Islands shoreplant in any Aleutian Islands community, and no exclusive opportunity to receive any portion of the set-aside is provided to an Aleutian Islands shoreplant or to a person based on residency in an Aleutian Islands community. As explained in the response to Comments 14 and 19, Amendment 113 and this final rule do not create a processing privilege.

As described in the Analysis, the preamble to the proposed rule, and in public testimony provided at Council meetings, Aleutian Islands Pacific cod is an important component of the socioeconomic health of the community of Adak, and may become a more critical piece of the processing in Atka. In Adak, the Aleutian Islands Pacific cod fishery provides income to harvesters, processors, and other businesses providing support services. Section 2.6.8 of the Analysis suggests that without the set-aside, it is very likely that the processing plant in Adak will not be capable of sustained participation in the future (see also Comment 1). Although Atka has not historically participated in the Aleutian Islands Pacific cod fishery, the Aleutian Pribilof Islands Community Development Association (APICDA) has been working with investors to make substantial infrastructure improvements to their harbor to enhance the local fishing fleet and to the shoreplant so it may operate year-round. Comments submitted by APICDA indicate that harvesting and processing Aleutian Islands Pacific cod are critical to the success of these developments in this remote community. Additional information about Atka is provided in Section 2.6.8 of the Analysis.

The Aleutian Islands Pacific cod fishery is a pulse fishery that operates for several weeks in late February and March. This pulse is the most profitable time of the season for Pacific cod in the region. These few weeks of the Federal-waters Pacific cod fishery are a critical part of these remote operations.

This action is consistent with the management objectives in the FMP and the Programmatic Supplemental Environmental Impact Statement (available at *https://alaskafisheries.noaa.gov/node/33552*). Specifically, NMFS refers the reader to objectives related to potential societal benefits, such as providing socially and economically viable fisheries for the well-being of fishing communities and balancing many competing uses of marine resources and different social and economic goals for sustainable fishery management, including protection of the long-term health of the resource and the optimization of yield.

Comment 19: This action should have been analyzed as a limited access privilege program. The eligibility requirements to grant limited access privileges to communities under the Magnuson-Stevens Act were not followed.

Response 19: Amendment 113 and this final rule do not create a limited access privilege as defined in the Magnuson-Stevens Act (16 U.S.C. 1802(26)). The Magnuson-Stevens Act defines ''limited access privilege'' as a Federal permit, issued as part of a limited access system under section 303A to harvest a quantity of fish expressed by a unit or units representing a portion of the total allowable catch of the fishery that may be received or held for exclusive use by a person, and includes an individual fishing quota, but does not include community development quotas as described in section 305(i). As stated in responses to previous comments, this final rule does not provide any person a portion of the Aleutian Islands Pacific cod TAC that may be received or held for exclusive use. Amendment 113 and this final rule do not assign the Aleutian Islands CV Harvest Set-Aside, in whole or in part, to any one person, Aleutian Islands shoreplant, or community for harvesting or delivery. All harvesters have access to the Aleutian Islands CV Harvest Set-Aside if they are willing to deliver their catch to an Aleutian Islands shoreplant. Any Aleutian Islands shoreplant can accept deliveries from the Aleutian Islands CV Harvest Set-Aside. While the practical effect of Amendment 113 and this final rule may be that harvesters in the Aleutian Islands CV Harvest Set-Aside may have only one Aleutian Islands shoreplant to deliver their catch (Adak), one or more Aleutian Islands shoreplants could become operational at any time and accept deliveries from harvesters in the Aleutian Islands CV Harvest Set-Aside, reducing the amount that Adak could receive. Therefore, Adak is not provided an exclusive processing privilege under Amendment 113 or this final rule (see also response to Comments 14 and 18).

Amendment 113 and this final rule set-aside a portion of the Aleutian Islands DFA during the A-season for vessels that conduct directed fishing for Aleutian Islands Pacific cod and deliver their catch to Aleutian Islands shoreplants for processing. Because Amendment 113 and this final rule do not establish a limited access privilege, Amendment 113 and this final rule do not create a limited access privilege program and the eligibility requirements for limited access privilege programs in the Magnuson-Stevens Act at section 303A (16 U.S.C. 1853a) do not apply to Amendment 113 and this final rule.

Comment 20: National Standard 5 states that ''Conservation and management measures shall, where practicable, consider efficiency in the utilization of fishery resources; except that no such measure shall have economic allocation as its sole purpose.'' This action is inconsistent with National Standard 5 because it fosters inefficiency and has no purpose other than economic allocation. The Draft Analysis acknowledged that the set-aside ''could potentially lead to a lower price for catch and reduce efficient utilization,'' and it is uncertain that this action would benefit Aleutian Islands communities. Adak serves as a port of embarkation and provides goods and services to the fleet. By reducing the number of port visits by CPs during a critical part of the year, this action may actually result in lost economic activity for Adak.

Response 20: Amendment 113 and this final rule set aside a portion of the Aleutian Islands Pacific cod fishery for harvest by certain vessels. The primary objective of this action is to provide Aleutian Islands communities with access to and sustained participation in the Aleutian Islands Pacific cod fishery, and to minimize the adverse impacts of a range of management actions on those communities. This objective is consistent with the goals of the FMP and with National Standard 8 (see response to Comment 18 for additional explanation of consistency with National Standard 8).

The Council and NMFS have determined that Amendment 113 and this final rule are also consistent with National Standard 5. According to the National Standard 5 guidelines, the term ''utilization'' encompasses harvesting, processing, marketing, and non-consumptive uses of the resource, since management decisions affect all sectors of the industry (§ 600.330(b)(1)). National Standard 5 does not refer exclusively to harvesting. While rationalization programs increased efficiency of harvesting the resource, they did so in part at the expense of Aleutian Islands communities. The Council and NMFS can, and must, implement conservation and management measures that are consistent with all of the National Standards.

Section 2.6.2.2 of the Analysis examines some of the potential gains and losses in efficiency that may result from Amendment 113. The Analysis acknowledges that there may be some losses to communities resulting from fewer port visits by CPs. On the other hand, efficiencies may be gained by having a local fishing fleet that can fish closer to shore. Public comments submitted in support for Amendment 113 and this final rule suggest that the communities believe the benefits of this action to Aleutian Islands outweigh any potential losses (see Comment 7). While the efficiency of utilizing shoreplant processing in remote parts of the Aleutian Islands can be debated, the social and economic benefits the shoreplants provide to the communities in which they are located are tangible.

In this particular case, the Council and NMFS have sought to balance the objectives of efficiency under National Standard 5 with the social and economic considerations of Aleutian Island communities under National Standard 8. This type of balance is contemplated in the National Standard 5 guidelines which note, ''Unless the use of inefficient techniques or the creation of redundant fishing capacity contributes to the attainment of other social or biological objectives, an FMP may not contain management measures that impede the use of cost-effective techniques of harvesting, processing, or marketing, and should avoid creating strong incentives for excessive investment in private sector fishing capital and labor'' (§ 600.330(b)(2)(ii)). In this case, the Council and NMFS considered a range of social factors in addition to efficiency, including providing socially and economically viable fisheries for the well-being of Aleutian Islands fishing communities. Consistent with the National Standard 5 guidelines, the Council and NMFS have prepared an analysis and rulemaking that justify these measures ''in light of the biological, ecological, and social objectives of the FMP, as well as the economic objectives'' (§ 600.330(e)).

Comments on Economic Effects

Comment 21: Reduced competition means lower prices for harvesters. By creating an exclusive processing privilege for Aleutian Islands shoreplants, this action has the potential to cause uncompetitive acts. Creating and enforcing a single market for fish is devastating for harvesters who are not protected by any sort of price arbitration structure. Having only a single plant limits competition for landings and the seller has limited negotiating leverage. This drives down the prices paid to fishermen. Additionally, having only a single processor means that some CVs could be excluded if the lone processor does not want to do business with them.

Response 21: As explained in the response to Comments 14, 18 and 19, Amendment 113 and this final rule do not create an exclusive processing privilege for Aleutian Islands shoreplants. As acknowledged in Section 2.7.2.3 of the Analysis, under Amendment 113, CVs may have less ability to use processor competition for Aleutian Islands Pacific cod landings to leverage higher prices. However, the Analysis also acknowledges several ways that CVs may retain leverage in negotiating fair prices from Aleutian Islands shoreplants. To remain solvent, Aleutian Islands shoreplants will need to offer harvesters competitive prices or CVs could withhold delivery of catch to that shoreplant. CVs could choose not to participate in the Aleutian Islands CV Harvest Set-Aside, wait until the set-aside has ended, or shift fishing operations to the Bering Sea. If Aleutian Islands shoreplants are not competitive, they likely will not be able to operate, and NMFS would not expect to receive notification from the City of Adak or the City of Atka by the annual deadline. If less than 1,000 mt of Aleutians Island Pacific cod have been delivered to Aleutian Islands shoreplants on or before February 28, the set-aside will be lifted and the fishery will be opened to all eligible participants for delivery to any eligible processor. This performance measure serves as an additional incentive for Aleutian Islands shoreplants to offer competitive prices to all interested harvesters so that harvesters do not wait until after February 28 for the opportunity to deliver to offshore processors. In addition, this final rule does not provide for only one Aleutian Islands shoreplant or prevent multiple Aleutian Islands shoreplants from operating at the same time. Even when the set-aside is in place, this final rule does not preclude CPs or stationary floating processors from receiving catch from CVs harvesting from the Aleutian Islands Unrestricted Fishery in years when the Aleutian Islands TAC is large enough for the Unrestricted Fishery to occur, or from operating after March 15. CPs and stationary floating processors present in the Aleutian Islands for the Unrestricted

Fishery could be ready to accept deliveries of Pacific cod if the set-aside were lifted early.

Comment 22: The Analysis does not consider the effects of the BSAI TAC split, and assumes the loss of Aleutian Islands Pacific cod can be made up in the Bering Sea, despite the fact that Bering Sea and Aleutian Islands cod are different fisheries with unique products.

Response 22: Sections 2.2 and 2.6 of the Analysis describe some of the effects the BSAI TAC split has had on the amount of Pacific cod available for harvest in the Aleutian Islands. Likewise, the ''Need for This Proposed Rule'' section of the proposed rule identifies the BSAI TAC split and resulting relatively low TAC in the Aleutian Islands as just one of several factors prompting the need for the community protections in this rule. NMFS acknowledges that this action may result in losses to some participants in the Aleutian Islands Pacific cod fishery. Section 2.7.2 of the Analysis and the response to Comment 23 discuss ways that shifting effort to the Bering Sea may mitigate the effects of Amendment 113 on participants.

Comment 23: The Analysis supposes that the loss of Pacific cod harvest by the hook-and-line CP sector in the Aleutian Islands can be offset by shifting effort to the eastern Bering Sea; however, Aleutian Islands Pacific cod are typically larger and fetch a higher price in international markets than Bering Sea Pacific cod. Bering Sea Pacific cod cannot be substituted for Aleutian Islands Pacific cod.

Response 23: The Council and NMFS recognize that Pacific cod fisheries and products differ between the Bering Sea and the Aleutian Islands. The Analysis does not suggest that the same product harvested and processed in the Aleutian Islands can be substituted by one harvested and processed in the Bering Sea and notes that harvesters generally fetch higher prices for Aleutian Islands Pacific cod because of their typically larger size (Section 2.7.2.2 of the Analysis). The Analysis further notes that moving to the Bering Sea to fish for Pacific cod may not be viable for all vessels because they may participate in other Aleutian Islands fisheries, or are subject to harvest sideboards in other fisheries as a result of their eligibility in rationalization programs. Additionally, vessels that formerly fished for Aleutian Islands Pacific cod that move to the Bering Sea to fish for Pacific cod will compete with vessels that have historically fished in the Bering Sea. The Council recognized these limitations on recuperating losses that may be incurred by some participants as a result of Amendment 113, but determined that CPs are better able to adapt to changing conditions in the Aleutian Islands Pacific cod fishery given their ability to move to different locations to fish and process their catch, than Aleutian Islands shoreplants and the vessels that deliver to them, which have less flexibility and adaptability.

The Council and NMFS recognized that CP sectors will not be able to participate in the Aleutian Islands Pacific cod fishery unless the set-aside is not in effect for that year, some of the set-aside remains available for harvest after the set-aside ends, or there is sufficient Aleutian Islands DFA for an Unrestricted Fishery during the set-aside period. The Council determined that in years of low TAC, when an Unrestricted Fishery will not occur, it was important to protect Aleutian Islands fishing communities that cannot easily participate in other fisheries or other areas to make up for lost revenue.

The Council and NMFS recognized the participation of hook-and-line CPs in the Aleutians Islands Pacific cod fishery by capping the amount of Aleutian Islands Pacific cod that goes to the Aleutian Islands CV Harvest Set-Aside and by providing mechanisms to lift the set-aside if no Aleutian Islands city will be processing in the upcoming year or if deliveries do not meet established thresholds by certain dates. This final rule limits the amount of the Aleutian Islands CV Harvest Set-Aside to 5,000 mt, which will allow the participation of all sectors in the Unrestricted Fishery except during years when the Aleutian Islands Pacific cod TAC is extremely low. The Council wanted to provide the Unrestricted Fishery so that vessels not participating in the Aleutian Islands CV Harvest Set-Aside can participate to some extent in the Aleutian Islands Pacific cod fishery and get some of the benefits from it. Additionally, because the Aleutian Islands CV Harvest Set-Aside is for a specific amount, rather than a percentage of TAC, the set-aside will not increase even if Aleutian Islands TAC increases, which will provide for an even greater amount in the Unrestricted Fishery.

Comment 24: The proposed Aleutian Islands CV Harvest Set-Aside period is too long and would prevent others from accessing the fishery altogether. If the Adak plant is expected to be capable of processing more than 400 mt of Pacific cod per day, and the proposed Atka plant has a planned capacity of 180 mt per day, Aleutian Islands shoreplants could process the entire proposed set-aside in just 8 to 11 days.

Response 24: If both of the existing Aleutian Islands shoreplants are operational, they may have the combined capacity to process 500 mt to 600 mt per day. However, if the Pacific cod have not yet arrived and aggregated on the fishing grounds, there would be no deliveries for them to process. To be effective, the Aleutian Islands CV Harvest Set-Aside and Bering Sea Trawl CV A-Season Sector Limitation need to be in place long enough for the Pacific cod to aggregate on the fishing grounds, and for the fish to be harvested and delivered to Aleutian Islands shoreplants for processing. An earlier end date might mean that the peak fishery occurs after the Aleutian Islands CV Harvest Set-Aside and Bering Sea Trawl CV A-Season Sector Limitation have been lifted. Conversely, if the Aleutian Islands CV Harvest Set-Aside and Bering Sea Trawl CV A-Season Sector Limitation did not go into place until later during the A-season, the entire trawl CV allocation could be taken in the Bering Sea before the fishery begins in the Aleutian Islands.

As discussed in the preamble of the proposed rule, the Council determined and NMFS agrees that March 15 is the preferred date for lifting the Aleutian Islands CV Harvest Set-Aside for several reasons. March 15 represents the average date of the peak of the Aleutian Islands Pacific cod fishery for CVs. During the period analyzed (2003 through 2015), a significant portion of Aleutian Islands Pacific cod was not delivered shoreside until mid-March (see Table 2–37 of the Analysis). Establishing a date much earlier than March 15 to relieve the set-aside would not meet the Council's goals to provide access to and to sustain participation in the Aleutian Islands Pacific cod fishery by Aleutian Islands communities because the protections afforded by the set-aside would be lifted before the Pacific cod aggregated on the fishing grounds.

The Council and NMFS considered earlier dates by which to lift these restrictions, but given historical harvesting and delivery patterns for Aleutian Islands Pacific cod, the longer the Aleutian Islands CV Harvest Set-Aside remains in effect during the A-season each year, the greater the opportunity for complete harvest and delivery of the Aleutian Islands CV Harvest Set-Aside. The March 15 date provides greater social and economic stability for Aleutian Islands fishing communities than earlier dates. Limiting the duration of the Aleutian Islands CV Harvest Set-Aside to March 15 also would provide an opportunity for CPs to harvest Pacific cod, and for

CVs to harvest and deliver Pacific cod to CPs or stationary floating processors, before the end of the A-season. The proposed March 15 date balances the opportunities for all participants. Additional information is provided in Section 2.7.2.4 of the Analysis.

Comment 25: The proposed threshold of 5,000 mt for the Aleutian Islands CV Harvest Set-Aside exceeds the recent historical average of deliveries made to Aleutian Islands shoreplants. Excluding the years of no processing by Aleutian Islands shoreplants (2010, 2011, and 2015), the 2010 through 2015 average is 3,073 mt and the average proportion of the Federal Aleutian Islands Pacific cod fishery processed at the Adak and Atka shoreplants from 2003 through 2015 is 32 percent. Applying the historic average to the projected 2017 DFA of 8,965 mt would result in a 2017 set-aside of 2,869 mt. Therefore, a threshold of 3,000 mt would more accurately reflect the ''historical place'' of Aleutian Islands shoreplants in the federal Aleutian Islands Pacific cod fishery.

Response 25: As discussed in the preamble to the proposed rule and in Section 2.7.1.2 of the Analysis, the Council examined harvest and landings data from 2003 through July 2015 and considered a range of options for the amount of the Aleutian Islands CV Harvest Set-Aside (and equivalent Bering Sea Trawl CV A-Season Sector Limitation). The average amount of non-CDQ Aleutian Islands Pacific cod processed by Aleutian Islands shoreplants during this period was 4,732 mt. The Council considered amounts for the Aleutian Islands CV Harvest Set-Aside ranging from 3,000 to 7,000 mt. The Council determined and NMFS agrees that a maximum of 5,000 mt is the appropriate amount because it represents a large percentage of the total amount of Aleutian Islands Pacific cod available to the non-CDQ fishery sectors in recent years, and is in the range necessary to provide benefits to Aleutian Islands fishing communities, including shoreplant operations, when considered in combination with the State guideline harvest level (State GHL) A-season harvest. Additionally, the Analysis shows that 5,000 mt is the approximate long-term average of the annual amount of Pacific cod processed at Aleutian Islands shoreplants between 2003 and 2015, when Aleutian Islands shoreplants were operational.

The Council considered an option that would have reserved a percentage, rather than a fixed amount, of the Aleutian Islands TAC for the Aleutian Islands CV Harvest Set-Aside (see Section 2.7.2.5 of the Analysis). The Council chose a fixed amount (5,000 mt) so that more of the DFA would be available to Aleutian Islands fishing communities in years of low TAC, and so that more of the DFA would be available to all participants in the Unrestricted Fishery in years when the Aleutian Islands TAC is high, providing more opportunities for other participants. Further explanation for the Council's choice of years to examine in the Analysis is given in the response to Comment 27.

Comment 26: The Aleutian Islands Pacific cod fishery is important for all hook-and-line CPs. While Amendment 113 will have negative impacts on all CPs with historical participation in the Aleutian Islands Pacific cod fishery, the negative effects are more profound on specific hook-and-line CP companies with a higher dependence on the Aleutian Islands Pacific cod fishery.

Response 26: The Council and NMFS examined participation in the Aleutian Islands Pacific cod fishery by all sectors over a range of years that included years before major changes in the fishery occurred and years since those changes occurred. The Council recognized that to offer protections to Aleutian Islands communities, there could be some negative effects on other participants in the Aleutian Islands Pacific cod fishery, including the hook-and-line CP sector. In years when the TAC is low and the set-aside is in effect, it is likely that CPs will not have access to the Aleutian Islands Pacific cod fishery at all or at levels to which they are accustomed. To minimize those negative effects, the Council included several provisions that lift the restrictions if minimum performance measures are not met and prevent the stranding of Aleutian Islands Pacific cod. For 2017, the hook-and-line CP sector will have access to 3,965 mt through the Aleutian Islands Unrestricted Fishery. The annual average targeted Aleutian Islands Pacific cod catch by the hook-and-line CP sector between 2003 and 2015 was 2,399 mt (Table 2–34 of the Analysis). Excluding years that Aleutian Islands shoreplants did not operate, the annual average targeted Pacific cod catch by the hook-and-line CP sector was 2,311 mt (Table 2–34 of the Analysis). Even under current management, there is no guarantee that any sector will have access to the Aleutian Islands Pacific cod fishery because of the ability of one sector to harvest Pacific cod up to the Aleutian Islands TAC before other sectors arrive.

NMFS and the Council acknowledge that the hook-and-line CP sector may have a higher dependence on the Aleutian Islands Pacific cod fishery than some other CP sectors; however, like other offshore sectors, the hook-and-line CP sector has the ability to react to changes in the fishery. The hook-and-line CP sector has formed a voluntary cooperative, which provides many of the benefits and flexibility of a rationalized fishery. In contrast, shoreside processors cannot move their operations in response to changing conditions or a low Aleutian Islands Pacific cod TAC. As discussed in the response to Comment 14, each sector continues to receive a percentage of the combined BSAI Pacific cod allocation as established in 2008 under Amendment 85, and can fish their allocations in either the Bering Sea or Aleutian Islands (and under this action shift effort to the Bering Sea or access the Aleutian Islands after a specified date). This action does not change the allocation to the hook-and-line CP sector.

This final rule may provide a benefit to the hook-and-line CP sector in years when the Aleutian Islands DFA is large enough for the Aleutian Islands Unrestricted Fishery to occur. The A-season for hook-and-line CPs and CVs opens on January 1, whereas the A-season for trawl CPs and CVs does not open until January 20. The hook-and-line CPs and CVs will have earlier access to the Aleutian Islands Unrestricted Fishery between January 1 and January 20.

Comment 27: The historical participation of the hook-and-line CP sector in the Aleutian Islands Pacific cod fishery is significantly larger and longer than as stated in the proposed rule. The hook-and-line CP sector has historically harvested more than 95 percent of the non-trawl harvest of Pacific cod in the Aleutian Islands. The hook-and-line CP sector's proportion of the Aleutian Islands Pacific cod harvest was much higher before 2002, when Steller sea lion protection measures were first implemented.

Response 27: NMFS acknowledges that the hook-and-line CP sector has consistently participated in the Aleutian Islands Pacific cod fishery annually, harvesting 14% of the Aleutian Islands Pacific cod on an average annual basis during 2003 through 2015 (Table 2–13 of the Analysis), and that the hook-and-line CP sector participated in the fishery prior to 2003. NMFS also acknowledges that the hook-and-line CP sector harvests a large percentage of the non-trawl harvest of Aleutian Islands Pacific cod, but also notes that the overall non-trawl harvest is a small proportion of the Aleutian Islands TAC. The Council chose to use 2003 as a starting point for the Analysis for this action for several reasons. First, data from years prior to 2003 is not compatible with data from

2003 to the present. NMFS implemented its Catch Accounting System in 2003, which significantly changed the methodologies used to determine catch estimates (Section 2.5 of the Analysis). Second, data before 2003 represent harvests made prior to the implementation of Steller sea lion protection measures, which substantively changed the management of, and the participation patterns in, the Aleutian Islands Pacific cod fishery. The Council determined and NMFS agrees that catch data prior to 2003 does not reflect how the fishery has been managed and prosecuted during the last 13 years (2003 through 2015) considered by NMFS and Council in developing Amendment 113 and this final rule. Third, the Council determined and NMFS agrees that it was important to consider data from the largest set of years both before and after the implementation of Steller Sea Lion measures, rationalization programs, and the BSAI TAC split to understand the effects of those actions on the Aleutian Islands Pacific cod fishery.

Comment 28: The proposed action will further concentrate the Aleutian Islands Pacific cod harvest spatially and temporally in the Aleutian Islands with more harvest by the trawl sector. In the proposed rule for the 2014 Steller sea lion protection measures (available at *https://alaskafisheries.noaa.gov/sites/default/files/79fr37486.pdf*), NMFS stated that, ''Pacific cod hook-and-line and pot gear harvests occur in much smaller quantities and at slower rates for these gears than trawl gear. This makes it less likely that hook-and-line and pot gear harvests would result in localized depletion of Steller sea lion prey resources.'' The proposed action, combined with the BSAI TAC split, GHL fishery, and consequences of the Steller sea lion protection measures will further limit the hook-and-line CP sector's participation and increase trawl harvests of Aleutian Islands Pacific cod.

Response 28: NMFS acknowledges that the Analysis predicts some spatial concentration of harvest because vessels participating in the set-aside are expected to be trawl CVs that will likely fish closer to shore and nearer to Adak and Atka, the Aleutian Islands communities that are most likely to receive Pacific cod deliveries under the set-aside. The amount of Aleutian Islands Pacific cod harvest that might be caught closer to shore under a maximum set-aside amount of 5,000 mt that is roughly equivalent to the average annual amount of Pacific cod caught by CVs and delivered to Aleutian Islands shoreplants between 2003 and 2015, which reduces the potential for spatial concentration (see Section 3.4 of the Analysis). Fishing closer to shore may increase efficiency in the fishery (Section 2.7.2.2 of the Analysis) by reducing transit times, allowing vessels to make more frequent offloads, and not having to coordinate fishing operations with an offshore processor (Section 2.7.2.2 of the Analysis). Allowing other participants to target the Aleutian Islands Unrestricted Fishery when the DFA is greater than 5,000 mt, and the performance measures that remove the set-aside if there is insufficient shoreplant processing will also limit spatial concentration. Finally, the Council and NMFS will continue to use the current harvest specifications process for setting the Aleutian Islands Pacific cod TAC and manage harvest within these limits. Any potential changes in harvest location as a result of the set-aside are not expected to impact Aleutian Islands Pacific cod stock status (see Section 3.3.1 of the Analysis), or have an impact on Steller sea lions in a manner not previously considered in previous consultations (see Section 3.4 of the Analysis).

NMFS disagrees that Amendment 113 and this final rule will cause additional temporal concentration of the fishery. In the years since the BSAI TAC split, the Aleutian Islands Pacific cod fishery has closed on March 16, 2014, February 27, 2015, and June 8, 2016, so as not to exceed the Aleutian Islands Pacific cod TAC. Setting aside a maximum of 5,000 mt of Aleutian Islands Pacific cod until March 21 may actually prolong the season for Aleutian Islands Pacific cod because CPs will not be able to harvest Pacific cod from the set-aside (unless they are delivering their catch to Aleutian Islands shoreplants for processing) or process any Aleutian Islands Pacific cod remaining from the set-aside until after the conclusion of the Aleutian Islands CV Harvest Set-Aside on March 15.

As examined in the FONSI (Section 3.6 of the Analysis), Amendment 113 and this final rule will not adversely affect endangered or threatened species, marine mammals, or critical habitat of these species in any manner not considered in prior consultations on the BSAI groundfish fisheries. While this action may increase the harvest of Pacific cod nearshore in the Aleutian Islands subarea, the harvest of Pacific cod will continue to occur within the limits established in the annual groundfish harvest specifications by vessels the same as or similar to those currently fishing for Pacific cod in the BSAI.

The vessels affected by this action will continue to be required to comply with all Steller sea lion protection measures including no-transit areas, closed areas, and the requirement to carry vessel monitoring systems (50 CFR part 679). Therefore, Amendment 113 and this rule will result in no substantial change to the actions analyzed in the biological opinion dated April 2, 2014, in which NMFS found that the groundfish fisheries in the BSAI are not likely to jeopardize the continued existence of the western distinct population segment of Steller sea lions or destroy or adversely modify its designated critical habitat (Section 3.4 of the Analysis).

Comment 29: The hook-and-line CP sector's proportion of the Aleutian Islands Pacific cod harvest has been reduced since the establishment of the State Pacific cod GHL fishery, which is designed for harvest by CVs that deliver to Aleutian Islands communities. The State GHL fishery sets aside 28 percent of the Aleutian Islands Pacific cod TAC for fishing in State waters, which is essentially an allocation to shore-based processors. The State GHL fishery cannot be harvested by CPs and is not prosecutable by the Federal offshore sector. The State GHL fishery has resulted in considerable stranded Pacific cod. A large proportion of the State GHL fishery has remained unharvested and unavailable to the Federal fisheries because there is no rollover provision. Adak and Atka have unique access to processing the State GHL fishery, but have chosen not to participate in this fishery in recent years.

Response 29: The State GHL fishery for Aleutian Islands Pacific cod is managed exclusively by the State within State waters. This final rule does not modify the State GHL fishery. Management of the State GHL fishery is outside of the scope of this final rule. Absent preemption under section 306(b) of the Magnuson-Stevens Act, NMFS does not have authority to determine catch amounts or the types of gear or vessels used in the Aleutian Islands Pacific cod State GHL fishery.

The State established two GHL fisheries for Pacific cod in 2006; one in the Bering Sea and one in the Aleutian Islands. The Aleutian Islands State GHL fishery is currently set at a harvest limit equivalent to 27 percent of the Aleutian Islands Pacific cod ABC, not 28 percent of the Aleutian Islands Pacific cod TAC as stated by the commenter. The harvest limit may be increased (or decreased) in the following fishing year depending on how much of the State GHL fishery is harvested, and the harvest limit can increase to a maximum of 39 percent of the Aleutian Islands Pacific cod ABC if

the harvest limit continues to be fully harvested each year. In addition, the Aleutian Islands State GHL fishery is capped at a maximum of 15 million pounds (6,804 mt). Therefore, if 27 percent of the Aleutian Islands Pacific cod ABC represents an amount that is greater than 15 million pounds in some future year, the State GHL fishery for that year would be 15 million pounds. The Aleutian Islands State GHL for 2016 is 4,752 mt.

The amount of the Aleutian Islands State GHL fishery is deducted from the Aleutian Islands Pacific cod ABC to calculate the Aleutian Islands Pacific cod TAC. While the establishment of the State GHL fishery in 2006 reduced the Aleutian Islands TAC, it did not change the hook-and-line CP sector's allocation of 48.7 percent of the combined BSAI Pacific cod TAC. The reduction in the Aleutian Islands TAC resulting from the State GHL fishery is distributed proportionately across all sectors, and is not borne by the hook-and-line CP sector alone.

NMFS assumes that the commenter is concluding that setting aside an additional amount of Aleutian Islands Pacific cod for Aleutian Islands communities is not warranted because these communities are not processing the full amount of what has already been allocated to them through the State GHL fishery. The commenter is correct that the full amount of the Aleutian Islands State GHL fishery has not been harvested every year; however, it is incorrect to state that Adak has chosen not to participate in the fishery in recent years. As noted in Table 2–31 in the Analysis, Aleutian Islands shoreplants have processed over 4,000 mt of Pacific cod from Federal and State GHL fisheries each year from 2012 through 2014. On average, Aleutian Islands shoreplants processed 2,046 mt of Pacific cod from the State GHL fishery annually since the inception of the Aleutian Islands Pacific cod State GHL fishery in 2006. The Council determined that the State GHL fishery alone was inadequate to sustain Aleutian Islands communities and shoreplants. Based on information received in public testimony, the Council determined that Aleutian Islands communities need about 9,000 mt of Pacific cod annually to support shoreplant operations. The Council selected a set-aside amount that in combination with the State GHL fishery would give Aleutian Islands communities access to at least 9,000 mt of Pacific cod annually. See also the response to Comment 25.

Comment 30: The data presented in the Analysis do not reflect CP participation and dependence in the Aleutian Islands Pacific cod fishery. Processing by the offshore sector has also declined since rationalization programs were implemented. This rule will cause economic harm to CPs that are invested and have historically participated in the Aleutian Islands Pacific cod fishery. This rule also harms CVs that cannot make onshore landings and must deliver to CPs.

Response 30: NMFS and the Council recognize, and the Analysis shows, that CPs have a history of participation in the Aleutian Islands Pacific cod fishery (Sections 2.6.6.1 through 2.6.6.3 of the Analysis), that the average annual amount of Aleutian Islands Pacific cod processed by the offshore sector has declined since 2011 (coinciding with the BSAI TAC split, Table 2–31 of the Analysis), and that this rule may cause some economic losses to CPs. The Council also recognized that the amount of Pacific cod harvested by trawl CPs, and the number of participating trawl CPs, have declined since 2003 (Table 2–10 in the Analysis). However, Aleutian Islands Pacific cod represents only a small portion of the total landings and revenue by the trawl CP fleet (Table 2–11 in the Analysis). The declining biomass and BSAI TAC split have resulted in reduced Pacific cod catches in the Aleutian Islands for all participants in both the onshore and offshore sectors. The Council and NMFS have chosen to set aside a portion of the harvest for vessels delivering their catch to Aleutian Islands shoreplants because these Aleutian Islands fishing communities do not have the flexibility available to offshore sector participants to redeploy into other BSAI or GOA groundfish fisheries, move their operations to the Bering Sea, or participate in rationalization programs that grant greater flexibility (Section 2.7.2.2 of the Analysis). The Council and NMFS have determined that the onshore sector had a greater dependence on the Aleutian Islands Pacific cod fishery than the offshore sector. Section 2.7.2.2 of the Analysis discusses some of the ways trawl CPs, trawl CVs, and hook-and-line CPs may respond to the restrictions imposed by this rule.

The Council and NMFS recognize that some trawl CVs that have historically participated in the Aleutian Islands Pacific cod fishery lack the ability to make onshore deliveries. These vessels will likely experience a loss of economic activity from this action (Section 2.7.2.3 of the Analysis), particularly in years of low Aleutian Islands Pacific cod TAC. The options for mitigating losses incurred by this action on trawl CVs are the same as for other sectors that may be excluded from the fishery during the set-aside: they may fish in the Bering Sea, fish the Aleutian Islands Unrestricted Fishery, or wait for the set-aside to be lifted.

Comment 31: The F/V *Katie Ann,* a trawl CP, is one of the earliest and most consistent participants in the Aleutian Islands Pacific cod fishery. The F/V *Katie Ann* is more dependent on the Aleutian Islands Pacific cod fishery than any other CP. Participation by the F/V *Katie Ann* predates the American Fisheries Act and the first entry of any shorebased processor in the Aleutian Islands. The intermittent entry into the fishery by the Adak shoreplant has harmed the ability of the F/V *Katie Ann* to harvest and process its long-term historical share of the Aleutian Islands Pacific cod fishery. Amendment 113, if implemented, threatens to destroy one of the only remaining viable fishing operations for the F/V *Katie Ann.*

Response 31: The Council and NMFS recognized the long history of participation in the Aleutian Islands Pacific cod fishery by the F/V *Katie Ann* as Amendment 113 was being developed and considered. The Council considered an option that would have allowed CPs that had processed Pacific cod in the Aleutian Islands management area in at least 12 years between 2000 and 2014, such as the F/V *Katie Ann,* to be exempt from restrictions on processing for up to 2,000 mt of Pacific cod. Ten CPs that harvested and processed both targeted and incidental catch of Pacific cod during that period would have qualified for this exemption. The F/V *Katie Ann* is the only vessel that operated as a mothership processing targeted Pacific cod during this period.

The Council did not select this option for an exemption for the F/V *Katie Ann* or other qualified CPs. The 2,000-mt exemption would have represented 40 percent of the 5,000-mt set-aside. The Council determined, and NMFS agrees, that this amount would have substantially reduced the amount available to vessels delivering to Aleutian Islands shoreplants and could have undermined the efficacy of Amendment 113. The primary objective of Amendment 113 and this final rule is to provide access to and promote sustained participation in the Aleutian Islands Pacific cod fishery by Aleutian Islands fishing communities in this remote area, especially at very low TAC levels. At TACs larger than 5,000 mt, CPs and motherships may participate in the Aleutian Islands Unrestricted Fishery. The Council considered historical participation of the offshore sector, including the F/V *Katie Ann,* but determined that the fishery cannot

support historical levels of effort by all sectors (Section 2.7.2.5 of the Analysis). The Council selected a maximum level of 5,000 mt for the set-aside to provide continued access to the Aleutian Islands Pacific cod fishery by the offshore sector when the Aleutian Islands TAC is at a level that can accommodate both the needs of the inshore fishery and Aleutian Islands fishing communities, as well as offshore fishery participants. See also the response to Comment 33.

Comment 32: In any fishery management plan that awards fishing privileges to one group and takes them away from another, there are certain to be winners and losers; however, the benefits to the winners must be balanced against the harm to the losers. Amendment 113 fails to achieve the required balance. There is little to no evidence that the harm that will be suffered by historical participants will be offset by any net benefits to either Adak or Atka. History has shown that it may be impossible to operate a viable shoreplant in Adak, and there is currently no one committed to future operations of the existing plant in Adak.

Response 32: Amendment 113 and this final rule provide access to and sustained participation in the Aleutian Islands Pacific cod fishery by Aleutian Islands fishing communities, especially during periods when the Pacific cod TAC in the Aleutian Islands is relatively low. This is an appropriate action for the Council and NMFS to take, in recognition of the dependence on the Pacific cod fishery by Aleutian Islands fishing communities, the lack of protections for Aleutian Island harvesters and communities seeking to establish viable community-based fishing operations under the status quo, and the lack of opportunity for Aleutian Islands shoreplants and CVs to expand to other areas and fisheries.

While it is accurate that the Aleutian Islands shoreplants in Adak or Atka did not process Pacific cod during the 2015 or 2016 fishing years, comments received during public testimony to the Council and the public comment period for the proposed rule state that investors and processors are planning to process Pacific cod in one or both communities if this final rule is implemented. The commenters believe that without the Aleutian Islands CV Harvest Set-Aside, it is doubtful that any operator will have a viable opportunity to process Pacific cod in Adak or Atka, and the inshore sector will continue to be preempted from the fishery. Public comments in favor of the action also state that there will be considerable social and economic benefits to Aleutian Islands communities as a result of this action that offset the expected costs to other participants.

The Council included provisions to mitigate the costs of the set-aside on other participants by providing access to the fishery by other participants if the Aleutian Islands shoreplants do not submit a notification of their intent to process Pacific cod in the upcoming year or if those shoreplants do not meet the minimum processing requirement of 1,000 mt on or before February 28. Additionally, historical participants who cannot participate in the set-aside may participate in the Aleutian Islands Unrestricted Fishery, when available, or fish in the Aleutian Islands for Pacific cod when the set-aside is lifted (see also the response to Comment 16).

Comment 33: This action would significantly impact the revenue and operations of Amendment 80 CPs that also have a history of dependence on the Aleutian Islands Pacific cod fishery. These CPs take deliveries from CVs that are unable to deliver to shore.

Response 33: Amendment 113 and this rule do not prohibit Amendment 80 CPs and CVs delivering to Amendment 80 CPs from participating in the A-season Pacific cod fishery in the Aleutian Islands; those vessels may participate in the Aleutian Islands Unrestricted Fishery, when available, and may harvest any remaining BSAI non-CDQ Pacific cod up to the Aleutian Islands DFA after the set-aside is lifted. In addition, if NMFS does not receive timely notification from the City of Adak or the City of Atka, there will be no Aleutian Islands CV Harvest Set-Aside, and no additional regulatory harvesting or delivery limitations imposed on these vessels.

When the Aleutian Islands DFA is greater than 5,000 mt, the difference between the DFA and the Aleutian Islands CV Harvest Set-Aside is available as the ''Aleutian Islands Unrestricted Fishery'' for directed fishing by all non-CDQ fishery sectors with sufficient A-season allocation and may be processed by any eligible processor, including Amendment 80 CPs and CVs making deliveries to them. The amount of the Aleutian Islands Unrestricted Fishery will be published in the BSAI Harvest Specifications. Given the current 2017 harvest specifications for Aleutian Islands Pacific cod, 3,965 mt of Pacific cod will be available for the Aleutian Islands Unrestricted Fishery.

The Aleutian Islands CV Harvest Set-Aside will only be in effect for a portion of the A-season. The set-aside will be lifted if the entire amount of the set-aside has been delivered to Aleutian Islands shoreplants, or on March 15, whichever comes first. Additionally, if Aleutian Islands shoreplants do not meet certain performance requirements, the harvest and delivery restrictions will be lifted and the Aleutian Islands Pacific cod DFA can be harvested by any eligible vessel for delivery to any eligible processor. For example, if Aleutian Islands shoreplants have not processed at least 1,000 mt of Pacific cod by February 28, the set-aside will be lifted. Any amount of the set-aside remaining after that date, plus the remainder of the Aleutian Islands DFA, will be available for harvest by any eligible vessel for delivery to any eligible processor. Likewise, if the entire set-aside is harvested prior to March 15, the harvest and delivery restrictions will be lifted immediately. At the latest, the harvest set-aside will be lifted on March 15, and any amount of the set-aside remaining will be added to the remaining Aleutian Islands DFA for harvest by any eligible vessel for delivery to any eligible processor.

Comment 34: Section 2.7.2 of the Analysis states that the set-aside ''would preclude the future participation of other participants that may benefit or have historically benefitted from the harvesting and processing of Aleutian Islands Pacific cod unless Aleutian Islands shoreplants are unable to process the Aleutian Islands Pacific cod received from catcher vessels.'' The justification for this is presented as the Council having made inshore-offshore allocations previously. This, however, is not an inshore-offshore allocation; this is pre-emption of the offshore sector to the benefit of the onshore sector.

Response 34: The sentence that follows the material quoted by the commenter states, ''The Council and NMFS have allocated fishery resources between inshore and offshore participants in the past, consistent with the purpose and need for the action, the National Standards and other provisions of the MSA [Magnuson-Stevens Act].'' This sentence simply refers to past actions taken by the Council and NMFS that allocate fishery resources between inshore and offshore participants and does not represent the Council's and NMFS' justification for recommending and approving the Aleutian Islands Pacific cod harvest set-aside. The justification and rationale for establishing the set-aside is provided generally in the administrative record for Amendment 113, and specifically in Section 2.4.3 of the Analysis, in the preamble of the proposed rule, and in the preamble of this final rule.

Although the Aleutian Islands Pacific cod set-aside is not identical to other inshore-offshore allocation actions the

Council and NMFS have implemented, the set-aside does allocate Aleutian Islands Pacific cod among an inshore sector (those vessels that deliver their catch to Aleutian Islands shoreplants for processing) and an offshore sector (those vessels that process their catch at sea or that deliver their catch to offshore processors for processing), making it a type of inshore-offshore allocation. Another type of inshore-offshore allocation was the Gulf of Alaska (GOA) pollock and Pacific cod inshore-offshore allocations under Amendment 23 to the Fishery Management Plan for Groundfish of the GOA (GOA FMP). Under Amendment 23, 100 percent of the GOA pollock TAC was allocated to vessels delivering their catch of pollock to onshore processors. In the preamble of the final rule implementing Amendment 23, NMFS stated, ''The allocation of 100 percent of the GOA pollock TAC to the inshore sector proposed by the Council and approved by the Secretary slightly exceeds the harvest rates of the inshore sector in recent years and results in a redistribution of the pollock resource from the offshore sector to the inshore sector. The Secretary determined that this redistribution was appropriate based on the social and other benefits that would be derived from implementation of the allocation'' (57 FR 23321, June 3, 1992). In contrast to the inshore-offshore allocation of GOA pollock under Amendment 23 to the GOA FMP, the Aleutian Islands Pacific cod CV Harvest Set-aside will allow the offshore sector to participate in the Aleutian Islands Pacific cod fishery in years when the Aleutian Islands Pacific cod DFA provides for the Unrestricted Fishery, and in years when no Aleutian Islands shoreplant is processing Pacific cod or participating vessels fail to deliver 1,000 mt of Aleutian Islands Pacific cod to Aleutian Islands shoreplants by February 28.

Comment 35: This action would create an exclusive processing privilege for Adak under the assumption that shore-based processors are entitled to an allocated share of processing privileges. The Council and NMFS have attempted to disguise an exclusive processing allocation to Adak by defining qualifying participants as ''Aleutian Islands shoreplants'' within a specified geographic region. However, the shoreplant in Atka has never processed Pacific cod and has no historical dependence on the fishery and it is unlikely that competing processing will be developed in the region in the foreseeable future. Therefore, this action is an exclusive allocation to Adak, whose shoreplant has a dubious track record for paying fisherman and has had numerous operational difficulties.

The Magnuson-Stevens Act does not allow a fishery management council to allocate fishery privileges to shore-based processors. The express Federal prohibition of creating such a privilege was acknowledged by NOAA General Counsel (GC) in a letter from Lisa Lindeman to the Council Chair in 2009. Section 303A of the Magnuson-Stevens Act specifies that limited access privilege programs authorized under this act pertain to fish harvesting. Had Congress intended to create an individual processor quota, it could have done so, as it did for the crab fisheries in the BSAI. No such congressional grant of authority applies to shore-based processors operating in the Aleutian Islands Pacific cod fishery.

Response 35: In a memorandum dated September 30, 2009, from Lisa Lindeman, Regional Counsel for the Alaska Region of NOAA General Counsel, to Eric Olsen (then Chairman) and Chris Oliver (Executive Director) of the Council, NOAA GC provided the Council with legal advice in response to four questions posed by the Council. Questions 1, 2, and 4 of the 2009 memorandum are relevant in responding to this comment. In response to the first question, NOAA GC advised that except for the authority provided at section 313(j) for the Crab Rationalization Program (16 U.S.C. 1862(j)), the Magnuson-Stevens Act does not provide the Council or NMFS with the authority to require fixed linkages between harvesters and shore-based processors. In fixed linkages, a harvester is required to deliver his or her catch to a specific shore-based processor. NOAA GC explained that requiring fixed linkages between harvesters and shore-based processors is similar to issuing processor quota, which is not authorized by the Magnuson-Stevens Act except for the Crab Rationalization Program. Therefore, with the exception of the Crab Rationalization Program, NMFS acknowledges that the Council and NMFS do not have authority under the Magnuson-Stevens Act to require fixed linkages between harvesters and processors or to establish exclusive processing privileges or processor quota.

In response to the second question, NOAA GC advised that the Magnuson-Stevens Act does authorize allocation of harvesting privileges to shore-based processors if other requirements of the Magnuson-Stevens Act are met. Therefore, NMFS generally disagrees with the commenter's assertion that the Magnuson-Stevens Act does not allow a fishery management council to allocate fishery privileges to shore-based processors. Finally, in response to the fourth question, whether the Magnuson-Stevens Act authorizes the Council to establish an exclusive class of shore-based processors that would be the recipients of all, or a specific portion of all, landings from a fishery, NOAA GC advised that the answer is dependent on the purpose of the action and the record developed by the Council. NOAA GC stated, ''The Magnuson-Stevens Act does not authorize placing a limit on the number of shore-based processing sites if the purpose is to allocate shore-based processing privileges. . . . However, if the Council developed an adequate record demonstrating that an action, which had the practical effect of limiting the number of sites to which deliveries could be made, was necessary for legitimate management or conservation objectives (*e.g.,* . . . protection of fishing communities that depend on the fisheries) and not a disguised limited entry program, then there could be a legal basis for such an action.''

NMFS disagrees that this action creates an exclusive processing privilege for Adak or a disguised processing allocation to Adak. No aspect of this action establishes exclusivity. This final rule does not provide a specific allocation of processing privileges to either Aleutian Islands shoreplant. Nothing in Amendment 113 or this final rule prevents the Atka shoreplant from processing Aleutian Islands Pacific cod and reducing the amount of Pacific cod that is delivered to Adak by vessels participating in the set-aside, prevents other Aleutian Islands shoreplants from processing Aleutian Islands Pacific cod in Adak or Atka, or prevents a shoreplant in any other onshore location west of 170° W. longitude from processing Aleutian Islands Pacific cod. The fact that the set-aside will be lifted if notification of intent to process is not provided, or if less than 1,000 mt of Aleutian Islands Pacific cod is processed by February 28, is directly contrary to exclusive privileges that permit the holder of the privilege exclusive access to the resource without diminishment by other participants or revocation without procedural due process. As explained throughout this final rule, the Council and NMFS have articulated legitimate management and conservation objectives for the Aleutian Islands CV Harvest Set-Aside to protect Aleutian Islands fishing communities that depend on access to and sustained participation in the fisheries for the socioeconomic benefits and stability

provided by that access and participation. Therefore, Amendment 113 and this final rule do not create an exclusive processing privilege for Adak.

OMB Revisions to PRA References in 15 CFR 902.1(b)

Section 3507(c)(B)(i) of the Paperwork Reduction Act (PRA) requires that agencies inventory and display a current control number assigned by the Director of the Office of Management and Budget (OMB), for each agency's information collection. Section 902.1(b) identifies the location of NOAA regulations for which OMB approval numbers have been issued. Because this final rule revises and adds data elements within a collection-of-information for recordkeeping and reporting requirements, 15 CFR 902.1(b) is revised to reference correctly the sections resulting from this final rule.

Classification

The NMFS Assistant Administrator, Alaska Region, NMFS, determined that Amendment 113 to the FMP and this rule are necessary for the conservation and management of the groundfish fishery and that they are consistent with the Magnuson-Stevens Act and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

Administrative Procedure Act

The NMFS Assistant Administrator finds good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness for this final rule. This finding is based on the need to provide the City of Adak and the City of Atka with sufficient time to submit a notification of intent to process that complies with the regulatory requirements after the notification requirements are effective; to provide NMFS with sufficient time to notify the general public and the affected industry as to whether the Aleutian Islands CV Harvest Set-Aside will be in effect for 2017; and to provide the affected industry with sufficient time to adequately prepare for the start of the 2017 fishing year on January 1, 2017.

NMFS has determined that it must give the City of Adak and the City of Atka 15 days after the effective date of the notification of intent to process regulations to take all necessary steps to prepare, sign, and submit a notification of intent to process that complies with the regulatory requirements at § 679.20(a)(7)(viii)(D). Because these cities are aware of this action, have been anticipating its approval, and support its implementation in time for the 2017 fishing year, NMFS has determined that 15 days will provide the cities with enough time to comply with the notification requirements in 2016. Without waiver of the 30-day delay in effectiveness, the deadline for submission of a notification of intent to process would occur 45 days after publication of the final rule in the **Federal Register**, which means the deadline would occur very late in December 2016 or in early January 2017. A deadline in late December would not provide NMFS with adequate time to notify the industry as to whether the set-aside will be in effect on January 1, 2017, or provide the affected industry with sufficient time to prepare for the fishery which begins on January 1 for some participants in the Aleutian Islands Pacific cod fishery. Because NMFS must receive a notification of intent prior to the start of the fishing year to provide for an orderly start to the fishing year and to ensure the appropriate specifications are in place before fishing occurs on January 1, any notification deadline for 2016 that would occur after December 31, 2016, renders the set-aside meaningless for the 2017 fishing year. For reasons set forth in the Analysis and the preambles of the proposed rule and this final rule, the Council and NMFS have determined that the Aleutian Islands CV Harvest Set-Aside will provide important socioeconomic benefits and stability to Aleutian Islands fishing communities that intend to process Aleutian Islands Pacific cod in the upcoming fishing year. Waiving the 30-day delay in effectiveness will provide Aleutian Islands fishing communities with an opportunity to realize those benefits starting with the 2017 fishing year; failure to waive the delay in effectiveness will postpone that opportunity for an entire fishing year until 2018. One Aleutian Islands shoreplant has already informally notified NMFS that it intends to process Aleutian Islands Pacific cod in 2017.

Additionally, as explained earlier in this final rule, the Analysis determined that the affected fishing industry would have sufficient time to prepare for the upcoming fishing year if notification of intent to process was received from Adak or Atka prior to December 15. Waiving the delay in effectiveness for these regulations provides for a submission deadline that will occur before December 15, thus providing NMFS with sufficient time to notify the public and affected industry as to whether the set-aside will be in effect, and for the affected industry, including vessels that deliver their catch to Aleutian Islands shoreplants and those that deliver their catch to at-sea processors, to prepare for the start of the fishing year with that knowledge. As explained above, failure to waive the delay in effectiveness could result in a notification deadline that occurs in late December, which would not provide NMFS or the affected industry with sufficient time to prepare for the upcoming fishery that starts on January 1, 2017.

For these reasons, the NMFS Assistant Administrator finds good cause to waive the 30-day delay in effectiveness for this final rule.

Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a Final Regulatory Flexibility Analysis, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The preambles to the proposed rule and this final rule serve as the small entity compliance guide. This action does not require any additional compliance from small entities that is not described in the preambles. Copies of the proposed rule and this final rule are available from the NMFS Web site at *http://alaskafisheries.noaa.gov.*

Final Regulatory Flexibility Analysis

Section 604 of the Regulatory Flexibility Act (RFA) requires that, when an agency promulgates a final rule under section 553 of Title 5 of the U.S. Code, after being required by that section or any other law to publish a general notice of proposed rulemaking, the agency shall prepare a FRFA. Section 604 describes the required contents of a FRFA: (1) A statement of the need for and objectives of the rule; (2) a statement of the significant issues raised by the public comments in response to the initial regulatory flexibility analysis, a statement of the assessment of the agency of such issues, and a statement of any changes made in the proposed rule as a result of such comments; (3) the response of the agency to any comments filed by the Chief Counsel for Advocacy of the U.S. Small Business Administration (SBA) in response to the proposed rule, and a detailed statement of any change made to the proposed rule in the final rule as a result of the comments; (4) a description of and an estimate of the number of small entities to which the rule will apply or an explanation of why

no such estimate is available; (5) a description of the projected reporting, recordkeeping, and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; and (6) a description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes, including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

(1) Need for and Objectives of This Final Rule

A statement of the need for and objectives of this rule is contained earlier in the preamble and is not repeated here. This FRFA incorporates the IRFA (see **ADDRESSES**) and the summary of the IRFA in the proposed rule (81 FR 50444, August 1, 2016), a summary of the significant issues raised by the public comments, NMFS' responses to those comments, and a summary of the analyses completed to support the action.

(2) Summary of Significant Issues Raised During Public Comment Period

No comments were received that raised significant issues in response to the IRFA specifically; therefore, no changes were made to this rule as a result of comments on the IRFA. However, several comments were received on the economic impacts of Amendment 113 on the Amendment 80 trawl CP and hook-and-line CP sectors. For a summary of the comments received and NMFS' responses, refer to the section above titled ''Responses to Comments.''

(3) Public and Chief Counsel for Advocacy Comments on the IRFA

NMFS published the proposed rule on August 1, 2016 (81 FR 50444), with comments invited through August 31, 2016. An IRFA was prepared and summarized in the ''Classification'' section of the preamble to the proposed rule. NMFS received 18 letters of public comment on the proposed rule and Amendment 113 to the FMP. The Chief Counsel for Advocacy of the SBA did not file any comments on the proposed rule.

(4) Description and Number of Directly Regulated Small Entities

This final rule directly regulates three groups of entities. This final rule will directly regulate trawl CVs harvesting Pacific cod in the BSAI because it limits how much Pacific cod those trawl CVs may harvest in the Bering Sea, and it may prohibit trawl CVs from participating in the Aleutian Islands Pacific cod fishery if they do not deliver their Pacific cod catch to Aleutian Islands shoreplants. It also directly regulates all non-trawl CVs who are harvesting Pacific cod in the Aleutian Islands because it will prohibit those non-trawl CVs from participating in the Aleutian Islands Pacific cod fishery if they do not deliver their Pacific cod catch to Aleutian Islands shoreplants. Finally, this final will directly regulate all CPs harvesting Pacific cod in the Aleutian Islands because it limits how much Pacific cod those CPs can harvest and process in the Aleutian Islands. This rule does not directly regulate the City of Adak or the City of Atka because it does not impose a requirement on those cities. This rule does not directly regulate entities participating in the harvesting and processing of Pacific cod managed under State GHL fisheries in State waters in the Bering Sea or Aleutian Islands.

The SBA has established size standards for all major industry sectors in the United States. For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 114111) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide.

Based on the best available and most recent complete data from 2012 through 2014, between 10 and 16 CPs, and an estimated 43 CVs (trawl and non-trawl) will be directly regulated by this action in the BSAI. Of these, no CP is estimated to be a small entity, while 6 trawl CVs and 26 non-trawl CVs are estimated to be small entities based on the best available data on the gross receipts from these entities and their known affiliates. Therefore, a total of 32 vessels considered to be small entities will be directly regulated by this action. The IRFA assumes that each vessel is a unique entity; therefore, the total number of directly regulated entities may be an overestimate because some vessels are likely affiliated through common ownership. These potential affiliations are not known with the best available data and cannot be predicted.

(5) Recordkeeping, Reporting, and Other Compliance Requirements

This final rule adds a recordkeeping and reporting requirement to notify NMFS of an Aleutian Islands shoreplant's intent to process Aleutian Islands Pacific cod in the upcoming year; therefore, the recordkeeping, reporting, and other compliance requirements are increased slightly under this final rule. This final rule contains a new requirement for the City of Adak or the City of Atka to notify NMFS of its intent to process Aleutian Islands Pacific cod in the upcoming fishing year in order for the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside to go into effect in the upcoming fishing year. The City Manager of Adak or the City Administrator of Atka is required to provide NMFS with an official notification of intent prior to December 8, 2016, and no later than October 31 for each year after 2016, for the harvest set-aside to go into effect in the upcoming year. The professional skills necessary to provide this notice include writing, sending email, and access to a U.S. Post Office.

(6) Description of Significant Alternatives Considered to the Final Action That Minimize Adverse Impacts on Small Entities

The RFA requires identification of any significant alternatives to the final rule that accomplish the stated objectives of the final action, consistent with applicable statutes, and that would minimize any significant economic impact of the final rule on small entities. The Council considered a status quo alternative and one action alternative with several options and suboptions. The combination of options and suboptions under the action alternative effectively provided a broad range of potential alternative approaches to status quo management. Under the status quo, there would have been a continued risk that fishing communities in the Aleutian Islands would not be able to sustainably participate in the Aleutian Islands Pacific cod fishery. The action alternative does not affect any non-CDQ fishery sector's Pacific cod allocation, or the TAC of Aleutian Islands Pacific cod. The action alternative accomplishes the stated objectives of prioritizing a portion of the Aleutian Islands Pacific cod TAC for harvest by vessels that deliver their

catch to Aleutian Islands shoreplants for processing, while minimizing adverse economic impacts on small entities and the potential for stranding a portion of the Aleutian Islands Pacific cod TAC.

The Council considered a range of dates, varying amounts of Aleutian Islands Pacific cod for the harvest set-aside and Bering Sea sector limitation, and a suite of mechanisms to relieve the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside under the action alternative. The Council recommended the final combination of dates, harvest set-aside amounts, harvest limitations, and provisions to relieve the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside that would give fishery participants sufficient opportunity to harvest and deliver Aleutian Islands Pacific cod to the benefit of Aleutian Islands communities and shoreplants without stranding the trawl CV sector allocation or the Aleutian Islands Pacific cod TAC. The Council recommended and NMFS is implementing selected options in the action alternative such that if specific notification or minimum harvest and processing requirements are not met by a specific date, the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside will either not go into effect in the upcoming year, or they will be lifted for the remainder of the year.

The Council considered and rejected two options under the action alternative. One option would have required that if less than 50 percent of the Aleutian Islands CV Harvest Set-Aside had been landed at an Aleutian Islands shoreplant by a given date, ranging from February 28 to March 15, the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside would be lifted. Instead, the Council selected an option that requires a minimum weight (1,000 mt) rather than a minimum percentage of the Aleutian Islands CV Harvest Set-Aside that must be landed at an Aleutian Islands shoreplant for processing by a given date (February 28) for the Bering Sea Trawl CV A-Season Sector Limitation and the Aleutian Islands CV Harvest Set-Aside to remain in place.

The Council also considered and rejected an option that would have exempted certain processing vessels with a history of processing Aleutian Islands Pacific cod in at least 12 out of 15 recent years from the final restrictions on processing and would have allowed them to process up to 2,000 mt of Aleutian Islands Pacific cod while the set-aside was in effect. This option could have allowed up to 10 processing vessels to continue to process Pacific cod during the A-season, limiting the effectiveness of this final rule to minimize the risk of a diminished historical share of Aleutian Islands Pacific cod being delivered to Aleutian Islands shoreplants and the communities where those shoreplants are located.

Federal Rules That May Duplicate, Overlap, or Conflict With the Final Action

NMFS has not identified any duplication, overlap, or conflict between this final action and existing Federal rules.

Collection-of-Information Requirements

This final rule contains a collection-of-information requirement subject to the PRA and which has been approved by OMB under control number 0648–0743.

Public reporting burden for Notification of Intent to Process Aleutian Islands Pacific cod is estimated to average 30 minutes per individual response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding this data collection, or any other aspect of this data collection, including suggestions for reducing the burden, to NMFS Alaska Region (see **ADDRESSES**), and by email to *OIRA_Submission@omb.eop.gov,* or fax to (202) 395–5806.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number. All currently approved NOAA collections of information may be viewed at: *http://www.cio.noaa.gov/services_programs/prasubs.html.*

List of Subjects

15 CFR Part 902

Reporting and recordkeeping requirements.

50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: November 14, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 15 CFR part 902 and 50 CFR part 679 as follows:

Title 15—Commerce and Foreign Trade

PART 902—NOAA INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL NUMBERS

■ 1. The authority citation for part 902 continues to read as follows:

Authority: 44 U.S.C. 3501 *et seq.*

■ 2. In § 902.1, in the table in paragraph (b), under the entry ''50 CFR'', add an entry for ''679.20(a)(7)(viii)'' to read as follows:

§ 902.1 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

* * * * *

(b) * * *

CFR part or section where the information collection requirement is located	Current OMB control number (all numbers begin with 0648–)
* * * * *	
50 CFR:	
* * * * *	
679.20(a)(7)(viii)	–0743
* * * * *	

* * * * *

Title 50—Wildlife and Fisheries

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 3. The authority citation for 50 CFR part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.;* 1801 *et seq.;* 3631 *et seq.;* Pub. L. 108–447; Pub. L. 111–281.

■ 4. In § 679.2, add a definition for ''Aleutian Islands shoreplant'' in alphabetical order to read as follows:

§ 679.2 Definitions.

* * * * *

Aleutian Islands shoreplant means a processing facility that is physically located on land west of 170° W. longitude within the State of Alaska.

* * * * *

■ 5. In § 679.20, add paragraph (a)(7)(viii) to read as follows:

§ 679.20 General limitations.

* * * * *

(a) * * *

(7) * * *

(viii) *Aleutian Islands Pacific Cod Catcher Vessel Harvest Set-Aside Program*—(A) *Calculation of the Aleutian Islands Pacific cod non-CDQ ICA and DFA.* Each year, during the annual harvest specifications process set forth at paragraph (c) of this section, NMFS will specify the Aleutian Islands Pacific cod non-CDQ incidental catch allowance and directed fishing allowance from the Aleutian Islands Pacific cod non-CDQ TAC as follows. Shortly after completion of the process set forth in paragraph (a)(7)(viii)(D) of this section, NMFS will announce through notice in the **Federal Register** whether the ICA and DFA will be in effect for the upcoming fishing year.

(*1*) *Aleutian Islands Pacific cod non-CDQ incidental catch allowance.* Each year, during the annual harvest specifications process set forth at paragraph (c) of this section, NMFS will specify an amount of Aleutian Islands Pacific cod that NMFS estimates will be taken as incidental catch in non-CDQ directed fisheries for groundfish other than Pacific cod in the Aleutian Islands. This amount will be the Aleutian Islands Pacific cod non-CDQ incidental catch allowance and will be deducted from the aggregate portion of Pacific cod TAC annually allocated to the non-CDQ sectors identified in paragraph (a)(7)(ii)(A) of this section.

(*2*) *Aleutian Islands Pacific cod non-CDQ directed fishing allowance.* Each year, during the annual harvest specifications process set forth at paragraph (c) of this section, NMFS will specify the Aleutian Islands Pacific cod non-CDQ directed fishing allowance. The Aleutian Islands Pacific cod non-CDQ directed fishing allowance will be the amount of the Aleutian Islands Pacific cod TAC remaining after subtraction of the Aleutian Islands Pacific cod CDQ reserve and the Aleutian Islands Pacific cod non-CDQ incidental catch allowance.

(B) *Calculation of the Aleutian Islands CV Harvest Set-Aside and Aleutian Islands Unrestricted Fishery.* Each year, during the annual harvest specifications process set forth at paragraph (c) of this section, NMFS will specify the Aleutian Islands CV Harvest Set-Aside and the Aleutian Islands Unrestricted Fishery. The Aleutian Islands CV Harvest Set-Aside will be an amount of Pacific cod equal to the lesser of either the Aleutian Islands Pacific cod non-CDQ directed fishing allowance as determined in paragraph (a)(7)(viii)(A)(*2*) of this section or 5,000 mt. The Aleutian Islands Unrestricted Fishery will be the amount of Pacific cod that remains after deducting the Aleutian Islands CV Harvest Set-Aside from the Aleutian Islands Pacific cod non-CDQ directed fishing allowance as determined in paragraph (a)(7)(viii)(A)(*2*) of this section. Shortly after completion of the process set forth in paragraph (a)(7)(viii)(D) of this section, NMFS will announce through notice in the **Federal Register** whether the Aleutian Islands CV Harvest Set-Aside and the Aleutian Islands Unrestricted Fishery will be in effect for the upcoming fishing year.

(C) *Calculation of the Bering Sea Trawl CV A-Season Sector Limitation.* Each year, during the annual harvest specifications process set forth at paragraph (c) of this section, NMFS will specify the Bering Sea Trawl CV A-Season Sector Limitation and the amount of the trawl CV sector's A-season allocation that could be harvested in the Bering Sea subarea prior to March 21. The Bering Sea Trawl CV A-Season Sector Limitation will be an amount of Pacific cod equal to the lesser of either the Aleutian Islands Pacific cod non-CDQ directed fishing allowance as determined in paragraph (a)(7)(viii)(A)(*2*) of this section or 5,000 mt. The amount of the trawl CV sector's A-season allocation that could be harvested in the Bering Sea subarea prior to March 21 will be the amount of Pacific cod that remains after deducting the Bering Sea Trawl CV A-Season Sector Limitation from the amount of BSAI Pacific cod allocated to the trawl CV sector A-season as determined in paragraph (a)(7)(iv)(A)(*1*)(*i*) of this section. Shortly after completion of the process set forth in paragraph (a)(7)(viii)(D) of this section, NMFS will announce through notice in the **Federal Register** whether the Bering Sea Trawl CV A-Season Sector Limitation will be in effect for the upcoming fishing year.

(D) *Annual notification of intent to process Aleutian Islands Pacific cod*—(*1*) *Submission of notification.* The provisions of paragraph (a)(7)(viii)(E) of this section will apply if the either the City Manager of the City of Adak or the City Administrator of the City of Atka submits to NMFS a timely and complete notification of its intent to process Aleutian Islands Pacific cod during the upcoming fishing year. This notification must be submitted annually to NMFS using the methods described below.

(*2*) *Submittal method.* An official notification of intent to process Aleutian Islands Pacific cod during the upcoming fishing year in the form of a letter or memorandum signed by the City Manager of the City of Adak or the City Administrator of the City of Atka must be submitted by certified mail through the United States Postal Service to: NMFS Alaska Region, Attn: Regional Administrator, P. O. Box 21668, Juneau, AK 99802. The City Manager or City Administrator must also submit an electronic copy of the official notification of intent and the certified mail receipt with postmark via email to *nmfs.akr.inseason@noaa.gov*. Email submission is in addition to submission via U.S. Postal Service; email submission does not replace the requirement to submit an official notification of intent via U.S. Postal Service.

(*3*) *NMFS confirmation.* On or shortly after December 8, 2016, or November 1 for each year after 2016, the Regional Administrator will send a signed and dated letter to the City Manager of the City of Adak or the City Administrator of the City of Atka either confirming NMFS' receipt of its official notification of intent to process Aleutian Islands Pacific cod, or informing the city that NMFS did not receive notification by the deadline.

(*4*) *Deadline.* The official notification of intent to process Aleutian Islands Pacific cod for the upcoming fishing year must be postmarked no later than December 8, 2016, or October 31 for each year after 2016, in order for the provisions of paragraph (a)(7)(viii)(E) of this section to apply during the upcoming fishing year. Notifications of intent postmarked on or after December 9, 2016, or November 1 for each year after 2016, will not be accepted by the Regional Administrator. The electronic copy of the official notification of intent and certified mail receipt with postmark must be submitted to NMFS via email dated no later than December 8, 2016, or no later than October 31 for each year after 2016, in order for the provisions of paragraph (a)(7)(viii)(E) of this section to apply during the upcoming fishing year.

(*5*) *Contents of notification.* A notification of intent to process Aleutian Islands Pacific cod for the upcoming fishing year must contain the following information:

(*i*) Date,

(*ii*) Name of city,

(*iii*) Statement of intent to process Aleutian Islands Pacific cod,

(*iv*) Identification of the fishing year during which the city intends to process Aleutian Island Pacific cod, and

(*v*) Signature of and contact information for the City Manager or City Administrator of the city intending to process Aleutian Islands Pacific cod.

(E) *Aleutian Islands community protections for Pacific cod.* If the City Manager of the City of Adak or the City

Administrator of the City of Atka submits a timely and complete notification in accordance with paragraph (a)(7)(viii)(D) of this section, then the following provisions will apply for the fishing year following the submission of the timely and complete notification:

(*1*) *Bering Sea Trawl CV A-Season Sector Limitation.* Prior to March 21, the harvest of Pacific cod by the trawl CV sector in the Bering Sea subarea is limited to an amount equal to the trawl CV sector A-season allocation as determined in paragraph (a)(7)(iv)(A)(*1*)(*i*) of this section minus the Bering Sea Trawl CV A-Season Sector Limitation as determined in paragraph (a)(7)(viii)(C) of this section. If, after the start of the fishing year, the provisions of paragraphs (a)(7)(viii)(E)(*4*) or (*5*) of this section are met, this paragraph (a)(7)(viii)(E)(*1*) will not apply for the remainder of the fishing year.

(*2*) *Aleutian Islands Catcher Vessel Harvest Set-Aside.* Prior to March 15, only catcher vessels that deliver their catch of Aleutian Islands Pacific cod to Aleutian Islands shoreplants for processing may directed fish for that portion of the Aleutian Islands Pacific cod non-CDQ directed fishing allowance that is specified as the Aleutian Islands Catcher Vessel Harvest Set-Aside in paragraph (a)(7)(viii)(B) of this section. If, after the start of the fishing year, the provisions of paragraph (a)(7)(viii)(E)(*4*) of this section are met, this paragraph (a)(7)(viii)(E)(*2*) will not apply for the remainder of the fishing year.

(*3*) *Aleutian Islands Unrestricted Fishery.* Prior to March 15, vessels otherwise authorized to directed fish for Pacific cod in the Aleutian Islands may directed fish for that portion of the Aleutian Islands Pacific cod non-CDQ directed fishing allowance that is specified as the Aleutian Islands Unrestricted Fishery as determined in paragraph (a)(7)(viii)(B) of this section and may deliver their catch to any eligible processor.

(*4*) *Minimum Aleutian Islands shoreplant landing requirement.* If less than 1,000 mt of the Aleutian Islands Catcher Vessel Harvest Set-Aside is landed at Aleutian Islands shoreplants on or before February 28, then paragraphs (a)(7)(viii)(E)(*1*) and (*2*) of this section will not apply for the remainder of the fishing year.

(*5*) *Harvest of Aleutian Islands Catcher Vessel Harvest Set-Aside.* If the Aleutian Islands Catcher Vessel Harvest Set-Aside is fully harvested prior to March 15, then paragraph (a)(7)(viii)(E)(*1*) of this section will not apply for the remainder of the fishing year.

RIN 1515–AE18

Extension of Import Restrictions Imposed on Certain Archaeological and Ethnological Material From Greece

AGENCY: Customs and Border Protection, Department of Homeland Security; Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the U.S. Customs and Border Protection (CBP) regulations to reflect the extension of import restrictions on certain archaeological and ethnological material from the Hellenic Republic (Greece). The restrictions, which were originally imposed by CBP Decision (CBP Dec.) 11–25, are due to expire on November 21, 2016. The Assistant Secretary for Educational and Cultural Affairs, United States Department of State, has determined that factors continue to warrant the imposition of import restrictions and no cause for suspension exists. Accordingly, these import restrictions will remain in effect for an additional five years, and the CBP regulations are being amended to reflect this extension until November 21, 2021. These restrictions are being extended pursuant to determinations of the United States Department of State made under the terms of the Convention on Cultural Property Implementation Act that implemented the United Nations Educational, Scientific and Cultural Organization (UNESCO) Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. CBP Dec. 11–25 contains the Designated List of archaeological and ecclesiastical ethnological material from Greece, to which the restrictions apply.

DATES: *Effective Date:* November 21, 2016.

FOR FURTHER INFORMATION CONTACT: For legal aspects, Lisa L. Burley, Chief, Cargo Security, Carriers and Restricted Merchandise Branch, Regulations and Rulings, Office of Trade, (202) 325–0215. For operational aspects, William R. Scopa, Branch Chief, Partner Government Agency Branch, Trade Policy and Programs, Office of Trade, (202) 863–6554, *William.R.Scopa@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

Pursuant to the provisions of the 1970 United Nations Educational, Scientific and Cultural Organization (UNESCO) Convention, implemented by the Convention on Cultural Property Implementation Act (Pub. L. 97–446, 19 U.S.C. 2601 *et seq.*), the United States made a bilateral agreement with Greece, which entered into force on November 21, 2011, concerning the imposition of import restrictions on archaeological materials representing Greece's cultural heritage from the Upper Paleolithic (beginning approximately 20,000 B.C.) through the 15th century A.D., and ecclesiastical ethnological material representing Greece's Byzantine culture (approximately the 4th century through the 15th century A.D.). On December 1, 2011, CBP published CBP Dec. 11–25 in the **Federal Register** (76 FR 74691), which amended 19 CFR 12.104g(a) to indicate the imposition of these restrictions and included a list designating the types of archaeological and ecclesiastical ethnological material covered by the restrictions.

Import restrictions listed in 19 CFR 12.104g(a) are effective for no more than five years beginning on the date on which the agreement enters into force with respect to the United States. This period can be extended for additional periods not to exceed five years if it is determined that the factors which justified the initial agreement still pertain and no cause for suspension of the agreement exists (19 CFR 12.104g(a)).

On February 5, 2016, the Department of State received a request by the Government of the Hellenic Republic to extend the Agreement. Subsequently, the Department of State proposed to extend the Agreement. After considering the views and recommendation of the Cultural Property Advisory Committee, the Assistant Secretary for Educational and Cultural Affairs, United States Department of State, determined that the cultural heritage of Greece continues to be in jeopardy from pillage of archaeological materials representing Greece's cultural heritage from the Upper Paleolithic (beginning approximately 20,000 B.C.) through the 15th century A.D., and ecclesiastical

ethnological material representing Greece's Byzantine culture (approximately the 4th century through the 15th century A.D.); and made the necessary determinations to extend the import restrictions for an additional five years. Diplomatic notes have been exchanged, reflecting the extension of those restrictions for an additional five-year period. Accordingly, CBP is amending 19 CFR 12.104g(a) to reflect this extension of the import restrictions.

The Designated List archaeological materials representing Greece's cultural heritage from the Upper Paleolithic (beginning approximately 20,000 B.C.) through the 15th century A.D., and ecclesiastical ethnological material representing Greece's Byzantine culture (approximately the 4th century through the 15th century A.D.) covered by these import restrictions is set forth in CBP Dec. 11–25. The Agreement and Designated List may also be found at the following Internet Web site address: *https://eca.state.gov/cultural-heritage-center/cultural-property-protection/bilateral-agreements/greece.*

The restrictions on the importation of these archaeological and ecclesiastical ethnological materials from Greece are to continue in effect for an additional five years. Importation of such material continues to be restricted unless the conditions set forth in 19 U.S.C. 2606 and 19 CFR 12.104c are met.

Inapplicability of Notice and Delayed Effective Date

This amendment involves a foreign affairs function of the United States and is, therefore, being made without notice or public procedure (5 U.S.C. 553(a)(1)). In addition, CBP has determined that such notice or public procedure would be impracticable and contrary to the public interest because the action being taken is essential to avoid interruption of the application of the existing import restrictions (5 U.S.C. 553(b)(B)). For the same reasons, a delayed effective date is not required under 5 U.S.C. 553(d)(3).

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply.

Executive Order 12866

It has been determined that this rule is not a significant regulatory action under Executive Order 12866.

Signing Authority

This regulation is being issued in accordance with 19 CFR 0.1(a)(1).

List of Subjects in 19 CFR Part 12

Cultural property, Customs duties and inspection, Imports, Prohibited merchandise.

Amendment to CBP Regulations

For the reasons set forth above, part 12 of title 19 of the Code of Federal Regulations (19 CFR part 12), is amended as set forth below:

PART 12—SPECIAL CLASSES OF MERCHANDISE

■ 1. The general authority citation for part 12 and the specific authority citation for § 12.104g continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States (HTSUS)), 1624.

* * * * *

Sections 12.104 through 12.104i also issued under 19 U.S.C. 2612;

* * * * *

§ 12.104g [Amended]

■ 2. In § 12.104g, paragraph (a), the table is amended in the entry for Greece (Hellenic Republic) by adding after the phrase ''CBP Dec. 11–25'' the phrase ''extended by CBP Dec. 16- 21''.

R. Gil Kerlikowske,

Commissioner, U.S. Customs and Border Protection.

Approved: November 21, 2016.

Timothy E. Skud,

Deputy Assistant Secretary of the Treasury.

BILLING CODE 9111–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

Food Labeling

CFR Correction

■ In Title 21 of the Code of Federal Regulations, Parts 100 to 169, revised as of April 1, 2016, on page 50, § 101.11 is added to read as follows:

§ 101.11 Nutrition Labeling of Standard Menu Items in Covered Establishments

(a) *Definitions.* The definitions of terms in section 201 of the Federal Food, Drug, and Cosmetic Act apply to such terms when used in this section. In addition, for purposes of this section:

Authorized official of a restaurant or similar retail food establishment means the owner, operator, agent in charge, or other person authorized by the owner, operator, or agent in charge to register the restaurant or similar retail food establishment, which is not otherwise subject to section 403(q)(5)(H) of the Federal Food, Drug, and Cosmetic Act, with FDA for the purposes of paragraph (d) of this section.

Combination meal means a standard menu item that consists of more than one food item, for example a meal that includes a sandwich, a side dish, and a drink. A combination meal may be represented on the menu or menu board in narrative form, numerically, or pictorially. Some combination meals may include a variable menu item or be a variable menu item as defined in this paragraph where the components may vary. For example, the side dish may vary among several options (*e.g.,* fries, salad, or onion rings) or the drinks may vary (*e.g.,* soft drinks, milk, or juice) and the customer selects which of these items will be included in the meal.

Covered establishment means a restaurant or similar retail food establishment that is a part of a chain with 20 or more locations doing business under the same name (regardless of the type of ownership, *e.g.,* individual franchises) and offering for sale substantially the same menu items, as well as a restaurant or similar retail food establishment that is registered to be covered under paragraph (d) of this section.

Custom order means a food order that is prepared in a specific manner based on an individual customer's request, which requires the covered establishment to deviate from its usual preparation of a standard menu item, *e.g.,* a club sandwich without the bacon if the establishment usually includes bacon in its club sandwich.

Daily special means a menu item that is prepared and offered for sale on a particular day, that is not routinely listed on a menu or menu board or offered by the covered establishment, and that is promoted by the covered establishment as a special menu item for that particular day.

Doing business under the same name means sharing the same name. The term ''name'' refers to either:

(i) The name of the establishment presented to the public; or

(ii) If there is no name of the establishment presented to the public (*e.g.,* an establishment with the generic descriptor ''concession stand''), the name of the parent entity of the establishment. When the term ''name'' refers to the name of the establishment presented to the public under paragraph (i) of this definition, the term ''same'' includes names that are slight variations

of each other, for example, due to the region, location, or size (*e.g.,* ''New York Ave. Burgers'' and ''Pennsylvania Ave. Burgers'' or ''ABC'' and ''ABC Express'').

Food on display means restaurant-type food that is visible to the customer before the customer makes a selection, so long as there is not an ordinary expectation of further preparation by the consumer before consumption.

Food that is part of a customary market test means food that appears on a menu or menu board for less than 90 consecutive days in order to test consumer acceptance of the product.

Location means a fixed position or site.

Menu or menu board means the primary writing of the covered establishment from which a customer makes an order selection, including, but not limited to, breakfast, lunch, and dinner menus; dessert menus; beverage menus; children's menus; other specialty menus; electronic menus; and menus on the Internet. Determining whether a writing is or is part of the primary writing of the covered establishment from which a customer makes an order selection depends on a number of factors, including whether the writing lists the name of a standard menu item (or an image depicting the standard menu item) and the price of the standard menu item, and whether the writing can be used by a customer to make an order selection at the time the customer is viewing the writing. The menus may be in different forms, *e.g.,* booklets, pamphlets, or single sheets of paper. Menu boards include those inside a covered establishment as well as drive-through menu boards at covered establishments.

Offering for sale substantially the same menu items means offering for sale a significant proportion of menu items that use the same general recipe and are prepared in substantially the same way with substantially the same food components, even if the name of the menu item varies, (*e.g.,* ''Bay View Crab Cake'' and ''Ocean View Crab Cake''). ''Menu items'' in this definition refers to food items that are listed on a menu or menu board or that are offered as self-service food or food on display. Restaurants and similar retail food establishments that are part of a chain can still be offering for sale substantially the same menu items if the availability of some menu items varies within the chain. Having the same name may indicate, but does not necessarily guarantee, that menu items are substantially the same.

Restaurant or similar retail food establishment means a retail establishment that offers for sale restaurant-type food, except if it is a school as defined by 7 CFR 210.2 or 220.2.

Restaurant-type food means food that is:

(i) Usually eaten on the premises, while walking away, or soon after arriving at another location; and

(ii) Either:

(A) Served in restaurants or other establishments in which food is served for immediate human consumption or which is sold for sale or use in such establishments; or

(B) Processed and prepared primarily in a retail establishment, ready for human consumption, of the type described in paragraph (ii)(A) of this definition, and offered for sale to consumers but not for immediate human consumption in such establishment and which is not offered for sale outside such establishment.

Self-service food means restaurant-type food that is available at a salad bar, buffet line, cafeteria line, or similar self-service facility and that is served by the customers themselves. Self-service food also includes self-service beverages.

Standard menu item means a restaurant-type food that is routinely included on a menu or menu board or routinely offered as a self-service food or food on display.

Temporary menu item means a food that appears on a menu or menu board for less than a total of 60 days per calendar year. The 60 days includes the total of consecutive and non-consecutive days the item appears on the menu.

Variable menu item means a standard menu item that comes in different flavors, varieties, or combinations, and is listed as a single menu item.

(b) *Requirements for nutrition labeling for food sold in covered establishments*—(1) *Applicability.* (i) The labeling requirements in this paragraph (b) apply to standard menu items offered for sale in covered establishments.

(ii)(A) The labeling requirements in this paragraph (b) do not apply to foods that are not standard menu items, including:

(*1*) Items such as condiments that are for general use, including those placed on the table or on or behind the counter; daily specials; temporary menu items; custom orders; food that is part of a customary market test; and

(*2*) Self-service food and food on display that is offered for sale for less than a total of 60 days per calendar year or fewer than 90 consecutive days in order to test consumer acceptance.

(B) The labeling requirements of paragraph (b)(2)(iii) of this section do not apply to alcoholic beverages that are foods on display and are not self-service foods.

(2) *Nutrition information.* (i) Except as provided by paragraph (b)(2)(i)(A)(*8*) of this section, the following must be provided on menus and menu boards:

(A) The number of calories contained in each standard menu item listed on the menu or menu board, as usually prepared and offered for sale. In the case of multiple-serving standard menu items, this means the calories declared must be for the whole menu item listed on the menu or menu board as usually prepared and offered for sale (*e.g.,* ''pizza pie: 1600 cal''); or per discrete serving unit as long as the discrete serving unit (*e.g.,* pizza slice) and total number of discrete serving units contained in the menu item are declared on the menu or menu board, and the menu item is usually prepared and offered for sale divided in discrete serving units (*e.g.,* ''pizza pie: 200 cal/slice, 8 slices''). The calories must be declared in the following manner:

(*1*) The number of calories must be listed adjacent to the name or the price of the associated standard menu item, in a type size no smaller than the type size of the name or the price of the associated standard menu item, whichever is smaller, in the same color, or a color at least as conspicuous as that used for the name of the associated standard menu item, and with the same contrasting background or a background at least as contrasting as that used for the name of the associated standard menu item.

(*2*) To the nearest 5-calorie increment up to and including 50 calories and to the nearest 10-calorie increment above 50 calories, except that amounts less than 5 calories may be expressed as zero.

(*3*) The term ''Calories'' or ''Cal'' must appear as a heading above a column listing the number of calories for each standard menu item or adjacent to the number of calories for each standard menu item. If the term ''Calories'' or ''Cal'' appears as a heading above a column of calorie declarations, the term must be in a type size no smaller than the smallest type size of the name or price of any menu item on that menu or menu board in the same color or a color at least as conspicuous as that used for that name or price and in the same contrasting background or a background at least as contrasting as that used for that name or price. If the term ''Calories'' or ''Cal'' appears adjacent to the number of calories for the standard menu item, the term ''Calories'' or ''Cal''

must appear in the same type size and in the same color and contrasting background as the number of calories.

(*4*) Additional requirements that apply to each individual variable menu item:

(*i*) When the menu or menu board lists flavors or varieties of an entire individual variable menu item (such as soft drinks, ice cream, doughnuts, dips, and chicken that can be grilled or fried), the calories must be declared separately for each listed flavor or variety. Where flavors or varieties have the same calorie amounts (after rounding in accordance with paragraph (b)(2)(i)(A)(*2*) of this section), the calorie declaration for such flavors or varieties can be listed as a single calorie declaration adjacent to the flavors or varieties, provided that the calorie declaration specifies that the calorie amount listed represents the calorie amounts for each individual flavor or variety.

(*ii*) When the menu or menu board does not list flavors or varieties for an entire individual variable menu item, and only includes a general description of the variable menu item (*e.g.,* ''soft drinks''), the calories must be declared for each option with a slash between the two calorie declarations where only two options are available (*e.g.,* ''150/250 calories'') or as a range in accordance with the requirements of paragraph (b)(2)(i)(A)(7) of this section where more than two options are available (*e.g.,* ''100–250 calories'').

(*iii*) When the menu or menu board describes flavors or varieties for only part of an individual variable menu item (such as different types of cheese offered in a grilled cheese sandwich (*e.g.,* ''Grilled Cheese (Cheddar or Swiss)''), the calories must be declared for each option with a slash between the two calorie declarations where only two options are available (*e.g.,* ''450/500 calories'') or as a range in accordance with the requirements of paragraph (b)(2)(i)(A)(*7*) of this section where more than two options are available (*e.g.,* ''450–550 calories'').

(*5*) Additional requirements that apply to a variable menu item that is offered for sale with the option of adding toppings listed on the menu or menu board. When the menu or menu board lists toppings that can be added to a menu item (such as pizza or ice cream):

(*i*) The calories must be declared for the basic preparation of the menu item as listed (*e.g.,* ''small pizza pie,'' ''single scoop ice cream'').

(*ii*) The calories must be separately declared for each topping listed on the menu or menu board (*e.g.,* pepperoni, sausage, green peppers, onions on pizza; fudge, almonds, sprinkles on ice cream), specifying that the calories are added to the calories contained in the basic preparation of the menu item. Where toppings have the same calorie amounts (after rounding in accordance with paragraph (b)(2)(i)(A)(*2*) of this section), the calorie declaration for such toppings can be listed as a single calorie declaration adjacent to the toppings, provided that the calorie declaration specifies that the calorie amount listed represents the calorie amount for each individual topping.

(*iii*) The calories for the basic preparation of the menu item must be declared for each size of the menu item. The calories for each topping listed on the menu or menu board must be declared for each size of the menu item, or declared using a slash between the two calorie declarations for each topping where only two sizes of the menu item are available (*e.g.,* ''adds 150/250 cal'') or as a range for each topping in accordance with the requirements of paragraph (b)(2)(i)(A)(*7*) of this section where more than two sizes of the menu item are available (*e.g.,* ''adds 100–250 cal''). If a slash between two calorie declarations or a range of calorie declarations is used, the menu or menu board must indicate that the variation in calories for each topping arises from the size of the menu item to which the toppings are added.

(*iv*) If the amount of the topping included on the basic preparation of the menu item decreases based on the total number of toppings ordered for the menu item (such as is sometimes the case with pizza toppings), the calories for each topping must be declared as single values representing the calories for each topping when added to a one-topping menu item, specifying that the calorie declaration is for the topping when added to a one-topping menu item.

(*6*) Additional requirements that apply to a combination meal. Except as provided in paragraph (b)(2)(i)(A)(*6*)(*iv*) of this section:

(*i*) When the menu or menu board lists two options for menu items in a combination meal (*e.g.,* a sandwich with a side salad or chips), the calories must be declared for each option with a slash between the two calorie declarations (*e.g.,* ''350/450 calories'').

(*ii*) When the menu or menu board lists three or more options for menu items in a combination meal (*e.g.,* a sandwich with chips, a side salad, or fruit), the calories must be declared as a range in accordance with the requirements of paragraph (b)(2)(i)(A)(*7*) of this section (*e.g.,* ''350–500 calories'').

(*iii*) When the menu or menu board includes a choice to increase or decrease the size of a combination meal, the calorie difference must be declared for the increased or decreased size with a slash between two calorie declarations (*e.g.,* ''Adds 100/150 calories,'' ''Subtracts 100/150 calories'') if the menu or menu board lists two options for menu items in the combination meal, or as a range in accordance with the requirements of paragraph (b)(2)(i)(A)(*7*) of this section (*e.g.,* ''Adds 100–250 calories,'' ''Subtracts 100–250 calories'') if the menu or menu board lists three or more options for menu items in the combination meal.

(*iv*) Where the menu or menu board describes an opportunity for a consumer to combine standard menu items for a special price (*e.g.,*''Combine Any Sandwich with Any Soup or Any Salad for $8.99''), and the calories for each standard menu item, including each size option as described in paragraph (b)(2)(i)(A)(6)(*iii*) of this section if applicable, available for the consumer to combine are declared elsewhere on the menu or menu board, the requirements of paragraphs (b)(2)(i)(A)(*6*)(*i*), (*ii*), and (*iii*) of this section do not apply.

(*7*) Additional format requirements for declaring calories for an individual variable menu item, a combination meal, and toppings as a range, if applicable. Calories declared as a range must be in the format ''xx–yy,'' where ''xx'' is the caloric content of the lowest calorie variety, flavor, or combination, and ''yy'' is the caloric content of the highest calorie variety, flavor, or combination.

(*8*) Exception for a variable menu item that has no clearly identifiable upper bound to the range of calories: If the variable menu item appears on the menu or menu board and is a self-service food or food on display, and there is no clearly identifiable upper bound to the range, *e.g.,* all-you-can-eat buffet, then the menu or menu board must include a statement, adjacent to the name or price of the item, referring customers to the self-service facility for calorie information, *e.g.,* ''See buffet for calorie declarations.'' This statement must appear in a type size no smaller than the type size of the name or price of the variable menu item, whichever is smaller, and in the same color or a color at least as conspicuous as that used for that name or price, with the same contrasting background or a background at least as contrasting as that used for that name or price.

(*9*) Additional requirements that apply to beverages that are not self-service. For beverages that are not self-service, calories must be declared based

on the full volume of the cup served without ice, unless the covered establishment ordinarily dispenses and offers for sale a standard beverage fill (*i.e.,* a fixed amount that is less than the full volume of the cup per cup size) or dispenses a standard ice fill (*i.e.,* a fixed amount of ice per cup size). If the covered establishment ordinarily dispenses and offers for sale a standard beverage fill or dispenses a standard ice fill, the covered establishment must declare calories based on such standard beverage fill or standard ice fill.

(B) The following statement designed to enable consumers to understand, in the context of a total daily diet, the significance of the calorie information provided on menus and menu boards: ''2,000 calories a day is used for general nutrition advice, but calorie needs vary.'' For menus and menu boards targeted to children, the following options may be used as a substitute for or in addition to the succinct statement: ''1,200 to 1,400 calories a day is used for general nutrition advice for children ages 4 to 8 years, but calorie needs vary.'' or ''1,200 to 1,400 calories a day is used for general nutrition advice for children ages 4 to 8 years and 1,400 to 2,000 calories a day for children ages 9 to 13 years, but calorie needs vary.''

(*1*) This statement must be posted prominently and in a clear and conspicuous manner in a type size no smaller than the smallest type size of any calorie declaration appearing on the same menu or menu board and in the same color or in a color at least as conspicuous as that used for the calorie declarations and with the same contrasting background or a background at least as contrasting as that used for the calorie declarations.

(*2*) For menus, this statement must appear on the bottom of each page of the menu. On menu pages that also bear the statement required by paragraph (b)(2)(i)(C) of this section, this statement must appear immediately above, below, or beside the statement required by paragraph (b)(2)(i)(C) of this section.

(*3*) For menu boards, this statement must appear on the bottom of the menu board, immediately above, below, or beside the statement required by paragraph (b)(2)(i)(C) of this section.

(C) The following statement regarding the availability of the additional written nutrition information required in paragraph (b)(2)(ii) of this section must be on all forms of the menu or menu board: ''Additional nutrition information available upon request.''

(*1*) This statement must be posted prominently and in a clear and conspicuous manner in a type size no smaller than the smallest type size of any calorie declaration appearing on the same menu or menu board and in the same color or in a color at least as conspicuous as that used for the caloric declarations, and with the same contrasting background or a background at least as contrasting as that used for the caloric declarations.

(*2*) For menus, the statement must appear on the bottom of the first page with menu items immediately above, below, or beside the succinct statement required by paragraph (b)(2)(i)(B) of this section.

(*3*) For menu boards, the statement must appear on the bottom of the menu board immediately above, below, or beside the succinct statement required by paragraph (b)(2)(i)(B) of this section.

(ii) The following nutrition information for a standard menu item must be available in written form on the premises of the covered establishment and provided to the customer upon request. This nutrition information must be presented in the order listed and using the measurements listed, except as provided in paragraph (b)(2)(ii)(B) of this section. Rounding of these nutrients must be in compliance with § 101.9(c). The information must be presented in a clear and conspicuous manner, including using a color, type size, and contrasting background that render the information likely to be read and understood by the ordinary individual under customary conditions of purchase and use. Covered establishments may use the abbreviations allowed for Nutrition Facts for certain packaged foods in § 101.9(j)(13)(ii)(B):

(A)(*1*) Total calories (cal);
(*2*) Calories from fat (fat cal);
(*3*) Total fat (g);
(*4*) Saturated fat (g);
(*5*) *Trans* fat (g);
(*6*) Cholesterol (mg);
(*7*) Sodium (mg);
(*8*) Total carbohydrate (g);
(*9*) Dietary fiber (g);
(*10*) Sugars (g); and
(*11*) Protein (g).

(B) If a standard menu item contains insignificant amounts of all the nutrients required to be disclosed in paragraph (b)(2)(ii)(A) of this section, the establishment is not required to include nutrition information regarding the standard menu item in the written form. However, if the covered establishment makes a nutrient content claim or health claim, the establishment is required to provide nutrition information on the nutrient that is the subject of the claim in accordance with § 101.10. For standard menu items that contain insignificant amounts of six or more of the required nutrients, the declaration of nutrition information required by paragraph (b)(2)(ii)(A) of this section may be presented in a simplified format.

(*1*) An insignificant amount is defined as that amount that allows a declaration of zero in nutrition labeling, except that for total carbohydrates, dietary fiber, and protein, it must be an amount that allows a declaration of ''less than one gram.''

(*2*) The simplified format must include information, in a column, list, or table, on the following nutrients:

(*i*) Total calories, total fat, total carbohydrates, protein, and sodium; and

(*ii*) Calories from fat, and any other nutrients identified in paragraph (b)(2)(ii)(A) of this section that are present in more than insignificant amounts.

(*3*) If the simplified format is used, the statement ''Not a significant source of ____'' (with the blank filled in with the names of the nutrients required to be declared in the written nutrient information and calories from fat that are present in insignificant amounts) must be included at the bottom of the list of nutrients.

(C) For variable menu items, the nutrition information listed in paragraph (b)(2)(ii)(A) of this section must be declared as follows for each size offered for sale:

(*1*) The nutrition information required in paragraph (b)(2)(ii)(A) of this section must be declared for the basic preparation of the item and, separately, for each topping, flavor, or variable component.

(*2*) Additional format requirements for toppings if the amount of the topping included on the basic preparation of the menu item decreases based on the total number of toppings ordered for the menu item (such as is sometimes the case with pizza toppings). The nutrients for such topping must be declared as single values representing the nutrients for each topping when added to a one-topping menu item, specifying that the nutrient declaration is for the topping when added to a one-topping menu item.

(*3*) If the calories and other nutrients are the same for different flavors, varieties, and variable components of the combination meal, each variety, flavor, and variable component of the combination meal is not required to be listed separately. All items that have the same nutrient values could be listed together with the nutrient values listed only once.

(D) The written nutrition information required in paragraph (b)(2)(ii)(A) of this section may be provided on a counter card, sign, poster, handout, booklet, loose leaf binder, or electronic device

such as a computer, or in a menu, or in any other form that similarly permits the written declaration of the required nutrient content information for all standard menu items. If the written nutrition information is not in a form that can be given to the customer upon request, it must be readily available in a manner and location on the premises that allows the customer/consumer to review the written nutrition information upon request.

(iii) The following must be provided for a standard menu item that is self-service or on display.

(A) Calories per displayed food item (*e.g.,* a bagel, a slice of pizza, or a muffin), or if the food is not offered for sale in a discrete unit, calories per serving (*e.g.,* scoop, cup), and the serving or discrete unit used to determine the calorie content (*e.g.,* ''per scoop'' or ''per muffin'') on either: A sign adjacent to and clearly associated with the corresponding food; (*e.g.,* ''150 calories per scoop); a sign attached to a sneeze guard with the calorie declaration and the serving or unit used to determine the calorie content above each specific food so that the consumer can clearly associate the calorie declaration with the food, except that if it is not clear to which food the calorie declaration and serving or unit refers, then the sign must also include the name of the food, *e.g.,* ''Broccoli and cheese casserole—200 calories per scoop''; or a single sign or placard listing the calorie declaration for several food items along with the names of the food items, so long as the sign or placard is located where a consumer can view the name, calorie declaration, and serving or unit of a particular item while selecting that item.

(*1*) For purposes of paragraph (b)(2)(iii)(A) of this section, ''per displayed food item''; means per each discrete unit offered for sale, for example, a bagel, a slice of pizza, or a muffin.

(*2*) For purposes of paragraph (b)(2)(iii)(A) of this section, ''per serving'' means, for each food:

(*i*) Per serving instrument used to dispense the food offered for sale, provided that the serving instrument dispenses a uniform amount of the food (*e.g.,* a scoop or ladle);

(*ii*) If a serving instrument that dispenses a uniform amount of food is not used to dispense the food, per each common household measure (*e.g.,* cup or tablespoon) offered for sale or per unit of weight offered for sale, *e.g.,* per quarter pound or per 4 ounces; or

(*iii*) Per total number of fluid ounces in the cup in which a self-service beverage is served and, if applicable, the description of the cup size (*e.g.,* ''140 calories per 12 fluid ounces (small)'').

(*3*) The calories must be declared in the following manner:

(*i*) To the nearest 5-calorie increment up to and including 50 calories and to the nearest 10-calorie increment above 50 calories except that amounts less than 5 calories may be expressed as zero.

(*ii*) If the calorie declaration is provided on a sign with the food's name, price, or both, the calorie declaration, accompanied by the term ''Calories'' or ''Cal'' and the amount of the serving or displayed food item on which the calories declaration is based must be in a type size no smaller than the type size of the name or price of the menu item whichever is smaller, in the same color, or a color that is at least as conspicuous as that used for that name or price, using the same contrasting background or a background at least as contrasting as that used for that name or price. If the calorie declaration is provided on a sign that does not include the food's name, price, or both, the calorie declaration, accompanied by the term ''Calories'' or ''Cal'' and the amount of the serving or displayed food item on which the calorie declaration is based must be clear and conspicuous.

(*iii*) For self-service beverages, calorie declarations must be accompanied by the term ''fluid ounces'' and, if applicable, the description of the cup size (*e.g.,* ''small,'' ''medium'').

(B) For food that is self-service or on display and is identified by an individual sign adjacent to the food itself where such sign meets the definition of a menu or menu board under paragraph (a) of this section, the statement required by paragraph (b)(2)(i)(B) of this section and the statement required by paragraph (b)(2)(i)(C) of this section. These two statements may appear on the sign adjacent to the food itself; on a separate, larger sign, in close proximity to the food that can be easily read as the consumer is making order selections; or on a large menu board that can be easily read as the consumer is viewing the food.

(C) The nutrition information in written form required by paragraph (b)(2)(ii) of this section, except for packaged food insofar as it bears nutrition labeling information required by and in accordance with paragraph (b)(2)(ii) of this section and the packaged food, including its label, can be examined by a consumer before purchasing the food.

(c) *Determination of nutrient content.* (1) A covered establishment must have a reasonable basis for its nutrient declarations. Nutrient values may be determined by using nutrient databases (with or without computer software programs), cookbooks, laboratory analyses, or other reasonable means, including the use of Nutrition Facts on labels on packaged foods that comply with the nutrition labeling requirements of section 403(q)(1) of the Federal Food, Drug, and Cosmetic Act and § 101.9, FDA nutrient values for raw fruits and vegetables in Appendix C of this part, or FDA nutrient values for cooked fish in Appendix D of this part.

(2) Nutrient declarations for standard menu items must be accurate and consistent with the specific basis used to determine nutrient values. A covered establishment must take reasonable steps to ensure that the method of preparation (*e.g.,* types and amounts of ingredients, cooking temperatures) and amount of a standard menu item offered for sale adhere to the factors on which its nutrient values were determined.

(3) A covered establishment must provide to FDA, within a reasonable period of time upon request, information substantiating nutrient values including the method and data used to derive these nutrient values. This information must include the following:

(i) For nutrient databases:

(A) The name and version (including the date of the version) of the database, and, as applicable, the name of the applicable software company and any Web site address for the database. The name and version of a database would include the name and version of the computer software, if applicable;

(B) The recipe or formula used as a basis for the nutrient declarations;

(C)(*1*) Information on:

(*i*) The amount of each nutrient that the specified amount of each ingredient identified in the recipe contributes to the menu item; and

(*ii*) How the database was used including calculations or operations (*e.g.,* worksheets or computer printouts) to determine the nutrient values for the standard menu items;

(*2*) If the information in paragraph (c)(3)(i)(C)(*1*) of this section is not available, certification attesting that the database will provide accurate results when used appropriately and that the database was used in accordance with its instructions;

(D) A detailed listing (*e.g.,* printout) of the nutrient values determined for each standard menu item.

(E) Any other information pertinent to the final nutrient values of the standard menu item (*e.g.,* information about what might cause slight variations in the

nutrient profile such as moisture variations);

(F) A statement signed and dated by a responsible individual, employed at the covered establishment or its corporate headquarters or parent entity, who can certify that the information contained in the nutrient analysis is complete and accurate; and

(G) A statement signed and dated by a responsible individual employed at the covered establishment certifying that the covered establishment has taken reasonable steps to ensure that the method of preparation (*e.g.,* types and amounts of ingredients in the recipe, cooking temperatures) and amount of a standard menu item offered for sale adhere to the factors on which its nutrient values were determined.

(ii) For published cookbooks that contain nutritional information for recipes in the cookbook:

(A) The name, author, and publisher of the cookbook used;

(B) If available, information provided by the cookbook or from the author or publisher about how the nutrition information for the recipes was obtained;

(C) A copy of the recipe used to prepare the standard menu item and a copy of the nutrition information for that standard menu item as provided by the cookbook; and

(D) A statement signed and dated by a responsible individual employed at the covered establishment certifying that that the covered establishment has taken reasonable steps to ensure that the method of preparation (*e.g.,* types and amounts of ingredients in the recipe, cooking temperatures) and amount of a standard menu item offered for sale adhere to the factors on which its nutrient values were determined. (Recipes may be divided as necessary to accommodate differences in the portion size derived from the recipe and that are served as the standard menu item but no changes may be made to the proportion of ingredients used.)

(iii) For laboratory analyses:

(A) A copy of the recipe for the standard menu item used for the nutrient analysis;

(B) The name and address of the laboratory performing the analysis;

(C) Copies of analytical worksheets, including the analytical method, used to determine and verify nutrition information;

(D) A statement signed and dated by a responsible individual, employed at the covered establishment or its corporate headquarters or parent entity, who can certify that the information contained in the nutrient analysis is complete and accurate; and

(E) A statement signed and dated by a responsible individual employed at the covered establishment certifying that the covered establishment has taken reasonable steps to ensure that the method of preparation (*e.g.,* types and amounts of ingredients in the recipe, cooking temperatures) and amount of a standard menu item offered for sale adhere to the factors on which its nutrient values were determined.

(iv) For nutrition information provided by other reasonable means:

(A) A detailed description of the means used to determine the nutrition information;

(B) A recipe or formula used as a basis for the nutrient determination;

(C) Any data derived in determining the nutrient values for the standard menu item, *e.g.,* nutrition information about the ingredients used with the source of the nutrient information;

(D) A statement signed and dated by a responsible individual, employed at the covered establishment or its corporate headquarters or parent entity, who can certify that the information contained in the nutrient analysis is complete and accurate; and

(E) A statement signed and dated by a responsible individual employed at the covered establishment certifying that the covered establishment has taken reasonable steps to ensure that the method of preparation (*e.g.,* types and amounts of ingredients in the recipe, cooking temperatures) and amount of a standard menu item offered for sale adhere to the factors on which its nutrient values were determined.

(d) *Voluntary registration to be subject to the menu labeling requirements*—(1) *Applicability.* A restaurant or similar retail food establishment that is not part of a chain with 20 or more locations doing business under the same name and offering for sale substantially the same menu items may voluntarily register to be subject to the requirements established in this section. Restaurants and similar retail food establishments that voluntarily register will no longer be subject to non-identical State or local nutrition labeling requirements.

(2) *Who may register?* The authorized official of a restaurant or similar retail food establishment as defined in paragraph (a) of this section, which is not otherwise subject to paragraph (b) of this section, may register with FDA.

(3) *What information is required?* Authorized officials for restaurants and similar retail food establishments must provide FDA with the following information on Form FDA 3757:

(i) The contact information (including name, address, phone number, and email address) for the authorized official;

(ii) The contact information (including name, address, phone number, and email address) of each restaurant or similar retail food establishment being registered, as well as the name and contact information for an official onsite, such as the owner or manager, for each specific restaurant or similar retail food establishment;

(iii) All trade names the restaurant or similar retail food establishment uses;

(iv) Preferred mailing address (if different from location address for each establishment) for purposes of receiving correspondence; and

(v) Certification that the information submitted is true and accurate, that the person submitting it is authorized to do so, and that each registered restaurant or similar retail food establishment will be subject to the requirements of section 403(q)(5)(H) of the Federal Food, Drug, and Cosmetic Act and this section.

(4) *How to register.* Authorized officials of restaurants and similar retail food establishments who elect to be subject to requirements in section 403(q)(5)(H) of the Federal Food, Drug, and Cosmetic Act can register by visiting *http://www.fda.gov/food/ingredientspackaginglabeling/labelingnutrition/ucm217762.htm.* FDA has created a form (Form 3757) that contains fields requesting the information in paragraph (d)(3) of this section and made the form available at this Web site. Registrants must use this form to ensure that complete information is submitted.

(i) Information should be submitted by email by typing complete information into the form (PDF), saving it on the registrant's computer, and sending it by email to *menulawregistration@fda.hhs.gov.*

(ii) *If email is not available, the registrant* can either fill in the form (PDF) and print it out (or print out the blank PDF and fill in the information by hand or typewriter), and either fax the completed form to 301–436–2804 or mail it to FDA, CFSAN Menu and Vending Machine Registration, White Oak Building 22, Rm. 0209, 10903 New Hampshire Ave., Silver Spring, MD 20993.

(5) *When to renew the registration.* To keep the establishment's registration active, the authorized official of the restaurant or similar retail food establishment must register every other year within 60 days prior to the expiration of the establishment's current registration with FDA. Registration will automatically expire if not renewed.

(e) *Signatures.* Signatures obtained under paragraph (d) of this section that

meet the definition of electronic signatures in § 11.3(b)(7) of this chapter are exempt from the requirements of part 11 of this chapter.

(f) *Misbranding.* A standard menu item offered for sale in a covered establishment shall be deemed misbranded under sections 201(n), 403(a), 403(f) and/or 403(q) of the Federal Food, Drug, and Cosmetic Act if its label or labeling is not in conformity with paragraph (b) or (c) of this section.

BILLING CODE 1301–00–D

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

Food Labeling

CFR Correction

■ In Title 21 of the Code of Federal Regulations, parts 100 to 169, revised as of April 1, 2016, on page 50, § 101.10 is revised to read as follows:.

§ 101.10 Nutrition labeling of restaurant foods whose labels or labeling bear nutrient content claims or health claims.

Nutrition labeling in accordance with § 101.9 shall be provided upon request for any restaurant food or meal for which a nutrient content claim (as defined in § 101.13 or in subpart D of this part) or a health claim (as defined in § 101.14 and permitted by a regulation in subpart E of this part) is made, except that information on the nutrient amounts that are the basis for the claim (*e.g.,* ''low fat, this meal provides less than 10 grams of fat'') may serve as the functional equivalent of complete nutrition information as described in § 101.9. For the purposes of this section, restaurant food includes two categories of food. It includes food which is served in restaurants or other establishments in which food is served for immediate human consumption or which is sold for sale or use in such establishments. It also includes food which is processed and prepared primarily in a retail establishment, which is ready for human consumption, which is of the type described in the previous sentence, and which is offered for sale to consumers but not for immediate human consumption in such establishment and which is not offered for sale outside such establishment. For standard menu items that are offered for sale in covered establishments (as defined in § 101.11(a)), the information in the written nutrition information required by § 101.11(b)(2)(ii)(A) will serve to meet the requirements of this section. Nutrient levels may be determined by nutrient databases, cookbooks, or analyses or by other reasonable bases that provide assurance that the food or meal meets the nutrient requirements for the claim. Presentation of nutrition labeling may be in various forms, including those provided in § 101.45 and other reasonable means.

[Docket No. FDA–2016–N–0543]

RIN 0910–AH30

Food and Drug Administration Review and Action on Over-the-Counter Time and Extent Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA or Agency) is amending its nonprescription (over-the-counter or OTC) drug regulations. This final rule supplements the time and extent application (TEA) process for OTC drugs by establishing timelines and performance metrics for FDA's review of non-sunscreen TEAs, as required by the Sunscreen Innovation Act (SIA). It also amends the existing TEA process to include filing determination and withdrawal provisions to make the TEA process more efficient.

DATES: This rule is effective December 23, 2016.

ADDRESSES: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this final rule, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Kristen Hardin, Center for Drug Evaluation and Research (CDER), Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 240–402–4246, *Kristen.Hardin@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

A. Purpose and Coverage of the Final Rule

This final rule implements part of the SIA (Pub. L. 113–195) enacted November 26, 2014, by establishing timelines and related performance metrics for the review of certain submissions under FDA's regulation governing TEAs, which is codified in § 330.14 (21 CFR 330.14). The TEA regulation sets forth criteria and procedures by which OTC drugs initially marketed in the United States after the OTC Drug Review began in 1972 and OTC drugs without any U.S. marketing experience can be considered in the OTC drug monograph system. Section 586F(b) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360fff–6(b)), which was added by the SIA, requires FDA to issue regulations providing for the timely and efficient review of submissions under the TEA regulation, including establishing: (1) Reasonable timelines for reviewing and acting on such submissions for non-sunscreen OTC active ingredients and other conditions (non-sunscreen TEA conditions) and (2) measurable metrics for tracking the extent to which such timelines are met.

FDA is also amending the TEA regulation to make the TEA process more efficient and predictable for product sponsors, consumers, and FDA by adding filing determination requirements and criteria, and by addressing the withdrawal of consideration of TEAs and safety and effectiveness data submissions.

The timelines and metrics in this final rule apply to non-sunscreen TEA conditions. FDA is addressing timelines for review of sunscreen active ingredients and other related topics regarding sunscreens separately, under other provisions of the SIA.

B. Summary of the Major Provisions of the Final Rule

This final rule implements the SIA requirements for non-sunscreen TEAs by establishing timelines for FDA to review and take action on non-sunscreen TEA conditions. Timelines are provided for each stage of the TEA process and are intended to be reasonable while taking into consideration FDA public health priorities and available resources. The timelines established by this rule provide sponsors, other interested persons, and the public with consistent time frames for expected Agency action.

This rule also implements the SIA requirements for non-sunscreen TEAs by establishing measurable metrics that FDA will use for tracking the extent to which the timelines set forth in the regulations are met. The Agency anticipates that, among other potential benefits, making the metrics publicly available will improve transparency by providing sponsors, other interested persons, and the public with information that will enable them to quickly find out the number of TEAs that have been submitted to FDA. Over time, these measurements may also assist the Agency with resource planning and use.

The applicability of these metric and timeline provisions are generally limited to non-sunscreen TEAs submitted after the enactment of the SIA.

The final rule also amends the existing TEA regulation to provide for FDA to make filing determinations regarding safety and effectiveness data submissions for eligible TEA conditions. This additional procedural step provides early notification on whether submissions are sufficiently complete to permit a substantive review by FDA.

In addition, the rule amends the existing TEA regulation to include a provision regarding the withdrawal of consideration of TEAs, and safety and effectiveness data submissions. The withdrawal provision provides clarity on the status of TEAs, and safety and effectiveness data submissions that are no longer being pursued, so that FDA does not spend resources on these submissions.

Finally, the final rule adds certain definitions, and makes minor conforming and clarifying changes to the existing TEA regulation.

C. Legal Authority

This rule is issued under FDA's authority to regulate OTC drug products under the FD&C Act (see sections 201, 501, 502, 503, 505, 510, 586F, and 701(a) of the FD&C Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 360fff–6, and 371(a))). As stated in the **Federal Register** of January 23, 2002 (67 FR3060), in which the final rule establishing the TEA process was published, submission of a new drug application (NDA) has been required before marketing a new drug since passage of the FD&C Act in 1938 (21 U.S.C. 355). To market a new drug, the drug must first be approved under section 505 of the FD&C Act. Section 701(a) of the FD&C Act authorizes FDA to issue regulations for the efficient enforcement of the FD&C Act. FDA's regulations in part 330 describe the conditions for a drug to be considered GRASE and not misbranded. If a drug meets each of the conditions contained in part 330, as well as each of the conditions contained in any applicable OTC drug monograph, and other applicable regulations, it is considered generally recognized as safe and effective (GRASE) and not misbranded, and is not required by FDA to obtain approval under section 505 of the FD&C Act.

In addition, section 586F of the FD&C Act requires FDA to issue regulations providing for the timely and efficient review of certain submissions under the TEA regulation in § 330.14. Section 586F of the FD&C Act specifically requires these regulations to include timelines and metrics associated with the review of those submissions under the TEA regulation. This rule adds timeline and metrics provisions that are intended to implement section 586F of the FD&C Act.

D. Costs and Benefits

We expect that the final rule will make the TEA process more efficient and predictable, and improve communication between FDA, sponsors, and other interested persons. Sponsors and other interested persons may benefit from knowing whether additional data are needed and what optimal steps to take to receive a GRASE determination, and we will be able to bring resolution to TEA conditions. However, we do not know the monetary value of added predictability.

We expect the rule will create a minimal burden on persons that submit

safety and effectiveness data submissions, primarily when they send a letter to request a meeting with us. Thus, we anticipate no increase in annual recurring costs for either small or large sponsors or other interested persons. We expect the six current sponsors of non-sunscreen TEAs covering conditions that have been found eligible to be considered for inclusion in the OTC drug monograph system will incur one-time costs to read and understand the rule.

We also estimate sponsors will submit two additional TEAs annually, and each of these sponsors will also spend time reading and understanding the rule. The present value of the total costs over 10 years ranges from about $17,000 to $35,000 with a 7 percent discount rate and from about $19,000 to $38,000 with a 3 percent discount rate. With a discount rate of 7 percent and 3 percent, we estimate that on average affected sponsors will incur less than $150 of annualized costs per year.

II. Table of Abbreviations and Acronyms Commonly Used in This Document

Abbreviation/ acronym	What it means
ANDA	Abbreviated New Drug Application.
FDA	Food and Drug Administration.
FD&C Act	Federal Food, Drug, and Cosmetic Act.
GRASE	Generally Recognized as Safe and Effective.
HHS	U.S. Department of Health and Human Services.
NDA	New Drug Application.
NOE	Notice of Eligibility.
NPRM	Notice of Proposed Rulemaking.
OMB	Office of Management and Budget.
OTC	Over-the-Counter.
PRA	Paperwork Reduction Act.
SIA	Sunscreen Innovation Act of 2014.
TEA	Time and Extent Application.

III. Background

A. Need for the Regulation/History of This Rulemaking

1. Overview of the OTC Drug Monograph System

The OTC drug monograph system was established to evaluate the safety and effectiveness of all OTC drug products marketed in the United States before May 11, 1972, that were not covered by NDAs and all OTC drug products covered by ''safety'' NDAs that were marketed in the United States before enactment of the 1962 drug amendments to the FD&C Act. In 1972, FDA began its OTC Drug Review to evaluate OTC drugs by therapeutic categories or classes (*e.g.,* sunscreens, antacids), rather than on a product-by-product basis, and to develop ''conditions'' under which classes of OTC drugs are GRASE and not misbranded.

FDA publishes these conditions in the **Federal Register** in the form of OTC drug monographs, which consist primarily of active ingredients, labeling, and other general requirements. Final monographs for OTC drugs that are GRASE and not misbranded are codified in part 330. Manufacturers of drugs that meet each of the conditions contained in part 330, including each of the conditions contained in any applicable OTC drug monograph, and other applicable regulations, need not seek FDA clearance before marketing.

2. Overview of the TEA Process Prior to This Rulemaking

Initially, OTC drug conditions not marketed in the United States prior to the inception of the OTC Drug Review were not eligible for review under the OTC drug monograph process. The TEA process, established by regulations finalized in 2002 (§ 330.14), expanded the scope of the OTC Drug Review. A ''condition,'' for purposes of the TEA regulation, is an active ingredient or botanical drug substance (or a combination of active ingredients or botanical drug substances), dosage form, dosage strength, or route of administration marketed for a specific OTC use. The TEA process provides a potential pathway for OTC conditions, including new active ingredients or dosage forms that previously had no U.S. marketing history or that were marketed in the United States after the OTC Drug Review began, to be marketed under an OTC drug monograph.

Active ingredients and other conditions that satisfy the TEA eligibility requirements are subject to the same safety, effectiveness, and labeling standards that apply to other conditions under the OTC monograph process (see § 330.14(g)). The TEA regulation requires multistep, notice-and-comment rulemaking procedures before an active ingredient or other condition is added to an OTC drug monograph.

The TEA process begins with the submission of a TEA containing data documenting the OTC marketing history of the active ingredient, combination of active ingredients, or other condition(s) (*e.g.,* a new dosage strength for an active ingredient already included in an OTC drug monograph). FDA reviews the application and determines whether the sponsor's marketing data establish that the condition or conditions have been marketed to a material extent and for a material time, as set forth in the TEA regulation's eligibility requirements. If the condition is not found eligible, FDA will send a letter to the sponsor explaining why the condition was not found acceptable. If the marketing data satisfy the TEA regulation's eligibility criteria, FDA publishes a notice of eligibility (NOE) in the **Federal Register** announcing that the active ingredient or other condition is being considered for inclusion in an OTC drug monograph and calling for submissions of safety and efficacy data for the proposed OTC use.

We note that although a TEA is the application regarding the time and extent of marketing, which leads to an eligibility determination (resulting in publication of an NOE or a letter of ineligibility), references to TEAs or applications (including in the SIA) sometimes encompass FDA's review of the condition's eligibility and the GRASE determination for the condition. Thus, these references may be used to mean the TEA itself, the safety and effectiveness data submission, FDA's GRASE determination, associated order or rulemaking actions, or all of these. In this rule and preamble, the terms ''TEA'' and ''safety and effectiveness data submission'' are used, where appropriate, to describe the two distinct submissions under the TEA regulation. However, the term ''TEA process'' may be used when referring to one or more actions under the TEA regulation.

If, after FDA reviews the safety and effectiveness data, the Agency initially determines that the active ingredient or other condition is GRASE, it will publish a notice of proposed rulemaking (NPRM) to include the condition in an appropriate OTC drug monograph.

If the condition is initially determined not to be GRASE, FDA will inform the sponsor and other interested persons that submitted data of its decision by letter, and will include the letter in the relevant public docket (§ 330.14(g)(4)). The Agency will also publish a NPRM to include the condition in § 310.502 (21 CFR 310.502). The sponsor and other interested persons will have an opportunity to submit comments and new data on FDA's initial determination and NPRM (§ 330.14(g)(5)). After evaluation of any additional data submitted, FDA will either issue a final rule or a new NPRM, if necessary, in the **Federal Register**.

3. The Sunscreen Innovation Act (SIA)

In November 2014, Congress passed the SIA to supplement the TEA process with regard to both sunscreen and non-sunscreen OTC drug products. Section 586F of the FD&C Act was added by the SIA and only applies to TEAs for drugs other than nonprescription sunscreen active ingredients or combinations of nonprescription sunscreen active ingredients (see sections 586 and 586F of the FD&C Act (21 U.S.C. 360fff and 360fff–6) as amended by the SIA). For FDA review of non-sunscreen TEA conditions, section 586F includes two main requirements. The first requirement (see section 586F(a) of the FD&C Act), which is generally outside the scope of this rule, is regarding a framework and timelines for review of certain eligible TEA conditions pending before the date of enactment of the SIA. The second general requirement (see section 586F(b) of the FD&C Act) is that FDA issue a regulation that includes: (1) Timelines for review of new non-sunscreen TEA conditions (with certain exceptions noted in sections 586F(a)(1) and (3)) and (2) measurable metrics for tracking the extent to which the timelines are met. Accordingly, FDA published a proposed rule on April 4, 2016, to address both timelines and metrics, as required by the SIA.

4. Brief Summary of the Proposed Rule

As described in the proposed rule ''Food and Drug Administration Review and Action on Over-the-Counter Time and Extent Applications'' (81 FR 19069, April 4, 2016) (Proposed Rule), FDA had determined that with regard to non-sunscreen TEAs, the best way to both address the statutory requirements of the SIA and to make certain FDA-initiated modifications to the TEA process set forth in § 330.14 was to: (1) Propose a new section (§ 330.15) that is specific to non-sunscreen TEA conditions and establishes the SIA-required timelines and metrics and (2) amend § 330.14 with regard to process improvements for TEAs for all OTC drugs (such as providing format and content criteria for a filing determination and addressing withdrawal of consideration).

We refer readers to the preamble of the Proposed Rule for additional information about the development of the Proposed Rule. The Agency requested public comments on the Proposed Rule, and the comment period closed June 3, 2016.

B. Summary of Comments on the Proposed Rule

We received comments from a trade association and several individual citizens. The comments were generally supportive. In addition to a few general comments, we received comments specific to the proposed timeline provision as well as on the format and content of the safety and effectiveness submissions.

C. General Overview of the Final Rule

This rule finalizes the Proposed Rule. The following subsections give a brief summary of the proposed provisions we are finalizing, including a summary of the key changes between the proposed and final rules.

1. Applicability (§ 330.15(a))

We proposed that a condition in a TEA submitted under § 330.14 would be subject to the timelines for FDA review and action except for: (1) A sunscreen active ingredient or a combination of sunscreen active ingredients, or other conditions for sunscreen ingredients or (2) a non-sunscreen active ingredient or combination of non-sunscreen active ingredients, and other conditions for such ingredients submitted in a TEA under § 330.14 before November 27, 2014, subject to section 586F(a)(1)(C) of the FD&C Act. The exceptions are based on provisions of the SIA, including section 586F(b) of the FD&C Act, which directs the Agency to issue regulations establishing timelines for drugs other than nonprescription sunscreen active ingredients or combinations of nonprescription active ingredients. For additional discussion on the development of this provision see the preamble (81 FR 19069 at 19073) of the Proposed Rule.

We are finalizing this provision without change.

2. Timelines for FDA Review and Action (§ 330.15(c))

In accordance with section 586F(b) of the FD&C Act, FDA proposed timelines for each of the various stages of the TEA process for conditions within the scope of the rule. The proposed timelines for each stage take into consideration factors set forth under the SIA. For additional discussion on the development of this provision, see the preamble (81 FR 19069 at 19073 to 19077) of the Proposed Rule.

We are finalizing this provision with one clarifying change to acknowledge that, with respect to the 90-day timeline for FDA to issue a filing determination, a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.

3. Metrics (§ 330.15(b))

Section 586F(b) of the FD&C Act requires FDA to establish measurable metrics for tracking the extent to which the timelines set forth in the regulations are met. We proposed to maintain a publicly available posting of metrics for the review of TEAs and safety and effectiveness data submissions submitted under § 330.14 that are subject to the timelines, and update the posting annually. The proposed metrics, when publically posted, should provide sponsors and the public with information that will enable them to quickly ascertain the number of TEAs that have been submitted to FDA, and the Agency's performance in meeting the proposed timelines. For additional discussion on the development of this provision, see the preamble (81 FR 19069 at 19077) of the Proposed Rule.

We are finalizing this provision without change.

4. Definitions (§ 330.14(a))

We proposed additional definitions that, in general, are intended to clarify the beginning or ending of the timelines for FDA review and action. We proposed to add these definitions to § 330.14 instead of § 330.15 because § 330.14 describes the TEA process to which these definitions apply. For additional discussion on the development of this provision, see the preamble (81 FR 19069 at 19077 to 19078) of the Proposed Rule.

We are finalizing this provision with clarifying changes to the definition of ''Date of filing'' and ''Safety and effectiveness data submission'' to acknowledge that a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.

5. Filing Determination (§ 330.14(j))

We proposed certain filing determination requirements to help improve the content and format of a safety and effectiveness data submission. We also proposed timelines related to these proposed new requirements and proposed processes that apply whether the submission is accepted for filing, refused, or filed over protest. The proposed requirement and related timelines were developed, in part, to provide a clear pathway for the Agency to indicate when a submission does not contain the information necessary for a complete review and what additional information is needed. For additional discussion on the development of this provision, see the

preamble (81 FR 19069 at 19078 to 19079) of the Proposed Rule.

We are finalizing the provision with several changes to the Proposed Rule for clarification purposes (for additional details on the changes, see section V.E):

- Throughout the provision, we have made clarifying changes to acknowledge that a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.
- With respect to § 330.14(j)(2), we are clarifying in this final rule that data submitted after a submission has been filed will be reviewed as part of the proposed rulemaking if there is adequate time before the NPRM will publish, or if there is not adequate time, the data will be evaluated as comments to the NPRM.
- In § 330.14(j)(3), we are changing the proposed term ''informal conference'' to ''meeting'' to use consistent terminology with the SIA.
- In both § 330.14(j)(2) and (3), we clarify that a copy of the notice will be posted to the docket.
- In § 330.14(j)(3), we originally proposed the process that a person that submitted a safety and effectiveness data submission must follow to request that FDA file a submission over protest. To avoid potential ambiguity, we are modifying § 330.14(j)(3) to clarify that the submitter cannot request to file over protest without first having a meeting with FDA. In addition, this final rule clarifies the status of the submission and the TEA condition once FDA has refused to file a submission.

6. Withdrawal of Consideration of a TEA or Safety and Effectiveness Data Submission (§ 330.14(k))

We proposed to add a withdrawal provision to new § 330.14(k). The proposed provision allowed a sponsor to request withdrawal of consideration of a TEA or safety and effectiveness data submission. In addition, we also proposed (§ 330.14(k)(1)(ii)) that inaction by a sponsor in certain circumstances may be deemed by FDA as a withdrawal of consideration. The proposed § 330.14(k)(2) also included a provision that FDA would give notice to the sponsor before deeming the submission withdrawn from consideration to give the sponsor an opportunity to provide an update and request FDA not withdraw the submission. Another proposed provision, § 330.14(k)(3), provided that the notice of withdrawal of consideration would be posted to the docket. In addition, we proposed in § 330.14(k)(4) that if the TEA or safety and effectiveness data submission is deemed withdrawn, the timelines under § 330.15(c) and the metrics under § 330.15(b) no longer apply. The provisions were proposed in part to enable the Agency to better allocate resources by providing a process for the Agency to suspend work on TEAs or safety and effectiveness data submissions that are no longer being pursued by the sponsor. For additional discussion on the development of these provisions see the preamble (81 FR 19069 at 19079 to 19080) of the Proposed Rule.

We are finalizing the provision with several clarifying changes to the Proposed Rule (for additional details on the changes, see section V.E):

- Throughout the provision, we have made clarifying changes to acknowledge that a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.
- Under § 330.14(k)(1)(ii), we no longer include that a sponsor's failure to act on a submission is a reason for FDA's deeming the submission withdrawn because until the sponsor or other interested person acts and files a TEA submission or safety and effectiveness data submission, there is nothing for FDA to deem withdrawn from consideration. For example, once a notice of eligibility is issued, the TEA is no longer under consideration and the eligible condition is not deemed under consideration until a safety and effectiveness data submission is filed.
- We have revised the proposed § 330.14(k)(2) to extend the time period to make a request that FDA not deem a submission withdrawn from consideration.
- The final rule makes a technical change to proposed § 330.14(k)(3) to account for the situation in which an NOE for a TEA has not been issued and the TEA therefore is not in the public docket.
- The final rule also clarifies in § 330.14(k)(3) that if FDA deems a submission withdrawn from consideration, the condition still remains eligible for consideration if an NOE was issued, and the sponsor or any interested person can pursue consideration of the condition in the future by submitting a new safety and effectiveness data submission.

7. Minor Changes to § 330.14 for Clarity and Consistency

We proposed minor changes to § 330.14 for clarity and consistency purposes. These changes included adding definitions to proposed new paragraph (a). We proposed several minor amendments to § 330.14(f) for clarity and for consistency with the OTC monograph regulations under § 330.10. We also revised § 330.14(f) to use terminology consistent with the new definition in § 330.14(a)(5) for ''safety and effectiveness data submission'' when referring to a data package submitted for an eligible TEA condition. We also proposed to add the word ''feedback'' prior to the word ''letter'' in the first sentence of § 330.14(g)(4) to use terminology consistent with the proposed new definition for ''feedback letter'' in § 330.14(a)(7). For additional discussion on the development of this provision, see the preamble (81 FR 19069 at 19080) of the Proposed Rule.

We are finalizing this provision with changes to § 330.14(f) in order to clarify that a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.

IV. Legal Authority

This rule is issued under FDA's authority to regulate OTC drug products under the FD&C Act (see sections 201, 501, 502, 503, 505, 510, 586F, and 701(a) of the FD&C Act). As stated in the **Federal Register** of January 23, 2002, in which the final rule establishing the original TEA process was published, submission of an NDA has been required before marketing a new drug since passage of the FD&C Act in 1938 (21 U.S.C. 355). To market a new drug, the drug must first be approved under section 505 of the FD&C Act. Section 701(a) of the FD&C Act authorizes FDA to issue regulations for the efficient enforcement of the FD&C Act. FDA's regulations in part 330 describe the conditions for a drug to be considered GRASE and not misbranded. If a drug meets each of the conditions contained in part 330, as well as each of the conditions contained in any applicable OTC drug monograph, and other applicable regulations, it is considered GRASE and not misbranded, and is not required by FDA to obtain approval under section 505 of the FD&C Act.

In addition, section 586F of the FD&C Act requires FDA to issue regulations providing for the timely and efficient review of certain submissions under the TEA regulation in § 330.14. Section 586F of the FD&C Act specifically requires these regulations to include timelines and metrics associated with the review of certain submissions under the TEA regulation. Therefore, § 330.15 adds timeline and metrics provisions that are intended to implement section 586F of the FD&C Act.

V. Comments on the Proposed Rule and FDA Response

A. Introduction

We received three comment letters on the Proposed Rule, each containing one or more comments on one or more issues. The comments were submitted by a trade association and individual consumers. The submissions overall support the objectives of the rule. None of the comments suggested changes to specific provisions of the Proposed Rule.

We describe and respond to the comments in sections V.B. through V.D. We have numbered each comment to help distinguish between different comments. The number assigned to each comment or comment topic is purely for organizational purposes and does not signify the comment's value or importance or the order in which comments were received.

B. Description of General Comments and FDA Response

(Comment 1) The comments generally support the TEA process, the establishment of timelines associated with the general steps in that process, and the proposed revisions to the TEA regulation.

(Response 1) We appreciate the support expressed in the comments received. The TEA process is intended to provide a potential pathway for OTC conditions, including newer active ingredients that previously had no U.S. marketing history or that were marketed in the United States after the OTC Drug Review began, to be marketed under an OTC drug monograph. The associated timelines and revisions to the TEA regulation are intended to implement certain requirements in the SIA and to make the TEA process more efficient and predictable.

C. Specific Comments on Timelines for FDA Review and Action and FDA Response

(Comment 2) One comment stated that the explanation for the proposed timelines was clear. However, the comment suggested that additional changes to the monograph system could further streamline the projected TEA timeline.

(Response 2) This final rule establishes timelines within the context of the general OTC monograph process, which involves rulemaking to establish general recognition of safety and effectiveness for conditions in a monograph. Because this rule is limited to the TEA process and not the overall monograph regulatory framework, changes to the OTC monograph process that in turn could affect the timelines established in this rule are outside the scope of this rulemaking.

(Comment 3) One comment expressed concern that factors such as the format and content of the data submission, the complexity of the data, competing Agency priorities, and available Agency resources and reasonableness could delay TEA reviews and actions many years beyond the established timelines.

(Response 3) As explained in the preamble to the Proposed Rule, section 586F(b) of the FD&C Act provides that the timelines for review of non-sunscreen TEA conditions shall: (1) Reflect FDA public health priorities (including potential public health benefits of including additional drugs in the OTC drug monograph system), (2) take into consideration the resources available for carrying out such public health priorities and the relevant review processes and procedures, and (3) be reasonable, taking into account the required consideration of priorities and resources. We accordingly took these factors into consideration when establishing timelines. Furthermore, we determined that instead of setting multiple timelines for submissions of varying content, complexity, and format, it would be more efficient and sensible, for each stage of the TEA process, to set one general timeline for the review of non-sunscreen TEA conditions that accommodates anticipated variation among submissions. Because anticipated variation is already accounted for, FDA expects the time frames to be achievable in most circumstances.

D. Specific Comments on the Filing Determination and FDA Response

(Comment 4) With respect to the format and content of submissions, one comment seeks FDA guidance on the inclusion of certain information from foreign data sources for non-sunscreen active ingredients. The comment incorporated a comment that was previously submitted to FDA on its draft guidance for industry ''Nonprescription Sunscreen Drug Products—Content and Format of Data Submissions To Support a GRASE Determination Under the Sunscreen Innovation Act'' [1] (nonprescription sunscreen content and format draft guidance) (Ref. 1).

(Response 4) As explained in the preamble to the Proposed Rule, the general advice provided in the nonprescription sunscreen content and format draft guidance (Ref. 1) may also be useful to persons preparing safety and effectiveness data submissions for non-sunscreen TEAs. The comment's request for guidance on the inclusion of certain information from foreign data sources in the safety and effectiveness data submission is outside the scope of this rulemaking. However, the Agency will consider providing additional guidance to address this issue.

E. Technical Amendments

The revised regulatory text includes technical amendments that we have made to the proposed provisions in order to clarify requirements. In the following subsections, we summarize the changes that are intended to clarify amendments to the relevant provisions.

1. Clarifying That the Sponsor or Other Interested Person Can Submit a Safety and Effectiveness Data Submission

We are finalizing §§ 330.14(a), (f), (j), (k), and 330.15(c)(2) with changes to clarify that a safety and effectiveness data submission can be submitted by a person other than the sponsor of the TEA.

In proposed § 330.14(a), we defined the term ''Sponsor'' to mean the person that submitted the TEA, and we defined ''Safety and effectiveness data submission'' to mean, in part, a data package submitted by a sponsor. Generally we expect the person submitting the TEA (*i.e.,* the sponsor) will submit a safety and effectiveness data submission upon issuance of a NOE. However, upon issuance of the NOE, the TEA is no longer under consideration, and the sponsor does not necessarily have to be the person that submits the safety and effectiveness data submission. Therefore, while we are not changing the definition of ''Sponsor,'' we are modifying the definition of ''Safety and effectiveness data submission'' to clarify that the submission can be submitted by a person other than the sponsor.

Correspondingly, we are clarifying the proposed definition of ''Date of filing'' under § 330.14(a) and clarifying the proposed §§ 330.14(f) and 330.15(c)(2) by removing references to the ''sponsor'' in order to acknowledge that the safety and effectiveness data submission can be submitted by a person other than the sponsor. In addition, throughout § 330.14(j) and (k), we have removed references to the ''sponsor'' in the context of a safety and effectiveness data submission and replaced the term with more general terms, such as ''submitter'' or ''person that submitted the safety and effectiveness submission,'' in order to acknowledge that the safety and effectiveness data submission can be

[1] When final, this guidance will represent FDA's current thinking on this topic.

submitted by a person other than the sponsor.

2. Filing Determination (§ 330.14(j))

In addition to the changes noted in the previous subsection, we are finalizing the provision with several additional changes for clarification purposes.

In § 330.14(j)(2), FDA proposed that the date of filing will begin the FDA timelines described in § 330.15(c)(3) and (4). Because FDA needs adequate time to review submitted data and the timeline for FDA to review and develop a NPRM begins as soon as the safety and effectiveness data submission has been filed, we are clarifying that data submitted after a submission has been filed will be reviewed before issuance of the NPRM if there is adequate time; otherwise, the data will be evaluated as comments to the NPRM. We note that although other submitted data submissions may be considered under the rulemaking process, they will not be subject to a filing determination. Furthermore, as with comments submitted after the comment period, any data submitted after the comment period for the NPRM may not be considered before issuance of the final rule.

We are also adding language to both § 330.14(j)(2) and (3) to clarify that when FDA sends a notice to the person that submitted a safety and effectiveness data submission informing that person that the submission is filed or filed over protest, a copy of the corresponding notice will be posted to the docket. The posting to the docket, which is public, provides other interested persons notice that a submission is filed and FDA is beginning its review.

Additionally, in proposed § 330.14(j)(3), we described the process for cases in which FDA refuses to file the safety and effectiveness data submission. The Proposed Rule provided that the sponsor (now submitter) can request an informal conference within 30 days of FDA notifying the sponsor that it refuses to file the submission. We are changing the term ''informal conference'' to ''meeting'' to be consistent with the SIA. In addition, the proposed provision explained that a sponsor's request to file over protest must be within 120 days of the meeting with FDA. To avoid potential ambiguity, we are modifying § 330.14(j)(3) to clarify that a sponsor (now submitter) cannot request to file over protest without first meeting with FDA.

Finally, we are clarifying the status of a safety and effectiveness data submission that FDA has refused to file by including at the end of § 330.14(j)(3) that if FDA refuses to file a safety and effectiveness data submission and the submission is not filed over protest, then the submission is no longer deemed under consideration. If the original submitter or other interested person wishes to pursue consideration of an eligible condition at some point in the future, a new safety and effectiveness data submission must be submitted.

3. Withdrawal of Consideration of a TEA or Safety and Effectiveness Data Submission (§ 330.14(k))

We are finalizing the provision with several clarifying changes.

We no longer include failure to act on a submission as a reason that FDA may deem the submission to be withdrawn from consideration, as was proposed under § 330.14(k)(1)(ii). In the preamble to the Proposed Rule, we explained there have been past instances when a NOE was issued but the sponsor never submitted safety and effectiveness data and the TEA condition remained unresolved. We proposed that a failure to act on a submission, which could include a sponsor's failure to file a safety and effectiveness data submission for a TEA-eligible condition, is one reason for FDA to deem the submission withdrawn from consideration and that, for purposes of the provision, this could include deeming a TEA-eligible condition withdrawn from consideration. However, in such a scenario when a condition is found eligible and there has not been a safety and effectiveness data submission, there is no action for FDA to take. Once a NOE is issued, the TEA is no longer under consideration. Also, since the sponsor or any other interested person is not obligated or under an established deadline for submitting a safety and effectiveness data submission, we do not consider the TEA-eligible condition to be under consideration until such a submission is filed. As a result, a sponsor's failure to act on a submission will not result in the need for FDA to deem a submission or other aspect of the TEA process withdrawn from consideration, and inclusion of this provision is not necessary.

We also proposed in § 330.14(k)(1)(ii) that FDA may deem a submission to be withdrawn from consideration due to the sponsor's failure to respond to communications from FDA. This provision remains, and we note the reference to ''communications'' encompasses the notice of withdrawal under § 330.14(k)(2) and any preceding communication from FDA that the sponsor failed to respond to.

In § 330.14(k)(2), we proposed that FDA will notify the sponsor of a submission that FDA intends to deem withdrawn under § 330.14(k)(1)(ii), and that the sponsor will then have 30 days from the date of the notice to request that FDA not withdraw consideration of the TEA or safety and effectiveness data submission. We are changing the time provided to request that FDA not withdraw consideration from 30 days to 90 days.

We are also further revising proposed § 330.14(k)(3), in which FDA proposed that a notice of withdrawal will be posted to the docket when FDA deems a submission withdrawn from consideration. We are including a clarification that when a condition has been found eligible, even if the safety and effectiveness data submission is withdrawn, not only does the NOE remain in the public docket but the condition remains eligible for consideration, so that the condition can still be considered in the future if a new safety and effectiveness data submission is received. In addition, we are adding an exception to the notice of withdrawal being posted to the docket. Specifically, when a TEA submission is withdrawn from consideration before the issuance of an NOE, the notice of withdrawal will not be posted to the public docket and will only be sent to the sponsor because in such an instance the TEA, itself, is not on public display.

Finally, although not a change to the Proposed Rule, we note as we discussed in the preamble to the Proposed Rule, that if a sponsor requests withdrawal of consideration of its TEA or safety and effectiveness data submission, FDA generally intends to stop its review. However, although FDA may withdraw consideration of a TEA or safety and effectiveness determination, we may determine not to withdraw or not to stop review in some cases. For example, if FDA has already issued a NPRM that tentatively determines that the active ingredient or other condition is GRASE for an OTC use or is not GRASE for an OTC use, FDA may continue the rulemaking and proceed to issue a final rule.

VI. Effective Date

The SIA requires that the final rule be published not less than 30 calendar days before the effective date of the regulation. Consequently, this final rule will become effective 30 calendar days after the date of the rule's publication in the **Federal Register**.

Beginning on that date, the timelines and metrics set forth in this regulation will apply to the review of non-sunscreen TEAs, and safety and

effectiveness data submissions to which this regulation is applicable, and any amended provisions of § 330.14 will apply to the TEA process under that regulation.

VII. Economic Analysis of Impacts

A. Introduction

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the final rule. We believe that this final rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because this final rule does not impose significant new economic burdens on any entity, we certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year.'' The current threshold after adjustment for inflation is $146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. This final rule would not result in an expenditure in any year that meets or exceeds this amount.

In table 1, we provide the Regulatory Information Service Center/Office of Information and Regulatory Affairs Consolidated Information System accounting information.

Table 1.--Economic Data: Costs and Benefits Statement

Category	Primary Estimate	Low Estimate	High Estimate	Units Year Dollars	Discount Rate	Period Covered	Notes

B. Summary

1. Baseline Conditions

We regulate nonprescription drug products under two primary pathways: (1) The NDA process, described in 21 CFR part 314 or (2) the nonprescription (over-the-counter or OTC) drug monograph process, described in part 330. There are important differences between these two pathways. Under the NDA process, the sponsor of an application must submit to us nonclinical and clinical data that support the safety and effectiveness of its drug product, and we must review and approve the application before the sponsor can market such product. By contrast, OTC drug monographs are regulations describing conditions (§ 330.14 defines ''condition'' as an active ingredient or botanical drug substance (or combination of both), dosage form, dosage strength, or route of administration marketed for a particular specific OTC use) that certain OTC drugs (such as antacids) must meet to be considered GRASE and not misbranded. In contrast with the application pathway, once a sponsor or other interested person submits safety and effectiveness data to amend a monograph (which is posted to a public docket), the data are public. Drug products that comply with an applicable OTC drug monograph and other applicable regulations may be marketed without an NDA.

Initially, active ingredients and other conditions that were not marketed in the United States before the inception of the OTC Drug Review in 1972 were not eligible for review under the OTC drug monograph process. However, the TEA process, established by regulations finalized in 2002 (§ 330.14), expanded the scope of this OTC drug review. The TEA process offers a pathway for OTC conditions to be marketed under an OTC drug monograph. OTC conditions can include newer active ingredients that previously had no U.S. marketing history, or that were marketed in the United States after the OTC drug review began. Active ingredients and other conditions that satisfy the TEA eligibility requirements are subject to the same safety, effectiveness, and labeling standards that apply to other conditions under the OTC monograph process.

The TEA process requires multistep, notice-and-comment rulemaking procedures before a new active ingredient or other condition is added to an OTC drug monograph. After determining that an active ingredient or other condition is eligible for consideration under the OTC monograph process, we issue a notice in the **Federal Register** announcing the TEA determination and requesting safety and effectiveness data for the proposed OTC use. Next, after reviewing data submitted to the docket, we issue a NPRM to either include the condition in the appropriate OTC drug monograph or, if the condition is initially determined not to be GRASE for OTC use, include it in § 310.502, which would require the sponsor to seek approval under the NDA pathway to market the condition. NPRMs regarding GRASE determinations allow for public comments and for sponsors and other interested persons to submit additional data for safety and effectiveness. If a monograph is amended, by publishing a final rule, an OTC condition that complies with the OTC monograph and the general requirements for OTC drugs may be marketed in the United States without an NDA (examples of other general requirements include requirements to comply with Current Good Manufacturing Practice, to register and list products, to use drug facts labeling).

Although our multistep TEA process allows sponsors and other interested persons to learn about the progress of our review of a submission (for example, when an NOE is issued, and if a feedback letter is issued), there are no established timelines to review submissions or for data to be submitted. The lack of timelines can create unpredictability for interested persons because they may lack key information. For example, they may not know: (1) Whether the safety and effectiveness data submitted is sufficient or in the right format for us to conduct a substantive review; (2) when they need to submit new information; or (3) when to expect our determinations regarding eligibility or other feedback. The unpredictability in the process could result in interested persons not performing a required action within reasonable time for our review, performing unnecessary actions (examples of unnecessary actions may include collecting unnecessary or inadequate data, performing tests or studies that do not contribute to data needed by us to make a GRASE determination), or creating unnecessary effort for us and for them. Without specific timelines, persons that submit safety and effectiveness data submissions may not know whether their initial data submissions were insufficient to review, whether their data submissions were sufficient and are under review, or whether we require additional information. In addition, without specific timelines, we don't know whether interested persons intend to submit additional data or whether they do not intend to pursue a TEA condition any further.

2. Purpose of This Rule

This rule complies with certain mandates of the SIA enacted in November 2014. In particular, the final rule establishes timelines and metrics for review of TEAs for non-sunscreen OTC drug products. Specific timelines applicable to non-sunscreen TEA conditions will be added in a new § 330.15. The first timeline is to issue an NOE or post a letter of ineligibility to the TEA docket within 180 days of submission of a TEA. The second timeline is to issue a filing determination within 90 days of receipt of a complete safety and effectiveness data submission once the submitter has confirmed that it considers the submission to be complete. If we initially determine the active ingredient or other condition not to be GRASE, we will inform sponsors and other interested persons who submitted data within 730 days from the date of filing as defined in § 330.14(a). The next timeline is to issue a NPRM within 1,095 days from the date of filing. Lastly, we will issue a final rule regarding GRASE status within 912 days of the closing of the docket of the proposed rulemaking.

The final rule will also amend the existing § 330.14 by: (1) Setting forth clear filing determination requirements with regard to the content and format of safety and effectiveness data submissions for TEAs and (2) addressing withdrawal of consideration of a TEA or safety and effectiveness data submission. These amendments will apply to all TEAs, and their goal is to provide early notification on whether the submissions meet the filing requirements and to provide more clarity regarding withdrawal of TEA-related submissions. The amendments in this final rule are intended to provide us with feedback from sponsors or other interested persons on whether they intend to actively pursue their submissions, and specify that we may withdraw consideration of a TEA or safety and effectiveness data submission in certain circumstances (such as at a submitter's request). Finally, this final rule also adds definitions and makes clarifying changes to the TEA regulation in § 330.14.

The clarifications and establishment of timelines for the TEA process seek to dissipate uncertainties that may have prevented interested persons from submitting all the necessary data for us

to make final GRASE determinations to existing TEA conditions that have been found to be eligible to be considered for inclusion in the OTC drug monograph system. Since the TEA review process became effective in 2002 (67 FR 3060 at 3074), we have received six TEAs for non-sunscreen active ingredients, including applications for dandruff, laxative, gingivitis, and acne products. Of these six, the sponsors for three of the TEAs have subsequently requested that the Agency withdraw consideration of the conditions that were found eligible for consideration.

3. Benefits

We lack data to quantify the potential benefits of this final rule. With this final rule, we expect the timelines and data submission clarifications will make the TEA process, including establishing a new OTC drug monograph, more efficient and predictable, and improve communication between us and sponsors or other interested persons. Sponsors and other interested persons may benefit from knowing whether additional data are needed and what optimal steps to take to receive a GRASE determination, and we will be able to bring resolution to TEA conditions. However, we do not know the monetary value of added predictability.

4. Costs

We expect this final rule will create a minimal burden on sponsors and other interested persons from the possible cost associated with sending a meeting request letter to us in the event that we refuse to file a safety and effectiveness data submission and the submitter wants to meet with us to discuss the decision, or the possible cost of calling or writing us to request that we do not withdraw consideration of a submission under § 330.14(k)(2). Therefore, we anticipate no increase in annual recurring costs for either small or large sponsors or other interested persons.

We expect the six current sponsors will spend time reading and understanding the final rule; we estimate this task will take from about 6.5 hours to 13 hours. With an hourly wage rate of $133 including 100 percent overhead, each sponsor will incur one-time costs ranging from about $865 to $1,730. This cost range is an overestimate because most sponsors are already familiar with the rule if they read the Proposed Rule. We also estimate that we will receive 2 additional TEAs annually, and thus during a 10-year horizon we estimate potentially 20 additional applicants will spend the time to read and understand the final rule. This cost is also an overestimate because we assume that future sponsors will be different from sponsors who already have read and understood the rule. The present value of the total costs over 10 years ranges from about $17,000 to $35,000 with a 7 percent discount rate and from about $19,000 to $38,000 with a 3 percent discount rate. With a discount rate of 7 percent and 3 percent, we estimate that on average, sponsors will incur less than $150 of annualized costs per year.

5. Impact on Small Entities

The Regulatory Flexibility Act requires a Regulatory Flexibility Analysis unless the Agency can certify that the final rule will have no significant impact on a substantial number of small entities. The final rule will affect few entities. Moreover, we estimate one-time costs under $2,000 per entity, costs well below 0.01 percent of annual revenues for the smallest entities; thus we certify that the final rule will not have a significant economic impact on a substantial number of small entities.

This is the full economic analysis.

VIII. Analysis of Environmental Impact

We have determined under 21 CFR 25.31(a) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Paperwork Reduction Act of 1995

This final rule contains information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520). The title, description, and respondent description of the information collection provisions are shown below with an estimate of the annual reporting burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

Title: Additional Criteria and Procedures for Classifying Over-the-Counter Drugs as Generally Recognized as Safe and Effective and Not Misbranded—OMB Control No. 0910–0688—Revision.

Description: The final rule amends FDA's TEA regulations to establish timelines and performance metrics for FDA's review of non-sunscreen TEAs and safety and effectiveness data submissions, as required by the SIA. FDA is making other changes to make the TEA process more efficient. Accordingly, FDA is revising the information collection currently approved under OMB control number 0910–0688 consistent with the regulations.

FDA has OMB approval (control number 0910–0688) for the information collection in § 330.14, which specifies additional criteria and procedures by which OTC drugs that were initially marketed in the United States after the OTC Drug Review began and OTC drugs without any U.S. marketing experience may become eligible for consideration in the OTC drug monograph system.

The final rule amends the TEA regulations in § 330.14 to make the process more efficient and to make conforming and clarifying changes. Section 330.14(j) clarifies the requirements on content and format criteria for a safety and effectiveness data submission, and provides procedures for FDA's review of the submissions and determination of whether a submission is sufficiently complete to permit a substantive review. Section 330.14(j)(3) describes the process for cases in which FDA refuses to file the safety and effectiveness data submission. Under § 330.14(j)(3), if FDA refuses to file the submission, the Agency will notify the submitter in writing, state the reason(s) for the refusal, and provide 30 days in which to submit a written request for a meeting with the Agency about whether the Agency should file the submission. A written request for a meeting is not already approved under OMB control number 0910–0688. We estimate that approximately one person that submits a safety and effectiveness data submission (''Number of Respondents'' in table 2, row 1) will annually submit to FDA approximately one request for a meeting (''Total Annual Responses'' in table 2, row 1), and preparing and submitting each request will take approximately 1 hour (''Average Burden per Response'' in table 2, row 1).

Under § 330.14(j)(4)(iii), the safety and effectiveness data submission must contain a signed statement that the submission represents a complete safety and effectiveness data submission and that the submission includes all the safety and effectiveness data and information available to the submitter at the time of the submission, whether positive or negative. A signed statement is not already approved under OMB control number 0910–0688. We estimate that approximately two persons (''Number of Respondents'' in table 2, row 2) will annually submit to FDA approximately two signed statements as

described previously (''Total Annual Responses'' in table 2, row 2), and that preparing and submitting each signed statement will take approximately one hour (''Average Burden per Response'' in table 2, row 2).

Under § 330.14(k)(1), FDA, in response to a written request, may withdraw consideration of a TEA submitted under § 330.14(c) or a safety and effectiveness data submission submitted under § 330.14(f). A request that FDA withdraw consideration of a TEA or safety and effectiveness data submission is not already approved under OMB control number 0910–0688. We estimate that approximately one person that submitted a safety and effectiveness data submission (''Number of Respondents'' in table 2, row 3) will annually submit to FDA approximately one request (''Total Annual Responses'' in table 2, row 3), and that preparing and submitting each request will take approximately 1 hour (Average Burden per Response'' in table 2, row 3).

Under § 330.14(k)(2), a person that submitted the submission may request that FDA not withdraw consideration of a TEA or safety and effectiveness data submission. A request for FDA to not deem its submission withdrawn from consideration is not already approved under OMB control number 0910–0688. We estimate that approximately one person that submitted a TEA or safety and effectiveness data submission (''Number of Respondents'' in table 2, row 4) will annually submit to FDA approximately one request (''Total Annual Responses'' in table 2, row 4), and that preparing and submitting each request will take approximately two hours (''Average Burden per Response'' in table 2, row 4).

FDA estimates the burden of this information collection as follows:

TABLE 2—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR Section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
330.14(j)(3)—Request for a meeting on FDA's refusal to file	1	1	1	1	1
330.14(j)(4)(iii)—Signed statement that the submission is complete	2	1	2	1	2
330.14(k)(1)—Request for FDA to withdraw consideration of a TEA or safety and effectiveness data submission	1	1	1	1	1
330.14(k)(2)—Request for FDA to not deem its submission withdrawn from consideration	1	1	1	2	2
Total					6

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The information collection provisions of this final rule have been submitted to the OMB for review, as required by section 3507(d) of the PRA. FDA will publish a subsequent notice in the **Federal Register** announcing OMB's decision to approve, modify, or disapprove the information collection provisions in this final rule. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

X. Federalism

We have analyzed this final rule in accordance with the principles set forth in Executive Order 13132. Section 4(a) of the Executive order requires agencies to ''construe . . . a Federal statute to preempt State law only where the statute contains an express preemption provision or there is some other clear evidence that the Congress intended preemption of State law, or where the exercise of State authority conflicts with the exercise of Federal authority under the Federal statute.'' The sole statutory provision giving preemptive effect to the final rule is section 751 of the FD&C Act (21 U.S.C. 379r). We have complied with all of the applicable requirements under the Executive order and have determined that the preemptive effects of this rule are consistent with Executive Order 13132.

XI. Reference

The following reference is on display in the Division of Dockets Management (see **ADDRESSES**) and is available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; it is also available electronically at *https://www.regulations.gov.* FDA has verified the Web site address, as of the date this document publishes in the **Federal Register**, but Web sites are subject to change over time.

1. FDA, Draft Guidance for Industry, ''Nonprescription Sunscreen Drug Products: Content and Format of Data Submissions To Support a GRASE Determination Under the Sunscreen Innovation Act,'' November 2015, available at *http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM473772.pdf.*

List of Subjects in 21 CFR Part 330

Over-the-counter drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 330 is amended as follows:

PART 330—OVER-THE-COUNTER (OTC) HUMAN DRUGS WHICH ARE GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED

■ 1. The authority citation for part 330 is revised to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 353, 355, 360, 360fff–6, 371.

■ 2. Section 330.14 is amended as follows:

■ a. Redesignate paragraph (a) as introductory text, revise the newly redesignated introductory text, and add new paragraph (a);

■ b. Revise paragraphs (f) heading and introductory text and (g)(4); and

■ c. Add paragraphs (j) and (k).

The revisions and additions read as follows:

§ 330.14 Additional criteria and procedures for classifying OTC drugs as generally recognized as safe and effective and not misbranded.

This section sets forth additional criteria and procedures by which over-the-counter (OTC) drugs initially marketed in the United States after the OTC drug review began in 1972 and OTC drugs without any U.S. marketing experience can be considered in the OTC drug monograph system. This

section also addresses conditions regulated as a cosmetic or dietary supplement in a foreign country that would be regulated as OTC drugs in the United States. Section 330.15 sets forth timelines for FDA review and action.

(a) *Definitions.* The definitions and interpretations contained in section 201 of the Federal Food, Drug, and Cosmetic Act and the following definitions of terms apply to this section and to § 330.15.

(1) *Botanical drug substance* means a drug substance derived from one or more plants, algae, or macroscopic fungi, but does not include a highly purified or chemically modified substance derived from such a source.

(2) *Condition* means an active ingredient or botanical drug substance (or a combination of active ingredients or botanical drug substances), dosage form, dosage strength, or route of administration, marketed for a specific OTC use, except as excluded in paragraph (b)(2) of this section.

(3) *Date of filing* means the date of the notice from FDA stating that FDA has made a threshold determination that the safety and effectiveness data submission is sufficiently complete to permit a substantive review; or, if the submission is filed over protest in accordance with paragraph (j)(3) of this section, the date of filing is the date of the notice from FDA stating that FDA has filed the submission over protest (this date will be no later than 30 days after the request that FDA file the submission over protest).

(4) *Feedback letter* means a letter issued by the agency in accordance with paragraph (g)(4) of this section that informs the sponsor and other interested persons who have submitted data under paragraph (f) of this section that a condition is initially determined not to be generally recognized as safe and effective (GRASE).

(5) *Safety and effectiveness data submission* means a data package submitted by a sponsor or other interested person that includes safety and effectiveness data and information under paragraph (f) of this section and that is represented by the submitter as being a complete submission.

(6) *Sponsor* means the person that submitted a time and extent application (TEA) under paragraph (c) of this section.

(7) *Time and extent application (TEA)* means a submission by a sponsor under paragraph (c) of this section, which will be evaluated by the agency to determine eligibility of a condition for consideration in the OTC drug monograph system.

* * * * *

(f) *Safety and effectiveness data submission.* The notice of eligibility will request a safety and effectiveness data submission that includes published and unpublished data to demonstrate the safety and effectiveness of the condition for its intended OTC use(s), as well as the submission of any other relevant data and views. These data will be submitted to a docket established in the Division of Dockets Management and will be publicly available for viewing at that office, except data deemed confidential under 18 U.S.C. 1905, 5 U.S.C. 552(b), or 21 U.S.C. 331(j). Data considered confidential under these provisions must be clearly identified. Any proposed compendial standards for the condition will not be considered confidential. The safety and effectiveness data submission must be sufficiently complete to be filed by the agency under paragraph (j)(2) of this section. Safety and effectiveness data and other information submitted under this paragraph are subject to the requirements in § 330.10(c), (e), and (f). The safety and effectiveness data submission must include the following:

* * * * *

(g) * * *

(4) If the condition is initially determined not to be GRASE for OTC use in the United States, the agency will inform the sponsor and other interested persons who have submitted data of its determination by feedback letter, a copy of which will be placed on public display in the docket established in the Division of Dockets Management. The agency will publish a notice of proposed rulemaking to include the condition in § 310.502 of this chapter.

* * * * *

(j) *Filing determination.* (1) After FDA receives a safety and effectiveness data submission, the agency will determine whether the submission may be filed. The filing of a submission means that FDA has made a threshold determination that the submission is sufficiently complete to permit a substantive review.

(2) If FDA finds that none of the reasons in paragraph (j)(4) of this section for refusing to file the safety and effectiveness data submission apply, the agency will file the submission and notify the submitter in writing. FDA will post a copy of the notice to the docket. The date of filing begins the FDA timelines described in § 330.15(c)(3) and (4). Data submitted after the date of filing will be considered before the issuance of a notice of proposed rulemaking if there is adequate time for review; otherwise, the data will be considered as comments to the proposed rule after issuance of a notice of proposed rulemaking.

(3) If FDA refuses to file the safety and effectiveness data submission, the agency will notify the submitter in writing and state the reason(s) under paragraph (j)(4) of this section for the refusal. The submitter may request in writing, within 30 days of the date of the agency's notification, a meeting with the agency about whether the agency should file the submission, and FDA will convene the meeting within 30 days of the request. If, within 120 days after the meeting, the submitter requests that FDA file the submission (with or without correcting the deficiencies), the agency will file the safety and effectiveness data submission over protest under paragraph (j)(2) of this section, notify the submitter in writing and post a copy to the docket, and review the submission as filed. The submitter must have a meeting before requesting that FDA file the submission over protest but need not resubmit a copy of a safety and effectiveness data submission that is filed over protest. A safety and effectiveness data submission and the corresponding TEA-eligible condition are both not deemed under consideration if FDA refuses to file the safety and effectiveness data submission, and it is not filed over protest; the condition remains eligible for consideration and the sponsor or any interested person can pursue consideration of the condition in the future by submitting a new safety and effectiveness data submission.

(4) FDA may refuse to file a safety and effectiveness data submission if any of the following applies:

(i) The submission is incomplete because it does not contain information required under paragraph (f) of this section. If the submission does not contain required information because such information or data are not relevant to the condition, the submission must clearly identify and provide an explanation for the omission.

(ii) The submission is not organized or formatted in a manner to enable the agency to readily determine whether it is sufficiently complete to permit a substantive review.

(iii) The submission does not contain a signed statement that the submission represents a complete safety and effectiveness data submission and that the submission includes all the safety and effectiveness data and information available to the submitter at the time of the submission, whether positive or negative.

(iv) The submission does not contain an analysis and summary of the data and other supporting information,

organized by clinical or nonclinical area, such as clinical efficacy data, clinical safety data, clinical pharmacology, adverse event reports, animal toxicology, chemistry data, and compendial status.

(v) The submission does not contain a supporting document summarizing the strategy used for literature searches, including search terms, sources, dates accessed, and years reviewed.

(vi) The submission does not contain a reference list of supporting information, such as published literature, unpublished information, abstracts and case reports, and a copy of the supporting information.

(vii) The submission includes data or information relevant for making a GRASE determination marked as confidential without a statement that the information may be released to the public.

(viii) The submission does not contain a complete environmental assessment under § 25.40 of this chapter or fails to provide sufficient information to establish that the requested action is subject to categorical exclusion under § 25.30 or § 25.31 of this chapter.

(ix) The submission does not contain a statement for each nonclinical laboratory study that the study was conducted in compliance with the requirements set forth in part 58 of this chapter, or, if it was not conducted in compliance with part 58 of this chapter, a brief statement of the reason for the noncompliance.

(x) The submission does not contain a statement for each clinical investigation involving human subjects that the investigation was conducted in compliance with the institutional review board regulations in part 56 of this chapter, or was not subject to those regulations, and that the investigation was conducted in compliance with the informed consent regulations in part 50 of this chapter.

(xi) The submission does not include financial certification or disclosure statements, or both, as required by part 54 of this chapter, accompanying any clinical data submitted.

(k) *Withdrawal of consideration.* (1) Notwithstanding paragraph (g) of this section, FDA may withdraw consideration of a TEA submission or a safety and effectiveness data submission if:

(i) The person that submitted the submission requests that its submission be withdrawn from consideration; or

(ii) FDA deems the submission to be withdrawn from consideration due to the submitter's failure to respond to communications from FDA.

(2) Before FDA deems a submission withdrawn under paragraph (k)(1)(ii) of this section, FDA will notify the person that submitted the submission. If, within 90 days from the date of the notice from FDA, the submitter requests that FDA not withdraw consideration of the submission, FDA will not deem the submission to be withdrawn.

(3) If FDA withdraws consideration of a submission under paragraph (k)(1) of this section, FDA will post a notice of withdrawal to the docket, except in the case of a TEA submission that is withdrawn from consideration before issuance of a notice of eligibility, in which case, the notice of withdrawal will only be provided to the sponsor. Information that has been posted to the public docket for the condition at the time of the withdrawal (such as a notice of eligibility or a safety and effectiveness data submission that has been accepted for filing and posted to the docket) will remain in the public docket. If the condition has been found eligible through issuance of a notice of eligibility, the condition remains eligible for consideration and the sponsor or any interested person can pursue consideration of the condition in the future by submitting a new safety and effectiveness data submission.

(4) If FDA withdraws consideration of a submission under paragraph (k)(1) of this section, the timelines under § 330.15(c) will no longer apply as of the date of withdrawal, and the submission will not be included in the metrics under § 330.15(b).

■ 3. Add § 330.15 to subpart B to read as follows:

§ 330.15 Timelines for FDA review and action on time and extent applications and safety and effectiveness data submissions.

(a) *Applicability.* This section applies to the review of a condition in a time and extent application (TEA) submitted under § 330.14 for consideration in the over-the-counter (OTC) drug monograph system. This section does not apply to:

(1) A sunscreen active ingredient or combination of sunscreen active ingredients, and other conditions for such ingredients; or

(2) A non-sunscreen active ingredient or combination of non-sunscreen active ingredients, and other conditions for such ingredients submitted in a TEA under § 330.14 before November 27, 2014, subject to section 586F(a)(1)(C) of the Federal Food, Drug, and Cosmetic Act.

(b) *Metrics.* FDA will maintain and update annually, a publicly available posting of metrics for the review of TEAs and safety and effectiveness data submissions that are subject to the timelines in this section. The posting will contain the following information for tracking the extent to which the timelines set forth in paragraph (c) of this section were met during the previous calendar year.

(1) Number and percent of eligibility notices or ineligibility letters issued within 180 days of submission of a TEA;

(2) Number and percent of filing determinations issued within 90 days of submission of a safety and effectiveness data submission;

(3) If applicable, number and percent of feedback letters issued within 730 days from the date of filing;

(4) Number and percent of notices for proposed rulemaking issued within 1,095 days from the date of filing;

(5) Number and percent of final rules issued within 912 days of closing of the docket of the proposed rulemaking; and

(6) Total number of TEAs submitted under § 330.14.

(c) *Timelines for FDA review and action.* FDA will review and take an action within the following timelines:

(1) Within 180 days of submission of a TEA under § 330.14(c), FDA will issue a notice of eligibility or post to the docket a letter of ineligibility, in accordance with § 330.14(d) and (e).

(2) Within 90 days of submission of a safety and effectiveness data submission, in accordance with § 330.14(j), FDA will issue a filing determination. The date of filing begins the FDA timelines in paragraphs (c)(3) and (4) of this section.

(3) Within 730 days from the date of filing, if the condition is initially determined not to be GRASE for OTC use in the United States, FDA will inform the sponsor and other interested persons who have submitted data of its determination by feedback letter in accordance with § 330.14(g)(4).

(4) Within 1,095 days from the date of filing of a safety and effectiveness data submission, FDA will issue a notice of proposed rulemaking to either:

(i) Include the condition in an appropriate OTC monograph(s), either by amending an existing monograph(s) or establishing a new monograph(s), if necessary; or

(ii) Include the condition in § 310.502 of this chapter.

(5) Within 912 days of the closing of the docket of the proposed rulemaking under paragraph (c)(4) of this section, FDA will issue a final rule.

Dated: November 17, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

LIBRARY OF CONGRESS

Copyright Royalty Board

37 CFR Part 381

[Docket No. 16–CRB–0016–PBR–COLA (2017)]

Cost of Living Adjustment for Performance of Musical Compositions by Colleges and Universities

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Final rule.

SUMMARY: The Copyright Royalty Judges announce a cost of living adjustment (COLA) of 2% in the royalty rates that colleges, universities, and other educational institutions not affiliated with National Public Radio pay for the use of published nondramatic musical compositions in the SESAC repertory for the statutory license under the Copyright Act for noncommercial broadcasting.

DATES: *Effective date:* January 1, 2017.

Applicability dates: These rates are applicable to the period January 1, 2017, through December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Kimberly Whittle, Attorney Advisor, by telephone at (202) 707–7658 or by email at *crb@loc.gov*.

SUPPLEMENTARY INFORMATION: Section 118 of the Copyright Act, title 17 of the United States Code, creates a statutory license for the use of published nondramatic musical works and published pictorial, graphic, and sculptural works in connection with noncommercial broadcasting.

On November 29, 2012, the Copyright Royalty Judges (Judges) adopted final regulations governing the rates and terms of copyright royalty payments under section 118 of the Copyright Act for the license period 2013–2017. *See* 77 FR 71104. Pursuant to these regulations, on or before December 1 of each year, the Judges shall publish in the **Federal Register** a notice of the change in the cost of living for the rate codified at § 381.5(c)(3) relating to compositions in the repertory of SESAC. The adjustment, fixed to the nearest dollar, shall be the greater of ''the change in the cost of living as determined by the Consumer Price Index (all consumers, all items) [CPI–U] * * * during the period from the most recent index published prior to the previous notice to the most recent index published prior to December 1, of that year,'' or 2%. 37 CFR 381.10.

The change in the cost of living as determined by the CPI–U during the period from the most recent index published before December 1, 2014, to the most recent index published before December 1, 2016, is 1.6%.[1] In accordance with 37 CFR 381.10(b), the Judges announce that the COLA for calendar year 2017 shall be 2%. Application of the 2% COLA to the current rate for the performance of published nondramatic musical compositions in the repertory of SESAC—$149 per station—results in an adjusted rate of $152 per station.

List of Subjects in 37 CFR Part 381

Copyright, Music, Radio, Television, Rates.

Final Regulations

In consideration of the foregoing, the Judges amend part 381 of title 37 of the Code of Federal Regulations as follows:

PART 381—USE OF CERTAIN COPYRIGHTED WORKS IN CONNECTION WITH NONCOMMERCIAL EDUCATIONAL BROADCASTING

■ 1. The authority citation for part 381 continues to read as follows:

Authority: 17 U.S.C. 118, 801(b)(1), and 803.

■ 2. Section 381.5 is amended by revising paragraph (c)(3)(v) to read as follows:

§ 381.5 Performance of musical compositions by public broadcasting entities licensed to colleges and universities.

* * * * *

(c) * * *

(3) * * *

(v) 2017: $152 per station.

* * * * *

Dated: November 17, 2016.

Suzanne M. Barnett,

Chief Copyright Royalty Judge.

[Docket No. 16–CRB–0017–SA–COLA (2017)]

Cost of Living Adjustment to Satellite Carrier Compulsory License Royalty Rates

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Final rule.

SUMMARY: The Copyright Royalty Judges announce a cost of living adjustment (COLA) of 1.6% in the royalty rates satellite carriers pay for a compulsory license under the Copyright Act. The COLA is based on the change in the Consumer Price Index from October 2015 to October 2016.

DATES: *Effective Date:* January 1, 2017.

Applicability Dates: These rates are applicable to the period January 1, 2017, through December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Kimberly Whittle, Attorney Advisor, by telephone at (202) 707–7658 or by email at *crb@loc.gov.*

SUPPLEMENTARY INFORMATION: The satellite carrier compulsory license establishes a statutory copyright licensing scheme for the retransmission of distant television programming by satellite carriers. 17 U.S.C. 119. Congress created the license in 1988 and has reauthorized the license for additional five-year periods, most recently with the passage of the STELA Reauthorization Act of 2014, Public Law 113–200.

On August 31, 2010, the Copyright Royalty Judges (Judges) adopted rates for the section 119 compulsory license for the 2010–2014 term. *See* 75 FR 53198. The rates were proposed by Copyright Owners and Satellite Carriers [1] and were unopposed. *Id.* Section 119(c)(2) of the Copyright Act provides that, effective January 1 of each year, the Judges shall adjust the royalty fee payable under Section 119(b)(1)(B) ''to reflect any changes occurring in the cost of living as determined by the most recent Consumer Price Index (for all consumers and for all items) [CPI–U] published by the Secretary of Labor before December 1 of the preceding year.'' Section 119 also requires that ''[n]otification of the adjusted fees shall be published in the **Federal Register** at least 25 days before January 1.'' 17 U.S.C. 119(c)(2).

The change in the cost of living as determined by the CPI–U during the period from the most recent index published before December 1, 2015, to the most recent index published before December 1, 2016, is 1.6%.[2] Application of the 1.6% COLA to the current rate for the secondary transmission of broadcast stations by satellite carriers for private

[1] On November 17, 2016, the Bureau of Labor Statistics announced that the CPI–U increased 1.6% over the last 12 months.

[1] Program Suppliers and Joint Sports Claimants comprised the Copyright Owners while DIRECTV, Inc., DISH Network, LLC, and National Programming Service, LLC, comprised the Satellite Carriers.

[2] On November 17, 2016, the Bureau of Labor Statistics announced that the CPI–U increased 1.6% over the last 12 months.

home viewing—27 cents per subscriber per month—results in an unchanged rate of 27 cents per subscriber per month (rounded to the nearest cent). *See* 37 CFR 386.2(b)(1). Application of the 1.6% COLA to the current rate for viewing in commercial establishments—56 cents per subscriber per month—results in a rate of 57 cents per subscriber per month (rounded to the nearest cent). *See* 37 CFR 386.2(b)(2).

List of Subjects in 37 CFR Part 386

Copyright, Satellite, Television.

Final Regulations

In consideration of the foregoing, the Judges amend part 386 of title 37 of the Code of Federal Regulations as follows:

PART 386—ADJUSTMENT OF ROYALTY FEES FOR SECONDARY TRANSMISSIONS BY SATELLITE CARRIERS

■ 1. The authority citation for part 386 continues to read as follows:

Authority: 17 U.S.C. 119(c), 801(b)(1).

■ 2. Section 386.2 is amended by adding paragraphs (b)(1)(viii) and (b)(2)(viii) as follows:

§ 386.2 Royalty fee for secondary transmission by satellite carriers.

* * * * *

(b) * * *

(1) * * *

(viii) 2017: 27 cents per subscriber per month.

(2) * * *

(viii) 2017: 57 cents per subscriber per month.

Dated: November 17, 2016.

[EPA–R04–OAR–2014–0507; FRL–9955–49–Region 4]

Air Plan Approval; FL Infrastructure Requirements for the 2010 1-hour NO_2 NAAQS

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve the State Implementation Plan (SIP) submission, submitted by the State of Florida, through the Florida Department of Environmental Protection (FDEP), on January 22, 2013, to demonstrate that the State meets certain infrastructure requirements of the Clean Air Act (CAA or Act) for the 2010 1-hour nitrogen dioxide (NO_2) national ambient air quality standards (NAAQS). The CAA requires that each state adopt and submit a SIP for the implementation, maintenance and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an ''infrastructure'' SIP. FDEP certified that the Florida SIP contains provisions that ensure the 2010 1-hour NO_2 NAAQS is implemented, enforced, and maintained in Florida. EPA has determined that Florida's infrastructure SIP submission, provided to EPA on January 22, 2013, satisfies certain required infrastructure elements for the 2010 1-hour NO_2 NAAQS.

DATES: This rule will be effective December 23, 2016.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2014–0507. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Richard Wong, Air Regulatory Management Section, Air Planning and Implementation Branch, Pesticides and Toxics Management Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–8726. Mr. Richard Wong can also be reached via electronic mail at *wong.richard@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Overview

On January 22, 2010 (75 FR 6474, February 9, 2010), EPA promulgated a new 1-hour primary NAAQS for NO_2 at a level of 100 parts per billion, based on a 3-year average of the 98th percentile of the yearly distribution of 1-hour daily maximum concentrations. Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as EPA may prescribe. Section 110(a)(2) requires states to address basic SIP elements such as requirements for monitoring, basic program requirements and legal authority that are designed to assure attainment and maintenance of the NAAQS. States were required to submit such SIPs for the 2010 NO_2 NAAQS to EPA no later than January 22, 2013.

In a proposed rulemaking published on July 20, 2016 (81 FR 47094), EPA proposed to approve Florida's 2010 1-hour NO_2 NAAQS infrastructure SIP submission submitted on January 22, 2013, with the exception of the elements related to the ambient air quality monitoring and data system of section 110(a)(2)(B), and the prevention of significant deterioration (PSD) permitting requirements for major sources of sections 110(a)(2)(C), prong 3 of D(i), and (J). EPA is not acting on Florida's January 22, 2013, infrastructure SIP submission regarding the PSD permitting requirements for major sources of sections 110(a)(2)(C), prong 3 of D(i) and (J) for the 2010 1-hour NO_2 NAAQS because it previously approved these requirements. *See* 80 FR 14019, March 18, 2015. Regarding section 110(a)(2)(B), EPA is not taking any action on this portion of Florida's 2010 1-hour NO_2 NAAQS infrastructure SIP submission in this action and will instead address this requirement in a separate action. Also note that EPA did not propose any action regarding the interstate transport provisions pertaining to the contribution to nonattainment or interference with maintenance in other states of prongs 1 and 2 of section 110(a)(2)(D)(i) because Florida's January 22, 2013 SIP submission did not address these requirements. The details of Florida's submission and the rationale for EPA's actions for this final rulemaking are explained in the July 20, 2016, proposed rulemaking. Comments on the proposed rulemaking were due on or before August 19, 2016. EPA received no adverse comments on the proposed action.

II. Final Action

With the exception of the elements related to the ambient air quality monitoring and data system of section 110(a)(2)(B), and the PSD permitting requirements for major sources of sections 110(a)(2)(C), prong 3 of D(i), and (J), EPA is taking final action to approve Florida's infrastructure SIP submission for the 2010 1-hour NO_2 NAAQS submitted on January 22, 2013. EPA is taking final action to approve Florida's infrastructure SIP submission for the 2010 1-hour NO_2 NAAQS because the submission is consistent with section 110 of the CAA.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register.** A major rule cannot take effect until 60 days after it is published in the **Federal Register.** This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 23, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Findings of Failure To Attain the 1997 $PM_{2.5}$ Standards; California; San Joaquin Valley

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) has determined that the San Joaquin Valley nonattainment area failed to attain the 1997 annual and 24-hour fine particulate matter ($PM_{2.5}$) national ambient air quality standards by the December 31, 2015 ''Serious'' area attainment date. As a result of this determination, the State of California is required to submit a revision to the California State Implementation Plan that, among other elements, provides for expeditious attainment of the 1997 $PM_{2.5}$ standards and for a five percent annual reduction in the emissions of direct $PM_{2.5}$ or a $PM_{2.5}$ plan precursor pollutant in the San Joaquin Valley.

DATES: This rule is effective December 23, 2016.

ADDRESSES: The EPA has established docket number EPA–R09–OAR–2016–0494 for this action. Generally, documents in the docket for this action are available electronically at *http://www.regulations.gov* or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105–3901. While all documents in the docket are listed at *http://www.regulations.gov,* some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material, large maps, multi-volume reports), and some may not be available in either location (*e.g.,* confidential business information (CBI)). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Rory Mays, Air Planning Office (AIR–2), EPA Region IX, (415) 972–3227, *mays.rory@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we'', ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. Background

On October 6, 2016 (81 FR 69448), the EPA proposed to determine that the San Joaquin Valley Serious nonattainment area failed to attain the 1997 $PM_{2.5}$ national ambient air quality standards (NAAQS or ''standards'') by the applicable attainment date of December 31, 2015, based on complete, quality-assured and certified ambient air quality data for the 2013 to 2015 monitoring period. The San Joaquin Valley $PM_{2.5}$ nonattainment area (or ''the Valley'') covers San Joaquin County, Stanislaus County, Merced County, Madera County, Fresno County, Tulare County, Kings County, and the valley portion of Kern County (see 40 CFR 81.305 for the precise boundaries of the $PM_{2.5}$ nonattainment area).

As discussed further in our October 6, 2016 proposed rule, in 1997, the EPA established annual and 24-hour $PM_{2.5}$ standards of 15.0 micrograms per cubic meter ($\mu g/m^3$) and 65 $\mu g/m^3$, respectively (*see* 40 CFR 50.7). Since promulgation of the 1997 $PM_{2.5}$ NAAQS, the EPA has established more stringent $PM_{2.5}$ NAAQS but, for reasons given in the proposed rule, the 1997 $PM_{2.5}$ NAAQS remain in effect in the San Joaquin Valley and represent the standards for which today's determinations are made. *See* pages 69448–69449 of the proposed rule.

Our proposed rule provided background information on: The effects of exposure to elevated levels of $PM_{2.5}$; the designations and classifications of the San Joaquin Valley under the Clean Air Act (CAA or ''Act'') for the 1997 $PM_{2.5}$ NAAQS; the plans developed by California to address nonattainment area requirements for San Joaquin Valley; the reclassification of the San Joaquin Valley from ''Moderate'' to ''Serious'' for the 1997 $PM_{2.5}$ NAAQS and the related extension of the applicable attainment date to December 31, 2015; the request by California to extend the December 31, 2015 attainment date for San Joaquin Valley under CAA section 188(e); and the denial of that request by the EPA. The EPA published its final denial of the State's attainment date extension request on October 6, 2016 at 81 FR 69396.

In our October 6, 2016 proposed rule, we also described the following: The statutory basis (*i.e.,* CAA sections 179(c)(1) and 188(b)(2)) for the obligation on the EPA to determine whether an area's air quality meets the 1997 $PM_{2.5}$ NAAQS; the EPA regulations establishing the specific methods and procedures to determine whether an area has attained the 1997 $PM_{2.5}$ NAAQS; and the $PM_{2.5}$ monitoring networks operated in the Valley by the California Air Resources Board and the San Joaquin Valley Unified Air Pollution Control District and related monitoring network plans. We also documented our previous review of the networks and network plans, the agencies' annual certifications of ambient air monitoring data, and our determination that 15 of the 17 monitoring sites within the Valley produced valid design values for purposes of comparison with the 1997 $PM_{2.5}$ NAAQS.

Under EPA regulations in 40 CFR part 50, section 50.7 and in accordance with Appendix N, the 1997 annual $PM_{2.5}$ standards are met when the design value is less than or equal to 15.0 $\mu g/m^3$, and the 1997 24-hour $PM_{2.5}$ standards are met when the design value is less than or equal to 65 $\mu g/m^3$. More specifically, the design value for the annual $PM_{2.5}$ standards is the 3-year average of annual mean concentration, and the 1997 annual $PM_{2.5}$ NAAQS are met when the design value for the annual $PM_{2.5}$ standards at each eligible monitoring site is less than or equal to 15.0 $\mu g/m^3$. With respect to the 24-hour $PM_{2.5}$ standards, the design value is the 3-year average of annual 98th percentile 24-hour average values recorded at each eligible monitoring site, and the 1997 24-hour $PM_{2.5}$ NAAQS are met when the design value for the 24-hour standards at each such monitoring site is less than or equal to 65 $\mu g/m^3$.

In our proposed rule, to evaluate whether the San Joaquin Valley attained the 1997 $PM_{2.5}$ NAAQS by the December 31, 2015 attainment date, we determined the 2013–2015 design values at each of the 17 $PM_{2.5}$ monitoring sites for the 1997 annual and 24-hour $PM_{2.5}$ standards. *See* Tables 1 and 2 of our October 6, 2016 proposed rule. Based on the design values at the various sites, we found that eight sites, all in the central and southern San Joaquin Valley, did not meet the 1997 annual $PM_{2.5}$ NAAQS of 15.0 $\mu g/m^3$, and that four sites, all in southwestern San Joaquin Valley, did not meet the 1997 24-hour $PM_{2.5}$ NAAQS of 65 $\mu g/m^3$ by the December 31, 2015 attainment date. The 2015 annual design value site, *i.e.,* the site with the highest design value based on 2013–2015 data, is the Corcoran site with a 2015 annual $PM_{2.5}$ design value of 22.2 $\mu g/m^3$ and a 24-hour $PM_{2.5}$ design value of 79 $\mu g/m^3$.

For the San Joaquin Valley to attain the 1997 $PM_{2.5}$ NAAQS by December 31, 2015, the 2015 design value (reflecting data from 2013–2015) at each eligible

monitoring site in the Valley must be equal to or less than 15.0 μg/m^3 for the annual standards and 65 μg/m^3 for the 24-hour standards. Since several sites for each averaging period had 2015 design values greater than those values, based on quality-assured and certified data for 2013–2015, we proposed to determine that the San Joaquin Valley failed to attain the 1997 annual and 24-hour $PM_{2.5}$ standards by the December 31, 2015 attainment date. With today's action, we finalize this determination.

Finally, in our proposed rule, we described the CAA requirements that would apply if the EPA were to finalize the proposed finding of failure to attain. *See* our October 6, 2016 proposed rule for more information about the topics summarized above.

II. Public Comments and Responses

Our October 6, 2016 proposed rule provided for a 30-day comment period. During this period, we received no comments.

III. Final Action

Under CAA sections 179(c)(1) and 188(b)(2), and based on reasons set forth in our proposed rule and summarized above, the EPA is taking final action to determine that the San Joaquin Valley Serious nonattainment area failed to attain the 1997 annual and 24-hour $PM_{2.5}$ NAAQS by the December 31, 2015 attainment date. This determination is based upon monitored air quality data from 2013 through 2015.

As a result of this final determination, the State of California is required under CAA sections 179(d) and 189(d) to submit, by December 31, 2016, a revision to the SIP for the San Joaquin Valley. The SIP revision must, among other elements, demonstrate expeditious attainment of the standards within the time period provided under CAA section 179(d), provide for annual reduction in the emissions of $PM_{2.5}$ or a $PM_{2.5}$ plan precursor pollutant within the area of not less than five percent until attainment,[1] demonstrate reasonable further progress, and include contingency measures. The requirement for a new attainment demonstration under CAA section 189(d) also triggers the requirement for the SIP revision for quantitative milestones under section 189(c) that are to be achieved every three years until redesignation to attainment.

The new attainment date is set by CAA section 179(d)(3), which relies upon section 172(a)(2) to establish a new attainment date but with a different starting point than provided in section 172(a)(2). Under section 179(d)(3), the new attainment date is the date by which attainment can be achieved as expeditiously as practicable, but no later than five years from the publication date of the final determination of failure to attain. The EPA may extend the attainment date for a period no greater than 10 years from the final determination, considering the severity of nonattainment and the availability and feasibility of pollution control measures.

IV. Statutory and Executive Order Reviews

This final action in and of itself establishes no new requirements; it merely documents that air quality in the San Joaquin Valley did not meet the 1997 $PM_{2.5}$ standards by the CAA deadline. For that reason, this final action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this final action does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP obligations discussed herein do not apply to Indian tribes and thus this action will not impose substantial direct costs on tribal governments or preempt tribal law. Nonetheless, the EPA has notified the tribes within the San Joaquin Valley $PM_{2.5}$ nonattainment area of this final action.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 23, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Ammonia, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: November 14, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

[1] 81 FR 58010 at 58100, 58158 (August 24, 2016). The EPA defines $PM_{2.5}$ plan precursor as those $PM_{2.5}$ precursors required to be regulated in the applicable attainment plan and/or nonattainment new source review program. 81 FR 58010 at 58152.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.247 is amended by adding paragraph (h) to read as follows:

§ 52.247 Control strategy and regulations: Fine Particle Matter.

* * * * *

(h) *Determination of Failure to Attain:* Effective December 23, 2016, the EPA has determined that the San Joaquin Valley Serious $PM_{2.5}$ nonattainment area failed to attain the 1997 annual and 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. This determination triggers the requirements of CAA sections 179(d) and 189(d) for the State of California to submit a revision to the California SIP for the San Joaquin Valley to the EPA by December 31, 2016. The SIP revision must, among other elements, demonstrate expeditious attainment of the 1997 $PM_{2.5}$ NAAQS within the time period provided under CAA section 179(d) and that provides for annual reduction in the emissions of direct $PM_{2.5}$ or a $PM_{2.5}$ plan precursor pollutant within the area of not less than five percent until attainment.

Federal Emergency Management Agency

44 CFR Part 62

[Docket ID: FEMA–2016–0012]

RIN 1660–AA86

National Flood Insurance Program (NFIP): Financial Assistance/Subsidy Arrangement

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency (FEMA) is issuing this final rule to remove the copy of the Financial Assistance/Subsidy Arrangement (Arrangement) and the summary of the Financial Control Plan from the appendices of the National Flood Insurance Program (NFIP) regulations. It is no longer necessary or appropriate to retain a contract, agreement, or any other arrangement between FEMA and private insurance companies in the Code of Federal Regulations.

DATES: This final rule is effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Claudia Murphy, Director, Policyholder Services Division, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 400 C Street SW., Washington, DC 20472, (202) 646–2775.

SUPPLEMENTARY INFORMATION:

I. Background and Regulatory History

The National Flood Insurance Act of 1968 (NFIA), as amended (42 U.S.C. 4001 *et seq.*), authorizes the Administrator of the Federal Emergency Management Agency (FEMA) to establish and carry out a National Flood Insurance Program (NFIP) to enable interested persons to purchase insurance against loss resulting from physical damage to or loss of real or personal property arising from flood in the United States. *See* 42 U.S.C. 4011(a). Under the NFIA, FEMA has the authority to undertake arrangements to carry out the NFIP through the facilities of the Federal government, utilizing, for the purposes of providing flood insurance coverage, insurance companies and other insurers, insurance agents and brokers, and insurance adjustment organizations, as fiscal agents of the United States. *See* 42 U.S.C. 4071. To this end, FEMA is authorized to ''enter into any contracts, agreements, or other arrangements'' with private insurance companies to utilize their facilities and services in administering the NFIP, and on such terms and conditions as may be agreed upon. *See* 42 U.S.C. 4081(a).

Pursuant to this authority, FEMA enters into a standard Financial Assistance/Subsidy Arrangement (Arrangement) with private sector property insurers, also known as Write Your Own (WYO) companies, to sell NFIP flood insurance policies under their own names and adjust and pay claims arising under the Standard Flood Insurance Policy (SFIP). Each Arrangement entered into by a WYO company must be in the form and substance of the standard Arrangement, a copy of which is in Title 44 of the Code of Federal Regulations (CFR) Part 62, Appendix A. *See* 44 CFR 62.23(a). Since the primary relationship between the Federal government and WYO companies is one of a fiduciary nature (that is, to ensure that any taxpayer funds are appropriately expended), FEMA established ''A Plan to Maintain Financial Control for Business Written Under the Write Your Own Program,'' also known as the ''Financial Control Plan.'' *See* 42 U.S.C. 4071; 44 CFR 62.23(f), Part 62, App. B. To ensure financial and statistical control over the NFIP, as part of the Arrangement, WYO companies agree to adhere to the standards and requirements in the Financial Control Plan.

On May 23, 2016, FEMA published a proposed rule (81 FR 32261) proposing to remove the copy of the Arrangement in 44 CFR part 62, Appendix A, and the summary of the Financial Control Plan in 44 CFR part 62, Appendix B. In addition, FEMA proposed to make conforming amendments to remove citations to these appendices in 44 CFR 62.23.

FEMA proposed to remove the Arrangement from the NFIP regulations because it is no longer necessary to include a copy of the Arrangement in the CFR. FEMA originally included the Arrangement in the CFR to inform the public of the procedural details of the WYO Program. *See* 50 FR 16236 (April 25, 1985). There are now more efficient ways to inform the public of the procedural details of the WYO Program, and after more than 30 years of operation, the public is more familiar with the procedural details of the WYO Program and the flood insurance provided through WYO companies. Further, the NFIA does not require FEMA to include a copy of the Arrangement in the CFR. *See* 42 U.S.C. 4081. Finally, it is inappropriate to codify in regulation a contract, agreement, or other arrangement between FEMA and private insurance companies.

With the removal of the copy of the Arrangement from the NFIP regulations, FEMA and its industry partners can have flexibility to make operational adjustments and corrections to the Arrangement more quickly and efficiently. Although the rulemaking process plays an important role in agency policymaking, when this process is not required or necessary, the requirement to undergo rulemaking can unnecessarily slow down the operation of the NFIP by FEMA and its industry partners and can result in the use of alternate, less than ideal measures that result in business and operational inefficiencies.

FEMA also proposed to remove the summary of the Financial Control Plan in Appendix B, because this information is contained in either FEMA's Financial

Control Plan,[1] or in 44 CFR Section 62.23. Reprinting these requirements elsewhere in the CFR is duplicative and unnecessary.

Finally, FEMA proposed to make conforming amendments to the language in 44 CFR 62.23 where FEMA references Appendix A and Appendix B of 44 CFR part 62, because those appendices will be removed.

II. Public Comments on the Proposed Rule

FEMA received five comments in response to the proposed rule, one from a WYO company (Allstate/FEMA–2016–0012–0003), one from a member of the public, two from organizations representing agents and brokers (Independent Insurance Agents & Brokers of America, Inc./FEMA–2016–0012–0004; National Association of Professional Insurance Agents/FEMA–2016–0012–0005), and one collective comment from four organizations representing insurance companies (The American Insurance Association (AIA), The Financial Services Roundtable (FSR), The National Association of Mutual Insurance Companies (NAMIC), The Property and Casualty Insurers Association of America (PCIAA)/FEMA–2016–0012–0006). FEMA responds to these comments below.

With this regulatory action, FEMA finalizes the proposed rule, with one revision made in response to the comments received. FEMA is adding a requirement to 44 CFR 62.23 that FEMA must publish the Arrangement in the **Federal Register** at least 6 months prior to the effective date of the Arrangement.

A. Notice to WYO Companies of Changes to the Arrangement

Under the terms of the Arrangement, FEMA must publish in the **Federal Register** each year, and make available to the WYO companies, the terms for subscription or re-subscription to the Arrangement. WYO companies must notify FEMA of their intent to re-subscribe or not re-subscribe within 30 days of the publication of the notice in the **Federal Register**. *See* Financial Assistance/Subsidy Arrangement, Article V(B).

FEMA received two comments requesting FEMA to provide WYO companies sufficient notice prior to the effective date of a revised Arrangement (FEMA–2012–2016–0003/FEMA–2012–2016–0006). The commenters said this would provide time for WYO companies to assess the impact to their business (FEMA–2012–2016–0003), and provide time for the marketplace to assess the impact of changes, thereby allowing WYO companies to determine what, if any, changes would be necessary (FEMA–2012–2016–0006). They stated that this would also provide WYO companies time to decide whether to continue in or withdraw from the NFIP (FEMA–2012–2016–0003; FEMA–2012–2016–0006). One commenter suggested this notice be at least 1 year prior to the effective date of the revised Arrangement (FEMA–2012–2016–0003).

The current Arrangement does not specify how far in advance FEMA must publish the Arrangement in the **Federal Register**. Typically, FEMA publishes the Arrangement in the **Federal Register** in August, and the Arrangement becomes effective October 1.[2] As a result, WYO companies typically have less than a month to decide whether to subscribe, because they must notify FEMA of their intent to re-subscribe or not re-subscribe within 30 days of the publication of the Arrangement in the **Federal Register**. WYO companies commented that they accepted this short timeline because they knew that they would receive notice of substantive changes to the Arrangement as part of the notice-and-comment rulemaking process. (FEMA–2016–0012–0006).

FEMA agrees it should provide sufficient notice to WYO companies prior to the effective date of a revised Arrangement. Therefore, FEMA is adding a requirement to paragraph (a) of Section 63.23 which states that each year, FEMA must publish the Arrangement at least 6 months before the effective date of the Arrangement. FEMA adds this 6-month notice requirement to the NFIP regulations to provide the WYO companies time to assess the impact of any changes to the Arrangement, including whether to re-subscribe. In addition, by placing this requirement in the CFR, FEMA will preserve certainty and protect the ability of WYO companies to adjust to any changes to the Arrangement. FEMA believes the 6-month notice provision is an appropriate balance between the 1-year notice proposed by the commenter, and the language of the current Arrangement, which does not specify how much notice FEMA must provide WYO companies, other than it must publish it each year.

Much like how WYO companies need time to adjust to changes to the Arrangement, FEMA needs time to evaluate the need for changes to the Arrangement. A 6-month notice period will enable FEMA, working with WYO companies, to incorporate lessons learned from the performance of the previous year's Arrangement into the next year's Arrangement. With a 1-year notice period, FEMA would have to publish the Arrangement for the next Arrangement Year the same day the current year's Arrangement takes effect. Accordingly, if stakeholders requested a change to the Arrangement based on experience for the current year, FEMA could not implement the change until nearly two years later. A 1-year notice period would also hinder FEMA's ability, in partnership with WYO companies, to make these operational adjustments and corrections to the Arrangement more quickly and efficiently, which is one of the stated purposes of this rule.

FEMA believes the 6-month notice provision is appropriate because it aligns with the amount of notice FEMA typically provides when it makes changes, for example, through bulletins announcing program changes or changes to the Flood Insurance Manual. Finally, FEMA believes the notice provision provides flexibility to both FEMA and WYO companies, because the 6-month notice is the minimum notice; FEMA may provide more notice than 6 months as necessary.

In addition to providing notice in the **Federal Register** 6 months prior to the effective date of the Arrangement, FEMA will continue to engage WYO companies, as it does currently, before it makes any changes to the Arrangement.

B. Uniformity of the Arrangement After Removal From the CFR

Two commenters stated that removing the copy of the Arrangement from the NFIP regulations might lead to significant variation among agreements executed between FEMA and the various WYO companies, including disparity in the obligations and expectations between entities not party to, but affected by, the Arrangement (FEMA–2016–0012–0003; FEMA–2016–0012–0006). Currently, 44 CFR 62.23(a) requires that arrangements between the NFIP and private insurance companies as part of the WYO Program be in the ''form and substance'' of the copy of the Arrangement found in Appendix A of Part 62. This final rule maintains this requirement. However, the rule no longer requires that the copy of the Arrangement be found in the CFR. As a result, FEMA will continue to enter into the same standard Arrangement with each WYO company or other insurer. Any changes FEMA makes to the Arrangement will be uniformly reflected

[1] *See* National Flood Insurance Program, The Write Your Own Program Financial Control Plan Requirements and Procedures (1999), *http://bsa.nfipstat.fema.gov/manuals/fcp99jc.pdf* (last accessed April 8, 2016).

[2] *See, e.g.,* 81 FR 51460 (Aug. 4, 2016).

in each arrangement entered into by WYO companies in a particular year.

C. Publication in the CFR or the ***Federal Register*** *as a Condition of Participation*

One commenter stated that in 1983, as a condition of private insurance companies returning to the NFIP, FEMA agreed to propose and implement the Arrangement through the **Federal Register** so that it could not be changed quickly (FEMA–2016–0012–0003). The commenter stated that the current regulatory structure creates an incentive for FEMA to work with the WYO companies to avoid surprises, which promotes the sharing of information and helps prevent unintended consequences. A second commenter stated that the condition of the return of the private insurance companies to the NFIP in 1983 was that the Arrangement would be codified in the CFR (FEMA–2016–0012–0006). The second commenter echoed the statement of the first commenter, stating that since 1983, both FEMA and the companies operate in an atmosphere of trust and certainty, as the regulatory process ensures that any issues or proposed changes will be adequately aired before implementation. The second commenter stated that if FEMA removes the Arrangement from the CFR, FEMA must provide a clear, consistently followed, and easily enforced alternative notice requirement.

FEMA is not aware of an agreement between FEMA and WYO companies that, as a condition of the WYO companies returning to the flood program, FEMA agreed to place the Arrangement in the appendices of the NFIP regulations. The WYO Program began in 1983, and FEMA added a copy of the WYO Arrangement to the appendices of the NFIP regulations in 1985 for the stated purpose of informing the public of the procedural details of the WYO Program. *See* 50 FR 16236 (April 25, 1985).

Two commenters mentioned FEMA's past failure to provide sufficient notice of the Arrangement offer prior to the new Arrangement year (FEMA–2016–0012–0003 and FEMA–2016–0012–0006). Article V.B of the Arrangement requires that a WYO company currently subject to the Arrangement inform FEMA of its intent to re-subscribe or not re-subscribe within 30 days of receiving the offer for the upcoming Arrangement Year. The provision is intended to help FEMA determine whether a current WYO company intends to continue participating or if they intend to not participate again, thus triggering the transition process described in Article V.C. No other similar deadlines or other timelines exist in statute, regulation, or in the Arrangement.

In practice, the Article V.B requirement has led FEMA to aim to provide the annual offer more than 30 days prior to the beginning of the next Arrangement Year to ensure clear program continuity. FEMA believes that the addition of the 6-month notice requirement in the **Federal Register** provides a clearer timeline going forward and will give WYO companies much greater notice before deciding whether to subscribe for the upcoming Arrangement Year.

Although FEMA is removing the copy of the Arrangement from the NFIP regulations, FEMA is committed to maintaining an atmosphere of trust and certainty with WYO companies. As discussed, FEMA is adding language to the NFIP regulations in Section 63.23(a) providing that each year, FEMA will publish the Arrangement in the **Federal Register** at least 6 months before the effective date of the Arrangement. However, FEMA intends to work with WYO companies through the NFIP's Industry Management Branch well before publication of the Arrangement in the **Federal Register**. FEMA believes that the 6-month notice requirement and ongoing collaboration efforts will encourage a more responsive Arrangement-modification process than what is possible through the formalities of the notice-and-comment rulemaking process.

D. Applicability of Government Contract Laws to the Arrangement

One commenter asked whether WYO companies would be subject to government contract laws if FEMA takes the Arrangement out of the regulatory process and WYO companies sign individual contracts with FEMA (FEMA–2016–0012–0003).

Since 1983, the first year of the WYO program, FEMA has not utilized contracting to effectuate its arrangement with the WYO companies and it has no intention of doing so in the future.

The NFIA authorizes FEMA to ''enter into any contracts, agreements, *or* other arrangements'' with private insurance companies to utilize their facilities and services in administering the NFIP, and on such terms and conditions as may be agreed upon. 42 U.S.C. 4081(a) (emphasis added). FEMA interprets section 4081(a) as distinguishing ''contracts'' from ''agreements'' and ''other arrangements.'' Accordingly, FEMA has relied upon section 4081(a)'s authority to enter into appropriate arrangements with private insurance companies.

On these grounds, FEMA has never utilized a contracting mechanism for the arrangements entered into between private insurance companies and FEMA as part of the WYO program. As this rule only changes the manner in which the Arrangement is published, FEMA does not intend to alter the Agency's longstanding interpretation of the NFIA and does not foresee any changes to the legal status of arrangements between FEMA and WYO companies.

E. Judicial Deference to FEMA's Interpretation of the Arrangement

One commenter noted that while the NFIA does not require the Arrangement to be codified in the CFR and be subject to public notice and comment, it has been so since the Arrangement's inception, and as a result, FEMA is entitled to the highest *Chevron*[3] deference in any judicial challenges to its interpretations of the NFIA under the Administrative Procedure Act. The commenter stated that once the Arrangement is removed from the CFR, FEMA would be entitled to only weaker *Skidmore*[4] deference, and that undoubtedly future judicial challenges to FEMA's interpretations of the Arrangement will raise the fact that FEMA sponsored the Arrangement's removal from the CFR and understood the negative impact on the deference given to its interpretations (FEMA–2016–0012–0006).

FEMA acknowledges the commenter's concern. However, FEMA believes that the effects of this change will be minimal given that the Arrangement is a largely technical document that does little to interpret or expand upon statute. Rather, the NFIP's regulations, particularly 44 CFR part 62, contain the substantive policies and statutory interpretations relevant to the WYO Program. FEMA does not expect the level of deference owed to these regulations to change due to this rule.

F. Notice to and Involvement of Non-WYO Companies

Three commenters expressed concern that by removing the Arrangement from the rulemaking process, interested persons not a party to the Arrangement will not have an opportunity to comment on proposed changes (FEMA–2016–0012–0003; FEMA–2016–0012–0004; FEMA–2016–0012–0006). One of these commenters stated that the removal of the Arrangement would prejudice third-party stakeholders (FEMA–2016–0012–0006). The

[3] *Chevron U.S.A. Inc.* v. *Natural Resources Defense Council, Inc.* 467 U.S. 837 (1984).

[4] *Skidmore* v. *Swift & Co.,* 323 U.S. 134 (1944).

commenter suggested that FEMA establish an alternative mechanism that would allow for meaningful stakeholder and public consultation.

Another commenter stated that the removal of the Arrangement would exclude independent insurance agents from the NFIP purchasing process at an unacceptable detriment to consumers, and that independent insurance agents, through their interactions with consumers, play a pivotal role in educating property owners about their flood insurance purchasing options and providing information vital to the NFIP's current and potential future policy holders (FEMA–2016–2012–0005). This commenter pointed out how the notice of proposed rulemaking stated that removing the Arrangement and the summary of the Financial Control Plan from regulation would keep the Arrangement between FEMA and WYO companies, and thus FEMA's position seemed to be that excluding ''the multitude of others involved in the program would improve the complex NFIP process.'' The commenter noted that in reality, consumers depend on the wisdom, experience, and access to information provided by independent insurance agents in navigating the program. The commenter acknowledged that the Arrangement is technically between FEMA and the WYO companies, but asserted that other stakeholders including independent insurance agents and members of the public, while not technically direct parties to the contract, are equally affected by the terms of the Arrangement and therefore must be included in any discussions about changes to it. The commenter pointed out that while the notice of proposed rulemaking asserts that removing the Arrangement would allow FEMA and its ''industry partners'' to be flexible in negotiating changes to the Arrangement, FEMA should be aware that its ''industry partners'' include more than just the WYO companies.

This commenter expressed ''grave concerns'' about the appearance of a lack of transparency that would be engendered in the removal of the Arrangement and the summary of the Financial Control Plan, and that NFIP stakeholders and members of the public who hope to see the NFIP reauthorized and improved over the next 18 months will be shut out of any changes being made to these documents if they are removed from regulation, and the essential input the stakeholders and public provide in the regulatory process would be lost. The commenter referred to FEMA's statement in the notice of proposed rulemaking that FEMA has carried out the regulatory process 21 times when seeking changes to the Arrangement, and the regulatory process is necessary and vital to the credibility of both FEMA as a Federal agency and the NFIP as a Federal program.

This commenter noted how, although the notice of proposed rulemaking characterized the removal of the Arrangement as nonsubstantive, FEMA's ''description of the benefits of the removal belies FEMA's intent to make substantive changes to the Arrangement upon its removal from regulation.'' The commenter stated that once removed from the CFR, changes to the Arrangement would no longer be subject to the valuable input of many parties affected by the terms of the Arrangement, such as independent agents, consumers, adjusters, State insurance regulators, and others.

A third commenter echoed this commenter's concerns that the flexibility and efficiencies that may be gained by removing the Arrangement from the rulemaking process will compromise the current transparent process where interested persons such as adjusters, consumers, or insurance agents who are not a party to the Arrangement but are impacted by the Arrangement are afforded an opportunity to comment on proposed changes (FEMA–2016–0004). This commenter stated that although the notice of proposed rulemaking stated that FEMA will continue to post the Arrangement online and in the **Federal Register**, it did not provide information on how the Arrangement negotiation process is intended to work, including how interested persons who are not a party to the Arrangement but impacted by it can comment on proposed changes or participate in the negotiation process. The commenter asked that FEMA continue to provide an avenue for interested persons to be informed and involved when changes to the Arrangement are considered.

As discussed, FEMA enters into arrangements with insurance companies to utilize their facilities and services in administering the NFIP, and on such terms and conditions as may be agreed upon. *See* 42 U.S.C. 4081(a). These insurance companies are fiscal agents of the United States, and through the terms of the Arrangement, sell NFIP flood insurance policies under their own names and adjust and pay claims arising under the SFIP. *See* 42 U.S.C. 4071. As discussed in the proposed rule, FEMA is removing the copy of the Arrangement from the NFIP regulations, because the NFIA does not require FEMA to include a copy of the Arrangement in the CFR and it is inappropriate to codify in regulation a contract, agreement, or other arrangement between FEMA and private insurance companies.

While FEMA appreciates the input of other stakeholders such as adjusters, consumers, and insurance agents, FEMA does not believe it is necessary to establish a formal alternative mechanism to allow for stakeholder and public consultation on the Arrangement. All members of the public have opportunities to comment on proposed rulemakings affecting the NFIP. Such regulations reflect the overarching policies and structures of the NFIP.

In addition to comments made as part of a rulemaking, FEMA encourages the public to comment on any other aspect of the NFIP. The NFIP Office of the Flood Insurance Advocate provides an excellent avenue for voicing comments, questions, or concerns. Members of the public can contact the Office via email at *insurance-advocate@fema.dhs.gov.* Members of the public can also send inquiries to Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 400 C Street SW., Washington, DC 20472.

G. Consistency Within the NFIP

Two commenters stated the current structure, with the copy of the Arrangement in the NFIP regulations, helps to promote consistent policies, procedures, and claims handling, and helps to shield FEMA from political pressures (FEMA–2016–2012–0003; FEMA–2016–2012–0006). FEMA believes the NFIP regulations, including the SFIP, help to promote consistent policies and claims handling. The copy of the Arrangement in the NFIP regulations is a copy of an arrangement between FEMA and private insurance companies acting as fiscal agents of the United States. As such, FEMA believes removing a copy of the Arrangement from the CFR will not have an impact on NFIP policies, procedures, and claims handling. The public will still have an opportunity to comment on proposed changes to the NFIP, including claims handling, whenever FEMA makes changes to its NFIP regulations.

H. Technical Changes

One commenter asked whether FEMA intended to repeal any portion of 44 CFR Section 63.23(a), which requires the Arrangement to be in the form and substance of the standard arrangement, a copy of which is included in Appendix A (FEMA–2016–2012–0003). In the proposed rule, FEMA proposed to remove reference to Appendix A in paragraph (a) of Section 62.23, because

FEMA was proposing to remove Appendix A. As a result, FEMA will remove reference to Appendix A in the last sentence of paragraph (a) of Section 62.23 which will then read: ''Arrangements entered into by WYO companies or other insurers under this subpart must be in the form and substance of the standard arrangement, titled 'Financial Assistance/Subsidy Arrangement.' ''

I. Comments Outside the Scope of the Rulemaking

FEMA received two comments outside the scope of this rulemaking. One comment was on an individual's observation of a flood event, which is outside the scope of this rulemaking (FEMA–2016–2012–0002). Another comment recommended changes to the existing Arrangement (FEMA–2016–2012–0006). As noted in this final rule, FEMA is adding a requirement to the regulations that FEMA will publish the Arrangement in the **Federal Register** at least 6 months before the effective date of the Arrangement. FEMA will continue to engage WYO companies, as it does currently, before it makes any changes to the Arrangement. In accordance with the process in the current Arrangement, FEMA published notice for the Fiscal Year 2017 Arrangement on August 4, 2016 (81 FR 51460), but FEMA will consider the commenter's recommendations for future possible revisions to the Arrangement.

III. Regulatory Analysis

A. Executive Order 12866, as Amended, Regulatory Planning and Review; Executive Order 13563, Improving Regulation and Regulatory Review

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action'' under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget has not reviewed this rule.

FEMA is issuing a final rule removing Appendix A and B from Part 62 of 44 CFR. These Appendices contain a copy of the WYO Financial Assistance/Subsidy Arrangement (Arrangement) and a summary of the ''Plan to Maintain Financial Control for Business Written Under the Write Your Own Program'' (Financial Control Plan), respectively. In addition, FEMA makes conforming amendments to remove citations to these appendices in 44 CFR 62.23.

Since 1983, FEMA has entered into a standard Arrangement with WYO companies to sell NFIP insurance policies under their own names and adjust and pay SFIP claims.[5] Since 1985, FEMA has included a copy of the Arrangement in the CFR. In order to maintain the Arrangement, FEMA has undertaken rulemaking approximately 21 times to update the copy of the Arrangement in the regulations. The NFIA does not require FEMA to place the Arrangement in the CFR. Accordingly, undergoing such rulemakings is an unnecessary requirement.

FEMA is removing the copy of the Arrangement in 44 CFR part 62, Appendix A, because the NFIA does not require FEMA to include a copy of the Arrangement in the CFR. Therefore, its inclusion is no longer necessary. In 1985, FEMA added a copy of the Arrangement to the regulations to inform the public of the procedural details of the WYO Program. However, since that time, there have been technological advances for disseminating information to the public, and there are now more efficient ways to inform the public of the procedural details of the WYO Program. For example, FEMA now posts a copy of the Arrangement on its Web site. This serves the purpose of promoting awareness and disseminating program information, without needing to go through the rulemaking process. This rulemaking does not impose any changes to the current Arrangement with WYO companies. As such, FEMA believes there will not be any costs imposed on participating WYO companies because of this final rule.

FEMA received a public comment highlighting that ''circumventing'' the rulemaking process could permit FEMA to more easily make changes to the Arrangement. Changes to the Arrangement would not necessarily occur more frequently or be any more impactful in nature than they had been thus far. The pattern of changes seen in the history of the Arrangement, with relatively frequent minor changes and the occasional substantive adjustment, is expected to continue into the future and will not change due to this rule. FEMA will continue to enter into the Arrangement with WYO companies, and make available the Arrangement, as well as the terms for subscription or re-subscription, through **Federal Register** notice. FEMA will also publish the Arrangement at least 6 months prior to it becoming effective.

One of the benefits associated with this final rule is enhanced flexibility for FEMA and WYO companies to make operational adjustments to the Arrangement more quickly and efficiently in order to be more responsive to the needs of WYO companies and the operation of the NFIP. FEMA received two public comments requesting that FEMA provide WYO companies notice prior to the effective date of a revised Arrangement. FEMA agrees it should provide notice to the WYO companies and will publish the Arrangement in the **Federal Register** at least 6 months before the effective date of the Arrangement. This 6-month notice requirement will provide the marketplace time to assess the impact of any changes to the Arrangement, including whether to re-subscribe. FEMA believes that the primary benefits will be reinforced as FEMA, working with WYO companies, is able to make operational adjustments and corrections to the Arrangement more quickly and efficiently incorporating lessons learned from the performance of the previous year's Arrangement into the next year's Arrangement. These revisions, both the removal from the CFR as well as the 6-month advance notice, will preserve certainty, maintain transparency, and protect the ability of WYO companies to adjust to any changes to the Arrangement.

As discussed in the proposed rule, although the rulemaking process plays an important role in agency policymaking, when this process is not required or necessary, the requirement to undergo rulemaking can unnecessarily slow down the operation of the NFIP and can result in the use of alternate, less than ideal measures that result in business and operational inefficiencies. The elimination of the administrative burden that accompanies repeated updates to the CFR and the use of alternative, less than ideal measures are an additional benefit. FEMA believes there will be no economic impact associated with implementing the final rule.

Additionally, FEMA will remove a summary of the Financial Control Plan. FEMA removed the plan itself in 1985

[5] As of August 2016, 73 private property or casualty insurance companies participate in the Write Your Own program. Federal Emergency Management Agency, Write Your Own Flood Insurance Company List, *http://www.fema.gov/wyo_company* (last accessed August 25, 2016).

thus FEMA does not anticipate any economic impacts from removing the summary.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires agency review of proposed and final rules to assess their impact on small entities. When an agency promulgates a final rule under 5 U.S.C. 553, after being required by that section or any other law to publish a general notice of proposed rulemaking, the agency must prepare a final regulatory flexibility assessment (FRFA) or have the head of the agency certify pursuant to 5 U.S.C. 605(b) that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. Having conducted and published an Initial Regulatory Flexibility Analysis (IRFA) for the proposed rule, and having received no public comments on that analysis, FEMA does not believe this final rule will have a significant economic impact on a substantial number of small entities.

NFIA authorizes FEMA to ''enter into any contracts, agreements, or other arrangements'' with private insurance companies to utilize their facilities and services in administering the NFIP, and on such terms and conditions as may be agreed upon. *See* 42 U.S.C. 4081. Pursuant to this authority, FEMA enters into a standard Arrangement with private sector property insurers, also known as WYO companies, to sell NFIP flood insurance policies under their own names and adjust and pay claims arising under the policy. Since the primary relationship between the Federal government and WYO companies is one of a fiduciary nature, FEMA established the Financial Control Plan. The NFIA does not require FEMA to include a copy of the Arrangement or a summary of the Financial Control Plan in the CFR.

''Small entity'' is defined in 5 U.S.C. 601. The term ''small entity'' can have the same meaning as the terms ''small business'', ''small organization'' and ''small governmental jurisdiction.'' Section 601(3) defines a ''small business'' as having the same meaning as ''small business concern'' under Section 3 of the Small Business Act. This includes any small business concern that is independently owned and operated, and is not dominant in its field of operation. Section 601(4) defines a ''small organization'' as any not-for-profit enterprises that are independently owned and operated, and are not dominant in their field of operation. Section 601(5) defines small governmental jurisdictions as governments of cities, counties, towns, townships, villages, school districts, or special districts with a population of less than 50,000. No small organizations or governmental jurisdictions participate in the WYO Program and therefore will not be affected.

The Small Business Administration (SBA) stipulates in its size standards [6] the largest an insurance firm that is ''for profit'' may be and still be classified as a ''small entity.'' The small business size standards for North American Industry Classification System (NAICS) code 524126 (direct property and casualty insurance carriers) is 1,500 employees. The size standard for the four remaining applicable codes of 524210 (Insurance Agencies and Brokerages), 524113 (Direct Life Insurance Carriers), 524292 (Third Party Administration of Insurance and Pension Funds) and 524128 (Other Direct Insurance) is $7.0 million in revenue as modified by the SBA, effective February 26, 2016.

This final rule directly affects all WYO companies. There are currently 73 companies participating in the WYO Program; these 73 companies are subject to the terms of the Arrangement and the standards and requirements in the Financial Control Plan. FEMA researched each WYO company to determine the NAICS code, number of employees, and revenue for the individual companies. FEMA used the open-access database, *www.manta.com,* as well as *www.cortera.com* to find this information for the size determination. Of the 73 WYO companies, FEMA found a majority of 50 firms were under code 524210 (Insurance Agencies and Brokerages), of which 19 firms or 38 percent were found to be small (with only one lacking full data but presumed to be small). The second largest contingent of 13 firms were under code 524126 (direct property and casualty insurance carriers), of which 9 firms or 69 percent were found to be small (with only one missing data points but presumed to be small). Of the other three aforementioned industry codes, 524113, 524292 and 524128, there was one firm under each and none were small. Finally, six firms were missing industry classifications, and FEMA believes that all but one are likely to be small. In total, we found that 33 of the 73 companies are below these thresholds, and therefore will be considered small entities. Consequently, small entities comprise 45 percent of participating companies.

FEMA believes that the final rule will impose no direct cost on any participating company because it is removing a *copy* of the Arrangement and a *summary* of the Financial Control Plan from the CFR, and is not making substantive changes to the Arrangement or the Financial Control Plan itself.

During the proposed rule public comment period, FEMA did not receive any comments discussing the IRFA. Pursuant to the RFA (5 U.S.C. 605 (b)), the administrator of FEMA hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. Although a substantial number of these small entities will be affected by the final rule, none of these entities will be significantly impacted.

C. Unfunded Mandates Reform Act of 1995

Pursuant to Section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1531), each Federal agency ''shall, unless otherwise prohibited by law, assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector (other than to the extent that such regulations incorporate requirements specifically set forth in law).'' Section 202 of the Act (2 U.S.C. 1532) further requires that ''before promulgating any general notice of proposed rulemaking that is likely to result in the promulgation of any rule that includes any Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year, and before promulgating any final rule for which a general notice of proposed rulemaking was published, the agency shall prepare a written statement'' detailing the effect on State, local, and tribal governments and the private sector. The final rule will not result in such an expenditure, and thus preparation of such a statement is not required.

D. National Environmental Policy Act of 1969 (NEPA)

Under the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4321 *et seq.* an agency must prepare an environmental assessment and environmental impact statement for any rulemaking that significantly affects the quality of the human environment. FEMA has determined that this rulemaking does not significantly affect the quality of the human environment and consequently has not prepared an

[6] U.S. Small Business Administration, Table of Small Business Size Standards, February 26, 2016. *https://www.sba.gov/sites/default/files/files/Size_Standards_Table.pdf.*

environmental assessment or environmental impact statement. Although rulemaking is a major Federal action subject to NEPA, the list of exclusion categories within DHS Instruction 023–01–001–01 includes a categorical exclusion for rules that are of a strictly administrative or procedural nature (A3). This is a rulemaking related to an administrative function. An environmental assessment will not be prepared because a categorical exclusion applies to this rulemaking and no extraordinary circumstances exist.

E. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (PRA), as amended, 44 U.S.C. 3501–3520, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the agency obtains approval from the Office of Management and Budget (OMB) for the collection and the collection displays a valid OMB control number. *See* 44 U.S.C. 3506, 3507. This final rule does not call for a new collection of information under the PRA. The removal of the Arrangement from the regulation will not impact any existing information collections in that it would not substantively change any of the information collection requirements, because the information collection requirements still exist in the regulations. The existing information collections listed include citations to 44 CFR part 62 Appendices A and B. FEMA will update these citations in the next information collection renewal cycle. FEMA will continue to expect WYO companies to comply with each of the information collection requirements associated with the WYO Program.

The collections associated with this regulation are as follows: (1) OMB Control Number 1660–0038, Write Your Own Company Participation Criteria, 44 CFR 62 Appendix A, which establishes the criteria to return to or participate in the WYO Program; (2) OMB control number 1660–0086, the National Flood Insurance Program—Mortgage Portfolio Protection Program (MPPP), 44 CFR part 62.23 (l)(2) and Appendix B, which is a program lenders can use to bring their mortgage loan portfolios into compliance with flood insurance purchase requirements; and (3) OMB control number 1660–0020, WYO Program, 44 CFR 62.23 (f) and Appendix B, the Federal Insurance and Mitigation Administration program that requires each WYO company to submit financial data on a monthly basis into the National Flood Insurance Program's Transaction Record Reporting and Processing Plan (TRRPP) system as referenced in 44 CFR 62.23(h)(4). Part 62 still requires each of these collections. The removal of the Arrangement from the regulation will not impact these information collections because the existing information collections cover requirements in the regulations, not requirements in the Appendices.

F. Privacy Act/E-Government Act

Under the Privacy Act of 1974, 5 U.S.C. 552a, an agency must determine whether implementation of a regulation will result in a system of records. A record is any item, collection, or grouping of information about an individual that is maintained by an agency, including, but not limited to, his/her education, financial transactions, medical history, and criminal or employment history and that contains his/her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph. *See* 5 U.S.C. 552a(a)(4). A system of records is a group of records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. An agency cannot disclose any record which is contained in a system of records except by following specific procedures.

The E-Government Act of 2002, 44 U.S.C. 3501 note, also requires specific procedures when an agency takes action to develop or procure information technology that collects, maintains, or disseminates information that is in an identifiable form. This Act also applies when an agency initiates a new collection of information that will be collected, maintained, or disseminated using information technology if it includes any information in an identifiable form permitting the physical or online contacting of a specific individual. A Privacy Threshold Analysis was completed. This rule does not require a Privacy Impact Analysis or System of Records Notice.

G. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, 65 FR 67249, November 9, 2000, applies to agency regulations that have Tribal implications, that is, regulations that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Under this Executive Order, to the extent practicable and permitted by law, no agency shall promulgate any regulation that has Tribal implications, that imposes substantial direct compliance costs on Indian Tribal governments, and that is not required by statute, unless funds necessary to pay the direct costs incurred by the Indian Tribal government or the Tribe in complying with the regulation are provided by the Federal Government, or the agency consults with Tribal officials.

This rule does not have Tribal implications. Currently, Indian Tribal governments cannot participate in the WYO Program as WYO companies, and thus are not affected by this rule. To participate in the WYO Program, a company must be a licensed property or casualty insurance company and meet the requirements in FEMA regulations at 44 CFR 62.24.

H. Executive Order 13132, Federalism

Executive Order 13132, Federalism, 64 FR 43255, August 10, 1999, sets forth principles and criteria that agencies must adhere to in formulating and implementing policies that have federalism implications, that is, regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Federal agencies must closely examine the statutory authority supporting any action that would limit the policymaking discretion of the States, and to the extent practicable, must consult with State and local officials before implementing any such action.

As noted in the notice of proposed rulemaking, FEMA has determined that this rulemaking does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, and therefore does not have federalism implications as defined by the Executive Order. No commenters disagreed with this determination. This rule does not have federalism implications because participation as a WYO company is voluntary and does not affect State policymaking discretion. Moreover, States cannot participate in the WYO Program as WYO companies, and thus are not affected by this regulatory action. To participate in the WYO Program, a company must be a licensed

property or casualty insurance company and must meet the requirements in FEMA regulations at 44 CFR 62.24.

I. Executive Order 11988, Floodplain Management

Pursuant to Executive Order 11988, each agency is required to provide leadership and take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) Acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. In carrying out these responsibilities, each agency must evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of the Executive Order.

Before promulgating any regulation, an agency must determine whether the regulations will affect a floodplain(s), and if so, the agency must consider alternatives to avoid adverse effects and incompatible development in the floodplain(s). If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in Executive Order 11988 is to promulgate a regulation that affects a floodplain(s), the agency must, prior to promulgating the regulation, design or modify the regulation in order to minimize potential harm to or within the floodplain, consistent with the agency's floodplain management regulations and prepare and circulate a notice containing an explanation of why the action is to be located in the floodplain. The changes in this rule would not have an effect on land use, floodplain management, or wetlands.

J. Executive Order 11990, Protection of Wetlands

Pursuant to Executive Order 11990, each agency must provide leadership and take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for (1) Acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. Each agency, to the extent permitted by law, must avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds (1) that there is no practicable alternative to such construction, and (2) that the action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

In carrying out the activities described in the Executive Order, each agency must consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are: Public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion; maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and other uses of wetlands in the public interest, including recreational, scientific, and cultural uses. The changes in this rule would not have an effect on land use or wetlands.

K. Executive Order 12898, Environmental Justice

Pursuant to Executive Order 12898, —Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994, as amended by Executive Order 12948, 60 FR 6381, February 1, 1995, FEMA incorporates environmental justice into its policies and programs. The Executive Order requires each Federal agency to conduct its programs, policies, and activities that substantially affect human health or the environment in a manner that ensures that those programs, policies, and activities do not have the effect of excluding persons from participation in programs, denying persons the benefits of programs, or subjecting persons to discrimination because of race, color, or national origin.

This rulemaking will not have a disproportionately high or adverse effect on human health or the environment. Therefore, the requirements of Executive Order 12898 do not apply to this rule.

L. Congressional Review of Agency Rulemaking

Under the Congressional Review of Agency Rulemaking Act (CRA), 5 U.S.C. 801–808, before a rule can take effect, the Federal agency promulgating the rule must submit to Congress and to the Government Accountability Office (GAO) a copy of the rule, a concise general statement relating to the rule, including whether it is a major rule, the proposed effective date of the rule, a copy of any cost-benefit analysis, descriptions of the agency's actions under the RFA and the Unfunded Mandates Reform Act, and any other information or statements required by relevant executive orders.

FEMA will send this rule to the Congress and to GAO pursuant to the CRA. The rule is not a major rule within the meaning of the CRA. It will not have an annual effect on the economy of $100,000,000 or more, it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

List of Subjects in 44 CFR Part 62

Claims, Flood insurance, and Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Federal Emergency Management Agency amends 44 CFR Chapter I as follows:

PART 62—SALE OF INSURANCE AND ADJUSTMENT OF CLAIMS

■ 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127 of Mar. 31, 1979, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

■ 2. Amend § 62.23 by:
■ a. Removing the last sentence of paragraph (a) and adding two sentences in its place;
■ b. Revising the second sentence of paragraph (f);
■ c. Revising paragraph (i)(1); and

■ d. Revising the last sentence of paragraph (l)(2).

The revisions read as follows:

§ 62.23 WYO companies authorized.

(a) * * * Arrangements entered into by WYO companies or other insurers under this subpart must be in the form and substance of the standard arrangement, titled ''Financial Assistance/Subsidy Arrangement.'' Each year, at least six months before the effective date of the ''Financial Assistance/Subsidy Arrangement,'' FEMA must publish in the **Federal Register** and make available to the WYO companies the terms for subscription or re-subscription to the ''Financial Assistance/Subsidy Arrangement.''

* * * * *

(f) * * * In furtherance of this end, the Federal Insurance Administrator has established ''A Plan to Maintain Financial Control for Business Written Under the Write Your Own Program.''

* * * * *

(i) * * *

(1) WYO companies will adjust claims in accordance with general company standards, guided by NFIP Claims manuals. The Arrangement provides that claim adjustments shall be binding upon the FIA.

* * * * *

(l) * * *

(2) * * * Participating WYO companies must also maintain evidence of compliance with paragraph (l)(3) of this section for review during the audits and reviews required by the WYO Financial Control Plan.

* * * * *

Appendix A to Part 62 [Removed]

■ 3. Remove Appendix A to Part 62.

Appendix B to Part 62 [Removed]

■ 4. Remove Appendix B to Part 62.

Dated: November 17, 2016.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

50 CFR Part 635

[Docket No. 160620545–6999–02]

RIN 0648–XE696

Atlantic Highly Migratory Species; 2017 Atlantic Shark Commercial Fishing Season

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; fishing season notification.

SUMMARY: This final rule establishes the opening date for all Atlantic shark fisheries, including the fisheries in the Gulf of Mexico and Caribbean. This final rule also establishes the quotas for the 2017 fishing season based on over- and/or underharvests experienced during 2016 and previous fishing seasons. The large coastal shark (LCS) retention limit for directed shark limited access permit holders will start at 45 LCS other than sandbar sharks per trip in the Gulf of Mexico region and at 25 LCS other than sandbar sharks per trip in the Atlantic region. These retention limits for directed shark limited access permit holders may decrease or increase during the year after considering the specified inseason action regulatory criteria to provide, to the extent practicable, equitable fishing opportunities for commercial shark fishermen in all regions and areas. These actions could affect fishing opportunities for commercial shark fishermen in the northwestern Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea.

DATES: This rule is effective on January 1, 2017. The 2017 Atlantic commercial shark fishing season opening dates and quotas are provided in Table 1 under **SUPPLEMENTARY INFORMATION**.

ADDRESSES: Highly Migratory Species Management Division, 1315 East-West Highway, Silver Spring, MD 20910.

SUPPLEMENTARY INFORMATION:

Background

The Atlantic commercial shark fisheries are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP) and its amendments are implemented by regulations at 50 CFR part 635. For the Atlantic commercial shark fisheries, the 2006 Consolidated HMS FMP and its amendments established, among other things, commercial shark retention limits, commercial quotas for species and management groups, accounting measures for under- and overharvests for the shark fisheries, and adaptive management measures such as flexible opening dates for the fishing season and inseason adjustments to shark trip limits, which provide management flexibility in furtherance of equitable fishing opportunities, to the extent practicable, for commercial shark fishermen in all regions and areas.

On August 29, 2016 (81 FR 59167), NMFS published a rule proposing the 2017 opening dates for the Atlantic commercial shark fisheries, commercial shark fishing quotas based on shark landings information reported as of July 15, 2016, and the commercial shark retention limits for each region and sub-region. The August 2016 proposed rule (81 FR 59167; August 29, 2016) for the 2017 season contains details that are not repeated here. The comment period on the proposed rule ended on September 28, 2016.

During the comment period, NMFS received approximately 300 written and oral comments on the proposed rule. Those comments, along with the Agency's responses, are summarized below. As further detailed in the Response to Comments section below, after considering all the comments, NMFS is opening the fishing seasons for all shark management groups except the blacktip, aggregated LCS, and hammerhead shark management groups in the western Gulf of Mexico sub-region on January 1, 2017, as proposed in the August 29, 2016, proposed rule. The blacktip, aggregated LCS, and hammerhead shark management groups in the western Gulf of Mexico sub-region will open on February 1, 2017, which is a change from the proposed rule. For directed shark limited access permit holders, the blacktip, aggregated LCS, and hammerhead management groups in the entire Gulf of Mexico region will start the fishing season with a retention limit of 45 LCS other than sandbar sharks per vessel per trip. The aggregated LCS and hammerhead shark management groups in the Atlantic region will start the fishing season with a retention limit of 25 LCS other than sandbar sharks per vessel per trip for directed shark limited access permit holders, which is a change from the proposed rule. The retention limit for incidental shark limited access permit

holders for all regions has not changed from the proposed rule and remains at 3 LCS other than sandbar sharks per trip and a combined total of 16 small coastal sharks (SCS) and pelagic sharks, combined per trip consistent with § 635.24(a)(3) and (4).

This final rule serves as notification of the 2017 opening dates for the Atlantic commercial shark fisheries and 2017 quotas, based on shark landings data updated as of October 14, 2016, and considering the ''opening commercial fishing season'' criteria at § 635.27(b)(3). These criteria consider factors such as the available annual quotas for the current fishing season, estimated season length and average weekly catch rates from previous years, length of the season and fishermen participation in past years, impacts to accomplishing objectives of the 2006 Consolidated HMS FMP and its amendments, temporal variation in behavior or biology target species (*e.g.,* seasonal distribution or abundance), impact of catch rates in one region on another, and effects of delayed season openings. This action does not establish or change the annual base commercial quotas established under the 2006 Consolidated HMS FMP and its amendments for any shark management group. The base quotas were established under previous actions, and any changes to those base quotas would be performed through a separate action. Rather, this action adjusts the annual commercial quotas for 2017 based on over- and/or underharvests that occurred in 2016 and previous fishing seasons, consistent with existing regulations and establishes the opening dates for the fisheries. Only the adjusted blacktip quota in the Gulf of Mexico region has changed since the proposed rule, based on updated landings information as of October 14, 2016; all other quotas remain the same as proposed.

Response to Comments

NMFS received approximately 300 written and oral comments on the proposed rule from fishermen, dealers, and other interested parties. All written comments can be found at *http://www.regulations.gov/* by searching for RIN 0648–XE696. NMFS received approximately 10 oral comments through phone conversations or at the HMS Advisory Panel meeting on September 8, 2016. All of the oral comments are represented with the written comments below.

A. LCS Management Group Comments

Comment 1: NMFS received comments regarding the proposed opening dates for the western Gulf of Mexico LCS fisheries on January 1. Some commenters supported the proposed January 1 opening date for both Gulf of Mexico sub-regions, while other commenters supported a delayed western Gulf of Mexico opening date of February 1 to coincide with the religious holiday of Lent.

Response: After considering public comment, NMFS has determined that changing the opening date to February 1 for the blacktip shark, aggregated LCS, and hammerhead shark management groups in the western Gulf of Mexico region, in combination with the change in retention limit (see discussion in Comment 2), will promote equitable fishing opportunities throughout this region. In reaching this determination, NMFS considered, in particular, the regulatory criterion regarding the length of the season in previous years for the different species and/or management groups and whether fishermen had been able to participate in the fishery in those years (§ 635.27(b)(3)(iii)). In 2016, NMFS opened the season on January 1 and closed it on March 12, 2016 (81 FR 12602; March 10, 2016). The State of Louisiana annually plans a state-water closure from April 1 through June 30. However, once NMFS announced that it was closing the Federal fishery, the State of Louisiana closed its waters as well, 2 weeks before its initially planned closure. Shark fishermen and dealers in the western Gulf of Mexico who were not expecting the closure did not have as much of an opportunity to fish as those few fishermen who fished earlier. Based on 2016 landings data, the majority of the shark landings from the western Gulf of Mexico region did not begin to occur until February, which is when other non-shark fisheries close. If NMFS were to open the fishery on January 1, 2017, it is likely that once again the fishery would need to close earlier than April 1 and a number of fishermen who would otherwise participate in the shark fishery based on traditional expectations would not have the opportunity. Furthermore, based on the review of the landings data, delaying the opening until February 1 will provide more equitable fishing opportunities. Thus, opening the season in February, in combination with the higher retention limit (see change discussion in Comment 2), should give all fishermen in the sub-region an equitable opportunity to harvest the quota before the state-water closure.

Comment 2: NMFS received comments regarding the proposed commercial retention limit for the blacktip, aggregated LCS, and hammerhead management groups in the western Gulf of Mexico sub-region. Specifically, some commenters from the western Gulf of Mexico sub-region preferred a retention limit of 45 LCS other than sandbar sharks per vessel per trip instead of the proposed 30 LCS other than sandbar sharks per vessel per trip.

Response: NMFS has determined that the default retention limit of 45 LCS other than sandbar sharks per vessel per trip at the start of the season will ensure equitable fishing opportunities in the western Gulf of Mexico sub-region. In the proposed rule, NMFS proposed a lower trip limit (30 LCS other than sandbar sharks per vessel per trip) in order to slow the harvest level due to the potential for a reduced hammerhead shark quota based on the 2016 sub-regional overharvest and given that the Aggregated LCS and hammerhead shark quotas are linked. The lower proposed trip limit was also intended to ensure the management groups remain open until at least April 2017, which is when the State of Louisiana closes state waters to shark fishing and when that State has asked that we close Federal shark fisheries to match state regulations if quotas are limited (see the criteria listed at § 635.27(b)(3)(vii) and 635.24(a)(8)(iii)). With the change in the western Gulf of Mexico LCS fisheries opening date to February 1 (see Comment 1), and because there are no sub-regional blacktip shark, aggregated LCS, and hammerhead shark management group quota adjustments due to overharvest, NMFS no longer believes a lower retention limit is needed to slow the harvest level to ensure the management groups will remain open until at least April 2017. Rather, NMFS will start the commercial retention limit at 45 LCS other than sandbar sharks per vessel per trip as of February 1, 2017, which is the retention limit preferred in public comments. However, NMFS may utilize the inseason retention limit adjustment during the fishing season if needed to ensure the quotas are not harvested too quickly and the management groups remain open at least until April 2017.

Comment 3: NMFS received several comments regarding the proposed opening date and retention limits for the aggregated LCS and hammerhead management groups in the Atlantic region. Regarding the opening dates, some commenters from the southern and northern part of the Atlantic region supported the proposed opening date of January 1 for the aggregated LCS and hammerhead management groups and retention limits. Some of these commenters requested that NMFS modify the retention limits on an

inseason basis to ensure the majority of the quota remains available later in the year since there are no other fisheries open in Florida at the end of the year. Other commenters suggested that NMFS delay the opening of the Atlantic region fishery until the western Gulf of Mexico LCS fisheries closes to ensure better market prices for the shark products. Additionally, comments from some of the fishermen in the southern part of the region preferred lowering the proposed retention limit of 36 to a lower retention limit of three to five LCS other than sandbar sharks per vessel per trip on January 1 with the potential for later inseason retention limit adjustments to ensure the opportunity to fish for sharks in October through December because they participate in other, non-shark fisheries at the beginning of the year and in the shark fisheries later in the year. NMFS also received comments that the LCS retention limit in the Atlantic region should stay at 36 LCS other than sandbar sharks per vessel per trip all season long and that NMFS should not later consider increasing the retention limit to 45 LCS other than sandbar sharks per vessel per trip since the aggregated LCS and hammerhead shark management groups quotas have not increased.

Response: After considering the ''opening commercial fishing season'' criteria in light of the comments, which reflected general support of the proposed opening date, NMFS has decided to open the fisheries in the Atlantic region on January 1, 2017, as proposed, but with a lower retention limit than proposed. Specifically, on January 1, 2017, the LCS fisheries in the Atlantic region will open with a retention limit of 25 LCS other than sandbar sharks per vessel per trip for directed shark limited access permit holders. NMFS has determined that a lower retention limit at the start of the season will allow NMFS to more easily and closely monitor the quota and catch rates in the beginning of the year to help ensure equitable fishing opportunities later in the year, while still allowing the majority of quota to be harvested later in the year (see the criteria listed at § 635.24(a)(8)(iii)). NMFS chose 25 LCS other than sandbar sharks per vessel per trip because that is the commercial retention limit for the fishery from October 19, 2016, through the rest of the 2016 fishing season (81 FR 72007; October 19, 2016), and would not cause additional changes in fishing practices, thus minimizing any economic or compliance issues within the fishery. Also, this change seemed a reasonable amount between that of an incidental level (3 LCS other than sandbar sharks per vessel per trip) and maximum retention levels (between 36 and 55 LCS other than sandbar sharks per vessel per trip). The January 1 opening date, in combination with this reduced retention limit, should allow fishermen in the southern and northern portions of the Atlantic region the opportunity to fish at the beginning of the year, while providing all fishermen in the Atlantic region fishing opportunities later in the year, when the majority of fishing occurs, as the majority of the quota should still be available.

The proposed rule stated that, if it appears that the quota is being harvested too quickly to allow fishermen throughout the entire region an opportunity to fish, NMFS will consider reducing the commercial retention limit after a portion of the quota is harvested (*e.g.,* 20 percent) and later consider raising the commercial retention limit to 45 LCS other than sandbar sharks per vessel per trip around July 15 to allow greater fishing opportunities later in the year. After considering public comment, NMFS anticipates that it would consider increasing the commercial retention limit around July 15, 2017, as this was the date used for prior season opening dates and was the date NMFS increased the retention limit in 2016 (81 FR 44798; July 11, 2016).

Regarding the request to delay the fishery in the Atlantic region until the shark fisheries in the Gulf of Mexico close, NMFS decided to not delay the LCS fisheries opening date in the Atlantic region until the western Gulf of Mexico fisheries are closed since this would not promote equitable fishing opportunities throughout the Atlantic region. In past fishing seasons, the LCS fisheries in the Gulf of Mexico have closed as early as March 17 or as late as July 17, and never on the same date year to year. Without knowing when the western or eastern Gulf of Mexico LCS fisheries will close, NMFS could not evaluate the ''opening commercial fishing season'' criteria (§ 635.27(b)(3)) when choosing an opening date for the Atlantic region based on the commenters' request. Thus, NMFS is not making a change in response to this comment and will open the Atlantic LCS fisheries on January 1. NMFS will consider adjusting the commercial retention limit during the season as appropriate to ensure equitable fishing opportunities.

Regarding the comments that having the LCS fisheries in the Atlantic and western Gulf of Mexico regions open at the same time will impact the market prices, while NMFS considers economic impacts as required, market prices are not one of the criteria NMFS evaluates when choosing an opening date. However, in the past, the LCS fisheries in the Atlantic and Gulf of Mexico regions have been open at the same time, and during those times, NMFS has noticed impacts on the ex-vessel prices in either region. For example, in 2016, when both regional LCS fisheries were open in January, the ex-vessel price for Atlantic aggregated LCS was at its lowest when compared to the rest of the year, but was higher than the western Gulf of Mexico aggregated LCS ex-vessel prices.

Comment 4: NMFS received comments regarding the overharvest of the western Gulf of Mexico sub-regional hammerhead shark quota. Some commenters were concerned that NMFS did not propose to adjust the western Gulf of Mexico sub-regional hammerhead shark quota even though the quota was overharvested by 41 percent in 2016.

Response: Based on landings through October 14, 2016, NMFS is not adjusting the western Gulf of Mexico sub-regional hammerhead shark quota in this final rule. As stated in the proposed rule, even though the reported landings in the western Gulf of Mexico exceeded the 2016 sub-regional quota, the total regional Gulf of Mexico reported landings have not exceeded the 2016 regional quota as of October 14, 2016. The regulations implemented through Amendment 6 to the 2006 Consolidated HMS FMP (80 FR 50073; August 18, 2015), provide that sub-regional quota overages (*e.g.,* western Gulf of Mexico sub-region) are only deducted from the next year's quota if the total regional quota (*e.g.,* Gulf of Mexico region) is exceeded. Thus, at this time, because the overall regional quota has not been overharvested, NMFS is not adjusting the western Gulf of Mexico sub-region quota to account for the overharvest. However, because the eastern Gulf of Mexico sub-region remains open at the time of this final rulemaking and quota is still available in that sub-region, NMFS expects that landings will continue to occur. If landings in the eastern Gulf of Mexico sub-region exceed 8.5 mt dw (18,594 lb dw) (*i.e.,* the remainder of the total regional Gulf of Mexico quota), then NMFS will take additional action to reduce the western Gulf of Mexico sub-region quota to account for overharvests in 2018.

B. General Comments

Comment 5: NMFS received some comments in support of the proposed rule regulating commercial shark fishing, while other commenters

opposed the regulations that allow for increased adjusted quotas as a result of underharvest. Specifically, those in opposition were concerned with the accuracy and the potential for under reporting of shark landings.

Response: As discussed in the proposed rule, shark stocks or management groups that are not overfished and have no overfishing occurring may have any underharvest carried over in the following year, up to 50 percent of the base quota (81 FR 59167; August 29, 2016). Since the Gulf of Mexico blacktip shark management group and smoothhound shark management groups in the Gulf of Mexico and Atlantic regions have been determined not to be overfished and to have no overfishing occurring, available underharvest from the 2016 fishing season for these management groups may be applied to the respective 2017 quotas to the extent allowable, and NMFS is doing so in this final rule.

All commercial shark landings and quotas are monitored with the HMS electronic dealer reporting system, which has been in use since January 1, 2013. This improvement in commercial quota monitoring technology and the weekly, as opposed to biweekly, reporting on paper provides more information on each dealer transaction, including a requirement of reporting all shark landings to the species level, and ensures that quotas are not exceeded. Overall, this improvement helps with monitoring of commercial landings of all shark species and with closing management groups in a more efficient and timely manner.

Comment 6: NMFS received approximately 280 comments in support of more conservative shark management measures by, for example, implementing lower commercial shark fishing quotas or prohibiting all commercial shark fishing to stop shark finning.

Response: These comments are outside the scope of this rulemaking because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. The quotas and general management measures were established in previous rulemakings, which were the final rules to implement Amendment 2 to the 2006 Consolidated HMS FMP (73 FR 35778, June 24, 2008; corrected on 73 FR 40658; July 15, 2008), Amendment 5a to the 2006 Consolidated HMS FMP (78 FR 40318; July 3, 2013), Amendment 6 to the 2006 Consolidated HMS FMP (80 FR 50073; August 18, 2015), and Amendment 9 to the 2006 Consolidated HMS FMP (80 FR 73128; November 24, 2015). Management of the Atlantic shark fisheries is based on the best available science to achieve optimum yield while also rebuilding overfished shark stocks and preventing overfishing. NMFS currently is considering conservation and management to rebuild the dusky shark stock and prevent overfishing in Amendment 5b to the 2006 Consolidated HMS FMP (81 FR 71672; October 18, 2016). The comment period for that rulemaking ends on December 22, 2016.

Comment 7: NMFS received a comment suggesting that we change the start of the fishing year for all shark species from January to September.

Response: This comment is outside the scope of this rulemaking because the fishing year is defined in the regulations as January 1 to December 31. The rule did not reanalyze the overall start date of the shark fishing year, which was established in the 2006 Consolidated HMS FMP.

Comment 8: NMFS received a comment suggesting that we not implement these regulations until such time that adequate shark research can be accomplished.

Response: Management of the Atlantic shark fisheries is based on the best available science to achieve optimum yield while preventing overfishing and to rebuild overfished shark stocks. Domestic shark stock assessments are generally conducted through the Southeast Data, Assessment, and Review (SEDAR) process, in which NMFS participates. This process is also used by the South Atlantic, Gulf of Mexico, and Caribbean Fishery Management Councils and is designed to provide transparency throughout the stock assessment process. Generally, SEDAR stock assessments have three stages (data availability, assessment models, and peer review). Meetings in these stages may be face-to-face or by webinar or conference call. All meetings are open to the public. All reports from all stages of the process are available online at *http://www.sefsc.noaa.gov/sedar/*. The SEDAR process can take several months to over a year depending on whether the species has been assessed before, if a species needs a full review of a previous assessment, or if the assessment is more of an update to previous assessments. Because the process takes so long and because of the large number of shark stocks that need to be assessed, there are times where we have reviewed stock assessments that were completed and peer reviewed outside of the SEDAR process and have determined the assessment to be appropriate for management. We have done that for both porbeagle and scalloped hammerhead sharks. Additionally, there are some shark stocks that are assessed internationally via the process established by ICCAT. In all cases, we ensure the data and models used are appropriate, all sources of mortality are considered, and that the end result constitutes the best available science, consistent with National Standard 2 and other requirements.

Comment 9: NMFS received comments asserting that sharks are worth more to eco-tourism than commercial fishermen.

Response: In adjusting quotas for the 2017 shark seasons based on over- and underharvests from the previous years and setting opening dates and commercial retention limits for the 2017 shark seasons, NMFS considers specific regulatory criteria, including the available annual quotas for the current fishing season, estimated season length and average weekly catch rates from previous years, length of the season and fishermen participation in past years, impacts to accomplishing objectives of the 2006 Consolidated HMS FMP and its amendments, temporal variation in behavior or biology target species (*e.g.,* seasonal distribution or abundance), impact of catch rates in one region on another, and effects of delayed season openings. NMFS does not consider the economic impacts of sharks to eco-tourism compared to commercial shark fishing. Such impacts are appropriately considered when establishing the base quotas.

Comment 10: NMFS received a comment expressing concern about the high mercury levels in shark meat. Specifically, the commenter is concerned that NMFS still allows fishing for sharks even though the health impacts are well known about high levels of mercury in shark meat.

Response: This comment is outside the scope of this rulemaking because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons.

Comment 11: NMFS received comments regarding the stock status of hammerhead shark and other shark species. Some commenters requested more protective management for hammerhead sharks and other shark species due to their threatened or endangered stock status listing by the International Union for the Conservation of Nature (IUCN).

Response: This comment is outside the scope of this rulemaking, because

the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. NMFS published Amendment 5a on July 3, 2013 (78 FR 40318) which implemented quotas for the hammerhead shark complex, including scalloped hammerhead sharks, linked the hammerhead shark quota to the aggregated LCS quota, and established a hammerhead shark recreational minimum size limit to reduce fishing mortality and rebuild the scalloped hammerhead stock. That rulemaking addressed this issue and it is not further addressed in this rulemaking.

Comment 12: NMFS received a comment requesting that NMFS implement individual fishing quotas for each of the three species of hammerhead sharks within the hammerhead shark management group.

Response: This comment is outside the scope of this rulemaking, because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. The current hammerhead shark quota was established in Amendment 5a to the 2006 Consolidated HMS FMP based on the best available science (78 FR 40318; July 3, 2013). In that rulemaking, NMFS decided to include all hammerhead shark landings in one quota because the three hammerhead sharks are difficult to differentiate, with the most evident differences being small differences in the shape of the front of the head. Once the head has been removed and the carcass has been dressed, species identification becomes more difficult. NMFS intends to conduct stock assessments on scalloped, smooth, and great hammerhead sharks in the future, as soon as practicable given timing, resource limits, and data availability and NMFS could consider individual fishing quotas for each of the three species of hammerhead sharks in the future if warranted and supportable.

Comment 13: NMFS received comments regarding state-water landings and discards of sharks with no observer coverage and fewer requirements and training than Federal fishermen. The commenters supported the need to have consistency between state, Council, and Federal regulations.

Response: This comment is outside the scope of this rulemaking, because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. Many states allow landings of sharks by state-permitted fishermen. However, these fishermen must comply with the state fishing regulations, which in some cases are the same as Federal regulations or, in other cases, are more restrictive. NMFS will continue to work closely with the states to ensure consistent regulations for shark fishing, to the extent practicable.

Comment 14: NMFS received comments that all quota linkages should be removed since it has contributed to underfishing for the past several years.

Response: This comment is outside the scope of this rulemaking, because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. The current LCS and SCS quota linkages were implemented in the final rules for Amendment 5a and Amendment 6 to the 2006 Consolidated HMS FMP and NMFS is citing the rationale provided in the previous rulemakings. The issue of removing quota linkages is not being re-considered or re-addressed in this rulemaking now.

As explained in those rulemakings, quota linkages were created for shark species that are in separate management groups, but that have the potential to be caught together on the same shark fishing trip (*e.g.* aggregated LCS and hammerhead sharks). If the quota for one management group has been harvested and the management group is closed, that species could still be caught as bycatch by fishermen targeting other shark species, possibly resulting in excess mortality and negating some of the conservation benefit of management group closures. In addition, shark quota linkages were put into place as part of the rebuilding plans for shark species that are overfished in order to reduce excess mortality of the overfished species during commercial fishing for other shark species. Thus, NMFS closes the linked shark management groups together.

Comment 15: NMFS received comments requesting that we consider increasing the Federal fishery closure trigger for the shark management groups from 80 percent to greater than 90 percent to prevent quota underharvests and to promote harvesting quotas fully for the greater profitability for fishermen and for increased access to shark products for consumers.

Response: This comment is outside the scope of this rulemaking, because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. The 80-percent Federal fishery closure trigger for the shark management groups was implemented in the final rule for Amendment 2 to the 2006 Consolidated HMS FMP and NMFS is citing the rationale provided in the previous rulemakings. The issue of changing this closure trigger is not being re-considered or re-addressed in this rulemaking now.

As explained in Amendment 2, NMFS' goal is to allow shark fishermen to harvest the full quota without exceeding it in order to maximize economic benefits to stakeholders while achieving conservation goals, including preventing overfishing and rebuilding overfished stocks. Based on past experiences with monitoring quotas for HMS species, the 80-percent threshold works well, allowing for all or almost all of the quota to be harvested without exceeding the quota. As such, NMFS expects that, in general, the quotas would be harvested between the time that the 80-percent threshold is reached and the time that the season actually closes. In addition, NMFS must also account for late reporting by shark dealers even with the improved electronic dealer system. Closing shark fisheries when 80 percent of quotas have been harvested provides a buffer to include landings received after the reporting deadline in an attempt to avoid overharvests.

Comment 16: NMFS received a comment to present all shark landings by species in addition to management group, particularly for hammerhead sharks given the listing of hammerhead sharks on Appendix II of the Convention on International Trade in Endangered Species (CITES).

Response: This comment is outside the scope of this rulemaking, because the purpose of this rulemaking is to adjust quotas for the 2017 shark seasons based on over- and underharvests from the previous years and set opening dates and commercial retention limits for the 2017 shark seasons. NMFS presents the shark landings by species and region in the annual Stock Assessment and Fisheries Evaluation (SAFE) Report that is released in December of each year, consistent with confidentiality requirements.

CITES is an international treaty designed to control and regulate international trade of certain animal and plant species that are now or potentially may be threatened with extinction and are affected by trade. Some shark

species (*e.g.,* oceanic whitetip sharks, great, scalloped, and smooth hammerhead sharks, and porbeagle sharks) are now listed on Appendix II, which imposes strict trade monitoring and could impact the ability of dealers to sell these species to international costumers. Additionally, starting in October 2017, silky and thresher sharks will be listed on Appendix II. Due to this listing, any U.S. fishermen or dealer who wishes to export these shark products will have to obtain a CITES permit in order to export or re-export these products.

Changes From the Proposed Rule

NMFS made four changes to the proposed rule, as described below.

1. NMFS changed the final blacktip shark quota in the western Gulf of Mexico sub-region from the 331.8 mt dw (730,803 lb dw) in the proposed rule to 331.6 mt dw (730,425 lb dw), a difference of 378 lb dw, based on updated landings through October 14, 2016. The 2017 shark season proposed rule (81 FR 59167; August 29, 2016) was based on dealer reports available through July 15, 2016. NMFS explained in the proposed rule that it would adjust the proposed quotas based on dealer reports as of mid-October or mid-November 2015. Based on updated landings data through October 14, 2016, the overall available adjustment amount for the blacktip shark management group in the western Gulf of Mexico sub-region was 100.1 mt dw (220,164 lb dw), resulting in a small reduction in the amount of quota that could be carried over to 2017. Landings information beyond October 14, 2016, was not available while NMFS was writing this rule. Any landings between October 14 and December 31, 2016, will be accounted for in the 2018 shark fisheries quotas, as appropriate.

2. NMFS changed the retention limit for directed shark limited access permit holders at the start of the commercial shark fishing season for the aggregated LCS and hammerhead shark management groups in the Atlantic region from 36 LCS other than sandbar sharks per vessel per trip to 25 LCS other than sandbar sharks per vessel per trip. As explained above, NMFS changed the retention limit after considering the ''opening commercial fishing season'' criteria (§ 635.27(b)(3)), public comment, and the 2016 landings data in order to promote equitable fishing opportunities throughout the Atlantic region.

3. NMFS changed the retention limit for directed shark limited access permit holders for the aggregated LCS, blacktip shark, and hammerhead shark management groups in the western Gulf of Mexico sub-region from 30 LCS other than sandbar sharks per vessel per trip to 45 LCS other than sandbar sharks per vessel per trip. As explained above, NMFS changed the retention limit after considering the ''opening commercial fishing season'' criteria (§ 635.27(b)(3)), public comment, and the 2016 landings data in order to promote equitable fishing opportunities throughout the Gulf of Mexico region.

4. NMFS changed the fishing season opening date for the western Gulf of Mexico from January 1, to February 1, 2017. NMFS changed the opening date based upon public comments that indicated a preference for a delayed opening when market conditions would be more optimal in that sub-region.

2017 Annual Quotas

This final rule adjusts the 2017 commercial quotas due to over- and/or underharvests in 2016 and previous fishing seasons, based on landings data through October 14, 2016. Based on overharvest in 2012 and 2015, NMFS had previously reduced the Atlantic blacknose shark base annual quota by 1.5 mt dw (3,268 lb dw) in 2016, 2017, and 2018. However, in 2016, the Atlantic blacknose shark quota was underharvested by 3.5 mt dw (7,725 lb dw). In the proposed rule for this action, NMFS noted that preliminary reported landings of blacknose sharks were at 78 percent (12.2 mt dw) of their 2016 quota levels (15.7 mt dw) in the Atlantic region. Given this large underharvest, NMFS notified the public that rather than spread out the previous years' overharvests over several years, it proposed to use the 2016 underharvest to cover the remaining 2012 and 2015 overharvest. Since NMFS received no comments on this proposal, 3.0 mt dw of the 2016 quota will be used to account for the past years' overharvests. An underharvest of 0.5 mt dw occurs in 2016 after this accounting but, pursuant to § 635.27(b)(2), NMFS cannot carry forward underharvest because blacknose sharks have been declared to be overfished with overfishing occurring in the Atlantic region. Therefore, the 2017 Atlantic blacknose shark quota is equal to the annual base quota without adjustment.

The 2017 annual quotas by species and management group are summarized in Table 1. Any dealer reports that are received by NMFS after October 14, 2016, will be used to adjust the 2018 quotas, if necessary. A description of the quota calculations is provided in the proposed rule and is not repeated here. Any changes are described in the ''Changes from the Proposed Rule'' section.

TABLE 1—ANNUAL QUOTAS FOR THE ATLANTIC SHARK FISHERIES

[All quotas and landings are dressed weight (dw), in metric tons (mt), unless specified otherwise. 1 mt dw = 2,204.6 lb dw]

Region or sub-region	Management group	2016 annual quota (A)	Preliminary 2016 landings [1] (B)	Adjustments [2] (C)	2017 Base annual quota (D)	2017 Final annual quota (D+C)
Eastern Gulf of Mexico.	Blacktip Sharks ...	28.9 mt dw (63,189 lb dw).	18.7 mt dw (41,116 lb dw).	10.9 mt dw (23,920 lb dw) [3].	25.1 mt dw (55,439 lb dw).	36.0 mt dw (79,359 lb dw)

	Pelagic Sharks Other Than Porbeagle or Blue.	488.0 mt dw (1,075,856 lb dw).	77.4 mt dw (170,675 lb dw).	.....	488.0 mt dw (1,075,856 lb dw).	488.0 mt dw (1,075,856 lb dw)

[1] Landings are from January 1, 2016, through October 14, 2016, and are subject to change.

[2] Underharvest adjustments can only be applied to stocks or management groups that are not overfished and have no overfishing occurring. Also, the underharvest adjustments cannot exceed 50 percent of the base quota.

[3] This adjustment accounts for underharvest in 2016. This final rule would increase the overall Gulf of Mexico blacktip shark quota by 111.0 mt dw (244,084 lb dw). Since any underharvest would be divided based on the sub-regional quota percentage split, 10.9 mt dw (9.8 percent of the overall regional quota adjustment) is being added to the eastern Gulf of Mexico blacktip shark base quota, and 100.1 mt dw (90.2 percent of the overall regional quota adjustment) is being added to the western Gulf of Mexico blacktip shark base quota.

[4] Based on overharvest in 2012 and 2015, NMFS had previously reduced the Atlantic blacknose shark base annual quota by 1.5 mt dw (3,268 lb dw) in 2016, 2017, and 2018. However, in 2016, the Atlantic blacknose shark quota was underharvested by 3.5 mt dw (7,725 lb dw). NMFS will use the 2016 underharvest to cover the remaining overharvest amount of 3.0 mt dw (6,536 lb dw). Thus the 2017 Atlantic blacknose shark quota will be equal to base annual quota.

Fishing Season Notification for the 2017 Atlantic Commercial Shark Fishing Seasons

Based on the seven ''opening commercial fishing season'' criteria listed in § 635.27(b)(3), NMFS is opening the 2016 Atlantic commercial shark fishing seasons on January 1, 2017, except for the aggregated LCS, blacktip shark, and hammerhead shark management groups in the western Gulf of Mexico sub-region which will open on February 1, 2017 (Table 2).

Regarding the LCS retention limit, as shown in Table 2, for directed shark limited access permit holders, the Gulf of Mexico blacktip shark, aggregated LCS, and hammerhead shark management groups will start the commercial fishing season at 45 LCS other than sandbar sharks per vessel per trip, and the Atlantic aggregated LCS and hammerhead shark management groups will start the commercial fishing season at 25 LCS other than sandbar sharks per vessel per trip. In the Atlantic region, as described above, NMFS will closely monitor the quota at the beginning of the year. If it appears that the quota is being harvested too quickly to allow fishermen throughout the entire region an opportunity to fish (*e.g.,* if approximately 20 percent of the quota is caught at the beginning of the year), NMFS will consider reducing the commercial retention limit, then consider raising it later in the season. Based on prior years' fishing activity, to allow greater fishing opportunities later in the year, NMFS anticipates considering raising the commercial retention limit to the default limit of 36 LCS other than sandbar sharks per vessel per trip around July 15, 2017. Any retention limit reductions and increases will be based on consideration of the trip limit adjustment criteria at 50 CFR 635.24(a)(8).

All of the shark management groups will remain open until December 31, 2017, or until NMFS determines that the fishing season landings for any shark management group has reached, or is projected to reach, 80 percent of the available quota; however, consistent with § 635.28(b)(5), NMFS may close the Gulf of Mexico blacktip shark management group before landings reach, or are expected to reach, 80 percent of the quota. Additionally,

NMFS has previously established non-linked and linked quotas; linked quotas are explicitly designed to concurrently close multiple shark management groups that are caught together to prevent incidental catch mortality from exceeding the total allowable catch. The linked and non-linked quotas are shown in Table 2. NMFS will file for publication with the Office of the Federal Register a notice of closure for that shark species, shark management group including any linked quotas, and/or region that will be effective no fewer than 5 days from date of filing. From the effective date and time of the closure until NMFS announces, via the publication of a notice in the **Federal Register**, that additional quota is available and the season is reopened, the fisheries for the shark species or management group are closed, even across fishing years.

TABLE 2—QUOTA LINKAGES, SEASON OPENING DATES, AND COMMERCIAL RETENTION LIMIT BY REGIONAL OR SUB-REGIONAL SHARK MANAGEMENT GROUP

Region or sub-region	Management group	Quota linkages	Season opening dates	Commercial retention limits for directed shark limited access permit holders (inseason adjustments are available)
Eastern Gulf of Mexico.	Blacktip Sharks	Not Linked	January 1, 2017	45 LCS other than sandbar sharks per vessel per trip
	Aggregated Large Coastal Sharks.	Linked.		
	Hammerhead Sharks.			
Western Gulf of Mexico.	Blacktip Sharks	Not Linked	February 1, 2017	45 LCS other than sandbar sharks per vessel per trip
	Aggregated Large Coastal Sharks.	Linked.		
	Hammerhead Sharks.			
Gulf of Mexico	Non-Blacknose Small Coastal Sharks.	Not Linked	January 1, 2017	N/A
Atlantic	Aggregated Large Coastal Sharks.	Linked	January 1, 2017	25 LCS other than sandbar sharks per vessel per trip. [If quota is landed quickly (*e.g.,* if approximately 20 percent of quota is caught at the beginning of the year), NMFS anticipates considering an inseason reduction (*e.g.,* to 3 or fewer LCS other than sandbar sharks per vessel per trip), and later considering an inseason increase to 36 LCS other than sandbar sharks per vessel per trip around July 15, 2017]
	Hammerhead Sharks.			
	Non-Blacknose Small Coastal Sharks.	Linked (South of 34 °N. lat. only).	January 1, 2017	N/A
	Blacknose Sharks (South of 34 °N. lat. only).			
No regional quotas	Non-Sandbar LCS Research.	Linked	January 1, 2017	N/A
	Sandbar Shark Research.			
	Blue Sharks	Not Linked	January 1, 2017	N/A
	Porbeagle Sharks.			
	Pelagic Sharks Other Than Porbeagle or Blue.			

Classification

The NMFS Assistant Administrator has determined that the final rule is consistent with the 2006 Consolidated HMS FMP and its amendments, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule is exempt from review under Executive Order 12866.

In compliance with section 604 of the Regulatory Flexibility Act (RFA), NMFS prepared a Final Regulatory Flexibility Analysis (FRFA) for this final rule, which analyzed the adjustments to the Gulf of Mexico blacktip shark, Gulf of Mexico smoothhound shark, and Atlantic smoothhound shark management group quotas based on underharvests from the previous fishing season(s). The FRFA analyzes the anticipated economic impacts of the final actions and any significant economic impacts on small entities. The FRFA is below.

Section 604(a)(1) of the RFA requires an explanation of the purpose of the rulemaking. The purpose of this final rulemaking is, consistent with the Magnuson-Stevens Act and the 2006 Consolidated HMS FMP and its amendments, to establish the 2017 Atlantic commercial shark fishing quotas, retention limits, and fishing seasons. Without this rule, the Atlantic commercial shark fisheries would close on December 31, 2016, and would not reopen until another action was taken. This final rule will be implemented according to the regulations implementing the 2006 Consolidated HMS FMP and its amendments. Thus, NMFS expects few, if any, economic impacts to fishermen other than those already analyzed in the 2006 Consolidated HMS FMP and its amendments. While there may be some direct negative economic impacts associated with the opening dates for fishermen in certain areas, there could also be positive effects for other fishermen in the region. The opening

dates were chosen to allow for an equitable distribution of the available quotas among all fishermen across regions and states, to the extent practicable.

Section 604(a)(2) of the RFA requires NMFS to summarize significant issues raised by the public in response to the Initial Regulatory Flexibility Analysis (IRFA), provide a summary of NMFS' assessment of such issues, and provide a statement of any changes made as a result of the comments. The IRFA was done as part of the proposed rule for the 2017 Atlantic Commercial Shark Season Specifications. NMFS did not receive any comments specific to the IRFA. However, NMFS received comments related to the overall economic impacts of the proposed rule, and those comments and NMFS' assessment of and response to them are summarized above (see Comments 3 and 9 above). As described in the responses to those comments relating to the season opening dates, consistent with § 635.27(b)(3), the opening date for the all of the commercial shark fisheries will be implemented as proposed (January 1, 2017), except for the western Gulf of Mexico sub-region, which will open on February 1, 2017.

Section 604(a)(4) of the RFA requires NMFS to provide an estimate of the number of small entities to which the rule would apply. The Small Business Administration (SBA) has established size criteria for all major industry sectors in the United States, including fish harvesters. Provision is made under SBA's regulations for an agency to develop its own industry-specific size standards after consultation with Advocacy and an opportunity for public comment (see 13 CFR 121.903(c)). Under this provision, NMFS may establish size standards that differ from those established by the SBA Office of Size Standards, but only for use by NMFS and only for the purpose of conducting an analysis of economic effects in fulfillment of the agency's obligations under the RFA. To utilize this provision, NMFS must publish such size standards in the **Federal Register** (FR), which NMFS did on December 29, 2015 (80 FR 81194, December 29, 2015). In this final rule effective on July 1, 2016, NMFS established a small business size standard of $11 million in annual gross receipts for all businesses in the commercial fishing industry (NAICS 11411) for RFA compliance purposes (80 FR 81194, December 29, 2015). NMFS considers all HMS permit holders to be small entities because they had average annual receipts of less than $11 million for commercial fishing.

As of October 2016, the proposed rule would apply to the approximately 223 directed commercial shark permit holders, 271 incidental commercial shark permit holders, 103 smoothhound shark permit holders, and 111 commercial shark dealers. Not all permit holders are active in the fishery in any given year. Active directed commercial shark permit holders are defined as those with valid permits that landed one shark based on HMS electronic dealer reports. Of the 494 directed and incidental commercial shark permit holders, only 40 permit holders landed sharks in the Gulf of Mexico region and only 99 landed sharks in the Atlantic region. Of the 103 smoothhound shark permit holders, only 59 permit holders landed smoothhound sharks in the Atlantic region and none landed smoothhound sharks in the Gulf of Mexico region. NMFS has determined that the proposed rule would not likely affect any small governmental jurisdictions.

Section 604(a)(5) of the RFA requires NMFS to describe the projected reporting, recordkeeping, and other compliance requirements of the final rule, including an estimate of the classes of small entities which would be subject to the requirements of the report or record. None of the actions in this final rule would result in additional reporting, recordkeeping, or compliance requirements beyond those already analyzed in the 2006 Consolidated HMS FMP and its amendments.

Section 604(a)(6) of the RFA requires NMFS to describe the steps taken to minimize the economic impact on small entities, consistent with the stated objectives of applicable statutes. Additionally, the RFA (5 U.S.C. 603(c)(1)–(4)) lists four general categories of ''significant'' alternatives that would assist an agency in the development of significant alternatives that would accomplish the stated objectives of applicable statutes and minimize any significant economic impact of the rule on small entities. These categories of alternatives are: (1) Establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities; (3) use of performance rather than design standards; and (4) exemptions from coverage of the rule, or any part thereof, for small entities.

In order to meet the objectives of this rule, consistent with the Magnuson-Stevens Act, NMFS cannot exempt small entities or change the reporting requirements only for small entities because all the entities affected are small entities. Thus, there are no alternatives discussed that fall under the first, second, and fourth categories described above. NMFS does not know of any performance or design standards that would satisfy the aforementioned objectives of this rulemaking while, concurrently, complying with the Magnuson-Stevens Act; therefore, there are no alternatives considered under the third category.

This rulemaking does not establish management measures to be implemented, but rather implements previously adopted and analyzed measures as adjustments, as specified in the 2006 Consolidated HMS FMP and its amendments and the Environmental Assessment (EA) for the 2011 shark quota specifications rule (75 FR 76302; December 8, 2010). Thus, in this rulemaking, NMFS adjusted the base quotas established and analyzed in the 2006 Consolidated HMS FMP and its amendments by subtracting the underharvest or adding the overharvest, as specified and allowable in existing regulations. Under current regulations (§ 635.27(b)(2)), all shark fisheries close on December 31 of each year, or when NMFS determines that the fishing season landings for any shark management group has reached, or is projected to reach, 80 percent of the available quota, and do not open until NMFS takes action, such as this rulemaking to re-open the fisheries. Thus, not implementing these management measures would negatively affect shark fishermen and related small entities, such as dealers, and also would not provide management flexibility in furtherance of equitable fishing opportunities, to the extent practicable, for commercial shark fishermen in all regions and areas.

Based on the 2015 ex-vessel price, fully harvesting the unadjusted 2017 Atlantic shark commercial baseline quotas could result in total fleet revenues of $8,265,467 (see Table 3). For the Gulf of Mexico blacktip shark management group, NMFS will increase the baseline sub-regional quotas due to the underharvests in 2016. The increase for the eastern Gulf of Mexico blacktip shark management group would result in a $24,099 gain in total revenues for fishermen in that sub-region, while the increase for the western Gulf of Mexico blacktip shark management group would result in a $221,815 gain in total revenues for fishermen in that sub-region. For the Gulf of Mexico and Atlantic smoothhound shark management groups, NMFS will

increase the baseline quotas due to the underharvest in 2016. This would cause a potential gain in revenue of $270,323 for the fleet in the Gulf of Mexico region and a potential gain in revenue of $965,095 for the fleet in the Atlantic region.

All of these changes in gross revenues are similar to the changes in gross revenues analyzed in the 2006 Consolidated HMS FMP and its amendments. The FRFAs for those amendments concluded that the economic impacts on these small entities are expected to be minimal. In the 2006 Consolidated HMS FMP and its amendments and the EA for the 2011 shark quota specifications rule, NMFS stated it would be conducting annual rulemakings and considering the potential economic impacts of adjusting the quotas for under- and overharvests at that time.

TABLE 3—AVERAGE EX-VESSEL PRICES PER LB DW FOR EACH SHARK MANAGEMENT GROUP, 2015

Region	Species	Average ex-vessel meat price	Average ex-vessel fin price
Gulf of Mexico	Blacktip Shark	$0.51	$9.95
	Aggregated LCS	0.55	9.96
	Hammerhead Shark	0.61	11.98
	Non-Blacknose SCS	0.35	6.72
	Smoothhound Shark*	0.65	1.58
Atlantic	Aggregated LCS	0.80	4.73
	Hammerhead Shark	0.65	10.25
	Non-Blacknose SCS	0.73	4.36
	Blacknose Shark	0.97	4.00
	Smoothhound Shark*	0.65	1.58
No Region	Shark Research Fishery (Aggregated LCS)	0.68	9.24
	Shark Research Fishery (Sandbar only)	0.76	10.62
	Blue shark	0.60	2.93
	Porbeagle shark	1.50	2.93
	Other Pelagic sharks	1.50	2.93

* Ex-vessel prices for smoothhound sharks come from HMS dealers who submitted landings data voluntarily before it was a requirement on March 15, 2016.

For this final rule, NMFS reviewed the ''opening commercial fishing season'' criteria at § 635.27(b)(3)(i) through (vii) to determine when opening each fishery will provide equitable opportunities for fishermen while also considering the ecological needs of the different species. Over- and/or underharvests of 2016 and previous fishing season quotas were examined for the different species/complexes to determine the effects of the 2017 final quotas on fishermen across regional fishing areas. The potential season lengths and previous catch rates were examined to ensure that equitable fishing opportunities would be provided to fishermen. Lastly, NMFS examined the seasonal variation of the different species/complexes and the effects on fishing opportunities. In addition to these criteria, NMFS also considered other relevant factors, such as recent landings data and public comments, before arriving at the final opening dates for the 2017 Atlantic shark management groups. For the 2017 fishing season, NMFS is opening the shark management groups on January 1, 2017, except for the aggregated LCS, blacktip shark, and hammerhead shark management groups in the western Gulf of Mexico sub-region, which will open on February 1, 2017. The direct and indirect economic impacts will be neutral on a short- and long-term basis for the eastern Gulf of Mexico blacktip shark, eastern Gulf of Mexico aggregated LCS, eastern Gulf of Mexico hammerhead shark, Gulf of Mexico non-blacknose shark SCS, Atlantic non-blacknose shark SCS, Atlantic blacknose shark, sandbar shark, blue shark, porbeagle shark, and pelagic shark (other than porbeagle or blue sharks) management groups, because NMFS did not change the opening dates of these fisheries from the status quo. For the aggregated LCS, blacktip shark, and hammerhead shark management groups in the western Gulf of Mexico sub-region, the delayed opening to February 1, 2017, anticipates minor positive short- and long-term economic impacts, because, according to public comments, ex-vessel prices for sharks are expected to be higher at that time in that sub-region.

Opening the aggregated LCS and hammerhead shark management groups in the Atlantic region on January 1 will result in short-term, direct, moderate, beneficial economic impacts, as fishermen and dealers in the southern portion of the Atlantic region will be able to fish for and sell aggregated LCS and hammerhead sharks starting in January. These fishermen will be able to fish earlier in the 2017 fishing season compared to the 2010, 2011, 2012, 2014, and 2015 fishing seasons, which did not start until June or July. Based on public comment, some Atlantic fishermen in the southern and northern part of the region prefer a January 1 opening for the fishery as long as the majority of the quota is available later in the year. With the implementation of the HMS electronic reporting system in 2013, NMFS now monitors the quota on a more real-time basis compared to the paper reporting system that was in place before 2013. This ability, along with the inseason retention limit adjustment criteria in § 635.24(a)(8), should allow NMFS the flexibility to further provide equitable fishing opportunities for fishermen across all regions, to the extent practicable. Depending on how quickly the quota is being harvested, NMFS will consider reducing the commercial retention limit, then consider raising it later in the season to ensure that fishermen farther north have sufficient quota for a fishery later in the 2017 fishing season. The direct impacts to shark fishermen in the Atlantic region of reducing the trip limit depend on the needed reduction in the trip limit and the timing of such a reduction. Therefore, such a reduction in the trip limit for directed shark limited access permit holders is only anticipated to have minor adverse direct economic impacts to fishermen in the short-term; long-term impacts are not anticipated as these reductions would not be permanent.

In the northern portion of the Atlantic region, a January 1 opening for the aggregated LCS and hammerhead shark management groups, with inseason trip limit adjustments to ensure quota is available later in the season, will have direct, minor, beneficial economic impacts in the short-term for fishermen as they will potentially have access to the aggregated LCS and hammerhead shark quotas earlier than in past seasons. Fishermen in this area have stated that, depending on the weather, some aggregated LCS species might be available to retain in January. Thus, fishermen will be able to target or retain aggregated LCS while targeting non-blacknose SCS. There will be indirect, minor, beneficial economic impacts in the short- and long-term for shark dealers and other entities that deal with shark products in this region as they will also have access to aggregated LCS products earlier than in past seasons. Thus, opening the aggregated LCS and hammerhead shark management groups in January and using inseason trip limit adjustments to ensure the fishery is open later in the year in 2017 will cause beneficial cumulative economic impacts, because it allows for a more equitable distribution of the quotas among constituents in this region, consistent with the 2006 Consolidated HMS FMP and its amendments.

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, NMFS has prepared a listserv summarizing fishery information and regulations for Atlantic shark fisheries for 2017. This listserv also serves as the small entity compliance guide. Copies of the compliance guide are available from NMFS (see **ADDRESSES**).

Atlantic Highly Migratory Species; Removal of Vessel Upgrade Restrictions for Swordfish Directed Limited Access and Atlantic Tunas Longline Category Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule removes vessel upgrading restrictions for vessels issued swordfish directed and Atlantic tunas Longline category limited access permits (LAPs). Currently, regulations allow for upgrading vessels or transferring permits to another vessel only if the vessel upgrade or permit transfer results in an increase of no more than 35 percent in length overall, gross registered tonnage, and net tonnage, as measured relative to the baseline vessel specifications (*i.e.,* the specifications of the vessel first issued a Highly Migratory Species (HMS) LAP). This final rule eliminates these restrictions on upgrades and permit transfers. This action affects vessel owners issued swordfish directed and Atlantic tunas Longline category LAPs and fishing in the Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea.

DATES: This rule is effective on December 23, 2016.

ADDRESSES: Other documents relevant to this final rule are available from the Atlantic HMS Management Division Web site at *http://www.nmfs.noaa.gov/sfa/hms/* or by contacting Steve Durkee by phone at 202–670–6637 or Rick Pearson by phone at 727–824–5399.

FOR FURTHER INFORMATION CONTACT: Steve Durkee by phone at 202–670–6637 or Rick Pearson by phone at 727–824–5399.

SUPPLEMENTARY INFORMATION: The U.S. Atlantic swordfish and tuna fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments. Implementing regulations at 50 CFR part 635 are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.,* and the Atlantic Tunas Convention Act (ATCA), 16 U.S.C. 971 *et seq.* ATCA authorizes the Secretary of Commerce (Secretary) to promulgate regulations, as may be necessary and appropriate, to implement recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT).

Background

This final rule removes vessel upgrading restrictions for vessels issued swordfish directed and Atlantic tunas Longline category LAPs. A brief summary of the background of this final rule is provided below. The details were described in the proposed rule for this action (81 FR 48731, July 26, 2016) and are not repeated here. Additional information regarding Atlantic HMS management can be found in the 2006 Consolidated Atlantic HMS FMP and its amendments, the annual HMS Stock Assessment and Fishery Evaluation (SAFE) Reports, and online at *http://www.nmfs.noaa.gov/sfa/hms/*. The comments received on the proposed rule for this action, and NMFS' responses to those comments, are summarized below in the section labeled ''Response to Comments.''

In 1999, NMFS issued initial LAPs in the Atlantic swordfish and shark fisheries (64 FR 29090, March 28, 1999). To be eligible to fish with pelagic longline gear, a vessel had to be issued a swordfish directed or incidental LAP, a shark directed or incidental LAP, and an Atlantic tunas Longline category permit. After initial issuance of these permits, no new permits were issued by NMFS, but permits could be transferred to other vessels. Swordfish and shark directed LAPs included restrictions on vessel upgrading and permit transfers. Vessel upgrades and permit transfers were allowed only if the upgrade or permit transfer to another vessel did not result in an increase in horsepower of more than 20 percent or an increase of more than 10 percent in length overall, gross registered tonnage, or net tonnage relative to the respective specifications of the first vessel issued the initial LAP (the baseline vessel). Additionally, vessels could only be upgraded one time. These vessel upgrading restrictions were put into place to limit capacity in the swordfish fishery. Incidental LAPs for these species did not have vessel upgrading restrictions. Upgrading restrictions for Atlantic tunas Longline category LAPs were not explicitly implemented in the 1999 rule. However, as a practical effect, Atlantic tunas Longline category LAPs were limited by the same upgrading restrictions as the swordfish and shark

directed permits due to the requirement to hold all three permits when fishing with pelagic longline gear.

On June 7, 2007 (72 FR 31688), NMFS issued a final rule amending the HMS fishery regulations to provide additional opportunities for U.S. vessels to more fully utilize the North Atlantic swordfish quota, recognizing the improved status of the species. The 2007 action modified limited access vessel upgrading and permit transfer restrictions for vessels that were concurrently issued, or were eligible to renew, directed or incidental swordfish, directed or incidental shark, and Atlantic tunas Longline category LAPs (*i.e.,* vessels that were eligible to fish with pelagic longline gear). The rule also clarified that Atlantic tunas Longline category LAPs were subject to the same vessel upgrade restrictions as swordfish and shark directed LAPs. These measures allowed eligible vessel owners to upgrade their vessels by 35 percent in size (length overall, gross registered tonnage, and net tonnage) relative to the specifications of the baseline vessel, and removed upgrade limits on horsepower. Additionally, these permits could be upgraded more than once, provided that the new maximum upgrade limits were not exceeded.

Since implementing the vessel upgrade requirements in 1999 and modifying them in 2007, several important things have changed in the Atlantic HMS pelagic longline fishery. As described in the proposed rule for this action, NMFS was concerned about ensuring that pelagic longline fishing effort and fleet capacity were commensurate with the available swordfish quota in 1999. The vessel upgrading restrictions were part of NMFS' management strategy to reduce fleet capacity. Since then, fleet capacity has been reduced through the successful application of the initial LAP qualification criteria and attrition over time. In 1998, prior to the implementation of upgrade restrictions, 233 pelagic longline vessels among the 2,000 permit holders landed swordfish and thus were considered ''active.'' The number of such vessels dropped to a low of 102 in 2006 and has since remained between 109 and 122 vessels. Similarly, as of December 30, 1999, approximately 451 directed and incidental swordfish LAPs had been issued. By 2015, permit numbers had been reduced to 260 directed and incidental swordfish LAPs. Permit numbers are expected to remain at approximately these levels because no new LAPs are being issued.

Other requirements implemented since 1999, such as those designed to reduce bycatch in the pelagic longline fishery (*e.g.,* closed areas, bait requirements, individual bluefin tuna quotas, and gear restrictions), have also limited fishing effort. The directed North Atlantic swordfish quota has not been exceeded in almost 20 years and, in fact, has been underharvested for a number of years.

During this same time period, the stock status of North Atlantic swordfish has significantly improved. In 2009, ICCAT declared that the stock had been fully rebuilt. Using domestic stock status thresholds, NMFS has also declared that the North Atlantic swordfish stock is not overfished and that overfishing is not occurring.

In addition to limiting capacity in the HMS pelagic longline fishery, a secondary goal for implementing the specific swordfish directed and Atlantic tunas Longline vessel upgrade limits adopted in 1999 was to be consistent with similar regulations previously established by the New England and Mid-Atlantic Fishery Management Councils (Councils). In August 2015, the Councils removed gross registered and net tonnage limits (80 FR 51754) so that only length and horsepower limits remain in effect. Because this HMS action will remove all upgrade restrictions for vessels issued swordfish directed and Atlantic tunas Longline category LAPs, only the Council regulations will limit vessel upgrading for vessels issued LAPs for both Council-managed species and HMS. Thus, there will be no conflict between Council and HMS vessel upgrade restrictions. This action will simplify compliance for dually permitted vessels and provide greater flexibility for HMS permitted vessels.

Because the overall reduction in pelagic longline fleet capacity, in combination with the totality of effort controls implemented since 1999, has sufficiently limited the Atlantic HMS pelagic longline fishery's capacity, vessel upgrading and related permit transfer restrictions are no longer necessary at this time. Therefore, this final rule removes all upgrading restrictions for vessels issued swordfish directed and Atlantic tunas Longline category LAPs. Although limited in scope, this action eases a barrier to entry in the pelagic longline fishery, facilitates LAP transfers, provides increased business flexibility, and helps vessel owners address safety issues. Eliminating vessel upgrading restrictions will have short- and long-term minor beneficial socioeconomic impacts, since it will allow fishermen to buy, sell, or transfer swordfish directed and Atlantic tunas Longline category LAPs without concerns about exceeding the maximum upgrade limit for the permits. It will also allow vessel owners to transfer their permits to newer vessels, which could have greater capacity, and address safety issues that exist with older vessels.

Removing the upgrading restrictions is not expected to affect the overall number of swordfish and tunas being landed by vessels, as these amounts are determined by established quotas and effort controls (including, for example, individual vessel quotas for bluefin tuna), not the size of the vessel. Thus, this action is expected to have no ecological impacts beyond those previously analyzed regarding the quotas and existing conservation and management measures, and will not result in additional interactions with protected resources, given the other restrictions on the Atlantic HMS pelagic longline fishery.

Response to Comments

The comment period for the proposed rule closed on September 26, 2016. NMFS received three written comments, which can be found at *https://www.regulations.gov/* by searching for NOAA–NMFS–2016–0087. Comments were also received from the Atlantic HMS Advisory Panel during its meeting on September 7, 2016. No comments were received during a conference call/webinar held on August 23, 2016. NMFS received comments in support of, and one opposed to, removing vessel upgrade restrictions for vessels issued Atlantic tunas Longline category and swordfish directed permits. A summary of the comments received during the public comment period is provided below along with NMFS's responses.

Comment 1: A commenter opposed to removing HMS pelagic longline vessel upgrade restrictions stated that the proposal will enable permits to be transferred to larger vessels that could catch more fish. The commenter also wrote that there should be a complete ban on catching swordfish because the species is virtually extinct.

Response: North Atlantic swordfish are not virtually extinct. In 2009, ICCAT declared that the stock was fully rebuilt, and it has remained so ever since. Using domestic stock status thresholds, NMFS has also declared that the north Atlantic swordfish stock is not overfished and that overfishing is not occurring. The most recent stock assessment, conducted in 2013, indicates that the stock is not overfished (B_{2011}/B_{MSY} = 1.14) and overfishing is not occurring (F_{2011}/F_{MSY} = 0.82). North Atlantic

swordfish quotas are set by ICCAT considering the stock's status and to ensure that the stock is sustainably harvested and to prevent overfishing from occurring. The United States adheres to its ICCAT-designated quota and, in fact, has underharvested the quota for the past several years. Numerous conservation and management measures remain in place in addition to the quota limitations to ensure that the stock is protected. The vessel upgrading restriction removal does not affect the amount of fish caught, nor does it relieve other restrictions that ensure effective conservation and management of this rebuilt fishery. Thus, the commenter's concerns about the stock being ''virtually extinct'' are unfounded and do not warrant modification of the proposed action.

While removing the upgrade restrictions for vessels issued swordfish directed and Atlantic tunas Longline category permits could facilitate the transfer of permits to larger vessels which could catch more swordfish, overall compliance with the quota in this fishery ensures that the stock is not negatively affected by fishing effort. North Atlantic swordfish landings are regulated by semi-annual quotas, and the fishery can be adjusted or closed as those quotas are approached. Similarly, landings of most tunas and pelagic sharks are regulated by quotas which can be adjusted, as necessary, to remain within the quotas.

Comment 2: A supporter of the proposal to remove upgrade restrictions for vessels issued Atlantic tunas Longline category and swordfish directed permits stated that when the upgrade restrictions were first implemented, the commercial swordfish industry was at a peak in terms of both participation and landings. The commenter stated that the swordfish fleet is currently in decline due to increased operating costs, competition from foreign product, and regulatory restrictions, despite a fully recovered north Atlantic swordfish stock; that NMFS should pursue management measures to allow new entrants into the fishery and to expand the production capabilities of the existing fleet; and that eliminating vessel upgrading restrictions is a small step toward encouraging new entrants in the pelagic longline fishery to keep the fleet operative.

Response: Although this final action is limited in scope, it will ease a barrier to entry in the pelagic longline fishery, facilitate LAP transfers, and provide increased business flexibility. As discussed above, both the North Atlantic swordfish stock status and the pelagic longline fishery have changed significantly since 1999. The vessel upgrading restrictions were part of NMFS' initial management strategy to reduce fleet capacity. Since then, capacity has been reduced through the successful application of the initial LAP qualification criteria and attrition over time. Both the number of swordfish LAPs and the number of pelagic longline vessels actively landing swordfish have declined by approximately 50 percent since 1999. As a result of these and other management measures, swordfish are no longer overfished and overfishing is not occurring. The overall reduction in fleet capacity, in combination with the totality of effort controls implemented since 1999, has sufficiently limited the Atlantic HMS pelagic longline fishery's capacity. Thus, vessel upgrading and related permit transfer restrictions are no longer necessary or relevant at this time. Adverse impacts on stock status can be avoided because swordfish landings are regulated by semi-annual quotas, and the fishery can be adjusted or closed as those quotas are approached. Similarly, landings of most tunas and pelagic sharks are regulated by quotas which can be adjusted, as necessary, to remain within the quotas.

Comment 3: When the upgrade restrictions were first implemented, vessel observers were not considered. The requirement to carry observers requires more space onboard a vessel, thus there is sometimes a need to increase the size of vessels more than might be allowed by the existing upgrade restrictions.

Response: Pelagic longline vessels are required to carry observers if selected by NMFS. Removing the upgrade restrictions for vessels issued swordfish directed and Atlantic tunas Longline category permits could allow owners to modify their vessels or purchase newer, larger vessels that would better accommodate these observers.

Comment 4: A commenter in support of the proposed action indicated that fishing vessels and fishing equipment needs improvement from time to time and that vessel upgrading restrictions have sometimes restricted that ability.

Response: NMFS agrees. Removing upgrade restrictions for vessels issued swordfish directed and Atlantic tunas Longline category vessels could facilitate improvements in safety, working conditions, and overall living conditions for both crew members and fishery observers while onboard. This final rule will allow pelagic longline vessel owners to make necessary modifications to their vessels without restrictions on vessel length and tonnage.

Comment 5: A commenter indicated that it has been almost impossible to replace their older engine with a similar engine due to the horsepower upgrade limits.

Response: Horsepower upgrade limits for most HMS pelagic longline vessels were removed in a final rule that published on June 7, 2007 (72 FR 31688).

Comment 6: NMFS should remove vessel upgrade restrictions on swordfish handgear LAPs in order to convert permits that are currently useless due to low horsepower upgrade limits and allow them to be used because handgear vessel owners often prefer high horsepower ratings.

Response: NMFS has previously considered this request in a final rule that published on June 7, 2007 (72 FR 31688) and will continue to do so. The swordfish handgear LAP authorizes the deployment of buoy gear, and buoy gear may be deployed in areas including the East Florida Coast pelagic longline closed area. This area contains oceanographic features that make it biologically unique. It provides important juvenile swordfish habitat, and is essentially a narrow migratory corridor containing high concentrations of swordfish located in close proximity to high concentrations of people who may fish for them. As stated in 2007, horsepower upgrade restrictions can limit the number of swordfish handgear LAPs that are issued because newer handgear vessels have very high horsepower ratings. Public comment indicated a concern that removing vessel upgrade restrictions on swordfish handgear LAPs could result in increased numbers of fishermen in the area, and the potential for crowding of fishermen, which could lead to potential fishing gear and user conflicts. Those concerns remain valid and NMFS decided not to pursue similar adjustments in the swordfish handgear fishery at this time.

Comment 7: Some fishermen might obtain swordfish directed permits because those permits could be used to fish with handgear (including buoy gear). This final action could provide a preliminary preview of lifting the vessel upgrade restrictions on swordfish handgear permits.

Response: Vessels in the swordfish buoy gear fishery are generally small. NMFS believes that the current vessel size restrictions (for maximum length and tonnage) applicable to pelagic longline vessels issued swordfish directed and Atlantic tunas Longline category LAPs have not been a limiting factor in the number of vessels that use

buoy gear. Rather, commenters indicated that buoy gear vessel owners are primarily limited by horsepower upgrade restrictions. Because the horsepower upgrade restrictions have already been removed from most swordfish directed limited access and Atlantic tunas Longline category LAPs (72 FR 31688) and because vessels owners who wish to enter the buoy gear fishery and whose vessels have large horsepower engines have already obtained permits and entered the fishery, it is unlikely that this action will result in significant increases in persons obtaining swordfish directed and Atlantic tunas Longline category LAPs to fish with buoy gear.

Comment 8: NMFS should remove vessel upgrade restrictions on swordfish and shark incidental LAPs, and shark directed LAPs.

Response: Swordfish and shark incidental LAPs and shark directed LAPs do not have vessel upgrade restrictions.

Changes From the Proposed Rule

There are no changes from the proposed rule.

Classification

The NMFS Assistant Administrator has determined that this final action is necessary for the conservation and management of the Atlantic HMS fisheries, and that it is consistent with the 2006 Consolidated HMS FMP and its amendments, other provisions of the Magnuson-Stevens Act, ATCA, and other applicable laws.

This final action has been determined to be categorically excluded from the requirement to prepare an environmental assessment in accordance with NOAA Administrative Order 216–6. A memorandum for the file has been prepared that sets forth the decision to use a categorical exclusion because the rule would implement minor changes to the regulations whose effects have already been analyzed, and additional effects are not expected. This action will have no additional effects that were not already analyzed, and the action is not precedent-setting or controversial. It would not have a significant effect, individually or cumulatively, on the human environment.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

NMFS has determined that this final rule will have no effects on any coastal use or resource, and a negative determination pursuant to 15 CFR 930.35 is not required. Therefore, pursuant to 15 CFR 930.33(a)(2), coordination with appropriate state agencies under section 307 of the Coastal Zone Management Act is not required. No changes to the human environment are anticipated because removing the vessel upgrading restrictions would not affect the number of swordfish and tunas being landed by vessels, as these amounts are determined by the established quotas and effort controls, not the size of the vessel.

List of Subjects in 50 CFR Part 635

Fisheries, Fishing, Fishing vessels, Foreign relations, Imports, Penalties, Reporting and recordkeeping requirements, Treaties.

Dated: November 17, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For reasons set out in the preamble, 50 CFR part 635 is amended as follows:

PART 635—ATLANTIC HIGHLY MIGRATORY SPECIES

■ 1. The authority citation for part 635 continues to read as follows:

Authority: 16 U.S.C. 971 *et seq.;* 16 U.S.C. 1801 *et seq.*

■ 2. In § 635.4, revise paragraphs (l)(2)(i), (l)(2)(ii) introductory text, (l)(2)(ii)(B), and (l)(2)(ii)(C) to read as follows:

§ 635.4 Permits and fees.

* * * * *

(l) * * *

(2) * * *

(i) Subject to the restrictions on upgrading the harvesting capacity of permitted vessels in paragraph (l)(2)(ii) of this section, as applicable, and to the limitations on ownership of permitted vessels in paragraph (l)(2)(iii) of this section, an owner may transfer a shark or swordfish LAP or an Atlantic Tunas Longline category permit to another vessel that he or she owns or to another person. Directed handgear LAPs for swordfish may be transferred to another vessel or to another person but only for use with handgear and subject to the upgrading restrictions in paragraph (l)(2)(ii) of this section and the limitations on ownership of permitted vessels in paragraph (l)(2)(iii) of this section. Shark directed and incidental LAPs, swordfish directed and incidental LAPs, and Atlantic Tunas Longline category permits are not subject to the upgrading requirements specified in paragraph (l)(2)(ii) of this section. Shark and swordfish incidental LAPs are not subject to the ownership requirements specified in paragraph (l)(2)(iii) of this section.

(ii) An owner may upgrade a vessel with a swordfish handgear LAP, or transfer such permit to another vessel or to another person, and be eligible to retain or renew such permit only if the upgrade or transfer does not result in an increase in horsepower of more than 20 percent or an increase of more than 10 percent in length overall, gross registered tonnage, or net tonnage from the vessel baseline specifications.

* * * * *

(B) Subsequent to the issuance of a swordfish handgear limited access permit, the vessel's horsepower may be increased, relative to the baseline specifications of the vessel initially issued the LAP, through refitting, replacement, or transfer. Such an increase may not exceed 20 percent of the baseline specifications of the vessel initially issued the LAP.

(C) Subsequent to the issuance of a swordfish handgear limited access permit, the vessel's length overall, gross registered tonnage, and net tonnage may be increased, relative to the baseline specifications of the vessel initially issued the LAP, through refitting, replacement, or transfer. An increase in any of these three specifications of vessel size may not exceed 10 percent of the baseline specifications of the vessel initially issued the LAP. This type of upgrade may be done separately from an engine horsepower upgrade.

* * * * *

RIN 0648–XE927

Revisions to Framework Adjustment 55 to the Northeast Multispecies Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; adjustment to specifications.

SUMMARY: We are reducing the 2016 fishing year Georges Bank haddock catch cap for the herring midwater trawl fishery. The reduction in the 2016 midwater trawl catch cap is necessary to account for an overage that occurred in fishing year 2015. This reduction is formulaic and is required as an accountability measure to help mitigate the 2015 overage.

DATES: Effective November 23, 2016, through April 30, 2017.

FOR FURTHER INFORMATION CONTACT: Liz Sullivan, Fishery Management Specialist, (978) 282–8493.

SUPPLEMENTARY INFORMATION: Framework Adjustment 55 to the Northeast (NE) Multispecies Fishery Management Plan (FMP) (May 2, 2016, 81 FR 26412) set annual catch limits for groundfish stocks for the 2016 fishing year, including allocations for the groundfish fishery and other fisheries with incidental catch of groundfish. The midwater trawl herring fishery is allocated 1 percent of the U.S. acceptable biological catch of Gulf of Maine (GOM) and Georges Bank (GB) haddock. If the herring midwater trawl fishery exceeds its GOM or GB haddock catch cap, we are required to reduce the respective catch cap by the amount of the overage in the following fishing year.

In fishing year 2015, the midwater trawl fishery exceeded its GB haddock catch cap by 8.54 mt. Therefore, this rule reduces the fishing year 2016 GB haddock catch cap by 8.54 mt to account for this overage. Table 1 provides the midwater trawl adjustment for GB haddock that this rule implements.

TABLE 1—FISHING YEAR 2016 MIDWATER TRAWL OVERAGE ADJUSTMENT (mt)

Stock	2015 Overage	Initial 2016 midwater trawl fishery catch cap	Adjusted 2016 midwater trawl fishery catch cap
GB haddock	8.54	521	512.46

Classification

The NMFS Assistant Administrator has determined that this final rule is consistent with the FMP, other provisions of the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable law.

This action is exempt from the procedures of E.O. 12866 because this action contains no implementing regulations.

Pursuant to 5 U.S.C. 553(b)(3)(B), we find good cause to waive prior public notice and opportunity for public comment on the catch cap adjustment because allowing time for notice and comment is impracticable, unnecessary, and contrary to the public interest. We also find good cause to waive the 30-day delay in effectiveness pursuant to 5 U.S.C. 553(d)(3), so that this final rule may become effective upon publication.

Prior notice and comment are impracticable and contrary to the public interest, because this is a non-discretionary action required by provisions of Framework 46 to the NE Multispecies FMP, which was subject to public comment. The proposed rule to implement Framework 46 requested public comment on these measures, including the specific accountability measure implemented by this rule, with the understanding that a catch cap adjustment would be required if an overage occurred. As a result, the public and industry are expecting this adjustment.

Final 2015 catch data only recently became available in September 2016. This information allows us to determine the amount of an overage, if any, and it was not possible to finalize this information sooner. If this rule is not effective immediately, the midwater trawl fishery will be operating under an incorrect 2016 catch cap for GB haddock. This could increase the likelihood of a subsequent overage and uncertainty on when to trigger an inseason accountability measure, which in turn could cause confusion and negative economic impacts to the midwater trawl fishery. Therefore, it is important to implement the reduced catch limit as soon as possible. For these reasons, we are waiving the public comment period and delay in effectiveness for this rule, pursuant to 5 U.S.C. 553(b)(3)(B) and (d), respectively.

A final regulatory flexibility analysis (FRFA) was previously prepared as part of the regulatory impact review of Framework 55. This minor adjustment does not change the conclusions drawn from that FRFA. The FRFA is contained in the Framework 55 final rule.

Each item in section 604(a)(1) through (5) of the Regulatory Flexibility Act (5 U.S.C. 604(a)(1) through (5)) was addressed in the Classification section of the Framework 55 final rule.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 17, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 81, No. 226
Wednesday, November 23, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 52

[Document Number AMS–FV–08–0076; SC–16–334]

United States Standards for Grades of Frozen Onions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is soliciting comments on its proposal to create new United States Standards for Grades of Frozen Onions. The American Frozen Food Institute (AFFI) petitioned AMS to develop new grade standards for frozen onions. AMS has received additional industry comments on several discussion drafts of the proposed standards. The grade standards would provide a common language for trade, a means of measuring value in the marketing of frozen onions, and guidance on the effective use of frozen onions.

DATES: Comments must be submitted on or before January 23, 2017.

ADDRESSES: Written comments may be submitted via the Internet to *http://www.regulations.gov*; by email to *Brian.Griffin@ams.usda.gov*; by mail to Brian E. Griffin, Standardization Branch, Specialty Crops Inspection Division, Specialty Crops Program, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Room 1536, South Building; STOP 0247, Washington, DC 20250; or by fax to (202) 690–1527. All comments should reference the document number, date, and page number of this issue of the **Federal Register**. All comments will be posted without change, including any personal information provided. All comments submitted in response to this notice will be included in the public record and will be made available to the public on the Internet via *http://www.regulations.gov.* Comments will be made available for public inspection at the above address during regular business hours or can be viewed at: *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Brian E. Griffin, Agricultural Marketing Specialist, Specialty Crops Inspection Division, Specialty Crops Program, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Room 1536, South Building; STOP 0247, Washington, DC 20250; telephone (202) 720–5021; fax (202) 690–1527; or, email *Brian.Griffin@ams.usda.gov*. Copies of the proposed revised grade standards are published with this notice and can be viewed at *http://www.regulations.gov.*

SUPPLEMENTARY INFORMATION: Section 203(c) of the Agricultural Marketing Act of 1946 (Act) (7 U.S.C. 1621–1627), as amended, directs and authorizes the Secretary of Agriculture ''to develop and improve standards of quality, condition, quantity, grade, and packaging, and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices.''

AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural commodities and makes copies of official grade standards available upon request. The United States Standards for Grades of Fruits and Vegetables unrelated to Federal Marketing Orders or U.S. Import Requirements no longer appear in the Code of Federal Regulations, but are maintained by USDA, AMS, Specialty Crops Program, and are available on the Internet at *http://www.ams.usda.gov/scihome.*

AMS is proposing to establish U.S. Standards for Grades of Frozen Onions using the procedures in part 36, Title 7 of the Code of Federal Regulations (7 CFR part 36).

Background: The American Frozen Food Institute (AFFI) petitioned AMS to develop new grade standards for frozen onions. AFFI is a national trade association representing the interests of U.S. frozen food processors and their suppliers in all frozen food sectors, including processors and packers of frozen onions. AFFI's more than 500 member companies represent approximately 90 percent of all frozen food processed annually in the United States. The AFFI petition provided information on product styles, sample sizes, and a product description for use in the grade standards.

AMS asked the petitioner for various styles of samples in order to determine grades of frozen onions. AMS distributed several discussion drafts of proposed standards to AFFI, instituted changes to the drafts once agreement was reached, then published several **Federal Register** notices in order to receive comments from all interested parties (see 66 FR 21116, 68 FR 11801, 68 FR 27010, and 76 FR 31575).

Comments

AMS responded to comments received in response to the drafts as follows:

1. AMS agreed to include stem material, sprout material, and root material as defects in the ''core material'' defect category for strips, diced, and other styles.

2. AMS agreed to include an AFFI proposal to add and define dark green units with dark green stripes across 50 percent or more of the onion unit as a defect.

3. AMS agreed to include onion units from ⅜ inch (10mm) to ⅞ inch (22mm) under the whole styles category as Type II (Pearl).

4. In response to AFFI comments, AMS agreed to classify the style ''minced'' in the category of ''other'' styles.

5. AFFI expressed concern that defects, as defined in the proposed section on Acceptable Quality Levels (AQLs) for quality defects, were defined by count and not by weight, and that larger units would be allowed a smaller number of defects, and that smaller units would be allowed a large number of defects. AMS agreed, and after reevaluation, based the sample size for quality defects in whole units by count (50 count), and for the styles ''diced,'' ''strips,'' and ''other'' by weight (450 grams). AFFI agreed with the adjusted sample sizes and AQLs.

6. AFFI also expressed concern that the proposed AQLs allowed many more defects than current industry practices, and submitted examples of current buyers specifications to demonstrate this. AMS then modified the AQLs by reducing the number of defects allowed

per hundred units to align it with current industry practices, based on the AFFI request.

7. AMS did not modify use of 450 gram samples in response to AFFI questioning why we used 450 grams for the individual sample sizes for styles other than whole instead of 454 grams, which equals one pound. AMS responded that AQLs are based on increments of 50 units so rounding to the nearest AQL results in using 450 grams per sample unit or approximately one pound. AFFI concurred with use of 450 gram samples.

8. In response to a request to revise the definitions of ''good appearance'' and ''reasonably good appearance'' because they were too similar, AMS added flowability, brightness, and overall appearance to the description of ''reasonably good appearance,'' and also added the classification and definition for ''poor appearance.'' AFFI agreed to the new terminology and additional classification.

9. In response to a comment received, AMS did not include a requirement for heat treatment but added that option in the product description, by means of blanching. The revised statement is: ''have been properly prepared, washed, blanched or unblanched, and then frozen in accordance with good commercial practice and maintained at temperatures necessary to preserve the product.'' AFFI concurred with the revised product description.

10. In response to AFFI comments, AMS agreed to limit the product description to ''individually quick frozen'' onions.

11. In accordance with AMS' policy requiring commodities covered by U.S. grade standards to comply with all federal, state, and local laws, AMS did not include microbiological requirements, storage temperatures, shelf life requirements, and limits for chemical and pesticide residues to the proposed frozen onion grade standards. Such requirements are not typically included in the voluntary U.S. grade standards. AFFI concurred.

12. In response to a request from AFFI members, AMS changed the proposed size descriptions for ''whole'' styles as follows:

Type I from ¾ inch (19mm) to 1⅞ inch (48mm) changed to ⅞ inch (22mm) to 1⅞ inch (48mm).

Type II (Pearl) from ¼ inch (6mm) to ⅞ inch (22mm) changed to ⅜ inch (10mm) to ⅞ inch (22mm).

13. In reponse to an AFFI member's comment to the AMS' **Federal Register** notice published on June 1, 2011 (76 FR 31575), AMS revised the Defect Tables and Definitions of the proposed standards. The AFFI member, a major processor and distributor of strips and diced styles of frozen onions, agreed with most of the proposal, but provided additional suggestions concerning whole, strips, diced, and other styles containing crown material defects in its comments. The member also suggested additional provisions for defects, such as core material, sprouts, seed stems, and root material; and, suggested that portions of root crown exceeding ⅜ inch (10 mm) in diameter be listed in a separate category. AMS agreed and revised Defect Tables I (whole style) and II (strips, diced, and other styles) of the proposed grade standards and definitions to include major and minor defects in core material, to include root crown, with dimensions listed accordingly.

AMS sent a discussion draft of the proposed standards to AFFI members for concurrence. AMS received confirmation in November 2015 that AFFI members agreed with the changes, and had no additional comments.

Conclusions

These proposed standards would establish the grade levels ''A,'' ''B,'' and ''Substandard,'' as well as proposed AQL tolerances and acceptance numbers for each quality factor as defined for each grade level.

AMS used the standard format for U.S. standards for grades using ''individual attributes.'' Specifically, the proposed grade standards would provide for tolerance limits for defects; acceptance numbers of allowable defects with single letter grade designation based on a specified number or weight of sample units; a product description for frozen onions; and, style designations for ''whole,'' ''strips,'' ''diced,'' and ''other'' styles. The proposal also would define quality factors, AQLs, and tolerances for defects in frozen onions, and determine sample unit sizes for this commodity. The grade of a sample unit of frozen onions would be ascertained considering the factors of varietal characteristics, color, flavor and odor, appearance, absence of grit or dirt, defects, and character.

These voluntary grade standards would provide a common language for trade, a means of measuring value in marketing, and guidance in the effective use of frozen onions.

The official grade of a lot of frozen onions covered by these standards would be determined by the procedures set forth in the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products (7 CFR 52.1 to 52.83).

AMS is publishing this notice with a 60-day comment period that will provide a sufficient amount of time for interested persons to comment on the proposed new grade standards for frozen onions.

Authority: 7 U.S.C. 1621–1627

Dated: November 18, 2016.

Tomatoes Grown in Florida; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement a recommendation from the Florida Tomato Committee (Committee) to increase the assessment rate established for the 2016–17 and subsequent fiscal periods from $0.03 to $0.035 per 25-pound carton of tomatoes handled under the marketing order (order). The Committee locally administers the order and is comprised of producers of tomatoes operating within the area of production. Assessments upon Florida tomato handlers are used by the Committee to fund reasonable and necessary expenses of the program. The fiscal period begins August 1 and ends July 31. The assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by December 8, 2016.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent to the Docket Clerk, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938; or Internet: *http://www.regulations.gov.* Comments should reference the document number and the date and page number of this issue of the **Federal Register** and will be available for public

inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *http://www.regulations.gov.* All comments submitted in response to this proposed rule will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting the comments will be made public on the Internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Steven W. Kauffman, Marketing Specialist, or Christian D. Nissen, Regional Director, Southeast Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (863) 324–3375, Fax: (863) 291–8614, or Email: *Steven.Kauffman@ams.usda.gov* or *Christian.Nissen@ams.usda.gov*.

Small businesses may request information on complying with this regulation by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202)720–8938, or Email: *Richard.Lower@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement No. 125 and Order No. 966, both as amended (7 CFR part 966), regulating the handling of tomatoes grown in Florida, hereinafter referred to as the ''order.'' The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.''

The Department of Agriculture (USDA) is issuing this proposed rule in conformance with Executive Orders 12866, 13563, and 13175.

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, Florida tomato handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as proposed herein would be applicable to all assessable Florida tomatoes beginning on August 1, 2016, and continue until amended, suspended, or terminated.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This proposed rule would increase the assessment rate established for the Committee for the 2016–17 and subsequent fiscal periods from $0.03 to $0.035 per 25-pound carton of tomatoes.

The Florida tomato marketing order provides authority for the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers of Florida tomatoes. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2015–16 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate of $0.03 per 25-pound carton of tomatoes that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on August 16, 2016, and unanimously recommended 2016–17 expenditures of $1,494,600 and an assessment rate of $0.035 per 25-pound carton of tomatoes. In comparison, last year's budgeted expenditures were $1,513,177. The assessment rate of $0.035 is $0.005 higher than the rate currently in effect. At the current assessment rate, assessment income would equal only $990,000, an amount insufficient to cover the Committee's anticipated expenditures of $1,494,600. The Committee considered the proposed expenses and recommended increasing the assessment rate.

The major expenditures recommended by the Committee for the 2016–17 year include $450,000 for salaries, $400,000 for research, and $400,000 for education and promotion. Budgeted expenses for these items in 2015–16 were $435,377, $400,000, and $400,000, respectively.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of Florida tomatoes. Florida tomato shipments for the 2016–17 year are estimated at 33 million 25-pound cartons, which should provide $1,155,000 in assessment income. Income derived from handler assessments, along with interest income, block grants, and funds from the Committee's authorized reserve, would be adequate to cover budgeted expenses. Funds in the reserve (approximately $999,361) would be kept within the maximum permitted by the order of no more than approximately one fiscal period's expenses as stated in § 966.44.

The proposed assessment rate would continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee would continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public, and interested persons may express their views at these meetings. USDA would evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking would be undertaken as necessary. The Committee's 2016–17 budget and those for subsequent fiscal periods would be reviewed and, as appropriate, approved by USDA.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially

small entities acting on their own behalf.

There are approximately 100 producers of tomatoes in the production area and approximately 80 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts less than $750,000, and small agricultural service firms are defined as those whose annual receipts are less than $7,500,000 (13 CFR 121.201).

Based on industry and Committee data, the average annual price for fresh Florida tomatoes during the 2015–16 season was approximately $11.27 per 25-pound carton, and total fresh shipments were approximately 28.2 million cartons. Using the average price and shipment information, number of handlers, and assuming a normal distribution, the majority of handlers have average annual receipts below $7,500,000. In addition, based on production data, an estimated grower price of $6.25, and the total number of Florida tomato growers, the average annual grower revenue is above $750,000. Thus, a majority of the handlers of Florida tomatoes may be classified as small entities while a majority of the producers may be classified as large entities.

This proposal would increase the assessment rate established for the Committee and collected from handlers for the 2016–17 and subsequent fiscal periods from $0.03 to $0.035 per 25-pound carton of tomatoes. The Committee unanimously recommended 2016–17 expenditures of $1,494,600 and an assessment rate of $0.035 per 25-pound carton handled. The proposed assessment rate of $0.035 is $.005 higher than the 2015–16 rate. The quantity of assessable tomatoes for the 2016–17 season is estimated at 33 million 25-pound cartons. Thus, the $0.035 rate should provide $1,155,000 in assessment income. Income derived from handler assessments, along with funds from interest income, MAP funds, and block grants, should provide sufficient funds to meet this year's anticipated expenses.

The major expenditures recommended by the Committee for the 2016–17 year include $450,000 for salaries, $400,000 for research, and $400,000 for education and promotion. Budgeted expenses for these items in 2015–16 were $435,377, $400,000, and $400,000, respectively.

At the current assessment rate, assessment income would equal only $990,000, an amount insufficient to cover the Committee's anticipated expenditures of $1,494,600. The Committee considered the proposed expenses and recommended increasing the assessment rate.

Prior to arriving at this budget and assessment rate, the Committee considered information from various sources, such as the Committee's Executive Subcommittee, Research Subcommittee, and Education and Promotion Subcommittee. Alternative expenditure levels were discussed by these groups, based upon the relative value of various activities to the tomato industry. The Committee determined that 2016–17 expenditures of $1,494,600 were appropriate, and the recommended assessment rate, along with funds from interest income, block grants, and funds from reserves, would be adequate to cover budgeted expenses.

A review of historical information and preliminary information pertaining to the upcoming crop year indicates that the average grower price for the 2016–17 season could be approximately $6.50 per 25-pound carton of tomatoes. Therefore, the estimated assessment revenue for the 2016–17 crop year as a percentage of total grower revenue would be approximately 0.5 percent.

This action would increase the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be offset by the benefits derived by the operation of the marketing order.

The Committee's meeting was widely publicized throughout the Florida tomato industry, and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the August 16, 2016, meeting was a public meeting, and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit comments on this proposed rule, including the regulatory and informational impacts of this action on small businesses.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the order's information collection requirements have been previously approved by the Office of Management and Budget (OMB) and assigned OMB No. 0581–0178 Vegetable and Specialty Crops. No changes in those requirements are necessary as a result of this action. Should any changes become necessary, they would be submitted to OMB for approval.

This proposed rule would impose no additional reporting or recordkeeping requirements on either small or large Florida tomato handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this action.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/rules-regulations/moa/small-businesses*. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 15-day comment period is provided to allow interested persons to respond to this proposed rule. Fifteen days is deemed appropriate because: (1) The 2016–17 fiscal period began on August 1, 2016, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable Florida tomatoes handled during such fiscal period; (2) the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis; and (3) handlers are aware of this action, which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years.

List of Subjects in 7 CFR Part 966

Marketing agreements, Reporting and recordkeeping requirements, Tomatoes.

For the reasons set forth in the preamble, 7 CFR part 966 is proposed to be amended as follows:

PART 966—TOMATOES GROWN IN FLORIDA

■ 1. The authority citation for 7 CFR part 966 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Section 966.234 is revised to read as follows:

§ 966.234 Assessment rate.

On and after August 1, 2016, an assessment rate of $0.035 per 25-pound carton is established for Florida tomatoes.

Dated: November 18, 2016.

Provisions for Removing Commodity Research and Promotion Board Members and Staff

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would amend the research and promotion orders—or the regulations under the orders—overseen by the Agricultural Marketing Service (AMS) to provide uniform authority for the removal of board members and staff who fail to perform their duties or who engage in dishonest actions or willful misconduct. The removal provisions in 13 of the orders would be modified to allow the U.S. Department of Agriculture (USDA) to take action necessary to ensure the boards can continue to fulfill their intended purposes with minimal disruption. Removal provisions would be added to the six orders that do not currently provide for such action.

DATES: Comments must be received by December 8, 2016.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments may be submitted on the internet at: *http://www.regulations.gov.* Written comments may also be sent to Laurel L. May, Senior Marketing Specialist, Order Formulation and Enforcement Division, USDA/AMS/Dairy Program, 1400 Independence Avenue SW., Room 2967–S—Stop 0231, Washington, DC 20250–0231; facsimile: 202–690–0552. All comments should reference the document number and the date and page number of this issue of the **Federal Register**, and will be made available for public inspection in the above office during regular business hours, or may be viewed at: *http://www.regluations.gov.* Please be advised that the identity of the individuals or entities submitting the comments will be made public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Laurel L. May, Senior Marketing Specialist, USDA/AMS/Dairy Program, telephone 202–690–1366, or email *Laurel.May@ams.usda.gov;* or Whitney Rick, Director; Promotion, Research, and Planning Division; USDA/AMS/Dairy Program; telephone 202–720–6961; or email *Whitney.Rick@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: This proposed rule is issued under 19 of the commodity research and promotion orders established under the following acts: Beef Promotion and Research Act of 1985 (7 U.S.C. 2901–2911); Commodity Promotion, Research, and Information Act of 1996 (7 U.S.C. 7411–7425); Cotton Research and Promotion Act of 1966 (7 U.S.C. 2101–2118); Dairy Production Stabilization Act of 1983 (7 U.S.C. 4501–4514); Egg Research and Consumer Information Act of 1974 (7 U.S.C. 2701–2718); Fluid Milk Promotion Act of 1990 (7 U.S.C. 6401–6417); Hass Avocado Promotion, Research, and Information Act of 2000 (U.S.C. 7801–7813); Mushroom Promotion, Research, and Consumer Information Act of 1990 (7 U.S.C. 6101–6112); Popcorn Promotion, Research, and Consumer Information Act of 1996 (7 U.S.C. 7481–7491); Pork Promotion, Research, and Consumer Information Act of 1985 (7 U.S.C. 4801–4819); Potato Research and Promotion Act of 1971 (7 U.S.C. 2611–2627); and Watermelon Research and Promotion Act (7 U.S.C. 4901–4916). These acts are collectively referred to as ''commodity research and promotion laws'' or ''acts.''

The preceding acts provide that administrative proceedings must be exhausted before parties may file suit in court. Under those acts, any person subject to an order may file a petition with the Secretary of Agriculture (Secretary) stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with laws and request a modification of the order or to be exempted therefrom. The petitioner is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary will make a ruling on the petition. The acts provide that the district courts of the United States in any district in which the person is an inhabitant, or has his or her principal place of business, has the jurisdiction to review the Secretary's rule, provided a complaint is filed within 20 days from the date of the entry of the ruling. There are no administrative proceedings that must be exhausted prior to any judicial challenge to the provision of the Beef Promotion and Research Act of 1985.

Executive Order 12866 and Executive Order 13563

USDA is issuing this proposed rule in conformance with Executive Orders 12866 and 13563. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This action has been designated as a ''non-significant regulatory action'' under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget has waived the review process.

Executive Order 13175

This proposed rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this regulation would not have substantial and direct effects on Tribal governments and would not have significant Tribal implications.

Executive Order 12988

Beef Promotion and Research Act of 1985

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 11 of the Beef Promotion and Research Act of 1985 (7 U.S.C. 2910) provides that it shall not preempt or supersede any other program relating to beef promotion organized and operated under the laws of the United States or any State.

Commodity Promotion, Research, and Information Act of 1996

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 524 of the Commodity Promotion, Research, and Information Act of 1996 (7 U.S.C. 7423) provides that it shall not affect or preempt any other Federal or State law authorizing promotion or research relating to an agricultural commodity.

Cotton Research and Promotion Act of 1966

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. The proposed rule is not intended to have retroactive effect.

Dairy Production Stabilization Act of 1983

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. The proposed rule is not intended to have retroactive effect. Section 1221 of the Dairy Production Stabilization Act of 1983 provides that nothing in this Act may be construed to preempt or superseded any other program relating to dairy product promotion organized and operated under the laws of the United States or any State.

Egg Research and Consumer Information Act of 1974

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. The proposed rule is not intended to have retroactive effect.

Fluid Milk Promotion Act of 1990

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. The proposed rule is not intended to have retroactive effect.

Hass Avocado Promotion, Research, and Information Act of 2000

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 1212(c) of the Hass Avocado Promotion, Research, and Information Act of 2000 (7 U.S.C. 7811) provides that nothing in this Act may be construed to preempt or supersede any program relating to Hass avocado promotion, research, industry information, and consumer information organized and operated under the laws of the United States or of a State.

Mushroom Promotion, Research, and Consumer Information Act of 1990

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 1930 of the Mushroom Promotion, Research, and Information Act of 1990 (7 U.S.C. 6109) provides that nothing in this Act may be construed to preempt or supersede any program relating to mushroom promotion, research, industry information, and consumer information organized and operated under the laws of the United States or of a State.

Popcorn Promotion, Research, and Consumer Information Act of 1996

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 580 of the Popcorn Promotion, Research, and Information Act of 1996 (7 U.S.C. 7489) provides that nothing in this Act may be construed to preempt or supersede any program relating to popcorn promotion organized and operated under the laws of the United States or of a State.

Potato Research and Promotion Act of 1971

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect.

Pork Promotion, Research, and Consumer Information Act of 1985

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 1628 of the Pork Promotion, Research, and Consumer Information Act of 1985 (7 U.S.C. 4817) states that the statute is intended to occupy the field of promotion and consumer education involving pork and pork products and of obtaining funds thereof from pork producers. The regulation of such activity (other than a regulation or requirements relating to a matter of public health or the provision of State or local funds for such activity) that is in addition to or different from the Pork Act may not be imposed by a State.

Watermelon Research and Promotion Act

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect.

Proposed Rule

USDA is proposing amendments to the orders and/or rules and regulations for 19 of the 22 national commodity research and promotion programs overseen by AMS. Each of the programs is administered by a board or council comprised of industry stakeholders, who are appointed by the Secretary to chart the course of the promotion and research activities undertaken by each commodity research and promotion program. The boards and councils hire staffs to carry out the day-to-day business operations of the programs. The proposed amendments would establish uniform provisions across all the programs for removing board and council members and their employees as necessary to preserve program integrity.

Currently, 16 of AMS's 22 research and promotion programs specify provisions for removing board and council members or their staff employees when they are unwilling or unable to perform their duties properly or when they engage in prohibited or illegal activities or other willful misconduct. Some of the programs require the board or council to first make a recommendation for removal to the Secretary, who then determines whether such action is appropriate. Six of the programs include no removal provisions.

The need to remove board and council members and staff from service is infrequent; but situations do arise that require immediate AMS action to ensure program integrity is maintained and to mitigate damage from illegal or inappropriate behavior. Examples of such situations include, but are not limited to, those occasions when board or council members find that they cannot commit enough time to board or council business and are unable to consistently attend meetings or fulfill program assignments. In such cases, it may be difficult for the board or council to meet quorum requirements or make urgent business decisions. In other situations, board or council members or their employees might violate program policies regarding lobbying and influencing government action or policy or violate anti-discrimination, anti-harassment, or anti-trust laws, all of which impede program integrity and the ability to conduct normal business. Board or council members or their employees might mishandle program funds or commit other dishonest acts injurious to all program participants. In each case, the Secretary must have the ability to initiate removal actions, applying consistent criteria and procedures across all programs. Improved AMS oversight would ensure these industry boards and councils can continue to fulfill their appointed purposes.

Currently, three of AMS's research and promotion orders (for soybeans, sorghum, and lamb) contain identical language related to removing board and council members and staff that would be appropriate for use in the other 19 programs. The language authorizes the Secretary to initiate removal action against any person (board or council member or employee) for failure or refusal to perform his or her duties properly or for engaging in acts of dishonesty or willful misconduct. The Secretary is authorized to remove that person if the he or she determines that

person's continued service would be detrimental to the purposes of the act under which the program is established.

This proposed rule would amend 11 of the orders by replacing current provisions with the language used in the soybean, sorghum, and lamb orders, to provide identical authority for the Secretary to take appropriate removal action when necessary to preserve program integrity. Specifically, the following sections in each order would be amended:

Mango Promotion, Research, and Information Order	§ 1206.33(b).
Processed Raspberry Promotion, Research, and Information Order	§ 1208.43(b).
Mushroom Promotion, Research, and Consumer Information Order	§ 1209.35(c).
Honey Packers and Importers Research, Promotion, Education and Information Order	§ 1212.43(b).
Christmas Tree Promotion, Research, and Information Order	§ 1214.43(b).
Popcorn Promotion, Research, and Consumer Information Order	§ 1215.26.
Softwood Lumber Research, Promotion, Consumer Education, and Industry Information Order	§ 1217.43(b).
Blueberry Promotion, Research and Information Order	§ 1218.43(b).
Paper and Paper-Based Packaging Promotion, Research, and Information Order	§ 1222.43(a).
Pork Promotion, Research, and Consumer Information Order	§§ 1230.35 and 1230.55.
Beef Promotion and Research Order	§ 1260.213.

Additionally, this proposed rule would suspend the current removal authority under two orders. The language proposed for use in all the other orders, as currently provided in the orders for soybeans, sorghum, and lamb, would be added to the rules and regulations under the three orders to provide identical authority for the Secretary to take appropriate removal action when necessary to preserve program integrity. Specifically, new regulations would be added to replace language suspended in the following sections:

Watermelon Research and Promotion Plan	§ 1210.324(b)
Hass Avocado Promotion, Research and Information Order	§ 1219.36(b)

Finally, this proposed rule would add removal authority to the six orders or the rules and regulations under the orders that do not currently specify such provisions. The language proposed for use in all the other orders, as currently provided in the orders for soybeans, sorghum, and lamb, would be added to provide identical authority for the Secretary to take appropriate removal action when necessary to preserve program integrity. Specifically, removal language would be added to each of the following:

Dairy Promotion and Research Order	§ 1150.136.
National Fluid Milk Processor Promotion Order	§ 1160.25.
Cotton Research and Promotion—Cotton Board Rules and Regulations	§ 1205.506 (new).
Potato Research and Promotion Plan	§ 1207.324.
Peanut Promotion, Research, and Information Order	§ 1216.44.
Egg Research and Promotion Order	§ 1250.331.

This proposed rule is intended to strengthen AMS's oversight of the commodity research and promotion programs to protect the interests of the regulated industries. The proposed removal language to be applied to all of the orders would not preclude the ability of the boards or councils to initiate action to remove members if they become aware of situations requiring such action. Nevertheless, board or council recommendations regarding removals would not be required for AMS to take action, as they currently are under some of the orders. AMS would be able to take immediate action to investigate possible violations of order provisions, policies, and laws without waiting for a formal request to do so from the board or council. AMS would also be able to apply consistent criteria for board or council member removal across all the programs as necessary to ensure program integrity.

Initial Regulatory Flexibility Act Analysis

In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS is required to examine the impact of this proposed rule on small entities. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Accordingly, AMS has considered the economic impact of this action on small entities and has prepared this initial regulatory flexibility analysis.

Small agricultural service firms are defined by the Small Business Administration (SBA) as those having annual receipts of less than $7,000,000, and small agricultural producers are defined as those having annual receipts of less than $750,000 (13 CFR 121.201).

Research and promotion programs established under the various commodity research and promotion acts, and the rules and regulations issued thereunder, are uniquely brought about through group action of essentially small entities acting on their own behalf. The boards and councils that administer the programs are largely comprised of producers, handlers, processors, manufacturers, and importers of the regulated commodities, who are nominated by their industries and selected by the Secretary to recommend, plan, and conduct generic promotion and research projects that will benefit all industry members, regardless of size.

In most cases, board and council members are nominated by their peers in specific regions or states where the commodity is produced to represent those areas. Some programs may provide for board or council representation according to the member's production volume. Every effort is made to ensure that boards and councils are composed of diverse members of all business sizes in order to assure proper representation of all

segments of the regulated industries. Thus, across the 19 boards and councils that would be affected by this proposed rule, there are any number of large or small entities serving as members at any one time.

This rule is intended to facilitate the removal of individual board and council members, or employees of the boards and councils, who are no longer able to perform their duties or who have engaged in dishonest acts or other willful misconduct. The proposed removal criteria and procedures would pertain to the removal of any board or council member, regardless of the size of the business entity they represent, or any employee of the boards or councils, whose continued service would be detrimental to the programs.

No negative or disproportionate impacts on large or small entities are anticipated in connection with this proposed rule. The positive impacts, which are expected to accrue to all industry members, both large and small, are improved AMS oversight of the commodity research and promotion programs and the improved integrity and effectiveness of those programs, which are designed to benefit all commodity producers, handlers, importers, and consumers, regardless of size.

AMS considered alternatives to this proposed rule, including variations to the removal provision language to be applied to all the orders, or doing nothing at all. After consideration, AMS opted to propose the provision language that would give the boards, councils, and the Secretary the ability to initiate and carry out removal proceedings when necessary. The proposal would also allow AMS to apply uniform oversight across all programs. In this way, AMS would be able to provide more effective oversight of the 22 commodity research and promotion programs.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large entities. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirements of the 19 affected commodity research and promotion programs (7 CFR parts 1150, 1160, 1205, 1206, 1207, 1208, 1209, 1210, 1212, 1214, 1215, 1216, 1217, 1218, 1219, 1222, 1230, 1250, and 1260) have previously been approved by the Office of Management and Budget (OMB) under those orders. All reports and forms used in the AMS research and promotion programs are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

AMS is committed to complying with the E-Government act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Interested persons are invited to submit comments on this proposed rule, including the regulatory and informational impacts of this action on small businesses.

While this proposed rule has not received the approval of USDA, it has been determined that it is consistent with and would effectuate the purposes of the Commodity Promotion, Research, and Information Act of 1996, for the programs to which the Act is applicable.

A 15-day comment period for the proposed rule is provided to allow interested persons to submit written comments on the proposed changes to the provisions for removing research and promotion board and council members, or board and council employees, from service. All comments timely received will be considered before a final determination is made on this matter.

List of Subjects

7 CFR Part 1150

Administrative practice and procedure, Dairy products, Reporting and recordkeeping requirements, Research.

7 CFR Part 1160

Administrative practice and procedure, Fluid milk products, Promotion, Reporting and recordkeeping requirements.

Administrative practice and procedure, Advertising, Agricultural research, Mango, Marketing agreements, Reporting and recordkeeping requirements.

7 CFR Part 1207

Advertising, Agricultural research, Imports, Potatoes, Reporting and recordkeeping requirements.

7 CFR Part 1208

Administrative practice and procedure, Advertising, Consumer information, Marketing agreements, Raspberry promotion, Reporting and recordkeeping requirements.

7 CRF Part 1209

Administrative practice and procedure, Advertising, Agricultural research, Imports, Mushrooms, Reporting and recordkeeping requirements.

7 CRF Part 1210

Administrative practice and procedure, Advertising, Agricultural research, Reporting and recordkeeping requirements, Watermelons.

7 CFR Part 1212

Administrative practice and procedure, Advertising, Consumer education, Honey and honey products, Marketing agreements, Promotion, Reporting and recordkeeping requirements.

7 CFR Part 1214

Administrative practice and procedure, Advertising, Christmas trees, promotion, Consumer information, Marketing agreements, Reporting and recordkeeping requirements.

7 CFR Part 1215

Administrative practice and procedure, Advertising, Agricultural research, Popcorn, Reporting and recordkeeping requirements.

7 CFR Part 1216

Administrative practice and procedure, Advertising, Agricultural research, Peanuts, Reporting and recordkeeping requirements.

7 CFR Part 1217

Administrative practice and procedure, Advertising, Consumer Information, Marketing agreements, Promotion, Reporting and recordkeeping requirements, Softwood lumber.

7 CFR Part 1218

Administrative practice and procedure, Advertising, Agricultural research, Blueberries, Reporting and recordkeeping requirements.

7 CFR Part 1219

Administrative practice and procedure, Advertising, Agricultural research, Hass avocados, Reporting and recordkeeping requirements.

7 CFR Part 1222

Administrative practice and procedure, Advertising, Consumer

information, Marketing agreements, Paper and paper-based packaging promotion, Reporting and recordkeeping requirements.

7 CFR Part 1230

Administrative practice and procedure, Advertising, Agricultural research, Marketing agreements, Pork and pork products, Reporting and recordkeeping requirements.

7 CFR Part 1250

Administrative practice and procedure, Advertising, Agricultural research, Eggs and egg products, Reporting and recordkeeping requirements.

7 CFR Part 1260

Administrative practice and procedure, Advertising, Agricultural research, Imports, Marketing agreements, Meat and meat products, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR parts 1150, 1160, 1205, 1206, 1207, 1208, 1209, 1210, 1212, 1214, 1215, 1216, 1217, 1218, 1219, 1222, 1230, 1250, and 1260 are proposed to be amended as follows:

PART 1150—DAIRY PROMOTION PROGRAM

■ 1. The authority citation for 7 CFR part 1150 continues to read as follows:

Authority: 7 U.S.C. 4501–4514 and 7 U.S.C. 7401.

■ 2. In § 1150.136, redesignate the introductory text as paragraph (a), and add a new paragraph (b) to read as follows:

§ 1150.136 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1160—FLUID MILK PROMOTION PROGRAM

■ 3. The authority citation for 7 CFR part 1160 continues to read as follows:

Authority: 7 U.S.C. 6401–6417 and 7 U.S.C. 7401.

■ 4. In § 1160.205, redesignate the introductory text as paragraph (a), and add a new paragraph (b) to read as follows:

§ 1160.205 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1205—COTTON RESEARCH AND PROMOTION

■ 5. The authority citation for 7 CFR part 1205 continues to read as follows:

Authority: 7 U.S.C. 2101–2118.

■ 6. Add § 1205.506 under the undesignated center heading ''General'' in the Subpart—Cotton Board Rules and Regulations to read as follows:

§ 1205.506 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1206—MANGO PROMOTION, RESEARCH, AND INFORMATION

■ 7. The authority citation for 7 CFR part 1206 continues to read as follows:

Authority: 7 U.S.C. 7411–7425 and 7 U.S.C. 7401.

■ 8. In § 1206.33, revise paragraph (b) to read as follows:

§ 1206.33 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1207—POTATO RESEARCH AND PROMOTION PLAN

■ 9. The authority citation for 7 CFR part 1207 continues to read as follows:

Authority: 7 U.S.C. 2611–2627 and 7 U.S.C. 7401.

■ 10. In § 1207.324, redesignate the introductory text as paragraph (a), and add a new paragraph (b) to read as follows:

§ 1207.324 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1208—PROCESSED RASPBERRY PROMOTION, RESEARCH, AND INFORMATION ORDER

■ 11. The authority citation for 7 CFR part 1208 continues to read as follows:

Authority: 7 U.S.C. 7411–7425; 7 U.S.C. 7404.

■ 12. In § 1208.43, revise paragraph (b) to read as follows:

§ 1208.43 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Council may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1209—MUSHROOM PROMOTION, RESEARCH, AND CONSUMER INFORMATION ORDER

■ 13. The authority citation for 7 CFR part 1209 continues to read as follows:

Authority: 7 U.S.C. 6101–6112 and 7 U.S.C. 7401.

■ 14. In § 1209.35, revise paragraph (c) to read as follows:

§ 1209.35 Vacancies.

* * * * *

(c) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Council may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1210—WATERMELON RESEARCH AND PROMOTION PLAN

■ 15. The authority citation for 7 CFR part 1210 continues to read as follows:

Authority: 7 U.S.C. 4901–4916 and 7 U.S.C. 7401.

■ 16. In § 1210.324, suspend paragraph (b) indefinitely.

■ 17. Add § 1210.503 under the undesignated center heading ''General'' in Subpart C—Rules and Regulations to read as follows:

§ 1210.503 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1212—HONEY PACKERS AND IMPORTER RESEARCH, PROMOTION, CONSUMER EDUCATION AND INDUSTRY INFORMATION ORDER

■ 18. The authority citation for 7 CFR part 1212 continues to read as follows:

Authority: 7 U.S.C. 7411–7425; 7 U.S.C. 7401.

■ 19. In § 1212.43, revise paragraph (b) to read as follows:

§ 1212.43 Removal and Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1214—CHRISTMAS TREE PROMOTION, RESEARCH, AND INFORMATION ORDER

■ 20. The authority citation for 7 CFR part 1214 continues to read as follows:

Authority: 7 U.S.C. 7411—7425; 7 U.S.C. 7401.

■ 21. In § 1214.43, revise paragraph (b) to read as follows:

§ 1214.43 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1215—POPCORN PROMOTION, RESEARCH, AND CONSUMER INFORMATION

■ 22. The authority citation for 7 CFR part 1215 continues to read as follows:

Authority: 7 U.S.C. 7481–7491 and 7 U.S.C. 7401.

■ 23. Revise § 1215.26 to read as follows:

§ 1215.26 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1216—PEANUT PROMOTION, RESEARCH, AND INFORMATION ORDER

■ 24. The authority citation for 7 CFR part 1216 continues to read as follows:

Authority: 7 U.S.C. 7411–7425 and 7 U.S.C. 7401.

■ 25. In § 1216.44, redesignate the introductory text as paragraph (a), and add paragraph (b) to read as follows:

§ 1216.44 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1217—SOFTWOOD LUMBER RESEARCH, PROMOTION, CONSUMER EDUCATION, AND INDUSTRY INFORMATION ORDER

■ 26. The authority citation for 7 CFR part 1217 continues to read as follows:

Authority: 7 U.S.C. 7411–7425; 7 U.S.C. 7401.

■ 27. In § 1217.43, revise paragraph (b) to read as follows:

§ 1217.43 Removal and Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1218—BLUEBERRY PROMOTION, RESEARCH, AND INFORMATION ORDER

■ 28. The authority citation for 7 CFR part 1218 continues to read as follows:

Authority: 7 U.S.C. 7411–7425 and 7 U.S.C. 7401.

■ 28. In § 1218.43, revise paragraph (b) to read as follows:

§ 1218.43 Vacancies.

* * * * *

(b) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Council may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1219—HASS AVOCADO PROMOTION, RESEARCH, AND INFORMATION

■ 29. The authority citation for 7 CFR part 1219 continues to read as follows:

Authority: 7 U.S.C. 7801–7813 and U.S.C. 7401.

■ 30. In § 1219.36, suspend paragraph (b) indefinitely.

■ 31. Add § 1219.204 under Subpart C—Rules and Regulations to read as follows:

§ 1219.204 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1222—PAPER AND PAPER-BASED PACKAGING PROMOTION, RESEARCH AND INFORMATION ORDER

■ 32. The authority citation for 7 CFR part 1222 continues to read as follows:

Authority: 7 U.S.C. 7411–7425; 7 U.S.C. 7401.

■ 33. In § 1222.43, revise paragraph (a) to read as follows:

§ 1222.43 Removal and vacancies.

(a) If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

* * * * *

PART 1230—PORK PROMOTION, RESEARCH, AND CONSUMER INFORMATION

■ 34. The authority citation for 7 CFR part 1230 continues to read as follows:

Authority: 7 U.S.C. 4801–4819 and 7 U.S.C. 7401.

■ 35. Add § 1230.40, to read as follows:

§ 1230.40 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

■ 36. Add § 1230.59, to read as follows:

§ 1230.59 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1250—EGG RESEARCH AND PROMOTION

■ 37. The authority citation for 7 CFR part 1250 continues to read as follows:

Authority: 7 U.S.C. 2701–2718 and 7 U.S.C. 7401.

■ 38. Add § 1250.511 under the undesignated section heading ''General'' in Subpart—Rules and Regulations to read as follows:

§ 1250.511 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

PART 1260—BEEF PROMOTION AND RESEARCH

■ 39. The authority citation for 7 CFR part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901–2911 and 7 U.S.C. 7401.

■ 40. Revise § 1260.213 to read as follows:

§ 1260.213 Removal.

If the Secretary determines that any person appointed under this part fails or refuses to perform his or her duties properly or engages in acts of dishonesty or willful misconduct, the Secretary shall remove the person from office. A person appointed under this part or any employee of the Board or Committee may be removed by the Secretary if the Secretary determines that the person's continued service would be detrimental to the purposes of the Act.

BILLING CODE 3410–02–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

[Docket No. FDA–2016–D–3401]

Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the availability of a draft guidance entitled ''Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-digestible Carbohydrates Submitted as a Citizen Petition (21 CFR 10.30).'' The draft guidance, when finalized, will describe our views on the scientific evidence needed and the approach to evaluating the scientific evidence on the physiological effects of isolated or synthetic non-digestible carbohydrates that are added to foods that are beneficial to human health.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on the draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on this document by January 23, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a

third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–D–3401 for ''Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-digestible Carbohydrates Submitted as a Citizen Petition (21 CFR 10.30).'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Office of Nutrition and Food Labeling, Center for Food Safety and Applied Nutrition (HFS–830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740. Send two self-addressed adhesive labels to assist that office in processing your request. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance.

FOR FURTHER INFORMATION CONTACT: Paula R. Trumbo, Center for Food Safety and Applied Nutrition (HFS–830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–2579.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a draft guidance for industry entitled ''Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-digestible Carbohydrates Submitted as a Citizen Petition (21 CFR 10.30).'' We are issuing the draft guidance consistent with our good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations.

In the **Federal Register** of May 27, 2016 (81 FR 33741), we published a final rule amending our Nutrition and Supplement Facts label regulations. The final rule provides a definition of dietary fiber as non-digestible soluble and insoluble carbohydrates (with 3 or more monomeric units), and lignin that are intrinsic and intact in plants; isolated or synthetic non-digestible carbohydrates (with 3 or more monomeric units) determined by FDA to have physiological effects that are beneficial to human health § 101.9(c)(6)(i)) (21 CFR 101.9 (c)(6)(i)). One mechanism by which a manufacturer could request an amendment to the dietary fiber definition is by using the citizen petition process in § 10.30. If an isolated or synthetic nondigestible carbohydrate meets the dietary fiber definition, then it would be added to the list of dietary fibers in the definition in § 101.9(c)(6)(i)).

The draft guidance document represents our current thinking regarding the type of scientific evidence on which we will rely and the scientific evaluation process we plan to use in determining the strength of the evidence for the relationship between an isolated or synthetic non-digestible carbohydrate that is added to food and a physiological effect that is beneficial to human health.

II. Paperwork Reduction Act of 1995

The draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in § 101.9 have been approved under OMB control number 0910–0813.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either *http://www.fda.gov/FoodGuidances* or *http://www.regulations.gov.* Use the FDA Web site listed in the previous sentence to find the most current version of the guidance.

Dated: November 14, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–136978–12]

RIN 1545–BL22

Fractions Rule

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the application of section 514(c)(9)(E) of the Internal Revenue Code (Code) to partnerships that hold debt-financed real property and have one or more (but not all) qualified tax-exempt organization partners within the meaning of section 514(c)(9)(C). The proposed regulations amend the current regulations under section 514(c)(9)(E) to allow certain allocations resulting from specified common business practices to comply with the rules under section 514(c)(9)(E). These regulations affect partnerships with qualified tax-exempt organization partners and their partners.

DATES: Written and electronic comments and requests for a public hearing must be received by February 21, 2017.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–136978–12), room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–136978–12), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC, or sent electronically, via the Federal eRulemaking Portal site at *http://www.regulations.gov* (indicate IRS and REG–136978–12).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Caroline E. Hay at (202) 317–5279; concerning the submissions of comments and requests for a public hearing, Regina L. Johnson at (202) 317–6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document proposes amendments to the Income Tax Regulations (26 CFR part 1) under section 514(c)(9)(E) regarding the application of the fractions rule (as defined in the Background section of this preamble) to partnerships that hold debt-financed real property and have one or more (but not all) qualified tax-exempt organization partners.

In general, section 511 imposes a tax on the unrelated business taxable income (UBTI) of tax-exempt organizations. Section 514(a) defines UBTI to include a specified percentage of the gross income derived from debt-financed property described in section 514(b). Section 514(c)(9)(A) generally excepts from UBTI income derived from debt-financed real property acquired or improved by certain qualified organizations (QOs) described in section 514(c)(9)(C). Under section 514(c)(9)(C), a QO includes an educational organization described in section 170(b)(1)(A)(ii) and its affiliated support organizations described in section 509(a)(3), any trust which constitutes a qualified trust under section 401, an organization described in section 501(c)(25), and a retirement income account described in section 403(b)(9).

Section 514(c)(9)(B)(vi) provides that the exception from UBTI in section 514(c)(9)(A) does not apply if a QO owns an interest in a partnership that holds debt-financed real property (the partnership limitation), unless the partnership meets one of the following requirements: (1) all of the partners of the partnership are QOs, (2) each allocation to a QO is a qualified allocation (within the meaning of section 168(h)(6)), or (3) each partnership allocation has substantial economic effect under section 704(b)(2) and satisfies section 514(c)(9)(E)(i)(I) (the fractions rule).

A partnership allocation satisfies the fractions rule if the allocation of items to any partner that is a QO does not result in that partner having a share of overall partnership income for any taxable year greater than that partner's fractions rule percentage (the partner's share of overall partnership loss for the taxable year for which the partner's loss share is the smallest). Section 1.514(c)–2(c)(1) describes overall partnership income as the amount by which the aggregate items of partnership income and gain for the taxable year exceed the aggregate items of partnership loss and deduction for the year. Overall partnership loss is the amount by which the aggregate items of partnership loss and deduction for the taxable year exceed the aggregate items of partnership income and gain for the year.

Generally, under § 1.514(c)–2(b)(2)(i), a partnership must satisfy the fractions rule both on a prospective basis and on an actual basis for each taxable year of the partnership, beginning with the first taxable year of the partnership in which the partnership holds debt-financed real property and has a QO partner. However, certain allocations are taken into account for purposes of determining overall partnership income or loss only when actually made, and do not create an immediate violation of the fractions rule. See § 1.514(c)–2(b)(2)(i). Certain other allocations are disregarded for purposes of making fractions rule calculations. See, for example, § 1.514(c)–2(d) (reasonable preferred returns and reasonable guaranteed payments), § 1.514(c)–2(e) (certain chargebacks and offsets), § 1.514(c)–2(f) (reasonable partner-specific items of deduction and loss), § 1.514(c)–2(g) (unlikely losses and deductions), and § 1.514(c)–2(k)(3) (certain de minimis allocations of losses and deductions). In addition, § 1.514(c)–2(k)(1) provides that changes in partnership allocations that result from transfers or shifts of partnership interests (other than transfers from a QO to another QO) will be closely scrutinized, but generally will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years. Section 1.514(c)–2(m) provides special rules for applying the fractions rule to tiered partnerships.

The Treasury Department and the IRS have received comments requesting targeted changes to the existing regulations under section 514(c)(9)(E) to allow certain allocations resulting from specified common business practices to comply with the rules under section 514(c)(9)(E). Section 514(c)(9)(E)(iii) grants the Secretary authority to prescribe regulations as may be necessary to carry out the purposes of section 514(c)(9)(E), including regulations that may provide for the exclusion or segregation of items. In response to comments and under the regulatory authority in section 514(c)(9)(E), these proposed regulations provide guidance in determining a partner's share of overall partnership income or loss for purposes of the fractions rule, including allowing allocations consistent with common arrangements involving preferred returns, partner-specific expenditures, unlikely losses, and chargebacks of partner-specific expenditures and unlikely losses. The proposed regulations also simplify one of the examples involving tiered partnerships and provide rules regarding changes to partnership allocations as a result of capital commitment defaults and later acquisitions of partnership interests. These proposed regulations except from applying the fractions rule certain partnerships in which all partners other than QOs own five percent or less of the capital or profits interests in the

partnership. Finally, these proposed regulations increase the threshold for de minimis allocations away from QO partners.

Explanation of Provisions

1. Preferred Returns

Section 1.514(c)–2(d)(1) and (2) of the existing regulations disregard in computing overall partnership income for purposes of the fractions rule items of income (including gross income) and gain that may be allocated to a partner with respect to a current or cumulative reasonable preferred return for capital (including allocations of minimum gain attributable to nonrecourse liability (or partner nonrecourse debt) proceeds distributed to the partner as a reasonable preferred return) if that preferred return is set forth in a binding, written partnership agreement. Section 1.514(c)–2(d)(2) of the existing regulations also provides that if a partnership agreement provides for a reasonable preferred return with an allocation of what would otherwise be overall partnership income, items comprising that allocation are disregarded in computing overall partnership income for purposes of the fractions rule.

Section 1.514(c)–2(d)(6)(i) of the existing regulations limits the amount of income and gain allocated with respect to a preferred return that can be disregarded for purposes of the fractions rule to: (A) The aggregate of the amount that has been distributed to the partner as a reasonable preferred return for the taxable year of the allocation and prior taxable years, on or before the due date (not including extensions) for filing the partnership's return for the taxable year of the allocation; minus (B) the aggregate amount of corresponding income and gain (and what would otherwise be overall partnership income) allocated to the partner in all prior years. Thus, this rule requires a current distribution of preferred returns for the allocations of income with respect to those preferred returns to be disregarded.

The Treasury Department and the IRS have received comments requesting that the current distribution requirement be eliminated from the regulations because it interferes with normal market practice, creates unnecessary complication, and, in some cases, causes economic distortions for partnerships with QO partners. The preamble to the existing final regulations under section 514(c)(9)(E) responded to objections regarding the current distribution requirement by explaining that if the requirement were eliminated, partnerships might attempt to optimize their overall economics by allocating significant amounts of partnership income and gain to QOs in the form of preferred returns. The preamble explained that these allocations ''would be a departure from the normal commercial practice followed by partnerships in which the money partners are generally subject to income tax.'' TD 8539, 59 FR 24924. A recent commenter explained that the vast majority of partnerships holding debt-financed real property (real estate partnerships) with preferred returns to investing partners (either the QO or the taxable partner) make allocations that match the preferred return as it accrues, without regard to whether cash has been distributed with respect to the preferred return. Instead of requiring distributions equal to the full amount of their preferred returns, taxable partners generally negotiate for tax distributions to pay any tax liabilities associated with their partnership interest.

The Treasury Department and the IRS have reconsidered the necessity of the current distribution requirement to prevent abuses of the fractions rule. So long as the preferred return is required to be distributed prior to other distributions (with an exception for certain distributions intended to facilitate the payment of taxes) and any undistributed amount compounds, the likelihood of abuse is minimized. Therefore, the proposed regulations remove the current distribution requirement and instead disregard allocations of items of income and gain with respect to a preferred return for purposes of the fractions rule, but only if the partnership agreement requires that the partnership make distributions first to pay any accrued, cumulative, and compounding unpaid preferred return to the extent such accrued but unpaid preferred return has not otherwise been reversed by an allocation of loss prior to such distribution (preferred return distribution requirement). The preferred return distribution requirement, however, is subject to an exception under the proposed regulations that allows distributions intended to facilitate partner payment of taxes imposed on the partner's allocable share of partnership income or gain, if the distributions are made pursuant to a provision in the partnership agreement, are treated as an advance against distributions to which the distributee partner would otherwise be entitled under the partnership agreement, and do not exceed the distributee partner's allocable share of net partnership income and gain multiplied by the sum of the highest statutory federal, state, and local tax rates applicable to that partner.

2. Partner-Specific Expenditures and Management Fees

Section 1.514(c)–2(f) of the existing regulations provides a list of certain partner- specific expenditures that are disregarded in computing overall partnership income or loss for purposes of the fractions rule. These expenditures include expenditures attributable to a partner for additional record-keeping and accounting costs including in connection with the transfer of a partnership interest, additional administrative costs from having a foreign partner, and state and local taxes. The Treasury Department and the IRS are aware that some real estate partnerships allow investing partners to negotiate for management and similar fees paid to the general partner that differ from fees paid with respect to investments by other partners. These fees include the general partner's fees for managing the partnership and may include fees paid in connection with the acquisition, disposition, or refinancing of an investment. Compliance with the fractions rule may preclude a real estate partnership with QO partners from allocating deductions attributable to these management expenses in a manner that follows the economic fee arrangement because the fractions rule limits the ability of the partnership to make disproportionate allocations.

The Treasury Department and the IRS have determined that real estate partnerships with QO partners should be permitted to allocate management and similar fees among partners to reflect the manner in which the partners agreed to bear the expense without causing a fractions rule violation. Accordingly, the proposed regulations add management (and similar) fees to the current list of excluded partner-specific expenditures in § 1.514(c)–2(f) of the existing regulations to the extent such fees do not, in the aggregate, exceed two percent of the partner's aggregate committed capital.

It has been suggested to the Treasury Department and the IRS that similar partner-specific expenditure issues may arise under the new partnership audit rules in section 1101 of the Bipartisan Budget Act of 2015, Public Law 114–74 (the BBA), which was enacted into law on November 2, 2015. Section 1101 of the BBA repeals the current rules governing partnership audits and replaces them with a new centralized partnership audit regime that, in general, assesses and collects tax at the

partnership level as an imputed underpayment. Some have suggested that the manner in which an imputed underpayment is borne by partners potentially could implicate similar concerns as special allocations of partner-specific items. As the Treasury Department and the IRS continue to consider how to implement the BBA, the Treasury Department and the IRS request comments regarding whether an imputed underpayment should be included among the list of partner-specific expenditures.

3. Unlikely Losses

Similar to § 1.514(c)–2(f), § 1.514(c)–2(g) of the existing regulations generally disregards specially allocated unlikely losses or deductions (other than items of nonrecourse deduction) in computing overall partnership income or loss for purposes of the fractions rule. To be disregarded under § 1.514(c)–2(g), a loss or deduction must have a low likelihood of occurring, taking into account all relevant facts, circumstances, and information available to the partners (including bona fide financial projections). Section 1.514(c)–2(g) describes types of events that give rise to unlikely losses or deductions.

The Treasury Department and the IRS have received comments suggesting that a ''more likely than not'' standard is appropriate for determining when a loss or deduction is unlikely to occur. Notice 90–41 (1990–1 CB 350) (see § 601.601(d)(2)(ii)(*b*)), which preceded the initial proposed regulations under section 514(c)(9)(E), outlined this standard. The commenter explained that the ''low likelihood of occurring'' standard in the existing regulations is vague and gives little comfort to QOs and their taxable partners when drafting allocations to reflect legitimate business arrangements (such as, drafting allocations to account for cost overruns). The Treasury Department and the IRS are considering changing the standard in § 1.514(c)–2(g) and request further comments explaining why ''more likely than not'' is a more appropriate standard than the standard contained in the existing regulations, or whether another standard turning upon a level of risk that is between ''more likely than not'' and ''low likelihood of occurring'' might be more appropriate and what such other standard could be.

4. Chargebacks of Partner-Specific Expenditures and Unlikely Losses

Because allocations of partner-specific expenditures in § 1.514(c)–2(f) and unlikely losses in § 1.514(c)–2(g) are disregarded in computing overall partnership income or loss, allocations of items of income or gain or net income to reverse the prior partner-specific expenditure or unlikely loss could cause a violation of the fractions rule. For example, a QO may contribute capital to a partnership to pay a specific expenditure with the understanding that it will receive a special allocation of income to reverse the prior expenditure once the partnership earns certain profits. If the allocation of income is greater than the QO's fractions rule percentage, the allocation will cause a fractions rule violation.

Section 1.514(c)–2(e)(1) of the existing regulations generally disregards certain allocations of income or loss made to chargeback previous allocations of income or loss in computing overall partnership income or loss for purposes of the fractions rule. Specifically, § 1.514(c)–2(e)(1)(i) disregards allocations of what would otherwise be overall partnership income that chargeback (that is, reverse) prior disproportionately large allocations of overall partnership loss (or part of the overall partnership loss) to a QO (the chargeback exception). The chargeback exception applies to a chargeback of an allocation of part of the overall partnership income or loss only if that part consists of a pro rata portion of each item of partnership income, gain, loss, and deduction (other than nonrecourse deductions, as well as partner nonrecourse deductions and compensating allocations) that is included in computing overall partnership income or loss.

The Treasury Department and the IRS understand that often a real estate partnership with QO partners may seek to reverse a special allocation of unlikely losses or partner-specific items with net profits of the partnership, which could result in allocations that would violate the fractions rule. Such allocations of net income to reverse special allocations of unlikely losses or partner-specific items that were disregarded in computing overall partnership income or loss for purposes of the fractions rule under § 1.514(c)–2(f) or (g), respectively, do not violate the purpose of the fractions rule. Accordingly, the proposed regulations modify the chargeback exception to disregard in computing overall partnership income or loss for purposes of the fractions rule an allocation of what would otherwise have been an allocation of overall partnership income to chargeback (that is, reverse) a special allocation of a partner-specific expenditure under § 1.514(c)–2(f) or a special allocation of an unlikely loss under § 1.514(c)–2(g). Notwithstanding the rule in the proposed regulations, an allocation of an unlikely loss or a partner-specific expenditure that is disregarded when allocated, but is taken into account for purposes of determining the partners' economic entitlement to a chargeback of such loss or expense may, in certain circumstances, give rise to complexities in determining applicable percentages for purposes of fractions rule compliance. Accordingly, the Treasury Department and the IRS request comments regarding the interaction of disregarded partner-specific expenditures and unlikely losses with chargebacks of such items with overall partnership income.

5. Acquisition of Partnership Interests After Initial Formation of Partnership

Section 1.514(c)–2(k)(1) of the existing regulations provides special rules regarding changes in partnership allocations arising from a change in partners' interests. Specifically, § 1.514(c)–2(k)(1) provides that changes in partnership allocations that result from transfers or shifts of partnership interests (other than transfers from a QO to another QO) will be closely scrutinized (to determine whether the transfer or shift stems from a prior agreement, understanding, or plan or could otherwise be expected given the structure of the transaction), but generally will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years. Section 1.514(c)–2(k)(4) of the existing regulations provides that § 1.514(c)–2 may not be applied in a manner inconsistent with the purpose of the fractions rule, which is to prevent tax avoidance by limiting the permanent or temporary transfer of tax benefits from tax-exempt partners to taxable partners.

The Treasury Department and the IRS have received comments requesting guidance in applying the fractions rule when additional partners are admitted to a partnership after the initial formation of the partnership. The commenter explained that many real estate partnerships with QO partners admit new partners in a number of rounds of closings, but treat the partners as having entered at the same time for purposes of sharing in profits and losses (staged closings). A number of commercial arrangements are used to effect staged closings. For example, the initial operations of the partnership may be funded entirely through debt financing, with all partners contributing their committed capital at a later date. Alternatively, later entering partners may contribute capital and an interest

factor, some or both of which is then distributed to the earlier admitted partners to compensate them for the time value of their earlier contributions.

Under existing regulations, staged closings could cause violations of the fractions rule in two ways. First, when new partners are admitted to a partnership, shifts of partnership interests occur. Changes in allocations that result from shifts of partnership interests are closely scrutinized under § 1.514(c)–2(k)(1) of the existing regulations if pursuant to a prior agreement and could be determined to violate the fractions rule. Second, after admitting new partners, partnerships may disproportionately allocate income or loss to the partners to adjust the partners' capital accounts as a result of the staged closings. These disproportionate allocations could cause fractions rule violations if one of the partners is a QO.

The Treasury Department and the IRS have determined that changes in allocations and disproportionate allocations resulting from common commercial staged closings should not violate the fractions rule if they are not inconsistent with the purpose of the fractions rule under § 1.514(c)–2(k)(4) and certain conditions are satisfied. The conditions include the following: (A) The new partner acquires the partnership interest no later than 18 months following the formation of the partnership (applicable period); (B) the partnership agreement and other relevant documents anticipate the new partners acquiring the partnership interests during the applicable period, set forth the time frame in which the new partners will acquire the partnership interests, and provide for the amount of capital the partnership intends to raise; (C) the partnership agreement and any other relevant documents specifically set forth the method of determining any applicable interest factor and for allocating income, loss, or deduction to the partners to adjust partners' capital accounts after the new partner acquires the partnership interest; and (D) the interest rate for any applicable interest factor is not greater than 150 percent of the highest applicable Federal rate, at the appropriate compounding period or periods, at the time the partnership was formed.

Under the proposed regulations, if those conditions are satisfied, the IRS will not closely scrutinize changes in allocations resulting from staged closings under § 1.514(c)–2(k)(1) and will disregard in computing overall partnership income or loss for purposes of the fractions rule disproportionate allocations of income, loss, or deduction made to adjust the capital accounts when a new partner acquires its partnership interest after the partnership's formation.

6. Capital Commitment Defaults or Reductions

The Treasury Department and the IRS received comments requesting guidance with respect to calculations of overall partnership income and loss when allocations change as a result of capital commitment defaults or reductions. The commenter indicated that, in the typical real estate partnership, a limited partner generally will not contribute its entire investment upon being admitted as a partner. Rather, that limited partner will commit to contribute a certain dollar amount over a fixed period of time, and the general partner will then ''call'' on that committed, but uncontributed, capital as needed. These calls will be made in proportion to the partners' commitments to the partnership.

The commenter identified certain remedies that partnership agreements provide if a partner fails to contribute a portion (or all) of its committed capital. These remedies commonly include: (i) Allowing the non-defaulting partner(s) to contribute additional capital in return for a preferred return on that additional capital; (ii) causing the defaulting partner to forfeit all or a portion of its interest in the partnership; (iii) forcing the defaulting partner to sell its interest in the partnership, or (iv) excluding the defaulting partner from making future capital contributions. Alternatively, the agreement may allow partners to reduce their commitment amounts, reducing allocations of income and loss as well. The commenter noted that, depending on the facts, any of these partnership agreement provisions could raise fractions rule concerns.

There is little guidance in the existing regulations regarding changes to allocations of a partner's share of income and losses from defaulted capital calls and reductions in capital commitments. Section 1.514(c)–2(k)(1) applies to changes in allocations resulting from a default if there is a ''transfer or shift'' of partnership interests. The Treasury Department and the IRS have determined that changes in allocations resulting from unanticipated defaults or reductions do not run afoul of the purpose of the fractions rule if such changes are provided for in the partnership agreement. Therefore, the proposed regulations provide that, if the partnership agreement provides for changes to allocations due to an unanticipated partner default on a capital contribution commitment or an unanticipated reduction in a partner's capital contribution commitment, and those changes in allocations are not inconsistent with the purpose of the fractions rule under § 1.514(c)–2(k)(4), then: (A) Changes to partnership allocations provided in the agreement will not be closely scrutinized under § 1.514(c)–2(k)(1) and (B) partnership allocations of income, loss, or deduction (including allocations to adjust partners' capital accounts to be consistent with the partners' adjusted capital commitments) to partners to adjust the partners' capital accounts as a result of unanticipated capital contribution defaults or reductions will be disregarded in computing overall partnership income or loss for purposes of the fractions rule.

7. Applying the Fractions Rule to Tiered Partnerships

Section 1.514(c)–2(m)(1) of the existing regulations provides that if a QO holds an indirect interest in real property through one or more tiers of partnerships (a chain), the fractions rule is satisfied if: (i) The avoidance of tax is not a principal purpose for using the tiered-ownership structure; and (ii) the relevant partnerships can demonstrate under ''any reasonable method'' that the relevant chains satisfy the requirements of § 1.514(c)–2(b)(2) through (k). Section 1.514(c)–2(m)(2) of the existing regulations provides examples that illustrate three different ''reasonable methods:'' the collapsing approach, the entity-by-entity approach, and the independent chain approach.

The Treasury Department and the IRS have received comments requesting guidance with respect to tiered partnerships and the application of the independent chain approach. Under the independent chain approach in § 1.514(c)–2(m)(2) *Example 3* of the existing regulations, different lower-tiered partnership chains (one or more tiers of partnerships) are examined independently of each other, even if these lower-tiered partnerships are owned by a common upper-tier partnership. The example provides, however, that chains are examined independently only if the upper-tier partnership allocates the items of each lower-tier partnership separately from the items of another lower-tier partnership.

The comment noted that in practice, a real estate partnership generally invests in a significant number of properties, often through joint ventures with other partners. A typical real estate partnership will not make separate allocations to its partners of lower-tier partnership items. Accordingly, the

proposed regulations amend § 1.514(c)–2(m)(2) *Example 3* to remove the requirement that a partnership allocate items from lower-tier partnerships separately from one another. Partnership provisions require that partnership items such as items that would give rise to UBTI be separately stated. *See* § 1.702–1(a)(8)(ii). That requirement suffices to separate the tiers of partnerships, and, thus, the proposed regulations do not require the upper-tier partnership to separately allocate partnership items from separate lower-tier partnerships. The proposed regulations also revise § 1.514(c)–2(m)(1)(ii) to remove the discussion of minimum gain chargebacks that refers to language that has been deleted from the example.

8. De Minimis Exceptions From Application of the Fractions Rule

Section 1.514(c)–2(k)(2) of the existing regulations provides that the partnership limitation in section 514(c)(9)(B)(vi) does not apply to a partnership if all QOs hold a de minimis interest in the partnership, defined as no more than five percent in the capital or profits of the partnership, and taxable partners own substantial interests in the partnership through which they participate in the partnership on substantially the same terms as the QO partners. If the partnership limitation in section 514(c)(9)(B)(vi) does not apply to the partnership, the fractions rule does not apply to the partnership. Because the fractions rule does not apply to a partnership if all QOs are de minimis interest holders in the partnership, the Treasury Department and the IRS considered whether the inverse fact pattern, in which all non-QO partners are de minimis partners, implicates the purpose of the fractions rule. *See* § 1.514(c)–2(k)(4) (providing that the purpose of the fractions rule is to ''prevent tax avoidance by limiting the permanent or temporary transfer of tax benefits from tax-exempt partners to taxable partners, whether by directing income or gain to tax-exempt partners, by directing losses, deductions or credits to taxable partners, or by some similar manner.'').

The Treasury Department and the IRS have determined that the purpose of the fractions rule is similarly not violated if all non-QO partners hold a de minimis interest. Therefore, the proposed regulations provide that the fractions rule does not apply to a partnership in which non-QO partners do not hold (directly or indirectly through a partnership), in the aggregate, interests of greater than five percent in the capital or profits of the partnership, so long as the partnership's allocations have substantial economic effect. For purposes of the proposed rule, the determination of whether an allocation has substantial economic effect is made without application of the special rules in § 1.704–1(b)(2)(iii)(*c*)(*2*) (regarding the presumption that there is a reasonable possibility that allocations will affect substantially the dollar amounts to be received by the partners from the partnership if there is a strong likelihood that offsetting allocations will not be made in five years, and the presumption that the adjusted tax basis (or book value) of partnership property is equal to the fair market value of such property).

The existing regulations also provide for a de minimis exception for allocations away from QO partners. Section 1.514(c)–2(k)(3) of the existing regulations provides that a QO's fractions rule percentage of the partnership's items of loss and deduction, other than nonrecourse and partner nonrecourse deductions, that are allocated away from the QO and to other partners in any taxable year, are treated as having been allocated to the QO for purposes of the fractions rule if: (i) The allocation was neither planned nor motivated by tax avoidance; and (ii) the total amount of those items of partnership loss or deduction is less than both one percent of the partnership's aggregate items of gross loss and deduction for the taxable year and $50,000. The preamble to the existing final regulations under section 514(c)(9)(E) explained that the de minimis allocation exception was ''to provide relief for what would otherwise be minor inadvertent violations of the fractions rule.'' TD 8539, 59 FR 24924. The exception was ''not intended . . . [to] be used routinely by partnerships to allocate some of the partnership's losses and deductions.'' *Id.* To that end, the final regulations limited the exception to $50,000. As an example of a de minimis allocation intended to meet this exception, the preamble described a scenario in which a plumber's bill is paid by the partnership but overlooked until after the partner's allocations have been computed and then is allocated entirely to the taxable partner. *Id.*

In current business practices, a $50,000 threshold does not provide sufficient relief for de minimis allocations away from the QO partner. The proposed regulations still require that allocations not exceed one percent of the partnership's aggregate items of gross loss and deduction for the taxable year, but raise the threshold from $50,000 to $1,000,000.

Proposed Applicability Date

The regulations under section 514(c)(9)(E) are proposed to apply to taxable years ending on or after the date these regulations are published as final regulations in the **Federal Register**. However, a partnership and its partners may apply all the rules in these proposed regulations for taxable years ending on or after November 23, 2016.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. Because these proposed regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the ''Addresses'' heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be available at *www.regulations.gov* or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Caroline E. Hay, Office of the Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the Treasury Department and the IRS participated in their development.

Income Taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.514(c)–2 also issued under 26 U.S.C. 514(c)(9)(E)(iii).

■ **Par. 2.** Section 1.514(c)–2 is amended by:

■ 1. In paragraph (a), adding entries for (d)(2)(i) through (iii), adding entries for (d)(3)(i) and (ii), revising the entry for (d)(6), removing entries for (d)(6)(i) and (ii), and (d)(7), adding entries for (k)(1)(i) through (iv), revising the entries for (k)(2)(i) and (ii), adding an entry for (k)(2)(iii), and revising the entry for (n).

■ 2. Revising paragraphs (d)(2) and (3).

■ 3. Removing paragraph (d)(6).

■ 4. Redesignating paragraph (d)(7) as paragraph (d)(6).

■ 5. Revising newly redesignated paragraph (d)(6) *Example 1* paragraph (i) and adding paragraph (iv).

■ 6. Removing the language ''(*i.e.,* reverse)'' in paragraph (e)(1)(i) and adding the language ''(that is, reverse)'' in its place.

■ 7. Removing the language ''other partners; and'' at the end of paragraph (e)(1)(iii) and adding the language ''other partners;'' in its place.

■ 8. Removing the language ''of § 1.704–1(b)(2)(ii)(*d*).'' at the end of paragraph (e)(1)(iv) and adding the language ''of § 1.704–1(b)(2)(ii)(*d*);'' in its place.

■ 9. Removing the language ''the regulations thereunder.'' at the end of paragraph (e)(1)(v) and adding the language ''the regulations thereunder;'' in its place.

■ 10. Adding new paragraphs (e)(1)(vi) and (vii).

■ 11. Adding *Example 5* to paragraph (e)(5).

■ 12. Removing the word ''and'' at the end of paragraph (f)(3).

■ 13. Redesignating paragraph (f)(4) as paragraph (f)(5) and adding new paragraph (f)(4).

■ 14. Revising paragraph (k)(1).

■ 15. Revising the subject heading for paragraph (k)(2)(i).

■ 16. Revising paragraph (k)(2)(i)(A).

■ 17. Redesignating paragraph (k)(2)(ii) as paragraph (k)(2)(iii) and adding new paragraph (k)(2)(ii).

■ 18. Revising paragraph (k)(3)(ii)(B).

■ 19. Removing the second sentence in paragraph (m)(1)(ii).

■ 20. Revising *Example 3*(ii) of paragraph (m)(2).

■ 21. Revising the subject heading for paragraph (n).

■ 22. Adding a sentence to the end of paragraph (n)(2).

The revisions and additions read as follows:

§ 1.514(c)–2. Permitted allocations under section 514(c)(9)(E).

* * * * *

(n) Effective/applicability dates.

* * * * *

(d) * * *

(2) *Preferred returns*—(i) *In general.* Items of income (including gross income) and gain that may be allocated to a partner with respect to a current or cumulative reasonable preferred return for capital (including allocations of minimum gain attributable to nonrecourse liability (or partner nonrecourse debt) proceeds distributed to the partner as a reasonable preferred return) are disregarded in computing overall partnership income or loss for purposes of the fractions rule. Similarly, if a partnership agreement effects a reasonable preferred return with an allocation of what would otherwise be overall partnership income, those items comprising that allocation are disregarded in computing overall partnership income for purposes of the fractions rule.

(ii) *Limitation.* Except as otherwise provided in paragraph (d)(2)(iii) of this section, items of income and gain (or part of what would otherwise be overall partnership income) that may be allocated to a partner in a taxable year with respect to a reasonable preferred return for capital are disregarded under paragraph (d)(2)(i) of this section for purposes of the fractions rule only if the partnership agreement requires the partnership to make distributions first to pay any accrued, cumulative, and compounding unpaid preferred return to the extent such accrued but unpaid preferred return has not otherwise been reversed by an allocation of loss prior to such distribution.

(iii) *Distributions disregarded.* A distribution is disregarded for purposes of paragraph (d)(2)(ii) of this section if the distribution—

(A) Is made pursuant to a provision in the partnership agreement intended to facilitate the partners' payment of taxes imposed on their allocable shares of partnership income or gain;

(B) Is treated as an advance against distributions to which the distributee partner would otherwise be entitled under the partnership agreement; and

(C) Does not exceed the distributee partner's allocable share of net partnership income and gain multiplied by the sum of the highest statutory federal, state, and local tax rates applicable to such partner.

(3) *Guaranteed payments*—(i) *In general.* A current or cumulative reasonable guaranteed payment to a qualified organization for capital or services is treated as an item of deduction in computing overall partnership income or loss, and the income that the qualified organization may receive or accrue from the current or cumulative reasonable guaranteed payment is not treated as an allocable share of overall partnership income or loss. The treatment of a guaranteed payment as reasonable for purposes of section 514(c)(9)(E) does not affect its possible characterization as unrelated business taxable income under other provisions of the Internal Revenue Code.

(ii) *Reasonable guaranteed payments may be deducted only when paid in cash.* If a partnership that avails itself of paragraph (d)(3)(i) of this section would otherwise be required (by virtue of its method of accounting) to deduct a reasonable guaranteed payment to a qualified organization earlier than the taxable year in which it is paid in cash, the partnership must delay the deduction of the guaranteed payment until the taxable year it is paid in cash. For purposes of this paragraph (d)(3)(ii), a guaranteed payment that is paid in cash on or before the due date (not including extensions) for filing the partnership's return for a taxable year may be treated as paid in that prior taxable year.

* * * * *

(6) * * *

Example 1. * * *

(i) The partnership agreement provides QO a 10 percent preferred return on its

unreturned capital. The partnership agreement provides that the preferred return may be compounded (at 10 percent) and may be paid in future years and requires that when distributions are made, they must be made first to pay any accrued, cumulative, and compounding unpaid preferred return not previously reversed by a loss allocation. The partnership agreement also allows distributions to be made to facilitate a partner's payment of federal, state, and local taxes. Under the partnership agreement, any such distribution is treated as an advance against distributions to which the distributee partner would otherwise be entitled and must not exceed the partner's allocable share of net partnership income or gain for that taxable year multiplied by the sum of the highest statutory federal, state, and local tax rates applicable to the partner. The partnership agreement first allocates gross income and gain 100 percent to QO, to the extent of the preferred return. All remaining income or loss is allocated 50 percent to QO and 50 percent to TP.

* * * * *

(iv) The facts are the same as in paragraph (i) of this *Example 1,* except the partnership makes a distribution to TP of an amount computed by a formula in the partnership agreement equal to TP's allocable share of net income and gain multiplied by the sum of the highest statutory federal, state, and local tax rates applicable to TP. The partnership satisfies the fractions rule. The distribution to TP is disregarded for purposes of paragraph (d)(2)(ii) of this section because the distribution is made pursuant to a provision in the partnership agreement that provides that the distribution is treated as an advance against distributions to which TP would otherwise be entitled and the distribution did not exceed TP's allocable share of net partnership income or gain for that taxable year multiplied by the sum of the highest statutory federal, state, and local tax rates applicable to TP. The income and gain that is specially allocated to QO with respect to its preferred return is disregarded in computing overall partnership income or loss for purposes of the fractions rule because the requirements of paragraph (d) of this section are satisfied. After disregarding those allocations, QO's fractions rule percentage is 50 percent (see paragraph (c)(2) of this section), and, under the partnership agreement, QO may not be allocated more than 50 percent of overall partnership income in any taxable year.

(e) * * *

(1) * * *

(vi) Allocations of what would otherwise be overall partnership income that may be made to chargeback (that is, reverse) prior allocations of partner-specific expenditures that were disregarded in computing overall partnership income or loss for purposes of the fractions rule under paragraph (f) of this section; and

(vii) Allocations of what would otherwise be overall partnership income that may be made to chargeback (that is, reverse) prior allocations of unlikely losses and deductions that were disregarded in computing overall partnership income or loss for purposes of the fractions rule under paragraph (g) of this section.

* * * * *

(5) * * *

Example 5. Chargeback of prior allocations of unlikely losses and deductions. (i) Qualified organization (QO) and taxable corporation (TP) are equal partners in a partnership that holds encumbered real property. The partnership agreement generally provides that QO and TP share partnership income and deductions equally. QO contributes land to the partnership, and the partnership agreement provides that QO bears the burden of any environmental remediation required for that land, and, as such, the partnership will allocate 100 percent of the expense attributable to the environmental remediation to QO. In the unlikely event of the discovery of environmental conditions that require remediation, the partnership agreement provides that, to the extent its cumulative net income (without regard to the remediation expense) for the taxable year the partnership incurs the remediation expense and for subsequent taxable years exceeds $500x, after allocation of the $500x of cumulative net income, net income will first be allocated to QO to offset any prior allocation of the environmental remediation expense deduction. On January 1 of Year 3, the partnership incurs a $100x expense for the environmental remediation of the land. In that year, the partnership had gross income of $60x and other expenses of $30x for total net income of $30x without regard to the expense associated with the environmental remediation. The partnership allocated $15x of income to each of QO and TP and $100x of remediation expense to QO.

(ii) The partnership satisfies the fractions rule. The allocation of the expense attributable to the remediation of the land is disregarded under paragraph (g) of this section. QO's share of overall partnership income is 50 percent, which equals QO's share of overall partnership loss.

(iii) In Year 8, when the partnership's cumulative net income (without regard to the remediation expense) for the taxable year the partnership incurred the remediation expense and subsequent taxable years is $480x (the $30x from Year 3, plus $450x of cumulative net income for Years 4–7), the partnership has gross income of $170x and expenses of $50x, for total net income of $120x. The partnership's cumulative net income for all years from Year 3 to Year 8 is $600x ($480x for Years 3–7 and $120x for Year 8). Pursuant to the partnership agreement, the first $20x of net income for Year 8 is allocated equally between QO and TP because the partnership must first earn cumulative net income in excess of $500x before making the offset allocation to QO. The remaining $100x of net income for Year 8 is allocated to QO to offset the environmental remediation expense allocated to QO in Year 3.

(iv) Pursuant to paragraph (e)(1)(vii) of this section, the partnership's allocation of $100x of net income to QO in Year 8 to offset the prior environmental remediation expense is disregarded in computing overall partnership income or loss for purposes of the fractions rule. The allocation does not cause the partnership to violate the fractions rule.

(f) * * *

(4) Expenditures for management and similar fees, if such fees in the aggregate for the taxable year are not more than 2 percent of the partner's capital commitments; and * * *

* * * * *

(k) *Special rules*—(1) *Changes in partnership allocations arising from a change in the partners' interests*—(i) *In general.* A qualified organization that acquires a partnership interest from another qualified organization is treated as a continuation of the prior qualified organization partner (to the extent of that acquired interest) for purposes of applying the fractions rule. Changes in partnership allocations that result from other transfers or shifts of partnership interests will be closely scrutinized (to determine whether the transfer or shift stems from a prior agreement, understanding, or plan or could otherwise be expected given the structure of the transaction), but generally will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years.

(ii) *Acquisition of partnership interests after initial formation of partnership.* Changes in partnership allocations due to an acquisition of a partnership interest by a partner (new partner) after the initial formation of a partnership will not be closely scrutinized under paragraph (k)(1)(i) of this section, but will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years, and disproportionate allocations of income, loss, or deduction to the partners to adjust the partners' capital accounts as a result of, and to reflect, the new partner acquiring the partnership interest and the resulting changes to the other partners' interests will be disregarded in computing overall partnership income or loss for purposes of the fractions rule if such changes and disproportionate allocations are not inconsistent with the purpose of the fractions rule under paragraph (k)(4) of this section and—

(A) The new partner acquires the partnership interest no later than 18 months following the formation of the partnership (applicable period);

(B) The partnership agreement and other relevant documents anticipate the

new partners acquiring the partnership interest during the applicable period, set forth the time frame in which the new partners will acquire the partnership interests, and provide for the amount of capital the partnership intends to raise;

(C) The partnership agreement and other relevant documents specifically set forth the method for determining any applicable interest factor and for allocating income, loss, or deduction to the partners to account for the economics of the arrangement in the partners' capital accounts after the new partner acquires the partnership interest; and

(D) The interest rate for any applicable interest factor is not greater than 150 percent of the highest applicable Federal rate, at the appropriate compounding period or periods, at the time the partnership was formed.

(iii) *Capital commitment defaults or reductions.* Changes in partnership allocations that result from an unanticipated partner default on a capital contribution commitment or an unanticipated reduction in a partner's capital contribution commitment, that are effected pursuant to provisions prescribing the treatment of such events in the partnership agreement, and that are not inconsistent with the purpose of the fractions rule under paragraph (k)(4) of this section, will not be closely scrutinized under paragraph (k)(1)(i) of this section, but will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years. In addition, partnership allocations of income, loss, or deduction to partners made pursuant to the partnership agreement to adjust partners' capital accounts as a result of unanticipated capital contribution defaults or reductions will be disregarded in computing overall partnership income or loss for purposes of the fractions rule. The adjustments may include allocations to adjust partners' capital accounts to be consistent with the partners' adjusted capital commitments.

(iv) *Examples.* The following examples illustrate the provisions of paragraph (k)(1) of this section.

Example 1. Staged closing. (i) On July 1 of Year 1, two taxable partners (TP1 and TP2) form a partnership that will invest in debt-financed real property. The partnership agreement provides that, within an 18-month period, partners will be added so that an additional $1000x of capital can be raised. The partnership agreement sets forth the method for determining the applicable interest factor that complies with paragraph (k)(1)(ii)(D) of this section and for allocating income, loss, or deduction to the partners to account for the economics of the arrangement in the partners' capital accounts. During the partnership's Year 1 taxable year, partnership had $150x of net income. TP1 and TP2, each, is allocated $75x of net income.

(ii) On January 1 of Year 2, qualified organization (QO) joins the partnership. The partnership agreement provides that TP1, TP2, and QO will be treated as if they had been equal partners from July 1 of Year 1. Assume that the interest factor is treated as a reasonable guaranteed payment to TP1 and TP2, the expense from which is taken into account in the partnership's net income of $150x for Year 2. To balance capital accounts, the partnership allocates $100x of the income to QO ($50x, or the amount of one-third of Year 1 income that QO was not allocated during the partnership's first taxable year, plus $50x, or one-third of the partnership's income for Year 2) and the remaining income equally to TP1 and TP2. Thus, the partnership allocates $100x to QO and $25x to TP1 and TP2, each.

(iii) The partnership's allocation to QO would violate the fractions rule because QO's overall percentage of partnership income for Year 2 of 66.7 percent is greater than QO's fractions rule percentage of 33.3 percent. However, the special allocation of $100x to QO for Year 2 is disregarded in determining QO's percentage of overall partnership income for purposes of the fractions rule because the requirements in paragraph (k)(1)(ii) of this section are satisfied.

Example 2. Capital call default. (i) On January 1 of Year 1, two taxable partners, (TP1 and TP2) and a qualified organization (QO) form a partnership that will hold encumbered real property and agree to share partnership profits and losses, 60 percent, 10 percent, and 30 percent, respectively. TP1 agreed to a capital commitment of $120x, TP2 agreed to a capital commitment of $20x, and QO agreed to a capital commitment of $60x. The partners met half of their commitments upon formation of the partnership. The partnership agreement requires a partner's interest to be reduced if the partner defaults on a capital call. The agreement also allows the non-defaulting partners to make the contribution and to increase their own interests in the partnership. Following a capital call default, the partnership agreement requires allocations to adjust capital accounts to reflect the change in partnership interests as though the funded commitments represented the partner's interests from the partnership's inception.

(ii) In Year 1, partnership had income of $100x, which was allocated to the partners $60x to TP1, $10x to TP2, and $30x to QO.

(iii) In Year 2, partnership required each partner to contribute the remainder of its capital commitment, $60x from TP1, $10x from TP2, and $30x from QO. TP1 could not make its required capital contribution, and QO contributed $90x, its own capital commitment, in addition to TP1's. TP1's default was not anticipated. As a result and pursuant to the partnership agreement, TP1's interest was reduced to 30 percent and QO's interest was increased to 60 percent. Partnership had income of $60x and losses of $120x in Year 2, for a net loss of $60x. Partnership allocated to TP1 $48x of loss (special allocation of $30x of gross items of loss to adjust capital accounts and $18x of net loss (30 percent of $60x net loss)), TP2 $6x of net loss (10 percent of $60x net loss), and QO $6x of loss (special allocation of $30x of gross items of income to adjust capital accounts—$36x of net loss (60 percent of $60x net loss)). At the end of Year 2, TP1's capital account equals $72x (capital contribution of $60x + $60x income from Year 1—$48x loss from Year 2); TP2's capital account equals $24x (capital contributions of $20x + $10x income from Year 1—$6x loss from Year 2); and QO's capital account equals $144x (capital contributions of $120x ($30x + $90x) + $30x income from Year 1—$6x loss from Year 2).

(iv) The changes in partnership allocations to TP1 and QO due to TP1's unanticipated default on its capital contribution commitment were effected pursuant to provisions prescribing the treatment of such events in the partnership agreement. Therefore these changes in allocations will not be closely scrutinized under paragraph (k)(1)(i) of this section, but will be taken into account only in determining whether the partnership satisfies the fractions rule in the taxable year of the change and subsequent taxable years. In addition, pursuant to paragraph (k)(1)(iii) of this section, the special allocations of $30x additional loss to TP1 and $30x additional income to QO to adjust their capital accounts to reflect their new interests in the partnership are disregarded when calculating QO's percentage of overall partnership income and loss for purposes of the fractions rule.

(2) * * *

(i) *Qualified organizations.* * * *

(A) Qualified organizations do not hold (directly or indirectly through a partnership), in the aggregate, interests of greater than five percent in the capital or profits of the partnership; and

* * * * *

(ii) *Non-qualified organizations.* Section 514(c)(9)(B)(vi) does not apply to a partnership otherwise subject to that section if—

(A) All partners other than qualified organizations do not hold (directly or indirectly through a partnership), in the aggregate, interests of greater than five percent in the capital or profits of the partnership; and

(B) Allocations have substantial economic effect without application of the special rules in § 1.704–1(b)(2)(iii)(*c*) (regarding the presumption that there is a reasonable possibility that allocations will affect substantially the dollar amounts to be received by the partners from the partnership if there is a strong likelihood that offsetting allocations will not be made in five years, and the presumption that the adjusted tax basis (or book value) of partnership property

is equal to the fair market value of such property).

* * * * *

(3) * * *

(ii) * * *

(B) $1,000,000.

* * * * *

(m) * * *

(2) * * *

Example 3. * * *

(ii) P2 satisfies the fractions rule with respect to the P2/P1A chain. See § 1.702–1(a)(8)(ii) (for rules regarding separately stating partnership items). P2 does not satisfy the fractions rule with respect to the P2/P1B chain.

(n) *Effective/applicability dates.*

* * *

(2) * * * However, paragraphs (d)(2)(ii) and (iii), (d)(6) *Example 1* (i) and (iv), (e)(1)(vi) and (vii), (e)(5) *Example 5,* (f)(4), (k)(1)(ii) through (iv), (k)(2)(i)(A), (k)(2)(ii), (k)(3)(ii)(B), (m)(1)(ii), and (m)(2) *Example 3* (ii) of this section apply to taxable years ending on or after the date these regulations are published as final regulations in the **Federal Register**.

* * * * *

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

[FR Doc. 2016–27105 Filed 11–22–16; 8:45 am]

BILLING CODE 4830–01–P

LIBRARY OF CONGRESS

Copyright Royalty Board

37 CFR Parts 301, 350 and 351

[Docket No. 16–CRB–0015–RM]

Electronic Filing of Documents

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Copyright Royalty Judges propose to amend procedural regulations governing the filing and delivery of documents to allow for electronic filing of documents. The Judges solicit comments on the proposed rule.

DATES: Comments are due no later than December 23, 2016.

ADDRESSES: Submit electronic comments via email to *crb@loc.gov*. Those who choose not to submit comments electronically should see ''How to Submit Comments'' in the **SUPPLEMENTARY INFORMATION** section below for physical addresses and further instructions. The proposed rule is also posted on the agency's Web site (*www.loc.gov/crb*).

FOR FURTHER INFORMATION CONTACT: Kimberly Whittle, Attorney Advisor, by telephone at (202) 707–7658 or email at *crb@loc.gov*.

SUPPLEMENTARY INFORMATION: On September 23, 2016, the Library of Congress awarded a contract for the design and implementation of an electronic filing and case management system for the Copyright Royalty Board (''Board''). The Copyright Royalty Judges (''Judges'') anticipate that the new system will be available for use by claims filers, participants in proceedings before the Judges, and other members of the public having business with the Board (*e.g.,* persons wishing to comment on proposed regulations) by May 2017. The Judges intend to make use of the system mandatory for claimants and participants in proceedings after a six-month transition period.

As part of the Judges' continuing oversight of the Board's procedural regulations, the Judges propose to amend the regulations to accommodate electronic filing of documents and to specify the required format of both electronic and paper documents. In addition, the Judges propose to amend the regulations to remove references to obsolete technologies and to eliminate redundant provisions.

I. Part 301—Organization

The Judges propose to amend Part 301 to specify that (1) the official addresses for the Board are to be used only for documents that are not filed using the electronic filing system; (2) general correspondence, but not pleadings or claims, may be sent by electronic mail; and (3) fax is no longer an acceptable means of transmitting any document or correspondence to the Board.

II. Part 350—General Administrative Provisions

The Judges propose rules concerning the required format and permitted length of documents, whether filed electronically or otherwise. Electronically-filed documents would be subject to additional requirements, similar to the guidelines that the Judges issued in November 2014.[1]

The proposed regulations include rules on obtaining and using a password for filing documents electronically. The use of a password to file a document would constitute the filer's signature. Electronic filing of a document would effect delivery of the document to all parties to a proceeding who have been issued a password or are represented by counsel who has been issued a password.

The Judges also propose to gather in this Part the various provisions that establish whether a document (including a claim) is timely filed. For documents that are not filed using the electronic filing system, the rules concerning timeliness would be unchanged. Documents that are filed electronically are considered timely if they are received and time-stamped by the system by 11:59:59 p.m. (ET) on the due date.

III. Part 351—Proceedings

The Judges propose to amend paragraph 351.1(b)(4) to clarify that the filing fee that must accompany a petition to participate may be remitted by check or money order, or through the electronic filing system's payment portal.

IV. Part 360—Filing of Claims to Royalty Fees Collected Under Compulsory License

The Judges will propose revisions to Part 360 in order to accommodate filing of claims through the new electronic filing system at a later date.

How To Submit Comments

Interested members of the public must submit comments to only one of the following addresses. If not commenting by email or online, commenters must submit an original of their comments, five paper copies, and an electronic version on a CD.

Email: crb@loc.gov; or

U.S. mail: Copyright Royalty Board, P.O. Box 70977, Washington, DC 20024–0977; or

Overnight service (only USPS Express Mail is acceptable): Copyright Royalty Board, P.O. Box 70977, Washington, DC 20024–0977; or

Commercial courier: Address package to: Copyright Royalty Board, Library of Congress, James Madison Memorial Building, LM–403, 101 Independence Avenue SE., Washington, DC 20559–6000. Deliver to: Congressional Courier Acceptance Site, 2nd Street NE. and D Street NE., Washington, DC; or

Hand delivery: Library of Congress, James Madison Memorial Building, LM–401, 101 Independence Avenue SE., Washington, DC 20559–6000.

37 CFR Part 351

Administrative practice and procedure, Copyright.

Proposed Regulations

For the reasons set forth in the preamble, and under the authority of chapter 8, title 17, United States Code, the Copyright Royalty Judges propose to amend parts 301, 350, and 351 of Title 37 of the Code of Federal Regulations as follows:

SUBCHAPTER A—GENERAL PROVISIONS

PART 301—ORGANIZATION

■ 1. The authority citation for part 301 continues to read as follows:

Authority: 17 U.S.C. 801.

§ 301.2 [Amended]

■ 2. Revise § 301.2 to read as follows:

§ 301.2 Official addresses.

All claims, pleadings, and general correspondence intended for the Copyright Royalty Board and not submitted by electronic means through the electronic filing system (''eCRB'') must be addressed as follows:

(a) If sent by mail (including overnight delivery using United States Postal Service Express Mail), the envelope should be addressed to: Copyright Royalty Board, P.O. Box 70977, Southwest Station, Washington, DC 20024–0977.

(b) If hand-delivered by a private party, the envelope must be brought to the Copyright Office Public Information Office, Room LM–401 in the James Madison Memorial Building, and be addressed as follows: Copyright Royalty Board, Library of Congress, James Madison Memorial Building, 101 Independence Avenue SE., Washington, DC 20559–6000.

(c) If hand-delivered by a commercial courier (excluding Federal Express, United Parcel Service and similar courier services), the envelope must be delivered to the Congressional Courier Acceptance Site (CCAS) located at Second and D Street NE., Washington, DC.

(d) Subject to paragraph (f), if sent by electronic mail, to *crb@loc.gov.*

(e) Correspondence and filings for the Copyright Royalty Board may not be delivered by means of:

(1) Overnight delivery services such as Federal Express, United Parcel Service, etc.; or

(2) Fax.

(f) General correspondence for the Copyright Royalty Board may be sent by electronic mail. Claimants or Parties must not send any claims, pleadings, or other filings to the Copyright Royalty Board by electronic mail without specific, advance authorization of the Copyright Royalty Judges.

SUBCHAPTER B—COPYRIGHT ROYALTY JUDGES' RULES AND PROCEDURES

PART 350—GENERAL ADMINISTRATIVE PROVISIONS

■ 3. Revise part 350 to read as follows:

Sec.
350.1 Scope.
350.2 Representation.
350.3 Documents: Format and length.
350.4 Form of motions and responsive pleadings.
350.5 Electronic filing system (eCRB).
350.6 Filing and delivery.
350.7 Time.
350.8 Construction and waiver.

Authority: 17 U.S.C. 803.

PART 350—GENERAL ADMINISTRATIVE PROVISIONS

§ 350.1 Scope.

This subchapter governs procedures generally applicable to proceedings before the Copyright Royalty Judges in making determinations and adjustments pursuant to the Copyright Act, 17 U.S.C. 801(b).

§ 350.2 Representation.

Individual parties in proceedings before the Judges may represent themselves or be represented by an attorney. All other parties must be represented by an attorney. Cf. Rule 49(c)(11) of the Rules of the District of Columbia Court of Appeals. The appearance of an attorney on behalf of any party constitutes a representation that the attorney is a member of the bar, in one or more states, in good standing.

§ 350.3 Documents Format and Length.

(a) *Format*—(1) *Caption and description.* Parties filing pleadings and documents in a proceeding before the Copyright Royalty Judges must include on the first page of each filing a caption that identifies the proceeding by proceeding type and docket number, and a heading under the caption describing the nature of the document. In addition, Parties must include a footer on each page that includes the name and posture of the filing party, *e.g.,* [Party's] Motion, [Party's] Response in Opposition, *etc.*

(2) *Page Layout.* Parties must submit documents that are typed (double spaced) using a serif typeface (*e.g.,* Times New Roman) no smaller than 12 points for text or 10 points for footnotes and formatted for 8½ by 11 inch pages with no less than 1 inch margins. Parties must assure that any exhibit or attachment to documents reflects the docket number of the proceeding in which it is filed and that all pages are numbered appropriately. Any party submitting a document to the Copyright Royalty Board in paper format must submit it unfolded and produced on opaque 8½ by 11 inch white paper using a clear black image.

(3) *Binding or securing.* Parties submitting any paper document to the Copyright Royalty Board must bind or secure the document in a manner that will prevent pages from becoming separated from the document. For example, acceptable forms of binding or securing include: Ring binders; spiral binding; comb binding; and for documents of fifty pages or fewer, a binder clip or single staple in the top left corner of the document. Rubber bands and paper clips are not acceptable means of securing a document.

(b) *Additional format requirements for electronic documents*—(1) *In general.* Parties filing documents electronically through eCRB must follow the requirements of § 350.3(a)(1) and (2) and the additional requirements in paragraphs (b)(2) through (8) of this section.

(2) *File type.* Parties must file all pleadings and documents in Portable Document Format (PDF), with the exception of proposed orders. In addition, participants may provide the Copyright Royalty Board with copies of Excel workbooks, audio files, and video files in their native electronic formats. Participants may also provide the Copyright Royalty Board with copies of PowerPoint presentations or image files in their native electronic formats if conversion to PDF format would render the files difficult to read or view.

(3) *Proposed Orders; file type.* Parties filing or responding to motions must provide a proposed order, drafted as if the Copyright Royalty Judges were granting the party's requested relief. The party must prepare the proposed order as a separate Word document and submit it as an attachment to the main pleading.

(4) *No scanned pleadings.* Parties must convert every filed document directly to PDF format (using ''print to pdf'' or ''save to pdf''), rather than submitting a scanned PDF image. The Copyright Royalty Board will NOT accept scanned documents, except in the case of specific exhibits or attachments that are available to the filing party only in paper form.

(5) *Scanned exhibits.* Parties must scan exhibits or other documents that are only available in paper form at no less than 300 dpi. All exhibits must be searchable. Parties must scan in color any exhibit that uses color to convey information or enhance readability.

(6) *Bookmarks.* Parties must include in all electronic documents appropriate electronic bookmarks to designate the tabs and/or tables of contents that would appear in a paper version of the same document.

(7) *Page rotation.* Parties must ensure that all pages in electronic documents are right side up, regardless of whether they are formatted for portrait or landscape printing.

(8) *Signature.* The signature line of an electronic pleading must contain ''/s/'' followed by the signer's typed name. The name on the signature line must match the name of the user logged into eCRB to file the document. Parties with the capability may also sign documents with a verifiable electronic signature.

(c) *Length of submissions.* Whether filing in paper or electronically, parties must adhere to the following space limitations or such other space limitations as the Copyright Royalty Judges may direct by order. Any party seeking an enlargement of the applicable page limit must make the request by a motion to the Copyright Royalty Judges filed no fewer than three days prior to the applicable filing deadline.

(1) *Motions.* Motions must not exceed 20 pages or 5000 words (exclusive of exhibits, proof of delivery, and the like).

(2) *Responses.* Responses in support of or opposition to motions must not exceed 20 pages or 5000 words (exclusive of exhibits, proof of delivery, and the like).

(3) *Replies.* Replies in support of motions must not exceed 10 pages or 2500 words (exclusive of exhibits, proof of delivery, and the like).

§ 350.4 Form of Motion and Responsive Pleadings.

A motion, responsive pleading, or reply must include the following content and conform to the following format:

(a) *Relief requested.* The pleading must state specific relief the party seeks from the Copyright Royalty Judges.

(b) *Statement of facts.* The pleading must include a succinct statement of material facts.

(c) *Statement of issues.* The pleading must include a concise statement of the issues of law presented to the Copyright Royalty Judges for ruling.

(d) *Evidence relied upon.* The pleading must state with particularity the evidence on which it is based, and must include any relevant, admissible documentary evidence as attachment(s).

(e) *Legal authority.* Parties must cite any legal authority upon which they rely for the relief they seek.

§ 350.5 Electronic Filing System (eCRB).

(a) *Documents to be filed by electronic means*—(1) *Transition period.* For a period of up to six months following the initial deployment of the Copyright Royalty Board's electronic filing and case management system (eCRB), all parties having the technological capability must file all documents with the Copyright Royalty Board through eCRB in addition to filing paper documents in conformity with applicable Copyright Royalty Board rules. The Copyright Royalty Board will announce the date of the initial deployment of eCRB on the Copyright Royalty Board Web site (*www.loc.gov/crb*), as well as the conclusion of the dual-system transition period.

(2) *Subsequent to transition period.* Except as otherwise provided in this chapter, all attorneys must file documents with the Copyright Royalty Board through eCRB. *Pro se* parties may file documents with the Copyright Royalty Board through eCRB, subject to § 350.4(c)(2).

(b) *Official record.* The electronic version of a document filed through and stored in eCRB will be the official record of the Copyright Royalty Board.

(c) *Obtaining an electronic filing password*—(1) *Attorneys.* An attorney must obtain an eCRB password from the Copyright Royalty Board in order to file documents or to receive copies of orders and determinations of the Copyright Royalty Judges. The Copyright Royalty Board will issue an eCRB password after the attorney applicant completes the application form available on the CRB Web site and completes eCRB training.

(2) Pro se *parties.* A party not represented by an attorney (a *pro se* party) may obtain an eCRB password from the Copyright Royalty Board with permission from the Copyright Royalty Judges, in their discretion. To obtain permission, the *pro se* party must submit an application on the form available on the CRB Web site, describing the party's access to the Internet and confirming the party's ability and capacity to file documents and receive electronically the filings of other parties on a regular basis. If the Copyright Royalty Judges grant permission, the *pro se* party must complete the eCRB training provided by the Copyright Royalty Board to all electronic filers before receiving an eCRB password. Once the Copyright Royalty Board has issued an eCRB password to a *pro se* party, that party must make all subsequent filings by electronic means through eCRB.

(3) *Claimants.* Any person desiring to file a claim with the Copyright Royalty Board for copyright royalties may obtain an eCRB password for the limited purpose of filing claims by completing the application form available on the CRB Web site.

(d) *Use of an eCRB password.* An eCRB password may be used only by the person to whom it is assigned, or, in the case of an attorney, by that attorney or an authorized employee or agent of that attorney's law office or organization. The person to whom an eCRB password is assigned is responsible for any document filed using that password.

(e) *Signature.* The use of an eCRB password to login and submit documents creates an electronic record. The password operates and serves as the signature of the person to whom the password is assigned for all purposes under this chapter III.

(f) *Originals of sworn documents.* The electronic filing of a document that contains a sworn declaration, verification, certificate, statement, oath, or affidavit certifies that the original signed document is in the possession of the attorney or *pro se* party responsible for the filing and that it is available for review upon request by a party or by the Copyright Royalty Judges. The filer must file through eCRB a scanned copy of the signature page of the sworn document together with the document itself.

(g) *Consent to delivery by electronic means.* An attorney or *pro se* party who obtains an eCRB password consents to electronic delivery of all documents, subsequent to the petition to participate, that are filed by electronic means through eCRB. Counsel and *pro se* parties are responsible for monitoring their email accounts and, upon receipt of notice of an electronic filing, for retrieving the noticed filing. Parties and their counsel bear the responsibility to keep the contact information in their eCRB profiles current.

(h) *Accuracy of docket entry.* A person filing a document by electronic means is responsible for ensuring the accuracy of the official docket entry generated by the eCRB system, including proper identification of the proceeding, the filing party, and the description of the document. The Copyright Royalty Board will maintain on its Web site (*www.loc.gov/crb*) appropriate guidance regarding naming protocols for eCRB filers.

(i) *Documents subject to a protective order.* A person filing a document by electronic means is responsible for

ensuring, at the time of filing, that any documents subject to a protective order are identified to the eCRB system as ''restricted'' documents. This requirement is in addition to any requirements detailed in the applicable protective order. Failure to identify documents as ''restricted'' to the eCRB system may result in inadvertent publication of sensitive, protected material.

(j) *Exceptions to requirement of electronic filing*—(1) *Certain exhibits or attachments.* Parties may file in paper form any exhibits or attachments that are not in a format that readily permits electronic filing, such as oversized documents; or are illegible when scanned into electronic format. Parties filing paper documents or things pursuant to this paragraph must deliver legible or usable copies of the documents or things in accordance with paragraph 350.5(a)(2) and must file electronically a notice of filing that includes a certificate of delivery.

(2) Pro se *parties.* A *pro se* party must file documents in paper form and must deliver and accept delivery of documents in paper form, unless the *pro se* party has obtained an eCRB password.

(k) *Privacy Requirements.* Unless otherwise instructed by the Copyright Royalty Judges, parties must exclude or redact from all electronically filed documents, whether designated ''restricted'' or not:

(1) *Social Security Numbers.* If an individual's Social Security number must be included in a filed document for evidentiary reasons, the filer must use only the last four digits of that number.

(2) *Names of minor children.* If a minor child must be mentioned in a document for evidentiary reasons, the filer must use only the initials of that child.

(3) *Dates of birth.* If an individual's date of birth must be included in a pleading for evidentiary reasons, the filer must use only the year of birth.

(4) *Financial account numbers.* If a financial account number is relevant evidence in the proceeding, the filer must use only the last four digits of the account identifier.

(*l*) *Incorrectly filed documents and technical difficulties.* (1) The Copyright Royalty Board may direct an eCRB filer to re-file a document that has been incorrectly filed, or to correct an erroneous or inaccurate docket entry.

(2) After the transition period, if an attorney or a *pro se* party who has been issued an eCRB password inadvertently presents a document for filing in paper form, the Copyright Royalty Board may direct the attorney or *pro se* party to file the document electronically. The document will be deemed filed on the date it was first presented for filing if, no later than the next business day after being so directed by the Copyright Royalty Board, the attorney or *pro se* participant files the document electronically. If the party fails to make the electronic filing on the next business day, the document will be deemed filed on the date of the electronic filing.

(3) The inability to complete an electronic filing because of technical problems arising in the eCRB system may constitute ''good cause'' (as used in § 350.6(b)(4)) for an order enlarging time or excusable neglect for the failure to act within the specified time. A filer encountering technical problems with an eCRB filing must immediately notify the Copyright Royalty Board of the problem either by email or by telephone, followed promptly by written confirmation. This rule does not provide authority to extend statutory time limits.

§ 350.6 Filing and delivery.

(a) *Filing of pleadings*—(1) *Electronic filing through eCRB.* Except as described in § 350.5(*l*)(2), any document filed by electronic means through eCRB in accordance with § 350.5 constitutes filing for all purposes under this chapter, effective as of the date and time the document is received and timestamped by eCRB.

(2) *All other filings.* For all filings not submitted by electronic means through eCRB, the submitting party must deliver an original, five paper copies, and one electronic copy in Portable Document Format (PDF) on an optical data storage medium such as a CD or DVD, a flash memory device, or an external hard disk drive to the Copyright Royalty Board in accordance with the provisions described in § 301.2 of this chapter. In no case will the Copyright Royalty Board accept any document by facsimile transmission or electronic mail, except with prior express authorization of the Copyright Royalty Judges.

(b) *Exhibits.* Filers must include all exhibits with the pleadings they support. In the case of exhibits not submitted by electronic means through eCRB, whose bulk or whose cost of reproduction would unnecessarily encumber the record or burden the party, the Copyright Royalty Judges will consider a motion, made in advance of the filing, to reduce the number of required copies. *See* § 350.5(j).

(c) *English language translations.* Filers must accompany each submission that is in a language other than English with an English-language translation, duly verified under oath to be a true translation. Any other party to the proceeding may, in response, submit its own English-language translation, similarly verified, so long as the responding party's translation proves a substantive, relevant difference in the document.

(d) *Affidavits.* The testimony of each witness must be accompanied by an affidavit or a declaration made pursuant to 28 U.S.C. 1746 supporting the testimony. *See* § 350.5(f).

(e) *Subscription*—(1) *Parties represented by counsel.* Subject to § 350.5(e), all documents filed electronically by counsel must be signed by at least one attorney of record and must list the attorney's full name, mailing address, email address (if any), telephone number, and a state bar identification number. *See* § 350.5(e). Submissions signed by an attorney for a party need not be verified or accompanied by an affidavit. The signature of an attorney constitutes certification that the contents of the document are true and correct, to the best of the signer's knowledge, information, and belief, formed after an inquiry reasonable under the circumstances and:

(i) The document is not being presented for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation;

(ii) The claims, defenses, and other legal contentions therein are warranted by existing law or by a nonfrivolous argument for the extension, modification, or reversal of existing law or the establishment of new law;

(iii) The allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery; and

(iv) The denials of factual contentions are warranted by the evidence or, if specifically so identified, are reasonably based on a lack of information or belief.

(2) *Parties representing themselves.* The original of all paper documents filed by a party not represented by counsel must be signed by that party and list that party's full name, mailing address, email address (if any), and telephone number. The party's signature will constitute the party's certification that, to the best of his or her knowledge and belief, there is good ground to support the document, and that it has not been interposed for purposes of delay.

(f) *Responses and replies.* Responses in support of or opposition to motions must be filed within five days of the

filing of the motion. Replies to responses must be filed within four days of the filing of the response.

(g) *Participant list.* The Copyright Royalty Judges will compile and distribute to those parties who have filed a valid petition to participate the official participant list for each proceeding. For all paper filings, a party must deliver a copy of the document to counsel for all other parties identified in the participant list, or, if the party is unrepresented by counsel, to the party itself. Parties must notify the Copyright Royalty Judges and all parties of any change in the name or address at which they will accept delivery and must update their eCRB profiles accordingly.

(h) *Delivery method and proof of delivery*—(1) *Electronic filings through eCRB.* Electronic filing of any document through eCRB operates to effect delivery of the document to counsel or *pro se* participants who have obtained eCRB passwords, and the automatic notice of filing sent by eCRB to the filer constitutes proof of delivery. Counsel or parties who have not yet obtained eCRB passwords must deliver and receive delivery as provided in paragraph (h)(2). Parties making electronic filings are responsible for assuring delivery of all filed documents to parties that do not use the eCRB system.

(2) *Paper filings.* During the course of a proceeding, each party must deliver all documents, including motions, responses and replies that they have not filed through eCRB to the other parties or their counsel by means no slower than overnight express mail on the same day they file the pleading, or by such other means as the parties may agree in writing among themselves. Parties must include a proof of delivery with any document delivered in accordance with this paragraph.

§ 350.7 Time.

(a) *Computation.* To compute the due date for filing and delivering any document or performing any other act directed by an order of the Copyright Royalty Judges or the rules of the Copyright Royalty Board:

(1) Exclude the day of the act, event, or default that begins the period.

(2) Exclude intermediate Saturdays, Sundays, and legal holidays when the period is less than 11 days, unless computation of the due date is stated in calendar days.

(3) Include the last day of the period, unless it is a Saturday, Sunday, legal holiday, or a day on which the weather or other conditions render the Copyright Royalty Board's office inaccessible.

(4) As used in this rule, ''legal holiday'' means the date designated for the observance of New Year's Day, Martin Luther King, Jr.'s Birthday, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, Christmas Day, and any other day declared a federal holiday by the President or the Congress.

(5) Except as otherwise described in this Chapter or in an order by the Copyright Royalty Judges, the Copyright Royalty Board will consider documents to be timely filed only if:

(i) They are filed electronically through eCRB and time-stamped by 11:59:59 p.m. Eastern time on the due date;

(ii) They are sent by U.S. mail, are addressed in accordance with paragraph 301.2(a), have sufficient postage, and bear a USPS postmark on or before the due date;

(iii) They are hand-delivered by private party to the Copyright Office Public Information Office in accordance with § 301.2(b) of this chapter and received by 5:00 p.m. Eastern time on the due date; or

(iv) They are hand-delivered by commercial courier to the Congressional Courier Acceptance Site in accordance with paragraph 301.2(c) and received by 4:00 p.m. Eastern time on the due date.

(6) Any document sent by mail and dated only with a business postal meter will be considered filed on the date it is actually received by the Library of Congress.

(b) *Extensions.* A party seeking an extension must do so by written motion. Prior to filing such a motion, a party must attempt to obtain consent from the other parties to the proceeding. An extension motion must state:

(1) The date on which the action or submission is due;

(2) The length of the extension sought;

(3) The date on which the action or submission would be due if the extension were allowed;

(4) The reason or reasons why there is good cause for the delay;

(5) The justification for the amount of additional time being sought; and

(6) The attempts that have been made to obtain consent from the other parties to the proceeding and the position of the other parties on the motion.

§ 350.8 Construction and waiver.

The regulations of the Copyright Royalty Judges are intended to provide efficient and just administrative proceedings and will be construed to advance these purposes. For purposes of an individual proceeding, the provisions of this subchapter may be suspended or waived, in whole or in part, upon a showing of good cause, to the extent allowable by law.

PART 351—PROCEEDINGS

■ 4. The authority citation for part 351 continues to read as follows:

Authority: 17 U.S.C. 803.

■ 5. In § 351.1 revise paragraph (b)(4) to read as follows:

§ 351.1 Initiation of proceedings.

* * * * *

(b) * * *

(4) *Filing fee.* A petition to participate must be accompanied with a filing fee of $150 or the petition will be rejected. For petitions filed electronically through eCRB, payment must be made to the Copyright Royalty Board through the payment portal designated on eCRB. For petitions filed by other means, payment must be made to the Copyright Royalty Board by check or by money order. If a check is subsequently dishonored, the petition will be rejected. If the petitioner believes that the contested amount of that petitioner's claim will be $1,000 or less, the petitioner must so state in the petition to participate and should not include payment of the $150 filing fee. If it becomes apparent during the course of the proceedings that the contested amount of the claim is more than $1,000, the Copyright Royalty Judges will require payment of the filing fee at that time.

Dated: November 16, 2016.

Suzanne M. Barnett,

Chief Copyright Royalty Judge.

BILLING CODE 6712–01–P

NATIONAL RAILROAD PASSENGER CORPORATION

49 CFR Part 701

Revision of the Freedom of Information Act Regulations of the National Railroad Passenger Corporation

AGENCY: National Railroad Passenger Corporation.

ACTION: Proposed rule.

SUMMARY: This notice sets forth proposed revisions of the Freedom of Information Act (FOIA) regulations of the National Railroad Passenger Corporation (''Amtrak''). The regulations are being revised in part to incorporate the changes brought about by the FOIA Improvement Act of 2016, which requires all agencies to review and update their FOIA regulations in accordance with its provisions. Amtrak has also taken this opportunity to update, clarify, and streamline the language of its regulations in order to make the FOIA process easier for the public to navigate.

DATES: Comments on the rulemaking must be submitted on or before December 23, 2016. Comments received by mail will be considered timely if they are postmarked on or before that date.

ADDRESSES: You may submit comments on the rulemaking by either of the methods listed below.

1. *Email: foiarequests@amtrak.com.* Please include ''Comments on FOIA Rule'' in the subject line.

2. *U.S. mail, courier, or hand delivery:* The Freedom of Information Office; National Railroad Passenger Corporation; 60 Massachusetts Avenue, NE.; Washington, DC 20002. To ensure proper handling, please write ''Comments on FOIA Rule'' on the correspondence.

FOR FURTHER INFORMATION CONTACT: Sharron H. Hawkins, Lead FOIA Specialist, 202–906–3741 or *foiarequests@amtrak.com.*

SUPPLEMENTARY INFORMATION: Amtrak's FOIA regulations were last revised on February 13, 1998. Since that time, there have been several major changes to the FOIA, including the FOIA Improvement Act of 2016 (Pub. L. 114–185) signed into law on June 30, 2016. The Act contains several substantive and procedural amendments to the FOIA, which include requirements that agencies establish a minimum of 90 days for requesters to file an administrative appeal and that they provide dispute resolution services at various times throughout the FOIA process.

Based on the amendments to the FOIA and the practical experience of the FOIA staff, Amtrak has made several changes to its regulations and is republishing them in their entirety. These revisions incorporate the necessary changes under the FOIA Improvement Act of 2016 and update, clarify, and streamline the language of the regulations in order to make the FOIA process easier for the public to navigate.

List of Subjects in 49 CFR Part 701

Freedom of Information.

For the reasons stated in the preamble, Amtrak proposes to amend 49 CFR part 701 as follows:

■ 1. Revise Part 701 to read as follows:

PART 701—AMTRAK FREEDOM OF INFORMATION ACT PROGRAM

Sec.

Authority: 5 U.S.C. 552; 49 U.S.C. 24301(e).

§ 701.1. General provisions.

This part contains the rules that the National Railroad Passenger Corporation (''Amtrak'') follows in processing requests for records under the Freedom of Information Act (FOIA), Title 5 of the United States Code, section 552. Information routinely provided to the public (*i.e.,* train timetables, press releases) may be obtained at Amtrak's Web site *www.amtrak.com* without following Amtrak's FOIA procedures. As a matter of policy, Amtrak will only withhold information under the FOIA if Amtrak reasonably foresees that disclosure would harm an interest protected by a FOIA exemption or when disclosure is prohibited by law.

§ 701.2. Definitions.

Unless the context requires otherwise in this part, masculine pronouns include the feminine gender and ''includes'' means ''includes but is not limited to.''

(a) *Amtrak or Corporation* means the National Railroad Passenger Corporation.

(b) *Appeal* means a request submitted to the President of Amtrak or designee for review of an adverse initial determination.

(c) *Business days* means working days; Saturdays, Sundays, and legal public holidays are excluded in computing response time for processing FOIA requests.

(d) *Disclose or disclosure* means making records available for examination or copying, or furnishing a copy of nonexempt responsive records.

(e) *Electronic data* means records and information (including email) that are created, stored, and retrievable by electronic means.

(f) *Exempt information* means information that is exempt from disclosure as permitted by 5 U.S.C. 552.

(g) *Final determination* means a decision by the President of Amtrak or designee concerning a request for

review of an adverse initial determination received in response to an FOIA request.

(h) *Freedom of Information Act or* ''*FOIA*'' means the statute as codified in section 552 of Title 5 of the United States Code as amended.

(i) *FOIA Officer* means the Amtrak official designated to fulfill the responsibilities of implementing and administering the Freedom of Information Act as specifically designated under this part.

(j) *Initial determination* means a decision by the Amtrak FOIA Officer in response to a request for information under the FOIA.

(k) *Pages* means paper copies of standard office size or the cost equivalent in other media.

(l) *President* means the President and Chief Executive Officer (CEO) of the National Railroad Passenger Corporation (Amtrak) or designee.

(m) *Record* means any writing, drawing, map, recording, tape, film, photograph, or other documentary material by which information is preserved in any format, including electronic format. A record must exist and be in the possession and control of Amtrak at the time of the request to be subject to this part and the FOIA. The following are not included within the definition of the word ''record'':

(1) Library materials compiled for reference purposes or objects of substantial intrinsic value.

(2) Routing and transmittal sheets, notes, and filing notes which do not also include information, comments, or statements of substance.

(3) Anything that is not a tangible or documentary record such as an individual's memory or oral communication.

(4) Objects or articles, whatever their historical or value as evidence.

(n) *Request* means any request for records made pursuant to 5 U.S.C. 552.

(o) *Requester or requesting party* means any person who has submitted a request to Amtrak.

(p) *Responsive records* means documents or electronic records determined to be within the scope of a FOIA request.

§ 701.3. Policy.

(a) Amtrak will make records of the Corporation available to the public to the greatest practicable extent in keeping with the spirit of the law. Therefore, records of the Corporation are available electronically, which can be accessed at the Amtrak FOIA Web site *http://www.amtrak.com/foia* and *www.amtrak.com,* as provided in this part with the exception of those that the Corporation specifically determines should not be disclosed either in the public interest, for the protection of private rights, or for the efficient conduct of public or corporate business, but only to the extent withholding is permitted by law.

(b) A record of the Corporation, or parts thereof, may be withheld from disclosure if the Corporation reasonably foresees that disclosure would harm an interest protected by a FOIA exemption or when disclosure is prohibited by law. Disclosure to a properly constituted advisory committee, to Congress, or to federal agencies does not waive the exemption.

(c) In the event full disclosure of a requested record is not possible, any reasonably segregable portion of the record will be made available to the requesting person after deletion of the exempt portions. The entire record may be withheld if a determination is made that nonexempt material is so inextricably intertwined that disclosure would leave only essentially meaningless words or phrases, or when it can be reasonably assumed that a skillful and knowledgeable person could reconstruct the deleted information.

(d) The procedures in this part apply only to records in existence at the time of a request. The Corporation has no obligation to create a record solely for the purpose of making it available under the FOIA or to provide a record that will be created in the future.

(e) Each officer and employee of the Corporation dealing with FOIA requests is directed to cooperate in making records available for disclosure under the Act in a prompt manner consistent with this part.

(f) The FOIA time limits will not begin to run until a request has been identified as being made under the Act and deemed received by the FOIA Office.

(g) Generally, when a member of the public complies with the procedures established in this part for obtaining records under the FOIA, the request shall receive prompt attention, and a response shall be made within twenty business days.

§ 701.4. Amtrak public information.

(a) *Amtrak FOIA Web site.* Amtrak will make available electronically records created by the Corporation that are required under the FOIA to be made available for public inspection which can be accessed at the Amtrak FOIA Web site *http://www.amtrak.com/foia* and *www.amtrak.com.*

(b) *Frequently requested information.* The FOIA requires that copies of records, regardless of form or format, that have been released pursuant to a FOIA request under 5 U.S.C. 552(a)(3) be made publicly available in an electronic format if (1) because of the nature of their subject matter they have become or are likely to become the subject of subsequent requests for substantially the same records or (2) they have been requested three or more times.

(1) Amtrak shall decide on a case-by-case basis whether records fall into the first category of ''frequently requested FOIA records'' based on the following factors:

(i) Previous experience with similar records;

(ii) The nature and type of information contained in the records;

(iii) The identity and number of requesters and whether there is widespread media or commercial interest in the records.

(2) The provision in this paragraph is intended for situations where public access in a timely manner is important. It is not intended to apply where there may be a limited number of requests over a short period of time from a few requesters. Amtrak may remove the records when it is determined that access is no longer necessary.

(c) *Guide for making requests.* A guide on how to use the FOIA for requesting records from Amtrak shall be made available to the public upon request. Amtrak's major information systems will be described in the guide.

§ 701.5. Requirements for making requests.

(a) *General requirements.*

(1) A FOIA request can be made by ''any person'' as defined in 5 U.S.C. 551(2), which encompasses individuals (including foreign citizens; partnerships; corporations; associations; and local, state, tribal, and foreign governments). A FOIA request may not be made by a federal agency.

(2) A request must be in writing, indicate that it is being made under the FOIA, and provide an adequate description of the records sought. The request should also include applicable information regarding fees as specified in paragraphs (d) and (e) of this section.

(b) *How to submit a request.*

(1) A request must clearly state on the envelope and in the letter that it is a Freedom of Information Act or ''FOIA'' request.

(2) The request must be addressed to the Freedom of Information Office; National Railroad Passenger Corporation; 60 Massachusetts Avenue, NE.; Washington, DC 20002. Requests will also be accepted by facsimile at

(202) 906–2004 or via email at *foiarequests@amtrak.com.* Amtrak cannot assure that a timely or satisfactory response under this part will be given to written requests addressed to Amtrak offices, officers, or employees other than the FOIA Office. Amtrak employees receiving a communication in the nature of a FOIA request shall forward it to the FOIA Office expeditiously. Amtrak shall advise the requesting party of the date that an improperly addressed request is received by the FOIA Office.

(c) *Content of the request—*

(1) *Description of records.* Identification of records sought under the FOIA is the responsibility of the requester. The records sought should be described in sufficient detail so that Amtrak personnel can locate them with a reasonable amount of effort. When possible, the request should include specific information such as dates, title or name, author, recipient, subject matter of the record, file designation or number, or other pertinent details for each record or category of records sought. Requesters may contact Amtrak's FOIA Public Liaison to discuss the records they seek and to receive assistance in describing the records.

(2) *Reformulation of a request.* Amtrak is not obligated to act on a request until the requester provides sufficient information to locate the record. Amtrak may offer assistance in identifying records and reformulating a request where: The description is considered insufficient, the production of voluminous records is required, or a considerable number of work hours would be required that would interfere with the business of the Corporation. The FOIA Office shall notify the requester within ten business days of the type of information that will facilitate the search. The requesting party shall be given an opportunity to supply additional information and may submit a revised request, which will be treated as a new request. Requesters may contact Amtrak's FOIA Public Liaison to receive assistance in reformulating or modifying their request.

(d) *Payment of fees.* The submission of a FOIA request constitutes an agreement to pay applicable fees accessed up to $25.00 unless the requesting party specifies a willingness to pay a greater or lesser amount or seeks a fee waiver or reduction in fees.

(1) *Fees in excess of $25.00.* When Amtrak determines or estimates that applicable fees are likely to exceed $25.00, the requesting party shall be notified of estimated or actual fees, unless a commitment has been made in advance to pay all fees. If only a portion of the fee can be estimated readily, Amtrak shall advise the requester that the estimated fee may be a portion of the total fee.

(i) In order to protect requesters from large and/or unexpected fees, Amtrak will request a specific commitment when it estimates or determines that fees will exceed $100.00.

(ii) A request shall not be considered received and further processing shall not be carried out until the requesting party agrees to pay the anticipated total fee. Any such agreement must be memorialized in writing. A notice under this paragraph will offer the requesting party an opportunity to discuss the matter in order to reformulate the request to meet the requester's needs at a lower cost.

(iii) Amtrak will hold in abeyance for ten business days requests requiring agreement to pay fees and will thereafter deem the request closed. This action will not prevent the requesting party from refiling the FOIA request with a fee commitment at a subsequent date.

(2) *Fees in excess of $250.* When Amtrak estimates or determines that allowable charges are likely to exceed $250, an advance deposit of the entire fee may be required before continuing to process the request.

(e) *Information regarding fee category.* In order to determine the appropriate fee category, a request should indicate whether the information sought is intended for commercial use or whether the requesting party is a member of the staff of an educational or noncommercial scientific institution or a representative of the news media.

(f) *Records concerning other individuals.* If the request is for records concerning another individual, either of the following may be required in order to process the request: (1) A notarized written authorization signed by that individual permitting disclosure of those records to the requesting party, together with a copy of a photo ID of that individual; or (2) proof that the individual is deceased (*i.e.,* a copy of a death certificate or an obituary). A form of identification from the requesting party may also be required. Such records are also subject to any applicable FOIA exemptions.

§ 701.6. Release and processing procedures.

(a) *General provisions.* In determining records that are responsive to a request, Amtrak will ordinarily include only records that exist and are in the possession and control of the Corporation as of the date that the search is begun. If any other date is used, the requesting party will be informed of that date.

(b) *Authority to grant or deny requests.* Amtrak's FOIA Officer is authorized to grant or deny any request for records.

(c) *Notice of referral.* If Amtrak refers all or any part of the responsibility for responding to a request to another organization, the requesting party will be notified. A referral shall not be considered a denial of access within the meaning of this part. All consultations and referrals of requests will be handled according to the date that the FOIA request was initially received.

(d) *Creating a record.* There is no obligation on the part of Amtrak to create, compile, or obtain a record to satisfy a FOIA request. The FOIA also does not require that a new computer program be developed to extract the records requested. Amtrak may compile or create a new record, however, when doing so would result in a more useful response to the requesting party or would be less burdensome to Amtrak than providing existing records. The cost of creating or compiling such a record may not be charged to the requester unless the fee for creating the record is equal to or less than the fee that would be charged for providing the existing record.

(e) *Incomplete records.* If the records requested are not complete at the time of a request, Amtrak may, at its discretion, inform the requester that complete nonexempt records will be provided when available without having to submit an additional request.

(f) *Electronic records.* Amtrak is not obligated to process a request for electronic records where creation of a record, programming, or a particular format would result in a significant expenditure of resources or interfere with the corporation's operations.

§ 701.7. Timing of responses to requests.

(a) *General.*

(1) The time limits prescribed in the FOIA will begin only after the requirements for submitting a request as established in § 701.5 have been met, and the request is deemed received by the FOIA Office.

(2) A request for records shall be considered to have been received on the later of the following dates:

(i) The requester has agreed in writing to pay applicable fees in accordance with § 701.5(d), or

(ii) The fees have been waived in accordance with § 701.11(k), or

(iii) Payment in advance has been received from the requester when required in accordance with § 701.11(i).

(3) The time for responding to requests set forth in paragraph (b) of this section may be delayed if:

(i)The request does not sufficiently identify the fee category applicable to the request;

(ii) The request does not state a willingness to pay all fees;

(iii) A request seeking a fee waiver does not address the criteria for fee waivers set forth in § 701.11(k);

(iv) A fee waiver request is denied, and the request does not include an alternative statement indicating that the requesting party is willing to pay all fees.

(b) *Initial determination.* Whenever possible, an initial determination to release or deny a record shall be made within twenty business days after receipt of the request. In ''unusual circumstances'' as described in paragraph (d) of this section, the time for an initial determination may be extended for ten business days.

(c) *Multitrack processing.*

(1) Amtrak may use two or more processing tracks by distinguishing between simple, complex, and expedited requests based on the amount of work and/or time needed to process a request or the number of pages involved.

(2) In general, when requests are received, Amtrak's FOIA Office will review and categorize them for tracking purposes. Requests within each track will be processed according to date of receipt.

(3) The FOIA Office may contact a requester when a request does not appear to qualify for fast track processing to provide an opportunity to limit the scope of the request and qualify for a faster track. Such notification shall be at the discretion of the FOIA Office and will depend largely on whether it is believed that a narrowing of the request could place the request on a faster track.

(d) *Unusual circumstances.*

(1) The requesting party shall be notified in writing if the time limits for processing a request cannot be met because of unusual circumstances, and it will be necessary to extend the time limits for processing the request. The notification shall set forth the unusual circumstances for such extension and shall include the date by which the request can be expected to be completed. Where the extension is for more than ten business days, the requesting party will be afforded an opportunity to either modify the request so that it may be processed within the time limits or to arrange an alternative time period for processing the initial request or modified request. In such a case, the requesting party has the right to seek assistance from Amtrak's FOIA Public Liaison and to seek dispute resolution services from the Office of Government Information Services (OGIS). If Amtrak fails to comply with the extended time limit, no search fees (or, in the case of requesters described in § 701.11(d)(2), no duplication fees) may be charged unless more than 5,000 pages are necessary to respond to the request, timely written notice has been sent out, and Amtrak has discussed with the requesting party via written mail, email, or telephone (or made not less than three good-faith attempts to do so) how the requesting party could effectively limit the scope of the request.

(2) If Amtrak believes that multiple requests submitted by a requester or by a group of requesters acting in concert constitute a single request that would otherwise involve unusual circumstances and the requests involve clearly related matters, the requests may be aggregated. Multiple requests concerning unrelated matters may not be aggregated.

(3) Unusual circumstances that may justify delay include:

(i) The need to search for and collect the requested records from other facilities that are separate from Amtrak's headquarters offices.

(ii) The need to search for, collect, and examine a voluminous amount of separate and distinct records sought in a single request.

(iii) The need for consultation, which shall be conducted with all practicable speed, with agencies having a substantial interest in the determination of the request, or among two or more Amtrak components having a substantial subject-matter interest in the request.

(e) *Expedited processing.*

(1) Requests and appeals may be taken out of order and given expedited treatment whenever it is determined that they involve a compelling need, which means:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; and

(ii) An urgency to inform the public about an actual or alleged Amtrak activity, if made by a person primarily engaged in disseminating information.

(2) A request for expedited processing may be made at the time of the initial request for records or at a later date.

(3) A requester seeking expedited processing must submit a statement, certified to be true and correct to the best of that person's knowledge and belief, explaining in detail the basis for requesting expedited processing. This statement must accompany the request in order to be considered and responded to within the ten calendar days required for decisions on expedited access.

(4) A requester who is not a full-time member of the news media must establish that he is a person whose main professional activity or occupation is information dissemination, though it need not be his sole occupation. A requester must establish a particular urgency to inform the public about the Amtrak activity involved in the request.

(5) Within ten business days of receipt of a request for expedited processing, Amtrak shall determine whether to grant such a request and notify the requester of the decision. If a request for expedited treatment is granted, the request shall be given priority and shall be processed as soon as practicable.

(6) Amtrak shall provide prompt consideration of appeals of decisions denying expedited processing.

§ 701.8. Responses to requests.

(a) *Granting of requests.* When an initial determination is made to grant a request in whole or in part, the requesting party shall be notified in writing and advised of any fees charged under § 701.11(e). The records shall be disclosed to the requesting party promptly upon payment of applicable fees. The requesting party has the right to seek assistance from Amtrak's FOIA Public Liaison.

(b) *Adverse determination of requests—*

(1) *Types of denials.* The requesting party shall be notified in writing of a determination to deny a request in any respect. Adverse determinations or denials of records consist of:

(i) A determination to withhold any requested record in whole or in part;

(ii) A determination that a requested record does not exist or cannot be located;

(iii) A denial of a request for expedited treatment; and

(iv) A determination on any disputed fee matter including a denial of a request for a fee waiver.

(2) *Deletions.* Records disclosed in part shall be marked clearly to show both the amount of the information deleted and the exemption under which the deletion was made unless doing so would harm an interest protected by an applicable exemption. If technically feasible, the amount of the information deleted and the exemption under which the deletion is made shall be indicated at the place in the record where such deletion is made.

(3) *Content of denial letter.* The denial letter shall be signed by the FOIA Officer or designee and shall include:

(i) A brief statement of the reason(s) for the adverse determination including any FOIA exemptions applied in denying the request;

(ii) An estimate of the volume of information withheld (number of pages or some other reasonable form of estimation). An estimate does not need to be provided if the volume is indicated through deletions on records disclosed in part, or if providing an estimate would harm an interest protected by an applicable exemption;

(iii) A statement that an appeal may be filed under § 701.10 and a description of the requirements of that section and of the right of the requesting party to seek dispute resolution services from either Amtrak's FOIA Public Liaison or the Office of Government Information Services (OGIS); and

(iv) The name and title or position of the person responsible for the denial.

(4) *Engaging in dispute resolution services provided by OGIS.* Mediation is a voluntary process. If Amtrak agrees to participate in the mediation services provided by OGIS, it will actively engage as a partner to the process in an attempt to resolve the dispute.

§ 701.9. Business information.

(a) *General.* Business information held by Amtrak will be disclosed under the FOIA only under this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Business information* means commercial or financial information held by Amtrak that may be protected from disclosure under Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).

(2) *Submitter* means any person or entity including partnerships; corporations; associations; and local, state, tribal, and foreign governments.

(c) *Designation of business information.* A submitter of business information will use good faith efforts to designate, by appropriate markings, either at the time of submission or at a reasonable time thereafter, any portions of its submission that it considers to be protected from disclosure under Exemption 4. These designations will expire ten years after the date of the submission unless the submitter requests and provides justification for a longer designation period.

(d) *Notice to submitters.* Amtrak shall provide a submitter with prompt written notice of an FOIA request or an appeal that seeks its business information when required under paragraph (e) of this section, except as provided in paragraph (h), in order to give the submitter an opportunity to object to disclosure of any specified portion of the information under paragraph (f). The notice shall either describe the business information requested or include copies of the requested records or portions of records containing the information.

(e) *When notice is required.* Notice shall be given to a submitter when:

(1) The information has been designated in good faith by the submitter as information considered protected from disclosure under Exemption 4; or

(2) Amtrak has reason to believe that the information may be protected from disclosure under Exemption 4.

(f) *Opportunity to object to disclosure.* Amtrak will allow a submitter a reasonable amount of time, as determined by Amtrak in its sole discretion, to respond to the notice described in paragraph (d) of this section.

(1) A detailed written statement must be submitted to Amtrak if the submitter has any objection to disclosure. The statement must specify all grounds for withholding any specified portion of the information sought under the FOIA. In the case of Exemption 4, it must show why the information is a trade secret or commercial or financial information that is privileged or confidential.

(2) Unless otherwise specified, in the event that a submitter fails to respond within the time specified in the notice, the submitter may, in Amtrak's discretion, be considered to have no objection to disclosure of the information sought under the FOIA.

(3) Information provided by a submitter in response to the notice may be subject to disclosure under the FOIA.

(g) *Notice of intent to disclose.* Amtrak shall consider a submitter's objections and specific grounds for disclosure in making a determination whether to disclose the information. In any instance, when a decision is made to disclose information over the objection of a submitter, Amtrak shall give the submitter written notice which shall include:

(1) A statement of the reason(s) why each of the submitter's objections to disclosure was not sustained;

(2) A description of the information to be disclosed; and

(3) A specified disclosure date, which shall be a reasonable time subsequent to the notice as determined by Amtrak in its sole discretion.

(h) *Exceptions to notice requirements.* The notice requirements of this section shall not apply if:

(1) Amtrak determines that the information should not be disclosed;

(2) The information has been published or has been officially made available to the public;

(3) Disclosure of the information is required by law (other than the FOIA);

(4) The designation made by the submitter under paragraph (c) of this section appears obviously frivolous. In such a case, Amtrak shall, prior to a specified disclosure date, give the submitter written notice of the final decision to disclose the information; or

(5) The information requested is not designated by the submitter as exempt from disclosure in accordance with this part, unless Amtrak has substantial reason to believe that disclosure of the information would result in competitive harm.

(i) *Notice of a FOIA lawsuit.* Whenever a FOIA requester files a lawsuit seeking to compel disclosure of business information, Amtrak shall promptly notify the submitter.

(j) *Notice to requesters.*

(1) When Amtrak provides a submitter with notice and an opportunity to object to disclosure under paragraph (f) of this section, the FOIA Office shall also notify the requester(s).

(2) When Amtrak notifies a submitter of its intent to disclose requested information under paragraph (g) of this section, Amtrak shall also notify the requester(s).

(3) When a submitter files a lawsuit seeking to prevent the disclosure of business information, Amtrak shall notify the requester(s).

§ 701.10. Appeals.

(a) *Appeals of adverse determinations.*

(1) The requesting party may appeal:

(i) A decision to withhold any requested record in whole or in part;

(ii) A determination that a requested record does not exist or cannot be located;

(iii) A denial of a request for expedited treatment; or

(iv) Any disputed fee matter or the denial of a request for a fee waiver.

(2) The appeal must be addressed to the President and Chief Executive Officer, in care of the Chief Legal Officer and General Counsel; National Railroad Passenger Corporation; 60 Massachusetts Avenue NE., Washington, DC 20002.

(3) The appeal must be in writing and specify the relevant facts and the basis for the appeal. The appeal letter and envelope must be marked prominently ''Freedom of Information Act Appeal'' to ensure that it is properly routed.

(4) The appeal must be received by the President's Office within ninety days of the date of denial.

(5) An appeal will not be acted upon if the request becomes a matter of FOIA litigation.

(b) *Responses to appeals.* The decision on any appeal shall be made in writing.

(1) A decision upholding an adverse determination in whole or in part shall contain a statement of the reason(s) for such action, including any FOIA exemption(s) applied. The requesting party shall also be advised of the provision for judicial review of the decision contained in 5 U.S.C. 552(a)(4)(B).

(2) If the adverse determination is reversed or modified on appeal in whole or in part, the requesting party shall be notified, and the request shall be reprocessed in accordance with the decision.

(c) *When appeal is required.* The requesting party must timely appeal any adverse determination prior to seeking judicial review.

§ 701.11. Fees.

(a) *General.* Amtrak shall charge for processing requests under the FOIA in accordance with this section. A fee of $38 per hour shall be charged for search and review. For information concerning other processing fees, refer to paragraph (e) of this section. Amtrak shall collect all applicable fees before releasing copies of requested records to the requesting party. Payment of fees shall be made by check or money order payable to the National Railroad Passenger Corporation.

(b) *Definitions.* For purposes of this section:

(1) *Search* means the process of looking for and retrieving records or information responsive to a request. It includes page-by-page or line-by-line identification of information within records and also includes reasonable efforts to locate and retrieve information from records maintained in electronic form or format.

(2) *Review* means the process of examining a record located in response to a request to determine whether one or more of the statutory exemptions of the FOIA apply. Processing any record for disclosure includes doing all that is necessary to redact the record and prepare it for release. Review time includes time spent considering formal objection to disclosure by a commercial submitter under § 701.9 but does not include time spent resolving general legal or policy issues regarding the application of exemptions. Review costs are recoverable even if a record ultimately is not disclosed.

(3) *Reproduction* means the making of a copy of a record or the information contained in it in order to respond to a FOIA request. Copies can take the form of paper, microform, audiovisual materials, or electronic records (*i.e.,* magnetic tape or disk) among others. Amtrak shall honor a requester's specified preference for the form or format of disclosure if the record is readily reproducible with reasonable effort in the requested form or format by the office responding to the request.

(4) *Direct costs* means those expenses actually incurred in searching for and reproducing (and, in the case of commercial use requests, reviewing) records to respond to a FOIA request. Direct costs include such costs as the salary of the employee performing the work (the basic rate of pay for the employee plus applicable benefits and the cost of operating reproduction equipment). Direct costs do not include overhead expenses such as the costs of space and heating or lighting of the facility.

(c) *Fee categories.* There are four categories of FOIA requesters for fee purposes: ''commercial use requesters,'' ''representatives of the news media,'' ''educational and non-commercial scientific institution requesters,'' and ''all other requesters.'' The categories are defined in paragraphs (c)(1) through (5), and applicable fees, which are the same for two of the categories, will be assessed as specified in paragraph (d) of this section.

(1) *Commercial requesters.* The term ''commercial use'' request refers to a request from or on behalf of a person who seeks information for a use or purpose that furthers his commercial, trade, or profit interests, including furthering those interests through litigation. Amtrak shall determine, whenever reasonably possible, the use to which a requester will put the records sought by the request. When it appears that the requesting party will put the records to a commercial use, either because of the nature of the request itself or because Amtrak has reasonable cause to doubt the stated intended use, Amtrak shall provide the requesting party with an opportunity to submit further clarification. Where a requester does not explain the use or where explanation is insufficient, Amtrak may draw reasonable inferences from the requester's identity and charge accordingly.

(2) *Representative of the news media or news media requester* refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large and publishers of periodicals (but only in those instances where they can qualify as disseminators of news). For ''freelance'' journalists to be regarded as working for a news organization, they must demonstrate a solid basis for expecting publication through an organization. A publication contract would be the clearest proof, but Amtrak shall also look to the past publication record of a requester in making this determination. A request for records supporting the news dissemination function of the requester shall not be considered to be for commercial use.

(3) *Educational institution* refers to a preschool, a public or private elementary or secondary school, an institution of undergraduate higher education, an institution of graduate higher education, an institution of professional education, or an institution of vocational education that operates a program of scholarly research. To be in this category, a requester must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are not sought for commercial use but to further scholarly research.

(4) *Noncommercial scientific institution* refers to an institution that is not operated on a ''commercial'' basis, as that term is defined in paragraph (c)(1) of this section, and that is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry. To be in this category, the requesting party must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are not sought for commercial use but to further scientific research.

(5) *Other requesters* refers to requesters who do not come under the purview of paragraphs (c)(1) through (4) of this section.

(d) *Assessing fees.* In responding to FOIA requests, Amtrak shall charge the following fees unless a waiver or a reduction in fees has been granted under paragraph (k) of this section:

(1) ''*Commercial use*'' *requesters:* The full allowable direct costs for search, review, and duplication of records.

(2) ''*Representatives of the news media*'' *and* ''*educational and non-commercial scientific institution*'' *requesters:* Duplication charges only, excluding charges for the first 100 pages.

(3) ''*All other*'' *requesters:* The direct costs of search and duplication of

records. The first 100 pages of duplication and the first two hours of search time shall be provided without charge.

(e) *Schedule of fees—*

(1) *Manual searches.* Personnel search time includes time expended in either manual searches for paper records, searches using indices, review of computer search results for relevant records, and personal computer system searches.

(2) *Computer searches.* The direct costs of conducting a computer search will be charged. These direct costs will include the cost of operating a central processing unit for that portion of the operating time that is directly attributable to searching for responsive records as well as the costs of operator/programmer salary apportionable to the search.

(3) *Duplication fees.* Duplication fees will be charged all requesters subject to limitations specified in paragraph (d) of this section. Amtrak shall charge 25 cents per page for a paper photocopy of a record. For copies produced by computer (such as tapes or printouts), Amtrak will charge the direct costs, including the operator time in producing the copy. For other forms of duplication, Amtrak will charge the direct costs of that duplication.

(4) *Review fees.* Review fees will be assessed for commercial use requests. Such fees will be assessed for review conducted in making an initial determination, or upon appeal, when review is conducted to determine whether an exemption not previously considered is applicable.

(5) *Charges for other services.* The actual cost or amount shall be charged for all other types of output, production, and duplication (*e.g.,* photographs, maps, or printed materials). Determinations of actual cost shall include the commercial cost of the media, the personnel time expended in making the item available for release, and an allocated cost for the equipment used in producing the item. The requesting party will be charged actual production costs when a commercial service is required. Items published and available through Amtrak will be made available at the publication price.

(6) *Charges for special services.* Apart from the other provisions of this section, when Amtrak chooses as a matter of discretion to provide a special service such as sending records by other than ordinary mail, the direct costs of providing such services shall be charged.

(f) *Commitment to pay fees.* When Amtrak determines or estimates that applicable fees will likely exceed $25.00, the requesting party will be notified of the actual or estimated amount unless a written statement has been received indicating a willingness to pay all fees. To protect requesters from large and/or unexpected fees, Amtrak will request a specific commitment when it is estimated or determined that fees will exceed $100.00. See § 701.5(d) for additional information.

(g) *Restrictions in accessing fees—*

(1) *General.* Fees for search and review will not be charged for a quarter-hour period unless more than half of that period is required.

(2) *Minimum fee.* No fees will be charged if the cost of collecting the fee is equal to or greater than the fee itself. That cost includes the costs to Amtrak for billing, receiving, recording, and processing the fee for deposit, which has been deemed to be $10.00.

(3) *Computer searches.* With the exception of requesters seeking documents for commercial use, Amtrak shall not charge fees for a computer search until the cost of search equals the equivalent dollar amount of two hours of the salary of the operator performing the search.

(h) *Nonproductive searches.* Amtrak may charge for time spent for search and review even if responsive records are not located or if the records located are determined to be entirely exempt from disclosure.

(i) *Advance payments.*

(1) When Amtrak estimates or determines that charges are likely to exceed $250, an advance payment of the entire fee may be required before continuing to process the request.

(2) Where a requester has previously failed to pay a properly charged FOIA fee within thirty (30) days of the date of billing, Amtrak may require the full amount due plus applicable interest and an advance payment of the full amount of anticipated fees before beginning to process a new request or continuing to process a pending request. The time limits of the FOIA will begin only after Amtrak has received such payment.

(3) Amtrak will hold in abeyance for thirty days requests where deposits are due.

(4) Monies owed for work already completed (*i.e.,* before copies are sent to a requester) shall not be considered an advance payment.

(5) Amtrak shall not deem a request as being received in cases in which an advance deposit or payment is due, and further work will not be done until the required payment is received.

(j) *Charging interest.* Amtrak may charge interest on any unpaid bill for processing charges starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate that Amtrak pays for short-term borrowing.

(k) *Waiver or reduction of fees—*

(1) *Automatic waiver of fees.* When the costs for a FOIA request total $10.00 or less, fees shall be waived automatically for all requesters regardless of category.

(2) *Other fee waivers.* Decisions to waive or reduce fees that exceed the automatic waiver threshold shall be made on a case-by-case basis. Records responsive to a request will be furnished without charge or at below the established charge where Amtrak determines, based on all available information, that disclosure of the requested information is in the public interest because:

(i) It is likely to contribute significantly to public understanding of the operations or activities of Amtrak, and

(ii) It is not primarily in the commercial interest of the requesting party.

(3) To determine whether the fee waiver requirement in paragraph (k)(2)(i) of this section is met, Amtrak will consider the following factors:

(i) *The subject of the request—whether the subject of the requested records concerns the operations or activities of Amtrak.* The subject of the requested records must concern identifiable operations or activities of Amtrak with a connection that is direct and clear, not remote or attenuated.

(ii) *The informative value of the information to be disclosed—whether the disclosure is likely to contribute to an understanding of Amtrak operations or activities.* The disclosable portions of the requested records must be meaningfully informative about Amtrak's operations or activities in order to be found to be likely to contribute to an increased public understanding of those operations or activities. The disclosure of information that already is in the public domain, in either a duplicative or a substantially identical form, would not be as likely to contribute to such understanding where nothing new would be added to the public's understanding.

(iii) *The contribution to an understanding of the subject by the public likely to result from disclosure—whether disclosure of the requested information will contribute to public understanding.* The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject as opposed to the individual understanding of the requester. A requester's ability and

expertise in the subject area as well as the requester's intention to effectively convey information to the public shall be considered. It shall be presumed that a representative of the news media will satisfy this consideration.

(iv) *The significance of the contribution to public understanding—whether the disclosure is likely to contribute significantly to public understanding of Amtrak operations or activities.* The public's understanding of the subject in question, as compared to the level of public understanding existing prior to the disclosure, must be enhanced by the disclosure to a significant extent.

(4) To determine whether the fee waiver requirement in paragraph (k)(2)(ii) of this section is met, Amtrak will consider the following factors:

(i) *The existence and magnitude of a commercial interest—whether the requesting party has a commercial interest that would be furthered by the requested disclosure.* Amtrak shall consider any commercial interest of the requesting party (with reference to the definition of ''commercial use'' in paragraph (c)(1) of this section) or any person on whose behalf the requesting party may be acting that would be furthered by the requested disclosure. Requesters shall be given an opportunity to provide explanatory information regarding this consideration.

(ii) *The primary interest in disclosure—whether the magnitude of the identified commercial interest of the requester is sufficiently large in comparison with the public interest in disclosure, that disclosure is ''primarily in the commercial interest of the requester.''* A fee waiver or reduction is justified where the public interest standard is satisfied and public interest is greater in magnitude than any identified commercial interest in disclosure.

(5) Requests for a fee waiver will be considered on a case-by-case basis, based upon the merits of the information provided. Where it is difficult to determine whether the request is commercial in nature, Amtrak may draw inference from the requester's identity and the circumstances of the request.

(6) Requests for a waiver or reduction of fees must address the factors listed in paragraphs (k) (3) and (4) of this section. In all cases, the burden shall be on the requesting party to present evidence of information in support of a request for a waiver of fees.

(l) *Aggregating requests.* A requester may not file multiple requests at the same time in order to avoid payment of fees. Where Amtrak reasonably believes that a requester or a group of requesters acting in concert is attempting to divide a request into a series of requests for the purpose of avoiding fees, Amtrak may aggregate those requests and charge accordingly. Amtrak may presume that multiple requests of this type made within a thirty-day period have been made in order to avoid fees. Where requests are separated by a longer period, Amtrak may aggregate them only when there exists a reasonable basis for determining that aggregation is warranted in view of all the circumstances involved. Multiple requests involving unrelated matters may not be aggregated.

§ 701.12. Other rights and services.

Nothing in this part shall be construed as entitling any person, as of right, to any service or the disclosure of any record to which such person is not entitled under the FOIA.

Dated: November 10, 2016.

Eleanor D. Acheson,

Executive Vice President, Chief Legal Officer, General Counsel & Corporate Secretary.

BILLING CODE 9600–51–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 160630574–6574–01]

RIN 0648–BG18

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Hogfish Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to implement management measures described in Amendment 43 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (Gulf)(FMP), as prepared by the Gulf of Mexico Fishery Management Council (Gulf Council)(Amendment 43). This proposed rule would revise the geographic range of the fishery management unit (FMU) for Gulf hogfish (the West Florida stock) consistent with the South Atlantic Fishery Management Council's (South Atlantic Council) proposed boundary between the Florida Keys/East Florida and West Florida stocks, set the annual catch limit (ACL) for the West Florida stock, increase the minimum size limit for the proposed West Florida stock, and remove the powerhead exception for harvest of hogfish in the Gulf reef fish stressed area. This proposed rule would also correct a reference in the regulatory definition for charter vessel. The purpose of this proposed rule is to manage hogfish using the best scientific information available.

DATES: Written comments must be received by December 23, 2016.

ADDRESSES: You may submit comments on the proposed rule identified by ''NOAA–NMFS–2016–0126'' by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0126,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit all written comments to Peter Hood, NMFS Southeast Regional Office, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of Amendment 43, which includes an environmental assessment, a fishery impact statement, a Regulatory Flexibility Act (RFA) analysis, and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/reef_fish/2016/am43/index.html.*

FOR FURTHER INFORMATION CONTACT: Peter Hood, NMFS Southeast Regional Office, telephone: 727–824–5305, email: *peter.hood@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS and the Council manage the Gulf reef fish fishery, which includes hogfish, under the FMP. The Council prepared the FMP and NMFS implements the FMP

through regulations at 50 CFR part 622 under the authority of the Magnuson Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*).

Background

The Magnuson-Stevens Act requires NMFS and regional fishery management councils to prevent overfishing and achieve, on a continuing basis, the optimum yield from federally managed fish stocks. These mandates are intended to ensure fishery resources are managed for the greatest overall benefit to the nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems.

Hogfish occur throughout the Gulf but are caught primarily off the Florida west coast. Hogfish are managed with a stock ACL and no allocation between the commercial and recreational sectors. Generally, the fishing season for both sectors is open year-round, January 1 through December 31. However, accountability measures (AMs) for hogfish specify that if commercial and recreational landings exceed the stock ACL in a fishing year, then during the following fishing year, if the stock ACL is reached or is projected to be reached, the commercial and recreational sectors will be closed for the remainder of the fishing year. The hogfish ACL and AMs were implemented in 2012 (76 FR 82044, December 29, 2011). The AMs were triggered when the hogfish ACL was exceeded in 2012, and the 2013 season was closed on December 2 because NMFS determined that the 2013 hogfish stock ACL had been harvested (78 FR 72583, December 3, 2013). The stock ACL was exceeded again in 2013. However, there was no closure in 2014 and the stock ACL was not exceeded in the 2014 or 2015 fishing years.

In 2014, the Florida Fish and Wildlife Conservation Commission (FWC) completed the most recent stock assessment for hogfish through the Southeast Data, Assessment, and Review process (SEDAR 37). SEDAR 37 divided the hogfish stock into three stocks based upon genetic analysis as follows: the West Florida stock, the Florida Keys/East Florida stock, and the Georgia through North Carolina stock. The West Florida stock is completely within the jurisdiction of the Gulf Council and the Georgia through North Carolina stock is completely within the jurisdiction of the South Atlantic Council. The Florida Keys/East Florida stock crosses the two Councils' jurisdictional boundary, with a small portion of the stock extending into the Gulf Council's jurisdiction off the west coast of Florida. Based on SEDAR 37 and the Gulf and South Atlantic Councils' Scientific and Statistical Committee (SSC) recommendations, NMFS determined that the West Florida stock is not overfished or undergoing overfishing, the Florida Keys/East Florida stock is overfished and experiencing overfishing, and the status of the Georgia through North Carolina stock is unknown. NMFS notified the Gulf and South Atlantic Councils of these stock status determinations via letter on February 17, 2015.

Because only a small portion of the Florida Keys/East Florida stock extends into the Gulf Council's jurisdiction off south Florida, the Gulf Council's SSC recommended that the South Atlantic Council's SSC take the lead in setting the overfishing limit (OFL) and acceptable biological catch (ABC) for the Florida Keys/East Florida stock. The Gulf Council's SSC reviewed and provided recommendations on the west Florida shelf (Gulf) portion of the stock assessment.

Management Measures Contained in This Proposed Rule

If implemented, this proposed rule would: Revise the hogfish FMU managed by the FMP to the West Florida hogfish stock, which includes hogfish in the Gulf exclusive economic zone (EEZ), except south of a line extending due west from 25°09′ N. lat. off the west coast of Florida; specify the ACL for the West Florida hogfish stock; increase the minimum size limit for the West Florida stock; and remove the powerhead exception for harvest of hogfish in the Gulf reef fish stressed area.

Fishery Management Unit

The South Atlantic Council developed and submitted for review by the Secretary of Commerce a rebuilding plan for the Florida Keys/East Florida stock through Amendment 37 to the FMP for the Snapper-Grouper Fishery of the South Atlantic Region (Amendment 37). A small portion of the Florida Keys/East Florida stock, as defined by the SEDAR 37, extends into Gulf waters in the Gulf Council's jurisdiction in south Florida. Therefore, in Amendment 43 and this proposed rule, the Gulf Council would revise the hogfish FMU in the Gulf to be the West Florida stock, and would define the geographic range of this stock consistent with the South Atlantic Council's proposed boundary between the Florida Keys/East Florida and West Florida hogfish stocks in Amendment 37. This boundary would be a line extending west along 25°09′ N. lat. to the outer boundary of the EEZ, which is just south of Cape Sable, Florida, on the west coast of Florida. The Gulf Council would manage hogfish (the West Florida stock) in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida. The South Atlantic Council would manage hogfish (the Florida Keys/East Florida stock) in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida, and in the South Atlantic EEZ to the state border of Florida and Georgia. This boundary is south of the line used in SEDAR 37, which defined the West Florida stock as north of the Monroe and Collier County, Florida, boundary line. Therefore, it is possible that some fish that are part of the Florida Keys/East Florida stock will be harvested under the regulations set by the Gulf Council. However, the majority of hogfish landings in Monroe County occur in the Florida Keys, and the proposed boundary is far enough north of the Florida Keys that fishing trips originating in the Florida Keys rarely travel north of the boundary, and far enough south of Naples and Marco Island, Florida, that fishing trips originating from these locations rarely travel south of the boundary. In addition, the boundary line proposed by the Gulf and South Atlantic Councils is currently used by the FWC as a regulatory boundary for certain state-managed species. Using a pre-existing management boundary will increase enforceability and help fishermen by simplifying regulations across adjacent management jurisdictions.

In accordance with section 304(f) of the Magnuson-Stevens Act, the Gulf Council requested that the Secretary of Commerce designate the South Atlantic Council as the responsible Council for management of the Florida Keys/East Florida hogfish stock in Gulf Federal waters south of 25°09′ N. lat. near Cape Sable on the west coast of Florida. If the Gulf Council's request is approved, the Gulf Council would continue to manage hogfish in Federal waters in the Gulf, except in Federal waters south of this boundary. Therefore, the South Atlantic Council, and not the Gulf Council, would establish the management measures for the entire range of the Florida Keys/East Florida hogfish stock, including in Federal waters south of 25°09′ N. lat. near Cape Sable in the Gulf. Commercial and recreational for-hire vessels fishing for hogfish in Gulf Federal waters, *i.e.,* north and west of the jurisdictional boundary between the Gulf and South Atlantic Councils (approximately at the Florida Keys), as defined at 50 CFR 600.105(c), would still be required to have the appropriate Federal Gulf reef fish permits, and

vessels fishing for hogfish in South Atlantic Federal waters, *i.e.,* south and east of the jurisdictional boundary, would still be required to have the appropriate Federal South Atlantic snapper-grouper permits. Those permit holders would still be required to follow the sale and reporting requirements associated with the respective permits.

NMFS specifically seeks public comment regarding the revised stock boundaries and the manner in which the Councils would have jurisdiction over these stocks if both Amendment 37 for the South Atlantic Council and Amendment 43 for the Gulf Council are approved and implemented. NMFS published notices of availability, seeking comments on Amendment 37 and Amendment 43, on October 7, 2016, and November 4, 2016, respectively (81 FR 69774 and 81 FR 76908).

Annual Catch Limit

The current stock ACL and annual catch target (ACT) for Gulf hogfish were established based on 1999–2008 landings. The ACL and ACT were set using the Gulf Council's ABC control rule for stocks that have not been assessed, but are stable over time, or are unlikely to undergo overfishing at current average levels. The SEDAR 37 projections produced annual yields for OFL and ABC for the West Florida hogfish stock for the 2016 through 2026 fishing years are based on an overfishing threshold of the fishing morality rate (F) at 30 percent spawning potential ratio ($F_{30\%SPR}$). However, because of increasing uncertainty with long-range projections, the Gulf Council's SSC only provided OFL and ABC recommendations for the West Florida hogfish stock for the first 3 years, 2016 through 2018. The 2016–2018 OFLs were 257,100 lb (116,619 kg), 229,400 lb (104,054 kg), and 211,000 lb (95,708 kg), round weight, respectively, and the 2016–2018 ABCs were 240,400 lb (109,044 kg), 216,800 lb (98,339 kg), and 200,800 lb (91,081 kg), round weight, respectively. The Gulf Council's SSC also made constant catch OFL and ABC recommendations based on the averages of the 2016–2018 OFLs and ABCs of 232,000 lb (105,233 kg), and 219,000 lb (99,337 kg), round weight, respectively. For 2019, and subsequent years, the SSC recommended an OFL and ABC set at the equilibrium yield of 161,900 lb (73,028 kg), and 159,300 lb (72,257 kg), round weight, respectively.

The proposed rule would set the ACL for the West Florida hogfish stock at 219,000 lb (99,337 kg), round weight, for the 2017 and 2018 fishing years and is based on the Gulf Council's SSC ABC recommendations that averaged the 2016 through 2018 ABC yield streams. In 2019, and subsequent fishing years, the stock ACL would be set at the equilibrium ABC of 159,300 lb (72,257 kg), round weight. The Council decided to discontinue the designation of an ACT, because it is not used in the current AMs or for other management purposes.

Minimum Size Limit

Although the West Florida hogfish stock is not overfished or undergoing overfishing, the stock could be subject to seasonal closures if landings exceed the stock ACL and AMs are triggered. The Gulf Council's Reef Fish Advisory Panel recommended increasing the minimum size limit in Federal waters from 12 inches (30.5 cm), fork length (FL), to 14 inches (35.6 cm), FL, to reduce the directed harvest rate and reduce the probability of exceeding the ACL. This minimum size limit increase was also supported in public testimony by fishermen. The minimum size limit increase is projected to reduce the recreational harvest rate by 10 to 35 percent and reduce the commercial harvest rate by 6 to 28 percent, depending upon time of year and type of fishing. This action has an additional benefit of allowing hogfish to grow larger and have an additional spawning opportunity before being susceptible to harvest.

Powerhead Exemption

Currently, as described at 50 CFR 622.35(a), a regulatory exemption allows for the harvest of hogfish using powerheads in the reef fish stressed area. The powerhead exemption is a regulatory holdover from when hogfish were listed in the regulations as a ''species in the fishery but not in the reef fish fishery management unit.'' Amendment 15 to the FMP (62 FR 67714, December 30, 1997) removed 25 reef fish species and left 4 species (hogfish, queen triggerfish, sand perch, and dwarf sand perch) in the category of ''species in the fishery but not the management unit.'' Amendment 15 to the FMP also included a provision that reinstated the allowance of powerheads in the reef fish stressed area to harvest these four reef fish species. In 1999, Amendment 16B to the FMP (64 FR 57403, October 10, 1999) removed the distinction between reef fish species in the management unit and those in the fishery but not in the management unit and also removed queen triggerfish from the FMU. Even though the ''species in the fishery but not the management unit'' category no longer existed, the other three species from this category continued to be listed as exempt from powerhead prohibition. Sand perch and dwarf sand perch were removed from the FMP in 2011, through the Gulf Council's Generic ACL/AM Amendment (76 FR 82043, December 29, 2011), leaving only hogfish subject to the powerhead exemption.

This proposed rule would remove the provision that exempts hogfish from the prohibition on the use of powerheads to take Gulf reef fish in the Gulf reef fish stressed area. By removing the powerhead exemption for hogfish, hogfish would be subject to the same regulations for Gulf reef fish in the stressed area as other species in the reef fish FMU. The stressed area begins at the shoreward boundary of Federal waters and generally follows the 10-fathom contour from the Dry Tortugas to Sanibel Island, Florida; the 20-fathom contour to Tarpon Springs, Florida; the 10-fathom contour to Cape San Blas, Florida; the 25-fathom contour to south of Mobile Bay, Alabama; the 13-fathom contour to Ship Island, Mississippi; the 10-fathom contour off Louisiana; and the 30-fathom contour off Texas. The original FMP established the stressed area for purposes of preventing the localized depletion of reef fish stocks in nearshore waters, and to reduce the potential for gear conflicts (49 FR 39548, October 9, 1984). The coordinates for the reef fish stressed area are provided in 50 CFR part 622, Table 2 in Appendix B.

Management Measures Contained in Amendment 43 But Not Codified Through This Proposed Rule

Amendment 43 would also specify hogfish status determination criteria (SDC) for the hogfish West Florida stock. The minimum stock size threshold (MSST) and maximum fishing mortality threshold (MFMT) are used to determine if a stock is overfished or undergoing overfishing, respectively. If the stock biomass falls below the MSST, then the stock is considered overfished and the Gulf Council would then need to develop a rebuilding plan capable of returning the stock to a level that allows the stock to produce maximum sustainable yield (MSY) on a continuing basis. If fishing mortality exceeds the MFMT, a stock is considered to be undergoing overfishing because this level of fishing mortality, if continued, would reduce the stock biomass to an overfished condition.

Currently, the only SDC implemented for Gulf hogfish is the overfishing threshold, or MFMT. This threshold was approved by NMFS through the Gulf Council's Sustainable Fisheries Act Generic Amendment on November 17, 1999. The overfished threshold, or

MSST, and MSY in the Sustainable Fisheries Act Generic Amendment were disapproved because these values were not biomass based.

In setting SDC in Amendment 43, the Council selected the spawning potential ratio (SPR) as the basis for an MSY proxy. The SPR is calculated as the average number of eggs per fish over its lifetime when the stock is fished compared to the average number of eggs per fish over its lifetime when the stock is not fished. The SPR assumes that a certain amount of fish must survive and spawn in order to replenish the stock. Analyses of stocks with various life histories suggest that, in general, SPR levels of 30 to 40 percent are most commonly associated with MSY. Amendment 43 proposes to use the equilibrium yield from fishing at $FF_{30\%SPR}$ as a proxy for MSY. This proxy is consistent to that used in SEDAR 37 and is consistent with the MSY proxy commonly used for reef fish species.

Both the proposed hogfish MFMT and MSST are based on this MSY proxy. The current MFMT value of $FF_{30\%SPR}$ for hogfish is already consistent with the MSY proxy and is not being changed in Amendment 43. To be consistent with the MSY proxy, the MSST needs to be equal to or reduced from the spawning stock biomass (SSB) capable of producing an equilibrium yield when fished at $FF_{30\%SPR}$ ($SSBF_{30\%SPR}$). The closer the MSST value is to $SSBF_{30\%SPR}$, the more likely a stock could be mistakenly declared overfished due to year-to-year fluctuations in SSB resulting in an unneeded rebuilding plan. However, if MSST is set too low, then rebuilding the stock equilibrium levels could take longer because the difference between $SSBF_{30\%SPR}$ and MSST is larger. Therefore, in Amendment 43, the Gulf Council determined that setting the MSST at 75 percent of $SSBF_{30\%SPR}$ balanced the likelihood of declaring the stock as overfished as a result of natural variations in stock size with being able to allow the stock to recover quickly from an overfished state.

Additional Proposed Changes to Codified Text Not in Amendment 43

In 2013, NMFS reorganized the regulations in 50 CFR part 622 to improve the organization of the regulations and make them easier to use (78 FR 57534, September 19, 2013). However, during that reorganization, a regulatory reference in the definition of ''charter vessel'' in § 622.2, was inadvertently not updated as needed. The current charter vessel definition includes a reference to § 622.4(a)(2) as the provision that specifies the required commercial permits under the various fishery management plans. Although § 622.4(a)(2) addressed all of the required commercial permits before the 2013 reorganization, that provision now refers to operator permits. The reorganization of the regulations removed the various commercial permit provisions from § 622.4 and placed them in the appropriate subparts throughout part 622. This proposed rule would update the regulatory reference in the definition of charter vessel in § 622.2 to refer to commercial permits ''as required under this part''. This update in language would make the regulatory reference in the definition of charter vessel consistent with the current regulatory definition for headboat in § 622.2.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with Amendment 43, other provisions of the Magnuson-Stevens Act, and other applicable laws, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

NMFS prepared an initial regulatory flexibility analysis (IRFA) for this proposed rule, as required by section 603 of the RFA, 5 U.S.C. 603. The IRFA describes the economic impact this proposed rule, if adopted, would have on small entities. A description of the action, why it is being considered, the objectives of, and legal basis for this action are contained at the beginning of this section in the preamble and in the **SUMMARY** section of the preamble. A copy of the full analysis is available from NMFS (see **ADDRESSES**). A summary of the IRFA follows.

The Magnuson-Stevens Act provides the statutory basis for this proposed rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting or record-keeping requirements are introduced by this proposed rule.

This proposed rule would directly affect all vessels with a Gulf Federal commercial reef fish permit that harvest hogfish. A Federal commercial reef fish permit is required for commercial vessels to harvest reef fish species, including hogfish, in the Gulf EEZ. Over the period 2010 through 2014, the number of vessels with recorded commercial harvests of hogfish in the Gulf EEZ ranged from 55 in 2010 to 75 in 2014, or an average of 61 vessels per year, based on mandatory Federal logbook data. The average annual revenue per vessel from the harvest of all finfish species during this period by these vessels was approximately $35,600 (this estimate and all subsequent monetary estimates in this analysis are in 2014 dollars), of which approximately $2,200 was derived from the harvest of hogfish.

NMFS has not identified any other small entities that might be directly affected by this proposed rule. Although recreational anglers would be directly affected by the actions in this proposed rule, recreational anglers are not small entities under the RFA. The actions in this proposed rule would not directly apply to or change the operation of the charter vessel and headboat (for-hire) component of the recreational sector or the service this component provides, which is providing a platform to fish for and retain those fish which are caught and within legal allowances. Although angler demand for for-hire services could be affected by the management changes in this proposed rule, the resultant effects on for-hire businesses would be indirect consequences of this proposed rule.

For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing. A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. All commercial fishing vessels expected to be directly affected by this proposed rule are believed to be small business entities.

This proposed rule contains four actions pertaining to the management of the West Florida hogfish stock in the Gulf: Defining the hogfish FMU, establishing the stock ACL, setting the minimum size limit, and prohibiting the harvest of hogfish with powerheads in the reef fish stressed area. Two of these actions, defining the FMU and prohibiting the use of powerheads, would not be expected to have any direct economic effects on any small entities.

Defining the FMU is an administrative action that forms the platform from which subsequent harvest regulations, such as the ACL and minimum size limit, are based. Although direct economic effects may accrue due to the imposition and change of these harvest regulations, these effects would be indirect consequences of defining the

FMU. Indirect effects are outside the scope of the RFA.

Prohibiting the use of powerheads would not be expected to directly affect any small entities because powerheads are not expected to be a gear used to harvest hogfish. The use of powerheads for the harvest of other reef fish species in these areas is currently prohibited and, because of the small size of hogfish, powerheads would be expected to result in excessive damage to the fish and adversely affect its market quality. Thus, it is not expected that any hogfish in the reef fish stressed area are commercially harvested using powerheads, and the proposed prohibition would not be expected to reduce revenue to any commercial fishermen.

The proposed changes in the West Florida hogfish stock ACL and minimum size limit have independent and interactive effects. The proposed West Florida hogfish stock ACL would be expected to result in an increase in total (all vessels) commercial fishing revenue for 2016 through 2018 fishing years by approximately $8,900 per year, followed by a decrease in revenue of approximately $39,300 in 2019, and thereafter until the stock ACL (or other management aspect) is changed. The proposed minimum size limit would be expected to reduce commercial harvest by 17 percent, resulting in a decrease in commercial revenue each year if vessels are unable to compensate for the increased minimum size limit. Independent of the proposed West Florida hogfish stock ACL, the proposed minimum size limit would be expected to result in a decrease in total (all vessels) commercial revenue of approximately $28,500 per year.

In combination, the proposed revisions to the West Florida hogfish stock ACL and minimum size limit would be expected to result in a decrease in total (all vessels) commercial revenue of approximately $21,100 per year for 2016 through 2018 and approximately $61,100 in 2019 and each year thereafter until the stock ACL (or other management aspect) is changed. As previously stated, these projected reductions assume an inability of fishermen to benefit from the full proposed increase in the ACL due to the proposed increase in the minimum size limit, as well as compensate for the effects of the larger minimum size limit on their normal harvests (*i.e.,* pre-ACL increase). Averaged across the number of small business entities expected to be directly affected by this proposed action (55–75 entities, or an average of 61 entities per year), the expected reduction in revenue each year for 2016 through 2018 would range from $282 (75 entities) to $384 (55 entities) per year, or an average of $347 (61 entities). For 2019, and thereafter, the expected average reduction would range from $814 (75 entities) to $1,111 (55 entities) per year, or an average of $1,001 (61 entities).

Compared to the average annual revenue per vessel from all commercial fishing (approximately $35,600), the expected reduction in revenue per year as a result of the proposed West Florida hogfish stock ACL and minimum size limit would average approximately one percent of average annual total revenue for 2016 through 2018. For 2019, and thereafter, the average expected reduction in annual revenue would be approximately three percent of average annual total revenue.

In conjunction with the proposed ACL for the West Florida stock, this proposed rule would eliminate the ACT (*i.e.,* an ACT would not be defined). Although this would eliminate the current West Florida hogfish ACT, the hogfish ACT is not currently used as a fishing restraint and does not affect the harvest of hogfish, or associated revenue, in the Gulf. As a result, not defining an ACT would not be expected to have any economic effects on any small entities.

In addition to the four actions that pertain to the management of hogfish in the Gulf, this proposed rule would make a minor revision to the definition of a charter vessel. A regulatory reference within the definition of charter vessel was inadvertently not updated when the regulations at 50 CFR part 622 were reorganized in 2013 (78 FR 57534, September 19, 2013). This revision would be editorial in nature and would not be expected to have any direct effect on any small entities.

Because the proposed actions to define the Gulf hogfish FMU, specify the SDC for the West Florida hogfish stock, prohibit the use of powerheads to harvest hogfish in the reef fish stressed area, and revise the definition of charter vessel would not be expected to have any direct adverse economic effects on any small entities, the issue of significant alternatives is not relevant.

Four alternatives, including no action, were considered for the action to set the West Florida hogfish stock ACL. Each of these alternatives included options to set the West Florida hogfish ACT, and the option selected by the Gulf Council was to not define an ACT. As previously discussed, the current ACT does not restrict harvest. Thus, not defining an ACT would not be expected to have any direct economic effects, and the issue of significant alternatives (or options) is not relevant.

The first alternative (no action) to the proposed ACL for the West Florida hogfish stock would have resulted in less revenue to commercial fishermen in 2016 through 2018, and more revenue in 2019, and thereafter than the proposed change. Cumulatively (2016 through 2019 and thereafter), this alternative would have resulted in more commercial fishing revenue than the proposed ACL. However, this alternative was not selected by the Gulf Council because it would not enable the increase in stock ACL for the West Florida hogfish stock resulting from SEDAR 37. Under the proposed rule, the ACL in 2019 will be substantially reduced from the 2017 and 2018 ACL if a new hogfish assessment is not completed. This may suggest the ''no action'' ACL would be preferable to the proposed ACL. However, retaining the ''no action'' ACL in 2019 and beyond would have been inconsistent with the ABC recommendations provided by the Council's SSC. In addition, the Council expects a new assessment to be completed in sufficient time to avoid the scheduled reduction to the ACL beginning in the 2019 fishing year.

The second alternative to the proposed ACL for the West Florida hogfish stock would set the ACL higher in 2016 and reduce it thereafter, until it reached the lowest level in 2019. This alternative would be expected to result in increased commercial fishing revenue in 2016, decreased revenue in 2017 and 2018, and the same revenue in 2019, and thereafter compared to the proposed ACL. This alternative was not adopted by the Gulf Council because it would require successive reductions in the ACL in 2017 and 2018 (after the initial increase in 2016), in addition to the reduction in 2019, common to both this alternative and the proposed ACL. The Gulf Council determined that employing a constant ACL for the 2016 through 2018 fishing years would result in greater economic stability for affected fishermen and associated businesses.

Finally, the fourth alternative to the proposed ACL for the West Florida hogfish stock would set the ACL at the lowest level, resulting in less revenue in 2016 through 2018, and the same revenue in 2019, and thereafter compared to the proposed ACL. This alternative was not selected because it would unnecessarily limit hogfish harvest and cause greater economic losses than the proposed ACL.

Four alternatives, including no action, were considered for the action to change the hogfish minimum size limit. The Gulf Council determined that slowing

the hogfish directed harvest rate was prudent to reduce the likelihood that the ACL is exceeded, thus triggering AMs. Exceeding the ACL may require an AM closure in the following year, and the Gulf Council determined that a closure is more economically harmful than reducing the harvest rate to help ensure a longer open season. Therefore, to reduce the harvest rate, the Gulf Council is proposing to increase the hogfish minimum size limit.

The first alternative (no action) to the proposed minimum size limit would not change the minimum size limit, would not reduce the harvest rate, and would not achieve the Gulf Council's objective. Two other minimum size limits were considered in Amendment 43, each of which are higher than the current and proposed size limits. Because these alternatives would result in a higher minimum size limit than the Council's preferred alternative, each would be expected to result in greater reductions in hogfish harvest and associated revenue. These alternatives were not adopted because the Gulf Council concluded that the resultant reductions in the hogfish harvest rate would be greater than necessary, and would result in excessive adverse economic effects on fishermen and associated businesses.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Gulf of Mexico, Hogfish, Recreational, South Atlantic.

Dated: November 16, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is proposed to be amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.1, revise the Table 1 entry for ''FMP for the Reef Fish Resources of the Gulf of Mexico'', and add footnote 7 to Table 1 to read as follows:

§ 622.1 Purpose and scope.

* * * * *

TABLE 1 TO § 622.1—FMPS IMPLEMENTED UNDER PART 622

FMP title	Responsible fishery management council(s)	Geographic area
* * * * * * *		
FMP for the Reef Fish Resources of the Gulf of Mexico	GMFMC	Gulf.[1 3 4 7]
* * * * * * *		

[1] Regulated area includes adjoining state waters for purposes of data collection and quota monitoring.

* * * * * * * * *

[3] Regulated area includes adjoining state waters for Gulf red snapper harvested or possessed by a person aboard a vessel for which a Gulf red snapper IFQ vessel account has been established or possessed by a dealer with a Gulf IFQ dealer endorsement.

[4] Regulated area includes adjoining state waters for Gulf groupers and tilefishes harvested or possessed by a person aboard a vessel for which an IFQ vessel account for Gulf groupers and tilefishes has been established or possessed by a dealer with a Gulf IFQ dealer endorsement.

* * * * * * * * *

[7] Hogfish are managed by the FMP in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida. Hogfish in the remainder of the Gulf EEZ south of 25°09' N. lat. off the west coast of Florida are managed under the FMP for the Snapper-Grouper Fishery of the South Atlantic Region.

■ 3. In § 622.2, revise the first two sentences in the definition of *Charter vessel* to read as follows:

§ 622.2 Definitions and acronyms.

* * * * *

Charter vessel means a vessel less than 100 gross tons (90.8 mt) that is subject to the requirements of the USCG to carry six or fewer passengers for hire and that engages in charter fishing at any time during the calendar year. A charter vessel with a commercial permit, as required under this part, is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew, except for a charter vessel with a commercial vessel permit for Gulf reef fish or South Atlantic snapper-grouper. * * *

* * * * *

■ 4. In § 622.34, add paragraph (g) to read as follows:

§ 622.34 Seasonal and area closures designed to protect Gulf reef fish.

* * * * *

(g) *Recreational sector for hogfish in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida.* See § 622.183(b)(4) for the applicable seasonal closures.

■ 5. In § 622.35, revise paragraph (a)(1) to read as follows:

§ 622.35 Gear restricted areas.

(a) * * *

(1) A powerhead may not be used in the stressed area to take Gulf reef fish. Possession of a powerhead and a mutilated Gulf reef fish in the stressed area or after having fished in the stressed area constitutes *prima facie* evidence that such reef fish was taken with a powerhead in the stressed area.

* * * * *

■ 6. In § 622.37, revise paragraph (c)(2) to read as follows:

§ 622.37 Size limits.

* * * * *

(c) * * *

(2) *Hogfish in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida*—14 inches (40.6 cm), fork length. See § 622.185(c)(3)(ii) for the hogfish size limit in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida.

* * * * *

■ 7. In § 622.38, revise paragraph (b)(7) to read as follows:

§ 622.38 Bag and possession limits.

* * * * *

(b) * * *

(7) *Hogfish in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida*—5. See § 622.187(b)(3)(ii) for the hogfish bag and possession limits in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida.

* * * * *

■ 8. In § 622.41, revise paragraph (p) to read as follows:

§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(p) *Hogfish in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida.* If the sum of the commercial and recreational landings, as estimated by the SRD, exceeds the stock ACL, then during the following fishing year, if the sum of commercial and recreational landings reaches or is projected to reach the stock ACL, the AA will file a notification with the Office of the Federal Register to close the commercial and recreational sectors for the remainder of that fishing year. For the 2016 through 2018 fishing years, the stock ACL for hogfish in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida is 219,000 lb (99,337 kg), round weight. For the 2019 and subsequent fishing years, the stock ACL for hogfish in the Gulf EEZ except south of 25°09′ N. lat. off the west coast of Florida is 159,300 lb (72,257 kg), round weight. See § 622.193(u)(2) for the ACLs, ACT, and AMs for hogfish in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida.

* * * * *

■ 9. In § 622.43, add paragraph (c) to read as follows:

§ 622.43 Commercial trip limits.

* * * * *

(c) *Hogfish in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida*—see § 622.191(a)(12) for the applicable commercial trip limit.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 160816746–6746–01]

RIN 0648–XE819

Fisheries of the Northeastern United States; Atlantic Surfclam and Ocean Quahog Fishery; Proposed 2017–2018 Fishing Quotas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes status quo commercial quotas for the Atlantic surfclam and ocean quahog fisheries for 2017 and projected status quo quotas for 2018. This action is necessary to establish allowable harvest levels of Atlantic surfclams and ocean quahogs that will prevent overfishing and allow harvesting of optimum yield. This action would also continue to suspend the minimum shell size for Atlantic surfclams for the 2017 fishing year. It is expected that the industry and dealers will benefit from the proposed status quo quotas, as they will be able to maintain a consistent market.

DATES: Comments must be received by December 8, 2016.

ADDRESSES: You may submit comments, identified by NOAA–NMFS–2016–0122, by any of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0122,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to John K. Bullard, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope: ''Comments on the 2017–2018 Surfclam/Ocean Quahog Specifications.''

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter may be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Copies of the Environmental Assessment (EA), Supplemental Information Report (SIR), and other supporting documents for these proposed specifications are available from the Mid-Atlantic Fishery Management Council, 800 North State Street, Suite 201, Dover, DE 19901. The EA and SIR are also accessible via the internet at: *www.greateratlantic.fisheries.noaa.gov/.*

FOR FURTHER INFORMATION CONTACT: Douglas Potts, Fishery Policy Analyst, 978–281–9341.

SUPPLEMENTARY INFORMATION: The Atlantic Surfclam and Ocean Quahog Fishery Management Plan (FMP) requires that NMFS, in consultation with the Mid-Atlantic Council, specify quotas for surfclam and ocean quahog for up to a 3-year period, with an annual review. It is the policy of the Council that the catch limits selected allow sustainable fishing to continue at that level for at least 10 years for surfclams, and 30 years for ocean quahogs. In addition to this, the Council policy also considers the economic impacts of the quotas. Regulations implementing Amendment 10 to the FMP (63 FR 27481; May 19, 1998) added Maine ocean quahogs (locally known as Maine mahogany quahogs) to the management unit, and provided for a small artisanal fishery for ocean quahogs in the waters north of 43°50′ N. lat., with an annual quota within a range of 17,000 to 100,000 Maine bu (0.6 to 3.524 million L). As specified in Amendment 10, the Maine ocean quahog quota is allocated separately from the quota specified for the ocean quahog fishery. Regulations implementing Amendment 13 to the FMP (68 FR 69970; December 16, 2003) established the ability to propose multi-year quotas with an annual quota review to be conducted by the Council to determine if the multi-year quota specifications remain appropriate for each year. NMFS then publishes the annual final quotas in the **Federal Register**. The fishing quotas must ensure overfishing will not occur. In recommending these quotas, the Council considered the most recent stock assessments and other relevant scientific information.

In June 2016, the Council voted to recommend maintaining the status quo quota levels of 5.33 million bu (284 million L) for the ocean quahog fishery, 3.40 million bu (181 million L) for the Atlantic surfclam fishery, and 100,000 Maine bu (3.52 million L) for the Maine ocean quahog fishery for 2017 and projected status quo quotas would be maintained in 2018.

Tables 1 and 2 show proposed quotas for the 2017 Atlantic surfclam and ocean quahog fishery along with projected quotas for 2018. By providing projected quotas for 2018, NMFS hopes to assist fishery participants in planning ahead. NMFS plans to reassess the status of the Atlantic surfclam and ocean quahog fishery in 2017. Final 2018 quotas will be published in the **Federal Register** before the start of the 2018 fishing year (January 1, 2018) based on the 2017 review.

TABLE 1—PROPOSED ATLANTIC SURFCLAM MEASURES

Year	Acceptable biological catch (ABC) (mt)	Annual catch limit (ACL) (mt)	Annual catch target (ACT) (mt)	Commercial quota
2017	44,469	44,469	29,364	3.40 million bu (181 million L).
2018 (projected)	45,524	45,524	29,364	3.4 million bu (181 million L).

TABLE 2—PROPOSED OCEAN QUAHOG MEASURES

Year	ABC (mt)	ACL (mt)	ACT (mt)	Commercial quota
2017; 2018 (projected)	26,100	26,100	26,035	Non-Maine Quota: 5.33 million bu (284 million L) Maine ACT: 100,000 Maine bu (3.52 million L)

The Atlantic surfclam and ocean quahog quotas are specified in ''industry'' bushels of 1.88 ft^3 (53.24 L) per bushel, while the Maine ocean quahog quota is specified in Maine bushels of 1.24 ft^3 (35.24 L) per bushel. Because Maine ocean quahogs are the same species as ocean quahogs, both fisheries are assessed under the same overfishing definition. When the two quota amounts (ocean quahog and Maine ocean quahog) are added, the total allowable harvest is below the level that would result in overfishing for the entire stock.

Surfclams

The proposed 2017 status quo surfclam quota was developed after reviewing the results of the Northeast Regional Stock Assessment Workshop (SAW) 56 for Atlantic surfclam, released to the public in 2013. The surfclam quota recommendation is consistent with the SAW 56 finding that the Atlantic surfclam stock is not overfished, nor is overfishing occurring. Based on this information, the Council is recommending, and NMFS is proposing, to maintain the status quo surfclam quota of 3.40 million bu (181 million L) for 2017 (See Table 1).

Ocean Quahogs

The proposed 2017 non-Maine quota for ocean quahogs also reflects the status quo quota of 5.33 million bu (284 million L). In April 2013, the ocean quahog stock assessment was updated and found that the ocean quahog stock is not overfished, nor is overfishing occurring. After several decades of relatively low fishing mortality, the ocean quahog stock is still above the biomass target reference points.

The 2017 proposed quota for Maine ocean quahogs is the status quo level of 100,000 Maine bu (3.52 million L). The proposed quota represents the maximum allowable quota under the FMP.

This proposed rule also announces projected quotas for 2018. However, new stock assessments for both Atlantic surfclam and ocean quahog are pending and the results are expected to be available to the Council when it next reviews quotas for this fishery in June 2017. It is expected that the Council will use these assessment results to update the 2018 specifications as needed and recommend specifications for both fisheries for 2018 through 2020.

Surfclam Minimum Size

At its June 2016 meeting, the Council voted to recommend that the Regional Administrator suspend the minimum size limit for Atlantic surfclams for the 2017 fishing year. This action may be taken unless discard, catch, and biological sampling data indicate that 30 percent or more of the Atlantic surfclam resource have a shell length less than 4.75 inches (120 mm), and the overall reduced size is not attributable to harvest from beds where growth of the individual clams has been reduced because of density-dependent factors.

Commercial surfclam data for 2016 were analyzed to determine the percentage of surfclams that were smaller than the minimum size requirement. The analysis indicated that 14.4 percent of the overall commercial landings were composed of surfclams that were less than the 4.75-in (120-mm) default minimum size. This percentage of small clams is higher than in most previous years; however, it is still below the 30-percent trigger. Based on the information available, the Regional Administrator concurs with the Council's recommendation, and is proposing to suspend the minimum size limit for Atlantic surfclams in the upcoming fishing year (January 1 through December 31, 2017).

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the Assistant Administrator for Fisheries, NOAA, has determined that this proposed rule is consistent with the Atlantic Surfclam and Ocean Quahog FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This action does not introduce any new reporting, recordkeeping, or other compliance requirements. This proposed rule does not duplicate, overlap, or conflict with other Federal rules.

This proposed rule is exempt from the requirements of E.O. 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not

have a significant economic impact on a substantial number of small entities. The factual basis for this certification is as follows:

For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. In 2015, there were 358 fishing firms that held at least one surfclam or ocean quahog permit. Using the $11.0 million cutoff for firms, there are 348 entities that are small and 10 that are large. In order to provide a more accurate count and description of the small directly regulated entities, landings data were evaluated to select only firms that were active in either the surfclam or ocean quahog fishery. There are 29 active fishing firms, of which 26 are small entities and 3 are large entities.

Because the proposed quotas are identical to those implemented for 2014–2016, the proposed action would have no impact on the way the fishery operates. These measures are expected to provide similar fishing opportunities in 2017 and 2018 when compared to 2015 (proxy for base year 2016). As such, revenue changes are not expected in 2017 and 2018 when compared to landings and revenues in 2015. Therefore, adoption of the proposed specifications would have no impacts on entities participating in the fishery if landings are similar to those that occurred in 2015.

Maintaining the suspension of the surfclam minimum shell length requirement would result in no change when compared to 2014–2016. The minimum shell length requirement has been suspended each year since 2005. The proposed action would have no impact on the way the fishery operates, and is not expected to disproportionately affect small entities.

As a result, an initial regulatory flexibility analysis is not required and none has been prepared.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

RIN 0648–BG23

Fisheries off West Coast States; Highly Migratory Fisheries; California Drift Gillnet Fishery; Protected Species Hard Caps for the California/Oregon Large-Mesh Drift Gillnet Fishery; Extension of Public Comment Period

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; extension of public comment period.

SUMMARY: On October 13, 2016, NMFS published a proposed rule to establish protected species hard caps for the California/Oregon large-mesh drift gillnet fishery, with comments due by November 28, 2016. However, in response to a request to extend the public comment period, NMFS has decided to extend the public comment period by an additional 30 calendar days.

DATES: The deadline for receipt of comments on the proposed rule published on October 13, 2016 (81 FR 70660) is extended to December 28, 2016. NMFS must receive written comments and information on or before December 28, 2016.

ADDRESSES: You may submit comments on the proposed rule, draft Environmental Assessment (EA), draft Regulatory Impact Review (RIR), and Initial Regulatory Flexibility Analysis (IRFA), identified by NOAA–NMFS–2016–0123, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *http://www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0123,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Lyle Enriquez, NMFS West Coast Region, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802. Include the identifier ''NOAA–NMFS–2016–0123'' in the comments.

Instructions: Comments must be submitted by one of the above methods to ensure they are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Copies of the draft EA, draft RIR, IRFA, and other supporting documents are available via the Federal eRulemaking Portal: *http://www.regulations.gov,* docket NOAA–NMFS–2016–0123 or by contacting the Regional Administrator, Barry Thom, NMFS West Coast Region, 1201 NE Lloyd Blvd., Portland, OR 97232–2182, or *RegionalAdministrator.WCRHMS@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Lyle Enriquez, NMFS, West Coast Region, 562–980–4025, or *Lyle.Enriquez@noaa.gov.*

SUPPLEMENTARY INFORMATION: On October 13, 2016, NMFS published a proposed rule in the **Federal Register** (81 FR 70660) announcing proposed issuance of regulations to establish protected species hard caps for the California/Oregon large-mesh drift gillnet fishery. The 45-day public comment period on the proposed rule ends on November 28, 2016.

On October 21, 2016, representatives of potentially affected parties requested an extension of the public comment period to aid in their review of the proposed rulemaking. NMFS has considered the request and will extend the comment period to December 28, 2016. This extension provides a total of 75 days for public input and continuing Federal agency reviews to inform NMFS' final decision to issue or deny the regulations.

NMFS refers the reader to the October 13, 2016, proposed rule (81 FR 70660) for background information concerning the proposed rulemaking as this notice does not repeat the information here.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Notices

Federal Register
Vol. 81, No. 226
Wednesday, November 23, 2016

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–LPS–16–0089]

Request for Approval of a New Information Collection for the Processed Egg and Egg Products Verification Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and Request for Comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), this notice announces the United States Department of Agriculture (USDA), Agricultural Marketing Service's (AMS) intention to request approval from the Office of Management and Budget (OMB), for a new information collection for the Processed Egg and Egg Products Verification Program. One new form is introduced in this information collection.

DATES: Submit comments on or before January 23, 2017.

ADDRESSES: Interested persons are invited to submit comments concerning this notice by using the electronic process available at *www.regulations.gov.* Written comments may also be submitted to Quality Assessment Division; Livestock, Poultry, and Seed Program; Agricultural Marketing Service, USDA; 1400 Independence Avenue SW; Room 3932–S, Stop 0258; Washington, DC 20250–0258; or by facsimile to (202) 690–2746. All comments should reference the docket number AMS–LPS–16–0089, the date of submission, and the page number of this issue of the **Federal Register**. All comments received will be posted without change, including any personal information provided, at *www.regulations.gov* and will be included in the record and made available to the public.

FOR FURTHER INFORMATION CONTACT: Jeff Waite, Branch Chief, Auditing Services Branch, Quality Assessment Division (QAD); (202) 720–4411; or email *Jeffrey.Waite@ams.usda.gov.*

SUPPLEMENTARY INFORMATION:

Overview of This Information Collection

(1) *Agency:* USDA, AMS.

(2) *Title:* Processed Egg and Egg Products Verification Program.

(3) *OMB Number:* 0581–NEW.

(4) *Type of Request:* New Information Collection.

(5) *Abstract:*

The Agricultural Marketing Act of 1946 (AMA) (7 U.S.C. 1621–1627) directs and authorizes the USDA to develop and improve standards of quality, grades, grading programs, and certification services which facilitate the marketing of agricultural products. The regulation in 7 CFR part 62—Livestock, Meat, and Other Agricultural Commodities (Quality Systems Verification Programs (QSVP)) provides for voluntary, audit-based, user-fee funded programs that allow applicants to have program documentation and program processes assessed by AMS auditors and other USDA officials. AMS also provides other types of voluntary services under these regulations, including contract and specification acceptance services and export verification services. The Processed Egg and Egg Products Export Verification Program is a voluntary export verification program that aids domestic food manufacturers in exporting processed food products containing egg to other countries. It is a voluntary program, and respondents request or apply for the specific service. Once the verification service is performed, the respondent is provided documentation that their product meets export requirements, in the form of an export certificate. AMS intends to create an export certificate specifically for this program, namely the USDA Processed Egg and Egg Products Export Certificate, Form LPS–234. In order to complete the export certificate, AMS must gather information from the respondent, including (but not limited to): Name and address of product manufacturer; exporter and importer information; country of destination; point of entry; product origin (state and/or county); place of loading; means of transport; dates of pack; type of packing material; name(s) of product(s); number of package(s); net weight; and any other import information requested by the importing country.

The information collection requirements in this request are essential to carry out the intent of AMA, to provide the respondents the type of service they request, and to administer the program.

Upon Office of Management and Budget (OMB) approval of the new Form LPS–234 and the information collection package, AMS will request OMB approval to merge the new form and this information collection into the currently approved information collection OMB control number 0581–0128 approved on July 8, 2014.

(6) *Estimate of Burden:* Public reporting burden for this collection of information is estimated to average 12 minutes per response.

(7) *Respondents:* Exporters of processed egg and egg products.

(8) *Estimated Number of Respondents:* 43.

(9) *Estimated Number of Responses per Respondent:* 15.

(10) *Estimated Number of Responses:* 645.

(11) *Estimated Total Annual Burden on Respondents:* 129 hours.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this document will be summarized and included in the request for OMB approval. All responses will become a matter of public record, including any personal information provided.

Dated: November 18, 2016.

Elanor Starmer,

Administrator, Agricultural Marketing Service.

[FR Doc. 2016–28250 Filed 11–22–16; 8:45 am]

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0086]

Notice of Request for Extension of Approval of an Information Collection; Spring Viremia of Carp; Import Restrictions on Certain Live Fish, Fertilized Eggs, and Gametes

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the importation of live fish, fertilized eggs, and gametes to prevent the introduction of spring viremia of carp into the United States.

DATES: We will consider all comments that we receive on or before January 23, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0086.*
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2016–0086, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0086* or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of live fish, fertilized eggs, and gametes, contact Dr. Christa Speekmann, Import-Export Specialist-Aquaculture, NIES, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737; (301) 851–3365. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Spring Viremia of Carp; Import Restrictions on Certain Live Fish, Fertilized Eggs, and Gametes.

OMB Control Number: 0579–0301.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States. These regulations are contained in 9 CFR parts 92 through 98. Sections 93.900 through 93.906 contain requirements to prevent the introduction of spring viremia of carp (SVC) into the United States. SVC is a disease of certain species of finfish that is caused by an eponymous rhabdovirus. The disease is considered extremely contagious, and there are currently no U.S.-approved vaccines or treatments for the virus.

In accordance with the regulations, APHIS restricts the importation of live fish, fertilized eggs, and gametes of SVC-susceptible species and the importation of diagnostic specimens or research materials containing viable SVC virus. The regulations involve information collection activities, including a fish import permit application, application for import or in-transit permit, diagnostic specimen import application, refusal of entry and order to dispose of fish, health certificate, cleaning and disinfection certificate, recordkeeping, and 72-hour notification to APHIS before arrival of a shipment in the United States.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.333 hours per response.

Respondents: Fish farmers, brokers, personnel at aquatic pathogen detection laboratories, salaried veterinary officers of the national government of the exporting region or designated certifying officials, and importers of SVC-susceptible live fish, fertilized eggs, and gametes.

Estimated annual number of respondents: 40.

Estimated annual number of responses per respondent: 120.3.

Estimated annual number of responses: 4,811.

Estimated total annual burden on respondents: 1,603 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of November 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2016–28230 Filed 11–22–16; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2016–0037]

National Advisory Committee on Meat and Poultry Inspection; Nominations for Membership

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice soliciting nominations for membership.

SUMMARY: The U.S. Department of Agriculture (USDA) is soliciting nominations for membership for the National Advisory Committee on Meat and Poultry Inspection (NACMPI). The full Committee consists of 20 members, and each person selected is expected to serve a 2-year term. The current Committee consists of 17 members, with 4 members retiring. USDA is soliciting nominations for seven available positions.

DATES: Nominations, including a cover letter to the Secretary, the nominee's typed resume or curriculum vitae, and a completed USDA Advisory Committee Membership Background Information form AD–755, must be received within December 23, 2016. Self-nominations are welcome.

FOR FURTHER INFORMATION CONTACT: Natasha Williams, Program Specialist, Designated Federal Officer, Office of Outreach, Employee Education and Training, Outreach and Partnership Staff, Food Safety and Inspection Service, Telephone: 202–690–6531, Fax: (202) 690–6519, Email: *Natasha.Williams@fsis.usda.gov,* regarding specific questions about the Committee or this solicitation. General information about the Committee can also be found at: *http://www.fsis.usda.gov/nacmpi.*

SUPPLEMENTARY INFORMATION:

Background

In accordance with the Federal Advisory Committee Act, 5 U.S.C. app. 2, USDA is seeking nominees for membership on the National Advisory Committee on Meat and Poultry Inspection (NACMPI). The Committee provides advice and recommendations to the Secretary on meat and poultry inspection programs, pursuant to sections 7(c), 24, 301(a)(3), and 301(c) of the Federal Meat Inspection Act (21 U.S.C. 607(c), 624, 645, 661(a)(3), and 661(c)) and to sections 5(a)(3), 5(c), 8(b), and 11(e) of the Poultry Products Inspection Act (21 U.S.C. 454(a)(3), 454(c), 457(b), and 460(e)). Nominations for membership are being sought from persons representing industry; academia; State and local government officials; public health organizations; and consumers and consumer organizations. NACMPI is seeking members with knowledge and interest in meat and poultry food safety and other FSIS policies. Appointments to the Committee will be made by the Secretary of Agriculture.

To ensure that recommendations of the Committee take into account the needs of the diverse groups served by the Department, membership will include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities. It is anticipated that the Committee will meet at least once annually.

Please note that federally registered lobbyists cannot be considered for USDA advisory committee membership. Members can only serve on one advisory committee at a time. All nominees will undergo a USDA background check.

How To Apply

To receive consideration for service on the NACMPI, a nominee must submit a resume and the USDA Advisory Committee Membership Background Information form AD–755. The resume or curriculum vitae must be limited to five one-sided pages and should include nominee's educational background and expertise. For submissions received that are more than five one-sided pages in length, only the first five pages will be reviewed. The USDA Advisory Committee Membership Background Information form AD–755 is available online at *http://www.fsis.usda.gov/wps/portal/fsis/forms.* The AD–755 will only be considered if it is complete.

Nomination packages should be accompanied by a resume and AD–755 form and can be sent by mail to: Natasha Williams, Designated Federal Officer; Office of Outreach, Employee Education and Training, Food Safety and Inspection Service, U.S. Department of Agriculture; 1400 Independence Avenue SW., Mail Stop 3778, Patriots Plaza III, Room 9–265A, Washington, DC 20250, Attention: National Advisory Committee on Meat and Poultry Inspection.

Regarding Nominees Who Are Selected

All members who are associated with colleges and universities will be designated as Special Government Employees (SGE) and must complete the Office of Government (OGE) 450 Confidential Financial Disclosure Report electronically through the USDA online system before rendering any advice or before their first meeting. SGEs are required to update financial forms yearly. An invitation to fill out the 450 form will be sent via email before the NACMPI meeting.

All members will be reviewed for conflict of interest pursuant to 18 U.S.C. 208 in relation to specific NACMPI work charges. Advisory Committee members serve a two-year term, renewable for two consecutive terms.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS Web page located at: *http://www.fsis.usda.gov/federal-register.*

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is available on the FSIS Web page. Through the Web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *http://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How to File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at *http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf,* or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email:

Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW., Washington, DC 20250–9410.

Fax: (202) 690–7442.

Email: program.intake@usda.gov.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.),

should contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

Alfred V. Almanza,

Acting Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Forest Service

Happy Camp/Oak Knoll Ranger District; California; Horse Creek Community Protection and Forest Restoration Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The purpose of the Horse Creek Community Protection and Forest Restoration Project (Horse Creek Project) is to reduce fuels along egress and ingress roads, on strategic ridges, and adjacent to private property; to reduce safety hazards along roads and in concentrated stands in and around the community of Horse Creek, California; to restore previously stocked units; and treat the riparian areas within the Horse Creek Botanical Special Interest Area. The Horse Creek Project includes 103 miles of roadside hazard treatment and 7,325 acres of other treatments within the 40,834-acre project boundary.

DATES: Comments concerning the scope of the analysis must be received by December 23, 2016. The draft environmental impact statement is expected March 2017 and the final environmental impact statement is expected July 2017.

ADDRESSES: Send written comments to C. Christine Frisbee ATTN: Lisa Bousfield 1711 S. Main Street, Yreka, California 96097–9549. Comments may also be sent via email to *lbousfield@fs.fed.us,* or via facsimile to (530) 493–1796.

FOR FURTHER INFORMATION CONTACT: Lisa Bousfield, (530) 493–1766, *lbousfield@fs.fed.us* or Jeff Marszal, (530) 493–2243, *jmarszal@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

Purpose and need is drive by the desired conditions for the landscape or management area in the Forest Plan. Where the forest is in the desired condition described in the Forest Plan, there is no need to act—meaning the existing condition is consistent with the Forest Plan. Where the existing condition of the landscape does not represent the desired conditions described in the Forest Plan, there is a need to act to accomplish the goals and objectives or purposes described in the Forest Plan.

- All Land Allocations—There is a need for public safety because the Gap Fire created unsafe conditions for the public and for adjacent private landowners. There is a need for safe conditions for forest workers, firefighters, tree planters, and recreationists.
- General Forest—There is a need for recovered timber volume from fire killed trees in the General Forest Management Area because these areas contribute to the timber base of the Forest. There is a need for reduced fuel loads to reduce the probability and extent of future high-severity fire. There is a need for fire-resilient coniferous forests in severely burned areas to meet Forest Plan Objectives.
- Partial Retention Visual Quality Objective—There is a need for recovered timber volume from fire killed trees on Partial Retention lands because these areas contribute to the timber base of the Forest. There is a need for reduced fuel loads to reduce the probability and extent of future high severity fire. There is a need for fire-resilient coniferous forests in severely burned areas to meet Forest Plan Objectives for partial retention.
- Late Successional Reserves—There is a need for reduced fuels to reduce the risk of future large-scale high severity fire losses of late successional habitat. There is a need for a fire resilient coniferous forest in severely burned areas to meet the desired conditions for late successional reserves.
- Riparian Reserves—There is a need to reduce fuels to reduce the risk of future high severity fire.
- Special Interest Area—There is a need to restore ecological functions to reflect the unique characteristics for which the Horse Creek Botanical area was designated.

Proposed Action

The proposed action was designed to meet the purpose and need of the project. The proposed action would treat roadside hazard trees adjacent to approximately 103 miles of roads and 7,325 acres of other treatments within the 40,834-acre project boundary. Acres by treatment type are described below and do not account for the overlap in treatment types. Treatment acreages are approximate at this point, riparian reserves have not been field validated, and may be adjusted and refined following scoping.

This project includes the following seven types of treatments: (1) Roadside hazard tree removal; (2) roadside fuels treatments; (3) fuels reduction adjacent to private property; (4) developing and maintaining fuels management zones; (5) salvage harvest with site preparation and planting; (6) site preparation and planting (without salvage); and (7) Horse Creek SIA.

(1) Roadside Hazard Tree Removal (103 miles)—Trees adjacent to National Forest System roads or along county roads adjacent to National Forest System lands within the project area will be evaluated for hazard tree removal.

(2) Roadside Fuels Treatment (1,243 acres)—The National Forest System Roads 12, 46N60, and 46N50 would receive treatment within 150 feet on either side of the road. To maintain strategic ingress and egress roads and to decrease the amount of activity-generated fuels in hazard tree removal areas, we propose to remove dead vegetation and live understory vegetation along with live conifer trees less than 12 inches at breast height.

(3) Fuels Reduction Adjacent to Private Property (1,684 acres)—Fuels reduction treatments are proposed within the 500 feet of National Forest System lands adjacent to private property with an existing structure or that had a structure that was affected by the fire. Treatment would include removing dead vegetation and live understory vegetation including conifer trees less than 12 inches in diameter at breast height to reduce fire behavior activity, specifically reduced flame length, crown fire potential and intensity to meet desired conditions.

(4) Developing and Maintaining Fuels Management Zones (1,499 acres)—During the Gap Fire, strategic dozer lines built during the Beaver Fire in 2014 or from past wildfires were re-opened. Strategic ridge systems, many containing historic firelines already in place, would be maintained by removing dead vegetation and live understory vegetation along with live conifer trees less than 12 inches at breast height.

(5) Salvage Harvest with Site Preparation and Planting (Ground-based 1,262 acres and Skyline (Cable) 995 acres)—Standing dead trees 14 inches in diameter at breast height or greater would be considered for salvage. Fire-killed and fire-injured trees with a 70 percent or greater chance of dying within the next three to five years

would be considered for salvage harvest. Salvage logging treatments would be accomplished by a combination of ground-based and skyline logging systems. All salvage units would be reforested as described in the site-preparation and planting section.

(6) Site Preparation and Planting (without salvage) (458 acres)—Forest stands selected for site preparation and tree planting are predominately plantations composed of standing dead trees generally under 16 inches in diameter at breast height. Both manual and mechanical methods would be used to cut or masticate standing dead trees depending on slope steepness, accessibility and feasibility. Activity-generated fuels would be treated using a variety of methods including piling and burning, underburning, or lop and scattering. Reforestation would be accomplished by directly planting nursery-grown seedlings or by allowing natural regeneration.

(7) Horse Creek SIA (184 acres)—Treatment within the Horse Creek SIA includes, hazard tree removal, placing trees with rootwads into the riparian reserve, and planting hardwood and conifers within the riparian reserves.

Connected Actions

- Road Access—Access for this project would be mainly accomplished by use of roads on National Forest Transportation System. Temporary roads are estimated at this time and will be finalized to comply with standards and guidelines as designated within the forest plan.
- Landings—Existing landings will be used where possible. Landing size will be commensurate with operation safety. Skyline landings will use roads where possible. Skyline landings off the road system and ground-based landings will average one acres in size but will not exceed 1.5 acres in size. Both new and existing landings will be hydrologically stabilized at the end of the project.

Responsible Official

C. Christine Frisbee, Klamath National Forest Acting Forest Supervisor, 1711 South Main Street, Yreka, California 96097, will prepare and sign the Record of Decision at the conclusion of the National Environmental Policy Act (NEPA) review.

Nature of Decision To Be Made

The Forest Service is lead agency for the project. Based on the result of the NEPA analysis, the Forest Supervisor's Record of Decision regarding the Horse Creek Project will recommend implementation of one of the following: (1) The proposed action and mitigation necessary to minimize or avoid adverse impacts; (2) An alternative to the proposed action and mitigation necessary to minimize or avoid adverse impacts; or (3) The no-action alternative. The Record of Decision will also document the consistency of the proposed action or one of the alternatives with the Klamath National Forest Land and Resource Management Plan.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: November 16, 2016.

Ted O. Mcarthur,

Acting Deputy Forest Supervisor.

[FR Doc. 2016–28209 Filed 11–22–16; 8:45 am]

BILLING CODE 3411–15–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the South Carolina Advisory Committee To Discuss Future Civil Rights Projects

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the South Carolina (State) Advisory Committee will hold a meeting on Wednesday, January 18, 2017, for the purpose of discussing potential projects.

DATES: The meeting will be held on Wednesday, January 18, 2017 12:00 p.m. EST.

ADDRESSES: The meeting will be by teleconference. Toll-free call-in number: 888–505–4378, conference ID: 2302391.

FOR FURTHER INFORMATION CONTACT: Jeff Hinton, DFO, at *jhinton@usccr.gov* or 404–562–7006.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 888–505–4378, conference ID: 2302391. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office by January 13, 2017. Written comments may be mailed to the Southern Regional Office, U.S. Commission on Civil Rights, 61 Forsyth Street, Suite 16T126, Atlanta, GA 30303. They may also be faxed to the Commission at (404) 562–7005, or emailed to Regional Director, Jeffrey Hinton at *jhinton@usccr.gov.* Persons who desire additional information may contact the Southern Regional Office at (404) 562–7000.

Records generated from this meeting may be inspected and reproduced at the Southern Regional Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, South Carolina Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's Web site, *http://www.usccr.gov,* or may contact the Southern Regional Office at the above email or street address.

Agenda

Welcome and Call to Order

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Georgia Advisory Committee for an Orientation Meeting To Welcome the New Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Georgia (State) Advisory Committee will hold a meeting on Thursday, December 15, 2016, for the purpose of orientation and discussing potential project topics.

DATES: The meeting will be held on Thursday December 15, 2016 10:00 p.m. EST.

ADDRESSES: The meeting will be by teleconference. Toll-free call-in number: 877–545–1409, conference ID: 9961239.

FOR FURTHER INFORMATION CONTACT: Jeff Hinton, DFO, at *jhinton@usccr.gov* or 404–562–7006.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 877–545–1409, conference ID: 9961239. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office by December 13, 2016. Written comments may be mailed to the Southern Regional Office, U.S. Commission on Civil Rights, 61 Forsyth Street, Suite 16T126, Atlanta, GA 30303. They may also be faxed to the Commission at (404) 562–7005, or emailed to Regional Director, Jeffrey Hinton at *jhinton@usccr.gov.* Persons who desire additional information may contact the Southern Regional Office at (404) 562–7000.

Records generated from this meeting may be inspected and reproduced at the Southern Regional Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, North Carolina Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's Web site, *http://www.usccr.gov,* or may contact the Southern Regional Office at the above email or street address.

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of National Advisory Council on Innovation and Entrepreneurship Meeting

AGENCY: Economic Development Administration, Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The National Advisory Council on Innovation and Entrepreneurship (NACIE) will hold a public meeting via teleconfrerence on Wednesday, December 7, 2016. During this time, members will discuss initial ideas and efforts underway and determine its focus on projects and potential recommendations leading up to NACIE's next quarterly meeting in early 2017.

DATES: Wednesday, December 7, 2016.

Time: 2:00 p.m.–4:00 p.m. Eastern Time (ET).

ADDRESSES: This meeting will be held by teleconference; a physical address is therefore not applicable.

Teleconference Information

Toll-Free: +1 877 950 4778.
Passcode: 4423486.

SUPPLEMENTARY INFORMATION: The Council was chartered on November 10, 2009, to advise the Secretary of Commerce on matters related to innovation and entrepreneurship in the United States. NACIE's overarching focus is recommending transformational policies to the Secretary that will help U.S. communities, businesses, and the workforce become more globally competitive. The Council operates as an independent entity within the Office of Innovation and Entrepreneurship (OIE), which is housed within the U.S. Commerce Department's Economic Development Administration. NACIE members are a diverse and dynamic group of successful entrepreneurs, innovators, and investors, as well as leaders from nonprofit organizations and academia.

The purpose of this meeting is to discuss the Council's planned work initiatives in three focus areas: workforce/talent, entrepreneurship, and innovation. The final agenda will be posted on the NACIE Web site at *http://www.eda.gov/oie/nacie/* prior to the meeting. Any member of the public may submit pertinent questions and comments concerning the Council's affairs at any time before or after the meeting. Comments may be submitted to the Office of Innovation and Entrepreneurship at the contact information below. Copies of the meeting minutes will be available by request within 90 days of the meeting date.

FOR FURTHER INFORMATION CONTACT: Craig Buerstatte, Office of Innovation and Entrepreneurship, Room 78018, 1401 Constitution Ave. NW., Washington, DC 20230; email: *nacie@doc.gov;* telephone: +1 202 482 8001; facsimile: +1 202 273 4781. Please reference ''NACIE December 7, 2016'' in the subject line of your correspondence.

Dated: November 18, 2016.

Craig Buerstatte,

Deputy Director, Office of Innovation and Entrepreneurship.

Finished Carbon Steel Flanges From India, Italy, Spain: Postponement of Preliminary Determinations of the Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective November 23, 2016.

FOR FURTHER INFORMATION CONTACT: Fred Baker at (202) 482–2924 (India), Edythe Artman at (202) 482–3931 (Italy), and Mark Flessner at (202) 482–6312 (Spain), AD/CVD Operations, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On July 20, 2016, the Department of Commerce (the Department) initiated antidumping duty investigations concerning imports of finished carbon steel flanges from India, Italy and Spain.[1] The notice of initiation stated that the Department, in accordance with section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.205(b)(1), would issue its preliminary determinations no later than 140 days after the date of the initiation, unless postponed.[2] The current deadline for the preliminary determinations of these investigations is no later than December 7, 2016.

Postponement of Preliminary Determinations

On October 31, 2016, Weldbend Corporation and Boltex Manufacturing Co., L.P. (collectively, the petitioners), made timely requests pursuant to section 733(c)(1)(A) of the Act and 19 CFR 351.205(e), for a 50-day postponement of the preliminary determinations in these investigations in order to provide the Department with sufficient time to review submissions and request supplemental information, in order to arrive at the most accurate results possible.[3] No other parties commented.

For the reasons stated above, and because there are no compelling reasons to deny the petitioners' request, the Department is postponing the deadline for the preliminary determinations by 50 days, until January 26, 2017, in accordance with section 733(c)(1)(A) of the Act and 19 CFR 351.205(b)(2).

In accordance with section 735(a)(1) of the Act, the deadline for the final determinations of these investigations will continue to be 75 days after the date of the preliminary determinations, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: November 17, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Ammonium Sulfate From the People's Republic of China: Correction to the Preliminary Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT: Maliha Khan or Thomas Martin, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0895 or (202) 482–3936, respectively.

SUPPLEMENTARY INFORMATION: On November 9, 2016, the Department of Commerce (''the Department'') published the preliminary results of the investigation of sales at less than fair value for ammonium sulfate from the People's Republic of China (''PRC'').[1]

The Department is issuing this notice to correct an inadvertent error in the **Federal Register** notice for the *Preliminary Determination.* Specifically, the Department stated an incorrect

[1] *See Ammonium Sulfate from the People's Republic of China: Preliminary Determination of Sales at Less Than Fair Value;* 81 FR 78776 (November 9, 2016) (''*Preliminary Determination*'').

deadline for submitting case briefs or other written comments in the ''Disclosure and Public Comment'' section of the *Preliminary Determination* notice. The notice states that ''{c}ase briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding . . .'' [2] However, the correct deadline, as stated in the preliminary determination memorandum accompanying the *Preliminary Determination* notice is ''no later than 30 days after the publication of this preliminary determination in the **Federal Register**.'' [3] Accordingly, the deadline for filing case briefs is December 9, 2016.

This correction to the preliminary determination of sales at less than fair value is issued and published in accordance with sections 733(f) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: November 16, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain Uncoated Paper From Portugal: Final Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On October 18, 2016, The Department of Commerce (the ''Department'') published its initiation and preliminary results of a changed circumstances review of the antidumping duty (''AD'') order on certain uncoated paper from Portugal. The Department preliminarily determined that The Navigator Company, S.A. and Navigator Fine Paper, S.A. (collectively ''Navigator'') is the successor in interest to Portucel, S.A. and Portucel Soporcel Fine Paper, S.A. (collectively ''Portucel'') for purposes of the AD order and, as such, is entitled to Portucel's cash deposit rate with respect to entries of subject merchandise. We invited interested parties to comment on the preliminary results. As no parties submitted comments, and there is no additional information or evidence on the record, the Department is making no changes to the *Preliminary Results.*

DATES: Effective November 23, 2016.

FOR FURTHER INFORMATION CONTACT: Carrie Bethea, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–1491.

SUPPLEMENTARY INFORMATION:

Background

On October 18, 2016, the Department initiated a changed circumstances review and made a preliminary finding that Navigator is the successor-in-interest to Portucel and is entitled to Portucel's cash deposit rate with respect to entries of subject merchandise.[1] We also provided interested parties 14 days from the date of publication of the *Preliminary Results* to submit case briefs in accordance with 19 CFR 351.309(c)(1)(ii). No interested parties submitted case briefs or requested a hearing. On October 12, 2016, the Department issued draft customs instructions to interested parties and solicited comments.[2] None were received.

Scope of the Order

The merchandise subject to the order is certain uncoated paper. The product is currently classified under Harmonized Tariff Schedule of the United States (HTSUS) categories 4802.56.1000, 4802.56.2000, 4802.56.3000, 4802.56.4000, 4802.56.6000, 4802.56.7020, 4802.56.7040, 4802.57.1000, 4802.57.2000, 4802.57.3000, and 4802.57.4000. Some imports of subject merchandise may also be classified under 4802.62.1000, 4802.62.2000, 4802.62.3000, 4802.62.5000, 4802.62.6020, 4802.62.6040, 4802.69.1000, 4802.69.2000, 4802.69.3000, 4811.90.8050 and 4811.90.9080. While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the investigation is dispositive.[3]

Final Results of Changed Circumstances Review

Because no party submitted a case brief in response to the Department's *Preliminary Results,* and because the record contains no other information or evidence that calls into question the *Preliminary Results,* the Department continues to find that Navigator is the successor-in-interest to Portucel, and is entitled to Portucel's cash deposit rate with respect to entries of merchandise subject to the AD order on uncoated paper from Portugal.[4]

Instructions to U.S. and Border Protection

Based on these final results, we will instruct U.S. Customs and Border Protection to collect estimated ADs for all shipments of subject merchandise exported by Navigator and entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register** at the current AD cash deposit rate for Portucel (*i.e.,* 7.80 percent). This cash deposit requirement shall remain in effect until further notice.

Notification to Interested Parties

This notice serves as a final reminder to parties subject to administrative protective order (''APO'') of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

We are issuing and publishing this final results notice in accordance with sections 751(b) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.216.

Dated: November 17, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

Environmental Technologies Trade Advisory Committee (ETTAC) Public Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the Environmental Technologies Trade Advisory Committee (ETTAC).

DATES: The teleconference meeting is scheduled for Wednesday, December 7, 2016, at 2:00 p.m. Eastern Standard Time (EST). Please register by 5:00 p.m. EST on Friday, December 2, 2016 to listen in on the teleconference meeting.

ADDRESSES: The meeting will take place via teleconference. For logistical reasons, all participants are required to register in advance by the date specified above. Please contact Ms. Maureen Hinman at the contact information below to register and obtain call-in information.

SUPPLEMENTARY INFORMATION: The meeting will take place from 2:00 p.m. to 4:00 p.m. Eastern Standard Time (EST). This meeting is open to the public. Written comments concerning ETTAC affairs are welcome any time before or after the meeting. Minutes will be available within 30 days of this meeting.

Topic to be considered: The agenda for the December 7, 2016 meeting includes providing the newly chartered committee with an overview of committee operations and a briefing on Federal Advisory Committee Act (FACA) requirements. The committee will also deliberate on composition of subcommittees.

Background: The ETTAC is mandated by Section 2313(c) of the Export Enhancement Act of 1988, as amended, 15 U.S.C. 4728(c), to advise the Environmental Trade Working Group of the Trade Promotion Coordinating Committee, through the Secretary of Commerce, on the development and administration of programs to expand U.S. exports of environmental technologies, goods, services, and products. The ETTAC was originally chartered in May of 1994. It was most recently re-chartered until August 2016.

The teleconference will be accessible to people with disabilities. Please specify any requests for reasonable accommodation when registering to participate in the teleconference. Last minute requests will be accepted, but may be impossible to fulfill.

No time will be available for oral comments from members of the public during this meeting. As noted above, any member of the public may submit pertinent written comments concerning the Committee's affairs at any time before or after the meeting. Comments may be submitted to Ms. Maureen Hinman at the contact information indicated above. To be considered during the meeting, comments must be received no later than 5:00 p.m. Eastern Standard Time on Friday, December 2, 2016, to ensure transmission to the Committee prior to the meeting. Comments received after that date will be distributed to the members but may not be considered at the meeting.

FOR FURTHER INFORMATION CONTACT: Ms. Maureen Hinman, Office of Energy & Environmental Industries (OEEI), International Trade Administration, Room 4053, 1401 Constitution Avenue NW., Washington, DC 20230. (Phone: 202–482–0627; Fax: 202–482–5665; email: *maureen.hinman@trade.gov*).

Dated: November 17, 2016.

Man Cho,

Deputy Director, Office of Energy and Environmental Industries.

National Oceanic and Atmospheric Administration

RIN 0648–XF013

Fisheries of the Exclusive Economic Zone off Alaska; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for exempted fishing permit.

SUMMARY: This notice announces receipt of an exempted fishing permit (EFP) application from the Alaska Seafood Cooperative (AKSC). If granted, this permit would allow up to ten vessels to participate in the EFP—up to five AKSC-member Amendment 80 vessels would be allowed to conduct experimental fishing in two subareas of the Bering Sea that are closed to fishing with trawl gear, and five additional AKSC-member Amendment 80 vessels would conduct experimental fishing adjacent to the closed areas. Under the permit, experimental fishing with non-pelagic trawl gear would be authorized in Reporting Area 516 of Zone 1 that is otherwise closed to all trawl gear and the Red King Crab Savings Area (RKCSA) that is otherwise closed to non-pelagic trawl gear. The AKSC would collect data on crab prohibited species catch (PSC) rates during commercial groundfish fishing operations inside the Area 516 seasonal closure, the RKCSA, and adjacent areas that are currently open to non-pelagic trawling. The objective of the EFP is to evaluate PSC rates and overall catch of target species in the above-mentioned closed areas compared with the areas currently open to fishing with trawl gear. This experiment has the potential to promote the objectives of the Magnuson-Stevens Fishery Conservation and Management Act.

DATES: Submit comments on this EFP application on or before December 15, 2016. The North Pacific Fishery Management Council (Council) will consider the EFP application at its meeting to be held December 6, 2016, through December 14, 2016, in Anchorage, Alaska.

ADDRESSES: The Council meeting will be held at the Anchorage Hilton Hotel, 500 W. 3rd Avenue, Anchorage, AK, 99501. The agenda for the Council meeting is available at *http://legistar2.granicus.com/npfmc/meetings/2016/12/950_A_North_Pacific_Council_16-12-06_Meeting_Agenda.pdf.*

You may submit comments on this document, identified by NOAA–NMFS–2016–0142, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0142* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Address written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will

be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of the EFP application and the categorical exclusion under the National Environmental Policy Act are available from the Alaska Region, NMFS Web site at *http://alaskafisheries.noaa.gov/*.

FOR FURTHER INFORMATION CONTACT: Brandee Gerke, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the domestic groundfish fisheries in the Bering Sea and Aleutian Islands management area (BSAI) under the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP), which the Council prepared under the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing the BSAI groundfish fisheries appear at 50 CFR parts 600 and 679. The FMP and the implementing regulations, § 600.745(b) and § 679.6, allow the NMFS Regional Administrator to authorize, for limited experimental purposes, fishing that would otherwise be prohibited. Procedures for issuing EFPs are contained in the implementing regulations.

Background

BSAI groundfish harvests are subject to annual limits on groundfish and PSC. Pacific halibut, Pacific herring, Pacific salmon and steelhead, king crab (including red king crab), and Tanner crab are prohibited species under the FMP. Participants in the BSAI non-pelagic trawl fisheries catch PSC incidentally—primarily crab and halibut.

The directed red king crab pot fishery is one of the most important shellfish fisheries in the Bering Sea. Current regulations for harvesting red king crab in the crab pot fishery may be found in 50 CFR part 680. Red king crab is also caught incidentally as PSC in Bering Sea groundfish non-pelagic trawl fisheries. PSC (including red king crab) in the non-pelagic trawl fisheries must be minimized to the extent practicable and if caught, immediately returned to the ocean with a minimum of injury.

The Council and NMFS have implemented FMP amendments, dating back to the 1980s and 1990s, to reduce the amount of red king crab PSC in trawl fisheries, including the BSAI non-pelagic trawl fishery. For example, the Area 516 red king crab seasonal closure for all trawl gear (FMP Amendment 10) was implemented in 1987 (52 FR 8592, March 19, 1987). FMP Amendment 37, (61 FR 65985, December 16, 1996) was implemented in 1997 to create the RKCSA along with other measures to conserve concentrations of Bristol Bay red king crab.

The management and structure of the non-pelagic trawl fisheries in the Bering Sea have changed since these red king crab closure areas were implemented. In 2008, NMFS implemented Amendment 80 to the FMP (72 FR 52668, September 14, 2007). Amendment 80 established a catch share program to allocate specific non-pelagic groundfish species among specific defined participants (the Amendment 80 sector) and facilitate the formation of Amendment 80 cooperatives among those participants. Nineteen vessels were active in the Amendment 80 sector in 2016—this sector is the largest component of the non-pelagic trawl fishery. With the implementation of Amendment 80 to the FMP in 2008, vessels operating in Amendment 80 cooperatives were able to develop tools to reduce incidental catch of crab PSC.

Participants in Amendment 80 cooperatives have reduced the amount of red king crab PSC through improved fishing practices that are possible now that participants in the Amendment 80 cooperative receive an allocation of specific groundfish species. These exclusive allocations provide opportunities for Amendment 80 cooperative participants to slow down or otherwise change their fishing operations to avoid red king crab. These modified fishing practices are not practicable when vessels are not provided an exclusive harvest allocation, participate in derby-style fisheries, and are competing with other vessels to harvest their groundfish as soon as possible.

Although Amendment 80 cooperatives have undoubtedly helped to reduce red king crab bycatch in the sector's target fisheries, a combination of closed areas and PSC limits currently regulate red king crab PSC in trawl fisheries, including the Amendment 80 sector. For example, Area 516 of Zone 1 in the Bering Sea subarea closes annually to all trawl gear, including Amendment 80 vessels, from March 15 through June 15, § 679.22(a)(2).

Regulations for groundfish fishing in the RKCSA, found at § 679.22(a)(3), close directed fishing for non-pelagic trawl gear in a portion of the Bering Sea subarea defined in Figure 11 to 50 CFR part 679. Non-pelagic trawl gear is used by all Amendment 80 vessels in the Bering Sea.

PSC limits for red king crab, found at § 679.21(e)(1)(i), specify the annual PSC allowance of red king crab for all trawl vessels while engaged in directed fishing for groundfish in Zone 1. Approximately 50 percent of the Zone 1 red king crab PSC limit is apportioned to the Amendment 80 sector, and distributed as an allowance of crab to each Amendment 80 cooperative. In 2016, the Zone 1 PSC allowance for the AKSC is 30,834 red king crab.

The Zone 1 red king crab PSC allowance, allowed the Amendment 80 cooperatives to assign voluntary, vessel-level apportionments of PSC to vessels fishing in Zone 1. With these voluntary apportionments, vessel owners and operators in the sector began to share information about individual vessel PSC rates and avoid areas with high PSC rates for red king crab.

The primary result of the improved crab avoidance and management tools is that AKSC and the remaining Amendment 80 sector participants have consistently stayed well under the Zone 1 red king crab PSC allowance. While the potential exists for crab PSC allowances and closure areas to constrain allocated catch in some Amendment 80 target fisheries, the Amendment 80 sector continues to actively explore how to further reduce crab PSC while preserving target fishery harvest opportunities.

Exempted Fishing Permit Application

On August 25, 2016, the AKSC, an Amendment 80 cooperative, submitted an application for an EFP. We note that the AKSC submitted an application for similar EFP on October 2, 2015 (80 FR 72049, November 18, 2015). That EFP application was subsequently withdrawn by the applicant to provide additional time for the applicants to address comments received on the experimental design during review at the December 2015 Council meeting. The application submitted by the AFSC on August 25, 2016, includes the additional information requested at the December 2015 Council meeting and a few modifications to the experimental design relative to the October 2, 2015, application.

The EFP would allow up to five AKSC-member Amendment 80 vessels to conduct field tests in two subareas of the Bering Sea that are closed to trawl directed fisheries. Those two subareas are Reporting Area 516 of Zone 1, which is closed to all trawl gear under § 679.22(a)(2), and the RKCSA, which is closed to non-pelagic trawl gear under § 679.22(a)(3). The EFP would also allow up to five additional AKSC-member Amendment 80 vessels to conduct simultaneous, paired field tests adjacent to the two closed subareas. If granted, this EFP would allow AKSC to

collect data on crab bycatch rates during commercial fishing operations on ten groundfish fishing vessels (targeting mostly flatfish) inside the Area 516 seasonal closure, the RKCSA, and adjacent areas that are currently open to non-pelagic trawl gear. The principle objective of the EFP is to compare red king crab bycatch rates and target flatfish catch rates inside and outside of the closed areas. Data collected under this EFP would inform whether a systematic survey of crab abundance in the closed area is warranted.

AKSC proposes to conduct EFP fishing from January 20, 2017, through the end of April 2017. EFP fishing would begin again in late January 2018 and end by April 30, 2018. Conducting EFP fishing over two winter/spring seasons would increase the chance that data are collected over a wider range of environmental conditions that are expected to affect crab and flatfish abundance and location.

To ensure data are available for valid comparisons of catch rates inside and outside the closed areas, participating vessels would fish both inside the closed areas and in adjacent areas outside the closed areas (as proportionally as possible) over the course of their Zone 1 rock sole and yellowfin sole fishing each year of the EFP. The adjacent areas outside of the closed areas would be selected based on similarities in general depth and substrate type with areas fished in the RKCSA and Area 516 closed areas. To help ensure differences in bycatch rates reflect differences in relative abundance rather than the attributes of trawl gear used, the vessels participating in the EFP would keep their ground gear configuration (*e.g.,* size of trawl net and width of footropes) as consistent as possible inside and outside of the closed areas.

Under the EFP, sea samplers would be required for monitoring and data collection. Sea samplers are NMFS-certified observers that conduct activities under an EFP rather than normal observer activities on an Amendment 80 vessel.

The sea samplers would conduct a census of all crab for all EFP tows inside the red king crab closed areas and in adjacent areas outside the red king crab closed areas. The census data would include a record of size and sex of each individual. Temperature and depth data will be collected by sea samplers for each tow. Sea samplers will also collect fishing operational information such as tow speed and tow length. AKSC will compare catch rates on different EFP vessels when fishing in similar areas to evaluate the degree to which individual vessels are impacting catch rates.

To ensure observer sampling duties are undisturbed, expanded crab data collection under the census would be conducted in a manner that is completely separate from current observer sampling protocols. To accomplish this, the crab census would occur after all the catch passes over the vessel's flow scale and the observer has completed all sampling of unsorted catch for all Bering Sea EFP hauls.

The ten vessels authorized to participate in this EFP would be required to comply with all the aggregate target species allocations that apply to the rest of the Amendment 80 sector, and would operate under the Amendment 80 crab and halibut PSC allowances available through membership in the AKSC. These allowances would apply to all EFP and non-EFP fishing during the year.

Under the EFP, the AKSC and the member EFP vessels would be limited to the amount of aggregate groundfish allocations currently in regulation at 50 CFR part 679. Further, the amount of red king crab PSC accrued by the AKSC and under the EFP would not exceed the AKSC's 2017 or 2018 red king crab allowance. All other crab limits and halibut mortality limits will continue to apply to the EFP activities, and are subject to review and approval by NMFS.

At the end of EFP fishing in 2017, AKSC would be required to submit to NMFS a preliminary report of the EFP results on PSC use inside and outside of the closed areas and by target fishery. At the end of EFP fishing in 2018, a final, comprehensive EFP report would be submitted.

The proposed action would exempt participating AKSC vessels from selected 50 CFR part 679 closed areas and PSC handling requirements. Should the Regional Administrator issue a permit based on this EFP application, the conditions of the permit would be designed to minimize PSC, and any potential for EFP participants to bias estimates of groundfish or PSC. Vessels participating in EFP fishing would be exempt from, at minimum, the following regulations:

1. Closure to directed fishing by trawl gear in Reporting Area 516 of Zone 1 in the Bering Sea subarea from March 15 through June 15, at § 679.22(a)(2).

2. Closure to directed fishing by non-pelagic trawl gear in the RKCSA, at § 679.22(a)(3).

3. The operator of each vessel, after allowing for sampling by an observer, return all prohibited species, or parts thereof, to the sea immediately, with a minimum of injury, regardless of its condition, at § 679.21(a)(2)(ii).

The EFP would be valid upon issuance in 2017 until either the end of designated EFP fishing in 2018 or until the AKSC Zone 1 red king crab PSC allowance is reached in areas of the BSAI open to directed fishing by the Amendment 80 cooperatives. EFP-authorized fishing activities would not be expected to change the nature or duration of the groundfish fishery, gear used, or the amount or species of fish caught by the Amendment 80 cooperatives.

The fieldwork that would be conducted under this EFP is not expected to have a significant impact on the human environment as detailed in the categorical exclusion prepared for this action (see **ADDRESSES**).

In accordance with § 679.6, NMFS has determined that the application warrants further consideration and has forwarded the application to the Council to initiate consultation. The Council is scheduled to consider the EFP application during its December 2016 meeting, which will be held at the Anchorage Hilton Hotel, Anchorage, AK. The EFP application will also be provided to the Council's Scientific and Statistical Committee for review at the December Council meeting. The applicant has been invited to appear in support of the application.

Public Comments

Interested persons may comment on the EFP application at the December 2016 Council meeting during public testimony. Information regarding the meeting is available at the Council's Web site at *http://alaskafisheries.noaa.gov/npfmc/council.htm.* Comments also may be submitted directly to NMFS (see **ADDRESSES**) by the end of the comment period (see **DATES**). Copies of the application and categorical exclusion are available for review from NMFS (see **ADDRESSES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 18, 2016.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Analysis of and Participation in Ocean Exploration Video Products.

OMB Control Number: 0648–xxxx.

Form Number(s): None.

Type of Request: Regular (request for a new information collection).

Number of Respondents: 2,000.

Average Hours per Response: 15 minutes or less.

Burden Hours: 563.

Needs and Uses: This request is for a new information collection. Telepresence uses satellite communication from ship to shore to bring the unknown ocean to the screens of scientists and the general public in their homes, schools or offices. With technology constantly evolving it is important to address the needs of the shore-based scientists and public to maintain a high level of participation. We will use voluntary surveys to identify the needs of users of data, best approaches to leverage expertise of shore based participants and to create a ''Citizen Science'' web portal for meaningful public engagement focused on ocean exploration.

Affected Public: Not-for-profit institutions; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: November 18, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

[FR Doc. 2016–28258 Filed 11–22–16; 8:45 am]

BILLING CODE 3510–KD–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Proposed Revised Information Collection Comment Request; Limited Access Death Master File Subscriber Certification Form

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Technical Information Service, Commerce.

Title: Limited Access Death Master File Subscriber Certification Form (Certification Form).

OMB Control Number: 0692–0013.

Form Number(s): NTIS FM161.

Type of Request: Revised information collection.

Number of Respondents: NTIS expects to receive approximately 560 applications for certification or renewal of certification every year for access to the Limited Access Death Master File.

Average Hours per Response: 2.5 hours.

Burden Hours: 1400 (560 applications × 2.5 hours = 1400 hours).

Needs and Uses: NTIS issued a final rule establishing a program through which persons may become eligible to obtain access to Death Master File (DMF) information about an individual within three years of that individual's death. The final rule was promulgated under Section 203 of the Bipartisan Budget Act of 2013, Public Law 113–67 (Act). The Act prohibits the Secretary of Commerce (Secretary) from disclosing DMF information during the three-year period following an individual's death (Limited Access DMF), unless the person requesting the information has been certified to access the Limited Access DMF pursuant to certain criteria in a program that the Secretary establishes. The Secretary delegated the authority to carry out Section 203 to the Director of NTIS. Initially, on March 26, 2014, NTIS promulgated an interim final rule, establishing a temporary certification program (79 FR 16668) for persons who seek access to the Limited Access DMF. Subsequently, on December 30, 2014, NTIS issued a notice of proposed rulemaking (79 FR 78314). NTIS adjudicated the comments received, and, on June 1, 2016, published a final rule (81 FR 34822).

NTIS created the Certification Form used with the interim final rule for Persons and Certified Persons to provide information to NTIS describing the basis upon which they are seeking certification. In the notice of proposed rulemaking, NTIS discussed proposed revisions to the Certification Form (79 FR 78314 at 78320–21). The final rule requires that Persons and Certified Persons provide additional information to improve NTIS's ability to determine whether a Person or Certified Person meets the requirements of the Act (81 FR 34882).

Affected Public: Members of the public seeking certification or renewal of certification for access to the Limited Access Death Master File under the final rule for the ''Certification Program for Access to the Death Master File.''

Frequency: Once a year.

Respondent's Obligation: Mandatory for any Person seeking certification or renewal of certification for access to the Limited Access DMF.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

[FR Doc. 2016–28243 Filed 11–22–16; 8:45 am]

BILLING CODE 3510–13–P

CONSUMER PRODUCT SAFETY COMMISSION

Civil Penalties; Notice of Adjusted Maximum Amounts

AGENCY: Consumer Product Safety Commission

ACTION: Notice of adjusted maximum civil penalty amounts.

SUMMARY: In 1990, Congress enacted statutory amendments that provided for periodic adjustments to the maximum civil penalty amounts authorized under the Consumer Product Safety Act, the Federal Hazardous Substances Act, and the Flammable Fabrics Act. On August 14, 2009, the Consumer Product Safety Improvement Act of 2008 (CPSIA) increased the maximum civil penalty amounts to $100,000 for each violation and $15,000,000 for any related series of violations. The CPSIA also revised the starting date, from December 1, 1994 to December 1, 2011, and December 1 of each fifth calendar year thereafter, on which the Commission must prescribe

and publish in the **Federal Register**, the schedule of maximum authorized penalties. As calculated in accordance with the amendments, the new amounts are $110,000 for each violation, and $16,025,000 for any related series of violations.

DATES: The new amounts will become effective on January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Dennis C. Kacoyanis, Attorney, Office of the General Counsel, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–7587; email *dkacoyanis@cpsc.gov.*

SUPPLEMENTARY INFORMATION: The Consumer Product Safety Improvement Act of 1990 (Improvement Act), Public Law 101–608, 104 Stat. 3110 (November 16, 1990), and the Consumer Product Safety Improvement Act of 2008 (CPSIA), Public Law 110–314, 122 Stat. 3016 (August 14, 2008), amended the Consumer Product Safety Act (CPSA), the Federal Hazardous Substances Act (FHSA), and the Flammable Fabrics Act (FFA). The Improvement Act added civil penalty authority to the FHSA and FFA, which previously contained only criminal penalties. 15 U.S.C. 1264(c) and 1194(e). The Improvement Act also increased the maximum civil penalty amounts applicable to civil penalties under the CPSA and set the same maximum amounts for the newly created FHSA and FFA civil penalties. 15 U.S.C. 2069(a)(1), 1264(c)(1) and 1194(e)(1).

The Improvement Act directed the Commission to adjust the maximum civil penalty amounts periodically for inflation:

(A) The maximum penalty amounts authorized in paragraph (1) shall be adjusted for inflation as provided in this paragraph.

(B) Not later than December 1, 1994, and December 1 of each fifth calendar year thereafter, the Commission shall prescribe and publish in the **Federal Register** a schedule of maximum authorized penalties that shall apply for violations that occur after January 1 of the year immediately following such publication.

(C) The schedule of maximum authorized penalties shall be prescribed by increasing each of the amounts referred to in paragraph (1) by the cost-of-living adjustment for the preceding 5 years. Any increase determined under the preceding sentence shall be rounded to—

(i) in the case of penalties greater than $1,000 but less than or equal to $10,000, the nearest multiple of $1,000;

(ii) in the case of penalties greater than $10,000 but less than or equal to $100,000, the nearest multiple of $5,000;

(iii) in the case of penalties greater than $100,000 but less than or equal to $200,000, the nearest multiple of $10,000; and

(iv) in the case of penalties greater than $200,000, the nearest multiple of $25,000.

(D) For purposes of this subsection:

(i) The term ''Consumer Price Index'' means the Consumer Price Index for all-urban consumers published by the Department of Labor.

(ii) The term ''cost-of-living adjustment for the preceding five years'' means the percentage by which—

(I) the Consumer Price Index for the month of June of the calendar year preceding the adjustment; exceeds

(II) the Consumer Price Index for the month of June preceding the date on which the maximum authorized penalty was last adjusted. 15 U.S.C. 2069(a)(3), 1264(c)(6), and 1194(e)(5).

The CPSIA amended the CPSA, FHSA, and FFA to increase the maximum civil penalty amounts to $100,000 for each violation, and $15,000,000 for any related series of violations. 15 U.S.C. 2069(a)(1), 1264(c)(1), and 1194(e)(1). The CPSIA also revised the starting date from December 1, 1994, and every fifth year thereafter, to no later than December 1, 2011, and every fifth year thereafter, as the date on which ''the Commission shall prescribe and publish in the **Federal Register** a schedule of maximum authorized penalties that shall apply for violations that occur after January 1 of the year immediately following such publication.''

The Commission's Directorate for Economics has calculated that the cost-of-living adjustment increases the maximum civil penalty amounts to $105,722 for each violation, and to $16,016,580 for any related series of violations. Rounding off these numbers in accordance with the statutory directions, the adjusted maximum amounts are $110,000 for each violation, and $16,025,000 for any related series of violations. These new amounts will apply to violations that occur after January 1, 2017.

Dated: November 18, 2016.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

CONSUMER PRODUCT SAFETY COMMISSION

Conclusion of Consumer Product Safety Commission International Trade Data System Initial Test Concerning the Electronic Filing of Targeting/Enforcement Data

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: The U.S. Consumer Product Safety Commission (Commission or CPSC) in consultation with U.S. Customs & Border Protection (CBP) previously announced a test to assess the electronic filing of certain data via the Partner Government Agency (PGA) Message Set to the CBP-authorized Electronic Data Interchange (EDI) system known as the Automated Commercial Environment (ACE). Test participants collaborated with CBP and CPSC in examining the effectiveness of the ''single window'' capability and assessing the concept of a data registry (the Product Registry), maintained by CPSC. CBP and CPSC have determined that the test, which the CPSC refers to as the ''eFiling Alpha Pilot,'' was successful, in that participating firms were able to file CPSC's PGA Message Set data as part of an ACE entry, CPSC was able to receive the PGA Message Set data from CBP, and CPSC was able to accept the data into CPSC's system for risk analysis. Accordingly, this document announces that the initial test, the eFiling Alpha Pilot, will conclude on December 31, 2016.

DATES: The CPSC test will conclude on December 31, 2016.

ADDRESSES: Comments on the test or concerning this notice should be submitted through electronic mail to: *efilingpilot@cpsc.gov.*

FOR FURTHER INFORMATION CONTACT: Questions regarding the test should be directed to Jim Joholske, Deputy Director, Office of Import Surveillance, U.S. Consumer Product Safety Commission, (301) 504–7527, *efilingpilot@cpsc.gov.* Questions sent by electronic mail should contain the subject heading ''Question re PGA Message Set Test.'' For technical questions regarding ACE or ABI transmissions, or the PGA message set data transmission, please contact your assigned CBP client representative. Interested parties without an assigned client representative should submit an email to Steven Zaccaro at *steven.j.zaccaro@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

A. The Automated Commercial Environment

ACE is an automated and electronic system for commercial trade processing that is intended to streamline business processes, facilitate growth in trade, ensure cargo security, and foster participation in global commerce, while ensuring compliance with U.S. laws and regulations, and reducing costs for CBP and all of its communities of interest. The Automated Broker Interface (ABI) is a software interface to ACE. Commercial trade participants who want to file entries in ACE use ABI to electronically file required import data with CBP. ABI transfers trade-submitted data into ACE. CBP has developed ACE as the ''single window'' for the trade community to comply with the International Trade Data System (ITDS) requirement established by the SAFE Port Act of 2006. The PGA Message Set enables additional trade-related data specified by PGAs to be entered in one location.

B. ITDS Goals and CBP's Authority To Conduct National Customs Automation Program Tests

The ITDS is an electronic data interchange system whose goals include eliminating redundant information requirements, efficiently regulating the flow of commerce, and effectively enforcing laws and regulations relating to international trade by establishing a single portal system, operated by CBP, for the collection and distribution of standard electronic import and export data required by participating federal agencies. All federal agencies that require documentation for clearance or licensing the importation of cargo are required to participate in ITDS. The Customs Modernization provisions in the North American Free Trade Agreement Implementation Act provide the Commissioner of CBP with authority to conduct limited test programs or procedures designed to evaluate planned components of the National Customs Automation Program (NCAP), which includes ACE.

C. Test Purpose and Goal

CPSC's PGA Message Set test, described in an August 21, 2015 **Federal Register** Notice, was developed to further ITDS and NCAP goals. 80 FR 50827 (Aug. 21, 2015) (August 2015 Test Notice). Information and feedback from the test will be used to evaluate electronic filing capability and inform the Commission in striving to improve and streamline the import process going forward. The goal of electronic filing of targeting/enforcement data is to facilitate compliant trade as well as sharpen CPSC's focus on noncompliant trade. CPSC intends to use targeting/enforcement data to review consumer product entry requirements and allow for earlier risk-based admissibility decisions by CPSC staff. Additionally, because it is electronic, the PGA Message Set could eliminate the necessity for submission and subsequent handling of paper documents. Piloting electronic filing as a means to transition away from paper-based filing is a priority initiative of the PGAs to meet the stated ''single window'' implementation timeline.

II. CPSC's PGA Message Set Test

A. Description of the Test

CPSC focused this initial test on electronic filing of five targeting/enforcement data elements (CPSC data), using the PGA Message Set. The test evaluated participant's ability to electronically file targeting/enforcement data for regulated finished consumer products under CPSC's jurisdiction and three specified finished products included on the Substantial Product Hazard List established under section 15(j) of the CPSA, and CPSC's ability to accept targeting/enforcement data into CPSC's risk assessment methodology program (the RAM).

Pilot participants had a choice between two different methods to file targeting/enforcement data for products using the PGA Message Set. Participants could either: (1) File the targeting/enforcement data elements with each product at the time of entry (Full PGA Message Set), or (2) file only a reference to targeting/enforcement data stored in a Product Registry maintained by CPSC (Product Registry and Reference PGA Message Set). Participants primarily chose to file data using the Product Registry and Reference PGA Message Set, although we anticipate that several participants will file using the Full PGA Message Set before the pilot concludes. Through their broker, pilot participants submitted targeting/enforcement data through CPSC's PGA Message Set as part of an ACE entry, or ACE entry summary if both entry and entry summary were filed together. Participants filed PGA Message Set data with each applicable entry filed with CBP. To file CPSC PGA Message Set data through ACE, associated brokers successfully implemented application software updates.

Once filed in ACE, CBP made the PGA Message Set data, along with entry data, available to CPSC for validation. CPSC was able to receive PGA Message Set data from CBP, where applicable, match a reference number with previously-filed targeting/enforcement data in the Product Registry, and to accept the enforcement/targeting data elements into CPSC's RAM. Moreover, participants that chose to use the Product Registry were able to file the requisite targeting/enforcement data into the Product Registry for specific products, and were able to successfully provide a reference number to this data using the PGA Message Set during the entry process, rather than entering all such data elements each time the product was imported.

B. Conclusion of the Test

As stated in the August 2015 Test Notice, once operational, the test was expected to run for approximately six months or until concluded or extended by the issuance of a **Federal Register** notice announcing the extension or conclusion of this test. This notice announces that CPSC and CBP have determined that ACE is capable of accepting electronic targeting/enforcement data, and electronic Product Registry reference information, through CPSC's PGA Message Set. CPSC is capable of receiving PGA Message Set data, matching reference data to previously-filed targeting/enforcement data in the Product Registry, and accepting targeting/enforcement data and entry data into CPSC's RAM program for further risk evaluation. CPSC also determined that participants are able to enter the requisite targeting/enforcement data elements for each product into a Product Registry, receive a reference number, and file such reference number in CPSC's PGA Message Set each time the product is referenced in an ACE entry. Having found the eFiling Alpha Pilot to be successful, CPSC and CBP are concluding the test effective December 31, 2016.

Upon the date the test concludes, trade members will no longer be authorized to file CPSC data in ACE. CBP will undertake efforts to reject or prevent the filing of CPSC data in ACE.

III. Next Steps for CPSC's PGA Message Set Testing

After the conclusion of the test, CPSC will provide a forum to consider what CPSC staff and participants learned from the eFiling Alpha Pilot and how best to structure a more robust ''beta'' test of electronic filing. Based on the review of the eFiling Alpha Pilot, CPSC staff will provide options regarding a ''beta'' testing phase for Commission consideration.

Dated: November 17, 2016.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Air Force

Notice of Intent To Grant a Partially Exclusive Patent License

AGENCY: Air Force Materiel Command.

ACTION: Notice of intent.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant a partially exclusive (exclusive with respect to the field of fluid separation and filtration) patent license agreement to InfiniPure LLC., a corporation of the State of Ohio, having a place of business at 714 Monument Ave, Dayton, OH 45402.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to the Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Room 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; or Email: *afmclo.jaz.tech@us.af.mil.* Include Docket No. ARQ–161114B–PL in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Rm 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; Email: *afmclo.jaz.tech@us.af.mil.*

SUPPLEMENTARY INFORMATION: The Department of the Air Force intends to grant the partially exclusive patent license agreement for the invention described in:

U.S. Patent No. 8,293,107, entitled, ''Fibers With Axial Capillary Slit That Enhances Adsorption, Absorption and Separation,'' filed 11 January 2010, and issued 23 October 2012.

Authority: 35 U.S.C. 209; 37 CFR 404.

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Henry Williams,

Acting Air Force Federal Register Liaison Officer.

DEPARTMENT OF DEFENSE

Department of the Air Force

Board of Visitors of the U.S. Air Force Academy Notice of Meeting

AGENCY: U.S. Air Force Academy Board of Visitors, Department of Defense.

ACTION: Meeting notice.

SUMMARY: In accordance with 10 U.S.C. Section 9355, the U.S. Air Force Academy (USAFA) Board of Visitors (BoV) will hold a meeting on the Senate Side, Capitol Visitor Center, Room 212–10, Washington, DC on Thursday, December 8, 2016. The meeting will begin at 0830 and conclude at 1515. The purpose of this meeting is to review morale and discipline, social climate, curriculum, instruction, infrastructure, fiscal affairs, academic methods, strategic communication, and other matters relating to the Academy. Specific topics for this meeting include a Superintendent's Update; Dean's Update; Athletic Department Update; BoV update. Public attendance at this USAFA BoV meeting shall be accommodated on a first-come, first-served basis up to the reasonable and safe capacity of the meeting room. In addition, any member of the public wishing to provide input to the USAFA BoV should submit a written statement in accordance with 41 CFR Section 102–3.140(c) and section 10(a)(3) of the Federal Advisory Committee Act and the procedures described in this paragraph. Written statements must address the following details: The issue, discussion, and a recommended course of action. Supporting documentation may also be included as needed to establish the appropriate historical context and provide any necessary background information. Written statements can be submitted to the Designated Federal Officer (DFO) at the Air Force address detailed below at any time. However, if a written statement is not received at least 10 calendar days before the first day of the meeting which is the subject of this notice, then it may not be provided to or considered by the BoV until its next open meeting. The DFO will review all timely submissions with the BoV Chairman and ensure they are provided to members of the BoV before the meeting that is the subject of this notice. If after review of timely submitted written comments and the BoV Chairman and DFO deem appropriate, they may choose to invite the submitter of the written comments to orally present the issue during an open portion of the BoV meeting that is the subject of this notice. Members of the BoV may also petition the Chairman to allow specific personnel to make oral presentations before the BoV. In accordance with 41 CFR Section 102–3.140(d), any oral presentations before the BoV shall be in accordance with agency guidelines provided pursuant to a written invitation and this paragraph. Direct questioning of BoV members or meeting participants by the public is not permitted except with the approval of the DFO and Chairman. For the benefit of the public, rosters that list the names of BoV members and any releasable materials presented during the open portions of this BoV meeting shall be made available upon request.

Contact Information: For additional information or to attend this BoV meeting, contact Major James Kuchta, Accessions and Training Division, AF/A1PT, 1040 Air Force Pentagon, Washington, DC 20330, (703) 695–4066, *James.L.Kuchta.mil@mail.mil.*

Henry Williams,

Acting Air Force Federal Register Liaison Officer.

BILLING CODE 5001–10–P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for Modification of the Bayou Lafourche and Lafourche-Jump Waterway, Louisiana, Navigation Channel Project in Lafourche Parish

AGENCY: U.S. Army Corps of Engineers, Department of the Army, DOD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps), New Orleans District will be the lead agency for a draft Environmental Impact Statement (DEIS), to be integrated with a Feasibility Report (FR), for the Bayou Lafourche and Lafourche-Jump Waterway, Louisiana Project, in Lafourche Parish. The FR and DEIS will investigate channel modification to the Bayou

Lafourche Waterway up to as much as 50 feet deep. The integrated document will be prepared by the Greater Lafourche Port Commission (GLPC).

FOR FURTHER INFORMATION CONTACT: Questions about the project and the DEIS should be addressed to: Mr. Sean Mickal, U.S. Army Corps of Engineers, Regional Planning and Environment Division South, Planning Branch, Room 141, 7400 Leake Avenue, New Orleans, LA 70118–3651, by email at *sean.p.mickal@usace.army.mil,* or by telephone at (504) 862–2319.

SUPPLEMENTARY INFORMATION:

1. *Authority.* The DEIS is being prepared by the GLPC under authority granted by Section 203 of the Water Resources Development Act (WRDA) of 1986, as amended by Section 1014(b) of the Water Resources Reform and Development Act (WRRDA) of 2014.

2. *Proposed Action.* The proposed action is to increase the controlling depth of the Bayou Lafourche Waterway federal navigation channel. Economic analyses will be performed to determine the current and future needs for the channel by various draft vessels, and the costs and benefits of maintaining channels of various sizes.

3. *Alternatives.* An array of alternatives will be analyzed and the most feasible of the alternatives will be recommended. Alternatives range from the 'No Action' Alternative to enlarging and extending the access channel to the natural contour of the Gulf at approximately -50 ft. Mean Lower Low Water. The selected contour is to be optimized in the process of preparing the Integrated FR and DEIS. All feasible and reasonable alternatives will be considered, including alternatives with varying depths and lengths, for detailed analysis.

4. *Scoping.* Scoping is the process for determining the scope of alternatives and significant issues to be addressed in the DEIS. For this study, a letter will be sent to all parties believed to have an interest in the study, requesting their input on alternatives and issues to be evaluated. The letter will also notify interested parties of a public scoping meeting that will be held in the local area. Notices will also be sent to local news media. All interested parties are invited to comment at this time, and anyone interested in this study should request to be included in the study mailing list. A public scoping meeting or meetings will be announced in the near future.

5. *Purpose of and Need for the Project.* The project will enlarge the existing authorized channel at Port Fourchon, Louisiana, to an engineering, economic and environmentally feasible depth and extend the main access channel to the natural contour of the Gulf of Mexico at the optimum depth. The project would include the construction of a turning basin or wider slip(s) within the port complex to accommodate larger vessels. The action is being proposed to provide adequate depth to accommodate deeper drafts of larger oil and gas exploration and service vessels plying the Gulf in deep waters; to provide depths required to move large oil and gas exploration and production rigs constructed and fabricated at the port to open water; to allow large oil and gas platforms to move from the Gulf to Port Fourchon for repair and refurbishment; and to provide adequate depth for other ongoing construction projects at the port.

6. *Significant Issues.* The tentative list of resources and issues, not exclusive, to be evaluated in the DEIS includes tidal wetlands, barrier shoreline habitat, aquatic resources, wildlife resources, essential fish habitat, water quality, air quality, threatened and endangered species, recreational resources, and cultural resources. Additional resources might include geological issues (including dredging and stabilization of fill areas) and impacts on visual resources. Socioeconomic items to be evaluated in the DEIS include navigation, business and industrial activity, employment, land use, property values, public/community facilities and services, tax revenues, population, community and regional growth, vehicular transportation, and noise.

7. *Consultation, Coordination, and Review.* The U.S. Fish and Wildlife Service (USFWS) will be assisting in the documentation of existing conditions and assessment of effects of project alternatives through Fish and Wildlife Coordination Act consultation procedures. The USFWS will also provide a Fish and Wildlife Coordination Act report. Endangered Species Act, Section 7 consultation, will also be conducted in close coordination with the USFWS and the National Marine Fisheries Service concerning threatened and endangered species. Consultation will also be done with the State Historic Preservation Office and federally recognized Indian Tribes. The proposed action will involve evaluation for compliance with guidelines established by Section 404(b) of the Clean Water Act; application (to the State of Louisiana) for Water Quality Certification pursuant to Section 401 of the Clean Water Act; certification of state lands, easements, and rights of way; and determination of Coastal Zone Management Act consistency. The DEIS will be distributed for review to all interested agencies, organizations, and individuals.

8. *Estimated Date of Availability.* It is estimated that this DEIS will be available to the public in November 2017. At least one public meeting will be held at that time, during which the public will be provided the opportunity to comment on the DEIS before it becomes final.

Dated: November 10, 2016.

Michael N. Clancy,

Colonel, U.S. Army, District Commander.

BILLING CODE 3720–35–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0100]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Gainful Employment Disclosure Template

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 23, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0100. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Gainful Employment Disclosure Template.

OMB Control Number: 1845–0107.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Individuals or Households; Private Sector.

Total Estimated Number of Annual Responses: 27,944,411.

Total Estimated Number of Annual Burden Hours: 3,118,160.

Abstract: Under the new disclosure requirements, an institution must provide current and prospective students with information about each of its programs that prepares students for gainful employment in a recognized occupation (GE programs) using a disclosure template provided by the Secretary. The Secretary must specify the information to be included on the disclosure template in a notice published in the **Federal Register**. In accordance with the requirements of § 668.412 of the Gainful Employment (GE) final regulations published in the **Federal Register** on October 31, 2014 (79 FR 64890), as corrected on December 4, 2014 (79 FR 71957), this collection describes the items that must be disclosed on the GE disclosure template. This request revises the current information collection for the disclosure template to reflect the new disclosure requirements and provides notice of the information that institutions must disclose. The Department is further requesting that burden currently calculated for 1845–0107 be discharged and transfer the burden already calculated for § 668.412 regarding the GE disclosure requirements from 1845–0123 to this information collection.

Dated: November 18, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0132]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; 2018 Teaching and Learning International Survey (TALIS 2018) Main Study Recruitment and Field Test—Questionnaires Change Request

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a reinstatement of a previously approved information collection.

DATES: Interested persons are invited to submit comments on or before December 23, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0132. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact NCES Information Collections at *NCES.Information.Collections@ed.gov.*

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: 2018 Teaching and Learning International Survey (TALIS 2018) Main Study Recruitment and Field Test—Questionnaires Change Request.

OMB Control Number: 1850–0888.

Type of Review: A reinstatement of a previously approved information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 1,228.

Total Estimated Number of Annual Burden Hours: 1,949.

Abstract: The Teaching and Learning International Survey (TALIS) is an international survey of teachers and principals that focuses on the working conditions of teachers and the teaching and learning practices in schools. TALIS was first administered in 2008 and is conducted every five years. Having participated in 2013 but not in 2008, the United States will administer TALIS for

the second time in 2018. TALIS is sponsored by the Organization for Economic Cooperation and Development (OECD). In the United States, TALIS is conducted by the National Center for Education Statistics (NCES), of the Institute of Education Sciences within the U.S. Department of Education. TALIS 2018 will address teacher training and professional development, teachers' appraisal, school climate, school leadership, teachers' instructional approaches, and teachers' pedagogical practices. In February 2017, TALIS 2018 field test will be conducted to evaluate newly developed teacher and school questionnaire items and test the survey operations. NCES's request to recruit and conduct pre-survey activities for the 2017 field test sample, administer the field test, and recruit schools for the 2018 main study sample was approved in September 2016 (1850–0888 v.5). This request amends the TALIS 2018 Recruitment and Field Test record with the final versions of the adapted U.S. versions of the TALIS 2018 field trial questionnaires. We are announcing a second 30-day comment period for the TALIS 2018 Field Test to include additional survey items in the field test questionnaires, as recently stipulated by OECD.

Dated: November 18, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

The SunShot Prize: Solar in Your Community Challenge

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy (DOE).

ACTION: Notice; Release of prize competition rules and process to participate.

SUMMARY: The Department of Energy (DOE) gives notice of the official release of rules for the SunShot Prize: Solar in Your Community Challenge. The Solar in your Community Challenge is a $5 million prize competition to expand solar access to underserved segments, specifically low-and-moderate-income (LMI) communities; non-federal governments (*i.e.* state, local, and tribal), and non-profit organizations. The Challenge supports the creation, demonstration, and scaling of innovative, replicable, and sustainable business and financial models that can successfully unlock solar access to these underserved segments. A $500,000 Grand Prize will be awarded to the best team that can most successfully demonstrate a model and plan to scale solar to low and moderate income market segments. Other top teams will compete to receive four final prizes totaling $500,000 based on their achievements and potential to scale up. In addition to competing for final prizes, DOE will award selected teams a total of $2 million in seed awards and $2 million in technical assistance throughout an 18-month performance period starting in April 2017 based on successful milestone completion. The rules for the Challenge can be found at *www.solarinyourcommunity.org.*

DATES: Submission to participate in the Solar in Your Community Challenge started on November 18, 2016 and ends on March 17, 2017. The 18-month performance period starts in April 2017 and ends in October 2018. Final prizes are expected to be announced in January 2019. All dates are subject to change.

ADDRESSES: To apply, parties interested in participating should visit *www.solarinyourcommunity.org* and fill out an application.

FOR FURTHER INFORMATION CONTACT: Ms. Odette Mucha, U.S. Department of Energy, Mailstop EE–4S, 1000 Independence Ave. SW., Washington, DC 20585–0001. Telephone: (202) 287–1862, Email: *solar.community@ee.doe.gov.*

SUPPLEMENTARY INFORMATION: The America COMPETES Reauthorization Act of 2010 (America COMPETES), Public Law 111–358, enacted January 4, 2011, authorizes Federal agencies to issue competitions to stimulate innovations in technology, education, and science.

Subject of the Competition

The Solar in Your Community Challenge is a $5 million competition sponsored by the U.S. Department of Energy's (DOE) SunShot Initiative and administered by State University of New York Polytechnic Institute. The goal is to expand solar access to underserved segments, specifically low-and-moderate-income (LMI) communities, non-federal governments (*i.e.* state, local, and tribal), and non-profit organizations. The Challenge supports the creation, demonstration, and scaling of innovative, replicable, and sustainable business and financial models that can successfully unlock solar access to these underserved segments.

A $500,000 Grand Prize will be awarded to the best team that can most successfully demonstrate a model and plan to scale solar to low and moderate income markets. Top teams will also compete to receive four additional final prizes totaling $500,000 based on their achievements and potential to scale up. In addition to competing for final prizes, DOE will award selected teams a total of $2 million in seed awards and $2 million in technical assistance. Seed awards will be granted incrementally based on milestones during the 18-month performance period.

Two types of teams can participate in the Challenge: Project-focused and program-focused teams. Both types of teams will pursue solar efforts that benefit LMI communities (*e.g.,* residents of public housing), municipal governments (*e.g.,* schools), or non-profits (*e.g.,* foodbanks) that aggregate to 25kW–5MW in size.

Project teams will pursue a portfolio of new solar projects, while program-teams will establish new initiatives that support and enable these types of projects. Any entity can lead the project teams, but the teams should include a wide range of partners (*e.g.,* solar developers, utilities, cities, financial institutions, and community groups). State, local, and/or tribal governments; financial institutions; or utilities should lead the program-focused teams.

The Rules for Being Eligible To Participate in the Competition

The Challenge is open only to: (a) Citizens or permanent residents of the United States; and (b) private or non-federal public entities, such as townships, tribes, corporations, or other organizations that are incorporated in and maintain a primary place of business in the United States. DOE employees, employees of sponsoring organizations, members of their immediate families (spouses, children, siblings, parents), and persons living in the same household as such persons, whether or not related, are not eligible to participate in this competition. Federal entities and federal employees, acting within the scope of their employment, are also not eligible to participate in any portion of this competition.

Applicants Planning To Participate as Part of a Team Must Meet the Following Qualifying Requirements

A team must have a single legal entity representing the entire team. This entity shall be designated the Team Lead. The Team Lead is responsible for complying

with all rules of this competition including coordinating with its team members, resolving any conflicts, working with DOE and its prize administrator, participating according to the governing guidelines of the Marketplace, responsibly allocating resources, submitting all required materials throughout the competition, and complying with all guidance and restrictions, including restrictions around intellectual property.

For program-focused teams only, the Team Lead should be an electric utility, an electric co-operative, municipal power company, a financial institution, or a state, local or tribal government entity.

Each team member must be either: (a) Citizens or permanent residents of the United States; or (b) private or non-federal public entities, such as townships, tribes, corporations, or other organizations that are incorporated in and maintain a primary place of business in the United States. A subsidiary of a foreign entity that is incorporated in the United States and that maintains a primary place of business in the United States is also eligible.

To apply, parties interested in participating should visit *www.solarinyourcommunity.org* and fill out an application.

Technical Assistance

DOE and the Prize Administrator will provide a total of $2 million in technical assistance to selected teams.

Prizes

Select Teams will receive seed prizes based on criteria assessing the team's potential impact (40%), innovation (30%), and the team itself (30%).

Final prizes will be determined through evaluation of teams' progress over the 18-month period of performance, their overall ability to create replicable, scalable, economically-sustainable business and financial models, and the innovativeness of their approach. The decisions of the judges are final and may not be challenged by participating teams.

Issued in Washington, DC on November 17, 2016.

Roland Risser,

Deputy Assistant Secretary Renewable Power, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy.

[FR Doc. 2016–28235 Filed 11–22–16; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–357–000]

MPower Energy; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding MPower Energy's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is December 6, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application

Chesapeake Appalachia, LLC ..... Columbia Natural Resources, LLC. Core Appalachia Midstream, LLC.	Docket No. CP17–13–000

Take notice that on November 9, 2016, Chesapeake Appalachia, LLC (Chesapeake), Columbia Natural Resources, LLC (CNR), (collectively CNR/Chesapeake), 6100 N. Western Avenue, Oklahoma City, OK 73118, filed an application for authority under section 7(b) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations to abandon by sale a Limited Jurisdiction Certificate granted in Docket No. CP04–101–000.

The Commission has previously determined that CNR/Chesapeake is not a natural gas company, as defined in Section 2(6) of the NGA. CNR/Chesapeake states that it entered into a Purchase and Sale Agreement on September 19, 2016, in which CNR/Chesapeake agreed to sell to TCFII Core LLC (Core) the non-jurisdictional Devonian Gas Gathering System located in Kanawha, Lincoln, Logan, Mingo, Raleigh, Roane, Wayne, and Wyoming Counties in West Virginia, and Floyd, Knott, Letcher, Magoffin, Martin, and Pike Counties in Kentucky. CNR/Chesapeake required the Limited Jurisdiction Certificate to provide limited service to Mountaineer Gas Company d/b/a Allegheny Power (Mountaineer).

Pursuant to Section 7(c) of the NGA and Part 157 of the Commission's regulations Core Appalachia Midstream, LLC (Core Midstream) 200 Crescent Court, Suite 1040, Dallas, Texas 75201, a wholly-owned subsidiary of Core, requests a Limited Jurisdiction Certificate authorizing continuation of the service authorized in the Certificate for which CNR/Chesapeake requests abandonment authorization. Core Midstream states that the Limited Jurisdiction Certificate would enable it to transport gas on the Devonian Gas Gathering System to provide service to

Mountaineer, thus there will be no gap in service.

Core Midstream states that it will continue to provide firm service to Mountaineer pursuant to the rate schedule already on file with the Commission, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions for CNR/Chesapeake regarding this application may be directed to Katherine B. Edwards, Edwards & Floom, LLP, 1409 King Street, Alexandria, VA 22314, by telephone at (703) 549–0888, by facsimile at (703) 549–8608, or by email to *kbe@kbelaw.com.*

Any questions for Core Midstream regarding this application may be directed to William F. Demarest, Jr., Hush Blackwell, LP, 750 17th St NW., Suite 900, Washington, DC 20002, by telephone at (202) 378–2310, or by email to *william.demarest@huschblackwell.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice, the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit five copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and five copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on December 7, 2016.

Dated: November 16, 2016.

Kimberly D. Bose,

Secretary.

[Docket No. ER17–252–000]

2016 ESA Project Company, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding 2016 ESA Project Company, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is December 5, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. Federal Energy Regulatory Commission

[Docket No. CP07–427–001]

Boardwalk Storage Company, LLC; Notice of Application

Take notice that on November 10, 2016, Boardwalk Storage Company, LLC (Boardwalk Storage), having its principal place of business at 9 Greenway Plaza, Suite 2800, Houston, TX 77046 filed in the above referenced docket an application pursuant to section 7(c) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authorization to amend its certificate for a natural gas storage cavern, Cavern No. 25, located in Iberville Parish,

Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions concerning this application may be directed to J. Kyle Stephens, Vice President of Regulatory Affairs, 9 Greenway Plaza, Suite 2800, Houston, TX 77046; by calling (713) 479–8033; by faxing (713) 479–1846; or by emailing *kyle.stephens@bwpmlp.com.*

The Commission issued a certificate of public convenience and necessity on March 3, 2008 (March 3 Order) in Docket No. CP07–427–000 to PetroLogistics Natural Gas Storage, LLC (PetroLogistics).[1] Boardwalk Storage is the successor-in-interest to PetroLogistics. Specifically, the applicant proposes to amend the requirements of Engineering Condition No. 5 related to periodic sonar survey found in Appendix A of the March 3 Order by replacing periodic sonar surveys with the alternative proposed Well and Cavern Integrity Monitoring Program.

Pursuant to section 157.9 of the Commission's rules (18 CFR 157.9), within 90 days of this Notice, the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the

decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for electronic review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202)502–8659.

[Docket No. CP17–9–000]

ANR Pipeline Company; Notice of Application

Take notice that on November 3, 2016, ANR Pipeline Company (ANR), having its principal place of business at 700 Louisiana Street, Suite 700, Houston, TX 77002–2700, filed an application in the above referenced docket pursuant to section 7(c) and 7(b) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authorization to implement its Wisconsin South Expansion Project (Project) in Illinois and Wisconsin. Specifically, ANR proposes modifications at its existing Sandwich Compressor Station, Hampshire Meter Station, Tiffany East Meter Station, Kewaskum Compressor Station and replacement of an approximate 0.54 mile associated lateral, as well as related appurtenant facilities. Upon completion, ANR states that it will be able to deliver an additional 230,950 Dekatherm per day (Dth/d) from its Sandwich Compressor Station area into the Northern Illinois and Wisconsin markets to meet growing natural gas demand in these areas. ANR estimates the total cost of the Project to be $57.7 million, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions concerning this application may be directed to Robert Jackson, Manager, Certificates and Regulatory Administration, ANR Pipeline Company, 700 Louisiana Street, Suite 700, Houston, Texas 77002–2700; by calling (832) 320–5487; by faxing (832) 320–6487; or by emailing *robert_jackson@transcanada.com.*

Pursuant to section 157.9 of the Commission's rules (18 CFR 157.9), within 90 days of this Notice, the Commission staff will either: complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and

to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy regulatory Commission, 888 First Street NE., Washington, DC 20426.

[Docket No. ER17–354–000]

American Falls Solar II, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request For Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding American Falls Solar II, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is December 6, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 16, 2016.

Kimberly D. Bose,

Secretary.

[Project No. 3442–026]

Mine Falls Limited Partnership; City of Nashua; Notice of Application for Transfer of License and Soliciting Comments, Motions To Intervene, and Protests

On November 4, 2016, Mine Falls Limited Partnership, co-licensee (transferor) and City of Nashua, co-licensee (transferor) filed an application to partially transfer the license for the Mine Falls Project No. 3442. The project is located on the Nashua River in Hillsborough County, New Hampshire. The project does not occupy Federal lands.

The applicants seek Commission approval to transfer the license for the Mine Falls Project from Mine Falls Limited Partnership and City of Nashua as co-licensees to City of Nashua as the sole licensee.

Applicants Contact: For transferor: Mr. Bernard H. Cherry, Mine Falls Limited Partnership, c/o Eagle Creek Renewable Energy, LLC, 65 Madison Avenue, Morristown, NJ 07960, Phone: 973–998–8400, Email: *bud.cherry@eaglecreekre.com* and Mr. Donald H. Clarke and Mr. Joshua E. Adrian, Duncan, Weinberg, Genzer & Pembroke, P.C., 1615 M Street NW., Suite 800, Washington, DC 20036, Phone: 202–467–6370, Emails: *dhc@dwgp.com* and *jea@dwgp.com.* For transferor/transferee: Mr. James Donchess, Mayor, City of Nashua, 229 Main Street, Nashua, NH 03060, Phone: 603–589–3260, Email: *NashuaMayor@NashuaNH.gov* and Ms. Madeleine Mineau, Waterways Manager, City of Nashua, 229 Main Street, P.O. Box 2019, Nashua, NH 03060, Phone: 603–589–3092, Email: *mineaum@nashuanh.gov.*

FERC Contact: Patricia W. Gillis, (202) 502–8735, *patricia.gillis@ferc.gov.*

Deadline for filing comments, motions to intervene, and protests: 30 days from the date that the Commission issues this notice. The Commission strongly encourages electronic filing. Please file

comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–3442–026.

Dated: November 16, 2016.

Kimberly D. Bose,

Secretary.

[Docket No. OR17–2–000]

Magellan Midstream Partners, L.P.; Notice of Petition for Declaratory Order

Take notice that on November 14, 2016, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2016), Magellan Midstream Partners, L.P. (''Magellan''), filed a petition for a declaratory order seeking confirmation that certain proposed marketing affiliate transactions are permissible under the Interstate Commerce act (ICA) and Elkins Act, as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to theFederal Energy Regulatory Commission, 888 First Street N.E., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *ERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–10–000]

Transcontinental Gas Pipe Line Company, LLC; Tennessee Gas Pipeline Company, LLC; Notice of Application

Take notice that on November 7, 2016, Transcontinental Gas Pipe Line Company, LLC (Transco), P.O. Box 1396, Houston, Texas 77251, and Tennessee Gas Pipeline Company, L.L.C. (Tennessee) 1001 Louisiana Street, Suite 1000, Houston, Texas 77002, filed in Docket No. CP17–10–000 an application pursuant to section 7(b) of the Natural Gas Act (NGA) and Part 157 of the Commission's Regulations, requesting authorization to abandon certain wholly-owned offshore gathering lateral facilities extending from

Galveston Block 391 to Brazos Block 538, Offshore, Texas, and related metering facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The filing may also be viewed on the Web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or TTY, contact (202) 502–8659.

Any questions concerning this application may be directed to Marg Camardello, Regulatory Analyst, Lead, (713) 215–3380, P.O. Box 1396, Houston, Texas 77251; and Ben Carranza, Manager, Rates & Regulatory, (713) 420–5535, 1001 Louisiana Street, Suite 1000, Houston Texas 77002.

Specifically, Transco and Tennessee propose to abandon four pipeline segments on Transco's Central Texas Gathering System, offshore Texas: Three 20-inch-diameter segments with a combined length of 40.45-miles connecting Transco Platform BA538 to Platform GA393, and 16-inch-diameter 5.87-mile-long segment immediately downstream of Transco Platform GA393. Transco states that due to the minimal flow on the Laterals, it would not be operationally feasible to pig these facilities in order to maintain their integrity. The requested order date is March 1, 2017. The project cost is estimated at $2.28 million.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit five copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit original and five copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on December 7, 2016.

Dated: November 16, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–12–000]

Dominion Carolina Gas Transmission, LLC; Notice of Request Under Blanket Authorization

Take notice that on November 9, 2016, Dominion Carolina Gas Transmission, LLC (DCG), 121 Moore Hopkins Lane, Columbia, South Carolina 29210, filed in Docket No. CP17–12–000, a prior notice request pursuant to sections 157.205 and 157.216 of the Commission's regulations under the Natural Gas Act (NGA). DCG seeks authorization to abandon in place and disconnect an 11.01 mile segment of its Line L in Kershaw County, South Carolina.

DCG proposes to perform these activities under its blanket certificate authority issued in Docket No. CP06–72–000, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The filing may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions regarding this application should be directed to Richard D. Jessee, Gas Transmission Certificates Program Manager, Dominion Carolina Gas Transmission, LLC, 707 East Main Street, Richmond, VA 23219, or by calling (804) 771–3704. (telephone), *Richard.Jessee@dom.com,*

Any person or the Commission's Staff may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and, pursuant to section 157.205 of the Commission's

Regulations under the NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to Section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a) (1) (iii) and the instructions on the Commission's Web site (*www.ferc.gov*) under the ''e-Filing'' link. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

Dated: November 16, 2016.

Kimberly D. Bose,

Secretary.

Notice of a Public Meeting of the National Drinking Water Advisory Council

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a public meeting and location.

SUMMARY: On November 17, 2016, the U.S. Environmental Protection Agency (EPA) announced a meeting of the National Drinking Water Advisory Council (NDWAC) in the **Federal Register**, as authorized under the Safe Drinking Water Act. This notice announces the location of the meeting (see the **ADDRESSES** section of this notice). The meeting is scheduled for December 6 and 7, 2016. During this meeting, the NDWAC will focus discussions on developing recommendations for the EPA Administrator on the Lead and Copper National Primary Drinking Water Regulation—Long Term Revisions.

DATES: The meeting on December 6, will be held from 9:30 a.m. to 4:15 p.m.; and December 7, from 8:30 a.m. to noon, eastern time.

ADDRESSES: The public meeting will be held at the U.S. Environmental Protection Agency, William Jefferson Clinton (WJC), 1201 Constitution Avenue NW., Room 1117A & B, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: For more information about this meeting or to request written materials, contact Tracey Ward of the Office of Ground Water and Drinking Water, U.S. Environmental Protection Agency, by phone at 202–564–3796 or by email at *ward.tracey@epa.gov.* For additional information about the NDWAC meeting, please visit *http://water.epa.gov/drink/ndwac/* or *www.regulations.gov* (search for Docket ID No. EPA–HQ–OW–2015–0714).

SUPPLEMENTARY INFORMATION:

Details about Participating in the Meeting: Teleconferencing will be available during the meeting. The number of teleconference connections available for the meeting is limited and will be offered on a first-come, first-served basis. The teleconference number is (1) 866–299–3188; when prompted, enter conference code 202 564–7347.

Dated: November 17, 2016.

Peter Grevatt,

Director, Office of Ground Water and Drinking Water.

[FRL–9955–56–Region 3]

Notice of Administrative Settlement Agreement for Recovery of Past Response Costs Pursuant to Section 122(H) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as Amended

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; Request for public comment.

SUMMARY: In accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''), as amended, notice is hereby given that a proposed administrative settlement agreement for recovery of past response costs (''Proposed Agreement'') associated with Operable Unit Two of the Sharon Steel Corporation (Farrell Works Disposal Area) Superfund Site, Mercer County, Pennsylvania, was executed by the Environmental Protection Agency (''EPA'') and is now subject to public comment, after which EPA may modify or withdraw its consent if comments received disclose facts or considerations that indicate that the Proposed Agreement is inappropriate, improper, or inadequate. The Proposed Agreement would resolve potential EPA claims under Section 107(a) of CERCLA, against Daniel Williams, d/b/a Williams Brothers Trucking (''Settling Party''). The Proposed Agreement would require Settling Party to reimburse EPA $12,000.00 for past response costs incurred by EPA for the Site.

For 30 days following the date of publication of this notice, EPA will receive written comments relating to the Proposed Agreement. EPA's response to any comments received will be available for public inspection at the U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, PA 19103.

DATES: Comments must be submitted no later than thirty (30) days after the date of publication of this notice.

ADDRESSES: The Proposed Agreement and additional background information relating to it are available for public inspection at the U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, PA 19103. A copy of the Proposed Agreement may be obtained from Robert S. Hasson (3RC41), Senior Assistant Regional Counsel, U.S. Environmental Protection Agency, 1650 Arch Street, Philadelphia, PA 19103. Comments should reference the ''Sharon Steel Corporation (Farrell Works Disposal Area) Superfund Site, Proposed Administrative Settlement Agreement for Recovery of Past Response Costs'' and ''EPA Docket No. CERC–03–2017–0057CR,'' and should be forwarded to Robert S. Hasson at the above address.

FOR FURTHER INFORMATION CONTACT: Robert S. Hasson (3RC41), U.S. Environmental Protection Agency, 1650 Arch Street, Philadelphia, PA 19103, Phone: (215) 814–2672; *hasson.robert@epa.gov.*

Dated: November 15, 2016.

Karen Melvin,

Director, Hazardous Site Cleanup Division, U.S. Environmental Protection Agency, Region III.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[Petition VI–2014–10; FRL–9955–61–Region 9]

Clean Air Act Operating Permit Program; Petition for Objection to State Operating Permit for Hu Honua Bioenergy Facility, LLC; Pepeekeo, Hawaii

AGENCY: United States Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition to object to a state operating permit.

SUMMARY: Pursuant to Clean Air Act (CAA or Act), the EPA Administrator signed an Order, dated September 14, 2016, denying a petition to object to a CAA title V operating permit proposed by the Clean Air Branch, Environmental Management Division, Hawaii Department of Health (HDOH) for the Hu Honua Bioenergy Facility, LLC (Hu Honua) in Pepeekeo, Hawaii. The Order constitutes a final action on the petition submitted by the Law Office of Marc Chytilo, on behalf of Preserve Pepeekeo Health & Environment (Petitioner), on September 15, 2014 (Petition). A petitioner may seek judicial review in the United States Court of Appeals for the appropriate circuit of those portions of the petition which EPA denied. Any petition for review shall be filed within 60 days from the date this notice appears in the **Federal Register**.

ADDRESSES: Copies of the Order, the Petition, and all pertinent information relating thereto are on file at the following location: EPA Region 9; Air Division; 75 Hawthorne Street; San Francisco, California 94105.

FOR FURTHER INFORMATION CONTACT: Gerardo Rios, Section Chief, Air Permits Office, EPA Region 9, at (415) 972–3974 or *rios.gerardo@epa.gov.*

SUPPLEMENTARY INFORMATION: The CAA affords the EPA a 45-day period to review and, as appropriate, the authority to object to operating permits proposed by state permitting authorities under title V of the CAA, 42 U.S.C. 7661–7661f. Section 505(b)(2) of the CAA and 40 CFR 70.8(d) authorize any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA's 45-day review period if the EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period.

On September 15, 2014, the EPA received a Petition dated September 13, 2014, pursuant to section 505(b)(2) of the CAA, 42 U.S.C. 7661d(b)(2), and 40 CFR 70.8(d). The Petition requested that the EPA object to the title V operating permit proposed on March 14, 2014 by HDOH, for the Hu Honua Bioenergy Facility, which is an electricity generating facility that consists primarily of a single biomass-fired steam boiler. On February 18, 2016, HDOH issued a final permit for Hu Honua, identified as Amendment of Covered Source Permit Number 0724–01–C, pursuant to Hawaii's Administrative Rules at Title 11, Chapter 60.1, Air Pollution Control.

The Petitioner requested that EPA object to the above referenced permit based on the following ten claims: (1) HDOH has failed to satisfy the public participation requirements of the Act, title V regulations, and state law; (2) permit limitations for criteria pollutants are not practically enforceable; (3) emissions limitations for hazardous air pollutants (HAPs) are not federally or practically enforceable; (4) emissions factors for HAPs are unacceptable; (5) the permit does not explicitly preclude affirmative defenses; (6) the monitoring report requirements are not practically enforceable; (7) there is no requirement for monitoring, recording, and reporting flow meter data; (8) special condition E6 concerning semi-annual reporting is ambiguous; (9) the permit fails to address greenhouse gas emissions; and (10) HDOH failed to estimate emissions from malfunction or upset conditions.

On September 14, 2016, the Administrator issued an Order denying each of the claims raised in the Petition. The Order explains the EPA's rationale for denying the petition. No modification or replacement of the above referenced permit is required as a result of this Order.

Dated: November 3, 2016.

Elizabeth Adams,

Acting Director, Air Division, Region IX.

FIFRA Scientific Advisory Panel; Notice of Rescheduled Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Agency is issuing this notice to reschedule the 4-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act Scientific Advisory Panel (FIFRA SAP) to consider and review a set of scientific issues being evaluated by the Environmental Protection Agency (EPA) regarding EPA's evaluation of the carcinogenic potential of glyphosate, a non-selective, phosphonomethyl amino acid herbicide registered to control weeds in various agricultural and non-agricultural settings.

DATES: The meeting will be held on December 13–16, 2016, from approximately 9:00 a.m. to 5:00 p.m.

ADDRESSES: The meeting will be held at the Environmental Protection Agency, Conference Center, Lobby Level, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Steven M. Knott, DFO, Office of Science Coordination and Policy (7201M), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–0103; email address: *knott.steven@epa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Agency is issuing this notice to reschedule the 4-day meeting of the FIFRA SAP to consider and review a set of scientific issues being evaluated by EPA regarding EPA's evaluation of the carcinogenic potential of glyphosate, a non-selective, phosphonomethyl amino acid herbicide registered to control weeds in various agricultural and non-agricultural settings. The meeting was originally scheduled for October 18–21, 2016 as announced in the **Federal Register** on July 26, 2016 (81 FR 48794) (FRL 9949–22). The new meeting dates are December 13–16, 2016. For additional information, please visit the public docket for this meeting at *http://www.regulations.gov* (Docket number EPA–HQ–OPP–2016–0385), the FIFRA SAP Web site at *http://www.epa.gov/sap* or contact the Designated Federal Official (DFO) listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 7 U.S.C. 136 *et. seq.;* 21 U.S.C. 301 *et seq.*

Dated: November 17, 2016.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2006–0745; FRL–9955–55–OAR]

Proposed Information Collection Request; Comment Request; Reformulated Gasoline Commingling Provisions (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an

information collection request (ICR), ''Reformulated Gasoline Commingling Provisions'' (EPA ICR No 2228.05, OMB Control No. 2060–0587 to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a renewal of the ICR, which is currently approved through December 31, 2016. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before January 23, 2017.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OAR–2006–0745, online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Geanetta Heard, Fuels Compliance Center, 6406J, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: 202–343–9017; fax number: 202–565–2085; email address: *heard.geanetta@epa.gov.*

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: With this information collection request (ICR), the Office of Air and Radiation (OAR) is seeking permission to accept notifications from gasoline retailers and wholesale purchaser-consumers related to commingling of ethanol blended and non-ethanol-blended reformulated gasoline (RFG) under § 1513 of the Energy Policy Act of 2005 (EPAct) and 40 CFR 80.78(a)(8)(ii)(B); and to provide for a compliance option whereby a retailer or wholesale purchaser-consumer may demonstrate compliance via test results under

§ 80.78(a)(8)(iii)(A). These provisions are designed to grant compliance flexibility. Parties were first subject to this recordkeeping and reporting on June 1, 2006.

Section 1513 of the EPAct addresses the combining of ethanol-blended RFG with non-ethanol-blended RFG. This provision amended the Clean Air Act (CAA) to add a new § 211(s) providing retail outlets two ten-day opportunities during a single VOC-control season to blend batches of ethanol-blended and non-ethanol- blended RFG. Under this new section, retail outlets are allowed to sell non-ethanol-blended RFG which has been combined with ethanol blended RFG under certain conditions.

Form Numbers: No.

Respondents/Affected Entities: Gasoline Stations, Gasoline stations with convenience stores, Gasoline stations without convenience stores

Respondent's Obligation to Respond: mandatory Section 114 and 208 of the Clean Air Act (CAA), 42 U.S.C. 7414 and 7542

Estimated Number of Respondents: 39,165 (total).

Frequency of Response: Annually

Total Estimated Burden: 19,116 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total Estimated Cost: $344,093 (per year), includes $0 annualized capital or operation & maintenance costs.

Changes in Estimates: The change in burden from the prior ICR is due in part to better numbers extracted from business and industry economic statistics that assisted in calculating the numbers of respondents. These better numbers reduced the party size by 5,750 members. The number of responses also declined from 84,050 to 76,465, a difference of 7,585 reports, which reduced the industry burden hours from 21,013 hours to 19,116 hours, a difference of 1,897 hours. With the decline of respondents, burden hours and responses, the cost associated with this ICR is $344,093 a difference of $13,128 calculated from the prior collection approved by OMB.

Dated: November 16, 2016.

Byron Bunker,

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation, U.S. Environmental Protection Agency.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL9955–57–ORD]

Federal Interagency Steering Committee on Multimedia Environmental Modeling

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: The annual public meeting of the Federal Interagency Steering Committee on Multimedia Environmental Modeling (ISCMEM) will convene to discuss developments in environmental modeling applications, tools and frameworks, as well as new operational initiatives among the participating agencies. The meeting this year will emphasize collaboration.

DATES: December 14, 2016, from 9:00 a.m. to 5:00 p.m., Arlington, VA.

ADDRESSES: National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

FOR FURTHER INFORMATION CONTACT: Inquiries and notice of intent to attend the meeting may be emailed to: Brenda Rashleigh, U.S. Environmental Protection Agency, 27 Tarzwell Drive, Narragansett, RI 02881, 401–782–3014, *Rashleigh.brenda@epa.gov.*

SUPPLEMENTARY INFORMATION:

Background: Federal agencies have been cooperating since 2001 under a Memorandum of Understanding (MOU) on the research and development of multimedia environmental models. The MOU, which was revised in 2016, establishes a framework for facilitating cooperation and coordination among the six following agencies (the specific research organization within the agency is in parentheses): National Science Foundation; U.S. Army Corps of Engineers (Engineer Research and Development Center); U.S. Department of Energy (Office of Biological and Environmental Research); U.S. Environmental Protection Agency (Office of Research and Development); U.S. Geological Survey; and U.S. Nuclear Regulatory Commission (Office of Nuclear Regulatory Research). These agencies are cooperating and coordinating in the research and development of multimedia environmental models, software and related databases, including development, enhancements, applications and assessments of site specific, generic, and process-oriented multimedia environmental models. Multimedia model development and simulation supports interagency interests in human and environmental health risk assessment, uncertainty analyses, water supply issues and contaminant transport.

Purpose of the Public Meeting: The public meeting provides an opportunity for other Federal and State agencies, the scientific community, and the public to be briefed on ISCMEM activities and initiatives, and to discuss technological advancements in multimedia environmental modeling.

Proposed Agenda: The ISCMEM Chair will open the meeting with an overview of the goals of the MOU and current activities of ISCMEM, followed by a series of presentations on modeling efforts in the Agencies in the morning, and Workgroup discussions on the afternoon.

Meeting Access: The meeting will be available through Web Meeting Services. To obtain web access, all interested attendees must pre-register by emailing Brenda Rashleigh (*Rashleigh.Brenda@epa.gov*) or Bill Cooper (*WJCOOPER@nsf.gov*), indicating their intent to participate in the meeting and providing their full contact information and affiliation.

Dated: November 16, 2016.

Brenda Rashleigh,

Chair, Federal Interagency Steering Committee on Multimedia Environmental Modeling.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of the agreements are available through the Commission's Web site (*www.fmc.gov*) or by contacting the Office of Agreements at (202) 523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 011117–057.

Title: United States/Australasia Discussion Agreement.

Parties: ANL Singapore Pte Ltd.; CMA–CGM.; Hamburg-Süd; Mediterranean Shipping Company S.A.; and Pacific International Lines (PTE) LTD.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Connor; 1200 Nineteenth Street NW.; Washington, DC 20036.

Synopsis: The amendment would add Compagnie Maritime Marfret S.A. as a party to the Agreement.

Agreement No.: 011574–020.

Title: Pacific Islands Discussion Agreement.

Parties: Hamburg Sudamerikanische Dampfschifffahrts-Gesellschaft KG doing business under its own name and the name Fesco Australia/New Zealand Liner Services (FANZL); and Polynesia Line Ltd.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Conner; 1200 Nineteenth Street NW.; Washington, DC 20036.

Synopsis: The amendment would add Compagnie Maritime Marfret S.A. as a party to the Agreement.

Agreement No.: 011223–054.

Title: Transpacific Stabilization Agreement.

Parties: American President Lines, Ltd. and APL Co. PTE Ltd.; (operating as a single carrier); Maersk Line A/S; CMA CGM, S.A.; COSCO Container Lines Company Ltd; Evergreen Line Joint Service Agreement; Hanjin Shipping Co., Ltd.; Hapag-Lloyd AG; Hyundai Merchant Marine Co., Ltd.; Mediterranean Shipping Company; Orient Overseas Container Line Limited; Yangming Marine Transport Corp.; and Zim Integrated Shipping Services, Ltd.

Filing Party: David F. Smith, Esq.; Cozen O'Conner; 1200 Nineteenth Street NW.; Washington, DC 20036.

Synopsis: The amendment revises Appendix A of the TSA Agreement to remove Nippon Yusen Kaisha Line as a party to the Agreement, effective November 16, 2016.

Agreement No.: 012441.

Title: HLUSA/ARC Cooperative Working Agreement.

Parties: American Roll-On Roll-Off Carrier, LLC and Hapag-Lloyd USA, LLC.

Filing Party: Wayne Rohde; Cozen O'Connor; 1200 Nineteenth Street NW.; Washington, DC 20036.

Synopsis: The Agreement authorizes HLUSA and ARC to engage in ad hoc space chartering in the trades between ports on the Atlantic and Gulf Coasts of the United States on the one hand and ports in North Europe and on the Baltic, Mediterranean and Red Seas and on the Persian Gulf on the other hand. It also authorizes the parties to discuss possible operational cooperation in those trades.

Agreement No.: 012442.

Title: Miami Marine Terminal Conference Agreement.

Parties: Port of Miami Terminal Operating Company, L.C.; and South Florida Container Terminal, LLC.

Filing Party: David F. Smith, Esq.; Cozen O'Conner; 1200 Nineteenth Street NW.; Washington, DC 20036.

Synopsis: The Agreement would permit the parties to (a) establish and maintain terminal rates, charges, classifications, rules, regulations, and practices at terminals owned and/or operated by them at the Port of Miami, and (b) meet, discuss, and agree on issues regarding their respective operations, facilities, and services at the Port, in order to improve services, reduce costs, increase efficiency, and otherwise optimize conditions in order to better service the interests of the shipping public at the Port.

By Order of the Federal Maritime Commission.

Dated: November 18, 2016.

Rachel E. Dickon,

Assistant Secretary.

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Submission for OMB Review; Comment Request

AGENCY: Federal Trade Commission (FTC).

ACTION: Notice and request for comment.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, the FTC is seeking public comments on its request to OMB for a three-year extension of the current PRA clearance for the information collection requirements contained in the Consumer Product Warranty Rule. That clearance expires on December 31, 2016.

DATES: Comments must be received by December 23, 2016.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''Warranty Rules: Paperwork Comment, FTC File No. P044403'' on your comment, and file your comment online at *https://ftcpublic.commentworks.com/ftc/consumerwarrantypra2* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed information requirements should be addressed to Gary Ivens, Attorney, Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, Room CC–8528, 600 Pennsylvania Ave. NW., Washington, DC 20580, (202) 326–2330.

SUPPLEMENTARY INFORMATION:

Title: Rule Concerning Disclosure of Written Consumer Product Warranty Terms and Conditions (the Consumer Product Warranty Rule or Warranty Rule), 16 CFR 701.

OMB Control Number: 3084–0111.

Type of Review: Extension of a currently approved collection.

Abstract: The Warranty Rule is one of three rules [1] that the FTC implemented pursuant to requirements of the Magnuson-Moss Warranty Act, 15 U.S.C. 2301 *et seq.* (Warranty Act or Act). The Warranty Rule specifies the information that must appear in a written warranty on a consumer product costing more than $15. The Rule tracks Section 102(a) of the Warranty Act, specifying information that must appear in the written warranty and, for certain disclosures, mandates the exact language that must be used. Neither the Warranty Rule nor the Act requires that a manufacturer or retailer warrant a consumer product in writing, but if they choose to do so, the warranty must comply with the Rule.

On August 24, 2016, the Commission sought comment on the Rule's information collection requirements.[2] The Commission did not receive any comments.

As required by OMB regulations, 5 CFR part 1320, the FTC is providing this second opportunity for public comment.

Likely Respondents: Manufacturers of consumer products.

Estimated Annual Hours Burden: 140,280 hours (derived from estimated 17,535 manufacturers x 8 hours of burden per year).

Estimated Annual Cost Burden: $19,011,798 ($17,535,000 for legal professionals + $883,413 for legal support + $593,384 for clerical workers).[3]

- Legal Professionals: (0.5) (140,280 hours) ($250/hour) = $17,535,000
- Legal Support: (0.25) (140,280 hours) ($25.19/hour) = $883,413
- Clerical Workers: (0.25) (140,280 hours) ($16.92/hour) = $593,384.

Request for Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 23, 2016. Write ''Warranty Rules: Paperwork Comment, FTC File No. P044403'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm.* As a matter of discretion, the Commission tries to remove individuals' home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, such as anyone's Social Security number, date of birth, driver's license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, like medical records or other individually identifiable health information. In addition, do not include any ''[t]rade secret or any commercial or financial information which is . . . privileged or confidential,'' as discussed in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you are required to follow the procedure explained in FTC Rule 4.9(c), 16 CFR 4.9(c). Your comment will be kept confidential only if the FTC General Counsel grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comment online, or to send it to the Commission by courier or overnight service. To make sure that the Commission considers your online comment, you must file it at *https://ftcpublic.commentworks.com/ftc/consumerwarrantypra2,* by following the instructions on the web-based form. If this Notice appears at *http://www.regulations.gov,* you also may file a comment through that Web site.

If you file your comment on paper, write ''Warranty Rules: Paperwork Comment, FTC File No. P044403'' on your comment and on the envelope, and mail or deliver it to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex J), 600 Pennsylvania Avenue NW., Washington, DC 20580. If possible,

[1] The other two rules relate to the pre-sale availability of warranty terms and minimum standards for informal dispute settlement mechanisms that are incorporated into a written warranty.

[2] *See* 81 FR 57910 (60-Day **Federal Register** Notice).

[3] Staff has derived an hourly wage rate ($250/hour) for legal professionals based upon industry knowledge. The wage rates for legal support workers ($25.19) and for clerical support ($16.92) used in this Notice are based on recent data from the U.S. Bureau of Labor Statistics, Occupational Employment and Wages—May 2015, table 1 (''National employment and wage data from the Occupational Employment Statistics survey by occupation''), released Mar. 30, 2016, available at *http://www.bls.gov/news.release/pdf/ocwage.pdf.*

submit your paper comment to the Commission by courier or overnight service.

Visit the Commission Web site at *http://www.ftc.gov* to read this Notice. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 23, 2016. You can find more information, including routine uses permitted by the Privacy Act, in the Commission's privacy policy, at *http://www.ftc.gov/ftc/privacy.shtm.*

Comments on the information collection requirements subject to review under the PRA should also be submitted to OMB. If sent by U.S. mail, address comments to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Federal Trade Commission, New Executive Office Building, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503. Comments sent to OMB by U.S. postal mail, however, are subject to delays due to heightened security precautions. Thus, comments instead should be sent by facsimile to (202) 395–5167.

David C. Shonka,

Principal Deputy General Counsel.

BILLING CODE 6750–01–P

GULF COAST ECOSYSTEM RESTORATION COUNCIL

Notice of Proposed Subaward Under a Council-Selected Restoration Component Award

AGENCY: Gulf Coast Ecosystem Restoration Council.

ACTION: Notice.

SUMMARY: The Gulf Coast Ecosystem Restoration Council (Council) publishes notice of a proposed subaward from the Texas Commission on Environmental Quality (TCEQ) to the Nature Conservancy (TNC), a nonprofit organization, for the purpose of acquiring three properties in the Bahia Grande Coastal Corridor in accordance with the Bahia Grande Coastal Corridor Implementation Award as approved in the Initial Funded Priority List.

FOR FURTHER INFORMATION CONTACT: Please send questions by email to *raams_pgmsupport@restorethegulf.gov.*

SUPPLEMENTARY INFORMATION: Section 1321(t)(2)(E)(ii)(III) of the RESTORE Act (33 U.S.C. 1321(t)(2)(E)(ii)(III)) and Treasury's implementing regulation at 31 CFR 34.401(b) require that, for purposes of awards made under the Council-Selected Restoration Component, a State or Federal award recipient may make a grant or subaward to or enter into a cooperative agreement with a nongovernmental entity that equals or exceeds 10 percent of the total amount of the award provided to the State or Federal award recipient only if certain notice requirements are met. Specifically, at least 30 days before the State or Federal award recipient enters into such an agreement, the Council must publish in the **Federal Register** and deliver to specified Congressional Committees the name of the recipient and subrecipient; a brief description of the activity, including its purpose; and the amount of the award. This notice accomplishes the **Federal Register** requirement.

Description of Proposed Action

As specified in the Initial Funded Priority List, which is available on the Council's Web site at *https://www.restorethegulf.gov/council-selected-restoration-component/funded-priorities-list,* RESTORE Act funds will support the Bahia Grande Coastal Corridor Implementation Award (Bahia Grande Award) to TCEQ. Through this Award of $4,378,500, approximately 1,852 acres of land will be conserved through fee title acquisition from willing sellers and added to a 105,000 acre corridor of conservation lands that includes the Laguna Atascosa National Wildlife Refuge (NWR), Boca Chica State Park, and the Lower Rio Grande Valley NWR. Property acquisitions under the Bahia Grande Award will be accomplished through a subaward in the amount of $4,363,391 from TCEQ to TNC. Through the subaward, TNC will acquire three properties in the Bahia Grande Coastal Corridor, which are expected to ultimately become part of the Laguna Atascosa NWR. These properties will connect Laguna Atascosa NWR, Lower Rio Grande Valley NWR, and Boca Chica State Park, as well as over 2 million acres of intact habitat on private ranchland with the 1.3 million acre Rio Bravo Protected Area. The connection provided by these properties will provide additional protection for, and could prevent future listing of State-threatened species like the reddish egret, Botteri's sparrow, white-tailed hawk, white-faced ibis, Texas tortoise, Texas indigo snake and Texas horned lizard. Conserving additional portions of the Bahia Grande wetland system and portions of its watershed will secure valuable freshwater inflows and allow partners to complete hydrological restoration needed to increase tidal flows and divert freshwater inflows needed to fully restore this system.

Will D. Spoon,

Program Analyst, Gulf Coast Ecosystem Restoration Council.

BILLING CODE 6560–58–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: ''*The Consumer Assessment of Healthcare Providers and Systems (CAHPS) Patient-Centered Medical Home (PCMH) Items Demonstration Study.*'' In accordance with the Paperwork Reduction Act, AHRQ invites the public to comment on this proposed information collection.

This proposed information collection was previously published in the **Federal Register** on August 3rd, 2016 and allowed 60 days for public comment. AHRQ did not receive any substantive comments. The purpose of this notice is to allow an additional 30 days for public comment.

DATES: Comments on this notice must be received by December 23, 2016.

ADDRESSES: Written comments should be submitted to: AHRQ's OMB Desk Officer by fax at (202) 395–6974 (attention: AHRQ's desk officer) or by email at *OIRA_submission@omb.eop.gov* (attention: AHRQ's desk officer).

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at *doris.lefkowitz@AHRQ.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Project

''*The Consumer Assessment of Healthcare Providers and Systems (CAHPS) Patient-Centered Medical Home (PCMH) Items Demonstration Study.*''

This study is being conducted by AHRQ through its contractor, RAND, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).

Method of Collection

The patient-centered medical home (PCMH) is a model for delivering primary care that is patient-centered, comprehensive, coordinated, accessible, and continuously improved through a systems-based approach to quality and safety.

As primary care practices across the United States seek National Committee for Quality Assurance (NCQA) recognition as patient-centered medical homes (PCMH), they can choose to administer the Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Clinician and Group (CG–CAHPS) survey with or without the PCMH supplemental item set (AHRQ, 2010; Hays et al., 2014; Ng et al., 2016; Scholle et al., 2012). NCQA offers a special patient experience distinction to practices that opt to use the CAHPS PCMH items set in their CG–CAHPS survey tool. While over 11,000 practices, representing an estimated 15–18% of primary care physicians, are currently recognized for PCMH by NCQA (NCQA, 2015), fewer than 3% of them submit patient experience surveys to NCQA when applying for recognition under NCQA's PCMH recognition program.

Despite the rapid movement toward PCMH primary care transformation and the increasing use of CAHPS PCMH items, little is known about the ways in which practices are using these CAHPS data and the PCMH supplemental item information (about access, comprehensiveness, self-management, shared decision making, coordination of care, and information about care and appointments) to understand and improve their patients' experiences during PCMH transformation. The PCMH Items Demonstration Study will investigate:

- How practices across the U.S. use CAHPS and the PCMH item set during PCMH transformation,
- How practices assemble and select items for inclusion in their patient experience surveys (*e.g.* core, PCMH, supplemental, and custom items),
- Primary care practice leaders' perspectives on NCQA PCMH Recognition and CAHPS Patient Experience Distinction,
- Effects of changes made during PCMH transformation on patient experiences reported on CAHPS surveys and any PCMH items, and
- Associations between PCMH transformation and patient experience scores.

To achieve the goals of this project the following data collections will be implemented:

(1) Office Manager Questions administered via phone about the participating practice's characteristics to describe the type of practices in the study and to understand how practice characteristics influence PCMH transformation and patient experience.

(2) Physician Interviews administered via phone with the lead PCMH clinical expert about the details, decisions and processes of PCMH transformation, NCQA PCMH Recognition and CAHPS Patient Experience Distinction and their use of patient experience data during the transformation process.

(3) PCMH–A Assessment Tool to be completed by the lead PCMH clinical expert (before or after the interview on the standardized form via fax or email) to collect validated metrics on the ''PCMH-ness'' of the practice.

(4) CAHPS Patient Experience Data Files, which are patient-level de-identified CAHPS patient experience data covering the period of PCMH transformation for the participating practice. These data are collected independently of this study by the practice (or network) via their current vendor. We will work with the PCMH clinical expert (or a person they designate who handles their data) in each of the participating practices to submit these CAHPS data files securely to RAND to understand practices' CAHPS patient experience trends and associations with PCMH implementation during practices' PCMH journey.

Characterizing primary care practices' use of CAHPS and PCMH items will provide important insight into the activities practices conduct during PCMH transformation to improve patient experience scores. This information may be useful in supporting practices that lag behind their peers, learning from practices with outstanding records of patient experience, and providing recommendations that may be used to refine the content of the CAHPS survey items.

Estimated Annual Respondent Burden

Table 1 shows the estimated annualized burden and cost for the respondents' time to participate in this data collection. These burden estimates are based on tests of data collection conducted on nine or fewer entities. As indicated below, the annual total burden hours are estimated to be 179 hours. The annual total cost associated with the annual total burden hours is estimated to be $16,899.

Table 1 shows the estimated annualized burden for the respondents' time to participate in this data collection. The PCMH Items Demonstration Study will recruit 150 practices including the participating practices' office managers and one physician/lead PCMH clinical expert. We will recruit and administer the Office Manager Questions by phone to 150 office managers, recruit all sampled physicians by sending them a recruitment packet that includes a cover letter, an AHRQ endorsement letter and an info sheet, and then administer the Physician Interview protocol questions by phone to 150 physicians, and 150 physicians will self-administer the PCMH–A Assessment Tool.

We have calculated our burden estimate for Office Manager Questions asked during physician recruitment using an estimate of 3–5 questions a minute as the Office Manager Questions are closed-ended survey questions. The Office Manager Questions contains 17 questions and is estimated to require an average of 5 minutes; this estimate is supported by the information gathered during a pilot of these questions. For the Physician Interview, we have calculated the burden estimate to require an average of 40 minutes per interview. For the PCMH–A Assessment Tool, we calculated our burden using a conservative estimate of 4.5 items per minute. Prior work suggests that 3–5 items on an assessment tool can typically be completed per minute, depending on item complexity and respondent characteristics (Berry, 2009; Hays & Reeve, 2010). The PCMH–A Assessment tool contains 36 items and is estimated to require an average completion time of 8–10 minutes.

Participating practices will be asked to submit any available CAHPS Patient Experience data files (*e.g.* submission of de-identified data including a data dictionary via encrypted transfer) for the period of time covering their NCQA

PCMH Recognition history. Each practice will have an average estimate of 3 CAHPS Patient Experience data files to submit per one submission, which we based on the average number of years of PCMH history of the sample. In addition, we conservatively estimate that half of the control practices (25/50) administer CG–CAHPS data, as this percentage is unknown; while 90% of the participating current and past CAHPS practices (90/100) will submit CAHPS data, yielding 115 submissions of CAHPS patient experience data files. As indicated below, the annual total burden is estimated to be 179 hours.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Data collection task	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
Office Manager Questions	150	1	5/60	12.5
Physician Interview	150	1	40/60	100
PCMH–A Assessment Tool	150 (Same Physicians as above).	1 (same person as above).	15/60	37.5
CAHPS Patient Experience Data Files	115	1 per practice	15/60	28.75
Total	415	1	75/60	178.75

+ The same respondent completes the Physician Interview and PCMH–A Assessment Tool and submits the CAHPS Patient Experience Data Files.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Data collection task	Number of requests	Total burden hours	Average hourly wage rate *	Total cost burden
Office Manager Questions	150	12.5	$57.44 [a]	$718.00
Physician Interview	150	100	97.33 [b]	9,733.00
PCMH–A Assessment Tool	150	37.5	97.33 [b]	3,649.88
CAHPS Patient Experience Data Files	115	28.75	97.33 [b]	2,798.24
Total	300	178.75	55.48	16,899.12

+ The same respondent completes the Physician Interview and PCMH–A Assessment Tool and submits the CAHPS Patient Experience Data Files.

* Occupational Employment Statistics, May 2015 National Occupational Employment and Wage Estimates United States, U.S. Department of Labor, Bureau of Labor Statistics. *http://www.bls.gov/oes/current/oes_nat.htm*

[a] Based on the mean wages for *General and Operations Managers, 11–1021 within Healthcare Support Occupations,* the occupational group most likely tasked with completing the Office Manager Questions.

[a] Based on the mean wages for *Physicians and Surgeons, 29–1060,* the occupational group most likely tasked with completing the Physician Interview, PCMH–A Assessment Tool, and submitting the CAHPS Patient Experience Data Files.

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Sharon B. Arnold,

Deputy Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Statement of Organization, Functions, and Delegations of Authority

Part C (Centers for Disease Control and Prevention) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (45 FR 67772–76, dated October 14, 1980, and corrected at 45 FR 69296, October 20, 1980, as amended most recently at 81 FR 66284–66285, dated September 27, 2016) is amended to reflect the reorganization of the Human Resources Office, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

Section C–B, Organization and Functions, is hereby amended as follows:

Delete in its entirety the title and the mission and function statements for the *Human Resources Office (CAJQ)* and insert the following:

Human Resources Office (CAJQ). (1) Provides leadership, policy formation, oversight, guidance, service, and advisory support and assistance to the Centers for Disease Control and Prevention (CDC) and the Agency for Toxic Substances and Disease Registry (ATSDR); (2) collaborates as appropriate, with the CDC Office of the Director (OD), Centers/Institute/Offices (CIOs), domestic and international agencies and organizations; and provides a focus for short- and long-term planning within the Human Resource Office (HRO); (3) develops and administers human capital and human resource management policies; (4) serves as the business steward for all CDC developed human capital and human resources management systems and applications; (5) develops,

maintains, and supports information systems to conduct personnel activities and provide timely information and analyses of personnel and staffing to management and employees; (6) conducts and coordinates human resources management for civil service and Commissioned Corps personnel; (7) manages the administration of fellowship programs; (8) conducts recruitment, special emphasis, staffing, position classification, position management, pay and leave administration, work-life programs, performance management, employee training and development, and employee and labor relations programs; (9) maintains personnel records and reports, and processes personnel actions and documents; (10) administers the federal life and health insurance programs; (11) administers employee recognition, suggestion, and incentive awards programs; (12) furnishes advice and assistance in the processing of workers compensation claims; (13) interprets standards of conduct regulations, reviews financial disclosure reports, and offers ethics training and counseling services to CDC/ATSDR employees; (14) maintains liaison with the Department of Health and Human Services (HHS) and the Office of Personnel Management (OPM) on human resources management, policy, compliance and execution of the Human Capital Assessment and Accountability Framework; (15) conducts organizational assessments to determine compliance with human capital policies, guidance, regulatory and statutory requirements of federal human capital and resource management programs and initiatives; (16) plans, directs, and manages CDC/ATSDR-wide training programs, monitors compliance with mandatory training requirements, and maximizes economies of scale through systematic planning and evaluation of agency-wide training initiatives to assist employees in achieving required competencies; (17) assists in the definition and analysis of training needs and develops and evaluates instructional products designed to meet those needs; (18) develops, designs, and implements a comprehensive leadership and career management program for all occupational series throughout CDC/ATSDR; (19) provides technical assistance in organizational development, career management, employee development, and training; (20) collaborates and works with partners, internally and externally, to develop workforce goals and a strategic vision for the public health workforce; (21) provides support for succession planning, forecasting services, and environmental scanning to ascertain both current and future public health workforce needs; and (22) administers and maintains the customer service help desk.

Office of the Director (CAJQ1). (1) Provides leadership and overall direction for HRO; (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for HRO; (4) develops and administers human capital and human resource management policies and procedures; (5) coordinates all program reviews; (6) provides technical assistance and consultation in the development of proposed legislation, Congressional testimony, and briefing materials; (7) establishes performance metrics and coordinates quarterly reviews to ascertain status on meeting of the metrics; (8) coordinates budget formulation, negotiation, and execution of financial resources; (9) identifies relevant scanning/benchmarking on workforce and career development processes, services and products; (10) provides leadership and guidance on new developments and national trends for the public health workforce; (11) establishes and oversees policies governing human capital and human resources management, and works collaboratively within CDC/ATSDR and other components in planning, developing and implementing policies; (12) develops strategic plans for information technology and information systems required to support human capital and human resources management information requirements; (13) serves as the business steward for CDC/ATSDR-wide human capital and human resources administrative systems and advocates and supports the commitment of resources to application development; (14) coordinates HR information resource management activities with the Management Information Systems Office and the related governance groups; (15) coordinates management information systems and analyses of data for improved utilization of resources; (16) serves as a liaison with HHS on the utilization and deployment of centralized HHS human capital and human resource management systems and applications; (17) applies standards of conduct regulations, reviews financial disclosure reports, and offers ethics training and counseling services to CDC/ATSDR employees; and (18) conducts demographic analysis of the CDC/ATSDR work force and publishes results in management reports.

Ethics and Compliance Activity (CAJQ12). (1) Oversees the CDC/ATSDR ethics and compliance program to ensure that processes and procedures are in place to ensure compliance with government-wide ethics statutes, regulations, and standards; (2) identifies and corrects weaknesses in policy, training, and monitoring to prevent CDC/ATSDR non-compliance of HHS supplemental ethics regulations; (3) serves as a liaison between the Office of Government Ethics and HHS on ethics matters; (4) applies standards of conduct regulations; (5) reviews financial disclosure reports for potential conflicts of interest; (6) provides continuing ethics training and counseling services; and (7) reviews and approve ethics-related requests for employees.

Commissioned Corps Activity (CAJQ14). (1) Serves as the primary contact for CDC/ATSDR management and employees in obtaining the full range of personnel assistance and management services for Commissioned Corps personnel; (2) provides leadership, technical assistance, guidance, and consultation in benefits, entitlements, and obligations of the Commissioned Corps to commissioned officers; (3) plans, directs, and manages the Department of Defense's Defense Eligibility Enrollment Report System identification card program for all active duty officers, retirees, and eligible dependents; (4) implements and evaluates Commissioned Corps policies and systems such as salary/benefits, performance management, assignments, health benefits, training, travel, relocation, and retirement; (5) manages the CDC/ATSDR's Commissioned Corps promotion and awards programs; (6) maintains liaison and coordinates personnel services for Commissioned Corps personnel with the Office of Commissioned Corps Operations and the Office of Surgeon General; (7) coordinates the agency deployment status of commissioned officers assigned to CDC and manages the Emergency Operation Center (EOC) Commissioned Corps deployment desk during activation of the CDC EOC; and (8) establishes and maintains personnel and payroll records and files.

Policy and Communications Activity (CAJQ15). (1) Provides leadership, oversight, guidance and support for policy and communication activities supporting HRO; (2) develops, administers and monitors the implementation of human capital and human resources management policies and operational procedures as directed

by OPM, HHS, CDC/ATSDR or other pertinent federal agencies to ensure consistent application across CDC/ATSDR; (3) serves as the focal point for the analysis, development, technical review and clearance of controlled correspondence and non-scientific policy documents that require approval/signature from the HRO Director or other senior CDC/ATSDR leadership; (4) responds to and coordinates requests from the OD for issues management information to ensure efficient responses to the Director's priority issues; (5) provides and manages a wide range of communication services in support of HRO; (6) facilitates open and transparent employee communication; (7) develops and implements internal and external public relations strategies to communicate upward and outward to customers, partners, and other stakeholders; and (8) utilizes multiple channels and methods to communicate and disseminate HR policies, announcements, procedures, information, and other relevant messages.

Operations Management Activity (CAJQ17). (1) Provides leadership, oversight, and guidance in the management and operations of HRO programs; (2) provides and oversees the delivery of HRO-wide administrative management and support services in the areas of fiscal management, personnel, travel, records management, internal controls, and other administrative services; (3) prepares annual budget formulation and budget justifications; (4) coordinates HRO requirements relating to contracts, grants, cooperative agreements, and reimbursable agreements; (5) develops and implements administrative policies, procedures, and operations, as appropriate, for HRO, and prepares special reports and studies, as required, in the administrative management areas; and (6) maintains liaison with related staff offices and other officials of CDC/ATSDR.

Customer Service Help Desk Activity (CAJQ18). (1) Provides technical assistance, guidance, and consultation on employee and labor relations, employee services, pay, leave and benefits administration, staffing and recruitment, position classification; (2) Provide issues management and resolution support to HRO as well as internal and external customers; (3) manage workload assessment and customer based training; (4) monitor customer satisfaction, (5) track and assess key performance indicators and other reporting requirements; and (6) administers and maintains the customer service help desk.

Strategic Programs Office (CAJQB). (1) Provides a broad array of strategic programs, workforce support, and development services; (2) develops and implements methodologies to measure, evaluate, and improve human capital results to ensure mission alignment; (3) assesses and evaluates the overall effectiveness and compliance of human resources programs and policies related to merit-based decision-making and compliance with laws and regulations; (4) works with the OPM, HHS, and CDC Governance Boards and agency managers to carry out human capital management planning and development activities; and (5) establishes, coordinates, develops, and monitors implementation of human capital initiatives and the agency Strategic Human Capital Management Plan.

Office of the Director (CAJQB1). (1) Provides leadership and overall direction for the Strategic Program Office (SPO); (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for the SPO; (4) develops and administers human capital and human resource management policies and procedures; (5) coordinates all program reviews; (6) provides technical assistance and consultation to the activities within the SPO; (7) establishes performance metrics and coordinates reviews to ascertain status on meeting of the metrics; and (8) coordinates, develops, and monitors implementation of human capital initiatives and the agency Strategic Human Capital Management Plan.

Human Capital Effectiveness and Accountability Activity (CAJQB2). (1) Operates as an internal audit function to maintain the operational integrity of human resources and human capital areas and safeguards legal and regulatory requirements; (2) ensures that human capital goals and programs are aligned with and support CDC/ATSDR missions; (3) ensures that human capital planning is guided by a data driven, results-oriented process toward goal achievement; (4) ensures that managers and HR practitioners are held accountable for their human capital decisions; (5) assesses the effectiveness and efficiency of the HR function; (6) ensures human capital programs and policies adhere to merit system principles and other pertinent laws and regulations; (7) conducts recurring delegated examining audits and periodic human capital management reviews to verify and validate the level of compliance and performance; and (8) implements a plan for addressing issues or problems identified during accountability audits and related activities.

Workforce Planning Activity (CAJQB3). (1) Advises and facilitates strategic workforce planning and development for CDC/ATSDR; (2) supports HRO and CIO program officials in the development, implementation and evaluation of workforce plans, policies, and initiatives; (3) serves as a liaison with HHS and entities within and outside the Agency to develop CDC/ATSDR's human capital management direction and strategies; (4) coordinates the development and implementation of an agency-wide strategic human capital plan; (5) identifies mission-critical occupations and associated competencies to assess potential gaps in occupations and competencies that are essential to CDC/ATSDR achieving its strategic goals; (6) reports on CDC/ATSDR's progress in meeting human capital management improvement objectives associated with HHS-wide and government-wide human capital management improvement; (7) develops and executes a strategic hiring plan to facilitate the recruitment and retention of members of under-represented groups and for closing occupational series and/or competency gaps in the workforce; (8) provides recruitment, retention, consultation and support to customers; and (9) supports CIO-specific, mission-critical work by managing various training programs designed to provide students, postgraduates, and university faculty with opportunities to participate in projects and assignments in support of CDC/ATSDR's missions.

Information Systems and Data Analytics Activity (CAJQB4). (1) Oversees all human resources information technology CDC/ATSDR systems and serves as the liaison to HHS in the development, maintenance, and support of Department-wide human resource information systems and applications; (2) manages capital planning and investment control activities related to all CDC/ATSDR developed human capital and human resources management systems and applications; (3) serves as liaison and provides support in the development and maintenance of HHS enterprise human resources systems; (4) facilitates the administration, analysis and reporting of, and provides recommendations for, business process improvements in regards to survey data or other business process reengineering efforts; (5) supports periodic reporting requirements from CDC/ATSDR, HHS, OPM, and Office of Management and Budget (OMB); (6) provides business

strategy, data analytics, and reporting services; (7) performs analysis, forecasting, and modeling to interpret quantitative and qualitative data; (8) reports and evaluates organizational performance outcomes on key measures and metrics; (9) oversees the human resources governance structure and change control board activities; (10) develops strategic plans for information technology and information systems required to support human capital and human resources management information requirements; (11) coordinates HR information resource management activities with the Management Information Systems Office and the related governance groups; and (12) coordinates management information systems and analyses of data for improved utilization of resources;

CDC University Office (CAJQC). (1) Provides agency-wide leadership and guidance in all functional areas related to training and career development; (2) designs, develops, implements and evaluates a comprehensive strategic human resource leadership and career training and development program for all occupational series throughout CDC; (3) develops and implements training strategies and activities that contribute to the agency's mission, goals and objectives; (4) maximizes economies of scale through systematic planning, administration, delivery, and evaluation of agency-wide training initiatives to assist CDC employees in achieving required competencies; (5) development of retraining activities for CDC managers/employees affected by organizational changes (*e.g.* major reorganizations, outsourcing initiatives, etc.); (6) maintains employee training records; (7) develops and validates occupational and functional competencies and develops related training plans and career maps; (8) develops and administers professional development programs; (9) administers and monitors the Training and Learning Management System for compliance with the Government Employees Training Act; (10) conducts training needs assessment of employees, provides analysis and data to correlate individual training with strategic plans; (11) develops and maintains assessment tools to identify core competency requirements for each occupational series throughout the agency; (12) provides consultation, guidance, and technical assistance to managers and employees in organizational development, career management, employee development, and training; (13) develops and delivers education and training programs to meet the identified needs of the workforce; (14) promotes, develops, and implements training needs assessment methodology to establish priorities for training interventions; (15) collaborates, as appropriate, with the CDC/OD, CIOs, HHS, OPM and other domestic and international agencies and organizations; and (16) develops and implements policies related to employee training.

Office of the Director (CAJQC1). (1) Provides leadership and overall direction for the CDC University Office; (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for the CDC University Offices; (4) coordinates all program reviews; (5) provides technical assistance and consultation to the activities within the CDC University Office; (6) establishes performance metrics and coordinates reviews to ascertain status on meeting of the metrics; and (7) coordinates, develops, and monitors implementation of training initiatives for the agency.

Career Development Activity (CAJQC2). (1) Designs, develops, implements and evaluates training activities to increase competency in the area of career development strategies; (2) maximizes economies of scale through systematic planning, administration, delivery, and evaluation of agency-wide training initiatives to assist CDC/ATSDR employees in achieving required competencies; (3) develops retraining activities for CDC/ATSDR managers/employees affected by organizational changes (*e.g.* major reorganizations, outsourcing initiatives, etc.); (4) maintains employee training records; (5) develops and validates occupational and functional competencies and develops related training plans and career maps; (6) develops and administers professional development programs to include mentoring and coaching for enhanced performance; (7) conducts training needs assessment of employees, provides analysis and data to correlate individual training with strategic plans; (8) develops and maintains assessment tools to identify core competency requirements for each occupational series throughout the agency; (9) provides consultation, guidance, and technical assistance to managers and employees in organizational development, career management, employee development, and training; (10) promotes, develops, and implements training needs assessment methodology to establish priorities for training interventions; (11) collaborates, as appropriate, with the CDC/ATSDR/OD, CIOs, HHS, OPM and other domestic and international agencies and organizations; (12) implements procedural components in compliance to the long term education training policy; and (13) conducts New Employee Orientation for the agency.

Leadership Development Activity (CAJQC3). (1) Designs, develops, implements and evaluates a comprehensive leadership development curriculum for leaders at all levels throughout CDC/ATSDR; (2) develops and implements leadership training strategies and activities that contribute to the agency's mission, goals and objectives; (3) maximizes economies of scale through systematic planning, administration, delivery, and evaluation of agency-wide training initiatives to assist CDC/ATSDR employees in achieving required competencies; (4) maintains employee training records; (5) develops and administers professional development programs such as executive coaching; (6) provides consultation, guidance, and technical assistance to managers and employees around leadership training and development activities; (7) develops and delivers education and training programs to meet the identified needs of the workforce; (8) collaborates, as appropriate, with the CDC/ATSDR/OD, CIOs, HHS, OPM and other domestic and international agencies and organizations; and (9) implements procedural components in compliance to the mandatory supervisory training requirements policy.

Public Health Training Activity (CAJQC4). (1) Designs, develops, implements and evaluates a comprehensive public health training curriculum for employees engaged in public health activities throughout CDC/ATSDR; (2) develops and implements public health, science, research and medicine and preparedness and emergency response training strategies and activities that contribute to the agency's mission, goals and objectives; (3) maximizes economies of scale through systematic planning, administration, delivery, and evaluation of agency-wide training initiatives to assist CDC employees in achieving required competencies; (4) maintains employee training records; (5) provides consultation, guidance, and technical assistance to managers and employees associated within curriculum scope; (6) develops and delivers education and training programs to meet the identified needs of the workforce; and (7) collaborates, as appropriate, with the CDC/ATSDR/OD, CIOs, HHS, OPM and

other domestic and international agencies and organizations.

Business and Technology Training Activity (CAJQC5). (1) Designs, develops, implements and evaluates a comprehensive business and technology training curriculum for employees throughout CDC/ATSDR; (2) develops and implements financial, acquisition and project management, communication and office skills and information technology training strategies and activities that contribute to the agency's mission, goals and objectives; (3) maximizes economies of scale through systematic planning, administration, delivery, and evaluation of agency-wide training initiatives to assist CDC/ATSDR employees in achieving required competencies; (4) maintains employee training records; (5) provides consultation, guidance, and technical assistance to managers and employees associated within curriculum scope; (6) develops and delivers education and training programs to meet the identified needs of the workforce; and (7) collaborates, as appropriate, with the CDC/ATSDR/OD, CIOs, HHS, OPM and other domestic and international agencies and organizations.

Workforce Relations Office (CAJQD). (1) Provides leadership, technical assistance, guidance, and consultation on employee and labor relations, employee services and assistance, work-life programs, performance management, incentive awards, pay, leave and benefits administration, on-the-job injuries and exposures to infectious diseases, debt complaints and other job-related issues; (2) develops and administers labor-management and employee relations program including: Disciplinary actions, grievances and appeals, labor negotiations, collective bargaining, management representation before third parties, and partnership activities; (3) serves as liaison with the Office of Safety, Security and Asset Management (OSSAM) and other CDC/ATSDR staff for personnel matters relating to substance abuse and other employee assistance programs; (4) coordinates and processes garnishment, child support, and other collection actions for CDC/ATSDR employees; (5) plans, directs, coordinates, and conducts contract negotiations on behalf of agency management with labor organizations holding exclusive recognition; (6) represents management in third party proceedings involving labor and employee relations issues; (7) serves as the authority to ensure validity, consistency, and legality of employee relations matters concerning grievances (both negotiated and agency procedures), disciplinary actions, adverse actions, and resultant third party hearings; (8) plans and coordinates all programmatic activities to include preparation of disciplinary and adverse action letters and all final agency decisions in grievances and appeals; (9) provides technical advice, consultation, and training on matters of employee conduct and performance; (10) provides consultation, guidance, and technical advice to human resources specialists, managers, and employees on the development, coordination and implementation of all work-life program initiatives; (11) provides personnel services relating to on-the-job injuries and exposures to infectious diseases; (12) facilitates the development and implementation of an agency-wide strategic approach to monitoring, evaluating, aligning, and improving performance management policies and practices for all CDC performance management systems (Title 5, Title 42, Senior Executive Service (SES), Senior Biomedical Research Service (SBRS), and the Commissioned Officer Effectiveness Report (COER); (13) coordinates performance management, strategic rewards and recognition programs and systems; (14) provides human resources services and assistance on domestic and international employee benefits and leave administration; (15) serves as liaison between CDC/ATSDR and the HHS payroll office resolving discrepancies with pay and leave; (16) administers the leave donor program and processes time and attendance amendments; (17) administers the federal life and health insurance programs; (18) provides policy guidance and technical advice and assistance on retirement, the Thrift Savings Plan, health/life insurance, and savings bonds; and (19) furnishes advice and assistance in the processing of Office of Workers' Compensation Program claims and the Voluntary Leave Donation Program;

Office of the Director (CAJQD1). (1) Provides leadership and overall direction for the Workforce Relations Office; (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for the Workforce Relations Offices; (4) coordinates all program reviews; (5) provides technical assistance and consultation to the activities within the Workforce Relations Office; and (6) coordinates, develops, and monitors implementation of program initiatives.

Employee and Labor Relations Activity (CAJQD2). (1) Provides leadership, technical assistance, guidance, and consultation on employee and labor relations, employee services; (2) develops and administers labor-management and employee relations program including: disciplinary actions, grievances and appeals, labor negotiations, collective bargaining, management representation before third parties, and partnership activities; (3) serves as liaison with OSSAM and other CDC/ATSDR staff for personnel matters relating to substance abuse and other employee assistance programs; (4) coordinates and processes garnishment, child support, and other collection actions for CDC/ATSDR employees; (5) plans, directs, coordinates, and conducts contract negotiations on behalf of agency management with labor organizations holding exclusive recognition; (6) represents management in third party proceedings involving labor and employee relations issues; (7) serves as the authority to ensure validity, consistency, and legality of employee relations matters concerning grievances (both negotiated and agency procedures), disciplinary actions, adverse actions, and resultant third party hearings; (8) plans and coordinates all programmatic activities to include preparation of disciplinary and adverse action letters and all final agency decisions in grievances and appeals; (9) provides technical advice, consultation, and training on matters of employee conduct and performance; and (10) provides consultation, guidance, and technical advice to human resources specialists, managers, and employees on the development.

Employee Benefits, WorkLife Programs and Payroll Activity (CAJQD3). (1) Provides consultation, guidance, and technical advice to human resources specialists, managers, and employees on the development, coordination and implementation of all WorkLife program initiatives; (2) provides personnel services relating to on-the-job injuries and exposures to infectious diseases; (3) provides human resources services and assistance on domestic and international employee benefits and leave administration; (4) serves as liaison between CDC/ATSDR and the HHS payroll office resolving discrepancies with pay and leave; (5) administers the leave donor program and processes time and attendance amendments; (6) administers the federal life and health insurance programs; (7) provides policy guidance and technical advice and assistance on retirement, the Thrift Savings Plan, health/life

insurance, and savings bonds; and (8) furnishes advice and assistance in the processing of Office of Workers' Compensation Program claims and the Voluntary Leave Donation Program.

Performance Management, Strategic Rewards and Recognitions Activity (CAJQD4). (1) Facilitates the development and implementation of an agency-wide strategic approach to monitoring, evaluating, aligning, and improving performance management policies and practices for all CDC/ATSDR performance management systems (Title 5, Title 42, SES, SBRS, and the COER); and (2) coordinates performance management, strategic rewards and recognition programs and systems.

Client Services Office (CAJQE). (1) Serves as the primary contact for CDC/ATSDR management and employees in obtaining the full range of personnel assistance and management services for civil service personnel; (2) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration, recruitment, staffing, placement, reorganizations, program evaluation, and personnel records and files management; (3) maintains liaison with HHS and OPM in the area of human resources management; (4) provides leadership in identifying the CIOs recruiting needs, and assesses, analyzes, and assists CDC/ATSDR programs in developing and executing short- and long-range hiring plans to meet these needs; (5) provides guidance to CDC/ATSDR organizations in the development of staffing plans and job analyses, evaluating/classifying position descriptions, conducting position management studies, and responding to desk audit requests; (6) processes personnel actions by determining position classification, issuing vacancy announcements, assisting in development of selection criteria, conducting examining under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (7) codes and finalizes all personnel actions in the automated personnel data system, personnel action processing, data quality control/assessment, and files/records management; (8) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (9) establishes objectives, standards, and internal controls; (10) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (11) manages various staffing programs such as the CDC summer program, Priority Placement Program, Priority Consideration Program, the Interagency Career Transition Assistance Program, and the Career Transition Assistance Program and other special emphasis programs; (12) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees, strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (13) establishes and maintains personnel records, files, and controls; (14) establishes and maintains the official personnel files system and administers personnel records storage and disposal program; (15) collaborates with Personnel Security in initiating suitability background checks and fingerprints for all CDC/ATSDR personnel; (16) responds to employment verification inquiries; and (17) administers the Special Emphasis Programs and Student Intern/Fellowship Programs.

Office of the Director (CAJQE1). (1) Provides leadership and overall direction for the Client Services Office; (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for the Client Services Offices; (4) coordinates all program reviews; (5) provides technical assistance and consultation to the Activities within the Client Services Office; and (6) coordinates, develops, and monitors implementation of program initiatives.

Customer Staffing Activity 1 (CAJQE2). (1) Supports the CDC, OD, Business Services Offices, Staff Offices, Office of Public Health Scientific Services, Office of State, Tribal, Local and Territorial Support; (2) provides leadership in identifying CIOs recruiting needs, and assesses, analyzes, and assists CDC programs in developing and executing short- and long-range hiring plans to meet these needs; (3) provides guidance to CDC organizations in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees, strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; and (10) codes and finalizes all personnel actions in the automated personnel data system; data quality control/assessment, and files/records management.

Customer Staffing Activity 2 (CAJQE3). (1) Supports the Office of Non-communicable Diseases, Injury and Environmental Health and subordinate Centers, National Center for Chronic Disease Prevention and Health Promotion, National Center for Injury Prevention and Control, and the National Center on Birth Defects and Developmental Disabilities; (2) provides leadership in identifying CIOs recruiting needs, and assesses, analyzes, and assists CDC/ATSDR programs in developing and executing short- and long-range hiring plans to meet these needs; (3) provides guidance to CDC/ATSDR organizations in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems,

operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees; strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; and (10) codes and finalizes all personnel actions in the automated personnel data system and ensures data quality control/assessment, and files/records management.

Customer Staffing Activity 3 (CAJQE4). (1) Supports the National Center for Emerging and Zoonotic Infectious Diseases, National Center for Immunization and Respiratory Diseases, and the Office of Infectious Diseases; (2) provides leadership in identifying CIOs recruiting needs, and assesses, analyzes, and assists CDC/ATSDR programs in developing and executing short- and long-range hiring plans to meet these needs; (3) provides guidance to CDC organizations in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees; strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; and (10) codes and finalizes all personnel actions in the automated personnel data system and ensures data quality control/assessment, and files/records management.

Classification and Advisory Activity (CAJQE5). (1) provides guidance to CDC/ATSDR organizations in the development of staffing plans and job analyses, evaluating/classifying position descriptions, conducting position management studies, and responding to desk audit requests; (2) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; (3) provides leadership in identifying CIOs classification and position management needs; (4) provides guidance to CDC organizations in the development, evaluation/classification of position descriptions; (5) conducts position management studies and responds to desk audit requests; (6) reviews reorganization proposals and provides advice on proposed staffing plans and organizational structures; (7) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (8) establishes objectives, standards, and internal controls; and (9) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures.

Technical Services Activity (CAJQE6). (1) Processes personnel actions by determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (2) codes and finalizes all personnel actions in the automated personnel data system, personnel action processing, data quality control/assessment, and files/records management; (3) establishes objectives, standards, and internal controls; (4) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (5) establishes and maintains personnel records, files, and controls; (6) establishes and maintains the official personnel files system and administers personnel records storage and disposal program; (7) collaborates with Personnel Security in initiating suitability background checks and fingerprints for all CDC/ATSDR personnel; and (8) responds to employment verification inquiries.

Customer Staffing Activity 4 (CAJQE7). (1) Supports the recruitment and staffing services for CDC/ATSDR's international workforce; (2) provides leadership in identifying the CDC/ATSDR international workforce recruiting needs, and assesses, analyzes, and assists programs in developing and executing short- and long-range hiring plans to meet these needs; (3) provides guidance to CDC/ATSDR in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees; strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) coordinates the provision of benefits, allowances, special pay requirements, labor and employee relations support services; (10) consults with the Department of State on utilization of State Department authorities to hire locally employed staff and coordination of records management requirements (11) provides leadership in identifying CIO's classification and position management needs; (12) provides guidance to CDC/ATSDR organizations in the development, evaluation/classification of position descriptions; (13) conducts position management studies and responds to desk audit requests; (14) codes and finalizes all personnel actions in the automated personnel data system and ensures data quality control/assessment, and files/records management; and (15) reviews all reorganization proposals and provides advice on proposed staffing plans and organizational structures.

Customer Staffing Activity 5 (CAJQE8). (1) Supports the Office of Public Health Preparedness and Response, and the National Center for HIV/AIDS, Virus Hepatitis, STD, and Tuberculosis Prevention; (2) provides leadership in identifying CIOs recruiting needs, and assesses, analyzes, and assists CDC programs in developing and executing short- and long-range hiring

plans to meet these needs; (3) provides guidance to CDC organizations in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees; strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; and (10) codes and finalizes all personnel actions in the automated personnel data system and ensures data quality control/assessment, and files/records management.

Customer Staffing Activity 6 (CAJQE9). (1) Supports the National Institute for Occupational Safety and Health, the Agency for Toxic Substance and Disease Registry, National Center for Environmental Health, and the Office of Public Health Scientific Services/Center for Surveillance, Epidemiology, and Laboratory Services; (2) provides leadership in identifying CIOs recruiting needs, and assesses, analyzes, and assists CDC programs in developing and executing short- and long-range hiring plans to meet these needs; (3) provides guidance to CDC organizations in the development of staffing plans and job analyses; (4) processes personnel actions by issuing vacancy announcements, assisting in development of selection criteria, conducting examinations under delegated examining authority, conducting candidate rating and ranking under CDC Merit Promotion Plan, making qualification determinations, determining pay, conducting reductions-in-force, effecting appointments and processing other actions; (5) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (6) establishes objectives, standards, and internal controls; (7) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; (8) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees; strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (9) provides leadership, technical assistance, guidance, and consultation in human resource utilization, position management, classification and pay administration; and (10) codes and finalizes all personnel actions in the automated personnel data system and ensures data quality control/assessment, and files/records management.

Special Emphasis Activity (CAJQE10). (1) Serves as the primary contact for CDC/ATSDR management and employees in obtaining the full range of personnel assistance and management services for excepted service personnel; (2) manages various staffing programs such as the CDC summer program, Priority Placement Program, Priority Consideration Program, the Interagency Career Transition Assistance Program, and the Career Transition Assistance Program, Pathways Program, Public Health Associates Program, and other special emphasis programs; (3) provides consultation, guidance, and technical advice on recruitment and special emphasis policies, practices, and procedures, including search committees, strategizes on the best approach to recruitment at specific events, and designs and develops recruitment materials for events; (4) establishes and maintains personnel records, files, and controls; (5) administers the Special Emphasis Programs and Student Intern/Fellowship Programs; (6) plans, develops, implements, and evaluates systems to ensure consistently high quality human resources services; (7) establishes objectives, standards, and internal controls; (8) evaluates, analyzes, and makes recommendations to improve personnel authorities, policies, systems, operations, and procedures; and (9) process the agency's Intergovernmental Personnel Act Employees.

Executive and Scientific Resources Office (CAJQG). (1) Provides leadership, technical assistance, guidance, and consultation in the administration of policies and procedures for appointment of individuals through the SBRS, SES, distinguished consultants, experts, consultants, and fellows under Title 42 appointment authorities;

(2) provides advisory services and technical assistance on pay and compensation guidelines in accordance with OPM rules and regulations, HHS and CDC/ATSDR established pay and compensation recommendation policies, and procedures; (3) provides expert human resources advisory services and technical assistance support to the CDC/ATSDR performance review boards and compensation committees; (4) reviews actions for statutory and regulatory compliance; (5) manages strategic recruitment, relocation, and retention incentives to facilitate attraction of a quality, diverse workforce to ensure accomplishment of the CDC/ATSDR missions; (6) provides performance management training for all SES and Title 42 executives with emphasis on performance systems, timelines, supervisory and employee responsibilities; (7) provides guidance on establishing performance plans, conducting mid-year reviews, and conducting final performance rating discussions and closing performance plans; (8) develops and maintains a standard Department-wide performance management system and forms for executives;(9) conducts reviews of SES performance plans and appraisals and provide feedback; (10) prepares and submits SES performance system certification request to OPM and OMB; (11) processes performance awards and performance-based pay adjustments; (12) provides advice, assistance, templates and training workshops on performance award and Presidential Rank Award requirements; (13) manages the HHS Executive Development Program, including developmental activities, rotational assignments, and the Candidate Development Program; (14) advises on development of executive succession planning activities; and (15) provides program guidance, administration, and oversight of CDC/ATSDR immigration and visa programs.

Office of the Director (CAJQG1). (1) Provides leadership and overall direction for the Executive and Scientific Resources Office (ESRO); (2) develops goals and objectives, and provides leadership, policy formation, oversight, and guidance in program planning and development; (3) plans, coordinates, and develops strategic plans for the Executive and Scientific Resources Office; (4) coordinates all program reviews; (5) provides technical

assistance and consultation to the activities within ESRO; and (6) coordinates, develops, and monitors implementation of program initiatives.

Senior Executive Compensation and Performance Activity (CAJQG2). (1) Provides advisory services, and technical assistance on pay and compensation guidelines in accordance with OPM rules and regulations, HHS and CDC/ATSDR established pay and compensation recommendation policies, and procedures; (2) provides expert human resources advisory services and technical assistance support to the CDC performance review boards and compensation committees; (3) reviews actions for statutory and regulatory compliance; (4) manages strategic recruitment, relocation, and retention incentives to facilitate attraction of a quality, diverse workforce to ensure accomplishment of the CDC/ATSDR missions; (5) provides performance management training for all SES and Title 42 executives with emphasis on performance systems, timelines, supervisory and employee responsibilities; (6) provides guidance on establishing performance plans, conducting mid-year reviews, and conducting final performance rating discussions and closing performance plans; (7) develops and maintains a standard Department-wide performance management system and forms for executives; (8) conducts reviews of SES performance plans and appraisals and provides feedback; (9) prepares and submits SES performance system certification request to OPM and OMB; (10) processes performance awards and performance-based pay adjustments; (11) provides advice, assistance, templates and training workshops on performance award and Presidential Rank Award requirements; (12) manages the HHS Executive Development Program, including developmental activities, rotational assignments, and the Candidate Development Program; and (13) advises on development of executive succession planning activities.

Title 42 Staffing and Recruitment Activity (CAJQG3). (1) Provides leadership, technical assistance, guidance, and consultation in the administration of policies and procedures for appointment of individuals through the distinguished consultants, experts, consultants, and fellows under Title 42 appointment authorities; and (2) administers and manages the Guest Researcher and Oak Ridge Institute for Science and Education Program.

Immigration Activity (CAJQG4). (1) provides technical guidance and visa-assistance for employment based, CDC-sponsored visas; (2) administers and Manages the Exchange Visitor Program; (3) works closely with the US Office of Exchange and Cultural Affairs, US Citizenship and Immigration Services, US Department of Homeland Security, US Department of State, Office of the Secretary/DHHS, and US Department of Labor) to facilitate immigration procedures; (4) reviews, processes and files H–1B, O–1, and Green Card (I–140) Petitions with the U.S. Citizenship and Immigration Services; (5) provides advisory services and guidance on employment based green card petitions in the Alien of Extraordinary Ability category; (6) issues Certificate of Eligibility for J–1 Exchange Visitor Status through the Student and Exchange Visitor Information System to non US citizens seeking CDC J–1 visa sponsorship; (7) coordinates and provides consultations and guidance on Interested Government Agency Waivers; (8) provides Immigration Training Workshops to CDC/ATSDR Administrative Staff; and (9) determines the appointment mechanism, legal status, and work authorizations for non U.S. citizens through the Visitors Management System.

Sherri A. Berger,

Chief Operating Officer, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Request for Nominations of Potential Reviewers To Serve on the Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)

The Centers for Disease Control and Prevention (CDC) is soliciting nominations for possible membership on the Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP) in the National Center for Injury Prevention and Control (NCIPC).

The Disease, Disability, and Injury Prevention and Control Special Emphasis Panel provides advice and guidance to the Secretary, Department of Health and Human Services (HHS); the Director, Centers for Disease Control and Prevention (CDC), and the Administrator, Agency for Toxic Substances and Disease Registry (ATSDR) regarding the concept review, scientific and technical merit of grant and cooperative agreement assistance applications, and contract proposals relating to the causes, prevention, and control of diseases, disabilities, injuries, and impairments of public health significance; exposure to hazardous substances in the environment; health promotion and education; and other related activities that promote health and well-being.

Nominations are being sought for individuals who have expertise and qualifications necessary to contribute to the accomplishment of NCIPC SEP objectives. Reviewers with expertise in the following research fields for injury and violence prevention are sought to serve on the NCIPC SEPs, for research and evaluation related, but not limited to: Child abuse and neglect, prescription drug overdose, intimate partner violence, motor vehicle injury, older adult falls, self-directed violence, sexual violence, traumatic brain injury, youth sports concussion, and youth violence. Reviewers with expertise in the following methodological fields for injury and violence prevention are also sought to serve on the CDC SEP for NCIPC programs: economic evaluation, etiology, implementation and translation, intervention research, policy evaluation, program evaluation, qualitative research design, quantitative research design, statistics, and surveillance.

Members and Chairs shall be selected by the Secretary, HHS, or other official to whom the authority has been delegated, on an ''as needed'' basis in response to specific applications being reviewed with expertise to provide advice. Members will be selected from authorities in the various fields of prevention and control of diseases, disabilities, and injuries. Members of other chartered HHS advisory committees may serve on the panel if their expertise is required. Consideration is given to professional training and background, points of view represented, and upcoming applications to be reviewed by the committee.

Information about nominated potential reviewers will be maintained in the NCIPC Reviewer and Advisor Database. The work of reviewers' appointed to NCIPC SEPS includes the initial review, discussion, and written critique and evaluation of applications. This work will enable the CDC/NCIPC to fulfill its mission of funding meritorious research that provides vital knowledge about underlying risk and protective factors and strategies for violence and injury prevention *http://www.cdc.gov/injury/index.html.*

The U.S. Department of Health and Human Services policy stipulates that

committee membership be balanced in terms of points of view represented and the committee's function. Appointments shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, gender identity, HIV status, disability, and cultural, religious, or socioeconomic status. Nominees must be U.S. citizens appointed to serve on a CDC SEP and can be full-time employees of the U.S. Government. Current participation on CDC federal workgroups or prior experience serving on another federal advisory committee does not disqualify a reviewer, except for service on the Board of Scientific Counselors, NCIPC. However, HHS policy is to avoid excessive individual service on advisory committees and multiple committee memberships. Reviewers appointed to the SEP, CDC are not considered Special Government Employees, and will not be required to file financial disclosure reports.

Nominees interested in serving as a potential reviewer on a SEP, CDC for NCIPC programs should submit the following items:

• Current *curriculum vitae,* including complete contact information (name, affiliation, mailing address, telephone number, and email address).

Nomination materials must be postmarked by March 31, 2017 and sent by U.S. mail to: NCIPC Extramural Research Program Office (ERPO): Centers for Disease Control and Prevention, 1600 Clifton Road NE., Mailstop F–63, Atlanta, Georgia 30329 or to the ERPO Mailbox *NCIPC_ERPO@cdc.gov.*

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Advisory Committee on Breast Cancer in Young Women, Centers for Disease Control and Prevention: Notice of Charter Renewal

This gives notice under the Federal Advisory Committee Act (Pub. L. 92–463) of October 6, 1972, that the Advisory Committee on Breast Cancer in Young Women, Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS), has been renewed for a 2-year period through June 17, 2018.

For information, contact Temeika L. Fairley, Ph.D., Designated Federal Officer, Advisory Committee on Breast Cancer in Young Women, HHS, CDC, 4770 Buford Highway NE., Mailstop K52, Atlanta, Georgia 30341, telephone 770/488–4518, fax 770/488–4760.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Food and Drug Administration

[Docket No. FDA–2015–D–4033]

Nonprescription Sunscreen Drug Products—Format and Content of Data Submissions; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled ''Nonprescription Sunscreen Drug Products—Format and Content of Data Submissions.'' This guidance addresses FDA's current thinking on the format and content of information provided to support a request for a determination whether a nonprescription sunscreen active ingredient is generally recognized as safe and effective (GRASE), as provided under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as amended by the Sunscreen Innovation Act (SIA).

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–4033 for ''Nonprescription Sunscreen Drug Products—Format and Content of Data Submissions; Guidance for Industry; Availability.'' Received comments will be placed in the docket

and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Kristen Hardin, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 5443, Silver Spring, MD 20993, 240–402–4246.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled ''Nonprescription Sunscreen Drug Products—Format and Content of Data Submissions.'' This guidance replaces a draft guidance that was issued on November 23, 2015, under the title ''Nonprescription Sunscreen Drug Products—Content and Format of Data Submissions to Support a GRASE Determination Under the Sunscreen Innovation Act'' (see 80 FR 72973), and incorporates editorial changes and clarifying language based on FDA's consideration of comments received on that draft guidance. The draft guidance and related public comments are available at *http://www.regulations.gov* by searching Docket No. FDA–2015–D–4033.

This guidance addresses FDA's current thinking on the format and content of information provided to support a request submitted under section 586A (586A request) of the FD&C Act (21 U.S.C. 360fff–1), as amended by the Sunscreen Innovation Act (SIA) (21 U.S.C. Ch. 9 Sub. 5 Part I, enacted November 26, 2014), or in support of a pending request, as defined under section 586(6) of the FD&C Act (21 U.S.C. 360fff(6)).[1] The requests addressed in this guidance seek a determination from FDA of whether an over-the-counter (nonprescription) sunscreen active ingredient,[2] or a combination of nonprescription sunscreen active ingredients, is GRASE for use under specified conditions and should be included in the over-the-counter sunscreen drug monograph.[3] The GRASE determination is primarily based on FDA's review of safety and effectiveness data and other information submitted by the request's sponsor (GRASE data submission) but also on information and comments submitted to the public docket by other interested parties.[4] Before that review may begin, however, FDA must review the GRASE data submission for completeness and determine accordingly whether to file or refuse to file it for substantive review. If the submission is not sufficiently complete to enable the Agency to conduct a substantive GRASE review, including being formatted in a manner that will enable the Agency to evaluate the submission's completeness, FDA will refuse to file the submission (section 586B(b)(2) of the FD&C Act).

FDA is issuing this guidance in partial implementation of the SIA, which, among other things, added section 586D(a)(1)(B) of the FD&C Act (21 U.S.C. 360fff–4(a)(1)(B)) and directed FDA to finalize guidance on the implementation of and compliance with the SIA requirements for nonprescription sunscreens, including the Agency's guidance on the format and content of information submitted by a sponsor in support of a 586A request or a pending request. The information in this guidance is intended to provide recommendations to help sponsors prepare a GRASE data submission that is sufficiently complete (including being formatted in a manner that enables FDA to determine its completeness) to enable FDA to conduct a substantive GRASE review, as required by section 586B(b)(2) of the FD&C Act (21 U.S.C. 360fff–2(b)(2)).

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on the format and content of GRASE data submissions under the SIA. It does not establish any rights for any person and is not binding on FDA or the public. A sponsor or member of the public can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

[1] The SIA defines a *pending request* to mean a request for a nonprescription sunscreen active ingredient to be included in the over-the-counter monograph that was originally submitted as a time and extent application under 21 CFR 330.14 and that was determined to be eligible for review and for which safety and effectiveness data were submitted prior to the enactment of the SIA (section 586(6) of the FD&C Act).

[2] As defined in the SIA, *sunscreen* means a drug containing one or more sunscreen active ingredients (section 586(9) of the FD&C Act (21 U.S.C. 360fff(9)), and the term *sunscreen active ingredient* means an active ingredient that is intended for application to the skin of humans for purposes of absorbing, reflecting, or scattering ultraviolet radiation (section 586(10) of the FD&C Act (21 U.S.C. 360fff(10)).

[3] See section 586(4) of the FD&C Act (21 U.S.C. 360fff(4) (definition of ''GRASE determination''). Under the SIA, FDA must also make an initial determination on whether a nonprescription sunscreen ingredient or combination of sunscreen ingredients that is the subject of a 586A request has been marketed for a material time and to a material extent and thus whether that ingredient or combination of sunscreen ingredients is eligible for review under the SIA (section 586B(a) of the FD&C Act (21 U.S.C. 360fff–2(a))).

[4] Section 586B(b)(1) of the FD&C Act. An SIA *sponsor* is a person who has submitted a 586A request, a pending request, or any other application subject to the SIA (section 586(8) of the FD&C Act (21 U.S.C. 360fff(8)).

II. The Paperwork Reduction Act of 1995

This guidance contains collections of information that are exempt from the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520). Section 586D(a)(1)(C) of the FD&C Act, as amended by the SIA, states that the PRA shall not apply to collections of information for purposes of guidance under that subsection.

III. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov.*

Dated: *November 17, 2016.*

Leslie Kux,

Associate Commissioner for Policy.

[Docket No. FDA–2015–D–4021]

Nonprescription Sunscreen Drug Products—Safety and Effectiveness Data; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled ''Nonprescription Sunscreen Drug Products—Safety and Effectiveness Data.'' This guidance addresses FDA's current thinking on the safety and effectiveness data needed to determine whether a nonprescription sunscreen active ingredient or combination of active ingredients evaluated under the Sunscreen Innovation Act (SIA) is generally recognized as safe and effective (GRASE) and not misbranded when used under specified conditions. The guidance also addresses FDA's current thinking about an approach to safety-related final formulation testing that the Agency anticipates adopting in the future.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–4021 for ''Nonprescription Sunscreen Drug Products—Safety and Effectiveness Data; Guidance for Industry; Availability.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatory&information/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Kristen Hardin, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, rm. 5443, Silver Spring, MD 20993–0002, 240–402–4246.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled ''Nonprescription Sunscreen Drug Products—Safety and Effectiveness Data.'' This guidance replaces a draft

guidance entitled ''Over-the-Counter Sunscreens: Safety and Effectiveness Data'' that was issued on November 23, 2015 (see 80 FR 72975) and incorporates editorial changes and clarifying language based on FDA's consideration of comments received on that draft guidance. The draft guidance and related public comments are available at *http://www.regulations.gov* by searching Docket No. FDA–2015–D–4021.

This guidance addresses the current thinking of FDA about the safety and effectiveness data needed to determine whether a nonprescription sunscreen active ingredient or combination of active ingredients evaluated under the SIA (Pub. L. 113–195), enacted November 26, 2014, which amended the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 351 *et seq.*), is GRASE and not misbranded when used under specified conditions. The guidance also addresses FDA's current thinking about an approach to safety-related final formulation testing that it anticipates adopting in the future. FDA is issuing this guidance in partial implementation of the SIA which, among other things, established new procedures and review timelines for FDA to determine whether a nonprescription sunscreen active ingredient or combination of active ingredients is GRASE and not misbranded when used under the conditions specified in a final sunscreen order, in accordance with sections 586A, 586B, and 586C of the FD&C Act (21 U.S.C. 360fff–1, 360fff–2, and 360fff–3). The SIA directed FDA to issue guidance on four topics, including guidance regarding safety and effectiveness data in accordance with section 586D of the FD&C Act (21 U.S.C. 360ffff–4). Many of the safety topics addressed in this guidance were discussed at a public Nonprescription Drug Advisory Committee meeting held on September 4 and 5, 2014, *http://www.fda.gov/AdvisoryCommittees/CommitteesMeetingMaterials/Drugs/NonprescriptionDrugsAdvisoryCommittee/ucm380890.htm.*

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents FDA's current thinking on the topics it addresses. This guidance does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance contains collections of information that are exempt from the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520). Section 586D(a)(1)(C) of the FD&C Act, as amended by the SIA, states that the PRA shall not apply to collections of information made for purposes of guidance under that subsection.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov.*

Food and Drug Administration

[Docket No. FDA–2016–N–3389]

Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates; Request for Scientific Data, Information, and Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; request for scientific data, information, and comments.

SUMMARY: The Food and Drug Administration (FDA or we) is requesting scientific data, information, and comments that would help us evaluate the beneficial physiological effects to human health of isolated or synthetic non-digestible carbohydrates that are added to foods. We are requesting such scientific data, information, and comments to help us determine whether a particular isolated or synthetic non-digestible carbohydrate should be added to our definition of ''dietary fiber'' for purposes of being declared as dietary fiber on a Nutrition Facts or Supplement Facts label.

DATES: Submit either electronic or written scientific data, information, and comments by January 9, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic scientific data, information, and comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comments will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–3389 for ''Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates; Request for Scientific Data, Information, and Comments.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your

comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov*. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Paula R. Trumbo, Center for Food Safety and Applied Nutrition (HFS–830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–2579.

SUPPLEMENTARY INFORMATION:

I. Background

FDA regulations did not define the term ''dietary fiber'' before 2016. In the **Federal Register** of May 27, 2016 (81 FR 33742), we published a final rule amending our Nutrition and Supplement Facts label regulation. The final rule, among other things, defines dietary fiber as non-digestible soluble and insoluble carbohydrates (with three or more monomeric units), and lignin that are intrinsic and intact in plants; isolated or synthetic non-digestible carbohydrates (with three or more monomeric units) determined by FDA to have physiological effects that are beneficial to human health (21 CFR 101.9(c)(6)(i)). The final rule also identifies seven isolated or synthetic non-digestible carbohydrates that we determined to have beneficial effects for human health when added to foods (§ 101.9(c)(6)(i)). The seven isolated or synthetic non-digestible carbohydrates are: [beta]-glucan soluble fiber (as described in 21 CFR 101.81(c)(2)(ii)); psyllium husk (as described in § 101.81(c)(2)(ii)); cellulose, guar gum, pectin, locust bean gum; and hydroxypropyl methylcellulose. Foods and dietary supplements that contain any of these seven isolated or synthetic non-digestible carbohydrates must include the amounts of these dietary fibers in a serving of food in the dietary fiber declarations on the products' Nutrition and Supplement Facts labels.

Interested parties can ask us to list additional isolated or synthetic non-digestible carbohydrates in the definition of dietary fiber in § 101.9(c)(6)(i) if we determine that the new isolated or synthetic non-digestible carbohydrate meets our dietary fiber definition. For example, a manufacturer who wants FDA to amend the definition of dietary fiber to include another added non-digestible carbohydrate could submit a citizen petition under 21 CFR 10.30. Elsewhere in this issue of the **Federal Register**, we have published a notice announcing the availability of a draft guidance document entitled, ''Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition (21 CFR 10.30): Guidance for Industry.'' The draft guidance describes the type of evidence and the scientific evaluation process we plan to use in determining the strength of the evidence for the relationship between an isolated or synthetic non-digestible carbohydrate that is added to food and a physiological effect that is beneficial to human health.

In addition to issuing the draft guidance and determining that the seven isolated or synthetic non-digestible carbohydrates identified in the final rule's definition of dietary fibers have physiological effects that are beneficial to human health, we have conducted a scientific literature review of clinical studies associated with 26 isolated or synthetic non-digestible carbohydrates, such as gum acacia, carboxymethyl cellulose, inulin, polydextrose, and xanthan gum, that are not listed as a dietary fiber in § 101.9(c)(6)(i). Our review is consistent with the factors we provide in the draft guidance entitled, ''Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition (§ 10.30); Guidance for Industry'' to evaluate whether the available scientific evidence is sufficient to support a physiological effect that is beneficial to human health, based on the factors set forth in the draft guidance. We have summarized the clinical studies that we have identified for these 26 non-digestible carbohydrates and have provided summaries of the studies and related references in a document entitled ''Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates.'' The purpose of this **Federal Register** notice is to invite interested parties to submit additional scientific data, information, and comments regarding:

- The physiological endpoints that we have addressed in the science review for each of the 26 non-digestible carbohydrates, and
- Other beneficial physiological endpoints and the relevant scientific data for a particular fiber. We have identified the main endpoints, such as cholesterol or glucose levels, but ask for scientific data on additional physiological endpoints (blood pressure) for which a non-digestible carbohydrate may have a beneficial physiological effect.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–D–0558]

Contract Manufacturing Arrangements for Drugs: Quality Agreements; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled ''Contract Manufacturing Arrangements for Drugs: Quality Agreements.'' This guidance describes FDA's current thinking on defining, establishing, and documenting manufacturing activities of the parties involved in contract drug manufacturing subject to current good manufacturing practice (CGMP) requirements. In particular, we describe how parties involved in contract drug manufacturing can use quality agreements to delineate their manufacturing activities to ensure compliance with CGMP.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov/.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–D–0558 for ''Contract Manufacturing Arrangements for Drugs: Quality Agreements.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov/* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov/.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov/* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Bldg., 4th Floor, Silver Spring, MD 20993–0002; the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002; or the Policy and Regulations Staff, HFV–6, Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Paula Katz, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 4330, Silver Spring, MD 20993–0002, 301–796–6972; Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911; or Jonathan Bray, Center for Veterinary Medicine (HFV–232), Food and Drug Administration, 7519 Standish Pl., Rm. 130, Rockville, MD 20855, 240–402–5623.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled ''Contract Manufacturing Arrangements for Drugs: Quality Agreements.'' This guidance describes FDA's current thinking on defining, establishing, and documenting manufacturing activities of the parties involved in contract drug manufacturing subject to CGMP requirements. Owners and contract facilities can draw on quality management principles to carry out the complicated process of contract drug manufacturing by defining, establishing, and documenting their activities for ensuring compliance with CGMP and to ensure the quality, safety, and effectiveness of drugs.

This guidance replaces the draft guidance of the same name that published in the **Federal Register** of May 28, 2013 (78 FR 31943). We have carefully reviewed and considered the comments that were received on the draft guidance and have made changes for clarification. In particular, our revisions clarified the scope and applicability of the guidance and key terms used in the guidance.

Regarding scope and applicability, we have clarified that the guidance is limited to commercial manufacturing activities. Although the principles articulated may be useful in approaching quality agreements for other kinds of activities, such as clinical research, development, or distribution, these are outside the scope of this particular document.

Many comments concerned the terms ''owner'' and ''contract facility.'' Although some comments recommended that this guidance adopt the terms ''contract giver'' and ''contract acceptor,'' these terms do not align with our goal of showing how the parties to a contract manufacturing arrangement can work together to define, establish, and document agreements that delineate manufacturing activities and ensure compliance with CGMP.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on Contract Manufacturing Arrangements for Drugs: Quality Agreements. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and have been approved under OMB control number 0910–0139.

III. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm, http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm, http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm,* or *https://www.regulations.gov/.*

Dated: November 17, 2016.

Leslie Kux,

Associate Commissioner for Policy.

National Cancer Institute Amended Notice of Meeting

Notice is hereby given of a change in the meeting of the Joint Board meeting of the National Cancer Advisory Board and NCI Board of Scientific Advisors, December 5, 2016, 4:30 p.m. to December 7, 2016, 12:00 p.m., National Cancer Institute Shady Grove, Shady Grove, 9609 Medical Center Drive, 7W116, Rockville, MD 20850 which was published in the **Federal Register** on October 31, 2016, 81 FR 75423.

The meeting notice is amended to change the date, time and location of the meeting and to cancel the *Ad Hoc* Subcommittee on Global Cancer Research on December 5, 2016. There will be a National Cancer Advisory Board *Ad hoc* Subcommittee on Clinical Investigations on December 5, 2016, from 6:00 p.m. to 7:30 p.m. at the Pooks Hill Marriott Hotel, Annapolis and Chesapeake Room, 5151 Pooks Hill Road, Bethesda, MD 20814. The Joint meeting of the National Cancer Advisory Board and NCI Board of Scientific Advisors will now be held on December 6, 2016 at the National Institutes of Health, Building 31, Conference Room 10, 31 Center Drive, Bethesda, MD 20892. The open session is from 8:30 a.m. to 3:45 p.m. The closed session will begin at 4:00 p.m. and end at 5:00 p.m. The meeting is partially closed to the public.

Dated: November 17, 2016.

National Institute of Diabetes and Digestive and Kidney Diseases: Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel; NIDDK DDK–B Member, Conflict Application Review.

Date: December 5, 2016.

Time: 11:00 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, 6707 Democracy Boulevard, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Carol J. Goter-Robinson, Ph.D., Scientific Review Officer, Review Branch, DEA, NIDDK, National Institutes of Health, Room 7347, 6707 Democracy Boulevard, Bethesda, MD 20892–5452, (301) 594–7791, *goterrobinsonc@extra.niddk.nih.gov*.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel; PAR 14–301: NIDDK Central Repositories Sample Access (X01).

Date: January 18, 2017.

Time: 11:00 a.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, 6707 Democracy Boulevard, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Najma Begum, Ph.D., Scientific Review Officer, Review Branch, DEA, NIDDK, National Institutes of Health, Room 7349, 6707 Democracy Boulevard, Bethesda, MD 20892–5452, (301) 594–8894, *begumn@niddk.nih.gov*.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel; PAR–15–067: U01 Applications.

Date: January 24, 2017.

Time: 11:00 a.m. to 12:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, 6707 Democracy Boulevard, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: JIAN YANG, Ph.D., Scientific Review Officer, Review Branch, DEA, NIDDK, National Institutes of Health, Room 7111, 6707 Democracy Boulevard, Bethesda, MD 20892–5452, (301) 594–7799, *yangj@extra.niddk.nih.gov*.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: AIDS and Related Research.

Date: December 5–6, 2016.

Time: 10:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Virtual Meeting).

Contact Person: Kenneth A Roebuck, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5106, MSC 7852, Bethesda, MD 20892, (301) 435–1166, *roebuckk@csr.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Social Sciences and Population Studies: Special Topics.

Date: December 8, 2016.

Time: 11:00 a.m. to 1:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Kate Fothergill, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3142, Bethesda, MD 20892, 301–435–2309, *fothergillke@mail.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: AIDS and AIDS Related Research.

Date: December 9, 2016.

Time: 12:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Jose H Guerrier, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5218, MSC 7852, Bethesda, MD 20892, 301–435–1137, *guerriej@csr.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Evaluation of the Cooperative Agreements to Benefit Homeless Individuals (CABHI) Program (OMB No. 0930–0339)—REVISION

SAMHSA is conducting a cross-site evaluation of the FY2016 cohort of the CABHI grant program. The CABHI Evaluation builds on a previous evaluation of SAMHSA's 2009–2012 homeless services grant programs (*i.e.,* Grants for the Benefit of Homeless Individuals, Services in Supportive Housing, and CABHI), under which the approved data collection tools were developed and implemented. SAMHSA is requesting approval from OMB to revise the burden inventory, which has been calculated based on the number of FY2016 CABHI grantees, and to modify

the data collection mode of a project director interview.

In 2016, SAMHSA awarded 30 CABHI grants across three levels: States (up to $1.5 million per year), Local Governments (up to $800,000 per year), and Communities (up to $400,000 per year). The grantees are united by the goal of enhancing and expanding infrastructure and capacity for mental health and substance abuse treatment and related support services for individuals experiencing chronic homelessness or veterans, families, or youth experiencing homelessness as a result of these conditions. This is accomplished through the provision of permanent supportive housing, behavioral health treatment, and recovery support services, and enrollment in health insurance, Medicaid, or other mainstream benefit programs.

The primary task of the CABHI evaluation is to conduct a comprehensive process and outcome evaluation, addressing questions related to the implementation of the CABHI grant projects and the extent to which they were able to meet the program's goals. Process evaluation primarily represents what is done to and for the client (*e.g.,* services provided); this aspect of the evaluation will also include a focus on structure, or the resources available in the service delivery system, which represent the capacity to deliver quality care, but not the care itself. The outcome evaluation will focus on outputs, which are the most immediate or proximal results of project activities (*e.g.,* changes in partner collaboration, the number of clients enrolled in mainstream benefits), and client outcomes, particularly those related to behavioral health and homelessness and housing instability. The data collection tools included in this request collect a wide range of quantitative and qualitative data on characteristics of the grantee organization and its partnerships; the system within which the project is embedded; relationships with stakeholders; characteristics of the target population; services received, including implementation of EBPs; staffing patterns; costs of services; barriers and facilitators of project implementation; and project sustainability efforts. Data collection efforts that will support the evaluation are described below.

The *Project Director (PD) Phone Interview/Web Survey* is designed to systematically collect key grant project characteristics which will directly inform the process evaluation component and will also provide essential data by documenting the partnerships and services each grantee includes in their project. The interview includes two components, a semi-structured telephone interview and a Web survey, which represents a change from the original approval. The interview was developed to be conducted as a telephone interview; however, some sections are better suited for self-administration through a Web-based survey (*e.g.,* reporting which services the project is providing to clients) and the instrument has been modified accordingly. The *PD Phone Interview/Web Survey* is composed of the following sections: Grantee Agency and Project Characteristics, Target Population, Stakeholders/Partners, Services, Evidence-Based Practices (EBPs), Housing, Project Organization and Implementation, Sustainability, Local Evaluation, Technical Assistance, and Lessons Learned. A total of 39 respondents are expected to complete the *PD Phone Interview/Web Survey;* this includes one respondent from all of the CABHI grantees (n=30) and the State sub-recipients (n=9). This data collection will occur one time during Year 1 and one time during Year 3 of the evaluation.

Site Visits will consist of in-person, semi-structured discussions with grant project directors, State sub-recipient coordinators, project evaluators, financial staff, behavioral health treatment staff, case managers, housing providers, other support services staff, primary partner staff and other key stakeholders, and project client participants. The purpose of the *Site Visits* is to collect detailed qualitative information and economic data on project activities conducted by the grantees and their partners, which will directly inform the process evaluation. The qualitative data will also provide essential information for the outcome evaluation component by documenting the interventions provided to clients and the implementation, barriers, facilitators, challenges and successes for each grant project visited. Each CABHI grant project (n=30) will be visited once during Year 2 and once during Year 3 of the evaluation. No changes have been made to the *Site Visit* instruments.

The *EBP Self-Assessment* is a Web-based survey designed to collect information on the services implemented in CABHI grant projects that have a demonstrable evidence base, providing a description of the EBP interventions received by project clients. The *EBP Self-Assessment* tool is divided into two parts. Part 1 collects information on general implementation of the projects' primary EBPs (*i.e.,* those received by the most project clients). Thirty-six respondents (9 State sub-recipients, 12 Local Governments, and 15 Communities) are expected to complete Part 1 of the *EBP Self-Assessment,* which may be completed up to 3 times based on the number of primary EBPs being implemented by the project. Part 2 collects detailed implementation data on a selected group of EBPs (*i.e.,* Assertive Community Treatment, Integrated Dual Disorders Treatment, Illness Management and Recovery, Supported Employment, Critical Time Intervention, and Supplemental Security Income [SSI]/Social Security Disability Insurance [SSDI] Outreach, Access, and Recovery) and will be administered only to projects using the selected EBPs and only for the EBPs they are implementing. Thirty-six respondents (9 State sub-recipients, 12 Local Governments, and 15 Communities) are expected to complete Part 2 of the *EBP Self-Assessment,* which may be completed up to 3 times based on the number of Part 2 EBPs being implemented by the project. Respondents for both Part 1 and 2 may include grant project directors, State sub-recipient coordinators, or other staff knowledgeable about the project's EBPs. The *EBP Self-Assessment* will be administered in Year 2 of the evaluation. No changes have been made to the *EBP Self-Assessment* instrument.

The *Permanent Supportive Housing (PSH) Self-Assessment* is a Web-based survey completed by the CABHI grant projects to understand the extent to which they are implementing key dimensions of PSH and capture the variability of the PSH model among the projects. Information is collected on the following dimensions: Choice of housing, separation of housing and services; decent, safe, and affordable housing; housing integration; tenancy rights; access to housing; flexible, voluntary services; service philosophy; and team-based behavioral health. Thirty-six respondents (9 State sub-recipients, 12 Local Governments, and 15 Communities) are expected to complete the *PSH Self-Assessment* one time, and may include grant project directors, State sub-recipient coordinators, or other staff knowledgeable about the project's PSH model. The *PSH Self-Assessment* will be administered in Year 2 of the evaluation. No changes have been made to the *PSH Self-Assessment* instrument.

ANNUALIZED BURDEN HOURS

Instrument/activity	Number of respondents	Responses per respondent	Total number of responses	Hours per response	Total burden hours
PD Phone Interview/Web Survey	39	1	39	2.1	82
Site Visits:					
Opening Session/Project Director Interview	[a] 300	1	300	2.5	750
Case Manager, Treatment, Housing Staff/Provider Interview	[b] 540	1	540	2	1,080
Stakeholder Interview	[c] 270	1	270	1.5	405
Evaluator Interview	[d] 60	1	60	1	60
Client Focus Group	[e] 450	1	450	1.5	675
Cost Interview	[f] 60	1	60	2	120
Evidence-Based Practice Self-Assessment Part 1	36	3	108	0.58	63
Evidence-Based Practice Self-Assessment Part 2	36	3	108	0.25	27
Permanent Supportive Housing Self-Assessment	36	1	36	0.67	24
Total	[g] 1,650		1,971		3,286

[a] 10 respondents × 30 site visits = 300 respondents.
[b] 18 respondents × 30 site visits = 540 respondents.
[c] 9 respondents × 30 site visits = 270 respondents.
[d] 2 respondents × 30 site visits = 60 respondents.
[e] 15 respondents × 30 site visits = 450 respondents.
[f] 2 respondents × 30 site visits = 60 respondents.
[g] This is an unduplicated count of total respondents.

Send comments to Summer King, SAMHSA Reports Clearance Officer, 5600 Fishers Lane, Room 15E57–B, Rockville, MD 20857 *OR* email a copy to *summer.king@samhsa.hhs.gov.* Written comments should be received by January 23, 2017.

Summer King,

Statistician.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2016–0006; OMB No. 1660–0006]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; National Flood Insurance Program Policy Forms

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission will describe the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort and resources used by respondents to respond) and cost, and the actual data collection instruments FEMA will use.

DATES: Comments must be submitted on or before December 23, 2016.

ADDRESSES: Submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the Desk Officer for the Department of Homeland Security, Federal Emergency Management Agency, and sent via electronic mail to *oira.submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Records Management Division, 500 C Street SW., Washington, DC 20472–3100, or email address *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This proposed information collection previously published in the **Federal Register** on March 27, 2016 at 81 FR 14459 with a 60 day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: National Flood Insurance Program Policy Forms.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0006.

Form Titles and Numbers: FEMA Form 086–0–1, Flood Insurance Application; FEMA From 086–0–2, Flood Insurance Cancellation/Nullification Request Form; FEMA Form 086–0–3, Flood Insurance General Change Endorsement; FEMA Form 086–0–4, V-Zone Risk Factor Rating Form and Instructions; FEMA Form 086–0–5, Flood Insurance Preferred Risk Policy and Newly Mapped Application.

Abstract: In order to provide for the availability of policies for flood insurance, policies are marketed through the facilities of licensed insurance agents or brokers in the various States. Applications from agents or brokers are forwarded to a servicing company designated as fiscal agent by the Federal Insurance Administration. Upon receipt and examination of the application and required premium, the servicing company issues the appropriate Federal flood insurance policy.

Affected Public: Individuals or households; State, local or Tribal Government; Business or other for profit; Not-for-profit institutions; and Farms.

Estimated Number of Respondents: 601,067.

Estimated Total Annual Burden Hours: 91,016 hours.

Estimated Cost: The cost to respondents is $6,500 for engineer or architect services.

Dated: November 17, 2016.

Richard W. Mattison,

Records Management Program Chief, Mission Support Bureau, Federal Emergency Management Agency, Department of Homeland Security.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4291–DR]; [Docket ID FEMA–2016–0001]

Virginia; Amendment No. 2 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the Commonwealth of Virginia (FEMA–4291–DR), dated November 2, 2016, and related determinations.

DATES: *Effective Date:* November 15, 2016.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: The notice of a major disaster declaration for the Commonwealth of Virginia is hereby amended to include the Public Assistance program for the following areas among those areas determined to have been adversely affected by the event declared a major disaster by the President in his declaration of November 2, 2016.

The independent cities of Franklin, Portsmouth, and Suffolk and the counties of Isle of Wight and Southampton for Public Assistance.

The independent cities of Chesapeake, Norfolk, and Virginia Beach for Public Assistance (already designated for Individual Assistance).

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4289–DR; Docket ID FEMA–2016–0001]

Iowa; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Iowa (FEMA–4289–DR), dated October 31, 2016, and related determinations.

DATES: *Effective Date:* October 31, 2016.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated October 31, 2016, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Iowa resulting from severe storms and flooding during the period of September 21 to October 3, 2016, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Iowa.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation will be limited to 75 percent of the total eligible costs. Federal funds provided under the Stafford Act for Public Assistance also will be limited to 75 percent of the total eligible costs, with the exception of projects that meet the eligibility criteria for a higher Federal cost-sharing percentage under the Public Assistance Alternative Procedures Pilot Program for Debris Removal implemented pursuant to section 428 of the Stafford Act.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, James N. Russo, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Iowa have been designated as adversely affected by this major disaster:

Allamakee, Benton, Black Hawk, Bremer, Buchanan, Butler, Cerro Gordo, Chickasaw, Clayton, Delaware, Des Moines, Fayette, Floyd, Franklin, Howard, Linn, Mitchell, Winneshiek, and Wright Counties for Public Assistance.

All areas within the State of Iowa are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Federal Emergency Management Agency

[Docket ID: FEMA–2016–0031; OMB No. 1660–0086]

Agency Information Collection Activities: Proposed Collection; Comment Request; Write Your Own (WYO) Company Participation Criteria; New Applicant

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on an extension, without change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the type of information that insurance companies that wish to join the National Flood Insurance Program's Write Your Own Program may need to submit to FEMA to show their ability to meet their responsibilities to FEMA and to their customers.

DATES: Comments must be submitted on or before January 23, 2017.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID FEMA–2016–0031. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., 8NE., Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Susan Berstein, Esq. I&PR, Mitigation, National Flood Insurance Program, (202) 212–2113. You may contact the Records Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Under the National Flood Insurance Program's (NFIP) Write Your Own (WYO) Program, FEMA may enter into arrangements authorized by the National Flood Insurance Act of 1968, as amended (the Act) with individual private sector insurance companies that are licensed to engage in the business of property insurance. These companies may offer flood insurance coverage to eligible property owners utilizing their customary business practice. To facilitate the marketing of flood insurance, the federal government will be a guarantor of flood insurance coverage for WYO companies policies issued under the WYO Program Financial Assistance/Subsidy Arrangement (Arrangement). To ensure that a company seeking to return or participate in the WYO program is qualified, FEMA is requiring a one-time submission of information to determine the company's qualifications, as set forth in 44 CFR 62.24.

Collection of Information

Title: Write Your Own (WYO) Company Participation Criteria; New Applicant

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660–0086.

FEMA Forms: There is no FEMA form number.

Abstract: Under the NFIP, WYO Program, FEMA may enter into arrangements with individual private sector insurance companies that are licensed to engage in the business of offering NFIP flood insurance coverage. The federal government acts as underwriter of this flood insurance. To ensure that a company seeking to return or participate in the WYO program is qualified, FEMA requires an initial submission of information to determine the company's qualifications, as set forth in 44 CFR 62.24.

Affected Public: Business or other for-profit.

Number of Respondents: 5.

Number of Responses: 5.

Estimated Total Annual Burden Hours: 35.

Estimated Cost: $1727.95.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Dated: November 17, 2016.

Richard W. Mattison

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–52–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1658]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition,

the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before February 21, 2017.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1658, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1659]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before February 21, 2017.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2014–0022]

Technical Mapping Advisory Council

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Committee management; Notice of Federal Advisory Committee meeting.

SUMMARY: The Federal Emergency Management Agency (FEMA) Technical Mapping Advisory Council (TMAC) will meet in person on December 13–14, 2016 in Arlington, Virginia. The meeting will be open to the public.

DATES: The TMAC will meet on Tuesday, December 13, 2016 from 8:00 a.m.–5:30 p.m. Eastern Standard Time (EST), and Wednesday, December 14, 2016 from 8:00 a.m.–5:00 p.m. EST. Please note that the meeting will close early if the TMAC has completed its business.

ADDRESSES: The meeting will be held at 3101 Wilson Boulevard, Arlington, Virginia, 22201. Members of the public who wish to attend the meeting must register in advance by sending an email to *FEMA-TMAC@fema.dhs.gov* (Attention: Mark Crowell) by 11:00 p.m. EST on Tuesday, December 6, 2016. Members of the public must check in at the front desk on the ground floor of 3101 Wilson Boulevard, Arlington, Virginia, 22201 and photo identification is required. For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact the person listed in **FOR FURTHER INFORMATION CONTACT** below as soon as possible.

To facilitate public participation, members of the public are invited to provide written comments on the issues to be considered by the TMAC, as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated meeting materials will be available at *www.fema.gov/TMAC* for review by Tuesday, December 6, 2016. Written comments to be considered by the committee at the time of the meeting must be submitted and received by Wednesday, December 7, 2016, identified by Docket ID FEMA–2014–0022, and submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email:* Address the email TO: *FEMA-RULES@fema.dhs.gov* and CC: *FEMA-TMAC@fema.dhs.gov.* Include the docket number in the subject line of the message. Include name and contact detail in the body of the email.
- *Mail:* Regulatory Affairs Division, Office of Chief Counsel, FEMA, 500 C Street SW., Room 8NE, Washington, DC 20472–3100.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the docket number for this action. Comments received will be posted without alteration at *http://www.regulations.gov,* including any personal information provided. *Docket:* For docket access to read background documents or comments received by the TMAC, go to *http://www.regulations.gov* and search for the Docket ID FEMA–2014–0022.

A public comment period will be held on Tuesday, December 13, 2016, from 4:00 p.m. to 4:30 p.m. EST and again on Wednesday, December 14, 2016, from 3:00 to 3:30 p.m. EST. Speakers are requested to limit their comments to no more than three minutes. The public comment period will not exceed 30 minutes. Please note that the public comment period may end before the time indicated, following the last call for comments. Contact the individual listed below to register as a speaker by close of business on Thursday, December 8, 2016.

FOR FURTHER INFORMATION CONTACT: Mark Crowell, Designated Federal Officer for the TMAC, FEMA, 400 C Street SW., Washington, DC 20024, telephone (202) 646–3432, and email *mark.crowell@fema.dhs.gov.* The TMAC Web site is: *http://www.fema.gov/TMAC.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. Appendix.

As required by the *Biggert-Waters Flood Insurance Reform Act of 2012,* the TMAC makes recommendations to the FEMA Administrator on: (1) How to improve, in a cost-effective manner, the (a) accuracy, general quality, ease of use, and distribution and dissemination of flood insurance rate maps and risk data; and (b) performance metrics and milestones required to effectively and efficiently map flood risk areas in the United States; (2) mapping standards and guidelines for (a) flood insurance rate maps, and (b) data accuracy, data quality, data currency, and data eligibility; (3) how to maintain, on an ongoing basis, flood insurance rate maps and flood risk identification; (4) procedures for delegating mapping activities to State and local mapping partners; and (5)(a) methods for improving interagency and intergovernmental coordination on flood mapping and flood risk determination, and (b) a funding strategy to leverage and coordinate budgets and expenditures across Federal agencies. Furthermore, the TMAC is required to submit an annual report to the FEMA Administrator that contains: (1) A description of the activities of the Council; (2) an evaluation of the status and performance of flood insurance rate maps and mapping activities to revise and update Flood Insurance Rate Maps; and (3) a summary of recommendations made by the Council to the FEMA Administrator.

Agenda: During the two-day meeting, TMAC members will receive briefings from subject matter experts, and will present and deliberate on the draft content and potential recommendations to be incorporated in the TMAC 2016 Annual Report. In addition, the TMAC members will identify and coordinate on the TMAC's next steps for Annual Report production. A brief public comment period will take place each day during the meeting and will occur prior to any vote. The full agenda and related briefing materials will be posted for review by December 7, 2016 at *http://www.fema.gov/TMAC.*

Dated: November 9, 2016.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Federal Emergency Management Agency.

BILLING CODE 9110–12–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5913–N–34]

60-Day Notice of Proposed Information Collection: FHA Single Family Model Mortgage Documents

AGENCY: Office of the Assistant Secretary for Housing- Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date: January 23, 2017.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Kevin Stevens, 451 7th Street SW., Washington, DC 20410; email *Kevin L. Stevens@hud.gov;* or telephone 202–402–2673. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: FHA Single Family Model Mortgage Documents.

OMB Approval Number: 2502–New.

Type of Request: Approval of a new collection of information.

Form Number: N/A.

Description of the need for the information and proposed use:

This notice advises of FHA's review and proposed revisions to the Single Family Model Forward Mortgage document. The majority of the proposed changes are conforming or technical in nature (*e.g.,* correction of internal references and typographical errors). Included in this category is the proposed change to Section 19. As provided in FHA's Instructions for Model Mortgages (located at *http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/sfh/model_documents*) the FHA Model Forward Mortgage document is based largely on the Federal Home Loan Mortgage Corporation and Federal National Mortgage Association (the ''Government Sponsored Enterprises'' or ''GSEs'') security instrument covenants, with certain FHA-specific revisions. When incorporating the GSE covenants into the Model Forward Mortgage document, the second paragraph of Section 19 was unintentionally omitted, but reference to that paragraph was retained in the section heading, resulting in an apparent internal discrepancy in the Model Forward Mortgage. Because the omission of this paragraph was not identified as an FHA-Specific Modification (as that term is used in the Instructions for Model Mortgages), mortgagees have been free to adopt the analogous GSE covenant provision to resolve this discrepancy. Therefore, although the proposed change to Section 19 appear substantive, it should bring the Model Forward Mortgage into closer conformity with current FHA-insured mortgages and industry standard.

In addition to these technical changes, FHA is proposing one set of substantive changes to the Model Forward Mortgage, reflected in the judicial and non-judicial versions of Section 22 (hereinafter ''Sections 22'') and Section 20. Prior to the September, 2014 publication of the current Model Forward Mortgage, the former Model Forward Mortgage contained the following provision: ''[i]n many circumstances regulations issued by the Secretary will limit Lender rights, in the case of payment defaults, to require immediate payment in full and foreclose if not paid. This Security Instrument does not authorize acceleration or foreclosure if not permitted by regulations of the Secretary.'' (hereinafter ''Paragraph 9(d)''). Because Paragraph 9(d) is not serve to again further this goal.

The Department is also proposing a revision to Section 20, which generally provides that the borrower is not a third-party beneficiary to the contract of mortgage insurance between the lender and FHA. Legally, FHA borrowers have never been deemed third-party beneficiaries of the mortgage insurance contract between FHA and the mortgagee, and therefore, have had no authority to enforce any provisions thereof. However, as reflected in the proposed changes to Sections 22, the borrower and lender will enjoy contractual rights and obligations under the private mortgage contract that happen to mirror elements of the mortgage insurance contract because they both separately rely on HUD's regulations. By asserting rights under the private mortgage contract, even those that incorporate elements of the regulations forming the mortgage insurance contract, borrowers would not be enforcing the contract of mortgage insurance and FHA regulations as such, but rather enforcing the private contractual terms incorporated into the mortgage contract that mirror those regulations.

While aiming to clearly delineate the lines between the private mortgage contract and the contract of mortgage insurance through the language contained in Section 20, the Department does not wish to cause any confusion concerning the borrower's ability to enforce his or her rights that have been granted through the incorporation of certain regulatory provisions. Therefore, for clarity, the Department is proposing a revision to Section 20 that eliminates any confusion regarding the borrower's ability to assert rights under the private mortgage contract with the mortgagee as provided in the proposed changes to Section 22. The proposed revision to Section 20 does not jeopardize the settled fact that borrowers are not third-party beneficiaries of the mortgage insurance contract and do not have the authority to enforce any provisions thereof. This is a consequence of well-established legal principals governing contractual relationships and private, which will remain unchanged not with standing the proposed revision. HUD expects, therefore, that the proposed change renders Section 20 more apparently consistent with the proposed changes to Sections 22, but does not intend to create third-party rights under the mortgage insurance contract.

The following information regarding respondents and number of responses is based on information related to the actual legal mortgage document, not the model mortgage document.

Affected *Respondents:* Businesses or other for-profit.

Estimated Number of Respondents: 2,535.

Estimated Number of Responses: 164,447.

Frequency of Response: On Occasion.

Average Hours per Response: .05.

Total Estimated Burdens: 822 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information

technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: November 17, 2016.

Janet M. Golrick,

Associate General Deputy Assistant Secretary for Housing Associate Deputy Federal Housing Commissioner.

[FR Doc. 2016–28245 Filed 11–22–16; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5993–N–01]

Notice of HUD Vacant Loan Sales (HVLS 2017–1)

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of sales of reverse mortgage loans.

SUMMARY: This notice announces HUD's intention to competitively offer multiple residential reverse mortgage pools consisting of approximately 1,700 reverse mortgage notes secured by properties with an aggregate broker price opinion of approximately $220 million. The sale will consist of due and payable Secretary-held reverse mortgage loans. The mortgage loans consist of first liens secured by single family, vacant residential properties, where all borrowers are deceased and no borrower is survived by a non-borrowing spouse.

This notice also generally describes the bidding process for the sale and certain persons who are ineligible to bid. This is the first sale offering of its type and the sale will be held on November 30, 2016.

DATES: For this sale action, the Bidder's Information Package (BIP) is expected to be made available to qualified bidders on or about October 28, 2016. Bids for the HVLS 2017–1 sale will be accepted on the Bid Date of November 30, 2016 (Bid Date). HUD anticipates that award(s) will be made on or about December 1, 2016 (the Award Date).

ADDRESSES: To become a qualified bidder and receive the BIP, prospective bidders must complete, execute, and submit a Confidentiality Agreement and a Qualification Statement acceptable to HUD. Both documents are available via the HUD Web site at: *http://www.hud.gov/sfloansales* or via: *http://www.verdiassetsales.com.* Please mail and fax executed documents to Verdi Consulting, Inc.: Verdi Consulting, Inc., 8400 Westpark Drive, 4th Floor, McLean, VA 22102, *Attention:* HUD SFLS Loan Sale Coordinator, Fax: 1–703–584–7790.

FOR FURTHER INFORMATION CONTACT: John Lucey, Director, Asset Sales Office, Room 3136, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410–8000; telephone 202–708–2625, extension 3927. Hearing- or speech-impaired individuals may call 202–708–4594 (TTY). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

HUD announces its intention to sell in HVLS 2017–1 due and payable Secretary-held reverse mortgage loans. The loans consist of first liens secured by single family, vacant residential properties, where all borrowers are deceased and no borrower is survived by a non-borrowing spouse.

A listing of the mortgage loans is included in the due diligence materials made available to qualified bidders. The mortgage loans will be sold without FHA insurance and with servicing released. HUD will offer qualified bidders an opportunity to bid competitively on the mortgage loans. The loans are expected to be offered in five regional pools.

The Bidding Process

The BIP describes in detail the procedure for bidding in HVLS 2017–1. The BIP also includes a standardized non-negotiable Conveyance, Assignment and Assumption Agreement for HVLS 2017–1 (CAA). Qualified bidders will be required to submit a deposit with their bid. Deposits are calculated based upon each qualified bidder's aggregate bid price.

HUD will evaluate the bids submitted and determine the successful bid, in terms of the best value to HUD, in its sole and absolute discretion. If a qualified bidder is successful, the qualified bidder's deposit will be non-refundable and will be applied toward the purchase price. Deposits will be returned to unsuccessful bidders.

This notice provides some of the basic terms of sale. The CAA, which is included in the BIP, provides comprehensive contractual terms and conditions. To ensure a competitive bidding process, the terms of the bidding process and the CAA are not subject to negotiation.

Due Diligence Review

The BIP describes how qualified bidders may access the due diligence materials remotely via a high-speed Internet connection.

Mortgage Loan Sale Policy

HUD reserves the right to remove mortgage loans from HVLS 2017–1 at any time prior to the Award Date. HUD also reserves the right to reject any and all bids, in whole or in part, and include any reverse mortgage loans in a later sale. Deliveries of mortgage loans will occur in conjunction with settlement and servicing transfer, approximately 30 to 45 days after the Award Date.

The HVLS 2017–1 reverse mortgage loans were insured by and were assigned to HUD pursuant to section 255 of the National Housing Act, as amended. The sale of the reverse mortgage loans is pursuant to section 204(g) of the National Housing Act.

Mortgage Loan Sale Procedure

HUD selected an open competitive whole-loan sale as the method to sell the mortgage loans for this specific sale transaction. For HVLS 2017–1, HUD has determined that this method of sale optimizes HUD's return on the sale of these loans, affords the greatest opportunity for all qualified bidders to bid on the mortgage loans, and provides the quickest and most efficient vehicle for HUD to dispose of the mortgage loans.

Bidder Ineligibility

In order to bid in HVLS 2017–1 as a qualified bidder, a prospective bidder must complete, execute and submit both a Confidentiality Agreement and a Qualification Statement acceptable to HUD. In the Qualification Statement, the prospective bidder must provide certain representations and warranties regarding the prospective bidder, including but not limited to (i) the prospective bidder's board of directors, (ii) the prospective bidder's direct parent, (iii) the prospective bidder's subsidiaries, (iv) any related entity with which the prospective bidder shares a common officer, director, subcontractor or sub-contractor who has access to Confidential Information as defined in the Confidentiality Agreement or is involved in the formation of a bid transaction (collectively the ''Related Entities''), and (v) the prospective bidder's repurchase lenders. The prospective bidder is ineligible to bid on any of the reverse mortgage loans included in HVLS 2017–1 if the prospective bidder, its Related Entities or its repurchase lenders, is any of the following, unless other exceptions apply as provided for the in Qualification Statement.

1. An individual or entity that is currently debarred, suspended, or excluded from doing business with

HUD pursuant to the Governmentwide Suspension and Debarment regulations at 2 CFR parts 180 and 2424;

2. An individual or entity that is currently suspended, debarred or otherwise restricted by any department or agency of the federal government or of a state government from doing business with such department or agency;

3. An individual or entity that is currently debarred, suspended, or excluded from doing mortgage related business, including having a business license suspended, surrendered or revoked, by any federal, state or local government agency, division or department;

4. An entity that has had its right to act as a Government National Mortgage Association (''Ginnie Mae'') issuer terminated and its interest in mortgages backing Ginnie Mae mortgage-backed securities extinguished by Ginnie Mae;

5. An individual or entity that is in violation of its neighborhood stabilizing outcome obligations or post-sale reporting requirements under a Conveyance, Assignment and Assumption Agreement executed for any previous mortgage loansale of HUD;

6. An employee of HUD's Office of Housing, a member of such employee's household, or an entity owned or controlled by any such employee or member of such an employee's household with household to be inclusive of the employee's father, mother, stepfather, stepmother, brother, sister, stepbrother, stepsister, son, daughter, stepson, stepdaughter, grandparent, grandson, granddaughter, father-in-law, mother-in-law, brother-in-law, sister-in-law, son-in-law, daughter-in-law, first cousin, the spouse of any of the foregoing, and the employee's spouse;

7. A contractor, subcontractor and/or consultant or advisor (including any agent, employee, partner, director, or principal of any of the foregoing) who performed services for or on behalf of HUD in connection with the sale;

8. An individual or entity that knowingly acquired or will acquire prior to the sale date material non-public information, other than that information which is made available to Bidder by HUD pursuant to the terms of this Qualification Statement, about mortgage loans offered in the sale;

9. An individual or entity that knowingly uses the services, directly or indirectly, of any person or entity ineligible under 1 through 10 to assist in preparing any of its bids on the mortgage loans;

10. An individual or entity which knowingly employs or uses the services of an employee of HUD's Office of Housing (other than in such employee's official capacity); or

The Qualification Statement has additional representations and warranties which the prospective bidder must make, including but not limited to the representation and warranty that the prospective bidder or its Related Entities are not and will not knowingly use the services, directly or indirectly, of any person or entity that is, any of the following (and to the extent that any such individual or entity would prevent the prospective bidder from making the following representations, such individual or entity has been removed from participation in all activities related to this sale and has no ability to influence or control individuals involved in formation of a bid for this sale):

(1) An entity or individual is ineligible to bid on any included reverse mortgage loan or on the pool containing such reverse mortgage loan because it is an entity or individual that:

(a) serviced or held such reverse mortgage loan at any time during the two-year period prior to the bid, or

(b) is any principal of any entity or individual described in the preceding sentence;

(c) any employee or subcontractor of such entity or individual during that two-year period; or

(d) any entity or individual that employs or uses the services of any other entity or individual described in this paragraph in preparing its bid on such reverse mortgage loan.

Freedom of Information Act Requests

HUD reserves the right, in its sole and absolute discretion, to disclose information regarding HVLS 2017–1, including, but not limited to, the identity of any successful qualified bidder and its bid price or bid percentage for any pool of loans or individual loan, upon the closing of the sale of all the Mortgage Loans. Even if HUD elects not to publicly disclose any information relating to SFLS 2017–1, HUD will disclose any information that HUD is obligated to disclose pursuant to the Freedom of Information Act and all regulations promulgated thereunder.

Scope of Notice

This notice applies to HVLS 2017–1 and does not establish HUD's policy for the sale of other mortgage loans.

Dated: November 16, 2016.

Edward L. Golding,

Principal Deputy Assistant Secretary for Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[15XL LLIDB00100 LF1000000.HT0000 LXSS020D0000 241A 4500084766]

Notice of Availability of the Draft Environmental Impact Statement for the Proposed Bruneau-Owyhee Sage-Grouse Habitat Project, Owyhee County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), the Bureau of Land Management (BLM) has prepared a Draft Environmental Impact Statement (Draft EIS) for the proposed Bruneau-Owyhee Sage-Grouse Habitat (BOSH) Project and by this notice is announcing the opening of the comment period.

DATES: To ensure comments will be considered, the BLM must receive written comments on the Bruneau-Owyhee Sage-Grouse Habitat Project Draft EIS within 45 days of this Notice of Availability being published in the **Federal Register**. The BLM will announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases, and mailings.

ADDRESSES: You may submit comments related to the proposed Bruneau-Owyhee Sage-Grouse Habitat Project by any of the following methods:

- Web site: *http://www.blm.gov/id/st/en/prog/nepa_register/BOSH-juniper-removal.html.*
- Email: *blm_id_bruneauowyheesagegrouse@blm.gov.*
- *Fax:* 208–384–3205.
- *Mail:* 3948 S. Development Ave., Boise, ID 83705.

Please title your correspondence, ''BOSH Project'' and include ''Attn: Mike McGee.'' Electronic copies of the proposed Bruneau-Owyhee Sage-Grouse Habitat Project Draft EIS are available at the BLM Boise District Office at the above address; you may also view or download the Draft EIS at the Web site listed above.

FOR FURTHER INFORMATION CONTACT: Mike McGee, Project Lead/Wildlife Biologist, 3948 S. Development Ave., Boise, ID 83705; via email at *blm_id_bruneauowyheesagegrouse@blm.gov;* or phone (208) 384–3464. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact Mr. McGee. The Service

is available 24 hours a day, 7 days a week, to leave a message or question with Mr. McGee. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Loss of suitable sage-grouse habitat from conversion of sagebrush steppe to juniper woodlands is a major threat to Greater Sage-Grouse (*Centrocercus urophasianus*) in southwest Idaho. The BLM, in collaboration with other Federal and State agencies and local groups, is proposing to remove encroaching juniper in areas that would provide the greatest benefit to existing sage-grouse habitat and improve the long-term viability and persistence of sage-grouse in the BOSH project area. The purpose of the project is to restore, improve, and maintain Greater Sage-Grouse habitat at a landscape scale that is being and/or has been degraded by the encroachment of western juniper (*Juniperus occidentalis*) into sagebrush communities.

The proposed BOSH project boundary encompasses approximately 1.5 million acres in the BLM Owyhee and Bruneau Field Office management areas in Owyhee County, Idaho. Within the proposed project area, an approximately 600,000-acre focal treatment area has been identified based on modeling and treatment criteria. The preferred alternative is to remove all juniper within 3 kilometers of occupied sage-grouse leks (breeding habitat areas where male sage-grouse gather each spring to perform courtship displays to attract and mate with females), all juniper in the early phases of encroachment (greater than 20 percent canopy cover), as well as 5-acre or smaller patches of later phases of juniper encroachment (less than 20 percent canopy cover) in riparian areas deemed important for sage-grouse in the focal treatment area. Old growth juniper trees, as identified in the Draft EIS, will not be removed during these treatments.

Proposed treatment methods include cutting juniper with handsaws or chainsaws, lopping with pruning shears, or using heavy equipment such as a track-hoe fitted with a grinding implement (masticator) or a shearing implement (large, powerful pruning shears). Juniper material (logs, branches, etc.) may be scattered on site and left, or the material may be jackpot-burned or piled and burned where scattering cut material is not feasible or desirable (*e.g.,* where there would be too much material to scatter, or in riparian areas).

The focal treatment area includes approximately 47,000 acres of designated wilderness where only non-motorized hand tools would be used to cut juniper, which must be less than or equal to eight inches diameter at breast height, and access to treatment areas would be permitted on foot only. Juniper treatment in wilderness is included in the preferred alternative because 92 percent of the wilderness area (43,000 acres) is identified as a Priority Habitat Management Area for sage-grouse, and the remaining 8 percent (4,000 acres) is considered a General Habitat Management Area. Habitat management areas are delineated in the Record of Decision for the 2015 Greater Sage-Grouse Approved Resource Management Plan Amendments for Idaho and Southwest Montana. The BLM used the Minimum Requirements Decision Guide (MRDG) to ensure that juniper treatments in wilderness areas would produce the least disturbance possible (*e.g.,* hand saws only, no vehicle travel off designated roads, foot traffic only, etc.).

The other alternatives analyzed in the draft EIS include the No Action alternative (*i.e.,* present management would continue as usual and the project would not be implemented in any form) and an action alternative to treat juniper on approximately 553,000 acres within the project area boundary that excludes wilderness (*i.e.,* juniper in the 47, 000 acres of designated wilderness would remain untreated).

Internal meetings and meetings with collaborators to discuss and develop the project proposal began in 2013. A 30-day public scoping period was held from January 20 to February 20, 2015 to aid the BLM in project development. The scoping period included public meetings held at the Boise District Office on February 4, 2015 and at the Owyhee County Historical Museum on February 5, 2015. Important issues identified during internal and public scoping and addressed in the document include effects to the following: wildlife habitat (especially sage-grouse and migratory birds), native plant communities, riparian areas and vegetation, soils, visual resources, spread of noxious weeds and invasive plants, wilderness values, recreation values, cultural resources, and social values.

Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Lara Douglas,

BLM Boise District Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2016–0003]; [MAA104000]

Notice of Availability of the 2017–2022 Outer Continental Shelf Oil and Gas Leasing Proposed Final Program

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Ocean Energy Management (BOEM) is announcing the availability of the 2017–2022 Outer Continental Shelf (OCS) Oil and Gas Leasing Proposed Final Program (''Proposed Final Program'' or ''PFP''). This proposal is the last of three proposals for the 2017–2022 OCS Oil and Gas Leasing Program that will succeed the current, 2012–2017 Program. The PFP provides information and analyses to inform the Secretary of the Interior's (Secretary) decision on the size, timing, and location of leasing in the 2017–2022 Program. Section 18 of the OCS Lands Act (43 U.S.C. 1344) specifies a multi-step process of consultation and analysis that must be completed before the Secretary may approve a new OCS Oil and Gas Leasing Program, commonly known as the Five-Year Program. The required steps following this notice include a minimum 60-day period after the submission of the PFP to the President and Congress before the Secretary may approve the 2017–2022 Program. Concurrently with this notice, and pursuant to the National Environmental Policy Act (NEPA), BOEM is publishing a Notice of Availability (NOA) of the Final Programmatic Environmental Impact Statement (PEIS) for the 2017–2022 Program.

FOR FURTHER INFORMATION CONTACT: Ms. Kelly Hammerle, Five-Year Program Manager, at (703) 787–1613 or *Kelly.hammerle@boem.gov.*

SUPPLEMENTARY INFORMATION:

Background

Section 18 of the OCS Lands Act requires the Secretary to prepare and maintain a schedule of proposed OCS oil and gas lease sales determined to ''best meet national energy needs for the five-year period following its approval or reapproval.'' This PFP is the last of three proposed leasing schedules for OCS lease sales under the 2017–2022 Program. The first proposal, the Draft Proposed Program (DPP), was published on January 29, 2015, and was followed by a 60-day comment period that ended on March 30, 2015. The second proposal, the Proposed Program, was published on March 18, 2016, with a 90-day comment period that closed on June 16, 2016.

The areas identified in the PFP were chosen after careful consideration of the factors specified in Section 18 of the OCS Lands Act and the comments received during the Program development process. Included in this PFP is an analysis of the lease sale options identified by the Secretary in the Proposed Program. The development of the Five-Year Program is a winnowing process; thus, only those areas that the Secretary decided were appropriate to include in the Proposed Program are analyzed in the PFP and the associated Final PEIS. The PFP and Final PEIS will be submitted to the President and Congress at least 60 days prior to Secretarial approval of the 2017–2022 Program.

Summary of the Proposed Final Program

As part of the Administration's energy strategy, the PFP is designed to best meet the nation's energy needs. It takes into account the Section 18 requirement to balance the potential for discovery of offshore oil and gas resources with the potential for environmental damage and the potential for adverse impact on the coastal zone. In weighing the Section 18 factors to develop a nationwide program, region-specific considerations were taken into account, including information about resource potential, the status of resource development and infrastructure to support oil and gas activities and emergency response capabilities, industry interest, and the regional interests and policies of affected states. Through the Five-Year Program winnowing process, the Secretary gathers information to determine the timing of lease sales and the combination of offshore areas that will, if leased, best meet the energy needs of the nation while protecting against environmental damage and adverse impact to the coastal zone.

Grounded in the above principles, and after careful consideration of public input and the OCS Lands Act Section 18(a)(2) factors, the PFP contains a proposed lease sale schedule of 11 lease sales, 10 in those portions of three OCS planning areas in the Gulf of Mexico that are not subject to moratorium, and one in the Cook Inlet offshore Alaska. These areas have high resource potential, existing Federal or state leases and infrastructure, and more manageable potential environmental and coastal conflicts from development as compared to other OCS areas that are not included in the 2017–2022 Program. In total, the PFP makes available approximately 70 percent of the resources that are economically recoverable at an oil price of $40 per barrel, and nearly one half of the estimated undiscovered technically recoverable OCS oil and gas resources.

TABLE 1—2017–2022 PROPOSED FINAL PROGRAM LEASE SALE SCHEDULE

Year	Planning area	Sale No.
1. 2017	Gulf of Mexico	249
2. 2018	Gulf of Mexico	250
3. 2018	Gulf of Mexico	251
4. 2019	Gulf of Mexico	252
5. 2019	Gulf of Mexico	253
6. 2020	Gulf of Mexico	254
7. 2020	Gulf of Mexico	256
8. 2021	Gulf of Mexico	257
9. 2021	Cook Inlet	258
10. 2021	Gulf of Mexico	259
11. 2022	Gulf of Mexico	261

Gulf of Mexico Region

The Gulf of Mexico combines abundant proven and estimated oil and gas resources, broad industry interest, and well-developed infrastructure. The oil and gas resource potential of the Western and Central Gulf of Mexico, as well as the portion of the Eastern Gulf of Mexico that is not subject to Congressional moratorium, is the best understood of all of the OCS planning areas. Not only are the oil and gas resource volume estimates for the Gulf of Mexico OCS unparalleled, the existing infrastructure to support development is mature for and able to support oil and gas activity and response capabilities in the event of an emergency.

Of the 11 lease sales included in the PFP, 10 are in the Gulf of Mexico (see Figure 1), where infrastructure is well established, and there is strong adjacent state support and significant oil and gas resource potential. The Gulf of Mexico proposal includes region-wide sales: One sale in 2017 and 2022, and two sales in 2018, 2019, 2020, and 2021.

Alaska Region

In Alaska, the PFP includes a Cook Inlet lease sale in 2021 that comprises the northern portion of the Cook Inlet Planning Area (see Figure 2). Cook Inlet is a mature basin with a long history of oil and gas development in State waters, where existing infrastructure is capable of supporting new activity. The design of this lease sale area allows for the protection of the endangered beluga whale, and for the protection of northern sea otter critical habitat, and makes available those areas with the greatest industry interest and significant oil and gas resource potential. BOEM will continue to use developing scientific information and stakeholder feedback to determine, in advance of any sale, which specific areas offer the greatest resource potential, while minimizing conflicts with environmental, subsistence, and multiple use considerations in Cook Inlet.

The DPP and Proposed Program included one sale each in the Chukchi Sea and Beaufort Sea Planning Areas. After considering all available information and analyses, the Secretary removed the Chukchi Sea and Beaufort Sea Program Areas from the PFP. The Secretary's decision to remove the Beaufort Sea and Chukchi Sea Program Areas was based on a consideration of the Section 18(a)(2) factors, which include regional geographical, geological and ecological characteristics of the region; equitable sharing of developmental benefits and environmental risks among regions; environmental and predictive information; industry interest; regional and national energy markets; state goals and policy; environmental sensitivity; and other uses of the various planning areas.

While there are significant hydrocarbon resources in the Arctic, the region is a unique, sensitive, and costly environment in which to operate. Unlike the Cook Inlet, the Arctic OCS is remote, and would require substantially more new investment for large-scale OCS development. Industry voiced its interest in the Arctic OCS in the comment period on the Proposed Program. However, foreshadowed by Shell's disappointing 2015 drilling season and subsequent announcement that it would leave the U.S. Arctic for the foreseeable future, industry has demonstrated its declining interest in the Arctic OCS with the relinquishment of the majority of leases in these two

Planning Areas. In fact, the number of active leases in the Arctic OCS has declined by more than 90 percent in a matter of months, from 527 in February 2016 to only 43 as of October 2016, with most of these expected to expire in 2017.

While the Arctic OCS has the potential to provide domestic energy production when economic conditions are considerably more favorable, the increase in domestic onshore production from shale formations and other market factors have shifted expectations regarding oil and gas price trajectories and have substantially reduced the economic incentives for Arctic exploration and production. As described in Chapter 6 of the PFP, recent developments in domestic oil and natural gas markets have reduced the United States' reliance on imported petroleum. With the existing U.S. onshore crude production increasing in every year since 2008, and substantial Gulf of Mexico offshore production continuing, U.S. domestic energy supply remains strong. While new production can be beneficial, the Arctic lease sales are not necessary to have a 2017–2022 Program that best meets the energy needs of the nation. BOEM estimates that without the Arctic OCS lease sales, cumulative U.S. oil and gas production will be less than one percent lower over the 70-year life of projected activity, and only four percent lower during the years of peak production. The Nation's energy security remains strong without leasing in the Arctic, and the oil and gas resources in the Arctic will likely become more valuable to potential bidders at some point in the future.

Atlantic Region

As in the Proposed Program, no lease sales are included in the Atlantic Region in the lease sale schedule for 2017–2022.

Pacific Region

As in the DPP and Proposed Program, no lease sales are included in the Pacific Region in the lease sale schedule for 2017–2022.

Assurance of Fair Market Value

Section 18 of the OCS Lands Act requires receipt of fair market value from OCS oil and gas leases. BOEM plans to continue to use the two-phase post-sale bid evaluation process that it has used since 1983 to meet the fair market value requirement. BOEM recently revised its post-sale bid evaluation process (see Summary of Procedures for Determining Bid Adequacy at Offshore Oil and Gas Lease Sales: Effective March 2016 at *http://www.boem.gov/Summary-of-Procedures-For-Determining-Bid-Adequacy/*). Further, the PFP provides that BOEM may set minimum bid levels, rental rates, and royalty rates for each individual lease sale, based on BOEM's assessment of market and resource conditions closer to the date of the lease sale.

Next Steps in the Process

BOEM will submit the PFP and Final PEIS to the President and Congress at least 60 days prior to Secretarial approval of the 2017–2022 Program.

Dated: November 16, 2016.

Abigail R. Hopper,

Director, Bureau of Ocean Energy Management.

UNITED STATES INTERNATIONAL TRADE COMMISSION

[USITC SE–16–039]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: December 2, 2016 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205–2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: none.
2. Minutes.
3. Ratification List.
4. Vote in Inv. Nos. 701–TA–249 and 731–TA–262, 263, and 265 (Fourth Review)(Iron Construction Castings from Brazil, Canada, and China). The Commission is currently scheduled to complete and file its determinations and views of the Commission on December 15, 2016.
5. Outstanding action jackets: none.

In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: November 17, 2016.

JUDICIAL CONFERENCE OF THE UNITED STATES

Hearing of the Judicial Conference Advisory Committee on Rules of Civil Procedure, Federal Register Citation of Previous Announcement: 81FR 52713

AGENCY: Judicial Conference of the United States Advisory Committee on Rules of Civil Procedure.

ACTION: Revised notice of proposed amendments and open hearings.

SUMMARY: The Advisory Committee on Rules of Civil Procedure has proposed amendments to the following rules: Civil Rules 5, 23, 62, and 65.1. Three public hearings were scheduled on these proposed amendments. An in-person hearing was held on November 3, 2016, in Washington, DC Two additional public hearings are scheduled. There will be an in-person hearing in Phoenix, Arizona, on January 4, 2017, and a telephonic hearing on February 16, 2017. Those wishing to testify in person on January 4, 2017 or telephonically on February 16, 2017, must contact the Secretary by email at: *Rules_Support@ao.uscourts.gov,* with a copy mailed to the address below at least 30 days before the hearing.

Please note: The public hearing on the amendments to the Civil Rules previously scheduled in Dallas/Fort Worth, Texas, for February 16, 2017, will be held via telephone conference.

The text of the proposed rules and the accompanying Committee Notes are posted on the Judiciary's Web site at: *http://www.uscourts.gov/rules-policies/proposed-amendments-published-public-comment.* As previously announced, the public comment period with respect to the proposed amendments opened on August 15, 2016, and written comments or suggestions must be received no later than February 15, 2017. Written comments must be submitted electronically, following the instructions provided on the Web site. All comments submitted will be available for public inspection.

FOR FURTHER INFORMATION CONTACT: Rebecca A. Womeldorf, Secretary, Committee on Rules of Practice and Procedure of the Judicial Conference of the United States, Thurgood Marshall Federal Judiciary Building, One Columbus Circle NE., Suite 7–240, Washington, DC 20544, Telephone (202) 502–1820.

Dated: November 16, 2016.

Rebecca A. Womeldorf,

Secretary, Committee on Rules of Practice and Procedure, Judicial Conference of the United States.

BILLING CODE 2210–55–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On November 10, 2016, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of New Jersey in the lawsuit entitled *United States* v. *Shieldalloy Metallurgical Corporation,* Civil Action No. 16-cv-8418.

The United States has filed a Complaint brought on behalf of the United States Environmental Protection Agency (''EPA'') against Shieldalloy Metallurgical Corporation (''SMC'') seeking performance of Operable Units 1 and 2 (''OU1 and OU2'') of the remedial action and past and future response costs at the Shieldalloy Metallurgical Corporation Superfund Site (''Site'') in Gloucester and Cumberland Counties, New Jersey. The consent decree resolving the claims requires SMC to perform the OU1 and OU2 remedies at the Site. EPA estimates the value of the work to be performed pursuant to the Consent Decree at about $5,635,000. In addition, EPA will receive $505,000 in reimbursement of its past costs and a commitment by SMC to pay future response costs at the Site relating to the work to be performed.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Shieldalloy Metallurgical Corporation,* D.J. Ref. No. 90–11–3–11285. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the consent decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $94.00 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the appendices, the cost is $11.25.

Robert E. Maher Jr.,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

[OMB Number 1121–0220]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension Without Change, of a Previously Approved Collection; Bureau of Justice Assistance Application Form: Public Safety Officers Educational Assistance

AGENCY: Bureau of Justice Assistance, Department of Justice.

ACTION: 60-day notice.

SUMMARY: The Department of Justice, Office of Justice Programs, Bureau of Justice Assistance, will submit the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 23, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Michelle Martin, Senior Management Analyst, Bureau of Justice Assistance, 810 Seventh Street NW., Washington, DC 20531 (phone: 202 514–9354).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Assistance, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

1 *Type of Information Collection:* Extension of a currently approved collection.

2 *The Title of the Form/Collection:* Public Safety Officers Educational Assistance.

3 *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* None. The applicable component within the Department of Justice is the Bureau of Justice Assistance, in the Office of Justice Programs.

4 *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Dependents of public safety officers who were killed or permanently and totally disabled in the line of duty.

Abstract: BJA's Public Safety Officers' Benefits (PSOB) division will use the PSOEA Application information to confirm the eligibility of applicants to receive PSOEA benefits. Eligibility is dependent on several factors, including the applicant having received or being eligible to receive a portion of the PSOB Death Benefit, or having a family member who received the PSOB Disability Benefit. Also considered are the applicant's age and the schools being attended. In addition, information to help BJA identify an individual is collected, such as contact numbers and email addresses.

5 *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that no more than 200 respondents will apply a year. Each application takes approximately 30 minutes to complete.

6 *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 100 hours. It is estimated that respondents will take 30 minutes to complete an application. The burden hours for collecting respondent data sum to 100 hours (200 respondents × 0.5 hours = 100 hours).

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E–405B, Washington, D.C 20530 or Hope D. Janke, Director, Public Safety Officers' Benefits Office, Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice, 810 7th Street NW., Washington, DC 20531.

Dated: November 17, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF JUSTICE

Notice Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On November 16, 2016, the Department of Justice lodged a proposed consent decree with the United States District Court for the Northern District of Illinois in the lawsuit entitled *United States and State of Illinois* v. *North Shore Gas Co.,* Civil Action No. 16–10672.

The proposed consent decree resolves claims by the United States and the State of Illinois in the associated complaint under the Comprehensive Environmental Response, Compensation, and Liability Act against North Shore Gas Company (''NSG'') for response actions and future response costs relating to the NSG South Plant Manufactured Gas Plant Superfund Alternative Site in Waukegan, Lake County, Illinois (''the Site''). Under the proposed consent decree, NSG agrees to perform the remedial actions, estimated to cost $10.5 million, selected by EPA and to pay future response costs incurred by the United States and the State of Illinois. The proposed consent decree includes a covenant not to sue NSG conditioned upon the satisfactory performance by NSG of its obligations under the proposed consent decree.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and State of Illinois* v. *North Shore Gas Co.,* D.J. Ref. No. 90–11–3–11472. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	*pubcomment-ees.enrd@usdoj.gov.*

To submit comments:	Send them to:
By mail	Assistant Attorney General U.S. DOJ—ENRD P.O. Box 7611 Washington, D.C. 20044–7611.

During the public comment period, the consent decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $44.25 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is $9.25.

Randall M. Stone,

Acting Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Decisions on States' Applications for Relief From Tax Credit Reductions Provided Under Section 3302 of the Federal Unemployment Tax Act (FUTA) Applicable in 2016

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: Sections 3302(c)(2)(A) and 3302(d)(3) of the FUTA provide that employers in a State that has an outstanding balance of advances under Title XII of the Social Security Act at the beginning of January 1 of two or more consecutive years are subject to a reduction in credits otherwise available against the FUTA tax for the calendar year in which the most recent such January 1 occurs, if a balance of advances remains at the beginning of November 10 of that year. Further, section 3302(c)(2)(C) of FUTA provides for an additional credit reduction for a year if a State has outstanding advances on five or more consecutive January firsts and has a balance at the beginning of November 10 for such years. Section 3302(c)(2)(C) also provides for waiver of this additional credit reduction and substitution of the credit reduction provided in section 3302(c)(2)(B) if a state meets certain conditions.

California, Connecticut, Ohio, and the Virgin Islands passed January 1, 2016 with outstanding Title XII advances and were potentially subject to FUTA credit reductions.

California, Ohio, and the Virgin Islands applied for a waiver of the 2016 additional credit reduction under section 3302 (c)(2)(C) of FUTA and it has been determined that each one met all of the criteria of that section necessary to qualify for the waiver of the additional credit reduction. Further, the additional credit reduction of section 3302(c)(2)(B) is zero for these States for 2016. Therefore, employers in these States will have no additional credit reduction applied for calendar year 2016.

Connecticut and Ohio repaid all of their outstanding advance balances before the beginning of November 10, 2016. Therefore, employers in those States will have no reduction in FUTA offset credit for calendar year 2016.

California and the Virgin Islands will have a credit reduction of 1.8 for calendar year 2016.

Portia Wu,

Assistant Secretary for Employment and Training.

BILLING CODE 4510–FW–P

DEPARTMENT OF LABOR

Comment Request; State Exchange on Employment and Disability (SEED) Initiative Implementation Evaluation Survey

AGENCY: Office of the Assistant Secretary for Policy, Chief Evaluation Office, Department of Labor.

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents is properly assessed. Currently, the Department of Labor is soliciting comments concerning the collection of data about the State Exchange on Employment and Disability (SEED) Initiative Implementation Evaluation Survey. A copy of the proposed Information Collection Request (ICR) can be obtained by contacting the office listed in the addressee section of this notice.

DATES: The OMB will consider all written comments that the agency receives on or before January 23, 2017.

ADDRESSES: You may submit comments by either one of the following methods:

Email: ChiefEvaluationOffice@dol.gov; Mail or Courier: Cherise Hunter, Office of Disability Employment Policy, U.S. Department of Labor, 200 Constitution Avenue NW., Room S–1303, Washington, DC 20210.

Instructions: Please submit one copy of your comments by only one method. All submissions received must include the agency name and OMB Control Number identified above for this information collection. Because we continue to experience delays in receiving mail in the Washington, DC area, commenters are strongly encouraged to transmit their comments electronically via email or to submit them by mail early. Comments, including any personal information provided, become a matter of public record. They will also be summarized and/or included in the request for OMB approval of the information collection request.

FOR FURTHER INFORMATION CONTACT: Contact Cherise Hunter by email at *chiefevaluationoffice@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Background.

The proposed information collection activities described in this notice will provide data for the State Exchange on Employment and Disabilities (SEED) Evaluation. In the fall of 2015, The Office of Disability Employment (ODEP) launched the SEED initiative. The SEED initiative is designed to advance policy at the state and local levels that promote employment opportunities for people with disabilities through collaborative engagement of intermediary organizations that serve as value added interfaces between and among various levels of government and entities with overlapping interests. A formative evaluation of SEED has been undertaken to provide feedback and information to the SEED implementation team to make the initiative as efficient and effective as possible. This **Federal Register** Notice provides the opportunity to comment on one proposed data collection instrument

that will be used in the SEED evaluation:

(1) SEED Implementation Evaluation Survey. This survey will be distributed to a sample of State legislators and their staff who are members of intermediary organizations participating in the SEED initiative. It will identify barriers and needs to inform the SEED implementation team on what SEED could do to assist states interested in adopting disability employment policies. It will also provide feedback from State legislators and staff regarding their perceptions of SEED activities and resources to date as well as identify where State legislators are currently getting their information about disability employment policy issues to improve outreach.

II. Review Focus

Currently, DOL is soliciting comments concerning the above data collection for the evaluation of SEED. DOL is particularly interested in comments that do the following:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

III. Current Action

At this time, DOL is requesting clearance for the SEED Implementation Evaluation Survey.

Type of Review: New Information Collection.

OMB Control Number: 1290–0NEW.

Title: State Exchange on Employment and Disability (SEED) Initiative Implementation Evaluation Survey.

ESTIMATED TOTAL BURDEN HOURS—SEED IMPLEMENTATION EVALUATION SURVEY

Respondents	Number of espondents	Number of esponses per respondent	Total esponses	Estimated time per response (hours)	Estimated total burden (hours)
State legislators and staff who are members of organizations participating in the SEED initiative	1,039	1	1,039	.22	228.58

Affected Public: A sample of State legislators and their staff who are members of intermediary organizations participating in the SEED initiative.

Annual Frequency: One time for the SEED initiative evaluation survey.

Comments submitted in response to this comment request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 15, 2016.

Sharon Block,

Principal Deputy Assistant Secretary for Policy, U.S. Department of Labor.

BILLING CODE 4510–HX–P

DEPARTMENT OF LABOR

Wage and Hour Division

Proposed Extension of the Information Collection Disclosure to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act

AGENCY: Wage and Hour Division, Department of Labor.

ACTION: Notice and request for comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). 44 U.S.C. 3056(c)(2)(A). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Wage and Hour Division is soliciting comments concerning its proposal to extend Office of Management and Budget (OMB) approval of the Information Collection: Disclosures to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act. A copy of the proposed information request can be obtained by contacting the office listed below in the **FOR FURTHER INFORMATION CONTACT** section of this Notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before January 23, 2017.

ADDRESSES: You may submit comments identified by Control Number 1235–0002, by either one of the following methods: *Email: WHDPRAComments@dol.gov; Mail, Hand Delivery, Courier:* Division of Regulations, Legislation, and Interpretation, Wage and Hour, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue NW., Washington, DC 20210. *Instructions:* Please submit one copy of your comments by only one method. All submissions received must include the agency name and Control Number identified above for this information collection. Because we continue to experience delays in receiving mail in the Washington, DC area, commenters are strongly encouraged to transmit their comments electronically via email or to submit them by mail early. Comments, including any personal information provided, become a matter of public record. They will also be summarized and/or included in the request for OMB approval of the information collection request.

FOR FURTHER INFORMATION CONTACT: Melissa Smith, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue NW., Washington, DC 20210; telephone: (202) 693–0406 (this is not a toll-free number). Copies of this notice may be obtained in alternative formats (Large Print, Braille, Audio Tape, or Disc), upon request, by calling (202) 693–0023 (not a toll-free number). TTY/TTD callers may dial toll-free (877) 889–5627 to obtain information or request materials in alternative formats.

SUPPLEMENTARY INFORMATION:

I. Background: The Migrant and Seasonal Agricultural Worker Protection Act (MSPA) safeguards migrant and seasonal agricultural workers in their interactions with Farm Labor Contractors, Agricultural Employers and Agricultural Associations, and providers of migrant farm worker housing. *See* Public Law 97–470. The MSPA requires Farm Labor Contractors, Agricultural Employers, and Agricultural Associations, who recruit, solicit, hire, employ, furnish, transport, or house agricultural workers, as well as providers of migrant housing, to meet certain minimum requirements in their dealings with migrant and seasonal agricultural workers. Various sections of the MSPA require respondents (*e.g.,* Farm Labor Contractors, Agricultural Employers, and Agricultural Associations to disclose terms and conditions in writing to their workers. MSPA sections 201(g) and 301(f) requires that the DOL make forms available to provide such information. The DOL prints and makes optional-use form WH–516, Worker Information—Terms and Conditions of Employment.

MSPA sections 201(d) and 301(c)—29 U.S.C. 1821(d), 1831(c) and regulations 29 CFR 500.80(a), require each Farm Labor Contractor, Agricultural Employer, and Agricultural Association that employs a migrant or seasonal worker to make, keep, and preserve records for three years for each such worker concerning the: (1) Basis on which wages are paid; (2) number of piece work units earned, if paid on a piece work basis; (3) number of hours worked; (4) total pay period earnings; (5) specific sums withheld and the purpose of each sum withheld; (6) net pay. Respondents are also required to provide an itemized written statement of this information to each migrant and seasonal agricultural worker each pay period. *See* 29 U.S.C. 1821(d), 1831(c), and 29 CFR 500.1-.80(d). Additionally, MSPA sections 201(e) and 301(d) require each Farm Labor Contractor provide copies of all the records noted above for the migrant and seasonal agricultural workers the contractor has furnished to other Farm Labor Contractors, Agricultural Employers, or Agricultural Associations who use the workers. Respondents must also make and keep certain records. Section 201(c) of the MSPA requires all Farm Labor Contractors, Agricultural Employers, and Agricultural Associations providing housing to a migrant agricultural worker to post in a conspicuous place at the site of the housing, or present to the migrant worker, a written statement of any housing occupancy terms and conditions. *See* 29 U.S.C. 1821(c); 29 CFR 500.75. In addition, MSPA section 201(g) requires them to provide such information in English, or as necessary and reasonable, in a language common to the workers. *See* 29 U.S.C. 1821(g). The provision also requires DOL make the optional forms available to provide the required disclosures. *See* 29 U.S.C. 1821(g); 29 CFR 500.1(i)(2).

II. Review Focus: The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Enhance the quality, utility, and clarity of the information to be collected;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

III. Current Actions: The Department of Labor seeks an approval for the extension of this information collection in order to ensure effective administration of various special employment programs.

Type of Review: Extension.

Agency: Wage and Hour Division.

Title: Disclosure to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act.

OMB Number: 1235–0002.

Affected Public: Business or other for-profit, Not-for-profit institutions, Farms.

Agency Numbers: Forms WH–501 (English and Spanish versions), WH–516 (English, Spanish and Haitian Creole versions), and WH–521.

Total Respondents: 105,587.

Total Annual Responses: 82,418,590.

Estimated Total Burden Hours: 1,387,565.

Estimated Time per Response: Various.

Frequency: On occasion.

Total Burden Cost (capital/startup/operation/maintenance): $3,296,743.60.

Dated: November 16, 2016.

Melissa Smith,

Director, Division of Regulations, Legislation, and Interpretation.

[FR Doc. 2016–28265 Filed 11–22–16; 8:45 am]

BILLING CODE 4510–27–P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs.

Advisory Board on Toxic Substances and Worker Health: Subcommittee on Medical Advice re: Weighing Medical Evidence

AGENCY: Office of Workers' Compensation Programs.

ACTION: Announcement of meeting of the Subcommittee on Medical Advice re: Weighing Medical Evidence of the Advisory Board on Toxic Substances and Worker Health (Advisory Board) for the Energy Employees Occupational Illness Compensation Program Act (EEOICPA).

SUMMARY: The subcommittee will meet via teleconference on December 12, 2016, from 1:00 p.m. to 3:00 p.m. Eastern Time.

FOR FURTHER INFORMATION CONTACT: For press inquiries: Ms. Amanda McClure, Office of Public Affairs, U.S. Department of Labor, Room S–1028, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–4672; email *mcclure.amanda.c@dol.gov.*

SUPPLEMENTARY INFORMATION: The Advisory Board is mandated by Section 3687 of EEOICPA. The Secretary of Labor established the Board under this authority and Executive Order 13699 (June 26, 2015). The purpose of the Advisory Board is to advise the Secretary with respect to: (1) The Site Exposure Matrices (SEM) of the Department of Labor; (2) medical guidance for claims examiners for claims with the EEOICPA program, with respect to the weighing of the medical evidence of claimants; (3) evidentiary requirements for claims under Part B of EEOICPA related to lung disease; and (4) the work of industrial hygienists and staff physicians and consulting physicians of the Department of Labor and reports of such hygienists and physicians to ensure quality, objectivity, and consistency. The Advisory Board sunsets on December 19, 2019. This subcommittee is being assembled to gather and analyze data and continue working on advice under Area #2, Medical Advice re: Weighing Medical Evidence.

The Advisory Board operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2) and its implementing regulations (41 CFR part 102–3).

Agenda: The tentative agenda for the Subcommittee on Medical Advice re: Weighing Medical Evidence meeting includes: review of claims filed under

Part E of the EEOICPA; review of available training materials; discuss format of working group meeting with claims examiners.

OWCP transcribes Advisory Board subcommittee meetings. OWCP posts the transcripts on the Advisory Board Web page, *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm,* along with written comments and other materials submitted to the subcommittee or presented at subcommittee meetings.

Public Participation, Submissions, and Access to the Public Record

Subcommittee meeting: The subcommittee will meet via teleconference on Monday, December 12, 2016, from 1:00 p.m. to 3:00 p.m. Eastern Time. Advisory Board subcommittee meetings are open to the public. The teleconference number and other details for listening to the meeting will be posted on the Advisory Board's Web site no later than 72 hours prior to the meeting. This information will be posted at *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm.*

Requests for special accommodations: Please submit requests for special accommodations to participate in the subcommittee meeting by email, telephone, or hard copy to Ms. Carrie Rhoads, OWCP, Room S–3524, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 343–5580; email *EnergyAdvisoryBoard@dol.gov.*

Submission of written comments for the record: You may submit written comments, identified by the subcommittee name and the meeting date of December 12, 2016, by any of the following methods:

- *Electronically:* Send to: *EnergyAdvisoryBoard@dol.gov* (specify in the email subject line, ''Subcommittee on Medical Advice re: Weighing Medical Evidence'').
- *Mail, express delivery, hand delivery, messenger, or courier service:* Submit one copy to the following address: U.S. Department of Labor, Office of Workers' Compensation Programs, Advisory Board on Toxic Substances and Worker Health, Room S–3522, 200 Constitution Ave. NW., Washington, DC 20210. Due to security-related procedures, receipt of submissions by regular mail may experience significant delays.

Comments must be received by December 5, 2016. OWCP will make available publically, without change, any written comments, including any personal information that you provide. Therefore, OWCP cautions interested parties against submitting personal information such as Social Security numbers and birthdates.

Electronic copies of this **Federal Register** notice are available at *http://www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available on the Advisory Board's Web page at *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm.*

FOR FURTHER INFORMATION CONTACT: You may contact Antonio Rios, Designated Federal Officer, at *rios.antonio@dol.gov,* or Carrie Rhoads, Alternate Designated Federal Officer, at *rhoads.carrie@dol.gov,* U.S. Department of Labor, 200 Constitution Avenue NW., Suite S–3524, Washington, DC 20210, telephone (202) 343–5580.

This is not a toll-free number.

Signed at Washington, DC.

Leonard J. Howie III,

Director, Office of Workers' Compensation Programs.

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Division of Longshore and Harbor Workers' Compensation Proposed Extension of Existing Collection; Comment Request

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506 (c)(2)(A)] This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Workers' Compensation (OWCP) is soliciting comments concerning the proposed collection: Application for Continuation of Death Benefit for Student (LS–266). A copy of the proposed information collection request can be obtained by contacting the office listed below in the address section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before January 23, 2017.

ADDRESSES: Ms. Yoon Ferguson, U.S. Department of Labor, 200 Constitution Ave. NW., Room S–3323, Washington, DC 20210, telephone/fax (202) 354–9647, Email *ferguson.yoon@dol.gov.* Please use only one method of transmission for comments (mail, fax, or Email).

SUPPLEMENTARY INFORMATION:

I. Background: The Office of Workers' Compensation Programs, (OWCP) administers the Longshore and Harbor Workers' Compensation Act. This Act was amended on October 27, 1972, to provide for continuation of death benefits for a child or certain other surviving dependents after the age of 18 years (to age 23) if the dependent qualifies as a student as defined in section 2(18) of the Act. The benefit would also be terminated if the dependent completes four years of education beyond high school. Form LS–266 is to be submitted by the parent or guardian for whom continuation of benefits is sought. The statements contained on the form must be verified by an official of the education institution. The information is used by the DOL to determine whether a continuation of the benefits is justified. This information collection is currently approved for use through March 31, 2017.

II. Review Focus: The Department of Labor is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

* evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

* enhance the quality, utility and clarity of the information to be collected; and

* minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

III. Current Actions: The Department of Labor seeks the extension of approval

of this information collection in order to ensure that employers are complying with the reporting requirements of the Act and to ensure that injured claimants receive all compensation benefits to which they are entitled.

Agency: Office of Workers' Compensation Programs.

Type of Review: Extension.

Title: Application for Continuation of Death Benefit for Student.

OMB Number: 1240–0026.

Agency Number: LS–266.

Affected Public: Individuals or households; Business or other for-profit.

Total Respondents: 20.

Total Annual Responses: 20.

Estimated Total Burden Hours: 10.

Estimated Time per Response: 30 minutes.

Frequency: On occasion.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $10.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 17, 2016.

Yoon Ferguson,

Agency Clearance Officer, Office of Workers' Compensation Programs, US Department of Labor.

BILLING CODE 4510–CF–P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Division of Longshore and Harbor Workers' Compensation Proposed Extension of Existing Collection; Comment Request

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Notice

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)] This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Workers' Compensation (OWCP) is soliciting comments concerning the proposed collection: Employer's First Report of Injury or Occupational Disease (LS–202) and Employer's Supplementary Report of Accident or Occupational Illness (LS–210). A copy of the proposed information collection request can be obtained by contacting the office listed below in the address section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before January 23, 2017.

ADDRESSES: Ms. Yoon Ferguson, U.S. Department of Labor, 200 Constitution Ave. NW., Room S–3323, Washington, DC 20210, telephone/fax (202) 354–9647, Email *ferguson.yoon@dol.gov.* Please use only one method of transmission for comments (mail, fax, or Email).

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Workers' Compensation Programs administers the Longshore and Harbor Workers' Compensation Act. The Act provides benefits to workers injured in maritime employment on the navigable waters of the United States and adjoining area customarily used by an employee in loading, unloading, repairing, or building a vessel. The LS–202 is used by employers initially to report injuries that have occurred which are covered under the Longshore Act and its related statutes. The LS–210 is used to report additional periods of lost time from work. This information collection is currently approved for use through March 31, 2017.

II. Review Focus

The Department of Labor is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

* Enhance the quality, utility and clarity of the information to be collected; and

* Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks the extension of approval of this information collection in order to ensure that employers are complying with the reporting requirements of the Act and to ensure that injured claimants receive all compensation benefits to which they are entitled.

Agency: Office of Workers' Compensation Programs.

Type of Review: Extension.

Title: Request for Earnings Information.

OMB Number: 1240–0003.

Agency Number: LS–202 and LS–210.

Affected Public: Business or other for-profit, Not-for-profit institution.

Form	Time to complete	Frequency of response	Number of respondents	Number of responses	Hours burden
LS–202	15 min	occasion	23,490	23,490	5,873
LS–210	15 min	occasion	1,141	1,141	285
Totals			24,631	24,631	6,158

Total Respondents: 24,631.

Total Annual Responses: 24,631.

Estimated Total Burden Hours: 6,158.

Estimated Time Per Response: 15 minutes.

Frequency: On occasion.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $12,316.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 17, 2016.

Yoon Ferguson,

Agency Clearance Officer, Office of Workers' Compensation Programs, US Department of Labor.

NATIONAL CREDIT UNION ADMINISTRATION

Submission for OMB Review; Comment Request

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice.

SUMMARY: The National Credit Union Administration (NCUA) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before December 23, 2016 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for NCUA, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) NCUA PRA Clearance Officer, 1775 Duke Street, Alexandria, VA 22314, Suite 5067, or email at *PRAComments@ncua.gov.*

FOR FURTHER INFORMATION CONTACT:

Copies of the submission may be obtained by emailing *PRAComments@ncua.gov* or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0103.

Title: Disclosure and Recordkeeping Requirements under Regulation B (Equal Credit Opportunity Act, 12 CFR part 1002); Regulation E (Electronic Fund Transfers, 12 CFR part 1005); Regulation M (Consumer Leasing, 12 CFR part 1013); and Regulation CC (Availability of Funds and Collection of Checks, 12 CFR part 229).

Abstract: The third party disclosure and recordkeeping requirements in this collection are required by statute and regulation. The regulations prescribe certain aspects of the credit application and notification process, making certain disclosures, uniform methods for computing the costs of credit, disclosing credit terms and cost, resolving errors on certain types of credit accounts, and timing requirements and disclosures relating to the availability of deposited funds.

Type of Review: Reinstatement with change of a previously approved collection.

Affected Public: Private Sector: Not-for-profit institutions; Individuals or Households.

Estimated Total Annual Burden Hours: 3,245,905.

By Gerard Poliquin, Secretary of the Board, the National Credit Union Administration, on November 18, 2016.

Dated: November 18, 2016.

Dawn D. Wolfgang,

NCUA PRA Clearance Officer.

THE NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Submission for OMB Review, Comment Request, Proposed Collection: Community Catalyst: The Roles of Libraries and Museums as Enablers of Community Vitality and Co-Creators of Positive Community Change—A National Leadership Grants Special Initiative

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Submission for OMB review, comment request.

SUMMARY: The Institute of Museum and Library Services announces the following information collection has been submitted to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 35). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the CONTACT section below on or before December 23, 2016.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.* permitting electronic submissions of responses.

ADDRESSES: Stephanie Burwell, Chief Information Officer, Office of the Chief Information Officer, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW., Suite 4000, Washington, DC 20024–2135. Mrs. Burwell can be reached by Telephone: 202–653–4684, Fax: 202–653–4625, or by email at *sburwell@imls.gov* or by teletype (TTY/TDD) at 202–653–4614. Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services is the primary source of federal support for the Nation's 123,000 libraries and 35,000 museums. The Institute's mission is to inspire libraries and museums to advance innovation, learning, and civic engagement. The Institute works at the national level and in coordination with state and local organizations to sustain heritage, culture, and knowledge; enhance learning and innovation; and support professional development. IMLS is responsible for identifying national needs for and trends in museum, library, and information services; measuring and reporting on the impact and effectiveness of museum, library

and information services throughout the United States, including programs conducted with funds made available by IMLS; identifying, and disseminating information on, the best practices of such programs; and developing plans to improve museum, library, and information services of the United States and strengthen national, State, local, regional, and international communications and cooperative networks (20 U.S.C. 72, 20 U.S.C. 9108).

The purpose of this survey is to Community Catalyst: The Roles of Libraries and Museums as Enablers of Community Vitality and Co-creators of Positive Community Change (Community Catalyst)—A National Leadership Grants Special Initiative. National Leadership Grants for Libraries (NLG-Libraries) and National Leadership Grants for Museums (NLG-Museums), under which this special initiative falls, support projects that address challenges faced by the library and museum fields and that have the potential to advance practice in those fields. Successful projects will generate results such as new tools, research findings, models, services, practices, or alliances that can be widely used, adapted, scaled, or replicated to extend the benefits of federal investment. This special joint NLG-Libraries and NLG-Museums initiative invites proposals for the development and testing of approaches to deepen and sustain the collaborative work that libraries and museums engage in with their communities. Funded projects will help to create foundations for enhanced collective impact in communities, especially working with those from diverse economic, social and cultural backgrounds and will involve key partners including community service organizations, government entities, community-focused businesses, and/or funders. The goal is to help build additional capacity in libraries and museums to become enablers of community vitality and co-creators of positive community change.

Current Actions: This notice proposes clearance of the Community Catalyst: The Roles of Libraries and Museums as Enablers of Community Vitality and Co-creators of Positive Community Change—A National Leadership Grants Special Initiative, was published in the **Federal Register** on September 9, 2016 (FR vol. 81, No. 175, pgs. 62540). There were no public comments.

Agency: Institute of Museum and Library Services.

Title: Community Catalyst: The Roles of Libraries and Museums as Enablers of Community Vitality and Co-creators of Positive Community Change—A National Leadership Grants Special Initiative.

OMB Number: TBD.

Agency Number: 3137.

Frequency: One time.

Affected Public: Libraries, agencies, institutions of higher education, museums, and other entities that advance the museum and library fields and that meet the eligibility criteria.

Number of Respondents: 60.

Estimated Time per Respondent: 40 hours.

Total Burden Hours: 2,400.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by December 23, 2016. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, at the above address or *ACApermits@nsf.gov.*

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

1. *Applicant—Permit Application:* 2017–036

Lisa Tauxe, Scripps Institute of Oceanography, 9500 Gilman Drive, La Jolla, CA 92093

Activity for Which Permit Is Requested

Enter Antarctic Specially Protected Area (ASPA). The applicant proposes to enter ASPA No. 124, Cape Crozier, to collect small rock samples. The applicant proposes to enter the ASPA on foot to access sites for rock collection near the ASPA boundary and via helicopter to access sites well within the ASPA, but away from the penguin and skua colonies. The rock samples will be collected from areas of exposed lava flow tops and away from plant life. The samples will be archived at the home institution.

Location

Cape Crozier, ASPA 124.

Dates

December 15–30, 2016.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79339; File No. SR-BatsEDGX–2016–41]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change Related to the Exchange's Equity Options Platform To Adopt a Price Improvement Auction, the Bats Auction Mechanism

November 17, 2016.

On September 16, 2016, Bats EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change for the Exchange's equity options platform (''EDGX Options'') to adopt a price improvement auction, the Bats Auction Mechanism. The proposed rule change was published for comment in the **Federal Register** on October 5, 2016.[3] The Commission has received no comment letters on the proposal.

Section 19(b)(2) of the Act [4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day for this filing is November 19, 2016.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on the Exchange's proposed rule change.

Accordingly, pursuant to Section 19(b)(2)(A)(ii)(I) of the Act [5] and for the reasons stated above, the Commission designates January 3, 2017, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-BatsEDGX–2016–41).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79342; File No. SR–BatsBZX–2016–73]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of an Amendment to Rule 8.11, Effective Date of Judgment and the Adoption of Rule 8.18, Release of Disciplinary Complaints, Decisions and Other Information

November 17, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, Bats BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to add proposed Rule 8.18 to require the publication of the Exchange's disciplinary complaints and disciplinary decisions issued and to remove the part of Interpretation and Policy .01 to Rule 8.11 that currently governs the publication of disciplinary complaints and information related to disciplinary complaints.

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Proposed Rule Change

Reorganization of Exchange Rules Governing Release of Disciplinary Complaints, Decisions and Other Information Based on FINRA Rule 8313

Interpretation and Policy .01 to Rule 8.11 currently provides, in part, that the Exchange shall cause details regarding all formal disciplinary actions where a final decision has been issued, except as provided in Rule 8.15(a), to be published on its Web site. Interpretation and Policy .01 also provides that the Exchange shall not issue any press release or other statement to the press concerning any formal or informal disciplinary matter unless the Chief Regulatory Officer recommends a press release to the Executive Committee or the Board of the Exchange and either body determines that such a press release is warranted. The Exchange proposes to remove parts of Interpretation and Policy .01 to Rule 8.11 described above and to add proposed Rule 8.18 modeled after FINRA Rule 8313,[5] as described below, to govern the publication of disciplinary information. The scope of proposed Rule 8.18 would be limited to publication of materials relating to the disciplinary process set forth in Chapter VIII because the Exchange seeks to provide prompt access to more information regarding its disciplinary

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

[5] New York Stock Exchange, LLC (''NYSE'') similarly adopted rules modeled after FINRA Rule 8313. *See* Securities Exchange Act Release No. 78664 (August 24, 2016), 81 FR 59678, 59679 (August 30, 2016) (SR–NYSE–2016–40).

actions to Members and associated persons. By providing more information regarding the Exchange's disciplinary process, including publishing disciplinary complaints at the time they are filed, Members and associated persons will be able to sooner identify conduct that the Exchange views as problematic and have will [sic] the ability to take corrective steps sooner than they can under the current rules that provide only for the publication of disciplinary decisions after they become final. In that regard, the Exchange has determined not to adopt FINRA Rule 8313 in all respects at this time.[6]

General Standards

The Exchange proposes Rule 8.18(a) to be entitled ''General Standards.'' The text would set forth general standards for the release to the public of disciplinary complaints, decisions, or information.

Proposed Rule 8.18(a)(1) would, in part, essentially replace the part of Interpretation and Policy .01 to Rule 8.11 that addresses the publication of disciplinary decisions and conform [sic] to FINRA Rule 8313. The proposed rule would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). Additionally, the proposed rule would provide that the Exchange would release to the public copies of disciplinary complaints as defined in proposed Rule 8.18(e). Also, the decision to issue other related information, including a press release, under proposed Rule 8.18(a)(1) would be in the discretion of the Exchange generally instead of requiring Executive Committee or Exchange Board approval as currently required in Interpretation and Policy .01 to Rule 8.11. Proposed Rule 8.18(a)(1) would also provide that, in response to a request, the Exchange shall also release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). These proposed amendments are modeled after FINRA Rule 8313(a)(1) and would be substantially similar to the FINRA rule.

The Exchange does not propose to incorporate subsections (2), (3), (4) and (6) of FINRA Rule 8313(a) because the Exchange proposes to limit the scope of proposed Rule 8.18 to the publication of materials relating to the disciplinary process set forth in Chapter VIII at this time.[7] The Exchange, however, notes that although Exchange Rules do not provide for temporary cease and desist orders as provided for in FINRA Rule 9800, the Exchange's Client Suspension Rule—Rule 8.17—is similar in its procedure and purpose. The Exchange proposes to include a client suspension order issued pursuant to Rule 8.17 in the definition of ''disciplinary decision'' under proposed Rule 8.18(e)(2) consistent with FINRA's inclusion of its temporary cease and desist orders for publication because the Exchange views client suspension proceedings as disciplinary in nature. For the same reason, the Exchange proposes to include a notice of the initiation of a client suspension proceeding in the definition of ''disciplinary complaint'' under proposed Rule 8.18(e)(1).

The Exchange does not propose to incorporate subsection (5) of FINRA Rule 8313(a) because the Exchange does not have at this time provisions analogous to FINRA Rule 6490[8] and the FINRA Rule 9700 Series.[9] Additionally, the Exchange does not propose to include its procedures for exemptive relief analogous to the FINRA Rule 9600 Series because the Exchange proposes to limit scope of proposed Rule 8.18 to the publication of disciplinary materials.

Release Specifications

The Exchange proposes to include subsection (b) to proposed Rule 8.18 entitled ''Release Specifications'' modeled after FINRA Rule 8313(b). Proposed Rule 8.18(b)(1) provides that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed rule would be the same as FINRA Rule 8313(b)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Proposed Rule 8.18(b)(2) provides that copies of, and information with respect to, any disciplinary decision released to the public pursuant to paragraph (a) of the proposed rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange Rules or the Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the Commission. The proposed rule would be substantially similar to FINRA Rule 8313(b)(2). The proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the release specifications for an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. To provide the standard for such limited exceptions, the Exchange proposes subsection (c) of proposed Rule 8.18 entitled ''Discretion to Redact Certain Information or Waive

[6] NYSE similarly declined to adopt all provisions of FINRA Rule 8313 insofar as the FINRA rule related to information beyond the formal disciplinary process. *See id.* at 59679.

[7] Subsection (2) of FINRA Rule 8313(a) provides for the publication of statutory disqualification decisions and temporary cease and desist orders.

Subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar for: failing to keep information current; failing to pay dues; failing to comply with an arbitration award or related settlement or an order of restitution or settlement providing for restitution; failing to meet the eligibility or qualification standards or prerequisites for access to services; or experiencing financial or operational difficulties. Additionally, subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar imposed as the result of a summary proceeding for actions authorized by Section 15A(h)(3) of the Act.

Subsection (4) addresses procedures for membership proceedings.

The Exchange does not propose to adopt subsections (2), (3), and (4) because, as discussed above, the Exchange's proposal is intended to provide more information regarding the Exchange's disciplinary process to the public so that Members and associated persons will be able to identify conduct that the Exchange views as problematic and will have the ability to take corrective steps sooner. Subsections (2), (3), and (4) to the FINRA rule would not further that purpose because those subsections would require the publication of information generally relating to membership eligibility or failure to satisfy one's membership obligations rather than discipline. Subsection (2) additionally addresses temporary cease and desist proceedings, which the Exchange does not have, and Subsection (3) additionally addresses Section 15A(h)(3) of the Act, which applies only to registered securities associations.

Subsection (6) permits discretionary release of a complaint, decision, order, notification, or notice issued under FINRA rules, where the release of such information is deemed by FINRA's Chief Executive Officer (or such other senior officer as the Chief Executive Officer may designate) to be in the public interest. The Exchange does not propose to adopt this open-ended subsection because [sic] Exchange intends for the proposed rule to instead be limited to disciplinary information for the reasons discussed above.

[8] ''Processing of Company-Related Actions.''

[9] ''Procedure For Grievances Concerning the Automated Systems.''

Publication,'' modeled after FINRA Rule 8313(c).

Proposed Rule 8.18(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed rule would be the same as FINRA Rule 8313(c)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Similarly, proposed Rule 8.18(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint or disciplinary decision under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice. The proposed rule would be the same as FINRA Rule 8313(c)(2) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the waiver of the release of an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Notice of Appeals of Exchange Decisions

The Exchange proposes to include subsection (d) to proposed Rule 8.18 entitled ''Notice of Appeals of Exchange Decisions to the SEC'' modeled on FINRA Rule 8313(d). Proposed Rule 8.18(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the Commission and the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed rule would be the same as FINRA Rule 8313(d) except that the proposed Rule would substitute the term ''Exchange'' for ''FINRA.''

Definitions

Finally, the Exchange proposes subsection (e) of proposed Rule 8.18 entitled ''Definitions.'' Proposed Rule 8.18(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the rule, modeled after the definitions contained in FINRA Rule 8313(e).

First, proposed Rule 8.18(e)(1) would define the term ''disciplinary complaint'' to mean any statement of charges issued pursuant to Rule 8.4 or any notice served pursuant to Rule 8.17. This proposed rule is based on FINRA Rule 8313(e)(1) except that it replaces the term ''complaint pursuant to the Rule 9200 Series'' with ''statement of charges pursuant to Rule 8.4'' and it includes a notice of the initiation of a client suspension proceeding issued pursuant to Rule 8.17 in the definition of ''disciplinary complaint.''

Second, proposed Rule 8.18(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to the Chapter VIII, including, decisions issued by a Hearing Panel or the Appeals Committee and accepted offers of settlement. The Exchange additionally proposes to include suspension orders issued pursuant to Rule 8.17 in the definition of ''disciplinary decision.'' The Exchange does not propose to adopt the part of FINRA Rule 8313(e)(2) that discusses decisions issued pursuant to the FINRA Rule 9550 Series, FINRA Rule 9600 Series, FINRA Rule 9700 Series, or FINRA Rule 9800 Series, or decisions, notifications, or notices issued pursuant to the FINRA Rule 9520 Series because, as explained above, the Exchange does not propose to adopt the provisions of the FINRA Rule providing for the publication of such information. Finally, proposed Rule 8.18(e)(2) would provide that minor rule violation plan letters issued pursuant to Rules 8.15 and 25.3 are not subject to the proposed rule.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] In particular, the proposal is consistent with Section 6(b)(1)[11] in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange. In particular, the Exchange believes that the proposed addition of Rule 8.18 regarding release of disciplinary complaints, decisions and other information are [sic] consistent with Section 6(b)(1) of the Act because it would establish general standards for the release of disciplinary information to the public to provide greater access to information regarding the Exchange's disciplinary actions.

For the same reasons, the Exchange believes that proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act[12] because the proposed rule is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system. In particular, proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act by providing greater clarity, consistency, and transparency regarding the release of disciplinary complaints, decisions and other information to the public. By adopting the proposed Rule 8.18 modeled after FINRA Rule 8313, the Exchange would establish standards for the release of disciplinary information to the public in line with those in effect at FINRA that provide greater access to information regarding the Exchange's disciplinary actions and describe the scope of information subject to proposed Rule 8.18. The Exchange believes that this proposed rule change promotes greater transparency to the Exchange's disciplinary process, and that the proposed rule change provides greater access to information regarding its disciplinary actions, and also provides valuable guidance and information to Members, associated persons, other regulators, and the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues, but rather it is designed to enhance the Exchange's rules governing the release of disciplinary complaints, decisions and other information to the public, thereby providing greater clarity and consistency and resulting in less burdensome and more efficient regulatory compliance and facilitating performance of regulatory functions.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(1).

[12] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [13] and paragraph (f)(6) of Rule 19b–4 thereunder.[14]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) [15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange states that FINRA performs services for it under a Regulatory Services Agreement (''RSA''), including the filing and prosecution of disciplinary complaints on the Exchange's behalf. FINRA also files and prosecutes disciplinary complaints on its own behalf, sometimes on cases involving identical or similar conduct to the cases it brings on the Exchange's behalf. Without the waiver, the Exchange is concerned that FINRA might publish a complaint during the 30-day operative delay, and that the Exchange would not be permitted to publish its own complaint, prepared by FINRA, regarding the same conduct. According to the Exchange, this would supply the public with an incomplete picture of the disciplinary proceedings, the full nature of which could not be disclosed until much later when a final disciplinary decision is issued. The Exchange, therefore, believes that waiver of the operative delay is consistent with the protection of investors and the public interest, as it will allow the Exchange to immediately publish any disciplinary complaints or decisions that are filed or issued after the proposal is filed. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow BZX to publish disciplinary complaints or decisions that have been filed or issued without delay. Therefore, the Commission designates the proposed rule change to be operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsBZX–2016–73 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR-BatsBZX–2016–73. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBZX–2016–73 and should be submitted on or before December 14, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–10258; 34–79350; File No. 265–27]

Advisory Committee on Small and Emerging Companies

AGENCY: Securities and Exchange Commission.

ACTION: Notice of Meeting.

SUMMARY: The Securities and Exchange Commission Advisory Committee on Small and Emerging Companies is providing notice that it will hold an open, public telephone meeting on Wednesday, December 7, 2016, beginning at 11:00 a.m. ET. Members of the public may attend the meeting by listening to the audiocast accessible on the Commission's Web site at *www.sec.gov.* Persons needing special accommodations to access the meeting because of a disability should notify the contact person listed below. The agenda for the meeting includes a continuation of discussions started at the Committee's meeting on October 5, 2016, including outreach and board diversity. The public is invited to submit written statements to the Committee.

DATES: The public meeting will be held on Wednesday, December 7, 2016. Written statements should be received on or before Monday, December 5, 2016.

ADDRESSES: Written statements may be submitted by any of the following methods:

Electronic Statements

- Use the Commission's Internet submission form (*http://www.sec.gov/info/smallbus/acsec.shtml*); or
- Send an email message to *rule-comments@sec.gov*. Please include File Number 265–27 on the subject line; or

Paper Statements

- Send paper statements to Brent J. Fields, Federal Advisory Committee Management Officer, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. 265–27. This file number should be included on the subject line if email is used. To help us process and review your statement more efficiently, please use only one method. The Commission will post all statements on the Advisory Committee's Web site at *http://www.sec.gov./info/smallbus/acsec.shtml*.

Statements also will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All statements received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Julie Z. Davis, Senior Special Counsel, at (202) 551–3460, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–3628.

SUPPLEMENTARY INFORMATION: In accordance with Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C.—App. 1, and the regulations thereunder, Keith F. Higgins, Designated Federal Officer of the Committee, has ordered publication of this notice.

Dated: November 18, 2016.

Brent J. Fields,

Committee Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79345; File No. SR–Phlx–2016–82]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Adopt a New Exception in Exchange Rule 1000(f) for Sub-MPV Split-Price Orders

November 17, 2016.

I. Introduction

On August 3, 2016, NASDAQ PHLX LLC (''Exchange'' or ''Phlx'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide an additional exception to the mandatory use of the Exchange's Floor Broker Management System (''FBMS'') pursuant to Rule 1000(f)(iii) to permit Floor Brokers to execute certain sub-minimum price increment (''sub-MPV'') split-price orders in the trading crowd. The proposed rule change was published for comment in the **Federal Register** on August 22, 2016.[3] On October 3, 2016, the Commission extended the time period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change to November 20, 2016.[4] The Commission received no comments on the proposal. This order institutes proceedings under Section 19(b)(2)(B) of the Act [5] to determine whether to disapprove the proposed rule change.

II. Description of the Proposed Rule Change

Currently, Phlx Rule 1000(f) requires that all Exchange options transactions be executed in one of the following three ways: ''(i) [a]utomatically by the Exchange Trading System pursuant to Rule 1080 and other applicable options rules; (ii) by and among members in the Exchange's options trading crowd none of whom is a Floor Broker; or (iii) through the Options [FBMS] for trades involving at least one Floor Broker.'' [6] Although a Floor Broker may represent orders in the trading crowd, a Floor Broker is not permitted to execute an order in the trading crowd unless one of three exceptions applies.[7] The exceptions to the mandatory use of FBMS [8] are set forth in Phlx Rule 1000(f)(iii). These exceptions allow a Floor Broker to execute a transaction in the trading crowd (rather than through FBMS) if: (i) there is a problem with Exchange's systems; (ii) the Floor Broker is executing the trade pursuant to Phlx Rule 1059 (''Accommodation Transactions'') or Phlx Rule 1079 (''Flex Index, Equity and Currency Options''); or (iii) the transaction involves a multi-leg order with more than 15 legs.[9]

Phlx Rule 1014(g)(i)(B) provides a priority rule regarding open outcry split price transactions in equity options and options overlying ETFs to permit a member who is responding to an order for at least 100 contracts who buys (sells) at least 50 contracts at a particular price to have priority over all other orders in purchasing (selling) up to an equivalent number of contracts of the same order at the next lower (higher) price without being required to yield to existing customer interest in the limit order book.[10] Absent Phlx Rule 1014(g)(i)(B), such orders would be required to yield priority. The Exchange states that ''the purpose behind the split-price priority exception was 'to bring about the execution of large orders, which by virtue of their size and the need to execute them at multiple prices may be difficult to execute

[5] 15 U.S.C. 78s(b)(2)(B).

[6] *See* Phlx Rule 1000(f).

[7] *See* Phlx Rule 1000(f)(iii).

[8] The original FBMS (''FBMS 1'') began operating in 2005. The Exchange retired FBMS 1 on March 31, 2016 after operating it concurrently with the Exchange's enhanced FBMS (''FBMS 2''), which was made available on March 7, 2014. As of March 31, 2016, FBMS 2 is available to all Floor Brokers in all options and is the only FBMS currently in use. The Exchange represents that it has contracted with a third-party to build an alternative system (''FBMS 3'') to replace FBMS 2, and anticipates that FBMS 3 will be ready by November 30, 2016. *See* Notice, *supra* note 3, at 56725.

[9] *See* Notice, *supra* note 3, at 56726; *see also* Phlx Rule 1000(f)(iii)(A)–(C). According to the Exchange, each time a Floor Broker uses one the current exceptions to Phlx Rule 1000(f)(iii), the Floor Broker is required by Phlx Rule 1063(e)(ii), to record the information required by Phlx Rule 1063(e)(i) on paper trade tickets. The Exchange further represents that a Floor Broker may only represent an order for execution that has been time stamped with the time of entry on the trading floor. In addition, according to the Exchange, once an execution occurs, the trade ticket must be stamped with the time of execution of such order. *See* Notice, *supra* note 3, at 56726.

[10] *See* Notice, *supra* note 3, at 56726 (citing Securities Exchange Act Release No. 51820 (June 10, 2005), 70 FR 35759 (June 21, 2005) (SR–Phlx–2005–28)) (approving pilot). *See also* Securities Exchange Act Release No. 55993 (June 29, 2007), 72 FR 37301 (July 9, 2007) (SR–Phlx–2007–44) (permanent approval).

without a limited exception to the priority rules.' '' [11]

According to the Exchange, split-price orders are currently processed using either FBMS 2 or paper tickets, depending on whether the split-price order can be evenly split using simple calculations or whether the transaction involves non-even integers and sub-MPV price points, thus requiring a more complicated computation to determine the number of contracts to trade at two different price points.[12] The Exchange represents that FBMS 2 does not have the capability to calculate specific volumes at different prices for transactions resulting from split-price orders.[13] To compensate for this system limitation, the Exchange is proposing to amend Phlx Rule 1000(f)(iii) to add a new exception from the mandatory use of FBMS that would expressly authorize Floor Brokers to execute certain split-price orders in the trading crowd. Accordingly, the Exchange is proposing in Phlx Rule 1000(f)(iii)(D) to allow the following split-price orders to be executed in the trading crowd: (1) simple orders not expressed in the applicable sub-MPV and that cannot be evenly split into two whole numbers to create a price at the midpoint of the MPV; and (2) complex and multi-leg orders with at least one option leg with an odd-numbered volume that must trade at a sub-MPV price or one leg that qualifies under (1) above.[14]

The Exchange also proposes that, in addition to split-price orders executed pursuant to proposed Phlx Rule 1000(f)(iii)(D), Phlx surveillance staff would approve all executions submitted under Phlx Rule 1000(f)(iii) to validate that such executions abide by applicable priority and trade-through rules.[15] The Exchange also proposes to round prices if necessary to execute the trade at the MPV, but only to the benefit of a customer order, or, where multiple customer orders are involved, for the customer order that is earliest in time.[16]

III. Proceedings To Determine Whether To Approve or Disapprove SR–Phlx–2016–82 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act,[17] to determine whether the proposed rule change should be disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described in greater detail below, the Commission seeks and encourages interested persons to comment on the proposed rule change to inform the Commission's analysis of whether to approve or disapprove the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[18] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceeding to allow for additional analysis of, and input from commenters with respect to, the consistency of the proposed rule change with Section 6(b)(5) of the Act,[19] which requires that the rules of a national securities exchange be designed, among other things, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers,[20] and with the Order Protection and Locked/Crossed Market Plan.[21]

Finally, under the Commission's rules of procedure, a self-regulatory organization that proposes to amend its rules bears the burden of demonstrating that its proposal is consistent with the Act.[22] In this regard:

> the description of the proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with the applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding. Any failure of the self-regulatory organization to provide the information elicited by Form 19b-4 may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the rules and regulations thereunder that are applicable to the self-regulation organization.[23]

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the issues identified above, as well as any other concerns they may have with respect to the proposed rule change. In particular, the Commission invites written views of interested persons concerning whether the proposed rule change is consistent with Section 6(b)(5) or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval which would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b-4, any request for an opportunity to make an oral presentation.[24]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposal should be approved or disapproved by December 14, 2016. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by December 28, 2016. The Commission asks that commenters address the sufficiency and merit of the Exchange's statements in support of the proposed rule change, in addition to any other comments they may wish to submit about the proposed rule change. The Commission notes that Phlx states that ''rounding of prices is used only where necessary to execute a trade at the MPV, and only to the benefit of a customer order. . . .'' [25] The Commission seeks commenters' views on the Exchange's statements, which are set forth in the Notice,[26] regarding how

[23] *Id.*

[24] Section 19(b)(2) of the Act, as amended by the Securities Act Amendments of 1975, Public Law 94–29 (June 4, 1975), grants the Commission flexibility to determine what type of proceeding—either oral or notice and opportunity for written comments—is appropriate for consideration of a particular proposal by a self-regulatory organization. *See* Securities Act Amendments of 1975, Senate Comm. on Banking, Housing & Urban Affairs, S. Rep. No. 75, 94th Cong., 1st Sess. 30 (1975).

[25] *See* Notice, *supra* note 3, at 56724.

[26] *See* Notice, *supra* note 3.

the Exchange would round prices for split-price orders, particularly when no customer orders are involved, in addition to any other comments they may wish to submit about the proposed rule change. The Commission seeks comment on whether this aspect of the proposal is consistent with Section 6(b)(5), which requires, among other things, that a proposed rule change not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[27]

The Commission is concerned that the Exchange has not made clear what the time of execution would be for split-price orders executed manually by Floor Brokers pursuant to the exception proposed in Phlx Rule 1000(f)(iii)(D) or how Floor Brokers would use paper tickets to execute split-price orders under the proposed exception. The Commission seeks commenters' views on the sufficiency of the Exchange's statements regarding the execution of a split-price order by a Floor Broker pursuant to the proposed exception under Phlx Rule 1000(f)(iii)(D). In addition, the Commission seeks comment on whether the proposed rule change is consistent with the Options Order Protection and Locked/Crossed Market Plan.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov. Please include File Number SR–Phlx–2016–82 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to *File Number* SR–Phlx–2016–82. The file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to *File Number* SR–Phlx–2016–82 and should be submitted on or before December 14, 2016. Rebuttal comments should be submitted by December 28, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[28]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79343; File No. SR-BatsEDGA–2016–27]

Self-Regulatory Organizations; Bats EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of an Amendment to Rule 8.11, Effective Date of Judgment and the Adoption of Rule 8.18, Release of Disciplinary Complaints, Decisions and Other Information

November 17, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, Bats EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to add proposed Rule 8.18 to require the publication of the Exchange's disciplinary complaints and disciplinary decisions issued and to remove the part of Interpretation and Policy .01 to Rule 8.11 that currently governs the publication of disciplinary complaints and information related to disciplinary complaints.

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Reorganization of Exchange Rules Governing Release of Disciplinary Complaints, Decisions and Other Information Based on FINRA Rule 8313

Interpretation and Policy .01 to Rule 8.11 currently provides, in part, that the Exchange shall cause details regarding all formal disciplinary actions where a final decision has been issued, except as provided in Rule 8.15(a), to be published on its Web site. Interpretation and Policy .01 also provides that the Exchange shall not issue any press release or other statement to the press concerning any formal or informal disciplinary matter unless the Chief Regulatory Officer recommends a press release to the Executive Committee or

the Board of the Exchange and either body determines that such a press release is warranted. The Exchange proposes to remove parts of Interpretation and Policy .01 to Rule 8.11 described above and to add proposed Rule 8.18 modeled after FINRA Rule 8313,[5] as described below, to govern the publication of disciplinary information. The scope of proposed Rule 8.18 would be limited to publication of materials relating to the disciplinary process set forth in Chapter VIII because the Exchange seeks to provide prompt access to more information regarding its disciplinary actions to Members and associated persons. By providing more information regarding the Exchange's disciplinary process, including publishing disciplinary complaints at the time they are filed, Members and associated persons will be able to sooner identify conduct that the Exchange views as problematic and have will [sic] the ability to take corrective steps sooner than they can under the current rules that provide only for the publication of disciplinary decisions after they become final. In that regard, the Exchange has determined not to adopt FINRA Rule 8313 in all respects at this time.[6]

General Standards

The Exchange proposes Rule 8.18(a) to be entitled ''General Standards.'' The text would set forth general standards for the release to the public of disciplinary complaints, decisions, or information.

Proposed Rule 8.18(a)(1) would, in part, essentially replace the part of Interpretation and Policy .01 to Rule 8.11 that addresses the publication of disciplinary decisions and conform [sic] to FINRA Rule 8313. The proposed rule would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). Additionally, the proposed rule would provide that the Exchange would release to the public copies of disciplinary complaints as defined in proposed Rule 8.18(e). Also, the decision to issue other related information, including a press release, under proposed Rule 8.18(a)(1) would be in the discretion of the Exchange generally instead of requiring Executive Committee or Exchange Board approval as currently required in Interpretation and Policy .01 to Rule 8.11. Proposed Rule 8.18(a)(1) would also provide that, in response to a request, the Exchange shall also release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). These proposed amendments are modeled after FINRA Rule 8313(a)(1) and would be substantially similar to the FINRA rule.

The Exchange does not propose to incorporate subsections (2), (3), (4) and (6) of FINRA Rule 8313(a) because the Exchange proposes to limit the scope of proposed Rule 8.18 to the publication of materials relating to the disciplinary process set forth in Chapter VIII at this time.[7] The Exchange, however, notes that although Exchange Rules do not provide for temporary cease and desist orders as provided for in FINRA Rule 9800, the Exchange's Client Suspension Rule—Rule 8.17—is similar in its procedure and purpose. The Exchange proposes to include a client suspension order issued pursuant to Rule 8.17 in the definition of ''disciplinary decision'' under proposed Rule 8.18(e)(2) consistent with FINRA's inclusion of its temporary cease and desist orders for publication because the Exchange views client suspension proceedings as disciplinary in nature. For the same reason, the Exchange proposes to include a notice of the initiation of a client suspension proceeding in the definition of ''disciplinary complaint'' under proposed Rule 8.18(e)(1).

The Exchange does not propose to incorporate subsection (5) of FINRA Rule 8313(a) because the Exchange does not have at this time provisions analogous to FINRA Rule 6490[8] and the FINRA Rule 9700 Series.[9] Additionally, the Exchange does not propose to include its procedures for exemptive relief analogous to the FINRA Rule 9600 Series because the Exchange proposes to limit scope of proposed Rule 8.18 to the publication of disciplinary materials.

Release Specifications

The Exchange proposes to include subsection (b) to proposed Rule 8.18 entitled ''Release Specifications'' modeled after FINRA Rule 8313(b). Proposed Rule 8.18(b)(1) provides that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed rule would be the same as FINRA Rule 8313(b)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Proposed Rule 8.18(b)(2) provides that copies of, and information with respect to, any disciplinary decision released to the public pursuant to paragraph (a) of the proposed rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange Rules or the Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the Commission. The proposed rule would be substantially similar to FINRA Rule 8313(b)(2). The proposed rule would substitute the term ''Exchange'' for

[5] New York Stock Exchange, LLC (''NYSE'') similarly adopted rules modeled after FINRA Rule 8313. *See* Securities Exchange Act Release No. 78664 (August 24, 2016), 81 FR 59678, 59679 (August 30, 2016) (SR–NYSE–2016–40).

[6] NYSE similarly declined to adopt all provisions of FINRA Rule 8313 insofar as the FINRA rule related to information beyond the formal disciplinary process. *See id.* at 59679.

[7] Subsection (2) of FINRA Rule 8313(a) provides for the publication of statutory disqualification decisions and temporary cease and desist orders.

Subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar for: failing to keep information current; failing to pay dues; failing to comply with an arbitration award or related settlement or an order of restitution or settlement providing for restitution; failing to meet the eligibility or qualification standards or prerequisites for access to services; or experiencing financial or operational difficulties. Additionally, subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar imposed as the result of a summary proceeding for actions authorized by Section 15A(h)(3) of the Act.

Subsection (4) addresses procedures for membership proceedings.

The Exchange does not propose to adopt subsections (2), (3), and (4) because, as discussed above, the Exchange's proposal is intended to provide more information regarding the Exchange's disciplinary process to the public so that Members and associated persons will be able to identify conduct that the Exchange views as problematic and will have the ability to take corrective steps sooner. Subsections (2), (3), and (4) to the FINRA rule would not further that purpose because those subsections would require the publication of information generally relating to membership eligibility or failure to satisfy one's membership obligations rather than discipline. Subsection (2) additionally addresses temporary cease and desist proceedings, which the Exchange does not have, and Subsection (3) additionally addresses Section 15A(h)(3) of the Act, which applies only to registered securities associations.

Subsection (6) permits discretionary release of a complaint, decision, order, notification, or notice issued under FINRA rules, where the release of such information is deemed by FINRA's Chief Executive Officer (or such other senior officer as the Chief Executive Officer may designate) to be in the public interest. The Exchange does not propose to adopt this open-ended subsection because [sic] Exchange intends for the proposed rule to instead be limited to disciplinary information for the reasons discussed above.

[8] ''Processing of Company-Related Actions.''

[9] ''Procedure For Grievances Concerning the Automated Systems.''

''FINRA'' and would not include a provision relating to the release specifications for an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. To provide the standard for such limited exceptions, the Exchange proposes subsection (c) of proposed Rule 8.18 entitled ''Discretion to Redact Certain Information or Waive Publication,'' modeled after FINRA Rule 8313(c).

Proposed Rule 8.18(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed rule would be the same as FINRA Rule 8313(c)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Similarly, proposed Rule 8.18(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint or disciplinary decision under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice. The proposed rule would be the same as FINRA Rule 8313(c)(2) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the waiver of the release of an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Notice of Appeals of Exchange Decisions

The Exchange proposes to include subsection (d) to proposed Rule 8.18 entitled ''Notice of Appeals of Exchange Decisions to the SEC'' modeled on FINRA Rule 8313(d). Proposed Rule 8.18(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the Commission and the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed rule would be the same as FINRA Rule 8313(d) except that the proposed Rule would substitute the term ''Exchange'' for ''FINRA.''

Definitions

Finally, the Exchange proposes subsection (e) of proposed Rule 8.18 entitled ''Definitions.'' Proposed Rule 8.18(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the rule, modeled after the definitions contained in FINRA Rule 8313(e).

First, proposed Rule 8.18(e)(1) would define the term ''disciplinary complaint'' to mean any statement of charges issued pursuant to Rule 8.4 or any notice served pursuant to Rule 8.17. This proposed rule is based on FINRA Rule 8313(e)(1) except that it replaces the term ''complaint pursuant to the Rule 9200 Series'' with ''statement of charges pursuant to Rule 8.4'' and it includes a notice of the initiation of a client suspension proceeding issued pursuant to Rule 8.17 in the definition of ''disciplinary complaint.''

Second, proposed Rule 8.18(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to the Chapter VIII, including, decisions issued by a Hearing Panel or the Appeals Committee and accepted offers of settlement. The Exchange additionally proposes to include suspension orders issued pursuant to Rule 8.17 in the definition of ''disciplinary decision.'' The Exchange does not propose to adopt the part of FINRA Rule 8313(e)(2) that discusses decisions issued pursuant to the FINRA Rule 9550 Series, FINRA Rule 9600 Series, FINRA Rule 9700 Series, or FINRA Rule 9800 Series, or decisions, notifications, or notices issued pursuant to the FINRA Rule 9520 Series because, as explained above, the Exchange does not propose to adopt the provisions of the FINRA Rule providing for the publication of such information. Finally, proposed Rule 8.18(e)(2) would provide that minor rule violation plan letters issued pursuant to Rules 8.15 and 25.3 are not subject to the proposed rule.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] In particular, the proposal is consistent with Section 6(b)(1) [11] in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange. In particular, the Exchange believes that the proposed addition of Rule 8.18 regarding release of disciplinary complaints, decisions and other information are [sic] consistent with Section 6(b)(1) of the Act because it would establish general standards for the release of disciplinary information to the public to provide greater access to information regarding the Exchange's disciplinary actions.

For the same reasons, the Exchange believes that proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act [12] because the proposed rule is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system. In particular, proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act by providing greater clarity, consistency, and transparency regarding the release of disciplinary complaints, decisions and other information to the public. By adopting the proposed Rule 8.18 modeled after FINRA Rule 8313, the Exchange would establish standards for the release of disciplinary information to the public in line with those in effect at FINRA that provide greater access to information regarding the Exchange's disciplinary actions and describe the scope of information subject to proposed Rule 8.18. The Exchange believes that this proposed rule change promotes greater transparency to the Exchange's disciplinary process, and that the proposed rule change provides greater access to information regarding its disciplinary actions, and also provides valuable guidance and information to Members, associated persons, other regulators, and the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(1).

[12] 15 U.S.C. 78f(b)(5).

any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues, but rather it is designed to enhance the Exchange's rules governing the release of disciplinary complaints, decisions and other information to the public, thereby providing greater clarity and consistency and resulting in less burdensome and more efficient regulatory compliance and facilitating performance of regulatory functions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [13] and paragraph (f)(6) of Rule 19b–4 thereunder.[14]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) [15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange states that FINRA performs services for it under a Regulatory Services Agreement (''RSA''), including the filing and prosecution of disciplinary complaints on the Exchange's behalf. FINRA also files and prosecutes disciplinary complaints on its own behalf, sometimes on cases involving identical or similar conduct to the cases it brings on the Exchange's behalf. Without the waiver, the Exchange is concerned that FINRA might publish a complaint during the 30-day operative delay, and that the Exchange would not be permitted to publish its own complaint, prepared by FINRA, regarding the same conduct. According to the Exchange, this would supply the public with an incomplete picture of the disciplinary proceedings, the full nature of which could not be disclosed until much later when a final disciplinary decision is issued. The Exchange, therefore, believes that waiver of the operative delay is consistent with the protection of investors and the public interest, as it will allow the Exchange to immediately publish any disciplinary complaints or decisions that are filed or issued after the proposal is filed. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow EDGA to publish disciplinary complaints or decisions that have been filed or issued without delay. Therefore, the Commission designates the proposed rule change to be operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGA–2016–27 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR-BatsEDGA–2016–27. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGA–2016–27 and should be submitted on or before December 14, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79337; File No. SR–NYSEARCA–2016–145]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To Conform to Proposed Amendments to Securities Exchange Act Rule 15c6–1(A) To Shorten the Standard Settlement Cycle From Three Business Days After the Trade Date (''T+3'') to Two Business Days After the Trade Date (''T+2'')

November 17, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 4, 2016, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to, through its wholly-owned corporation, NYSE Arca Equities, Inc. (''NYSE Arca Equities''), adopt new NYSE Arca Equities Rule 7.4T (''Rule 7.4T'') to conform to proposed amendments to Securities Exchange Act Rule 15c6–1(a) to shorten the standard settlement cycle from three business days after the trade date to two business days after the trade date. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt a new Rule 7.4T (Ex-Dividend or Ex-Right Dates) conform to proposed amendments to Securities Exchange Act Rule 15c6–1(a) [4] to shorten the standard settlement cycle from T+3 to T+2.

The proposed new rule would have the same numbering as the current rule, but with the modifier ''T'' appended to the rule number. As discussed below, because the Exchange would not implement the proposed rule until after the final implementation of T+2, the Exchange proposes to retain the current version of Rule 7.4 on its books and not delete it until after the proposed rule is approved. The Exchange also proposes to file separate proposed rule changes to establish the operative date of the proposed rule and to delete the current version of the rule.

Background

In 1993, the Securities and Exchange Commission (the ''SEC'' or ''Commission'') adopted Rule 15c6–1(a) [5] under the Act, which established three business days after trade date instead of five business days (''T+5''), as the standard trade settlement cycle for most securities transactions. The rule became effective in June 1995.[6] In November 1994, the Exchange amended its rules to be consistent with the T+3 settlement cycle for securities transactions.[7]

On September 28, 2016, the SEC proposed amendments to Rule 15c6–1(a) to shorten the standard settlement cycle from T+3 to T+2 on the basis that the shorter settlement cycle would reduce the risks that arise from the value and number of unsettled securities transactions prior to completion of settlement, including credit, market and liquidity risk faced by U.S. market participants.[8] The proposed rule amendment was published for comment in the **Federal Register** on October 5, 2016.[9] In light of this action by the SEC, the Exchange proposes new rules to reflect ''regular way'' settlement as occurring on T+2.[10]

Proposed Rule Change

The Exchange proposes a new Rule 7.4T to reflect a T+2 settlement cycle.[11] Current Rule 7.4 provides that transactions in stocks traded ''regular'' shall be ''ex-dividend'' or ''ex-rights'' as the case may be, on the second business day preceding the record date fixed by the company or the date of the closing of transfer books, except when the Board of Directors rules otherwise. Proposed Rule 7.4T would not include the word ''second'' so that the reference would be to the ''business day'' preceding the record date. The current version of Rule 7.4 further provides that if the record date or closing of transfer books occur upon a day other than a business day, the rule shall apply for the third preceding business day. Proposed Rule 7.4T would replace ''third preceding business day'' to ''second preceding business day.''

Operative Date Preambles

As noted above, because the Exchange would not implement the proposed rule until after the final implementation of T+2, the Exchange proposes to retain to retain the current version of Rule 7.4 on its books and not delete it until after the proposed rule is approved. The Exchange also proposes to file separate proposed rule changes as necessary to establish the operative date of Proposed Rule 7.4T and to delete the current version of the rule.

To reduce the potential for confusion regarding which version of the rule governs, the Exchange proposes to add a preamble to current Rule 7.4 providing that: (1) The rule will remain operative until the Exchange files separate

[10] Earlier this year the MSRB also filed a rule change to reflect ''regular way'' settlement as occurring on T+2. *See* Securities Exchange Act Release Nos. 77744 68678 [sic] (April 29, 2016), [sic] 81 FR 14906 (March 18, 2016) (SR–MSRB–2016–04) (approving proposed amendments to MSRB Rules G- 12 and G–15 to define regular-way settlement for municipal securities transactions as occurring on a two-day settlement cycle and technical conforming amendments).

[11] Current Rule 7.4 was adopted originally as Rule 7.7 of the PCX Equities Exchange in 2000 and reflects a T+3 settlement cycle for securities transactions.

proposed rule changes as necessary to establish the operative date of the revised rule, to delete the current rule and proposed preamble, and to remove the preamble text from the revised rule; and (2) in addition to filing the necessary proposed rule changes, the Exchange will announce via Information Memo the operative date of the deletion of the current rule and implementation of proposed Rule 7.4T.

The Exchange also proposes to add a preamble to proposed Rule 7.4T that would provide that: (1) The Exchange will file a separate rule change to establish the operative date of the proposed rule, delete the current version and the proposed preamble, and remove the preamble text from the revised rule; and (2) until such time, the current version of the rule will remain operative and that, in addition to filing the necessary proposed rule changes, the Exchange will announce via Information Memo the implementation of the proposed rule and the operative date of the deletion of the current rule.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. In particular, the Exchange believes that, by shortening the time period for settlement of most securities transactions, the proposed rule change would protect investors and the public interest by reducing the number of unsettled trades in the clearance and settlement system at any given time, thereby reducing the risk inherent in settling securities transactions to clearing corporations, their members and public investors. The Exchange also believes that adding a preamble to each current rule and to each proposed rule clarifying the operative dates of the respective versions would remove impediments to and perfect the mechanism of a free and open market and a national market system by adding clarity and transparency to the Exchange's rules, reducing potential confusion, and making the Exchange's rules easier to navigate.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather facilitate the industry's transition to a T+2 regular-way settlement cycle. The Exchange also believes that the proposed rule change will serve to promote clarity and consistency, thereby reducing burdens on the marketplace and facilitating investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2016–145 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–145. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2016–145, and should be submitted on or before December 14,2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79347; File No. SR–MSRB–2016–12]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, to MSRB Rules G–15 and G–30 To Require Disclosure of Mark-Ups and Mark-Downs to Retail Customers on Certain Principal Transactions and To Provide Guidance on Prevailing Market Price

November 17, 2016.

I. Introduction

On September 2, 2016, the Municipal Securities Rulemaking Board (''MSRB'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend MSRB Rule G–15 (''Rule G–15''), on confirmation, clearance, settlement and other uniform practice requirements with respect to retail customer (*i.e.,* non-institutional) transactions, and MSRB Rule G–30 (''Rule G–30''), on prices and commissions to require brokers, dealers and municipal securities dealers (collectively, ''dealers'') to disclose mark-ups and mark-downs (collectively, ''mark-ups'' unless the context requires otherwise) to retail customers on certain principal transactions and to provide dealers guidance on prevailing market price (''PMP'' or ''prevailing market price'') for the purpose of calculating mark-ups and mark-downs and other Rule G–30 determinations (collectively, the ''proposed rule change''). The proposed rule change was published for comment in the **Federal Register** on September 13, 2016.[3] The Commission received seven comment letters in response to the proposal.[4] The Commission also received a letter from the Office of the Investor Advocate (''Investor Advocate'') recommending approval of the proposed rule change.[5] On November 14, 2016, the MSRB responded to the comments [6] and filed Amendment No. 1 to the proposal.[7] The Commission is publishing this notice to solicit comment on Amendment No. 1 to the proposal from interested persons and is approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description of the Proposal, as Modified by Amendment No. 1

A. Background

The MSRB proposes to amend Rule G–15, on confirmation, clearance and other uniform practice requirements with respect to customer transactions, and Rule G–30, on prices and commissions to require dealers to disclose mark-ups and mark-downs to retail customers on certain principal transactions and to provide dealers guidance on prevailing market price for the purpose of calculating mark-ups and mark-downs and other Rule G–30 determinations.[8] The MSRB also proposes to require for all transactions in municipal securities with retail customers, irrespective of whether mark-up/mark-down disclosure is required, that a dealer provide on the confirmation (1) a reference, and hyperlink if the confirmation is electronic, to a Web page hosted by the MSRB that contains publicly available trading data from the MSRB's Electronic Municipal Market Access (''EMMA'') system for the specific security that was traded, in a format specified by the MSRB, along with a brief description of the type of information available on that page; and (2) the execution time of the customer transaction, expressed to the minute.[9]

The MSRB developed this proposal, as modified by Amendment No. 1, in coordination with the Financial Industry Regulatory Authority (''FINRA'') to advance the goal of providing additional pricing information, including transaction cost information, to retail customers in corporate, agency, and municipal debt securities.[10] The MSRB and FINRA have worked toward consistent rule requirements in this area, as appropriate, to minimize the operational burdens for dealers that are registered with the MSRB and FINRA members that transact in multiple types of fixed income securities.[11] The MSRB's proposal, as modified by Amendment No. 1, is before the Commission following a process in which the MSRB solicited comment on related proposals on three separate occasions and subsequently incorporated modifications designed to address commenters' concerns after each solicitation.[12]

1. Confirmation Disclosure of Pricing Information

In November, 2014, the MSRB, concurrently with FINRA, published a regulatory notice requesting comment on a proposal (the ''Initial Proposal'') to require disclosure of pricing information for certain same-day, retail-sized principal transactions.[13] In the Initial Proposal, the MSRB proposed to

The Initial Proposal was published concurrently with a similar proposal by FINRA. See also* FINRA *Regulatory Notice* 14–52, Pricing Disclosure in the Fixed Income Markets: FINRA Requests Comment on a Proposed Rule Requiring Confirmation Disclosure of Pricing Information in Fixed Income Securities Transactions (Nov. 2014), *available at: http://www.finra.org/sites/default/files/notice_doc_file_ref/Notice_Regulatory_14-52.pdf.*

require a dealer to disclose on the customer confirmation its trade price for a defined ''reference transaction'' as well as the difference in price between the reference transaction and the customer trade.[14] The MSRB characterized a reference transaction generally as one in which the dealer, as principal, purchases or sells the same security that is the subject of the confirmation on the same date as the customer trade.[15] Under the Initial Proposal, the disclosure obligation would have been triggered only where the dealer was on the same side of the transaction as the customer (as purchaser or seller) and the size of such dealer transaction(s), in total, equaled or exceeded the size of the customer transaction.[16] Designed to capture transactions with retail investors, the Initial Proposal's proposed disclosure obligation was limited to transactions of 100 bonds or less or bonds with a face value of $100,000 or less.[17]

As more fully summarized in the Notice, the MSRB received a number of comments on the Initial Proposal.[18] Some commenters supported the Initial Proposal, stating that the proposed confirmation disclosure would put investors in a better position to assess both whether they are paying fair prices and the quality of the services provided by their dealer, and also could assist investors in detecting improper practices.[19] Some of these commenters urged the MSRB to expand the Initial Proposal so that it would apply to all trades involving retail investors.[20] But many commenters were critical of the Initial Proposal. Some commenters critical of the Initial Proposal believed that the proposed disclosure obligation would confuse retail investors, fail in its attempt to provide investors with useful information, be overly complex and costly for dealers to implement, and impair liquidity in the municipal securities market.[21]

In response to the comments received on the Initial Proposal, the MSRB made several modifications and solicited comment on a revised proposal (the ''Revised Proposal'').[22] In the Revised Proposal, the MSRB proposed to depart from the ''reference price'' approach and instead require that dealers disclose the amount of mark-up/mark-down from the prevailing market price for certain retail customer transactions.[23] Specifically, the MSRB proposed to require a dealer to disclose its mark-up/mark-down if the dealer bought (sold) the security in one or more transactions in an aggregate trade size that met or exceeded the size of the sale (purchase) to (from) the non-institutional customer within two hours of the customer transaction.[24] The disclosed mark-up/mark-down would be required to be expressed both as a total dollar amount and as a percentage of the PMP.[25] Additionally, the MSRB proposed to require the disclosure of two additional data points on all trade confirmations, even those for which mark-up/mark-down disclosure was not required: a security-specific hyperlink to the publicly available municipal security trade data on EMMA, and the time of execution of the customer's trade.[26]

In response to similar comments received on its initial proposal, FINRA also made several modifications and solicited comment on a revised proposal.[27] These modifications, reflected in FINRA's revised proposal, were designed to ensure that the disclosure applied to transactions with retail investors, enhanced the utility of the disclosure, and reduced the operational complexity of providing the disclosure.[28]

Although the MSRB and FINRA took different approaches in their revised proposals—diverging primarily on the questions of whether to require disclosure of reference price or mark-up/mark-down, and whether to specify a same-day or two-hour time frame—each acknowledged the importance of achieving a consistent approach and invited comments on the relative merits and shortcomings of both approaches.[29] Following a second round of comments, publication of a third related proposal by the MSRB,[30] as well as investor testing conducted jointly by the MSRB and FINRA in mid-2016, the MSRB and FINRA made a third round of revisions to achieve a consistent approach and filed the proposed rule changes that are before the Commission.

2. Prevailing Market Price Guidance

In February, 2016, the MSRB published the PMP Proposal soliciting comment on proposed amendments to Rule G–30 to incorporate therein supplemental material to provide guidance on establishing the prevailing market price and calculating mark-ups and mark-downs for principal transactions in municipal securities.[31] In the PMP Proposal, the MSRB generally proposed that the prevailing market price of a municipal security be presumptively established by referring to the dealer's contemporaneous cost as incurred, or contemporaneous proceeds as obtained.[32] If this presumption is either inapplicable or successfully rebutted, the prevailing market price would generally be determined by

[27] FINRA Regulatory Notice 15–36, Pricing Disclosure in the Fixed Income Markets: FINRA Requests Comment on a Revised Proposal Requiring Confirmation Disclosure of Pricing Information in Corporate and Agency Debt Securities Transactions (Oct. 2015) (''FINRA Revised Proposal''), *available at: http://www.finra.org/sites/default/files/notice_doc_file_ref/Regulatory-Notice-15-36.pdf.*

[28] *See* FINRA Proposal, *supra* note 11, at 55508 (explaining FINRA's modifications to its initial proposal in its revised proposal). FINRA's Revised Proposal included the following revisions: (i) Replacing the ''qualifying size'' requirement with an exclusion for transactions with institutional accounts, as defined in FINRA Rule 4512(c); (ii) excluding transactions which are part of fixed-price offerings on the first trading day and which are sold at the fixed-price offering price; (iii) excluding firm-side transactions that are conducted by a department or trading desk that is functionally separate from the retail-side trading desk; (iv) excluding trades where the member's principal trade was executed with an affiliate of the member and the affiliate's position that satisfied this trade was not acquired on the same trading day; (v) requiring members to provide a hyperlink to publicly available corporate and agency debt security trade data disseminated from TRACE on the customer confirmation; (vi) permitting members to omit the reference price in the event of a material change in the price of the security between the time of the member's principal trade and the customer trade; and (vii) permitting members to use alternative methodologies to determine the reference price in complex trade scenarios, provided the methodologies were adequately documented, and consistently applied. *See* FINRA Revised Proposal, *supra* note 27.

[29] *See* Revised Proposal, *supra* note 22. In the Revised Proposal, consistent with FINRA, proposed that certain categories of transactions be excluded from the disclosure requirement, including (i) transactions with institutional accounts; (ii) firm-side transactions if conducted by a ''functionally separate principal trading desk'' that had no knowledge of the non-institutional customer transaction; and (iii) customer transactions at list offering prices. For trades with an affiliate of the firm, the MSRB also proposed to ''look through'' the firm's trade with the affiliate to the affiliate's trade with the third party for purposes of determining whether disclosure would be required. *See id.* at 9, 23.; *see also* FINRA Revised Proposal, *supra* note 27.

[30] *See* MSRB *Regulatory Notice* 2016–07, Request for Comment on Draft Amendments to MSRB Rule G–30 to Provide Guidance on Prevailing Market Price (Feb. 18, 2016), (''PMP Proposal''), *available at: http://www.msrb.org/~/media/Files/Regulatory-Notices/RFCs/2016-07.ashx.*

[32] *Id.* at 4.

referring in sequence to: (1) A hierarchy of pricing factors, including contemporaneous inter-dealer transaction prices, and, if the subject security is an actively traded security, contemporaneous inter-dealer quotations; (2) prices or yields of contemporaneous inter-dealer or institutional transactions in similar securities, and yields from validated contemporaneous quotations in similar securities; and (3) economic models.[33]

As more fully summarized in the Notice, the MSRB received a number of comments on the PMP Proposal.[34] One commenter supported the PMP Proposal, stating that the proposed guidance was generally useful, clear, and consistent with the existing FINRA prevailing market price guidance, but also noted its concern that the PMP Proposal could permit a dealer to determine a misleading prevailing market price when a dealer sources a municipal security from an affiliated entity.[35] Other commenters were critical of the PMP Proposal. Some commenters argued that the hierarchical approach was inappropriate, that the guidance should incorporate more factors for dealers to consider, and that the guidance should have a more limited scope of applicability.[36] More generally, commenters suggested that the MSRB coordinate its efforts with respect to the PMP Proposal with FINRA to develop prevailing market price guidance that is consistent with FINRA's existing guidance in the supplementary material to FINRA Rule 2121.[37] In response to comments received, the MSRB modified or clarified several aspects of the PMP Proposal and filed the proposed rule change that is before the Commission.[38] The modifications and clarifications reflected in the Notice were designed to make the prevailing market price guidance generally less subjective and more easily susceptible to programming, and, at the same time, provide dealers with a greater degree of flexibility with respect to certain elements of the prevailing market price guidance, thus making the PMP Proposal's hierarchical approach more appropriate for the municipal securities market.[39]

B. Proposed Amendments to Rule G–15 and Rule G–30

1. Mark-Up/Mark-Down Proposal

a. Overview

The MSRB proposes to amend Rule G–15, on confirmation, clearance, settlement and other uniform practice requirements with respect to customer transactions. In particular, proposed Rule G–15(a) would require that a retail customer confirmation for a transaction in a municipal security includes the dealer's mark-up/mark-down, to be calculated from the prevailing market price (as determined in compliance with the proposed amendments to Rule G–30) and expressed as a total dollar amount and as a percentage of the prevailing market price, if the dealer also executes one or more offsetting principal transaction(s) on the same trading day as the retail customer, on the same side of the market as the retail customer, in an aggregate size that meets or exceeds the size of the retail customer trade.[40] The MSRB also proposes to require for all transactions in municipal securities with retail customers, irrespective of whether mark-up disclosure is required, that the dealer provide on the confirmation (1) a reference, and if the confirmation is electronic, a hyperlink, to a Web page hosted by the MSRB that contains publicly available trading data from the MSRB's EMMA system for the specific security that was traded, in a format specified by the MSRB, along with a brief description of the type of information available on that page; and (2) the execution time of the customer transaction, expressed to the minute.[41]

Proposed Rule G–15(a) would specify limited exceptions to the mark-up disclosure obligation,[42] and would address how a dealer's transaction with an affiliate is to be considered.[43]

b. Scope

Under proposed Rule G–15(a), the mark-up disclosure requirement would, subject to certain exceptions, apply to transactions in municipal securities where the dealer buys (or sells) a municipal security on a principal basis from (or to) a retail customer and engages in one or more offsetting principal trade(s) on the same trading day in the same security where the size of the dealer's offsetting principal trade(s), in aggregate, equals or exceeds the size of the retail customer trade.[44] A retail customer would be a customer with an account that is not an institutional account, as defined in Rule G–8(a)(xi) (*i.e.,* a non-institutional account).[45] The proposed mark-up disclosure requirement would apply to transactions in municipal securities, other than municipal fund securities (as defined in MSRB Rule D–12).[46] The disclosure obligation would similarly not be required to be disclosed if the retail customer transaction is a list offering transaction (as defined in paragraph (d)(vii)(A) of Rule G–14 RTRS Procedures), or if a dealer's offsetting same-day principal transaction was executed by a trading desk that is functionally separate from the dealer's trading desk that executed the transaction with the retail customer.[47]

Discussing the rationale for the mark-up disclosure requirement, the MSRB states that the proposed rule change would provide meaningful pricing information to retail investors, who would most benefit from such disclosure, while not imposing unduly burdensome disclosure requirements on dealers.[48] Furthermore, the MSRB states its belief that requiring disclosure for retail customers would be appropriate because such customers typically have less ready access to market and pricing information than institutional customers.[49]

With respect to the same-trading-day timeframe of the proposed disclosure obligation, the MSRB states that it believes that the timeframe is appropriate because it will generally make a dealer's determination of the prevailing market price easier.[50] Additionally, the MSRB emphasizes that the same-trading-day timeframe, as opposed to the two-hour timeframe previously proposed, would produce the added benefits of ensuring that more investors receive the disclosure and reducing the likelihood that dealers would alter their trading behavior to avoid the proposed disclosure requirement.[51]

For purposes of determining whether the mark-up disclosure requirement is triggered, proposed Rule G–15(a) also addresses how dealer transactions with affiliates are to be considered. If a dealer

[51] *Id.* at 62949 & n.18.

executes an offsetting principal trade(s) with an affiliate, the rule would require the dealer to determine whether the transaction was an ''arms-length transaction.'' [52] The proposed rule defines an arms-length transaction as ''a transaction that was conducted through a competitive process in which non-affiliate dealers could also participate, and where the affiliate relationship did not influence the price paid or proceeds received by the dealer.'' [53] If the transaction is not an arms-length transaction, the proposed rule would require the dealer to ''look through'' its transaction in a security with its affiliate to the affiliate's transaction(s) with a third-party in the security to determine whether the proposed mark-up disclosure requirement would apply.[54] The MSRB states that sourcing liquidity through a non-arms-length transaction with an affiliate is functionally equivalent to selling out of a dealer's inventory for purposes of the proposed disclosure requirement, and, therefore, it would be appropriate in those circumstances to require a dealer to ''look through'' to the affiliate's transaction(s) with a third-party to determine whether the proposed disclosure requirement is triggered.[55]

The proposed rule change also specifies three exceptions from the proposed disclosure requirement. First, if the offsetting same-day principal trade was executed by a trading desk that is functionally separate from the dealer's trading desk that executed the transaction with the retail customer, the principal trade by the functionally separate trading desk would not trigger the mark-up disclosure requirement.[56] To avail itself of this exception, the dealer must have in place policies and procedures reasonably designed to ensure that the functionally separate trading desk through which the dealer purchase or sale was executed had no knowledge of the retail customer transaction.[57] According to the MSRB, this exception would allow an institutional desk within a dealer to service an institutional customer without triggering the disclosure requirement for an unrelated trade performed by a separate retail desk with the dealer.[58] The MSRB states that this exception is appropriate because it recognizes the operational cost and complexity that may result from using a dealer principal trade executed by a separate, unrelated trading desk as the basis for determining whether the mark-up disclosure requirement would be triggered.[59] Moreover, the MSRB notes its belief that requiring dealers to have policies and procedures in place that are reasonably designed to ensure that the separate trading desk had no knowledge of the retail customer transaction is a sufficiently rigorous safeguard to protect against potential abuse of this exception.[60]

The second exception to the proposed mark-up disclosure requirement arises in the context of list-offering price transactions (as defined in paragraph (d)(vii)(A) of MSRB Rule G–14 RTRS Procedures).[61] According to the MSRB, municipal securities purchased as part of a list-offering transaction are sold at the same published list offering price to all investors and the compensation paid to a dealer is paid by the issuer of the municipal securities and is typically described in the offering document for such securities.[62] The MSRB notes, therefore, that the proposed mark-up disclosure would not be warranted for list-offering price transactions.[63]

The third exception to the proposed mark-up disclosure requirement arises when a dealer transacts in municipal fund securities.[64] Specifically, the proposed mark-up disclosure requirement would not apply to transactions in municipal fund securities.[65] According to the MSRB, dealer compensation for municipal fund securities transactions is typically not in the form of a mark-up or mark-down and, therefore, the MSRB believes that the proposed mark-up disclosure requirement would not have application for transactions in municipal fund securities.[66]

c. Information To Be Disclosed and/or Provided

i. Mark-Up/Mark-Down

Proposed Rule G–15(a) would require the dealer's mark-up or mark-down to be calculated in compliance with Rule G–30 and supplementary material thereunder, including proposed Supplementary Material .06, and expressed as a total dollar amount and as a percentage of the prevailing market price.[67] The MSRB notes that disclosure of both the total dollar amount and the percentage of the PMP is supported by investor testing, which found the investors believed such disclosures would be useful.[68] According to the MSRB, it would be appropriate to require dealers to calculate the mark-up in compliance with Rule G–30, as new Supplementary Material .06 would provide extensive guidance on how to calculate the mark-up for transactions in municipal securities, including transactions for which disclosure would be required under the proposed rule change, and incorporates a presumption that prevailing market price is established by reference to contemporaneous cost or proceeds.[69] The MSRB recognizes that the determination of prevailing market price for a particular security may not be identical across dealers, but adds that dealers would be expected to have reasonable policies and procedures in place to determine prevailing market price in a manner consistent with Rule G–30, and that such policies and procedures would be applied consistently across customers.[70]

In the Notice, the MSRB acknowledges that certain dealers provide trade confirmations on an intra-day basis, and states that nothing in the proposed rule change is meant to delay a dealer's confirmation generation process.[71] To that end, the MSRB states that a dealer may determine, as a final matter for disclosure purposes, the prevailing market price based on the information the dealer has, based on the use of reasonable diligence as required by proposed Rule G–30, at the time of the dealer's generation of the disclosure.[72]

ii. Reference/Hyperlink to EMMA and Time of Trade

The proposed rule change, as modified by Amendment No. 1, would require a dealer to provide, in a format specified by the MSRB, a reference and, if the confirmation is electronic, a hyperlink to a Web page on EMMA that contains publicly available trading data for the specific security that was traded, along with a brief description of the type of information available on the

[52] *Id.* at 62949.

[53] *See* Amendment No. 1, *supra* note 7, at 16.

[54] *See* Notice, *supra* note 3, at 62949. The MSRB adds that, in a non-arm's length transaction with an affiliate, the dealer also would be required to ''look through'' to the affiliate's transaction with a third-party and related cost or proceeds by the affiliate as the basis for determining the dealer's calculation of the mark-up/mark-down pursuant to the proposed guidance. *See id.*

[72] *Id.*

page.[73] This disclosure requirement would be limited to transactions with retail customers, but would apply to all such transactions regardless of whether a mark-up disclosure is required for the transaction.[74] According to the MSRB, providing a security-specific URL on a trade confirmation would provide retail investors with a broad picture of the market for a security on a given day and would increase retail investor awareness of, and ability to access, this information.[75]

The proposed rule change, as modified by Amendment No. 1, would also require a dealer to disclose the time of trade execution (expressed to the minute) on all retail customer trade confirmations, other than those for transactions in municipal fund securities.[76] According to the MSRB, dealers are currently obligated to either disclose the time of execution to their customers or include a statement on trade confirmations that such information is available upon written request thereof, and the proposed rule change essentially deletes the option to provide this information upon request with respect to retail customers.[77] The MSRB believes that time of execution disclosure, together with the provision of a security-specific reference or hyperlink to EMMA on retail customer confirmations, would provide a retail customer a comprehensive view of the market for its security, including the market at the time of trade.[78] Moreover, the MSRB states that these disclosures would also reduce the risk that a customer may overly focus on dealer compensation at the expense of other factors relevant to the investment decision.[79]

2. Prevailing Market Price Proposal

a. Overview

The MSRB proposes to add new supplementary material (paragraph .06 entitled—''Mark-up Policy'') and amend existing supplementary material under Rule G–30, on prices and commissions, to provide guidance on determining the prevailing market price and calculating mark-ups and mark-downs for principal transactions in municipal securities (the ''proposed guidance'').[80] According to the MSRB, the proposed guidance would promote consistent compliance by dealers with their existing fair-pricing obligations under MSRB rules in a manner that would be generally harmonized with the approach taken in other fixed income markets, and would support effective compliance with the proposed amendments to Rule G–15(a).[81] The proposed guidance sets forth a sequence of criteria and procedures that a dealer must consider when determining the prevailing market price for a municipal security.

In general, the proposed guidance provides that the prevailing market price of a municipal security be presumptively determined by referring to the dealer's contemporaneous cost as incurred, or contemporaneous proceeds as obtained; provided, however, if this presumption is either inapplicable or successfully rebutted, the dealer must, among other things, consider, in order (1) a hierarchy of pricing factors, including contemporaneous inter-dealer transaction prices, and, if the subject security is an actively traded security, contemporaneous inter-dealer quotations; (2) prices or yields from contemporaneous inter-dealer or institutional transactions in similar securities, and yields from validated contemporaneous quotations in similar securities; and (3) economic models.[82] The MSRB states that the presumption in favor of contemporaneous costs incurred or proceeds obtained could be overcome in limited circumstances.[83] Moreover, the MSRB notes that the proposed guidance is substantially similar to and generally harmonized with FINRA's existing prevailing market price guidance in the supplementary material to FINRA Rule 2121.[84]

b. Presumptive Use of Contemporaneous Cost

The proposed guidance provides that the best measure of prevailing market price is presumptively established by referring to the dealer's contemporaneous cost (proceeds).[85] Under the proposed guidance, a dealer's cost is (or proceeds are) considered contemporaneous if the transaction occurs close enough in time to the subject transaction that it would reasonably be expected to reflect the current market price for the municipal security.[86] According to the MSRB, reference to a dealer's contemporaneous cost or proceeds in determining the prevailing market price reflects a recognition of the principle that the prices paid or received for a security by a dealer in actual transactions closely related in time are normally a highly reliable indicator of the prevailing market price and that the burden is appropriately on the dealer to establish the contrary.[87]

In the Notice, the MSRB provides guidance to dealers for determining the prevailing market price for a municipal security when a dealer does not have contemporaneous cost or proceeds from an inter-dealer transaction, but instead has contemporaneous cost or proceeds from a retail customer transaction. According to the MSRB, when a dealer's contemporaneous cost or proceeds are derived from a retail customer transaction, the dealer should refer to such contemporaneous cost or proceeds and make an adjustment for any mark-up or mark-down charged in that customer transaction.[88] The MSRB notes that this approach is supported by relevant case law and is consistent with the text of the proposed guidance because under the proposed guidance the presumptive prevailing market price is, through this methodology, established ''by referring to'' the dealer's contemporaneous cost or proceeds.[89] Moreover, the MSRB notes that this approach is consistent with the fundamental principle underlying the proposed guidance because it results in a reasonable proxy for what the dealer's contemporaneous cost or proceeds would have been in an inter-dealer transaction.[90] Finally, the MSRB states that because this adjustment occurs at the first level of the analysis, the prevailing market price so determined from this methodology by the dealer would be presumed to be the prevailing market price for any contemporaneous transactions with the same strength of the presumption that applies to prices from inter-dealer transactions.[91]

c. Criteria for Overcoming Presumption

The proposed guidance recognizes that a dealer may look to other evidence of the prevailing market price (other than contemporaneous cost or contemporaneous proceeds) only where the dealer, when selling (or buying) the security, made no contemporaneous purchases (sales) in the municipal security or can show that in the particular circumstances the dealer's contemporaneous cost (proceeds) is not indicative of the prevailing market

price.[92] In such circumstances, the dealer may be able to show that its contemporaneous cost (when it is making a sale to a customer) or proceeds (when it is making a purchase from a customer) are not indicative of the prevailing market price, and thus overcome the presumption, in instances where: (i) Interest rates changed to a degree that such change would reasonably cause a change in the municipal security's pricing; (ii) the credit quality of the municipal security changed significantly; or (iii) news was issued or otherwise distributed and known to the marketplace that had an effect on the perceived value of the municipal security.[93]

d. Pricing Alternatives to Contemporaneous Cost

Under the proposed guidance, if a dealer establishes that its cost is (or proceeds are) not contemporaneous or if the dealer has overcome the presumption that its contemporaneous cost (proceeds) provides the best measure of the prevailing market price, the dealer must consider, in the order listed (subject to Supplementary Material .06(a)(viii), on isolated transactions and quotations), a hierarchy of three additional types of pricing information, referred to herein as the hierarchy of pricing factors: (i) Prices of any contemporaneous inter-dealer transactions in the municipal security; (ii) prices of contemporaneous dealer purchases (or sales) in the municipal security from (or to) institutional accounts with which any dealer regularly effects transactions in the same municipal security; or (iii) if an actively traded security, contemporaneous bid (or offer) quotations for the municipal security made through an inter-dealer mechanism, through which transactions generally occur at displayed quotations.[94] The proposed guidance further provides that in reviewing the available pricing information for each level in the hierarchy of pricing factors, the relative weight of the information depends on the facts and circumstances of the comparison transaction or quotation.[95] The MSRB also states that because of the lack of active trading in many municipal securities, these factors may frequently not be available, and, as such, dealers may often need to consult factors further down the sequence of criteria, such as ''similar'' securities or economic models to identify sufficient relevant and probative pricing information to establish the prevailing market price of a municipal security.[96]

e. Additional Alternatives to Contemporaneous Cost

If none of the three ''hierarchy of pricing factors'' is available, the proposed guidance provides that a dealer may take into consideration a non-exclusive list of factors that are generally analogous to those set forth under the hierarchy of pricing factors, but applied here to prices and yields of specifically defined ''similar'' securities.[97] Unlike the factors set forth in the hierarchy of pricing factors, which must be considered in specified order, the factors related to similar securities are not required to be considered in any particular order or combination.[98] The non-exclusive factors are:

- Prices, or yields calculated from prices, of contemporaneous inter-dealer transactions in a specifically defined ''similar'' municipal security;
- Prices, or yields calculated from prices, of contemporaneous dealer purchase (sale) transactions in a ''similar'' municipal security with institutional accounts with which any dealer regularly effects transactions in the ''similar'' municipal security with respect to customer mark-ups (mark-downs); and
- Yields calculated from validated contemporaneous inter-dealer bid (offer) quotations in ''similar'' municipal securities for customer mark-ups (mark-downs).[99]

With respect to the similar security analysis, the MSRB states that the relative weight of the pricing information obtained through this analysis depends on the facts and circumstances surrounding the comparison transaction, such as whether the dealer in the comparison transaction was on the same side of the market as the dealer in the subject transaction, the timeliness of the information, and, with respect to the final bulleted factor, the relative spread of the quotations in the similar municipal security to the quotations in the subject security.[100]

The proposed guidance provides that a ''similar'' municipal security should be sufficiently similar to the subject security that it would serve as a reasonable alternative investment for the investor.[101] At a minimum, the municipal security or securities should be sufficiently similar that a market yield for the subject security can be fairly estimated from the yields of the ''similar'' security or securities.[102] The proposed guidance also sets forth a set of non-exclusive factors that a dealer may use in determining the degree to which a security is ''similar.'' [103] These include: (i) Credit quality considerations; (ii) the extent to which the spread at which the ''similar'' municipal security trades is comparable to the spread at which the subject security trades; (iii) general structural characteristics and provisions of the issue; (iv) technical factors such as the size of the issue, the float or recent turnover of the issue, and legal restrictions on transferability as compared to the subject security; and (v) the extent to which the federal and/or state tax treatment of the ''similar'' municipal security is comparable to such tax treatment of the subject security.[104]

Due to the unique characteristics of the municipal securities market, the MSRB expects that in order for a security to qualify as sufficiently ''similar'' to the subject security, such security will have to be at least highly similar to the subject security with respect to nearly all of the listed ''similar'' security factors that are relevant to the subject security at issue.[105] The MSRB believes that recognizing this practical aspect of the municipal securities market supports a more rational comparison of a municipal security to only those that are likely to produce relevant and probative pricing information in determining the prevailing market price of the subject security.[106]

f. Economic Models

If it is not possible to obtain information concerning the prevailing market price of the subject security by applying any of the factors discussed above, the proposed guidance permits a dealer to consider as a factor in assessing the prevailing market price of a security the prices or yields derived from economic models.[107] Under the proposed guidance, such economic models may take into account measures such as reported trade prices, credit quality, interest rates, industry sector, time to maturity, call provisions and any other embedded options, coupon

rate, face value, and may consider all applicable pricing terms and conventions used.[108] Further, the proposed guidance, as clarified in the MSRB Response, requires that when a dealer utilizes a third-party pricing model it must have a reasonable basis for believing that the third-party pricing service's pricing methodologies produce evaluated prices that reflect actual prevailing market prices.[109] In the MSRB Response, the MSRB cautions dealers that they have the ultimate responsibility to determine the market value of a security and ensure the fairness and reasonableness of a price and any related mark-up or mark-down, and suggests that a dealer, in conducting its due diligence on a pricing service, may wish to consider the inputs, methods, models, and assumptions used by the pricing service to determine its evaluated prices, and how these criteria are affected as market conditions change.[110] The MSRB contrasts its treatment of a dealer's use of an economic model provided by a third-party with the standard for a dealer's use of an economic model that the dealer uses or has developed internally. If a dealer relies on pricing information from an economic model the dealer uses or developed internally, the dealer must be able to provide information that was used on the day of the transaction to develop the pricing information (*i.e.,* the data that were input and the data that the model generated and the dealer used to arrive at the prevailing market price).[111]

g. Isolated Transactions or Quotations

Under the proposed guidance, isolated transactions or isolated quotations would generally have little or no weight or relevance in establishing the prevailing market price of a municipal security.[112] The MSRB notes that due to the unique nature of the municipal securities market, isolated transactions and quotations may be more prevalent therein than in other fixed income markets, and explicitly recognizes that an off-market transaction may qualify as an ''isolated transaction'' under the proposed guidance.[113] Furthermore, the proposed guidance also provides that in considering yields of ''similar'' securities, except in extraordinary circumstances, a dealer may not rely exclusively on isolated transactions or a limited number of transactions that are not fairly representative of the yields in ''similar'' municipal securities taken as a whole.[114]

C. Description of Proposed Amendment No. 1

In response to commenters' suggestions and, in part, to harmonize the proposed rule change with the FINRA Proposal, the MSRB proposes in Amendment No. 1 to amend the proposed rule change. Specifically, the MSRB proposes to amend the proposed rule change to: (1) Clarify the trigger requirements for the proposed mark-up disclosure obligation by inserting the term ''offsetting'' to proposed Rule G–15(a)(i)(F)(1)(b) and thereby make clear the conditions precedent for triggering the mark-up disclosure obligation; [115] (2) replace the requirement for dealers to disclose a hyperlink to a specific existing page on EMMA—the ''Security Details'' page—with a more generic requirement to disclose, in a format specified by the MSRB, a reference and, if the confirmation is electronic, a hyperlink to a Web page on EMMA that contains publicly available trading data for the specific security that was traded; [116] (3) limit a dealer's obligation to disclose the time of trade execution to only retail customers, as opposed to retail and institutional customers (as proposed in the Notice); [117] (4) revise proposed Supplementary Material .06(b)(ii)(B) under Rule G–30 to include reference to ''an applicable index'' and thereby include language to address an appropriate spread relied upon for tax-exempt municipal securities; [118] and (5) extend the implementation date for the proposed rule change from no later than one year following Commission approval of the proposed rule change to no later than 18 months following the Commission's approval thereof.[119]

D. Effective Date of the Proposed Rule Change

The MSRB represents that it will announce an effective date of the proposed rule change in a *regulatory notice* to be published no later than 90 days following Commission approval of the proposed rule change.[120] The MSRB initially proposed that the effective date would be no later than 12 months following Commission approval of the proposed rule change. In Amendment No. 1, the MSRB proposes to extend the effective date so that it would be 18 months following Commission approval of the proposed rule change.[121]

III. Summary of Comments, MSRB's Response and the Investor Advocate's Recommendation

The Commission received seven comment letters regarding the proposed rule change.[122] Many of the commenters expressed support for the goals of the proposal.[123] Many commenters, however, expressed some concern about implementing the proposal and requested guidance or certain changes to the proposal to facilitate and reduce the costs of implementation.[124] Areas of concern included: (1) The scope of the proposal; (2) methodology and timing for determining the PMP; (3) acceptable ways to present mark-up/mark-down disclosure information on the customer confirmations; (4) areas of inconsistency with FINRA's mark-up disclosure proposal; [125] and (5) the effective date of the proposed rule change and the costs of implementation. Additionally, the Investor Advocate submitted to the public comment file its recommendation letter (the ''Investor Advocate Letter''), in which the Investor Advocate recommended that the Commission approve the proposed rule change.[126] The comments received with respect to this proposal, as well as the MSRB's responses, are summarized below, followed by a summary of the Investor Advocate Letter.

A. Scope of the Proposal

Several commenters addressed the same-day offsetting trade aspect of the proposal's scope. Specifically, commenters raised concerns that the same-day nature of the proposal would require a member to look forward to transactions occurring after the execution of a retail customer trade to determine whether that trade requires mark-up/mark-down disclosure, and

[123] *See* SIFMA Letter, at 2 (expressing support for the MSRB's objective to enhance price transparency for retail investors); Wells Fargo Letter, at 3 (supporting the MSRB's efforts to improve price transparency in municipal markets); Fidelity Letter, at 2 (noting Fidelity's appreciation of regulatory efforts to improve price transparency in the fixed income markets); BDA Letter, at 1 (accepting the value of increasing market and price transparency for investors); RW Smith Letter, at 1 (supporting the objective of enhancing price transparency for market participants).

[124] Two commenters suggested that the MSRB would be best served by implementing an alternative disclosure regime focused on providing information about prevailing market conditions through EMMA. *See* SIFMA Letter, at 2; Wells Fargo Letter, at 2.

[125] *See* FINRA Proposal, *supra* note 11.

[126] *See* Investor Advocate Letter, *supra* note 5.

that this would impose costs on members and disrupt the confirmation process.[127] One commenter urged the MSRB to eliminate the ''look-forward requirement'' so dealers could determine the need for disclosure at the time of trade.[128] Another commenter advocated for eliminating not only the look-forward aspect of the proposal, but also the look-back aspect.[129] According to this commenter, mark-up/mark-down disclosure should be calculated by reference to PMP in ''all instances'' and provided for all retail customer transactions ''regardless of their origins.'' [130]

In response, the MSRB stated that, while dealers could incur costs to identify trades subject to disclosure, it believed that disclosure based on a same-day trigger would deliver important benefits associated with increased pricing transparency.[131] The MSRB also noted that it provided guidance in the Notice intended to clarify the timing of the mark-up determination for dealers that voluntarily determine to provide mark-up disclosure more broadly than specifically required by the proposed rule change.[132]

One commenter asked whether the confirmation disclosure requirement is triggered only when a customer trade has an offsetting principal trade or if a dealer must continue to disclose its mark-up/mark-down until the triggering trade has been exhausted, at which point the dealer may choose to continue to disclose or not.[133]

In its response, the MSRB confirmed that there must be offsetting customer and principal trades in order to trigger the mark-up disclosure obligation.[134] The MSRB stated that it was submitting Amendment No. 1 to ensure rule text clarity on this point by adding the word ''offsetting'' to the trigger language.[135] By way of example, the MSRB explained that if a dealer purchased 100 bonds at 9:30 a.m., and then satisfied three customer buy orders for 50 bonds each in the same security on the same day without purchasing any more of the bonds, the proposal would require mark-up disclosure on two of the three trades, since one of the trades would have been satisfied by selling out of the dealer's inventory rather than through an offsetting principal transaction by the dealer.[136]

One commenter questioned how the proposal would apply to certain small institutions that may fit within the MSRB's definition of ''non-institutional customer,'' but trade via accounts that settle on a delivery versus payment/receive versus payment (DVP/RVP) basis and rely on confirmations generated through the Depository Trust and Clearing Corporation's institutional delivery (DTCC ID) system.[137] Because it is possible for those institutions to receive confirms through the DTCC ID process, the commenter asked the MSRB to clarify whether its proposal requires modifications to the DTCC ID system, or, in the alternative, to exempt DVP/RVP accounts from the proposed rule change.[138]

The MSRB responded that it believes that investors who do not meet the ''institutional account'' definition should gain the benefits and protections of the proposed disclosures.[139] Accordingly, the MSRB stated that it does not believe exempting certain classes of ''non-institutional investors'' from receiving the proposed disclosures is desirable or consistent with the intended goals of the proposed rule change.[140]

B. Mark-Up/Mark-Down Disclosure

1. Determination of PMP and Calculation of Mark-Up/Mark-Down in Accordance With Rule G–30

Commenters expressed concern about the need to determine PMP in accordance with Rule G–30, believing that this requirement would be operationally burdensome.[141] These commenters requested that the MSRB provide additional guidance on how dealers may determine PMP and calculate mark-ups/mark-downs to facilitate compliance with this rule.[142] Specifically, two commenters believed that dealers would need to automate the determination of PMP, but that automation of certain factors in the proposed guidance would be impracticable.[143] One commenter believed that it would be ''simply not practicable'' to automate the PMP guidance set forth in Rule G–30 in a manner that would allow dealers to calculate and disclose mark-ups/mark-downs on an automated basis.[144] In particular, these commenters emphasized that it would be difficult to automate factors in the waterfall that require a subjective analysis of facts and circumstances.[145]

In addition, a commenter also requested clarification from the MSRB that dealers may adopt ''a variety of other reasonable methodologies to automate the calculation of PMP for disclosure purposes, including but not limited to pulling prices from . . . third-party pricing vendors, the dealer's trading book or inventory market-to-market and contemporaneous trades by the dealer in the given security, or some variation thereof.'' [146] This commenter further requested that it be deemed reasonable that dealers may ''calculate PMP solely on the contemporaneous cost of the offsetting transaction(s) without further automating the waterfall.'' [147]

The MSRB responded by initially noting that dealers are not required to automate the PMP determination to comply with the proposed rule change.[148] The MSRB acknowledged, however, that many dealers may need to enhance existing technology to determine PMP in a consistent and efficient manner.[149] To help these dealers determine PMP, the MSRB cited to explanations given in the proposed rule change as well as additional clarifications contained in the MSRB Response on such topics as the determination of similar securities and the use of economic models.[150] The MSRB also stated that it may be reasonable for a dealer that chooses largely to automate the process of determining prevailing market price to establish, in its policies and procedures, objective criteria reasonably designed to implement aspects of the PMP waterfall that are not prescribed and for which dealers would have discretion to

[150] *Id.* at 7–8.

exercise a degree of subjectivity if the determination were not automated.[151]

On the subject of economic models, the MSRB explained that if a dealer considers economic models as a factor in determining the PMP of a security (which it is permitted to do if the PMP cannot be obtained by applying any of the factors at the higher levels of the waterfall), the dealer, if using an internal economic model, must be able to provide the information that was used on the day of the transaction to develop the pricing information.[152] If the dealer is using a third-party economic model, then the dealer would typically not have access to such information but the dealer still retains the ultimate responsibility to ensure the fairness and reasonableness of a price and any mark-up or mark-down under Rule G–30.[153] The MSRB also explained that, before using a third-party pricing service, a dealer should have a reasonable basis for believing that third-party's pricing service produces evaluated prices that reflect actual prevailing market prices. The MSRB cautioned that such basis would not exist if a periodic review revealed a substantial difference between evaluated prices generated by the third-party pricing service and the prices at which actual transactions in the relevant securities occurred.[154] The MSRB also provided a list of factors for dealers to consider in conducting its due diligence and selecting a price service.[155]

On the subject of alternative methods of determining PMP, the MSRB reaffirmed that dealers must have reasonable policies and procedures in place to determine PMP, and that those policies and procedures must be designed to implement the prevailing market price guidance, not to create an alternative manner of determining PMP.[156] The MSRB also stated that such policies and procedures must be reasonably designed to implement all applicable components of the proposed guidance, such as provisions regarding functionally separate trading desks, inter-affiliate transactions, the calculation of imputed mark-ups and mark-downs, the determination of similar securities, and the use of economic models.[157]

Additionally, one commenter sought acknowledgment that different dealers may reach different conclusions as to whether securities are similar and that dealers may adopt reasonable policies and procedures to make that determination.[158] Another commenter sought clarification on the use of ''isolated'' transactions under the proposed guidance, noting that rule text in the proposed rule change provided that a dealer may give isolated transactions little consideration in establishing PMP, but the language in the proposal suggested a more restrictive approach.[159] Several commenters also requested that the MSRB revise the proposed guidance to more accurately describe the concept of spread in the municipal market.[160] The proposed guidance (as provided in the Notice) includes as one of its non-exclusive list of relevant factors to determine the degree to which a municipal security is similar, the factor of ''the extent to which the spread (*i.e.,* the spread over U.S. Treasury securities of a similar duration) at which the 'similar' municipal security trades is comparable to the spread at which the subject security trades.'' Commenters noted that only taxable municipal bonds trade at a spread to Treasuries.[161]

On the subject of similar securities, the MSRB confirmed that different dealers may reasonably reach different conclusions as to whether securities are similar, and that dealers may adopt reasonable policies and procedures to consistently implement the guidance.[162] On the ''isolated'' transactions issue, the MSRB noted that the descriptive language included in the filing paraphrased the rule text and the actual rule text controls.[163] The MSRB clarified that a dealer may give little or no weight to pricing information resulting from an isolated transaction; the weight, if any, given to such a transaction is dependent on the facts and circumstances surrounding the transaction.[164] With respect to the proposed guidance's suggestion that a similar security analysis consider the spread over U.S. Treasury securities, the MSRB agreed to amend the proposed guidance to include language relevant to the appropriate spread relied upon for non-taxable municipal bonds.[165] The MSRB also agreed to amend the proposed guidance language to clarify that a dealer may also consider the extent to which a spread over the ''applicable index'' at which the similar municipal security trades is comparable.[166]

2. Fair Pricing and Time of Determination of Prevailing Market Price

Commenters stated that the proposed guidance in the proposed rule change should apply solely for the purposes of calculating the mark-up or mark-down to be disclosed, and not ''as an overarching fair pricing methodology under Rule G–30.'' [167] In particular, one commenter stated its belief that the proposed guidance ''originated as a necessary technical clarification solely as part of the retail disclosure requirement,'' and was not general guidance applicable to all trades.[168] In the alternative, such commenter requested that if the MSRB planned to apply the proposed guidance for fair pricing purposes, it should only apply for retail customers, because such a limitation would be consistent with the terms of the proposed mark-up disclosure requirement and be more closely aligned with the prevailing market price guidance provided by FINRA in the supplementary material to FINRA Rule 2121.[169]

In addition, one commenter addressed the issue of timing of the PMP determination, requesting that the MSRB proposal allow determination of the PMP at the time of trade for all processes, including those that capture confirm-related data in real-time, even if the actual issuance of the confirm is not until the end of the day.[170]

The MSRB responded to the fair pricing issue by stating that a dealer that uses reasonable diligence to determine the PMP of a municipal security in accordance with the proposed guidance, and then discloses a mark-up based on such determination, should generally be able to rely on that determination for fair pricing purposes.[171] The MSRB explained that it would be confusing for investors to learn that the mark-up or mark-down disclosed on customer confirmations is not necessarily the mark-up or mark-down examined by regulators for fair pricing analysis.[172]

[172] *Id.*

The MSRB also rejected commenter request to limit use of the proposed guidance for fair pricing purposes to retail customers.[173] The MSRB explained that such request was inappropriate because while certain institutional customers, like sophisticated municipal market professionals, could opt out of certain fair pricing protections for agency transactions, such opt-out was not possible for principal transactions.[174] Because the determination of PMP is critical to fair pricing determinations in principal transactions, the MSRB stated that it was not appropriate to limit the proposed guidance to transactions with retail customers only.[175]

Responding to commenter concern, the MSRB confirmed that a dealer may determine the PMP for disclosure purposes based on information the dealer has at the time the dealer inputs the information into its systems to generate the mark-up disclosure, even when the actual issuance of the confirmation is not until the end of the day, as long as the dealer consistently applies its relevant policies and procedures in the same manner for all retail customers.[176] The MSRB also provided an example providing guidance on both timing and fair pricing issues.[177]

C. Presentation of Mark-Up/Mark-Down Information on Customer Confirmations

The MSRB proposes to require that mark-ups/mark-downs be disclosed on confirmations as a total dollar amount (*i.e.,* the dollar difference between the customer's price and the security's PMP, and as a percentage amount, (*i.e.,* the mark-up's percentage of the security's PMP). Several commenters noted that the new disclosures required by the proposal might cause investor confusion, as different members may determine the PMP for the same security differently, resulting in a lack of comparability or consistency across customer confirmations.[178]

Commenters suggested different approaches to resolve potential investor confusion. Several commenters, for instance, argued that dealers should be permitted to label or qualify the mark-up/mark-down disclosed on the confirmation as ''estimated'' or ''approximate.'' [179] Other commenters suggested that dealers be allowed to add a description of the dealer's process for calculating mark-ups and mark-downs.[180] Others suggested that dealers be permitted to describe the meaning of the mark-up/mark-down,[181] or to indicate that it may not reflect profit to the dealer [182] or the exact compensation to the dealer.[183] Two commenters suggested that to ensure consistent disclosure, any explanatory text that dealers may include on customer confirmations should be drafted and prepared by the MSRB.[184]

The MSRB responded by stating that dealers should not be permitted to label the required mark-up/mark-down disclosure as ''estimated'' or ''approximate'', because such labels have the potential to unduly suggest an unreliability of the disclosures or otherwise diminish their value.[185] However, the MSRB agreed that a dealer should be permitted to include explanatory language or disclosures on confirmations to provide context and understanding for investors receiving mark-up and mark-down disclosures, such as an explanation of how the disclosure was derived.[186] In response to commenters' requests for the MSRB to provide standardized or sample disclosures that would be appropriate under the proposal, the MSRB stated that dealers should have the flexibility to determine how to craft such language for their customers, as long as such explanatory language is accurate and not misleading.[187]

D. Time of Execution, Hyperlink to EMMA, and Harmonization With the FINRA Proposal

The MSRB's proposed rule change, as provided in the Notice, requires dealers to include on all trade confirmations a time-of-trade disclosure and on all trade confirmations a CUSIP-specific hyperlink to EMMA's ''security details'' page for that relevant municipal security. Notably, these disclosure requirements exist irrespective of whether the dealer has an obligation to disclose its mark-up or mark-down on a particular transaction. As originally proposed, the FINRA rule change did not contain a similar disclosure requirement. Several commenters, citing a desire for greater harmonization between FINRA and the MSRB, suggested that the MSRB remove or delay implementation of the time-of-trade and CUSIP-specific hyperlink requirements.[188] Other commenters suggested changes to the requirement, including replacing the CUSIP-specific hyperlink with a more general hyperlink to EMMA, which they argued would: Reduce confusion by minimizing the risk of typographical errors made by investors who receive paper confirmations and have to manually type of the hyperlink in a web browser, avoid issues that arise if the web addresses to security-specific pages change, reduce the amount of space needed on the confirmation to fulfill the disclosure requirement, and generally ease the programming and operational burden of compliance.[189]

One commenter also sought guidance on how dealers should implement the time-of-execution disclosure in adviser block-trade executions that are later allocated to that adviser's customers.[190] That same commenter also recommended that dealers should be permitted to combine the security-specific hyperlink disclosure with the official statement delivery obligation for primary issues under MSRB Rule G–32 in order to avoid potentially lengthy and duplicative disclosures.[191]

In response, the MSRB modified the proposed rule change in Amendment No. 1 to harmonize the MSRB's and FINRA's hyperlink and time of execution standards in all relevant, substantive, and technical respects.[192] The harmonized proposals would require the disclosure of the time of trade or time of execution on retail customer confirmations, regardless of whether the dealer would be required to disclosure the mark-up or mark-down on the customer transaction.[193] The proposals would also require a reference and hyperlink to a Web page on FINRA's Trade Reporting Compliance Engine (''TRACE'') or EMMA, as applicable, containing trading data for the specific security that was traded, along with a brief description of the type of information available on that page.[194]

[194] *Id.*

Further, to promote harmonization and enhance the user experience, the MSRB agreed to make a technical amendment to its proposed hyperlink requirement, replacing the requirement for a specific Web page hyperlink with a more generic requirement to hyperlink to a Web page on EMMA, in a format specified by the MSRB, containing publicly available trading data for the traded security.[195] The MSRB explained that this change in language is meant to more closely harmonize with the language in FINRA's proposal, and that, by using more general language to describe the hyperlink requirement, the MSRB and FINRA retain some flexibility to consider ways to make the landing page for investors accessing EMMA and TRACE via the hyperlink on confirmations more accessible and user friendly.[196] The MSRB also agreed, in the interest of harmonization and to provide some implementation relief, to amend the proposed rule change to require dealers to disclose time of execution for only retail customer confirmations, explaining that institutional customers are already likely to know the time of execution of their transaction.[197]

In response to comments about investor confusion and potential error caused by the difficulty in typing in a lengthy hyperlink, the MSRB developed a more succinct EMMA URL for direct access to a security-specific page on EMMA. The MSRB stated its belief that this succinct URL, which can be used for the proposed disclosure, is easier to use and would decrease the number of characters an investor may need to type or input to access to relevant page on EMMA.[198] Addressing commenter concerns that such a hyperlink may expire, the MSRB also stated that it does not anticipate any future changes to the protocol for the succinct URL, and therefore it believes that hyperlinks that use the succinct URL will continue to function indefinitely.[199] The MSRB also confirmed that the disclosure of a security-specific hyperlink to EMMA would satisfy a dealer's official statement delivery obligation for primary issues under Rule G–32, as long as the hyperlink and URL are accompanied by the information required under Rule G–32(a)(iii).[200]

E. *Anticipated Costs of Implementing the Proposed Rule Change by the Proposed Effective Date*

Most commenters stated that the proposed rule change was too complex and costly to implement by the proposed effective date—one year from Commission approval of the proposed rule change. Commenters particularly emphasized the significant systems and programming modifications that they believed dealers and their third-party vendors would need to undertake in order to implement the proposal.[201] They also asserted that it would be particularly challenging to implement such changes in light of other regulatory initiatives slated to become effective in the near future.[202] As a result, commenters suggested implementation periods of at least two years and often longer.[203] In response, the MSRB agreed to extend the implementation time to provide that the effective date of the proposed rule change will be no later than eighteen months following Commission approval.[204]

Numerous commenters also expressed concern about the total cost of the proposed rule change.[205] Two commenters questioned whether the costs of implementing the rule may outweigh the benefits, and one questioned whether FINRA and the MSRB had conducted a cost-benefit analysis.[206] Several commenters also expressed the belief that the heaviest costs and burdens would fall on smaller dealers and may lead to dealers to reduce head count or exit the industry.[207] Commenters suggested alternative proposals that they viewed as achieving similar goals in a less costly manner, including focusing more on developing EMMA to achieve greater transparency.[208] One commenter also noted its belief that there was no evidence the MSRB considered or measured the risk that its proposal would impair liquidity in the municipal security market, or that the proposal would cause some principal-holding dealers to shift towards a riskless principal model.[209]

The MSRB acknowledged that the proposed rule change would impose burdens and costs on dealers.[210] The MSRB also noted that, in response to earlier comments it had received, it had already acknowledged and recognized the costs in its filing supporting the proposed rule change.[211] These costs included those that would be incurred by dealers to develop a methodology to satisfy the disclosure requirement, identify the trades subject to the disclosure requirement, and convey the required mark-up and disclosure information to the customer.[212] The MSRB also acknowledged that it had received some cost estimates from one commenter.[213]

However, while recognizing these costs, the MSRB reiterated its belief that the proposed rule change reflects the lowest overall cost approach to achieving a worthy regulatory objective. It noted that retail investors are currently limited in their ability to compare transaction costs associated with transactions in municipal securities.[214] It also noted that mark-up and mark-down disclosure may improve investor confidence, allow customers to better evaluate the services provided by dealers, promote pricing transparency, improve communication between dealers and customers, and make the enforcement of Rule G–30 more efficient.[215] Finally, the MSRB noted that it had engaged in a multi-year rulemaking process on this proposal, had evaluated numerous reasonable regulatory alternatives, and had implemented several changes to make the rule less costly and burdensome.[216]

F. Recommendation of the Investor Advocate

As noted above, the Investor Advocate submitted to the public comment file its recommendation to the Commission that the Commission approve the proposed rule change.[217] In its recommendation, the Investor Advocate stated its belief that the proposed rule change's ''enhancements to pricing disclosure in the fixed income markets are long overdue and will greatly benefit retail investors.'' [218] Specifically, the Investor Advocate noted that the required mark-up disclosures will better equip retail investors ''to evaluate transactions and the quality of service provided to them by a firm,'' help regulators and retail investors detect improper dealer practices, and make it less likely that dealers will charge excessive mark-ups.[219] Ultimately, the Investor Advocate focused its attention on ''four key issues''—consistency of approach between the MSRB and FINRA; same-day disclosure window; the use of prevailing market price as the basis for calculating mark-ups; and the need for dealers to look through transactions with affiliates—as the focus of its review, and stated ''each of these issues has been resolved to our satisfaction'' in the proposed rule change.[220]

With respect to the MSRB and FINRA adopting consistent rules related to confirmation disclosure, the Investor Advocate highlighted that the proposed rule change and the FINRA Proposal ''provide a coordinated and consistent approach to mark-up disclosure in corporate and municipal bond transactions.'' [221] Accordingly, the Investor Advocate concluded that ''this deliberative approach will lead to consistent disclosures across the fixed income markets and will provide retail investors with better post-trade price transparency.'' [222]

Addressing the same-day disclosure window, the Investor Advocate noted its agreement ''that the window of time for disclosure should be the full trading day.'' [223] According to the Investor Advocate, a shorter time-frame—*e.g.,* the two-hour window previously proposed by the MSRB—could inappropriately incentivize dealers to alter their trading practices to avoid the obligation to disclose mark-ups.[224]

Discussing the proposed rule change's use of prevailing market price as the basis for mark-up disclosure, the Investor Advocate stated its belief that the prevailing market price-based disclosure has advantages over the initially proposed reference price-based disclosure.[225] Specifically, the Investor Advocate noted that though the ''PMP-based disclosure may lead to disclosure of a smaller cost to retail investors under certain circumstances . . . the PMP-based approach provides retail investors with the relevant information about the actual compensation the retail investor is paying the dealer for the transaction . . . [and] . . . [i]t reflects market conditions and has the potential to provide a more accurate benchmark for calculating transaction costs.'' [226] Moreover, the Investor Advocate noted that the prevailing market price-based disclosure regime could more easily be expanded beyond the presently contemplated same-day disclosure window.[227] As a result, the Investor Advocate stated its support for the MSRB's use of the prevailing market price-based disclosure regime.[228] Finally, the Investor Advocate stated its support for the proposed rule change's requirement that dealers express the mark-up both as a total dollar amount and as a percentage of the prevailing market price.[229]

With respect to dealer transactions with affiliates, the Investor Advocate highlighted its concern with dealer-affiliate trading arrangements, and concluded that the proposed rule change ''satisfies [the Investor Advocate's] concerns by making clear that a dealer must look through non-arms-length transactions with affiliates to calculate PMP.'' [230]

Finally, with respect to the implementation of the proposed rule change, the Investor Advocate stated its support for a one-year implementation period, noting that such period would be reasonable despite the technical and system changes that might be required for compliance with the proposed rule change.[231]

IV. Discussion and Commission Findings

After carefully considering the proposed rule change, the comments received, the MSRB Response Letter, and Amendment No. 1, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB. In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 15B(b)(2)(C) of the Act,[232] which requires, among other things, that the MSRB's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest, and not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

A. Mark-Up/Mark-Down Disclosure

The Commission notes that the goal of improving transaction cost transparency in fixed-income markets for retail investors has long been pursued by the Commission.[233] In particular, in the

Gallagher, Kara M. Stein, and Michael S. Piwowar stating, ''We encourage the Financial Industry Regulatory Authority (FINRA) and the Municipal Securities Rulemaking Board (MSRB) to complete rules mandating transparency of mark-ups and mark-downs, even in riskless principal trades.''). *See also* Investor Advocate Letter, *supra* note 5, at 2 (supporting the proposed rule change and stating

2012 Report, the Commission stated that the MSRB should consider possible rule changes that would require dealers acting as riskless principal to disclose on customer confirmations the amount of any mark-up/mark-down.[234] The Commission believes that the establishment of a requirement that dealers disclose mark-ups/mark-downs to retail investors, as proposed, will advance the goal of providing retail investors with meaningful and useful information about the pricing of their municipal securities transactions.[235]

The Commission believes the proposed rule change, as modified by Amendment No. 1, is reasonably designed to ensure that mark-ups/mark-downs are disclosed to retail investors, at least when a dealer has effected a same-day off-setting transaction, while limiting the impact of operational challenges for dealers. For example, with respect to dealers that generate intra-day trade confirmations, the Commission notes that the MSRB stated that dealers need not delay the confirmation process.[236] The Commission further notes that the MSRB stated that dealers would not be expected to cancel and resend a confirmation to revise the mark-up or mark-down disclosure solely based on the occurrence of a subsequent transaction or event that would otherwise be relevant to the calculation of the mark-up or mark-down under the proposed guidance.[237]

Under the proposed rule change, disclosed mark-ups/mark-downs are to be calculated in compliance with the proposed guidance, and expressed as a total dollar amount and as a percentage of the PMP of the subject security.[238] The Commission believes that this information will, for example, promote transparency of dealers' pricing practices and encourage dialogue between dealers and retail investors about the costs associated with their transactions, thereby better enabling retail investors to evaluate their transaction costs and potentially promoting price competition among dealers.

As discussed above, concerns were raised that the proposed rule change's requirement to determine PMP in compliance with the proposed guidance would make it difficult for dealers to automate PMP determinations at the time of the trade.[239] The Commission believes that the MSRB has adequately responded to these concerns, and that the price and mark-up/mark-down disclosed to the customer on a confirmation must reflect the actual PMP the dealer used to price and mark-up/mark-down the transaction at the time of the trade. The Commission believes that it is feasible to automate the determination of PMP in accordance with the proposed guidance to the extent a dealer chooses to do so, and agrees with the MSRB. The Commission further believes that a dealer's election to use automated processes to support pricing of retail trades, and thus determine the PMP, would not justify departure from the proposed requirement that dealers price municipal securities in accordance with the proposed guidance.

When the Commission approved the prevailing market price guidance contained in FINRA Rule 2121.02 [240] (which is substantially similar to and generally harmonized with the proposed guidance being approved by the Commission in this Order [241]), the Commission stated that such guidance is consistent with long-standing Commission and judicial precedent regarding fair mark-ups, and that it: provides a framework that specifically establishes contemporaneous cost as the presumptive prevailing market price, but also identifies certain dynamic factors that are relevant to whether contemporaneous cost or alternative values provide the most appropriate measure of prevailing market price. The Commission believes that the factors that govern when a dealer may depart from contemporaneous cost and that set forth alternative measures the dealer may use are reasonably designed to provide greater certainty to dealers and investors while providing an appropriate level of flexibility for dealers to consider alternative market factors when pricing debt securities.[242]

The Commission believes this reasoning remains sound and is not persuaded that the proposed requirement to disclose mark-ups/mark-downs on customer confirmations necessitates an approach contrary to the proposed guidance.

Further, in response to commenters that requested confirmation or clarification that firms may adopt reasonable policies and procedures regarding the implementation of particular aspects of the guidance, the MSRB stated its expectation that dealers will have reasonable policies and procedures in place to determine PMP, and that such policies and procedures are consistently applied across customers.[243] The MSRB further explained that it expects those policies and procedures to be designed to implement the proposed guidance, not to create an alternative manner of determining PMP.[244] More specifically, the MSRB stated its expectation that such policies and procedures will be reasonably designed to implement all applicable components of the PMP determination.[245] The MSRB also proposed to extend the implementation date of the proposal, as modified by Amendment No. 1, from one year to 18 months following Commission approval,[246] and represented that it will continue to engage with FINRA with the goal of promoting generally harmonized interpretations of the proposed guidance and the FINRA guidance, as applicable and to the extent appropriate in light of the differences between the markets.[247] The Commission believes that the MSRB's responses appropriately address commenters' concerns regarding implementation of the proposed rule change.

Also, as discussed above, commenters had questions regarding the presentation of mark-up/mark-down information on customer confirmations, and, in particular, sought the MSRB's concurrence that it would be acceptable to label the required mark-up/mark-down disclosure as an ''estimate'' or an ''approximate'' figure.[248] The Commission agrees with the MSRB,[249] and does not believe that it would be consistent with the Act or the proposed rule change for dealers to label the

that enhancements to pricing disclosure in the fixed-income markets are ''long overdue and will greatly benefit retail investors''); Recommendation of the Investor Advisory Committee to Enhance Information for Bond Market Investors (June 7, 2016), *available at: https://www.sec.gov/spotlight/investor-advisory-committee-2012/recommendation-enhance-information-bond-market-investors-060716.pdf* (recommending that the Commission work with FINRA and the MSRB to finalize mark-up/mark-down disclosure proposals).

required mark-up/mark-down disclosure as an ''estimate'' or an ''approximate'' figure, or to otherwise suggest that the dealer is not disclosing the actual amount of the mark-up/mark-down it determined to charge the customer. However, the proposed rule change is appropriately flexible to permit a dealer to include language on confirmations that explains PMP as a concept, or that details the dealer's methodology for determining PMP, or that notes the availability of information about methodology upon request, provided such statements are accurate. The Commission emphasizes that dealers will be required to disclose the actual amount of the mark-up/mark-down that they have determined to charge the customer, in accordance with the proposed amendments to Rules G–15 and G–30 being approved in this Order.

B. Requirement To Provide EMMA Reference/Hyperlink and Time of Execution on All Retail Customer Confirmations

The Commission also believes that the MSRB's proposal to require dealers to disclose, in a format specified by the MSRB, a reference and, if the confirmation is electronic, a hyperlink to Web page on EMMA that contains publicly available trading data for the specific security that was traded is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to protect investors, is in the public interest, and does not impose any burden on competition not necessary or appropriate in furtherance of the Act, and is therefore consistent with the Act.

In the Commission's view, providing a retail investor with a security-specific reference or hyperlink on the trade confirmation and the time of trade execution will facilitate retail customers obtaining a comprehensive view of the market for their securities, including the market as of the time of trade. The Commission believes that these items will complement the MSRB's existing order-handling obligations (*e.g.,* best execution) by providing retail investors with meaningful and useful information with which they will be able to independently evaluate the quality of execution obtained from a dealer.

Some commenters urged the MSRB to require a general hyperlink to EMMA, rather than a security-specific hyperlink.[250] According to the MSRB, a security-specific hyperlink would provide retail investors, who typically have less ready access to market and pricing information than institutional customers, with a more comprehensive picture of the market for a security on a given day, and would increase investors' awareness of, and ability to access, this information.[251] Further, in Amendment No. 1, the MSRB made a technical amendment to its proposed hyperlink disclosure requirement that mitigates concerns raised by commenters. The MSRB asserted that the use of such language, which, based on coordination between the MSRB and FINRA, is similar to the language used by FINRA in its related proposal, is responsive to commenter requests for more harmonization and would reduce the potential for confusion.[252] The Commission has carefully considered Amendment No. 1 in light of comments received urging the MSRB and FINRA to harmonize both the substance and timing of their proposals. The Commission concurs with the MSRB that the time of execution along with a security-specific reference or hyperlink on a customer confirmation would provide customers with the ability to obtain a comprehensive view of the market for their security at the time of trade.

C. Prevailing Market Price Guidance

In 2007, the Commission approved detailed interpretive guidance that establishes a framework for how a dealer should determine the PMP for non-municipal debt securities in a variety of scenarios.[253] In the 2012 Report, the Commission recommended that the MSRB should consider possible rule changes that would set forth more detailed guidance as to how dealers should establish the PMP for municipal securities, and that is consistent with that provided by FINRA for non-municipal debt securities.[254]

The proposed guidance is designed to provide a clear and consistent framework to dealers for determining PMP to aid in compliance with their fair-pricing obligations under Rule G–30 and their mark-up/mark-down disclosure obligations under Rule G–15. The proposed guidance provides a framework that specifically establishes contemporaneous cost as the presumptive PMP, but also identifies certain factors that are relevant to whether contemporaneous cost or alternative values provide the most appropriate measure of PMP. The Commission believes that the factors that govern when a dealer may depart from contemporaneous cost and that set forth alterative measures the dealer may use are reasonably designed to provide greater certainty to dealers and investors while providing an appropriate level of flexibility for dealers to consider alternative market factors when pricing municipal securities. As noted in the 2012 Report, providing dealers a clear and consistent framework as to how they should approach the complex task of establishing the PMP of municipal securities should enhance their ability to comply with fair pricing obligations, facilitate regulators' ability to enforce those obligations, and better protect customers.[255]

In addition, by recognizing the facts-and-circumstances nature of the analysis and by setting forth a logical series of factors to be used when a dealer departs from contemporaneous cost, the MSRB has proposed an approach for determining the PMP of a municipal security that is reasonable and practical in addressing the interests of dealers and investors and is consistent with the Act and longstanding Commission and judicial precedent relating to determining PMP and mark-ups. The Commission also notes that the MSRB represented that the proposed guidance is substantially similar to and generally harmonized with the FINRA guidance for non-municipal fixed income securities that is set forth in FINRA Rule 2121.02.[256] While several commenters raised concerns with respect to implementing the proposed guidance,[257] the Commission believes that the MSRB has reasonably addressed the comments.

D. Efficiency, Competition, and Capital Formation

In approving the proposed rule change, as modified by Amendment No. 1, the Commission has considered its impact on efficiency, competition, and capital formation.[258] The Commission believes that the proposed rule change, as modified by Amendment No. 1, could affect efficiency, competition, and capital formation in several ways.

The Commission believes that the proposed rule change could have an impact on competition among dealers. For instance, costs associated with the proposed rule change could raise barriers to entry in the retail trading market. The MSRB acknowledges that the proposed rule change may

[257] *See* notes 141–147, and accompanying text, *supra.*

[258] 15 U.S.C. 78c(f).

disproportionately impact less active dealers that, as indicated by data, currently charge relatively higher mark-ups than more active dealers; however, overall, the MSRB believes that the burdens on competition will be limited and the proposed rule change will not impose any additional burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act.[259] The MSRB recognizes that the proposed rule change could lead dealers to consolidate with other dealers, or to exit the market, however, the MSRB does not believe—and is not aware of any data that suggest—that the number of dealers exiting the market or consolidating would materially impact competition.[260] Additionally, the Commission believes that the proposed rule change provides dealers with the flexibility to develop cost-effective policies and procedures for complying with the proposed rule change that reflect their business needs and are consistent with the regulatory objectives of the proposed rule change.

By increasing disclosure requirements for retail customer confirmations, the proposed rule change could improve efficiency—in particular, price efficiency—and the improvement in pricing efficiency could promote capital formation. The Commission believes that mark-up/mark-down disclosure and the inclusion of a reference/hyperlink to security-specific transaction information on EMMA on retail customer confirmations will promote price competition among dealers and improve trade execution quality. An increase in price competition among dealers would lower transaction costs on retail customer trades. To the extent that the proposed rule change lowers transaction costs on retail customer trades, the proposed rule change could improve the pricing efficiency and price discovery process. The quality of the price discovery process has implications for efficiency and capital formation, as prices that accurately convey information about fundamental value could better facilitate capital allocations across municipalities and capital projects. Furthermore, to the extent that the proposed rule change would lower transaction costs on retail customer trades, the proposed rule change could lower bond financing costs for municipalities and capital projects. Lower transaction costs could attract more investors to the municipal securities market, which could increase the demand for municipal securities. Higher demand could lead to higher municipal security prices and higher municipal security prices could contribute to increased funding opportunities for municipalities and capital projects.

As noted above, the Commission received seven comment letters on the filing. The Commission believes that the MSRB considered carefully and responded adequately to the concerns raised by commenters. For all the foregoing reasons, including those discussed in the MSRB Response, the Commission believes the proposed rule change, as modified by Amendment No. 1, is reasonably designed to help the MSRB fulfill its mandate in Section 15B(b)(2)(C) of the Act which requires, among other things, that MSRB's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest, and not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[261]

V. Solicitation of Comments on Amendment No. 1

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 1 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MSRB–2016–12 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MSRB–2016–12. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing will also be available for inspection and copying at the principal office of MSRB. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MSRB–2016–12 and should be submitted on or before December 14, 2016.

VI. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 1, prior to the 30th day after the date of publication of notice of the filing of Amendment No. 1 in the **Federal Register**. Amendment No. 1 amends the proposed rule change to (1) replace the requirement that dealers supply a hyperlink to the ''Security Details'' page on EMMA of specific security that was traded with a requirement to provide, in a format specified by the MSRB, a reference, and if the confirmation is electronic, a hyperlink to a Web page on EMMA that contains publicly available trading data for the specific security that was traded; (2) limit the time of execution disclosure requirement to retail investors; (3) add the term ''offsetting'' to proposed Rule G–15(a)(i)(F)(1)(b) to conform the rule language to the language used to discuss conditions that trigger the disclosure requirement; (4) add the phrase ''an applicable index'' to proposed Supplementary Material .06(b)(ii)(B) of Rule G–30 to ensure that the proposed guidance contemplates an appropriate

[259] *See* Notice, *supra* note 3, at 62956–57.

[260] *Id.*

[261] 15 U.S.C. 78*o*–4(b)(2)(C).

spread relied upon for tax-exempt municipal securities; and (5) extend the implementation period of the proposed rule change from no later than one year to no later than 18 months.

According to the MSRB, it has proposed the revisions included in Amendment No. 1 in response to specific commenter suggestions and commenters' general preference for the MSRB and FINRA to adopt harmonized mark-up disclosure rules and prevailing market price guidance. The Commission notes that the addition of the terms ''offsetting'' and ''an applicable index'' to the proposed rule change is solely a clarification amendment for the avoidance of doubt and that the amendment does not alter the substance of the rule. Furthermore, extension of the implementation period of the proposal from no later than one year to no later than 18 months is appropriate and responsive to the operational and implementation concerns raised by commenters. The Commission also notes that after consideration of the comments the MSRB received on its proposal to require a security-specific hyperlink to EMMA and the execution time of the transaction, the MSRB amended its proposal in a manner that is identical to the Amendment No. 1 that FINRA has filed.[262] Based on the foregoing, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 15B(b)(2)(C) of the Act, which requires, among other things, that the MSRB's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest, and not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[263]

The Commission notes that it today has approved the FINRA Proposal, as modified by FINRA Amendment No. 1, and believes that in the interests of promoting efficiency in the implementation of both proposals, it is appropriate to approve the proposed rule change, as modified by Amendment No. 1, concurrently. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Exchange Act,[264] to approve the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

VII. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[265] that the proposed rule change (SR–MSRB–2016–12), as modified by Amendment No. 1, is approved on an accelerated basis.

For the Commission, pursuant to delegated authority.[266]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79344; File No. SR–BatsEDGX–2016–64]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of an Amendment to Rule 8.11, Effective Date of Judgment and the Adoption of Rule 8.18, Release of Disciplinary Complaints, Decisions and Other Information

November 17, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, Bats EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to add proposed Rule 8.18 to require the publication of the Exchange's disciplinary complaints and disciplinary decisions issued and to remove the part of Interpretation and Policy .01 to Rule 8.11 that currently governs the publication of disciplinary complaints and information related to disciplinary complaints.

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Proposed Rule Change

Reorganization of Exchange Rules Governing Release of Disciplinary Complaints, Decisions and Other Information Based on FINRA Rule 8313

Interpretation and Policy .01 to Rule 8.11 currently provides, in part, that the Exchange shall cause details regarding all formal disciplinary actions where a final decision has been issued, except as provided in Rule 8.15(a), to be published on its Web site. Interpretation and Policy .01 also provides that the Exchange shall not issue any press release or other statement to the press concerning any formal or informal disciplinary matter unless the Chief Regulatory Officer recommends a press release to the Executive Committee or the Board of the Exchange and either body determines that such a press release is warranted. The Exchange proposes to remove parts of Interpretation and Policy .01 to Rule 8.11 described above and to add

proposed Rule 8.18 modeled after FINRA Rule 8313,[5] as described below, to govern the publication of disciplinary information. The scope of proposed Rule 8.18 would be limited to publication of materials relating to the disciplinary process set forth in Chapter VIII because the Exchange seeks to provide prompt access to more information regarding its disciplinary actions to Members and associated persons. By providing more information regarding the Exchange's disciplinary process, including publishing disciplinary complaints at the time they are filed, Members and associated persons will be able to sooner identify conduct that the Exchange views as problematic and have will [sic] the ability to take corrective steps sooner than they can under the current rules that provide only for the publication of disciplinary decisions after they become final. In that regard, the Exchange has determined not to adopt FINRA Rule 8313 in all respects at this time.[6]

General Standards

The Exchange proposes Rule 8.18(a) to be entitled ''General Standards.'' The text would set forth general standards for the release to the public of disciplinary complaints, decisions, or information.

Proposed Rule 8.18(a)(1) would, in part, essentially replace the part of Interpretation and Policy .01 to Rule 8.11 that addresses the publication of disciplinary decisions and conform [sic] to FINRA Rule 8313. The proposed rule would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). Additionally, the proposed rule would provide that the Exchange would release to the public copies of disciplinary complaints as defined in proposed Rule 8.18(e). Also, the decision to issue other related information, including a press release, under proposed Rule 8.18(a)(1) would be in the discretion of the Exchange generally instead of requiring Executive Committee or Exchange Board approval as currently required in Interpretation and Policy .01 to Rule 8.11. Proposed Rule 8.18(a)(1) would also provide that, in response to a request, the Exchange shall also release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). These proposed amendments are modeled after FINRA Rule 8313(a)(1) and would be substantially similar to the FINRA rule.

The Exchange does not propose to incorporate subsections (2), (3), (4) and (6) of FINRA Rule 8313(a) because the Exchange proposes to limit the scope of proposed Rule 8.18 to the publication of materials relating to the disciplinary process set forth in Chapter VIII at this time.[7] The Exchange, however, notes that although Exchange Rules do not provide for temporary cease and desist orders as provided for in FINRA Rule 9800, the Exchange's Client Suspension Rule—Rule 8.17—is similar in its procedure and purpose. The Exchange proposes to include a client suspension order issued pursuant to Rule 8.17 in the definition of ''disciplinary decision'' under proposed Rule 8.18(e)(2) consistent with FINRA's inclusion of its temporary cease and desist orders for publication because the Exchange views client suspension proceedings as disciplinary in nature. For the same reason, the Exchange proposes to include a notice of the initiation of a client suspension proceeding in the definition of ''disciplinary complaint'' under proposed Rule 8.18(e)(1).

The Exchange does not propose to incorporate subsection (5) of FINRA Rule 8313(a) because the Exchange does not have at this time provisions analogous to FINRA Rule 6490[8] and the FINRA Rule 9700 Series.[9] Additionally, the Exchange does not propose to include its procedures for exemptive relief analogous to the FINRA Rule 9600 Series because the Exchange proposes to limit scope of proposed Rule 8.18 to the publication of disciplinary materials.

Release Specifications

The Exchange proposes to include subsection (b) to proposed Rule 8.18 entitled ''Release Specifications'' modeled after FINRA Rule 8313(b). Proposed Rule 8.18(b)(1) provides that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed rule would be the same as FINRA Rule 8313(b)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Proposed Rule 8.18(b)(2) provides that copies of, and information with respect to, any disciplinary decision released to the public pursuant to paragraph (a) of the proposed rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange Rules or the Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the Commission. The proposed rule would be substantially similar to FINRA Rule 8313(b)(2). The proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the release specifications for an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes

[5] New York Stock Exchange, LLC (''NYSE'') similarly adopted rules modeled after FINRA Rule 8313. *See* Securities Exchange Act Release No. 78664 (August 24, 2016), 81 FR 59678, 59679 (August 30, 2016) (SR–NYSE–2016–40).

[6] NYSE similarly declined to adopt all provisions of FINRA Rule 8313 insofar as the FINRA rule related to information beyond the formal disciplinary process. *See id.* at 59679.

[7] Subsection (2) of FINRA Rule 8313(a) provides for the publication of statutory disqualification decisions and temporary cease and desist orders.

Subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar for: Failing to keep information current; failing to pay dues; failing to comply with an arbitration award or related settlement or an order of restitution or settlement providing for restitution; failing to meet the eligibility or qualification standards or prerequisites for access to services; or experiencing financial or operational difficulties. Additionally, subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar imposed as the result of a summary proceeding for actions authorized by Section 15A(h)(3) of the Act.

Subsection (4) addresses procedures for membership proceedings.

The Exchange does not propose to adopt subsections (2), (3), and (4) because, as discussed above, the Exchange's proposal is intended to provide more information regarding the Exchange's disciplinary process to the public so that Members and associated persons will be able to identify conduct that the Exchange views as problematic and will have the ability to take corrective steps sooner. Subsections (2), (3), and (4) to the FINRA rule would not further that purpose because those subsections would require the publication of information generally relating to membership eligibility or failure to satisfy one's membership obligations rather than discipline. Subsection (2) additionally addresses temporary cease and desist proceedings, which the Exchange does not have, and Subsection (3) additionally addresses Section 15A(h)(3) of the Act, which applies only to registered securities associations.

Subsection (6) permits discretionary release of a complaint, decision, order, notification, or notice issued under FINRA rules, where the release of such information is deemed by FINRA's Chief Executive Officer (or such other senior officer as the Chief Executive Officer may designate) to be in the public interest. The Exchange does not propose to adopt this open-ended subsection because [sic] Exchange intends for the proposed rule to instead be limited to disciplinary information for the reasons discussed above.

[8] ''Processing of Company-Related Actions.''

[9] ''Procedure For Grievances Concerning the Automated Systems.''

to limit the rule only to disciplinary complaints and disciplinary decisions.

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. To provide the standard for such limited exceptions, the Exchange proposes subsection (c) of proposed Rule 8.18 entitled ''Discretion to Redact Certain Information or Waive Publication,'' modeled after FINRA Rule 8313(c).

Proposed Rule 8.18(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed rule would be the same as FINRA Rule 8313(c)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Similarly, proposed Rule 8.18(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint or disciplinary decision under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice. The proposed rule would be the same as FINRA Rule 8313(c)(2) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the waiver of the release of an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Notice of Appeals of Exchange Decisions

The Exchange proposes to include subsection (d) to proposed Rule 8.18 entitled ''Notice of Appeals of Exchange Decisions to the SEC'' modeled on FINRA Rule 8313(d). Proposed Rule 8.18(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the Commission and the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed rule would be the same as FINRA Rule 8313(d) except that the proposed Rule would substitute the term ''Exchange'' for ''FINRA.''

Definitions

Finally, the Exchange proposes subsection (e) of proposed Rule 8.18 entitled ''Definitions.'' Proposed Rule 8.18(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the rule, modeled after the definitions contained in FINRA Rule 8313(e).

First, proposed Rule 8.18(e)(1) would define the term ''disciplinary complaint'' to mean any statement of charges issued pursuant to Rule 8.4 or any notice served pursuant to Rule 8.17. This proposed rule is based on FINRA Rule 8313(e)(1) except that it replaces the term ''complaint pursuant to the Rule 9200 Series'' with ''statement of charges pursuant to Rule 8.4'' and it includes a notice of the initiation of a client suspension proceeding issued pursuant to Rule 8.17 in the definition of ''disciplinary complaint.''

Second, proposed Rule 8.18(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to the Chapter VIII, including, decisions issued by a Hearing Panel or the Appeals Committee and accepted offers of settlement. The Exchange additionally proposes to include suspension orders issued pursuant to Rule 8.17 in the definition of ''disciplinary decision.'' The Exchange does not propose to adopt the part of FINRA Rule 8313(e)(2) that discusses decisions issued pursuant to the FINRA Rule 9550 Series, FINRA Rule 9600 Series, FINRA Rule 9700 Series, or FINRA Rule 9800 Series, or decisions, notifications, or notices issued pursuant to the FINRA Rule 9520 Series because, as explained above, the Exchange does not propose to adopt the provisions of the FINRA Rule providing for the publication of such information. Finally, proposed Rule 8.18(e)(2) would provide that minor rule violation plan letters issued pursuant to Rules 8.15 and 25.3 are not subject to the proposed rule.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] In particular, the proposal is consistent with Section 6(b)(1)[11] in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange. In particular, the Exchange believes that the proposed addition of Rule 8.18 regarding release of disciplinary complaints, decisions and other information are [sic] consistent with Section 6(b)(1) of the Act because it would establish general standards for the release of disciplinary information to the public to provide greater access to information regarding the Exchange's disciplinary actions.

For the same reasons, the Exchange believes that proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act[12] because the proposed rule is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system. In particular, proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act by providing greater clarity, consistency, and transparency regarding the release of disciplinary complaints, decisions and other information to the public. By adopting the proposed Rule 8.18 modeled after FINRA Rule 8313, the Exchange would establish standards for the release of disciplinary information to the public in line with those in effect at FINRA that provide greater access to information regarding the Exchange's disciplinary actions and describe the scope of information subject to proposed Rule 8.18. The Exchange believes that this proposed rule change promotes greater transparency to the Exchange's disciplinary process, and that the proposed rule change provides greater access to information regarding its disciplinary actions, and also provides valuable guidance and information to Members, associated persons, other regulators, and the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(1).

[12] 15 U.S.C. 78f(b)(5).

address competitive issues, but rather it is designed to enhance the Exchange's rules governing the release of disciplinary complaints, decisions and other information to the public, thereby providing greater clarity and consistency and resulting in less burdensome and more efficient regulatory compliance and facilitating performance of regulatory functions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[13] and paragraph (f)(6) of Rule 19b–4 thereunder.[14]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii)[15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange states that FINRA performs services for it under a Regulatory Services Agreement (''RSA''), including the filing and prosecution of disciplinary complaints on the Exchange's behalf. FINRA also files and prosecutes disciplinary complaints on its own behalf, sometimes on cases involving identical or similar conduct to the cases it brings on the Exchange's behalf. Without the waiver, the Exchange is concerned that FINRA might publish a complaint during the 30-day operative delay, and that the Exchange would not be permitted to publish its own complaint, prepared by FINRA, regarding the same conduct. According to the Exchange, this would supply the public with an incomplete picture of the disciplinary proceedings, the full nature of which could not be disclosed until much later when a final disciplinary decision is issued. The Exchange, therefore, believes that waiver of the operative delay is consistent with the protection of investors and the public interest, as it will allow the Exchange to immediately publish any disciplinary complaints or decisions that are filed or issued after the proposal is filed. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow EDGX to publish disciplinary complaints or decisions that have been filed or issued without delay. Therefore, the Commission designates the proposed rule change to be operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGX–2016–64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsEDGX–2016–64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGX–2016–64 and should be submitted on or before December 14, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79341; File No. SR–BatsBYX–2016–32]

Self-Regulatory Organizations; Bats BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of an Amendment to Rule 8.11, Effective Date of Judgement and the Adoption of Rule 8.18, Release of Disciplinary Complaints, Decisions and Other Information

November 17, 2016

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, Bats BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to add proposed Rule 8.18 to require the publication of the Exchange's disciplinary complaints and disciplinary decisions issued and to remove the part of Interpretation and Policy .01 to Rule 8.11 that currently governs the publication of disciplinary complaints and information related to disciplinary complaints.

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Proposed Rule Change

Reorganization of Exchange Rules Governing Release of Disciplinary Complaints, Decisions and Other Information Based on FINRA Rule 8313

Interpretation and Policy .01 to Rule 8.11 currently provides, in part, that the Exchange shall cause details regarding all formal disciplinary actions where a final decision has been issued, except as provided in Rule 8.15(a), to be published on its Web site. Interpretation and Policy .01 also provides that the Exchange shall not issue any press release or other statement to the press concerning any formal or informal disciplinary matter unless the Chief Regulatory Officer recommends a press release to the Executive Committee or the Board of the Exchange and either body determines that such a press release is warranted. The Exchange proposes to remove parts of Interpretation and Policy .01 to Rule 8.11 described above and to add proposed Rule 8.18 modeled after FINRA Rule 8313,[5] as described below, to govern the publication of disciplinary information. The scope of proposed Rule 8.18 would be limited to publication of materials relating to the disciplinary process set forth in Chapter VIII because the Exchange seeks to provide prompt access to more information regarding its disciplinary actions to Members and associated persons. By providing more information regarding the Exchange's disciplinary process, including publishing disciplinary complaints at the time they are filed, Members and associated persons will be able to sooner identify conduct that the Exchange views as problematic and have will [sic] the ability to take corrective steps sooner than they can under the current rules that provide only for the publication of disciplinary decisions after they become final. In that regard, the Exchange has determined not to adopt FINRA Rule 8313 in all respects at this time.[6]

General Standards

The Exchange proposes Rule 8.18(a) to be entitled ''General Standards.'' The text would set forth general standards for the release to the public of disciplinary complaints, decisions, or information.

Proposed Rule 8.18(a)(1) would, in part, essentially replace the part of Interpretation and Policy .01 to Rule 8.11 that addresses the publication of disciplinary decisions and conform [sic] to FINRA Rule 8313. The proposed rule would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). Additionally, the proposed rule would provide that the Exchange would release to the public copies of disciplinary complaints as defined in proposed Rule 8.18(e). Also, the decision to issue other related information, including a press release, under proposed Rule 8.18(a)(1) would be in the discretion of the Exchange generally instead of requiring Executive Committee or Exchange Board approval as currently required in Interpretation and Policy .01 to Rule 8.11. Proposed Rule 8.18(a)(1) would also provide that, in response to a request, the Exchange shall also release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed Rule 8.18(e). These proposed amendments are modeled after FINRA Rule 8313(a)(1) and would be substantially similar to the FINRA rule.

The Exchange does not propose to incorporate subsections (2), (3), (4) and (6) of FINRA Rule 8313(a) because the Exchange proposes to limit the scope of proposed Rule 8.18 to the publication of materials relating to the disciplinary process set forth in Chapter VIII at this time.[7] The Exchange, however, notes

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

[5] New York Stock Exchange, LLC (''NYSE'') similarly adopted rules modeled after FINRA Rule 8313. *See* Securities Exchange Act Release No. 78664 (August 24, 2016), 81 FR 59678, 59679 (August 30, 2016) (SR–NYSE–2016–40).

[6] NYSE similarly declined to adopt all provisions of FINRA Rule 8313 insofar as the FINRA rule related to information beyond the formal disciplinary process. *See id.* at 59679.

[7] Subsection (2) of FINRA Rule 8313(a) provides for the publication of statutory disqualification decisions and temporary cease and desist orders.

Subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar for: Failing to keep information current; failing to pay dues; failing to comply with an arbitration award or related settlement or an order of restitution or settlement providing for restitution; failing to meet the eligibility or qualification standards or prerequisites for access to services; or experiencing financial or operational difficulties. Additionally, subsection (3) provides for the publication of any suspension, cancellation, expulsion, or bar imposed as the result of a summary proceeding for actions authorized by Section 15A(h)(3) of the Act.

Subsection (4) addresses procedures for membership proceedings.

The Exchange does not propose to adopt subsections (2), (3), and (4) because, as discussed above, the Exchange's proposal is intended to provide more information regarding the Exchange's disciplinary process to the public so that Members and associated persons will be able to identify conduct that the Exchange views as problematic and will have the ability to take corrective steps sooner. Subsections (2), (3), and (4) to the FINRA rule would not further that purpose because those subsections would require the publication of information generally relating to membership eligibility or failure to satisfy one's membership obligations rather than discipline. Subsection (2) additionally addresses temporary cease and desist proceedings, which the Exchange does not have, and Subsection (3) additionally addresses Section 15A(h)(3) of the Act, which applies only to registered securities associations.

Subsection (6) permits discretionary release of a complaint, decision, order, notification, or notice issued under FINRA rules, where the release of such information is deemed by FINRA's Chief

that although Exchange Rules do not provide for temporary cease and desist orders as provided for in FINRA Rule 9800, the Exchange's Client Suspension Rule—Rule 8.17—is similar in its procedure and purpose. The Exchange proposes to include a client suspension order issued pursuant to Rule 8.17 in the definition of ''disciplinary decision'' under proposed Rule 8.18(e)(2) consistent with FINRA's inclusion of its temporary cease and desist orders for publication because the Exchange views client suspension proceedings as disciplinary in nature. For the same reason, the Exchange proposes to include a notice of the initiation of a client suspension proceeding in the definition of ''disciplinary complaint'' under proposed Rule 8.18(e)(1).

The Exchange does not propose to incorporate subsection (5) of FINRA Rule 8313(a) because the Exchange does not have at this time provisions analogous to FINRA Rule 6490 [8] and the FINRA Rule 9700 Series.[9] Additionally, the Exchange does not propose to include its procedures for exemptive relief analogous to the FINRA Rule 9600 Series because the Exchange proposes to limit scope of proposed Rule 8.18 to the publication of disciplinary materials.

Release Specifications

The Exchange proposes to include subsection (b) to proposed Rule 8.18 entitled ''Release Specifications'' modeled after FINRA Rule 8313(b). Proposed Rule 8.18(b)(1) provides that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed rule would be the same as FINRA Rule 8313(b)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Proposed Rule 8.18(b)(2) provides that copies of, and information with respect to, any disciplinary decision released to the public pursuant to paragraph (a) of the proposed rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange Rules or the Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the Commission. The proposed rule would be substantially similar to FINRA Rule 8313(b)(2). The proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the release specifications for an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. To provide the standard for such limited exceptions, the Exchange proposes subsection (c) of proposed Rule 8.18 entitled ''Discretion to Redact Certain Information or Waive Publication,'' modeled after FINRA Rule 8313(c).

Proposed Rule 8.18(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed rule would be the same as FINRA Rule 8313(c)(1) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA.''

Similarly, proposed Rule 8.18(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint or disciplinary decision under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice. The proposed rule would be the same as FINRA Rule 8313(c)(2) except that the proposed rule would substitute the term ''Exchange'' for ''FINRA'' and would not include a provision relating to the waiver of the release of an ''other decision, order, notification, or notice'' because, as noted above, the Exchange proposes to limit the rule only to disciplinary complaints and disciplinary decisions.

Notice of Appeals of Exchange Decisions

The Exchange proposes to include subsection (d) to proposed Rule 8.18 entitled ''Notice of Appeals of Exchange Decisions to the SEC'' modeled on FINRA Rule 8313(d). Proposed Rule 8.18(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the Commission and the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed rule would be the same as FINRA Rule 8313(d) except that the proposed Rule would substitute the term ''Exchange'' for ''FINRA.''

Definitions

Finally, the Exchange proposes subsection (e) of proposed Rule 8.18 entitled ''Definitions.'' Proposed Rule 8.18(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the rule, modeled after the definitions contained in FINRA Rule 8313(e).

First, proposed Rule 8.18(e)(1) would define the term ''disciplinary complaint'' to mean any statement of charges issued pursuant to Rule 8.4 or any notice served pursuant to Rule 8.17. This proposed rule is based on FINRA Rule 8313(e)(1) except that it replaces the term ''complaint pursuant to the Rule 9200 Series'' with ''statement of charges pursuant to Rule 8.4'' and it includes a notice of the initiation of a client suspension proceeding issued pursuant to Rule 8.17 in the definition of ''disciplinary complaint.''

Second, proposed Rule 8.18(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to the Chapter VIII, including, decisions issued by a Hearing Panel or the Appeals Committee and accepted offers of settlement. The Exchange additionally proposes to include suspension orders issued pursuant to Rule 8.17 in the definition of ''disciplinary decision.'' The Exchange does not propose to adopt the part of FINRA Rule 8313(e)(2) that discusses decisions issued pursuant to the FINRA Rule 9550 Series, FINRA Rule 9600 Series, FINRA Rule 9700 Series, or FINRA Rule 9800 Series, or decisions, notifications, or notices issued pursuant to the FINRA Rule 9520 Series because, as explained above, the Exchange does not propose to adopt the provisions of the FINRA Rule providing for the publication of such information. Finally, proposed Rule 8.18(e)(2) would provide that minor rule violation plan

Executive Officer (or such other senior officer as the Chief Executive Officer may designate) to be in the public interest. The Exchange does not propose to adopt this open-ended subsection because [sic] Exchange intends for the proposed rule to instead be limited to disciplinary information for the reasons discussed above.

[8] ''Processing of Company-Related Actions.''

[9] ''Procedure For Grievances Concerning the Automated Systems.''

letters issued pursuant to Rules 8.15 and 25.3 are not subject to the proposed rule.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] In particular, the proposal is consistent with Section 6(b)(1)[11] in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange. In particular, the Exchange believes that the proposed addition of Rule 8.18 regarding release of disciplinary complaints, decisions and other information are [sic] consistent with Section 6(b)(1) of the Act because it would establish general standards for the release of disciplinary information to the public to provide greater access to information regarding the Exchange's disciplinary actions.

For the same reasons, the Exchange believes that proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act[12] because the proposed rule is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system. In particular, proposed Rule 8.18 furthers the objectives of Section 6(b)(5) of the Act by providing greater clarity, consistency, and transparency regarding the release of disciplinary complaints, decisions and other information to the public. By adopting the proposed Rule 8.18 modeled after FINRA Rule 8313, the Exchange would establish standards for the release of disciplinary information to the public in line with those in effect at FINRA that provide greater access to information regarding the Exchange's disciplinary actions and describe the scope of information subject to proposed Rule 8.18. The Exchange believes that this proposed rule change promotes greater transparency to the Exchange's disciplinary process, and that the proposed rule change provides greater access to information regarding its disciplinary actions, and also provides valuable guidance and information to Members, associated persons, other regulators, and the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues, but rather it is designed to enhance the Exchange's rules governing the release of disciplinary complaints, decisions and other information to the public, thereby providing greater clarity and consistency and resulting in less burdensome and more efficient regulatory compliance and facilitating performance of regulatory functions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[13] and paragraph (f)(6) of Rule 19b–4 thereunder.[14]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii)[15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange states that FINRA performs services for it under a Regulatory Services Agreement (''RSA''), including the filing and prosecution of disciplinary complaints on the Exchange's behalf. FINRA also files and prosecutes disciplinary complaints on its own behalf, sometimes on cases involving identical or similar conduct to the cases it brings on the Exchange's behalf. Without the waiver, the Exchange is concerned that FINRA might publish a complaint during the 30-day operative delay, and that the Exchange would not be permitted to publish its own complaint, prepared by FINRA, regarding the same conduct. According to the Exchange, this would supply the public with an incomplete picture of the disciplinary proceedings, the full nature of which could not be disclosed until much later when a final disciplinary decision is issued. The Exchange, therefore, believes that waiver of the operative delay is consistent with the protection of investors and the public interest, as it will allow the Exchange to immediately publish any disciplinary complaints or decisions that are filed or issued after the proposal is filed. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow BYX to publish disciplinary complaints or decisions that have been filed or issued without delay. Therefore, the Commission designates the proposed rule change to be operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(1).

[12] 15 U.S.C. 78f(b)(5).

[13] 15 U.S.C. 78s(b)(3)(A).

[14] 17 CFR 240.19b–4(f)(6).

[15] 17 CFR 240.19b–4(f)(6)(iii).

[16] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79346; File No. SR–FINRA–2016–032]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, Relating to FINRA Rule 2232 (Customer Confirmations) To Require Members To Disclose Additional Pricing Information on Retail Customer Confirmations Relating to Transactions in Certain Fixed Income Securities

November 17, 2016.

I. Introduction

On August 12, 2016, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission'' or ''SEC''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend FINRA Rule 2232 to require FINRA members to disclose additional pricing information on retail customer confirmations relating to certain transactions in fixed income securities. The proposed rule change was published for comment in the **Federal Register** on August 19, 2016.[3] The Commission received nine comment letters from eight commenters in response to the proposal.[4] On September 28, 2016, pursuant to Section 19(b)(2) of the Act,[5] the Commission designated a longer period within which to either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[6] The Commission then received a letter from the SEC Office of the Investor Advocate, submitted to the public comment file, recommending approval of the proposed rule change.[7] On November 14, 2016, FINRA responded to the comments [8] and filed Amendment No. 1 to the proposal.[9] The Commission is publishing this notice to solicit comment on Amendment No. 1 to the proposal from interested persons and is approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description of the Proposal, as Modified by Amendment No. 1

A. Background

FINRA proposes to amend FINRA Rule 2232 (Customer Confirmations) to require a member effecting certain transactions as principal with non-institutional customers in a corporate debt or agency debt security to disclose the member's mark-up/mark-down from the prevailing market price (''PMP'') for the security on the customer confirmation.[10] FINRA also proposes to require for all transactions in corporate or agency debt securities with non-institutional customers, irrespective of whether mark-up/mark-down disclosure is required, that the member provide on the confirmation (1) a reference, and hyperlink if the confirmation is electronic, to a Web page hosted by FINRA that contains publicly available trading data from FINRA's Trade Reporting and Compliance Engine

[10] *See* Notice, *supra* note 3. For ease of reference, a ''non-institutional customer'' is also alternatively referred to as a ''retail customer'' or ''retail investor,'' which, among others are not included in the definition of an institutional customer.

(''TRACE'') for the specific security that was traded, in a format specified by FINRA, along with a brief description of the type of information available on that page; and (2) the execution time of the customer transaction, expressed to the second.[11]

FINRA developed the proposal, as modified by Amendment No. 1, in coordination with the Municipal Securities Rulemaking Board (''MSRB'') to advance the goal of providing additional pricing information, including transaction cost information, to non-institutional customers in corporate, agency, and municipal debt securities.[12] FINRA and the MSRB have worked toward consistent rule requirements in this area, as appropriate, to minimize the operational burdens for firms that are both FINRA members and MSRB registrants that transact in multiple types of fixed income securities.[13] The proposal, as modified by Amendment No. 1, is before the Commission following a process in which FINRA twice solicited comment on related proposals, and subsequently incorporated modifications designed to address commenters' concerns.[14]

In November 2014, FINRA, concurrently with the MSRB, published a regulatory notice requesting comment on the Initial Proposal to require disclosure of pricing information for certain same-day, retail-sized principal transactions.[15] In the Initial Proposal, FINRA proposed to require customer confirmation disclosure of additional pricing information when a member executes a sell (buy) transaction of ''qualifying size'' with a customer and executes a buy (sell) transaction as principal with one or multiple parties in the same security within the same trading day, where the size of the customer transaction(s) would otherwise be satisfied by the size of one or more same-day principal transaction(s). To supplement the price to the customer, which currently is required to be provided on customer confirmations, members would additionally have been required to disclose (i) the price to the firm of the same-day trade (''reference price''); and (ii) the difference between those two prices. Designed to capture transactions with retail investors, the term ''qualifying size,'' was defined to include transactions of 100 bonds or less or bonds with a face value of $100,000 or less.

As more fully summarized in the Notice, FINRA received a number of comments on the Initial Proposal.[16] Some commenters supported FINRA's Initial Proposal, stating that the proposed confirmation disclosure would provide additional post-trade information that would be otherwise difficult for a retail investor to ascertain and would foster increased price competition in fixed income markets, which would ultimately lower investors' transaction costs.[17] Some of these commenters urged FINRA to expand the Initial Proposal so that it would apply to all trades involving retail investors.[18] But many commenters were critical of the Initial Proposal. Some commenters critical of the Initial Proposal believed that the proposed scope was overbroad, that a reference price was not necessarily a useful point of pricing information, and/or that FINRA's proposed methodologies for calculating the reference price were too complex.[19] In response to the comments received, FINRA made several modifications to the Initial Proposal and solicited comment on a Revised Proposal.[20] The modifications reflected in the Revised Proposal were designed to ensure that the disclosure applied to transactions with retail investors, enhance the utility of the disclosure, and reduce the operational complexity of providing the disclosure.[21]

In response to similar comments received on its initial proposal, the MSRB incorporated several modifications to be consistent with FINRA's proposal;[22] however, the MSRB proposed to depart from the ''reference price'' approach and instead require that firms disclose the amount of mark-up/mark-down from the PMP for certain retail customer transactions.[23] Specifically, the MSRB proposed to require firms to disclose their mark-up/mark-down on the retail customer's trade if the firm bought (sold) the security in one or more transactions in an aggregate trade size that met or exceeded the size of the sale (purchase) to (from) the non-institutional customer within two hours of the customer

[11] *See* Amendment No. 1, *supra* note 9, at 5. FINRA also proposes in Amendment No. 1 to add the term ''offsetting'' to proposed Rule 2232(c)(2) to conform the rule language to the language used to discuss conditions that trigger the disclosure requirement, and extend the implementation period of the proposal from one year to 18 months.

[12] *See, e.g.,* Notice, *supra* note 3, at 55500. The proposal, as modified by Amendment No. 1, would apply to corporate and agency debt securities. It would not apply to U.S. Treasury Securities. *See* proposed Rules 2232(c), (e), and (f); *see also* note 37 *infra.*

[13] The MSRB has filed with the Commission a proposal and amendment that is substantially similar to this proposal, as modified by Amendment No. 1. *See* Securities Exchange Act Release No. 78777 (Sep. 7, 2016), 81 FR 62947 (Sep. 13, 2016) (SR–MSRB–2016–12) (''MSRB Proposal''); *see also* MSRB Amendment No. 1, *available at: https://www.sec.gov/comments/sr-msrb-2016-12/msrb201612-11.pdf.*

[18] *Id.*

[19] *See* Notice, *supra* note 3, at 55507–55508.

[20] *See* Revised Proposal, *supra* note 14.

[21] *See* Notice, *supra* note 3, at 55508 (explaining FINRA's modifications to the Initial Proposal in the Revised Proposal). FINRA's Revised Proposal included the following revisions: (i) Replacing the ''qualifying size'' requirement with an exclusion for transactions with institutional accounts, as defined in FINRA Rule 4512(c); (ii) excluding transactions which are part of fixed-price offerings on the first trading day and which are sold at the fixed-price offering price; (iii) excluding firm-side transactions that are conducted by a department or trading desk that is functionally separate from the retail-side trading desk; (iv) excluding trades where the member's principal trade was executed with an affiliate of the member and the affiliate's position that satisfied this trade was not acquired on the same trading day; (v) requiring members to provide a hyperlink to publicly available corporate and agency debt security trade data disseminated from TRACE on the customer confirmation; (vi) permitting members to omit the reference price in the event of a material change in the price of the security between the time of the member's principal trade and the customer trade; and (vii) permitting members to use alternative methodologies to determine the reference price in complex trade scenarios, provided the methodologies were adequately documented, and consistently applied. *See* Revised Proposal, *supra* note 14.

[22] *See* MSRB *Regulatory Notice* 2015–16, Request for Comment on Draft Rule Amendments to Require Confirmation Disclosure of Mark-ups for Specified Principal Transactions with Retail Customers (Sept. 24, 2015), *available at: http://www.msrb.org/~/media/files/regulatory-notices/rfcs/2015-16.ashx.* In its revised proposal, the MSRB, consistently with FINRA, proposed that certain categories of transactions be excluded from the disclosure requirement, including (i) transactions with institutional accounts; (ii) firm-side transactions if conducted by a ''functionally separate principal trading desk'' that had no knowledge of the non-institutional customer transaction; and (iii) customer transactions at list offering prices. For trades with an affiliate of the firm, the MSRB also proposed to ''look through'' the firm's trade with the affiliate to the affiliate's trade with the third party for purposes of determining whether disclosure would be required.

[23] *See id.*

transaction.[24] The disclosed mark-up/mark-down would have been required to be expressed both as a total dollar amount and as a percentage of the PMP.[25] Additionally, the MSRB proposed to require the disclosure of two additional data points on all customer confirmations, even those for which mark-up/mark-down disclosure was not required: A security-specific hyperlink to the publicly available municipal security trade data on the MSRB's Electronic Municipal Market Access (''EMMA'') Web site, and the time of execution of a customer's trade.[26]

Although FINRA and the MSRB took different approaches in their revised proposals—diverging primarily on the questions of whether to require disclosure of reference price or mark-up/mark-down, and whether to specify a same-day or two-hour time frame—each acknowledged the importance of achieving a consistent approach and invited comments on the relative merits and shortcomings of both approaches.[27] Following a second round of comments, publication of a third related proposal by the MSRB,[28] as well as investor testing conducted jointly by FINRA and the MSRB in mid-2016,[29] FINRA and the MSRB made a third round of revisions to achieve a consistent approach and filed the proposed rule changes, each as modified by Amendment No. 1, that are before the Commission.

B. Proposed Amendments to FINRA Rule 2232

1. Overview

FINRA proposes to amend FINRA Rule 2232 (Customer Confirmations) to add new paragraphs (c)–(f). Proposed Rule 2232(c) would require that a customer confirmation for a transaction in a corporate or agency debt security include the member's mark-up/mark-down for the transaction, to be calculated in compliance with FINRA Rule 2121, expressed as a total dollar amount and as a percentage of the PMP if (1) the member effects a transaction in a principal capacity with a non-institutional customer and (2) the member purchased (sold) the security in one or more offsetting transactions in an aggregate trading size meeting or exceeding the size of such sale to (purchase from) the non-institutional customer. Proposed Rule 2232(c) also would address how a member's transactions with affiliates are to be considered. Proposed Rule 2232(d) would specify limited exceptions.[30]

Proposed Rule 2232(e), which is the subject of Amendment No. 1, additionally would require that for all transactions in corporate or agency debt securities with non-institutional customers, irrespective of whether mark-up/mark-down disclosure is required, the member provide on the confirmation (i) a reference, and hyperlink if the confirmation is electronic, to a Web page hosted by FINRA that contains TRACE publicly available trading data for the specific security that was traded, in a format specified by FINRA, along with a brief description of the type of information available on that page; and (ii) the execution time of the customer transaction, expressed to the second.[31]

Proposed Rule 2232(f) would set forth defined terms.[32]

In addition, FINRA Rule 0150 would be amended to make the proposed rule change, as modified by Amendment No. 1, applicable to agency debt securities, but not to U.S. Treasury Securities.[33]

2. Scope of the Mark-Up/Mark-Down Disclosure Requirement

Under proposed Rule 2232(c), mark-up/mark-down disclosure would be required if: (1) The member is effecting a transaction in a principal capacity in a corporate or agency debt security with a non-institutional customer, and (2) the member purchased (sold) the security in one or more offsetting transactions in an aggregate trading size meeting or exceeding the size of such sale to (purchase from) the non-institutional customer on the same trading day as the non-institutional customer transaction.[34]

A non-institutional customer is a customer that does not have an institutional account, as defined in FINRA Rule 4512(c).[35] In addition, the proposal, as modified by Amendment No. 1, would apply only to transactions in corporate debt securities, as defined in the proposed rule,[36] and agency debt securities, as defined in FINRA Rule 6710(l).[37]

Discussing the rationale for the mark-up/mark-down disclosure requirement generally, FINRA notes that while members already are required, pursuant to Securities Exchange Act Rule 10b–10 (''Rule 10b–10''), to provide pricing information on customer confirmations, including transaction cost information, for transactions in equity securities where the member acted as principal, no comparable requirement currently exists for transactions in fixed-income securities.[38] Discussing the same-day offsetting trade trigger for mark-up/mark-down disclosure more specifically, FINRA states that it believes that a full-day window (as compared to a shorter window such as two-hours) will ensure that more non-institutional investors receive the benefit of mark-up/mark-down disclosure; [39] and adds that limiting the required disclosure to those instances where there is an offsetting trade in the same trading day will reduce the variability of the mark-up/mark-down

[31] *See* Amendment No. 1, *supra* note 9, at 5.

[32] *See* proposed Rule 2232(f).

[33] *See* note 12 *supra*; note 36 *infra.*

[34] *See* Notice, *supra* note 3, at 55500. *See also* Amendment No. 1, *supra* note 9, at 4, in which FINRA further clarifies that disclosure obligations are triggered by ''offsetting'' transactions, and not only by ''matched'' trades.

[35] *See* proposed Rule 2232(f)(4). *See also* FINRA Rule 4512(c), defining an institutional account as: An account of ''(1) a bank, savings and loan association, insurance company or registered investment company; (2) an investment adviser registered either with the SEC under Section 203 of the Investment Advisers Act or with a state securities commission (or any agency or office performing like functions); or (3) any other person (whether a natural person, corporation, partnership, trust or otherwise) with total assets of at least $50 million. FINRA states that use of this definition to define the scope of the proposal is appropriate because firms use this definition in other rule contexts and it will therefore reduce the implementation costs of the proposal. *See* Notice, *supra* note 3 at 55501.

[36] The rule would define a corporate debt security as a ''debt security that is United States (''U.S.'') dollar-denominated and issued by a U.S. or foreign private issuer and, if a 'restricted security' as defined in Securities Act Rule 144(a)(3), sold pursuant to Securities Act Rule 144A, but does not include a Money Market Instrument as defined in FINRA Rule 6710(o) or an Asset-Backed Security as defined in FINRA Rule 6710(cc).'' *See* Proposed Rule 2232(f).

[37] Existing FINRA Rule 6710(l) defines an agency debt security as ''a debt security (i) issued or guaranteed by an Agency as defined in paragraph (k); or (ii) issued or guaranteed by a Government-Sponsored Enterprise as defined in paragraph (n). The term excludes a U.S. Treasury Security as defined in paragraph (p) and a Securitized Product as defined in paragraph (m), where an Agency or a Government-Sponsored Enterprise is the Securitizer as defined in paragraph (s) (or similar person), or the guarantor of the Securitized Product.'' *See* Notice, *supra* note 3, at 55501 n. 9.

[38] *See* Notice, *supr*a note 3, at 55000 n.3.

[39] *See* Notice, *supra* note 3, at 55501 and 55509 (discussing data evidencing dispersion in mark-ups/mark-downs in firm principal/customer trades in corporate and agency debt securities).

calculation.[40] FINRA also emphasizes that a full-day window may make members less likely to alter their trading patterns to avoid the rule, as members would be required to hold positions overnight to avoid the customer confirmation disclosure requirement which action may be in contravention of a member's other obligations under FINRA rules.[41]

For purposes of determining whether the mark-up/mark-down disclosure requirement would be triggered, proposed Rule 2232(c) also addresses how a member's transactions with affiliates are to be considered. If a member executes an offsetting principal trade(s) with an affiliate, the rule would require a member to determine whether the transaction was an ''arms-length transaction.'' [42] The rule defines an arms-length transaction as ''a transaction that was conducted through a competitive process in which non-affiliate firms could also participate, and where the affiliate relationship did not influence the price paid or proceeds received by the member.'' [43] If the transaction is not an arms-length-transaction, the rule would require the member to ''look through'' to the time and terms of the affiliate's separate purchase (sale) of the security with a third party to determine whether the confirmation disclosure requirement is applicable.[44] FINRA states that sourcing liquidity through a non-arms-length transaction with an affiliate is functionally equivalent to selling out of its own inventory, and therefore that it is appropriate in the case of a non-arm's length transaction to require a member to ''look through'' to the affiliate's transaction with a third party to determine whether the disclosure requirement is triggered.[45]

The proposed rule also specifies two exceptions from the disclosure requirement. First, if the member's offsetting same-day firm principal trade was executed by a trading desk that is functionally separate from the member's trading desk that executed the transaction with the non-institutional customer, the principal trade by that separate trading desk would not trigger the confirmation disclosure requirement.[46] To avail itself of this exception, a member must have in place policies and procedures reasonably designed to ensure that the functionally separate principal trading desk through which the member purchase or sale was executed had no knowledge of the customer transaction.[47] For example, in the case of a purchase/sale transaction with a non-institutional customer effected by the retail trading desk, if a functionally separate institutional trading desk within the same member firm effected a purchase/sale in the same security to service an institutional customer, that trade would not trigger the disclosure requirement, provided that the institutional trading desk was operated pursuant to policies and procedures reasonably designed to ensure that institutional desk through which the member purchase or member sale was executed had no knowledge of the non-institutional customer transaction.[48] In addition, the rule does not apply if the member acquired the security in a fixed-price offering and sold the security to non-institutional customer(s) at the fixed-price offering price on the day the securities were acquired.[49]

3. Information To Be Disclosed and/or Provided

a. Mark-Up/Mark-Down

Rule 2232(c) would require that the member's mark-up/mark-down for the transaction be calculated in compliance with FINRA Rule 2121 and expressed as a total dollar amount and as a percentage of the PMP.[50] FINRA represents that its determination to require disclosure of both the total dollar amount and the percentage of the PMP is supported by investor testing, which found disclosure of this information in both forms would be more useful than disclosure of the information in only one of these forms.[51] FINRA also explains that members currently are already subject to FINRA Rule 2121, including Supplementary Material .02 to FINRA Rule 2121, which provides extensive guidance on how to determine the PMP and calculate mark-ups/mark-downs for the fixed-income securities to which the proposal would apply, including a presumption to use contemporaneous cost or proceeds.[52] FINRA recognizes that the determination of the PMP of a particular security may not be identical across member firms.[53] FINRA states that members would be expected to have reasonable policies and procedures in place to determine the PMP in a manner consistent with FINRA Rule 2121, and that such policies and procedures be applied consistently across customers.[54] Regarding when a mark-up/mark-down is to be calculated and disclosed, FINRA notes that the mark-up on a customer trade should ''generally be established at the time of that trade'' and states that members may generate customer confirmations that include a mark-up/mark-down disclosure on an intra-day basis.[55]

b. Reference/HyperLink to TRACE and Execution Time of Trade

FINRA initially represented that it would submit a separate filing proposing that confirmations include a hyperlink to publicly available TRACE data and the execution time of the customer trade.[56] FINRA stated that comments received on the Revised Proposal and the results of investor testing justified the addition of these requirements.[57] In response to comments urging FINRA and the MSRB to harmonize both the substance and the time frames of their proposals, FINRA proposes in Amendment No. 1 to

[40] *See* Notice, *supra* note 3, at 55501.

[41] *See* Notice, *supra* note 3, at 55501 n.11, in which FINRA notes that under FINRA Rule 5310 (Best Execution and Interpositioning) members are required to use reasonable diligence to ascertain the best market for the security and buy or sell in such market so that the resultant price to the customer is as favorable as possible under prevailing market conditions, and that under Supplementary Material .01 to FINRA Rule 5310 a member must make every effort to execute a marketable customer order that it receives fully and promptly. FINRA states that a firm found to purposefully delay the execution of a customer order to avoid the proposed disclosure may be in violation of the proposed rule, FINRA Rule 5310 and FINRA Rule 2010 (Standards of Commercial Honor and Principles of Trade).

[42] *See* Notice, *supra* note 3, at 55501.

[43] As a general matter, FINRA would expect that the competitive process used in an ''arms-length'' transaction, *e.g.,* the request for pricing or platform for posting bids and offers, is one in which non-affiliates have frequently participated. *See* Notice, *supra* note 3, at 55501–2.

[44] *See* Notice, *supra* note 3, at 55502 n.12. FINRA adds that, in a non-arms-length transaction with an affiliate, the member also would be required to ''look-through'' to the affiliate's transaction with a third party and related cost or proceeds by the affiliate as the basis for determining the member's calculation of the mark-up/mark-down pursuant to FINRA Rule 2121 (Fair Prices and Commissions) *See id.*

[45] *See* Notice, *supra* note 3, at 55502.

[46] *See* Proposed Rule 2232(d)(1).

[47] *See id.* In the Notice, FINRA notes that the separate trading desk exception would only determine whether or not the proposed disclosure requirement has been triggered and would not change a member's existing requirements relating to the calculation of its mark-up/mark-down under FINRA Rule 2121. *See* Notice, *supra* note 3, at 55502 n.13.

[48] FINRA further explains that a firm could not use the functionally separate trading desk exception to avoid the proposed disclosure requirement if the institutional desk was used to source securities by the retail desk. *See* Notice, *supra* note 3, at 55502.

[49] *See* Proposed Rule 2232(d)(2).

[50] *See* Proposed Rule 2232(c).

[51] *See* Notice, *supra* note 3, at 55502 n.14.

[52] *See* Notice, *supra* note 3, at 55502.

[53] *Id.*

[54] *Id.*

[55] *See* Notice *supra* note 3, at 55506. *See also* notes 128–130, *infra,* and accompanying text (discussing FINRA's response to commenters concerned about the proposal's potential to disrupt the intra-day confirmation generation process).

[56] *See* Notice, *supra* note 3, at 55502 n.14.

[57] *Id.*

include these requirements in the same manner and form as the MSRB has proposed.[58] Specifically, proposed Rule 2232(e) would require that for all transactions in corporate or agency debt securities with non-institutional customers, the member provide on the confirmation (1) a reference, and hyperlink if the confirmation is electronic, to a Web page hosted by FINRA that contains TRACE publicly available trading data for the specific security that was traded, in a format specified by FINRA, along with a brief description of the type of information available on that page; and (2) the execution time of the customer transaction, expressed to the second.[59] Amendment No. 1, in which FINRA proposes to require inclusion of these additional data points, is more fully discussed below.

C. Effective Date of the Proposed Rule Change

FINRA represents that it will announce the effective date of the proposed rule change and the specific implementation date in a *Regulatory Notice* to be published no later than 90 days following Commission approval of the proposal. FINRA initially proposed that the effective date would be no later than 12 months following Commission approval of the proposal. In Amendment No. 1, FINRA proposes to extend the effective date to 18 months following Commission approval of the proposal.[60]

III. Summary of Comments and FINRA Response Letter, Investor Advocate Recommendation, Amendment No. 1

The Commission received nine comment letters from eight commenters, regarding the proposed rule change, and a letter from the Investor Advocate recommending approval of the proposed rule change.[61] Many of the commenters expressed support for the goals of the proposal.[62] Many commenters, however, expressed some concern about implementing the proposal and requested guidance or certain changes to the proposal to facilitate and reduce the costs of implementation.[63] Areas of concern included: (1) The scope of the proposal; (2) methodology and timing for calculating the PMP; (3) acceptable ways to present mark-up/mark-down disclosure information on the customer confirmation; (4) areas of inconsistency with MSRB Proposal; and (5) the effective date of the proposed rule change due to its anticipated costs.

A. Scope of the Proposal

Several commenters addressed the same-day offsetting trade aspect of the proposal's scope. One commenter stated that the same-day window was too limited.[64] Some commenters expressed concern about the operational impact of the same-day window. Specifically, two commenters were concerned that the same-day nature of the proposal would require a member to look forward to transactions occurring after the execution of the non-institutional trade to determine whether that trade requires mark-up/mark-down disclosure, and that this would disrupt the confirmation process.[65] One of these commenters urged FINRA to eliminate the ''look-forward requirement'' so that members could determine the need for disclosure at the time of trade.[66] Another commenter advocated eliminating not only the look-forward aspect of the proposal, but also the look-back aspect.[67] According to this commenter, mark-up/mark-down disclosure should be provided for all retail customer transactions.[68]

In response, FINRA stated that it ''continues to believe that a same-day timeframe is an appropriate trigger for disclosure.'' [69] FINRA acknowledged that members could incur costs to identify customer trades subject to the proposal's disclosure requirements.[70] However, FINRA indicated that members could avoid the cost associated with the look-forward aspect of the rule by choosing to ''provide mark-up disclosure more broadly if they find it beneficial to do so.'' [71] FINRA also noted that members' best execution obligations and surveillance by FINRA should deter inappropriate gaming of the same-day trigger.[72]

One commenter requested clarification on FINRA's statement in the Notice that disclosure is triggered when a member executes one or more offsetting principal transaction(s) on the same trading day. This commenter asked whether the confirmation disclosure requirement is triggered only when a customer trade has an offsetting principal trade or if a firm must continue to disclose its mark-up/mark-down until the triggering trade has been exhausted, at which point the firm may choose to continue to disclose or not.[73]

FINRA responded that there must be offsetting customer and firm principal trades for the disclosure requirement to be triggered, and explained that if a member purchased 100 bonds at 9:30 a.m., and then satisfied three customer buy orders for 50 bonds each in the same security on the same day without purchasing any more of the bonds, the proposal would require mark-up disclosure on two of the three trades, since one of the trades would have been satisfied by selling out of the member's inventory rather than through an offsetting principal transaction by the member.[74] In addition, FINRA noted that, in Amendment No. 1, it was proposing to provide added clarity on this point by adding the term ''offsetting'' to Rule 2232(c)(2) to conform the rule language to the

[61] *See supra* notes 4 and 7. The views of the Investor Advocate are noted in the context of specific issues raised by commenters, as well as separately.

[62] *See* PIABA, at 1 (stating that increased transparency on customer confirmation is a necessary step); Wells Fargo, at 3 (supporting FINRA's efforts to improve price transparency in fixed income markets); Fidelity, at 2 (noting Fidelity's appreciation of regulatory efforts to improve price transparency in the fixed income markets); BDA, at 1 (accepting that retail investors could benefit from disclosure of mark-up (mark-down) on same-day trades); SIFMA, at 1 (expressing support for FINRA's objective to enhance fixed income price transparency for retail investors). *See also* UMiami, at 1–3 (more generally expressing support for the proposal). *See also* Investor Advocate, *supra* note 7, at 2 (recommending that the Commission approve the proposal).

[63] *See generally* SIFMA; BDA, Thomson Reuters II; Wells Fargo; Fidelity; FIF. Among these commenters SIFMA and Wells Fargo suggested that FINRA instead pursue a proposal focusing exclusively on providing information about prevailing market conditions through TRACE. *See* SIFMA, at 2; Wells Fargo, at 2.

[64] *See* PIABA, at 1–2. This commenter encouraged FINRA to emphasize that ''[a]ny intentional delay of a customer execution to avoid the proposed rule . . . would be contrary to [Best Execution] duties to customers.'' *But see* Investor Advocate, *supra* note 7, at 7 (stating that a same-day window of time for disclosure was appropriate and that a full-day window would deter members from adjusting their behavior to avoid the disclosure requirements.)

[65] *See* Thomson Reuters II, at 3; FIF, at 2, 4–5.

[66] *See* Thomson Reuters II, at 3. This commenter also noted that members choosing to provide mark-up/mark-down disclosure on all confirmations in order to ease implementation of the rule might hesitate to do so unless they could provide additional text on customer confirmations to put the mark-up/mark-down disclosure ''in context.'' *Id.*

[67] *See* FIF, at 2, 4–5. FIF suggested that the ''trigger'' be eliminated from the rule to avoid members having to wait to determine if a trigger trade occurred later in the day (look-forward) or to assess whether a trigger trade existed at the end of the day (look-back). *Id.*

[74] *See* FINRA Response Letter, at 4–5.

language used to discuss conditions that trigger the disclosure requirement.[75] FINRA further explained that the proposal applies to ''offsetting'' transactions, and is not limited to ''matched'' trades.[76] FINRA also noted in its response to comments that a member could ''develop reasonable policies and procedures to identify and account for offsetting trades that trigger the [p]roposal, provided the member applies those policies and procedures in a consistent manner.'' [77]

One commenter questioned how the proposal would apply to certain small institutions that may fall into FINRA's definition of ''non-institutional customer,'' but trade via accounts that settle on a delivery versus payment/receive versus payment (DVP/RVP) basis and rely on confirmations generated through the Depository Trust and Clearing Corporation's institutional delivery (DTCC ID) system.[78] Because it is possible for those firms to receive confirms through the DTCC ID process, the commenter asked FINRA to clarify whether its proposal requires modifications to the DTCC ID system.[79]

FINRA responded that it believes that few non-institutional accounts settle on a DVP/RVP basis and that it would not be appropriate to exempt such accounts from the scope of the proposal.[80] FINRA noted that non-institutional accounts that settle on a DVP/RVP basis using the services of the DTCC ID system ''could receive mark-up disclosure without necessitating changes to the DTCC ID system, whether through free text fields currently in the system or by other means.'' [81] Accordingly, FINRA stated that it continues to believe that mark-up/mark-down disclosure ''is appropriate for any account that does not qualify as an institutional account.'' [82]

Another commenter questioned whether FINRA planned to broaden the scope of the rule to cover financial products other than corporate debt and agency securities, asking if the rule would be expanded to include other financial products like TRACE eligible mortgage backed securities, TBAs, asset backed securities or Treasuries.[83]

One commenter addressed the exception for trades executed by a functionally separate trading desk. That commenter seemed to conflate this exception with a separate provision in the proposed rule change that would require a firm to ''look through'' a non-arms-length transaction with its affiliate to determine whether the proposed disclosure obligations are applicable.[84] Specifically, the commenter characterized the functionally separate trading desk exception, as an exception to the ''look through'' requirement.[85]

In response, FINRA clarified that the look-through provision and functionally separate desk exception are separate provisions of the proposal, intended to operate independently of each other.[86] FINRA noted that it is possible that both provisions may be applicable to the same trade; however, each provision would need to be analyzed and applied on its own.[87]

B. Mark-Up/Mark-Down Disclosure

1. Determination of PMP and Mark-Up/Mark-Down in Accordance with FINRA Rule 2121

The Investor Advocate supported the mark-up/mark-down disclosure requirement, stating that this approach has advantages over the reference price approach FINRA contemplated in the Initial Proposal and the Revised Proposal because the mark-up/mark-down approach ''provides retail investors with the relevant information about the actual compensation the retail investor is paying the dealer for the transaction . . . [and] reflects market conditions and has the potential to provide a more accurate benchmark for calculating transaction costs.'' [88] Another commenter did not believe that a mark-up/mark-down disclosure requirement was better than the approach contemplated in the Initial Proposal and the Revised Proposal.[89]

Other commenters expressed concern about the need to determine PMP in accordance with FINRA Rule 2121, believing that this requirement would be operationally burdensome.[90] These commenters requested that FINRA provide additional guidance on how members may determine PMP and calculate mark-ups/mark-downs to facilitate compliance with the rule.[91] Specifically, these two commenters believed that members would need to automate the determination of PMP in order to consistently produce accurate values in the limited time afforded.[92] One commenter believed that it would be ''simply unworkable'' to automate the guidance set forth in FINRA Rule 2121 in a manner that would allow members to calculate and disclose mark-ups/mark-downs on a systematic basis.[93] The other commenter stated that FINRA Rule 2121 would not be easy to convert to the automated operational framework that would be required to comply with the proposed rule change.[94] Both commenters particularly emphasized that it would be difficult to automate factors in the waterfall that require a subjective analysis of facts and circumstances.[95] One of these commenters further questioned whether these challenges could result in the disclosure of inaccurate information on customer confirmations.[96]

In addition, one commenter requested explicit guidance from FINRA that the use of ''reasonable policies and procedures'' would permit member firms to use ''alternative methodologies'' to determine PMP in an automated manner.[97] This commenter, SIFMA, particularly requested that members be permitted to make reasonable assumptions in calculating PMP ''that do not follow the prescriptive waterfall.'' [98] SIFMA suggested that FINRA ''clarify'' that reasonable policies for automated calculation of PMP may include pulling prices from: Third-party pricing vendors, the firm's trading book or inventory market-to-market and contemporaneous trades, or ''some variation thereof.'' [99] SIFMA also requested that it be deemed reasonable for FINRA members to choose to calculate PMP based solely on the contemporaneous cost of the offsetting transaction, without further automating the waterfall.[100]

[100] *Id.*

In addition, SIFMA suggested that FINRA clarify that members may adjust their PMP determination to account for certain characteristics that may affect pricing, such as ''the discount or premium inherent in pricing small or institutional-size transactions,'' the ''difference between inter-dealer and customer markets,'' the size of a transaction, and the ''side of the market.'' [101] SIFMA further requested that FINRA provide specific examples demonstrating how to calculate PMP in order to aid the development of reasonable policies, procedures, and methodologies.[102]

In response to comments, FINRA stated that it continues to believe that mark-up/mark-down disclosure should be based on FINRA Rule 2121 guidance.[103] FINRA noted that members have been subject to FINRA Rule 2121 for ten years, and that it has provided a consistent, prescriptive framework for PMP determination.[104] FINRA believes that the continued use of FINRA Rule 2121 will foster more comparable mark-up/mark-down disclosures across firms.[105] FINRA emphasized that it expects a very significant percentage of the trades that require mark-up/mark-down disclosure to have relatively close-in-time offsetting principal trades, which would presumptively establish PMP under the first step of FINRA Rule 2121.02 and, therefore, FINRA did not believe that the proposal's reliance on FINRA Rule 2121 would present logistical operational challenges to the degree argued by commenters.[106]

FINRA also addressed commenters' requests for additional guidance on establishing reasonable policies and procedures to comply with FINRA Rule 2121.02. FINRA indicated that it did not believe a member's PMP determination under FINRA Rule 2121 must be fully and strictly automated.[107] FINRA nevertheless stated that members may rely on reasonable policies and procedures to facilitate automated PMP determination, provided these policies and procedures are consistent with FINRA Rule 2121.[108] Explaining how the use of reasonable policies and procedures would be consistent with FINRA Rule 2121, FINRA stated that members could, for example, make reasonable judgments about how they apply FINRA Rule 2121. For example, members could calculate contemporaneous costs (proceeds) at the preliminary stage of the FINRA Rule 2121 analysis in cases where the member has multiple principal trades that offset one or more customer trades subject to disclosure.[109] Members also could establish a methodology to adjust contemporaneous costs and proceeds in cases where the member's offsetting trades that trigger disclosure under the proposal are both customer transactions, to avoid ''double counting'' in the mark-up and mark-down it disclosed to each customer.[110] FINRA did not believe, however, that additional adjustments to contemporaneous cost calculations, such as adjustments to reflect the size or side of a contemporaneous trade, as SIFMA requested, are consistent with FINRA Rule 2121.[111] Providing further examples, FINRA noted that members could develop policies and procedures to address subsequent steps of the FINRA Rule 2121 guidance.[112] FINRA believes that certain judgments could be documented up front with the requisite assumptions explained in a member's procedures, including decisions regarding whether a transaction is ''contemporaneous,'' whether there is trade or quotation activity in a subject or similar security, and what economic models provide about the price of an illiquid security.[113] FINRA acknowledged that these steps involve potentially subjective judgments, such as the relative weight of trade or quote activity in a given security, or the number or type of characteristics a different security must share with a given security to be considered ''similar,'' [114] but believes, based on outreach to firms and its own experience with market data, that there are ways for members to represent subjective judgments with objective logic that could be documented and applied consistently through reasonable policies and procedures.[115] In particular, FINRA stated that it understands that many members already have in place some systematic approach to fixed income pricing that allows them to provide traders with automated pricing information or to run compliance checks against the prices that traders use to mark their inventory each day.[116] Although current systems may not evaluate pricing information exactly as set out in FINRA Rule 2121, FINRA noted that the existence of such systems illustrates the possibility for programming the kinds of decision-making required by FINRA Rule 2121.[117] FINRA therefore believes that FINRA Rule 2121 is subject to automation without the need for the ''artificial intelligence'' that SIFMA suggested would be required.[118]

Further, in response to comments suggesting that members be permitted to use third-party pricing services, FINRA stated that, under the proposal, members would not be prohibited from engaging third-party service providers to document and perform the steps of the FINRA Rule 2121 analysis, particularly those that look beyond a firm's own transaction history to more broadly available information.[119] FINRA added, however, that members employing such services would retain compliance responsibility, and it would be incumbent on them to perform the due diligence necessary to ensure that third-party service providers were providing them with calculations performed consistently with FINRA Rule 2121.[120] FINRA cautioned that members would be expected to perform regular reviews of their policies and procedures for mark-up/mark-down disclosure—whether the procedures document steps taken within a member's own operations or the member's oversight of third party vendors—to ensure they are adequate, appropriate, and consistently applied.[121]

Recognizing that members may have more detailed, specific implementation questions FINRA represented that it would work closely with the industry and the MSRB during the implementation period to issue further guidance as necessary.[122]

[101] *See* SIFMA, at 9.

[102] *See* SIFMA, at 10.

[103] *See* FINRA Response Letter, at 7.

[104] *See* FINRA Response Letter, at 7–8. FINRA noted that BDA, while commenting on the potential complexity of automating FINRA Rule 2121 guidance, nevertheless acknowledged that the principles and processes that guide fair pricing assessments—*i.e.,* FINRA Rule 2121—are an appropriate guide for the confirmation disclosure process. *Id. See also* Investor Advocate, *supra* note 7, at 8 (opining that a PMP-based approach provides retail investors with relevant information that reflects market conditions and potentially a more accurate benchmark for calculating transaction costs than a ''reference price'' approach).

2. Time of PMP Determination and Mark-Up/Mark-Down Disclosure

Commenters also addressed the time at which PMP must be determined and the mark-up/mark-down must be calculated and disclosed. Although some commenters believed that the Notice was clear that the proposal permitted members to determine PMP at the time of the customer trade to avoid delay in the confirmation process,[123] others sought confirmation and requested additional detail on the determination of PMP at the time of the customer trade.[124] Specifically, one commenter believed that FINRA had made clear that the PMP determination for calculating a mark-up could be done at the time of trade, but sought confirmation from FINRA that this would also be so for purposes of calculating a mark-down.[125] Another commenter asked FINRA to acknowledge that changes to the price to the customer would not necessitate changes to the PMP from which the disclosure was calculated and also that members need not resend a corrected confirmation based solely on the occurrence of a subsequent transaction or events that might otherwise be relevant.[126] This commenter also requested that FINRA provide assurance that an automated calculation of PMP for the purpose of mark-up/mark-down disclosure, based only on the information available at the time of the trade, would not be deemed incorrect by regulators for the purposes of a fair pricing determination.[127]

As noted above, with regard to timing questions, FINRA responded that members may maintain real-time, intra-day confirmation generation processes, stating that ''members may determine PMP, as a final matter for disclosure purposes, based on the information the member has available to it as a result of reasonable diligence at the time the member inputs the PMP and associated mark-up information into its systems to generate a confirmation,'' [128] which is generally at the time of the trade.[129] FINRA also confirmed that it would not expect members to send revised confirmations solely based on the occurrence of a subsequent transaction or event that would otherwise be relevant to PMP calculation under FINRA Rule 2121.02.[130] FINRA added that, notwithstanding this guidance, it did not believe it was necessary to make a formal distinction between PMP determination for disclosure purposes as opposed to other regulatory purposes, as requested by SIFMA.[131]

C. Presentation of Mark-Up/Mark-Down Information on Customer Confirmations

FINRA proposes to require that mark-ups/mark-downs be disclosed on confirmations as a total dollar amount (*i.e.,* the dollar difference between the customer's price and the security's PMP), and as a percentage amount (*i.e.,* the mark-up's percentage of the security's PMP). Several commenters noted that the new disclosures required by the proposal might cause investor confusion, as different members may determine the PMP for the same security differently, resulting in a lack of comparability or consistency across customer confirmations.[132] One commenter encouraged FINRA to address this issue by monitoring and reviewing relevant policies and procedures.[133] Other commenters sought clarity on members' ability to provide various explanatory statements or qualifying language on the confirmation. Two commenters, for instance, argued that firms should be permitted to label or qualify the mark-up/mark-down disclosed on the confirmation as ''estimated'' or ''approximate.'' [134] Commenters therefore suggested that members be allowed to add a description of the member's process for calculating mark-ups and mark-downs [135] or to explain that the determination of PMP for a particular security may not be identical across firms.[136] Others suggested that members be permitted to describe the meaning of the mark-up/mark-down,[137] or to indicate that it may not reflect profit to the member [138] or the exact compensation to the member.[139] One commenter suggested that, to ''standardize retail investor understanding,'' acceptable explanatory text should be drafted and prepared by FINRA.[140]

FINRA responded by reiterating that the determination of the PMP of a particular security may not be identical across firms.[141] According to FINRA, this is the reason that it will expect members to have reasonable policies and procedures in place to determine PMP and to apply these policies and procedures consistently across customers.[142] FINRA also made clear that it does not believe that members should be permitted to label the required mark-up/mark-down disclosure as an ''estimate'' or an ''approximate'' figure, as such labels have the potential to unduly suggest an unreliability of the disclosures or otherwise diminish their value.[143] However, FINRA believes that a member would not be prohibited from including language on confirmations that provides explanation of PMP as a concept, or provides detail about the member's methodology for determining PMP (or notes the availability of information about methodology upon request), provided such statements are accurate.[144] In response to commenters' requests for FINRA to provide standardized or sample disclosures that would be appropriate under the proposal, FINRA represented that it will engage with members to evaluate the potential need for and use of such guidance.[145]

D. Harmonization With the MSRB Proposal and Amendment No. 1

Commenters generally urged harmonization with the MSRB Proposal,[146] focusing mostly on the MSRB's proposal to require firms to include a security-specific hyperlink to EMMA and the execution time of the customer's trade on the confirmation,[147] and FINRA's statement that it would propose those requirements in a separate filing.[148]

Although two commenters urged FINRA and the MSRB to harmonize

[146] *See, e.g.,* Wells Fargo, at 2; BDA, at 2; SIFMA, at 2–3; Thomson Reuters II, at 1–2. *See also* Investor Advocate, *supra* note 7, at 6.

[147] *See* MSRB Proposal, *supra* note 13, at 62950–62951.

[148] *See* Notice, *supra* note 3, at 55502 n.14.

their approach, they did not address the substance of the MSRB's proposal to include a security-specific hyperlink to EMMA.[149] However, two other commenters expressly opposed the inclusion of a security-specific hyperlink, despite their general support for harmonization with the MSRB.[150] These commenters asserted that customers who typically receive paper confirmations would likely not type in the long universal resource locator (''URL'') of a security-specific hyperlink into an internet browser.[151] One commenter also stated that it would be difficult to maintain security-specific hyperlinks [152] and that inclusion of a security-specific hyperlink would reduce the amount of space available on an already-crowded confirmation.[153] The other commenter believed that FINRA should provide only a general hyperlink to publicly available TRACE data.[154] One commenter suggested that FINRA delay any requirement to include a hyperlink to TRACE on customer confirmations until the mark-up/mark-down disclosure requirement had been fully implemented.[155]

With respect to the inclusion of the time of trade on customer confirmations, two commenters urged FINRA and the MSRB to harmonize their approach, but did not address the substance of the MSRB's proposal to include the time of trade on customer confirmations.[156] One commenter, despite its general support for harmonization with the MSRB Proposal, opposed the inclusion of the time of the trade on customer confirmations, stating that including the time of trade would not only be costly, but that mark-up/mark-down disclosure would obviate the need for this disclosure.[157] This commenter also stressed the practical difficulties on providing this disclosure.[158] One commenter suggested that FINRA delay any requirement to include the time of trade on customer confirmations until the mark-up/mark-down disclosure requirement had been fully implemented.[159]

In response, FINRA agreed with commenters that it was important to harmonize with the MSRB on both of these items.[160] FINRA pointed out that it solicited comments on these potential requirements in the Revised Proposal and that it had reviewed the comments submitted to the MSRB regarding its proposal.[161] After reviewing all such comments, FINRA determined that it was appropriate to require disclosure of a security-specific hyperlink to TRACE and time of execution on customer confirmations, and it further stated that the additional requirements could be implemented in a way that would mitigate the concerns raised by commenters.[162] Accordingly, FINRA submitted Amendment No. 1 to propose requirements that it believes to be ''identical to the MSRB's proposed requirements in all material respects,'' stating that this would further a ''more harmonized implementation schedule.'' [163]

E. Anticipated Costs of Implementing the Proposed Rule Change by the Proposed Effective Date

Several commenters stated that the cost and complexity of the proposed rule change would make it difficult to implement by the proposed effective date. Commenters particularly emphasized the need for significant systems and programming modifications on their part and on the part of their third-party vendors.[164] They also asserted that it would be particularly challenging to implement such changes in light of other regulatory initiatives slated to become effective in the near future.[165] One commenter requested that FINRA or the Commission perform additional outreach to the industry to gather information on the operational costs,[166] while two commenters felt the burdens imposed by the proposal were so high that they questioned whether an adequate cost-benefit analysis had been performed.[167]

In light of these issues, most commenters urged FINRA and the MSRB to agree on a harmonized implementation time frame longer than the one-year period set forth in the proposal. Commenters suggested time frames ranging from 18 months to three years.[168] Two commenters further

[149] *See* BDA, at 2; SIFMA, at 12. In subsequent letters regarding the MSRB Proposal, however, both commenters recommended that FINRA and the MSRB allow firms to provide a general hyperlink to TRACE and/or EMMA, rather than a security-specific hyperlink. *See* Letter from Mike Nicholas, Chief Executive Officer, Bond Dealers of America, to Brent J. Fields, Secretary, Securities and Exchange Commission (Oct. 4, 2016) (''BDA II''), at 4; Letter from Leslie M. Norwood, Managing Director and Associate General Counsel, Municipal Securities Division, and Sean Davy, Managing Director, Capital Markets Division, SIFMA, to Brent J. Fields, Secretary, Securities and Exchange Commission (Oct. 3, 2016) (''SIFMA II''), at 13. They nevertheless continued to stress harmonization as the critical point. *See id.*

[150] *See* Thomson Reuters II, at 3; FIF, at 9.

[151] *See* Thomson Reuters II, at 3 (also stating that investors typing in a long URL would make mistakes in doing so); FIF, at 9. *See also* SIFMA II, at 13 (stating that investors typing in a long URL would make mistakes in doing so).

[152] *See* FIF, at 8. *See also* BDA II, at 4 (noting that dealers are concerned that web addresses to specific security pages may change without their knowledge).

[153] *See* FIF, at 8. In a subsequent letter regarding the MSRB Proposal, however, FIF made it clear that their preference was to remove the requirement for a hyperlink altogether. *See* Letter from Mary Lou Von Kaenel, Managing Director, Financial Information Forum, to Brent J. Fields, Secretary, Securities and Exchange Commission (Oct. 4, 2016) (''FIF II''), at 8. *See also* SIFMA II, at 13 (noting that a short, general hyperlink would reduce the amount of space needed on a confirmation to fulfill the requirement).

[154] *See* Thomson Reuters II, at 3. *See also* BDA II, at p. 4 (recommending that FINRA and the MSRB provide a general hyperlink to search page); SIFMA II, at 13 (recommending that FINRA and the MSRB allow firms to provide a general hyperlink).

[155] *See* SIFMA, at 12. In subsequent letters regarding the MSRB Proposal, three commenters added recommendations that the MSRB delay action on this particular issue in order to coordinate with FINRA. *See* FIF II, at 8; Letter from Norman L. Ashkenas, Chief Compliance Officer, Fidelity Brokerage Services, LLC, and Richard J. O'Brien, Chief Compliance Officer, National Financial Services, LLC, to Brent J. Fields, Secretary, Securities and Exchange Commission (Oct. 4, 2016) (''Fidelity II''), at 5; Letter from Robert J. McCarthy, Director of Regulatory Policy, Wells Fargo Advisors, LLC, to Brent J. Fields, Secretary, Securities and Exchange Commission (Oct. 4, 2016) (''Wells Fargo II''), at 5.

Continued

proposed a phased approach that would first focus on PMP determination and then focus on calculation of the mark-up/mark-down and presentation of this information on customer confirmations.[169]

By contrast, one commenter and the Investor Advocate believed that a one-year implementation period was reasonable.[170] The commenter argued that the benefits of the proposed rule change far outweighed any associated costs.[171] This commenter noted that firms already have an obligation to calculate mark-ups/mark-downs in compliance with FINRA Rule 2121 and maintained that the proposal would impose a limited burden, insofar as it only requires members to provide disclosure in instances when offsetting sales (purchases) occur within the same trading day.[172] Furthermore, this commenter believed that the proposed mark-up/mark-down disclosures might actually stimulate the market by increasing investor confidence, which could create more competitive prices and reduce transaction costs.[173]

FINRA responded that it continues to believe that the proposal is justified.[174] FINRA stated that it ''included significant economic analysis in the [p]roposal, which was based on a multi-year process during which FINRA published two *Regulatory Notices* to solicit feedback on the potential impacts of additional pricing disclosure.'' [175] FINRA represented that it understands the cost concerns expressed by commenters and the firms FINRA has spoken with, particularly those associated with altering the current practice of near straight-through processing of confirmations after a transaction and the potential for regulatory and legal risk associated with errors, but added that it has received no additional data about the magnitude of these costs.[176]

FINRA stated that the proposal's economic impact assessment was premised on the adherence to FINRA Rule 2121 guidance by members, and thus, for members that are not reasonably following FINRA Rule 2121's step-by-step guidance to determine PMP in the manner they would need to under the proposal, the implementation costs of the proposal may be substantially higher than for other firms.[177] However, in the absence of any new data on potential costs that FINRA did not already consider in the proposal, FINRA continues to believe that the proposal's economic impact assessment was sufficient and appropriate.[178] FINRA also believes that the guidance provided in the FINRA Response Letter may reduce the potential costs or burdens of the proposal.[179] To further reduce potential costs or burdens, FINRA further noted that it was proposing in Amendment No. 1 to harmonize the proposal with the MSRB Proposal, as amended, and extend the implementation time frame from one year to 18 months.[180]

F. Recommendation of the Investor Advocate

As noted above, the Investor Advocate submitted to the public comment file its recommendation to the Commission that the Commission approve the proposed rule change.[181] In its recommendation, the Investor Advocate stated its belief that the proposed rule change's ''enhancements to pricing disclosure in the fixed income markets are long overdue and will greatly benefit retail investors.'' [182] Specifically, the Investor Advocate noted that the required mark-up/mark-down disclosures will better equip retail investors ''to evaluate transactions and the quality of service provided to them by a firm,'' help regulators and retail investors detect improper dealer practices, and make it less likely that dealers will charge excessive mark-ups.[183] Ultimately, the Investor Advocate focused its attention on ''four key issues''—consistency of approach between FINRA and the MSRB; same-day disclosure window; the use of PMP as the basis for calculating mark-ups; and the need for dealers to look through transactions with affiliates—as the focus of its review, and stated ''each of these issues has been resolved to our satisfaction'' in the proposed rule change.[184]

With respect to FINRA and the MSRB adopting consistent rules related to confirmation disclosure, the Investor Advocate highlighted that the proposed rule change and the MSRB Proposal ''provide a coordinated and consistent approach to mark-up disclosure in corporate and municipal bond transactions.'' [185] Accordingly, the Investor Advocate concluded that ''this deliberative approach will lead to consistent disclosures across the fixed income markets and will provide retail investors with better post-trade price transparency.'' [186]

Addressing the same-day disclosure window, the Investor Advocate noted its agreement ''that the window of time for disclosure should be the full trading day.'' [187] According to the Investor Advocate, a shorter time-frame—*e.g.,* the two-hour window previously proposed by the MSRB—could inappropriately incentivize dealers to alter their trading practices to avoid the obligation to disclose mark-ups.[188]

Discussing the proposed rule change's use of PMP as the basis for mark-up disclosure, the Investor Advocate stated its belief that the PMP-based disclosure has advantages over the initially proposed reference price-based disclosure.[189] Specifically, the Investor Advocate noted that though the ''PMP-based disclosure may lead to disclosure of a smaller cost to retail investors under certain circumstances . . . the PMP-based approach provides retail investors with the relevant information about the actual compensation the retail investor is paying the dealer for the transaction . . . [and] . . . [i]t reflects market conditions and has the potential to provide a more accurate benchmark for calculating transaction costs.'' [190] Moreover, the Investor Advocate notes that the PMP-based disclosure regime could more easily be expanded beyond the presently contemplated same-day disclosure window.[191] As a result, the Investor Advocate stated its support for the use of the PMP-based disclosure regime.[192] Finally, the Investor Advocate stated its support for the proposed rule change's requirement that dealers express the mark-up both as a total dollar amount and as a percentage of the PMP.[193]

With respect to dealer transactions with affiliates, the Investor Advocate highlighted its concern with dealer-affiliate trading arrangements, and concluded that the proposed rule change ''satisfies [the Investor

Advocate's] concerns by making clear that a dealer must look through non-arms-length transactions with affiliates to calculate PMP.'' [194]

Finally, with respect to the implementation of the proposed rule change, the Investor Advocate stated its support for a one-year implementation period, noting that such period would be reasonable despite the technical and system changes that might be required for compliance with the proposed rule change.[195]

G. Amendment No. 1

To complement the mark-up/mark-down disclosure proposal and further harmonize its proposal with the MSRB Proposal, FINRA proposes in Amendment No. 1 to require that for all transactions in corporate or agency debt securities with non-institutional customers, irrespective of whether mark-up/mark-down disclosure is required, the member provide on the confirmation the following additional information: (1) A reference, and a hyperlink if the confirmation is electronic, to a Web page hosted by FINRA that contains TRACE publicly available trading data for the specific security that was traded, in a format specified by FINRA, along with a brief description of the type of information available on that page; and (2) the execution time of the transaction, expressed to the second.[196]

In support of the Amendment, FINRA notes that four commenters—BDA, Thomson Reuters, SIFMA, and FIF—addressed FINRA's statement in the Notice that it intended to submit an additional filing to require members to add disclosures to non-institutional confirmations of the time of trade and a hyperlink to trade data reported to TRACE, and that three of these commenters asked that FINRA conform its forthcoming filing to parallel requirements included in the MSRB Proposal.[197] In addition, in support of the proposed additional requirements, FINRA discusses comments received on the Initial and Revised Proposals.

Regarding the reference/hyperlink to TRACE, FINRA notes that one commenter stated in response to *Regulatory Notice* 14–52 that providing CUSIP-specific hyperlinks to TRACE on customer confirmations would be ''fairly easy'' if FINRA adopts a retail customer-friendly hyperlink protocol.[198] In addition, FINRA states that three commenters on *Regulatory Notice* 15–36 supported adding a hyperlink to TRACE data in some form,[199] although one commenter requested a short URL [200] and one preferred a general hyperlink to the TRACE Web site.[201] Regarding comments on the proposed requirement to disclose the time of the execution of the customer transaction, FINRA notes that some commenters on *Regulatory Notice* 15–36 supported including the time of execution of the customer trade because it would allow customers to identify their trade on TRACE and understand the market for the security at the time of their trade,[202] and that others opposed it as unnecessary and costly.[203]

FINRA represents that it also has evaluated the comments submitted on the MSRB Proposal, which includes the proposed additional requirements.[204] FINRA states that the commenters that opposed these elements of the MSRB's Proposal did so primarily on the basis of harmonization, because FINRA had not yet proposed the same requirements, and on the basis of operational cost or burden.[205]

FINRA believes that the proposed additional requirements are consistent with the Act because they will provide retail customers with meaningful and useful additional information that is either not readily available through existing data sources, or is not always known or easily accessible to investors.[206] FINRA notes that its conduct of investor testing indicated that investors would find the proposed additional information useful, and that their inclusion will better enable customers to evaluate the cost of the services that members provide, and will promote transparency into members' pricing practices and encourage communications between members and their customers about the execution of their fixed income transactions.[207]

Addressing cost concerns that commenters have raised regarding the proposed additional requirements,[208] FINRA represents that it is developing technology that it believes may mitigate costs associated with modifying systems to include the required security-specific reference or hyperlink to TRACE data prior to the rule's implementation date.[209] In addition, while FINRA recognizes that there will be operational burdens associated with the time of execution requirement, FINRA believes that the systems to capture this information for provision to customers should already be in place, given that current rules already require members to capture and maintain this information with respect to each customer transaction.[210] As a result, FINRA expects the cost to implement the proposed additional requirements to be limited.[211]

FINRA represents that it has thoroughly and carefully evaluated all of the comments that relate to the additional requirements it proposes in Amendment No. 1, and believes it is appropriate to pursue these requirements as an amendment to the proposal in response to the strong call from commenters to harmonize the proposed disclosure requirements put forth by FINRA and the MSRB.[212] In addition, FINRA believes it has modified the requirements in a way that significantly mitigates the operational concerns that commenters have identified, particularly with respect to the format for the required reference or hyperlink to TRACE data.[213] FINRA also notes that it is extending the implementation timeline for the proposal from one year to eighteen months, which it believes should

[194] *See* Investor Advocate, *supra* note 7, at 9–10.

[206] *See* Amendment No. 1, *supra* note 9, at 7.

[207] *See id.*

[208] *See* Amendment No. 1, *supra* note 9, at 9.

[209] *See* Amendment No. 1, *supra* note 9, at 9–10. Specifically, FINRA is in the process of developing a Web page linkage system that will create a short, uniform hyperlink template that could be included on customer confirmations. FINRA anticipates that the hyperlink template would include a short domain name followed by a slash and the specific security CUSIP. FINRA believes that, by developing this short, uniform hyperlink template, it can limit the space required on each confirmation for the required TRACE reference or hyperlink. FINRA also believes a short, uniform hyperlink template would make automation of the requirement more feasible, since the hyperlink would only include two pieces of information: (1) The short domain name, which would remain constant; and (2) the security-specific CUSIP, which members already include on customer confirmations. FINRA intends to work with firms to obtain input and expects to finalize and publish the short uniform hyperlink template well before the rule takes effect, with sufficient time for further feedback and implementation.

[210] *See* Amendment No. 1, *supra* note 9, at 7.

[211] *See* Amendment No. 1, *supra* note 9, at 9.

[212] *See* Amendment No. 1, *supra* note 9, at 10–12.

[213] *See* Amendment No. 1, *supra* note 9, at 12.

mitigate the commenters' potential concerns with these requirements even further.[214] FINRA believes that the extension of the time period for implementation of the rule is an appropriate balance of the commenters' concerns and the desire to begin delivering additional pricing information to retail customers.[215]

IV. Discussion and Commission Findings

After carefully considering the proposed rule change, the comments received, the FINRA Response Letter, and Amendment No. 1, the Commission finds that the proposed rule change, as modified by Amendment No.1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association. In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 15A(b)(6) of the Act,[216] which requires, among other things, that FINRA's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and Section 15A(b)(9) of the Act,[217] which requires the rules of a national securities association not impose any burden on competition not necessary or appropriate in furtherance of the Exchange Act.

A. Mark-Up/Mark-Down Disclosure

The Commission notes that the goal of improving transaction cost transparency in fixed-income markets for retail investors has long been pursued by the Commission.[218] The Commission believes that the establishment of a requirement that FINRA members disclose mark-ups/mark-downs to retail investors, as proposed, will advance the goal of providing retail investors with meaningful and useful information about the pricing of their fixed-income transactions.[219]

The Commission believes the proposal, as modified by Amendment No. 1, is reasonably designed to ensure that mark-ups/mark-downs are disclosed to retail investors, at least when a member has effected a same-day off-setting transaction, while limiting the impact of operational challenges for members. For example, in response to commenters concerned that the proposal would disrupt intra-day confirmation generation processes, FINRA has clarified that members need not wait until the end of the day to determine the information to be included in a confirmation, and may maintain real-time, intra-day confirmation generation processes; and, further, that members will not be expected to send revised confirmations solely based on the occurrence of a subsequent transaction or event that would otherwise be relevant to the determination of PMP under FINRA Rule 2121.02.[220]

Under the proposal, disclosed mark-ups/mark-downs are to be calculated in compliance with FINRA Rule 2121, and expressed as a total dollar amount and as a percentage of the PMP.[221] The Commission believes that this information will, for example, promote transparency of members' pricing practices and encourage dialogue between members and retail investors about the costs associated with their transactions, thereby better enabling retail investors to evaluate their transaction costs and potentially promoting price competition among member firms.

As discussed above, concerns were raised that the proposal's requirement to determine PMP in compliance with FINRA Rule 2121 and the supplementary material thereunder would make it difficult for members to automate PMP determinations at the time of the trade.[222] The Commission believes that FINRA has adequately responded to these concerns, and that the price and mark-up/mark-down disclosed to the customer on a confirmation must reflect the actual PMP the member used to price and mark-up/mark-down the transaction at the time of the trade. The Commission believes that it is feasible to automate the determination of PMP in accordance with FINRA Rule 2121 to the extent a member chooses to do so, and agrees with FINRA that a firm's election to use automated processes to support pricing of retail trades, and thus determine the PMP, would not justify departure from the current requirement that members price securities in accordance with FINRA Rule 2121.[223] When it approved FINRA Rule 2121.02, the Commission stated that such guidance is consistent with long-standing Commission and judicial precedent regarding fair mark-ups, and that it:

> provides a framework that specifically establishes contemporaneous cost as the presumptive prevailing market price, but also identifies certain dynamic factors that are relevant to whether contemporaneous cost or alternative values provide the most appropriate measure of prevailing market price. The Commission believes that the factors that govern when a dealer may depart from contemporaneous cost and that set forth alternative measures the dealer may use are reasonably designed to provide greater certainty to dealers and investors while providing an appropriate level of flexibility for dealers to consider alternative market factors when pricing debt securities.[224]

The Commission believes this reasoning remains sound and is not persuaded that the proposed requirement to disclose mark-ups/mark-downs on customer confirmations necessitates an

[223] *See* notes 103–106, *supra,* and accompanying text.

[224] *See* Securities Exchange Act Release No. 55638 (Apr. 16, 2007), 72 FR 20150, 20154 (Apr. 23, 2007) (NASD–2003–141).

approach contrary to FINRA Rule 2121.02.

Further, in response to commenters that requested additional guidance concerning how they could develop reasonable policies and procedures to comply with the rule,[225] FINRA states that members may rely on reasonable policies and procedures to facilitate the determination of PMP, provided they do so consistent with FINRA Rule 2121.[226] More specifically, FINRA explained that a member could, for example, develop reasonable policies and procedures to: (i) Employ a methodology to determine PMP when there are multiple principal trades that offset one or more customer trades subject to disclosure; (ii) employ a methodology to adjust contemporaneous cost and proceeds in cases where the member's offsetting trades that trigger disclosure under the proposal are both customer transactions; and/or (iii) employ the use of economic models provided by a third-party pricing service.[227] Because the determination of the PMP of a particular security may not be identical across firms, FINRA will expect members to have reasonable policies and procedures in place to determine PMP and to apply these policies and procedures consistently across customers.[228] FINRA also has proposed to extend the implementation date of the proposal, as modified by Amendment No. 1, from one year to 18 months,[229] and represented that it will work closely with the industry and MSRB during the rule's implementation period to issue further guidance as necessary.[230] The Commission believes FINRA's response appropriately addresses commenters' concerns regarding implementation of the proposal.

Also, as discussed above, commenters had questions regarding the presentation of mark-up/mark-down information on customer confirmations, and in particular sought FINRA's concurrence that it would be acceptable to label the required mark-up/mark-down disclosure as an ''estimate'' or an ''approximate'' figure.[231] The Commission agrees with FINRA,[232] and does not believe that it would be consistent with the Act or the proposal for members to label the required mark-up/mark-down disclosure as an ''estimate'' or an ''approximate'' figure, or to otherwise suggest that the member is not disclosing the actual amount of the mark-up/mark-down it determined to charge the customer. However, the proposal is appropriately flexible to permit a member to include language on confirmations that explains PMP as a concept, or that details the member's methodology for determining PMP, or notes the availability of information about methodology upon request, provided such statements are accurate.[233] The Commission emphasizes that members will be required to disclose the actual amount of the mark-up/mark-down that they have determined to charge the customer, in accordance with FINRA Rule 2121, and the amendments to FINRA Rule 2232 being approved hereby.

B. Harmonization With the MSRB Proposal: Requirement To Provide TRACE Reference/Hyperlink and Time of Execution on All Non-Institutional Customer Confirmations

The Commission also believes that FINRA's proposal to require members to reference (or include, if the confirmation is electronic) a security-specific hyperlink to a Web page hosted by FINRA that contains TRACE publicly available trade data and to disclose the time of trade execution on all retail trade confirmations, is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to protect investors, and in the public interest, and does not impose any burden on competition not necessary or appropriate in furtherance of the Act, and is therefore consistent with the Act.

In the Commission's view, providing a retail investor with a security-specific reference or hyperlink on the trade confirmation and the time of trade execution will facilitate retail customers obtaining a comprehensive view of the market for their securities, including the market as of the time of trade. The Commission believes that these items will complement FINRA's existing order-handling obligations (*e.g.,* best execution) by providing retail investors with meaningful and useful information with which they will be able to independently evaluate the quality of execution obtained from a firm.

Although some commenters urged a general hyperlink to TRACE publicly available trade data, rather than a security-specific hyperlink,[234] FINRA believes that a security-specific hyperlink will better enable retail investors, who typically have less ready access to market and pricing information than institutional customers, to access important data related to fixed-income securities, providing them with a more comprehensive picture of the market for a security on a given day, and ultimately assist them in understanding and comparing the transaction costs associated with their purchases and sales of fixed income securities.[235] Further, in Amendment No. 1, FINRA represents that the proposed requirements can be implemented in a way that mitigates the concerns raised by commenters, as FINRA intends to develop technology that it believes may reduce the costs associated with modifying systems to include the required security-specific reference or hyperlink prior to the rule's implementation date.[236] The Commission has carefully considered Amendment No. 1 in light of comments received urging FINRA and the MSRB to harmonize both the substance and timing of their proposals,[237] as well comments submitted on the MSRB Proposal which proposed analogous requirements.[238] The Commission concurs with FINRA that the time of execution along with a security-specific reference or hyperlink on a customer confirmation would provide customers with the ability to obtain a comprehensive view of the market for their security at the time of trade.

C. Efficiency, Competition, and Capital Formation

In approving the proposed rule change, as modified by Amendment No. 1, the Commission has considered its impact on efficiency, competition, and capital formation.[239] The Commission believes that the proposed rule change, as modified by Amendment No. 1, could affect efficiency, competition, and capital formation in several ways.

The Commission believes that the proposed rule could have an impact on competition among broker-dealers. For instance, costs associated with the proposed rule could raise barriers to

[239] 15 U.S.C. 78c(f).

entry in the non-institutional trading market. Further, in the Notice, FINRA considers the possibility that the mark-up/mark-down disclosure proposal could have a differing operational impact and costs across members.[240] FINRA acknowledges that the proposal could result in higher costs for small broker-dealers and broker-dealers less active in non-institutional trading, that the proposed rule could lead small broker-dealers to consolidate with large broker-dealers, or to exit the market, but believes that FINRA's data analysis suggested that this effect could be limited.[241] Additionally, the Commission believes that the proposal provides members with the flexibility to develop cost effective policies and procedures for complying with the proposed rule change, as modified by Amendment No. 1,that reflect their business needs and are consistent with the regulatory objectives of the proposal.

By increasing disclosure requirements in non-institutional customer confirmation, the proposed rule could improve efficiency—in particular, price efficiency—and the improvement in pricing efficiency could promote capital formation. The Commission believes that mark-up/mark-down disclosure and the inclusion of a security-specific reference/hyperlink to TRACE data on non-institutional customer confirmations would promote price competition among broker-dealers and improve trade execution quality. An increase in price competition among broker-dealers would lower transaction costs on non-institutional customer trades. To the extent that the proposed rule lowers transaction costs on non-institutional customer trades, the proposed rule could improve the pricing efficiency and price discovery process. The quality of the price discovery process has implications for efficiency and capital formation, as prices that accurately convey information about fundamental value improve the efficiency with which capital is allocated across projects and firms. Furthermore, to the extent that the proposed rule lowers transaction costs on non-institutional customer trades, the proposed rule could lower bond financing costs for projects and firms.

As noted above, the Commission received nine comment letters on the filing. The Commission believes that FINRA considered carefully and responded adequately to the concerns raised by commenters. For all of the foregoing reasons, including those discussed in the FINRA Response Letter, the Commission believes the proposal is reasonably designed to help FINRA fulfill its mandate in Section 15A(b)(6) of the Act which requires that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and Section 15A(b)(9) of the Act, which requires, among other things, that FINRA's rules do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Pursuant to Section 19(b)(5) of the Act,[242] the Commission consulted with and considered the views of the Treasury Department in determining whether to approve the proposed rule change, as modified by Amendment No. 1. The Treasury Department did not object to the proposal, as modified by Amendment No. 1. Pursuant to Section 19(b)(6) of the Act,[243] the Commission has considered the sufficiency and appropriateness of existing laws and rules applicable to government securities brokers, government securities dealers, and their associated persons in approving the proposal.

V. Solicitation of Comments on Amendment No. 1

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 1 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–FINRA–2016–032 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2016–032. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change, as modified by Amendment No. 1, that are filed with the Commission, and all written communications relating to the proposed rule change, as modified by Amendment No. 1, between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing will also be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2016–032 and should be submitted on or before December 14, 2016.

VI. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 1, prior to the thirtieth day after the date of publication of notice of the filing of Amendment No. 1 in the **Federal Register**. Amendment No. 1 supplements the proposed rule change by amending FINRA Rule 2232 to require members to provide the following additional information on customer confirmations: (1) A reference, and a hyperlink if the confirmation is electronic, to a Web page hosted by FINRA that contains TRACE publicly available trading data for the specific security that was traded, in a format specified by FINRA, along with a brief description of the type of information available on that page; and (2) the execution time of the transaction, expressed to the second. FINRA also proposes in Amendment No. 1. to add the term ''offsetting'' to proposed Rule 2232(c)(2) to conform the rule language to the language used to discuss conditions that trigger the disclosure requirement, and extend the

[240] *See* Notice, *supra* note 3, at 55505–55506.

[241] *See* Notice, *supra* note 3, at 55506.

[242] 15 U.S.C. 78s(b)(5) (providing that the Commission ''shall consult with and consider the views of the Secretary of the Treasury prior to approving a proposed rule filed by a registered securities association that primarily concerns conduct related to transactions in government securities, except where the Commission determines that an emergency exists requiring expeditious or summary action and publishes its reasons therefor'').

[243] 15 U.S.C. 78s(b)(6).

implementation period of the proposal from one year to 18 months.

The Commission finds that requiring members to include a reference or hyperlink to a security-specific TRACE Web page and include the time of trade on all retail customer confirmations is responsive to commenters' requests for harmonization of the FINRA Proposal and MSRB Proposal and therefore helped the Commission find that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 15A(b)(6) of the Act,[244] which requires, among other things, that FINRA's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and Section 15A(b)(9) of the Act,[245] which requires, among other things, that FINRA's rules do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Commission notes that the addition of the term ''offsetting'' to the rule is solely a clarification for the avoidance of doubt and that the change does not alter the substance of the rule. Furthermore, extension of the implementation period of the proposal from one year to 18 months is appropriate and responsive to the operational and implementation concerns raised by commenters. The Commission also notes that after consideration of the comments the MSRB received on its proposal to require a security-specific hyperlink to EMMA and the execution time of the transaction, the MSRB amended its proposal in a manner that is identical to the Amendment No. 1 that FINRA has filed.[246] The Commission notes that it today has approved the MSRB Proposal, as modified by MSRB Amendment No. 1, and believes that in the interests of promoting efficiency in the implementation of both proposals, it is appropriate to approve FINRA's proposal, as modified by Amendment No. 1, concurrently. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Exchange Act,[247] to approve the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

V. Conclusion

It Is Therefore Ordered, pursuant to Section 19(b)(2) of the Act,[248] that the proposed rule change (SR–FINRA–2016–032), as modified by Amendment No. 1, is approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[249]

Brent J. Fields,

Secretary.

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36069]

Kokomo Rail, LLC—Acquisition and Operation Exemption—Rail Line of Kokomo Rail Co., Inc.

Kokomo Rail, LLC (KR), a noncarrier, has filed a verified notice of exemption [1] under 49 C.F.R 1150.31 to acquire, from Kokomo Rail Co., Inc. (KRC),[2] and to operate, approximately 12.55 miles of rail line between milepost 134.48 at or near Marion and milepost 147.07 at or near Amboy, in Howard and Grant Counties, Ind. (the Line).

According to KR, KRC acquired the 12.55-mile line from CSX Transportation, Inc.[3] KR states that KRC was voluntarily dissolved as a corporation, and that dissolution makes it necessary to transfer KRC's authority to own and operate the Line from KRC to KR.

KR states that the proposed transaction does not involve any interchange commitments. KR certifies that its projected annual revenues as a result of this transaction will not result in the creation of a Class I or Class II rail carrier and that its projected annual revenues do not exceed $5 million.

The transaction may be consummated on or after December 7, 2016, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions to stay must be filed no later than November 30, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36069, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on applicant's representative, Thomas F. McFarland, Thomas F. McFarland, P.C., 208 South LaSalle Street, Suite 1666, Chicago, IL 60604.

According to KR, this action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available on our Web site at ''*WWW.STB.GOV.*''

Decided: November 18, 2016.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Rena Laws-Byrum,

Clearance Clerk.

[FR Doc. 2016–28222 Filed 11–22–16; 8:45 am]

BILLING CODE 4915–01–P

[1] The verified notice was originally filed on October 27, 2016. On November 7, 2016, KR filed supplemental information, including the relevant mileposts, and noted that KRC was dissolved in 1999. Therefore, November 7, 2016, is the official filing date.

[2] KR is an affiliate of Kokomo Grain Co., Inc., as was KRC.

SURFACE TRANSPORTATION BOARD

[Docket No. AB 290 (Sub-No. 343X)]

Central of Georgia Railroad Company—Abandonment Exemption—in Newton County, Ga.

AGENCY: Surface Transportation Board.

ACTION: Correction to notice of exemption.

On July 1, 2013, Central of Georgia Railroad Company (CGA) [1] filed a verified notice of exemption under 49 CFR pt. 1152 subpart F—*Exempt Abandonments* to abandon approximately 14.90 miles of rail line between milepost E 65.80 and milepost E 80.70, in Newton County, Ga. The notice was served and published in the **Federal Register** on July 19, 2013 (78 FR 43,273).

Before the exemption became effective, Newton County Trail-Path Foundation, Inc. (Newton Trail) filed a request for a notice of interim trail use (NITU). The Board issued a NITU on August 19, 2013, and on September 28, 2016, CGA and Newton Trail filed a notice informing the Board that they had entered into a lease agreement for interim trail use and rail banking for the 14.90 miles of rail line that was subject to abandonment.

On October 14, 2016, CGR filed a letter stating that the map attached as

[1] CGA is a wholly owned subsidiary of Norfolk Southern Railway Company.

Appendix A to its July 1, 2013 verified notice did not properly depict the location of milepost E 65.80, and that parentheticals in the notice incorrectly refer to milepost E 65.80 as: ''(at the point of the Line's crossing of Route 229 in Newborn).'' [2] Thus, CGR requests that the Board accept the corrected map attached to the October 14, 2016 letter and clarify the parenthetical references to milepost E 65.80 in its July 1, 2013 verified notice and the notice the Board served and published on July 19, 2013, to read: ''(a point just east of the Ziegler Road crossing west of downtown Newborn)''. These corrections are recognized here. All of the remaining information in the July 19, 2013 notice remains unchanged.

Board decisions and notices are available on our Web site at ''*WWW.STB.DOT.GOV.*''

Decided: November 18, 2016.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Jeffrey Herzig,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Approval of Noise Compatibility Program for Bob Hope Airport, Burbank, California

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by Burbank-Glendale-Pasadena Airport Authority under the provisions of 49 U.S.C. 47501 *et seq.* (formerly the Aviation Safety and Noise Abatement Act, hereinafter referred to as ''the Act'') and 14 Code of Federal Regulations (CFR) Part 150 (hereinafter referred to as ''Part 150''). These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96–52 (1990). On October 10, 2013, the FAA determined that the noise exposure maps submitted by Burbank-Glendale-Pasadena Airport Authority under Part 150 were in compliance with applicable requirements. On October 24, 2016, the FAA approved the Bob Hope Airport noise compatibility program. Fifteen (15) of the eighteen (18) total number of recommendations of the program were approved. Two (2) of the eighteen (18) total number of recommendations of the program were approved in part. For one (1) of the eighteen (18) program measures there was no action required at this time. No program elements relating to new or revised flight procedures for noise abatement were proposed by the airport operator.

DATES: *Effective Date:* The effective date of the FAA's approval of the noise compatibility program for Bob Hope Airport is October 24, 2016.

FOR FURTHER INFORMATION CONTACT: Victor Globa, Environmental Protection Specialist, Federal Aviation Administration, Los Angeles Airports District Office, Mailing Address: P.O. Box 92007, Los Angeles, California 90009–2007. Street Address: 15000 Aviation Boulevard, Lawndale, California 90261. Telephone: 310/725–3637. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Bob Hope Airport, effective October 24, 2016.

Under section 47504 of the Act, an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing non-compatible land uses and prevention of additional non-compatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required. Prior to an FAA decision on a request to implement the action, an environmental review of the proposed action may be required. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Los Angeles Airports District Office in the Western-Pacific Region.

Burbank-Glendale-Pasadena Airport Authority submitted to the FAA on June 27, 2013 the noise exposure maps, descriptions and other documentation produced during the noise compatibility planning study conducted from September 13, 2011 through October 24, 2016. The Bob Hope Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on October 10, 2013. Notice of this determination was published in the **Federal Register** (78 FR 64048) on October 25, 2013.

The Bob Hope Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from December 30, 2014 to the year

[2] On October 14, 2016, CGA and Newton Trail also filed a letter to correct their September 28, 2016 notification that a lease agreement for interim trail use and rail banking had been reached. This filing as well as the modification of the NITU to reflect the correct location of milepost E 65.80 will be addressed in a separate decision.

2017. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 47504 of the Act. The FAA began its review of the program on May 11, 2016, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new or modified flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained 18 proposed actions for noise abatement, noise mitigation, land use planning and program management measures on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and Part 150 have been satisfied. The overall program was approved by the FAA, effective October 24, 2016.

FAA approval was granted for fifteen (15) specific program measures. The approved measures included such items as: Continue Requiring All Transport Category and Turbojet Aircraft to Comply with Federal Aircraft Noise Regulations; Continue Requiring Compliance with the Airport's Engine Test Run-up Policy; Continue Promoting Use of AC 91–53A, Noise Abatement Departure Procedures by Air Carrier Jets as voluntary only; Continue Promoting Use of NBAA Noise Abatement Procedures, or Equivalent Manufacturer Procedures, by General Aviation Jet Aircraft as voluntary only; Continue Working with the FAA Airport Traffic Control Tower to Maintain the Typical Traffic Pattern Altitude of 1,800 feet MSL as voluntary only; Continue the Placement of New Buildings on the Airport North of Runway 8–26 to Shield Nearby Neighborhood From Noise on Runway; Designate Runway 26 as Nighttime Preferential Departure Runway as voluntary only; Build Engine Maintenance Run-Up Enclosure; Revise Residential Acoustical Treatment Program to Include Single Family Homes Within 65 Community Noise Equivalent Level (CNEL) Contour Based on 2017 NEM that were constructed or existed before October 1, 1998; Establish Acoustical Treatment Program for Multi-Family Dwelling Units Within the 2017 Acoustical Treatment Eligibility Area that were constructed or existed before October 1, 1998; Provision for Retention or an Easement Preventing Noise-Sensitive Land Uses of Property Located in the Northeast Quadrant of the Airport within the 2017 65 CNEL Noise Exposure Contour (This measure would prevent the development of noise-sensitive land uses within the 65 CNEL noise contour and that would jeopardize the long-term viability of the airport.); Continue Noise Abatement Information Program (For the purpose of aviation safety, this approval does not extend to the use of monitoring equipment for enforcement purposes by in-situ measurement of any pre-set noise thresholds.); Monitor Implementation of Updated Noise Compatibility Program; Update Noise Exposure Maps and Noise Compatibility Program (In order to comply with 14 CFR part 150, the proposed changes should be submitted to FAA for approval after local consultation and a public hearing has been conducted.); Maintain Log of Nighttime Runway Use and Operations by Aircraft Type.

FAA approved in part, disapproved in part on two (2) specific program measures. The first approved in part, disapproved in part measure is: Continue Existing Acoustical Treatment Program for Single Family Homes. The portion of this measure that is approved is limited to single family homes that are located within the 65 CNEL noise contour for the forecasted year 2017 accepted by the FAA on October 10, 2013. The portion that is disapproved is acoustical treatment of homes that previously were within the 65 CNEL contour for the forecast year 2000 NEM submitted in 1988, but that are now outside of the 65 CNEL contours for the NEMs submitted with this Part 150 update; The second approved in part, disapproved in part measure is: For Otherwise Qualified Property Owners Who Have Been Unable to Participate in the Residential Acoustical Treatment Program (RATP) Due to Building Code Deficiencies, Offer to Purchase a Noise Easement as an Option for Owners of Single Family and Multi-Family Properties in the 2017 Acoustical Treatment Eligibility Area That Have Not Been Treated. The portion of this measure that is approved is the Airport Authority may offer avigation easements to property owners within the 2017 65 CNEL noise contour accepted by the FAA on October 10, 2013. The portions that are disapproved are the additional local requirements proposed for easement eligibility.

FAA determined that there is no action required at this time on one (1) specific program measure. This measure is Establish Noise Abatement Departure Turn for Jet Takeoffs on Runway 26. This measure relates to flight procedures under Section 104(b). Additional review by FAA is necessary to evaluate the operational safety, feasibility, and environmental effects of this proposal.

These determinations are set forth in detail in a Record of Approval signed by the Director, Office of Airports, Western-Pacific Region (AWP–600) on October 24, 2016. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the Burbank-Glendale-Pasadena Airport Authority.

The Record of Approval also will be available on-line at: *http://www.faa.gov/airports/environmental/airport_noise/part_150/states/*

Issued in Hawthorne, California, on November 17, 2016.

Mark A. McClardy,

Director, Office of Airports, Western-Pacific Region.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–FMCSA–2007–29035; FMCSA–2008–0293; FMCSA–2009–0242; FMCSA–2011–0277; FMCSA–2011–0278; FMCSA–2013–0184; FMCSA–2013–0187; FMCSA–2013–0190]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions of 133 individuals from its prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals with ITDM to continue to operate CMVs in interstate commerce.

DATES: Each group of renewed exemptions were effective on the dates stated in the discussions below and will expire on the dates stated in the discussions below.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue, SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m., e.t., Monday through Friday, except Federal holidays. If you have

questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http//www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

II. Background

On November 27, 2015, FMCSA published a notice announcing its decision to renew exemptions for 133 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (80 FR 74196). The public comment period ended on December 28, 2015 and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received no comments in this preceding.

IV. Conclusion

Based upon its evaluation of the 133 renewal exemption applications and that no comments were received, FMCSA confirms its decision to exempt the following drivers from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce in 49 CFR 391.64(3):

As of December 1, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (74 FR 48338; 74 FR 62883; 80 FR 74196):

Charles E. Boyd (NE)
Warren B. Copple, Jr. (MI)
Hernan Hernandez (CT)
Jeffrey E. Kiehl (MI)
Jesus G. Maesse (TX)
Jackson R. Olive (NY)
Thomas N. Pico (PA)
Paul Ramirez (OK)
Jon C. Thomas (MT)
Dennis M. Thyfault (UT)

The drivers were included in Docket No. FMCSA–2009–0242. Their exemptions are effective as of December 1, 2015, and will expire on December 1, 2017.

As of December 10, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 7 individuals, have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (73 FR 63042; 73 FR 75163; 80 FR 74196):

Herschel J. Crawford (AK)
James E. Gaines (NJ)
Allan D. Gralapp (IA)
Scott L. Halm (OH)
Jason P. Smith (GA)
Dean A. Sullivan (KY)
Lawrence W. Thomas (AR)

The drivers were included in Docket No. FMCSA–2008–0293. Their exemptions are effective as of December 10, 2015, and will expire on December 10, 2017.

As of December 17, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 60 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 63298; 78 FR 76397; 80 FR 74196):

James L. Barnes (GA)
Toni Benfield (SC)
Peter J. Benz (FL)
Robert J. Berger, III (PA)

Thomas B. Quirk (CT)
Steven M. Oliver (AZ)
Sean T. McMahon (WI)
David G. Shultz (PA)
Ryan L. Harrier (MI)
John E. Parker (KS)

The drivers were included in Docket No. FMCSA–2013–0184. Their exemptions are effective as of December 24, 2015, and will expire on December 24, 2017.

As of December 31, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following individual, Gary L. Crawford (OH), has satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 65034; 79 FR 3917; 80 FR 74196).

The driver was included in Docket No. FMCSA–2013–0190. The exemption is effective as of December 31, 2015, and will expire on December 31, 2017.

In accordance with 49 U.S.C. 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

Issued on: November 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0225]

Qualification of Drivers; Exemption Applications; Diabetes Mellitus

AGENCY: Federal Motor Carrier Safety Administration (FMCSA).

ACTION: Notice of applications for exemptions; request for comments.

SUMMARY: FMCSA announces receipt of applications from 52 individuals for exemption from the prohibition against persons with insulin-treated diabetes mellitus (ITDM) operating commercial motor vehicles (CMVs) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate CMVs in interstate commerce.

DATES: Comments must be received on or before December 23, 2016.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2016–0225 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket numbers for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 52 individuals listed in this notice have recently requested such an exemption from the diabetes prohibition in 49 CFR 391.41(b) (3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

II. Qualifications of Applicants

Rickey C. Alvis
