FEDERAL REGISTER

Vol. 81 Friday,

No. 242 December 16, 2016

Book 1 of 2 Books

Pages 90949–91334

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Expanded Examination Cycle for Certain Small Insured Depository Institutions and U.S. Branches and Agencies of Foreign Banks

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury; Board of Governors of the Federal Reserve System (Board); and Federal Deposit Insurance Corporation (FDIC).

ACTION: Joint final rules.

SUMMARY: The OCC, Board, and FDIC (collectively, the agencies) are jointly adopting as final and without change the agencies' interim final rules published in the **Federal Register** on February 29, 2016, that implemented section 83001 of the Fixing America's Surface Transportation Act (FAST Act). Section 83001 of the FAST Act permits the agencies to conduct a full-scope, on-site examination of qualifying insured depository institutions with less than $1 billion in total assets no less than once during each 18-month period. Prior to enactment of the FAST Act, only qualifying insured depository institutions with less than $500 million in total assets were eligible for an 18-month on-site examination cycle. The final rules, like the interim final rules, generally allow well capitalized and well managed institutions with less than $1 billion in total assets to benefit from the extended 18-month examination schedule. In addition, the final rules adopt as final parallel changes to the agencies' regulations governing the on-site examination cycle for U.S. branches and agencies of foreign banks, consistent with the International Banking Act of 1978. Finally, through this rulemaking, the FDIC has integrated its regulations regarding the frequency of safety and soundness examinations for State nonmember banks and State savings associations.

DATES: Effective on January 17, 2017.

FOR FURTHER INFORMATION CONTACT:

OCC: Deborah Katz, Assistant Director, or Melissa J. Lisenbee, Attorney, Legislative and Regulatory Activities Division, (202) 649–5490; Scott Schainost, Midsize and Community Bank Supervision Liaison, Midsize and Community Bank Supervision, (202) 649–8173.

Board: Division of Banking Supervision and Regulation—Richard Naylor, Associate Director, (202) 728–5854; Richard Watkins, Deputy Associate Director, (202) 452–3421; Virginia Gibbs, Manager, (202) 452–2521; or Alexander Kobulsky, Supervisory Financial Analyst, (202) 452–2031; and Legal Division—Laurie Schaffer, Associate General Counsel, (202) 452–2277; Brian Chernoff, Senior Attorney, (202) 452–2952; or Mary Watkins, Attorney, (202) 452–3722.

FDIC: Thomas F. Lyons, Chief, Policy and Program Development, (202) 898–6850, Karen Jones Currie, Senior Examination Specialist, (202) 898–3981 for the Division of Risk Management Supervision; Mark A. Mellon, Counsel, (202) 898–3884 for revisions to 12 CFR part 337; Rodney D. Ray, Counsel, (202) 898–3556 for revisions to 12 CFR part 347; Suzanne J. Dawley, Senior Attorney, (202) 898–6509 for revisions to 12 CFR part 390 for the Legal Division.

SUPPLEMENTARY INFORMATION:

I. Background

Section 10(d) of the Federal Deposit Insurance Act (FDI Act) [1] generally requires the appropriate Federal banking agency for an insured depository institution (IDI) to conduct a full-scope, on-site examination of the institution at least once during each 12-month period. Prior to enactment of section 83001 of the FAST Act,[2] section 10(d)(4) of the FDI Act authorized the appropriate Federal banking agency to extend the on-site examination cycle for an IDI to at least once during an 18-month period if the IDI (1) had total assets of less than $500 million; (2) was well capitalized (as defined in 12 U.S.C. 1831o); (3) was found, at its most recent examination, to be well managed [3] and to have a composite condition of ''outstanding'' or, in the case of an institution that has total assets of not more than $100 million, ''outstanding'' or ''good;'' (4) was not subject to a formal enforcement proceeding or order by the FDIC or its appropriate Federal banking agency; and (5) had not undergone a change in control during the previous 12-month period in which a full-scope, on-site examination otherwise would have been required. Section 10(d)(10) of the FDI Act, prior to the enactment of section 83001 of the FAST Act, also gave the agencies discretionary authority to raise the eligibility size limit for the 18-month examination cycle for otherwise qualifying IDIs with an ''outstanding'' or ''good'' composite rating from $100 million to an amount not to exceed $500 million in total assets if the agencies determined that the higher limit would be consistent with the principles of

[1] 12 U.S.C. 1820(d). Section 10(d) of the FDI Act was added by section 111 of the Federal Deposit Insurance Corporation Improvement Act of 1991.

[2] Public Law 114–94, 129 Stat. 1312 (2015).

[3] Depository institutions are evaluated under the Uniform Financial Institutions Rating System (commonly referred to as ''CAMELS''). CAMELS is an acronym that is drawn from the first letters of the individual components of the rating system: Capital adequacy, Asset quality, Management, Earnings, Liquidity, and Sensitivity to market risk. CAMELS ratings of ''1'' and ''2'' correspond with ratings of ''outstanding'' and ''good.'' In addition to having a CAMELS composite rating of ''1'' or ''2,'' an IDI is considered to be ''well managed'' for the purposes of section 10(d) of the FDI Act only if the IDI also received a rating of ''1'' or ''2'' for the management component of the CAMELS rating at its most recent examination. See 72 FR 17798 (Apr. 10, 2007).

safety and soundness.[4] Under section 10(d)(3), the Board and the FDIC, as the appropriate Federal banking agencies for State-chartered insured banks and savings associations, are permitted to conduct on-site examinations of such IDIs on alternating 12-month or 18-month periods with the institution's State supervisor, if the Board or FDIC, as appropriate, determines that the alternating examination conducted by the State carries out the purposes of section 10(d) of the FDI Act.[5]

Section 7(c)(1)(C) of the International Banking Act (IBA) provides that a Federal or a State branch or agency of a foreign bank shall be subject to on-site examination by its appropriate Federal banking agency or State bank supervisor as frequently as a national or State bank would be subject to such an examination by the agency.[6] The agencies previously adopted regulations to implement the examination cycle requirements of section 10(d) of the FDI Act and section 7(c)(1)(C) of the IBA, including the extended 18-month examination cycle available to qualifying small institutions and U.S. branches and agencies of foreign banks.[7] The agencies have also exercised their discretion, under section 10(d)(10) of the FDI Act, to extend the 18-month examination cycle for otherwise qualifying institutions with ''good'' composite ratings,[8] first, in 1997, for such institutions with total assets of $250 million or less, and, again, in 2007, for such institutions with total assets of $500 million or less.[9]

Section 83001 of the FAST Act, effective on December 4, 2015, amended section 10(d) of the FDI Act to raise, from $500 million to $1 billion, the total asset threshold below which an agency may apply an 18-month (rather than a 12-month) on-site examination cycle for IDIs with ''outstanding'' composite ratings, and to raise, from not more than $100 million to not more than $200 million, the total asset threshold below which an agency may apply an 18-month examination cycle to an institution with an ''outstanding'' or ''good'' composite rating.[10] Section 83001 also amended section 10(d)(10) of the FDI Act to authorize the appropriate Federal banking agency to increase, by regulation, the maximum amount limitation for IDIs with ''outstanding'' or ''good'' composite ratings from not more than $200 million to not more than $1 billion if the appropriate Federal banking agency determines that the higher amount would be consistent with the principles of safety and soundness for IDIs.[11]

These FAST Act amendments reduce regulatory burdens on small, well capitalized, and well managed institutions and allow the agencies to better focus their supervisory resources on those IDIs and U.S. branches and agencies of foreign banks that may present capital, managerial, or other issues of supervisory concern.

II. Discussion of the Final Rules

On February 29, 2016, the agencies published and requested comment on interim final rules to implement the amendments to section 10(d) made by section 83001 of the FAST Act.[12] The agencies are adopting the interim final rules as final without change. In particular, the agencies are adopting as final the increase, from $500 million to $1 billion, in the total asset threshold below which an IDI that meets the criteria in section 10(d) and the agencies' rules may qualify for an 18-month, full-scope, on-site examination cycle. In addition, as authorized by section 83001 of the FAST Act, the agencies have determined that it is consistent with principles of safety and soundness to permit institutions with total assets of $200 million or greater and not exceeding $1 billion that received a composite CAMELS rating of ''1'' or ''2,'' and that meet other qualifying criteria set forth in section 10(d) and the agencies' rules, to qualify for an 18-month examination cycle. Consistent with section 7(c)(1)(C) of the IBA, the agencies also are adopting as final conforming changes to the regulations that govern the on-site examination cycle of a U.S. branch or agency of a foreign bank. These changes permit a U.S. branch or agency of a foreign bank with total assets of less than $1 billion to qualify for an 18-month examination cycle if the U.S. branch or agency of a foreign bank received a composite ROCA rating of ''1'' or ''2'' at its most recent examination and meets the other applicable criteria.

The FDIC analyzed the frequency with which institutions rated a composite CAMELS rating of ''1'' or ''2'' failed within five years, versus the frequency with which institutions rated a composite CAMELS rating of ''3,'' ''4,'' or ''5'' failed within five years. FDIC analysis indicates that between 1985 and 2011,[13] FDIC-insured depository institutions with assets less than $1 billion and a composite CAMELS rating of ''1'' or ''2'' had a five-year failure rate that was one-seventh as high as institutions with a CAMELS rating of ''3,'' ''4,'' or ''5.'' Moreover, the relationship between failure rates in the two ratings groups did not meaningfully change when the analysis was restricted to institutions with assets between $200 million and $500 million compared to institutions with assets between $500 million to $1 billion. This analysis suggests that extending the examination cycle for well-rated institutions with $500 million to $1 billion in assets by an additional six months, combined with the agencies' off-site monitoring activities and ability to examine an institution more frequently as necessary or appropriate, is unlikely to negatively affect the safe and sound operations of qualifying institutions or the ability of the agencies to effectively supervise and protect the safety and soundness of institutions with total assets of less than $1 billion.[14] Furthermore, the agencies note that, in order to qualify for an 18-month examination cycle, any institution with total assets of less than $1 billion—including one with a CAMELS composite rating of ''2''—must meet the other capital, managerial, and supervisory criteria set forth in section 10(d). The agencies estimate that the changes adopted by the final rules will increase the number of institutions that may qualify for an extended 18-month examination cycle by approximately 611 institutions (372 of which are supervised by the FDIC, 142 by the OCC, and 97 by the Board), bringing the total number of institutions that may qualify for an extended 18-month examination cycle to 4,793 IDIs.[15] Approximately 89 U.S. branches and agencies of foreign banks would be eligible for the extended examination cycle based on the final rules, an increase of 30 (one of which is

[13] A list of failed institutions can be found on the FDIC's Web site at *https://www.fdic.gov/bank/individual/failed/banklist.html.*

[14] The agencies continue to reserve the right in their regulations to examine an IDI or U.S. branch or agency of a foreign bank more frequently than is required by the FDI Act or IBA. See 12 CFR 4.6(c) and 4.7(c) (OCC), 12 CFR 208.64(c) and 211.26(c)(3) (Board), 12 CFR 337.12(c), 347.211(c) (FDIC), and 390.351(c).

[15] Call report data, March 31, 2016.

supervised by the FDIC, four by the OCC, and 25 by the Board).[16]

Finally, the FDIC is adopting as final changes made in the interim final rules to integrate its regulations regarding the frequency of safety and soundness examinations for State nonmember banks and State savings associations. Twelve CFR 390.351 was rescinded and removed because it was substantively identical to 12 CFR 337.12 and, therefore, redundant to section 12 CFR 337.12. Twelve CFR 337.12 was amended to reflect the authority of the FDIC under section 4(a) of the Home Owners' Loan Act to provide for the examination and safe and sound operation of State savings associations. State savings associations now are within the scope of 12 CFR 337.12, and, all FDIC-supervised institutions, including State savings associations, are subject to the requirements of 12 CFR 337.12.

The agencies received three comment letters in response to the interim final rules. Two commenters, both industry trade groups, supported the interim final rules. Both commenters agreed that extending the examination cycle for IDIs that meet the interim final rules' criteria would not negatively affect the safe and sound operations of the institutions or the ability of the agencies to supervise them. The third commenter, an individual, did not support the interim final rules, but offered no specific reasons for that opposition.

For the reasons described in this section, the agencies are adopting these rules as final without change.

Effective Date

The Administrative Procedure Act (APA) generally requires that a final rule be published in the **Federal Register** no less than 30 days before its effective date.[17] Therefore, the final rules will become effective on January 17, 2017. The interim final rules will continue to be in effect until the final rules become effective.

Section 302 of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA) requires that each Federal banking agency, in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosures, or other requirements on IDIs, consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations.[18] Further, new regulations that impose additional reporting, disclosures, or other new requirements on IDIs generally must take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form.[19] The final rules adopt the interim final rules without change. The RCDRIA does not apply to the final rules because the rules do not impose any additional reporting, disclosures, or other new requirements on IDIs.

III. Regulatory Analysis

A. Plain Language

Section 722 of the Gramm-Leach-Bliley Act[20] requires the Federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000. The agencies' staff believe the final rules are presented in a clear and straightforward manner and having received no comments on how to make the interim final rules easier to understand, the agencies adopt the final rules without change.

B. Regulatory Flexibility Act

Board: Regulatory Flexibility Act[21] (RFA) requires an agency to prepare a final regulatory flexibility analysis (FRFA) when an agency promulgates a final rule, unless pursuant to section 605(b) of the RFA, the agency certifies that the final rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. In this context, small entities include banking entities with total assets less than or equal to $550 million.

The final rules do not have a significant impact on a substantial number of small entities. Like the interim final rules, the final rules expand the number of institutions eligible for an extended examination cycle, thus reducing the regulatory burden associated with on-site examinations for these institutions. Further, only 22 of the 122 Board-regulated institutions affected by the final rules have assets between $500 million and $550 million and thus would be considered small entities. These 22 institutions represent a small percentage (3.3 percent) of the 657 Board-supervised institutions with total assets less than $550 million.[22] For these reasons, the Board certifies that the final rules will not have a significant impact on a substantial number of small entities as defined in the RFA,[23] and therefore, a regulatory flexibility analysis is not required.

FDIC: The RFA[24] requires an agency, in connection with a notice of final rulemaking, to prepare a FRFA analysis describing the impact of the rule on small entities (defined by the Small Business Administration for the purposes of the RFA to include banking entities with total assets of $550 million or less) or to certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The final rule does not impose any significant economic impact on a substantial number of small entities. The final rule raises the asset eligibility threshold for extended examination cycles from $500 million to $1 billion, expanding the number of qualifying institutions and U.S. branches and agencies of foreign banks, and reduces the regulatory burden associated with on-site examinations. Of the 372 FDIC-supervised institutions that could be impacted by the rule, only 71 of the FDIC-supervised institutions have total assets between $500 million and $550 million which is a very small share (2.5 percent) of the 2,817 FDIC-supervised institutions with total assets less than $550 million.[25] For this reason, the FDIC certifies that the final rule will not have a significant economic impact on a substantial number of small entities as defined in the RFA, and therefore, a regulatory flexibility analysis is not required.

OCC: The RFA applies only to rules for which an agency publishes a general notice of proposed rulemaking pursuant to 5 U.S.C. 553(b). Consistent with section 553(b)(B) of the APA, the agencies determined for good cause that general notice and opportunity for public comment were not necessary and issued an interim final rule rather than a proposed rule. Accordingly, the RFA's requirements relating to initial and final regulatory flexibility analyses do not apply.

C. Paperwork Reduction Act

The Paperwork Reduction Act of 1995[26] states that no agency may conduct or sponsor, nor is the respondent required to respond to, an

information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. Because the final rules do not create a new, or revise an existing collection of information, no information collection submission needs to be made to OMB.

D. The Economic Growth and Regulatory Paperwork Reduction Act

Under section 2222 of the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA),[27] the agencies are required to conduct a review at least once every 10 years to identify any outdated or otherwise unnecessary regulations. The agencies completed the last comprehensive review of their regulations under EGRPRA in 2006 and are currently conducting the next decennial review. The burden reduction evidenced in these final rules is consistent with the objectives of the EGRPRA review process.

Authority and Issuance

■ For the reasons set forth in the joint preamble, the interim rule published on February 29, 2016 at 81 FR 10063, is adopted as final without change.

Dated: October 19, 2016.

Thomas J. Curry,

Comptroller of the Currency.

Board of Governors of the Federal Reserve System, December 6, 2016.

Robert deV. Frierson,

Secretary of the Board.

Dated at Washington, DC, this 19th day of October 2016.

By order of the Board of Directors.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 4810–33–P 6210–01–P 6714–01–P

FEDERAL RESERVE SYSTEM

12 CFR Part 217 Regulation Q

[Docket No. R–1535; RIN 7100 AE–49]

Regulatory Capital Rules: Implementation of Capital Requirements for Global Systemically Important Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a final rule to make several revisions to its rule regarding risk-based capital surcharges for U.S.-based global systemically important bank holding companies (GSIB surcharge rule). The final rule modifies the GSIB surcharge rule to provide that a bank holding company subject to the rule should continue to calculate its method 1 score and method 2 score under the rule annually using data reported on the firm's Banking Organization Systemic Risk Report (FR Y–15) as of December 31 of the previous calendar year. In addition, the final rule clarifies that a bank holding company subject to the GSIB surcharge rule must calculate its method 2 score using systemic indicator amounts expressed in billions of dollars.

DATES: The final rule is effective January 17, 2017.

FOR FURTHER INFORMATION CONTACT: Anna Lee Hewko, Associate Director, (202) 530–6260, Constance M. Horsley, Assistant Director, (202) 452–5239, Elizabeth MacDonald, Manager, (202) 475–6316, or Sean Healey, Supervisory Financial Analyst, (202) 912–4611, Division of Banking Supervision and Regulation; or Benjamin McDonough, Special Counsel, (202) 452–2036, Mark Buresh, Senior Attorney, (202) 452–5270, or Mary Watkins, Attorney, (202) 452–3722, Legal Division. Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551. SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

Section 165 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) authorizes the Board of Governors of the Federal Reserve System (Board) to establish enhanced prudential standards for bank holding companies with $50 billion or more in total consolidated assets and for nonbank financial companies that the Financial Stability Oversight Council has designated for supervision by the Board.[1] These standards must include risk-based capital requirements as well as other enumerated standards. Pursuant to section 165 of the Dodd-Frank Act, the Board adopted a rule regarding risk-based capital surcharges for U.S.-based global systemically important bank holding companies (GSIB surcharge rule) in July 2015 to impose a risk-based-capital surcharge on bank holding companies identified under the rule as global systemically important bank holding companies (GSIBs).[2] In April 2016, the Board invited public comment on a notice of proposed rulemaking (proposal or proposed rule) to make clarifying revisions to the Board's GSIB surcharge rule.[3] The Board now is issuing a final rule implementing the proposal without change (final rule).

II. Background

The GSIB surcharge rule works to mitigate the potential risk that the material financial distress or failure of a GSIB could pose to U.S. financial stability by increasing the stringency of capital standards for GSIBs, thereby increasing the resiliency of these firms. The GSIB surcharge rule establishes a methodology to identify whether a U.S. top-tier bank holding company is a GSIB and imposes a risk-based capital surcharge on such an institution. The GSIB surcharge rule takes into consideration the nature, scope, size, scale, concentration, interconnectedness, and mix of activities of each company subject to the rule in its methodology for determining whether the company is a GSIB and the size of the surcharge. These factors are captured in the GSIB surcharge rule's method 1 and method 2 scores, which use quantitative metrics reported on the FR Y–15 reporting form to measure a firm's systemic footprint.

Specifically, the GSIB surcharge rule requires each U.S. bank holding company that qualifies as an advanced approaches institution under the Board's capital rules to calculate an aggregate systemic indicator score based on five indicators of systemic importance (method 1 score).[4] A bank holding company whose method 1 score exceeds a defined threshold is identified as a GSIB. Advanced approaches institutions must calculate their method 1 scores on an annual basis using data

[27] Public Law 104–208, 110 Stat. 3309 (1996).

[1] *See,* 12 U.S.C. 5365.

[2] 80 FR 49082 (August 14, 2015).

[3] 81 FR 20579 (April 8, 2016).

[4] *See,* 12 CFR 217.100(b)(1); 12 CFR part 217, subpart H.

reported on the FR Y–15 reporting form as of December 31 of the prior year.[5]

A bank holding company identified as a GSIB must also calculate a score under method 2. Such a firm must calculate a method 2 score each year using data reported on the firm's FR Y–15 as of December 31 of the prior year. GSIB surcharges are established using the method 1 and method 2 scores, and GSIBs with higher scores are subject to higher GSIB surcharges.

Method 1 uses five equally-weighted categories that are correlated with systemic importance—size, interconnectedness, cross-jurisdictional activity, substitutability, and complexity—as measured by twelve systemic indicators.[6] For each systemic indicator, a firm divides its own measure of the systemic indicator by an aggregate global indicator amount. Each resulting value is then weighted and put onto a standard scale. The firm's method 1 score is the sum of its weighted systemic indicator scores. Method 2 uses similar inputs to those used in method 1, but replaces the substitutability category with a measure of short-term wholesale funding.[7] The GSIB surcharge for the firm is the higher of the two surcharges determined under method 1 and method 2.[8] Method 2 is calibrated differently from method 1 and generally results in a higher GSIB surcharge.

The FR Y–15 reporting form collects systemic risk data from U.S. bank holding companies and covered savings and loan holding companies [9] with total consolidated assets of $50 billion or more. The information reported on the FR Y–15 is used in part in the calculation of a bank holding company's method 1 and method 2 scores under the GSIB surcharge rule.[10]

In April 2016, the Board invited comment on a proposed rule to clarify certain aspects of the GSIB surcharge rule.[11] Because the FR Y–15 had become a quarterly, rather than an annual report, the proposed rule would have clarified that a bank holding company subject to the rule should continue to use the systemic indicator amount from the FR Y–15 regulatory report as of December 31 of the prior calendar year to calculate its method 1 and method 2 scores. The proposal also would have clarified the units used for purposes of the method 2 score calculation under the capital surcharge rule. In connection with these proposed changes, the preamble to the proposal provided clarifying information on how a firm identified as a GSIB should calculate its short-term wholesale funding score for purposes of calculating its method 2 score.

III. Description of the Final Rule

A. Revisions Related to FR Y–15 Reporting Frequency

The FR Y–15, as implemented on December 31, 2012, was an annual report.[12] The Board recently revised the FR Y–15 to require that the FR Y–15 to be filed on a quarterly basis, beginning with the report as of June 30, 2016.[13] Under the GSIB surcharge rule, bank holding companies calculate their method 1 and method 2 scores using data from their most recent FR Y–15.[14] These calculations were intended to be conducted annually using data as of December 31 of the prior calendar year, consistent with the frequency of the FR Y–15 at the time.

The proposed rule sought comment on revising the GSIB surcharge rule to require continued use of a December 31 as-of date for purposes of a bank holding company's calculation of its method 1 and method 2 scores. The proposed revisions to sections 217.404 and 217.405 of the GSIB surcharge rule would provide that the systemic indicator amount used in the calculations would be drawn from a firm's FR Y–15 as of December 31 of the previous calendar year even after the FR Y–15 becomes a quarterly report.

The Board received no comments on this aspect of the proposal and is finalizing this portion of the rule as proposed.

B. Revision To Clarify the Method 2 Score Calculation

The proposed rule also sought to revise section 217.405 of the Board's Regulation Q to clarify that, for purposes of calculating its method 2 score, a GSIB should convert its systemic indicator amounts as reported on the FR Y–15 to billions of dollars. The FR Y–15 requires these data to be reported in thousands of dollars, while the fixed coefficients used in the calculation of a firm's method 2 score are determined using aggregate data expressed in billions of dollars.[15] Therefore, to properly use the fixed coefficients in the method 2 score methodology, a firm should reflect its systemic indicator amounts used in the method 2 score calculation in billions of dollars.

The Board received no comments on this aspect of the proposal and is finalizing this portion of the rule as proposed.

C. Comment Received on the Proposed Rule

The Board received one public comment on the proposed rule. The commenter generally expressed support for the proposed rule, but expressed concerns regarding the interaction of the timing of the FR Y–15 and the Federal Reserve's complex institution liquidity monitoring report, the FR 2052a. The FR Y–15, as noted above, collects data regarding a firm's systemic risk, while the FR 2052a collects data on an institution's overall liquidity profile.[16] The commenter expressed concern that if the initial effective date of Schedule G of the FR Y–15 preceded the initial effective date of the FR 2052a this difference would reduce the time that certain firms have to fully implement the FR 2052a. Specifically, the commenter observed that, because data from the FR 2052a will be used to complete Schedule G of the FR Y–15, it was inconsistent to require firms with total assets of $50 billion or more to file Schedule G of the FR Y–15 as of December 31, 2016, but provide firms with total assets equal to or greater than $50 billion, but less than $250 billion until July 31, 2017 to file the FR 2052a. The commenter therefore argued that firms should be given additional time to complete Schedule G of the FR Y–15 in order to allow them to make use of the

[5] The GSIB surcharge rule includes transition provisions for the first years that it is effective. See 12 CFR 217.400(b)(2).

[6] 12 CFR 217.404.

[7] 12 CFR 217.405.

[8] 12 CFR 217.403.

[9] Covered savings and loan holding companies are those which are not substantially engaged in insurance or commercial activities. For more information, see the definition of ''covered savings and loan holding company'' provided in 12 CFR 217.2.

[10] The FR Y–15 requires reporting of the components used in calculating the method 1 and method 2 scores on the FR Y–15, but does not require reporting of the scores themselves. As of January 1, 2016, a bank holding company that is subject to a GSIB surcharge is required to report its applicable GSIB surcharge on line 67 of the Federal Financial Institutions Examination Council 101 report, Regulatory Capital Reporting for Institutions Subject to the Advanced Capital Adequacy Framework.

[15] *See,* 80 FR 49082, 49088.

[16] *See* 77 FR 76487 (December 28, 2012). The Board subsequently revised the FR Y–15 in December 2013. *See* 78 FR 77128 (December 20, 2013). *See* 80 FR 71795 (November, 17, 2015).

full implementation period for the FR 2052a.

In response to the comment, the Board is issuing an interim final rule concurrently with this final rule to provide additional time for certain smaller firms to complete Schedule G of the FR Y–15 for the first time.

V. Regulatory Analysis

A. Paperwork Reduction Act (PRA)

There is no new collection of information pursuant to the PRA (44 U.S.C. 3501 *et seq.*) contained in this final rule.

B. Regulatory Flexibility Act Analysis

The Board is providing a final regulatory flexibility analysis with respect to this final rule. The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), generally requires that an agency provide a regulatory flexibility analysis in connection with a final rulemaking. This final rule amends the Board's GSIB surcharge rule, which only applies to bank holding companies that are advanced approaches Board-regulated institutions for purposes of the Board's Regulation Q (advanced approaches bank holding companies). Generally, advanced approaches bank holding companies are those that: Have total consolidated assets of $250 billion or more; have total consolidated on-balance sheet foreign exposures of $10 billion or more; have subsidiary depository institutions that are advanced approaches institutions; or elect to use the advanced approaches framework.[17] Under regulations issued by the Small Business Administration, a small entity includes a depository institution, bank holding company, or savings and loan holding company with assets of $550 million or less (small banking organizations).[18] As of June 30, 2016, there were approximately 3,203 top-tier small bank holding companies. Bank holding companies that are subject to the final rule therefore are expected to substantially exceed the $550 million asset threshold at which a banking entity would qualify as a small bank holding company. As a result, the final rule is not expected to apply to any small bank holding company for purposes of the RFA.

Therefore, there are no significant alternatives to the final rule that would have less economic impact on small bank holding companies. As discussed above, there are no projected reporting, recordkeeping, and other compliance requirements of the final rule. The Board does not believe that the final rule duplicates, overlaps, or conflicts with any other Federal rules. In light of the foregoing, the Board does not believe that the final rule would have a significant economic impact on a substantial number of small entities.

The Board sought comment on whether the proposed rule would impose undue burdens on, or have unintended consequences for, small organizations, and received no comments on this aspect of the proposal. In light of the foregoing, the Board does not believe that the final rule will have a significant impact on small entities.

C. Riegle Community Development and Regulatory Improvement Act of 1994

In determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on state member banks, the Board is required to consider, consistent with the principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, and the benefits of such regulations.[19] In addition, new regulations that impose additional reporting disclosures or other new requirements on insured depository institutions generally must take effect on the first day of a calendar quarter which begins on or after the date on which the regulations are published in final form.[20]

The final rule is only applicable to advanced approaches bank holding companies. Therefore, the requirements of the Riegle Community Development and Regulatory Improvement Act of 1994 are not applicable to this final rule.

D. Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the Board to use plain language in all proposed and final rules published after January 1, 2000. The Board has sought to present the final rule in a simple straightforward manner. The Board did not receive any comment on its use of plain language.

[17] *See* 12 CFR 217.100.

[18] *See* 13 CFR 121.201. Effective July 14, 2014, the Small Business Administration revised the size standards for banking organizations to $550 million in assets from $500 million in assets. 79 FR 33647 (June 12, 2014). The Small Business Administration's June 12, 2014, interim final rule was adopted without change as a final rule by the Small Business Administration on January 12, 2016. 81 FR 3949 (January 25, 2016).

Board of Governors of the Federal Reserve System

12 CFR Chapter II

Authority and Issuance

For the reasons set forth in the preamble, the Board amends chapter II of title 12 of the Code of Federal Regulations as follows:

PART 217—CAPITAL ADEQUACY OF BANK HOLDING COMPANIES, SAVINGS AND LOAN HOLDING COMPANIES, AND STATE MEMBER BANKS (REGULATION Q)

■ 1. The authority citation for part 217 continues to read as follows:

Authority: 12 U.S.C. 248(a), 321–338a, 481–486, 1462a, 1467a, 1818, 1828, 1831n, 1831o, 1831p–1, 1831w, 1835, 1844(b), 1851, 3904, 3906–3909, 4808, 5365, 5368, 5371.

■ 2. In § 217.404, paragraph (b)(1) is revised to read as follows:

§ 217.404 Method 1 score.

* * * * *

(b) * * *

(1) Except as provided in paragraph (b)(2) of this section, the systemic indicator score in basis points for a given systemic indicator is equal to:

(i) The ratio of:

(A) The amount of that systemic indicator, as reported by the bank holding company as of December 31 of the previous calendar year; to

(B) The aggregate global indicator amount for that systemic indicator published by the Board in the fourth quarter of that year;

(ii) Multiplied by 10,000; and

(iii) Multiplied by the indicator weight corresponding to the systemic indicator as set forth in Table 1 of this section.

* * * * *

■ 3. In § 217.405, paragraph (b)(1) is revised to read as follows:

§ 217.405 Method 2 score.

* * * * *

(b) * * *

(1) The amount of the systemic indicator, as reported by the bank holding company as of December 31 of the previous calendar year, expressed in billions of dollars;

* * * * *

By order of the Board of Governors of the Federal Reserve System, December 9, 2016.

Robert deV. Frierson,

Secretary of the Board.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–3142; Directorate Identifier 2015–NM–003–AD; Amendment 39–18725; AD 2016–25–02]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 airplanes. This AD was prompted by reports of the accumulation of very fine particle deposits in the power control unit (PCU) electro-hydraulic servo valves (EHSVs) used in the flight control system; this accumulation caused degraded performance due to reduced EHSV internal hydraulic supply pressures, resulting in the display of PCU fault status messages from the engine indication and crew alerting system (EICAS). This AD requires installing markers to limit the hydraulic system fluid used to a specific brand, doing hydraulic fluid tests of the hydraulic systems, replacing hydraulic system fluid if necessary, and doing all applicable related investigative and corrective actions. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 20, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 20, 2017.

ADDRESSES: For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com*. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3142.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3142; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Fnu Winarto, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6659; fax: 425–917–6590; email: *fnu.winarto@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 787–8 airplanes. The NPRM published in the **Federal Register** on August 19, 2015 (80 FR 50233) (''the NPRM''). The NPRM was prompted by reports of the accumulation of very fine particle deposits in the PCU EHSVs used in the flight control system; this accumulation caused degraded performance due to reduced EHSV internal hydraulic supply pressures, resulting in the display of PCU fault status messages from the EICAS. The NPRM proposed to require installing markers to limit the hydraulic system fluid used to a specific brand, doing hydraulic fluid tests of the hydraulic systems, replacing hydraulic system fluid if necessary, and doing all applicable related investigative and corrective actions. We are issuing this AD to prevent the failure of flight control hydraulic PCUs, which could lead to reduced controllability of the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Refer to Revised Service Information

United Airlines (UAL) stated that there are many errors, omissions, and inconsistencies in Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014, and provided examples of those mistakes. UAL asked that this service information be revised to correct these problems.

Boeing has issued Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016. The revised service information corrects typographical errors and makes clarifications to the Accomplishment Instructions in Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014. We have included Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016, in paragraphs (c) and (h) of this AD. We have also included a new paragraph (i) in this AD to provide credit for actions done prior to the effective date of this AD using Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014. The subsequent paragraphs have been redesignated accordingly.

Request To Clarify the Reason for the Unsafe Condition

Boeing asked that we remove all references to hydraulic fluid contamination causing EHSV restriction, in the SUMMARY, the Discussion section of the NPRM, and paragraph (e) of the proposed AD. Boeing stated that the issue is not hydraulic fluid contamination causing EHSV restriction, but the accumulation of very fine particle deposits within the EHSV causing degraded performance due to reduced EHSV internal hydraulic supply pressures. Boeing added that the solution is to change the hydraulic fluid to a specific brand, considering that it has been verified to significantly reduce the rate of accumulation of particles in the EHSVs. Boeing concluded that this would clarify the cause of the EICAS messages.

We agree that the reason for the unsafe condition should be clarified, for the reasons provided. Therefore, we have removed the references to hydraulic fluid contamination causing EHSV restriction and replaced that language with a more accurate reason for the unsafe condition in the **SUMMARY**, the Discussion section of the final rule, and paragraph (e) of this AD.

Request To Issue Global Alternative Method of Compliance (AMOC)

UAL asked that a fleet-wide AMOC be issued for Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, to correct a part number (P/N) reference. Task 1, Figure 1, and Task 2, Figure 1, of Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, identify P/N 710Z7290–9##ALT1 for the left and right engine diagonal braces; however, the correct P/N is 710Z7290–9 with no ##ALT suffix. UAL stated that the correct part number is identified in the Illustrated Parts Catalog (IPC).

We acknowledge the commenter's concern that an incorrect part number for the left and right engine diagonal braces is identified in Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014. We have discussed this error with Boeing, and it was confirmed that the part number in the IPC (as noted by UAL) is correct and should be used. In light of this information, we do not agree that a global AMOC should be issued. However, we have added a new Note 2 to paragraph (g) of this AD to clarify the correct part number.

Request To Change Certain Instructions in the Service Information

UAL stated that Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, includes procedures for the HyJet V marker installation, which is a ''Required for Compliance (RC)'' item in Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014, and must be done before or concurrently with that service information. UAL noted that there is no RC language in Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, which makes the entire service bulletin ''RC.'' UAL asked that the steps that specify access and close be marked as non-RC steps.

We do not agree to change Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, to mark the steps RC and non-RC. However, we do agree to clarify the steps that are required to accomplish the marker installation. Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014, has an RC step that specifies to install markers. That RC step does not specify to perform access and close steps for the marker installation; therefore those access and close steps are not required by this AD. We have not changed this AD in this regard.

UAL also asked we change the procedures in Part 4 of Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014, which specify options for either replacing the hydraulic fluid again, or draining and filling the hydraulic reservoir. UAL stated that if either option is used, then Part 2 of the service information titled ''Cycle Hydraulic Fluid'' must again be done, or the airplane must be flown at least one flight cycle, and then a sample drawn for testing. UAL added that this procedure, done in accordance with the instructions in the referenced service information, results in excessive cycling if the operator needs to only replace a small amount of fluid and chooses the reservoir drain-and-fill option. UAL asked to use a procedure that would specify draining and filling the reservoir, flight control cycling, and taking a fresh sample for testing, all at the same time. UAL noted that Option 10 specifies ''Drain and Fill Hydraulic Reservoir'' and is acceptable to operate the flight controls six to eight times to let the fluid flow through all the systems. UAL stated that this is the procedure used by Boeing before taking fluid samples per the Boeing 787 Airplane Maintenance Manual.

We do not agree to change the procedure for servicing the hydraulic fluid. Although UAL's proposal is an accepted procedure in the Boeing 787 Airplane Maintenance Manual, this procedure does not include operating the other hydraulic-powered subsystems, such as the landing gear, thrust reverser, and brakes. Subsequently, it could result in stagnant fluid measurements not intermixing with other hydraulic system fluid following replacement of the hydraulic system fluid, and could generate fluid test samples that do not include the entire system. In light of these factors, we have not changed this AD in this regard.

Clarification to Paragraph (g) of This AD

We have added a new Note 1 to paragraph (g) of this AD to refer to Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, as an additional source of guidance for installing markers to allow servicing of hydraulic systems with only HyJet V hydraulic fluid.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We have reviewed Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016. This service information describes procedures for installing markers to limit the hydraulic system fluid used to a specific brand; doing hydraulic fluid tests of the hydraulic systems, replacing the hydraulic system fluid if necessary, and related investigative and corrective actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 11 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Install markers	2 work-hours × $85 per hour = $170	$95	$265	$2,915
Test and replace left, center, and right hydraulic system fluid.	104 work-hours × $85 per hour = $8,840	1,020	9,860	108,460

We estimate the following costs to do any necessary replacements that may be required based on the results of the inspection. We have no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace power control unit of elevator	9 × $85 per hour = $765	$108,000	$108,765
Replace power control unit of aileron	9 × $85 per hour = $765	118,000	118,765

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–02 The Boeing Company: Amendment 39–18725; Docket No. FAA–2015–3142; Directorate Identifier 2015–NM–003–AD.

(a) Effective Date

This AD is effective January 20, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Control Systems.

(e) Unsafe Condition

This AD was prompted by reports of the accumulation of very fine particle deposits in the power control unit (PCU) electro-hydraulic servo valves (EHSVs) used in the flight control system; this accumulation caused degraded performance due to reduced EHSV internal hydraulic supply pressures, resulting in the display of PCU fault status messages from the engine indication and crew alerting system (EICAS). We are issuing this AD to prevent failure of flight control hydraulic PCUs, which could lead to reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Marker Installation

Within 36 months after the effective date of this AD, install markers to allow servicing of hydraulic systems with only HyJet V hydraulic fluid, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016.

Note 1 to paragraph (g) of this AD: Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016, refers to Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, as an additional source of guidance for installing markers to allow servicing of hydraulic systems with only HyJet V hydraulic fluid.

Note 2 to paragraph (g) of this AD: Task 1, Figure 1, and Task 2, Figure 1, of Boeing Service Bulletin B787–81205–SB290022–00, Issue 001, dated September 4, 2014, identify P/N 710Z7290–9##ALT1 for the left and right engine diagonal braces; however, the correct P/N is 710Z7290–9 with no ##ALT suffix.

(h) Fluid Tests of the Left, Right, and Center Hydraulic Systems

For airplanes identified in Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016, as Group 1, Configuration 2, Group 2: Within 36 months after the effective date of this AD, do hydraulic fluid tests of the left, right, and center hydraulic systems, replace the hydraulic system fluid, if necessary, and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016. Do all applicable related investigative and corrective actions within 36 months after the effective date of this AD.

(i) Credit for Previous Actions

This paragraph provides credit for the actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD using Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 001, dated November 25, 2014.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if

requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (j)(3)(i) and (j)(3)(ii) apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or sub-step is labeled ''RC Exempt,'' then the RC requirement is removed from that step or sub-step. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(4) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(k) Related Information

(1) For more information about this AD, contact Fnu Winarto, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle ACO, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6659; fax: 425–917–6590; email: *fnu.winarto@faa.gov*.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (l)(3) and (l)(4) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin B787–81205–SB270026–00, Issue 002, dated June 13, 2016.

(ii) Reserved.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com*.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html*.

Issued in Renton, Washington, on November 25, 2016.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9509; Directorate Identifier 2016–NM–177–AD; Amendment 39–18750; AD 2016–25–24]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Airbus Model A319, A320, and A321 series airplanes. This AD requires repetitive general visual inspections for broken battery retaining rods and replacement if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective January 3, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 3, 2017.

We must receive comments on this AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: *account.airworth-eas@airbus.com;* Internet: *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9509.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9509; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1405; fax: 425–227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2016–0204, dated October 13, 2016; corrected October 19, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''); to correct an unsafe condition for certain Airbus Model A319, A320, and A321 series airplanes. The MCAI states:

Several occurrences have been reported of battery [retaining] rod failures on certain Airbus aeroplanes. Subsequent examination of broken [battery retaining] rod parts determined that these failures were due to quality defects of the material used during parts manufacturing. Each battery is secured on an aeroplane by two [battery retaining] rods. Failure of one rod, in case of severe turbulence during flight or hard landing, could lead to battery displacement, or roll on the remaining rod side, up to a point where the remaining rod could be disengaged. The battery could ultimately detach from its housing and damage relays, connectors, contactor boxes, air ducts and surrounding structure.

This condition, if not detected and corrected, could lead to the loss of the normal electrical generation not followed by an automatic recovery of essential network.

To address this potential unsafe condition, Airbus issued Alert Operators Transmission (AOT) A92N001–16 (later revised) to provide instructions for inspection and replacement of battery [retaining] rods.

For the reason described above, this [EASA] AD requires repetitive general visual inspections (GVI) of the four battery [retaining] rods (two per battery), and, in case of findings, replacement of [broken] battery [retaining] rods.

Pending the outcome of the on-going investigation, this [EASA] AD is considered an interim action and further [EASA] AD action may follow.

This [EASA] AD is republished to add two missing models to the applicability (the respective MSN were already listed in the original [EASA] AD) and to correct the battery [retaining] rod Part Number (P/N).

You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9509.

Related Service Information Under 1 CFR Part 51

Airbus has issued Alert Operators Transmission (AOT) A92N001–16, Rev 01, dated October 10, 2016. The service information describes procedures for general visual inspections to look for broken battery retaining rods. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the MCAI or Service Information

The MCAI specifies to replace broken rods in accordance with Airbus AOT A92N001–16, Rev 01, dated October 10, 2016. However, Airbus AOT A92N001–16, Rev 01, dated October 10, 2016, does not include procedures to replace broken rods. This AD requires that broken rods be replaced using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA Design Organization Approval (DOA).

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of these same type designs.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because the detachment of a battery from the housing and damage to other electrical equipment and surrounding structure could lead to loss of normal electrical power generation and recovery of essential network and consequential control of the airplane. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9509; Directorate Identifier 2016–NM–177–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD affects 330 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × $85 per hour = $185	$0	$85	$28,050

We estimate the following costs to do any necessary replacements that would be required based on the results of the inspection. We have no way of determining the number of aircraft that might need this replacement.

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace Battery Rod	1 work-hour × $85 per hour = $85 per battery rod	[1] $0	$85 per battery rod.

[1] Parts costs are not available from the manufacturer.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–24 Airbus: Amendment 39–18750; Docket No. FAA–2016–9509; Directorate Identifier 2016–NM–177–AD.

(a) Effective Date

This AD becomes effective January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Model A319–111, A319–112, A319–113, A319–114, A319–115, A319–131, A319–132, A319–133, A320–211, A320–212, A320–214, A320–231, A320–232, A320–233, A320–251N, A320–271N, A321–111, A321–112, A321–131, A321–211, A321–212, A321–213, A321–231, and A321–232 airplanes, certificated in any category, manufacturer serial numbers (MSN) 5182, 5295, 5327, 5406, 5470, 5545, 5650, 5656, 5664, 5671, 5679, 5685, 5690, 5700, 5701, 5711, 5717, 5722, 5725, 5731, 5732, 5734, 5738, 5740, 5742, 5744, 5746, 5748, 5750 through 5752 inclusive, 5754 through 5756 inclusive, 5758 through 5760 inclusive, 5762, 5763, 5765 through 6100 inclusive, 6102 through 6285 inclusive, 6287 through 6418 inclusive, 6420 through 6463 inclusive, 6465 through 6619 inclusive, 6621 through 6641 inclusive, 6643 through 6672 inclusive, 6674 through 6719 inclusive, 6721 through 6771 inclusive, 6773 through 6828 inclusive, 6830 through 6832 inclusive, 6834 through 6838 inclusive, 6840 through 6867 inclusive, 6869 through 6903 inclusive, 6905, 6906, 6908 through 6913 inclusive, 6915 through 6919 inclusive, 6921 through 6944 inclusive, 6947 through 6951 inclusive, 6953 through 6966 inclusive, 6968 through 6972 inclusive, 6974, 6976 through 6992 inclusive, 6994 through 7000 inclusive, 7002 through 7010 inclusive, 7012, 7014 through 7032 inclusive, 7034 through 7045 inclusive, 7047 through 7050 inclusive, 7052, 7054 through 7059 inclusive, 7061 through 7071 inclusive, 7073 through 7078 inclusive, 7080, 7081, 7084 through 7093 inclusive, 7095 through 7098 inclusive, 7100, 7101, 7104, 7105, 7108 through 7110 inclusive, 7112 through 7121 inclusive, 7123, 7125, 7127, 7128, 7130, 7132, 7133, 7135, 7136, 7138 through 7140 inclusive, 7142 through 7146 inclusive, 7148, 7149, 7152 through 7156 inclusive, 7158, 7160, 7161, 7163 through 7167 inclusive, 7169 through 7171 inclusive, 7173, 7174, 7176, 7177, 7179, 7180, 7182 through 7184 inclusive, 7187, 7189, 7191, 7194, 7196 through 7200 inclusive, 7203, 7204, 7206, 7207, 7210, 7212 through 7225 inclusive, 7227, 7228, 7230, 7232, 7235, 7238, 7241 through 7244 inclusive, 7248, and 7261.

(d) Subject

Air Transport Association (ATA) of America Code 92, Electrical System Installation.

(e) Reason

This AD was prompted by reports of broken battery retaining rods. We are issuing this AD to detect and correct broken battery retaining rods, which, in the event of a hard landing or severe turbulence, can cause the battery to detach from its housing, resulting in damage to other electrical equipment and surrounding structure. This condition could lead to loss of normal electrical power generation and subsequent inability to restore electrical power to essential airplane systems.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

Within 4 months after the effective date of this AD, and thereafter at intervals not to exceed 4 months, accomplish a general visual inspection of each battery retaining rod part number (P/N) D9241023700000, in accordance with the instructions of Airbus Alert Operators Transmission (AOT) A92N001–16, Rev 01, dated October 10, 2016.

(h) Additional Inspections After Any Hard Landing or Any Flight in Severe Turbulence

In addition to the inspections required by paragraph (g) of this AD, after any hard landing, or after any flight in severe turbulence: Before further flight, accomplish a general visual inspection of each battery retaining rod P/N D9241023700000, in accordance with the instructions of Airbus AOT A92N001–16, Rev 01, dated October 10, 2016.

(i) Corrective Action

If, during any general visual inspection required by paragraph (g) or (h) of this AD, as applicable, any battery retaining rod is found broken, before further flight, replace each affected battery retaining rod with a serviceable part using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

Note 1 to paragraph (i) of this AD: Additional guidance for the replacement of battery retaining rods can be found in Tasks 24–38–51–000–001–A, Removal of the Batteries, and 24–38–51–400–001–A, Installation of the Batteries, of the Airbus A319/A320/A321 Aircraft Maintenance Manual (AMM).

(j) Provision Regarding Terminating Action

Replacement of failed battery retaining rods on an airplane with serviceable parts, as required by paragraph (i) of this AD, does not constitute terminating action for the repetitive general visual inspections required by paragraphs (g) and (h) of this AD for that airplane.

(k) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD using Airbus AOT A92N001–16, dated August 25, 2016.

(l) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1405; fax: 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(m) Special Flight Permits

Special flight permits, as described in Section 21.197 and Section 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199), are not allowed.

(n) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016–0204, dated October 13, 2016; corrected October 19, 2016; for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9509.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (o)(3) and (o)(4) of this AD.

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Alert Operators Transmission (AOT) A92N001–16, Rev 01, dated October 10, 2016.

(ii) Reserved.

(3) For service information identified in this AD, contact Airbus, Airworthiness Office-EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: *account.airworth-eas@airbus.com;* Internet: *http://www.airbus.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2016–30038 Filed 12–15–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9503; Directorate Identifier 2016–NM–179–AD; Amendment 39–18744; AD 2016–25–18]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Bombardier, Inc. Model BD–700–1A10 and BD–700–1A11 airplanes. This AD requires an inspection for discrepancies of the attachment points of the links between the engine rear mount assemblies, and corrective actions if necessary. This AD was prompted by a report indicating that during maintenance, an engine mount pin was found backed out of the rear mount link, and the associated retaining bolt was also found fractured. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective January 3, 2017.

The Director of the **Federal Register** approved the incorporation by reference of certain publications listed in this AD as of January 3, 2017.

We must receive comments on this AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone: 514–855–5000; fax: 514–855–7401; email: *thd.crj@aero.bombardier.com;* Internet: *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9503.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9503; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Aziz Ahmed, Airframe Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office (ACO), 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7329; fax: 516–794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

Transport Canada Civil Aviation (TCCA), which is the aviation authority

for Canada, has issued Canadian AD CF–2016–23, dated July 28, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Bombardier, Inc. Model BD–700–1A10 and BD–700–1A11 airplanes. The MCAI states:

> Bombardier reported that during maintenance of a BD–700 aeroplane, the engine mount pin, part number (P/N) BRR15838, was found backed out of the rear mount link. The retaining bolt, P/N AS54020, which passes through the engine mount pin was also found fractured at the groove which holds the locking spring. An investigation revealed the most probable root cause of failure to be a single axial tension static overload, with no evidence of fatigue contributing to the failure.
>
> The above condition if not detected, may result in the loss of engine attachment to the airframe.
>
> Bombardier has issued Service Bulletins (SBs) 700–71–002, 700–71–6002, 700–71–5002 and 700–1A11–71–002 to inspect the attachment points of the links between the engine rear mount assemblies, and installation of replacement hardware if required.
>
> This [Canadian] AD mandates incorporation of the above Bombardier SBs to inspect [for discrepancies (including missing or broken bolts, missing nuts, incorrect torque values, and an incorrect gap between the bushing and washer), noncompliant gaps and torque values, broken or missing attachment hardware; and corrective actions, including installation of replacement hardware if necessary] and maintain integrity of the affected engine rear mount assembly. Bombardier is developing design changes for the parts in question. Further mandatory action may be required when the new parts become available.

You may examine the MCAI on the Internet at *http://www.regulations.gov by* searching for and locating Docket No. FAA–2016–9503.

Related Service Information Under 1 CFR Part 51

We reviewed the following service information:

- Bombardier Service Bulletin 700–71–002, Revision 01, dated June 30, 2016.
- Bombardier Service Bulletin 700–71–6002, Revision 01, dated June 30, 2016.
- Bombardier Service Bulletin 700–71–5002, Revision 01, dated June 30, 2016.
- Bombardier Service Bulletin 700–1A11–71–002, Revision 01, dated June 30, 2016.

The service information describes procedures for an inspection for discrepancies of the attachment points of the links between the engine rear mount assemblies, and corrective actions. These documents are distinct since they apply to different airplane models and serial numbers. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of these same type designs.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because broken engine attachment hardware could result in separation of an engine from the airplane. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9503; Directorate Identifier 2016–NM–179–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD affects 97 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × $85 per hour = $85 per airplane.	$0	$85	$8,245

We estimate the following costs to do any necessary corrective actions that would be required based on the results of the inspection. We have no way of determining the number of aircraft that might need these corrective actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Bolt and Nut Replacement	1 work-hour × $85 per hour = $85	$730	$815

ON-CONDITION COSTS—Continued

Action	Labor cost	Parts cost	Cost per product
Torque Change on Affected Bolts	1 work-hour × $85 per hour = $85	0	85

We have received no definitive data that would enable us to provide cost estimates for other on-condition actions specified in this AD.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all available costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–18 Bombardier Inc.: Amendment 39–18744; Docket No. FAA–2016–9503; Directorate Identifier 2016–NM–179–AD.

(a) Effective Date

This AD becomes effective January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier Inc. Model BD–700–1A10 and BD–700–1A11 airplanes, certificated in any category, serial numbers (S/Ns) 9002 through 9763 inclusive, 9765, 9767 through 9770 inclusive, and 9998.

(d) Subject

Air Transport Association (ATA) of America Code 72, Engine.

(e) Reason

This AD was prompted by a report indicating that during maintenance, an engine mount pin was found backed out of the rear mount link, and the associated retaining bolt was also found fractured at the groove that holds the locking spring. We are issuing this AD to detect and correct broken engine attachment hardware, which could result in separation of an engine from the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection

Within 500 flight hours or 4 months, whichever occurs first after the effective date of this AD: Do an inspection for discrepancies of the engine rear mount assemblies (including missing or broken bolts, missing nuts, incorrect torque values, and an incorrect gap between the bushing and washer); in accordance with Part A of the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1) through (g)(4) of this AD.

(1) Bombardier Service Bulletin 700–71–002, Revision 01, dated June 30, 2016 (for Bombardier Model BD–700–1A10 airplanes).

(2) Bombardier Service Bulletin 700–71–6002, Revision 01, dated June 30, 2016 (for Bombardier Model BD–700–1A10 airplanes).

(3) Bombardier Service Bulletin 700–71–5002, Revision 01, dated June 30, 2016 (for Bombardier Model BD–700–1A11 airplanes).

(4) Bombardier Service Bulletin 700–1A11–71–002, Revision 01, dated June 30, 2016 (for Bombardier Model BD–700–1A11 airplanes).

(h) Corrective Action

If any discrepancy is detected during the inspection required by paragraph (g) of this AD, before further flight, replace missing parts and correct noncompliant gaps and bolt torque, as specified in the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1) through (g)(4) of this AD, except as required by paragraph (i) of this AD.

(i) Exceptions to Service Information Specifications

Where the applicable Bombardier service bulletin provides no instructions for corrective actions, or specifies to contact Bombardier for appropriate action, accomplish corrective actions in accordance with the procedures specified in paragraph (k)(2) of this AD.

(j) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (j)(1) through (j)(4) of this AD.

(1) Bombardier Service Bulletin 700–71–002, dated May 31, 2016.

(2) Bombardier Service Bulletin 700–71–6002, dated May 31, 2016.

(3) Bombardier Service Bulletin 700–71–5002, dated May 31, 2016.

(4) Bombardier Service Bulletin 700–1A11–71–002, dated May 31, 2016.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this

AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the New York ACO, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, New York ACO, ANE–170, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian Airworthiness Directive CF–2016–23, dated July 28, 2016, for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9503.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (m)(3) and (m)(4) of this AD.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 700–71–002, Revision 01, dated June 30, 2016.

(ii) Bombardier Service Bulletin 700–71–6002, Revision 01, dated June 30, 2016.

(iii) Bombardier Service Bulletin 700–71–5002, Revision 01, dated June 30, 2016.

(iv) Bombardier Service Bulletin 700–1A11–71–002, Revision 01, dated June 30, 2016.

(3) For service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–5000; fax 514–855–7401; email *thd.crj@aero.bombardier.com;* Internet *http://www.bombardier.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2016–29815 Filed 12–15–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–4228; Directorate Identifier 2015–NM–107–AD; Amendment 39–18734; AD 2016–25–08]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2014–13–12 for all Airbus Model A318, A319, A320, and A321 series airplanes. AD 2014–13–12 required identifying the part number and serial number of each passenger oxygen container, replacing the oxygen generator manifold of any affected oxygen container with a serviceable manifold, performing an operational check of the manual mask release, and doing corrective actions if necessary. This new AD retains the requirements of AD 2014–13–12, and requires replacing the oxygen generator manifold of any affected DAe oxygen container with a serviceable manifold. This AD was prompted by reports of silicon particles inside the oxygen generator manifolds, which had chafed from the mask hoses during installation onto the generator outlets. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 20, 2017.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 20, 2017.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of September 9, 2014 (79 FR 45317, August 5, 2014).

ADDRESSES: For Airbus service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.*

For B/E AEROSPACE service information identified in this final rule, contact BE Aerospace Systems GmbH, Revalstrasse 1, 23560 Lübeck, Germany; telephone (49) 451 4093–2976; fax (49) 451 4093–4488.

You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4228.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4228; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1405; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2014–13–12, Amendment 39–17888 (79 FR 45317, August 5, 2014) (''AD 2014–13–12''). AD 2014–13–12 applied to all Airbus Model A318, A319, A320, and A321 series airplanes. The NPRM published in the **Federal Register** on March 21, 2016 (81 FR 14990). The NPRM was prompted by reports of silicon particles inside the oxygen generator manifolds, which had chafed from the mask hoses during installation onto the generator outlets. The NPRM proposed to continue to require identifying the part number and

serial number of each passenger oxygen container, replacing the oxygen generator manifold of any affected oxygen container with a serviceable manifold, and performing an operational check of the manual mask release, and doing corrective actions if necessary. The NPRM also proposed to require replacing the oxygen generator manifold of any affected DAe oxygen container with a serviceable manifold. We are issuing this AD to detect and correct nonserviceable oxygen generator manifolds, which could reduce or block the oxygen supply and result in injury to passengers when oxygen supply is needed.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014–0208, dated September 16, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition. The MCAI states:

> During production of passenger oxygen containers, the manufacturer, B/E Aerospace, detected some silicon particles inside the oxygen generator manifolds. Investigation revealed that those particles (chips) had chafed from the mask hoses during installation onto the generator outlets. It was discovered that a defective mask hose installation device had caused the chafing.
>
> This condition, if not detected and corrected, could reduce or block the oxygen supply, possibly resulting in injury to passengers when oxygen supply is needed.
>
> To address this potential unsafe condition, EASA issued AD 2011–0167 to require the identification and modification of the affected oxygen container assemblies. That [EASA] AD also prohibited the installation of the affected containers on any aeroplane as replacement parts. It was subsequently established that Models A318–121 and A318–122 were missing from the Applicability of the [EASA] AD, and clarification was necessary regarding the affected containers.
>
> Consequently, EASA issued AD 2012–0083 [which corresponds to FAA AD 2014–13–12], retaining the requirements of EASA AD 2011–0167, which was superseded, expanded the Applicability by adding two aeroplane models, and provided clarity by providing a list of affected passenger oxygen containers.
>
> Since that [EASA] AD was issued, it was found that the affected containers have not only been marked with company name B/E Aerospace, as was specified, but also, for a brief period, with the former company name DAe Systems.
>
> For the reason described above, this [EASA] AD retains the requirements of EASA AD 2012–0083, which is superseded, and expands the affected group of containers to include those that have the name ''DAe Systems'' on the identification plate.
>
> This [EASA] AD also clearly separates the serial number (s/n) groups of containers into those manufactured by B/E Aerospace and those manufactured by DAe Systems, for which additional compliance time is provided.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4228.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comment received on the NPRM and the FAA's response to the comment.

Request To Revise Compliance Time

United Airlines (UAL) requested that we revise the compliance time for DAe Systems units from within ''2,500 flight cycles, or 3,750 flight hours, or 12 months, whichever occurs first, after the effective date of this AD,'' to within ''5,000 flight cycles, or 7,500 flight hours, or 24 months, whichever occurs first after the effective date of this AD.'' UAL stated that this would make both units have the same compliance time. UAL explained that it has inspected 97 out of 152 airplanes in compliance with AD 2014–13–12, and due to the new requirements in the NPRM, it will have to re-start the inspection for the entire UAL Model A319/A320 fleet.

We do not agree with UAL's request. As allowed by the phrase ''unless already done'' in paragraph (f) of this AD, if the inspection required by this AD has already been accomplished, this AD does not require that action to be repeated. The EASA, as the State of Design Authority for Airbus products, has determined this AD's compliance times based on the overall risk to the fleet, including the severity of the failure and the likelihood of the failure's occurrence. We are unaware of any information or data that would substantiate the compliance time change that UAL has requested. UAL did not provide any substantiation to support its request. The EASA works closely with Airbus to ensure that all appropriate actions are taken at the appropriate times to mitigate risk to the fleet to meet our collective safety goals. Under the provisions of paragraph (q)(1) of this AD, we will consider requests for approval of an extension of the compliance time if sufficient data are submitted to substantiate that the change would provide an acceptable level of safety. We have not changed this AD in this regard.

Conclusion

We reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

B/E AEROSPACE has issued Service Bulletins 1XCXX–0100–35–005 and 22CXX–0100–35–003, both Revision 2, both dated July 10, 2014. The service information describes procedures for replacement of the oxygen generator manifold. These service bulletins are distinct since they apply to different products.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 22 airplanes of U.S. registry.

The actions required by AD 2014–13–12, and retained in this AD take about 6 work-hours per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that were required by AD 2014–13–12 is $510 per product.

We also estimate that it takes about 6 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $11,220, or $510 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on

products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2014–13–12, Amendment 39–17888 (79 FR 45317, August 5, 2014), and adding the following new AD:

2016–25–08 Airbus: Amendment 39–18734; Docket No. FAA–2016–4228; Directorate Identifier 2015–NM–107–AD.

(a) Effective Date

This AD is effective January 20, 2017.

(b) Affected ADs

This AD replaces AD 2014–13–12, Amendment 39–17888 (79 FR 45317, August 5, 2014) (''AD 2014–13–12'').

(c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1) through (c)(4) of this AD, certificated in any category, all manufacturer serial numbers.

(1) Model A318–111, –112, –121, and –122 airplanes.

(2) Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Model A320–211, –212, –214, –231, –232, –233, and –271 airplanes.

(4) Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 35, Oxygen.

(e) Reason

This AD was prompted by reports of silicon particles inside the oxygen generator manifolds, which had chafed from the mask hoses during installation onto the generator outlets. We are issuing this AD to detect and correct nonserviceable oxygen generator manifolds, which could reduce or block the oxygen supply and result in injury to passengers when oxygen supply is needed.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Part Number and Serial Number Identification, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2014–13–12, with no changes. Within 5,000 flight cycles, or 7,500 flight hours, or 24 months, whichever occurs first after September 9, 2014 (the effective date of AD 2014–13–12), identify the part number and serial number of each passenger oxygen container. A review of airplane maintenance records is acceptable in lieu of this identification if the part number and serial number of the oxygen container can be conclusively determined from that review.

(h) Retained Replacement, Check, and Repair, With Paragraph (h)(5) and Note 1 to Paragraph (h) of AD 2014–13–12 Removed, and Revised Repair Instructions

This paragraph restates the requirements of paragraph (h) of AD 2014–13–12, with paragraph (h)(5) and Note 1 to paragraph (h) of AD 2014–13–12 removed, and revised repair instructions. If the part number of the passenger oxygen container is listed in paragraph (h)(1) of this AD and the serial number of the passenger oxygen container is listed in paragraph (h)(2) of this AD: Within the compliance time specified in paragraph (g) of this AD, do the actions specified in paragraphs (h)(3) and (h)(4) of this AD, except as provided by paragraphs (i)(1) through (i)(7) of this AD.

(1) (Type I: 15 and 22 minutes) 12C15Lxxxxx0100, 12C15Rxxxxx0100, 13C15Lxxxxx0100, 13C15Rxxxxx0100, 14C15Lxxxxx0100, 14C15Rxxxxx0100, 12C22Lxxxxx0100, 12C22Rxxxxx0100, 13C22Lxxxxx0100, 13C22Rxxxxx0100, 14C22Lxxxxx0100, and 14C22Rxxxxx0100; and (Type II: 15 and 22 minutes) 22C15Lxxxxx0100, 22C15Rxxxxx0100, 22C22Lxxxxx0100, and 22C22Rxxxxx0100.

(2) ARBA–0000 to ARBA–9999 inclusive, ARBB–0000 to ARBB–9999 inclusive, ARBC–0000 to ARBC–9999 inclusive, ARBD–0000 to ARBD–9999 inclusive, ARBE–0000 to ARBE–9999 inclusive, BEBF–0000 to BEBF–9999 inclusive, BEBH–0000 to BEBH–9999 inclusive, BEBK–0000 to BEBK–9999 inclusive, BEBL–0000 to BEBL–9999 inclusive, and BEBM–0000 to BEBM–9999 inclusive.

(3) Replace the oxygen generator manifold of any affected oxygen passenger container with a serviceable manifold, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011.

(4) Do an operational check of the manual mask release, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011. If the operational check fails, before further flight, repair the manual mask release, using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

(i) Retained Exceptions, With No Changes

This paragraph restates the provisions of paragraph (i) of AD 2014–13–12, with no changes.

(1) Oxygen containers that meet the conditions specified in paragraph (i)(1)(i) or (i)(1)(ii) of this AD are compliant with the requirements of paragraph (h) of this AD.

(i) Oxygen containers Type I having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (h)(2) of this AD, that have been modified prior to September 9, 2014 (the effective date of AD 2014–13–12), as specified in the Accomplishment Instructions of B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 1, dated December 15, 2012.

(ii) Oxygen containers Type II having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (h)(2) of this AD, that have been modified prior to September 9, 2014 (the effective date of AD 2014–13–12), as specified in the Accomplishment Instructions of B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 1, dated December 20, 2011.

(2) Airplanes on which Airbus Modification 150703 or Airbus Modification 150704 has not been embodied in production do not have to comply with the requirements of paragraph (h) of this AD, unless an oxygen container having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (h)(2) of this AD has been installed since the airplane's first flight.

(3) Airplanes on which Airbus Modification 150703 or Airbus Modification 150704 has been embodied in production and which are not listed by model and manufacturer serial number in Airbus Service Bulletin A320–35A1047, dated March 29, 2011, are not subject to the requirements of paragraphs (g) and (h) of this AD, unless an oxygen container having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (h)(2) of this AD has been installed since the airplane's first flight.

(4) Model A319 airplanes that are equipped with a gaseous oxygen system for passengers, installed in production with Airbus

Modification 33125, do not have the affected passenger oxygen containers installed. Unless these airplanes have been modified in service (no approved Airbus modification exists), the requirements of paragraphs (g) and (h) of this AD do not apply to these airplanes.

(5) Airplanes that have already been inspected prior to the effective date of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011, must be inspected and, depending on the findings, corrected, within the compliance time defined in paragraph (g) of this AD, as required by paragraph (h) of this AD, as applicable, except as specified in paragraph (i)(6) of this AD.

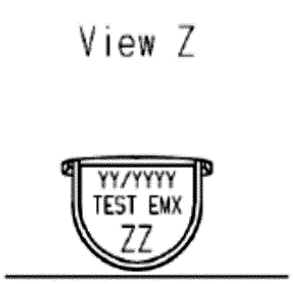
(6) Airplanes on which the passenger oxygen container has been replaced before the effective date of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011, are compliant with the requirements of the paragraph (h) of this AD for that passenger oxygen container.

(7) The requirements of paragraphs (g) and (h) of this AD apply only to passenger oxygen containers that are Design A, as defined in figure 1 to paragraph (i)(7) of this AD.

Figure 1 to Paragraph (i)(7) of this AD – Design A of the Passenger Oxygen Containers Affected by this AD

Design A: The placard on the passenger oxygen container test button is as described in Picture A of Appendix 1 of this AD. The Mask configuration ("ZZ" in Picture A) is a number and the test button is as shown in Picture B.

Picture A:

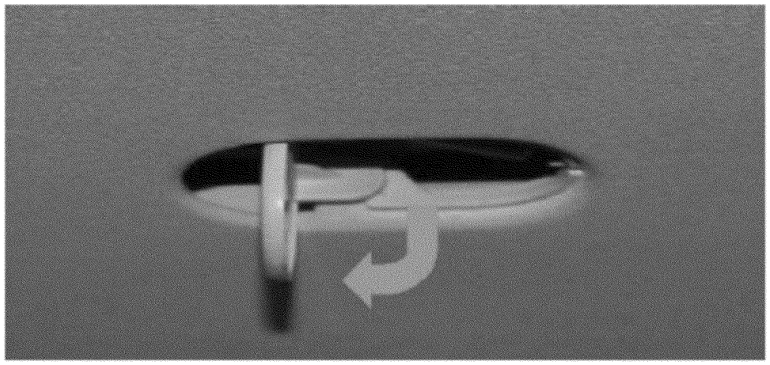


YY/YYYY : Month and Year of Inspection of Container

X : number of masks

ZZ : Oxygen mask code from the 7. + 8. place of the Customerr Part No.

Picture B:



Note 1 to figure 1 to paragraph (i)(7) of this AD: Figure 1 is a reproduction of material from EASA AD 2012–0083, dated May 16, 2012. The words ''Appendix 1 of this AD'' in this figure refer to Appendix 1 of EASA AD 2012–0083, dated May 16, 2012.

Note 2 to figure 1 to paragraph (i)(7) of this AD: For ''Design A,'' the placard on the passenger oxygen container test button is as described in ''Picture A'' in figure 1 to paragraph (i)(7) of this AD. The mask configuration (''ZZ'' in ''Picture A'') is a number, and the test button is as shown in ''Picture B.''

(j) Retained Parts Installation Limitations, With No Changes

This paragraph restates the requirements of paragraph (j) of AD 2014–13–12, with no changes. As of September 9, 2014 (the effective date of AD 2014–13–12), no person may install an oxygen container having a part number specified in paragraph (h)(1) of this AD and having a serial number specified in paragraph (h)(2) of this AD, on any airplane, unless the container has been modified in accordance with the Accomplishment Instructions of any of the service information specified in paragraph (j)(1), (j)(2), or (j)(3) of this AD, as applicable.

(1) Airbus Service Bulletin A320–35A1047, dated March 29, 2011.

(2) B/E AEROSPACE Service Bulletin 1XCXX–0100–35–005, Revision 1, dated December 15, 2012.

(3) B/E AEROSPACE Service Bulletin 22CXX–0100–35–003, Revision 1, dated December 20, 2011.

(k) New Requirement of This AD: Identification of Oxygen Containers

At the applicable time specified in paragraphs (k)(1) and (k)(2) of this AD: Identify the part number and serial number of each passenger oxygen container. A review of airplane maintenance records is acceptable in lieu of this identification if the part number and serial number of the oxygen container can be conclusively determined from that review.

(1) For units with ''B/E AEROSPACE'' on the identification plate: Within 5,000 flight cycles, or 7,500 flight hours, or 24 months, whichever occurs first after the effective date of this AD.

(2) For units with ''DAe Systems'' on the identification plate: Within 2,500 flight cycles, or 3,750 flight hours, or 12 months, whichever occurs first, after the effective date of this AD.

(l) New Requirement of This AD: Modification of Oxygen Containers

If a passenger oxygen container has a part number listed in paragraph (h)(1) of this AD and a serial number listed in paragraph (m)(1) or (m)(2) of this AD: At the applicable time specified in paragraphs (k)(1) and (k)(2) of this AD, do the actions specified in paragraphs (l)(1), (l)(2), and (l)(3) of this AD.

(1) Replace the oxygen generator manifold of any affected oxygen container with a serviceable manifold, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011.

(2) Do an operational check of the manual mask release, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011. If the operational check fails, before further flight, repair the manual mask release, using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA.

(3) Check if the part number of the passenger oxygen container is listed in B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 2, dated July 10, 2014; or B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 2, dated July 10, 2014, as applicable. If the part number is not listed in B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 2, dated July 10, 2014; or B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 2, dated July 10, 2014; within the compliance time specified in paragraphs (k)(1) and (k)(2) of this AD, repair the passenger oxygen container using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA.

(m) New Requirement of This AD: Part Numbers and Serial Numbers for the Parts Affected by Paragraph (l) of This AD Requirements

Affected parts for the actions required by paragraph (l) of this AD are identified in paragraphs (m)(1) and (m)(2) of this AD.

(1) For oxygen containers with ''DAe Systems'' on the identification plate: Units having a part number identified in paragraphs (h)(1) of this AD, where part number ''xxxxx'' stands for any alphanumerical value, and a serial number identified in paragraphs (m)(1)(i) through (m)(1)(vi) of this AD.

(i) ARBA–0000 to ARBA–9999 inclusive.

(ii) ARBB–0000 to ARBB–9999 inclusive.

(iii) ARBC–0000 to ARBC–9999 inclusive.

(iv) ARBD–0000 to ARBD–9999 inclusive.

(v) ARBE–0000 to ARBE–9999 inclusive.

(vi) BEBE–0000 to BEBE–9999 inclusive.

(2) For oxygen containers with ''B/E AEROSPACE'' on the identification plate: Units having a part number identified in paragraphs (h)(1) of this AD, where part number ''xxxxx'' stands for any alphanumerical value, and a serial number identified in paragraphs (m)(2)(i) through (m)(2)(v) of this AD.

(i) BEBF–0000 to BEBF–9999 inclusive.

(ii) BEBH–0000 to BEBH–9999 inclusive.

(iii) BEBK–0000 to BEBK–9999 inclusive.

(iv) BEBL–0000 to BEBL–9999 inclusive.

(v) BEBM–0000 to BEBM–9999 inclusive.

(n) New Requirement of This AD: Exceptions

(1) Oxygen containers that meet the conditions specified in paragraph (n)(1)(i) or (n)(1)(ii) of this AD are compliant with the requirements of paragraph (l) of this AD.

(i) Oxygen containers Type I having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (m)(1) or (m)(2), as applicable, of this AD, that have been modified prior to the effective date of this AD, as specified in the Accomplishment Instructions of B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 1, dated December 15, 2012; or B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 2, dated July 10, 2014.

(ii) Oxygen containers Type II having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (m)(1) or (m)(2) of this AD, as applicable, that have been modified prior to the effective date of this AD, as specified in the Accomplishment Instructions of B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 1, dated December 20, 2011; or B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 2, dated July 10, 2014.

(2) Airplanes on which Airbus Modification 150703 or Airbus Modification 150704 has not been embodied in production do not have to comply with the requirements of paragraph (l) of this AD, unless an oxygen container having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (m)(1) or (m)(2) of this AD, as applicable, of this AD has been installed since the airplane's first flight.

(3) Airplanes on which Airbus Modification 150703 or Airbus Modification 150704 has been embodied in production and which are not listed by model and manufacturer serial number in Airbus Service Bulletin A320–35A1047, dated March 29, 2011, are not subject to the requirements of paragraphs (k) and (l) of this AD, unless an oxygen container having a part number listed in paragraph (h)(1) of this AD and having a serial number listed in paragraph (m)(1) or (m)(2) of this AD, as applicable, of this AD has been installed since the airplane's first flight.

(4) Model A319 airplanes that are equipped with a gaseous oxygen system for passengers, installed in production with Airbus Modification 33125, do not have the affected passenger oxygen containers installed. Unless these airplanes have been modified in service (no approved Airbus modification exists), the requirements of paragraphs (k) and (l) of this AD do not apply to these airplanes.

(5) Airplanes that have already been inspected prior to the effective date of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011, must be inspected and, depending on the findings, corrected, within the compliance time defined in paragraphs (k)(1) and (k)(2) of this AD, as applicable, as required by paragraph (l) of this AD, as applicable, except as specified in paragraph (n)(6) of this AD.

(6) Airplanes on which the passenger oxygen container has been replaced before the effective date of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–35A1047, dated March 29, 2011, are compliant with the requirements of the paragraph (l) of this AD for that passenger oxygen container.

(7) The requirements of paragraphs (k) and (l) of this AD apply only to passenger oxygen containers that are Design A, as defined in figure 1 to paragraph (i)(7) of this AD.

(o) New Requirement of This AD: Parts Installation Limitations

As of the effective date of this AD, no person may install an oxygen container having a part number specified in paragraph (h)(1) of this AD and having a serial number specified in paragraph (m)(1) or (m)(2) of this AD, as applicable, on any airplane, unless the container has been modified in accordance with the Accomplishment Instructions of any of the service information specified in paragraph (o)(1), (o)(2), or (o)(3) of this AD, as applicable to the oxygen container part number.

(1) Airbus Service Bulletin A320–35A1047, dated March 29, 2011.

(2) B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 2, dated July 10, 2014.

(3) B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 2, dated July 10, 2014.

(p) Credit for Previous Actions

(1) This paragraph restates the requirements of paragraph (k) of AD 2014–13–12, with no changes. This paragraph provides credit for the actions required by paragraph (h) of this AD, if those actions were performed before September 9, 2014 (the effective date of AD 2014–13–12) using the service information specified in paragraph (p)(1)(i) or (p)(1)(ii) of this AD, as applicable to the oxygen container part number.

(i) B/E Aerospace Service Bulletin 1XCXX–0100–35–005, dated March 14, 2011, which is not incorporated by reference in this AD.

(ii) B/E Aerospace Service Bulletin 22CXX–0100–35–003, dated March 17, 2011, which is not incorporated by reference in this AD.

(2) This paragraph provides credit for the actions required by paragraphs (l)(3) and (o) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraph (p)(2)(i) or (p)(2)(ii) of this AD, as applicable to the oxygen container part number.

(i) B/E Aerospace Service Bulletin 1XCXX–0100–35–005, Revision 1, dated December 15, 2012, which was incorporated by reference in AD 2014–13–12.

(ii) B/E Aerospace Service Bulletin 22CXX–0100–35–003, Revision 1, dated December 20, 2011, which was incorporated by reference in AD 2014–13–12.

(q) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1405; fax-425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.*

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(ii) AMOCs approved previously for AD 2014–13–12, are approved as AMOCs for the corresponding provisions of paragraphs (g) through (j) of this AD.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(r) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014–0208, dated September 16, 2014, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4228.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (s)(5), (s)(6), and (s)(7) of this AD.

(s) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on January 20, 2017.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–7099; Directorate Identifier 2016–NE–15–AD; Amendment 39–18737; AD 2016–25–11]

RIN 2120–AA64

Airworthiness Directives; International Aero Engines AG Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain International Aero Engines AG (IAE) V2522–A5, V2524–A5, V2527–A5, V2527E–A5, V2527M–A5, V2530–A5, V2533–A5, V2525–D5, V2528–D5, and V2531–E5 turbofan engines. This AD was prompted by nine in-flight shutdowns (IFSDs) that resulted from premature failure of the No. 3 bearing. This AD requires inspections and corrective actions for bearing damage. This AD also requires removal of the No. 3 bearing from service at the next engine shop visit. We are issuing this AD to correct the unsafe condition on these products.

DATES: This AD is effective January 20, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 20, 2017.

ADDRESSES: For service information identified in this final rule, contact International Aero Engines AG, 400

Main Street, East Hartford, CT 06118; phone: 860–565–0140; email: *help24@pw.utc.com;* Internet: *http://fleetcare.pw.utc.com.*

You may view this referenced service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7099.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7099; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brian Kierstead, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7772; fax: 781–238–7199; email: *brian.kierstead@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain IAE V2522–A5, V2524–A5, V2527–A5, V2527E–A5, V2527M–A5, V2530–A5, V2533–A5, V2525–D5, V2528–D5, and V2531–E5 turbofan engines. The NPRM published in the **Federal Register** on July 21, 2016 (81 FR 47313). The NPRM was prompted by nine IFSDs resulting from premature failure of the No. 3 bearing. This condition, if not corrected, could result in failure of the No. 3 bearing, failure of one or more engines, loss of thrust control, and loss of the airplane. The NPRM proposed to require removal of the No. 3 bearing from service at the next engine shop visit. We are issuing this AD to prevent failure of the No. 3 bearing, failure of one or more engines, loss of thrust control, and loss of the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment. Boeing supported the NPRM.

Request To Add Terminating Action

MTU Maintenance Hanover GmbH (MTU) requested that IAE Non Modification Service Bulletin (NMSB) V2500–ENG–72–0673, dated June 3, 2016, be added as a terminating action in this AD. MTU also requested IAE NMSB V2500–ENG–72–0673 be included in credit for previous action. They reason that following the issue of IAE NMSB V2500–ENG–72–0671, dated March 22, 2016, IAE released IAE NMSB V2500–ENG–72–0673, which recommends removal of No. 3 bearing serial numbers (S/Ns) identical to those listed in IAE NMSB V2500–ENG–72–0671.

We partially agree. We agree that the removal of the suspect bearing in accordance with IAE NMSB V2500–ENG–72–0673, dated June 3, 2016 would accomplish both the (e)(3) compliance and (f) terminating action requirements of this AD because both IAE service documents reference identical bearing S/Ns.

We disagree that including IAE NMSB V2500–ENG–72–0673 as a terminating action or listing as credit for previous action is necessary since replacement of a bearing S/N per IAE NMSB V2500–ENG–72–0673, dated June 3, 2016, makes the engine no longer applicable to the AD. We did not change this AD.

Request To Remove Certain Engine Models From Applicability

IAE and MTU request engine models V2525–D5, V2528–D5, and V2531–E5 be removed from the applicability section of this AD. IAE states that the suspect No. 3 bearings referenced by this AD have all been installed in A5 series engines as specified in IAE NMSB V2500–ENG–72–0671, dated March 22, 2016 and requests alignment with the service instructions in order to provide consistency between the IAE NMSB V2500–ENG–72–0671 and this AD. MTU reasons that the IAE NMSBs V2500–ENG–72–0671 and V2500–ENG–72–0673 do not list V2525–D5, V2528–D5, and V2531–E5 engine models, therefore, this AD should not be applicable to these models.

We disagree. The applicability section of this AD identifies all V2500 engine models of the same type design where the suspect bearing could be installed. This AD further refines the applicability section with identification of specific No. 3 bearing S/Ns listed in IAE NMSB V2500–ENG–72–0671, Appendix 1, dated March 22, 2016. We did not change this AD.

Request To Identify Applicability by Either Engine S/N or Bearing S/N

Cathay Pacific Airways (CPA) requests the applicability section be revised to identify either the engine S/N or the No. 3 bearing S/N listed in IAE NMSB V2500–ENG–72–0671, dated March 22, 2016. CPA suggests that operators might identify engine applicability based on the No. 3 bearing S/N or the engine S/N, as both are listed in IAE NMSB V2500–ENG–72–0671, Appendix 1, dated March 22, 2016.

We disagree. Determining applicability by engine S/N in lieu of the No. 3 bearing S/N is not adequate, as the suspect bearing may have been reinstalled in another engine. We did not change this AD.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD as proposed.

Related Service Information Under 1 CFR Part 51

We reviewed IAE NMSB V2500–ENG–72–0671, dated March 22, 2016. The NMSB describes procedures for inspecting the MMCD and further actions if metallic debris is found. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

We reviewed IAE NMSB V2500–ENG–72–0673, dated June 3, 2016. The NMSB describes procedures for removal and replacement of the No. 3 bearing.

Costs of Compliance

We estimate that this AD affects 11 engines installed on airplanes of U.S. registry. We estimate that it would take about 1 hour to perform the inspection. The average labor rate is $85 per hour. We estimate the cost to replace a No. 3 bearing to be $54,510. Based on these figures, we estimate the cost of this AD on U.S. operators to be $600,545.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII:

Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–11 International Aero Engines AG: Amendment 39–18737; Docket No. FAA–2016–7099; Directorate Identifier 2016–NE–15–AD.

(a) Effective Date

This AD is effective January 20, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to International Aero Engines AG (IAE) V2522–A5, V2524–A5, V2527–A5, V2527E–A5, V2527M–A5, V2530–A5, V2533–A5, V2525–D5, V2528–D5, and V2531–E5 turbofan engines with No. 3 bearing serial numbers (S/Ns) listed in Appendix 1 of IAE Non-Modification Service Bulletin (NMSB) V2500–ENG–72–0671, dated March 22, 2016.

(d) Unsafe Condition

This AD was prompted by several in-flight shutdowns that resulted from premature failure of the No. 3 bearing. We are issuing this AD to correct the unsafe condition on these products.

(e) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) Prior to accumulating 125 flight hours (FH) after the effective date of this AD, inspect the master magnetic chip detector (MMCD) for metallic debris. If no metallic debris is found during the MMCD inspection, repeat the inspection within every 125 FH.

(2) If metallic debris is found during the MMCD inspection, evaluate the debris using paragraph 2.B. of the Accomplishment Instructions in IAE NMSB V2500–ENG–72–0671, dated March 22, 2016. Perform additional inspections or remove the engine from service in accordance with the Accomplishment Instructions in IAE NMSB V2500–ENG–72–0671.

(3) Remove the No. 3 bearing from service at the next engine shop visit and replace it with a bearing part/serial number combination not listed in Appendix 1 of IAE NMSB V2500–ENG–72–0671, dated March 22, 2016.

(f) Mandatory Terminating Action

Removal of the No. 3 bearing from service at the next engine shop visit and replacement with a bearing not listed in Appendix 1 of IAE NMSB V2500–ENG–72–0671, dated March 22, 2016, is terminating action to this AD.

(g) Definition

For the purpose of this AD, an ''engine shop visit'' is the induction of an engine into the shop for maintenance involving the separation of pairs of major mating engine flanges, except that the separation of engine flanges solely for the purposes of transportation without subsequent engine maintenance does not constitute an engine shop visit.

(h) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(i) Related Information

(1) For more information about this AD, contact Brian Kierstead, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7772; fax: 781–238–7199; email: *brian.kierstead@faa.gov.*

(2) IAE NMSB V2500–ENG–72–0673, dated June 3, 2016, can be obtained from IAE using the contact information in paragraph (j)(3) of this AD.

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) International Aero Engines AG (IAE) Non-Modification Service Bulletin V2500–ENG–72–0671, dated March 22, 2016.

(ii) Reserved.

(3) For IAE service information identified in this AD, contact International Aero Engines AG, 400 Main Street, East Hartford, CT 06118; phone: 860–565–0140; email: *help24@pw.utc.com;* Internet: *http://fleetcare.pw.utc.com.*

(4) You may view this service information at FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on November 28, 2016.

Colleen M. D'Alessandro,

Manager, Engine & Propeller Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Airbus Model A319–115 and –132 airplanes, and Model A320–214, –232, and –233 airplanes. This AD requires revising the airplane flight manual (AFM) to include information that introduces a fuel limitation for certain types of fuel and a fuel gravity feed ceiling procedure for airplanes equipped with jet pumps. This AD was prompted by a report indicating that certain modified airplanes do not have electrical ground wires on the fuel level sensing control unit (FLSCU), which adversely affects gravity feeding operation. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective January 3, 2017.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 3, 2017.

We must receive comments on this AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: *account.airworth-eas@airbus.com;* Internet: *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9515.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9515; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1405; fax: 425–227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2016–0205, dated October 13, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Airbus Model A319–115 and –132 airplanes, and Model A320–214, –232, and –233 airplanes. The MCAI states:

> Airbus introduced mod 154327 on A319 and A320 aeroplanes which substituted the pump fuel feed system from the centre fuel tank with a jet pump transfer system, based on the Airbus A321 design.
>
> Following the modification introduction, it was discovered that the modified aeroplanes do not have electrical ground signals that replicate those from the deleted centre tank pump pressure switches. These signals are used as part of the fuel recirculation inhibition request logic.
>
> Subsequent investigation determined that ground wires had not been installed on the Fuel Level Sensing Control Units (FLSCU) of the modified A319 and A320 aeroplanes, due to a drawing error on the fuel system recirculation Principle Diagram. Without these ground wires providing inputs, the FLSCU logic is not correctly implemented for gravity feeding operation.
>
> This condition, if not corrected, could lead to reduced fuel pressure at the engine inlet, possibly resulting in an uncommanded in-flight shut-down when flying at the gravity feed ceiling levels, as defined in the Aircraft Flight Manual (AFM).
>
> To address this potential unsafe condition, Airbus issued AFM Temporary Revision (TR) 695 Issue 1 and AFM TR699 Issue 1 to prohibit the use of Jet B and JP4 fuel and AFM TR700 Issue 1 to provide instructions for amendment of the gravity feed procedure for the other fuels.
>
> For the reasons described above, this [EASA] AD requires amendment of the applicable AFM to include the new gravity feed procedure and reduce the list of authorised fuels.
>
> This [EASA] AD is considered to be an interim measure and further [EASA] AD action may follow.

You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9515.

Related Service Information Under 1 CFR Part 51

Airbus has issued the following service information.

- Airbus A318/A319/A320/A321 Temporary Revision TR695, Issue 1.0, dated August 1, 2016; and Airbus A318/A319/A320/A321 Temporary Revision TR699, Issue 1.0, dated August 1, 2016. This service information describes revising the Limitations section of the AFM to include a fuel limitation that removes JET B and JP4 fuels from the list of usable fuels for airplanes equipped with jet pumps. These documents are distinct since they apply to different airplane configurations.
- Airbus A318/A319/A320/A321 Temporary Revision TR700, Issue 1.0, dated August 1, 2016. This service information describes revising the Abnormal Procedures section of the AFM to include information to modify the fuel gravity feed ceiling procedure for airplanes equipped with jet pumps.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Interim Action

We consider this AD interim action. If final action is later identified, we might consider further rulemaking at that time.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice

and comment prior to adoption of this rule because the current AFM procedure may lead to reduced fuel pressure at the engine inlet, possibly resulting in an uncommanded in-flight shutdown when flying at the fuel gravity feed ceiling levels. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9515; Directorate Identifier 2016–NM–181–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD affects 58 airplanes of U.S. registry.

We also estimate that it will take about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $4,930, or $85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–23 Airbus: Amendment 39–18749; Docket No. FAA–2016–9515; Directorate Identifier 2016–NM–181–AD.

(a) Effective Date

This AD becomes effective January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Model A319–115 and –132 airplanes, and Model A320–214, –232, and –233 airplanes, certificated in any category, all manufacturer serial numbers on which Airbus modification 154327 has been embodied in production.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Reason

This AD was prompted by a report indicating that, for airplanes on which Airbus modification 154327 (which substitutes the pump fuel feed system from the center fuel tank with a jet pump transfer system) was done, the modified airplanes do not have electrical ground wires on the fuel level sensing control unit (FLSCU), which adversely affects gravity feeding operation. We are issuing this AD to prevent reduced fuel pressure at the engine inlet, potentially resulting in an uncommanded in-flight shutdown when flying at the fuel gravity feed ceiling levels.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revision of the Airplane Flight Manual (AFM)

(1) Within 30 days after the effective date of this AD, revise the Limitations section of the AFM by inserting a copy of Airbus A318/A319/A320/A321 Temporary Revision TR695, Issue 1.0, dated August 1, 2016; or Airbus A318/A319/A320/A321 Temporary Revision TR699, Issue 1.0, dated August 1, 2016; as applicable; and revise the Abnormal Procedures section of the AFM by inserting a copy of Airbus A318/A319/A320/A321 Temporary Revision TR700, Issue 1.0, dated August 1, 2016. These temporary revisions introduce a fuel limitation for certain types of fuel and a fuel gravity feed ceiling procedure for airplanes equipped with jet pumps. Thereafter, operate the airplane according to the limitation and procedure in the applicable temporary revision.

(2) When the information in Airbus A318/A319/A320/A321 Temporary Revision TR695, Issue 1.0, dated August 1, 2016; or Airbus A318/A319/A320/A321 Temporary Revision TR699, Issue 1.0, dated August 1, 2016; as applicable; and Airbus A318/A319/A320/A321 Temporary Revision TR700, Issue 1.0, dated August 1, 2016; has been included in the general revisions of the AFM, the general revisions may be inserted in the AFM, and the temporary revisions may be removed.

(h) Special Flight Permits

Special flight permits, as described in Section 21.197 and Section 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199), are not allowed.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your

request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1405; fax: 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016–0205, dated October 13, 2016, for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9515.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus A318/A319/A320/A321 Temporary Revision TR695, Issue 1.0, dated August 1, 2016.

(ii) Airbus A318/A319/A320/A321 Temporary Revision TR699, Issue 1.0, dated August 1, 2016.

(iii) Airbus A318/A319/A320/A321 Temporary Revision TR700, Issue 1.0, dated August 1, 2016.

(3) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: *account.airworth-eas@airbus.com;* Internet: *http://www.airbus.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–6744; Directorate Identifier 2016–NE–12–AD; Amendment 39–18736; AD 2016–25–10]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce plc Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Rolls-Royce plc (RR) RB211–Trent 875–17, RB211–Trent 877–17, RB211–Trent 884–17, RB211–Trent 884B–17, RB211–Trent 892–17, RB211–Trent 892B–17, and RB211–Trent 895–17 turbofan engines. This AD requires machining and inspecting parts related to the high-pressure compressor (HPC) and replacing HPC parts found defective. This AD was prompted by inspection of RR Trent 800 engines returned from service that revealed flame erosion and axial cracking on the stage 3 disk rim of the HPC stage 1–4 rotor disks shaft. We are issuing this AD to correct the unsafe condition on these products.

DATES: This AD becomes effective January 20, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 20, 2017.

ADDRESSES: For service information identified in this final rule, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, England, DE24 8BJ; phone: 011–44–1332–242424; fax: 011–44–1332–249936; email: *http://www.rolls-royce.com/contact/civil_team.jsp;* Internet: *https://customers.rolls-royce.com/public/rollsroycecare.* You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6744.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6744; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the mandatory continuing airworthiness information (MCAI), the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Robert Green, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7754; fax: 781–238–7199; email: *robert.green@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM was published in the **Federal Register** on July 26, 2016 (81 FR 48724). The NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

> Inspection of Trent 800 engines returned from service revealed flame eroded areas and axial cracking on the rear Stage 3 disc of the High Pressure Compressor (HPC) Stage 1–4 drum. This is considered to be the result of a localised fire originating from an excessive rub at the stage 3–4 forward seal fin.
>
> This condition, if not detected and corrected, could lead to an uncontained engine failure and release of high energy debris, possibly resulting in damage to the aeroplane and injury to occupants.

You may obtain further information by examining the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6744.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received.

Request To Revise Inspection for Wear and Cracks

American Airlines, Inc., (AAL) requested that the requirement in paragraph (e)(1)(i) of this AD be revised

to allow the standards in the RR Trent 800 Engine Manual (EM) to be used in the assessment for wear and cracks. AAL indicated that RR Trent 800 EM task 72–41–31–200–801 addresses the conditions of wear and cracking and provides limits and rejection criteria. AAL commented that RR has noted that the types of damage described in RR Standard Practices Manual 70–01–02–200–000 including the terms ''burned/charred'' and ''eroded'' provide an adequate description of flame erosion.

AAL further indicated that if, based on the proposed requirement in paragraph (e)(1)(ii) of this AD, any wear is found on the forward stage 3–4 seal fin, then the HPC 1–4 rotor would have to be replaced. AAL noted, however, that EM task 72–41–31–200–801 allows the seal fin to exhibit wear within the diametral limits of 23.665 to 23.722 inches.

RR indicated that the requirement in this AD to reject the part for evidence of wear should be eliminated. RR noted that the EM for the affected engines already includes inspections for wear and other damage.

We partially agree. We agree with AAL's assessment that the EM task would allow wear as defined above while paragraph (e)(1)(i) in this AD, as proposed, would not have allowed any wear. We also agree with RR that it is not necessary to specify an inspection for wear.

We disagree that it is necessary to refer to the EM task in the requirements of this AD. We have revised the requirements of this AD to remove the requirement to inspect for ''wear.'' We are removing this requirement because seal tooth wear serviceability limits are already defined in the RR Trent 800 EM.

Request To Revise Requirement to Machine HPC Stage 3 Inner Shroud

RR and AAL requested that the requirement in paragraph (e)(1)(ii) of this AD to machine the HPC stage 3 inner shroud be revised. AAL noted that the HPC 1–4 disks shaft is a life-limited part; therefore, AAL tracks its cycle use, both total part cycles and cycles since last piece-part inspection. There is, however, no mandatory tracking requirement for the HPC stage 3 inner shroud. AAL, therefore, cannot ensure that it can comply with RR Service Bulletin (SB) RB211.72–J195, dated February 26, 2016, before exceeding 5,000 duty cycles since new or since last piece-part inspection of the HPC stage 1–4 rotor disks shaft, as proposed in this AD. AAL and RR suggested that the requirement in paragraph (e)(1)(ii) of this AD become an optional terminating action.

We partially agree. We disagree with revising the requirement in paragraph (e)(1)(ii) in this AD to machine the HPC stage 1–3 shroud because that addresses the unsafe seal clearance condition. We agree, however, that the proposed language in paragraph (e)(1) may be misinterpreted to refer to tracking the cycles on the HPC stage 3 inner shroud. Therefore, we clarified paragraph (e)(1) of this AD to read: ''(1) Before the HPC stage 1–4 rotor disks shaft cyclic life exceeds 5,000 duty cycles since new, or 5,000 duty cycles since last HPC stage 1–4 rotor disks shaft piece-part inspection, whichever occurs later, do the following: . . . .'' This change clarifies that the 5,000 duty cycles since new criterion in this AD applies only to the HPC stage 1–4 rotor disks and not the HPC stage 3 inner shroud.

Support for the NPRM

The Boeing Company, Inc., commented that it supported the proposed rule as written.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously. We determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

RR has issued SB RB.211–72–J195, dated February 26, 2016. The SB describes procedures to machine the HPC stage 3 inner shroud and to inspect the HPC stage 1–4 rotor disks shaft. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 125 engines installed on airplanes of U.S. registry. We did not estimate any time to machine the HPC stage 3 inner shroud because this is accomplished during routine overhaul. We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection of the HPC stage 1–4 rotor disks	8 work-hours × $85 per hour = $680	$0	$680	$85,000

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–25–10 Rolls-Royce plc: Amendment 39–18736; Docket No. FAA–2016–6744; Directorate Identifier 2016–NE–12–AD.

(a) Effective Date

This AD becomes effective January 20, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Rolls-Royce plc (RR) RB211–Trent 875–17, RB211–Trent 877–17, RB211–Trent 884–17, RB211–Trent 884B–17, RB211–Trent 892–17, RB211–Trent 892B–17, and RB211–Trent 895–17 turbofan engines that have not incorporated RR modification 72–J195, in production, or RR Service Bulletin RB.211–72–J195, dated February 26, 2016, in service.

(d) Reason

This AD was prompted by inspection of RR Trent 800 model engines returned from service that revealed flame erosion and axial cracking on the aft face of the stage 3 disk rim of the high-pressure compressor (HPC) stage 1–4 rotor disks shaft. We are issuing this AD to correct the unsafe condition on these products.

(e) Actions and Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) Before the HPC stage 1–4 rotor disks shaft cyclic life exceeds 5,000 duty cycles since new, or 5,000 duty cycles since last HPC stage 1–4 rotor disks shaft piece-part inspection, whichever occurs later, do the following:

(i) Perform fluorescent penetrant and visual inspections of the HPC stage 1–4 rotor disks shaft forward stage 3–4 seal fin and aft face of the stage 3 disk rim for cracks and flame erosion. Any findings of cracks or flame erosion constitute a failure of the HPC stage 1–4 rotor disks shaft.

(ii) Machine the HPC stage 3 inner shroud to the dimensions shown in Figure 1 of RR Service Bulletin (SB) RB.211–72–J195, dated February 26, 2016.

(2) If the HPC stage 1–4 rotor disks shaft fails the inspections required by paragraph (e)(1)(i) of this AD, replace with a part eligible for installation before further flight.

(f) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(g) Related Information

(1) For more information about this AD, contact Robert Green, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7754; fax: 781–238–7199; email: *robert.green@faa.gov.*

(2) Refer to MCAI European Aviation Safety Agency AD 2016–0078, dated April 20, 2016 (corrected April 27, 2016), for more information. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating it in Docket No. FAA–2016–6744.

(h) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Rolls-Royce plc (RR) SB RB.211–72–J195, dated February 26, 2016.

(ii) Reserved.

(3) For RR service information identified in this AD, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, England, DE24 8BJ; phone: 011–44–1332–242424; fax: 011–44–1332–249936; email: *http://www.rolls-royce.com/contact/civil_team.jsp;* Internet: *https://customers.rolls-royce.com/public/rollsroycecare.*

(4) You may view this service information at FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

(5) You may view this service information at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on November 23, 2016.

Colleen M. D'Alessandro,

Manager, Engine & Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2016–9375; Airspace Docket No. 16–ASO–16]

Amendment of Class D Airspace for St. Petersburg, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the ceiling of the Class D Airspace area at St. Petersburg-Clearwater International Airport, St. Petersburg, FL. This would allow the Tampa International Airport Air Traffic Control Tower (ATCT) to carry out Letter of Agreement procedures between St. Petersburg Air Traffic Control Tower and Tampa Terminal Radar Approach Control (TRACON) for the safety and management of standard instrument approach procedures (SIAPs), and for Instrument Flight Rule (IFR) operations in the area.

DATES: Effective 0901 UTC, January 5, 2017. The Director of the Federal Register approves this incorporation by reference action under Title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at *http://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal-regulations/ibr_locations.html.*

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class D airspace at St. Petersburg-Clearwater International Airport, St. Petersburg, FL.

History

In a review of the airspace, the FAA found the Class D airspace description for St. Petersburg-Clearwater International Airport, St. Petersburg, FL, published in FAA Order 7400.11A, describes the ceiling as extending upward from the surface to and including 2,500 feet MSL. The Tampa International Airport Class B airspace area has control of aircraft operating at and above 1,800 feet MSL in the St. Petersburg, FL, Class D airspace area.

The FAA is lowering the Class D airspace area to 1,600 feet MSL to avoid the overlap of controlled airspace between the two airports. To avoid confusion on the part of pilots overflying the St. Petersburg, FL, area, the FAA finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest. To be consistent with the FAA's safety mandate when an unsafe condition exists, the FAA finds good cause pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days to promote the safe and efficient handling of air traffic in the area.

Class D airspace designations are published in paragraphs 5000 of FAA Order 7400.11A dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR part 71.1. The Class D airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) part 71 by lowering the ceiling of the Class D airspace area from 2,500 feet MSL to upward from the surface to and including 1,600 feet MSL at St. Petersburg-Clearwater International Airport, St. Petersburg, FL. The Letter of Agreement between Tampa TRACON and St. Petersburg-Clearwater International Airport ATCT, established February 13, 2015, states that Tampa TRACON shall control aircraft operating at or above 1,800 feet MSL in the St. Petersburg-Clearwater International Airport Class D airspace area. This airspace change eliminates confusion on the part of pilots operating aircraft at or above 1,600 feet MSL in the St. Petersburg-Clearwater International Airport Class D airspace area. Also, an adjustment to the geographic coordinates of St. Petersburg-Clearwater International Airport is made to be in concert with the FAA's aeronautical database.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120, E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, effective September 15, 2016, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ASO FL D St. Petersburg, FL [Amended]

St. Petersburg-Clearwater International Airport, FL
(Lat. 27°54′31″ N., long. 82°41′11″ W.)

That airspace extending upward from the surface to and including 1,600 feet MSL within a 4.2-mile radius of St. Petersburg-Clearwater International Airport; excluding that portion within the Tampa International Airport, FL, Class B airspace area. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement (previously called Airport/Facility Directory).

Issued in College Park, Georgia, on December 1, 2016.

Ryan W. Almasy,

Manager, Operations Support Group Eastern Service Center, Air Traffic Organization.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 31111; Amdt. No. 530]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

DATES: Effective 0901 UTC, January 5, 2017.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AMCAFS–420), Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125), telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user, and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers; Related Aircraft Amendment

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This rule allows air carriers to seek a deviation from the flight simulation training device (FSTD) requirements for related aircraft proficiency checks. As a result, this rule will eliminate an inconsistency that currently permits carriers that have obtained FAA approval to modify the FSTD requirements for related aircraft differences training, but not for corresponding proficiency checks. In doing so, it corrects an inadvertent omission from the Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers final rule.

DATES: Effective January 17, 2017.

Submit comments on or before February 14, 2017.

ADDRESSES: Send comments identified by docket number FAA–2016–9526 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking

process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Sheri Pippin, Air Transportation Division, AFS–200, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8166; email *sheri.pippin@faa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

This rule will allow air carriers to seek a deviation from the FSTD requirements for related aircraft proficiency checks based on a related aircraft designation and determination of an equivalent level of safety. As a result, this rule will eliminate an inconsistency that currently permits carriers that have obtained FAA approval to modify the FSTD requirements for related aircraft differences training, but not for corresponding proficiency checks.

II. Administrative Procedure Act and Legal Authority

A. Good Cause for Immediate Adoption

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 553) authorizes agencies to dispense with notice and comment procedures for rules when the agency for ''good cause'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking.

The FAA finds that notice and public comment to this final rule are unnecessary. This final rule corrects an inadvertent omission from the Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers (Crewmembers and Aircraft Dispatchers Training) final rule by providing certificate holders additional flexibility in the selection of an FSTD for related aircraft proficiency check maneuvers and procedures based on a determination of an equivalent level of safety. As a result, this rule is relieving for certificate holders. In addition, in the process of drafting and implementing the suite of rules culminating in the Crewmembers and Aircraft Dispatchers Training final rule, the FAA sought comment on, and thoroughly considered, comments regarding related aircraft proficiency checks. The updates to § 121.441(f) contained in this final rule offer additional flexibility; in that, air carrier certificate holders can request permission to deviate from related aircraft proficiency check requirements when the proficiency check is conducted in full, or in part, in an FSTD. Therefore, the FAA has determined that notice and public comment are unnecessary prior to the adoption of this amendment.

B. Comments Invited

The FAA is adopting this final rule without prior notice and public comment because it corrects an inadvertent omission from the Crewmembers and Aircraft Dispatchers Training final rule and the FAA previously sought comment on and considered comments regarding related aircraft proficiency checks. The Regulatory Policies and Procedures of the Department of Transportation (DOT) (44 FR 1134; February 26, 1979), provide that to the maximum extent possible, operating administrations for the DOT should provide an opportunity for public comment on regulations issued without prior notice. Accordingly, consistent with DOT Regulatory Policies and Procedures and 14 CFR 11.11, the FAA seeks comment on this Final Rule.

C. Authority for This Rulemaking

The FAA's authority to issue rules on aviation safety is found in Title 49 of the United States Code. This rulemaking is promulgated under the authority described in 49 U.S.C. 106(f), which vests final authority in the Administrator for carrying out all functions, powers, and duties of the administration relating to the promulgation of regulations and rules, and 49 U.S.C. 44701(a)(5), which requires the Administrator to promulgate regulations and minimum standards for other practices, methods, and procedures necessary for safety in air commerce and national security.

III. Background

On November 12, 2013, the FAA published the Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers final rule (78 FR 67800). In that final rule, effective March 12, 2014, the FAA included opportunities for air carriers to modify training program requirements for flightcrew members when the air carrier operates multiple aircraft types with similar design and flight handling characteristics. The final rule also included opportunities for air carriers to seek a deviation to allow credit for flightcrew member qualification requirements, including proficiency checks, when the air carrier operates multiple aircraft types with similar design and flight handling characteristics.[1]

The final rule explained that due to differences in instrumentation and installed equipment, crewmembers trained on one variation of aircraft type may require additional training to safely and efficiently operate another variation of the same aircraft type. This additional training is identified in regulations as differences training.[2] The final rule further explained that the FAA, through the Flight Standardization Board (FSB), provides an analysis of the differences between variations of an aircraft type, which the FSB documents in an FSB report for a specific aircraft type. This report may include recommendations on reduced training frequency, reduced training elements or events, or use of a lower level FSTD than required by part 121 appendix E (Flight Training Requirements) for a specific maneuver or procedure.

Additionally, the final rule explained the rapid advancement in modern technologies, both in manufacturing techniques and systems design and application, can produce aircraft types of differing models and aerodynamic airframes, with similar handling or flight characteristics. These modern aircraft systems and displays may allow different type certificated aircraft to have common flight deck and systems designs, such that minimal differences training may be warranted. The FAA, through the FSB, can analyze these aircraft with different type certificates which may result in recommendations for training reductions.

[1] As the FAA clarified in its final rule, the agency uses the term ''related aircraft'' when describing two or more aircraft of the same make (with either the same or different type certificates) that have been demonstrated and determined by the Administrator to have commonality to the extent that flightcrew member training, checking, recent experience, operating experience, operating cycles, and line operating flight time for consolidation of knowledge and skills may be reduced while still meeting the training and qualification requirements for service on the other aircraft. 78 FR at 67816.

[2] See §§ 121.400 and 121.418.

Statement of the Problem

In the Crewmembers and Aircraft Dispatchers Training final rule, the FAA intended to extend fully the differences training concept to aircraft with different type certificates within the new provisions for related aircraft differences training. In addition, an air carrier may seek deviations for related aircraft proficiency checks, operating experience, operating cycles, line operating flight time for consolidation of knowledge and skills, and recency of experience.

In the Crewmembers and Aircraft Dispatchers Training final rule, the FAA added paragraph (f) to § 121.441, to allow the Administrator to approve a deviation to the proficiency check requirements based on a designation of related aircraft and after the Administrator determines the certificate holder can demonstrate an equivalent level of safety. Specifically, paragraph (f) allows a deviation from the frequency of proficiency checks and from certain procedures and maneuvers required by appendix F (Proficiency Check Requirements). Paragraph (f) did not, however, include an allowance to obtain a deviation from the FSTD requirements specified in appendix F. As currently written, § 121.441(f) does not allow deviation if the FSB determines that the use of a lower level FSTD for a specific maneuver or procedure may be acceptable on a related aircraft proficiency check. Such a determination by the FSB would foreseeably be based on similarities in design and flight characteristics between the base aircraft and the related aircraft.

IV. Discussion of Final Rule

This final rule will correct an inadvertent omission from the Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers final rule by eliminating an inconsistency that currently permits air carriers (with FAA approval) to modify the FSTD requirements for related aircraft differences training, but not for related aircraft proficiency checks. Because the FAA intended to extend fully the differences training concept to related aircraft differences training and deviations, the FAA is revising § 121.441(f)(2) to allow a certificate holder to request a deviation from the FSTD requirements in paragraph (c) of § 121.441. To receive a deviation, the certificate holder must provide a designation of related aircraft and demonstrate an equivalent level of safety exists to justify the deviation. By this update, the request for deviation must include the level of FSTD to be used for each maneuver and procedure.

Requests for deviation remain voluntary. The FAA has determined this change would not adversely affect safety of aircraft operations. A deviation from any proficiency check requirement under § 121.441(f) is only available if the certificate holder has a designation of related aircraft. Such a designation indicates the base aircraft and designated related aircraft have been demonstrated and determined by the Administrator to have commonality; the certificate holder must be able to demonstrate that it can maintain the equivalent level of safety in obtaining the designation.

V. Regulatory Notices and Analyses

A. Regulatory Evaluation

Changes to Federal regulations must undergo several economic analyses. First, Executive Order 12866 and Executive Order 13563 direct that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (Pub. L. 96–39) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. In developing U.S. standards, the Trade Act requires agencies to consider international standards and, where appropriate, that they be the basis of U.S. standards. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more annually (adjusted for inflation with base year of 1995). This portion of the preamble summarizes the FAA's analysis of the economic impacts of this final rule.

Department of Transportation Order DOT 2100.5 prescribes policies and procedures for simplification, analysis, and review of regulations. If the expected cost impact is so minimal that a proposed or final rule does not warrant a full evaluation, this order permits that a statement to that effect and the basis for it to be included in the preamble if a full regulatory evaluation of the cost and benefits is not prepared. Such a determination has been made for this rule. This rule would remove additional requirements with respect to proficiency checks for aircraft of a related type, as long as FAA has made a determination that an equivalent level of safety is maintained. Given the relieving nature of this rule, the economic impact of this rule would be minimal cost.

The FAA has, therefore, determined that this rule is not a ''significant regulatory action'' as defined in section 3(f) of Executive Order 12866, and is not ''significant'' as defined in DOT's Regulatory Policies and Procedures.

B. Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (Pub. L. 96–354) (RFA) establishes ''as a principle of regulatory issuance that agencies shall endeavor, consistent with the objectives of the rule and of applicable statutes, to fit regulatory and informational requirements to the scale of the businesses, organizations, and governmental jurisdictions subject to regulation. To achieve this principle, agencies are required to solicit and consider flexible regulatory proposals and to explain the rationale for their actions to assure that such proposals are given serious consideration.'' The RFA covers a wide-range of small entities, including small businesses, not-for-profit organizations, and small governmental jurisdictions.

Agencies must perform a review to determine whether a rule will have a significant economic impact on a substantial number of small entities. If the agency determines that it will, the agency must prepare a regulatory flexibility analysis as described in the RFA.

However, if an agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities, section 605(b) of the RFA provides that the head of the agency may so certify and a regulatory flexibility analysis is not required. The certification must include a statement providing the factual basis for this determination, and the reasoning should be clear.

This rule would correct an inadvertent omission from the Crewmembers and Aircraft Dispatchers Training final rule and would eliminate an inconsistency that currently permits air carriers (with FAA approval) to modify the FSTD requirements for related aircraft differences training, but not for related aircraft proficiency checks. This action would result in increased flexibility for certificate holders. While the rule would likely impact a substantial number of small

entities,[3] given the relieving nature of this rule, it would have a minimal positive economic impact.

Therefore, as provided in section 605(b), the head of the FAA certifies that this rulemaking will not result in a significant economic impact on a substantial number of small entities.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to these Acts, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. The FAA has assessed the potential effect of this rule and determined that the rule will have the same impact on international and domestic flights and is a safety rule thus is consistent with the Trade Agreements Act.

D. Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of $100 million or more (in 1995 dollars) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a ''significant regulatory action.'' The FAA currently uses an inflation-adjusted value of $155 million in lieu of $100 million. This rule does not contain such a mandate; therefore, the requirements of Title II of the Act do not apply.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the FAA consider the impact of paperwork and other information collection burdens imposed on the public. According to the 1995 amendments to the Paperwork Reduction Act (5 CFR 1320.8(b)(1)), an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid Office of Management and Budget (OMB) control number.

The FAA has determined that there is no new information collection associated with this cost relieving amendment to related aircraft proficiency check requirements. The OMB previously approved the collection of such information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) and it was assigned OMB Control Number 2120–0739.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA has determined that there are no ICAO Standards and Recommended Practices that correspond to these regulations.

G. Environmental Analysis

FAA Order 1050.1F identifies FAA actions that are categorically excluded from preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act in the absence of extraordinary circumstances. The FAA has determined this rulemaking action qualifies for the categorical exclusion identified in paragraph 5–6.6 and involves no extraordinary circumstances.

VI. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA has analyzed this final rule under the principles and criteria of Executive Order 13132, Federalism. The agency determined that this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, and, therefore, does not have Federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this final rule under Executive Order 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (May 18, 2001). The agency has determined that it is not a ''significant energy action'' under the executive order and it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, Promoting International Regulatory Cooperation

Executive Order 13609, Promoting International Regulatory Cooperation, promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609, and has determined that this action would have no effect on international regulatory cooperation.

VII. How To Obtain Additional Information

A. Rulemaking Documents

An electronic copy of a rulemaking document may be obtained by using the Internet—

1. Search the Federal eRulemaking Portal (*http://www.regulations.gov*);
2. Visit the FAA's Regulations and Policies Web page at *http://www.faa.gov/regulations_policies/* or
3. Access the Government Printing Office's Web page at: *http://www.gpo.gov/fdsys/.*

Copies may also be obtained by sending a request (identified by notice, amendment, or docket number of this rulemaking) to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–9677.

B. Comments Submitted to the Docket

Comments received may be viewed by going to *http://www.regulations.gov* and following the online instructions to search the docket number for this action. Anyone is able to search the electronic form of all comments received into any of the FAA's dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.).

C. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction.

[3] Based on an analysis of publicly available information, the FAA assumed that the Crewmembers and Aircraft Dispatchers Training final rule would have an impact on a substantial number of small entities. We make the same determination in this rulemaking.

A small entity with questions regarding this document may contact its local FAA official, or the person listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA on the Internet, visit *http://www.faa.gov/regulations_policies/rulemaking/sbre_act/.*

List of Subjects in 14 CFR Part 121

Air carriers, Aircraft, Airmen, Aviation safety.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 121 as follows:

PART 121—OPERATING REQUIREMENTS: DOMESTIC, FLAG, AND SUPPLEMENTAL OPERATIONS

■ 1. The authority citation for part 121 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40119, 41706, 42301 preceding note added by Pub. L. 112–95, sec. 412, 126 Stat. 89, 44101, 44701–44702, 44705, 44709–44711, 44713, 44716–44717, 44722, 44729, 44732, 46105; Pub. L. 111–216, 124 Stat. 2348 (49 U.S.C. 44701 note); Pub. L. 112–95, 126 Stat. 62 (49 U.S.C. 44732 note).

■ 2. Amend § 121.441 by revising paragraphs (f)(1), (f)(2) introductory text, and (f)(2)(ii) to read as follows:

§ 121.441 Proficiency checks.

* * * * *

(f) * * *

(1) The Administrator may authorize a deviation from the proficiency check requirements of paragraphs (a), (b)(1), and (c) of this section based upon a designation of related aircraft in accordance with § 121.418(b) of this part and a determination that the certificate holder can demonstrate an equivalent level of safety.

(2) A request for deviation from paragraphs (a), (b)(1), and (c) of this section must be submitted to the Administrator. The request must include the following:

* * * * *

(ii) Based on review of the related aircraft, the operation, and the duty position:

(A) For recurrent proficiency checks, the frequency of the related aircraft proficiency check, the maneuvers and procedures to be included in the related aircraft proficiency check, and the level of FSTD to be used for each maneuver and procedure.

(B) For qualification proficiency checks, the maneuvers and procedures to be included in the related aircraft proficiency check and the level of FSTD to be used for each maneuver and procedure.

* * * * *

Issued under authority provided by 49 U.S.C. 106(f) and 44701(a) in Washington, DC, on December 8, 2016.

Michael P. Huerta,

Administrator.

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Industry and Security (BIS) publishes this final rule to amend the Export Administration Regulations (EAR) to implement the recommendations presented at the February 2016 Australia Group (AG) Intersessional Implementation Meeting, and later adopted pursuant to the AG silent approval procedure, and the understandings reached at the June 2016 AG Plenary Implementation Meeting. This rule amends two Commerce Control List (CCL) entries to reflect the February 2016 Intersessional Implementation Meeting recommendations that were adopted by the AG. Specifically, this rule amends the CCL entry that controls certain human and zoonotic pathogens and toxins to reflect the AG updates to the nomenclature for certain bacteria and toxins identified on the AG ''List of Human and Animal Pathogens and Toxins for Export Control.'' In addition, this rule amends the CCL entry that controls equipment capable of handling biological materials to reflect the AG updates to the controls on cross (tangential) flow filtration equipment described on the AG ''Control List of Dual-Use Biological Equipment and Related Technology and Software.''

Consistent with the understandings adopted at the June 2016 AG Plenary Implementation Meeting that updated the AG ''List of Human and Animal Pathogens and Toxins for Export Control,'' this rule amends the CCL entry that controls certain human and zoonotic pathogens and toxins by removing dengue fever virus, updating the nomenclature of the listing for conotoxin, and consolidating the controls for Shiga toxin and Verotoxin (and other Shiga-like ribosome inactivating proteins) under a single listing. This rule also amends the CCL entry that controls equipment capable of handling biological materials by updating the controls on biological containment facilities and related equipment and the controls on fermenters, consistent with the AG Plenary Implementation Meeting updates to the AG ''Control List of Dual-Use Biological Equipment and Related Technology and Software.''

DATES: This rule is effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Richard P. Duncan, Ph.D., Director, Chemical and Biological Controls Division, Office of Nonproliferation and Treaty Compliance, Bureau of Industry and Security, Telephone: (202) 482–3343, Email: *Richard.Duncan@bis.doc.gov.*

SUPPLEMENTARY INFORMATION: The Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to implement the recommendations presented at the Australia Group (AG) Intersessional Implementation Meeting held in Brussels, Belgium, on February 2, 2016, and adopted pursuant to the AG silent approval procedure in April 2016, and the understandings reached at the Implementation Meeting of the 2016 AG Plenary held in Paris, France, from June 6–10, 2016. The AG is a multilateral forum consisting of 41 participating countries that maintain export controls on a list of chemicals, biological agents, and related equipment and technology that could be used in a chemical or biological weapons program. The AG periodically reviews items on its control list to enhance the effectiveness of participating governments' national controls and to achieve greater harmonization among these controls.

Amendments to the CCL Based on the February 2016 AG Intersessional Recommendations

ECCN 1C351 (Human and Animal Pathogens and ''toxins'')

This final rule amends Export Control Classification Number (ECCN) 1C351 on the CCL to update the nomenclature for two bacteria and five toxins, consistent with the AG Intersessional Implementation Meeting updates to the AG ''List of Human and Animal

Pathogens and Toxins for Export Control.'' Specifically, this rule updates the nomenclature for the bacteria ''Chlamydia pscittaci'' and ''Salmonella typhi'' and the toxin ''Viscum Album Lectin 1'' to reflect current scientific usage. This rule also removes the word ''toxin'' from the listings for ''Diacetoxyscirpenol toxin,'' ''Modeccin toxin,'' and ''Volkensin toxin,'' because it was deemed to be redundant (*i.e.,* the abbreviated nomenclature, absent the word ''toxin,'' adequately identifies these particular toxins). In addition, this rule revises the description for ''Microcystin'' by making it plural, thereby clarifying that ECCN 1C351.d.9 controls all variants of this toxin. Finally, this rule renumbers the listings for ''Viscumin'' and ''Volkensin'' to control these toxins under ECCN 1C351.d.17 and .d.18, respectively, to conform with the June 2016 AG Plenary Implementation Meeting change in which the Shiga toxin and Verotoxin listings (ECCN 1C351.d.13 and .d.17, respectively) were merged into a single listing (ECCN 1C351.d.13). These amendments to ECCN 1C351 are summarized in the following table.

Previous names of AG-controlled bacteria and toxins	Current names of AG-controlled bacteria and toxins	Previous CCL designation	Current CCL designation
Chlamydophila psittaci (formerly known as Chlamydia psittaci).	Chlamydia psittaci (Chlamydophila psittaci)	ECCN 1C351.c.7	No Change.
Salmonella typhi	Salmonella enterica subspecies enterica serovar Typhi (Salmonella typhi).	ECCN 1C351.c.18	No Change.
Diacetoxyscirpenol toxin	Diacetoxyscirpenol	ECCN 1C351.d.7	No Change.
Microcystin (Cyanginosin)	Microcystins (Cyanginosins)	ECCN 1C351.d.9	No Change.
Modeccin toxin	Modeccin	ECCN 1C351.d.10	No Change.
Viscum Album Lectin 1 (Viscumin)	Viscumin (Viscum album lectin 1)	ECCN 1C351.d.18	ECCN 1C351.d.17.
Volkensin toxin	Volkensin	ECCN 1C351.d.19	ECCN 1C351.d.18.

The license requirements applicable to the bacteria and toxins affected by these amendments to ECCN 1C351 remain unchanged. Specifically, all of these items continue to require a license for chemical/biological (CB) reasons to destinations indicated under CB Column 1 on the Commerce Country Chart and for anti-terrorism (AT) reasons to destinations indicated in AT Column 1 on the Commerce Country Chart.

ECCN 2B352 (Equipment Capable of Use in Handling Biological Materials)

This final rule amends ECCN 2B352 on the CCL to reflect changes to the AG ''Control List of Dual-Use Biological Equipment and Related Technology and Software'' based on the February 2016 Intersessional Implementation Meeting recommendations that were adopted by the AG pursuant to its silent approval procedure. Specifically, this rule amends the controls on cross (tangential) flow filtration equipment described in 2B352.d.1 by removing the word ''pathogenic'' from the description of this equipment. This change is made because there is no distinction, with respect to either the technical characteristics or the use of this equipment, between pathogenic and non-pathogenic micro-organisms.

This rule also amends ECCN 2B352, consistent with the AG intersessional recommendations, by revising the Nota Bene to 2B352.d.1 to clarify that the exclusion from the controls on cross (tangential) flow filtration equipment listed in 2B352.d.1 applies to hemodialysis equipment, as specified by the manufacturer, as well as reverse osmosis equipment (*i.e.,* both hemodialysis equipment and reverse osmosis equipment, as specified by the manufacturer, are excluded from control under ECCN 2B252.d.1).

All items controlled under ECCN 2B352 require a license for CB reasons to destinations indicated under CB Column 2 on the Commerce Country Chart and for AT reasons to destinations indicated in AT Column 1 on the Commerce Country Chart.

Amendments to the CCL Based on the June 2016 AG Plenary Understandings

ECCN 1C351 (Human and Animal Pathogens and ''Toxins'')

This final rule amends ECCN 1C351 on the CCL to remove the listing for ''dengue fever virus,'' revise the listing for ''Conotoxin,'' and merge the listings for ''Shiga toxin'' and Verotoxin'' consistent with the AG Plenary Implementation Meeting updates to the AG ''List of Human and Animal Pathogens and Toxins for Export Control.''

The removal of ''dengue fever virus'' from control under ECCN 1C351 is designed to reduce barriers to the export of clinical samples, materials, and ''technology'' required for vaccine development, production, and distribution. To reflect the removal of the ECCN 1C351 controls on ''dengue fever virus,'' which was controlled under ECCN 1C351.a.11 prior to the publication of this final rule, this rule also makes conforming changes to ECCN 1C351.a by renumbering those items previously designated as 1C351.a.12 through .a.58 as 1C351.a.11 through .a 57. Consistent with this renumbering, this rule revises the Technical Note to newly redesignated ECCN 1C351.a.40 (''reconstructed 1918 influenza virus'') to reference the new designation for this listing. In addition, the listing for ''tick-borne encephalitis virus (Siberian subtype)'' in ECCN 1C351.b.3 is amended by revising the parenthetical reference therein to ''tick-borne encephalitis virus (Far Eastern subtype)'' to reflect the new designation for the latter (*i.e.,* ECCN 1C351.a.52).

This rule also revises the description for ''Conotoxin'' by making it plural to clarify that ECCN 1C351.d.6 controls all variants of this toxin.

In addition, the listings for ''Shiga toxin'' and ''Verotoxin'' which, prior to the publication of this final rule, were controlled under ECCN 1C351.d.13 and d.17, respectively, are merged into a single listing under ECCN 1C351.d.13 that also includes some changes in nomenclature to clarify the scope of these controls. The revised listing reads as follows: ''Shiga toxins (shiga-like toxins, verotoxins, and verocytotoxins).''

This rule also makes certain conforming changes to other listings in ECCN 1C351 to reflect the merger of the ''Shiga toxin'' and ''Verotoxin'' listings and the related nomenclature changes described above. First, the Note to ECCN 1C351.c.19 (Shiga-toxin producing Escherichia coli) is revised to read: ''Shiga toxin producing Escherichia coli (STEC) includes, inter alia, enterohaemorrhagic E. coli (EHEC), verotoxin producing E. coli (VTEC) or verocytotoxin producing E. coli (VTEC).'' Specifically, this Note is

revised by adding the ''Verotoxin'' nomenclature and by replacing the phrase ''also known as'' with the phrase ''inter alia,'' thereby clarifying that this Note does not exclude other relevant shiga-toxin producing strains from the scope of ECCN 1C351.c.19. Second (as referenced in the description of the AG intersessional changes, above), this rule renumbers the listings for ''Viscumin'' and ''Volkensin'' to control these toxins under ECCN 1C351.d.17 and .d.18, respectively, to reflect the merger of the Shiga toxin and Verotoxin listings (which were previously designated as ECCN 1C351.d.13 and .d.17, respectively) into a single listing (ECCN 1C351.d.13).

Except for the dengue fever virus, the license requirements applicable to the viruses, bacteria and toxins affected by these amendments to ECCN 1C351 remain unchanged. Specifically, all of these items, except the dengue fever virus, continue to require a license for CB reasons to destinations indicated under CB Column 1 on the Commerce Country Chart and for AT reasons to destinations indicated in AT Column 1 on the Commerce Country Chart. The dengue fever virus is now designated as EAR99 and, as such, no longer requires a license for CB or AT reasons. However, any item that is subject to the EAR, whether or not it is listed on the CCL, may require a license for reasons described elsewhere in the EAR (*e.g.,* the end-user/end-use controls described in part 744 of the EAR or the embargoes and other special controls described in part 746 of the EAR).

ECCN 2B352 (Equipment Capable of Use in Handling Biological Materials)

This final rule also amends ECCN 2B352 on the CCL to reflect changes to the AG ''Control List of Dual-Use Biological Equipment and Related Technology and Software'' based on the understandings reached at the June 2016 AG Plenary Implementation Meeting. Specifically, this rule amends ECCN 2B352.a by expanding the controls on biological containment facilities and related equipment to include the following equipment designed for fixed installation in complete containment facilities at the P3 or P4 containment level: (1) Double-door pass-through decontamination autoclaves; (2) breathing air suit decontamination showers; and (3) mechanical-seal or inflatable-seal walkthrough doors. This change is made in recognition of the fact that such equipment could be acquired, individually, and subsequently assembled into a functional containment facility that would be subject to the controls described in ECCN 2B352.a.

In addition, this rule amends ECCN 2B352.b.1 (fermenters) by removing the word ''pathogenic'' from the description of this equipment. This change is made, because there is no distinction, with respect to either the technical characteristics or the use of this equipment, between pathogenic and non-pathogenic micro-organisms. As revised, ECCN 2B352.b.1 reads: ''Fermenters capable of cultivation of micro-organisms or of live cells for the production of viruses or toxins, without the propagation of aerosols, having a capacity of 20 liters or greater.'' This clarification to ECCN 2B352.b.1 was adopted by the AG, subsequent to the June 2016 AG Plenary Implementation Meeting, pursuant to their silent approval procedure.

All items controlled under ECCN 2B352 require a license for CB reasons to destinations indicated under CB Column 2 on the Commerce Country Chart and for AT reasons to destinations indicated in AT Column 1 on the Commerce Country Chart.

Effect of This Rule on the Scope of the CB Controls in the EAR

The changes made by this rule only marginally affect the scope of the EAR controls on human and animal pathogens/toxins and equipment capable of use in handling biological materials.

The scope of the CCL-based CB controls on human and animal pathogens and toxins was not affected by the nomenclature changes involving the following items in ECCN 1C351: the bacteria listed under ECCN 1C351.c.7 (Chlamydia psittaci) or .c.18 (Salmonella); the toxins listed under ECCN 1C351.d.6 (Conotoxins), .d.7 (Diacetoxyscirpenol), .d.9 (Microcystins), or .d.10 (Modeccin); and the toxins Viscumin and Volkensin (renumbered as ECCN 1C351.d.17 and .d.18, respectively). In addition, the merger of the listings for Shiga toxin and Verotoxin (previously controlled under ECCN 1C351.d.13 and .d.17, respectively) under a single listing (ECCN 1C351.d.13), and the related nomenclature changes involving these toxins, clarified the controls applicable to these toxins, but did not affect the scope of these controls. Furthermore, the removal of the dengue fever virus from ECCN 1C351 is not expected to significantly reduce the number of license applications that will have to be submitted for items controlled under this ECCN. Consequently, none of the changes made by this rule to ECCN 1C351 are expected to have a significant impact on the number of license applications that will have to be submitted for the items controlled under this ECCN.

The updates in this rule to the ECCN 2B352.a controls on biological containment facilities represent an expansion in the number of items that require a license under this ECCN. However, the expanded controls apply to only a relatively small percentage of these types of items that were not controlled under ECCN 2B352 prior to the publication of this rule (*i.e.,* only those double-door pass-through decontamination autoclaves, breathing air suit decontamination showers, and mechanical-seal or inflatable-seal walkthrough doors that are designed for fixed installation in P3 or P4 biological containment facilities). Consequently, any increase in the number of license applications resulting from this change is not expected to be significant, when considered as a percentage of these types of items.

The scope of the CCL-based CB controls on equipment capable of use in handling biological materials was not affected by the clarifications involving fermenters controlled under ECCN 2B352.b or cross (tangential) flow filtration equipment controlled under ECCN 2B352.d. Consequently, none of these changes to ECCN 2B352 are expected to have a significant impact on the number of license applications that will have to be submitted for the items controlled under this ECCN.

Export Administration Act

Although the Export Administration Act expired on August 20, 2001, the President, through Executive Order 13222 of August 17, 2001, 3 CFR, 2001 Comp., p. 783 (2002), as amended by Executive Order 13637 of March 8, 2013, 78 FR 16129 (March 13, 2013), and as extended by the Notice of August 4, 2016 (81 FR 52587 (August 8, 2016)), has continued the Export Administration Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*). BIS continues to carry out the provisions of the Export Administration Act, as appropriate and to the extent permitted by law, pursuant to Executive Order 13222 as amended by Executive Order 13637.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic,

environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated a ''significant regulatory action,'' although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This rule contains a collection of information subject to the requirements of the PRA. This collection has been approved by OMB under Control Number 0694–0088 (Multi-Purpose Application), which carries a burden hour estimate of 58 minutes to prepare and submit form BIS–748. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Jasmeet Seehra, Office of Management and Budget, by email to *Jasmeet_K._Seehra@omb.eop.gov* or by fax to (202) 395–7285; and to the Regulatory Policy Division, Bureau of Industry and Security, Department of Commerce, 14th Street & Pennsylvania Avenue NW., Room 2705, Washington, DC 20230 or by email to *RPD2@bis.doc.gov*.

3. This rule does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military and foreign affairs function of the United States (see 5 U.S.C. 553(a)(1)). Immediate implementation of these amendments is non-discretionary and fulfills the United States' international obligation to the Australia Group (AG). The AG contributes to international security and regional stability through the harmonization of export controls and seeks to ensure that exports do not contribute to the development of chemical and biological weapons. The AG consists of 41 member countries that act on a consensus basis and the amendments set forth in this rule implement changes made to the AG common control lists (as a result of the adoption of the recommendations made at the February 2016 AG Intersessional Implementation Meeting and the understandings reached at the June 2016 AG Plenary Implementation Meeting) and other changes that are necessary to ensure consistency with the controls maintained by the AG. Because the United States is a significant exporter of the items in this rule, immediate implementation of this provision is necessary for the AG to achieve its purpose. Any delay in implementation will create a disruption in the movement of affected items globally because of disharmony between export control measures implemented by AG members, resulting in tension between member countries. Export controls work best when all countries implement the same export controls in a timely manner.

Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this final rule. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule under the Administrative Procedure Act or by any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable. Therefore, this regulation is issued in final form.

List of Subjects in 15 CFR Part 774

Exports, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, part 774 of the Export Administration Regulations (15 CFR parts 730–774) is amended as follows:

PART 774—[AMENDED]

■ 1. The authority citation for 15 CFR part 774 continues to read as follows:

Authority: 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 7420; 10 U.S.C. 7430(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 30 U.S.C. 185(s), 185(u); 42 U.S.C. 2139a; 43 U.S.C. 1354; 15 U.S.C. 1824a; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

Supplement No. 1 to Part 774—[Amended]

■ 2. In Supplement No. 1 to Part 774 (the Commerce Control List), Category 1—Special Materials and Related Equipment, Chemicals, ''Microorganisms'' and ''Toxins,'' ECCN 1C351 is amended in the ''Items'' paragraph under the ''List of Items Controlled'' section:

■ a. By removing paragraph a.11 and redesignating paragraphs a.12 through a.58 as paragraphs a.11 through a.57;

■ b. By revising the Technical Note to newly designated paragraph a.40;

■ c. By revising paragraph b.3;

■ d. By revising paragraphs c.7 and c.18;

■ e. By revising the Note immediately following paragraph c.19;

■ f. By revising paragraphs d.6, d.7, d.9, d.10 and d.13;

■ g. By removing paragraph d.17 and redesignating paragraphs d.18 and d.19 as paragraphs d.17 and d.18, respectively; and

■ h. By revising newly designated paragraphs d.17 and d.18.

The revisions read as follows:

1C351 Human and animal pathogens and ''toxins'', as follows (see List of Items Controlled).

* * * * *

List of Items Controlled

* * * * *

Items:

a. * * *

a.11. Dobrava-Belgrade virus;

a.12. Eastern equine encephalitis virus;

a.13. Ebolavirus (includes all members of the Ebolavirus genus);

a.14. Foot-and-mouth disease virus;

a.15. Goatpox virus;

a.16. Guanarito virus;

a.17. Hantaan virus;

a.18. Hendra virus (Equine morbillivirus);

a.19. Japanese encephalitis virus;

a.20. Junin virus;

a.21. Kyasanur Forest disease virus;

a.22. Laguna Negra virus;

a.23. Lassa virus;

a.24. Louping ill virus;

a.25. Lujo virus;

a.26. Lumpy skin disease virus;

a.27. Lymphocytic choriomeningitis virus;

a.28. Machupo virus;

a.29. Marburgvirus (includes all members of the Marburgvirus genus);

a.30. Monkeypox virus;

a.31. Murray Valley encephalitis virus;

a.32. Newcastle disease virus;

a.33. Nipah virus;

a.34. Omsk hemorrhagic fever virus;

a.35. Oropouche virus;

a.36. Peste-des-petits ruminants virus;

a.37. Porcine Teschovirus;

a.38. Powassan virus;

a.39. Rabies virus and all other members of the Lyssavirus genus;

a.40. Reconstructed 1918 influenza virus;

Technical Note: 1C351.a.40 includes reconstructed replication competent forms of the 1918 pandemic influenza virus containing any portion of the coding regions of all eight gene segments.

a.41. Rift Valley fever virus;

a.42. Rinderpest virus;

a.43. Rocio virus;

a.44. Sabia virus;
a.45. Seoul virus;
a.46. Severe acute respiratory syndrome-related coronavirus (SARS-related coronavirus);
a.47. Sheeppox virus;
a.48. Sin Nombre virus;
a.49. St. Louis encephalitis virus;
a.50. Suid herpesvirus 1 (Pseudorabies virus; Aujeszky's disease);
a.51. Swine vesicular disease virus;
a.52. Tick-borne encephalitis virus (Far Eastern subtype, formerly known as Russian Spring-Summer encephalitis virus—see 1C351.b.3 for Siberian subtype);
a.53. Variola virus;
a.54. Venezuelan equine encephalitis virus;
a.55. Vesicular stomatitis virus;
a.56. Western equine encephalitis virus; *or*
a.57. Yellow fever virus.
b. * * *
b.3. Tick-borne encephalitis virus (Siberian subtype, formerly West Siberian virus—see 1C351.a.52 for Far Eastern subtype).
c. * * *
c.7. Chlamydia psittaci (Chlamydophila psittaci);
* * * * *
c.18. Salmonella enterica subspecies enterica serovar Typhi (Salmonella typhi);
c.19. * * *
Note: Shiga toxin producing Escherichia coli (STEC) includes, inter alia, enterohaemorrhagic E. coli (EHEC), verotoxin producing E. coli (VTEC) or verocytotoxin producing E. coli (VTEC).
* * * * *
d. * * *
d.6. Conotoxins;
d.7. Diacetoxyscirpenol;
d.8. * * *
d.9. Microcystins (Cyanginosins);
d.10. Modeccin;
* * * * *
d.13. Shiga toxins (shiga-like toxins, verotoxins, and verocytotoxins);
* * * * *
d.17. Viscumin (Viscum album lectin 1); *or*
d.18. Volkensin.
* * * * *

■ 3. In Supplement No. 1 to Part 774 (the Commerce Control List), Category 2—Materials Processing, ECCN 2B352 is amended in the ''Items'' paragraph, under the List of Items Controlled section, by revising paragraph a, by revising paragraph b.1, by revising the introductory text of paragraph d.1, and by revising the nota bene to paragraph d.1, to read as follows:

2B352 Equipment capable of use in handling biological materials, as follows (see List of Items Controlled).

* * * * *

List of Items Controlled

Related Controls: * * *
Related Definition: * * *
Items:

a. Containment facilities and related equipment, as follows:

a.1. Complete containment facilities at P3 or P4 containment level.

Technical Note: P3 or P4 (BL3, BL4, L3, L4) containment levels are as specified in the WHO Laboratory Biosafety Manual (3rd edition, Geneva, 2004).

a.2. Equipment designed for fixed installation in containment facilities specified in paragraph a.1 of this ECCN, as follows:
a.2.a. Double-door pass-through decontamination autoclaves;
a.2.b. Breathing air suit decontamination showers;
a.2.c. Mechanical-seal or inflatable-seal walkthrough doors.
b. * * *
b.1. Fermenters capable of cultivation of micro-organisms or of live cells for the production of viruses or toxins, without the propagation of aerosols, having a capacity of 20 liters or greater.
* * * * *
d. * * *
d.1. Cross (tangential) flow filtration equipment capable of separation of microorganisms, viruses, toxins or cell cultures having all of the following characteristics:
* * * * *
N.B.: 2B352.d.1 does not control reverse osmosis and hemodialysis equipment, as specified by the manufacturer.
* * * * *

Dated: December 7, 2016.

Kevin J. Wolf,

Assistant Secretary for Export Administration.

[Docket No. SSA–2014–0052]

RIN 0960–AH71

Ensuring Program Uniformity at the Hearing and Appeals Council Levels of the Administrative Review Process

AGENCY: Social Security Administration.

ACTION: Final rule.

SUMMARY: We are revising our rules so that more of our procedures at the hearing and Appeals Council levels of our administrative review process are consistent nationwide. We anticipate that these nationally consistent procedures will enable us to administer our disability programs more efficiently and better serve the public.

DATES: This final rule will be effective on January 17, 2017. However, compliance is not required until May 1, 2017.

FOR FURTHER INFORMATION CONTACT: Patrick McGuire, Office of Appellate Operations, Social Security Administration, 5107 Leesburg Pike, Falls Church, VA 22041, (703) 605–7100. For information on eligibility or filing for benefits, call our national toll-free number, 1–800–772–1213 or TTY 1–800–325–0778, or visit our Internet site, Social Security Online, at *http://www.socialsecurity.gov.*

SUPPLEMENTARY INFORMATION

Background

We are revising and making final the rules for creating nationally uniform hearing and Appeals Council procedures, which we proposed in a notice of proposed rulemaking (NPRM) published in the **Federal Register** on July 12, 2016 (81 FR 45079). In the preamble to the NPRM, we discussed the changes we proposed from our current rules and our reasons for proposing those changes. In the NPRM, we proposed revisions to: (1) The time frame for notifying claimants of a hearing date; (2) the information in our hearing notices; (3) the period when we require claimants to inform us about or submit written evidence, written statements, objections to the issues, and subpoena requests; (4) what constitutes the official record; and (5) the manner in which the Appeals Council would consider additional evidence.

As we explained in the preamble to our NPRM, we proposed these changes to ensure national consistency in our policy and procedures and improve accuracy and efficiency in our administrative review process. We expect this final rule will positively affect our ability to manage our workloads and lead to better public service. Interested readers may refer to the preamble to the NPRM, available at *http://www.regulations.gov* under docket number SSA–2014–0052.

What changes are we making from the NPRM?

We are making several changes in this final rule from the NPRM based on some of the public comments we received. We briefly outline those changes here and provide additional detail on the changes in the comment and response section that follows. We are also making minor editorial changes throughout this final rule. For the reader's ease of review, we refer to the general requirement that all evidence, objections, or written statements be submitted at least 5 business days before the date of the hearing as the ''5-day requirement.'' We adopted the following changes from our NPRM in this final rule:

- We lengthened the time frame for notifying claimants of a hearing date in

20 CFR 404.938 and 416.1438 from at least 60 days to at least 75 days;

- In 20 CFR 404.935(b)(3)(iv) and 416.1435(b)(3)(iv), we removed the phrase ''through no fault of your own'' to reduce the evidentiary burden on claimants who are unable to provide evidence;
- We clarified that the circumstances set forth in 20 CFR 404.935(b)(3)(i) to (b)(3)(iv) and 416.1435(b)(3)(i) to (b)(3)(iv) are merely examples and do not constitute an exhaustive list;
- We added the same exceptions to the 5-day requirement that we proposed for the submission of evidence in 20 CFR 404.935 and 416.1435 to the deadlines related to objecting to the issues (20 CFR 404.939 and 416.1439), presenting written statements (20 CFR 404.949 and 416.1449), and submitting subpoenas (20 CFR 404.950(d)(2) and 416.1450(d)(2));
- We added language to 20 CFR 404.949 and 416.1449 to clarify that the 5-day requirement applies only to pre-hearing written statements, not to post-hearing written statements;
- We added an example of an exception for submitting additional evidence to the Appeals Council in 20 CFR 404.970(b)(3)(v) and 416.1470(b)(3)(v);
- We reorganized paragraphs (a)(5) and (b) of 20 CFR 404.970 and 416.1470;
- We removed proposed subsection 20 CFR 404.970(d) and 416.1470(d);
- We added clarifying cross-references to 20 CFR 404.900 and 416.1400 and 20 CFR 404.929 and 416.1429 to place the 5-day requirement in 20 CFR 404.935 and 416.1435 in context; and,
- We broadened the existing cross-reference in 20 CFR 404.968 and 416.1468 and 20 CFR 404.979 and 416.1479 to reference the entire section of 20 CFR 404.970 and 416.1470, and we removed the cross reference to 20 CFR 404.976 and 416.1476 in 20 CFR 404.979 and 416.1479.

Public Comments

We initially provided a 30-day comment period that would have ended on August 11, 2016. We subsequently extended the comment period for an additional 15 days, until August 26, 2016 (81 FR 51412). We received 154 comments on our proposed rule from the public, interested advocacy groups, and several members of Congress. We did not consider six comments because they either came from employees who commented in their official employment capacity, which is a violation of our policy, or they were outside the scope of this rulemaking. We published and carefully considered the remaining 148 comments and, where appropriate, made changes in response to these comments.

Below, we summarize and respond to the comments submitted on the proposed rule, and respond to the significant issues relevant to this rulemaking. We do not respond to comments that are outside the scope of this rulemaking proceeding.

Hearing Notice Requirement

Comment: Several commenters supported our proposal to provide more advance notice of a hearing, but asked that we adopt the 75-day advance notice requirement currently in place in the Boston region, rather than the 60-day advance notice we proposed in the NPRM. Several of the commenters stated that earlier notice would allow claimants to: (1) Obtain and submit the information and evidence, especially when a medical provider is uncooperative; (2) make arrangements for transportation to the hearing; (3) take into account time frames under the regulations implementing the Health Insurance Portability and Accountability Act (HIPAA) that provide an entity up to 60 days before it must produce records (45 CFR 164.524(b)); and (4) avoid a postponement of hearing due to non-receipt of medical records. Several other commenters said that even a 75-day notice requirement is insufficient, and that we should provide notice 90 to 120 days in advance of a hearing.

Response: We recognize that claimants and representatives may sometimes face challenges in acquiring medical records. In response to multiple advocate comments indicating a preference for 75 days' advance notice of a hearing instead of 60 days, we are revising the final rule to provide 75 days' advance notice. Since we already have approximately a decade of experience in using the 75-day advance notice period in the Boston Region, we believe its expansion nationwide is justified.

We proposed a 60-day period in our NPRM because we believed it would promote the efficiency of our hearing process (81 FR at 45081). However, we recognize the concerns that that commenters raised, including stated concerns about the adequacy of a 60-day advance notice requirement in light of the timeframe an entity has to provide evidence to an individual under the HIPAA regulations. In order to minimize the burden on claimants, we have decided to adopt the commenters' suggestion that we continue to provide at least 75-day advance notice of a hearing, as we have done under the rules we have been applying in the Boston region since 2006.

Some commenters requested that we extend the advance notice period to 90 or 120 days instead of the proposed 60-days advance notice. We have decided not to extend the advance notice period to 90 or 120 days, because providing a hearing date this far in advance would increase the likelihood that an adjudicator's schedule will change by the scheduled hearing date. Moreover, in contrast to the 75-day period, we have no current model to support the use of a longer time period.

Exceptions to the 5-Day Requirement

Comment: Several commenters asked that we retain the exception in 20 CFR 404.935(b)(3)(iv) in the final rule because it recognized the difficulties of obtaining medical evidence, while another commenter suggested we eliminate this exception because it was vague and contrary to the intent and purpose of the proposed rule. Several commenters expressed concerns about our exceptions to the 5-day requirement because they were too narrowly defined, too subjective, and would increase our workloads. Other commenters suggested that we add additional exceptions, such as when the claimant is homeless or lacks representation. One commenter requested that the Appeals Council also find good cause for submitting evidence after the 5-day requirement if the claimant was unrepresented or homeless at the hearing level.

Response: We provide examples of exceptions to the 5-day requirement in final 20 CFR 404.935(b)(3) and 416.1435(b)(3) and have clarified that we did not intend for them to be all-inclusive or to exclude other extenuating circumstances that may result in a claimant being unable to meet the 5-day requirement. To clarify this point, we changed the regulatory text to state that ''[e]xamples include, but are not limited to'' the outlined exceptions. Because circumstances vary, we determine whether a claimant qualifies for an exception on a case-by-case basis.

We do not anticipate that evaluating requests for exceptions to the 5-day requirement will increase our workloads. We recognize that compliance with the 5-day requirement will not be possible in all situations; however, based on our experience in the Boston region, we expect that providing at least 75 days' advance notice of a hearing will significantly increase the number of times evidence is obtained and submitted at least 5 business days before the hearing. We also note that in our experience the need to evaluate

requests to submit evidence pursuant to one of the exceptions has not caused workload spikes in our Boston region, where a 5-day requirement has been in place for more than a decade. When a claimant or appointed representative is aware that he or she will need more time to submit evidence in accordance with one of the exceptions, we expect that he or she will provide us with the necessary information in advance. To do so, the claimant or representative should notify the administrative law judge (ALJ) of what the evidence generally consists of and the expected volume of evidence (*e.g.,* one visit to a treating physician or a one-week hospital stay). When the claimant or his or her representative timely provides this information to the ALJ, we expect that evaluating the request for an exception will likely be very simple.

The fact that a claimant is homeless or lacks representation does not automatically excuse him or her from complying with our rules. However, situations such as these may result in circumstances that warrant an exception to the 5-day requirement. We will evaluate these circumstances carefully on a case-by-case basis under the exceptions described in the final rule.

Comment: Commenters who represented advocacy groups noted that our proposed rule did not include exceptions to deadline requirements for objecting to the issues (20 CFR 404.939 and 416.1439), presenting written statements (20 CFR 404.949 and 416.1449), and submitting subpoenas (20 CFR 404.950(d)(2) and 416.950(d)(2)). Some commenters had concerns that the 5-day requirement, as applied to objections to the issues, could force representatives to develop boilerplate notices that list all possible objections in every case.

Response: We agree with the commenters' concerns, and we have added exceptions for the deadlines related to objecting to the issues (20 CFR 404.939 and 416.1439), presenting written statements (20 CFR 404.949 and 416.1449), and submitting subpoenas (20 CFR 404.950(d)(2) and 416.1450(d)(2)). The exceptions in 20 CFR 404.939 and 416.1439 should eliminate the need for representatives to develop boilerplate notices.

Appeals Council Authority

Comment: While one commenter supported the proposal in subsections 20 CFR 404.970(d) and 416.1470(d) that the Appeals Council conduct hearings to develop evidence, other commenters expressed concern about the proposal. A few of these commenters stated it was an expansion of the Appeals Council's authority and was inconsistent with the Administrative Procedure Act. Other commenters stated that we did not provide an adequate explanation of the authority for such hearings.

Response: Since the beginning of our hearing process in 1940, our regulations (currently found in sections 20 CFR 404.956 and 416.1456) have authorized the Appeals Council to remove a hearing request from an ALJ and conduct the hearing proceedings, using the rules that ALJs apply. We proposed to revise sections 20 CFR 404.970 and 416.1470 to clarify the Appeals Council's authority in this area. Although we disagree with some of the comments, including concerns that the proposal lacked legal support, we understand the concerns the commenters raised regarding this proposal. As a result, we have decided to remove the rule we proposed in subsections 404.970(d) and 416.1470(d). The Appeals Council will continue to exercise its authority to develop evidence in accordance with 20 CFR 404.976(b) and 416.1446(b).

''Inform'' Option

Comment: Several commenters stated the proposed rule may have unintended consequences because appointed representatives may rely on the ''inform'' option in 20 CFR 404.935 and 416.1435 and in 20 CFR 404.1512 and 416.912 to avoid developing evidence. A few commenters stated if we retain the ''inform'' option, we should require the claimant to inform the hearing office earlier so there would be time to develop the evidence and avoid unnecessary supplemental hearings.

Response: On April 20, 2015, we implemented a final rule that requires a claimant to ''inform us about or submit all evidence known to you that relates to whether you are blind or disabled.'' 81 FR 14828. As we stated in the preamble to that proposed rule, we specifically added this option because we did not intend to shift our burden to develop the record to claimants. In the proposed rule, as in this final rule, we recognize that some individuals, many of whom do not have appointed representatives, require our assistance in obtaining medical evidence needed to adjudicate their claims. Claimants who are unable to obtain evidence necessary to adjudicate their claims may inform us of this difficulty and we will continue to seek out evidence on their behalf to develop the record for their hearing. By adopting this final rule, we have not changed our longstanding policy of assisting claimants in developing the record. At the hearing level, this policy has been explicitly set forth in our sub-regulatory instructions.

Because most claimants are represented at the hearing level, and because we are providing more advance notice of a hearing than we have in the past, we expect to significantly reduce the number of postponed hearings or supplemental hearings needed based on evidence that was available at least 5 business days before the hearing.

In our experience, the vast majority of representatives act ethically in regard to evidence development and make good faith efforts to assist claimants in obtaining and submitting the required evidence before a hearing, as required under 20 CFR 404.1740(b)(2) and 416.1540(b)(2). Therefore, we do not expect the ''inform'' option to significantly affect our administrative processes.

In those circumstances in which hearing offices assist unrepresented claimants in developing evidence, our sub-regulatory instructions will clarify that employees in our hearing offices should undertake development as early as possible to reduce the number of continuances or postponed hearings.

5-Day Requirement

Comment: Some commenters thought the 5-day requirement in the proposed rules was inconsistent with our duty to make eligibility decisions based on the evidence presented at the hearing.

Response: In developing these rules, we were guided by the two principles that we have always applied when we make decisions regarding our programs: As the Supreme Court has observed, the Social Security system ''must be fair—and it must work.'' [1] These final rules appropriately balance these two guiding principles. These rules are fair because they provide the claimant with more advance notice of his or her hearing, and they provide appropriate exceptions to the 5-day requirement. At the same time, the 5-day requirement promotes the efficiency of our hearings process and allows it to work more effectively by ensuring that ALJs have a more complete evidentiary record when they hold hearings. Striking such a balance in our rules is of paramount importance to us. That balance would not be present if, as some commenters suggested, we merely gave claimants more advance notice of a hearing, without the 5-day requirement. Conversely, that balance would not be present if we simply imposed a 5-day requirement, without giving a claimant more advance notice of a hearing. Given the size of our

[1] *Richardson* v. *Perales,* 402 U.S. 389, 399 (1971).

hearings workloads,[2] where the need for efficiency is ''self-evident,'' [3] these final rules appropriately balance the twin concerns of fairness and efficiency that always guide us.

In publishing this final rule, we do not intend to change the purpose of a hearing, where an ALJ looks fully into the issues and obtains oral testimony from the claimant and witnesses, if any. Additionally, our final rule contemplates that some circumstances may warrant the introduction of new evidence at or after the hearing, and includes appropriate exceptions to accommodate these circumstances. Thus, under our final rule, adjudicators will continue to make decisions based on the evidence of record, including the evidence adduced at the hearing. However, we expect that our final rule will help to ensure that evidentiary records are more complete at the time of the administrative hearing, which should reduce the need for post-hearing proceedings and help us provide better, more timely service to all claimants.

Comment: Some commenters stated that the philosophical underpinnings of the rule in 20 CFR 404.1512 is that ALJs must have all evidence that is available at the time of the hearing so they can reach the correct decision. The commenters thought that the proposed rule conflicted with our rule requiring claimants to submit all evidence. The commenters noted that it would not make sense to place a duty on the claimant to submit evidence when at the same time, rules are created that would allow an ALJ not to consider that evidence.

Response: Our approach with this rule is tied to the ''philosophical underpinnings'' of 20 CFR 404.1512 and 416.912, which describe a claimant's ongoing duty to ''inform us about or submit all evidence known to you that relates to whether or not you are blind or disabled.'' This rule will ensure claimants have the benefit of a fully developed record at the time our ALJs conduct their hearings. We recognize that there will be circumstances in which claimants cannot produce evidence at least 5 business days before the hearing. As stated above, we have included appropriate exceptions to the 5-day requirement to ensure fairness when a claimant or his or her representative actively and diligently seeks evidence but is unable to obtain it. To bolster this point, in 20 CFR 404.935(b)(3)(iv) and 416.1435(b)(3)(iv), we removed the phrase ''through no fault of your own'' to ensure that our adjudicators interpret this exception consistent with our intent. We intend the words ''actively'' and ''diligently'' to be interpreted using their ordinary English usage. When a claimant or representative shows that he or she made a good faith effort to timely request, obtain, and submit evidence, but he or she did not receive the evidence in time to submit it at least 5 business days before the hearing because of circumstances outside his or her control, we expect that our adjudicators would find that this standard is met.

Some commenters perceived this rule as an exclusionary procedure designed to prevent the introduction of medical records at the expense of the claimant's case. Our experience is more consistent with one of the commenters from the Boston region who noted that most ALJs ''effectively draw the line between evidence which had been available but was not submitted, and previously unavailable evidence'' and ''do not use the 5-day rule as a punitive device against claimants or their representatives.'' Further, in those situations in which an ALJ in the Boston region did not correctly find reason to accept evidence outside the 5-day time frame, the Appeals Council granted review in order to consider the information on appeal where the evidence raised a reasonable probability of changing the outcome of the case. This important practice will continue in our final rule.

Comment: Some commenters pointed out that the 5-day requirement would preclude a claimant from submitting evidence at the hearing or Appeals Council level of the administrative process, particularly if a claimant is illiterate or does not speak English, or is without an appointed representative or obtained a representative shortly before the hearing date, and this exclusion was an undue burden, fundamentally unfair, and disadvantaged claimants in favor of adjudicators.

Response: We expect that this final rule will enhance our decision-making process and allow us to provide more timely decisions to claimants. We do not intend to unduly burden claimants with this rule. By asking claimants to inform us about or submit evidence at least 5 business days before the hearing date, we expect that evidentiary records will be more complete and comprehensive at the time of the scheduled hearing. In turn, this should facilitate the ALJ's ability to look fully into the issues at the hearing and produce a timely, accurate decision. As stated above, we will continue our longstanding practice of assisting those individuals who, for various reasons, are unable to develop the record themselves. This rule also incorporates appropriate exceptions to take into account for the needs of individuals who, due to unique circumstances, do not fully understand or are not capable of adhering to our requirements or requests.

Comment: Some commenters said that the proposed rule makes the administrative review process more formal and adversarial. Commenters also asked the agency to clarify that if a claimant informs an ALJ about evidence at least 5 business days before the hearing, the ALJ must consider the evidence regardless of whether an exception exists. Commenters said that the proposed rule overlooked that an ALJ adjudicates a case through the date of his or her decision, and that he or she needs evidence of ongoing treatment to adjudicate the case. Commenters also said the proposed rule did not provide the claimant with an opportunity to submit evidence to rebut other evidence produced at or after the hearing or permit an ALJ to hold the record open when a new issue arises during the hearing.

Response: From our experience, similar rules that applied in the Boston region for approximately a decade have not resulted in a more adversarial process or misunderstandings from the public. Moreover, many of our other rules that apply nationwide impose deadlines or other requirements on the public, such as the deadline to appeal a determination or decision. While processing a case, we frequently request that individuals submit a response or provide us with information within certain timeframes. We have not found that these provisions make our process more adversarial. Rather, like this final rule, they are necessary for efficient administration of our programs.

If a claimant informs an ALJ about evidence 5 or more days before the hearing, there would be no need for the ALJ to find that an exception applies, because the claimant notified us prior to the deadline.

While it is true that, in many cases, an ALJ adjudicates the case through the date of the hearing decision, our rule is not intended to prevent a claimant from submitting evidence related to ongoing treatment. Rather, we expect that

[2] *See Annual Statistical Supplement to the Social Security Bulletin, 2015,* Table 2.F9, at page 2.81 (April 2016) (setting out the number of hearing level receipts, dispositions, and end-of-year pending cases for fiscal years 012–2014).

[3] *See Barnhart* v. *Thomas,* 540 U.S. 20, 28–29 (2003) (''As we have observed, '[t]he Social Security hearing system is 'probably the largest adjudicative agency in the western world.' . . . The need for efficiency is self-evident.' '') (quoting *Heckler* v. *Campbell,* 461 U.S. 458, 461 n.2 (1983)).

evidence of ongoing treatment, which was unavailable at least 5 business days before the hearing, would qualify under the exception in 20 CFR 404.935(b)(3) and 416.1435(b)(3).

Similarly, if an ALJ introduces new evidence at or after a hearing, the claimant could use the exception in 20 CFR 404.935(b)(3) and 416.1435(b)(3) to submit rebuttal evidence. The claimant could also rebut evidence introduced at or after the hearing by submitting a written statement to the ALJ. As previously mentioned, we added language to 20 CFR 404.949 and 416.1449 to clarify that the 5-day requirement applies only to pre-hearing written statements, not to post-hearing written statements.

Comment: Some commenters stated that the 5-day requirement could affect a representative's ability to prepare useful and persuasive pre-hearing statements, given that the Office of Disability Adjudication and Review (ODAR) frequently exhibits files very close to the hearing date.

Response: For the same reasons we are adopting a 5-day requirement for available evidence, we are adopting this requirement for pre-hearing written statements to ensure that an ALJ has the benefit of reviewing arguments before the hearing. This will allow the ALJ to be fully aware of any unresolved issue(s) that a claimant is raising and which the ALJ may need to address at the hearing. While we are sympathetic to the commenters who noted exhibit numbers were unlikely to be available at least 5 business days before the hearing, we note that this issue existed under our prior rules as well and therefore, this convenience does not outweigh our need for a complete case file before the hearing.

Comment: Some commenters stated that the 5-day requirement could disadvantage claimants who hire representatives shortly before the hearing date.

Response: We reiterate that we expect all appointed representatives to make good faith efforts to assist claimants in obtaining and submitting the required evidence before a hearing, as required under 20 CFR 404.1740(b)(2) and 416.1540(b)(2). However, we have included appropriate exceptions to the 5-day requirement to ensure fairness when a claimant or his or her representative actively and diligently seeks evidence but is unable to obtain it. The appointment of a representative shortly before a hearing may be such an exception, depending on the circumstances surrounding the late appointment. In addition, we note that if a claimant informs an ALJ about evidence 5 or more days before the hearing, there would be no need for the ALJ to find that an exception applies, because the claimant notified us prior to the deadline.

Representation

Comment: A few commenters argued that when taking a new case, representatives often find that prior counsel was incompetent in obtaining evidence, and this rule, as applied at both the hearing and Appeals Council levels, unjustly harms claimants represented by such individuals.

Response: We reiterate that we expect all appointed representatives to make good faith efforts to assist claimants in obtaining and submitting the required evidence before a hearing, as required under 20 CFR 404.1740(b)(2) and 416.1540(b)(2). Additionally, if a new representative can show that a prior representative did not adequately uphold his or her duty to the claimant, we expect that our adjudicators would find that this would warrant an exception to the 5-day requirement.

Other

Comment: Several commenters stated the new standard at the Appeals Council level would force claimants to choose between filing a new claim and appealing an ALJ's decision to the Appeals Council, which could result in the loss of significant benefits. Another commenter stated it would result in filing more new applications overall or the reopening of prior applications so that a claimant could submit previously excluded evidence.

Response: It bears reiterating that we expect the final rule will help to ensure that evidentiary records are more complete at the time of the scheduled hearing. However, our final rule contemplates that some circumstances may warrant the introduction of new evidence at or after the hearing, and includes an ''inform'' option and broad exceptions to accommodate these circumstances. With the ''inform'' option and the broad exceptions to the 5-day requirement, we do not expect to see a spike in new applications or reopenings.

Moreover, it is already our policy that if a claimant wants to file a new disability application under the same title and for the same benefit type as a disability claim pending at the Appeals Council level, and the claimant does not have evidence of a new critical or disabling condition, the claimant must choose to continue the appeal of the prior claim or file a new application. Nothing in the proposed or final rule substantively changes this policy.

Under our current rules in 20 CFR 404.970 and 416.1470, the Appeals Council considers additional evidence only if it is new, material, and related to the period on or before the date of the ALJ's decision. This does not mean, however, that the Appeals Council grants a claimant's request for review of an ALJ's decision whenever additional evidence meets this criteria. In many cases, the Appeals Council adds evidence that meets the criteria to the record, but denies the request for review of the case. Under our current rules, the Appeals Council will review a case in this situation only if it finds that the ALJ's action, findings, or conclusion is contrary to the weight of the evidence currently of record. This final rule provides more clarity to this procedure. Under this final rule, the Appeals Council will grant review of a case based on the receipt of additional evidence if the evidence is new, material, and related to the period on or before the date of the hearing decision and if there is a reasonable probability that the additional evidence would change the outcome of the decision.

If a claimant submits evidence that the Appeals Council does not consider, the Appeals Council will notify the claimant that if he or she files a new application for disability insurance benefits within 6 months or a new application for Supplemental Security Income within 60 days of the Appeals Council notice, the date of the request for review will constitute a protective filing for a new application.

Comment: One commenter expressed concerns about the proposed language in 20 CFR 404.951(b) and 416.1451(b) because adding the phrase ''appropriate reference'' was insufficient to describe what evidence an ALJ must include in the record.

Response: During the time that substantially the same rule was in place in the Boston region, we did not experience any confusion as to the meaning of the phrase ''appropriate reference.'' Further, this language is consistent with our longstanding sub-regulatory policies and practices nationwide, and adoption of this language does not change our policies regarding what constitutes the official record.

Comment: Many commenters submitted a broad statement that there have been ''serious problems'' and inconsistencies with implementation of the 5-day requirement in the Boston region. The commenters generally presented two main points: (1) There was variance in applying the 5-day requirement between ALJs; and (2) ALJs who did apply the rule varied in when

the 5-day requirement ended and in evaluating whether an exception to the 5-day requirement applied.

Response: We acknowledge that in a report issued by the Administrative Conference of the United States (ACUS) [4] on December 13, 2013, ACUS noted several variances in applying similar rules in the Boston region. However, in response to the ACUS report, we provided additional training to adjudicators and staff regarding application of our Part 405 rules. We also incorporated instructions for processing cases originating in the Boston region into our training materials for all staff, including addressing Part 405 issues in several of our quarterly Videos-On-Demand series that focus on new or problematic areas of adjudication. We updated our sub-regulatory guidance to include references and instructions on how to process cases under Part 405. We will provide the training and instruction necessary to ensure consistent application of our rules nationwide.

Comment: One commenter asked that if we retain the 5-day requirement, we amend the language to require that each party make every reasonable effort to ensure the ALJ receives all the evidence. The commenter noted that proposed 20 CFR 404.935(a) and 416.1435(a) require ''every effort,'' which the commenter believed is an impossible standard to meet.

Response: While our final rule requires a claimant to ''make every effort to ensure that the administrative law judge receives all of the evidence,'' we do not believe the rule creates an ''impossible standard'' because it also includes appropriate exceptions to accommodate circumstances when, despite good faith efforts, the claimant cannot satisfy the 5-day requirement.

Comment: Some commenters stated that 20 CFR 404.944(a)(1) and 416.1444(a)(1) conflict with 20 CFR 404.1512 and 416.912 because one regulation requires an ALJ to ''accept[] as evidence any documents that are material to the issues'' while the other regulation requires a claimant to submit evidence that ''relates to whether or not you are blind or disabled.''

Response: A claimant continues to have a duty to submit all evidence that relates to whether or not he or she is blind or disabled, subject to our other requirements, at the hearing and Appeals Council levels of the administrative process. Whereas 20 CFR 404.1512 and 416.912 explain a claimant's responsibility, 20 CFR 404.944(a)(1) and 416.1444(a)(1) address actions an administrative law judge will take. We expect claimants to submit evidence that relates to whether they are blind or disabled, but our administrative law judges are responsible for making the legal judgment determination whether evidence is ''material to the issues.''

Regulatory Procedures

Executive Order 12866, as Supplemented by Executive Order 13563

We consulted with the Office of Management and Budget (OMB) and determined that this final rule meets the criteria for a significant regulatory action under Executive Order 12866, as supplemented by Executive Order 13563. Therefore, OMB reviewed it.

Regulatory Flexibility Act

We certify that this final rule would not have a significant economic impact on a substantial number of small entities because it affects individuals only. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act, as amended.

Paperwork Reduction Act

These final rules contain reporting requirements in regulation sections §§ 404.968, 404.976, 416.1468, and 416.1476 that require OMB clearance under the Paperwork Reduction Act of 1995 (PRA). SSA will submit separate information collection requests to OMB in the future for these regulations sections. We will not collect the information referenced in these burden sections until we receive OMB approval.

20 CFR Part 404

Administrative practice and procedure; Blind; Disability benefits; Old-Age, Survivors, and Disability Insurance; Reporting and recordkeeping requirements; Social Security.

20 CFR Part 405

Administrative practice and procedure; Blind; Disability benefits; Old-Age, Survivors, and Disability Insurance; Public assistance programs; Reporting and recordkeeping requirements; Social Security; Supplemental Security Income (SSI).

20 CFR Part 416

Administrative practice and procedure; Aged, Blind, Disability benefits, Public assistance programs; Reporting and recordkeeping requirements; Supplemental Security Income (SSI).

Carolyn W. Colvin,

Acting Commissioner of Social Security.

For the reasons set out in the preamble, we amend 20 CFR chapter III, parts 404, 405, and 416 as set forth below:

PART 404—FEDERAL OLD–AGE, SURVIVORS AND DISABILITY INSURANCE (1950–)

Subpart J—[Amended]

■ 1. The authority citation for subpart J of part 404 continues to read as follows:

Authority: Secs. 201(j), 204(f), 205(a)–(b), (d)–(h), and (j), 221, 223(i), 225, and 702(a)(5) of the Social Security Act (42 U.S.C. 401(j), 404(f), 405(a)–(b), (d)–(h), and (j), 421, 423(i), 425, and 902(a)(5)); sec. 5, Pub. L. 97–455, 96 Stat. 2500 (42 U.S.C. 405 note); secs. 5, 6(c)–(e), and 15, Pub. L. 98–460, 98 Stat. 1802 (42 U.S.C. 421 note); sec. 202, Pub. L. 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 2. In § 404.900, revise the second sentence of paragraph (b) to read as follows:

§ 404.900 Introduction.

* * * * *

(b) * * * Subject to certain timeframes at the hearing level (see § 404.935) and the limitations on Appeals Council consideration of additional evidence (see § 404.970), we will consider at each step of the review process any information you present as well as all the information in our records.* * *

■ 3. Revise the fifth and eighth sentences in § 404.929 to read as follows:

§ 404.929 Hearing before an administrative law judge-general.

* * * You may submit new evidence (subject to the provisions of § 404.935), examine the evidence used in making the determination or decision under review, and present and question witnesses. * * * If you waive your right to appear at the hearing, in person, by video teleconferencing, or by telephone, the administrative law judge will make a decision based on the preponderance of the evidence that is in the file and, subject to the provisions of § 404.935,

any new evidence that may have been submitted for consideration.* * *

■ 4. Revise § 404.935 to read as follows:

§ 404.935 Submitting written evidence to an administrative law judge.

(a) When you submit your request for hearing, you should also submit information or evidence as required by § 404.1512 or any summary of the evidence to the administrative law judge. Each party must make every effort to ensure that the administrative law judge receives all of the evidence and must inform us about or submit any written evidence, as required in § 404.1512, no later than 5 business days before the date of the scheduled hearing. If you do not comply with this requirement, the administrative law judge may decline to consider or obtain the evidence, unless the circumstances described in paragraph (b) of this section apply.

(b) If you have evidence required under § 404.1512 but you have missed the deadline described in paragraph (a) of this section, the administrative law judge will accept the evidence if he or she has not yet issued a decision and you did not inform us about or submit the evidence before the deadline because:

(1) Our action misled you;

(2) You had a physical, mental, educational, or linguistic limitation(s) that prevented you from informing us about or submitting the evidence earlier; or

(3) Some other unusual, unexpected, or unavoidable circumstance beyond your control prevented you from informing us about or submitting the evidence earlier. Examples include, but are not limited to:

(i) You were seriously ill, and your illness prevented you from contacting us in person, in writing, or through a friend, relative, or other person;

(ii) There was a death or serious illness in your immediate family;

(iii) Important records were destroyed or damaged by fire or other accidental cause; or

(iv) You actively and diligently sought evidence from a source and the evidence was not received or was received less than 5 business days prior to the hearing.

■ 5. In § 404.938, revise paragraphs (a) and (b) to read as follows:

§ 404.938 Notice of a hearing before an administrative law judge.

(a) *Issuing the notice.* After we set the time and place of the hearing, we will mail notice of the hearing to you at your last known address, or give the notice to you by personal service, unless you have indicated in writing that you do not wish to receive this notice. We will mail or serve the notice at least 75 days before the date of the hearing.

(b) *Notice information.* The notice of hearing will tell you:

(1) The specific issues to be decided in your case;

(2) That you may designate a person to represent you during the proceedings;

(3) How to request that we change the time or place of your hearing;

(4) That your hearing may be dismissed if neither you nor the person you designate to act as your representative appears at your scheduled hearing without good reason under § 404.957;

(5) Whether your appearance or that of any other party or witness is scheduled to be made in person, by video teleconferencing, or by telephone. If we have scheduled you to appear at the hearing by video teleconferencing, the notice of hearing will tell you that the scheduled place for the hearing is a video teleconferencing site and explain what it means to appear at your hearing by video teleconferencing;

(6) That you must make every effort to inform us about or submit all written evidence that is not already in the record no later than 5 business days before the date of the scheduled hearing, unless you show that your circumstances meet the conditions described in § 404.935(b); and

(7) Any other information about the scheduling and conduct of your hearing.

* * * * *

■ 6. Revise § 404.939 to read as follows:

§ 404.939 Objections to the issues.

If you object to the issues to be decided at the hearing, you must notify the administrative law judge in writing at the earliest possible opportunity, but no later than 5 business days before the date set for the hearing, unless you show that your circumstances meet the conditions described in § 404.935(b). You must state the reason(s) for your objection(s). The administrative law judge will make a decision on your objection(s) either at the hearing or in writing before the hearing.

■ 7. Revise § 404.944 to read as follows:

§ 404.944 Administrative law judge hearing procedures—general.

A hearing is open to the parties and to other persons the administrative law judge considers necessary and proper. At the hearing, the administrative law judge looks fully into the issues, questions you and the other witnesses, and, subject to the provisions of § 404.935: Accepts as evidence any documents that are material to the issues; may stop the hearing temporarily and continue it at a later date if he or she finds that there is material evidence missing at the hearing; and may reopen the hearing at any time before he or she mails a notice of the decision in order to receive new and material evidence. The administrative law judge may decide when the evidence will be presented and when the issues will be discussed.

■ 8. Revise § 404.949 to read as follows:

§ 404.949 Presenting written statements and oral arguments.

You or a person you designate to act as your representative may appear before the administrative law judge to state your case, present a written summary of your case, or enter written statements about the facts and law material to your case in the record. If presenting written statements prior to hearing, you must provide a copy of your written statements for each party no later than 5 business days before the date set for the hearing, unless you show that your circumstances meet the conditions described in § 404.935(b).

■ 9. In § 404.950, revise paragraphs (c) and (d) to read as follows:

§ 404.950 Presenting evidence at a hearing before an administrative law judge.

* * * * *

(c) *Admissible evidence.* Subject to the provisions of § 404.935, the administrative law judge may receive any evidence at the hearing that he or she believes is material to the issues, even though the evidence would not be admissible in court under the rules of evidence used by the court.

(d) *Subpoenas.* (1) When it is reasonably necessary for the full presentation of a case, an administrative law judge or a member of the Appeals Council may, on his or her own initiative or at the request of a party, issue subpoenas for the appearance and testimony of witnesses and for the production of books, records, correspondence, papers, or other documents that are material to an issue at the hearing.

(2) Parties to a hearing who wish to subpoena documents or witnesses must file a written request for the issuance of a subpoena with the administrative law judge or at one of our offices at least 10 business days before the hearing date, unless you show that your circumstances meet the conditions described in § 404.935(b). The written request must give the names of the witnesses or documents to be produced; describe the address or location of the witnesses or documents with sufficient detail to find them; state the important

facts that the witness or document is expected to prove; and indicate why these facts could not be proven without issuing a subpoena.

(3) We will pay the cost of issuing the subpoena.

(4) We will pay subpoenaed witnesses the same fees and mileage they would receive if they had been subpoenaed by a Federal district court.

* * * * *

■ 10. Revise § 404.951 to read as follows:

§ 404.951 Official record.

(a) *Hearing recording.* All hearings will be recorded. The hearing recording will be prepared as a typed copy of the proceedings if—

(1) The case is sent to the Appeals Council without a decision or with a recommended decision by the administrative law judge;

(2) You seek judicial review of your case by filing an action in a Federal district court within the stated time period, unless we request the court to remand the case; or

(3) An administrative law judge or the Appeals Council asks for a written record of the proceedings.

(b) *Contents of the official record.* All evidence upon which the administrative law judge relies for the decision must be contained in the record, either directly or by appropriate reference. The official record will include the applications, written statements, certificates, reports, affidavits, medical records, and other documents that were used in making the decision under review and any additional evidence or written statements that the administrative law judge admits into the record under §§ 404.929 and 404.935. All exhibits introduced as evidence must be marked for identification and incorporated into the record. The official record of your claim will contain all of the marked exhibits and a verbatim recording of all testimony offered at the hearing. It also will include any prior initial determinations or decisions on your claim.

■ 11. In § 404.968, revise the second sentence of paragraph (a) introductory text to read as follows:

§ 404.968 How to request Appeals Council review.

(a) * * * You should submit any evidence you wish to have considered by the Appeals Council with your request for review, and the Appeals Council will consider the evidence in accordance with § 404.970. * * *

* * * * *

■ 12. Revise § 404.970 to read as follows:

§ 404.970 Cases the Appeals Council will review.

(a) The Appeals Council will review a case if—

(1) There appears to be an abuse of discretion by the administrative law judge;

(2) There is an error of law;

(3) The action, findings or conclusions of the administrative law judge are not supported by substantial evidence;

(4) There is a broad policy or procedural issue that may affect the general public interest; or

(5) Subject to paragraph (b) of this section, the Appeals Council receives additional evidence that is new, material, and relates to the period on or before the date of the hearing decision, and there is a reasonable probability that the additional evidence would change the outcome of the decision.

(b) The Appeals Council will only consider additional evidence under paragraph (a)(5) of this section if you show good cause for not informing us about or submitting the evidence as described in § 404.935 because:

(1) Our action misled you;

(2) You had a physical, mental, educational, or linguistic limitation(s) that prevented you from informing us about or submitting the evidence earlier; or

(3) Some other unusual, unexpected, or unavoidable circumstance beyond your control prevented you from informing us about or submitting the evidence earlier. Examples include, but are not limited to:

(i) You were seriously ill, and your illness prevented you from contacting us in person, in writing, or through a friend, relative, or other person;

(ii) There was a death or serious illness in your immediate family;

(iii) Important records were destroyed or damaged by fire or other accidental cause;

(iv) You actively and diligently sought evidence from a source and the evidence was not received or was received less than 5 business days prior to the hearing; or

(v) You received a hearing level decision on the record and the Appeals Council reviewed your decision.

(c) If you submit additional evidence that does not relate to the period on or before the date of the administrative law judge hearing decision as required in paragraph (a)(5) of this section, or the Appeals Council does not find you had good cause for missing the deadline to submit the evidence in § 404.935, the Appeals Council will send you a notice that explains why it did not accept the additional evidence and advises you of your right to file a new application. The notice will also advise you that if you file a new application within 6 months after the date of the Appeals Council's notice, your request for review will constitute a written statement indicating an intent to claim benefits under § 404.630. If you file a new application within 6 months of the Appeals Council's notice, we will use the date you requested Appeals Council review as the filing date for your new application.

■ 13. Revise § 404.976 to read as follows:

§ 404.976 Procedures before the Appeals Council on review.

(a) *Limitation of issues.* The Appeals Council may limit the issues it considers if it notifies you and the other parties of the issues it will review.

(b) *Oral argument.* You may request to appear before the Appeals Council to present oral argument. The Appeals Council will grant your request if it decides that your case raises an important question of law or policy or that oral argument would help to reach a proper decision. If your request to appear is granted, the Appeals Council will tell you the time and place of the oral argument at least 10 business days before the scheduled date. The Appeals Council will determine whether your appearance, or the appearance of any other person relevant to the proceeding, will be in person, by video teleconferencing, or by telephone.

§ 404.979 [Amended]

■ 14. Revise the first sentence of § 404.979 to read as follows:

After it has reviewed all the evidence in the administrative law judge hearing record and any additional evidence received, subject to the limitations on Appeals Council consideration of additional evidence in § 404.970, the Appeals Council will make a decision or remand the case to an administrative law judge. * * *

PART 405—[REMOVED AND RESERVED]

■ 15. Under the authority of sections 205(a), 702(a)(5), and 1631(d)(1) of the Social Security Act, part 405 is removed and reserved.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart N—Determinations, Administrative Review Process, and Reopening of Determinations and Decisions

■ 16. The authority citation for subpart N of part 416 continues to read as follows:

Authority: Secs. 702(a)(5), 1631, and 1633 of the Social Security Act (42 U.S.C. 902(a)(5), 1383, and 1383b); sec. 202, Pub. L. 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 17. In § 416.1400, revise the second sentence of paragraph (b) to read as follows:

§ 416.1400 Introduction.

* * * * *

(b) * * * Subject to certain timeframes at the hearing level (see § 416.1435) and the limitations on Appeals Council consideration of additional evidence (see § 416.1470), we will consider at each step of the review process any information you present as well as all the information in our records.* * *

■ 18. Revise the fifth and eighth sentences of § 416.1429 to read as follows:

§ 416.1429 Hearing before an administrative law judge-general.

* * * You may submit new evidence (subject to the provisions of § 416.1435), examine the evidence used in making the determination or decision under review, and present and question witnesses. * * * If you waive your right to appear at the hearing, in person, by video teleconferencing, or by telephone, the administrative law judge will make a decision based on the preponderance of the evidence that is in the file and, subject to the provisions of § 416.1435, any new evidence that may have been submitted for consideration.* * *

■ 19. Revise § 416.1435 to read as follows:

§ 416.1435 Submitting written evidence to an administrative law judge.

(a) When you submit your request for hearing, you should also submit information or evidence as required by § 416.912 or any summary of the evidence to the administrative law judge. Each party must make every effort to ensure that the administrative law judge receives all of the evidence and must inform us about or submit any written evidence, as required in § 416.912, no later than 5 business days before the date of the scheduled hearing. If you do not comply with this requirement, the administrative law judge may decline to consider or obtain the evidence unless the circumstances described in paragraph (b) of this section apply.

(b) If you have evidence required under § 416.912 but you have missed the deadline described in paragraph (a) of this section, the administrative law judge will accept the evidence if he or she has not yet issued a decision and you did not inform us about or submit the evidence before the deadline because:

(1) Our action misled you;

(2) You had a physical, mental, educational, or linguistic limitation(s) that prevented you from informing us about or submitting the evidence earlier; or

(3) Some other unusual, unexpected, or unavoidable circumstance beyond your control prevented you from informing us about or submitting the evidence earlier. Examples include, but are not limited to:

(i) You were seriously ill, and your illness prevented you from contacting us in person, in writing, or through a friend, relative, or other person;

(ii) There was a death or serious illness in your immediate family;

(iii) Important records were destroyed or damaged by fire or other accidental cause; or

(iv) You actively and diligently sought evidence from a source and the evidence was not received or was received less than 5 business days prior to the hearing.

(c) *Claims Not Based on an Application For Benefits.* Notwithstanding the requirements in paragraphs (a)–(b) of this section, for claims that are not based on an application for benefits, the evidentiary requirement to inform us about or submit evidence no later than 5 business days before the date of the scheduled hearing will not apply if our other regulations allow you to submit evidence after the date of an administrative law judge decision.

■ 20. In § 416.1438, revise paragraphs (a) and (b) to read as follows:

§ 416.1438 Notice of a hearing before an administrative law judge.

(a) *Issuing the notice.* After we set the time and place of the hearing, we will mail notice of the hearing to you at your last known address, or give the notice to you by personal service, unless you have indicated in writing that you do not wish to receive this notice. We will mail or serve the notice at least 75 days before the date of the hearing.

(b) *Notice information.* The notice of hearing will tell you:

(1) The specific issues to be decided in your case;

(2) That you may designate a person to represent you during the proceedings;

(3) How to request that we change the time or place of your hearing;

(4) That your hearing may be dismissed if neither you nor the person you designate to act as your representative appears at your scheduled hearing without good reason under § 416.1457;

(5) Whether your appearance or that of any other party or witness is scheduled to be made in person, by video teleconferencing, or by telephone. If we have scheduled you to appear at the hearing by video teleconferencing, the notice of hearing will tell you that the scheduled place for the hearing is a video teleconferencing site and explain what it means to appear at your hearing by video teleconferencing;

(6) That you must make every effort to inform us about or submit all written evidence that is not already in the record no later than 5 business days before the date of the scheduled hearing, unless you show that your circumstances meet the conditions described in § 416.1435(b); and

(7) Any other information about the scheduling and conduct of your hearing.

* * * * *

■ 21. Revise § 416.1439 to read as follows:

§ 416.1439 Objections to the issues.

If you object to the issues to be decided at the hearing, you must notify the administrative law judge in writing at the earliest possible opportunity, but no later than 5 business days before the date set for the hearing, unless you show that your circumstances meet the conditions described in § 416.1435(b). You must state the reason(s) for your objection(s). The administrative law judge will make a decision on your objection(s) either at the hearing or in writing before the hearing.

■ 22. Revise § 416.1444 to read as follows:

§ 416.1444 Administrative law judge hearing procedures—general.

A hearing is open to the parties and to other persons the administrative law judge considers necessary and proper. At the hearing, the administrative law judge looks fully into the issues, questions you and the other witnesses, and, subject to the provisions of § 416.1435: Accepts as evidence any documents that are material to the issues; may stop the hearing temporarily and continue it at a later date if he or she finds that there is material evidence missing at the hearing; and may reopen the hearing at any time before he or she mails a notice of the decision in order

to receive new and material evidence. The administrative law judge may decide when the evidence will be presented and when the issues will be discussed.

■ 23. Revise § 416.1449 to read as follows:

§ 416.1449 Presenting written statements and oral arguments.

You or a person you designate to act as your representative may appear before the administrative law judge to state your case, present a written summary of your case, or enter written statements about the facts and law material to your case in the record. If presenting written statements prior to hearing, you must provide a copy of your written statements for each party no later than 5 business days before the date set for the hearing, unless you show that your circumstances meet the conditions described in § 416.1435(b).

■ 24. In § 416.1450, revise paragraphs (c) and (d) to read as follows:

§ 416.1450 Presenting evidence at a hearing before an administrative law judge.

* * * * *

(c) *Admissible evidence.* Subject to the provisions of § 416.1435, the administrative law judge may receive any evidence at the hearing that he or she believes is material to the issues, even though the evidence would not be admissible in court under the rules of evidence used by the court.

(d) *Subpoenas.* (1) When it is reasonably necessary for the full presentation of a case, an administrative law judge or a member of the Appeals Council may, on his or her own initiative or at the request of a party, issue subpoenas for the appearance and testimony of witnesses and for the production of books, records, correspondence, papers, or other documents that are material to an issue at the hearing.

(2) Parties to a hearing who wish to subpoena documents or witnesses must file a written request for the issuance of a subpoena with the administrative law judge or at one of our offices at least 10 business days before the hearing date, unless you show that your circumstances meet the conditions described in § 416.1435(b). The written request must give the names of the witnesses or documents to be produced; describe the address or location of the witnesses or documents with sufficient detail to find them; state the important facts that the witness or document is expected to prove; and indicate why these facts could not be proven without issuing a subpoena.

(3) We will pay the cost of issuing the subpoena.

(4) We will pay subpoenaed witnesses the same fees and mileage they would receive if they had been subpoenaed by a Federal district court.

* * * * *

■ 25. Revise § 416.1451 to read as follows:

§ 416.1451 Official record.

(a) *Hearing recording.* All hearings will be recorded. The hearing recording will be prepared as a typed copy of the proceedings if—

(1) The case is sent to the Appeals Council without a decision or with a recommended decision by the administrative law judge;

(2) You seek judicial review of your case by filing an action in a Federal district court within the stated time period, unless we request the court to remand the case; or

(3) An administrative law judge or the Appeals Council asks for a written record of the proceedings.

(b) *Contents of the official record.* All evidence upon which the administrative law judge relies for the decision must be contained in the record, either directly or by appropriate reference. The official record will include the applications, written statements, certificates, reports, affidavits, medical records, and other documents that were used in making the decision under review and any additional evidence or written statements that the administrative law judge admits into the record under §§ 416.1429 and 416.1435. All exhibits introduced as evidence must be marked for identification and incorporated into the record. The official record of your claim will contain all of the marked exhibits and a verbatim recording of all testimony offered at the hearing. It also will include any prior initial determinations or decisions on your claim.

■ 26. In § 416.1468, revise the second sentence of paragraph (a) introductory text to read as follows:

§ 416.1468 How to request Appeals Council review.

(a) * * * You should submit any evidence you wish to have considered by the Appeals Council with your request for review, and the Appeals Council will consider the evidence in accordance with § 416.1470. * * *

■ 27. Revise § 416.1470 to read as follows:

§ 416.1470 Cases the Appeals Council will review.

(a) The Appeals Council will review a case if—

(1) There appears to be an abuse of discretion by the administrative law judge;

(2) There is an error of law;

(3) The action, findings or conclusions of the administrative law judge are not supported by substantial evidence;

(4) There is a broad policy or procedural issue that may affect the general public interest; or

(5) Subject to paragraph (b) of this section, the Appeals Council receives additional evidence that is new, material, and relates to the period on or before the date of the hearing decision, and there is a reasonable probability that the additional evidence would change the outcome of the decision.

(b) In reviewing decisions other than those based on an application for benefits, the Appeals Council will consider the evidence in the administrative law judge hearing record and any additional evidence it believes is material to an issue being considered. However, in reviewing decisions based on an application for benefits, the Appeals Council will only consider additional evidence under paragraph (a)(5) of this section if you show good cause for not informing us about or submitting the evidence as described in § 416.1435 because:

(1) Our action misled you;

(2) You had a physical, mental, educational, or linguistic limitation(s) that prevented you from informing us about or submitting the evidence earlier; or

(3) Some other unusual, unexpected, or unavoidable circumstance beyond your control prevented you from informing us about or submitting the evidence earlier. Examples include, but are not limited to:

(i) You were seriously ill, and your illness prevented you from contacting us in person, in writing, or through a friend, relative, or other person;

(ii) There was a death or serious illness in your immediate family;

(iii) Important records were destroyed or damaged by fire or other accidental cause;

(iv) You actively and diligently sought evidence from a source and the evidence was not received or was received less than 5 business days prior to the hearing; or

(v) You received a hearing level decision on the record and the Appeals Council reviewed your decision.

(c) If you submit additional evidence that does not relate to the period on or before the date of the administrative law judge hearing decision as required in paragraph (a)(5) of this section, or the Appeals Council does not find you had

good cause for missing the deadline to submit the evidence in § 416.1435, the Appeals Council will send you a notice that explains why it did not accept the additional evidence and advises you of your right to file a new application. The notice will also advise you that if you file a new application within 60 days after the date of the Appeals Council's notice, your request for review will constitute a written statement indicating an intent to claim benefits under § 416.340. If you file a new application within 60 days of the Appeals Council's notice, we will use the date you requested Appeals Council review as the filing date for your new application.

■ 28. Revise § 416.1476 to read as follows:

§ 416.1476 Procedures before the Appeals Council on review.

(a) *Limitation of issues.* The Appeals Council may limit the issues it considers if it notifies you and the other parties of the issues it will review.

(b) *Oral argument.* You may request to appear before the Appeals Council to present oral argument. The Appeals Council will grant your request if it decides that your case raises an important question of law or policy or that oral argument would help to reach a proper decision. If your request to appear is granted, the Appeals Council will tell you the time and place of the oral argument at least 10 business days before the scheduled date. The Appeals Council will determine whether your appearance, or the appearance of any other person relevant to the proceeding, will be in person, by video teleconferencing, or by telephone.

§ 416.1479 [Amended]

■ 29. Revise the first sentence of § 416.1479 to read as follows:

After it has reviewed all the evidence in the administrative law judge hearing record and any additional evidence received, subject to the limitations on Appeals Council consideration of additional evidence in § 416.1470, the Appeals Council will make a decision or remand the case to an administrative law judge. * * *

BILLING CODE 4191–02–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 91

[Docket No. FR 5891–F–02]

RIN 2506–AC41

Modernizing HUD's Consolidated Planning Process To Narrow the Digital Divide and Increase Resilience to Natural Hazards

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final rule.

SUMMARY: HUD's Consolidated Plan is a planning mechanism designed to help States and local governments to assess their affordable housing and community development needs and to make data-driven, place-based investment decisions. The Consolidated Planning process serves as the framework for a community-wide dialogue to identify housing and community development priorities that align and focus funding from HUD's formula block grant programs. This rule amends HUD's Consolidated Plan regulations to require that jurisdictions consider two additional concepts in their planning efforts.

The first concept is how to address the need for broadband access for low- and moderate-income residents in the communities they serve. Broadband is the common term used to refer to a high-speed, always-on connection to the Internet. Such connection is also referred to as high-speed broadband or high-speed Internet. Specifically, the rule requires that States and localities that submit a Consolidated Plan describe the broadband access in housing occupied by low- and moderate-income households. If low-income residents in the communities do not have such access, States and jurisdictions must consider providing broadband access to these residents in their decisions on how to invest HUD funds. The second concept added to the Consolidated Plan process requires jurisdictions to consider incorporating resilience to natural hazard risks, taking care to anticipate how risks will increase due to climate change, into development of the plan in order to begin addressing impacts of climate change on low- and moderate-income residents.

DATES: *Effective Date:* January 17, 2017.

FOR FURTHER INFORMATION CONTACT: Lora Routt, Senior Advisor, Office of Community Planning and Development, Department of Housing and Urban Development, Office of Community Planning and Development, 451 7th Street SW., Suite 7204, Washington, DC 20410 at 202–402–4492 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of This Rule

The purpose of this rule is to require States and local governments to evaluate the availability of broadband access and the vulnerability of housing occupied by low- and moderate income households to natural hazard risks, many of which may be increasing due to climate change, in their Consolidated Planning efforts. These evaluations are to be conducted using readily available data sources developed by Federal government agencies, other available data and analyses (including State, Tribal, and local hazard mitigation plans that have been approved by the Federal Emergency Management Agency (FEMA)), and data that State and local government grantees may have available to them. Where access to broadband Internet service is not currently available or is minimally available (such as in certain rural areas), States and local governments must consider ways to bring broadband Internet access to low- and moderate-income residents, including how HUD funds could be used to narrow the digital divide for these residents. Further, where low- and moderate-income communities are at risk of natural hazards, including those that are expected to increase due to climate change, States and local governments must consider ways to incorporate appropriate hazard mitigation and resilience into their community planning and development goals, codes, and standards, including the use of HUD funds to accomplish these objectives. These two planning considerations reflect emerging needs of communities in this changing world. Broadband provides access to a wide range of resources, services, and products, which assist not only individuals and, but also communities, in their efforts to improve their economic outlooks. Analysis of natural hazards, including the anticipated effects of climate change on those hazards, is important to help ensure that jurisdictions are aware of existing and developing vulnerabilities in the geographic areas that they serve that can threaten the health and safety of the populations they serve.

B. Summary of Major Provisions of This Rule

HUD's currently codified Consolidated Plan regulations require that local governments and States consult public and private agencies that provide assisted housing, health services, and social and fair housing services during preparation of the Consolidated Plan. Under these regulations, local governments and States are also required in their citizen participation plan to encourage the participation of local and regional institutions and businesses in the process of developing and implementing their Consolidated Plans. This rule requires States and local governments, in preparing their Consolidated Plan, to add to the list of public and private agencies and entities that they now must consult with for preparation of their plans, to consult with public and private organizations, including broadband internet service providers, organizations engaged in narrowing the digital divide (*e.g.,* schools, digital literacy organizations), and agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies (see §§ 91.100 and 91.110). Jurisdictions must also encourage the participation of these entities in implementing relevant components of the plan (see §§ 91.105 and 91.115).

The rule also requires each jurisdiction to describe broadband needs in housing occupied by low- and moderate-income households based on an analysis of data for its low- and moderate-income neighborhoods for which the source is cited in the jurisdiction's Consolidated Plan. These needs include the need for broadband wiring and for connection to the broadband service in the household units, and the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction (see §§ 91.210 and 91.310). Possible sources of such data include the National Broadband Mapcreated by the National Telecommunications and Information Administration (NTIA) of the Department of Commerce. Grantees may also find broadband availability data in Federal Communications Commission (FCC) Form 477. As discussed later in this preamble, the regulatory text does not include recommended sources of data to avoid any confusion that these are not required sources, only recommended sources.

The rule also requires that jurisdictions provide, as part of their required housing market analysis, an assessment of natural hazard risks to low- and moderate-income residents, including risks expected to increase due to climate change, based on an analysis of data, findings, and methods identified by the jurisdiction, for which a reputable source is cited in the jurisdiction's Consolidated Plan. Possible sources of such data include: (1) The most recent National Climate Assessment, (2) the Climate Resilience Toolkit, (3) the Community Resilience Planning Guide for Buildings and Infrastructure Systems prepared by the National Institute of Standards and Technology (NIST), and, (4) other climate risk-related data published by the Federal government or other State or local government climate risk related data, including FEMA-approved hazard mitigation plans which incorporate climate change data or analysis. For the same reasons discussed above, the regulatory text related to natural hazard risk analysis does not include the recommended sources of data. Prior to implementation of the new requirements established by this rule, HUD will provide additional resources to support grantees in the form of guides and trainings. Grantees may also request Technical Assistance through their HUD Field Office or directly at *www.HUDExchange.info/get-assistance.*

C. Costs and Benefits of This Rule

HUD's Consolidated Plan process, established by regulation in 1995, provides a comprehensive planning process for HUD programs administered by HUD's Office of Community Planning and Development, specifically the Community Development Block Grant (CDBG) program, the HOME Investment Partnerships (HOME) program, the Emergency Solutions Grants (ESG) program and the Housing with Opportunities for Persons With AIDS (HOPWA) program. Comprehensive community planning provides officials with an informative profile of their communities in terms of population, housing, economic base, community facilities, and transportation systems, and such information aids officials in their investment decisions. HUD's Consolidated Planning process assists State and local officials that are recipients of HUD funds under the above-listed programs in determining the housing and community development needs of their respective communities. Requiring Consolidated Plan jurisdictions to consider the broadband and natural hazard resilience needs of their communities helps to ensure a more complete profile of the needs of their communities. As discussed in this preamble, the importance of providing broadband access to all cannot be overstated. Broadband access is not only important for increasing opportunities for individuals' success, but also for the success of a community. Consideration of the impact of natural hazard risks, many of which are anticipated to increase due to climate change, in one's community, and how communities can help mitigate any such adverse impacts, is equally important as it will help to guide the best use of land and orderly and sustainable growth. In brief, the benefits of this rule are to promote a balanced planning process that more fully considers the housing, environmental, and economic needs of communities.

The costs of the revised consultation and reporting requirements are not significant since the regulatory changes proposed by this rule merely build upon similar existing requirements for other elements covered by the Consolidated Planning process rather than mandating completely new procedures. Further, the required assessments are based on data readily available on the Internet, or which the Consolidated Plan jurisdiction may already have available to it, such as its own local data. Therefore, jurisdictions will not have to incur the expense and administrative burdens associated with collecting data. HUD anticipates providing grantees with data early in Federal Fiscal Year 2018. HUD will not require grantees to incorporate these new requirements into their Consolidated Plan process until HUD is able to make the data available to all grantees. To provide such time, the regulatory text provides that the new requirements apply to Consolidated Plans submitted on or after January 1, 2018.

Moreover, this rule does not mandate that actions be taken to address broadband needs or climate change adaptation needs. HUD's Consolidated Plan process has long provided that jurisdictions are in the best position to decide how to expend their HUD funds. The additional analyses required by this rule may highlight areas where expenditure of funds would assist in opening up economic opportunities through increased broadband access or mitigate the impact of possible natural hazards, including those that may be exacerbated due to climate change. But HUD leaves it to jurisdictions to consider any appropriate methods to promote broadband access or protect against the adverse impacts of climate change, taking into account the other

needs of their communities, and available funding, as identified through the Consolidated Planning process.

II. Background

A. Broadband Access

On March 23, 2015, President Obama issued a Presidential Memorandum on ''Expanding Broadband Deployment and Adoption by Addressing Regulatory Barriers and Encouraging Investment and Training.'' In this memorandum, the President noted that access to high-speed broadband is no longer a luxury, but a necessity for American families, businesses, and consumers. The President further noted that the Federal government has an important role to play in developing coordinated policies to promote broadband deployment and adoption, including promoting best practices, breaking down regulatory barriers, and encouraging further investment.

On July 15, 2015, HUD launched its Digital Opportunity Demonstration, known as ''ConnectHome,'' in which HUD provided a platform for collaboration among local governments, public housing agencies, Internet service providers, philanthropic foundations, nonprofit organizations and other relevant stakeholders to work together to produce local solutions for narrowing the digital divide in communities across the nation served by HUD. The demonstration, or pilot as it is also called, commenced with the participation of 28 communities. Through contributions made by the Internet service providers and other organizations participating in the pilot, these 28 communities will benefit from the ConnectHome collaboration by receiving, for the residents living in HUD public and assisted housing in these communities, broadband infrastructure, technical assistance, literacy training, and electronic devices that provide for accessing high-speed Internet.

The importance of all Americans having access to the Internet cannot be overstated. As HUD stated in its announcement of the Digital Opportunity Demonstration, published in the **Federal Register** on April 3, 2015, at 80 FR 18248, ''[k]nowledge is a pillar to achieving the American Dream—a catalyst for upward mobility as well as an investment that ensures each generation is as successful as the last.'' [1] Many low-income Americans do not have broadband Internet at home, contributing to the estimated 66 million Americans who are without the most basic digital literacy skills. Without broadband access and connectivity and the skills to use Internet technology at home, children will miss out on the high-value educational, economic, and social impact that high-speed Internet provides. It is for these reasons that HUD is exploring ways, beyond ConnectHome, to narrow the digital divide for the low-income individuals and families served by HUD multifamily rental housing programs. This rule presents one such additional effort.

B. Natural Hazards Resilience

On November 1, 2013, President Obama signed Executive Order 13653, on ''Preparing the United States for the Impacts of Climate Change.'' Executive Order 13653 was subsequently published in the **Federal Register** on November 6, 2013 (78 FR 66819). The Executive Order recognizes that the potential impacts of climate change—including an increase in prolonged periods of excessively high temperatures, more heavy precipitation, an increase in wildfires, more severe droughts, permafrost thawing, ocean acidification, and sea-level rise—are often most significant for communities that already face economic or health-related challenges. Research has bolstered the understanding of the concept of social vulnerability, which describes characteristics (age, gender, socioeconomic status, special needs, race, and ethnicity) of populations that influence their capacity to prepare for, respond to, and recover from hazards and disasters, including the sensitivity of a population to climate change impacts and how different people or groups are more or less vulnerable to those impacts. Social vulnerability and equity in the context of climate change are important because some populations may have less capacity to prepare for, respond to, and recover from climate-related hazards and effects. Executive Order 13653 asserts that managing these risks requires deliberate preparation, close cooperation, and coordinated planning by the Federal government, State, Tribal, and local governments, and stakeholders. Further, the Executive Order calls upon Federal agencies to identify opportunities to support and encourage smarter, more climate-resilient investments by States, local communities, and tribes, through grants and other programs, in the context of infrastructure development.

Section 7 of Executive Order 13653 established the President's State, Local, and Tribal Leaders Task Force on Climate Change Resilience and Preparedness (Task Force). Co-chaired by the Chair of the White House Council on Environmental Quality and the Director of the White House Office of Intergovernmental Affairs, the Task Force consisted of 26 governors, mayors, county officials, and Tribal leaders from across the United States. Members brought first-hand experiences in building climate preparedness and resilience in their communities and conducted broad outreach to thousands of government agencies, trade associations, planning agencies, academic institutions, and other stakeholders, to inform their recommendations to the Administration.

The President charged the Task Force with providing recommendations on how the Federal government can respond to the needs of communities nationwide that are dealing with the impacts of climate change by removing barriers to resilient investments, modernizing Federal grant and loan programs to better support local efforts, and developing the information and tools they need to prepare, among other measures. In November 2014, Task Force members presented their recommendations for the President at a White House meeting with Vice President Biden and other senior Administration officials. Among other actions, the Task Force called on HUD to consider strategies within existing grant programs to facilitate and encourage integrated hazard mitigation approaches that address climate-change related risks, land use, development codes and standards, and capital improvement planning. This final rule represents one step that HUD is taking to implement these recommendations.

HUD's May 2016 Proposed Rule

On May 18, 2016, at 81 FR 31192, HUD published a proposed rule that would require Consolidated Plan jurisdictions to consider broadband Internet access and the natural hazard resilience needs of their communities and to consider whether they should and can take actions to address these needs.

HUD's Consolidated Planning process serves as the framework for a community-wide dialogue to identify housing and community development priorities that align and focus funding from the HUD formula block grant programs: The CDBG program, the HOME program, the ESG program, and the HOPWA program. HUD's regulations for the Consolidated Plan are codified at 24 CFR part 91 (entitled ''Consolidated Submissions for Community Planning and Development Programs''). A Consolidated Plan, which may have a planning duration of

[1] See 80 FR 18248, at 18249.

between 3 and 5 years, is designed to help States and local governments to assess their affordable housing and community development needs, in the context of market conditions at the time of their planning, and to make data-driven, place-based decisions on how to expend HUD funds in their jurisdictions.

In developing their Consolidated Plans, States and local governments are required to engage their communities, both in the process of developing and reviewing the proposed plan, and as partners and stakeholders in the implementation of the plan. By consulting and collaborating with other public and private entities, States and local governments can better align and coordinate community development programs with a range of other plans, programs, and resources to achieve greater impact. A jurisdiction's Consolidated Plan is carried out through annual Action Plans, which provide a concise summary of the actions, activities, and the specific Federal and non-federal resources that will be used each year to address the priority needs and specific goals identified by the Consolidated Plan. States and local governments report on accomplishments and progress toward Consolidated Plan goals in the Consolidated Annual Performance and Evaluation Report (CAPER).

The regulatory amendments proposed by HUD's May 2016 rule would require States and local governments to consider broadband access and natural hazard resilience as part of their Consolidated Planning efforts. Where the required analysis demonstrates that broadband Internet support is not currently available or is minimally available, or the jurisdiction's community is at risk of natural hazards, the jurisdiction should consider ways of addressing those needs.

The public comment period for HUD's May 18, 2016, proposed rule closed on July 18, 2016. HUD received 37 public comments on the proposed rule. The commenters included State and local governments, climate adaptation and environment organizations, public housing agencies (PHAs) and nonprofit organizations. The following Section III discusses the significant comments raised by the commenters and HUD's responses to the comments.

III. Discussion of Public Comments Received on the May 16, 2016, Proposed Rule

This section of the preamble presents a summary of the significant issues and questions raised by the commenters and HUD's responses to these comments. The majority of the commenters supported the inclusion of both assessments in the Consolidated Planning process, but as shown below in the discussion of public comments were concerned about administrative burden. In responding to the comments, HUD has strived to highlight that the burden is minimal. The only change that HUD makes in responses to public comments, as is more fully discussed below, is to remove from the regulatory text specific recommended broadband and risk hazard sources to consult in making the required assessments. There was confusion about whether or when consultation with these sources was required. They are recommended, not required sources. Removing these references from the regulatory text eliminates this confusion.

A. General Comments

Comment: Support for the rule. The majority of commenters supported the proposed rule. These commenters commended HUD on recognizing the importance of requiring jurisdictions to assess broadband access for low-and moderate-income households and to consider how to incorporate resilience to natural hazard risks in their planning efforts.

HUD Response. HUD appreciates the support of the commenters and agrees that these changes to the Consolidated Planning process should aid jurisdictions in addressing two emerging needs of communities in this changing world.

Comment: The rule is an unfunded mandate. Several commenters stated that the proposed rule represented an overreach of HUD's authority and that the changes were an unfunded mandate.

HUD Response. The commenters are not correct that the two new assessments impose an unfunded mandate. As an initial matter, HUD notes that the rule's scope is limited to requiring consideration of the broadband and natural hazards resilience needs of low-income communities. The rule does not mandate that any actions be taken in response to the required assessments. Jurisdictions retain the discretion to consider the most appropriate methods to address their assessments, taking into account other needs identified as part of the Consolidated Planning process as well as financial and other resource constraints. Further, HUD notes that the Consolidated Planning process is required only to the extent jurisdictions voluntarily seek to participate in HUD's community planning and development programs. Accordingly, there is no mandate for jurisdictions choosing not to receive such funding. The concept of unfunded mandates excludes voluntarily-assumed requirements imposed as a condition for receipt of Federal assistance.

Comment: The proposed regulatory changes are administratively and economically burdensome. Several commenters wrote that the proposed rule imposes an administrative burden, especially on smaller communities. The commenters wrote that the financial burden would unduly stretch already limited CDBG and HOME program funding. The commenters also objected that HUD underestimated the administrative burden of complying with the new requirements. Some of these commenters focused on the administrative burden associated with the expanded consultation requirements, which now include broadband internet service providers, organizations engaged in narrowing the digital divide, and agencies engaged in resilience planning. These commenters stated that HUD's estimates of the administrative burden failed to account for the person-hours required to locate, engage, evaluate, and compile recommendations from qualified public and private entities within either content area. The commenters wrote that HUD should refrain from pursuing the changes or make the two new assessments optional.

HUD Response. As noted in the proposed rule, HUD has sought to minimize the costs and burdens imposed on communities by allowing the assessments to be completed using readily available online data sources. HUD further minimizes the burden imposed on jurisdictions by providing an electronic template for completing the Consolidated Plan. This template, first used in 2012, provides a uniform and flexible template that helps ensure the Consolidated Plan is complete per the regulations found in 24 CFR part 91. Many of the data tables within the Consolidated Plan template are pre-populated with the most up-to-date housing and economic data available, and HUD plans to input data for both broadband and resilience assessment requirements. While grantees will need to provide explanations relating their funding priorities to the pre-populated data, they do not need to incur the costs or time of searching for, entering, and compiling the data. HUD also notes that the rule does not require jurisdictions to use the pre-populated data; jurisdictions may opt to use other data of their choice.

HUD anticipates providing grantees with data early in Federal Fiscal Year 2018. HUD will not require grantees to

incorporate these new requirements into their Consolidated Plan process until HUD is able to make the data available to all grantees. To provide such time, the regulatory text provides that the new requirements apply to Consolidated Plans submitted on or after January 1, 2018.

With respect to the consultation requirements, HUD notes the Consolidated Plan has always served as a planning document for the jurisdiction as a whole. Jurisdictions are already required to consult with public and private agencies, business and civic leaders, and units of local government. The inclusion of the newly specified entities does not substantively alter the cost or administration of the already required participatory process.

Comment: The new proposed rule lacks necessary specificity of how the two new assessments are to be conducted. Several commenters wrote that the proposed rule lacked sufficient specificity regarding the required contents of the new assessments and the criteria HUD will use to evaluate the adequacy of the assessment. The commenters wrote that this lack of details would make it difficult for jurisdictions to comply with the new requirements. One of the commenters asked whether the data sources cited by the community would be subject to review by HUD. The commenters urged HUD to provide additional guidance to communities on how it plans to measure compliance with the rule.

HUD Response: As it does on other components of the Consolidated Plan, HUD will provide technical assistance and training materials to assist jurisdictions in meeting the new requirements. However, HUD notes that the requirements of the new rule are not entirely unfamiliar, as the Consolidated Planning process already requires jurisdictions to identify non-housing community development needs that would aid communities in developing viable urban communities, providing a suitable living environment and expanding economic opportunities principally for low-income and moderate-income persons. (See 24 CFR 91.215(f).) With respect to data, as noted in response to an earlier comment, HUD plans to pre-populate data in the electronic Consolidated Plan template. Through the standardized template with prepopulated data tables at the jurisdictional level and providing the ability to map community needs, jurisdictions will be able to ascertain and satisfy HUD's needs assessment expectations. To ensure that jurisdictions have engaged in analysis regarding community broadband and natural hazard resilience needs, plans will be reviewed for compliance with the new requirements. Guidance will be developed for the field staff to support consistent implementation of this policy. In order to aid grantees, HUD will provide in its guidance best practices and examples for incorporating broadband and natural hazards into the Consolidated Plan.

Comment: HUD should first establish eligible activities for the two new assessments, before requiring that such assessments be undertaken. A commenter wrote that the two new assessments do not directly address CDBG's objectives. The commenter stated that before any changes are made to the consultation and citizen participation regulations, HUD should update the eligible activities and guidance regarding these kinds of activities. The commenter stated that, for instance, income payments, including payments for utilities such as Internet, are not considered an eligible CDBG activity. The commenter stated that CDBG funding could be used to make utility payments, including Internet payments, to ensure low- and moderate-income families have access to the Internet. Another commenter asked whether CDBG funds can be used to assist in broadband infrastructure or otherwise connect housing assisted by HUD to broadband.

HUD Response: One of the statutory objectives of the CDBG program is to ''provid[e] . . . [a] suitable living environment,'' which encompasses a range of related goals and activities such as improving the safety and livability of neighborhoods; increasing access to quality public and private facilities and services; and reducing the isolation of income groups within a community or geographical area through the spatial deconcentration of housing opportunities for persons of lower income, the revitalization of deteriorating or deteriorated neighborhoods, and the conservation of energy resources. The two new assessments required under this rule align with this objective. With respect to eligible activities, while HUD does not have regulatory authority to add new eligible activities to the CDBG program beyond those authorized in statute, the CDBG program already includes numerous eligible activities, such as rehabilitation, through which grantees can assist broadband connectivity and natural hazard resilience efforts directly. When determining their public facility, housing rehabilitation, economic development, and infrastructure needs, grantees may wish to consider high performing infrastructure to ameliorate/withstand natural hazards, as well as ways to use eligible activities to meet community broadband needs. HUD has provided guidance on using existing eligible activities for these purposes,[2] and will also be providing additional technical assistance and guidance on how CDBG funds may be used to address both broadband and resilience needs in the community.

Comment: HUD's regulations should be generally stated and guidance should provide the necessary specificity. A commenter wrote that as proposed, HUD requires very specific data sources to be included in the Consolidated Plan. The commenter stated that this is problematic because data sources often change or are renamed. The commenter stated that HUD's regulations should list general information that is required in the Consolidated Plan while HUD guidance and other materials that are regularly updated, such as the ''Consolidated Plan in IDIS Desk Guide,'' should provide recommended data sources. The commenter stated that this will allow HUD to update data sources easily in circumstances where sources change or new sources become available.

HUD Response: HUD appreciates the suggestion made by the commenter, and has revised the rule accordingly. As recommended, the regulation no longer identifies specific recommended sources. These suggested sources of data will now be listed in guidance to facilitate updating as new data becomes available or data sources are re-named. Jurisdictions will still be able to use either the data identified by HUD and pre-populated in the electronic Consolidated Plan template or other data sources of the jurisdiction's choice, for which the source is cited in the jurisdiction's Consolidated Plan.

Comment: The rule includes no mandate thereby providing no assurance goals will be met. A commenter wrote that despite HUD's recognition of the importance of access to broadband and the increasing risk of natural hazards, the proposed rule does not mandate jurisdictions take any action, or even formulate actions steps, to address these needs. The commenter wrote that while is it is often true that ''jurisdictions are in the best position to decide how to expend their HUD funds,'' requiring concrete plans of

[2] Please see the Frequently Asked Questions (FAQs) for the CDBG, HOME, and Housing Trust Fund programs available at the following links: *https://www.hudexchange.info/resource/4891/cdbg-broadband-infrastructure-faqs/ https://www.hudexchange.info/onecpd/assets/File/HOME–FAQs-Broadband.pdf https://www.hudexchange.info/resource/4420/htf-faqs/.*

action instead of just data collection is the only real way to ensure HUD's stated goals are met.

HUD Response: A fundamental principle of the Consolidated Planning process, as well as of HUD's community development formula programs (for which the Consolidated Plan is the submission vehicle) is that grantees have the flexibility and responsibility for developing their own programs and funding priorities, based on their own assessment of their needs. HUD does not mandate what objectives grantees should achieve or what activities grantees are to undertake with their formula funding. It will be up to the jurisdiction through its needs assessment process to determine whether to select activities related to these issues as a priority need. The grantee would identify the financial and organizational resources available to address its priority needs. In the Consolidated Planning process, the level of resources available will play a key role in determining strategies and goals. Once broadband or increasing resilience have been selected as a priority need, grantees would then develop a set of goals based on the availability of resources, and local organizational capacity.

Comment: The new assessments are already made by agencies within each State tasked with such assessments. A commenter stated that new assessments should not be required of State housing agencies. The commenter stated that these assessments are already made by those State agencies charged with technology authority or charged with emergency management. The commenter stated that generally, for each State, these assessments are made through programs that are not part of the Consolidated Planning process.

HUD Response: HUD agrees that jurisdictions often already have assessments undertaken by other agencies regarding both broadband access and natural hazard resiliency. HUD is encouraging through its Consolidated Planning process a collaborative consultation process. HUD also encourages jurisdictions to use these plans developed by other agencies in identifying community needs and priorities. The Consolidated Planning process provides the opportunity for jurisdictions to reference existing plans and HUD is not requiring a separate, distinct study to be undertaken. It is up to each jurisdiction to determine which agencies or departments will be responsible for developing its Consolidated Plan and for administering the HUD community development formula funding received through each block grant program. All other jurisdictions (including States) are encouraged to ensure collaboration among internal and external agencies and staff to take full advantage of relevant expertise. Ideally, State agencies would develop these plans in alignment with each other, not only to reduce duplication of work but also to ensure that Federal investments are more aligned throughout the State and in their communities.

Comment: Consider requiring assessments for broadband adoption and increasing resilience to natural hazards beyond the context of housing needs. Several commenters wrote that HUD should consider requiring assessments in Consolidated Plans beyond just housing needs. The commenter stated that even though Consolidated Plans are focused on housing needs, communities would benefit if jurisdictions are required to at least analyze how funds could be used for broadband adoption and enhancing resilience to natural hazard risks for communities as a whole.

HUD Response: The Consolidated Plan is not exclusively concerned with housing needs. HUD's Consolidated Plan regulations include both a housing needs assessment and a non-housing community development plan. Specifically, under 24 CFR 91.215 (for local governments) and 24 CFR 92.315 (for States), jurisdictions must provide a description of priority non-housing community development needs eligible for assistance under HUD's community development programs. In line with the goals of this rulemaking, HUD strongly encourages jurisdictions to consider implementing actions to support broadband access and adoption and increase resilience in their non-housing community development efforts, but such decisions on priorities are determined by grantees.

Comment: These two new Consolidated Plan assessments require input by the residents of the community. A commenter stated that assessing broadband and natural hazards concerns of the community beyond the data points and institutional input required in the proposed rule is essential for local governments and States in assessing the true needs of the community. The commenter stated that without direct communication with the households that are affected by these issues, States and localities cannot properly assess the full needs of the communities they serve. The commenter urged HUD to require jurisdictions to create a public process where members of the community have opportunity to comment on Consolidated Plans, and that HUD should consider a community participation structure similar to the requirement under HUD's Affirmatively Furthering Fair Housing (AFFH) regulation.

HUD Response: HUD's Consolidated Plan regulations already require jurisdictions to undertake a citizen participation and consultation process (see, subpart B of the Consolidated Plan regulations at 24 CFR part 91, entitled ''Citizen Participation and Consultation''). The AFFH citizen participation process was modeled on the citizen participation and consultation process required by HUD's Consolidated Plan regulations. HUD does not believe that a separate citizen participation and consultation process is required for the two new assessments established by this rule, as was established under the AFFH rule. HUD's AFFH rule implemented a requirement, affirmatively furthering fair housing, under a separate statute, the Fair Housing Act. That is not the case here.

Comment: Broadband access and natural hazard risk resilience should be included in the jurisdictions' Assessment of Fair Housing required by HUD's Affirmatively Furthering Fair Housing regulation. A commenter wrote that in addition to addressing concerns about broadband access and resilience to natural hazard risks in their Consolidated Plans, HUD should require jurisdictions to incorporate these assessments into their Assessment of Fair Housing required under HUD's AFFH rule. The commenter stated that HUD's AFFH rule aims to aide States and local governments ''in taking a meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.'' The commenter stated that under the AFFH rule, jurisdictions are charged with taking meaningful actions that ''transform racially and ethnically concentrated areas of poverty into areas of opportunity.''

HUD Response: While HUD, in this rule, is not mandating inclusion of the broadband access and resilience assessments in the Assessment of Fair Housing required under HUD's AFFH rule, jurisdictions may voluntarily elect to include them in their assessment required under the AFFH rule. As noted, HUD encourages jurisdictions to ensure collaboration among State and local agencies and staff to take full advantage of relevant expertise among all agencies and employees, be they internal or external to the jurisdiction.

The suggestion made by the commenter may be one possible way of achieving that goal.

B. Specific Comments on Narrowing the Digital Divide

Comment: The National Broadband Map and Form 477 do not provide current data and HUD should therefore allow use of State and local data. Several commenters objected to use of National Broadband Map and Form 477 data to determine broadband availability. A commenter questioned the accuracy of data quality and accuracy within the broadband services sector. Another commenter wrote that Federally collected data on broadband access and adoption is often of inconsistent quality, unverified, not released in a timely manner, and insufficient for the planning needs of many communities. Commenters stated that the National Broadband Map has not been updated or maintained and currently shows data from the fall of 2014, and this outdated resource could lead to confusion and inaccurate information. A commenter requested that HUD, in partnership with the Department of Commerce's National Telecommunications and Information Administration (NITA), pre-certify broadband coverage data and maps that communities could use.

With respect to the Form 477, commenters wrote that the data has not been mapped and is difficult to access. To address these concerns, the commenters suggested that HUD allow Consolidated Plans to include data on broadband access collected directly through State and local broadband efforts. A commenter wrote that currently 37 States still have active broadband planning teams with data and resources that are likely more up-to-date than current federal data. Another commenter wrote that few communities have the ability and knowledge base to ''consult with . . . broadband internet service providers'' as would be required in proposed revisions to the consultation and citizen participation requirements. The commenter stated that HUD would need to provide substantial levels of policy and practical guidance to enable local staff to determine broadband ''needs'' for a specific subset of the overall population within each community.

HUD Response: While HUD does not agree with the commenters' objections to use of the National Broadband Map and Form 477, it is sympathetic to the general concerns expressed regarding the need to ensure that data sources are accurate and up-to-date. As noted in response to an earlier comment, this final rule does not codify specific recommended data sources. These will now be listed in guidance to facilitate updating as new data becomes available or data sources are re-named. It was not HUD's intent to mandate use of the National Broadband Map or Form 477. While HUD plans to provide pre-populated data in the electronic Consolidated Plan template, jurisdictions are not required to use such data and may use alternative data. The template's default data can be replaced or complemented by other data identified by the jurisdiction, for which the source is cited in the jurisdiction's Consolidated Plan. Further, HUD is committed to aiding jurisdictions with meeting the new requirements contained in this rule, and will supplement the rule with guidance as may be needed. As it does on other components of the Consolidated Plan, HUD will provide technical assistance and training materials to assist jurisdictions in meeting these new requirements.

Comment: The rule offers no suggested sources for States and communities to assess the extent to which the need for connection to the broadband service in the household units is being met. A commenter wrote that the data sources identified in the rule are not adequate to permit jurisdictions to assess the extent to which broadband services have actually penetrated the market of low-to-moderate income households in a given community. This commenter suggested two readily available federal sources for actual household connection data which should be suggested, but not required, by the rule. In contrast to commenters that submitted concerns about the data in the immediately preceding comment, the first source recommended by the commenter is FCC's Form 477 Census Tract Data on Internet Access Services, which the commenter stated provides a summary of reported connections for each tract and compares the total to the tract's total Census households. The commenter stated that this form, along with the FCC's national interactive color-coded map, make it reasonably easy to rank or map a state or community's Census tracts by household broadband penetration and have an easy first look at their tracts' penetration levels. The second source recommended by the commenter is the American Community Survey (ACS) data on household computer ownership and Internet access.

HUD Response: HUD appreciates the suggestions of additional data sources that may be useful to jurisdictions in preparing the required broadband assessment. HUD notes that the Form 477 is already included as a suggested data source. As previously addressed in this preamble, jurisdictions may either use the data sources suggested by HUD or other data identified by the jurisdiction, for which the source is cited in the jurisdiction's Consolidated Plan.

Comment: Do not ignore other causes of digital exclusion other than availability in the housing market analysis. A commenter stated that in creating a framework through its Consolidated Plan process for community dialogue leading to possible action toward greater digital access and inclusion, HUD should recognize that low rates of household Internet access among low- and moderate-income residents can be the result of many causes other than physical availability of service, including the following: Unaffordability of available Internet services to low-income residents; a lack of convenient opportunities for residents to gain digital literacy skills; a failure to communicate the value of available Internet services and tools; and other factors specific to communities, such as language, cultural barriers, etc.

HUD Response: HUD appreciates the concerns raised by the commenter. The Consolidated Plan contains both a housing need assessment and a non-housing community plan development component. HUD encourages jurisdictions to look at their broadband and resiliency needs across all components of the Consolidated Planning process. The jurisdiction has the ability to include an infrastructure assessment as well as public services assessment as part of its non-housing community development plan. HUD is cognizant that the adoption of broadband internet is an equally critical component of closing the digital divide and is contingent on many factors other than the availability of internet service. This rule, however, is but one part of HUD's broader efforts to expand the access and use of broadband internet. HUD also notes that the jurisdictions are free to expand their broadband assessment to include the types of issues listed by the commenter, based on their identification of local needs and circumstances.

Comment: Consultation requirements should include other identified stakeholders. Several commenters expressed support for the proposed rule requiring the consultation of broadband stakeholders in preparation for creating Consolidated Plans. The commenters suggested additional stakeholders that should be included in the consultation

process. One commenter specifically recommended that State planning programs be identified as possible partners in the locations they are available. Another commenter suggested that HUD clarify that public-private initiatives or partnerships (like a local community technology planning team or task force, which might not have a formal legal identity or corporate status) will qualify as an ''organization engaged in narrowing the digital divide.'' The commenter stated that the needs of often-voiceless, low-income communities with low adoption rates will not always register with broadband providers, but allowing these public-private organizations to voice the needs of low-income communities can help establish a business case for improved service offerings and options. Yet another commenter suggested adding language to include ''local social service and public agencies providing digital literacy, public internet access, or other broadband adoption programs.'' The commenter stated that these may include, but are not limited to: Adult literacy and education providers; K–20 schools; youth program providers; libraries; and small business and workforce training program providers.

HUD Response: The purpose of the Consolidated Planning process is to aid jurisdictions, as a whole, in identifying their housing and community development needs and funding priorities. The Consolidated Plan builds on a participatory process that includes citizens, organizations, businesses, and other stakeholders. In carrying out these already required consultations, HUD encourages jurisdictions to conduct the broadest possible outreach, including State and local agencies and other entities identified by the commenters.

Comment: Require grantees to submit progress reports in closing the digital divide. A commenter recommended that HUD revise the language at the final rule stage to state that after submission and acceptance of the Consolidated Plan, communities are expected to develop a reasonable and achievable strategy for closing the digital divide. The commenter stated that this language should leave no doubt as to the expectation that progress will begin immediately. The commenter stated that HUD should mandate that communities provide regular progress reports as they take their first steps into closing the digital divide.

HUD Response: Grantees are currently required to submit progress reports on the priority needs and goals they select during the Consolidated Planning process. Under HUD's Consolidated Plan regulations, within 90 days after the end of its program year, a grantee must submit a Consolidated Annual Performance and Evaluation Report (CAPER) to HUD. The primary purpose of the CAPER is to report on accomplishments of funded activities within the program year and to evaluate the grantee's progress in meeting one-year goals it has described in the Annual Action Plan and long-term goals it has described in the Consolidated Plan.

Comment: Encourage jurisdictions to partner with successful ConnectHome communities. A commenter stated that to ease and facilitate the assessment of broadband needs as part of the Consolidated Planning process, HUD should recommend and/or establish connections between applicants and successful ConnectHome communities that have developed and implemented their own connection plans. The commenter stated that this additional resource would dramatically increase the information available to each community while further reducing administrative and financial costs as communities share best practices. Another commenter suggested that HUD document and widely share data and promising practices from the 28 ConnectHome pilot communities, and assess what strategies have been most (and least) successful in supporting broadband access and adoption. The commenter encouraged HUD to regularly undertake and make public an analysis of findings from broadband access and adoption strategies jurisdictions reported in their Consolidated Annual Performance and Evaluation Report or other relevant reporting processes. The commenter also requested that HUD establish a single-stop data center that contains links to all relevant resources.

HUD Response: HUD agrees that ConnectHome communities could be a valuable resource for other jurisdictions. HUD encourages collaboration, where possible, between jurisdictions in developing and implementing their plans to expand access to broadband internet. As the commenter notes, such collaboration can be a cost-effective way to share successful strategies and best practices. HUD will seek ways to facilitate sharing of best practices of the ConnectHome communities. For example, HUD is developing playbook that provides suggestions and best practices for communities seeking to expand digital inclusion. The suggestions identified in the playbook are based on HUD's experience and expertise developed during implementation of the ConnectHome initiative.

Comment: Examine how HUD programs may limit the ability of grantees to invest funds in broadband access and adoption. A commenter suggested that HUD assess how existing rules and legislation governing HUD programs may limit the ability of grantee governments to invest funds in broadband access and adoption. The commenter offered as an example of such limitation the ''public services cap'' on grantees' permissible use of CDGB grant funds. The commenter stated that any local investment of CDBG funds in digital literacy training, technical assistance or even consumer premises equipment to support household internet adoption is currently classified as a public service expenditure and limited by the cap, which means it competes for a fixed pool of dollars with all kinds of ongoing community needs such as emergency homeless shelters.

HUD Response: As with all its programs and initiatives, HUD will, on an ongoing basis, review and assess the impact of legislative and regulatory requirements on program participants. Where appropriate or necessary to policy goals, HUD will seek changes through the appropriate vehicle, rulemaking, legislation or other policy action that may facilitate a change. However, HUD does not agree with the commenter that the CDBG program unduly limits activities to expand access and adoption of broadband internet. The CDBG regulations allow the use of grant funds for a wide range of eligible activities including public services, which is not the only activity a community can use to address its broadband needs. Grantees have the flexibility and responsibility for developing their own programs and funding priorities, based on their own assessment of their needs. Additionally, other funding associated with the Consolidated Plan, such as HOME and Housing Trust Fund funds, may be used for the actual costs of constructing or rehabilitating single family or multifamily housing, including the costs to wire the property for broadband internet, which could help address a community's broadband needs.

C. Specific Comments on Increasing Resilience to Natural Hazards

Comment: Include a definition of resilience. A commenter stated that resilience is a term that means many things to many people. The commenter recommended that a definition of resiliency be included in HUD's regulations in 24 CFR part 91.

HUD Response: HUD will provide technical assistance and training

materials to assist jurisdictions in meeting the new requirements. This will include guidance to communities on how to assess their resilience to natural hazard risk. As a guide, HUD points to the definition of the term ''resilience'' used by HUD for the National Disaster Resilience Competition, which is already familiar to HUD grantees and communities participating in HUD programs. Specifically, in that notice of funding availability, HUD defined resilience to mean ''the ability to anticipate, prepare for, and adapt to changing conditions and withstand, respond to, and recover rapidly from disruptions.''

Comment: For consistent evaluation of resilience, HUD should work with other Federal agencies to develop guidance and tools that support communities and practitioners. A commenter encouraged HUD to work with other Federal agencies to develop guidance and tools that support communities and practitioners, and noted that several tools already exist and were identified in the proposed rule. The commenter specifically noted as helpful tools the Integrated Rapid Visual Screening (IRVS) Tool, the Community Resilience Planning Guide, and Hazus MH FEMA. The commenter stated that to the extent practical, the resilience evaluations required within the Consolidated Plan should mirror requirements contained in other hazard identification and mitigation plans conducted at the State and local level. The commenter stated that this should include at a minimum the State Hazard Mitigation Plan required to receive certain funding from the Federal Emergency Management Agency (FEMA), the Threat and Hazard Identification and Risk Assessment (THIRA) process, and planning and assessment requirements associated with Department of Transportation, Economic Development Administration and other Federal programs. The commenter also stated that the rule should require consultation with additional community resources such as geological and meteorological agencies, energy and sustainability offices, and building code departments. Another commenter urged HUD to include academic institutions as resources that should be consulted. Yet another commenter stated that in addition to supporting communities' access to critical governmental resources for assessing resilience to natural hazards, HUD should convene a group of expert stakeholders from the non-governmental organization community to strategize how to implement effective resilience tactics, as well as hosting a broader clearinghouse of readily available online data sources—including those available in the private sector and nongovernmental organizations—to achieve resilience solutions.

HUD Response: HUD notes that the final rule already provides jurisdictions with the flexibility to consult with community resources such as those identified by the commenter. HUD also strongly encourages jurisdictions to leverage and integrate existing assessments of climate and hazard related risks into their Consolidated Plan analysis where the jurisdiction deems appropriate. With regard to the suggestion that HUD work with other Federal agencies, HUD notes that it currently works with other agencies to develop guidance and tools that support communities and practitioners. For example, HUD conferred with various Federal agencies in the development of this rule. More recently, HUD has worked collaboratively with a group of expert stakeholders from non-governmental organizations to strategize about the implementation of effective resilience tactics to achieve resilience solutions through its National Disaster Resilience Competition (NDRC).

Comment: Establish minimum investment requirements. A commenter stated that while the identification of hazards and opportunities to mitigate them is an important step to making communities more resilient, once such efforts are institutionalized, the commenter expressed hope that HUD will establish requirements that communities invest in a minimum level of mitigation before Federal investments are made within the community. The commenter stated that such requirements will enhance the community and assure limited federal funds are used responsibly.

HUD Response: HUD agrees with the commenter that identification of hazards and opportunities to mitigate them is an important first step, and appreciates the suggestion for establishing minimum investment requirements. However, such a mandate runs contrary to the approach HUD has taken with its Consolidated Planning regulations.

Comment: Expand the organizations with which jurisdictions should consult. A commenter stated that the proposed rule is a step in the right direction, but that to further this important work, jurisdictions should be required to consult not only with the list of proposed agencies, but also with a wide range of organizations working on adaption to the decline of cheap fossil fuel energy, the depletion of fresh water, access to fresh food, complex environmental crises like climate change and biodiversity loss, and the issues of social, economic and health equity. The commenter stated that such information is consistent with HUD's new AFFH Data and Mapping Tool and could be included as part of the assessment of fair housing. The commenter stated that limiting mandatory consultation to ''agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies'' is too narrow for a full evaluation of vulnerability to natural hazards and ensuring resilience of low- and moderate-income households.

The commenter stated that a number of public and private organizations not listed in the proposed rule are immersed in activities that enhance community resilience. For example, organizations promoting home weatherization engage in energy conservation, help prepare communities for a decline in cheap energy, and contribute to efforts to improve neighborhood conditions; organizations that focus on public health are able to provide local data and findings on health inequity, such as asthma rates and food deserts; and community organizations, colleges/universities, and other non-profits are currently looking at and responding to the climate crisis. The commenter stated that without casting a broad net, planning efforts will be incomplete and continue the ill-suited forms of planning for the new realities our communities face. Another commenter stated that it was important for HUD grantees to consult with agencies responsible for economic development and housing in the private sector. The commenter stated that it is important to add this additional category because the current HUD proposal seems to only cover agencies responsible for ''public land and water resources,'' which would exclude the many low- and moderate-income facilities regulated and affected by local agencies responsible for economic development and housing in the private sector.

HUD Response: The commenters offer very good suggestions on agencies with whom to consult with respect to resilience. However, HUD does not mandate consultation with these entities. As already noted in this preamble, the approach taken in the Consolidated Plan is for jurisdictions to determine their needs, decide which needs to fund, conduct outreach to residents in their communities, and consult with individuals and agencies that will aid them in good community

planning. The citizen participation and consultation process provides the opportunity for a wide variety of stakeholders to participate the in the Consolidated Planning process. As mentioned previously, the Consolidated Plan includes a non-housing community development plan that provides opportunity for a jurisdiction to assess its neighborhood conditions, including economic needs, in its efforts to develop viable communities.

Comment: Natural hazard risks should be assessed by the appropriate government agency, not the government's housing and/or economic development agency, and be done on a project-level basis. A commenter that is a government economic development agency stated that it is not the appropriate agency to assess natural hazard risks for low- and moderate-income households, and that there are other governmental organizations charged with assessing mitigating these risks. The commenter stated that it can consult with the governmental agency charged with assessing and mitigating risks and seek their input on Consolidated Planning, but that it would not be appropriate for the economic development agency to have a directive or management role in this effort. The commenter also stated it is more impactful for this type of review to take place at the project level. Once funded, each project goes through an environmental review process. Many hazards are assessed, ranging from hazardous waste and radiation to floodplain analysis. The commenter stated that if a project site is in the floodplain, it must go through a potentially lengthy and burdensome process to determine if they can move the project or mitigate the impact.

HUD Response: HUD addressed a similar comment early on in this Section of the preamble that requested that HUD not mandate broadband or natural hazards risk resilience assessments by a housing and/or economic development agency when a State or local government has other agencies charged to address these matters. As noted by HUD in response to that earlier comment, HUD agrees that jurisdictions often already have assessments undertaken by other agencies regarding both broadband and resiliency. This final rule directs agencies to existing resources to guide them in these two areas. Through its Consolidated Planning process, HUD encourages a collaborative consultation process instead of duplication of efforts. Given that HUD also encourages jurisdictions to use other plans that identify community needs and priorities, the Consolidated Planning process provides the opportunity for jurisdictions to reference existing plans and is not requiring a separate, distinct study to be undertaken. It is up to each State or local government to determine which agencies or departments will be responsible for developing its Consolidated Plan and for administering the different HUD funding covered by HUD's Consolidated Plan regulations. All jurisdictions (including States) are certainly encouraged to ensure collaboration among internal and external agencies and staff to take full advantage of all relevant expertise.

Comment: The National Climate Assessment and the Climate Resilience Toolkit are confusing. A commenter stated that the National Climate Assessment and the Climate Resilience Toolkit are very confusing. The commenter stated that it was hard to understand how a State could use this toolkit in a meaningful way in developing its Consolidated Plan. The commenter stated that it shares data from its State's Homeland Security and Emergency Management Department in its plans and then relies on site-specific environmental reviews once projects are funded. The commenter stated that these would seem to be better approaches to assessing natural hazard risks to low-and moderate households for States. In contrast to this comment, another commenter stated that the Climate Resilience Toolkit is useful for screening and planning purposes. This commenter also stated that while GIS tools that integrate topography, hydrology, and social science are readily available on the Internet, these tools are not likely to be commonly used by housing programs. The commenter suggested that HUD provide technical assistance in the form of webinars and workshops to train housing staff on the use of these tools, and stated that training programs are readily available through NOAA and EPA.

Another commenter stated that many of the natural hazard resources named in HUD's proposed rule are not data sources, but instead are plans and toolkits with already-made strategies [§ 91.210(a)(5)(i), § 91.210(a)(5)(ii), and § 91.210(a)(5)(iii)]. The commenter stated that the housing market analysis section of the Consolidated Plan is intended to contain data with analysis that will inform the later sections which include strategies and goals. The commenter stated that because HUD is regulating the use of plans and strategies in this data section of the Consolidated Plan, HUD is taking away the grantee's efforts to create place-based strategies based on current data.

HUD Response: By referring to resources, plans, and toolkits, HUD is encouraging jurisdictions to review what's been proposed and discussed, and see whether it fits into the Consolidated Planning efforts. HUD is developing guidance, resources, and tools to help grantees work with these sources. Further, as already noted in this section, HUD plans to provide pre-populated data in both CPD Maps and the eCon Planning Suite template. Jurisdictions may use alternative data in the Consolidated Planning process and are not required to use the default data provided by the system. Default data can be replaced or complemented by specifying a survey or administrative data source. If an alternative source is specified, the jurisdiction will be required to identify the source and provide basic information on how the data was collected. The jurisdiction also has the option of providing notes under each table in which alternate data is used to indicate what was changed or why the change was necessary. Because the public can view much of the default data in CPD Maps, these notes may be useful to avoid confusion during the citizen participation process.

Comment: Expand approved sources of data to be made available to jurisdictions for use, and require use of local data. A commenter stated that jurisdictions should be required to both identify and include local data when describing vulnerabilities of housing occupied by low- and moderate-income households due to increased natural hazards. The commenter stated that, for example, local data regarding the quality of a jurisdiction's housing stock should be considered in the planning process, and similarly, geographic location of the low- and moderate-income households (which is available through HUD's AFFH Assessment Tool Map) should be addressed in planning with regard to vulnerabilities of housing.

HUD Response: As noted earlier, jurisdictions are already able to use alternative data. While HUD plans to prepopulate data in both CPD Maps and the eCon Planning Suite template, jurisdictions may use alternative data in the Consolidated Planning process and are not required to use the default data provided by the system. If an alternative source is specified, the jurisdiction will be asked to identify the source and provide basic information on how the data was collected.

Comment: Issue guidance on how to undertake the required analysis. A commenter strongly encouraged HUD to establish more specific guidance for jurisdictions on how to complete the

required analysis. The commenter stated that such guidance should not only include a step-by-step process for assessing community vulnerability to climate change and natural hazard risks but also should facilitate the identification and incorporation of actions that build resilience to these risks in the Consolidated Planning process. The commenter stated that developing more detailed guidance also would reduce the burden placed on jurisdictions by providing greater clarity on how to conduct a robust resiliency analysis, and would enhance consistency among and improve confidence in resiliency analyses as well as facilitate the review and approval of Consolidated Plans by HUD.

HUD Response: HUD plans to provide further guidance once the rule is implemented, but since the Consolidated Plan is completed through the e-Con Planning Suite template, the template provides a uniform and flexible template that helps ensure the Consolidated Plan is complete per the regulations found in 24 CFR part 91. Each screen in the template cites the specific section(s) of the regulations that the screen is designed to capture. Each screen includes a combination of prepopulated data tables and narrative sections that set a baseline for HUD's expectations for the amount of information required. HUD anticipates providing this same format for both broadband and resilience assessment requirements.

Comment: Ensure that grantees take steps to reduce the risks of natural hazards. A commenter stated that HUD's proposed rule does not ensure that grantees will take steps to reduce these risks or disparities. The commenter stated that, as written, the proposed rule explicitly, ''does not mandate that actions be taken to address . . . climate change adaptation needs'' and requires nothing of grantees beyond gaining knowledge of climate change risks. The commenter stated that HUD's rule should ensure that grantees take reasonable and adequate steps to both assess climate change risks and develop and incorporate reasonable and effective climate change risk mitigation strategies into their Consolidated Plans and project designs. The commenter stated that without such strategies, the rule would continue to allow HUD to invest in community development projects that may not be resilient to the effects of climate change and could put communities at risk. This commenter also stated that to ensure some level of accountability HUD's final rule should state that if grantees invest HUD funds in community development projects that do not include designs and/or strategies to reduce identified climate risks, HUD could reduce funding to that grantee in the future.

HUD Response: Through the Consolidated Planning process, jurisdictions will continue to have the flexibility to determine their own needs and priorities for distributing HUD funds. The rule provides for the incorporation of broadband and resilience to natural hazard risks into the existing needs assessment and market analysis required under the Consolidated Planning process. However, it is up to the jurisdiction through its needs assessment process to determine whether to select either of these issues as a priority need. The grantee would identify the financial and organizational resources available to address its priority needs. In the Consolidated Planning process, the level of resources available will play a key role in determining strategies and goals. Once broadband access or increasing resilience have been selected as a priority need, grantees would then develop a set of goals based on the availability of resources, and local organizational capacity. However, the statutory authority for the Consolidated Plan process and the formula funding programs remain the same. HUD has no authority to require that grantees carry out certain types of activities or to achieve specific objectives.

Comment: Look at climate risk between disasters, not just risk post-disaster. A commenter stated that it is essential that jurisdictions look at climate risk between disasters, not just in a post-disaster context. The commenter stated that identifying vulnerabilities during calmer times gives the jurisdiction the opportunity to address those challenges before the next disaster. The commenter stated that HUD should be mindful that pre-disaster planning is a preferable process, as post-disaster—when communities are in crisis—is an incredibly difficult time to be strategic. In response to HUD's specific inquiry regarding post-disaster reviews, another commenter stated that it strongly believes that jurisdictions should be required to conduct reviews and revisions of their resilience analysis following any major disaster. The commenter stated that this post-disaster review would not only enable jurisdictions to determine if the disaster introduced new hazard risks, but would also serve an important function in forcing jurisdictions to face and reconcile weaknesses and oversights within their previous plans.

HUD Response: HUD agrees that it is important to review needs not only in a post-disaster context but also between disasters. The inclusion of an assessment of resilience in the Consolidated Plan is not intended to apply to the post-disaster context, but rather is designed to help all grantees be better prepared if a disaster were to occur in the future. The Consolidated Plan is based on a community's strategic plan over the next 3–5 years. The use of climate resilience data will help a community identify its vulnerabilities and determine whether there are priorities that the jurisdiction can address, as well as develop preventive measures to address known issues in advance of a disaster occurring. HUD appreciates the commenter responding to its specific inquiry about post-disaster reviews. HUD is not mandating such review in this final rule but encourages jurisdictions to undertake these types of assessments.

Comment: Ensure communities are aware of local hazard mitigation plans. A commenter stated that guiding communities to consider and integrate this information into their Consolidated Plans is an excellent move by HUD, assuring that risk reduction dovetails with a community's economic and social development goals. The commenter stated that its concern is that communities may not be aware of the existence of local hazard mitigation plans, and may unfortunately duplicate efforts that have already been expended on their behalf. The commenter stated that its hope is that in the guidance for the rule, HUD would direct communities to explore with local emergency managers and planners the existence of current local hard mitigation plans, consider the content of those plans (which often includes information about low-income areas and vulnerability), and then use the information to inform decisions made in the Consolidated Plans, referring to the mitigation plan documents for justification or further data. The commenter stated that in this way, there will be no duplication of effort, no confusion as to valid risk assessment data, and the integration of mitigation measures, policies and programs will be a seamless practice across a community's planning portfolio.

HUD Response: HUD's rule addresses the commenter's concern by requiring jurisdictions to consult with State and local emergency managers (who are responsible for developing the State and local hazard mitigation plans).

Comment: Coordinate and align with existing Federal, State and local natural hazard risk management plans. A commenter stated that while it understands HUD's intent to ensure that

communities consider resilience to natural hazard risks as a part of the Consolidated Plan, the proposal goes about it in the wrong way. The commenter stated that instead of asking communities to undertake potentially new, unnecessary, and duplicative analysis, HUD should focus on encouraging coordination and alignment with the pre-existing Federal, State, and local plans that they already follow to comply with the various programs that focus on resilience and natural hazard planning. The commenter stated that it is concerned by the list of resources in the rule and cites to the ''Impact of Climate Change and Population Growth on the National Flood Insurance Program Through 2100'' as an example of such concern. The commenter expressed concerns that the implication that this study could be included as the basis of specific management decisions at a community level, since it would seem to run counter to the scope and objectives of the study. The commenter stated that the uncertainty that remains in accounting for mapping future conditions, such as risks due to changes caused by climate change, is the very reason that multiple segments of the National Flood Insurance Program (NFIP) continue to examine the issue and how it might best be addressed. The commenter stated that given that it is an ongoing topic currently being studied by issue area experts such as the Technical Mapping Advisory Council (TMAC), this is not something that individual communities should be expected to get out in front of. The commenter further stated that as the NFIP falls completely outside the jurisdiction and expertise of HUD, the potential unintended consequences may not be fully understood. The commenter stated that if HUD chooses to move forward with promulgation of this rulemaking and provide communities with a list of suggested resources for them to consider, HUD should concentrate on more practical planning resources which will still provide communities flexibility such as the Community Resilience Planning Guide for Buildings and Infrastructure Systems prepared by the National Institute of Standards and Technology (NIST)

HUD Response: HUD agrees that it will continue to encourage coordination and alignment with the pre-existing Federal, State, and local plans that focus on resilience and natural hazard planning is a benefit to the jurisdiction.

Comment: Require States and local jurisdictions to take action to improve natural hazard resilience to protect Federal taxpayer investments. A commenter expressed strong support for the rule but expressed disappointment that the rule does not require actions to be taken. The commenter stated that it believes that there should be a much stronger attempt to compel States and communities to take action to improve natural hazard resilience to protect federal taxpayer investments—not merely just require an assessment of it.

HUD Response: HUD reiterates that the Consolidated Planning process provides States and local government the flexibility and responsibility to determine where HUD funding should be expended. Through the Consolidated Planning process, jurisdictions will continue to have the flexibility to determine their own needs and priorities for distributing funds covered by the Consolidated Plan process. It will be up to a jurisdiction through its needs assessment process to determine whether to select either of these issues as a priority need. HUD has no authority to require that grantees carry out certain types of activities or to achieve specific objectives.

Comment: Ensure that jurisdictions comply with the Federal Flood Risk Management Standard (FFRMS). A commenter stated that HUD must ensure that jurisdictions funded by HUD comply with the FFRMS, established by Executive Order 13690 (E.O. 13690) and Executive Order 11988 (E.O. 11988). The commenter stated that the FFRMS not only reinforces the original intent of E.O. 11988—''to avoid to the extent possible the long and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative,'' but expands upon it by requiring the federal government to ''take action, informed by the best-available and actionable [climate] science,'' to improve the nation's resilience to flooding.

The commenter stated that the importance of transitioning from an emphasis on flood protection to a broader focus on flood risk management cannot be overstated because floodwaters can never be completely controlled, nor the risks associated with flooding completely eliminated. This is especially true when the impacts of climate change are considered.

HUD Response: HUD is addressing this issue through separate rulemaking.

IV. This Final Rule

As noted in Section III of this preamble, this final rule makes one change from the proposed rule. In response to public comment, HUD no longer identifies in the regulatory text specific recommended sources for Consolidated Plan jurisdictions to consult for both assessments. When included in the regulatory text, commenters thought these were required sources to consult, rather than recommended sources. HUD agrees with the commenters that such sources may change over time or their names may change, or new sources will be introduced. HUD agreed with the commenters that the better approach is to list these sources outside of the regulation, in guidance.

Consultation and citizen participation requirements (§§ 91.100, 91.105, 91.110, 91.115). HUD's currently codified Consolidated Plan regulations require that local governments and States consult public and private agencies that provide assisted housing, health services, and social and fair housing services during preparation of the Consolidated Plan. Under the currently codified regulations, local governments and States are also required, in their citizen participation plan, to encourage the participation of local and regional institutions and businesses in the process of developing and implementing their Consolidated Plans. This rule amends these requirements to specify that local governments and States must consult with public and private organizations, including broadband internet service providers, and other organizations engaged in narrowing the digital divide. Further, the citizen participation plan must encourage their participation in implementing any components of the plan designed to narrow the digital divide for low-income residents. The rule also requires local governments and States to consult with agencies whose primary responsibilities include the management of flood prone areas, public land, or water resources, and emergency management agencies in the process of developing the Consolidated Plan.

Contents of Consolidated Plan (§§ 91.5, 91.200, 9.200, 91.210, 91.300, 91.310). The rule makes several changes to these sections in subparts C and D of HUD's regulations 24 CFR part 91, which establish the required contents of the Consolidated Plan.

First, the rule requires that, in describing their consultation efforts, local governments and States describe their consultations with public and private organizations, including broadband internet service providers, other organizations engaged in narrowing the digital divide, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies.

Second, the jurisdiction must also describe broadband needs in housing occupied by low- and moderate-income households based on an analysis of data, identified by the jurisdiction, for its low- and moderate-income neighborhoods.

Third, the rule requires the jurisdiction to provide an assessment of natural hazard risk to low- and moderate-income residents based on an analysis of data identified by the jurisdiction. Possible sources of such data include (1) the most recent National Climate Assessment, (2) the Climate Resilience Toolkit, (3) the Community Resilience Planning Guide for Buildings and Infrastructure Systems prepared by the National Institute of Standards and Technology (NIST), or (4) other climate risk-related data published by the Federal government or other State or local government climate risk related data, including FEMA-approved hazard mitigation plans which incorporate climate change. HUD encourages the use of other plans, including a jurisdiction's hazard mitigation plan, in identifying community needs and priorities.

By undertaking these two analyses as part of their Consolidated Planning, HUD believes that jurisdictions become better informed of two emerging community needs in the world today: (1) The importance of broadband access, which opens up opportunity to a wide range of services, markets, jobs, educational, cultural and recreational opportunities; and (2) the importance of being cognizant and prepared for environmental and geographical conditions that may threaten the health and safety of communities. As noted earlier in this preamble, HUD is not mandating that jurisdictions take actions in either of these areas, but HUD believes that these are two areas that must be taken into consideration in a jurisdiction's planning for its expenditure of HUD funds.

V. Findings and Certifications

Regulatory Review—Executive Orders 12866 and 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are ''outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned. Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. This rule was determined to be a ''significant regulatory action'' as defined in section 3(f) of the Executive Order (although not an economically significant regulatory action, as provided under section 3(f)(1) of the Executive Order).

As noted, the regulatory amendments are designed to assist Consolidated Plan jurisdictions in assessing two emerging needs of communities in this changing world. Specifically, the final rule directs States and local governments to consider broadband access and natural hazard resilience in their consolidated planning efforts by using readily available data sources. Where access to broadband Internet service is either not currently available or only minimally available, jurisdictions will be required to consider ways to bring broadband Internet access to low- and moderate-income residents, including how HUD funds could be used to narrow the digital divide for these residents. Further, where low- and moderate-income communities are at risk of natural hazards, including those that may be exacerbated due to climate change, States and local governments must consider ways to incorporate hazard mitigation and resilience into their community planning and development goals, including the use of HUD funds.

Benefits and Costs of the Final Rule

A. Benefits

The Consolidated Planning process benefits jurisdictions by establishing the framework for a community-wide dialogue to identify housing and community development needs for 1,255 jurisdictions, including 1,205 localities and all 50 States. Rather than a piecemeal approach to planning based on differing program requirements, the Consolidated Plan enables a holistic approach to the assessment of affordable housing and community development needs and market conditions. HUD established the Consolidated Plan, through a 1994 final rule, for the explicit purpose of linking disparate program planning requirements, thereby ensuring ''that the needs and resources of . . . [jurisdictions] are included in a comprehensive planning effort to revitalize distressed neighborhoods and help low-income residents locally.'' [3] The Consolidated Plan replaced a dozen separate planning mechanisms with a unified approach enabling communities to make data-driven, place-based investment decisions.

New housing and community development needs have arisen in the 21 years since the Consolidated Plan was created. Two of the most pressing emerging needs facing communities in the twenty-first century are the digital divide and climate change. Despite the benefits described above of a comprehensive approach to planning and the allocation of scarce Federal dollars, jurisdictions are not currently required to consider either the digital divide or climate change resilience in development of their Consolidated Plans. Jurisdictions may therefore place a low priority on assessing, and using Federal dollars to address, these critical issues relative to other needs included in the Consolidated Plan. As a worst-case scenario, omitting these needs from the consolidated planning process could mean that communities elect to defer considering these needs.

The direct benefits provided by the final rule are, therefore, to help ensure that Consolidated Plan jurisdictions consider broadband access and natural hazard resilience as part of their comprehensive assessment and planning efforts, including their determination of the most effective use of HUD grant funds.

B. Costs

The costs of the revised consultation and reporting requirements will not be substantial since the regulatory changes made by this final rule build upon similar existing requirements for other elements covered by the consolidated planning process rather than mandating completely new procedures.

A complete Consolidated Plan that contains both a Strategic Plan and Annual Action Plan is submitted once every 3 to 5 years. An Annual Action Plan is submitted once a year. HUD data indicate that the cost of preparing the Strategic Plan for a locality is $5,236, and for a State is $14,382. The cost of preparing the Annual Action Plan is $1,904 for a locality and $6,392 for each State. HUD estimates that the increase in costs resulting from addressing the new elements under the new rule will be minimal. Specifically, HUD estimates that cost to a locality of preparing the Strategic Plan will increase to $5,406, while the cost to a State will increase to $14,552. This represents an increase of $170 per locality as well as per State.

[3] 60 FR 1878 (January 5, 1994).

The cost of preparing the Annual Action Plan will also increase by the same amount, to $2,074 for a locality and $6,562 for a State. While these are not trivial amounts, they are not substantial when considered in proportion to HUD grant funding (for example, the average CDBG grant to entitlement communities in FY 2012 was approximately $1.7 million).[4]

The amounts of the increased costs are based on HUD's estimate of the increased number of hours it will take jurisdiction to complete the new assessments. The table below summarizes the cost of the increased burden hours across all jurisdiction that submit a Consolidated Plan.

Consolidated plan tasks	Number of respondents	Increased burden hours	Cost per hour[5]	Completed consolidated plan
Localities				
Strategic Plan Development	1205	5	34	$204,850
Action Plan Development	1205	5	34	204,850
States				
Strategic Plan Development	50	5	34	8,500
Action Plan Development	50	5	34	8,500
Total				*$426,700*

Further, and as noted elsewhere in this preamble, HUD has taken several actions to further mitigate the cost of the regulatory changes. Jurisdictions will be able to base the required assessments on data that are already readily available on the Internet, and provided to grantees via the eCon Planning Suite. Therefore, jurisdictions will not have to incur the expense and administrative burdens associated with collecting data. Moreover, the proposed rule does not mandate that actions be taken to address broadband needs or climate change needs. Consolidated plan jurisdictions are in the best position to decide how to expend their HUD funds. However, HUD believes that the additional analyses required by this proposed rule may highlight areas where expenditure of funds would assist in opening up economic opportunities through increased broadband access or mitigate the impact of possible natural hazard risks and climate change impacts. HUD leaves it to jurisdictions to consider any appropriate methods to promote broadband access or protect against the adverse impacts of climate change, taking into account the other needs of their communities, and available funding, as identified through the consolidated planning process.

The docket file is available for public inspection in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, please schedule an appointment to review the docket file by calling the Regulation Division at 202–402–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800–877–8339.

Paperwork Reduction Act

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), and assigned an OMB control number 2506–0117.

Impact on Small Entities

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

The rule will amend the Consolidated Plan regulations to require that States and local governments consider (1) broadband Internet service access for low- and moderate-income households to; and (2) the risk of potential natural hazards, including those that may be exacerbated due to climate change, to low- and moderate-income residents in their jurisdictions. As noted above under the heading ''Regulatory Review'' in the ''Findings and Certifications'' section of this preamble, HUD's analysis of the economic costs associated with the new regulatory requirements indicate that the final rule will not impose significant economic burdens on HUD grantees, irrespective of their size.

The RFA defines small governmental jurisdictions as those with a population of less than 50,000 persons.[6] As discussed above, the Consolidated Planning process establishes the framework for identifying housing and community development needs for 1,255 jurisdictions, including 1,205 localities and all 50 States. Although HUD does not have precise data indicating the number of small Consolidated Plan localities as defined by the RFA, data from the Decennial census indicates that there are 758 large incorporated places.[7] This leaves an estimated 447 small Consolidated Planning jurisdictions. This number represents a minority of 37 percent of all jurisdictions. As noted above, HUD estimates that cost to a locality of preparing the Strategic Plan (which is submitted once every 3 to 5 years) will increase by $170 per locality. The cost of preparing the Annual Action Plan will also increase by the same amount. Assuming submission of the Strategic Plan on 3-year cycle, the total annual costs directly attributable to this rule is $270 per locality.[8] The increased costs are minimal when considered in proportion to HUD grant funding. For example, and as noted above, the average CDBG grant to entitlement

[8] Diving the increased cost of preparing the Strategic Plan by three to arrive at an annual figure ($170/3 = $57), and adding to the $170 increased cost of preparing the Annual Action Plan. $57 + $170 = $270.

communities in FY 2012 was approximately $1.7 million).

Moreover, HUD has taken several measures to even further minimize the costs associated with complying with the rule. As discussed above, jurisdictions will have the option to complete the required assessments using data that has already been compiled and readily available on the Internet. Jurisdictions will, therefore, not have to incur the expense and administrative burdens associated with collecting and analyzing data. Further, the rule does not mandate that any actions be taken in response to the required assessments. Jurisdictions retain the discretion to consider the most appropriate methods to address their assessments, taking into account other needs identified as part of the Consolidated Planning process as well as financial and other resource constraints.

This rule therefore, which only requires consideration of the broadband and natural hazards resilience needs of low-income communities, has a minimal cost impact on all grantees subject to the Consolidated Planning process, whether large or small, and will not have a significant economic impact on substantial number of small entities.

Environmental Review

This final rule does not direct, provide for assistance or loan and mortgage insurance for, or otherwise govern, or regulate, real property acquisition, disposition, leasing, rehabilitation, alteration, demolition, or new construction, or establish, revise or provide for standards for construction or construction materials, manufactured housing, or occupancy. Accordingly, under 24 CFR 50.19(c)(1), this final rule is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Executive Order 13132, Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule imposes either substantial direct compliance costs on state and local governments and is not required by statute, or the rule preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This rule would not have federalism implications and would not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive Order.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments, and on the private sector. This rule would not impose any federal mandates on any State, local, or tribal governments, or on the private sector, within the meaning of the UMRA.

List of Subjects in 24 CFR Part 91

Aged, Grant programs—housing and community development, Homeless, Individuals with disabilities, Low- and moderate-income housing, Reporting and recordkeeping requirements.

For the reasons discussed in the preamble, HUD amends 24 CFR part 91 as follows:

PART 91—CONSOLIDATED SUBMISSIONS FOR COMMUNNITY PLANNING AND DEVELOPMENT PROGRAMS

■ 1. The authority citation for part 91 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 3601–3619, 5301–5315, 11331–11388, 12701–12711, 12741–12756, and 12901–12912.

Subpart A—General

■ 2. In § 91.100, add two sentences to the end of paragraph (a)(1) to read as follows:

§ 91.100 Consultation; local governments.

(a) * * *

(1) * * * When preparing the consolidated plan, the jurisdiction shall also consult with public and private organizations. Commencing with consolidated plans submitted on or after January 1, 2018, such consultations shall include broadband internet service providers, organizations engaged in narrowing the digital divide, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies.

* * * * *

■ 3. In § 91.105, add two sentences at the end of paragraph (a)(2)(ii) to read as follows:

§ 91.105 Citizen participation plan; local governments.

(a) * * *

(2) * * *

(ii) * * * The jurisdiction shall encourage the participation of public and private organizations. Commencing with consolidated plans submitted on or after January 1, 2018, such consultations shall include broadband internet service providers, organizations engaged in narrowing the digital divide, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies in the process of developing the consolidated plan.

* * * * *

■ 4. In § 91.110, add two sentences at the end of paragraph (a) introductory text to read as follows:

§ 91.110 Consultation; States.

(a) * * * When preparing the consolidated plan, the State shall also consult with public and private organizations. Commencing with consolidated plans submitted on or after January 1, 2018, such consultations shall include broadband internet service providers, organizations engaged in narrowing the digital divide, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies.

* * * * *

■ 5. In § 91.115, add a sentence at the end of paragraph (a)(2)(ii) to read as follows:

§ 91.115 Citizen participation plan; States.

(a) * * *

(2) * * *

(ii) * * * Commencing with consolidated plans submitted in or after January 1, 2018, the State shall also encourage the participation of public and private organizations, including broadband internet service providers, organizations engaged in narrowing the digital divide, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies in the process of developing the consolidated plan.

* * * * *

Subpart C—Local Governments; Contents of Consolidated Plan

■ 6. In § 91.200, redesignate paragraph (b)(3)(iv) as paragraph (b)(3)(vi), and add new paragraphs (b)(3)(iv) and (v) to read as follows:

§ 91.200 General.

* * * * *

(b) * * *

(3) * * *

(iv) Commencing with consolidated plans submitted on or after January 1, 2018, public and private organizations, including broadband internet service providers and organizations engaged in narrowing the digital divide;

(v) Commencing with consolidated plans submitted on or after January 1, 2018, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies; and

* * * * *

■ 7. Revise § 91.210(a) to read as follows:

§ 91.210 Housing market analysis.

(a) *General characteristics.* (1) Based on information available to the jurisdiction, the plan must describe the significant characteristics of the jurisdiction's housing market, including the supply, demand, and condition and cost of housing and the housing stock available to serve persons with disabilities, and to serve other low-income persons with special needs, including persons with HIV/AIDS and their families.

(2) Data on the housing market should include, to the extent information is available, an estimate of the number of vacant or abandoned buildings and whether units in these buildings are suitable for rehabilitation.

(3) The jurisdiction must also identify and describe any areas within the jurisdiction with concentrations of racial/ethnic minorities and/or low-income families, stating how it defines the terms ''area of low-income concentration'' and ''area of minority concentration'' for this purpose. The locations and degree of these concentrations must be identified, either in a narrative or on one or more maps.

(4) Commencing with consolidated plans submitted on or after January 1, 2018, the jurisdiction must also describe the broadband needs of housing occupied by low- and moderate-income households based on an analysis of data, identified by the jurisdiction, for its low- and moderate-income neighborhoods. These needs include the need for broadband wiring and for connection to the broadband service in the household units and the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

(5) Commencing with consolidated plans submitted on or after January 1, 2018, the jurisdiction must also describe the vulnerability of housing occupied by low- and moderate-income households to increased natural hazard risks associated with climate change based on an analysis of data, findings, and methods identified by the jurisdiction in its consolidated plan.

* * * * *

Subpart D—State Governments; Contents of Consolidated Plan

■ 8. In § 91.300, remove the word ''and'' following the semicolon at the end of paragraph (b)(3)(iii), redesignate paragraph (b)(3)(iv) as paragraph (b)(3)(vi), and add new paragraphs (b)(3)(iv) and (v) to read as follows:

§ 91.300 General.

* * * * *

(b) * * *

(3) * * *

(iv) Commencing with consolidated plans submitted on or after January 1, 2018, public and private organizations, including broadband internet service providers and organizations engaged in narrowing the digital divide;

(v) Commencing with consolidated plans submitted on or after January 1, 2018, agencies whose primary responsibilities include the management of flood prone areas, public land or water resources, and emergency management agencies; and

* * * * *

■ 9. Revise § 91.310(a) to read as follows:

§ 91.310 Housing market analysis.

(a) *General characteristics.* (1) Based on data available to the State, the plan must describe the significant characteristics of the State's housing markets (including such aspects as the supply, demand, and condition and cost of housing).

(2) Commencing with consolidated plans submitted on or after January 1, 2018, the State must describe the broadband needs of housing in the State based on an analysis of data identified by the State. These needs include the need for broadband wiring and for connection to the broadband service in the household units, the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

(3) Commencing with consolidated plans submitted on or after January 1, 2018, the State must also describe the vulnerability of housing occupied by low- and moderate-income households to increased natural hazard risks due to climate change based on an analysis of data, findings, and methods identified by the State in its consolidated plan.

BILLING CODE 4210–67–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9803]

RIN 1545–BL87

Treatment of Certain Transfers of Property to Foreign Corporations

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to certain transfers of property by United States persons to foreign corporations. The final regulations affect United States persons that transfer certain property, including foreign goodwill and going concern value, to foreign corporations in nonrecognition transactions described in section 367 of the Internal Revenue Code (Code). The regulations also combine certain sections of the existing regulations under section 367(a) into a single section. This document also withdraws certain temporary regulations.

DATES: *Effective date:* These regulations are effective on December 16, 2016.

Applicability date: For dates of applicability, see §§ 1.367(a)–1(g)(5), 1.367(a)–2(k), 1.367(a)–4(b), and 1.367(a)–6(j); 1.367(d)–1(j); and 1.6038B–1(g)(7).

FOR FURTHER INFORMATION CONTACT: Ryan A. Bowen, (202) 317–6937 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in the regulations have been submitted for review and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545–0026.

The collections of information are in § 1.6038B–1(c)(4) and (d)(1). The collections of information are mandatory. The likely respondents are domestic corporations. Burdens

associated with these requirements will be reflected in the burden for Form 926, Return by a U.S. Transferor of Property to a Foreign Corporation. Estimates for completing the Form 926 can be located in the form instructions.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number.

Books and records relating to a collection of information must be retained as long as their contents might become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains final regulations issued under sections 367 and 6038B of the Code. Temporary regulations were published on May 16, 1986 (TD 8087, 51 FR 17936) (the 1986 temporary regulations). Proposed regulations under these sections were published on September 16, 2015 (80 FR 55568) (the proposed regulations). Written comments to the proposed regulations were received, and a public hearing was held on February 8, 2016. All comments are available at *www.regulations.gov* or upon request.

The proposed regulations generally provided five substantive changes from the 1986 temporary regulations: (1) Eliminating the favorable treatment for foreign goodwill and going concern value by narrowing the scope of the active trade or business exception under section 367(a)(3) (ATB exception) and eliminating the exception under § 1.367(d)–1T(b) that provides that foreign goodwill and going concern value is not subject to section 367(d); (2) allowing taxpayers to apply section 367(d) to certain property that otherwise would be subject to section 367(a); (3) removing the twenty-year limitation on useful life for purposes of section 367(d) under § 1.367(d)–1T(c)(3); (4) removing the exception under § 1.367(a)–5T(d)(2) that permits certain property denominated in foreign currency to qualify for the ATB exception; and (5) changing the valuation rules under § 1.367(a)–1T to better coordinate the regulations under sections 367 and 482 (including temporary regulations under section 482 issued with the proposed regulations (see § 1.482–1T(f)(2)(i), TD 9738, 80 FR 55538).

Specifically with regard to the ATB exception, the proposed regulations revised the categories of property that are eligible for the ATB exception so that foreign goodwill and going concern value cannot qualify for the exception. Under the 1986 temporary regulations, all property was eligible for the ATB exception, subject only to five narrowly tailored exceptions. In addition to limiting the scope of the ATB exception, the proposed regulations also implemented changes to the ATB exception that were intended to consolidate various provisions and update the 1986 temporary regulations in response to subsequent changes to the Code.

The proposed regulations did not resolve the extent to which property, including foreign goodwill and going concern value, that is not explicitly enumerated in section 936(h)(3)(B)(i) through (v) (enumerated section 936 intangibles) is described in section 936(h)(3)(B) and therefore subject to section 367(d) or instead is subject to section 367(a) and not eligible for the ATB exception. All property that is described in section 936(h)(3)(B) is referred to at times in this preamble as ''section 936 intangibles.'' Nonetheless, the proposed regulations permitted taxpayers to apply section 367(d) to such property. Under this rule, a taxpayer that has historically taken the position that goodwill and going concern value is not described in section 936(h)(3)(B) could apply section 367(d) to such property.

These regulations generally finalize the proposed regulations, as well as portions of the 1986 temporary regulations, as amended by this Treasury decision. Although minor wording changes have been made to certain aspects of those portions of the 1986 temporary regulations, the final regulations are not intended to be interpreted as making substantive changes to those regulations. Further explanation of the proposed regulations can be found in the Explanation of Provisions section of the preamble to the proposed regulations. That Explanation of Provisions section is hereby incorporated as appropriate into this preamble.

Summary of Comments and Explanation of Revisions

Nineteen sets of comments were received in response to the proposed regulations, and three speakers presented at the public hearing. In drafting the final regulations, the Treasury Department and the IRS carefully considered all of the comments received.

This section of the preamble is comprised of five parts that discuss, in turn, the comments received with respect to (i) the elimination of the favorable treatment of transfers of foreign goodwill and going concern value, (ii) the useful life of property for purposes of applying section 367(d), (iii) the applicability date of the final regulations, (iv) the qualification of property denominated in foreign currency for the ATB exception, and (v) other issues.

I. Foreign Goodwill and Going Concern Value

A. Overview

The Treasury Department and the IRS received a variety of comments in response to the proposed elimination of the favorable treatment of transfers of foreign goodwill and going concern value provided by the 1986 temporary regulations. Two comments supported the treatment of foreign goodwill and going concern value under the proposed regulations. One comment asserted that allowing intangible property to be transferred outbound in a tax-free manner is inconsistent with the policies of section 367. Other comments acknowledged the concerns about tax avoidance described in the preamble to the proposed regulations, but requested specific exceptions for transfers of foreign goodwill and going concern value in situations that the comments asserted were not abusive. Other comments disagreed more fundamentally with the approach taken and stated that the Treasury Department and the IRS should withdraw the proposed regulations entirely. Many of these comments asserted that eliminating the favorable treatment of transfers of foreign goodwill and going concern value would be an invalid exercise of regulatory authority under section 367.

Overall, the comments indicated widely divergent understandings of the nature of foreign goodwill and going concern value. Accordingly, the comments also widely differed in their proffered justifications for an exception for foreign goodwill and going concern value and in the recommended contours of an appropriate exception. The variance in the comments regarding these fundamental issues highlights the difficulty of permitting some form of favorable treatment for foreign goodwill and going concern value while preventing tax avoidance.

As described in greater detail in Part I.B of this Summary of Comments and Explanation of Revisions, and consistent with the proposed regulations, the final regulations eliminate the favorable treatment of foreign goodwill and going concern value contained in the 1986 temporary regulations. The Treasury Department and the IRS have

determined that this change is necessary to carry out the tax policy embodied in section 367 in a fair, impartial, and reasonable manner, taking into account the intent of Congress, the realities of relevant transactions, the need for the IRS to administer the rules and monitor compliance, and the overall integrity of the federal tax system. In particular, the final regulations are consistent with the policy and intent of the statute, which does not reference foreign goodwill or going concern value, and with Congress' expectation that the Secretary would exercise the regulatory authority under section 367 to require gain recognition when property is transferred offshore under circumstances that present a potential for tax avoidance.

B. Interpretation of Section 367

1. Summary of Comments Challenging Authority

The Treasury Department and the IRS received numerous comments addressing the proposed regulations' treatment of foreign goodwill and going concern value. One comment asserted that the ATB exception must apply to transfers of foreign goodwill and going concern value, because (i) foreign goodwill and going concern value is not a section 936(h)(3)(B) intangible, and so is subject to section 367(a) rather than section 367(d), and (ii) the legislative history indicates that Congress expected that the transfer of such value should be tax-free. The comment further asserted that, because goodwill and going concern value is inextricably linked to the conduct of an active trade or business, the ATB exception necessarily encompasses such transfers. Other comments asserted that finalizing the proposed regulations would represent an unreasonable exercise of regulatory authority because the proposed regulations eliminated the favorable treatment of all transfers of purported foreign goodwill and going concern value, rather than just those transfers that the Treasury Department and the IRS determine are abusive.

Several comments asserted that the proposed regulations are inconsistent with Congressional intent and cited statements from the legislative history to section 367, such as the following:

> The committee does not anticipate that the transfer of goodwill or going concern value developed by a foreign branch to a newly organized foreign corporation will result in abuse of the U.S. tax system. . . . The committee contemplates that the transfer of goodwill or going concern value developed by a foreign branch will be treated under [the exception for transfers of property for use in the active conduct of a foreign trade or business] rather than a separate rule applicable to intangibles.

H.R. Rep. No. 98–432, pt. 2, at 1317–19 (1984).

Comments also asserted that it is inappropriate to use regulatory authority under section 367 to address transfer pricing concerns under section 482.

2. Response

The Treasury Department and the IRS do not agree with the foregoing comments. Section 367 generally provides for income recognition on transfers of property to a foreign corporation in certain transactions that otherwise would qualify for nonrecognition. While section 367(a)(3)(A) includes a broad exception to this general rule for property used in the active conduct of a trade or business outside of the United States, grants of rulemaking authority in section 367(a)(3)(A) and (B) authorize the Secretary to exercise administrative discretion in determining the property to which nonrecognition treatment applies under the ATB exception. Moreover, section 367(d) reflects a clear policy that income generally should be recognized with respect to transfers of section 936 intangibles. The 1984 legislative history to section 367 explains that Congress intended for the Secretary to use his ''regulatory authority to provide for recognition in cases of transfers involving the *potential* of tax avoidance.'' S. Rep. No. 98–169, at 364 (1984) (emphasis added). The Treasury Department and the IRS have determined that the proposed regulations and these final regulations are consistent with that intention and the authority granted to the Secretary under section 367, based on the fact that the statute does not refer to foreign goodwill and going concern value and the determination that, as described in the preamble to the proposed regulations, the favorable treatment of foreign goodwill and going concern value contravenes the policy that income generally should be recognized with respect to transfers of section 936 intangibles. The remainder of this section discusses subsequent changes to the regulatory, statutory, and market context in which the 1984 legislative history was drafted, in order to reconcile the statements in the 1984 legislative history expressing the expectation that an exception for foreign goodwill and going concern value would not result in abuse with the IRS's contrary experience administering the statute during the intervening years.

a. The 1980s and Early 1990s

The Treasury Department and the IRS considered the 1984 legislative history to section 367 in issuing the 1986 temporary regulations. The 1986 temporary regulations gave effect to the statements in the legislative history indicating that Congress anticipated that the transfer of goodwill and going concern value developed by a foreign branch to a newly organized foreign corporation generally would not result in abuse of the U.S. tax system, and, on that basis, that such transfers would benefit from nonrecognition treatment. As a result, the 1986 temporary regulations provide nonrecognition treatment for foreign goodwill and concern value. The 1986 temporary regulations did not provide a conceptual definition of foreign goodwill and going concern value but, in effect, provided a rule for valuing it by describing foreign goodwill and going concern value as the residual value of a business operation conducted outside of the United States after all other tangible and intangible assets have been identified and valued. § 1.367(a)–1T(d)(5)(iii).

The Treasury Department and the IRS also took into account the 1984 legislative history in issuing the proposed regulations and these final regulations. In doing so, the Treasury Department and the IRS also considered that, in amending section 367 in 1984, Congress did not choose to statutorily mandate any particular treatment of foreign goodwill and going concern value and instead delegated broad authority to the Secretary to promulgate regulations under section 367 to carry out its purposes in this complex area. The Treasury Department and the IRS further considered that the legal and factual context in which the 1984 legislative history was drafted has changed significantly over the last 32 years.

Before 1993, goodwill and going concern value was not amortizable. As a result, in 1984, much of the case law and policy debate regarding goodwill and going concern value involved sales of business operations at arm's length between unrelated parties, where the taxpayer attempted to minimize the value of goodwill in order to maximize the value of amortizable intangibles. See, for example, *Newark Morning Ledger Co.* v. *United States,* 507 U.S. 546 (1993). In 1989, the General Accounting Office analyzed data with respect to unresolved tax cases involving purchased intangibles and found that, presumably in order to minimize the amount of unamortizable goodwill, taxpayers had identified 175

different types of customer-based intangibles that were distinct from goodwill. See General Accounting Office, Report to the Joint Committee on Taxation: Issues and Policy Proposals Regarding Tax Treatment of Intangible Assets, at 3 (Aug. 1991).

b. Statutory and Regulatory Changes

In 1993, Congress addressed these valuation disputes between taxpayers and the IRS by enacting section 197, which, similar to the approach taken by the proposed regulations, did not directly address the underlying disagreement about the relative size of goodwill but substantially reduced the stakes of the disagreement. That is, by generally providing for the amortization of goodwill over 15 years, the enactment of section 197 generally eliminated the incentive that existed in 1984, when Congress enacted section 367(d) in its present form, for taxpayers to argue that goodwill has relatively minor value.

Other law changes since 1984 have increased the relevance of section 367(d) and the incentive for taxpayers to overstate the value attributable to goodwill and going concern value. Before 1997, amounts received under section 367(d) were treated as ordinary income from U.S. sources. In 1997, Congress amended section 367(d)(2)(C) to provide that amounts received under section 367(d) are treated as ordinary income that is sourced in the same manner as a royalty, and thus potentially as from sources outside the United States. Taxpayer Relief Act of 1997, Public Law 105–34, 111 Stat. 788. The 1997 amendments increased the relevance of section 367(d) and the exception for foreign goodwill and going concern value because, before 1997, the consequences under the foreign tax credit limitation of the treatment of section 367(d) deemed royalties as U.S. source income represented a substantial disincentive for taxpayers to structure transactions in a way that would be subject to section 367(d).

Additionally, the so-called ''check-the-box'' regulations of § 301.7701–3, published December 18, 1996 (TD 8697, 61 FR 66584), and Congress's enactment in 2006 of the subpart F ''look-thru'' rule in section 954(c)(6) (Tax Increase Prevention and Reconciliation Act of 2005, Public Law 109–222, 120 Stat. 345), increased the potential benefit to taxpayers from transferring high-value intangibles offshore by reducing obstacles to redeploying cash earned in overseas operations among foreign affiliates without incurring U.S. tax. Both of these changes also facilitate, in certain circumstances, the ability of foreign subsidiaries to license transferred intangibles to affiliates without incurring subpart F income.

Finally, on January 5, 2009, the Treasury Department and the IRS issued temporary regulations under section 482 (TD 9441, 74 FR 340) related to cost sharing arrangements (subsequently finalized at TD 9568, 76 FR 80082 (Dec. 22, 2011)). The 2009 cost sharing regulations, in particular the supplemental guidance in § 1.482–7T(g) on transfer pricing methods applicable in determining the arm's length price for a platform contribution transaction or PCT (so-called ''buy-in payments''), were intended, in part, to address inappropriate income shifting from intangible transfers under the prior cost sharing regulations. Although the prior cost sharing regulations did not provide any favorable treatment for foreign goodwill and going concern value, in the experience of the IRS, taxpayers took positions under those regulations that allowed a domestic cost sharing participant to transfer intangibles to a foreign cost sharing participant for development under a cost sharing arrangement without fully compensating the domestic cost sharing participant for the value of the transferred intangibles. It is also the experience of the IRS that the 2009 cost sharing regulations limited taxpayers' ability to use PCTs in cost sharing arrangements to shift high value intangibles offshore without appropriate compensation, thereby increasing the relative appeal of transferring intangibles in a transaction subject to section 367. Thus, taxpayers began using transactions subject to section 367 to transfer intangibles intended for development under a cost sharing arrangement rather than as part of a PCT.

c. Changing Markets for Intangibles

Moreover, since Congress enacted section 367(d) in its current form in 1984, the relative importance of intangibles in the economy and in the profitability of business has increased greatly. According to a joint report issued by the Economic and Statistics Administration and the U.S. Patent and Trademark Office, ''IP use permeates all aspects of the economy with increasing intensity and extends to all parts of the U.S.'' Justin Antonipillai, Economics and Statistics Administration, & Michelle K. Lee, U.S. Patent and Trademark Office, Intellectual Property and the U.S. Economy, at p.30 (2016). This growing importance is reflected in the significant increase in the portion of business values attributable to intangible assets in the years since 1984, with one study indicating that intangibles accounted for only 32 percent of the market value of the S&P 500 in 1985, but accounted for 84 percent by 2015. Annual Study of Intangible Asset Market Value from Ocean Tomo, LLC (Mar. 4, 2015, 12:00 a.m.), *http://www.oceantomo.com/2015/03/04/2015-intangible-asset-market-value-study/.* Growth in the share of business values attributable to section 936 intangibles during this period, together with the statutory and regulatory changes discussed in the preceding paragraphs, have increased the incentives for taxpayers to transfer such valuable intangibles to related offshore affiliates in transactions subject to section 367(d) and to misattribute intangible value from enumerated section 936 intangibles to foreign goodwill and going concern value in the context of such transactions.

d. The Potential for Abuse

Since 1984, taxpayers have reversed their positions regarding the significance of goodwill and going concern value in response to the enactment of sections 197 and 367(d), and now commonly assert that such value constitutes a large percentage—even the vast majority—of an enterprise's value. The IRS's experience administering section 367(d) has, once again, highlighted the abuse potential that arises from the need to distinguish value attributable to nominally distinct intangibles that are used together in a single trade or business. Specifically, the uncertainty inherent in distinguishing between value attributable to goodwill and going concern value and value attributable to other intangible property makes any exception to income recognition for the outbound transfer of goodwill and going concern value unduly difficult to administer and prone to tax avoidance. Of course, any rule that provides for the tax-free transfer of one type of property, while the transfer of other types of property remains taxable, provides an incentive to improperly allocate value away from the taxable property and onto the tax-free property. This problem is acute, however, in cases involving the offshore reorganization of entire business divisions that include high-value, interrelated intangibles, because goodwill and going concern value are particularly difficult to distinguish (perhaps are even indistinguishable) from the enumerated section 936 intangibles. See, for example, *International Multifoods Corp.* v. *Commissioner,* 108 T.C. 25, 42 (1997) (noting that it ''is well established that trademarks embody goodwill''). See also Joint Committee on Taxation, Present

Law and Background Related to Possible Income Shifting and Transfer Pricing, (JCX–37–10) July 20, 2010, at 110 (noting that unique intangible property is difficult to value because it is rarely, if ever, transferred to third parties).

e. Legislative Intent and the Broad Grant of Authority To Limit Potential Abuses

These statutory, regulatory, and market developments since Congress amended section 367(d) in 1984, as well as the experience of the IRS in administering section 367 over that period, inform the manner in which the Treasury Department and the IRS seek to give effect to the intent of Congress in this complex area of law. As a starting point, the Treasury Department and the IRS observe that the statutory grants of authority in section 367(a) and (d), coupled with the absence of any specific statutory protection for transfers of goodwill and going concern value, form the basis for the broad authority of the Treasury Department and the IRS to design the appropriate parameters for the taxation of outbound transfers. The 1984 legislative history expressed an expectation that outbound transfers of foreign goodwill and going concern value would not lead to abuse of the U.S. tax system and, on the basis of that expectation, anticipated that the Secretary would exercise the regulatory authority under section 367 in a manner that would allow taxpayers to transfer foreign goodwill and going concern value outbound without current U.S. tax. The legislative history also explains that Congress expected the Secretary to use the ''regulatory authority to provide for recognition in cases of transfers involving the potential of tax avoidance.'' Accordingly, the administrative discretion to determine the contours of nonrecognition treatment must be exercised in light of the income recognition objectives of the statute and informed by the IRS's experience in administering the exception.

The Treasury Department and the IRS have determined that the premise of the expectation noted in the legislative history that an exception to recognition treatment would apply to foreign goodwill and going concern value—namely, that outbound transfers of foreign goodwill and going concern value would not lead to abuse—is inconsistent with the experience of the IRS in administering section 367(d), and consequently no longer supports such an exception. Rather, based on the IRS's experience over the past three decades, the Treasury Department and the IRS have determined that the favorable treatment of foreign goodwill and going concern value has interfered with the application of the general rule in section 367(d) that requires income recognition upon the outbound transfer of section 936 intangibles due to the inherent difficulty of distinguishing value attributable to goodwill and going concern value from value attributable to enumerated section 936 intangibles, coupled with taxpayer efforts to maximize the value allocated to goodwill and going concern value.

The Treasury Department and the IRS also observe that the 1984 legislative history explains that the 1984 amendments to section 367(d) were made in response to challenges the IRS faced in administering the prior regime. That regime required a taxpayer to clear its purpose for transferring property offshore with the IRS. See H.R. Rep. 98–432, pt. 2, at 1315. The 1984 reworking of section 367 was intended to promote administrability by making the analysis of outbound transfers more objective. Other passages from the legislative history show that the general purpose of the amendments to section 367 was to close ''serious loopholes,'' and that the 1984 revisions were intended to strengthen the application of that section. *Id.*

Accordingly, the Treasury Department and the IRS do not view the legislative history as mandating an exception for transfers of goodwill and going concern value developed by a foreign branch, or as indicating that Congress anticipated, or would have condoned, the extent of the claims regarding foreign goodwill and going concern value that the IRS has in fact encountered. To the contrary, the Treasury Department and the IRS have concluded that the statutory purpose of the income recognition provisions in section 367(d) is incompatible with the favorable treatment of foreign goodwill and going concern value reflected in the 1986 temporary regulations. In particular, taking into account the statutory, regulatory, and market developments since 1984 and the experience of the IRS in administering section 367(d) under the 1986 temporary regulations, the Treasury Department and the IRS have determined that, at this juncture, the approach most consistent with the intent of Congress in 1984, including the directive to use regulatory authority ''to provide for recognition in cases of transfers involving the potential of tax avoidance,'' is to remove the favorable treatment for foreign goodwill and going concern value in the 1986 temporary regulations.

The Treasury Department and the IRS also disagree with the notion expressed in comments that the proposed regulations inappropriately attempt to solve section 482 transfer pricing problems under the authority of section 367. Congress made clear in adding the commensurate with income language to both sections 367(d) and 482 in 1986 that the provisions are closely related, and it is within the authority of the Treasury Department and the IRS to consider valuation concerns in administering section 367. Section 1231(e)(1) and (2) of the Tax Reform Act of 1986, Public Law 99–514, 100 Stat. 2085, 2562–3.

For these reasons, the Treasury Department and the IRS disagree with comments asserting that the Treasury Department and the IRS lack the authority to eliminate the favorable treatment that applied to foreign goodwill and going concern value under the 1986 temporary regulations.

C. Other Comments Suggesting That Some Favorable Treatment for Transfers of Foreign Goodwill and Going Concern Value Be Maintained

Several comments generally favored retaining both the nonrecognition treatment for foreign goodwill and going concern value and its current measurement as the residual value of a foreign business operation. Other comments, however, acknowledged the problems associated with the residual valuation approach but supported an exception determined on some other basis. Some of these comments included suggestions for other ways to define goodwill and going concern value and for determining the amount that should qualify for nonrecognition. The Treasury Department and the IRS have determined that none of the comments provided a sufficiently administrable approach that would reliably ensure that section 367 applies with respect to the full value of all section 936 intangibles.

1. Local Pressure To Incorporate; Industry-Based Exception

The proposed regulations specifically requested comments on a potential exception that would apply to situations where there is limited potential for abuse. As an example, the comment solicitation posited the incorporation, in response to regulatory pressure or compulsion, of a financial services business that previously had operated as a branch in another country. The Treasury Department and the IRS received several comments in response to this solicitation.

Several comments suggested that the final regulations provide an exception that would continue to permit favorable treatment of transfers of foreign

goodwill and going concern value that occur as a result of the incorporation of a branch in a country that exerts regulatory pressure (either implicit or explicit) upon the U.S. transferor to conduct its operations in that country in corporate form. According to these comments, the incorporation of a branch in these circumstances is not motivated by tax considerations but rather occurs in order to comply with local law or regulations.

The regulations under section 367 provide that certain property is deemed to be transferred for use in the active conduct of a trade or business outside of the United States when the transfer is either legally required by the local foreign government as a necessary condition of doing business or is compelled by a genuine threat of immediate expropriation by the local foreign government. Section 367 and the regulations thereunder do not, however, provide exceptions to the requirement to recognize income or gain when assets that are not eligible for the ATB exception, such as section 936 intangibles and assets described in section 367(a)(3)(B), are transferred in this circumstance. Accordingly, the policy of section 367 and the regulations thereunder is not to expand on the types of assets that are eligible for the ATB exception in this circumstance. Moreover, the mere fact that a taxpayer is compelled or pressured to incorporate its branch does not mean that the taxpayer has any less incentive to reduce the tax consequences of such incorporation by adopting the aggressive valuation positions that the proposed regulations were intended to prevent. Therefore, the final regulations do not provide a special exception to continue the favorable treatment of foreign goodwill and going concern value in this circumstance. Notably, some taxpayers that are pressured to incorporate branch operations in these circumstances can avoid being subject to section 367 by incorporating the branch using an eligible entity described in § 301.7701–2 that could elect to be treated as a disregarded entity for U.S. federal income tax purposes.

Several comments recommended an exception for transfers of foreign goodwill and going concern value by taxpayers in certain industries, such as banking and finance, life insurance, and industries that primarily provide services to third parties, asserting that such businesses do not possess the types of highly valuable intangibles about which they believe the Treasury Department and the IRS are concerned. The comments did not provide any basis, however, for the Treasury Department and the IRS to conclude that taxpayers in particular industries consistently lack valuable intangibles of the kind listed in section 936(h)(3)(B), even though the prevalence of specific types of intangibles may differ across industries. Additionally, the ability and incentive to allocate value away from other intangibles, such as trademarks, and toward goodwill or going concern value is not limited to particular industries. As a general matter, the Treasury Department and the IRS attempt, to the extent possible, to avoid issuing guidance based on industry classifications that are not clearly and closely tied to specific tax policy concerns. Accordingly, the final regulations do not provide any industry-specific exceptions.

Based on these comments, the Treasury Department and the IRS considered whether it would be possible to provide an exception for tax-free transfers of foreign goodwill and going concern value developed by a foreign branch that did not possess or otherwise benefit from the use of any highly valuable enumerated section 936 intangibles. If the absence of such highly valuable intangibles could be reliably determined, the concerns regarding the potential to attribute value away from such intangibles and toward goodwill and going concern value would be mitigated. However, such an exception would require the development and administration of standards to determine whether any enumerated section 936 intangible was highly valuable, an exercise that would be as difficult (and in many circumstance would be no different) than the exercise of distinguishing value attributable to foreign goodwill and going concern value from value attributable to other intangibles transferred together with it. Such an exception also would require a careful examination of the particular facts of a transferor's assets and business as a threshold matter to confirm that valuable enumerated section 936 intangibles are not made available for the benefit of the transferee foreign corporation, either through a separate but related transfer to the foreign corporation or through a service provided to the foreign corporation using such intangibles. Accordingly, the Treasury Department and the IRS did not adopt this potential exception in these final regulations.

2. Foreign Branch Exception

Several comments suggested maintaining the favorable treatment of foreign goodwill and going concern value in situations in which section 367 applies to the incorporation of a long-standing foreign branch or a branch that conducts an active foreign business operation. The Treasury Department and the IRS acknowledge that conditioning favorable treatment for foreign goodwill and going concern value on the presence of a robust foreign branch would increase the likelihood that the business at issue has substantive foreign operations. However, in situations where the exception would continue to apply, the requirement of a robust foreign branch would not address the potential for tax avoidance that motivated the proposed regulations when value must be allocated between foreign goodwill and going concern value, on the one hand, and enumerated section 936 intangibles, on the other hand. Thus, the final regulations do not adopt the comments suggesting an exception for goodwill and going concern value developed by a foreign branch that is subsequently incorporated because, when applicable, such an exception would not address the administrative difficulties in identifying and separately valuing the property that is and is not eligible for the exception, and therefore would be insufficient to prevent the potential for tax avoidance.

3. New Rules for Valuing Foreign Goodwill and Going Concern Value

Other comments suggested that the regulations provide new rules for determining foreign goodwill and going concern value, such that an exception for such transfers could be provided that would be less susceptible to the abuses described in the preamble to the proposed regulations. That is, the comments suggested determining goodwill and going concern value using an approach that differs from that in existing § 1.367(a)–1T(d)(5)(iii), which treats it as the residual after other intangibles are valued.

Several of these comments suggested determining foreign goodwill and going concern value by classifying intangibles as routine and non-routine and permitting value attributable to routine intangibles to be transferred tax-free under an exception. One comment asserted that goodwill is relatively easy to value as compared to certain enumerated section 936 intangibles but did not explain why or how goodwill is more easily valued or how to reliably allocate value between goodwill and enumerated section 936 intangibles. Another comment asserted that goodwill can be valued based on the premise that it is the kind of asset that enables an existing business to produce ''routine'' or ''normal'' operating profits

or cash flow during the period that a new business would be assembling its assets and workforce and attracting a customer base, but the comment did not explain how to determine ''routine'' or ''normal'' operating profits.

Another comment recommended determining foreign goodwill and going concern value using a formulaic approach based on sales and general and administrative expenses, asserting that routine expenses for operational costs and compensation are closely associated with the business activities that give rise to goodwill and going concern value. The comment did not provide any support for this premise. As a general matter, cost-based methods (in comparison with market-based and income-based methods) are not a reliable means of valuing intangible property because the value of intangible property does not necessarily bear any predictable relationship to the costs of developing the property. The comment suggesting a cost-based approach did not demonstrate that determining goodwill and going concern value in the section 367(d) context is a situation where costs are a reliable measure of value (regardless of whether goodwill and going concern value are section 936(h)(3)(B) intangibles). Accordingly, the Treasury Department and the IRS have determined that a rule that determined foreign goodwill and going concern value based on certain expenses would be inappropriate.

Another comment proposed, for branches incorporated in a jurisdiction with which the United States has an income tax treaty in effect, using the earnings before interest, taxes, depreciation, and amortization of the branch as reported to foreign tax authorities as reliable data on which to base a valuation. An exception based on information reported to a foreign country's tax authority, which may be based on that jurisdiction's generally accepted accounting standards, does not address the concerns expressed by the Treasury Department and the IRS in the preamble to the proposed regulations. Most significantly, the comment does not explain how this information would be useful in determining the value of foreign goodwill and going concern value or distinguishing value attributable to enumerated section 936 intangibles from that of other property, nor have the Treasury Department and the IRS been able to identify how it would be useful. Accordingly, this recommendation has not been adopted.

In summary, none of the proposed approaches for more directly valuing foreign goodwill and going concern value offer a principled and administrable basis for allocating value between foreign goodwill and going concern value that would be subject to an exception and other intangibles that would not. The Treasury Department and the IRS therefore concluded that the proposed approaches would not provide a meaningful improvement over the residual value approach in the 1986 temporary regulations as a conceptual or administrative matter.

4. Formulaic Caps on Foreign Goodwill and Going Concern Value

Several comments suggested that the favorable treatment for transfers of foreign goodwill and going concern value could be maintained while addressing the concerns that prompted the issuance of the proposed regulations by capping the amount that can qualify for the exception, either on a non-rebuttable basis or in the absence of a ruling. For example, one comment suggested that the excepted amount should not exceed 25 percent of the branch's net enterprise value, unless a ruling is obtained from the IRS. The comment asserted that 25 percent represents a modest portion of a branch's value that is likely to be attributable to branch goodwill and going concern value. Another comment suggested that the excepted amount should not exceed 50 percent of the total value of the assets transferred to the foreign corporation. Although such formulaic caps would limit the potential tax avoidance from improperly attributing value from enumerated section 936 intangibles to foreign goodwill and going concern value that is eligible for an exception, the amount excepted under such an approach would still potentially reflect value properly attributable to enumerated section 936 intangibles. That is, with respect to amounts claimed below the cap, a formulaic cap would not relieve the IRS of the need to distinguish foreign goodwill and going concern value from enumerated section 936 intangibles, a key challenge that motivated the approach of the proposed regulations. Moreover, the Treasury Department and the IRS have determined that the discretionary ruling practice proposed by one comment would require an onerous commitment of IRS resources (which the comment acknowledged are constrained), and, without detailed procedures for both identifying and valuing foreign goodwill and going concern value, would simply accelerate the disputes that occur under the 1986 temporary regulations. As a result, the final regulations do not adopt the recommendations to use a formulaic cap to limit the amount of foreign goodwill and going concern value.

5. Professional Services Exception

One comment stated that U.S. citizens may conduct professional services outside the United States as sole practitioners, or in partnership with other practitioners, and observed that the incorporation of such a business would entail a section 351 contribution subject to section 367 (assuming the transferee entity was classified as a corporation for U.S. federal income tax purposes). According to the comment, because any goodwill in such a scenario would relate to foreign customers and a foreign business or professional license, there could be no abuse warranting taxation under section 367.

The Treasury Department and the IRS do not agree that the outbound transfer of value developed in such cases will necessarily not result in abuse of the U.S. tax system. The potential for abuse in a transfer subject to section 367 arises not just from the possibility that value associated with U.S. customers would be denominated as foreign goodwill, but also from the fundamental difficulty in reliably distinguishing value attributable to enumerated section 936 intangibles from value attributable to other intangibles, an issue that is no different in the professional services context. Therefore, the final regulations do not adopt this comment.

6. Joint Venture Exception

One comment proposed maintaining the favorable treatment of foreign goodwill and going concern value for transfers to joint venture companies, particularly cases in which the U.S. transferor is going into business with one or more unrelated foreign parties (third parties) and in which the U.S. transferor's interest in the joint venture is equal to or less than 50 percent. According to the comment, the U.S. transferor in this situation has a financial incentive to segregate its intangibles contributed to the joint venture from its other property. The presence of a third party, however, would not necessarily reduce the U.S. transferor's incentive to attribute value to foreign goodwill and going concern value, rather than to enumerated section 936 intangibles, in order to minimize the tax consequences of the transfer, since such a distinction may be irrelevant to the third party. Accordingly, the final regulations do not adopt this proposal.

D. Classifying Foreign Goodwill and Going Concern Value as Subject to Section 367(a) or (d)

Several comments requested that the Treasury Department and the IRS address whether goodwill and going concern value should be characterized as a section 936(h)(3)(B) intangible, and thus subject to section 367(d), or instead as property subject to section 367(a). Comments also requested that the regulations provide certainty to taxpayers that have taken the position that goodwill and going concern value is not described in section 936(h)(3)(B) by providing that such taxpayers will be permitted to treat goodwill and going concern value as property subject to section 367(a) rather than section 367(d).

As discussed in the preamble to the proposed regulations, the Treasury Department and the IRS acknowledge that taxpayers have taken different positions regarding the scope of section 936(h)(3)(B) and that the issue is more significant following the elimination of the favorable treatment for foreign goodwill and going concern value. Any enumerated section 936 intangible, and any item similar to such specifically enumerated intangibles, is subject to the regime provided by section 367(d). The Treasury Department and the IRS have determined that it would be inconsistent with the policy underlying section 367(d) to permit intangible property that is described in section 936(h)(3)(B) to be subject to section 367(a). Accordingly, the Treasury Department and the IRS have determined that it is appropriate to retain the approach provided in the proposed regulations, which allows taxpayers to apply section 367(d) to certain property that otherwise would be taxed under section 367(a) but which continues to require taxpayers to apply section 367(d) to all property described in section 936(h)(3)(B). Because the identification of items that are neither explicitly listed in section 936(h)(3)(B)(i) through (v) nor explicitly listed as potentially qualifying for the ATB exception generally will require a case-by-case functional and factual analysis, the final regulations do not address the characterization of such items as similar items (within the meaning of section 936(h)(3)(B)(vi)) or as something else. In general, potential rules under section 367 for identifying and valuing transferred property are beyond the scope of these final regulations.

II. Useful Life

The proposed regulations eliminated the 20-year limitation on useful life for intangible property subject to section 367(d) that was included in § 1.367(d)–1T(c)(3), because of concerns that the limitation results in less than all of the income attributable to transferred intangible property being taken into account by the U.S. transferor. In the preamble to the proposed regulations, the Treasury Department and the IRS solicited comments on how to simplify the administration of section 367(d) inclusions for property with a very long useful life in the absence of the 20-year limitation. In response to this comment solicitation, several comments requested that the final regulations restore the 20-year limitation on useful life because it promotes administrability for both taxpayers and the IRS.

After considering the comments received, the Treasury Department and the IRS agree that a 20-year limitation on inclusions may promote administrability for both taxpayers and the IRS in cases where the useful life of the transferred property is indefinite or is reasonably anticipated to exceed twenty years. Accordingly, in such cases, the final regulations provide that taxpayers may, in the year of transfer, choose to take into account section 367(d) inclusions only during the 20-year period beginning with the first year in which the U.S. transferor takes into account income pursuant to section 367(d). However, the Treasury Department and the IRS have determined that this optional limitation should not affect the present value of all amounts included by the taxpayer under section 367(d). Accordingly, the final regulations specifically require a taxpayer that chooses to limit section 367(d) inclusions to a 20-year period to include, during that period, amounts that reasonably reflect amounts that, in the absence of the limitation, would be required to be included over the useful life of the transferred property following the end of the 20-year period. This requirement is consistent with the requirement in section 367(d) to include amounts that are commensurate with the income attributable to the transferred intangible during its full useful life, without limitation. The requirement of the final regulations that inclusions during the limited 20-year period begin in the first year in which in which the U.S. transferor takes into account income pursuant to section 367(d) reflects the possibility of delays between the year the intangible property is transferred and the first year in which exploitation of the transferred property results in taxable income being earned by the transferee and included under section 367(d) by the transferor.

One comment also suggested that the IRS be precluded from making commensurate-with-income adjustments for taxable years beginning more than 20 years after the outbound transfer. In response to this comment, the final regulations provide that, if a taxpayer chooses to limit inclusions under section 367(d) to a 20-year period, no adjustments will be made for taxable years beginning after the conclusion of the 20-year period. Thus, after the statute of limitations expires for taxable years during the 20-year period, a taxpayer will have no further section 367(d) inclusions as a result of the Commissioner's examination of taxable years that begin after the end of the 20-year period. However, consistent with the commensurate-with-income principle, for purposes of determining whether income inclusions during the 20-year period are commensurate with the income attributable to the transferred property, and whether adjustments should be made for taxable years during that period while the statute of limitations for such taxable years is open, the Commissioner may take into account information with respect to taxable years after that period, such as the income attributable to the transferred property during those later years.

The final regulations revise the definition of useful life to provide that useful life includes the entire period during which exploitation of the transferred intangible property is reasonably anticipated to affect the determination of taxable income, in order to appropriately account for the fact that exploitation of intangible property can result in both revenue increases and cost decreases. A comment asserted that including use in subsequently developed intangibles within the useful life of the transferred intangible property would be too difficult to administer and was not consistent with the arm's length standard. The Treasury Department and the IRS disagree with this comment. The value of many types of intangible property is derived not only from use of the intangible property in its present form, but also from its use in further development of the next generation of that intangible and other property. For example, if a software developer were to sell all of its copyright rights in its software to an unrelated party, and the copyright rights are expected to derive value both from the exclusive right to use the current generation computer code to make and sell current generation

software products and from the exclusive right to use the current generation code in the development of other versions of the software, which will then be used to make and sell future generation software products, the software developer would expect to be compensated for the latter right. That is, if the software has value in developing a future generation of products, the software developer would not ignore the value of the use of the software in future research and development and hand over those rights free of charge, and an uncontrolled purchaser would be willing to compensate the developer to obtain such rights.

III. Applicability Date

Several comments requested that the final regulations apply to transfers occurring after their date of publication, and not relate back to the date the proposed regulations were issued. These comments asserted that the proposed regulations change long-standing law in a way that would prejudice taxpayers that had arranged their business operations based on the 1986 temporary regulations. Others speculated that the final regulations might deviate from the proposed regulations to such an extent that substantial confusion would result for taxpayers attempting to determine their tax results in the interim period before the final regulations were published. Finally, one comment asserted that an applicability date relating back to the proposed regulations would violate the Administrative Procedure Act (APA), specifically 5 U.S.C. 553, which provides that the effective date of certain final regulations must be at least 30 days after their date of publication.

After considering these comments, the Treasury Department and the IRS have determined that the proposed applicability date, under which the final regulations would apply to transfers occurring on or after September 14, 2015, should be retained. The proposed regulations were issued to curtail the potential for abuse that exists under the 1986 temporary regulations from treating value that should be attributed to enumerated section 936 intangibles instead as exempt foreign goodwill or going concern value. The proposed effective date was intended to prevent taxpayers from using the time while the proposed regulations were pending to accelerate transfers subject to section 367 in order to take abusive positions under the 1986 temporary regulations before the finalization of the proposed regulations.

The Treasury Department and the IRS have statutory authority to issue regulations applicable at least as of the date the proposed regulations were filed with the **Federal Register**. The pre-1996 version of section 7805(b)—which governs regulations related to statutory provisions enacted before July 30, 1996, such as section 367—provides express retroactive rulemaking authority by stating that the Secretary may prescribe the extent, if any, to which any ruling or regulation shall be applied without retroactive effect. Section 7805(b) (1995). Because section 7805(b) is the more specific statute, it controls over the general notice requirements of 5 U.S.C. 553. See, for example, *Redhouse* v. *Commissioner,* 728 F.2d 1249, 1253 (9th Cir. 1984); *Wing* v. *Commissioner,* 81 T.C. 17, 28–30 & n.17 (1983).

Finally, the Treasury Department and the IRS disagree with the comment that differences between the proposed and final regulations may create confusion. The final regulations are a logical outgrowth of the proposed regulations in light of the comments received and their consideration by the Treasury Department and the IRS. In particular, the final regulations do not differ from the proposed regulations with respect to the elimination of the favorable treatment for transfers of foreign goodwill and going concern value. Furthermore, a transfer of property that is subject to recognition treatment under section 367 under the final regulations would also have been subject to such treatment under section 367 under the proposed regulations.

For these reasons, the final regulations generally apply to transfers occurring on or after September 14, 2015, the date the proposed regulations were filed with the **Federal Register**, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–2 that are filed on or after September 14, 2015.

IV. Qualification of Property Denominated in Foreign Currency for the ATB Exception

Although section 367(a)(3)(B)(iii) provides that the ATB exception does not apply, and therefore that section 367(a)(1) applies, to foreign currency or other property denominated in foreign currency, current § 1.367(a)–5T(d)(2) generally provides that section 367(a)(1) nonetheless does not apply to certain transfers of property denominated in the currency of the country in which the transferee foreign corporation is organized. The proposed regulations eliminated this regulatory exception from the general rule in section 367(a)(3)(B)(iii) that turns off the ATB exception for such property. One comment recommended clarifying the regulations under section 367(a) by adopting the language and concepts reflected in the changes to the foreign currency rules in subpart J that were made after the publication of the 1986 temporary regulations. In response to this comment, § 1.367(a)–2(c)(3) of the final regulations, which corresponds to existing § 1.367(a)–5T(d)(2), reflects amendments that increase consistency with the rules in sections 987 and 988. In particular, the terms ''foreign currency'' and ''property denominated in foreign currency'' are no longer used. Rather, proposed § 1.367(a)–2(c)(3) is revised to refer to nonfunctional currency and other property that gives rise to a section 988 transaction of the taxpayer described in section 988(c)(1)(B), or that would give rise to such a section 988 transaction if it were acquired, accrued, or entered into directly by the taxpayer. The Treasury Department and the IRS consider that these modifications do not substantially change the scope of property subject to the rule at § 1.367(a)–5T(d)(2).

V. Other Issues

Other comments suggested that regulations address many outstanding issues in the context of section 367 that were not addressed in the proposed regulations. These suggestions include guidance to address the following topics: (i) The valuation of intangibles subject to section 367(d) and the forms that deemed payments should take, including guidance providing parity with the section 482 form-of-payment rules; (ii) whether a receivable is created upon an audit-related adjustment; (iii) the tax basis consequences under section 367(d), including how section 367(d) applies to intangibles subject to the section 197 anti-churning rules; (iv) coordination of the general rules and disposition rules in section 367(d); (v) issues raised in connection with Notice 2012–39 (2012–31 IRB 95); (vi) the definition of ''property'' for purposes of section 367; and (vii) the subsequent transfer rules under the ATB exception.

The Treasury Department and the IRS generally agree that additional guidance under section 367(a) and (d) is desirable and would benefit both taxpayers and the government. However, these issues are beyond the scope of this project. For example, while the Treasury Department and the IRS are aware that there is uncertainty regarding the application of the subsequent transfer rules to transactions involving hybrid partnerships, the Treasury Department and the IRS have determined that transactions involving partnerships merit a more holistic consideration and

that this regulation package is not the appropriate vehicle to address the issue. Consequently, the regulations finalize the subsequent transfer rules in § 1.367(a)–2T(c) (located in § 1.367(a)–2(g) of these final regulations), but the Treasury Department and the IRS expect those rules will be amended after a more detailed consideration of transactions involving partnerships.

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It is hereby certified that the collection of information contained in these regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. This certification is based on the fact that the regulations under section 367(a) and (d) simplify existing regulations, and the regulations under section 6038B make relatively minor changes to existing information reporting requirements. Moreover, these regulations primarily will affect large domestic corporations filing consolidated returns. Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking that preceded this regulation was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business. No comments were received.

Drafting Information

The principal author of these regulations is Ryan Bowen, Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.367(d)–1 also issued under 26 U.S.C. 367(d). * * *

* * * * *

■ **Par. 2.** Section 1.367(a)–0 is added to read as follows:

§ 1.367(a)–0 Table of contents.

This section lists the paragraphs contained in §§ 1.367(a)–1 through 1.367(a)–8.

■ **Par. 3.** Section 1.367(a)–1 is revised to read as follows:

§ 1.367(a)–1 Transfers to foreign corporations subject to section 367(a): In general.

(a) *Scope.* Section 367(a)(1) provides the general rule concerning certain transfers of property by a United States person (referred to at times in this section as the ''U.S. person'' or ''U.S. transferor'') to a foreign corporation. Paragraph (b) of this section provides general rules explaining the effect of section 367(a)(1). Paragraph (c) of this section describes transfers of property that are described in section 367(a)(1). Paragraph (d) of this section provides definitions that apply for purposes of sections 367(a) and (d) and the regulations thereunder. Paragraphs (e) and (f) of this section provide rules that apply to certain reorganizations described in section 368(a)(1)(F). Paragraph (g) of this section provides dates of applicability. For rules concerning the reporting requirements under section 6038B for certain transfers of property to a foreign corporation, see § 1.6038B–1.

(b) *General rules*—(1) *Foreign corporation not considered a corporation for purposes of certain transfers.* If a U.S. person transfers property to a foreign corporation in connection with an exchange described in section 351, 354, 356, or 361, then, pursuant to section 367(a)(1), the foreign corporation will not be considered to be a corporation for purposes of determining the extent to which gain is recognized on the transfer. Section 367(a)(1) denies nonrecognition treatment only to transfers of items of property on which gain is realized. Thus, the amount of gain recognized because of section 367(a)(1) is unaffected by the transfer of items of property on which loss is realized (but not recognized).

(2) *Cases in which foreign corporate status is not disregarded.* For circumstances in which section 367(a)(1) does not apply to a U.S. transferor's transfer of property to a foreign corporation, and thus the foreign corporation is considered to be a corporation, see §§ 1.367(a)–2, 1.367(a)–3, and 1.367(a)–7.

(3) *Determination of value.* In cases in which a U.S. transferor's transfer of property to a foreign corporation constitutes a controlled transaction as defined in § 1.482–1(i)(8), the value of

the property transferred is determined in accordance with section 482 and the regulations thereunder.

(4) *Character, source, and adjustments*—(i) *In general.* If a U.S. person is required to recognize gain under section 367 upon a transfer of property to a foreign corporation, then—

(A) The character and source of such gain are determined as if the property had been disposed of in a taxable exchange with the transferee foreign corporation (unless otherwise provided by regulation); and

(B) Appropriate adjustments to earnings and profits, basis, and other affected items will be made according to otherwise applicable rules, taking into account the gain recognized under section 367(a)(1). For purposes of applying section 362, the foreign corporation's basis in the property received is increased by the amount of gain recognized by the U.S. transferor under section 367(a) and the regulations issued pursuant to that section. To the extent the regulations provide that the U.S. transferor recognizes gain with respect to a particular item of property, the foreign corporation increases its basis in that item of property by the amount of such gain recognized. For example, §§ 1.367(a)–2, 1.367(a)–3, and 1.367(a)–4 provide that gain is recognized with respect to particular items of property. To the extent the regulations do not provide that gain recognized by the U.S. transferor is with respect to a particular item of property, such gain is treated as recognized with respect to items of property subject to section 367(a) in proportion to the U.S. transferor's gain realized in such property, after taking into account gain recognized with respect to particular items of property transferred under any other provision of section 367(a). For example, § 1.367(a)–6 provides that branch losses must be recaptured by the recognition of gain realized on the transfer but does not associate the gain with particular items of property. See also § 1.367(a)–1(c)(3) for rules concerning transfers by partnerships or of partnership interests.

(C) The transfer will not be recharacterized for U.S. Federal tax purposes solely because the U.S. person recognizes gain in connection with the transfer under section 367(a)(1). For example, if a U.S. person transfers appreciated stock or securities to a foreign corporation in an exchange described in section 351, the transfer is not recharacterized as other than an exchange described in section 351 solely because the U.S. person recognizes gain in the transfer under section 367(a)(1).

(ii) *Example.* The rules of this paragraph (b)(4) are illustrated by the following example.

Example. Domestic corporation DC transfers inventory with a fair market value of $1 million and adjusted basis of $800,000 to foreign corporation FC in exchange for stock of FC that is described in section 351(a). Title passes within the United States. Pursuant to section 367(a), DC is required to recognize gain of $200,000 upon the transfer. Under the rule of this paragraph (b)(4), the gain is treated as ordinary income (sections 1201 and 1221) from sources within the United States (section 861) arising from a taxable exchange with FC. Appropriate adjustments to earnings and profits, basis, etc., will be made as if the transfer were subject to section 351. Thus, for example, DC's basis in the FC stock received, and FC's basis in the transferred inventory, will each be increased by the $200,000 gain recognized by DC, pursuant to sections 358(a)(1) and 362(a), respectively.

(5) *Treatment of certain property as subject to section 367(d).* A U.S. transferor may apply section 367(d) and § 1.367(d)–1, rather than section 367(a) and the regulations thereunder, to a transfer of property to a foreign corporation that otherwise would be subject to section 367(a), provided that the property is not eligible property, as defined in § 1.367(a)–2(b) but determined without regard to § 1.367(a)–2(c). A U.S. transferor and any other U.S. transferor that is related (within the meaning of section 267(b) or 707(b)(1)) to the U.S. transferor must consistently apply this paragraph (b)(5) to all property described in this paragraph (b)(5) that is transferred to one or more foreign corporations pursuant to a plan. A U.S. transferor applies the provisions of this paragraph (b)(5) in the form and manner set forth in § 1.6038B–1(d)(1)(iv) and (v).

(c)(1) through (c)(3)(i) reserved. For further guidance, see § 1.367(a)–1T(c)(1) through (c)(3)(i).

(ii) *Transfer of partnership interest treated as transfer of proportionate share of assets*—(A) *In general.* If a U.S. person transfers an interest as a partner in a partnership (whether foreign or domestic) in an exchange described in section 367(a)(1), then that person is treated as having transferred a proportionate share of the property of the partnership in an exchange described in section 367(a)(1). Accordingly, the applicability of the exception to section 367(a)(1) provided in § 1.367(a)–2 is determined with reference to the property of the partnership rather than the partnership interest itself. A U.S. person's proportionate share of partnership property is determined under the rules and principles of sections 701 through 761 and the regulations thereunder.

(c)(3)(i)(A) *Example* through (7) reserved. For further guidance, see § 1.367(a)–1T(c)(3)(i)(A) *Example* through (7).

(d) *Definitions.* The following definitions apply for purposes of sections 367(a) and (d) and the regulations thereunder.

(1) *United States person.* The term ''United States person'' includes those persons described in section 7701(a)(30). The term includes a citizen or resident of the United States, a domestic partnership, a domestic corporation, and any estate or trust other than a foreign estate or trust. (For definitions of these terms, see section 7701 and the regulations thereunder.) For purposes of this section, an individual with respect to whom an election has been made under section 6013(g) or (h) is considered to be a resident of the United States while such election is in effect. A nonresident alien or a foreign corporation will not be considered a United States person because of its actual or deemed conduct of a trade or business within the United States during a taxable year.

(2) *Foreign corporation.* The term ''foreign corporation'' has the meaning set forth in section 7701(a)(3) and (5) and § 301.7701–5.

(3) *Transfer.* For purposes of section 367 and regulations thereunder, the term ''transfer'' means any transaction that constitutes a transfer for purposes of section 332, 351, 354, 355, 356, or 361, as applicable. A person's entering into a cost sharing arrangement under § 1.482–7 or acquiring rights to intangible property under such an arrangement shall not be considered a transfer of property described in section 367(a)(1). See § 1.6038B–1T(b)(4) for the date on which the transfer is considered to be made.

(4) *Property.* For purposes of section 367 and the regulations thereunder, the term ''property'' means any item that constitutes property for purposes of section 351, 354, 355, 356, or 361, as applicable.

(5) *Intangible property.* The term ''intangible property'' means either property described in section 936(h)(3)(B) or property to which a U.S. person applies section 367(d) pursuant to paragraph (b)(5) of this section, but does not include property described in section 1221(a)(3) or a working interest in oil and gas property.

(6) *Operating intangibles.* An operating intangible is any property described in section 936(h)(3)(B) of a type not ordinarily licensed or otherwise transferred in transactions

between unrelated parties for consideration contingent upon the licensee's or transferee's use of the property. Examples of operating intangibles may include long-term purchase or supply contracts, surveys, studies, and customer lists.

(f) *Exchanges under sections 354(a) and 361(a) in certain section 368(a)(1)(F) reorganizations*—(1) *Rule.* In every reorganization under section 368(a)(1)(F), where the transferor corporation is a domestic corporation, and the acquiring corporation is a foreign corporation, there is considered to exist—

(i) A transfer of assets by the transferor corporation to the acquiring corporation under section 361(a) in exchange for stock (or stock and securities) of the acquiring corporation and the assumption by the acquiring corporation of the transferor corporation's liabilities;

(ii) A distribution of the stock (or stock and securities) of the acquiring corporation by the transferor corporation to the shareholders (or shareholders and security holders) of the transferor corporation; and

(iii) An exchange by the transferor corporation's shareholders (or shareholders and security holders) of their stock (or stock and securities) of the transferor corporation for stock (or stock and securities) of the acquiring corporation under section 354(a).

(2) *Rule applies regardless of whether a continuance under applicable law.* For purposes of paragraph (f)(1) of this section, it shall be immaterial that the applicable foreign or domestic law treats the acquiring corporation as a continuance of the transferor corporation.

(g) *Effective/applicability dates.* (1) through (3) [Reserved]. For further guidance, *see* § 1.367(a)–1T(g)(1) through (3).

(4) The rules in paragraphs (b)(4)(i)(B) and (b)(4)(i)(C) of this section apply to transfers occurring on or after April 18, 2013. For guidance with respect to paragraph (b)(4)(i)(B) of this section before April 18, 2013, see 26 CFR part 1 revised as of April 1, 2012. The rules in paragraph (e) of this section apply to transactions occurring on or after March 31, 1987. The rules in paragraph (f) of this section apply to transactions occurring on or after January 1, 1985.

(5) Paragraphs (a), (b)(1) through (b)(4)(i)(B), (b)(4)(ii) through (b)(5), (c)(3)(ii)(A), (d) introductory text through (d)(2), (d)(4) through (d)(6) of this section apply to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see §§ 1.367(a)–1 and 1.367(a)–1T as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.367(a)–1T [Amended]

■ **Par. 4.** Section 1.367(a)–1T is amended by removing and reserving paragraphs (a), (b)(1), (b)(2), (b)(3), (b)(4)(i)(A), (b)(4)(ii), (c)(3)(ii)(A), (d) introductory text, (d)(1), (d)(2), (d)(4), and (d)(5), and adding and reserving new paragraphs (b)(5) and (d)(6).

■ **Par. 5.** Section 1.367(a)–2 is revised to read as follows:

§ 1.367(a)–2 Exceptions for transfers of property for use in the active conduct of a trade or business.

(a) *Scope and general rule*—(1) *Scope.* Paragraph (a)(2) of this section provides the general exception to section 367(a)(1) for certain property transferred for use in the active conduct of a trade or business. Paragraph (b) of this section describes property that is eligible for the exception provided in paragraph (a)(2) of this section. Paragraph (c) of this section describes property that is not eligible for the exception provided in paragraph (a)(2) of this section. Paragraph (d) of this section provides general rules, and paragraphs (e) through (h) of this section provide special rules, for determining whether property is used in the active conduct of a trade or business outside of the United States. Paragraph (i) of this section is reserved. Paragraph (j) of this section provides relief for certain failures to comply with the reporting requirements under paragraph (a)(2)(iii) of this section that are not willful. Paragraph (k) of this section provides dates of applicability. The rules of this section do not apply to a transfer of stock or securities in an exchange subject to § 1.367(a)–3.

(2) *General rule.* Except as otherwise provided in §§ 1.367(a)–4, 1.367(a)–6, and 1.367(a)–7, section 367(a)(1) does not apply to property transferred by a United States person (U.S. transferor) to a foreign corporation if—

(i) The property constitutes eligible property;

(ii) The property is transferred for use by the foreign corporation in the active conduct of a trade or business outside of the United States, as determined under paragraph (d), (e), (f), (g), or (h) of this section, as applicable; and

(iii) The U.S. transferor complies with the reporting requirements of section 6038B and the regulations thereunder.

(b) *Eligible property.* Except as provided in paragraph (c) of this section, eligible property means—

(1) Tangible property;

(2) A working interest in oil and gas property; and

(3) A financial asset. For purposes of this section, a financial asset is—

(i) A cash equivalent;

(ii) A security within the meaning of section 475(c)(2), without regard to the last sentence of section 475(c)(2) (referencing section 1256) and without regard to section 475(c)(4), but excluding an interest in a partnership;

(iii) A commodities position described in section 475(e)(2)(B), 475(e)(2)(C), or 475(e)(2)(D); and

(iv) A notional principal contract described in § 1.446–3(c)(1).

(c) *Exception for certain property.* Notwithstanding paragraph (b) of this section, property described in paragraph (c)(1), (2), (3), or (4) of this section does not constitute eligible property.

(1) *Inventory.* Stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business (including raw materials and supplies, partially completed goods, and finished products).

(2) *Installment obligations, etc.* Installment obligations, accounts receivable, or similar property, but only to the extent that the principal amount of any such obligation has not previously been included by the taxpayer in its taxable income.

(3) *Nonfunctional currency, etc.*—(i) *In general.* Property that gives rise to a section 988 transaction of the taxpayer described in section 988(c)(1)(A) through (C), without regard to section 988(c)(1)(D) and (E), or that would give rise to such a section 988 transaction if it were acquired, accrued, entered into, or disposed of directly by the taxpayer.

(ii) *Limitation of gain required to be recognized.* If section 367(a)(1) applies to a transfer of property described in paragraph (c)(3)(i) of this section, then the gain required to be recognized is limited to the gain realized as part of the same transaction upon the transfer of property described in paragraph (c)(3)(i) of this section, less any loss realized as part of the same transaction upon the transfer of property described in paragraph (c)(3)(i) of this section. This limitation applies in lieu of the rule in § 1.367(a)–1(b)(1). No loss is recognized with respect to property described in this paragraph (c)(3).

(4) *Certain leased tangible property.* Tangible property with respect to which the transferor is a lessor at the time of the transfer, unless either the foreign corporation is the lessee at the time of the transfer or the foreign corporation will lease the property to third persons.

(d) *Active conduct of a trade or business outside the United States*—(1) *In general.* Except as provided in paragraphs (e), (f), (g), and (h) of this section, to determine whether property is transferred for use by the foreign corporation in the active conduct of a trade or business outside of the United States, four factual determinations must be made:

(i) What is the trade or business of the foreign corporation (see paragraph (d)(2) of this section);

(ii) Do the activities of the foreign corporation constitute the active conduct of that trade or business (see paragraph (d)(3) of this section);

(iii) Is the trade or business conducted outside of the United States (see paragraph (d)(4) of this section); and

(iv) Is the transferred property used or held for use in the trade or business (see paragraph (d)(5) of this section)?

(2) *Trade or business.* Whether the activities of the foreign corporation constitute a trade or business is determined based on all the facts and circumstances. In general, a trade or business is a specific unified group of activities that constitute (or could constitute) an independent economic enterprise carried on for profit. For example, the activities of a foreign selling subsidiary could constitute a trade or business if they could be independently carried on for profit, even though the subsidiary acts exclusively on behalf of, and has operations fully integrated with, its parent corporation. To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. In this regard, one or more of such activities may be carried on by independent contractors under the direct control of the foreign corporation. (However, see paragraph (d)(3) of this section.) The group of activities must ordinarily include the collection of income and the payment of expenses. If the activities of the foreign corporation do not constitute a trade or business, then the exception provided by this section does not apply, regardless of the level of activities carried on by the corporation. The following activities are not considered to constitute by themselves a trade or business for purposes of this section:

(i) Any activity giving rise to expenses that would be deductible only under section 212 if the activities were carried on by an individual; or

(ii) The holding for one's own account of investments in stock, securities, land, or other property, including casual sales thereof.

(3) *Active conduct.* Whether a trade or business is actively conducted by the foreign corporation is determined based on all the facts and circumstances. In general, a corporation actively conducts a trade or business only if the officers and employees of the corporation carry out substantial managerial and operational activities. A corporation may be engaged in the active conduct of a trade or business even though incidental activities of the trade or business are carried out on behalf of the corporation by independent contractors. In determining whether the officers and employees of the corporation carry out substantial managerial and operational activities, however, the activities of independent contractors are disregarded. On the other hand, the officers and employees of the corporation are considered to include the officers and employees of related entities who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the lending related entity by), the foreign corporation. See paragraph (d)(6) of this section for the standard that applies to determine whether a trade or business that produces rents or royalties is actively conducted. The rule of this paragraph (d)(3) is illustrated by the following example.

Example. X, a domestic corporation, and Y, a foreign corporation not related to X, transfer property to Z, a newly formed foreign corporation organized for the purpose of combining the research activities of X and Y. Z contracts all of its operational and research activities to Y for an arm's-length fee. Z's activities do not constitute the active conduct of a trade or business.

(4) *Outside of the United States.* Whether the foreign corporation conducts a trade or business outside of the United States is determined based on all the facts and circumstances. Generally, the primary managerial and operational activities of the trade or business must be conducted outside the United States and immediately after the transfer the transferred assets must be located outside the United States. Thus, the exception provided by this section would not apply to the transfer of the assets of a domestic business to a foreign corporation if the domestic business continued to operate in the United States after the transfer. In such a case, the primary operational activities of the business would continue to be conducted in the United States. Moreover, the transferred assets would be located in the United States. However, it is not necessary that every item of property transferred be used outside of the United States. As long as the primary managerial and operational activities of the trade or business are conducted outside of the United States and substantially all of the transferred assets are located outside the United States, incidental items of transferred property located in the United States may be considered to have been transferred for use in the active conduct of a trade or business outside of the United States.

(5) *Use in the trade or business.* Whether property is used or held for use by the foreign corporation in a trade or business is determined based on all the facts and circumstances. In general, property is used or held for use in the foreign corporation's trade or business if it is—

(i) Held for the principal purpose of promoting the present conduct of the trade or business;

(ii) Acquired and held in the ordinary course of the trade or business; or

(iii) Otherwise held in a direct relationship to the trade or business. Property is considered held in a direct relationship to a trade or business if it is held to meet the present needs of that trade or business and not its anticipated future needs. Thus, property will not be considered to be held in a direct relationship to a trade or business if it is held for the purpose of providing for future diversification into a new trade or business, future expansion of trade or business activities, future plant replacement, or future business contingencies.

(6) *Active leasing and licensing.* For purposes of paragraph (d)(3) of this section, whether a trade or business that produces rents or royalties is actively conducted is determined under the principles of section 954(c)(2)(A) and the regulations thereunder, but without regard to whether the rents or royalties are received from an unrelated party. See §§ 1.954–2(c) and (d).

(e) *Special rules for certain property to be leased*—(1) *Leasing business of the foreign corporation.* Except as otherwise provided in this paragraph (e), tangible property that will be leased to another person by the foreign corporation will be considered to be transferred for use by the foreign corporation in an active trade or business outside the United States only if—

(i) The foreign corporation's leasing of the property constitutes the active

conduct of a leasing business, as determined under paragraph (d)(6) of this section;

(ii) The lessee of the property is not expected to, and does not, use the property in the United States; and

(iii) The foreign corporation has a need for substantial investment in assets of the type transferred.

(2) *De minimis leasing by the foreign corporation.* Tangible property that will be leased to another person by the foreign corporation but that does not satisfy the conditions of paragraph (e)(1) of this section will, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if either—

(i) The property transferred will be used by the foreign corporation in the active conduct of a trade or business but will be leased during occasional brief periods when the property would otherwise be idle, such as an airplane leased during periods of excess capacity; or

(ii) The property transferred is real property located outside the United States and—

(A) The property will be used primarily in the active conduct of a trade or business of the foreign corporation; and

(B) Not more than ten percent of the square footage of the property will be leased to others.

(3) *Aircraft and vessels leased in foreign commerce.* For purposes of satisfying paragraph (e)(1) of this section, an aircraft or vessel, including component parts such as an engine leased separately from the aircraft or vessel, that will be leased to another person by the foreign corporation will be considered to be transferred for use in the active conduct of a trade or business if—

(i) The employees of the foreign corporation perform substantial managerial and operational activities of leasing aircraft or vessels outside the United States; and

(ii) The leased property is predominantly used outside the United States, as determined under § 1.954–2(c)(2)(v).

(f) *Special rules for oil and gas working interests*—(1) *In general.* A working interest in oil and gas property will be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transfer satisfies the conditions of paragraph (f)(2) or (f)(3) of this section;

(ii) At the time of the transfer, the foreign corporation has no intention to farm out or otherwise transfer any part of the transferred working interest; and

(iii) During the first three years after the transfer there are no farmouts or other transfers of any part of the transferred working interest as a result of which the foreign corporation retains less than a 50-percent share of the transferred working interest.

(2) *Active use of working interest.* A working interest in oil and gas property that satisfies the conditions in paragraphs (f)(1)(ii) and (iii) of this section will be considered to be transferred for use in the active conduct of a trade or business if—

(i) The U.S. transferor is regularly and substantially engaged in exploration for and extraction of minerals, either directly or through working interests in joint ventures, other than by reason of the property that is transferred;

(ii) The terms of the working interest transferred were actively negotiated among the joint venturers;

(iii) The working interest transferred constitutes at least a five percent working interest;

(iv) Before and at the time of the transfer, through its own employees or officers, the U.S. transferor was regularly and actively engaged in—

(A) Operating the working interest, or

(B) Analyzing technical data relating to the activities of the venture;

(v) Before and at the time of the transfer, through its own employees or officers, the U.S. transferor was regularly and actively involved in decision making with respect to the operations of the venture, including decisions relating to exploration, development, production, and marketing; and

(vi) After the transfer, the foreign corporation will for the foreseeable future satisfy the requirements of subparagraphs (iv) and (v) of this paragraph (f)(2).

(3) *Start-up operations.* A working interest in oil and gas property that satisfies the conditions in paragraphs (f)(1)(ii) and (iii) of this section but that does not satisfy all the requirements of paragraph (f)(2) of this section will, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if—

(i) The working interest was acquired by the U.S. transferor immediately before the transfer and for the specific purpose of transferring it to the foreign corporation;

(ii) The requirements of paragraphs (f)(2)(ii) and (iii) of this section are satisfied; and

(iii) The foreign corporation will for the foreseeable future satisfy the requirements of paragraph (f)(2)(iv) and (v) of this section.

(4) *Other applicable rules.* A working interest in oil and gas property that is not described in paragraph (f)(1) of this section may nonetheless qualify for the exception to section 367(a)(1) contained in this section depending upon the facts and circumstances.

(g) *Property retransferred by the foreign corporation*—(1) *General rule.* Property will not be considered to be transferred for use in the active conduct of a trade or business outside of the United States if—

(i) At the time of the transfer, it is reasonable to believe that, in the reasonably foreseeable future, the foreign corporation will sell or otherwise dispose of any material portion of the property other than in the ordinary course of business; or

(ii) Except as provided in paragraph (g)(2) of this section, the foreign corporation receives the property in an exchange described in section 367(a)(1), and, as part of the same transaction, transfers the property to another person. For purposes of the preceding sentence, a subsequent transfer within six months of the initial transfer will be considered to be part of the same transaction, and a subsequent transfer more than six months after the initial transfer may be considered to be part of the same transaction under step-transaction principles.

(2) *Exception.* Notwithstanding paragraph (g)(1) of this section, the active conduct exception provided by this section shall apply to the initial transfer if—

(i) The initial transfer is followed by one or more subsequent transfers described in section 351 or 721; and

(ii) Each subsequent transferee is either a partnership in which the preceding transferor is a general partner or a corporation in which the preceding transferor owns common stock; and

(iii) The ultimate transferee uses the property in the active conduct of a trade or business outside the United States.

(h) *Compulsory transfers of property.* Property is presumed to be transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was previously in use in the country in which the foreign corporation is organized; and

(2) The transfer is either:

(i) Legally required by the foreign government as a necessary condition of doing business; or

(ii) Compelled by a genuine threat of immediate expropriation by the foreign government.

(i) [Reserved].

(j) *Failure to comply with reporting requirements of section 6038B*—(1)

Failure to comply. For purposes of the exception to the application of section 367(a)(1) provided in paragraph (a)(2) of this section, a failure to comply with the reporting requirements of section 6038B and the regulations thereunder (failure to comply) has the meaning set forth in § 1.6038B–1(f)(2).

(2) *Relief for certain failures to comply that are not willful*—(i) *In general.* A failure to comply described in paragraph (j)(1) of this section will be deemed not to have occurred for purposes of satisfying the requirements of this section if the taxpayer demonstrates that the failure was not willful using the procedure set forth in this paragraph (j)(2). For this purpose, willful is to be interpreted consistent with the meaning of that term in the context of other civil penalties, which would include a failure due to gross negligence, reckless disregard, or willful neglect. Whether a failure to comply was a willful failure will be determined by the Director of Field Operations, Cross Border Activities Practice Area, Large Business & International (or any successor to the roles and responsibilities of such position, as appropriate) (Director) based on all the facts and circumstances. The taxpayer must submit a request for relief and an explanation as provided in paragraph (j)(2)(ii)(A) of this section. Although a taxpayer whose failure to comply is determined not to be willful will not be subject to gain recognition under this section, the taxpayer will be subject to a penalty under section 6038B if the taxpayer fails to demonstrate that the failure was due to reasonable cause and not willful neglect. See § 1.6038B–1(b)(1) and (f). The determination of whether the failure to comply was willful under this section has no effect on any request for relief made under § 1.6038B–1(f).

(ii) *Procedures for establishing that a failure to comply was not willful*—(A) *Time and manner of submission.* A taxpayer's statement that the failure to comply was not willful will be considered only if, promptly after the taxpayer becomes aware of the failure, an amended return is filed for the taxable year to which the failure relates that includes the information that should have been included with the original return for such taxable year or that otherwise complies with the rules of this section, and that includes a written statement explaining the reasons for the failure to comply. The amended return must be filed with the Internal Revenue Service at the location where the taxpayer filed its original return. The taxpayer may submit a request for relief from the penalty under section 6038B as part of the same submission. See § 1.6038B–1(f).

(B) *Notice requirement.* In addition to the requirements of paragraph (j)(2)(ii)(A) of this section, the taxpayer must comply with the notice requirements of this paragraph (j)(2)(ii)(B). If any taxable year of the taxpayer is under examination when the amended return is filed, a copy of the amended return and any information required to be included with such return must be delivered to the Internal Revenue Service personnel conducting the examination. If no taxable year of the taxpayer is under examination when the amended return is filed, a copy of the amended return and any information required to be included with such return must be delivered to the Director.

(3) For illustrations of the application of the willfulness standard of this paragraph (j), see the examples in § 1.367(a)–8(p)(3).

(4) Paragraph (j) applies to requests for relief submitted on or after November 19, 2014.

(k) *Effective/applicability dates*—(1) *In general.* Except as provided in paragraphs (j)(4) and (k)(2) of this section, the rules of this section apply to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see §§ 1.367(a)–2, –2T, –4, –4T, –5, and –5T as contained in 26 CFR part 1 revised as of April 1, 2016.

(2) *Foreign currency exception.* Notwithstanding paragraph (c)(3)(i) of this section, § 1.367(a)–5T(d)(2) as contained in 26 CFR part 1 revised as of April 1, 2016, applies to transfers of property denominated in a foreign currency occurring before December 16, 2016, other than transfers occurring before that date resulting from entity classification elections made under § 301.7701–3 that are filed on or after that date.

§ 1.367(a)–2T [Removed]

■ **Par. 6.** Section 1.367(a)–2T is removed.

§ 1.367(a)–3 [Amended]

■ **Par. 7.** For each section listed in the following the table, remove the language in the ''Remove'' column and add in its place the language in the ''Add'' column.

Section	Remove	Add
§ 1.367(a)–3(a)(3), first sentence	§ 1.367(a)–1T(c)	§ 1.367(a)–1(c).
§ 1.367(a)–3(c)(3)(i)(A)	§ 1.367(a)–2T(b)(2) and (3)	§ 1.367(a)–2(d)(2), (3), and (4).
§ 1.367(a)–3(c)(3)(ii)(B), last sentence	§ 1.367(a)–2T(b)(2) and (3)	§ 1.367(a)–2(d)(2) and (3).
§ 1.367(a)–3(c)(4)(i), last sentence	§ 1.367(a)–1T(c)(3)	§ 1.367(a)–1(c)(3).
§ 1.367(a)–3(c)(5)(iv), first sentence	§ 1.367(a)–1T(d)(1)	§ 1.367(a)–1(d)(1).
§ 1.367(a)–3(d)(3) *Example 7A(ii),* penultimate sentence	§ 1.367(a)–2T(a)(2)	§ 1.367(a)–2(a)(2)(iii).
§ 1.367(a)–3(d)(3) *Example 13(i),* penultimate sentence	§ 1.367(a)–2T(c)(2)	§ 1.367(a)–2(g)(2).

■ **Par. 8.** Section 1.367(a)–4 is revised to read as follows:

§ 1.367(a)–4 Special rule applicable to U.S. depreciated property.

(a) *Depreciated property used in the United States*—(1) *In general.* A U.S. person that transfers U.S. depreciated property (as defined in paragraph (a)(2) of this section) to a foreign corporation in an exchange described in section 367(a)(1), must include in its gross income for the taxable year in which the transfer occurs ordinary income equal to the gain realized that would have been includible in the transferor's gross income as ordinary income under section 617(d)(1), 1245(a), 1250(a), 1252(a), 1254(a), or 1255(a), whichever is applicable, if at the time of the transfer the U.S. person had sold the property at its fair market value. Recapture of depreciation under this paragraph (a) is required regardless of whether the exception to section 367(a)(1) provided by § 1.367(a)–2(a)(2) applies to the transfer of the U.S. depreciated property. However, the transfer of the U.S. depreciated property may qualify for the exception with respect to realized gain that is not included in ordinary income pursuant to this paragraph (a).

(2) *U.S. depreciated property.* U.S. depreciated property subject to the rules

of this paragraph (a) is any property that—

(i) Is either mining property (as defined in section 617(f)(2)), section 1245 property (as defined in section 1245(a)(3)), section 1250 property (as defined in section 1250(c)), farm land (as defined in section 1252(a)(2)), section 1254 property (as defined in section 1254(a)(3)), or section 126 property (as defined in section 1255(a)(2)); and

(ii) Has been used in the United States or has been described in section 168(g)(4) before its transfer.

(3) *Property used within and without the United States.* (i) If U.S. depreciated property has been used partly within and partly without the United States, then the amount required to be included in ordinary income pursuant to this paragraph (a) is reduced to an amount determined in accordance with the following formula:

$$\text{Full recapture amount} \times \frac{\text{U.S use}}{\text{Total use}}$$

(ii) For purposes of the fraction in paragraph (a)(3)(i) of this section, the ''full recapture amount'' is the amount that would otherwise be included in the transferor's income under paragraph (a)(1) of this section. ''U.S. use'' is the number of months that the property either was used within the United States or has been described in section 168(g)(4), and was subject to depreciation by the transferor or a related person. ''Total use'' is the total number of months that the property was used (or available for use), and subject to depreciation, by the transferor or a related person. For purposes of this paragraph (a)(3), property is not considered to have been in use outside of the United States during any period in which such property was, for purposes of section 168, treated as property not used predominantly outside the United States pursuant to section 168(g)(4). For purposes of this paragraph (a)(3), the term ''related person'' has the meaning set forth in § 1.367(d)–1(h).

(b) *Effective/applicability dates.* The rules of this section apply to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see §§ 1.367(a)–4 and 1.367(a)–4T as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.367(a)–4T [Removed]

■ **Par. 9.** § 1.367(a)–4T is removed.

§ 1.367(a)–5 [Removed and Reserved]

■ **Par. 10.** Section 1.367(a)–5 is removed and reserved.

§ 1.367(a)–5T [Removed]

■ **Par. 11.** § 1.367(a)–5T is removed.

■ **Par. 12.** Section 1.367(a)–6 is revised to read as follows:

§ 1.367(a)–6 Transfer of foreign branch with previously deducted losses.

(a) through (b)(1) [Reserved]. For further guidance, see § 1.367(a)–6T(a) through (b)(1).

(b)(2) *No active conduct exception.* The rules of this paragraph (b) apply regardless of whether any of the assets of the foreign branch satisfy the active trade or business exception of § 1.367(a)–2(a)(2).

(c)(1) [Reserved]. For further guidance, see § 1.367(a)–6T(c)(1).

(2) *Gain limitation.* The gain required to be recognized under paragraph (b)(1) of this section will not exceed the aggregate amount of gain realized on the transfer of all branch assets (without regard to the transfer of any assets on which loss is realized but not recognized).

(3) [Reserved].

(4) *Transfers of certain intangible property.* Gain realized on the transfer of intangible property (computed with reference to the fair market value of the intangible property as of the date of the transfer) that is an asset of a foreign branch is taken into account in computing the limitation on loss recapture under paragraph (c)(2) of this section. For rules relating to the crediting of gain recognized under this section against income deemed to arise by operation of section 367(d), see § 1.367(d)–1(g)(3).

(d) through (i) [Reserved]. For further guidance, see § 1.367(a)–6T(d) through (i).

(j) *Effective/applicability dates.* The rules of this section apply to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see § 1.367(a)–6T as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.367(a)–6T [Amended]

■ **Par. 13.** Section 1.367(a)–6T is amended by

■ 1. Removing and reserving paragraphs (b)(2), (c)(2), and (c)(4).

■ 2. Adding and reserving paragraph (j).

■ **Par. 14.** Section 1.367(a)–7 is amended by:

■ 1. Revising paragraph (f)(11).

■ 2. Redesignating paragraph (j) as (j)(1) and revising the first sentence, and adding paragraph (j)(2).

The revision and addition read as follows:

§ 1.367(a)–7 Outbound transfers of property described in section 361(a) or (b).

* * * * *

(f) * * *

(11) Section 367(d) property is intangible property as defined in § 1.367(a)–1(d)(5).

* * * * *

(j) *Effective/applicability dates*—(1) *In general.* Except for paragraph (e)(2) of this section, and as provided in paragraph (j)(2) of this section, this section applies to transfers occurring on or after April 18, 2013. * * *

(2) *Section 367(d) property.* The definition provided in paragraph (f)(11) of this section applies to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see § 1.367(a)–7 as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.367(a)–7 [Amended]

■ **Par. 15.** For each section listed in the following table, remove the language in the ''Remove'' column and add in its place the language in the ''Add'' column.

Section	Remove	Add
§ 1.367(a)–7(a), sixth sentence	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(c), second sentence	§ 1.367(a)–2T	§ 1.367(a)–2.
§ 1.367(a)–7(c), second sentence	§ 1.367(a)–4T, 1.367(a)–5T	§ 1.367(a)–4.
§ 1.367(a)–7(c), second sentence	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(c)(2)(i)(B)	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(c)(2)(ii)(A)(*2*)	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(e)(1), third sentence	§ 1.367(a)–2T	§ 1.367(a)–2.
§ 1.367(a)–7(e)(1), third sentence	§ 1.367(a)–4T, 1.367(a)–5T	§ 1.367(a)–4.
§ 1.367(a)–7(e)(1), third sentence	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(e)(1), last sentence	§ 1.367(a)–1T(b)(4) and § 1.367(a)–1(b)(4)(i)(B).	§ 1.367(a)–1(b)(4).
§ 1.367(a)–7(e)(2)(i), third sentence	Director of Field Operations International, Large Business & International.	Director of Field Operations, Cross Border Activities Practice Area of Large Business & International.
§ 1.367(a)–7(e)(4)(ii), first and second sentences.	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(e)(5), heading	§ 1.367(a)–6T	§ 1.367(a)–6.
§ 1.367(a)–7(e)(5)(i), first sentence	§ 1.367(a)–6T	§ 1.367(a)–6.

§ 1.367(a)–7(g), *Example 1 (ii)(A),* last sentence.	§ 1.367(a)–2T	§ 1.367(a)–2.
§ 1.367(a)–7(g), *Example 2 (ii)(A),* last sentence.	§ 1.367(a)–2T	§ 1.367(a)–2.
§ 1.367(a)–7(h), first sentence	§ 1.367(a)–1(b)(4)(i)(B) and § 1.367(a)–1T(b)(4).	§ 1.367(a)–1(b)(4).

§ 1.367(a)–8 [Amended]

■ **Par. 16.** For each section listed in the following table, remove the language in the ''Remove'' column and add in its place the language in the ''Add'' column.

Section	Remove	Add
§ 1.367(a)–8(b)(1)(xvii), first sentence	§ 1.367(a)–1T(d)(1)	§ 1.367(a)–1(d)(1).
§ 1.367(a)–8(b)(1)(xvii), second sentence	§ 1.367(a)–1T(c)(3)(i)	§ 1.367(a)–1(c)(3)(i).
§ 1.367(a)–8(c)(3)(viii)	§ 1.367(a)–1T(c)(3)(i)	§ 1.367(a)–1(c)(3)(i).
§ 1.367(a)–8(c)(3)(viii)	§ 1.367(a)–1T(c)(3)(ii)	§ 1.367(a)–1(c)(3)(ii).
§ 1.367(a)–8(c)(4)(iv), second sentence	§ 1.367(a)–1T(b)(4)	§ 1.367(a)–1(b)(4).
§ 1.367(a)–8(j)(3)	§ 1.367(a)–1T(c)(3)(ii)	§ 1.367(a)–1(c)(3)(ii).
§ 1.367(a)–8(j)(8), second sentence	Director of Field Operations International, Large Business & International.	Director of Field Operations, Cross Border Activities Practice Area of Large Business & International.

■ **Par. 17.** Section 1.367(d)–1 is added to read as follows:

§ 1.367(d)–1 Transfers of intangible property to foreign corporations.

(a) [Reserved]. For further guidance, see § 1.367(d)–1T(a).

(b) *Property subject to section 367(d).* Section 367(d) and the rules of this section apply to the transfer of intangible property, as defined in § 1.367(a)–1(d)(5), by a U.S. person to a foreign corporation in an exchange described in section 351 or 361. See section 367(a) and the regulations thereunder for the rules that apply to the transfer of any property other than intangible property.

(c)(1) through (2) [Reserved]. For further guidance, see § 1.367(d)–1T(c)(1) and (2).

(3) *Useful life*—(i) *In general.* For purposes of determining the period of inclusions for deemed payments under § 1.367(d)–1T(c)(1), the useful life of intangible property is the entire period during which exploitation of the intangible property is reasonably anticipated to affect the determination of taxable income, as of the time of transfer. Exploitation of intangible property includes any direct or indirect use or transfer of the intangible property, including use without further development, use in the further development of the intangible property itself (and any exploitation of the further developed intangible property), and use in the development of other intangible property (and any exploitation of the other developed intangible property).

(ii) *Procedure to limit inclusions to 20 years.* In cases where the useful life of the transferred property is indefinite or is reasonably anticipated to exceed twenty years, taxpayers may, in lieu of including amounts during the entire useful life of the intangible property, choose in the year of transfer to increase annual inclusions during the 20-year period beginning with the first year in which the U.S. transferor takes into account income pursuant to section 367(d), to reflect amounts that, but for this paragraph (c)(3)(ii), would have been required to be included following the end of the 20-year period. See § 1.6038B–1(d)(1)(iv) for guidance on reporting this choice of method. If the taxpayer applies this method during the 20-year period, no adjustments will be made for taxable years beginning after the conclusion of the 20-year period. However, for purposes of determining whether amounts included during the 20-year period are commensurate with the income attributable to the transferred intangible property, the

Commissioner may take into account information with respect to taxable years after that period, such as the income attributable to the transferred property during those later years. The application of this paragraph (c)(3)(ii) must be reflected in a statement (titled ''Application of 20-Year Inclusion Period to Section 367(d) Transfers'') attached to a timely filed original federal income tax return (including extensions) for the year of the transfer. An increase to the deemed payment rate made pursuant to this paragraph (c)(3)(ii) will be irrevocable, and a failure to timely file the statement under this paragraph (c)(3)(ii) may not be remedied.

(iii) Example. Property subject to section 367(d) is transferred from USP, a domestic corporation, to FA, a foreign corporation wholly owned by USP. The useful life of the transferred property, inclusive of derivative works, at the time of transfer is indefinite but is reasonably anticipated to exceed 20 years. In the first five years following the transfer, sales related to the property are expected to be $100x, $130x, $160x, $180x and $187.2x, respectively. Thereafter, for the remainder of the property's useful life, sales are expected to grow by four percent annually. In the first five years following the transfer, operating profits attributable to the property are expected to be $5x, $8x, $11x, $12.5x, and $13x, respectively. Thereafter, for the remainder of the property's useful life, operating profits are expected to grow by four percent annually. It is determined that the appropriate discount rate for sales and operating profits is 10 percent. The present value of operating profits through the property's indefinite useful life is $185x. The present value of sales through the property's indefinite useful life is $2698x. Accordingly, the sales based royalty rate during the property's useful life is 6.8 percent ($185x/$2698x). The taxpayer may choose to take income inclusions into account over a 20-year period. The present value of sales through the 20-year period is $1787x. Accordingly, the sales based royalty rate under the 20-year option is increased to 10.3 percent ($185x/$1787x).

(c)(4) through (g)(2) (introductory text) [Reserved]. For further guidance, see § 1.367(d)–1T(c)(4) through (g)(2) (introductory text).

(g)(2)(i) The intangible property transferred constitutes an operating intangible, as defined in § 1.367(a)–1(d)(6).

(g)(2)(ii) through (iii)(D) [Reserved]. For further guidance, see § 1.367(d)–1T(g)(2)(ii) through (iii)(D).

(E) The transferred intangible property will be used in the active conduct of a trade or business outside of the United States within the meaning of § 1.367(a)–2 and will not be used in connection with the manufacture or sale of products in or for use or consumption in the United States.

(g)(2)(iii) undesignated concluding paragraph [Reserved]. For further guidance, see § 1.367(d)–1T(g)(2)(iii) undesignated concluding paragraph.

(3) *Intangible property transferred from branch with previously deducted losses.* (i) If income is required to be recognized under section 904(f)(3) and the regulations thereunder or under § 1.367(a)–6 upon the transfer of intangible property of a foreign branch that had previously deducted losses, then the income recognized under those sections with respect to that property is credited against amounts that would otherwise be required to be recognized with respect to that same property under paragraphs (c) through (f) of this section in either the current or future taxable years. The amount recognized under section 904(f)(3) or § 1.367(a)–6 with respect to the transferred intangible property is determined in accordance with the following formula:

$$\text{Loss recapture income} \times \frac{\text{gain from intangible property}}{\text{gain from all branch assets}}$$

(ii) For purposes of the formula in paragraph (g)(3)(i) of this section, the ''loss recapture income'' is the total amount required to be recognized by the U.S. transferor pursuant to section 904(f)(3) or § 1.367(a)–6. The ''gain from intangible property'' is the total amount of gain realized by the U.S. transferor pursuant to section 904(f)(3) and § 1.367(a)–6 upon the transfer of items of property that are subject to section 367(d). ''Gain from intangible property'' does not include gain realized with respect to intangible property by reason of an election under paragraph (g)(2) of this section. The ''gain from all branch assets'' is the total amount of gain realized by the transferor upon the transfer of items of property of the branch for which gain is realized.

(g)(4) through (i) [Reserved]. For further guidance, see § 1.367(d)–1T(g)(4) through (i).

(j) *Effective/applicability dates.* This section applies to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see § 1.367(d)–1T as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.367(d)–1T [Amended]

■ **Par. 18.** Section 1.367(d)–1T is amended by removing and reserving paragraphs (b), (c)(3), and (g)(2)(i), (g)(2)(iii)(E), and (g)(3).

■ **Par. 19.** Section 1.367(e)–2 is amended by

■ 1. Revising paragraph (b)(3)(iii).

■ 2. Revising paragraph (e)(4)(ii)(B).

The revisions read as follows.

§ 1.367(e)–2 Distributions described in section 367(e)(2).

* * * * *

(b) * * *

(3) * * *

(iii) *Other rules.* For other rules that may apply, see sections 381, 897, 1248, and § 1.482–1(f)(2)(i)(C).

* * * * *

(e) * * *

(4) * * *

(ii) * * *

(B) The period of limitations on assessment of tax for the taxable year in which gain is required to be reported will be extended until the close of the third full taxable year ending after the date on which the domestic liquidating corporation, foreign distributee corporation, or foreign liquidating corporation, as applicable, furnishes to the Director of Field Operations, Cross Border Activities Practice Area of Large Business & International (or any successor to the roles and responsibilities of such position, as appropriate) (Director) the information that should have been provided under this section.

* * * * *

§ 1.884–5 [Amended]

■ **Par. 20.** Section 1.884–5 is amended in paragraph (e)(3)(ii)(A) by removing the citation ''§ 1.367(a)–2T(b)(5),'' and adding the citation ''§ 1.367(a)–2(d)(5)'' in its place.

§ 1.1248–8 [Amended]

■ **Par. 21.** Section 1.1248–8 is amended in paragraph (b)(2)(iv)(B)(*1*)(*ii*) by removing the citation ''§§ 1.367(a)–6T,'' and adding the citation ''§ 1.367(a)–6'' in its place.

§ 1.1248(f)–2 [Amended]

■ **Par. 22.** Section 1.1248(f)–2 is amended in the last sentence of paragraph (e) by removing the citation ''§ 1.367(a)–2T,'' and adding the citation ''§ 1.367(a)–2'' in its place.

■ **Par. 23.** Section 1.6038B–1 is amended by:

■ 1. Removing the citation ''§ 1.367(a)–1T(c),'' in the fourth sentence of paragraph (b)(1)(i) and adding the citation ''§ 1.367(a)–1(c)'' in its place.

■ 2. Revising paragraphs (c)(1) through (5) and (d).

■ 3. Revising the first sentence of paragraph (g)(1).

■ 4. Adding paragraph (g)(7).

The additions and revision read as follows:

§ 1.6038B–1 Reporting of certain transfers to foreign corporations.

* * * * *

(c) * * *

(1) through (4) introductory text [Reserved]. For further guidance, see § 1.6038B–1T(c)(1) through (4) introductory text.

(i) *Active business property.* Describe any transferred property that qualifies under § 1.367(a)–2(a)(2). Provide here a general description of the business conducted (or to be conducted) by the transferee, including the location of the business, the number of its employees, the nature of the business, and copies of the most recently prepared balance sheet and profit and loss statement. Property listed within this category may be identified by general type. For example, upon the transfer of the assets of a manufacturing operation, a reasonable description of the property to be used in the business might include the categories of office equipment and supplies, computers and related equipment, motor vehicles, and several major categories of manufacturing equipment. However, any property that is includible in both paragraphs (c)(4)(i) and (iii) of this section (property subject to depreciation recapture under § 1.367(a)–4(a)) must be identified in the manner required in paragraph (c)(4)(iii) of this section. If property is considered to be transferred for use in the active conduct of a trade or business under a special rule in paragraph (e), (f), or (g) of § 1.367(a)–2, specify the applicable rule and provide information supporting the application of the rule.

(ii) *Stock or securities.* Describe any transferred stock or securities, including the class or type, amount, and characteristics of the transferred stock or securities, as well as the name, address, place of incorporation, and general description of the corporation issuing the stock or securities.

(iii) *Depreciated property.* Describe any property that is subject to depreciation recapture under § 1.367(a)–4(a). Property within this category must be separately identified to the same extent as was required for purposes of the previously claimed depreciation deduction. Specify with respect to each such asset the relevant recapture provision, the number of months that such property was in use within the United States, the total number of months the property was in use, the fair market value of the property, a schedule of the depreciation deduction taken with respect to the property, and a calculation of the amount of depreciation required to be recaptured.

(iv) *Property not transferred for use in the active conduct of a trade or business.* Describe any property that is eligible property, as defined in § 1.367(a)–2(b) taking into account the application of § 1.367(a)–2(c), that was transferred to the foreign corporation but not for use in the active conduct of a trade or business outside the United States (and was therefore not listed under paragraph (c)(4)(i) of this section).

(v) *Property transferred under compulsion.* If property qualifies for the exception of § 1.367(a)–2(a)(2) under the rules of paragraph (h) of that section, provide information supporting the claimed application of such exception.

(vi) *Certain ineligible property.* Describe any property that is described in § 1.367(a)–2(c) and that therefore cannot qualify under § 1.367(a)–2(a)(2) regardless of its use in the active conduct of a trade or business outside of the United States. The description must be divided into the relevant categories, as follows:

(A) *Inventory, etc.* Property described in § 1.367(a)–2(c)(1);

(B) *Installment obligations, etc.* Property described in § 1.367(a)–2(c)(2);

(C) *Foreign currency, etc.* Property described in § 1.367(a)–2(c)(3); and

(D) *Leased property.* Property described in § 1.367(a)–2(c)(4).

(vii) *Other property that is ineligible property.* Describe any property, other than property described in § 1.367(a)–2(c), that cannot qualify under § 1.367(a)–2(a)(2) regardless of its use in the active conduct of a trade or business outside of the United States and that is not subject to the rules of section 367(d) under § 1.367(a)–1(b)(5) (treatment of certain property as subject to section 367(d)). Each item of property must be separately identified.

(viii) [Reserved]. For further guidance, see § 1.6038B–1T(c)(4)(viii).

(5) *Transfer of foreign branch with previously deducted losses.* If the property transferred is property of a foreign branch with previously deducted losses subject to §§ 1.367(a)–6 and –6T, provide the following information:

(i) through (iv) [Reserved]. For further information, see § 1.6038B–1T(c)(5)(i) through (iv).

* * * * *

(d)(1) through (1)(iii) [Reserved]. For further guidance, see § 1.6038B–1T(d)(1) through (1)(iii).

(iv) *Intangible property transferred.* Provide a description of the intangible property transferred, including its adjusted basis. Generally, each item of intangible property must be separately identified, including intangible property described in § 1.367(d)–1(g)(2)(i). Identify all property that is subject to the rules of section 367(d) under § 1.367(a)–1(b)(5) (treatment of certain property as subject to section 367(d)). Describe any property for which the income required to be taken into account under section 367(d) and the regulations thereunder will be recognized over a 20-year period pursuant to § 1.367(d)–1(c)(3)(ii). Estimate the anticipated income or cost reductions attributable to the intangible property's use beyond the 20-year period.

(v)–(vi) [Reserved]. For further guidance, see § 1.6038B–1T(d)(1)(v) through (1)(vi).

(vii) *Coordination with loss rules.* List any intangible property subject to section 367(d) the transfer of which also gives rise to the recognition of gain under section 904(f)(3) or §§ 1.367(a)–6 or –6T. Provide a calculation of the gain required to be recognized with respect to such property, in accordance with the provisions of § 1.367(d)–1(g)(3).

(d)(1)(viii) through (d)(2) [Reserved]. For further guidance, see § 1.6038B–1T(d)(1)(viii) through (d)(2).

* * * * *

(g) *Effective/applicability dates.* (1) This section applies to transfers occurring on or after July 20, 1998, except as provided in paragraphs (g)(2) through (g)(7) of this section, and except for transfers of cash made in tax years beginning on or before February 5, 1999 (which are not required to be reported under section 6038B), and transfers described in paragraph (e) of this section (which applies to transfers that are subject to §§ 1.367(e)–1(f) and 1.367(e)–2(e)). * * *

* * * * *

(7) Paragraphs (c)(4)(i) through (vii), (c)(5), and (d)(1)(iv) and (vii) of this section apply to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification

elections made under § 301.7701–3 that are filed on or after September 14, 2015. For guidance with respect to paragraphs (c)(4), (c)(5), and (d)(1) of this section before this section is applicable, see §§ 1.6038B–1 and 1.6038B–1T as contained in 26 CFR part 1 revised as of April 1, 2016.

§ 1.6038B–1T [Amended]

■ **Par. 24.** Section 1.6038B–1T is amended by removing and reserving paragraphs (c)(4)(i) through (c)(5) introductory text, and (d)(1)(iv) and (vii).

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Approved: November 23, 2016.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–P

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 4022

Benefits Payable in Terminated Single-Employer Plans; Interest Assumptions for Paying Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This final rule amends the Pension Benefit Guaranty Corporation's regulation on Benefits Payable in Terminated Single-Employer Plans to prescribe interest assumptions under the regulation for valuation dates in January 2017. The interest assumptions are used for paying benefits under terminating single-employer plans covered by the pension insurance system administered by PBGC. As discussed below, PBGC will publish a separate final rule document dealing with interest assumptions under its regulation on Allocation of Assets in Single-Employer Plans for the first quarter of 2017.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy (*Murphy.Deborah@pbgc.gov*), Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005, 202–326–4400 ext. 3451. (TTY/TDD users may call the Federal relay service toll-free at 1–800–877–8339 and ask to be connected to 202–326–4400 ext. 3451.)

SUPPLEMENTARY INFORMATION: PBGC's regulation on Benefits Payable in Terminated Single-Employer Plans (29 CFR part 4022) prescribes actuarial assumptions—including interest assumptions—for paying plan benefits under terminating single-employer plans covered by title IV of the Employee Retirement Income Security Act of 1974. The interest assumptions in the regulation are also published on PBGC's Web site (*http://www.pbgc.gov*).

PBGC uses the interest assumptions in Appendix B to Part 4022 to determine whether a benefit is payable as a lump sum and to determine the amount to pay. Appendix C to Part 4022 contains interest assumptions for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using PBGC's historical methodology. Currently, the rates in Appendices B and C of the benefit payment regulation are the same.

The interest assumptions are intended to reflect current conditions in the financial and annuity markets. Assumptions under the benefit payments regulation are updated monthly. This final rule updates the benefit payments interest assumptions for January 2017.[1]

PBGC normally updates the assumptions under the benefit payments regulation for January at the same time as PBGC updates assumptions for the first quarter of the year under its regulation on Allocation of Assets in Single-Employer Plans (29 CFR part 4044) in a single rulemaking document. Because of delays in obtaining data used in setting assumptions under Part 4044 for the first quarter of 2017, PBGC is publishing two separate rulemaking documents to update the benefit payments regulation for January 2017 and the allocation regulation for the first quarter of 2017.

The January 2017 interest assumptions under the benefit payments regulation will be 1.25 percent for the period during which a benefit is in pay status and 4.00 percent during any years preceding the benefit's placement in pay status. In comparison with the interest assumptions in effect for December 2016, these interest assumptions represent an increase in the immediate rate of 0.50 percent and are otherwise unchanged.

PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest assumptions promptly so that the assumptions can reflect current market conditions as accurately as possible.

Because of the need to provide immediate guidance for the payment of benefits under plans with valuation dates during January 2017, PBGC finds that good cause exists for making the assumptions set forth in this amendment effective less than 30 days after publication.

PBGC has determined that this action is not a ''significant regulatory action'' under the criteria set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects in 29 CFR Part 4022

Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements.

In consideration of the foregoing, 29 CFR part 4022 is amended as follows:

PART 4022—BENEFITS PAYABLE IN TERMINATED SINGLE-EMPLOYER PLANS

■ 1. The authority citation for part 4022 continues to read as follows:

Authority: 29 U.S.C. 1302, 1322, 1322b, 1341(c)(3)(D), and 1344.

■ 2. In appendix B to part 4022, Rate Set 279, as set forth below, is added to the table.

Appendix B to Part 4022—Lump Sum Interest Rates for PBGC Payments

* * * * *

[1] Appendix B to PBGC's regulation on Allocation of Assets in Single-Employer Plans (29 CFR part 4044) prescribes interest assumptions for valuing benefits under terminating covered single-employer plans for purposes of allocation of assets under ERISA section 4044. Those assumptions are updated quarterly.

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities (percent)				
	On or after	Before		i_1	i_2	i_3	n_1	n_2
*	*		*	*	*	*	*	
279	1–1–17	2–1–17	1.25	4.00	4.00	4.00	7	8

■ 3. In appendix C to part 4022, Rate Set 279, as set forth below, is added to the table.

Appendix C to Part 4022—Lump Sum Interest Rates for Private-Sector Payments

* * * * *

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities (percent)				
	On or after	Before		i_1	i_2	i_3	n_1	n_2

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2016–0359; FRL–9956–63–Region 4]

Air Plan Approval; TN; Revisions to the Knox County Portion of the TN SIP

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of Tennessee, through the Tennessee Department of Environment and Conservation (TDEC), on January 11, 2016. The revision was submitted by TDEC on behalf of the Knox County Department of Air Quality Management, which has jurisdiction over Knox County, Tennessee. The revision that EPA is approving amends the Knox County Air Quality Management Department's regulations, which are part of the Tennessee SIP, to address EPA's startup, shutdown, and malfunction (SSM) SIP call for Knox County. EPA is approving the January 11, 2016, SIP revision because the Agency has determined that it is in accordance with the requirements for SIP provisions under the Clean Air Act (CAA or Act).

DATES: This rule will be effective January 17, 2017.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2016–0359. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Madolyn Sanchez, Air Regulatory Management Section, Air Planning and Implementation Branch, Pesticides and Toxics Management Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Ms. Sanchez can be reached via telephone at (404) 562–9644 and via electronic mail at *sanchez.madolyn@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On May 22, 2015, EPA finalized an action (hereafter referred to as the ''SSM SIP Action'') [1] that responded to a Sierra Club petition for rulemaking concerning state rule treatment of excess emissions by sources during periods of SSM and called for 36 states to submit corrective SIP revisions to EPA by November 22, 2016. As discussed in that action, EPA determined that Knox County Regulation 32.1(C) [2] is inconsistent with the fundamental requirements of CAA sections 113(e)(1), 114(c) and 304 and the credible evidence rule [3] and thus issued a SIP call requiring the State to submit a corrective SIP revision addressing this provision. *See* 80 FR 33965.

On January 11, 2016, the State of Tennessee submitted a SIP revision, pursuant to a request by the Knox County Department of Air Quality Management, to address the SSM SIP Action with respect to Knox County. The revision removes the language from Knox County Regulation 32.1(C) that EPA found to be unlawful in the SSM SIP Action and replaces it with ''(Reserved).'' In a proposed rulemaking published on September 22, 2016 (81 FR 65313), EPA proposed to approve that

[1] *See* ''State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown and Malfunction,'' 80 FR 33839 (June 12, 2015).

[2] Knox County SIP Regulation 32.1(C) is a subsection of Section 32.0, ''Use of Evidence.''

[3] 40 CFR 51.212(c); *see also* ''Credible Evidence Revisions,'' 62 FR 8314 (Feb. 24, 1997).

SIP revision. The details of Tennessee's SIP revision and the rationale for EPA's action are explained in the proposed rulemaking. Comments on the proposed rulemaking were due on or before October 24, 2016. EPA did not receive any comments on the proposed action.

II. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of Knox County Regulation Section 32.0 entitled ''Use of Evidence,'' effective November 12, 2015, which replaces the language previously included in Section 32.1(C) with ''(Reserved).'' Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.[4] EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and/or at the EPA Region 4 Office (please contact the person identified in the ''For Further Information Contact'' section of this preamble for more information).

III. Final Action

EPA is approving the Tennessee SIP revision consisting of replacing the language in Section 32.1(C) currently in the EPA-approved SIP for Knox County with ''(Reserved).'' EPA is approving the January 11, 2016 SIP revision because the Agency has determined that it is in accordance with the requirements for SIP provisions under the CAA, is otherwise consistent with the CAA, and adequately addresses the SSM SIP call with respect to the Knox County portion of the Tennessee SIP.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 14, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

[EPA–R05–OAR–2016–0269; FRL–9956–60–Region 5]

Air Plan Approval; Ohio; Redesignation of the Ohio Portion of the Cincinnati, Ohio-Kentucky-Indiana Area to Attainment of the 2008 Ozone Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finding that the Cincinnati, Ohio-Kentucky-Indiana area is attaining the 2008 ozone National Ambient Air Quality Standard (NAAQS or standard) and is redesignating the Ohio portion of the Cincinnati area to attainment for the 2008 ozone NAAQS because the area meets the statutory requirements for redesignation under the Clean Air Act (CAA or Act). The Cincinnati area includes Butler, Clermont, Clinton, Hamilton, and Warren Counties in Ohio; Lawrenceburg Township in Dearborn County, Indiana; and, Boone, Campbell, and Kenton Counties in Kentucky. EPA is also approving, as a revision to the Ohio State Implementation Plan (SIP), the state's plan for maintaining the 2008 ozone standard through 2030 in the Cincinnati area. Finally, EPA finds adequate and is approving the state's 2020 and 2030 volatile organic compound (VOC) and oxides of nitrogen (NO_X) Motor Vehicle Emission Budgets (MVEBs) for the Ohio and Indiana portion of the Cincinnati area. The Ohio Environmental Protection Agency (Ohio EPA) submitted the SIP revision and redesignation request on April 21, 2016.

DATES: This final rule is effective December 16, 2016.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2016–0269. All documents in the docket are listed in the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through *http://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Kathleen D'Agostino, Environmental Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–1767, *dagostino.kathleen@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA.

I. What is being addressed in this document?

This rule takes action on the submission from Ohio EPA, dated April 21, 2016, requesting redesignation of the Ohio portion of the Cincinnati area to attainment for the 2008 ozone standard. The background for today's action is discussed in detail in EPA's proposal, dated September 28, 2016 (81 FR 66602). In that rulemaking, we noted that, under EPA regulations at 40 CFR part 50, the 2008 ozone NAAQS is attained in an area when the 3-year average of the annual fourth highest daily maximum 8-hour average concentration is equal to or less than 0.075 ppm, when truncated after the thousandth decimal place, at all of the ozone monitoring sites in the area. (*See* 40 CFR 50.15 and appendix P to 40 CFR part 50.) Under the CAA, EPA may redesignate nonattainment areas to attainment if sufficient complete, quality-assured data are available to determine that the area has attained the standard and if it meets the other CAA redesignation requirements in section 107(d)(3)(E). The proposed rule, dated September 28, 2016, provides a detailed discussion of how Ohio has met these CAA requirements.

As discussed in the September 28, 2016, proposal, quality-assured and certified monitoring data for 2013–2015 and preliminary data for 2016 show that the Cincinnati area has attained and continues to attain the 2008 ozone standard. In the maintenance plan submitted for the area, Ohio has demonstrated that the ozone standard will be maintained in the area through 2030. Finally, Ohio and Indiana have adopted 2020 and 2030 VOC and NO_X MVEBs for the Ohio and Indiana portion of the Cincinnati area that are supported by Ohio's maintenance demonstration.

II. What comments did we receive on the proposed rule?

EPA provided a 30-day review and comment period for the September 28, 2016, proposed rule. The comment period ended on October 28, 2016. During the comment period, comments in support of the action were submitted on behalf of the Ohio Utility Group and its member companies. We received no adverse comments on the proposed rule.

III. What action is EPA taking?

EPA is determining that the Cincinnati nonattainment is attaining the 2008 ozone standard, based on quality-assured and certified monitoring data for 2013–2015 and that the Ohio portion of this area has met the requirements for redesignation under section 107(d)(3)(E) of the CAA. EPA is thus changing the legal designation of the Ohio portion of the Cincinnati area from nonattainment to attainment for the 2008 ozone standard. EPA is also approving, as a revision to the Ohio SIP, the state's maintenance plan for the area. The maintenance plan is designed to keep the Cincinnati area in

attainment of the 2008 ozone NAAQS through 2030. Finally, EPA finds adequate and is approving the newly-established 2020 and 2030 MVEBs for the Indiana and Ohio portion of the Cincinnati area.

In accordance with 5 U.S.C. 553(d), EPA finds there is good cause for these actions to become effective immediately upon publication. This is because a delayed effective date is unnecessary due to the nature of a redesignation to attainment, which relieves the area from certain CAA requirements that would otherwise apply to it. The immediate effective date for this action is authorized under both 5 U.S.C. 553(d)(1), which provides that rulemaking actions may become effective less than 30 days after publication if the rule ''grants or recognizes an exemption or relieves a restriction,'' and section 553(d)(3), which allows an effective date less than 30 days after publication ''as otherwise provided by the agency for good cause found and published with the rule.'' The purpose of the 30-day waiting period prescribed in section 553(d) is to give affected parties a reasonable time to adjust their behavior and prepare before the final rule takes effect. Today's rule, however, does not create any new regulatory requirements such that affected parties would need time to prepare before the rule takes effect. Rather, today's rule relieves the state of planning requirements for this ozone nonattainment area. For these reasons, EPA finds good cause under 5 U.S.C. 553(d)(3) for these actions to become effective on the date of publication of these actions.

IV. Statutory and Executive Order Reviews

Under the CAA, redesignation of an area to attainment and the accompanying approval of a maintenance plan under section 107(d)(3)(E) are actions that affect the status of a geographical area and do not impose any additional regulatory requirements on sources beyond those imposed by state law. A redesignation to attainment does not in and of itself create any new requirements, but rather results in the applicability of requirements contained in the CAA for areas that have been redesignated to attainment. Moreover, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because redesignation is an action that affects the status of a geographical area and does not impose any new regulatory requirements on tribes, impact any existing sources of air pollution on tribal lands, nor impair the maintenance of ozone national ambient air quality standards in tribal lands.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 14, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Oxides of nitrogen, Ozone, Volatile organic compounds.

40 CFR Part 81

Environmental protection, Administrative practice and procedure, Air pollution control, Designations and classifications, Intergovernmental relations, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: December 5, 2016.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

Parts 52 and 81, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. Section 52.1885 is amended by revising paragraph (ff) introductory text and adding paragraph (pp) to read as follows:

§ 52.1885 Control strategy: Ozone.

* * * * *

(ff) Approval—The 1997 8-hour ozone standard maintenance plans for the following areas have been approved:

* * * * *

(pp) Approval—The 2008 8-hour ozone standard maintenance plans for the following areas have been approved:

(1) Approval—On April 21, 2016, the Ohio Environmental Protection Agency submitted a request to redesignate the Ohio portion of the Cincinnati, OH-KY-IN area to attainment of the 2008 ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. The 2020 motor vehicle emissions budgets for the Ohio and Indiana portions of the Cincinnati, OH-KY-IN area are 30.00 tons per summer day (TPSD) for VOC and 26.77 TPSD for NO_X. The 2030 motor vehicle emissions budgets for the Ohio and Indiana portions of the area are 18.22 TPSD for VOC and 16.22 TPSD for NO_X.

PART 81—[AMENDED]

■ 1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. Section 81.336 is amended by revising the entry for Cincinnati, OH-KY-IN in the table entitled ''Ohio—2008 8-Hour Ozone NAAQS (Primary and secondary)'' to read as follows:

§ 81.336 Ohio.

* * * * *

BILLING CODE 6560–50–P

LEGAL SERVICES CORPORATION

45 CFR Part 1602

Procedures for Disclosure of Information Under the Freedom of Information Act

AGENCY: Legal Services Corporation.

ACTION: Final rule.

SUMMARY: The Legal Services Corporation (LSC) is revising its regulation on procedures for disclosure of information under the Freedom of Information Act to implement the statutorily required amendments in the FOIA Improvement Act of 2016. LSC is also making technical changes to improve the structure and clarity of its Freedom of Information Act (FOIA) regulations.

DATES: The final rule is effective as of December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Helen Gerostathos Guyton, Assistant General Counsel, Legal Services Corporation, 3333 K Street NW., Washington, DC 20007, (202) 295–1632 (phone), (202) 337–6519 (fax), *guytonh@lsc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

LSC is subject to the FOIA by the terms of the Legal Services Corporation Act. 42 U.S.C. 2996d(g). LSC has implemented FOIA by adopting regulations that contain the rules and procedures LSC will follow in making its records available to the public. LSC last amended its FOIA regulations in 2008. 73 FR 67791, Dec. 31, 2008.

On June 30, 2016, President Obama signed into law the FOIA Improvement Act of 2016 (''2016 Amendments'' or the ''Act''). The Act codifies a number of transparency and openness principles and enacts housekeeping measures designed to facilitate FOIA requests and production. The revised regulations described in this final rule reflect the required changes prescribed by the Act. LSC also clarified the language and updated the structure of its FOIA regulations.

In light of the deadline established by Congress, LSC management requested that the Operations and Regulations Committee (Committee) recommend that the Board authorize expedited rulemaking and publication of this final rule. On October 16, 2016, the Committee considered the request and voted to make the recommendation to the Board. On October 18, 2016, the Board voted to authorize expedited rulemaking and the publication of the final rule and request for comments. LSC published the final rule and request for comments on October 31, 2016, 81 FR 75330, and the comment period closed on November 30, 2016. LSC received no substantive adverse comments. LSC received comments from two parties recommending technical changes, which LSC has incorporated into this final rule where noted.

II. Section-by-Section Analysis

Section 1602.1 Purpose

There are no proposed changes to this section.

Section 1602.2 Definitions

LSC modified several existing definitions, deleted one definition, and added five new definitions to make its regulations clearer. LSC amended the Definitions section as follows:

Duplication. LSC modified this definition to require the release of records ''in a form appropriate for release.'' This change complies with

FOIA guidance that records be released in the format requested, where possible.

LSC. LSC replaced all references to ''the Corporation'' with ''LSC'' for simplicity. LSC introduced this definition to make clear that, unless otherwise specified, references to LSC in this rule include both the Corporation and LSC's Office of Inspector General.

Office. LSC added this definition in order to simplify references to the Office of Inspector General and/or the Office of Legal Affairs, where appropriate.

Office of Inspector General records. LSC deleted this definition because the general definition of *records* includes the Office of Inspector General records, making this definition redundant.

Person. LSC's prior regulations did not define *person.* To address this gap, LSC added a definition modeled after the definition of *person* contained in the FOIA, 5 U.S.C. 551(2). In response to the rule published in the **Federal Register** on October 31, 2016, 81 FR 75330, LSC received a comment recommending that it add ''or a Federal agency'' to the definition of *person* to clarify that a Federal agency is not a person. LSC is adopting that recommendation.

Records. LSC modified the definition of this term to comport with the definition of *records* in LSC's Records Management Policy, which was updated in September 2015. It also incorporates Office of Inspector General records, which were previously defined separately.

Rule. LSC's FOIA regulations cite to personnel rules, rules of procedure, and substantive rules, but do not define the term *rule.* To address this gap, LSC added a definition of *rule* modeled on the definition contained in the FOIA, 5 U.S.C. 551(4).

Submitter. On February 14, 2003, LSC published in the **Federal Register** a final rule adding provisions for a submitter's rights process to its FOIA regulations. 68 FR 7433, Feb. 14, 2003. These provisions were modeled after the process outlined in Executive Order No. 12,600 (June 23, 1987). The 2003 final rule limited *submitter* solely to any person or entity from whom LSC receives grant application records. LSC is expanding the definition of *submitter* to include ''any person or applicant for funds who provides confidential commercial information to LSC.'' This definition more closely conforms with the spirit of E.O. 12,600 and ensures that submitters who may have an interest in the protection of their confidential commercial information are properly notified.

Confidential Commercial Information. LSC added a definition of *confidential commercial information* modeled on the definition in E.O. 12,600 to comport with the new definition of *submitter* described above. LSC received a comment recommending that the phrase ''because disclosure could reasonably be expected to cause substantial competitive harm'' be deleted from the definition of *confidential commercial information* because substantial competitive harm is not the only reason that information could be withheld under Exemption 4. LSC is adopting that recommendation.

Section 1602.3 Policy

LSC made minor technical edits to clarify this section, including clarifying the foreseeability definition as recommended by one commenter.

Section 1602.4 Records Published in the ***Federal Register***

LSC made minor technical edits to clarify this section.

Section 1602.5 Public Reading Room

This section sets out the process by which LSC makes available for public inspection the records described in the FOIA, 5 U.S.C. 552(a)(2). In the prior version of its FOIA regulations, LSC set out the specific categories of records that must be publicly disclosed. LSC deleted those specific provisions and replaced them with a broader reference to 552(a)(2) generally in anticipation of implementing the ''Release to One, Release to All'' policy. One commenter recommended that LSC implement ''Release to One, Release to All'' as a policy and delete the reference to the policy from its regulations. LSC also received a comment recommending that it delete reference to § 1602.10 as authority for LSC to withhold records from the public reading room because the FOIA itself provides sufficient authority. LSC is adopting these recommendations.

LSC also made minor technical revisions to clarify this section.

Section 1602.6 Procedures for Using the Public Reading Room

LSC added a provision to this section that will provide requesters with onsite computer and printer access to electronic reading room records. This provision is consistent with Federal agency practice and provides greater access to LSC's records to the public at large.

Section 1602.7 Index of Records

LSC updated this section to reflect its current practice of maintaining its index of records electronically.

Section 1602.8 Requests for Records

The prior version of § 1602.8 included provisions relating to the format of requests for records, the timing of responses, and the format of responses to requests. There were no subheadings to distinguish these provisions within the section, making it difficult to follow. To improve readability, LSC restructured § 1602.8 by limiting the section solely to provisions related to the format of FOIA requests. LSC also added a provision that informs requesters of their right to specify the preferred form or format for the records sought and that requires requesters to provide their contact information to assist LSC in communicating with them about their request. One commenter recommended that LSC delete the phrase ''LSC shall respond to such a request as promptly as possible'', referring to requests for fee waivers or reductions, because LSC would not adjudicate a fee waiver until fees are at issue. The proposed language suggested that all fee waivers would be adjudicated promptly, when this may not always occur. LSC is adopting this recommendation.

Section 1602.9 Timing and Responses to Requests for Records

This is a new section. As described in the discussion of § 1602.8, LSC determined that it would be clearer if the provisions for timing and responses to requests were contained in a separate section. LSC also made technical changes to the language and structure to improve clarity. In addition, LSC added provisions describing the dispute resolution processes available to the public as required by the 2016 Amendments. These provisions describe when a requester may seek assistance, including dispute resolution services, from an LSC FOIA Public Liaison or the U.S. National Archives and Record Administration's Office of Government Information Services. In response to the final rule published on October 31, 2016, 81 FR 75330, LSC received a comment recommending that it articulate the procedures for consultations and referrals when it processes a request that contains within the records information of interest to another Office or Federal agency. LSC also received a comment recommending that it remove § 1602.9(b)(3)'s reference to ''two or more components of LSC'' because LSC has only two components, LSC and the Office of Inspector General. LSC is adopting both recommendations.

Section 1602.10 Exemptions for Withholding Records

LSC amended this section to incorporate the 2016 Amendments' codification of the Department of Justice's foreseeable harm standard, which requires LSC to withhold information only if disclosure would harm an interest protected by an exemption or prohibited by law. It further obligates LSC to consider whether partial disclosure of information is possible when full disclosure is not and to take reasonable steps to segregate and release nonexempt information. One commenter recommended that LSC clarify the foreseeable harm standard. LSC is adopting this recommendation.

In addition, LSC modified its rule regarding the applicability of the deliberative process privilege, as required by the 2016 Amendments. The privilege now applies only to records created within 25 years of the date on which the records were requested.

Finally, LSC added exemptions 1, 8, and 9 from 5 U.S.C. 552(8)(B)(b) to its regulations. While these exemptions, which deal with national security, financial institutions, and geological information, generally do not apply to the work of LSC, their absence caused confusion because LSC's exemption numbers did not track the commonly used exemption numbers found in both the FOIA and case law. This change will eliminate any confusion.

Section 1602.11 Officials Authorized To Grant or Deny Requests for Records

LSC deleted paragraph (a) of this section, which describes the role of the General Counsel in adequately and consistently applying the provisions of this part within LSC. The 2016 Amendments establish the role of the Chief FOIA Officer in ensuring compliance with FOIA, thereby superseding LSC's prior regulations.

Section 1602.12 Denials

LSC added a provision to this section requiring it to include a provision in its denial decisions notifying the requester of his or her right to seek dispute resolution services from LSC's FOIA Public Liaison or the Office of Government Information Services.

Section 1602.13 Appeals of Denials

LSC made minor technical edits to clarify this section. LSC also added a provision that requires LSC to notify a requester of the dispute resolution services offered by the Office of Government Information Services as a non-exclusive alternative to litigation. LSC received a comment recommending that it include contact information for the Office of Government Information Services' voluntary dispute resolution services. LSC is adopting this recommendation.

Section 1602.14 Fees

LSC added a provision to this section that prohibits LSC from assessing fees if its response time is delayed, subject to limited exceptions described in the 2016 Amendments. One commenter recommended that LSC add a provision excusing a failure to comply with the time limits set forth in the regulation when a court determines that exceptional circumstances exist. The commenter also recommended that LSC detail its fee structure and provide requesters an opportunity to reformulate their request at a lower cost. LSC is adopting both recommendations.

Section 1602.15 Submitter's Rights Process

As previously described in the discussion of § 1602.2's definition of the term *submitter,* LSC expanded the submitter's rights process to include ''any person or applicant for funds who provides confidential commercial information to LSC.'' This definition more closely conforms with the spirit of E.O. 12600 and ensures that submitters who may have an interest in the protection of their confidential information are properly notified.

Finally, LSC clarified an ambiguous provision that requires a submitter to provide to LSC within seven days his or her statement objecting to disclosure of his information. One commenter recommended that LSC delete the seven-day response period and instead specify in its notice to the requester a reasonable time period within which the submitter must respond. LSC also received a comment recommending that LSC's regulations comport with agency practice that makes the notice of proposed release the final administrative action by LSC. LSC is adopting these recommendations.

List of Subjects in 45 CFR Part 1602

Freedom of information.

■ For the reasons stated in the preamble, the Legal Services Corporation revises 45 CFR part 1602 to read as follows:

PART 1602—PROCEDURES FOR DISCLOSURE OF INFORMATION UNDER THE FREEDOM OF INFORMATION ACT

Sec.

Authority: 42 U.S.C. 2996g(e).

§ 1602.1 Purpose.

This part contains the rules and procedures the Legal Services Corporation (LSC) follows in making records available to the public under the Freedom of Information Act.

§ 1602.2 Definitions.

(a) *Commercial use request* means a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, LSC will look to the use to which a requester will put the documents requested. When LSC has reasonable cause to doubt the requester's stated use of the records sought, or where the use is not clear from the request itself, it will seek additional clarification before assigning the request to a category.

(b) *Confidential commercial information* means records provided to LSC by a submitter that arguably contain material exempt from release under Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).

(c) *Duplication* means the process of making a copy of a requested record pursuant to this part in a form appropriate for release in response to a FOIA request.

(d) *Educational institution* means a preschool, a public or private elementary or secondary school, an institution of undergraduate or graduate higher education, or an institution of professional or vocational education which operates a program or programs of scholarly research.

(e) *FOIA* means the Freedom of Information Act, 5 U.S.C. 552.

(f) *LSC* means the Legal Services Corporation. Unless explicitly stated otherwise, LSC includes the Office of Inspector General.

(g) *Non-commercial scientific institution* means an institution that is

not operated on a commercial basis and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(h) *Office* refers to the Office of Legal Affairs and/or the Office of Inspector General (OIG).

(i) *Person* includes an individual, partnership, corporation, association, or public or private organization other than LSC or a Federal agency.

(j) *Records* are any type of information made or received by LSC or the OIG for purposes of transacting LSC or OIG business and preserved by LSC or the OIG (either directly or maintained by a third party under contract to LSC or the OIG for records management purposes) regardless of form (*e.g.,* paper or electronic, formal or informal, copies or original) as evidence of LSC's or OIG's organization, functions, policies, decisions, procedures, operations, or other activities of LSC or the OIG or because the record has informational value.

(k) *Representative of the news media* means any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. In this clause, the term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities are television or radio stations broadcasting to the public at large and publishers of periodicals (but only if such entities qualify as disseminators of ''news'') who make their products available for purchase or subscription or by free distribution to the general public. These examples are not all-inclusive. Moreover, as methods of news delivery evolve (for example, the adoption of the electronic dissemination of newspapers through telecommunications services), such alternative media shall be considered to be news media entities. A freelance journalist shall be regarded as working for a news media entity if the journalist can demonstrate a solid basis for expecting publication through that entity, whether or not the journalist is actually employed by the entity. A publication contract would present a solid basis for such an expectation. LSC may also consider the past publication record of the requester in making such a determination.

(l) *Review* means the process of examining documents located in response to a request to determine whether any portion of any such document is exempt from disclosure. It also includes processing any such documents for disclosure. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(m) *Rule* means the whole or a part of an LSC statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy or describing the organization, procedure, or practice requirements of LSC.

(n) *Search* means the process of looking for and retrieving records that are responsive to a request for records. It includes page-by-page or line-by-line identification of material within documents and also includes reasonable efforts to locate and retrieve information from records maintained in electronic form or format. Searches may be conducted manually or by automated means and will be conducted in the most efficient and least expensive manner.

(o) *Submitter* means any person or applicant for funds who provides confidential commercial information to LSC.

§ 1602.3 Policy.

LSC will make records concerning its operations, activities, and business available to the public to the maximum extent reasonably possible. LSC will withhold records from the public only in accordance with the FOIA and this part. LSC will disclose records otherwise exempt from disclosure under the FOIA when LSC does not reasonably foresee that disclosure would harm an interest protected by an exemption and disclosure is not prohibited by law or protected under Exemption 3.

§ 1602.4 Records published in the Federal Register.

LSC routinely publishes in the **Federal Register** information on its basic structure and operations necessary to inform the public how to deal effectively with LSC. LSC will make reasonable efforts to currently update such information, which will include basic information on LSC's location, functions, rules of procedure, substantive rules, statements of general policy, and information regarding how the public may obtain information, make submittals or requests, or obtain decisions.

§ 1602.5 Public reading room.

(a) LSC will maintain a public reading room at its offices at 3333 K St. NW., Washington, DC 20007. This room will be supervised and will be open to the public during LSC's regular business hours. Procedures for use of the public reading room are described in § 1602.6. LSC also maintains an electronic public reading room that may be accessed at *http://www.lsc.gov/about-lsc/foia/foia-electronic-public-reading-room.*

(b) Subject to the limitation stated in paragraph (c) of this section, LSC will make available for public inspection in its electronic public reading room the records described in 5 U.S.C. 552(a)(2).

(c) Records required by FOIA to be available in the public reading room may be exempt from mandatory disclosure pursuant to 5 U.S.C. 552(b). LSC will not make such records available in the public reading room. LSC may edit other records maintained in the reading room by redacting details about individuals to prevent clearly unwarranted invasions of personal privacy. In such cases, LSC will attach a full explanation of the redactions to the record. LSC will indicate the extent of the redactions unless doing so would harm an interest protected by the exemption under which the redactions are made. If technically feasible, LSC will indicate the extent of the redactions at the place in the record where the redactions were made.

§ 1602.6 Procedures for use of public reading room.

(a) A person who wishes to inspect or copy records in the public reading room should arrange a time in advance, by telephone or letter request made to the Office of Legal Affairs, Legal Services Corporation, 3333 K Street NW., Washington, DC 20007 or by email to *FOIA@lsc.gov.*

(1) In appropriate circumstances, LSC will advise persons making telephonic requests to use the public reading room that a written request would aid in the identification and expeditious processing of the records sought.

(2) Written requests should identify the records sought in the manner provided in § 1602.8(b) and should request a specific date for inspecting the records.

(b) LSC will advise the requester as promptly as possible if, for any reason, it is not feasible to make the records sought available on the date requested.

(c) A computer terminal and printer are available upon request in the public reading room for accessing Electronic Reading Room records.

§ 1602.7 Index of records.

LSC will maintain and make available for public inspection in an electronic format a current index identifying any matter within the scope of § 1602.4 and § 1602.5(b).

§ 1602.8 Requests for records.

(a) LSC will make its records promptly available, upon request, to any person in accordance with this section, unless:

(1) the FOIA requires the records to be published in the **Federal Register** (§ 1602.4) or to be made available in the public reading room (§ 1602.5); or

(2) LSC determines that such records should be withheld and are exempt from mandatory disclosure under the FOIA and § 1602.10.

(b)(1) *Requests for LSC records.* All requests for LSC records must be clearly marked Freedom of Information Act Request and shall be addressed to the FOIA Analyst, Office of Legal Affairs, Legal Services Corporation, 3333 K Street NW., Washington, DC 20007. Email requests shall be sent to *FOIA@lsc.gov.* Requests for LSC Records may also be made online using the FOIA Request Electronic Submission Form located at *http://www.lsc.gov/about-lsc/foia.*

(2) *Requests for Office of Inspector General records.* All requests for records maintained by the OIG must be clearly marked Freedom of Information Act Request and shall be addressed to the FOIA Officer, Office of Inspector General, Legal Services Corporation, 3333 K Street NW., Washington, DC 20007. Email requests shall be sent to *FOIA@oig.lsc.gov.*

(3) Any request not marked and addressed as specified in this section will be so marked by LSC personnel as soon as it is properly identified, and will be forwarded immediately to the appropriate Office. A request improperly addressed will be deemed to have been received as in accordance with § 1602.9 only when it has been received by the appropriate Office. Upon receipt of an improperly addressed request, the Chief FOIA Officer, Office of Inspector General Legal Counsel or their designees shall notify the requester of the date on which the time period began.

(c) A request must reasonably describe the records requested so that employees of LSC who are familiar with the subject area of the request are able, with a reasonable amount of effort, to determine which particular records are within the scope of the request. Before submitting their requests, requesters may contact LSC's or OIG's FOIA Analyst or FOIA Public Liaison to discuss the records they seek and to receive assistance in describing the records. If LSC determines that a request does not reasonably describe the records sought, LSC will inform the requester what additional information is needed or why the request is otherwise insufficient. Requesters who are attempting to reformulate or modify their request may discuss their request with LSC's or OIG's FOIA Analyst or FOIA Public Liaison. If a request does not reasonably describe the records sought, LSC's response to the request may be delayed.

(d) To facilitate the location of records by LSC, a requester should try to provide the following kinds of information, if known:

(1) The specific event or action to which the record refers;

(2) The unit or program of LSC that may be responsible for or may have produced the record;

(3) The date of the record or the date or period to which it refers or relates;

(4) The type of record, such as an application, a grant, a contract, or a report;

(5) Personnel of LSC who may have prepared or have knowledge of the record;

(6) Citations to newspapers or publications which have referred to the record.

(e) Requests may specify the preferred form or format (including electronic formats) for the records sought. LSC will provide records in the form or format indicated by the requester to the extent such records are readily reproducible in the requested form or format. LSC reserves the right to limit the number of copies of any document that will be provided to any one requester or to require that special arrangements for duplication be made in the case of bound volumes or other records representing unusual problems of handling or reproduction.

(f) Requesters must provide contact information, such as their phone number, email address, and/or mailing address, to assist LSC in communicating with them and providing released records.

(g) LSC is not required to create a record or to perform research to satisfy a request.

(h) Any request for a waiver or reduction of fees should be included in the FOIA request, and any such request should indicate the grounds for a waiver or reduction of fees, as set out in § 1602.14(g).

§ 1602.9 Timing and responses to requests for records.

(a)(1) Upon receiving a request for LSC or Inspector General records under § 1602.8, the Chief FOIA Officer, Office of Inspector General Legal Counsel or their designees shall make an initial determination of whether to comply with or deny such request. The Chief FOIA Officer, Office of Inspector General Legal Counsel or their designees will send the determination to the requester within 20 business days after receipt of the request and will notify the requester of their right to seek assistance from an LSC FOIA Public Liaison.

(2) The 20-day period under paragraph (a)(1) of this section shall commence on the date on which the request is first received by the appropriate Office, but in no event later than 10 working days after the request has been received by either the Office of Legal Affairs or the Office of Inspector General. The 20-day period shall not be tolled by the Office processing the request except that the processing Office may make one request to the requester for information pursuant to paragraph (b) of this section and toll the 20-day period while

(i) It is awaiting such information that it has reasonably requested from the requester under this section; or

(ii) It communicates with the requester to clarify issues regarding fee assessment.

In either case, the processing Office's receipt of the requester's response to such a request for information or clarification ends the tolling period.

(b) *Consultation.* When records originated with the Office processing the request, but contain within them information of interest to another Office or Federal agency, the Office processing the request should typically consult with that other entity prior to making a release determination.

(c) *Referral.* (1) If the processing Office determines that the other Office or Federal agency is best able to determine whether to disclose the record, the processing Office will typically refer the responsibility for responding to the request for that record to the other Office or Federal agency. Ordinarily, the Office that originated the record is presumed to be the best Office to make the disclosure determination. However, if the Offices or Federal agency jointly agree that the processing Office is in the best position to respond regarding the record, then the record may be released by the processing Office after consultation with the other Office or Federal agency.

(2) Whenever a referral occurs, the processing Office must document the referral, maintain a copy of the record that it refers, and notify the requester of the referral, informing the requester of the name(s) of the Office or Federal agency to which the record was referred, including that Office's or Federal agency's FOIA contact information.

(d)(1) In unusual circumstances, as specified in paragraph (d)(3) of this section, LSC may extend the time limit

for up to 10 working days by written notice to the requester setting forth the reasons for such extension and the date on which LSC expects to send its determination.

(2) LSC may also provide an opportunity to the requester to narrow the request. In addition, to aid the requester, LSC shall make available a FOIA Public Liaison, who shall assist in the resolution of any disputes between the requester and LSC, and shall notify the requester of his right to seek dispute resolution services from the U.S. National Archives and Records Administration's Office of Government Information Services.

(3) *Unusual circumstances.* As used in this part, *unusual circumstances* are limited to the following, but only to the extent reasonably necessary for the proper processing of the particular request:

(i) The need to search for and collect the requested records from establishments that are separate from the office processing the request;

(ii) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) The need for consultation, which shall be conducted with all practicable speed, with another Office, Federal agency, or organization having a substantial interest in the determination of the request.

(c)(1) When the processing Office cannot send a determination to the requester within the applicable time limit, the Chief FOIA Officer, Office of the Inspector General Legal Counsel, or their designees shall inform the requester of the reason for the delay, the date on which the processing Office expects to send its determination, and the requester's right to treat the delay as a denial and to appeal to LSC's President or Inspector General, in accordance with § 1602.13, or to seek dispute resolution services from a FOIA Public Liaison or the Office of Government Information Services.

(2) If the processing Office has not sent its determination by the end of the 20-day period or the last extension thereof, the requester may deem the request denied, and exercise a right of appeal in accordance with § 1602.13, or seek dispute resolution services from LSC's or OIG's FOIA Public Liaison or the National Archives and Records Administration's Office of Government Information Services. The Chief FOIA Officer, Office of Inspector General Legal Counsel, or their designees may ask the requester to forego appeal until a determination is made.

(d) After the processing Office determines that a request will be granted, LSC or the OIG will act with due diligence in providing a substantive response.

(e)(1) *Expedited treatment.* Requests and appeals will be taken out of order and given expedited treatment whenever the requester demonstrates a compelling need. A compelling need means:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual;

(ii) An urgency to inform the public about an actual or alleged LSC activity and the request is made by a person primarily engaged in disseminating information;

(iii) The loss of substantial due process rights; or

(iv) A matter of widespread and exceptional media interest raising questions about LSC's integrity which may affect public confidence in LSC.

(2) A request for expedited processing may be made at the time of the initial request for records or at any later time. For a prompt determination, a request for expedited processing must be properly addressed and marked and received by LSC pursuant to § 1602.8.

(3) A requester who seeks expedited processing must submit a statement demonstrating a compelling need and explaining in detail the basis for requesting expedited processing. The requester must certify that the statement is true and correct to the best of the requester's knowledge and belief.

(4) Within 10 calendar days of receiving a request for expedited processing, the Chief FOIA Officer, Office of Inspector General Legal Counsel or their designees shall decide whether to grant the request and shall notify the requester of the decision. If a request for expedited treatment is granted, the request shall be given priority and shall be processed as soon as practicable. If a request for expedited processing is denied, the requester may appeal in writing to LSC's President or Inspector General in the format described in § 1602.13(a). Any appeal of a denial for expedited treatment shall be acted on expeditiously by LSC.

§ 1602.10 Exemptions for withholding records.

(a) LSC shall—

(1) Withhold information under this section only if—

(i) LSC reasonably foresees that disclosure would harm an interest protected by an exemption described in paragraph (b); or

(ii) Disclosure is prohibited by law; and

(2)(i) Consider whether partial disclosure of information is possible whenever LSC determines that a full disclosure of a requested record is not possible; and

(ii) Take reasonable steps necessary to segregate and release nonexempt information;

(b) LSC may withhold a requested record from public disclosure only if one or more of the following exemptions authorized by the FOIA apply:

(1)(i) Matter that is specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy; and

(ii) Is in fact properly classified pursuant to such Executive Order;

(2) Matter that is related solely to the internal personnel rules and practices of LSC;

(3) Matter that is specifically exempted from disclosure by statute (other than the exemptions under FOIA at 5 U.S.C. 552(b)), provided that such statute requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or establishes particular criteria for withholding, or refers to particular types of matters to be withheld;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memoranda or letters that would not be available by law to a party other than an agency in litigation with LSC, provided that the deliberative process privilege shall not apply to records created 25 years or more before the date on which the records were requested;

(6) Personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Records or information compiled for law enforcement purposes, including enforcing the Legal Services Corporation Act or any other law, but only to the extent that the production of such law enforcement records or information:

(i) Could reasonably be expected to interfere with enforcement proceedings;

(ii) Would deprive a person or a recipient of a right to a fair trial or an impartial adjudication;

(iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(iv) Could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution that furnished information on a confidential basis, and

in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, information furnished by a confidential source;

(v) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or

(vi) Could reasonably be expected to endanger the life or physical safety of any individual;

(8) Matter that is contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

(c) In the event that one or more of the exemptions in paragraph (b) of this section applies, any reasonably segregable portion of a record shall be provided to the requester after redaction of the exempt portions. The amount of information redacted and the exemption under which the redaction is being made shall be indicated on the released portion of the record, unless doing so would harm the interest protected by the exemption under which the redaction is made. If technically feasible, the amount of information redacted and the exemption under which the redaction is being made shall be indicated at the place in the record where the redaction occurs.

(d) No requester shall have a right to insist that any or all of the techniques in paragraph (c) of this section should be employed in order to satisfy a request.

(e) Records that may be exempt from disclosure pursuant to paragraph (b) of this section may be made available at the discretion of the LSC official authorized to grant or deny the request for records, after appropriate consultation as provided in § 1602.11. LSC will disclose records otherwise exempt from disclosure under the FOIA when LSC does not reasonably foresee that disclosure would harm an interest protected by an exemption and disclosure is not prohibited by law or protected under Exemption 3.

§ 1602.11 Officials authorized to grant or deny requests for records.

(a) The Chief FOIA Officer, Office of Inspector General Legal Counsel or their designees are authorized to grant or deny requests under this part. In the absence of an Office of Inspector General Legal Counsel, the Inspector General shall name a designee who will be authorized to grant or deny requests under this part and who will perform all other functions of the Office of Inspector General Legal Counsel under this part.

(b)(1) The Chief FOIA Officer or designee shall consult with the Office of Inspector General Legal Counsel or designee prior to granting or denying any request for records or portions of records which originated with the OIG, or which contain information which originated with the OIG, but which are maintained by other components of LSC.

(2) The Office of Inspector General Legal Counsel or designee shall consult with the Chief FOIA Officer or designee prior to granting or denying any request for records or portions of records which originated with any component of LSC other than the OIG, or which contain information which originated with a component of LSC other than the OIG, but which are maintained by the OIG.

§ 1602.12 Denials.

(a) A denial of a written request for a record that complies with the requirements of § 1602.8 shall be in writing and shall include the following:

(1) A reference to the applicable exemption or exemptions in § 1602.10(b) upon which the denial is based;

(2) An explanation of how the exemption applies to the requested records;

(3) A statement explaining why it is deemed unreasonable to provide segregable portions of the record after deleting the exempt portions;

(4) An estimate of the volume of requested matter denied unless providing such estimate would harm the interest protected by the exemption under which the denial is made;

(5) The name and title of the person or persons responsible for denying the request;

(6) An explanation of the right to appeal the denial and of the procedures for submitting an appeal, as described in § 1602.13, including the address of the official to whom appeals should be submitted; and

(7) An explanation of the right of the requester to seek dispute resolution services from a FOIA Public Liaison or the Office of Government Information Services.

(b) Whenever LSC makes a record available subject to the deletion of a portion of the record, such action shall be deemed a denial of a record for purposes of paragraph (a) of this section.

(c) All denials shall be treated as final opinions under § 1602.5(b).

§ 1602.13 Appeals of denials.

(a) Any person whose written request has been denied is entitled to appeal the denial within 90 days of the date of the response by writing to the President of LSC or, in the case of a denial of a request for OIG records, the Inspector General, at the mailing or email addresses given in § 1602.8(b)(1) and (2). The envelope and letter or email appeal should be clearly marked: ''Freedom of Information Appeal.'' An appeal need not be in any particular form, but should adequately identify the denial, if possible, by describing the requested record, identifying the official who issued the denial, and providing the date on which the denial was issued.

(b) No personal appearance, oral argument, or hearing will ordinarily be permitted on appeal of a denial. Upon request and a showing of special circumstances, however, this limitation may be waived and an informal conference may be arranged with the President, Inspector General or their designees for this purpose.

(c)(1) The decision of the President or the Inspector General on an appeal shall be in writing and, in the event the denial is in whole or in part upheld, shall contain an explanation responsive to the arguments advanced by the requester, the matters described in § 1602.12(a)(1) through (4), and the provisions for judicial review of such decision under 5 U.S.C. 552(a)(4). The decision must also notify the requester of the dispute resolution services offered by the National Archives and Records Administration's Office of Government Information Systems as a non-exclusive alternative to litigation. A requester may contact the Office of Government Information Services in any of the following ways:

(i) Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road—OGIS, College Park, MD 20740.

(ii) *ogis.archives.gov.*

(iii) *Email: ogis@nara.gov.*

(iv) *Telephone:* 202–741–5770.

(v) *Facsimile:* 202–741–5769.

(vi) *Toll-free:* 1–877–684–6448.

(2) Dispute resolution through the Office of Government Information Services is a voluntary process. If LSC agrees to participate in the dispute resolution services provided by the Office of Government Information Services, it will actively engage in the process in an attempt to resolve the dispute.

(d) LSC will send its decision to the requester within 20 business days after receipt of the appeal, unless an additional period is justified due to

unusual circumstances, as described in § 1602.9, in which case LSC may extend the time limit for up to 10 working days by written notice to the requester setting forth the reasons for such extension and the date on which LSC expects to send its determination. The decision of the President or the Inspector General shall constitute the final action of LSC. All such decisions shall be treated as final opinions under § 1602.5(b)(1).

(e) On an appeal, the President or designee shall consult with the OIG prior to reversing in whole or in part the denial of any request for records or portions of records which originated with the OIG, or which contain information which originated with the OIG, but which are maintained by LSC. The Inspector General or designee shall consult with the President prior to reversing in whole or in part the denial of any request for records or portions of records which originated with LSC, or which contain information which originated with LSC, but which are maintained by the OIG.

§ 1602.14 Fees.

(a) LSC will not charge fees for information routinely provided in the normal course of doing business.

(b)(1) When records are requested for commercial use, LSC shall limit fees to reasonable standard charges for document search, review, and duplication.

(2) LSC shall not assess any search fees (or if the requester is a representative of the news media, duplication fees) if LSC has failed to comply with the time limits set forth in § 1602.9 and no unusual circumstances, as defined in that section apply.

(3)(i) If LSC has determined that unusual circumstances as defined in § 1602.9 apply and LSC has provided timely written notice to the requester in accordance with § 1602.9, a failure described in paragraph (2) is excused for an additional 10 days. If LSC fails to comply with the extended time limit, LSC may not assess any search fees (or, if the requester is a representative of the news media, duplication fees) except as provided in paragraphs (a)(3)(ii)–(iii) of this section.

(ii) If LSC has determined that unusual circumstances as defined in § 1602.9 apply and more than 5,000 pages are necessary to respond to the request, LSC may charge search fees or duplication fees if LSC has provided a timely written notice to the requester in accordance with § 1602.9 and LSC has discussed with the requester via written mail, electronic mail, or telephone (or made not less than three good faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with § 1602.9.

(iii) If a court has determined that exceptional circumstances exist, as defined by the FOIA, a failure to comply with the time limits shall be excused for the length of time provided by the court order.

(c) When records are sought by a representative of the news media or by an educational or non-commercial scientific institution, LSC shall limit fees to reasonable standard charges for document duplication after the first 100 pages; and

(d) For all other requests, LSC shall limit fees to reasonable standard charges for search time after the first 2 hours and duplication after the first 100 pages.

(e) The schedule of charges and fees for services regarding the production or disclosure of the Corporation's records is as follows:

(1) Manual search for and review of records will be charged as follows:

(i) *Administrative fee:* $22.35/hour;

(ii) *Professional fee:* $66.26/hour;

(iii) Charges for search and review time less than a full hour will be billed by quarter-hour segments;

(2) *Duplication by paper copy:* 35 cents per page;

(3) *Duplication by other methods:* actual charges as incurred;

(4) *Packing and mailing records:* no charge for regular mail;

(5) *Express mail:* actual charges as incurred.

(f) LSC may charge for time spent searching even if it does not locate any responsive records or it withholds the records located as exempt from disclosure.

(g) *Fee waivers.* A requester may seek a waiver or reduction of the fees established under paragraph (e) of this section. A fee waiver or reduction request will be granted where LSC has determined that the requester has demonstrated that disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations of LSC and is not primarily in the commercial interest of the requester.

(1) In order to determine whether disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of LSC, LSC shall consider the following four factors:

(i) *The subject of the request:* Whether the subject of the requested records concerns ''the operations or activities of LSC.'' The subject of the requested records must concern identifiable operations or activities of LSC, with a connection that is direct and clear, not remote or attenuated.

(ii) *The informative value of the information to be disclosed:* Whether the disclosure is ''likely to contribute'' to an understanding of LSC operations or activities. The requested records must be meaningfully informative about LSC operations or activities in order to be likely to contribute to an increased public understanding of those operations or activities. The disclosure of information that is already in the public domain, in either a duplicative or a substantially identical form, would not be likely to contribute to such understanding where nothing new would be added to the public's understanding.

(iii) *The contribution to an understanding of the subject by the public likely to result from disclosure:* Whether disclosure of the requested records will contribute to ''public understanding.'' The disclosure must contribute to a reasonably broad audience of persons interested in the subject, as opposed to the personal interest of the requester. A requester's expertise in the subject area and ability and intention to effectively convey information to the public shall be considered. LSC shall presume that a representative of the news media will satisfy this consideration.

(iv) *The significance of the contribution to public understanding:* Whether the disclosure is likely to contribute ''significantly'' to public understanding of LSC operations or activities. The disclosure must enhance the public's understanding of the subject in question to a significant extent.

(2) In order to determine whether disclosure of the information is not primarily in the commercial interest of the requester, LSC will consider the following two factors:

(i) *The existence and magnitude of a commercial interest:* Whether the requester has a commercial interest that would be furthered by the requested disclosure. LSC shall consider any commercial interest of the requester (with reference to the definition of *commercial use* in this part) or of any person on whose behalf the requester may be acting, that would be furthered by the requested disclosure.

(ii) *The primary interest in disclosure:* Whether the magnitude of the identified commercial interest is sufficiently large, in comparison with the public interest in disclosure, that disclosure is ''primarily'' in the commercial interest of the requester. A fee waiver or reduction is justified where the public interest is of greater magnitude than is

any identified commercial interest in disclosure. LSC ordinarily shall presume that where a news media requester has satisfied the public interest standard, the public interest will be the interest primarily served by disclosure to that requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return shall not be presumed primarily to serve a public interest.

(3) Where LSC has determined that a fee waiver or reduction request is justified for only some of the records to be released, LSC shall grant the fee waiver or reduction for those records.

(4) Requests for fee waivers and reductions shall be made in writing and must address the factors listed in this paragraph as they apply to the request.

(h) Requesters must agree to pay all fees charged for services associated with their requests. LSC will assume that requesters agree to pay all charges for services associated with their requests up to $25 unless otherwise indicated by the requester. For requests estimated to exceed $25, LSC will consult with the requester prior to processing the request, and such requests will not be deemed to have been received by LSC until the requester agrees in writing to pay all fees charged for services. LSC will also make available its FOIA Public Liaison or other FOIA professional to assist any requester in reformulating a request to meet the requester's needs at a lower cost.

(i) No requester will be required to make an advance payment of any fee unless:

(1) The requester has previously failed to pay a required fee within 30 days of the date of billing, in which case an advance deposit of the full amount of the anticipated fee together with the fee then due plus interest accrued may be required (and the request will not be deemed to have been received by LSC until such payment is made); or

(2) LSC determines that an estimated fee will exceed $250, in which case the requester shall be notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. Such notification shall be transmitted as soon as possible, but in any event within five working days of receipt by LSC, giving the best estimate then available. The notification shall offer the requester the opportunity to confer with appropriate representatives of LSC for the purpose of reformulating the request so as to meet the needs of the requester at a reduced cost. The request will not be deemed to have been received by LSC for purposes of the initial 20-day response period until the requester makes a deposit on the fee in an amount determined by LSC.

(j) Interest may be charged to those requesters who fail to pay the fees charged. Interest will be assessed on the amount billed, starting on the 31st day following the day on which the billing was sent. The rate charged will be as prescribed in 31 U.S.C. 3717.

(k) If LSC reasonably believes that a requester or group of requesters is attempting to break a request into a series of requests for the purpose of evading the assessment of fees, LSC shall aggregate such requests and charge accordingly. Likewise, LSC will aggregate multiple requests for documents received from the same requester within 45 days.

§ 1602.15 Submitter's rights process.

(a) When LSC receives a FOIA request seeking the release of confidential commercial information, LSC shall provide prompt written notice of the request to the submitter in order to afford the submitter an opportunity to object to the disclosure of the requested confidential commercial information. The notice shall reasonably describe the confidential commercial information requested, inform the submitter of the process required by paragraph (b) of this section, and provide a reasonable time period for the submitter to respond.

(b) If a submitter who has received notice of a request for the submitter's confidential commercial information wishes to object to the disclosure of the confidential commercial information, the submitter must provide LSC within the time period set forth in the notice, a detailed written statement identifying the information which it objects. The submitter must send its objections to the Office of Legal Affairs or, if it pertains to Office of Inspector General records, to the Office of Inspector General, and must specify the grounds for withholding the information under FOIA or this part. In particular, the submitter must demonstrate why the information is commercial or financial information that is privileged or confidential. If the submitter fails to respond to the notice from LSC within the time period specified in the notice, LSC will deem the submitter to have no objection to the disclosure of the information.

(c) Upon receipt of written objection to disclosure by a submitter, LSC shall consider the submitter's objections and specific grounds for withholding in deciding whether to release the disputed information. Whenever LSC decides to disclose information over the objection of the submitter, LSC shall give the submitter written notice which shall include:

(1) A description of the information to be released and a notice that LSC intends to release the information;

(2) A statement of the reason(s) why the submitter's request for withholding is being rejected; and

(3) A specified disclosure date, which must be a reasonable time after the notice.

(d) The requirements of this section shall not apply if:

(1) LSC determines upon initial review of the requested confidential commercial information that the requested information should not be disclosed;

(2) The information has been previously published or officially made available to the public; or

(3) Disclosure of the information is required by statute (other than FOIA) or LSC's regulations.

(e) Whenever a requester files a lawsuit seeking to compel disclosure of a submitter's information, LSC shall promptly notify the submitter.

(f) Whenever LSC provides a submitter with notice and opportunity to oppose disclosure under this section, LSC shall notify the requester that the submitter's rights process under this section has been triggered. Likewise, whenever a submitter files a lawsuit seeking to prevent the disclosure of the submitter's information, LSC shall notify the requester.

Dated: December 12, 2016.

Stefanie K. Davis,

Assistant General Counsel.

RIN 2700–AE33

NASA Federal Acquisition Regulation Supplement: Contractor Financial Reporting of Property (2016–N024)

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: NASA is issuing a final rule amending the NASA Federal Acquisition Regulation Supplement (NFS) to add a monthly reporting requirement for contractors having custody of $10 million or more in NASA-owned Property, Plant and Equipment (PP&E).

DATES: *Effective:* January 17, 2017.

FOR FURTHER INFORMATION CONTACT: Andrew O'Rourke, telephone 202–358–4560.

SUPPLEMENTARY INFORMATION:

I. Background

NASA published a proposed rule in the **Federal Register** at 81 FR 48726 on July 26, 2016, to amend the NFS to add a monthly reporting requirement at 1852.245–73 for contracts in which the contractor has custody of NASA-owned PP&E valued at $10 million or more to ensure contractor-held PP&E are more accurately represented in NASA financial statements. Two respondents provided comments in response to the proposed rule.

II. Discussion and Analysis

NASA reviewed the public comments in the development of the final rule. A discussion of the comments and any changes made to the rule as a result of these comments is provided, as follows:

A. Changes. No changes are being made to the final rule as a result of the public comments received with the exception of minor editorial changes.

B. Analysis of Public Comments.

1. Recommend use of different approach to asset management.

Comment: One respondent agreed with the overall objective of the rule, but disagreed with NASA's proposed approach and changes in the rule. The respondent commented that the NFS clause is fundamentally flawed, is non-GAAP accounting, and it does not in of itself create adequate infrastructure to provide reliable accounting data and financial reporting. The respondent commented that the clause inappropriately combines and transforms property management accountability data under a contract based upon FAR 45 Government Property, into Financial Accounting Standards Board (FASB) accounting data. The respondent commented that NASA-owned and contractor-furnished internal use property, acquired under a contract that is accountable to a contract is generally not subject to NASA's capitalization threshold of $500,000; however, what is acquired and furnished includes property transactions for research and development, period cost, program cost . . ., probably very little individual capital items, per FASAB No. 6—Accounting for property, plant, and equipment. The respondent commented that using property accountability data subject to FAR 45, for financial accounting data is wrong, as it does not provide faithful representation of NASA's PP&E as well as external reporting of property accountability in all other Government agencies is not on a monthly basis. The respondent commented that reporting this information will not result in improved decision making. The respondent also stated that reporting unreliable financial data on a yearly basis or monthly basis is a waste of NASA resources, the cost to increase the reporting cycle from annual to monthly is not inconsequential, and NASA should expect their contractors to ask for a contract modification with due consideration. The respondent recommended that NASA not proceed with the proposed rule, rather NASA should migrate to the new ISO 55000 Asset Management standard.

Response: NASA does not concur with the respondent's stance on the proposed rule. The objective of the rule is to clarify and emphasize the supplemental instructions in paragraph (a) of NFS clause 1852.245–73 that all contractors having custody of NASA Property, Plant, and Equipment (PP&E) with a value of $10 million or more are required to report this information on a monthly basis to NASA. The property reporting requirement is to help assess the efficiency and effectiveness of asset management consistent with the Statement of Federal Financial Accounting Standard (SFFAS) No. 6, Accounting for Property, Plant, and Equipment, and NASA Procedural Requirement (NPR) 9250.1, Property, Plant, and Equipment and Operating Materials and Supplies, which implements SFFAS No. 6. The respondent failed to provide data to support their comments concerning the NFS clause or the recommendation to migrate to a new standard. Thus, no changes were made in response to this comment.

2. Difference between monthly and annual reporting.

Comment: One respondent submitted the following questions on the proposed rule:

- If a contractor has $10M worth of property, is reporting is required?
- If the value drops below $10M, does the contractor stop reporting on a monthly basis?
- Is the $10M per contract or the sum of NASA property accountable to the contractor?
- Is the NASA Form 1018 required for the monthly reporting or is another format/system used?
- If NASA is going to require monthly financial reporting, are they referring to how the contractor reports monthly financials on the CHATS report or how the contractor reports on the NASA Form 1018?
- Will NASA require the contractor to submit a NASA Form 1018 monthly or a CHATS monthly?
- Currently in the month of September an annual and a monthly financial report is due. Will NASA eliminate one of these if they are going to require 1018s on a monthly basis?

Response: If at any time during performance of the contract, NASA-owned property in the custody of the contractor has a value of $10 million or more for the contract, the contractor shall submit a report no later than the 21st of each month. At any time during performance of the contract if the value of property for the contract drops below $10M, the contractor does not have to submit the monthly report. A contractor having NASA-owned property in their custody of $10 million or more will be required to report both the monthly and yearly reporting in accordance with the requirements of paragraph (c)(1) and paragraph (c)(2) of the clause utilizing the NASA Form 1018, the NASA Form 1018 Electronic Submission System (NESS), NASA Form 533 Contractor Financial Management Report, and any supplemental instructions issued by the contracting officer. Accordingly, no changes were made in response to this respondent's questions.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

A final regulatory flexibility analysis has been prepared consistent with the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* and is summarized as follows:

The objective of this rule is to add a monthly reporting requirement for contractors having custody of NASA-owned PP&E valued at $10 million or greater to ensure that contractor-held PP&E are more accurately represented in NASA financial statements consistent with the Statement of Federal Financial

Accounting Standard (SFFAS) No. 6, Accounting for Property, Plant, and Equipment and NASA Procedural Requirement (NPR) 9250.1, Property, Plant, and Equipment and Operating Materials and Supplies.

Two respondents provided comments in response to the proposed rule, but none of the comments were submitted in response to the Initial Regulatory Flexibility Act request in the proposed rule. Thus, no changes were made to the final rule.

NASA does not expect this final rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* because the affected NASA contractors with custody of NASA-owned Property, Plant, and Equipment (PP&E) valued at $10 million or greater are primarily large businesses.

The requirements under this rule apply to any contract award (including contracts for supplies, services, construction, and major systems) that requires contractors to use Government property. According to NASA Property Records in Fiscal Year (FY) 2015 there were 643 contracts that required reporting NASA contractors with custody of Government property to report that property. Of the 643 contracts, approximately 20% or 129 contracts were with small business contractors. Of the 643 contracts, 32 contracts had NASA-owned and contractor-held PP&E with a value of $10 million or more and required monthly reporting. Of those 32 contracts, only three were awarded to small business contractors.

Each NASA contractor is required to submit annually the NASA Form 1018, NASA Property in the Custody of Contractors. This rule will add a new reporting requirement requiring contractors to submit a report if at any time during performance of the contract NASA-owned property in the custody of the contractor has a value of $10 million or more. However, the impact of this reporting requirement is minimal on small entities based on FY 2015 NASA property records that show only three small business contractors with custody of NASA PP&E valued at $10 million or more. There are no additional professional skills necessary in this area on the part of small businesses.

There are no significant alternatives that could further minimize the already minimal impact on businesses, small or large. New PP&E reporting requirements are the same for both large and small businesses once the NASA-owned PP&E threshold of $10 million is reached.

V. Paperwork Reduction Act

The rule contains information collection requirements that require the approval of the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C chapter 35); however, these changes to the NFS do not impose additional information collection requirements to the paperwork burden previously approved under OMB Control Number 2700–0017, titled NASA Property in the Custody of Contractors and OMB Control No. 9000–0075, titled Government Furnished Property Requirements.

List of Subjects in 48 CFR Parts 1845 and 1852

Government procurement.

Manuel Quinones,

NASA FAR Supplement Manager.

Accordingly, 48 CFR parts 1845 and 1852 are amended as follows:

PART 1845—GOVERNMENT PROPERTY

■ 1. The authority citation for part 1845 continues to read as follows:

Authority: 51 U.S.C. 20113(a) and 48 CFR chapter 1.

■ 2. Amend section 1845.107–70 by revising paragraph (d) to read as follows:

1845.107–70 NASA solicitation provisions and contract clauses.

* * * * *

(d) The contracting officer shall insert the clause at *1852.245–73,* Financial Reporting of NASA Property in the Custody of Contractors, in cost reimbursement solicitations and contracts and in all contracts in which the contractor has custody of NASA-owned property with a value of $10 million or more, unless all property to be provided is subject to the clause at *1852.245–71,* Installation-Accountable Government Property. Insert the clause 1852.245–73 in other types of solicitations and contracts when it is known at award that property will be provided to the contractor or that the contractor will acquire property title to which will vest in the Government prior to delivery.

* * * * *

PART 1852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 3. The authority citation for part 1852 continues to read as follows:

Authority: 51 U.S.C. 20113(a) and 48 CFR chapter 1.

■ 4. Amend section 1852.245–73 by—
■ a. Revising the date of the clause; and
■ b. Revising paragraphs (b)(2) and (c).

The revised text reads as follows:

1852.245–73 Financial reporting of NASA property in the custody of contractors.

* * * * *

Financial Reporting of NASA Property in the Custody of Contractors (Jan 2017)

* * * * *

(b) * * *

(2) The Contractor shall mail the original signed NF 1018 directly to the cognizant NASA Center Industrial Property Officer and a copy to the cognizant NASA Center Deputy Chief Financial Officer, Finance, unless the Contractor uses the NF 1018 Electronic Submission System (NESS) for report preparation and submission.

* * * * *

(c)(1) The annual reporting period shall be from October 1 of each year through September 30 of the following year. The report shall be submitted in time to be received by October 31st. The information contained in these reports is entered into the NASA accounting system to reflect current asset values for agency financial statement purposes. Therefore, it is essential that required reports be received no later than October 31st.

(2) Some activity may be estimated for the month in which the report is submitted, if necessary, to ensure the NF 1018 is received when due. However, contractors' procedures must document the process for developing these estimates based on planned activity such as planned purchases or NASA Form 533 (NF 533) Contractor Financial Management Report cost estimates. It should be supported and documented by historical experience or other corroborating evidence, and be retained in accordance with FAR Subpart 4.7, Contractor Records Retention. Contractors shall validate the reasonableness of the estimates and associated methodology by comparing them to the actual activity once that data is available, and adjust them accordingly. In addition, differences between the estimated cost and actual cost must be adjusted during the next reporting period. Contractors shall have formal policies and procedures, which address the validation of NF 1018 data, including data from subcontractors, and the identification and timely reporting of errors. The objective of this validation is to ensure that information reported is accurate and in compliance with the NASA FAR Supplement. If errors are discovered on NF 1018 after submission, the contractor shall contact

the cognizant NASA Center Industrial Property Officer (IPO) within 30 days after discovery of the error to discuss corrective action.

(3) In addition to an annual report, if at any time during performance of the contract, NASA-owned property in the custody of the contractor has a value of $10 million or more, the contractor shall also submit a report no later than the 21st of each month in accordance with the requirements of paragraph (c)(2) of this clause.

(4) The Contracting Officer may, in NASA's interest, withhold payment until a reserve not exceeding $25,000 or 5 percent of the amount of the contract, whichever is less, has been set aside, if the Contractor fails to submit annual NF 1018 reports in accordance with NFS subpart 1845.71, any monthly report in accordance with (c)(3) of this clause, and any supplemental instructions for the current reporting period issued by NASA. Such reserve shall be withheld until the Contracting Officer has determined that NASA has received the required reports. The withholding of any amount or the subsequent payment thereof shall not be construed as a waiver of any Government right.

Proposed Rules

Federal Register
Vol. 81, No. 242
Friday, December 16, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Part 430

[Docket No. EERE–2013–BT–STD–0006]

RIN 1904–AC55

Energy Efficiency Program for Commercial and Industrial Equipment: Availability of Provisional Analysis Tools and Notice of Data Availability

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Reopening of public comment period.

SUMMARY: On November 1, 2016, the U.S. Department of Energy (DOE) published in the **Federal Register** a notice of data availability (NODA) pertaining to the provisional analysis of energy conservation standards for commercial and industrial fans and blowers. The notice provided an opportunity for submitting written comments, data, and information by December 1, 2016. This document announces a reopening of the public comment period for submitting comments and data on the NODA. The comment period is reopened until January 6, 2017.

DATES: The comment period for the notice of data availability published on November 1, 2016 (81 FR 75742) is reopened. DOE will accept comments, data, and information regarding this rulemaking received no later than January 6, 2017.

ADDRESSES: *Instructions:* Any comments submitted must identify the NODA for commercial and industrial fans and blowers and provide docket number EERE–2013–BT–STD–0006 and/or RIN number 1904–AC55. Comments may be submitted using any of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

(2) *Email: CIFB2013STD0006@ee.doe.gov.* Include the docket number and/or RIN in the subject line of the message. Submit electronic comments in WordPerfect, Microsoft Word, PDF, or ASCII file format, and avoid the use of special characters or any form of encryption.

(3) *Postal Mail:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW., Washington, DC 20585–0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.

(4) *Hand Delivery/Courier:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, 950 L'Enfant Plaza SW., 6th Floor, Washington, DC 20024. Telephone: (202) 586–6636. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

Docket: The docket, which includes **Federal Register** notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, some documents listed in the index may not be publicly available, such as those containing information that is exempt from public disclosure.

The docket Web page can be found at: *https://www.regulations.gov/docket?D=EERE-2013-BT-STD-0006.* The docket Web page contains simple instructions on how to access all documents, including public comments, in the docket.

FOR FURTHER INFORMATION CONTACT:
Ashley Armstrong, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies, EE–2J, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–6636. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Mr. Peter Cochran, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–9496. Email: *peter.cochran@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: On November 1, 2016, DOE published a notice of data availability (NODA) pertaining to energy conservation standards for commercial and industrial blowers (81 FR 75742). The NODA announced the availability of provisional analysis tools and results that DOE may use to support energy conservation standards for commercial and industrial fans and blowers. The November 2016 NODA provided for the submission of public comments by December 1, 2016. The Air Conditioning, Heating, and Refrigeration Institute (AHRI), and the Air Movement and Control Association (AMCA) requested an extension of the public comment period to allow for additional time to review and evaluate the changes reflected in the provisional analysis tools and results associated with the November 2016 NODA compared to the revised provisional analysis tools and results associated with the previous NODA, which DOE published on May 1, 2015. 80 FR 24841.

In view of the requests for an additional comment period extension for the November 2016 NODA, DOE has determined that a reopening of the comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is reopening the comment period until January 6, 2017, to provide interested parties additional time to prepare and submit comments. DOE further notes that any submissions of comments or other information submitted between the original comment end date and January 6, 2017, will be deemed timely filed.

Issued in Washington, DC, on November 30, 2016.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

BILLING CODE 6450–01–P

SMALL BUSINESS ADMINISTRATION

13 CFR Part 107

RIN 3245–AG65

Small Business Investment Companies—Administrative Fees

AGENCY: U.S. Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The U.S. Small Business Administration (SBA) proposes to increase the Small Business Investment Company (SBIC) licensing and examination fees. The Small Business Investment Act of 1958, as amended, allows SBA to collect licensing and examination fees to offset SBA's costs associated with the administration of these two activities. SBA last increased fees for SBICs in 1996. Current fees offset less than 40% of SBA's administrative expenses related to these activities. The proposed rule would revise existing regulations to increase, over a five-year period, SBIC licensing and examination fees in order to annually recoup an estimated 70% of SBA administrative expenses related to these activities. After the five year period, the rule proposes annual increases of these fees based on inflation. To encourage investment into underserved areas, the proposed rule would establish certain examination fee discounts for SBICs that make significant low and moderate income (LMI) investments.

DATES: Comments on the proposed rule must be received on or before February 14, 2017.

ADDRESSES: You may submit comments, identified by RIN 3245–AG65, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail, Hand Delivery/Courier:* Mark Walsh, Associate Administrator for the Office of Investment and Innovation, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416.

SBA will post comments on *http://www.regulations.gov.* If you wish to submit confidential business information (CBI) as defined in the User Notice at *http://www.regulations.gov,* please submit the information to Theresa Jamerson, Office of Investment and Innovation, 409 Third Street SW., Washington, DC 20416. Highlight the information that you consider to be CBI and explain why you believe this information should be held confidential. SBA will review the information and make the final determination of whether it will publish the information or not.

FOR FURTHER INFORMATION CONTACT: Theresa Jamerson, Office of Investment and Innovation, (202) 205–7563 or *sbic@sba.gov.*

SUPPLEMENTARY INFORMATION:

I. Background Information

The Small Business Investment Act of 1958, as amended, authorizes SBA to collect fees to cover the costs associated with the licensing and examination of SBICs. 15 U.S.C. 681(e)(2)(B) and 687b(b). Although SBA has regulations setting the amount of these fees, SBA has not increased licensing and examination fees for SBICs since 1996. As part of the final rule published January 31, 1996 (61 FR 3177), SBA set licensing fees ''to reflect the Agency's costs of processing applications'' and similarly set examination fees to ''produce total revenue sufficient to cover the current direct costs to SBA of conducting examinations.'' In a subsequent rule published on April 30, 1997 (62 FR 23337), SBA capped examination fees at $14,000, which lowered the fee for SBICs with over $60 million in assets. As part of the rationale for this change, the rule stated, ''many of the largest SBICs are bank-owned and do not use federal leverage, so that fees computed on the basis of total assets do not appropriately reflect the level of effort and risk associated with the examination process.'' In December 1996, only 6 of the 28 SBICs with over $60 million in assets used leverage and only 1 of the 12 SBICs with over $120 million in assets used leverage. As of September 14, 2016, 114 of the 121 SBICs with over $60 million in assets used leverage and 64 of the 66 SBICs with over $120 million in assets used leverage. Since nearly all of the SBIC program's largest SBICs now utilize leverage, the rationale stated in the 1997 rule as a basis for reducing examination fees no longer applies.

The 1997 rule, which remains in place today, does not include an inflation adjustment for these fees. Consequently, these fees have not kept pace with rising SBA costs due to changes in inflation and increased risk in its portfolio. In 1996 when the fees were most recently increased to cover SBA's costs, aggregate outstanding SBA leverage was less than $1.4 billion; this figure has grown to $10.4 billion as of June 30, 2016. Licensing and examination fees received in Fiscal Year (FY) 2015 were slightly lower than those received in FY 1999 (the earliest date fees paid and SBA expenses for these activities are readily available) because, at that time, SBA was licensing SBICs issuing Participating Securities (in addition to SBICs issuing only Debentures), which pay higher licensing and examination fees than SBICs issuing only Debentures. While licensing and examination fees have decreased, SBA's expenses related to licensing and examination activities have doubled due to inflation and the cost of obtaining necessary resources to manage SBA's increased risk.

Although fees set in 1996, as adjusted in 1997, were intended to fully reimburse SBA's costs, by FY 1999, licensing and examination fees only covered approximately 85% of SBA's related expenses. In FY 2015, licensing and examination fees covered less than 40% of SBA's related licensing and examination expenses.

In FY 2015, SBA processed 44 Management Assessment Questionnaires as part of its initial licensing review and 32 SBIC license applications in its final licensing review. SBA collected approximately $0.4 million in SBIC licensing fees, which reimbursed less than a quarter of SBA's expenses associated with licensing. In FY 2015 SBA issued 222 exam reports for over 300 operating SBICs and collected $1.8 million in examination fees, reimbursing less than half of SBA's costs associated with examination activities. SBA's Office of Inspector General (OIG) also noted the disparity between examination costs and fees collected in Audit Report 13–22: Improved Examination Quality Can Strengthen SBA's Oversight of Small Business Investment Companies (available at *http://www.sba.gov/oig/audit-report-13-22-improved-examination-quality-can-strengthen-sbas-oversight-small-business*), stating, ''while the SBA has continued to exercise its statutory authority to collect examination fees, we determined the fees were not sufficient to keep pace with rising costs.'' OIG Audit Report 13–22 at 8.

The primary reason that licensing and examination fees do not cover the current cost of these activities is inflation. Another factor is the increased number of SBICs utilizing higher amounts of leverage. Since 1996 (when the fees were last increased), the number of leveraged SBICs with assets over $60 million has risen from 6 SBICs in 1996 to 114 in September 2016. SBA applies a higher level of credit analysis to leveraged SBICs than non-leveraged SBICs in both licensing and exams. Another factor is that SBA has intensified its licensing activities in the past ten years due to the increased amounts of leverage sought by applicants and in order to improve the quality of its SBIC portfolio. SBA has adopted many industry best practices in its licensing process, including accessing relevant private equity performance resources and benchmarking applicants to industry performance. These industry-standard best practices cost money. For example, SBA spent over $100,000 for information subscription services to support licensing activities in FY 2016.

However, SBICs ultimately benefit financially from improvements in the quality of the SBIC program portfolio through lower annual charges on SBA-guaranteed debenture leverage. SBA formulates the annual charge each year to keep the program at zero subsidy cost. The SBIC debenture leverage annual charge has decreased from 1% in FY 1999 to an annual charge of 0.347% in FY 2017, reflecting improvements to the SBIC debenture portfolio.

Even with these improvements, SBA recognizes that its oversight capabilities must continue to improve, particularly in the areas of technology and training in connection with its licensing and examination activities. As indicated by the OIG's report, ''without proper training and technology examiners may not effectively identify all regulatory violations as intended by the Act.'' OIG Audit Report 13–22 at 11. Testimony to the House Small Business Committee on behalf of the Small Business Investor Alliance in July 2013 also indicated that the SBIC Program has ''a number of major technological and information systems challenges.'' *Examining the Small Business Investment Company Program: Hearing Before the House Subcommittee on Investigations, Oversight and Regulations,* 113th Congress (Statement by Steven Brown, President, Trinity Capital Investment, testifying on behalf of the Small Business Investor Alliance), which may be found at *http://smallbusiness.house.gov/uploadedfiles/7-25-2013_steven_brown_testimony_final_july_25.pdf*. In order to overcome some of these technological challenges, SBA needs to expand its web-based reporting application to address licensing and examinations needs. These efforts are expected to increase licensing and examination costs by $500,000 annually. SBA believes that improvements in its web-based tools will facilitate the exchange and analysis of information and result in more effective licensing and examination activities, as well as improve efficiency and ease of use by SBIC program stakeholders. To address identified training needs, SBA expects to incur additional training costs amounting to between $50,000 and $100,000 to support analysts in licensing and examinations.

Finally, due to recent attrition in staffing and to address peaks in licensing, SBA expects to hire contractors to support both examinations and licensing processes. Due to the specialized skill set associated with these activities, SBA estimates additional contracting resources may cost an additional $600,000 for examinations and up to $400,000 for licensing annually.

Based on estimated costs for FY 2017, SBA projects costs exceeding $2 million for SBIC licensing activities and $4.5 million for SBIC examination activities. SBA is not currently proposing to increase fees to 100% of its anticipated costs; SBA estimates the proposed fees would recoup only 70% of its anticipated licensing and examination costs. Under this proposed rule, SBA seeks to increase SBIC licensing and examination fees in order to: (1) Recoup a significant portion of its projected expenses associated with licensing and examination activities; (2) pay for necessary technology upgrades related to licensing and examinations; (3) pay for additional licensing and examiner training; (4) pay for necessary information resources commonly available to private equity fund of funds to support due diligence, analysis and decision-making in the licensing area; and (5) pay for contractors with specialized expertise to help support staff associated with licensing and examination-related activities. SBA proposes to increase these fees over a five year period in order to provide a more gradual impact on SBICs and then annually adjust these fees for inflation beginning on October 1, 2021. SBA may consider increasing its fees to reimburse more of its expenses at a later time, but will be mindful of any impact on the level of interest in the program.

II. Section by Section Analysis

A. Indexing Fees

Section 107.50—Definition of Terms

In order to adjust licensing and examination fees to remain current with inflation after the five year period, SBA proposes to add the defined term ''Inflation Adjustment'', which would be defined as the methodology used to increase SBIC administrative fees using the consumer price index for all urban consumers (CPI–U), as calculated by the U.S. Bureau of Labor and Statistics (BLS), based on the U.S. city average for all items, not seasonally adjusted, with the base period 1982–84=100. After consulting with BLS, SBA chose this index because it reflects the average change in the prices paid for a market basket of goods and services and is most frequently used in escalation agreements, as discussed on the BLS Web site (*http://www.bls.gov/cpi/cpi1998d.htm*). Historical CPI–U values may be found at *http://data.bls.gov/timeseries/CUUR0000SA0*?. Beginning October 1, 2021, SBA would recalculate the examination and licensing fees annually to reflect increases in the CPI–U at the beginning of each government fiscal year (October 1) based on the change in the index from the previous year and round the amount to the nearest $100. If the CPI–U decreases, no change will be made to the fees. SBA will publish the resulting fees in a notice in the **Federal Register** each year prior to the date of the increase. SBA is proposing to calculate the increase based on the change from the previous year's June CPI–U to the most recent June CPI–U, which will provide sufficient time for SBA to publish the revised fee before October. For example, the CPI–U is 238.638 in June 2015 and 241.038 in June 2016, a 1.0057% increase.

B. Licensing Fees

Section 107.300—License Application Form and Fee

Regulations currently require SBIC applicants to pay a base fee of $10,000 plus an additional $5,000 if the applicant intends to operate as a limited partnership (Partnership Licensee). Most SBIC applicants are organized as limited partnerships and therefore currently pay a licensing fee of $15,000. Applicants seeking to be licensed as Early Stage SBICs are required to pay both the additional $5,000 Partnership Licensee fee and an additional $10,000 Early Stage fee, for a total of $25,000. Current regulations also include an additional $5,000 fee for applicants intending to issue Participating Securities leverage (a type of leverage, no longer available, that was designed to encourage SBICs to invest in equity securities).

Current regulations require applicants to pay the licensing fee when they submit their complete license application, which initiates the final phase in the SBIC licensing process. SBA expends significant resources prior to this submission. The first phase in the licensing process begins when a first time applicant submits its Management Assessment Questionnaire (''MAQ''), which consists of SBA Forms 2181 and exhibits A through F of SBA Form 2182, or when the management of an existing SBIC submits a request to SBA to be considered for a subsequent SBIC license. (SBIC application forms are available on SBA's Web site at *www.sba.gov/sbic*.) SBA reviews the MAQ or subsequent SBIC applicant materials, performs due diligence, analyzes the management team's performance, interviews those management teams invited for an in-person interview, and ultimately determines whether to issue a formal invitation (Green Light letter) to the

applicant to proceed to the final licensing phase of the process. Once an applicant receives a Green Light letter, the applicant typically has up to 18 months to raise the requisite private capital. During this timeframe, SBA keeps in touch with the applicant, conducts SBIC training classes, and provides guidance as needed. The applicant pays the licensing fee only at the final licensing phase, which occurs when it submits its complete license application (consisting of an updated SBA Form 2181 and complete SBA Forms 2182 and 2183) after raising sufficient private capital. A number of applicants fail to raise the requisite capital or for other reasons do not submit a license application. As a result, SBA estimates that less than half of SBIC applicants pay the licensing fee, even though SBA expends resources on all applicants.

To clarify its existing practices, the proposed rule defines SBA's licensing phases and what forms and fees are required at each phase as discussed above. SBA considered adding a fee at the beginning of the licensing process to help spread the costs across all applicants on which SBA expends resources, but decided not to pursue this approach so as to not discourage applicants from applying to the program. SBA invites comments on whether SBA should charge a fee at the first phase to help spread the costs across all applicants on which SBA expends resources.

The proposed rule would remove the additional fee currently charged to applicants seeking to operate as a Partnership Licensee, since substantially all applicants intend to operate as a Partnership Licensee and this is not a significant variable in determining costs. The proposed rule also removes the additional fee for Participating Securities Licensees, since SBA stopped issuing commitments for Participating Securities Leverage and licensing new Participating Securities SBICs as of October 1, 2004. The proposed rule increases the licensing fee to $25,000 in FY 2017, after the effective date of a final rule, with further increases of $5,000 each October for the next 4 years, resulting in a licensing fee of $45,000 by October 1, 2020. Beginning on October 1, 2021, SBA will increase the licensing fee using the Inflation Adjustment and, prior to the date of the increase, will publish the amount in a Notice in the **Federal Register**. As previously discussed, this increase will be used to offset SBA's costs associated with additional training, upgraded information technology, necessary subscription services, and specialized contractor support. Even with this increase, SBA expects these fees to offset less than half of SBA's licensing expenses by FY 2021. SBA may consider further increases in the future in order to fully cover the costs of its licensing activities as authorized by the Small Business Investment Act, but does not want to increase fees too sharply without better understanding the impact fee increases may have on application submission rates.

Section 107.410—Changes in Control of Licensee

SBA treats a change in control of a Licensee as a licensing action, since SBA must perform similar functions and processes to those in SBA's final licensing phase. Current regulations require SBICs seeking a change in control to pay a $10,000 fee, similar to the current licensing fee. Since the procedures and costs are similar to those in the final licensing process, the proposed regulations change the current fee to be equal to the licensing fee identified in proposed § 107.300.

C. Examination Fees

Section 107.692—Examination Fees

Current § 107.692(b) provides for a base examination fee calculated as a percentage of an SBIC's total assets at cost. As more specifically set forth in current § 107.692(b), the percentage decreases as the assets increase, with the maximum base examination fee set at $14,000 for SBICs with total assets greater than $60 million.

Current § 107.692(c) then provides for various adjustments to the base examination fee which are summarized in the table set forth in § 107.692(d), as shown on Table 1: Current SBIC Examination Fee Adjustments, as follows:

TABLE 1—CURRENT SBIC EXAMINATION FEE ADJUSTMENTS

Examination fee discounts	Amount of discount—% of base examination fee	Examination fee additions	Amount of addition—% of base examination fee
No prior violations	15	Partnership or limited liability company	5
Responsiveness	10	Participating Security Licensee	10
		Records/Files at multiple locations	10
		Early Stage SBIC	10

Current § 107.692(e) provides that SBA may assess an additional fee of $500 per day if SBA determines the examination is delayed due to the SBIC's lack of cooperation or the condition of its records.

Proposed § 107.692(b) would replace the base fee calculation with the following formula: Base Fee = Minimum Base Fee + 0.024% of assets at cost, but not to exceed the Maximum Base Fee. Both the Minimum Base Fee and the Maximum Base Fee would change each year as shown on Table 3: Minimum and Maximum Base Fees:

TABLE 3—MINIMUM AND MAXIMUM BASE FEES

Time period (based on the examination start date)	Minimum base fee	Maximum base fee for non-leveraged SBICs	Maximum base fee for leveraged SBICs
February 14, 2017 to September 30, 2017	$5,000	$20,000	$20,000
October 1, 2017 to September 30, 2018	6,000	22,500	26,000
October 1, 2018 to September 30, 2019	7,000	25,000	32,000

TABLE 3—MINIMUM AND MAXIMUM BASE FEES—Continued

Time period (based on the examination start date)	Minimum base fee	Maximum base fee for non-leveraged SBICs	Maximum base fee for leveraged SBICs
October 1, 2019 to September 30, 2020	8,000	27,500	38,000
October 1, 2020 to September 30, 2021	9,000	30,000	44,000

For the purposes of calculating the examination fee, the proposed rule defines Non-leveraged SBICs as SBICs that have no outstanding SBA-guaranteed leverage or leverage commitments and, in the case of SBICs that have issued leverage in the form of Participating Securities, those SBICs that have no outstanding Earmarked Assets. An SBIC that satisfies these requirements must also certify to SBA that it will not seek new SBA leverage in the future. As discussed in the 1997 rule, non-leveraged SBICs pose no credit risk to SBA and therefore require less time to examine. The lower Maximum Base Fee for non-leveraged SBICs reflects this reduced effort. The lower Maximum Base Fee for non-leveraged SBICs also provides a small incentive for leveraged SBICs to repay their leverage. By October 1, 2020, the examination fees are estimated to cover most of SBA's costs related to examination activities.

An example may be helpful to demonstrate the gradual phase-in of the proposed exam fees. Assume that in March 2019, a leveraged SBIC has $125 million in assets at cost. The Base Fee would be equal to $32,000, the Maximum Base Fee for that time period, since the Base Fee calculation ($7,000 + .024% × $125 million) computes to $37,000. If the SBIC still had $125 million in assets at cost and outstanding leverage in March 2021, the Base Fee would be $39,000, since the Base Fee calculation ($9,000 + .024% × $125 million) would compute to $39,000 and the Maximum Base Fee for leveraged SBICs would be $40,000. If the SBIC had repaid all SBA leverage, had no leverage commitments and certified that it did not intend to seek leverage in the future, it would qualify as a non-leveraged SBIC and the Base Fee would be reduced to $30,000, based on the non-leveraged Maximum Base Fee in March 2021.

In considering examination fees, SBA reviewed the expenses reported in the Form 468 related to private sector financial auditors (which perform activities similar to an examination). In FY 2015, private sector auditor expenses for SBICs ranged from $35,000 to over $65,000 (depending on the size of the fund) with an average audit cost of approximately $43,000. By FY 2021, the SBIC Base Fee would range from $9,000 to $44,000 with an expected average examination fee of $19,300. SBA believes the proposed examination fees are reasonable.

To keep the fees aligned with SBA's costs, beginning on October 1, 2021, the Base Fee would be adjusted annually by increasing both the Minimum and Maximum Base Fees using the Inflation Adjustment. For example, if the Inflation Adjustment was 1.5% between June 2020 and June 2021, the Minimum Base Fee beginning in FY 2022 would be $9,100 and the Maximum Base Fee would be $30,600 for non-leveraged SBICs and $44,900 for leveraged SBICs.

Consistent with current regulations, proposed § 107.692(b) only computes a Base Fee. That Base Fee is then increased or decreased using the adjustments defined in § 107.692(c) to determine the final examination fee. Proposed § 107.692(c) would change the examination fee adjustments to better reflect SBA costs and provide certain incentives to SBICs. These changes are identified below:

• *Low and Moderate Income (LMI) Investing Discount:* Proposed § 107.692(c)(2) would apply a discount of 1% of the Base Fee for every $10 million in LMI Investments (in dollars at cost) financed since the Licensee's last examination up to a maximum 10% of the Base Fee. SBA will not spend any less time or resources examining SBICs with LMI Investments as a result of this discount, but is including the discount in order to provide an incentive to SBICs to make LMI Investments.

• *Remove Fully-responsive Discount and Non-responsiveness Addition:* Current regulations provide a 15% discount if the SBIC is ''fully responsive to the letter of notification of examination.'' Most SBICs currently receive this discount, and the proposed Base Fee already reflects the cost efficiencies resulting from responsiveness. To compensate SBA for the additional time associated with SBICs that are not responsive, proposed § 107.692(c)(3) would add 15% of the Base Fee for non-responsiveness or ''not fully responsive to the letter of notification of examination.''

• *Remove Additions for Partnership and LLC:* Current regulations identify additions to the Base Fee for SBICs organized as partnerships or limited liability companies (LLCs). The proposed rule would remove these additional fees from § 107.692(c). Since substantially all SBICs are organized as partnerships or LLCs, the cost to SBA of examining SBICs with this structure is reflected in the proposed Base Fee.

• *Remove Additions for Participating Securities Licensees and Early Stage SBICs:* Current regulations include additions to the Base Fee if the SBIC is authorized to issue Participating Securities or is licensed as an Early Stage SBIC. SBA promulgated these additional fees because these types of SBICs were perceived to engage in particularly complex financing transactions. However, given the sophistication of the financing transactions of many of today's SBICs, whether standard debenture SBICs or otherwise, SBA no longer sees a need for this fee adjustment and proposes to remove it from § 107.692(c).

• *Unresolved Finding Addition:* SBA expends significant time monitoring and resolving examination findings that have remained unresolved for many months, and in some cases, years. SBA believes that SBICs should resolve all examination findings within 90 days from notification. To encourage SBICs to resolve findings in a timely manner, proposed § 107.692(c)(5) would assess an additional fee equal to 5% of the Base Fee for every 30 calendar days or portion thereof for each examination finding that remains unresolved after a 90 calendar day grace period after the SBIC is notified that corrective action must be taken to resolve an examination finding, unless SBA ultimately resolves the finding in the SBIC's favor.

As an example, if an SBIC is notified on May 1, 2018 of an examination finding that requires resolution, the SBIC would have 90 calendar days (through July 30, 2018) to resolve the finding. If the SBIC does not resolve the examination finding until September 10, 2018, the SBIC would have taken 132 days to resolve the finding, or 42 days

beyond the 90 calendar day cure period. If the SBIC's base examination fee was $20,000, SBA would assess an additional fee of $2,000 calculated as follows:

	First 30 days:	$1,000	(5% of Base Fee)
+	Next 12 days:	$1,000	
	Total Unresolved Finding Addition:	$2,000	

If the SBIC had two findings that each took 132 days to resolve, the total unresolved finding addition would be $4,000. There would be no additional charge if SBA ultimately resolved the finding in the SBIC's favor.

Proposed § 107.692(c)(1) keeps the 15% discount for SBICs that have no outstanding regulatory violations at the time of the commencement of the examination and no violations as a result of the most recent prior examination. Proposed § 107.692(c)(5) retains the 10% addition charged to SBICs that maintain records located in multiple locations. SBA believes both these adjustments continue to be appropriate. A summary of the resulting proposed examination fee discounts and additions is summarized in Table 4: Proposed Examination Fee Discounts and Additions, below:

TABLE 4—PROPOSED EXAMINATION FEE DISCOUNTS AND ADDITIONS

Examination fee discounts	Amount of discount—% of base fee	Examination fee additions	Amount of addition—% of base fee
No outstanding violations; no violations in prior exam.	15%	Non-responsive	15%
LMI Investments	1% of Base Fee for every $10 million in LMI Investments funded since the last examination up to a maximum discount of 10% of Base Fee.	Records/Files at multiple locations.	10%
		Unresolved Findings	5% of Base Fee for every 30 days or portion thereof beyond the 90 day grace period for each unresolved finding

Just as with current § 107.692, the final examination fee is calculated by taking the Base Fee determined under § 107.692(b) and adding or deducting the adjustments identified in proposed § 107.692(c). The following example demonstrates this calculation. Assume that in March 2019, a leveraged SBIC has $125 million in assets at cost. The Base Fee calculation ($8,500 + .024% × $200 million) computes to $38,500. Since the Base Fee may not exceed the Maximum Base Fee for the relevant time period, the Base Fee would be equal to $30,000. If the SBIC is non-responsive to the examiner's requests, has records in multiple locations, and does not qualify for any of the proposed discounts, the examination fee would be calculated as follows:

	$30,000	Base Fee determined per proposed § 107.692(b)
+	$ 4,500	15% addition for non-responsiveness per proposed § 107.692(c)(3)
+	$ 3,000	10% addition for records in multiple locations per proposed § 107.692(c)(4)
	$37,500	Examination Fee

Proposed § 107.692(e) changes the current $500 per day delay fee to $700 per day, which will be adjusted annually using the Inflation Adjustment, beginning on October 1, 2021 to coincide with the date on which the other fee inflation adjustments are computed.

Compliance With Executive Orders 12866, 12988 and 13132, the Paperwork Reduction Act (44 U.S.C. Ch. 35) and the Regulatory Flexibility Act (5 U.S.C. 601–612) Executive Order 12866

The Office of Management and Budget has determined that this rule is not a ''significant'' regulatory action under Executive Order 12866. However, to provide additional transparency for the SBIC community, a Regulatory Impact Analysis is set forth below.

1. Necessity of Regulation

The Small Business Investment Act authorizes SBA to collect administrative fees to cover licensing and examination costs. Currently, licensing fees cover less than a quarter of SBA's licensing costs and examination fees cover less than half of examination costs. It is critical that SBA increase fees in order to (1) improve its technology for both licensing and examinations; (2) improve examiner training; (3) pay for necessary information subscription services; and (4) provide contractor resources to support licensing and examination activities.

2. Alternative Approaches to the Regulation

A. Licensing Fees

SBA considered several alternatives to the proposed regulations regarding licensing fees. SBA first considered indexing the licensing fees for inflation from 1996 (the year in which SBA most recently raised licensing fees) to 2017. This alternative did not produce sufficient fees to offset SBA licensing costs and produced lower licensing fees

than those in the proposed rule. SBA therefore rejected the option of adjusting the current fees only for inflation.

Given its technology and processing time concerns, SBA considered higher licensing fees than those in the proposed rule in order to obtain the same technology and resources utilized by industry peers and further use of contractor support to reduce times in the licensing process. Although increasing fees even higher than SBA is proposing would provide more resources, SBA believes the proposed fee increases would be sufficient to meet essential needs while remaining well within the ability of qualified applicants to pay.

SBA considered adding a fee at the first licensing phase (Initial Review), but was concerned that this might substantially reduce the number of applicants to the program. SBA invites comments from industry as to whether SBA should add a fee at the first licensing phase to help spread costs across all applicants on which SBA expends resources.

SBA also considered implementing a larger increase in FY 2017 in order to offset costs more quickly. SBA opted to pursue the gradual increase identified in the proposed rule to allow potential applicants time to adjust to these increases.

B. Examination Fees

SBA considered several alternatives to the proposed regulations regarding examination fees. SBA considered indexing the fees utilizing the existing table in current § 107.692(b) to reflect inflation from 1997 to 2017. This alternative did not produce sufficient fees to offset SBA costs in examinations. In assessing the reasons for this, SBA analyzed the SBIC portfolios from both periods, and recognized that the SBIC portfolio in 1997 was significantly different than today. In 1997, most of the SBICs with the highest total assets were bank-owned SBICs that did not issue SBA leverage and therefore required less time and resources for SBA to examine. Today, most of the highest-asset SBICs have significant amounts of SBA leverage. Therefore, merely indexing the existing fees would not appropriately reflect the costs associated with examinations.

SBA also considered proposing examination fee increases that were only sufficient to cover current costs and did not cover additional money needed to address technology upgrades, training, or contractor support. SBA rejected this alternative for three reasons. First, the OIG indicated the need for improved technology and training for examiners and suggested that SBA increase its fees to cover these costs. SBA agrees that such resources would improve the examination function. Second, SBA believes its proposed examination fees are less than fees charged for similar activities such as financial audits. SBA calculated the median private sector financial audit fee paid by SBICs in FY 2015 to be $43,000, where the proposed fees would result in an average Base Fee of $19,300 in FY 2021. Third, while SBA's outstanding leverage in its operating portfolio has more than tripled from $3.1 billion at the end of September 30, 2000 to $10.4 billion as of June 30, 2016, the number of personnel in SBIC Examinations has declined by over a third. In order to continue to monitor the SBIC program at the same level as in previous years, SBA will likely need to hire contractors with specialized skills to support this function.

SBA also considered a flat examination fee, regardless of the asset cost. SBA believes its examination activities are similar to financial auditor or bank examiner activities, which typically are based on asset cost and therefore rejected this alternative.

SBA considered increasing the fees to cover most of its cost in FY 2017, but believes that a gradual increase over a five year period would allow SBICs time to budget and adjust to the higher fees.

3. Potential Benefits and Costs

SBA anticipates this proposed rule may benefit the taxpayer by covering a larger portion of SBIC program administrative costs through the collection of an additional estimated $3 million to $4 million per year by October 2020. As noted above, these increased fees will (1) improve SBIC program technology for both licensing and examinations, (2) improve examiner training, (3) pay for necessary information subscription services, and (4) provide contractor resources to support licensing and examination activities. Collections are expected to increase annually each year beginning in October 2021 based on the CPI–U Inflation Adjustment.

The proposed rule would increase licensing costs for applicants and examination costs for SBICs. The proposed rule would, by October 2020, increase licensing costs by $30,000 for all applicants that submit a complete license application. Based on the proposed rule, SBA estimates that by October 2020, the average non-leveraged examination fee would increase by $5,100 and the average examination fee for leveraged SBICs would increase by $12,100 based on FY 2015 examinations data. These fees would further impact SBICs through annual increases to reflect inflation.

Executive Order 13563

A description of the need for this regulatory action and benefits and costs associated with this action is included above in the Regulatory Impact Analysis under Executive Order 12866.

In considering this proposed rule, SBA talked with fund of fund managers, auditors, and contractors to determine whether the proposed fees were reasonable. In reviewing organizational costs for SBIC applicants, including legal and other professional costs, SBIC applicants often incur organizational costs amounting to around $500,000. The proposed increased licensing fee represents a small percentage of the total organizational costs typically incurred by SBIC applicants. SBA also compared Federal bank examiner fees and SBIC auditor fees (based on the SBIC annual Financial Reporting Form 468s submitted in 2015) with proposed SBIC examination fees. SBA believes the proposed licensing and examination fees are reasonable in comparison to the market.

Executive Order 12988

This action would meet applicable standards set forth in section 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden. The action would not have retroactive or presumptive effect.

Executive Order 13132

For the purpose of Executive Order 13132, SBA has determined that the rule would not have substantial, direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, for the purpose of Executive Order 13132, Federalism, SBA has determined that this proposed rule has no federalism implications warranting the preparation of a federalism assessment.

Paperwork Reduction Act, 44 U.S.C. Ch. 35

For purposes of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, SBA has determined that this rule would not impose any new reporting or recordkeeping requirements.

Regulatory Flexibility Act, 5 U.S.C. 601–612

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601, requires administrative agencies to consider the effect of their

actions on small entities, small non-profit businesses, and small local governments. Pursuant to the RFA, when an agency issues a rule, the agency must prepare an Initial Regulatory Flexibility Act (IRFA) analysis which describes whether the impact of the rule will have a significant economic impact on a substantial number of small entities. However, § 605 of the RFA allows an agency to certify a rule, in lieu of preparing an IRFA, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities. This proposed rule would affect all applicants that submit applications at final licensing (which averaged 35 per year for FYs 2013 to 2015), and all operating SBICs (currently approximately 300). SBA estimates that approximately 98% of these SBICs are small entities. Therefore, SBA has determined that this proposed rule does have an impact on a substantial number of small entities. However, SBA has determined that the impact on entities affected by the rule is not significant.

As noted above, proposed § 107.300 would increase licensing costs by $30,000 by October 1, 2020 for all applicants that submit a license application, which represents less than 0.1% of the average applicant's Regulatory Capital based on newly licensed SBICs between October 1, 2014 and June 30, 2016. Many applicants have organizational costs totaling around $500,000, and some have far in excess of that amount. The proposed FY 2021 licensing fee of $45,000 would represent a small fraction of those costs.

SBA estimates that proposed § 107.692 would eventually increase the average examination fee by $5,100, representing approximately 0.02% of the average non-leveraged SBIC's Regulatory Capital, and the average leveraged SBIC examination fee by $12,100, representing approximately 0.01% of the average total capital under management (Regulatory Capital and outstanding SBA guaranteed leverage). As a point of comparison, most SBIC managers charge management fees of approximately 2% of capital under management. (Management fees, like the examination fees, are paid by the SBIC.) For a leveraged SBIC with $50 million in Regulatory Capital and using 2 tiers of leverage charging a 2% management fee, the management fee would equal $3 million a year. If the leveraged SBIC had assets at cost of $150 million, no regulatory violations, and did not incur any exam fee additions, the exam fee in FY 2021 would amount to $37,400 ($44,000 minus the 15% discount for no violations), representing 0.025% of the SBIC's total capital. The examination fee would be a very small percentage of the SBIC's expenses.

SBA believes that most applicants with sufficient private equity experience and capital raising ability will not be discouraged from applying to the program based on the proposed administrative fee increases. SBA asserts that the economic impact of the rule is minimal. Accordingly, the Administrator of the SBA certifies that this proposed rule would not have a significant impact on a substantial number of small entities.

List of Subjects in 13 CFR Part 107

Examination fees, Investment companies, Loan programs—business, Licensing fees, Small businesses.

For the reasons stated in the preamble, SBA proposes to amend 13 CFR part 107 as follows:

PART 107—SMALL BUSINESS INVESTMENT COMPANIES

■ 1. The authority citation for part 107 continues to read as follows:

Authority: 15 U.S.C. 681, 683, 687(c), 687b, 687d, 687g, 687m.

■ 2. Amend § 107.50 by adding a definition of ''Inflation Adjustment'' to read as follows:

§ 107.50 Definitions of terms.

* * * * *

Inflation Adjustment is the methodology used to increase SBIC administrative fees using the Consumer Price Index for Urban Consumers (CPI–U), calculated by the U.S. Bureau of Labor and Statistics (BLS), using the U.S. city average for all items, not seasonally adjusted, with the base period of 1982–84=100. To calculate the Inflation Adjustment, each year, SBA will divide the CPI–U from the most recent June by the CPI–U from June of the preceding year. If the result is greater than 1, SBA will increase the relevant fees as follows:

(1) Multiply the result by the current fee; and

(2) Round to the nearest $100.

* * * * *

■ 3. Revise § 107.300 to read as follows:

§ 107.300 License application form and fee.

SBA evaluates license applicants in two review phases: (1) Initial review and (2) final licensing, as follows:

(a) *Initial review.* Except as provided in this paragraph, SBIC applicants must submit a MAQ. MAQ means the Management Assessment Questionnaire in the form approved by SBA and available on SBA's Web site at *www.sba.gov/sbic.* An applicant under Common Control with one or more Licensees must submit a written request to SBA to be considered for a license and is exempt from the requirement in this paragraph to submit a MAQ unless otherwise determined by SBA in SBA's discretion.

(b) *Final licensing.* (1) An applicant may proceed to the final licensing phase only if notified in writing by SBA that it may do so. Following receipt of such notice, in order to proceed to the final licensing phase, the applicant must submit (i) a complete license application, in the form approved by SBA and available on SBA's Web site at *www.sba.gov/sbic,* within the timeframe identified by SBA and (ii) the Licensing Fee. The Licensing Fee means a non-refundable fee (determined as of the date SBA accepts the application) fee adjusted annually as follows:

Time period	Licensing fee
February 14, 2017 to September 30, 2017	$25,000
October 1, 2017 to September 30, 2018	30,000
October 1, 2018 to September 30, 2019	35,000
October 1, 2019 to September 30, 2020	40,000
October 1, 2020 to September 30, 2021	45,000

(2) Beginning on October 1, 2021, SBA will annually adjust the fee using the Inflation Adjustment and will publish a Notice prior to such adjustment in the **Federal Register** identifying the amount of the fee.

■ 4. In § 107.410, revise paragraph (b) to read as follows:

§ 107.410 Changes in Control of Licensee (through change in ownership or otherwise).

* * * * *

(b) *Fee.* A processing fee equal to the Licensing Fee defined in § 107.300(b) must accompany any application for approval of one or more transactions or events that will result in a transfer of Control.

■ 5. In § 107.692, revise paragraphs (b) through (e) to read as follows:

§ 107.692 Examination Fees.

* * * * *

(b) *Base fee.* (1) The Base Fee will be assessed based on your total assets (at cost) as of the date of your latest certified financial statement, including if requested by SBA in connection with the examination, a more recently submitted interim statement. For purposes of this § 107.692, Base Fee means the Minimum Base Fee plus 0.024% of assets at cost, rounded to the nearest $100, not to exceed the Maximum Base Fee. The Minimum and Maximum Base Fees are adjusted annually as follows:

Time period (Based on the examination start date)	Minimum base fee	Maximum base fee for non-leveraged SBICs	Maximum base fee for leveraged SBICs
February 14, 2017 to September 30, 2017	$5,000	$20,000	$20,000
October 1, 2017 to September 30, 2018	6,000	22,500	26,000
October 1, 2018 to September 30, 2019	7,000	25,000	32,000
October 1, 2019 to September 30, 2020	8,000	27,500	38,000
October 1, 2020 to September 30, 2021	9,000	30,000	44,000

(2) In the table in paragraph (b)(1) of this section, a Non-leveraged SBIC means any SBIC that, as of the date of the examination, has no outstanding Leverage or Leverage commitment, has no Earmarked Assets, and certifies to SBA that it will not seek Leverage in the future. Beginning on October 1, 2021, SBA will annually adjust the Minimum Base Fee and Maximum Base Fees using the Inflation Adjustment and will publish a Notice prior to such adjustment in the **Federal Register** identifying the amount of the fees.

(c) *Adjustments to base fee.* In order to determine the amount of your examination fee, your Base Fee, as determined in paragraph (b) of this section, will be adjusted (increased or decreased) based on the following criteria:

(1) If you have no outstanding regulatory violations at the time of the commencement of the examination and SBA did not identify any violations as a result of the most recent prior examination, you will receive a 15% discount on your Base Fee;

(2) If you have funded at least $10 million in LMI Investments at cost since the last examination, you will receive a 1% discount for every $10 million in LMI Investments made since the last examination up to a maximum of a 10% discount on your Base Fee;

(3) If you were not fully responsive to the letter of notification of examination (that is, you did not provide all requested documents and information within the time period stipulated in the notification letter in a complete and accurate manner, or you did not prepare or did not have available all information requested by the examiner for on-site review), you will pay an additional charge equal to 15% of your Base Fee;

(4) If you maintain your records/files in multiple locations (as permitted under § 107.600(b)), you will pay an additional charge equal to 10% of your Base Fee; and

(5) For any regulatory violation that remains unresolved 90 days from the date SBA notified you that you must take corrective action (as established by the date of the notification letter), you will pay an additional charge equal to 5% of the Base Fee for every 30 days or portion thereof that the violation remains unresolved after the 90 day cure period, unless SBA resolves the finding in your favor.

(d) *Fee discounts and additions table.* The following table summarizes the discounts and additions noted in paragraph (c) of this section:

Examination fee discounts	Amount of discount—% of base fee	Examination fee additions	Amount of addition—% of base fee
No outstanding violations; no violations in prior exam.	15	Non-responsive	15
LMI Investments	1% of Base Fee for every $10 million in LMI Investments made since the last examination up to a maximum discount of 10% of Base Fee.	Records/Files at multiple locations	10
		Unresolved Findings	5% of Base Fee for every 30 days or portion thereof beyond the 90 day grace period for each unresolved finding.

(e) *Delay fee.* If, in the judgment of SBA, the time required to complete your examination is delayed due to your lack of cooperation or the condition of your records, SBA may assess an additional fee of $700 per day. Beginning on October 1, 2021, SBA will annually adjust this fee using the Inflation Adjustment and will publish a Notice prior to such adjustment in the **Federal Register** identifying the amount of the fee.

Dated: November 17, 2016.

Maria Contreras-Sweet,

Administrator.

BILLING CODE 8025–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9438; Directorate Identifier 2016–NM–109–AD]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Bombardier, Inc. Model DHC–8–400 series airplanes. This proposed AD was prompted by reports of interruptions in the airstair door operation. This proposed AD would require repetitive inspections and modification of the handrail hardware. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Bombardier, Inc., Q-Series Technical Help Desk, 123 Garratt Boulevard, Toronto, Ontario M3K 1Y5, Canada; telephone 416–375–4000; fax 416–375–4539; email *thd.qseries@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9438; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Cesar A. Gomez, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office (ACO), 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7318; fax 516–794–5531.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9438; Directorate Identifier 2016–NM–109–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Airworthiness Directive CF–2015–02, dated January 27, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Bombardier, Inc. Model DHC–8–400, –401, and –402 airplanes. The MCAI states:

> A number of airstair door operation interruptions have been reported. In one case, the airstair door could not be opened. It was found that the airstair door handrail holder bracket was deformed and became lodged into the adjacent wardrobe bulkhead, which prevented the door from opening.
>
> On airstair doors with Jetway Compatible option, a deformed handrail holder bracket or a failure of the pin retainer bracket can interfere with the operation of the airstair door and prevent it from opening.
>
> The airstair door is classified as an emergency exit. The inability to open an emergency exit could impede evacuation in the event of an emergency.
>
> This [Canadian] AD mandates the repetitive inspection of airstair door handrail hardware, and the modification of the handrail stowage hardware.

Required actions include applicable corrective actions (replacing or removing brackets, installing lanyards, adjusting pins, and adjusting affected parts of the assembly). You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9438.

Related Service Information Under 1 CFR Part 51

We reviewed Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016. This service information describes procedures for a general visual inspection to detect deformities and cracks of the forward and aft handle holder brackets on the airstair handrail; a detailed visual inspection of the forward and aft pin retainer brackets for the condition of the lanyards and the pins; a check for unobstructed movement of the pin retainer brackets; and rework of the airstair door handrail to prevent damage to the bulkhead and to prevent the door from jamming once the handrails are stowed. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified

of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD affects 82 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Repetitive Inspections ...	1 work-hour × $85 per hour = $85 per inspection cycle.	$0	$85 per inspection cycle.	$6,970 per inspection cycle.
Modification	3 work-hours × $85 per hour = $255	1,556	$1,811	$148,502.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Bombardier, Inc.: Docket No. FAA–2016–9438; Directorate Identifier 2016–NM–109–AD.

(a) Comments Due Date

We must receive comments by January 30, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc. Model DHC–8–400, –401, and –402 airplanes, certificated in any category, serial numbers 4001 through 4473 inclusive, equipped with Jetway Compatible Passenger Airstair Door Modsum 4–422100 or Modsum 4–458687.

(d) Subject

Air Transport Association (ATA) of America Code 52, Doors.

(e) Reason

This AD was prompted by reports of interruptions in the airstair door operation, including one case where the door would not open. The airstair door is classified as an emergency exit. We are issuing this AD to ensure the ability to evacuate passengers through the airstair door in the event of an emergency.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections of the Forward and Aft Handle Holder Brackets and Forward and Aft Pin Retainer Brackets, Repetitive Checks, and Corrective Actions

Within 600 flight hours after the effective date of this AD, perform a general visual inspection of the forward and aft handle holder brackets for damage, such as visible cracks and deformation; a detailed visual inspection of the forward and aft pin retainer brackets to make sure that both lanyards are installed and to make sure that the head of each pin is installed correctly; a check of the pin retainer brackets for unobstructed movement; an operational check of the forward passenger door; and all applicable corrective actions; in accordance with PART A1 and PART A2 of the Accomplishment Instructions of Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016, except as required by paragraphs (g)(1), (g)(2), and (g)(3) of this AD. Do all applicable corrective actions before further flight. Repeat the inspections and checks thereafter at intervals not to exceed 600 flight hours until the terminating action required by paragraph (h) of this AD is accomplished.

(1) If one or both lanyards are missing, before further flight, install lanyards as specified in, and in accordance with PART A1 of the Accomplishment Instructions of Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016.

(2) If a pin is not installed correctly, as specified in PART A1 of the Accomplishment Instructions of Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016, before further flight, adjust the affected pin until it is installed correctly as specified in, and in accordance with PART A1 of the Accomplishment Instructions Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016.

(3) If a pin retainer bracket does not rotate freely, before further flight, adjust affected parts of the assembly until the pin retainer bracket rotates freely as specified in, and in accordance with PART A1 of the Accomplishment Instructions of Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016.

(h) Terminating Action

Within 6,000 flight hours or 36 months, whichever occurs first, after the effective date

of this AD: Incorporate ModSum 4–903234 to modify installed Jetway Compatible Handrail Stowage Bracket, in accordance with PART A3 of the Accomplishment Instructions of Bombardier Service Bulletin 84–52–79, Revision C, dated February 2, 2016. Incorporating ModSum 4–903234 terminates the actions required by paragraph (g) of this AD.

(i) Credit for Previous Actions

This paragraph provides credit for actions required by paragraph (g) of this AD, if those actions were performed before the effective date of this AD using the service information identified in paragraph (i)(1), (i)(2), or (i)(3) of this AD.

(1) Bombardier Service Bulletin 84–52–79, dated May 1, 2014.

(2) Bombardier Service Bulletin 84–52–79, Revision A, dated November 18, 2014.

(3) Bombardier Service Bulletin 84–52–79, Revision B, dated April 8, 2015.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the ACO, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, New York ACO, ANE–170, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(k) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian Airworthiness Directive CF–2015–02, dated January 27, 2015, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9438.

(2) For service information identified in this NPRM, contact Bombardier, Inc., Q-Series Technical Help Desk, 123 Garratt Boulevard, Toronto, Ontario M3K 1Y5, Canada; telephone 416–375–4000; fax 416–375–4539; email *thd.qseries@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on December 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. FAA–2016–9498; Directorate Identifier 2016–NM–105–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all Airbus Model A321 series airplanes. This proposed AD was prompted by a determination from fatigue testing on the Model A321 airframe that cracks could develop in the cabin floor beam junction at certain fuselage frame locations. This proposed AD would require repetitive inspections for cracking in the cabin floor beam junction at certain fuselage frame locations, and repair if necessary. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9498; Directorate Identifier 2016–NM–105–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2016–0105, dated June 6, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe

condition on all Airbus Model A321 series airplanes. The MCAI states:

Following the results of a new full scale fatigue test campaign on the A321 airframe in the context of the A321 extended service goal, it was identified that cracks could develop in the cabin floor beam junctions at fuselage frame (FR) 35.1 and FR 35.2, on both left hand (LH) and right hand (RH) sides, also on aeroplanes operated in the context of design service goal.

This condition, if not detected and corrected, could reduce the structural integrity of the fuselage.

Prompted by these findings, Airbus developed an inspection programme, published in Service Bulletin (SB) A320–53–1317, SB A320–53–1318, SB A320–53–1319, and SB A320–53–1320, each containing instructions for a different location.

For the reasons described above, this [EASA] AD requires repetitive detailed inspections (DET) of the affected cabin floor beam junctions and [for cracking], depending on findings, accomplishment of a repair.

This [EASA] AD is considered an interim action, pending development of a permanent solution.

* * * * *

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9498.

Related Service Information Under 1 CFR Part 51

Airbus has issued the following service information, which describes procedures for inspections for cracking on the frame to cabin floor beam junction at certain fuselage frame locations, and repairs.

- Airbus Service Bulletin A320–53–1317, dated December 15, 2015 (FR 35.1 on the right-hand side).
- Airbus Service Bulletin A320–53–1318, dated October 9, 2015 (FR 35.1 on the left-hand side).
- Airbus Service Bulletin A320–53–1319, dated October 9, 2015 (FR 35.2 on the right-hand side).
- Airbus Service Bulletin A320–53–1320, dated October 9, 2015 (FR 35.2 on the left-hand side).

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD affects 175 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	6 work-hours × $85 per hour = $510 per inspection cycle.	$0	$510 per inspection cycle	$89,250 per inspection cycle.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2016–9498; Directorate Identifier 2016–NM–105–AD.

(a) Comments Due Date

We must receive comments by January 30, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes, certificated in any category, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by a determination from fatigue testing on the Model A321 airframe that cracks could develop in the

cabin floor beam junction at certain fuselage frame locations. We are issuing this AD to detect and correct cracking in the cabin floor beam junction at certain fuselage frame locations, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

Before exceeding 36,900 total flight cycles since first flight of the airplane, or within 2,100 flight cycles after the effective date of this AD, whichever occurs later: Do a detailed inspection for cracking of the frame to cabin floor beam junction on the aft and forward sides at frame (FR) 35.1 and FR 35.2 on the left-hand and right-hand sides, in accordance with the Accomplishment Instructions of the Airbus service information specified in paragraphs (g)(1), (g)(2), (g)(3), and (g)(4) of this AD. Repeat the inspection of the frame to cabin floor beam junction on the aft and forward sides at FR 35.1 and FR 35.2 on the left-hand and right-hand sides thereafter at intervals not to exceed 15,300 flight cycles.

(1) Airbus Service Bulletin A320–53–1317, dated December 15, 2015 (FR 35.1 right-hand side).

(2) Airbus Service Bulletin A320–53–1318, dated October 9, 2015 (FR 35.1 left-hand side).

(3) Airbus Service Bulletin A320–53–1319, dated October 9, 2015 (FR 35.2 right-hand side).

(4) Airbus Service Bulletin A320–53–1320, dated October 9, 2015 (FR 35.2 left-hand side).

(h) Repair

If any crack is found during any inspection required by paragraph (g) of this AD: Before further flight, repair using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). Although the service information specified in paragraph (g) of this AD specifies to contact Airbus for repair instructions, and specifies that action as ''RC'' (Required for Compliance), this AD requires repair as specified in this paragraph. Repair of an airplane as required by this paragraph does not constitute terminating action for the repetitive actions required by paragraph (g) of this AD, unless specified otherwise in the instructions provided by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1405; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) Contacting the Manufacturer: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) Required for Compliance (RC): Except as required by paragraph (h) of this AD: If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(j) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2016–0105, dated June 6, 2016, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9498.

(2) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on December 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–8428; Directorate Identifier 2014–NM–032–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM); reopening of comment period.

SUMMARY: We are revising an earlier proposal to supersede Airworthiness Directive (AD) 2011–17–09 for all Airbus Model A330–200, –200 Freighter, and –300 series airplanes; and AD 2012–25–12 for all Airbus Model A330–200 and –300 series airplanes. The notice of proposed rulemaking (NPRM) proposed to require revising the maintenance or inspection program, as applicable, to incorporate new or revised airworthiness limitation requirements. The NPRM was prompted by revisions to certain airworthiness limitations items (ALI) documents, which specify more restrictive instructions and/or airworthiness limitations. This action revises the NPRM by proposing to require revising the maintenance or inspection program, as applicable, to incorporate more restrictive, instructions and/or airworthiness limitations that the manufacturer has recently issued. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this SNPRM by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For Airbus service information identified in this SNPRM, contact

Airbus service information identified in this final rule, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330-A340@airbus.com;* Internet *http://www.airbus.com.*

For Messier-Bugatti-Dowty service information identified in this SNPRM, contact Messier-Bugatti USA, One Carbon Way, Walton, KY 41094; telephone 859–525–8583; fax 859–485 8827; email *americascsc@safranmbd.com.*

You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–8428; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2015–8428; Directorate Identifier 2014–NM–032–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We issued an NPRM to amend 14 CFR part 39 to supersede AD 2011–17–09, Amendment 39–16773 (76 FR 53305, August 26, 2011) (''AD 2011–17–09''); and AD 2012–25–12, Amendment 39–17293 (77 FR 75825, December 26, 2012) (''AD 2012–25–12''). AD 2011–17–09 applies to all Airbus Model A330–200 series airplanes, –200 Freighter, and –300 series airplanes. AD 2012–25–12 applies to all Airbus Model A330–200 and –300 series airplanes. The NPRM published in the **Federal Register** on January 13, 2016 (81 FR 1570) (''the NPRM''). The NPRM was prompted by revisions to certain airworthiness limitations items (ALI) documents, which specify more restrictive instructions and/or airworthiness limitations. The NPRM proposed to require revising the maintenance or inspection program, as applicable, to incorporate new or revised airworthiness limitation requirements.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive, 2014–0009, dated January 8, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Airbus Model A330–200, –200 Freighter, and –300 series airplanes; and Model A340–200, –300, –500, and –600 series airplanes. The MCAI states:

> The airworthiness limitations for Airbus aeroplanes are currently published in Airworthiness Limitations Section (ALS) documents.
>
> The instructions and airworthiness limitations applicable to the Safe Life Airworthiness Limitation Items (SL ALI) are given in Airbus A330 ALS Part 1 and A340 ALS Part 1, which are approved by EASA.
>
> The revision 07 of Airbus A330 and A340 ALS Part 1 introduces more restrictive instructions and/or airworthiness limitations. Failure to comply with this revision could result in an unsafe condition.
>
> For the reason described above, this [EASA] AD retains the requirements of EASA AD 2012–0179, which is superseded, and requires accomplishment of the actions specified in Airbus A330 or A340 ALS Part 1 revision 07.
>
> In addition, this [EASA] AD also supersedes EASA AD 2011–0122–E and EASA AD 2011–0212, whose requirements have been transferred into Airbus A330 and A340 ALS Part 1 revision 07.

The unsafe condition is fatigue cracking, accidental damage, and corrosion in certain principal structural elements, and possible failure of certain life limited parts, which could result in reduced structural integrity of the airplane.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–8428.

Actions Since the NPRM Was Issued

Since we issued the NPRM, Airbus has issued Airbus A330 ALS Part 1, Safe Life Airworthiness Limitation Items (SL–ALI), Revision 08, dated April 11, 2016, which specifies more restrictive instructions and/or airworthiness limitations.

Related Rulemaking

We are considering similar rulemaking for Model A340–200, –300, –500, and –600 series airplanes that would revise the maintenance or inspection program, as applicable, to incorporate more restrictive instructions and/or airworthiness limitations. Currently, there are no U.S.-registered Model A340 series airplanes.

Airworthiness Limitations Based on Type Design

The FAA recently became aware of an issue related to the applicability of ADs that require incorporation of an ALS revision into an operator's maintenance or inspection program.

Typically, when these types of ADs are issued by civil aviation authorities of other countries, they apply to all airplanes covered under an identified type certificate (TC). The corresponding FAA AD typically retains applicability to all of those airplanes.

In addition, U.S. operators must operate their airplanes in an airworthy condition, in accordance with 14 CFR 91.7(a). Included in this obligation is the requirement to perform any maintenance or inspections specified in the ALS, and in accordance with the ALS as specified in 14 CFR 43.16 and 91.403(c), unless an alternative has been approved by the FAA.

When a TC is issued for a type design, the specific ALS, including revisions, is a part of that type design, as specified in 14 CFR 21.31(c).

The sum effect of these operational and maintenance requirements is an obligation to comply with the ALS defined in the type design referenced in the manufacturer's conformity statement. This obligation may introduce a conflict with an AD that requires a specific ALS revision if new airplanes are delivered with a later revision as part of their type design.

To address this conflict, the FAA has approved alternative methods of compliance (AMOCs) that allow operators to incorporate the most recent ALS revision into their maintenance/inspection programs, in lieu of the ALS revision required by the AD. This eliminates the conflict and enables the operator to comply with both the AD and the type design.

However, compliance with AMOCs is normally optional, and we recently became aware that some operators choose to retain the AD-mandated ALS revision in their fleet-wide maintenance/inspection programs, including those for new airplanes delivered with later ALS revisions, to help standardize the maintenance of the fleet. To ensure that operators comply with the applicable ALS revision for newly delivered airplanes containing a later revision than that specified in an AD, we plan to limit the applicability of ADs that mandate ALS revisions to those airplanes that are subject to an earlier revision of the ALS, either as part of the type design or as mandated by an earlier AD.

This SNPRM therefore applies to Model A330–200, –200 Freighter, and –300 series airplanes with an original certificate of airworthiness or original export certificate of airworthiness that was issued on or before the date of approval of the ALS revision identified in this SNPRM. Operators of airplanes with an original certificate of airworthiness or original export certificate of airworthiness issued after that date must comply with the airworthiness limitations specified as part of the approved type design and referenced on the TC data sheet.

Related Service Information Under 1 CFR Part 51

Airbus has issued Airbus A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016. Messier-Bugatti-Dowty has issued Service Letter A33–34 A20, Revision 7, including Appendices A through F, dated July 20, 2012. This service information describes Safe Life Airworthiness Limitation Items SL–ALI for the landing gear. This service information is distinct since it was issued by two different manufacturers for different purposes.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Comments

We gave the public the opportunity to participate in developing this proposed AD. We considered the comments received.

Request To Specify New Service Information

Air France requested that we revise paragraph (i) of the proposed AD to include Messier-Bugatti-Dowty Service Letter A33–34 A20, Revision 7, including Appendices A through F, dated July 20, 2012, as the required service information.

We agree with the commenter's request. The changes in Messier-Bugatti-Dowty Service Letter A33–34 A20, Revision 7, including Appendices A through F, dated July 20, 2012, do not specify additional work. We have revised paragraph (i) of this proposed AD to specify using Messier-Dowty Service Letter A33–34 A20, Revision 5, including Appendices A through F, dated July 31, 2009; or Messier-Bugatti-Dowty Service Letter A33–34 A20, Revision 7, including Appendices A through F, dated July 20, 2012.

Requests To Specify Airbus A330 Variations

Air France requested that we revise paragraph (k) of the proposed AD to list all of the Airbus A330 variations to Airbus A330 ALS Part 1, SL–ALS, Revision 07, dated September 23, 2013, applicable at the effective date of this AD. Air France submitted a list of the requested variations.

American Airlines (AAL) requested that we add three Airbus A330 variations to paragraph (k) of the proposed AD. AAL stated that the NPRM does not include two variation documents that AAL currently utilizes as part of its approved maintenance program.

We partially agree with the commenters' requests. Airbus has issued A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016. Therefore, the variations for Airbus A330 ALS Part 1, SL–ALI, Revision 07, dated September 23, 2013, are no longer applicable to this SNPRM.

We have changed paragraph (k) of this proposed AD to reference Airbus A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016. We have also changed paragraph (c) of this proposed AD to reference the date of April 11, 2016, for the certificate of airworthiness.

FAA's Determination and Requirements of This SNPRM

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Certain changes described above expand the scope of the NPRM. As a result, we have determined that it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this SNPRM.

This SNPRM would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this SNPRM, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an AMOC according to paragraph (m)(1) of this proposed AD. The request should include a description of changes to the required actions that will ensure the continued damage tolerance of the affected structure.

Costs of Compliance

We estimate that this SNPRM affects 82 airplanes of U.S. registry.

The actions that are required by AD 2011–17–09, and retained in this SNPRM, take about 1 work-hour per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2011–17–09 is $85 per product.

The actions that are required by AD 2012–25–12, and retained in this SNPRM, take about 16 work-hours per product (2 main landing gear (MLG) bogie beams per airplane), at an average labor rate of $85 per work-hour. Required parts cost about $255,000 per MLG bogie beam. Based on these figures, the estimated cost of the actions that are required by AD 2012–25–12 is up to $256,360 per MLG bogie beam.

We also estimate that it would take about 1 work-hour per product to comply with the basic requirements of this SNPRM. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this SNPRM on U.S. operators to be $6,970, or $85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I,

section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2011–17–09, Amendment 39–16773 (76 FR 53305, August 26, 2011); and AD 2012–25–12, Amendment 39–17293 (77 FR 75825, December 26, 2012); and adding the following new AD:

Airbus: Docket No. FAA–2015–8428; Directorate Identifier 2014–NM–032–AD.

(a) Comments Due Date

We must receive comments by January 30, 2017.

(b) Affected ADs

This AD replaces AD 2011–17–09, Amendment 39–16773 (76 FR 53305, August 26, 2011) (''AD 2011–17–09''); and AD 2012–25–12, Amendment 39–17293 (77 FR 75825, December 26, 2012) (''AD 2012–25–12'').

(c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD, certificated in any category, with an original certificate of airworthiness or original export certificate of airworthiness issued on or before April 11, 2016.

(1) Airbus Model A330–201, –202, –203, –223, and –243 airplanes.

(2) Airbus Model A330–223F and –243F airplanes.

(3) Airbus Model A330–301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 05, Periodic inspections.

(e) Reason

This AD was prompted by revisions to certain airworthiness limitations items (ALI) documents, which specify more restrictive instructions and/or airworthiness limitations. We are issuing this AD to detect and correct fatigue cracking, accidental damage, or corrosion in principal structural elements, and possible failure of certain life limited parts, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Maintenance Program Revision, With New Terminating Action

This paragraph restates the requirements of paragraph (h) of AD 2011–17–09, with new terminating action. Within 3 months after September 30, 2011 (the effective date of AD 2011–17–09): Revise the maintenance program by incorporating Airbus A330 ALS Part 1, ''Safe Life Airworthiness Limitation Items (SL–ALI), Revision 05, dated July 29, 2010. Comply with all Airbus A330 ALS Part 1, SL–ALI, Revision 05, dated July 29, 2010, at the times specified therein. Accomplishing the actions specified in paragraph (k) of this AD terminates the requirements of this paragraph.

(h) Retained Limitation of No Alternative Intervals or Limits, With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2011–17–09, with no changes. Except as provided by paragraph (m) of this AD, after accomplishment of the actions specified in paragraph (g) of this AD, no alternatives to the maintenance tasks, intervals, or limitations specified in paragraph (g) of this AD may be used.

(i) Retained Bogie Beam Replacement, With Specific Delegation Approval Language, New Terminating Action, and New Service Information

This paragraph restates the requirements of paragraph (g) of AD 2012–25–12, with specific delegation approval language and terminating action and new service information. For airplanes identified in paragraphs (c)(1) and (c)(3) of this AD: At the later of the times specified in paragraphs (i)(1) and (i)(2) of this AD, replace all main landing gear (MLG) bogie beams having part number (P/N) 201485300, 201485301, 201272302, 201272304, 201272306, or 201272307, except those that have serial number (S/N) S2A, S2B, or S2C, as identified in Messier-Dowty Service Letter A33–34 A20, Revision 5, including Appendices A through F, dated July 31, 2009; or Messier-Bugatti-Dowty Service Letter A33–34 A20, Revision 7, including Appendices A through F, dated July 20, 2012; with a new or serviceable part, using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, or the European Aviation Safety Agency (EASA) (or its delegated agent). As of the effective date of this AD, the applicable MLG bogie beams specified in this paragraph must be replaced using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA Design Organization Approval (DOA). Accomplishing the actions specified in paragraph (k) of this AD terminates the requirements of this paragraph.

(1) At the applicable time specified in paragraphs (i)(1)(i), (i)(1)(ii), and (i)(1)(iii) of this AD.

(i) For Model A330–201, –202, –203, –223, –243 series airplanes, weight variant (WV)02x, WV05x (except WV058), and WV06x series: Before the accumulation of a life limit of 50,000 landings or 72,300 total flight hours, whichever occurs first from the first installation of a MLG bogie beam on the airplane.

(ii) For Model A330–201, –202, –203, –223, –243 WV058 series airplanes: Before the accumulation of a life limit of 50,000 landings or 57,900 total flight hours, whichever occurs first from the first installation of a MLG bogie beam on the airplane.

(iii) For Model A330–301, –302, –303, –321, –322, –323, –341, –342, –343 series airplanes, WV00x, WV01x, WV02x, and WV05x series: Before the accumulation of a life limit of 46,000 landings or 75,000 total flight hours, whichever occurs first from the first installation of a MLG bogie beam on the airplane.

(2) Within 6 months after January 30, 2013 (the effective date of AD 2012–25–12).

(j) Retained Parts Installation Limitation, With New Terminating Action

This paragraph restates the requirements of paragraph (h) of AD 2012–25–12, with new

terminating action. For airplanes identified in paragraphs (c)(1) and (c)(3) of this AD, as of January 30, 2013 (the effective date of AD 2012–25–12), a MLG bogie beam having any part number identified in paragraph (i) of this AD may be installed on an airplane, provided its life has not exceeded the life limit specified in paragraphs (i)(1)(i), (i)(1)(ii), and (i)(1)(iii) of this AD, and is replaced with a new or serviceable part before reaching the life limit specified in paragraphs (i)(1)(i), (i)(1)(ii), and (i)(1)(iii) of this AD. Accomplishing the actions specified in paragraph (k) of this AD terminates the requirements of this paragraph.

(k) New Maintenance or Inspection Program Revision

Within 3 months after the effective date of this AD: Revise the maintenance or inspection program, as applicable, by incorporating the information in Airbus A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016. The initial compliance times for the actions specified in Airbus A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016, are at the times specified in Airbus A330 ALS Part 1, SL–ALI, Revision 08, dated April 11, 2016, or within 3 months after the effective date of this AD, whichever occurs later. Accomplishing the actions specified in this paragraph terminates the requirements specified in paragraphs (g) through (j) of this AD.

(l) New Limitation of No Alternative Actions or Intervals

After the maintenance or inspection program, as applicable, has been revised, as required by paragraph (k) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an AMOC in accordance with the procedures specified in paragraph (m)(1) of this AD.

(m) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Related Information

(1) For Airbus service information identified in this AD, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330–A340@airbus.com;* Internet *http://www.airbus.com.*

(2) For Messier-Bugatti-Dowty service information identified in this AD, contact Messier-Bugatti USA, One Carbon Way. Walton, KY 41094; telephone 859–525–8583; fax 859–485 8827; email *americascsc@safranmbd.com.*

(3) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 22, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2016–9439; Directorate Identifier 2016–NM–170–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 airplanes. This proposed AD was prompted by a report indicating that during an airplane inspection in production, the variable frequency starter generator (VFSG) power feeder cables were found to contain terminal lugs incorrectly installed common to terminal blocks located in the wing front spar. This proposed AD would require a general visual inspection of the wings, section 16, terminal lugs at the terminal power block of the VFSG power feeder cable for correct installation and if required, applicable corrective actions. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 30, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone: 562–797–1717; Internet: *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9439.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9439; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9439; Directorate Identifier 2016–NM–170–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received a report indicating that during an airplane inspection in production, the variable frequency starter generator (VFSG) power feeder cables were found to contain terminal lugs incorrectly installed common to terminal blocks located in the wing front spar; the lugs were close to the structure causing the lug sleeve to come in contact with adjacent fasteners. The installation procedures have been corrected on subsequent production airplanes. Operators have not reported any issues with the power feeder cables. This condition, if not corrected, could result in electrical arcing in a flammable leakage zone which could result in an electrical short and the possible introduction of energy into the main fuel tanks.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin B787–81205–SB240027–00, Issue 002, dated September 6, 2016. The service information describes procedures for a general visual inspection of the right and left wing, section 16, VFSG power feeder cable terminal lugs for correct installation and corrective actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously. For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9439.

The phrase ''corrective actions'' is used in this proposed AD. Corrective actions correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

Costs of Compliance

We estimate that this proposed AD affects 6 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	8 work-hours × $85 per hour = $680	$0	$680	$4,080

We estimate the following costs to do any necessary repairs that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Rework Wing Terminal Lugs	9 work-hours × $85 per hour = $765 [1]	$0	$765

[1] Labor costs are specific to each wing (left or right.)

According to the manufacturer, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and

Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2016–9439; Directorate Identifier 2016–NM–170–AD.

(a) Comments Due Date

We must receive comments by January 30, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin B787–81205–SB240027–00, Issue 002, dated September 6, 2016.

(d) Subject

Air Transport Association (ATA) of America Code 24, Electrical power.

(e) Unsafe Condition

This AD was prompted by a report indicating that during an airplane inspection in production, the variable frequency starter generator (VFSG) power feeder cables were found to contain terminal lugs incorrectly installed common to terminal blocks located in the wing front spar; the lugs were close to the structure causing the lug sleeve to come in contact with adjacent fasteners. We are issuing this AD to detect and correct incorrectly installed terminal lugs which may contact adjacent structure and be damaged. Damaged terminal lugs could cause electrical arcing in a flammable leakage zone which could result in an electrical short and the possible introduction of energy into the main fuel tanks.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection of Terminal Lugs and Corrective Actions

Within the applicable times specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin B787–81205–SB240027–00, Issue 002, dated September 6, 2016: Do a general visual inspection of the right and left wing, section 16, VFSG power feeder cable terminal lugs at the terminal block for correct installation and do all applicable corrective actions in accordance with Boeing Alert Service Bulletin B787–81205–SB240027–00, Issue 002, dated September 6, 2016. Do all applicable corrective actions before further flight.

(h) Credit for Previous Actions

This paragraph provides credit for the actions specified in paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Boeing Alert Service Bulletin B787–81205–SB240027–00, Issue 001, dated January 21, 2014.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone: 562–797–1717; Internet: *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on December 1, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2012–22–15 for all Fokker Services B.V. Model F28 Mark 0070 and Mark 0100 airplanes. AD 2012–22–15 currently requires revising the maintenance program to incorporate the limitations, tasks, thresholds, and intervals specified in certain revised Fokker maintenance review board (MRB) documents. Since we issued AD 2012–22–15, we received new revisions of airworthiness limitations items (ALI) documents, which introduce new and more restrictive maintenance requirements and airworthiness limitations. This proposed AD would require revising the maintenance or inspection program to incorporate new maintenance requirements and airworthiness limitations. We are proposing this AD to prevent the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 30, 2017.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

• *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone: +31 (0)88–6280–350; fax: +31 (0)88–6280–111; email: *technicalservices@fokker.com;* Internet *http://www.myfokkerfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9435; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1137; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9435; Directorate Identifier 2016–NM–108–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On October 30, 2012, we issued AD 2012–22–15, Amendment 39–17252 (77 FR 68063, November 15, 2012) (''AD 2012–22–15''). AD 2012–22–15 requires actions intended to address an unsafe condition on all Fokker Services B.V. Model F28 Mark 0070 and Mark 0100 airplanes.

Since we issued AD 2012–22–15, we received Fokker Services Engineering Reports that consist of new and more restrictive airworthiness limitations (ALS).

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive AD 2016–0125, dated June 21, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Fokker Services B.V. Model F28 Mark 0070 and Mark 0100 airplanes. The MCAI states:

Fokker Services recently published issue 15 of Engineering Report SE–623, containing Airworthiness Limitation Items (ALIs) and Safe Life Items (SLIs). This report is Part 2 of the Airworthiness Limitations Section (ALS Part 2) of the Instructions for Continued Airworthiness, referred to in Section 06, Appendix 1, of the Fokker 70/100 Maintenance Review Board document.

The complete ALS currently consists of:

Part 1—Report SE–473, Certification Maintenance Requirements (CMRs)—reference: EASA AD 2015–0027 [which corresponds to FAA AD 2016–11–22, Amendment 39–18549 (81 FR 36438, June 7, 2016)].

Part 2—Report SE–623, ALIs and SLIs—reference: EASA AD 2014–0224 [which corresponds to FAA AD 2012–22–15], and

Part 3—Report SE–672, Fuel ALIs and CDCCLs—reference: EASA AD 2015–0032 [which corresponds to FAA AD 2016–11–15, Amendment 39–18542 (81 FR 36447, June 7, 2016)].

The instructions contained in those reports have been identified as mandatory actions for continued airworthiness. Failure to accomplish these actions could result in an unsafe condition.

EASA previously issued AD 2014–0224, requiring the actions described in ALS Part 1 (report SE–473 issue 10), Part 2 (report SE–623 issue 13) and Part 3 (report SE–672 issue 4). Since that [EASA] AD was issued, ALS Part 1 was revised (SE–473 issue 11) and EASA issued AD 2015–0027 accordingly. ALS Part 3 was also revised (SE–672 issue 5) and EASA issued AD 2015–0032 accordingly.

For the reasons described above, this [EASA] AD retains part of the requirements of [EASA] AD 2014–0224, which is superseded, and requires implementation of the maintenance actions as specified in ALS Part 2 of the Instructions for Continued Airworthiness, Fokker Services Engineering Report SE–623 at issue 15 (hereafter referred to as 'ALS Part 2' in this [EASA] AD).

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9435.

Related Service Information Under 1 CFR Part 51

Fokker Services B.V. has issued Fokker Services B.V. Engineering Report SE–623, ''Fokker 70/100 ALI's and SLI's,'' Issue 16, issued June 3, 2016. The service information describes new and more restrictive maintenance requirements and airworthiness limitations. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (m)(1) of this AD. The request should include a description of changes to the required inspections that will ensure the continued operational safety of the airplane.

Costs of Compliance

We estimate that this proposed AD affects 15 airplanes of U.S. registry.

The actions required by AD 2012–22–15, and retained in this proposed AD, take about 1 work-hour per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that are

required by AD 2012–22–15 is $85 per product.

We also estimate that it would take about 1 work-hour per product to comply with the basic requirements of this proposed AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be $1,275, or $85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2012–22–15, Amendment 39–17252 (77 FR 68063, November 15, 2012), and adding the following new AD:

Fokker Services B.V.: Docket No. FAA–2016–9435; Directorate Identifier 2016–NM–108–AD.

(a) Comments Due Date

We must receive comments by January 30, 2017.

(b) Affected ADs

(1) This AD replaces AD 2012–22–15, Amendment 39–17252 (77 FR 68063, November 15, 2012) (''AD 2012–22–15'').

(2) This AD affects AD 2012–12–07, Amendment 39–17087 (77 FR 37788, June 25, 2012) (''AD 2012–12–07'').

(3) This AD affects AD 2008–06–20 R1, Amendment 39–16089 (74 FR 61018, November 23, 2009) (''AD 2008–06–20 R1'').

(c) Applicability

This AD applies to Fokker Services B.V. Model F28 Mark 0070 and Mark 0100 airplanes, certificated in any category, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by a revision of an airworthiness limitations items (ALI) document, which introduces new and more restrictive maintenance requirements and airworthiness limitations. We are issuing this AD to prevent reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Maintenance Program Revision, With Revised Compliance Language

This paragraph restates the requirements of paragraph (i) of AD 2012–22–15, with revised compliance language. Within 3 months after December 20, 2012 (the effective date of AD 2012–22–15), revise the maintenance program to incorporate the airworthiness limitations specified in Fokker Report SE–623, ''Fokker 70/100 Airworthiness Limitation Items and Safe Life Items,'' Issue 13, released August 25, 2014 (''Fokker Report SE–623, Issue 13''). For all tasks and retirement lives identified in Fokker Report SE–623, Issue 13, the initial compliance times start from the later of the times specified in paragraphs (g)(1) and (g)(2) of this AD, and the repetitive inspections must be accomplished thereafter at the applicable interval specified in Fokker Report SE–623, Issue 13. Accomplishing the revision required by paragraph (k) of this AD terminates the requirements of this paragraph.

(1) Within 3 months after December 20, 2012 (the effective date of AD 2012–22–15).

(2) At the time specified in Fokker Report SE–623, Issue 13.

(h) Retained Corrective Actions, With Specific Delegation Approval Language

This paragraph restates the requirements of paragraph (j) of AD 2012–22–15, with specific delegation approval language. If any discrepancy, as defined in Fokker Report SE–623, Issue 13, is found during accomplishment of any task specified in Fokker Report SE–623, Issue 13: Within the applicable compliance time specified in Fokker Report SE–623, Issue 13, accomplish the applicable corrective actions in accordance with Fokker Report SE–623, Issue 13.

(1) If no compliance time is identified in Fokker Report SE–623, Issue 13, accomplish the applicable corrective actions before further flight.

(2) If any discrepancy is found and there is no corrective action specified in Fokker Report SE–623, Issue 13: Before further flight, repair using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Fokker Services' EASA Design Organization Approval (DOA).

(i) Retained ''No Alternative Actions or Intervals,'' With a New Exception

This paragraph restates the requirements of paragraph (k) of AD 2012–22–15, with a new exception. Except as required by paragraph (k) of this AD, after accomplishing the revision required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (m)(1) of this AD.

(j) Retained Method of Compliance With AD 2008–06–20, With Revised Compliance Language

This paragraph restates the requirements of paragraph (m) of AD 2012–22–15, with revised compliance language. Accomplishing the actions specified in paragraph (g) of this AD terminates the requirements of paragraphs (f)(1) through (f)(5) of AD 2008–06–20 R1.

(k) New Requirement of This AD: Maintenance or Inspection Program Revision

Within 30 days of the effective date of this AD, revise the maintenance or inspection program, as applicable, to incorporate the ALI instructions specified in Fokker Services B.V. Engineering Report SE–623, ''Fokker 70/100 ALI's and SLI's,'' Issue 16, issued June 3, 2016 (''Fokker Services B.V. Engineering

Report SE–623, Issue 16''). Accomplishing the revision required by this paragraph terminates the requirements of paragraph (g) of this AD. Accomplishing the revision required by this paragraph also terminates the requirements of paragraph (g) of AD 2012–12–07.

(1) The initial compliance times for the tasks specified in Fokker Services B.V. Engineering Report SE–623, Issue 16, are at the later of the applicable compliance times specified in Fokker Services B.V. Engineering Report SE–623, Issue 16, or within 30 days after the effective date of this AD, whichever is later.

(2) If any discrepancy is found, before further flight, repair using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Fokker B.V. Service's EASA DOA.

(l) No Alternative Actions or Intervals

After the maintenance or inspection program, as applicable, has been revised as required by paragraph (k) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an AMOC in accordance with the procedures specified in paragraph (m)(1) of this AD.

(m) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1137; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA; or Fokker B.V. Services' EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016–0125, dated June 21, 2016, for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9435.

(2) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone: +31 (0)88–6280–350; fax: +31 (0)88–6280–111; email: *technicalservices@fokker.com;* Internet *http://www.myfokkerfleet.com.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 17, 2016.

Phil Forde,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Food and Drug Administration

21 CFR Part 216

[Docket No. FDA–2016–N–3464]

RIN 0910–AH29

List of Bulk Drug Substances That Can Be Used To Compound Drug Products in Accordance With Section 503A of the Federal Food, Drug, and Cosmetic Act

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA or Agency) is proposing a regulation to identify an initial list of bulk drug substances that can be used to compound drug products in accordance with certain compounding provisions of the Federal Food, Drug, and Cosmetic Act (the FD&C Act), although they are neither the subject of an applicable United States Pharmacopeia (USP) or National Formulary (NF) monograph nor components of FDA-approved drugs. Specifically, the Agency proposes to place six bulk drug substances on the list. This proposed rule also identifies four bulk drug substances that FDA has considered and proposes not to include on the list. Additional substances nominated by the public for inclusion on this list are currently under consideration and will be the subject of a future rulemaking.

DATES: Submit either electronic or written comments on the bulk drug substances list by March 16, 2017. See section VI for the proposed effective date of a final rule based on this proposed rule.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–3464 for ''List of Bulk Drug Substances That Can Be Used To Compound Drug Products in Accordance With Section 503A of the Federal Food, Drug, and Cosmetic Act.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: James Flahive, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 5108, Silver Spring, MD 20993–0002, 301–796–9293.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

A. Purpose of the Proposed Rule

FDA is proposing to amend its regulations to add a list of bulk drug substances that can be used in compounding under section 503A of the FD&C Act (21 U.S.C. 353a) (referred to as ''the 503A Bulks List''). Bulk drug substances that appear on the 503A Bulks List can be used to compound drug products subject to the conditions of section 503A, although those substances are not the subject of a USP or NF monograph or components of approved drug products.

B. Summary of the Major Provisions of the Proposed Rule

FDA is proposing to establish the criteria by which bulk drug substances will be evaluated for inclusion on the 503A Bulks List. Based on the results of its evaluation of nominated bulk drug substances to date, as well as consultation with the Pharmacy Compounding Advisory Committee (PCAC), FDA is also proposing to include six bulk drug substances on the list: Brilliant Blue G, also known as Coomassie Brilliant Blue G–250; cantharidin (for topical use only); diphenylcyclopropenone (for topical use only); N-acetyl-D-glucosamine (for topical use only); squaric acid dibutyl ester (for topical use only); and thymol iodide (for topical use only) and that four other substances not be included on the list: Oxitriptan, piracetam, silver protein mild, and tranilast.

C. Legal Authority

Section 503A of the FD&C Act, in conjunction with our general rulemaking authority in section 701(a) of the FD&C Act (21 U.S.C. 371(a)), serves as our principal legal authority for this proposed rule.

D. Costs and Benefits

FDA is proposing to place six bulk substances on the 503A Bulks List and not to place four bulk substances on the 503A Bulks List. Because we lack sufficient information to quantify the costs and benefits of this proposed rule, we include a qualitative description of potential benefits and potential costs. We expect that the rule would affect compounding pharmacies and other entities that market the affected substances or drug products made from the affected substances, consumers of drug products containing the affected drug substances, and payers that cover these drug products or alternative drug products.

III. Background

A. Statutory and Regulatory Background

Section 503A of the FD&C Act (21 U.S.C. 353a) describes the conditions under which a compounded drug product may qualify for an exemption from certain sections of the FD&C Act. Those conditions include that a licensed pharmacist in a State-licensed pharmacy or Federal facility or a licensed physician compounds the drug product using bulk drug substances that: (1) Comply with the standards of an applicable USP or NF monograph,[1] if a

[1] FDA has interpreted the statutory language ''applicable USP or NF monographs'' to refer to official USP or NF drug substance monographs. Therefore, a substance that is the subject of a dietary supplement monograph, but not a USP or NF drug substance monograph, does not satisfy the

monograph exists, and the USP chapter on pharmacy compounding; (2) if such a monograph does not exist, are drug substances that are components of drugs approved by the Secretary; or (3) if such a monograph does not exist and the drug substance is not a component of a drug approved by the Secretary, that appear on the 503A Bulks List. See section 503A(b)(1)(A)(i) of the FD&C Act. This proposed rule proposes criteria for evaluating substances for inclusion on the 503A Bulks List and identifies six substances the Secretary proposes to place on the list. The Agency considered four other substances and is proposing not to include those substances on the 503A Bulks List. Additional substances are under evaluation, and new substances may be added to the list through subsequent rulemaking.

Section 503A adopts the definition of ''bulk drug substance'' in FDA's drug establishment registration and listing regulations, which was codified at § 207.3(a)(4) (21 CFR 207.3(a)(4)) at the time section 503A was enacted. See section 503A(b)(1)(A) of the FD&C Act. Under the definition, bulk drug substance means any substance that is represented for use in a drug and that, when used in the manufacturing, processing, or packaging of a drug, becomes an active ingredient or a finished dosage form of the drug, but the term does not include intermediates used in the synthesis of such substances.

On August 31, 2016, FDA published a final rule in the **Federal Register** to update its registration and listing regulations in part 207 (21 CFR part 207), which included minor changes to the definition of bulk drug substance and moved the definition to § 207.3 (see 81 FR 60170). This definition becomes effective on November 29, 2016. As set forth in § 207.3, ''bulk drug substance,'' as referenced in section 503A(b)(1)(A) of the FD&C Act, means the same as ''active pharmaceutical ingredient'' as defined in § 207.1(b). An ''active pharmaceutical ingredient'' is any substance that is intended for incorporation into a finished drug product and is intended to furnish pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease, or to affect the structure or any function of the body. Active pharmaceutical ingredient does not include intermediates used in the synthesis of the substance (§ 207.1).

Inactive ingredients used in compounded drug products, such as flavorings, dyes, or diluents, need not appear on the 503A Bulks List to be eligible for use in compounding drug products and will not be included on the list.

B. Regulatory History of the 503A Bulks List

Section 503A of the FD&C Act was enacted in 1997. In the **Federal Register** of April 7, 1998 (63 FR 17011), FDA invited all interested persons to nominate bulk drug substances for inclusion on the 503A Bulks List. In 1998, FDA received nominations for 41 different drug substances. Ten of these drug substances were the subject of an applicable USP or NF monograph or were components of FDA-approved drugs and did not need to go on the list to be used in compounding. After evaluating the nominated drug substances and consulting with the PCAC as required by section 503A(c)(2), FDA published a proposed rule listing 20 drug substances for potential inclusion on the initial section 503A Bulks List (64 FR 996, January 7, 1999) (the 1999 Proposed 503A Bulks List). The proposed rule also described 10 nominated drug substances that were still under consideration for the 503A Bulks List. The PCAC reconvened in May 1999 to discuss bulk drug substances included in the proposed rule, in addition to other bulk drug substances (see 64 FR 19791, April 22, 1999).

In February 2001, the U.S. Court of Appeals for the Ninth Circuit held that certain provisions of section 503A of the FD&C Act were unconstitutional restrictions on commercial speech. (See *Western States Med. Ctr.* v. *Shalala,* 238 F.3d 1090 (9th Cir. 2001).) Furthermore, the Ninth Circuit held that the advertising and solicitation provisions could not be severed from the rest of section 503A and, as a result, found section 503A of the FD&C Act to be invalid in its entirety. In April 2002, the U.S. Supreme Court affirmed the Ninth Circuit's decision that the advertising and solicitation provisions were unconstitutional; it did not, however, rule on the severability of section 503A of the FD&C Act. (See *Thompson* v. *Western States Med. Ctr.,* 535 U.S. 357 (2002).) In 2008, the U.S. Court of Appeals for the Fifth Circuit held that compounded drugs are subject to regulation by FDA, and that the advertising and solicitation provisions are severable from the rest of section 503A of the FD&C Act. (See *Medical Ctr. Pharm.* v. *Mukasey,* 536 F.3d 383 (5th Cir. 2008).)

Following a fungal meningitis outbreak in September 2012, FDA sought legislation to, among other things, resolve the split in the Circuits to clarify that section 503A of the FD&C Act was valid nationwide. On November 27, 2013, President Obama signed the Drug Quality and Security Act (Pub. L. 113–54) (DQSA), which contains important provisions relating to the oversight of human drug product compounding. Among other things, the DQSA removed from section 503A of the FD&C Act the provisions that had been held unconstitutional by the U.S. Supreme Court in 2002. By removing these provisions, the DQSA clarified that section 503A of the FD&C Act applies nationwide.

C. Requests for Nominations

Because of the amount of time that had passed between the publication of the 1999 proposed rule and the enactment of the DQSA, FDA felt it was necessary to begin again to develop the 503A Bulks List. In the **Federal Register** of December 4, 2013 (78 FR 72841), FDA published a notice withdrawing the 1999 proposed rule and inviting all interested persons to nominate bulk drug substances for inclusion on the 503A Bulks List.

Over 2,000 substances were nominated. However, many of those nominations were for a substance that is the subject of an applicable USP or NF monograph or a component of an FDA-approved drug, were not for substances used in compounding as active ingredients, or did not include sufficient information for FDA to evaluate whether the substances should be proposed for inclusion on the 503A Bulks List. To improve the efficiency of the process for developing the 503A Bulks List, FDA reopened the nomination process in July 2014 (79 FR 37747, July 2, 2014) and provided a more detailed description about what information should be included in a nomination to support the Agency's evaluation. FDA stated that bulk drug substances that were previously nominated would not be further considered unless they were renominated and the new nominations were adequately supported. Substances that were already eligible for use in compounding or that were not adequately supported would not be placed on the list.

In response to that solicitation, approximately 740 unique substances were nominated. Of those substances, approximately 315 are components of an FDA-approved drug product or the

condition regarding bulk drug substances in section 503A(b)(1)(A)(i)(I) of the Act. Such a substance may only be used as a bulk drug substance under section 503A of the FD&C Act if it is a component of an FDA-approved drug product or is on the 503A Bulks List.

subject of an applicable USP or NF monograph. Such substances can be used in compounding under section 503A(b)(1)(A)(i)(I) and (II) of the FD&C Act and, therefore, are not eligible for inclusion on the 503A Bulks List.

At least one of the nominated substances is a finished drug product that was nominated by its brand name. Finished drug products are not eligible for the 503A Bulks List because they do not meet the definition of a bulk drug substance in § 207.3(4).

At least one of the nominated substances is a biological product subject to approval in a biologics license application (BLA) under section 351 of the Public Health Service (PHS) Act (42 U.S.C. 262) when used for the indication proposed in the nomination. This substance is not eligible for the 503A Bulks List because biological products subject to approval in a BLA under section 351 of the PHS Act are not eligible for the exemptions in section 503A of the FD&C Act. No biological products subject to approval in a BLA will be considered for the 503A Bulks List.

At least four of the nominated substances appear on the list published by FDA of substances that have been withdrawn or removed from the market because the drug products or components of the drug products have been found to be unsafe or not effective (section 503A(b)(1)(C) of the FD&C Act) (Withdrawn or Removed List). Such substances cannot be used in compounding under section 503A of the FD&C Act, and therefore, are not eligible for inclusion on the 503A Bulks List.

One of the nominated substances has no currently accepted medical use and is included on Schedule I of the Controlled Substances Act (CSA) (21 U.S.C. 812(c)). The CSA does not allow possession or distribution of Schedule I substances (see 21 U.S.C. 841(a)(1) and 829), except for research purposes (see 21 U.S.C. 823(f)), and Schedule I substances will not be considered for the 503A Bulks List. Those desiring to do research on a Schedule I substance may apply to do so under an investigational new drug (IND) application.

Of the substances that are not components of an approved drug product or the subject of an applicable USP or NF monograph, finished drug products, biological products subject to licensure in a BLA, and do not appear on the Withdrawn or Removed List or Schedule I of the CSA, about 350 substances were nominated with insufficient supporting evidence for FDA to evaluate them.

The remaining substances may be eligible for inclusion on the 503A Bulks List and were nominated with sufficient supporting information for FDA to evaluate them. Ten of those substances have been evaluated and are discussed in section V. The rest will be discussed in future notices of proposed rulemaking (NPRMs) after they have been evaluated. Once the Agency completes its review of the substances that were nominated for the 503A Bulks List with adequate supporting information under the July 2, 2014, request for nominations, FDA will consider additional substances nominated for inclusion on the list if they are eligible and adequate supporting information is submitted to permit FDA to meaningfully evaluate them (see section III).

With regard to the substances nominated with sufficient supporting information for FDA to evaluate them, including the 10 nominated substances discussed in this proposed rule, FDA generally does not intend to take regulatory action against a State-licensed pharmacy, Federal facility, or licensed physician for compounding a drug product using a bulk drug substance that is not the subject of an applicable USP or NF monograph or a component of an FDA-approved drug product, provided that the other conditions in section 503A and the FD&C Act are met, until the substance is addressed in a final rule. FDA is not applying this interim policy to a nominated substance however, if the Agency has identified the substance as posing a significant safety risk,[2] or if the substance was nominated without adequate support. For further information on this subject, see the guidance for industry entitled ''Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act'' (Ref. 1). As described in the guidance, the following categories of bulk drug substances are identified on FDA's Web site at *http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/PharmacyCompounding/UCM467373.pdf:* (1) The substances nominated with sufficient supporting information that are under evaluation, (2) the substances nominated with sufficient supporting information but with which FDA has identified significant safety risks relating to the use of these bulk drug substances in compounding, and (3) the substances nominated with insufficient supporting evidence for FDA to evaluate them.

[2] This is not a determination regarding whether the substances will be added to the 503A Bulks list. FDA intends to make that determination after notice and comment rulemaking, as set forth in this proposal.

IV. Legal Authority

As described in the Background section, section 503A of the FD&C Act describes the conditions that must be satisfied for human drug products compounded by a licensed pharmacist or licensed physician to be exempt from three sections of the FD&C Act (sections 501(a)(2)(B), 502(f)(1), and 505 (21 U.S.C. 351(a)(2)(B), 352(f)(1), and 355)). One of the conditions that must be satisfied for a compounded drug to qualify for the exemptions under section 503A of the FD&C Act is that a licensed pharmacist in a State-licensed pharmacy or Federal facility or a licensed physician compounds the drug product using bulk drug substances that: (1) Comply with the standards of an applicable USP or NF monograph, if a monograph exists, and the USP chapter on pharmacy compounding; (2) if such a monograph does not exist, are drug substances that are components of drugs approved by the Secretary; or (3) if such a monograph does not exist and the drug substance is not a component of a drug approved by the Secretary, that appear on the 503A Bulks List. See section 503A(b)(1)(A)(i) of the FD&C Act. Section 503A(c)(1) of the FD&C Act also states that the Secretary shall issue regulations to implement section 503A, and that before issuing regulations to implement section 503A(b)(1)(A)(i)(III) pertaining to the 503A bulks list, among other sections, the Secretary shall convene and consult an advisory committee on compounding unless the Secretary determines that the issuance of such regulations before consultation is necessary to protect the public health. Section 503A(c)(2) of the FD&C Act requires the Secretary to issue the regulations in consultation with the USP, and to include in the regulation the criteria for such substances that shall include historical use, reports in peer reviewed journals, and any other criteria the Secretary identifies. Thus, section 503A of the FD&C Act, in conjunction with our general rulemaking authority in section 701(a) of the FD&C Act, serves as our principal legal authority for this proposed rule.

V. Description of the Proposed Rule

FDA is proposing to add § 216.23 to title 21 of the Code of Federal Regulations (CFR) to set forth criteria to evaluate bulk drug substances for inclusion on the 503A Bulks List. Additionally, after considering 10 bulk drug substances for the 503A Bulks List,

FDA proposes to codify the initial 503A Bulks List to include 6 of the bulk drug substances that were considered and to identify 4 substances that were considered and would not be placed on the list. The criteria and the bulk drug substances considered for inclusion on the list are described in the paragraphs that follow.

A. Criteria for Evaluating Bulk Drug Substances for the 503A Bulks List

Section 503A(c)(2) of the FD&C Act provides that the criteria for determining which substances should appear on the 503A Bulks List shall include historical use, reports in peer reviewed medical literature, or other criteria the Secretary of Health and Human Services may identify. Consistent with the July 2, 2014, **Federal Register** notice (79 FR 37747) soliciting nominations for this list, and as presented to and discussed with the PCAC in February 2015 (Ref. 2), FDA proposes that the following criteria be used to evaluate the nominated substances:

- The physical and chemical characterization of the substance;
- Any safety issues raised by the use of the substance in compounded drug products;
- The available evidence of effectiveness or lack of effectiveness of a drug product compounded with the substance, if any such evidence exists; and
- Historical use of the substance in compounded drug products, including information about the medical condition(s) the substance has been used to treat and any references in peer-reviewed medical literature.

In evaluating candidates for the 503A Bulks List under these criteria, the Agency proposes to use a balancing test. Specifically, the Agency proposes to consider each criterion in the context of the others and balance them, on a substance-by-substance basis, to decide whether a particular substance is appropriate for inclusion on the 503A Bulks List.

Under the first criterion, the physical and chemical characterization of the substance, FDA would consider each substance's purity, identity, and quality. Based on attributes such as the substance's molecular structure, stability, melting point, appearance, likely impurities, and solubilities, FDA would determine whether the substance can be identified consistently based on its physical and chemical characteristics. If a substance cannot be well characterized chemically and physically, the Agency proposes that this criterion weigh against its inclusion on the 503A Bulks List because there can be no assurance that its properties and toxicities, when used in compounding, would be the same as the properties and toxicities reported in the literature and considered by the Agency.

Under the second criterion, FDA would consider the safety issues raised by the use of each substance in pharmacy compounding. Based on FDA's review of the substances nominated to date, it is unlikely that candidates for the 503A Bulks List will have been thoroughly investigated in in vitro or in animal toxicology studies, or that there will be well-controlled clinical trials to substantiate their safe use in humans. Thus, in evaluating list candidates, the Agency is likely to have at its disposal very limited information, or in some cases no information, of the type and quality that is ordinarily required and evaluated as part of the drug approval process.

To evaluate the safety of the substances then, the Agency proposes to rely on available information, including reports in peer-reviewed medical literature, about each substance's pharmacology, acute toxicity, repeat dose toxicity, mutagenicity, developmental and reproductive toxicity, and carcinogenicity. The Agency would also rely on reports and abstracts in the literature about adverse reactions the substances have caused in humans. In applying the safety criterion, FDA also proposes to consider the availability of approved drug products or drug products that follow an OTC monograph (OTC monograph products). The existence of approved drug products or OTC monograph products would likely weigh against inclusion on the proposed list when the toxicity of a particular substance appears to be significant or where there are other safety concerns associated with the use of the substance in compounded drug products.

Under the third criterion, FDA proposes to consider the available evidence of the substance's effectiveness or lack of effectiveness for a particular use, including reports in peer-reviewed medical literature, if any such evidence exists. In the new drug approval process, applicants are required to demonstrate effectiveness under the substantial evidence standard described in section 505(d) of the FD&C Act. FDA recognizes that few, if any, of the candidates for the 503A Bulks List will have been studied in adequate and well-controlled investigations sufficient to satisfy this standard. Thus, in its balancing of the relevant criteria, the Agency would take into account whatever relevant evidence concerning effectiveness is available.

For example, for substances that have been widely used for a long period of time, the literature may include anecdotal reports of effectiveness for a particular use or reports of one or more trials suggesting possible effectiveness. Conversely, the literature may contain anecdotal or clinical evidence that a particular bulk drug substance was not effective for a particular use (negative effectiveness data). When evaluating a bulk drug substance that is proposed for the treatment of a less serious illness, FDA would generally be more concerned about the safety of the substance than about its effectiveness. Thus, the availability of minimal effectiveness data, or the existence of mere anecdotal reports, would be less likely to preclude inclusion of the substance on the list. However, for a bulk drug substance that is proposed to treat a more serious or life-threatening disease, there may be more serious consequences associated with ineffective therapy, particularly when there are approved drug products or OTC monograph products. In those cases, the existence of approved drug products or OTC monograph products would likely weigh against inclusion on the proposed list, and the availability of minimal effectiveness data, or the presence of negative effectiveness data, would weigh more heavily against placement on the list in FDA's balancing of the relevant criteria.

Under the fourth criterion, the historical use of the substance in pharmacy compounding, FDA proposes to consider the length of time the substance has been used in pharmacy compounding, the medical conditions it has been used to treat, how widespread its use has been, including use in other countries, and any references in peer-reviewed medical literature. The Agency proposes that the longer a substance has been used in pharmacy compounding and the broader its use, the more this criterion will weigh in favor of inclusion of the substance on the list.

B. Methodology for Developing the 503A Bulks List

FDA reviewed the substances addressed in this proposed rule in the context of adequately supported nominated uses. In certain circumstances, FDA also reviewed substances in the context of unnominated or inadequately supported uses because, for example, such uses appear to be widespread, are intended to treat serious conditions, or pose serious risks to patients. The

information that FDA assessed to evaluate the substances addressed in this proposed rule under each of the proposed evaluation criteria was obtained from publicly available sources, including peer-reviewed medical literature. Some of this information was referenced in the nominations, and the remainder FDA gathered through independent searches of medical and pharmaceutical databases. FDA did not review raw data. The nature, quantity, and quality of the information FDA assessed varied considerably from substance to substance. In some cases, there were very little data. For other substances, reports in the literature were more plentiful and sometimes comprised hundreds or thousands of articles. In those cases, generally the Agency limited its review to a sample of the best literature sources available (*e.g.,* review articles in widely known, peer-reviewed journals; meta-analyses; reports of randomized controlled trials).

FDA's evaluation of the nominated substances was, necessarily, far less rigorous and less comprehensive than the Agency's review of drugs as part of the new drug approval process. The new drug approval process is conducted based on extensive data compiled and submitted with new drug and abbreviated new drug applications, which are not available for the nominated substances. Additionally, the Agency's review during the drug approval process includes premarketing evaluation of a specific drug formulation, the sponsor's chemistry and manufacturing controls, and the establishments where approved drugs will be manufactured. In contrast, these bulk drug substances will be evaluated only for possible use in compounded drugs.

Therefore, the proposed inclusion of a drug substance on the 503A Bulks List should not, in any way, be equated with or considered an FDA approval, endorsement, or recommendation of any drug compounded using the substance. Nor should it be assumed that a drug compounded using the substances on the proposed list has been proven to be safe and effective under the standards required for Agency approval. Any person who represents that a compounded drug made with a bulk drug substance that appears on this list is FDA approved, or otherwise endorsed by FDA generally, or for a particular indication, will cause the drug to be misbranded under section 502(a) and/or 502(bb) of the FD&C Act.

On February 23 and 24, 2015, and on June 17, 2015, FDA consulted with the PCAC created under section 503A(c)(1) of the FD&C Act, about the criteria proposed to evaluate substances nominated for the list and about the 10 substances that are addressed in this proposed rule (Refs. 2–4). The Agency has considered all of the PCAC's recommendations in developing this proposed rule, and the Agency intends to continue to consult with the PCAC in evaluating future candidates for the 503A Bulks List. The first 10 substances evaluated are addressed in this proposed rule. Going forward, FDA intends to publish NPRMs proposing additional substances be placed on the list or not placed on the list on a rolling basis as evaluations are completed. Depending on the length of time it takes to complete a rulemaking, multiple rulemakings may be ongoing simultaneously.

Section 503A of the FD&C Act requires that FDA create the 503A Bulks List by regulation, in consultation with the USP. See section 503A(c)(2) of the FD&C Act. To this end, FDA has been periodically meeting with USP and discussing the 503A Bulks List (Refs. 5 and 6). After publication of this NPRM, the public will have an opportunity to comment on the proposed rule. After considering the comments on this proposed rule submitted to the docket, FDA will issue the 503A Bulks List as a final rule, which will be codified in the CFR. The final version of the rule may include all, none, or only some of the substances proposed here for inclusion on the 503A Bulks List, depending on the comments received, and will also identify those substances the Agency has determined should not be placed on the list. The Agency may amend the 503A Bulks List to add or delete substances after further notice and comment rulemaking.

Individuals and organizations may petition FDA to amend the list (to add or delete bulk drug substances) at any time after the final rule is published (see 21 CFR 10.30). Individuals and organizations may also nominate new substances for the 503A Bulks List or comment on nominated substances that have not yet been addressed in an NPRM via Docket No. FDA–2015–N–3534 while that docket is open.

C. Substances Proposed for Inclusion on the 503A Bulks List

Under section 503A(c)(2) of the FD&C Act, FDA is proposing that the following six bulk drug substances, which are neither the subject of a current applicable USP or NF monograph nor components of FDA-approved drugs, be included on the 503A Bulks List, and the drug products compounded with those substances may qualify for the exemptions provided for in section 503A of the FD&C Act (*i.e.,* from sections 501(a)(2)(B), 502(f)(1), and 505 of the FD&C Act). When a salt or ester of an active moiety is listed, only that particular salt or ester may be used. The base compound and other salts or esters of the same active moiety must be evaluated separately for eligibility for the 503A Bulks List. Additionally, when a bulk drug substance is included on the 503A Bulks List subject to certain restrictions (for example, for a particular route of administration (*e.g.,* topical)), only dosage forms for that route of administration may be compounded with that bulk drug substance.

The following bulk drug substances are being proposed for the 503A Bulks List, to appear in § 216.23(a) of Title 21 of the CFR:

1. Brilliant Blue G

Brilliant Blue G, also known as Coomassie Brilliant Blue G-250,[3] was evaluated for use as a dye used in staining for visualization during ophthalmic procedures. It is well characterized physically and chemically. There are potential mutagenic and carcinogenic concerns associated with Brilliant Blue G; however, those concerns are mitigated in clinical use because the dye is immediately washed out of the eye after administration, and tissue that is stained with the dye is removed as part of the surgical procedure. Published clinical trials provide some evidence for efficacy of Brilliant Blue G in staining the internal limiting membrane. Brilliant Blue has had relatively widespread use for staining the internal limiting membrane during retinal surgery for approximately 10 years. There is one product that is FDA-approved for staining the internal limiting membrane and the anterior capsule.

FDA proposed to the PCAC that Brilliant Blue G be included on the 503A Bulks List (Ref. 7), and at its meeting on June 17, 2015, the PCAC voted to include Brilliant Blue G on the list (Ref. 4). The proposed rule would place Brilliant Blue G on the 503A Bulks List.

2. Cantharidin

Cantharidin, which is obtained from various species of blister beetle, was

[3] While there are other substances referred to by the name ''Brilliant Blue,'' only Coomassie Brilliant Blue G-250 (CAS RN 6104-58-1, UNII M1ZRX790SI) was evaluated, and the Agency is proposing only that substance for inclusion on the 503A Bulks List. The other substances referred to as ''Brilliant Blue'' would have to be nominated and separately evaluated for consideration for inclusion on the 503A Bulks List.

evaluated for topical use [4] in the treatment of warts and molluscum contagiosum. It is well characterized physically and chemically. Cantharidin is extremely toxic, due to its potential for severe irritation. However, clinical data accumulated since 1958 indicate that, with careful use under physician direction, toxicities observed with cantharidin, are no worse than and sometimes less severe than those seen with other destructive modalities in the treatment of molluscum contagiosum and warts. Evidence of some efficacy of cantharidin in the treatment of warts and molluscum contagiosum has been reported in the literature. It appears to have been widely used to treat molluscum contagiosum and warts since the 1950s. There are no approved prescription or OTC monograph products for molluscum contagiosum. For warts, there are no prescription drug products approved for use outside of the genital area. A variety of OTC monograph products containing salicylic acid are available.

FDA proposed to the PCAC that cantharidin be included on the 503A Bulks List for topical use only (Ref. 8). At the PCAC meeting on February 24, 2015, the PCAC voted to include cantharidin on the list (Ref. 3). Because the supported nominations and the Agency's review were limited to the topical use of this substance, the proposed rule would place cantharadin on the 503A Bulks List for topical use only.

3. Diphenylcyclopropenone (DPCP)

DPCP was evaluated for topical use in the treatment of alopecia areata and nongenital warts. It is well characterized physically and chemically but degrades readily by hydrolysis in an alcoholic base or exposure to light. Known safety concerns about the use of DPCP are limited to reported adverse effects primarily due to its action as a contact sensitizer to elicit contact dermatitis. Evidence of some efficacy of DPCP in the treatment of alopecia areata and recalcitrant nongenital warts has been reported in the literature. DPCP has been used to treat resistant non-genital warts and alopecia areata for over 30 years. The only FDA-approved drug product indicated for the treatment of alopecia areata is intralesional injection of corticosteroid suspensions. For warts, there are no approved prescription drug products outside of the genital area. A variety of OTC monograph products are available containing salicylic acid at percentages varying from 17 to 40 percent.

FDA proposed to the PCAC that DPCP be included on the 503A Bulks List (Ref. 8). At its meeting on February 24, 2015, the PCAC voted to include DPCP on the list (Ref. 3). Because the supported nominations and the Agency's review were limited to the topical use of this substance, the proposed rule would place DPCP on the 503A Bulks List for topical use only.

4. N-acetyl-D-glucosamine (NAG)

NAG, also known as acetyl-D glucosamine or N-acetyl glucosamine, was evaluated for topical use in the treatment of hyperpigmentation and other skin conditions. It is well characterized physically and chemically. Topical use of NAG has been associated with relatively minor and infrequent side effects. Studies have indicated that NAG may be effective for reducing diffuse and local facial hyperpigmentation. NAG has been used topically for the treatment of hyperpigmentation since the mid-2000s. There are FDA-approved drug products indicated for the treatment of hyperpigmentation and other skin conditions, which are not serious or life-threatening conditions.

FDA proposed to the PCAC that NAG be included on the 503A Bulks List for topical use only (Ref. 7). At the PCAC meeting on June 17, 2015, the PCAC voted to include NAG on the list (Ref. 4). Because the supported nominations and the Agency's review were limited to the topical use of this substance, the proposed rule would place NAG on the 503A Bulks List for topical use only.

5. Squaric Acid Dibutyl Ester (SADBE)

SADBE was evaluated for topical use in the treatment of alopecia areata and recalcitrant nongenital warts. It is well characterized physically and chemically but hydrolyzes readily in the presence of water. The adverse effects from use of SADBE are primarily related to its action as contact sensitizer. Evidence of some efficacy of SADBE in the treatment of recalcitrant nongenital warts and alopecia areata has been reported in the literature. SADBE has been used in the treatment of resistant nongenital warts and alopecia areata for 30 to 40 years. The only FDA-approved drug product indicated for the treatment of alopecia areata is intralesional injection of corticosteroid suspensions. For warts, there are no prescription drug products approved for use outside of the genital area. A variety of OTC monograph products are available containing salicylic acid at percentages varying from 17 to 40 percent.

FDA proposed to the PCAC that SADBE be included on the 503A Bulks List (Ref. 8). At its meeting on February 24, 2015, the PCAC voted to include SADBE on the list (Ref. 3). Because the supported nominations and the Agency's review were limited to the topical use of this substance, the proposed rule would place SADBE on the 503A Bulks List for topical use only.

6. Thymol Iodide

Thymol iodide was evaluated for use as a topical treatment for ulcerations and skin infections, as well as an intrapleural treatment for pleural effusions. It is well characterized physically and chemically. Reports indicate that it has been used without major complications. Literature reports some efficacy of thymol iodide for pleural effusions, which are serious and can be life-threatening conditions. Data regarding the effectiveness of thymol iodide in compounding for topical use on wounds or ulcers in various skin conditions is limited; however, these skin conditions generally are not serious or life-threatening. Thymol iodide has been in use for over 100 years. Regarding use as an antiseptic in surgery and use as an external application to wounds or ulcers in various skin conditions, approved and OTC monograph products are available. There are also FDA-approved products available to treat malignant pleural effusions.

FDA proposed to the PCAC that thymol iodide be included on the 503A Bulks List (Ref. 8). At its meeting on February 23, 2015, the PCAC voted to include thymol iodide on the list (Ref. 2). Because the supported nominations were limited to the topical use of this substance, and because pleural effusions are serious and potentially life-threatening conditions for which there are approved products available, the proposed rule would place thymol iodide on the 503A Bulks List for topical use only.

D. Substances Considered and Not Proposed for Inclusion on the 503A Bulks List

FDA is proposing that four of the bulk drug substances that it has evaluated not be included on the 503A Bulks List. Bulk drug substances that are considered for the 503A Bulks list but not placed on the list cannot be used to compound drug products that would qualify for the exemptions in section 503A. If a prescribing practitioner nevertheless believes that a patient should be treated with a drug product compounded from such a bulk drug substance, it may be possible to obtain

[4] Except where specified otherwise, ''topical use'' means for application on the skin only and does not include oral, intravaginal, or ophthalmic use.

the drug under an IND. For information about the requirements for proceeding under an IND, visit FDA's Web site at *http://www.fda.gov/Drugs/DevelopmentApprovalProcess/HowDrugsareDevelopedandApproved/ApprovalApplications/InvestigationalNewDrugINDApplication/default.htm.*

The four bulk drug substances that have been evaluated and that FDA is not proposing to place on the list, and the reasons for that proposal, are as follows:

1. Oxitriptan

Oxitriptan, also known as 5-hydroxytryptophan (5-HTP), was evaluated as a treatment for depression and insomnia. It is a hydroxylated form of a naturally occurring amino acid, tryptophan. Oxitriptan is well characterized physically and chemically. However, there are significant safety concerns related to its use. Based upon its mechanism of action, concomitant use of oxitriptan with antidepressant drugs could result in serotonin syndrome, a serious and life-threatening drug interaction. Additionally, medications used to treat depression have been linked to an increase in suicidal thinking and behavior. There are no data to suggest that oxitriptan would be free of similar risks, and compounded drugs do not include labeling that would adequately warn physicians and patients of such risks. Other potential adverse reactions include moderate gastrointestinal effects, which are common upon administration of oxitriptan.

Data supporting the efficacy of oxitriptan for depression are limited, and there is no evidence to support long-term efficacy of oxitriptan for the treatment of this chronic disease. Depression is a serious and potentially life-threatening condition, and there are multiple FDA-approved antidepressants that have been shown to be safe and effective in their approved forms that are appropriately labeled. Regarding the use of oxitriptan to treat insomnia, the clinical trials examining insomnia were too poorly designed and/or executed to assess efficacy. There are multiple FDA-approved drug products available for the treatment of insomnia. The length of time oxitriptan has been used in compounding is uncertain, although it has been discussed in scientific journals dating back approximately 40 years.

On balance, the physiochemical characteristics, the safety concerns, lack of evidence of effectiveness, and historical use of oxitriptan weigh against inclusion of this substance on the 503A Bulks List. In particular, the Agency's proposal regarding this substance is based on the seriousness of the safety concerns related to the use of oxitriptan for depression in lieu of, or causing a delay in the use of an approved product, the lack of adequate warnings that would inform patients and prescribers of the risks associated with taking an oxitriptan product, and the availability of approved drug products for the treatment of depression, a potentially life-threatening condition. FDA proposed to the PCAC that this substance not be included on the 503A Bulks List (Ref. 7). At its meeting on June 17, 2015, the PCAC voted not to include oxitriptan on the list (Ref. 4). The proposed rule would not place oxitriptan on the 503A Bulks List.

2. Piracetam

Piracetam was evaluated as a treatment for enhancing cognitive skills in treating a variety of cognitive disorders, including Alzheimer's disease. It has also been studied for treatment of coagulation disorders and vertigo. It is well characterized physically and chemically. Piracetam is approved in the United Kingdom (UK) as a prescription drug for the adjunctive treatment of cortical myoclonus. The labeling of the UK product identifies that the drug is renally excreted, that the dosage should be adjusted in the presence of renal disease, and that it is contraindicated in end-stage renal disease. Piracetam acts by multiple mechanisms to prolong bleeding time and is therefore not recommended for use by individuals with medical conditions that prolong bleeding time or that are taking concomitant anticoagulants or other medications that prolong bleeding (Ref. 9). Piracetam is not recommended for women who are pregnant, planning to become pregnant, or breastfeeding, because, according to the UK product's labeling, the drug has been shown to cross the placenta and be excreted in human milk. It is also recommended that individuals required to restrict their salt intake avoid piracetam (id.).

Piracetam was assessed for the treatment of mild cognitive impairment, a potential component of Alzheimer's disease, in a large, well-conducted, controlled clinical trial that failed to demonstrate efficacy. Studies of the efficacy of piracetam for other indications have been inconclusive, many of which were poorly designed or executed, or used flawed statistical methods to analyze the results. Piracetam's regulatory approval in the UK for the treatment of cortical myoclonus, which is not among the uses for which piracetam was nominated, was based on a single center, retrospective review of 40 patients treated with piracetam (id.). FDA-approved products are available for treatment of the conditions, and conditions related to, those for which piracetam was nominated, for example, for Alzheimer's disease, which is frequently preceded by mild cognitive impairment. Regarding historical use, piracetam has been available for approximately 40 years.

On balance, the physiochemical characteristics, safety concerns, inconclusive evidence of effectiveness, and historical use of piracetam weigh against inclusion of this substance on the list. In particular, the Agency's proposal regarding this substance is based on the limited evidence of benefit associated with piracetam, the seriousness of the conditions for which piracetam was nominated to be used, and the availability of safe and effective FDA-approved medications for many of these uses. FDA proposed to the PCAC that this substance not be included on the 503A Bulks List (Ref. 8). At its meeting on February 24, 2015, the PCAC voted not to include piracetam on the list (Ref. 3). The proposed rule would not place piracetam on the 503A Bulks List.

3. Silver Protein Mild

Silver protein mild, also known as mild silver protein, was evaluated for use as an anti-infective agent for ophthalmic use. Silver protein mild is not well characterized because the term ''silver protein mild'' is used to refer to a variety of different drug products. There are also safety concerns associated with the use of silver protein mild. It can cause argyria, which is a permanent ashen-gray discoloration of the skin, conjunctiva, and internal organs. Regarding effectiveness, silver protein mild has been found to be inferior to another treatment in clinical trials. A number of FDA-approved anti-infective agents for ophthalmic use are available and have been shown to be both safe and effective. While it has a long history of use, dating back to the early 1900s, the use of silver protein mild declined dramatically after the introduction of FDA-approved ocular anti-infectives.

On balance, the physiochemical characteristics, safety issues, questionable effectiveness, and historical use of silver protein mild weigh against inclusion of this substance on the 503A Bulks List. In particular, the Agency's proposal is based on the facts that silver protein mild is not well characterized, that in clinical trials it has been found to be inferior to another treatment and

numerically inferior to no treatment at all, and that chronic use may result in permanent discoloration of the conjunctiva, cornea, and/or lens. FDA proposed to the PCAC that this substance not be included on the 503A Bulks List (Ref. 8). At its meeting on February 23, 2015, the PCAC voted not to include silver protein mild on the list (Ref. 2). The proposed rule would not place silver protein mild on the 503A Bulks List.

4. Tranilast

Tranilast, an antiallergenic agent, was evaluated for the treatment of allergic disorders, arthritis, dry eye syndrome, keloids, and hypertrophic scars. It is approved in South Korea and Japan for the treatment of asthma, keloids, and hypertrophic scarring, and as an ophthalmic solution for allergic conjunctivitis. It is well characterized physically and chemically. However, there are significant safety concerns associated with its systemic administration. In a well-controlled clinical trial with nearly 12,000 participants (the Prevention of REStenosis with Tranilast and its Outcomes (PRESTO) Trial) (Ref. 10), tranilast was associated with significantly elevated liver enzymes (three times the upper limit of normal) in 11 percent of patients within 1 to 3 months of drug initiation, as well as anemia, renal failure, rash, and dysuria.[5] Liver toxicity is of particular concern because many of the conditions for which tranilast was nominated are chronic conditions. While there is some evidence that tranilast may be effective for allergic disorders, evidence of effectiveness for other uses is either not available or inconclusive. For allergy, arthritis, and ophthalmic indications, there are numerous FDA-approved and OTC monograph products. The length of time tranilast has been used in compounding is uncertain, although it has been discussed in scientific journals dating back approximately 40 years.

On balance, the physiochemical characteristics, safety concerns, lack of evidence of effectiveness, and historical use of tranilast weigh against inclusion of this substance on the 503A Bulks List, particularly given the seriousness of the safety concerns related to hepatotoxicity of tranilast and contraindications in pregnant and breastfeeding women, the availability of approved products for most of the proposed uses, and the lack of evidence that tranilast is effective. FDA proposed to the PCAC that this substance not be included on the 503A Bulks List (Ref. 7). However, at its meeting on June 17, 2015, the PCAC voted to include tranilast on the list for topical use only (Ref. 4).

Subsequent to that meeting, FDA reviewed the topical use of tranilast further. It obtained the label of the Japanese tranilast product, RIZABEN, but found no information on the transdermal absorption or other pharmacokinetics of tranilast when applied topically to healthy or diseased human skin (Ref. 11). The labeling of the Japanese product identifies a number of safety concerns, including a contraindication in pregnant women, especially during the first trimester of pregnancy, and in those who might be pregnant, due to evidence of teratogenicity in animal studies (id.). The labeling also states that tranilast is detected in breast milk and should be avoided by breastfeeding women. In addition, the RIZABEN label lists a drug interaction with warfarin and identifies a number of serious adverse events, particularly those that are hematologic in nature (leukopenia, thrombocytopenia, anemia, hemolytic anemia), associated with the oral use of tranilast. Safety information regarding other routes of administration is limited.

FDA also noted evidence that some increases in some liver function tests (bilirubin) are explained by tranilast inhibition of uridine diphosphate glucuronosyltransferase 1A1 (UGT1A1) especially in patients with a genotype for Gilbert's Disease. Increases in liver transaminases observed with tranilast are not typically seen with inhibition of UGT1A1. It is speculated that tranilast impairs the metabolism of drugs that are metabolized by UGT1A1. If these drugs are associated with transaminase elevations, inhibiting the drug's metabolism may lead to liver transaminitis.

As was found in the Agency's initial review and presented to the PCAC, there is no persuasive information available regarding the safety or effectiveness of topical tranilast. FDA has identified only two reports in the literature describing the efficacy and safety of tranilast administered topically for the treatment of keloids and hypertrophic scars (Refs. 12 and 13). One of those studies was an open-label trial, and the other was a case series. Between the two studies, only five patients were exposed to topical tranilast.

As stated previously, FDA has serious concerns about the safety of tranilast when administered orally. The Agency has insufficient information about the systemic absorption of topical tranilast formulations to determine whether topical administration of the drug product would present the same safety concerns. Given the lack of information available about the safety and efficacy of topical tranilast, and safety concerns related to the oral use of this product, the proposed rule would not place tranilast on the 503A Bulks List.

VI. Proposed Effective Date

The Agency proposes that any final rule based on this proposal will become effective 30 days after the date of publication of the final rule in the **Federal Register**.

VII. Analysis of Environmental Impact

FDA has determined under 21 CFR 25.30(h) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Economic Analysis of Impacts

We have examined the impacts of the proposed rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the proposed rule. We believe that this proposed rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because we find little evidence that a substantial number of small entities would be affected by the proposed rule or that the economic impact on each affected small entity would be significant, we propose to certify that the proposed rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to

[5] During the PCAC meeting on June 17, 2015, the PRESTO trial was criticized by one of the tranilast nominators as having insufficiently accounted for the medical history of the subjects, among other things (see Ref. 4). To the contrary, the five-arm trial design appears to have been properly controlled for the patients' various medical conditions, and signals of liver toxicity were consistent across arms (see Ref. 10).

prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year.'' The current threshold after adjustment for inflation is $146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. This proposed rule would not result in an expenditure in any year that meets or exceeds this amount.

The Economic Analysis of Impacts of the proposed rule performed in accordance with Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act, and the Unfunded Mandates Reform Act is available at *http://www.regulations.gov* under the docket number for this proposed rule (Ref. 14) and at *http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm.* We invite comments on this analysis.

A. Summary of the Costs of the Rule

We lack data on the scope of the current use of the affected bulk drug substances and the number of firms that would be affected by the rule. Without this information, we cannot quantify the total potential costs of the proposed rule. Potential costs include administrative costs, additional costs for consumers and payers if alternative therapies are more costly than the affected compounded drug products, and a potential loss of producer surplus if producers use additional resources in response to the rule. We estimate that each affected firm would spend 1 to 2 hours on administrative costs to read and understand the rule. The average hourly wage for a pharmacist in 2014 equals about $57, or $114 including 100 percent overhead. Thus, each affected firm would incur administrative costs that range from $118 to $235. We request comment on the potential costs and number of firms affected by the proposed rule.

B. Summary of the Benefits of the Rule

The benefits of the rule are unquantified. We include a qualitative discussion of potential benefits. For consumers who switch to more effective treatments, there would be benefits as consumers experience better health outcomes than they do currently.

C. Summary of the Impact on Small Entities

The Regulatory Flexibility Act requires a Regulatory Flexibility Analysis (RFA) unless the Agency can certify that the proposed rule would have no significant impact on a substantial number of small entities. The Small Business Administration (SBA) establishes thresholds for small entities by North American Industry Classification System (NAICS); the SBA considers small any entity below these thresholds. Firms affected by the proposed rule would fall into three major industries, NAICS 325412 Pharmaceutical Preparation Manufacturing, NAICS 424210 Drugs and Druggists' Sundries Merchant Wholesalers, and NAICS 446110 Pharmacies and Drug Stores. The thresholds for these industries are 750 employees for NAICS 325412, 100 employees for NAICS 424210, and annual sales of $27.5 million for NAICS 446110.

We lack data on the number or size of manufacturers, wholesalers, and compounding pharmacies that would be affected by the proposed rule. Moreover, we find little evidence of widespread use of four bulk drug substances not proposed for inclusion on the 503A Bulks List. This suggests that the impact of the rule would likely not be significant on small entities. Because we find little evidence that a substantial number of small entities would be affected by the proposed rule or that the economic impact on each affected small entity would be significant, we believe that the proposed rule would not have a significant economic impact on a substantial number of small entities, but the impacts are uncertain. We request detailed comments and data on the number of small entities that would be affected by the proposed rule, as well as data on the economic impact of the proposed rule on these small entities.

IX. Paperwork Reduction Act of 1995

The submission of comments on this proposed rule would be submissions in response to a **Federal Register** notice, in the form of comments, which are excluded from the definition of ''information'' under 5 CFR 1320.3(h)(4) of Office of Management and Budget regulations on the Paperwork Reduction Act (*i.e.,* facts or opinions submitted in response to general solicitations of comments from the public, published in the **Federal Register** or other publications, regardless of the form or format thereof, provided that no person is required to supply specific information pertaining to the commenter, other than that necessary for self-identification, as a condition of the Agency's full consideration of the

comment). The proposed rule contains no other collection of information.

X. Federalism

We have analyzed this proposed rule in accordance with the principles set forth in Executive Order 13132. We have determined that the proposed rule, if finalized, would not contain policies that would have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, we conclude that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

14. Economic Analysis of Impacts.

List of Subjects in 21 CFR Part 216

Drugs, Prescription drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, the Food and Drug Administration proposes to amend 21 CFR part 216 as follows:

PART 216—HUMAN DRUG COMPOUNDING

■ 1. The authority citation for part 216 is revised to read as follows:

Authority: 21 U.S.C. 351, 352, 353a, 353b, 355, and 371.

■ 2. The heading for part 216 is revised to read as set forth above.

■ 3. Section 216.23 is added to read as follows:

§ 216.23 Bulk drug substances that can be used to compound drug products in accordance with section 503A of the Federal Food, Drug, and Cosmetic Act.

(a) The following bulk drug substances can be used in compounding under section 503A(b)(1)(A)(i)(III) of the Federal Food, Drug, and Cosmetic Act.

Brilliant Blue G, also known as Coomassie Brilliant Blue G–250.

Cantharidin (for topical use only).

Diphenylcyclopropenone (for topical use only).

N-acetyl-D-glucosamine (for topical use only).

Squaric acid dibutyl ester (for topical use only).

Thymol iodide (for topical use only).

(b) After balancing the criteria set forth in paragraph (c) of this section, FDA has determined that the following bulk drug substances will not be included on the list of substances that can be used in compounding set forth in paragraph (a) of this section:

Oxitriptan.

Piracetam.

Silver Protein Mild.

Tranilast.

(c) FDA will use the following criteria in evaluating substances considered for inclusion on the list set forth in paragraph (a) of this section:

(1) The physical and chemical characterization of the substance;

(2) Any safety issues raised by the use of the substance in compounded drug products;

(3) The available evidence of the effectiveness or lack of effectiveness of a drug product compounded with the substance, if any such evidence exists; and

(4) Historical use of the substance in compounded drug products, including information about the medical condition(s) the substance has been used to treat and any references in peer-reviewed medical literature.

(d) Based on evidence currently available, there are inadequate data to demonstrate the safety or efficacy of any drug product compounded using any of the drug substances listed in paragraph (a) of this section, or to establish general recognition of the safety or effectiveness of any such drug product. Any person who represents that a compounded drug made with a bulk drug substance that appears on this list is FDA approved, or otherwise endorsed by FDA generally or for a particular indication, will cause the drug to be misbranded under section 502(a) and/or 502(bb) of the Federal Food, Drug, and Cosmetic Act.

Dated: December 9, 2016.

Leslie Kux,

Associate Commissioner for Policy.

[Docket No. FR–5848–P–01]

RIN 2502–AJ37

Manufactured Housing Program: Minimum Payments to the States

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the minimum payments to states approved as State Administrative Agencies (SAAs) under the National Manufactured Housing Construction and Safety Standards Act of 1974 in order to provide for a more equitable guarantee of minimum funding from HUD's appropriation for this program and to avoid the differing per unit payments to the states that have occurred under the present rule. This rule would base the minimum payments to states upon their participation in the production or siting of new manufactured homes, including for new manufactured homes both produced and sited in the same state.

DATES: *Comment Due Date:* February 14, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0500. Communications must refer to the above docket number and title. There are two methods for submitting public comments. All submissions must refer to the above docket number and title.

1. *Submission of Comments by Mail.* Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0500.

2. *Electronic Submission of Comments.* Interested persons may submit comments electronically through the Federal eRulemaking Portal at *http://www.regulations.gov.* HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the *http://www.regulations.gov* Web site can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the rule.

No Facsimile Comments. Facsimile (fax) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m., weekdays, at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at (202) 402–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service, toll-free, at (800) 877–8339. Copies of all comments submitted are available for inspection and downloading at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Pamela Beck Danner, Administrator, Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 Seventh Street SW., Room 9168, Washington, DC 20410; telephone 202–708–6423. (This is not a toll-free number.) Individuals with speech or hearing impairments may access this number through TTY by calling the toll free Federal Information Relay Service at 1–800–877–8389.

SUPPLEMENTARY INFORMATION:

I. Background

On August 13, 2002 (67 FR 52832), HUD published a final rule that, among other things, established minimum payments to the states participating in the Manufactured Housing Program as an SAA. HUD's August 13, 2002, final rule was issued in accordance with section 620(e)(3) of the National Manufactured Housing Construction and Safety Standards Act of 1974 (42 U.S.C. 5401–5426) (the Act), as amended.[1] In that rule, HUD determined to pay each state that, on December 27, 2000, had a fully approved state plan an amount not less than the amount paid to that state for the 12 months ending on December 26, 2000. HUD codified this rule at 24 CFR 3284.10.

On March 1, 2004 (69 FR 9740), HUD published a proposed rule to revise the minimum payments to SAAs in order to provide for a more equitable guarantee of minimum funding from HUD's appropriation for this program. Specifically, HUD proposed basing minimum payment to states on their participation in the production or siting of new manufactured homes. In explaining the reasons for its March 2004, rule, HUD stated that the August 13, 2002, rule resulted in inequitable payments between states fully approved as of December 27, 2000, and states that were not fully approved (including conditionally approved states) as of that date, and resulted in some states receiving more funding than other states for each unit of manufactured housing produced or sited in the state. In this regard, HUD explained that State A, a fully approved state in which the production and siting level had decreased by 30 percent since the rule's base year of 2000, would effectively receive a total of $16.50 (1,000 units received in 2000 × $11.50 divided by 700 units based on 30 percent reduction) per unit sited and produced in the state because that payment represented a pro rata portion of the inflated base year amount. State B, on the other hand, in which production and siting had remained steady or had increased, but which was not a fully approved state, would only be paid a total of $11.50 per unit sited and produced in State B (with no adjustment for reduced production levels) as provided by § 3282.307. HUD concluded that while it expected some inequity in payments under the August 2002 rule, it believed that the minimum fee was based on production levels that were low enough to establish a reasonable minimum payment to each approved state. HUD was not expecting, however, the extent of the imbalances that resulted from the rule. Nevertheless, HUD did not finalize the March 2004 proposed rule.

On May 2, 2014 (79 FR 25035), HUD published a proposed rule to revise the amount of the fee collected from manufacturers in accordance with section 620 of the Act. In response to HUD's proposed rule, several commenters stated that the fees paid to SAAs are not reflective of current production and shipment levels. HUD responded to these comments by stating

[1] Section 620(e)(3) of the Act provides, ''On or after the effective date of the Manufactured Housing Improvement Act of 2000 (December 27, 2000), the Secretary shall continue to fund the States having approved State plans in the amounts which are not less than the allocated amounts, based on the fee distribution system in effect on the day before such effective date.''

that it would review revisions to the current fee distribution formula to ensure that states are provided with adequate funding to perform the required SAA function. (See, 79 FR 47373, August 13, 2014).

HUD agrees that it should establish a more equitable distribution of funds. As a result, HUD is proposing to implement section 620 of the Act by establishing a formula that bases the amount paid to a state on the state's participation in the production or siting of new manufactured homes while ensuring a cumulative payment based on the amount a state received in Fiscal Year (FY) 2014, which is at least the same amount that each fully approved state received as of December 27, 2000, the date of enactment of the statute.

II. HUD Consultation With SAAs and Manufactured Housing Consensus Committee (MHCC)

HUD has worked with its partner SAAs and the MHCC to develop this proposal. In 2015, HUD elicited comments from both its partner SAAs and the MHCC on how to more equitably distribute fees among the states. At its August 2015 meeting, the MHCC considered a formula of $9.00 per transportable section located in a state, and $14.00 per transportable section manufactured in a state. Under this formula, whether a state was fully or conditionally approved would cease to affect funding. Additionally, the formula would provide that amounts states receive would not decrease below that received during FY 2014.

The MHCC unanimously referred that proposal to its Regulatory Subcommittee. At the January 2016 MHCC meeting, the Regulatory Subcommittee recommended approval of this proposal to the full MHCC. Subsequently, the entire MHCC recommended adoption of the above mentioned proposal. As a result, HUD proposes revising payments to states consistent with that proposal through this rule.

III. This Proposed Rule

HUD proposes to amend § 3282.307(b) to increase the amount paid to both fully approved and conditionally approved states for each transportable section of new manufactured housing that is produced in that state. Under HUD's proposal, § 3282.307(b) would be revised to allow for payments to states of (1) $9.00 for each transportable section of new manufactured housing that is located in that state, and (2) $14.00 for each transportable section of new manufactured housing that is produced in that state. These increased levels reflect the respective levels of responsibility of states.

HUD is also proposing to revise § 3284.10 to ensure participating states (regardless of approval status before December 27, 2000) receive a funding level no less than the cumulative amount that state received in FY 2014. HUD's approach in revising § 3284.10 builds on § 3282.307(b) which provides for distribution of a portion of the monitoring inspection fees among both fully approved and conditionally approved states. These payments have been in effect for over 20 years and are currently paid to all participating states. As a result, under HUD's proposed rule, all states receiving amounts allocated from the fees collected from manufacturers will continue to be paid amounts at least equivalent to those received in FY 2014. These proposed funding levels would also meet or exceed the allocated amounts, paid to fully approved states, based on the fee distribution system in effect on December 27, 2000, in accordance with 620(e)(3) of the Act.

In addition to being more equitable for the participating states, HUD believes that this proposed method of implementing the statutory requirement concerning minimum payments to the states would simplify the related administrative burdens of HUD and the states. For many years, HUD and the states have been making and receiving payments based on whether that state's program was fully or conditionally approved on December 27, 2000. Under this proposal, payments would continue to be made to all participating states, regardless of whether they are fully or conditionally approved, using a similar system under which HUD and the states have been operating for years. The proposed revised implementation of the statutory provision on minimum payments is similar to the same methodology used for compliance with § 3282.307. As a result, the revised approach should not require any new payment or accounting structures and states should be able to seamlessly implement the statutory requirement.

This new method of determining state payments would also largely eliminate the need for a year-end supplemental payment to states. Based on current production levels, most states would meet or exceed their FY 14 manufacturing and location levels. As a result, HUD believes that funding to states under this proposal would be more consistent, and more closely linked to their production and location levels.

As stated in this preamble, whether a state was fully or conditionally approved on December 27, 2000 would cease to be a factor in determining SAA funding. Rather, all states, including states with fully approved state plans as of December 27, 2000, would continue to receive at least the same cumulative payment they received for FY 2014. That cumulative payment is at least the same amount that each fully approved state received as of December 27, 2000, the date of enactment of the statute.

HUD developed this proposal while conservatively estimating manufactured housing production growth of 5 percent per annum. In recent years, manufactured housing growth has exceeded this 5 percent threshold.[2] Based on these projections, HUD estimates that states that have levels of production above their 2000 levels will receive more funding reflecting both their higher production and the greater responsibilities of SAAs in manufacturing states. However, based on the fee distribution formula being proposed in this rulemaking, no state which was approved prior to December 27, 2000, will see a decrease in funding, even if production levels remain below those from 2000. Based on a conservative estimate of 5 percent annual growth, and given this rule's guarantee of FY14 funding levels, no state, even those not fully approved prior to December 27, 2000, would see a decrease in funding.

IV. Specific Issues for Comment

To assist in HUD's development of this proposed rule, HUD is soliciting comments on certain features of its proposed rule. Therefore, in addition to commenting on the specific provisions of this proposed rule, HUD invites comment on the following questions and any other related matters or suggestions:

1. In determining a revised equitable fee distribution formula, what methods and data should HUD consider to increase the amounts paid to the states? For example, should HUD rely on the past three years or more of fee income data received by both fully approved and conditionally approved states in assessing the amount of the increase of the payment to each SAA?

2. Should fully approved states be entitled to higher levels of payments than conditionally approved SAAs? In addition to the number of home placements and production levels in each state, should the increase in payment consider the number of

[2] More information on Manufactured Housing production levels may be obtained via the Web site of the Manufactured Housing Institute, available at *http://www.manufacturedhousing.org/reports/*.

complaints handled by each SAA for the past three years in determining the amount of the increase (HUD would need each SAA to provide a list of all complaints handled over the past three years)?

3. Should HUD revise 24 CFR 3282.307(b) to allow the amount of the distribution of fees among the states to be established by Notice in order to more timely address changes or fluctuations in production levels, in order to assure that the states are adequately funded for the inspections and work they perform?

V. Findings and Certifications

Executive Order 12866 and Executive Order 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and, therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are ''outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned. Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. This proposed rule was determined to not be a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and therefore was not reviewed by OMB.

Impact on Small Entities

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This rule will affect only states that participate in the manufactured housing program, and will have a negligible economic impact. Notwithstanding HUD's determination that this rule will not have a significant economic impact on a substantial number of small entities, HUD specifically invites comments regarding any less burdensome alternatives to this rule that will meet HUD's program responsibilities.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538)(UMRA) establishes requirements for federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments and the private sector. This proposed rule does not impose any federal mandates on any state, local, or tribal governments or the private sector within the meaning of the UMRA.

Environmental Impact

In accordance with 24 CFR 50.19(c)(6) of the HUD regulations, this rule sets forth fiscal requirements which do not constitute a development decision that affects the physical condition of specific project areas or building sites, and therefore is categorically excluded from the requirements of the National Environmental Policy Act and related federal laws and authorities.

Federalism Impact

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either (1) imposes substantial direct compliance costs on state and local governments and is not required by statute, or (2) the rule preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

List of Subjects

24 CFR Part 3282

Manufactured home procedural and enforcement regulations, Administrative practice and procedure, Consumer protection, Intergovernmental relations, Investigations, Manufactured homes, Reporting and recordkeeping requirements.

24 CFR Part 3284

Consumer protection, Intergovernmental relations, Manufactured homes.

Accordingly, for the reasons discussed in this preamble, HUD proposes to amend 24 CFR parts 3282 and 3284 as follows:

PART 3282—MANUFACTURED HOME PROCEDURAL AND ENFORCEMENT REGULATIONS

■ 1. The authority citation for part 3282 continues to read as follows:

Authority: 28 U.S.C. 2461 note; 42 U.S.C. 3535(d) and 5424.

■ 2. Revise § 3282.307(b) to read as follows:

§ 3282.307 Monitoring inspection fee establishment and distribution.

* * * * *

(b) The monitoring inspection fee shall be paid by the manufacturer to the Secretary or to the Secretary's Agent, who shall distribute a portion of the fees collected from all manufactured home manufacturers among the approved and conditionally-approved States in accordance with an agreement between the Secretary and the States and based upon the following formula:

(1) $9.00 of the monitoring inspection fee collected for each transportable section of each new manufactured housing unit that, after leaving the manufacturing plant in another State, is first located on the premises of a retailer, distributor, or purchaser in that state; plus

(2) $14.00 of the monitoring inspection fee collected for each transportable section of each new manufactured housing unit produced in a manufacturing plant in that State.

* * * * *

PART 3284—MANUFACTURED HOUSING PROGRAM FEE

■ 3. The authority citation for 24 CFR Part 3284 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 5419, and 5424.

■ 4. Revise § 3284.10 to read as follows:

§ 3284.10 Minimum payments to states.

For every State that has a State plan fully or conditionally approved pursuant to § 3282.302 of this chapter, HUD will pay such State annually a total amount that is the greater of either the amount of cumulative payments that State received between October 1, 2013 and September 30, 2014; or the total amount determined by adding:

(a) $9.00, if after leaving the manufacturing plant, for every transportable section that is first located on the premises of a retailer, distributor, or purchaser in that State after leaving the manufacturing plant (or $0, if it is not) during the year for which payment is received; and

(b) 14.00 for every transportable section that is produced in a manufacturing plant in that State (or $0,

if it is not) during the year for which payment is received.

Dated: November 17, 2016.

Edward L. Golding,

Principal Deputy Assistant Secretary for Housing.

33 CFR Part 117

[Docket No. USCG–2016–0988]

RIN 1625–AA09

Drawbridge Operation Regulation; Detroit River (Trenton Channel), Grosse Ile, MI

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to add permanent winter hours to the operating schedule of the Grosse Ile Toll Bridge (Bridge Road) at mile 8.8, over Trenton Channel at Grosse Ile, MI. A review of the current regulation was requested by the Grosse Ile Bridge Company, the owner of the Grosse Ile Toll Bridge (Bridge Road).

DATES: Comments and related material must reach the Coast Guard on or before: January 17, 2017.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0988 using Federal eRulemaking Portal at *http://www.regulations.gov.*

See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Mr. Lee D. Soule, Bridge Management Specialist, Ninth Coast Guard District; telephone 216–902–6085, email *Lee.D.Soule@uscg.mil.*

§ Section
U.S.C. United States Code

II. Background, Purpose and Legal Basis

This proposed rule was requested by the Grosse Ile Bridge Company, the owner of the Grosse Ile Toll Bridge (Bridge Road) to align drawbridge operating schedules with the Wayne County Highway Bridge (Grosse Ile Parkway) Bridge at mile 5.6, at Grosse Ile. The Grosse Ile Highway Bridge is authorized to remove drawtenders and open the drawbridge if at least 12-hours advance notice is provided from December 15 through March 15 each year. This proposed rule will make the current regulation easier to follow for the mariners that use the river system. The Grosse Ile Toll Bridge (Bridge Road) was not granted permanent winter hours in the past due to regular commercial traffic that required bridge openings during the winter months. Over the past two winter seasons the commercial traffic has been reduced significantly and waterway use through this drawbridge is equivalent to the volume and type of traffic that passes through the Wayne County Highway (Grosse Ile Parkway) Bridge that has had permanent winter hours for approximately 10 years. Mariners will still be able to request bridge openings with advance notice during times of light traffic volume on the river, which is due to ice formation on the Detroit River that typically prevents most vessel traffic from navigation in the channel from December 15 through March 15 each year. Additionally, Commander, Ninth Coast Guard District has granted annual authorization to the owner/operator of the Grosse Ile Toll Bridge to assume the same schedule during the past 10 years under authority granted in 33 CFR 117.35.

III. Discussion of Proposed Rule

Currently, the regulation for Grosse Ile drawbridges (33 CFR 117.631) includes the operating schedule for the Grosse Ile Toll Bridge (Bridge Road) and the Wayne County Highway Bridge (Grosse Ile Parkway) Bridge at mile 5.6, both at Grosse Ile, MI. The purpose of this proposed rule is to establish the same permanent 12-hours advance notice for both bridges on the waterway from December 15 through March 15 each year. The only change in this proposed rule is to allow a permanent requirement for 12-hours advance notice during the winter months when ice typically prevents recreational navigation in the channel. At all times both bridges will be required to open as soon as possible for public vessels of the United States, State or local government vessels used for public safety, and vessels in distress.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders and discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This NPRM has not been designated a ''significant regulatory action,'' under executive order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the ability that vessels can still transit the bridge given advanced notice during times when vessel traffic is at its lowest. The proposed winter drawbridge schedule for the Grosse Ile Toll Bridge (Bridge Street) would be the same as the Wayne County Highway Bridge (Grosse Ile Parkway) Bridge.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section IV.A above this proposed rule standardizes drawbridge schedules for both drawbridges on the waterway and would not have a significant economic impact on any vessel owner or operator because the bridges will open with advance notice during low traffic times on the waterway, or when ice conditions hinder normal navigation.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section, above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in executive order 13132.

Also, this proposed rule does not have tribal implications under executive order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This proposed rule simply promulgates the operating regulations or procedures for drawbridges. Normally such actions are categorically excluded from further review, under figure 2–1, paragraph (32)(e), of the Instruction.

Under figure 2–1, paragraph (32)(e), of the Instruction, an environmental analysis checklist and a categorical exclusion determination are not required for this rule. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this notice, and all public comments, are in our online docket at *http://www.regulations.gov* and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to revise 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 0170.1.

■ 2. In § 117.631, revise paragraph (a) to read as follows:

§ 117.631 Detroit River (Trenton Channel).

(a) The draw of the Grosse Ile Toll Bridge (Bridge Road), mile 8.8, at Grosse Ile, shall operate as follows:

(1) From March 16 through December 14—

(i) Between the hours of 7 a.m. and 11 p.m., seven days a week and holidays, the draw need open only from three minutes before to three minutes after the hour and half-hour for pleasure craft; for commercial vessels, during this period of time, the draw shall open on signal as soon as possible.

(ii) Between the hours of 11 p.m. and 7 a.m., the draw shall open on signal for pleasure craft and commercial vessels.

(2) From December 15 through March 15, no bridge tenders are required to be on duty at the bridge and the bridge shall open on signal if at least a twelve-hour advance notice is given.

Rear Admiral, U.S. Coast Guard, Commander, Ninth Coast Guard District.

[FR Doc. 2016–30342 Filed 12–15–16; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52 and 81

[EPA–HQ–OAR–2016–0515; FRL–9956–20–OAR]

RIN 2060–AT24

Determinations of Attainment by the Attainment Date, Determinations of Failure To Attain by the Attainment Date and Reclassification for Certain Nonattainment Areas for the 2006 24-Hour Fine Particulate Matter National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing determinations of attainment by the attainment date and determinations of failure to attain by the attainment date for eleven areas currently classified as ''Moderate'' for the 2006 24-hour fine particulate matter ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS). Specifically, the EPA is proposing to determine that seven areas attained the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015, based on complete, quality-assured and certified $PM_{2.5}$ monitoring data for 2013–2015. The EPA is also proposing to determine that four areas failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015. Upon finalization of such determinations of failure to timely attain the NAAQS, these four areas will be reclassified as ''Serious'' for the 2006 24-hour $PM_{2.5}$ NAAQS by operation of law. Within 18 months from the effective date of reclassification, or 2 years before the applicable Serious area attainment date, whichever is earlier, states with jurisdiction over these areas must submit State Implementation Plan (SIP) revisions that comply with the statutory and regulatory requirements for Serious $PM_{2.5}$ nonattainment areas.

DATES: Comments must be received on or before January 17, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2016–0515, at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Ms. Leigh Herrington, Office of Air Quality Planning and Standards, Air Quality Policy Division, Mail code C539–01, Research Triangle Park, NC 27711, telephone (919) 541–0882; fax number: (919) 541–5315; email address: *herrington.leigh@epa.gov.*

SUPPLEMENTARY INFORMATION: This preamble is organized as follows:

I. General Information

A. Does this action apply to me?

Entities potentially affected by this action include states (typically state air pollution control agencies) and, in some cases, tribal governments. In particular, seven states [1] with one or more areas designated nonattainment and classified as ''Moderate'' for the 2006 24-hour $PM_{2.5}$ NAAQS are affected by this action. Entities potentially affected indirectly by this proposal include owners or operators of sources of emissions of direct $PM_{2.5}$ or $PM_{2.5}$ precursors (ammonia, nitrogen oxides, sulfur dioxide and volatile organic compounds) that contribute to fine particulate levels within the designated nonattainment areas the EPA is addressing in this action.

B. What should I consider as I prepare my comments for the EPA?

1. Submitting CBI. Do not submit this information to the EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be confidential business information (CBI). For CBI information in a disk or CD–ROM that you mail to the EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed to be CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for Preparing Your Comments. When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

[1] Alaska, Arizona, California, Idaho, Pennsylvania, Tennessee and Utah.

• Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

• Describe any assumptions and provide any technical information and/or data that you used.

• If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

• Provide specific examples to illustrate your concerns, and suggest alternatives.

• Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

• Make sure to submit your comments by the comment period deadline identified.

C. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this notice will be posted at *https://www.epa.gov/pm-pollution/particulate-matter-pm-implementation-regulatory-actions.*

D. What information should I know about a possible public hearing?

To request a public hearing or information pertaining to a public hearing on this document, contact Ms. Pamela Long at (919) 541–0641 before 5 p.m. on January 3, 2017. If requested, further details concerning a public hearing for this proposed rule will be published in a separate **Federal Register** notice. For updates and additional information on a public hearing, please check the EPA's Web site for this rulemaking at *https://www.epa.gov/pm-pollution/particulate-matter-pm-implementation-regulatory-actions.*

II. Summary of Proposal and Background

A. Summary of Proposal

Clean Air Act (CAA) section 188(b)(2) requires the EPA to determine whether any $PM_{2.5}$ nonattainment area classified as ''Moderate'' attained the relevant $PM_{2.5}$ standard by the area's attainment date, and requires EPA to make such determination within 6 months after that date.[2] The CAA requires that a Moderate area that has not attained the standard by the relevant attainment date be reclassified to ''Serious.'' The 2006 24-hour $PM_{2.5}$ NAAQS are met when the 24-hour $PM_{2.5}$ NAAQS design value at each eligible monitoring site is less than or equal to 35 micrograms per cubic meter ($\mu g/m^3$), as explained in Section III of this rulemaking action.

In this notice, the EPA is proposing to find that seven Moderate areas attained the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015, which is the applicable attainment date for these areas. This finding is based on complete, quality-assured and certified $PM_{2.5}$ monitoring data for the 3-year period of 2013–2015.[3] The seven areas are: (1) Chico, California; (2) Imperial County, California; [4] (3) Knoxville-Sevierville-La Follette, Tennessee; (4) Liberty-Clairton, Pennsylvania; (5) Nogales, Arizona; (6) Sacramento, California; and, (7) San Francisco Bay Area, California. The EPA is also proposing to find that four Moderate areas failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015: (1) Fairbanks, Alaska; (2) Logan, Utah-Idaho; (3) Provo, Utah; and, (4) Salt Lake City, Utah. As required by CAA section 188(b)(2), upon finalization of the EPA's determinations that these areas failed to attain, these four areas will be reclassified to Serious by operation of law and will be subject to all applicable Serious area attainment planning and nonattainment New Source Review (NNSR) requirements. Under CAA section 188(b)(2) and the EPA's final rule, titled ''Fine Particulate Matter National Ambient Air Quality Standards: State Implementation Plan Requirements'' (81 FR 58010, August 24, 2016), a state is required to make a SIP submission to address the statutory and regulatory requirements for any newly reclassified Serious area within 18 months from the effective date of reclassification, or 2 years before the attainment date, whichever is earlier, and will be required to demonstrate that the area will attain the standard as expeditiously as practicable, but in this case no later than December 31, 2019, which is the end of the tenth calendar year following the effective date of designation of the area.

The EPA also notes that CAA section 188(d) provides a mechanism by which a state may request, and the EPA may grant, a 1-year extension of an area's attainment date if the state meets certain criteria. While the state of Idaho submitted a request for a 1-year attainment date extension for the Logan, Utah-Idaho multi-state nonattainment area, the agency has determined that the state did not meet the criteria for a Moderate area 1-year attainment date extension provided in CAA section 188(d), as explained more fully later. Accordingly, the EPA is including the Logan, Utah-Idaho nonattainment area in its list of areas for a proposed finding of failure to attain by December 31, 2015.

Table 1 provides a summary of the EPA's proposed findings that would apply to these eleven areas.

TABLE 1—2006 24-HOUR $PM_{2.5}$ NAAQS: SUMMARY OF PROPOSED FINDINGS FOR ELEVEN MODERATE NONATTAINMENT AREAS

2006 24-hour $PM_{2.5}$ NAAQS nonattainment area	2013–2015 Design value ($\mu g/m^3$)	2006 24-hour $PM_{2.5}$ NAAQS status
Chico, California	29	Attained.
Fairbanks, Alaska	124	Did not attain.
Imperial County, California	33	Attained.
Knoxville-Sevierville-La Follette, Tennessee	20	Attained.
Liberty-Clairton, Pennsylvania	33	Attained.

[2] An area's highest design value for the 24-hour $PM_{2.5}$ NAAQS is the highest of the 3-year average of annual 98th percentile 24-hour average $PM_{2.5}$ mass concentration values recorded at each eligible monitoring site (40 CFR part 50, Appendix N, 1.0(c)(2)).

[3] According to 40 CFR part 50, Appendix N, 3.0(a), ''data not certified by the reporting organization can nevertheless be used, if the deadline for certification has passed and EPA judges the data to be complete and accurate.''

[4] The EPA notes that 2013–2015 monitoring data indicate that the Imperial County, California nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. Prior to 2013, the EPA requested that the California Air Resources Board and Imperial County Air Pollution Control District increase sampling frequency at the monitor from 1 in 3 days to daily, but CARB and ICAPCD did not start daily sampling until 2014. This does not affect the validity of the design value because daily sampling was not required under the monitoring regulations that applied at the time. Further, a separate calculation based on daily sampling data collected in 2013 at a collocated non-regulatory monitor yields a similar 98th percentile value for 2013 as the primary regulatory monitor. *See* Memo from Michael Flagg, U.S. EPA, Region IX, Air Quality Analysis Office, ''Implementation of $PM_{2.5}$ sampling frequency requirements in Imperial County,'' November 1, 2016. This memo is within the rulemaking docket.

TABLE 1—2006 24-HOUR $PM_{2.5}$ NAAQS: SUMMARY OF PROPOSED FINDINGS FOR ELEVEN MODERATE NONATTAINMENT AREAS—Continued

2006 24-hour $PM_{2.5}$ NAAQS nonattainment area	2013–2015 Design value ($\mu g/m^3$)	2006 24-hour $PM_{2.5}$ NAAQS status
Logan, Utah-Idaho	*50	Did not attain.
Nogales, Arizona	28	Attained.
Provo, Utah	*49	Did not attain.
Sacramento, California	35	Attained.
Salt Lake City, Utah	*45	Did not attain.
San Francisco Bay Area, California	30	Attained.

*Data submitted to the EPA's National Air Quality System (AQS) by the Utah Department of Environmental Quality for the period 2013–2015 are incomplete, meaning there are fewer than 75 percent of the necessary data required for completion. However, the valid data provided by the state and submitted to AQS for 2013–2015 show a design value greater than 35 $\mu g/m^3$. The EPA's regulations governing the use of air quality data for regulatory purposes, located at 40 CFR part 50, Appendix N 4.2(b), specify that 24-hour $PM_{2.5}$ design values derived from less than complete data are valid if greater than the level of the standard. The EPA is thus basing this proposal on its determination that sufficient data exist to make findings of failure to attain and reclassifications for all Utah nonattainment areas. The EPA calculated the design values for these areas using the available $PM_{2.5}$ Federal Reference Method (FRM) data in AQS as of September 21, 2016. These design values may change as data validation efforts to include additional monitoring data are completed by Utah. A memo describing the agency's treatment of these data, titled ''Utah $PM_{2.5}$ 2013–2015 24-hour Design Concentrations Memo,'' is included in the docket for this rulemaking.

B. What is the background for this proposed action?

This proposed action relates to the ongoing efforts of states and the EPA to implement the $PM_{2.5}$ NAAQS. Since the EPA's initial promulgation of the NAAQS to address fine particles, there have been significant rulemaking and litigation developments that affect these ongoing efforts. In order to clarify the proper application of the statutory and regulatory requirements to this action, the EPA is providing a fuller explanation of the evolving implementation efforts.

On July 18, 1997, the EPA established the first NAAQS for $PM_{2.5}$ (the 1997 $PM_{2.5}$ NAAQS), including an annual standard of 15.0 $\mu g/m^3$ based on a 3-year average of annual mean $PM_{2.5}$ concentrations, and a 24-hour (or daily) standard of 65 $\mu g/m^3$ based on a 3-year average of the 98th percentile of 24-hour concentrations (62 FR 38652). The EPA established the 1997 $PM_{2.5}$ NAAQS based on significant evidence and numerous health studies demonstrating the serious health effects associated with exposures to $PM_{2.5}$. To provide guidance on the CAA requirements for state and tribal implementation plans to implement the 1997 $PM_{2.5}$ NAAQS, the EPA promulgated the ''Final Clean Air Fine Particle Implementation Rule'' (72 FR 20586, April 25, 2007) (hereinafter, the ''2007 $PM_{2.5}$ Implementation Rule''). The Natural Resources Defense Council (NRDC) subsequently filed a petition for review challenging certain aspects of this rule.

On October 17, 2006, the EPA strengthened the 24-hour $PM_{2.5}$ NAAQS by revising it to 35 $\mu g/m^3$ and retained the level of the annual $PM_{2.5}$ standard at 15.0 $\mu g/m^3$ (71 FR 61144). Following promulgation of a new or revised NAAQS, the EPA is required by the CAA to promulgate designations for areas throughout the U.S. in accordance with section 107(d)(1) of the CAA. On November 13, 2009, the EPA designated 31 areas across the U.S. with respect to the revised 2006 24-hour $PM_{2.5}$ NAAQS (74 FR 58688), requiring states to prepare and submit attainment plans to meet those NAAQS. At the time of those designations, the states and the EPA were operating under the interpretations of the CAA set forth in the 2007 $PM_{2.5}$ Implementation Rule, which covered issues such as the timing of attainment plan submissions, the content of attainment plan submissions, and the relevant attainment dates.

On March 2, 2012, the EPA issued its ''Implementation Guidance for the 2006 Fine Particulate ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS)'' to provide guidance to states on the development of attainment plans to demonstrate attainment with the 2006 24-hour $PM_{2.5}$ NAAQS (''March 2012 Implementation Guidance''). This guidance largely instructed states to rely on the 2007 $PM_{2.5}$ Implementation Rule in developing SIPs to demonstrate attainment of the 2006 24-hour $PM_{2.5}$ NAAQS.

On January 4, 2013, the U.S. Court of Appeals for the D.C. Circuit issued its decision with regard to the challenge by the NRDC to the EPA's 2007 $PM_{2.5}$ Implementation Rule. In *NRDC* v. *EPA,*[5] the court held that the EPA erred in implementing the 1997 $PM_{2.5}$ NAAQS pursuant only to the general implementation requirements of subpart 1, rather than also to the implementation requirements specific to particulate matter (PM_{10}) in subpart 4, part D of title I of the CAA (''subpart 4''). The court reasoned that the plain meaning of the CAA requires implementation of the 1997 $PM_{2.5}$ NAAQS under subpart 4 because $PM_{2.5}$ particles fall within the statutory definition of PM_{10} and thus implementation of the $PM_{2.5}$ NAAQS is subject to the same statutory requirements as the PM_{10} NAAQS. The court remanded the rule and instructed the EPA ''to repromulgate these rules pursuant to Subpart 4 consistent with this opinion.'' [6]

As a result of the *NRDC* v. *EPA* decision, the EPA withdrew its March 2012 Implementation Guidance for implementation of the 2006 24-hour $PM_{2.5}$ NAAQS. In so doing, the EPA advised states that the statutory requirements of subpart 4 apply to attainment plans for these NAAQS and reminded the states about pre-existing EPA guidance regarding the subpart 4 requirements. One practical consequence of the application of subpart 4 to states with areas designated nonattainment for the 2006 24-hour $PM_{2.5}$ NAAQS is that the applicable statutory attainment date is governed by CAA section 188(c), which states that for areas classified as Moderate, the statutory attainment date is ''as expeditiously as practicable, but no later than the end of the sixth calendar year after the area's designation as nonattainment.'' Thus, for the areas at issue in this action, the latest possible statutory Moderate area attainment date was December 31, 2015.

Consistent with the *NRDC* v. *EPA* decision, the EPA published a final rule on June 2, 2014, classifying all areas that were designated nonattainment for the 1997 and/or 2006 $PM_{2.5}$ standards at the time as ''Moderate'' under subpart 4.

[5] *NRDC* v. *EPA,* 706 F.3d 428 (D.C. Cir. 2013).

[6] *Id.,* 706 F.3d at 437.

The EPA also established a due date of December 31, 2014, for states to submit attainment-related and NNSR SIP elements required for these areas pursuant to subpart 4. This rulemaking did not affect the statutory attainment dates imposed in subpart 4 and merely provided states with the opportunity to update or revise any prior attainment plan submissions, if necessary, to meet subpart 4 requirements in light of the 2013 court decision. This rulemaking did not affect any action that the EPA had previously taken under CAA section 110(k) on a SIP for a $PM_{2.5}$ nonattainment area.

Currently, there are 14 nonattainment areas classified as Moderate for the 2006 24-hour $PM_{2.5}$ NAAQS, 11 of which are addressed in this notice.[7] The applicable statutory attainment date for these areas was as expeditiously as practicable but no later than December 31, 2015. Pursuant to section 188(b)(2) of the CAA, within 6 months of the Moderate area attainment date, the EPA must (1) determine whether each area attained the standard by the attainment date, and (2) reclassify as a Serious nonattainment area any area that did not attain by the attainment date.

III. Criteria for Determining Whether an Area Has Attained the 2006 24-Hour $PM_{2.5}$ Standards

Under EPA regulations at 40 CFR part 50, Appendix N, the 2006 primary and secondary 24-hour $PM_{2.5}$ NAAQS are met within a nonattainment area when the 24-hour $PM_{2.5}$ NAAQS design value at each eligible monitoring site is less than or equal to 35 μg/m³. Three years of valid annual $PM_{2.5}$ 98th percentile mass concentrations are required to produce a valid 24-hour $PM_{2.5}$ NAAQS design value.

The EPA's determination of attainment is based upon data that have been collected and quality-assured in accordance with 40 CFR part 58 and recorded in the EPA's AQS database. Ambient air quality monitoring data for the 3-year period must meet data completion criteria or data substitution criteria according to 40 CFR part 50, Appendix N. The ambient air quality monitoring data completeness requirements are met when quarterly data capture rates for all four quarters in a calendar year are at least 75 percent. However, Appendix N states that years shall be considered valid, notwithstanding quarters with less than complete data, if the resulting annual 98th percentile value or resulting 24-hour NAAQS design value is greater than the level of the standard.

IV. The EPA's Proposed Action and Associated Rationale

The EPA is issuing this proposal pursuant to the agency's statutory obligation under CAA section 188(b)(2) to determine whether 11 nonattainment areas have attained the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015. The agency's proposed actions, and the rationale for these proposed actions, are described in the sections that follow.

A. Determinations of Attainment

The EPA evaluated data from air quality monitors in 11 areas classified as Moderate for the 2006 24-hour $PM_{2.5}$ NAAQS in order to determine the areas' attainment status as of the applicable attainment date, December 31, 2015. Seven of the 11 nonattainment areas' monitoring sites with valid data had a design value equal to or less than 35 μg/m³ based on the 2013–2015 monitoring period. Thus, the EPA proposes to determine, in accordance with section 188(b)(2) of the CAA, that these seven areas (listed in Table 1) have attained the standard by the applicable attainment date. The EPA's determination is based upon 3 years' worth of complete, quality-assured and certified data during the applicable 3-year period. The monitoring data for the 3 years (2013 to 2015) used to calculate each monitor's design value are provided in a technical support document (TSD) in the docket for this proposed action.[8] Also, the EPA notes that these determinations of attainment do not constitute a redesignation to attainment. Redesignations require states to meet a number of additional statutory criteria, including the EPA approval of a state plan demonstrating maintenance of the air quality standard for 10 years after redesignation. As for all NAAQS, the EPA is committed to working with states that choose to submit redesignation requests for the 2006 24-hour $PM_{2.5}$ NAAQS. The EPA is soliciting comments on these proposed determinations of attainment by the attainment date.

B. Determinations of Failure To Attain and Reclassification

The EPA is proposing to determine that the remaining four areas (listed in Table 1) failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date. Each of these areas failed to attain because the 2013–2015 design value for at least one monitor in each area exceeded the 2006 24-hour $PM_{2.5}$ NAAQS of 35 μg/m³. The TSD provided in the docket shows all monitoring data for the relevant years for each of these nonattainment areas as well as the 3-year design value calculations for each area.

CAA section 188(b)(2) provides that a Moderate nonattainment area shall be reclassified by operation of law upon a determination by the EPA that such area failed to attain the relevant NAAQS by the applicable attainment date. Based on quality-assured $PM_{2.5}$ monitoring data from 2013–2015, described in the TSD for this proposal, the new classification applicable to each of these four areas would be ''Serious.'' Serious $PM_{2.5}$ nonattainment areas are required to attain the standard as expeditiously as practicable, but no later than the end of the tenth year after designation (which, in the case of these four areas, is December 31, 2019).

Section 188(d) of the CAA states that the Administrator may extend the attainment date for 1 additional year if: ''(1) the State has complied with all requirements and commitments pertaining to the area in the applicable implementation plan and (2) no more than one exceedance of the 24-hour NAAQS for PM_{10} has occurred in the area in the year preceding the Extension Year, and the annual mean concentration of PM_{10} in the area for such year is less than or equal to the standard level.'' [9] The state of Idaho submitted two letters [10] to the EPA

[7] The three areas not addressed in this action are Klamath Falls, Oregon; Oakridge, Oregon; and, West Central Pinal, Arizona. The EPA issued a determination of attainment by the attainment date of December 31, 2014, for Klamath Falls, Oregon, on June 6, 2016 (*See* 81 FR 36176). The EPA issued a 1-year attainment date extension from December 31, 2015, to December 31, 2016, for Oakridge, Oregon. *See* 81 FR 46612, July 18, 2016. The EPA designation for the West Central Pinal, Arizona area as nonattainment became effective March 7, 2011. *See* 76 FR 6056, February 3, 2011. Therefore, the latest attainment date applicable to this area under subpart 4 is December 31, 2017.

[8] Technical Support Document Regarding $PM_{2.5}$ Monitoring Data—Determinations of Attainment by the Attainment Date, Determinations of Failure to Attain by the Attainment Date and Reclassification For Certain Nonattainment Areas for the 2006 24-Hour Fine Particulate Matter National Ambient Air Quality Standards.

[9] Consistent with the January 2013 *NRDC* v. *EPA* decision, the EPA reads the air quality criterion under CAA 188(d) for PM_{10} to also apply to $PM_{2.5}$. The form of the 2006 24-hour $PM_{2.5}$ NAAQS is a percentile-based form and not a ''one expected exceedance'' form as is the PM_{10} NAAQS. The EPA interprets the statutory language to require a state seeking an attainment date extension for a Moderate nonattainment area for a 24-hour $PM_{2.5}$ NAAQS to demonstrate that the area had clean data for that particular standard in the calendar year prior to the applicable attainment date for the area, rather than demonstrating that the area necessarily had no more than one exceedance of the 24-hour $PM_{2.5}$ NAAQS.

[10] *See* Letters from John H. Tippets, Director, Department of Environmental Quality, state of Idaho, to Dennis J. McLerran, Regional Administrator, U.S. EPA, Region 10, on December

Continued

requesting a 1-year extension of the area's Moderate attainment date for its portion of the Logan, UT-ID multi-state nonattainment area, asserting that the state has complied with all requirements and commitments pertaining to the Logan, Utah-Idaho nonattainment area in the applicable Idaho SIP and that all monitors in the area have a 98th percentile of 35 μg/m^3 or less for the attainment year (2015). These letters are provided in the docket for this proposed action.

CAA section 188(d)(2) air quality criterion requiring the area to meet the applicable NAAQS in the year preceding the extension year applies to ''the area'' which, in the case of the Logan, Utah-Idaho, nonattainment area, includes regulatory monitors in both Franklin, Idaho, and Logan, Utah. In other words, the reference to ''the area'' is to the entire designated nonattainment area, not merely to a portion of it in one state. However, in its request, Idaho acknowledges that, ''. . . the validity of the Logan, Utah, monitor data is in question. Therefore, the Franklin monitor is the only regulatory monitor available for use in the (nonattainment area).'' Idaho's submission attempts to address concerns about the regulatory suitability of the Utah monitor with a statistical comparison of monitors in Utah and Idaho based on historical data.

Because there are data completeness issues for the Utah monitoring sites in question for the first three quarters of 2015, the nonattainment area as a whole lacks the necessary data for the EPA to determine that the air quality criterion has been satisfied for the entire nonattainment area. Moreover, because the historically high monitor is located on the Utah portion of the multi-state nonattainment area, as acknowledged by Idaho, the EPA believes that it is necessary to have complete data from the Utah monitor in order to determine whether the entire nonattainment area has a 98th percentile of 35 μg/m^3 or less for the year prior to the attainment date (*i.e.,* 2015).

Further, with respect to the 2015 monitoring data for the Franklin monitor, the EPA determined in 2015 that temperature and relative humidity data for the FRM filter laboratory were not being archived as required by the Idaho Quality Assurance Plan and EPA regulations. The EPA's audit [11] concluded that, due to this lack of laboratory data, FRM filter weight determinations and the resulting FRM concentration data cannot be confirmed to meet data quality objectives. Idaho concurred with this finding and subsequently changed the status of the affected data for 2011–2014 in AQS to ''non-regulatory.'' The EPA therefore cannot confirm the accuracy of the monitoring data cited in Idaho's request.

The EPA has thus evaluated the information submitted by Idaho for its portion of the nonattainment area and the relevant monitoring data for the entire area for calendar year 2015 and has determined that the area does not meet the air quality criterion for a 1-year extension to the CAA section 188(c)(1) Moderate area attainment date. Given the lack of complete and valid data from Utah, and the lack of valid, historical data from Idaho, the EPA is unable to determine whether the entire nonattainment area has a 98th percentile of 35 μg/m^3 or less for the year preceding the extension year. Therefore, the EPA has determined that Idaho's request for a 1-year extension to the Moderate attainment date for the Idaho portion of the Logan, Utah-Idaho nonattainment area should be denied, and is instead proposing to determine that the Logan, Utah-Idaho nonattainment area failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date.

If the EPA determines that an area has failed to attain by its attainment date, CAA section 188(b)(2) requires that those areas be reclassified to Serious as of the time that the EPA publishes the notice identifying the areas that have failed to attain by their attainment date. Accordingly, the EPA is proposing that the following four Moderate areas failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by December 31, 2015, and will be reclassified to Serious: Fairbanks, Alaska; Logan Utah-Idaho; Provo, Utah and Salt Lake City, Utah. The EPA is taking comment on these proposed determinations of failure to attain and subsequent reclassifications of each of these four nonattainment areas from Moderate to Serious.

V. Summary of Proposed Actions

The actions proposed in this notice affect 11 nonattainment areas for the 2006 24-hour $PM_{2.5}$ NAAQS currently classified as Moderate. The EPA is proposing to determine that the following seven areas attained the NAAQS by the applicable attainment date of December 31, 2015: (1) Chico, CA; (2) Imperial County, CA; (3) Knoxville-Sevierville-La Follette, TN; (4) Liberty-Clairton, PA; (5) Nogales, AZ; (6) San Francisco, CA and (7) Sacramento, CA. The EPA is also proposing to determine that the following four Moderate areas failed to attain the 2006 $PM_{2.5}$ NAAQS by the December 31, 2015, attainment date and thus will be reclassified to Serious: (1) Fairbanks, AK; (2) Logan UT-ID; (3) Provo, UT; and, (4) Salt Lake City, UT. The EPA is taking comment on these proposed determinations of attainment by the attainment date.

VI. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was, therefore, not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* This proposed action to find that the Moderate $PM_{2.5}$ nonattainment areas listed in Table 1 have failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by their attainment date and to reclassify those areas as Serious $PM_{2.5}$ nonattainment areas does not establish any new information collection burden.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. Determinations of attainment and the resulting reclassification of nonattainment areas by operation of law under section 188(b)(2) of the CAA do not in and of themselves create any new requirements. Instead, this rulemaking only makes a factual determination, and does not directly regulate any entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The EPA believes, as discussed previously in this document, that the finding of nonattainment is a factual determination based upon air quality considerations and that the resulting reclassification of an area and the associated required revisions to state

15, 2015 and February 26, 2016, regarding a 1-year extension of the attainment date for the Logan UT-ID nonattainment area. Copies of these letters are available in the docket for this rulemaking.

[11] *See* ''Final Technical Systems Audit Report for the Idaho Department of Environmental Quality,'' January 16, 2015. This report is within the rulemaking docket.

implementation plans must occur by operation of law. Thus, this action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. This action merely proposes to determine whether the 2006 24-hour $PM_{2.5}$ nonattainment areas listed in Table 1 attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date and to reclassify as ''Serious'' the 2006 24-hour $PM_{2.5}$ nonattainment areas that did not do so.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. No tribal areas are implicated in the four areas that the EPA is proposing to find failed to attain the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date. The CAA and the Tribal Authority Rule establish the relationship of the federal government and tribes in developing plans to attain the NAAQS, and this rule does nothing to modify that relationship. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This action merely proposes to determine that four 2006 24-hour $PM_{2.5}$ nonattainment areas, identified in Table 1, did not attain the 2006 24-hour $PM_{2.5}$ standard by their applicable attainment date and to reclassify these areas as Serious $PM_{2.5}$ nonattainment areas.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards. This action merely proposes to determine that four 2006 24-hour $PM_{2.5}$ nonattainment areas (identified in Table 1) did not attain the 2006 24-hour $PM_{2.5}$ standard by their applicable attainment date and to reclassify these areas as Serious $PM_{2.5}$ nonattainment areas.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). This action merely proposes to determine that four 2006 24-hour $PM_{2.5}$ nonattainment areas identified in Table 1, did not attain by the applicable attainment date and to reclassify these nonattainment areas as Serious $PM_{2.5}$ nonattainment areas.

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Nitrogen oxides, Fine particulate matter, Ammonia, Sulfur dioxides, Volatile organic compounds, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements.

40 CFR 81

Environmental protection, Air pollution control, Nitrogen oxides, Fine particulate matter, Ammonia, Sulfur dioxides, Volatile organic compounds, Intergovernmental relations, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: December 1, 2016.

Gina McCarthy,

Administrator.

For the reasons stated in the preamble, Title 40, Chapter I of the Code of Federal Regulations is proposed to be amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart D—Arizona

■ 2. Section 52.131 is amended by adding paragraph (c) to read as follows:

§ 52.131 Control Strategy and regulations: Fine Particle Matter.

* * * * *

(c) *Determination of Attainment.* Effective [DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**], the EPA has determined that, based on 2013–2015 ambient air quality data, the Nogales, AZ $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188((b)(2) to determine whether the area attained the standard. The EPA also has determined that the Nogales, AZ nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

Subpart F—California

■ 3. Section 52.247 is amended by adding paragraphs (i), (j), (k) and (l) to read as follows:

§ 52.247 Control Strategy and regulations: Fine Particle Matter.

* * * * *

(i) *Determination of Attainment.* Effective [DATE 30 DAYS AFTER DATE OF PUBLICATION PUBLICATION IN THE **FEDERAL REGISTER**], the EPA has determined that, based on 2013–2015 ambient air quality data, the Chico, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188((b)(2) to determine whether the area attained the standard. The EPA also has determined that the Chico, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(j) *Determination of Attainment.* Effective [DATE 30 DAYS AFTER DATE OF PUBLICATION PUBLICATION IN THE **FEDERAL REGISTER**], the EPA has determined that, based on 2013–2015 ambient air quality data, the Imperial County, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Imperial County, CA nonattainment area will not

be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(k) *Determination of Attainment.* Effective [DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**], the EPA has determined that, based on 2013–2015 ambient air quality data, the Sacramento, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Sacramento, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(l) *Determination of Attainment.* Effective [DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**], the EPA has determined that, based on 2013–2015 ambient air quality data, the San Francisco Bay, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the San Francisco Bay, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

Subpart NN—Pennsylvania

■ 4. Section 52.2059 is amended by adding paragraph (u) to read as follows:

National Oceanic and Atmospheric Administration

50 CFR Parts 223

[Docket No. 161109999–6999–01]

RIN 0648–BG45

Sea Turtle Conservation; Shrimp Trawling Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments; notice of public hearings.

SUMMARY: We are proposing to withdraw the alternative tow time restriction and require all skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) rigged for fishing—with the exception of vessels participating in the Biscayne Bay wing net fishery prosecuted in Miami-Dade County, Florida—to use turtle excluder devices (TEDs) designed to exclude small turtles in their nets. The intent of this proposed rule is to reduce incidental bycatch and mortality of sea turtles in the southeastern U.S. shrimp fisheries, and to aid in the protection and recovery of listed sea turtle populations. We also are proposing to amend the definition of tow times to better clarify the intent and purpose of tow times to reduce sea turtle mortality, and to refine additional portions of the TED requirements to avoid potential confusion.

DATES: Written comments (see **ADDRESSES**) will be accepted through February 14, 2017. Public hearings on the proposed rule will be held in January 2017. See **SUPPLEMENTARY INFORMATION** for meeting dates, times, and locations.

ADDRESSES: You may submit comments on this proposed rule, identified by 0648–BG45, by any of the following methods:

- *Federal e-Rulemaking Portal:* Go to *www.regulations.gov/#!docketDetail;D=[NOAA-NMFS-2016-0151*], click the ''Comment Now!' icon, complete the required fields, and enter or attach your comments
- Mail: Michael Barnette, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.
- Fax: 727–824–5309; Attention: Michael Barnette.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will generally post for public viewing on *www.regulations.gov* without change. All personal identifying information (for example, name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter N/A in the required fields, if you wish to remain anonymous). You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Michael Barnette, 727–551–5794.

SUPPLEMENTARY INFORMATION:

Background

All sea turtles in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973 (ESA). In the Atlantic Ocean and Gulf of Mexico, the Kemp's ridley (*Lepidochelys kempii*), leatherback (*Dermochelys coriacea*), and hawksbill (*Eretmochelys imbricata*) turtles are listed as endangered. The loggerhead (*Caretta caretta;* Northwest Atlantic Ocean distinct population segment) and green (*Chelonia mydas;* North Atlantic and South Atlantic Ocean distinct population segments) turtles are listed as threatened.

Sea turtles are incidentally taken, and some are killed, as a result of numerous activities including fishery-related trawling activities in the Gulf of Mexico and along the Atlantic seaboard. Under the ESA and its implementing regulations, taking (harassing, injuring or killing) sea turtles is prohibited, except as identified in 50 CFR 223.206 in compliance with the terms and conditions of a biological opinion issued under section 7 of the ESA, or in accordance with an incidental take permit issued under section 10 of the ESA. Incidental takes of threatened sea turtles during shrimp trawling are exempt from the taking prohibition of section 9 of the ESA so long as the conservation measures specified in the sea turtle conservation regulations (50 CFR 223.206) are followed. The same conservation measures also apply to endangered sea turtles (50 CFR 224.104).

The regulations require most shrimp trawlers operating in the southeastern United States to have an approved TED installed in each net that is rigged for fishing, to allow sea turtles to escape. Approved TED types include single-grid

hard TEDs and hooped hard TEDs conforming to a generic description, and the Parker soft TED (see 50 CFR 223.207). However, skimmer trawls, pusher-head trawls, and vessels using wing nets (butterfly trawls) currently may employ alternative tow time restrictions in lieu of installing TEDs, under 50 CFR 223.206(d)(2)(ii)(A). The alternative tow time restrictions currently limit tow times to 55 minutes from April 1 through October 31, and 75 minutes from November 1 through March 31.

TEDs incorporate an escape opening, usually covered by a webbing flap, which allows sea turtles to escape from trawl nets. A TED design must be shown to be 97 percent effective in excluding sea turtles during testing based upon specific testing protocols (50 CFR 223.207(e)(1)) to meet standards for approval. Most approved hard TEDs are described in the regulations (50 CFR 223.207(a)) according to generic criteria based upon certain parameters of TED design, configuration, and installation, including minimum height and width dimensions of the TED opening through which the turtles escape.

We previously examined the incidental bycatch and mortality of sea turtles in the shrimp fisheries in 2011–2012, stemming from concerns related to elevated sea turtle strandings in the northern Gulf of Mexico. On June 24, 2011 (76 FR 37050), we published a notice of intent to prepare an EIS and conduct scoping meetings on potential measures to reduce sea turtle bycatch in the shrimp fisheries. On May 10, 2012 (77 FR 27411), we published a proposed rule that, if implemented, would require all skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) to use TEDs in their nets. We also prepared a draft environmental impact statement (DEIS), which included a description of the purpose and need for evaluating the proposed action and other potential management alternatives, the scientific methodology and data used in the analyses, background information on the physical, biological, human, and administrative environments, and a description of the effects of the proposed action and other potential management alternatives on the aforementioned environments. A notice of its availability was published on May 18, 2012 (77 FR 29636). At the time the 2012 DEIS was prepared, information on the effects of the skimmer trawl fisheries on sea turtle populations was extremely limited. New information gained after the preparation of the 2012 DEIS indicated that a significant number of sea turtles observed interacting with the skimmer trawl fisheries (*i.e.,* those found in shallow (< 60 feet), state waters) had a body depth that would allow them to pass between the required maximum 4-inch (10.2 centimeter (cm)) bar spacing of a standard, approved TED and proceed into the back of the net (*i.e.,* they would not escape the trawl net). Therefore, the conservation benefit of expanding the TED requirement to skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) was much less than originally anticipated. As a result, we determined that a final rule to withdraw the alternative tow time restriction and require all skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) to use TEDs was not warranted (February 7, 2013; 78 FR 9024).

Following the withdrawal of the proposed rule, we initiated additional TED testing, evaluating both small sea turtle exclusion and shrimp retention within the skimmer trawl fisheries. This testing has produced several TED configurations that all use a TED grid with 3-inch (7.6 cm) bar spacing (*i.e.,* less than the current 4-inch bar spacing maximum) and escape-opening flap specifications that would allow small turtles to effectively escape the trawl net, which could be employed by trawl vessels in areas where these small turtles occur.

Additionally, anecdotal information, law enforcement data, and past public comment during scoping for the 2012 DEIS indicate that the alternative tow time requirements are exceeded by the skimmer trawl fleets, though to what extent is unclear. Tow times are inherently difficult to enforce widely due to the time required to monitor a given vessel, as well as the ability to do so covertly to observe unbiased fishing operations. Furthermore, anecdotal information indicates that skimmer trawl vessels have increased the size and amount of gear they use to fish, allowing them to fish in deeper water. In some cases, vessels are rigged with both skimmer trawl frames and outriggers for use with conventional otter trawl nets. As a result of these larger skimmer trawl nets, there is a possibility that a sea turtle could be captured within the mouth of the net and not be visible during a cursory cod end inspection, a scenario that is compounded by the fact that many vessels fish at night. For these reasons, and because of the increased abundance of sea turtles in the northern Gulf of Mexico, particularly juvenile Kemp's ridley sea turtles, we are re-evaluating the efficacy of sea turtle conservation requirements associated with the skimmer trawl fisheries, and analyzing the effectiveness of current TED requirements in the otter trawl fisheries.

On March 15, 2016 (81 FR 13772), we published a notice of intent to prepare an EIS and conducted five scoping meetings in April 2016. Information and public comment gathered during that process was incorporated into this DEIS, and a notice of its availability was published elsewhere in today's issue of the **Federal Register**. The analysis included in this DEIS demonstrates that withdrawing the alternative tow time restriction and requiring all skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) rigged for fishing—with the exception of vessels participating in the Biscayne Bay wing net fishery prosecuted in Miami-Dade County, Florida—to use TEDs in their nets would reduce incidental bycatch and mortality of sea turtles in the southeastern U.S. shrimp fisheries and, therefore, may be a necessary and advisable action to conserve threatened and endangered sea turtle species.

The Biscayne Bay wing net fishery is not required to use the new TEDs included in this rulemaking since the fishery operates by sight fishing at the surface close to the vessel using small, light monofilament nets during the winter months. We anticipate the incidental capture of sea turtles would be a rare event based on the time, location, and operational parameters of the fishery. If a sea turtle was incidentally captured, it would be immediately obvious to the operator, and could be quickly released.

Skimmer Trawls, Pusher-Head Trawls, and Wing Nets

Developed in the early 1980s, the skimmer trawl was intended for use in some areas primarily to catch white shrimp, which have the ability to jump over the headrope of standard otter trawls while being towed in shallow water. The skimmer net frame allows the net to be elevated above the water while the net is fishing, thus preventing shrimp from escaping over the top. Owing to increased shrimp catch rates, less debris and/or fish and other bycatch, and lower fuel consumption than otter trawlers, the use of skimmer nets quickly spread throughout Louisiana, Mississippi, and Alabama. The basic components of a skimmer trawl include a frame, the net, heavy weights, skids or ''shoes,'' and tickler chains. The net frame is usually constructed of steel or aluminum pipe or tubing and is either L-shaped (with an additional stiff leg) or a trapezoid design. When net frames are deployed, they are aligned perpendicularly to the vessel and cocked or tilted forward and

slightly upward. This position allows the net to fish better and reduces the chance of the leading edge of the skid digging into the bottom and subsequently damaging the gear. The frames are maintained in this position by two or more stays or cables to the bow. The outer leg of the frame is held in position with a ''stiff leg'' to the horizontal pipe and determines the maximum depth at which each net is capable of working. The skid, or ''shoe,'' is attached to the bottom of the outer leg, which allows the frame to ride along the bottom, rising and falling with the bottom contour. The bottom of the gear includes tickler chains and lead lines. The skimmer trawl is the most popular trawl type after the otter trawl, and is widely used in Louisiana waters.

Vietnamese fishers who moved into Louisiana in the early 1980s introduced the pusher-head trawl, also known as the ''xipe'' or chopstick net. The pusher-head trawl net is attached to a rigid or flexible frame similar to the wing net; however, the frame mounted on the bow of the boat is attached to a pair of skids and fished by pushing the net along the bottom.

Wing nets, also known as butterfly trawls or ''paupiers'', were introduced in the 1950s and used on stationary platforms and on shrimp boats either under power or while anchored. A wing net consists of a square metal frame which forms the mouth of the net. Webbing is attached to the frame and tapers back to a cod end. The net can be fished from a stationary platform or a pair of nets can be attached to either side of a vessel. The vessel is then anchored in tidal current or the nets are ''pushed'' through the water by the vessel. The contents of the wing net, as well as the contents of skimmer and pusher-head trawls, can be picked up and dumped without raising the entire net out of the water, which is necessary with an otter trawl.

Pusher-head trawls and wing nets (butterfly trawls) are both allowable gear types in several Gulf of Mexico coastal states, however, their use is largely overshadowed by skimmer trawls in shallow, coastal waters. In the DEIS, we estimate approximately 93 percent of non-otter trawl effort in the shrimp fisheries is conducted by skimmer trawls.

Sea Turtle Bycatch in Skimmer Trawls, Pusher-Head Trawls, and Wing Nets

We initiated observer effort on Gulf of Mexico skimmer trawl vessels in 2012. A total of 39 sea turtles were captured during observed trips consisting of 2,699.23 tow hours from 2012 through 2015. Additionally, in 2015 the North Carolina Division of Marine Fisheries observed 238 tows over 62 days, which is 6.21 percent of the total annual skimmer trawl fishing effort. They observed four sea turtle captures (Brown 2016). The incidental capture of sea turtles in skimmer trawls has been documented in North Carolina during other studies as well (Coale *et al,* 1994; Price and Gearhart 2011).

In the DEIS, we calculated sea turtle catch per unit effort rates based on observed effort in the skimmer trawl fisheries. The catch rate was multiplied by total average effort (*i.e.,* 539,394 effort hours in the Gulf of Mexico non-otter trawl fisheries and 4,356 effort hours in the North Carolina skimmer trawl fishery) to determine total sea turtle take in these fisheries. The analysis resulted in a total anticipated take of 7,928 captured sea turtles in the combined skimmer trawl, pusher-head trawl, and wing net fisheries.

We then estimated sea turtle mortalities as a result of these fisheries based on observed mortality rates and taking into consideration the effects of post-interaction mortality on captured and released sea turtles. That analysis concluded a TED requirement for all skimmer trawl, pusher-head trawl, and wing net vessels could reduce annual sea turtle mortalities from those currently occurring under the status quo by 789–1,543 in the near term and 1,730–2,500 after TED compliance rises to final anticipated levels. The methodology for this analysis is described in detailed in the DEIS. Therefore, we preliminarily determined that the measures proposed here are necessary and advisable to conserve threatened and endangered sea turtle species. We have further preliminarily determined that the measures proposed here are necessary and appropriate to enforce the requirements of the ESA.

We anticipate a six-month delayed effective date upon publication of a final rule in the **Federal Register**. Due to the number of TEDs required for the affected vessels and the time required to construct these TEDs, our analysis indicates additional effort may be needed to construct the new TEDs. One way to address this concern is a phased-in approach for implementing the new TED requirements that takes these issues into account. Thus, we are specifically soliciting public comment on how to best structure a phased implementation, so as to achieve the desired conservation benefit promptly, while providing adequate time for the devices to be constructed and installed.

Potential scenarios include basing the approach on landings, where vessels with the highest landings would be the first vessels required to install the new TEDs, and vessels with lower landings would be required to install the new TEDs later in time. Vessels could be placed in categories based on their recorded landings, with each category being addressed in multiple phases over time. The intention would be to first implement the requirement where it would achieve the greatest conservation benefit for listed sea turtles. Based on the assumption that higher landings would be associated with higher levels of effort and, therefore, higher numbers of sea turtle interactions, those vessels should be the first required to install the devices. Another approach could be to phase the TED requirement based on vessel size, where the largest vessels would be the first vessels required to install the devices. Similar to the landings based approach, this would view vessel size as a proxy for effort and the associated sea turtle interactions. One of the challenges with any approach will be the ability to definitively identify all vessels subject to the requirement and provide adequate notice to the owners and operators as to precisely when the new devices must be installed.

Additional Revisions to the TED Requirements

We are proposing to amend the TED requirements to clarify that tow times are mandatory for vessels not required to use TEDs, as well as to clarify the tow time definition. The requirements currently define a tow time for trawls that are not attached to an otter door as the time the cod end enters the water until it is removed from the water. Skimmer trawls can still fish while the cod end is raised, and there is concern that turtles could be entangled or otherwise entrained in other portions of the net that would not be visible by raising just the cod end. As such, this definition may not properly address the need to ensure sea turtles are not drowned in trawl nets while fishing without TEDs. Therefore, we are proposing to revise the tow time definition to specify that the entire net (*i.e.,* including the net frame) be removed from the water at the end of a tow when not using TEDs in the net. We also are amending the name of various TED escape openings and webbing flaps to avoid confusion about where these openings and flaps may be used. For example, we propose to amend the ''71-inch offshore opening'' to just the ''71-inch opening'' as this TED escape opening can also be used in inshore waters.

Classification

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

We prepared an initial regulatory flexibility analysis (IRFA), as required by section 603 of the Regulatory Flexibility Act (RFA), for this proposed rule. The IRFA describes the economic effects this proposed rule, if adopted, would have on small entities. A description of this action, why it is being considered, the objectives of, and legal basis for this proposed rule are contained at the beginning of this section in the preamble and in the **SUMMARY** section of the preamble. A copy of the full analysis is available from us (see **ADDRESSES**). A summary of the IRFA follows.

The ESA provides the statutory basis for this proposed rule. This proposed rule would not establish any new reporting, record-keeping, or other compliance requirements beyond the requirement to use TEDs when using skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls). TEDs are typically installed by the net manufacturer, so no special skills would be expected to be required of fishers for TED installation. Some training would be necessary for the maintenance and routine use of TEDs by fishers who have not historically had to use these devices. However, TEDs have been required for vessels harvesting shrimp with otter trawls for many years. A majority of the vessels directly regulated by this proposed rule also used otter trawls between 2011 and 2014 and, thus, are expected to know how to properly maintain and use TEDs. Further, the skills required for properly maintaining and using TEDs in skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) is thought to be consistent with the skillset and capabilities of commercial shrimp fishers in general. As a result, special professional skills training would not be expected to be necessary.

This proposed rule is expected to directly regulate vessels that use skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) in the southeastern U.S. shrimp fisheries (North Carolina through Texas), with the exception of vessels that use only wing nets (butterfly trawls) in Biscayne Bay in Miami-Dade County, Florida. An estimated 5,837 vessels have been identified as using this gear (5,660 vessels in the Gulf of Mexico and 177 vessels in the South Atlantic). Although some of the directly regulated shrimp vessels are thought to be owned by businesses with the same or substantively the same individual owners, and thus would be considered affiliated, ownership data for these vessels is incomplete. It is not currently feasible to accurately determine whether businesses that own these vessels are, in fact, affiliated. As a result, although it will result in an overestimate of the actual number of businesses directly regulated by this proposed rule, for the purposes of this analysis, it is assumed that each vessel is independently owned by a single business. We have not identified any other entities that might be directly regulated by this proposed rule. Therefore, this proposed rule would be expected to directly regulate 5,837 businesses.

The average annual gross revenue (2014 dollars) over the period 2011–2014 for vessels that harvested shrimp using skimmer trawls, pusher-head trawls, or wing nets (butterfly trawls) was approximately $31,861 for vessels in the Gulf of Mexico (5,660 vessels) and $37,250 for vessels in the South Atlantic (177 vessels). The largest average annual gross revenues earned by a single business over this period were approximately $1.85 million.

On December 29, 2015, NMFS issued a final rule establishing a small business size standard of $11 million in annual gross receipts (revenue) for all businesses primarily engaged in the commercial fishing industry (NAICS code 114111) for RFA compliance purposes only (80 FR 81194; December 29, 2015). The $11 million standard became effective on July 1, 2016, and is to be used in place of the prior Small Business Administration standards of $20.5 million, $5.5 million, and $7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine fishing (NAICS 114119) sectors of the U.S. commercial fishing industry in all our rules subject to the RFA after July 1, 2016. Id. at 81194. In addition to this gross revenue standard, a business primarily involved in commercial fishing is classified as a small business if it is independently owned and operated, and is not dominant in its field of operations (including its affiliates). Based on the information above, all businesses directly regulated by this proposed rule are determined to be small businesses for the purpose of this analysis.

This proposed rule would require all commercial fishing vessels using skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) in the Southeastern U.S. shrimp fishery (North Carolina through Texas), with the exception of vessels that use only wing nets (butterfly trawls) in Biscayne Bay in Miami-Dade County, Florida, to use TEDs designed to exclude small sea turtles when shrimping. Although these TEDs, as designed, successfully result in the reduced bycatch of small sea turtles, they also result in shrimp loss and, thus, reduced shrimp harvest per tow. Although it may be theoretically possible to compensate for this reduction in harvest with additional effort (more tows or trips), increasing effort will also increase operating costs. The difference between shrimp prices and fuel prices is directly related to profitability (*i.e.,* as the difference increases, profits increase). With the exception of 2014, this difference has been very small in the past several years and thus vessels are already operating on small economic margins. Increasing effort is therefore likely to be economically risky, particularly for vessels that only or primarily harvest after the seasonal openings because catch per unit effort steadily declines over time and the additional revenue from each tow or trip steadily declines as well. Further, if additional effort was cost-effective or profitable, this effort would already be occurring and part of baseline fishing behavior. Therefore, vessels are not expected to compensate for lost shrimp and the associated gross revenues by increasing effort.

As a result, vessels affected by this proposed rule would be expected to experience adverse economic effects from two sources: reduced shrimp revenue and increased gear costs associated with the purchase, installation, maintenance, and replacement of newly required TEDs. Revenue loss from reduced shrimp harvest would be expected to be recurrent (yearly), barring changes in fishing practices, and the increased gear costs would recur periodically based on the loss, maintenance, and replacement cycles of TEDs (under normal use and proper maintenance, a TED would be expected to last at least three years).

In this analysis, the average shrimp loss is assumed to be 6.21 percent on average (estimated range of 3.07 percent-10.61 percent), the estimated cost per TED is $325 for small vessels (vessels less than 60 feet) and $550 for large vessels (vessels 60 feet or longer), and vessels are assumed to purchase/carry enough TEDs for the nets towed plus one spare set. Therefore, the actual effects of this proposed rule on individual vessels will vary based on individual performance (*i.e.,* shrimp loss may be higher or lower than the average; because these fishers have not traditionally had to use TEDs, and initial shrimp loss may be higher and persist until greater familiarity with the gear is acquired) and gear purchase

decisions (how many TEDs are purchased/carried).

Additionally, in this analysis, neither the ex-vessel price per pound of domestically harvested shrimp nor the expected cost per TED is modeled to change in response to supply and demand conditions. Specifically, the estimated decrease in the harvest of domestic shrimp (as a result of increased shrimp loss due to this proposed rule) is not modeled to result in an increase in the ex-vessel price of domestic shrimp, nor has the projected increase in the demand for TEDs been modeled to result in an increase in the average price of a TED. The assumed lack of change in shrimp ex-vessel prices is likely more realistic than the assumed constant price of a TED because imported shrimp dominate the U.S. market and available evidence suggests the demand for shrimp is highly elastic. Upward price pressure on TEDs will be affected by the number of available suppliers (there are currently six), their capacity to meet production demand (each can currently produce 20 TEDs per week), the timeframe for compliance, and the total number of TEDs needed (estimated to be 23,266 in order to fully outfit all of the vessels directly regulated by this proposed rule). The total number of TEDs needed will be affected by vessel purchase decisions (*i.e.,* how many spare TEDs vessels choose to carry), and the number of vessels that can successfully remain in operation in the face of the higher operating costs and reduced revenue. Although not expected, if the ex-vessel price of shrimp increases as a result of reduced supply, the effects provided in this analysis will be overstated. Conversely, if the price of a TED increases, then the adverse economic effects associated with the costs of purchasing TEDs will be understated.

Because the increased gear costs associated with purchasing TEDs would be periodic, whereas the shrimp loss would be ongoing and recurrent, the following analysis only presents first-year results (*i.e.,* results that include both TED purchase costs and shrimp revenue reduction). The adverse effects in subsequent years will be less than those in the first year and would be expected to vary with fishing adaptations (fishers may become more skilled in and familiar with the operation and use of TEDs, thereby reducing shrimp loss), and TED replacement schedules (both planned and unplanned).

All of the monetary effects provided in this analysis are in 2014 dollars. Over all of the businesses expected to be affected (5,837 vessels), this proposed rule would be expected to result in a reduction in gross revenue of approximately $6.2 million and TED costs of approximately $7.5 million, thereby resulting in a total adverse effect of approximately $13.7 million in the first year. The average adverse effects per vessel would be $1,062, $1,285, and $2,347 with respect to lost gross revenue, TED costs, and the total adverse effect, respectively. These effects would not be expected to be uniform across Gulf of Mexico and South Atlantic vessels. Gulf of Mexico vessels would be expected to experience average adverse effects of $1,085, $1,298, and $2,383 with respect to lost gross revenue, TED costs, and the total adverse effect, respectively. The comparable values for South Atlantic vessels would be $146, $1,219, and $1,365.

In the Gulf of Mexico, vessels were placed into one of six (6) categories: average Federally-permitted vessel (Federal Gulf of Mexico), Q5, Q4, Q3, Q2, and Q1. The average annual gross revenue ranges for these categories are as follows: greater than or equal to $255,000 (Federal Gulf of Mexico), less than $255,000 but greater than or equal to $119,000 (Q5), less than $119,000 but greater than or equal to $52,000 (Q4), less than $52,000 but greater than or equal to $29,000 (Q3), less than $29,000 but greater than or equal to $17,000 (Q2), and less than $17,000 (Q1). In the South Atlantic, vessels were placed into nine (9) categories: rock shrimp (RSLA), primary penaeid (SPA Primary), secondary penaeid (SPA Secondary), average Federally-permitted South Atlantic penaeid vessel (AS), Q5, Q4, Q3, Q2, and Q1. A vessel was placed in the RSLA category if 50 percent or more of its gross revenue came from shrimp and its average annual gross revenue was greater than or equal to $456,000. A vessel was placed in the AS category if 50 percent or more of its gross revenue came from shrimp and its average annual gross revenue was less than $456,000 but greater than or equal to $216,000. A vessel was placed in the SPA Primary category if 50 percent or more of its gross revenue came from shrimp and its average annual gross revenue was less than $216,000 but greater than or equal to $119,000. Finally, a vessel was placed in the SPA Secondary category if less than 50 percent of its gross revenue came from shrimp and its average annual gross revenue was greater than or equal to $119,000. The ranges are the same as in the Gulf of Mexico for the Q5, Q4, Q3, Q2, and Q1 categories.

It should not be inferred that every vessel in a particular category has a particular permit associated with the category name, as that is not always the case. For the purpose of this analysis, vessels in the Q1, Q2, and Q3 categories are considered part-time vessels (*i.e.,* vessels that are only engaged in commercial fishing part-time) in both the Gulf of Mexico and the South Atlantic, while vessels in each of the other categories are considered full-time vessels.

For Gulf of Mexico vessels, the number of vessels expected to be directly regulated by this proposed rule and their average annual gross fishing revenue from 2011 through 2014 are 3,386 vessels and $4,524 for Q1 vessels, followed by 534 vessels and $22,773 (Q2), 655 vessels and $39,130 (Q3), 781 vessels and $77,698 (Q4), 232 vessels and $160,932 (Q5), and 72 vessels and $405,664 (Federal Gulf of Mexico). The expected average adverse effect (reduced shrimp revenue and TED cost) of the proposed rule in the first year for these vessels is $1,510, $2,200, $2,813, $4,568, $6,467, and $3,303 for vessels in the Q1, Q2, Q3, Q4, Q5, and Federal Gulf of Mexico categories, respectively.

Although the average adverse effects of the proposed rule could be compared to the average gross revenue to generate an estimate of the average relative (percent) effect of the proposed rule by category, this ''average to average'' approach (average adverse effect/average gross revenue for each category) would provide a distorted perspective of the actual expected effects of this proposed rule at the vessel level. For example, using this approach (''average to average'') for category Q1, the average estimated effect of the cost of the proposed rule would be approximately 33.4 percent ($1,510/$4,524; the projected average adverse effect per vessel of this proposed rule would be 33.4 percent of average annual gross revenue). Although this outcome would not likely be considered insignificant, examination of the adverse effect by vessel (adverse effect/average gross revenue for that vessel), then averaged across all vessels, provides a much clearer picture of the expected economic effect of this proposed rule. Using this approach, the relative adverse effect of this proposed rule, as a percentage of average annual gross revenue, increases to 199.4 percent for vessels in the Q1 category. This result demonstrates that most of these vessels generate minimal fishing revenue year-to-year, and the costs of the TEDs alone are likely to be financially unbearable even before factoring in the loss of shrimp revenue.

Applying this approach (analysis at the vessel level, then averaging across all vessels) to all revenue categories for

Gulf of Mexico vessels, the relative adverse effect as a percentage of gross revenue would be expected to be 199.4 percent for Q1 vessels, 9.8 percent (Q2), 7.3 percent (Q3), 6.0 percent (Q4), 4.2 percent (Q5), and 1.0 percent (Federal Gulf of Mexico). These results demonstrate that, although the expected effects in absolute monetary terms are greater for vessels in the Q4, Q5, and Federal Gulf of Mexico categories, (*i.e.,* vessels that generate the highest average annual gross revenues and are considered full-time vessels), the relative effect of this proposed rule would be greater on vessels in the Q1, Q2, and Q3 categories (*i.e.,* part-time vessels that have the lowest average annual gross revenues).

For South Atlantic vessels, the number of vessels expected to be directly affected by this proposed rule and their average gross revenue for 2011–2014 are 123 vessels and $5,350 for Q1 vessels, followed by 19 vessels and $22,797 (Q2), 17 vessels and $39,329 (Q3), 13 vessels and $717,843 (Q4), 3 vessels and $835,270 (RSLA), and 1 vessel for each of the SPA Secondary and AS categories. Because the expected number of entities affected by the proposed rule in the SPA Secondary and AS categories is so small, neither baseline economic information nor expected economic effects can be reported for them due to confidentiality restrictions. The expected average adverse effect (reduced shrimp revenue and TED cost) of this proposed rule in the first year is $1,290, $1,378, $1,667, $1,627, $1,573 for vessels in the Q1, Q2, Q3, Q4 and RSLA categories, respectively. Using the same vessel-level analytical approach discussed in the previous paragraph and applied to Gulf of Mexico vessels, the relative adverse effect as a percentage of gross revenue for South Atlantic vessels would be expected to be 96.5 percent for Q1 vessels, 6.2 percent (Q2), 4.4 percent (Q3), 2.4 percent (Q4), and 0.2 percent (RSLA). The expected effects in absolute monetary terms for the South Atlantic vessels do not follow as markedly the same pattern as do those for Gulf of Mexico vessels. Full-time vessels in the South Atlantic would generally be expected to experience greater average adverse effects than part-time vessels, but range of the difference is only a couple hundred dollars for South Atlantic vessels and not thousands of dollars as expected in the Gulf of Mexico, and the relative effects are not expected to be as great. However, as in the Gulf of Mexico, the relative effects on the part-time vessels in the South Atlantic also exceed that of full-time vessels. In addition, similar to the results for Gulf of Mexico vessels, the effects on the South Atlantic Q1 vessels may be so great as to render continued operation as a commercial fishing vessel economically infeasible.

In spite of the results presented above, this analysis neither assumes nor concludes that any specific individual or total number of vessels would be expected to stop operating as a commercial fishing business due to the expected adverse effects of this proposed rule. The results suggest that a high number of the part-time vessels may not continue operating as a result of this proposed rule. However, based on available data, a general economic assessment utilizing gross revenue and operating cost information suggests that the financial conditions for many vessels are and have been poor, particularly for part-time vessels as the average net revenues for Q1, Q2, and Q3 vessels were negative based on 2012 data for non-permitted vessels in the Gulf of Mexico. Yet, at least some of these vessels continue to commercially harvest shrimp. This suggests either that available data incompletely capture the ''economics'' of these operations, or that the decision to harvest shrimp is based on criteria other than, or in addition to, considerations of profit and loss (*e.g.,* personal consumption of harvested shrimp and the associated value, the value some fishermen place on the commercial fishing lifestyle, etc.).

Despite acknowledgement that reducing revenues and imposing additional costs on businesses that already operate under a tenuous financial situation will, with some unknown degree of certainty, result in some vessels exiting the commercial shrimp industry, this analysis does not forecast how many vessels may do so. Instead, this analysis simply notes that the total reduction in gross revenues and total adverse effects associated with this proposed rule will increase as more vessels cease operation. Conversely, the more vessels that cease commercial fishing, the more likely that demand pressure on TED prices will be reduced (*i.e.,* TED prices will not increase over the assumed prices used in this analysis) and the total costs associated with purchasing TEDs will decrease as fewer vessels will need to buy them. Further, for vessels that continue to operate, they may harvest some portion of the shrimp traditionally harvested by the exiting vessels, thereby mitigating some of the shrimp loss to these vessels as a result of TED use.

Seven alternatives, including no action, were considered for the action in this proposed rule (Alternative 3 is the preferred alternative). The first alternative (Alternative 1, no action) to the action in this proposed rule would not expand the required use of TEDs and, as a result, would not achieve the objective of reducing the incidental bycatch and mortality of sea turtles in the Southeastern U.S. commercial shrimp fisheries.

The second alternative (Alternative 2) to the action in this proposed rule would have expanded the required use of TEDs to only vessels using skimmer trawls, pusher-head trawls, and wing nets (butterfly trawls) that were 26 feet and greater in length. This alternative would have been expected to affect fewer vessels (3,103) and reduce the total expected increase in TED costs and shrimp revenue loss compared to this proposed rule. However, this alternative was not selected because it would be expected to result in less protection of sea turtles (1,509–2,179 turtles, or a mid-point estimate of 1,844 turtles) than this proposed rule (1,730–2,500 turtles, or a mid-point estimate of 2,115 turtles).

The third alternative (Alternative 4) to the action in this proposed rule would have expanded the required use of TEDs to only vessels using skimmer trawls that were 26 feet and greater in length. This alternative would have been expected to affect fewer vessels (2,913) and reduce the total expected increase in TED costs and the shrimp revenue loss compared to this proposed rule. However, this alternative was not selected because it would be expected to result in less protection of sea turtles (1,412–2,040 turtles, or a mid-point estimate of 1,726 turtles) than this proposed rule.

The fourth alternative (Alternative 5) to the action in this proposed rule would have expanded the required use of TEDs to all vessels using skimmer trawls regardless of vessel length. This alternative would, similar to Alternative 4, have been expected to affect fewer vessels (5,432) and reduce the total expected increase in TED costs and shrimp revenue loss compared to this proposed rule. However, this alternative was not selected because it would be expected to result in less protection of sea turtles (1,624–2,348 turtles, or a mid-point estimate of 1,986 turtles) than this proposed rule.

The fifth and sixth alternatives (Alternatives 6 and 7) to the action in this proposed rule would have expanded the required use of TEDs to all shrimp vessels regardless of trawl type but varying by fishing location (Alternative 6, state waters only; Alternative 7, all waters). These alternatives were not selected because they would have been expected to affect

more vessels (9,711, both alternatives) and result in greater expected increases in TED costs and shrimp revenue loss compared to this proposed rule.

Locations and Times of Public Hearings

Public hearings will be held at the following locations:

1. Larose—Larose Regional Park and Civic Center, 307 East 5th Street, Larose, LA 70373.

2. Gretna—Coastal Communities Consulting, Inc. Offices, 925 Behrman Highway, Suite 15, Gretna, LA 70056.

3. Belle Chasse—Belle Chasse Auditorium, 8398 Highway 23, Belle Chasse, LA 70037.

4. Biloxi—Biloxi Visitor's Center, 1050 Beach Boulevard, Biloxi, MS 39530.

5. Bayou La Batre—Bayou La Batre Community Center, 12745 Padgett Switch Road, Bayou La Batre, AL 36509.

6. Morehead City—Crystal Coast Civic Center, 3505 Arendell Street, Morehead City, NC 28557.

The public hearing dates are:

1. January 9, 2017, 4 p.m. to 6 p.m., Larose, LA.

2. January 10, 2017, 12 p.m. to 2 p.m., Gretna, LA.

3. January 10, 2017, 4 p.m. to 6 p.m., Belle Chasse, LA.

4. January 11, 2017, 4 p.m. to 6 p.m., Biloxi, MS.

5. January 12, 2017, 10 a.m. to 12 p.m., Bayou La Batre, AL.

6. January 18, 2017, 12 p.m. to 2 p.m., Morehead City, NC.

Vietnamese translation services will be available at the January 10, 2017, meeting in Gretna, LA.

List of Subjects in 50 CFR Part 223

Endangered and threatened species; Exports; Imports; Transportation.

Dated: December 12, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 223 is proposed to be amended as follows:

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES.

■ 1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531–1543; subpart B, § 223.201–202 also issued under 16 U.S.C. 1361 *et seq.;* 16 U.S.C. 5503(d) for § 223.206(d)(9).

■ 2. In § 223.206, revise paragraphs (d)(2)(ii)(A)(*3*) and (d)(3)(i) to read as follows:

§ 223.206 Exceptions to prohibitions relating to sea turtles.

* * * * *

(d) * * *

(2) * * *

(ii) * * *

(A) * * *

(*3*) Has only a wing net rigged for fishing and is fishing only in Miami-Dade County, Florida;

* * * * *

(3) *Tow-time restrictions*–(i) *Duration of tows.* If tow-time restrictions are used pursuant to paragraph (d)(2)(ii), (d)(3)(ii), or (d)(3)(iii) of this section, a shrimp trawler must limit tow times. The tow time begins at the time that the trawl door enters the water and ends at the time that the trawl door is removed from the water. For a trawl that is not attached to a door, the tow time begins at the time that the entire net enters the water and ends at the time that the entire net is removed from the water. Tow times may not exceed:

* * * * *

■ 3. In § 223.207,

■ a. Revise paragraphs (a)(4), (a)(6), (a)(7)(ii)(B) and (C), and (d)(3)(ii) and (iii); and

■ b. Add paragraph (d)(3)(v) to read as follows:

§ 223.207 Approved TEDs.

* * * * *

(a) * * *

(4) *Space between bars.* The space between deflector bars and the deflector bars and the TED frame must not exceed 4 inches (10.2 cm) except for TEDs installed in skimmer trawls, pusher-head trawls, and wing nets, where the space between deflector bars and the deflector bars and the TED frame must not exceed 3 inches (7.6 cm).

* * * * *

(6*) Position of the escape opening.* The escape opening must be made by removing a rectangular section of webbing from the trawl, except for a TED with an escape opening size described at paragraph (a)(7)(ii)(A) of this section for which the escape opening may alternatively be made by making a horizontal cut along the same plane as the TED. The escape opening must be centered on and immediately forward of the frame at either the top or bottom of the net when the net is in the deployed position. The escape opening must be at the top of the net when the slope of the deflector bars from forward to aft is upward, and must be at the bottom when such slope is downward. The passage from the mouth of the trawl through the escape opening must be completely clear of any obstruction or modification, other than those specified in paragraph (d) of this section. A TED installed in a skimmer trawl, pusher-head trawl, or wing net rigged for fishing must have the escape opening oriented at the top of the net.

(7) * * *

(ii) * * *

(B) *The 71-inch opening.* The two forward cuts of the escape opening must not be less than 26 inches (66 cm) long from the points of the cut immediately forward of the TED frame. The resultant length of the leading edge of the escape opening cut must be no less than 71 inches (181 cm) with a resultant circumference of the opening being 142 inches (361 cm) (Figure 12 to this part). A webbing flap, as described in paragraph (d)(3)(ii) or (d)(3)(v) of this section, may be used with this escape hole, so long as this minimum opening size is achieved. Either this opening or the one described in paragraph (a)(7)(ii)(C) of this section must be used in all offshore waters and in all inshore waters in Georgia and South Carolina, but may also be used in other inshore waters.

(C) *Double cover opening.* The two forward cuts of the escape opening must not be less than 20 inches (51 cm) long from the points of the cut immediately forward of the TED frame. The resultant length of the leading edge of the escape opening cut must be no less than 56 inches (142 cm)(Figure 16 to this part illustrates the dimensions of these cuts). A webbing flap, as described in paragraph (d)(3)(iii) or (d)(3)(v) of this section, may be used with this escape hole. Either this opening or the one described in paragraph (a)(7)(ii)(B) of this section must be used in all offshore waters and in all inshore waters in Georgia and South Carolina, but may also be used in other inshore waters.

* * * * *

(d) * * *

(3) * * *

(ii) *71-inch TED flap.* The flap must be a 133-inch (338-cm) by 52-inch (132-cm) piece of webbing. The 133-inch (338-cm) edge of the flap is attached to the forward edge of the opening (71-inch (180-cm) edge). The flap may extend no more than 24 inches (61 cm) behind the posterior edge of the grid (Figure 12 to this part illustrates this flap).

(iii) *Double cover TED flap.* This flap must be composed of two equal size rectangular panels of webbing. Each panel must be no less than 58 inches (147.3 cm) wide and may overlap each other no more than 15 inches (38.1 cm). The panels may only be sewn together along the leading edge of the cut. The trailing edge of each panel must not

extend more than 24 inches (61 cm) past the posterior edge of the grid (Figure 16 to this part). Each panel may be sewn down the entire length of the outside edge of each panel. Paragraph (d)(3) of this section notwithstanding, this flap may be installed on either the outside or inside of the TED extension. For interior installation, the flap may be sewn to the interior of the TED extension along the leading edge and sides to a point intersecting the TED frame; however, the flap must be sewn to the exterior of the TED extension from the point at which it intersects the TED frame to the trailing edge of the flap. Chafing webbing described in paragraph (d)(4) of this section may not be used with this type of flap.

* * * * *

(v) *Small turtle TED flap.* If the angle of the deflector bars of a bent bar TED used by a skimmer trawl, pusher-head trawl, or wing net exceeds 45°, or if a double cover opening straight bar TED (at any allowable angle) is used by a skimmer trawl, pusher-head trawl, or wing net, the flap must not consist of twine size greater than number 15 (1.32-mm thick) on webbing flaps described in paragraphs (d)(3)(i), (d)(3)(ii), (d)(3)(iii), or (d)(3)(iv) of this section.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 160906822–6999–01]

RIN 0648–BG33

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Amendment 37

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to implement management measures described in Amendment 37 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP), as prepared and submitted by the South Atlantic Fishery Management Council (South Atlantic Council). If implemented, this proposed rule would modify the management unit boundaries for hogfish in the South Atlantic by establishing two hogfish stocks, a Georgia through North Carolina (GA/NC) stock and a Florida Keys/East Florida (FLK/EFL) stock; establish a rebuilding plan for the FLK/EFL hogfish stock; specify fishing levels and accountability measures (AMs), and modify or establish management measures for the GA/NC and FLK/EFL stocks of hogfish. The purpose of this proposed rule is to manage hogfish using the best scientific information available while ending overfishing and rebuilding the FLK/EFL hogfish stock.

DATES: Written comments must be received by January 17, 2017.

ADDRESSES: You may submit comments on the proposed rule, identified by ''NOAA–NMFS–2016–0068'' by either of the following methods:

- *Electronic Submission:* Submit all electronic comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0068,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit all written comments to Nikhil Mehta, NMFS Southeast Regional Office (SERO), 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of Amendment 37 may be obtained from *www.regulations.gov* or the SERO Web site at *http://sero.nmfs.noaa.gov*. Amendment 37 includes a final environmental impact statement, initial regulatory flexibility analysis (IRFA), regulatory impact review, and fishery impact statement.

FOR FURTHER INFORMATION CONTACT: Nikhil Mehta, NMFS SERO, telephone: 727–824–5305, or email: *nikhil.mehta@noaa.gov*.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery in the South Atlantic includes hogfish and is managed under the FMP. The FMP was prepared by the South Atlantic Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Background

The Magnuson-Stevens Act requires that NMFS and regional fishery management councils prevent overfishing and achieve, on a continuing basis, the optimum yield (OY) from federally managed fish stocks. These mandates are intended to ensure that fishery resources are managed for the greatest overall benefit to the nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems. To further this goal, the Magnuson-Stevens Act requires fishery managers to minimize bycatch and bycatch mortality to the extent practicable.

Currently, hogfish is managed under the FMP as a single stock in the South Atlantic from the jurisdictional boundary between the South Atlantic Council and Gulf of Mexico Fishery Management Council (Gulf Council) (approximately the Florida Keys) to a line extending seaward from the North Carolina and Virginia state border. The current stock status determination criteria, such as maximum sustainable yield (MSY) and minimum stock size threshold (MSST), annual catch limits (ACLs), recreational annual catch targets (ACTs), AMs, and management measures in the FMP, are established for a single stock of hogfish for the South Atlantic region. The most recent stock assessment for hogfish was completed in 2014 through the Southeast Data, Assessment, and Review process (SEDAR 37). SEDAR 37 identified two separate stocks of hogfish in the South Atlantic region under the jurisdiction of the South Atlantic Council, and one stock of hogfish in the Gulf of Mexico (Gulf) under the jurisdiction of the Gulf Council. In the South Atlantic region, one stock of hogfish was identified to exist off North Carolina, South Carolina, and Georgia; and a separate stock of hogfish was identified to exist off the Florida Keys and east Florida. The South Atlantic Council's Scientific and Statistical Committee (SSC) did not consider the SEDAR 37 results for the GA/NC stock as sufficient to determine stock status and inform South Atlantic Council management decisions, and the South Atlantic Council concurred. NMFS agreed and determined that the overfishing and overfished status determination of the GA/NC stock is unknown. The SSC did consider the SEDAR 37 results as sufficient to

determine the stock status and inform management decisions for the FLK/EFL stock, and the South Atlantic Council concurred. NMFS agreed and determined that the FLK/EFL stock is currently undergoing overfishing and is overfished. Based on SEDAR 37, NMFS also determined that the West Florida hogfish stock in the Gulf, which occurs off the west coast of Florida to Texas, is neither overfished, nor undergoing overfishing. NMFS notified the South Atlantic Council of these stock status determinations via letter on February 17, 2015.

Management Measures Contained in This Proposed Rule

This proposed rule would revise the hogfish fishery management unit in the FMP by establishing two hogfish stocks, one in Federal waters off Georgia through North Carolina and one in Federal waters off the Florida Keys and east Florida; specify ACLs and AMs; and modify or establish management measures for the GA/NC and FLK/EFL stocks of hogfish. All weights of hogfish are described in round weight.

Fishery Management Unit for Hogfish

Currently, hogfish is managed as a single stock in Federal waters in the South Atlantic region from the jurisdictional boundary between the South Atlantic and Gulf Councils to the North Carolina and Virginia state border. This proposed rule would establish new stock boundaries and create two stocks of hogfish in Federal waters under the jurisdiction of the South Atlantic Council. The first stock would be the GA/NC stock, with a southern boundary extending from the Florida and Georgia state border extending northward to the North Carolina and Virginia state border. The second stock would be the FLK/EFL hogfish stock, with a southern boundary extending from 25°09′ N. lat. near Cape Sable on the west coast of Florida. The management area would extend south and east around the Florida Keys and have a northern border extending from the Florida and Georgia state border.

The Gulf Council has approved Amendment 43 to the FMP for the Reef Fish Resources of the Gulf, and has selected the same boundary near Cape Sable on the west coast of Florida to separate the FLK/EFL hogfish stock from the West Florida hogfish stock. In accordance with section 304(f) of the Magnuson-Stevens Act, the Gulf Council requested that the Secretary of Commerce designate the South Atlantic Council as the responsible Council for management of the FLK/EFL hogfish stock in Gulf Federal waters south of 25°09′ N. lat. near Cape Sable on the west coast of Florida. On November 23, 2016, NMFS published a proposed rule in the **Federal Register** to implement Amendment 43 (81 FR 84538, November 23, 2016). If NMFS implements Amendment 43, the Gulf Council would continue to manage hogfish in Federal waters in the Gulf (the West Florida hogfish stock), except in Federal waters south of this boundary. Therefore, the South Atlantic Council, and not the Gulf Council, would establish the management measures for the entire range of the FLK/EFL hogfish stock, including in Federal waters south of 25°09′ N. lat. near Cape Sable in the Gulf. Vessels fishing for hogfish in Gulf Federal waters, *i.e.,* north and west of the jurisdictional boundary between the Gulf and South Atlantic Councils (approximately at the Florida Keys), as defined at 50 CFR 600.105(c), would still be required to have the appropriate Federal Gulf reef fish permits, and vessels fishing for hogfish in South Atlantic Federal waters, *i.e.,* south and east of the jurisdictional boundary, would still be required to have the appropriate Federal South Atlantic snapper-grouper permits. Federal permit holders would still be required to follow the sale and reporting requirements associated with the respective permits.

As described in Amendment 37, the proposed stock boundary near Cape Sable, Florida, would aid law enforcement personnel, because it coincides with an existing State of Florida management boundary for certain state-managed species, and it would simplify regulations across adjacent state and Federal management jurisdictions. NMFS specifically seeks public comment regarding the revised stock boundaries and the manner in which the Councils would have jurisdiction over these stocks if both Amendment 37 for the South Atlantic Council and Amendment 43 for the Gulf Council are approved and implemented. NMFS published notices of availability in the **Federal Register**, seeking comments on Amendment 37 and Amendment 43, on October 7, 2016, and November 4, 2016, respectively (81 FR 69774 and 81 FR 76908). On November 23, 2016, NMFS published a proposed rule to implement Amendment 43 in the **Federal Register** that also solicited public comment (81 FR 84538, November 23, 2016).

ACLs and OY for the GA/NC and FLK/EFL Hogfish Stocks

Currently, the total acceptable biological catch (ABC) for the single hogfish stock (equal to ACL and OY) in the FMP is 134,824 lb (61,155 kg), with a commercial ACL sector allocation (36.69 percent) of 49,469 lb (22,439 kg), and recreational ACL sector allocation (63.31 percent) of 85,355 lb (38,716 kg). Because SEDAR 37 was not deemed sufficient to specify an ABC recommendation for the GA/NC stock of hogfish, the SSC applied Level 4 of the South Atlantic Council's ABC control rule to arrive at their ABC recommendation for this stock. Level 4 is appropriate for unassessed stocks with only reliable catch data, and involves selection of a ''catch statistic,'' a scalar to describe the risk of overexploitation for the stock, and a scalar to describe the management risk level. Amendment 29 updated the South Atlantic Council's ABC control rule, including Level 4 for unassessed stocks (80 FR 30947, June 1, 2015). The SSC provides the first two criteria for each stock, and the South Atlantic Council specifies their management risk level for each stock. For the GA/NC hogfish stock, this proposed rule and Amendment 37 would specify an ABC of 35,716 lb (16,201 kg), a total ACL and OY (equal to 95 percent of the ABC) of 33,930 lb (15,390 kg), and commercial and recreational ACLs based on re-calculated sector allocations of 69.13 percent to the commercial sector and 30.87 percent to the recreational sector. It was necessary to re-calculate the sector allocations based on the existing formula from the South Atlantic Council's Comprehensive ACL Amendment (77 FR 15916, March 16, 2012), to reflect the appropriate landings for each sector from the relevant geographic region of the new stock. Through this proposed rule, the commercial ACL would be 23,456 lb (10,639 kg) and the recreational ACL would be 988 fish. For the GA/NC stock of hogfish, the South Atlantic Council decided to specify the ABC, total ACL, and commercial ACL in pounds and the recreational ACL in numbers of fish. Commercial landings are already tracked in pounds while recreational landings are tracked in numbers of fish. Additionally, because Amendment 37 also considers changing the minimum size limit for this stock of hogfish, specifying the recreational ACL in pounds could potentially increase the risk of exceeding the ABC in pounds because larger fish are heavier. Therefore, the South Atlantic Council determined that there would be a lower risk of exceeding the recreational ACL due to an increase in the minimum size limit if the recreational ACL were to be specified in numbers of fish.

The SSC considered the SEDAR 37 results sufficient to provide an ABC recommendation for the FLK/EFL stock of hogfish, and the South Atlantic Council concurred with their recommendation. The ABC for the FLK/EFL stock is derived from projections in SEDAR 37, and the projections were provided in both pounds and numbers of fish. The South Atlantic Council determined that for this stock of hogfish, it was more appropriate to specify the ABC, total ACL, and recreational ACL in numbers of fish, and the commercial ACL in pounds (since recreational landings are tracked in numbers of fish and commercial landings are tracked in pounds). Therefore, Amendment 37 would specify an ABC of 17,930 fish for this stock, which would increase annually through 2027 when the ABC would be 63,295 fish. The total ACL and OY would be equal to 95 percent of the ABC, and the commercial and recreational ACLs would be based on re-calculated sector allocations of 9.63 percent to the commercial sector and 90.37 percent to the recreational sector. As discussed above, the re-calculated sector allocations are based on the South Atlantic Council's existing allocation formula and are necessary to reflect the appropriate landings for each sector from the relevant geographic region of the new stock. In 2017, the total ACL (and OY) would be 17,034 fish, the commercial ACL would be 3,510 lb (1,592 kg), and the recreational ACL would be 15,689 fish and would increase annually through 2027 as the stock rebuilds. In 2027, the total ACL (and OY) for the FLK/EFL hogfish stock would be 60,130 fish, the commercial ACL would be 17,018 lb (7,719 kg), and recreational ACL would be 53,610 fish.

AMs for the Commercial and Recreational Sectors for Both the GA/NC and FLK/EFL Hogfish Stocks

The current South Atlantic commercial AMs for the single hogfish stock consist of an in-season closure of the commercial sector if the commercial ACL is met or projected to be met. If the commercial ACL is exceeded, a post-season AM would reduce the commercial ACL by the amount of the commercial ACL overage during the following fishing year if the total ACL (commercial ACL plus recreational ACL) is also exceeded and hogfish are overfished. This proposed rule would retain the current South Atlantic in-season and post-season AMs for the commercial sector, as specified in 50 CFR 622.193(u)(1), and apply them to both the GA/NC and FLK/EFL hogfish stocks.

The current South Atlantic recreational AMs for the single hogfish stock consist of an in-season closure of the recreational sector if the recreational ACL is met or is projected to be met. If the recreational ACL is exceeded, then during the following fishing year, NMFS will monitor for a persistence in increased landings. The post-season AM would reduce the length of the recreational season and the recreational ACL by the amount of the recreational ACL overage if the total ACL is also exceeded and hogfish are overfished. This proposed rule would retain the current South Atlantic recreational AMs, as specified in 50 CFR 622.193(u)(2), and apply them to both the GA/NC and FLK/EFL hogfish stocks.

Minimum Size Limits for the GA/NC and FLK/EFL Hogfish Stocks

The current minimum size limit for the single hogfish stock in the South Atlantic is 12 inches (30.5 cm), fork length (FL), for both the commercial and recreational sectors. For both the commercial and recreational sectors, this proposed rule would increase the minimum size limit to 17 inches (43.2 cm), FL, for the GA/NC hogfish stock, and 16 inches (40.6 cm), FL, for the FLK/EFL hogfish stock. Hogfish are protogynous: Fish mature as females first and are expected to eventually become male if they live long enough; they are pair spawners; and they form harems. The number and gender of hogfish in a local group influences the size and age range at which sexual transition occurs. Considering these life history characteristics, the South Atlantic Council determined these proposed minimum size limits could serve as a precautionary approach to address population stability for hogfish off Georgia through North Carolina, and reduce disruption to spawning, avoid recruitment overfishing, and benefit the spawning populations off the Florida Keys and east Florida.

Commercial Trip Limit for the GA/NC and FLK/EFL Hogfish Stocks

Currently, there is no commercial trip limit for hogfish in the South Atlantic. This proposed rule would establish a commercial trip limit of 500 lb (227 kg) for the GA/NC stock, and 25 lb (11 kg) for the FLK/EFL stock. As described in Amendment 37, few commercial fishermen catch more than 500 lb (227 kg) of hogfish per trip off Georgia through North Carolina, and the proposed commercial ACL is not expected to be met. However, the South Atlantic Council is concerned that commercial fishermen may shift effort from the FLK/EFL stock to the GA/NC stock because of the proposed restrictions to the FLK/EFL stock. Therefore, the South Atlantic Council proposed a 500-lb (227-kg) commercial trip limit for the GA/NC stock to enable commercial harvest in that geographic area to take place year-round. Furthermore, as described in Amendment 37, the majority of commercial fishermen landed 25 lb (11 kg) or less of hogfish per trip off the Florida Keys and east Florida area. The South Atlantic Council determined that implementing a commercial trip limit of 25 lb (11 kg) for the FLK/EFL hogfish stock would restrict harvest and help to prevent a commercial in-season closure.

Recreational Bag Limits for the GA/NC and FLK/EFL Hogfish Stocks

The current recreational bag limit for hogfish in the South Atlantic is five fish per person per day in Federal waters off Florida, with no recreational bag limit in Federal waters off Georgia, South Carolina, and North Carolina. This proposed rule would set a recreational bag limit of one fish per person per day in Federal waters off the Florida Keys and east coast of Florida, and a recreational bag limit of two fish per person per day in Federal waters off Georgia through North Carolina. The South Atlantic Council determined that these bag limits would reduce harvest and help to prevent a recreational in-season closure.

Recreational Fishing Season for the FLK/EFL Hogfish Stock

Currently, hogfish is available for the recreational sector to harvest year-round, as long as the recreational ACL has not been met. This proposed rule would establish a recreational fishing season from May through October for the FLK/EFL hogfish stock, with recreational harvest prohibited from January through April and from November through December each year. As described in Amendment 37, hogfish spawning activity occurs predominantly during the months of December through April, and begins (and ends) slightly earlier in the Florida Keys than on the West Florida shelf (*e.g.,* from the Florida panhandle south along the west coast of Florida to Naples, Florida). Analysis in Amendment 37 showed that based on the proposed recreational ACLs, minimum size limits, and recreational bag limits, a recreational fishing season that is open for 6 months would help constrain recreational landings below the recreational ACL for the FLK/EFL hogfish stock. The South Atlantic Council determined that specifying a May through October fishing season would protect the overfished FLK/EFL

hogfish stock during the peak spawning season, and the proposed ACLs and AMs would help ensure overfishing does not occur. The South Atlantic Council decided not to establish a recreational fishing season for the GA/NC hogfish stock because that stock does not seem to be experiencing heavy fishing pressure, and the average recreational landings in recent years have been well below the proposed recreational ACL.

Management Measures Contained in Amendment 37 But Not Codified Through This Proposed Rule

In addition to the management measures that this proposed rule would implement, Amendment 37 includes actions to specify fishing levels and recreational ACTs for the GA/NC and FLK/EFL hogfish stocks, and establish a rebuilding plan for the FLK/EFL hogfish stock.

MSY and MSST for the GA/NC and FLK/EFL Hogfish Stocks

Currently, MSY for the single hogfish stock in the South Atlantic is the yield produced by the fishing mortality rate at MSY (F_{MSY}) or the F_{MSY} proxy, and MSST is equal to the spawning stock biomass at MSY (SSB_{MSY}) * (1–M) or 0.5, whichever is greater (where M equals natural mortality). However, MSY and MSST values for the single hogfish stock are unknown because hogfish were unassessed until recently. Amendment 37 would specify the MSY for the GA/NC and FLK/EFL stocks of hogfish as equal to the yield produced by F_{MSY} or the F_{MSY} proxy, with the MSY and F_{MSY} proxy recommended by the most recent stock assessment. Based on SEDAR 37, the resulting MSY for the FLK/EFL hogfish stock is 346,095 lb (156,986 kg), and is unknown for the GA/NC hogfish stock. Amendment 37 would specify the MSST for these two stocks of hogfish at 75 percent of SSB_{MSY}, which results in an unknown MSST value for the GA/NC hogfish stock, and an MSST for the FLK/EFL hogfish stock of 1,725,293 lb (782,580 kg). The proposed MSST for hogfish is consistent with how the South Atlantic Council has defined MSST for other snapper-grouper stocks with low natural mortality estimates, and SEDAR 37 estimated the natural mortality for hogfish at 0.179.

Recreational ACTs for the GA/NC and FLK/EFL Hogfish Stocks

The recreational ACT for the current hogfish stock is 59,390 lb (26,939 kg). Amendment 37 specifies a recreational ACT (equal to 85 percent of the recreational ACL) of 840 fish for the GA/NC stock and 13,335 fish for the FLK/EFL stock in 2017. The recreational ACT for the FLK/EFL stock would increase annually from 2017 through 2027 as the stock rebuilds. NMFS notes that the current and proposed recreational ACTs are used only for monitoring and do not trigger an AM.

Rebuilding Plan for the FLK/EFL Hogfish Stock

Because the FLK/EFL hogfish stock is overfished, Amendment 37 would establish a rebuilding plan that would set the ABC equal to the yield at a constant fishing mortality rate and rebuild the stock in 10 years with a 72.5 percent probability of success. Year 1 of the rebuilding plan would be 2017, and 2027 would be the last year. The South Atlantic Council's SSC indicated that harvest levels proposed in the Amendment 37 rebuilding plan are sustainable and would achieve the goal of rebuilding the FLK/EFL hogfish stock. The ABC for the FLK/EFL hogfish stock would be 17,930 fish in 2017 and would increase annually through 2027 when the ABC would be 63,295 fish.

Additional Proposed Change to Codified Text Not in Amendment 37

In addition to the measures described for Amendment 37, this final rule would correct an error in Table 1 to § 622.1—FMPs Implemented Under Part 622. In 2013, the final rule for Amendment 27 to the FMP inadvertently removed two footnotes from the entry for the FMP in Table 1 of § 622.1 (78 FR 78770, December 27, 2013). This final rule corrects that error and inserts those footnotes back into the entry for the FMP in Table 1 of § 622.1.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the Assistant Administrator has determined that this proposed rule is consistent with Amendment 37, the FMP, the Magnuson-Stevens Act, and other applicable laws, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

NMFS prepared an IRFA for this proposed rule, as required by section 603 of the RFA, 5 U.S.C. 603. The IRFA describes the economic impact that this proposed rule, if implemented, would have on small entities. A description of the proposed rule, why it is being considered, and the objectives of and legal basis for this proposed rule are contained at the beginning of this CLASSIFICATION section in the preamble and in the **SUMMARY** section of the preamble. A copy of the full analysis is available from NMFS (see **ADDRESSES**). A summary of the IRFA follows.

The Magnuson-Stevens Act provides the statutory basis for this proposed rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting, record-keeping, or other compliance requirements are introduced by this proposed rule. Accordingly, this proposed rule does not implicate the Paperwork Reduction Act.

This proposed rule, if implemented, would apply to all federally-permitted commercial vessels and recreational anglers that fish for or harvest hogfish in Federal waters of the South Atlantic. It would not directly apply to or regulate charter vessels and headboats (for-hire vessels), since for-hire vessels sell fishing services to recreational anglers and the proposed changes to the hogfish management measures would not directly alter the services sold by these vessels. However, the proposed changes would affect when recreational anglers on for-hire trips are allowed to fish for or retain hogfish, as well as the quantity and size of hogfish that are harvested. Any change in demand for for-hire fishing services, and associated economic effects, as a result of this proposed rule would be a consequence of behavioral change by anglers, secondary to any direct effect on anglers and, therefore, an indirect effect of the proposed rule. Because the effects on for-hire vessels would be indirect, they fall outside the scope of the RFA. For-hire captains and crew are permitted to retain hogfish under the recreational bag limit; however, they are not permitted to sell these fish. As such, for-hire captains and crew are only affected as recreational anglers. The RFA does not consider recreational anglers to be small entities, so they are outside the scope of this analysis, and only the impacts on commercial vessels will be discussed.

As of May 25, 2016, there were 552 valid or renewable Federal South Atlantic snapper-grouper unlimited permits and 116 valid or renewable 225-lb (102-kg) trip-limited permits. Each of these commercial permits is associated with an individual vessel. Data from the years of 2010 through 2014, the most recent data available at the time the analysis was conducted, were used in Amendment 37 and these data provided the basis for the South Atlantic Council's decisions. Although this proposed rule would apply to all commercial snapper-grouper permit holders, it is expected that the vessels that harvest hogfish would most likely be affected. On average from 2010

through 2014, there were 135 federally-permitted commercial fishing vessels with reported landings of hogfish. Their average annual vessel-level revenue from all species for 2010 through 2014 was approximately $59,000 (2014 dollars). During this period, there were an average of 62 vessels that harvested hogfish in the GA/NC stock area and 77 vessels that harvested hogfish in the FLK/EFL stock area. Their average annual revenue from all species (2010 through 2014) was approximately $83,000 and $44,000 (2014 dollars) in the two stock areas, respectively. Some of these vessels reported hogfish landings from both stock areas and are, therefore, included in the vessel counts for both stock areas. The maximum annual revenue for all species reported by a single one of the 135 vessels identified above, in 2014, was approximately $1 million (2014 dollars).

For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. All of the commercial vessels directly regulated by this proposed rule are believed to be small entities based on the NMFS size standard.

No other small entities that would be directly affected by this proposed rule have been identified.

There are currently 668 federally-permitted commercial vessels eligible to fish for the snapper-grouper species managed under the FMP. Based on the analysis included in Amendment 37, NMFS expects 135 of these vessels would be affected by this proposed rule (approximately 20 percent). Because all entities expected to be affected by this proposed rule are small entities, NMFS has determined that this proposed rule would affect a substantial number of small entities. Moreover, the issue of disproportionate effects on small versus large entities does not arise in the present case.

This proposed rule would modify the snapper-grouper Fishery Management Unit for hogfish, specifying two stocks of hogfish: (1) A GA/NC stock from the Georgia/Florida state boundary to the North Carolina/Virginia state boundary, and (2) a FLK/EFL stock from the Florida/Georgia state boundary south to a line extending due west from 25°09′ N. lat. just south of Cape Sable on the west coast of Florida. Amendment 37 would also specify MSY and MSST values for each of these stocks. For both the GA/NC and FLK/EFL stocks, MSY would be set equal to the yield produced by F_{MSY} or the F_{MSY} proxy ($F_{30\%SPR}$) and MSST would be set equal to 75 percent of SSB_{MSY}. Specifying separate hogfish stocks, as well as management reference points (MSY and MSST) for those stocks, would not directly alter the current harvest of the hogfish resource. Therefore, these changes would not be expected to have any direct economic effects on any small entities. They would, however, influence other components of this proposed rule that would be expected to have direct economic effects.

This proposed rule would also establish a total ACL of 33,930 lb (15,390 kg), round weight, for the GA/NC stock of hogfish, which is equal to 95 percent of the ABC recommended by the Council's SSC. Using the existing allocation formula specified in the Comprehensive ACL Amendment and landings data specific to the GA/NC stock area, the commercial ACL for the GA/NC stock of hogfish would be set constant at 23,456 lb (10,639 kg). Based on average annual landings for 2012 through 2014 off Georgia through North Carolina, the commercial sector would be expected to land only 20,534 lb (9,314 kg) under the status quo in 2017, with an estimated ex-vessel value of $76,797 (2014 dollars). Because the proposed commercial ACL is higher than the estimated status quo commercial landings for 2017, it would not be expected to have any short-term direct negative economic effects on commercial vessels. Due to increasing uncertainty as projections extend further into the future, status quo commercial landings estimates for years subsequent to 2017 were not calculated. The proposed commercial ACL would provide the potential for landings to increase by 2,922 lb (1,325 kg) relative to average historical commercial landings (2012 through 2014). Using the average annual hogfish price per pound from 2012 through 2014, this would represent a potential increase in ex-vessel revenue of $10,928 (2014 dollars) overall. Divided by the average number of commercial vessels that harvested hogfish in the GA/NC stock area from 2010 through 2014, this would be an increase of approximately $176 per vessel.

In addition, Amendment 37 would establish a rebuilding plan, beginning in 2017, for the FLK/EFL stock, where the rebuilding strategy sets ABC equal to the yield at a constant fishing mortality rate and rebuilds the stock in 10 years with a 72.5 percent probability of rebuilding success. This proposed rebuilding plan would provide the basis for setting ACLs but would not directly alter the current harvest of the hogfish resource. Therefore, it would not be expected to have direct economic effects on any small entities.

The proposed rule would also establish a total ACL, in numbers of fish, for the FLK/EFL stock of hogfish for 2017 through 2027. The total ACL each year would be set equal to 95 percent of the ABC values specified in the proposed rebuilding plan. In 2017, the total ACL would be 17,034 fish and would increase each year until reaching 60,130 fish in 2027. Using the existing allocation formula specified in the Comprehensive ACL Amendment and landings data specific to the FLK/EFL stock area, the commercial ACL for the FLK/EFL stock of hogfish would be set at 3,510 lb (1,592 kg) in 2017 and would increase each year until reaching 17,018 lb (7,719 kg) in 2027. In Amendment 37, a time series model was fit to historical landings data (1997 through 2014) for the FLK/EFL stock area in order to project commercial landings under the status quo in 2017. The commercial sector would be expected to land an estimated 20,380 lb (9,244 kg) of hogfish under the status quo in 2017, worth $76,213 (2014 dollars). Due to increasing uncertainty as projections extend further into the future, status quo commercial landings estimates for years subsequent to 2017 were not calculated. Assuming the proposed commercial ACL for FLK/EFL hogfish is harvested in full, it would represent a reduction in ex-vessel revenue of $63,086 (2014 dollars), or 83 percent, relative to estimated 2017 status quo revenue. This assumes that ex-vessel revenue from other commercially harvested species would not be substituted for the loss in hogfish revenue. Divided by the average number of commercial vessels that harvested hogfish in the FLK/EFL stock area from 2010 through 2014, this would be a decrease of approximately $819 (2014 dollars) per vessel. It is assumed that ex-vessel revenue from FLK/EFL hogfish will increase relative to the proposed annual increases in the commercial ACL from 2017 through 2027. This would lessen the negative economic effects of this proposed rule on commercial vessels each year.

This proposed rule would increase the commercial minimum size limit for both stocks of hogfish as well. The minimum size limit for the GA/NC stock would be increased from 12 inches (30.5 cm), FL, to 17 inches (43.2 cm), FL, and the minimum size limit for the FLK/EFL

stock would be increased from 12 inches (30.5 cm), FL, to 16 inches (38.1 cm), FL.

The proposed minimum size limit increase for the GA/NC stock was estimated to reduce commercial landings by only 406 lb (184 kg) in 2017. This would translate into a $1,478 (2014 dollars) reduction in ex-vessel revenue overall, or $24 per vessel. This assumes that ex-vessel revenue from other species would not be substituted for the loss in hogfish revenue. Under the proposed commercial ACL for GA/NC hogfish, the season would be expected to be open year-round and would not change as a result of the proposed minimum size limit. Assuming effort, harvest rates, and hogfish prices remain constant, then the expected economic effects of the proposed minimum size limit in future years would be equivalent to those of 2017.

For the FLK/EFL stock, the proposed minimum size limit increase would not be expected to reduce aggregate commercial landings or ex-vessel revenue in 2017. This assumes that ex-vessel hogfish prices would be unresponsive to temporal changes in landings. In subsequent years, as the FLK/EFL stock ACL increases, the proposed minimum size limit would be more likely than the status quo minimum size limit to prevent the full harvest of the commercial ACL and result in a reduction in aggregate ex-vessel revenue. Under the proposed minimum size limit of 16 inches (38.1 cm), FL, the 2017 fishing season is expected to be open 35 days longer than under the current minimum size limit of 12 inches (30.5 cm), FL. Because fewer legal-sized fish would be available for harvest, this proposed rule may increase harvest costs, and in turn, reduce profitability for some vessels. Conversely, a longer season for FLK/EFL hogfish may have positive economic effects for other vessels by expanding the number of species available for harvest later in the fishing year. Individual vessels would be expected to experience varying levels of economic effects, depending on their fishing practices, profit maximization strategies, and ability to substitute revenue from other species for hogfish revenue. These economic effects cannot be estimated with available data.

This proposed rule would also establish commercial trip limits for each stock of hogfish. The trip limit would be set at 500 lb (227 kg) per trip for the GA/NC stock and 25 lb (11 kg) per trip for the FLK/EFL stock. Currently, there is no commercial trip limit for hogfish in the South Atlantic.

For the GA/NC stock, the proposed commercial trip limit was estimated to result in a $4,470 (2014 dollars) decrease in ex-vessel revenue relative to the status quo. This assumes that ex-vessel revenue from other commercially harvested species would not be substituted for the loss in hogfish revenue. Based on historical harvest rates for 2012 through 2014, it is expected that the proposed commercial trip limit of 500 lb (227 kg), round weight, would only affect spearfishing trips. On average (2010 through 2014), there were 11 vessels with Federal commercial snapper-grouper permits that reported taking at least 1 hogfish trip in the GA/NC stock area, where the majority of revenue from that trip was attributed to spearfishing. Their average annual revenue from all species from 2010 through 2014 was $61,479 (2014 dollars). If the estimated reduction in ex-vessel revenue was borne entirely by these vessels, it would result in a loss of $406 per vessel, or less than 1 percent of their average annual revenue from all species from 2010 through 2014. When the proposed commercial trip limit and proposed minimum size limit for the GA/NC stock are analyzed together, the combined effect on all vessels that fish for hogfish in the corresponding stock area would be an estimated reduction in aggregate ex-vessel revenue of $5,741 (2014 dollars).

For the FLK/EFL stock, the proposed commercial trip limit would not be expected to reduce aggregate commercial landings or ex-vessel revenue in 2017. This assumes that prices would not change as a result of a change in the timing of landings. In subsequent years, as the commercial ACL for the FLK/EFL stock increases, the proposed commercial trip limit of 25 lb (11 kg) would be more likely to prevent full harvest of the commercial ACL and result in a reduction in ex-vessel revenue relative to no trip limit. Under the proposed commercial trip limit, the 2017 fishing season is expected to be open 33 days longer than what would be expected under the proposed commercial ACL of 3,510 lb (1,592 kg) and with no commercial trip limit implemented. Because more trips would be required to harvest the same amount of fish, the proposed commercial trip limit could reduce profitability for some vessels. Conversely, a longer commercial fishing season in the FLK/EFL stock area may have positive economic effects for other vessels by expanding the number of species available for harvest later in the fishing year. On average (2010 through 2014), 37 vessels with Federal commercial snapper-grouper permits took at least 1 trip with hogfish landings in excess of 25 lb (11 kg). Trips with hogfish landings in excess of 25 lb (11 kg) accounted for approximately 28 percent of all hogfish trips reported for the FLK/EFL stock area, on average, from 2010 through 2014. Approximately 66 percent of these were spearfishing trips, 25 percent were trips that used hook-and-line gear, and the remaining 11 percent were trips that used other fishing gear types. Historically (2012 through 2014), 10.1 percent of hogfish landings on hook-and-line trips and approximately 29.4 percent of hogfish landings on spearfishing trips were harvested on trips in excess of the proposed 25 lb (11 kg) commercial trip limit. These statistics suggest that spearfishing trips may be more adversely affected, on average, by the proposed commercial trip limit than hook-and-line trips. However, specific economic effects estimates categorized by fishing gear are not currently available due to the high degree of model uncertainty at the gear level. Individual vessels would be expected to experience varying levels of economic effects, depending on their fishing practices, profit maximization strategies, and ability to substitute other species revenue for hogfish revenue. These economic effects cannot be estimated with available data.

Finally, the proposed rule would establish commercial AMs for the GA/NC and the FLK/EFL stocks of hogfish. These AMs would close the commercial sector for the applicable hogfish stock for the remainder of the fishing year if commercial landings of the applicable stock reach, or are projected to reach, the respective commercial ACL. Additionally, if the commercial ACL is exceeded, NMFS would reduce the stock-specific commercial ACL in the following fishing year by the amount of the commercial ACL overage, only if hogfish is overfished and the total ACL (commercial ACL and recreational ACL) for the respective stock is exceeded. These proposed AMs are the same as the current commercial AMs in place for hogfish in the South Atlantic. It is assumed that the proposed AMs would constrain landings to the proposed commercial ACL for each stock, so no direct economic effects, aside from those already discussed under the proposed ACLs, would be expected to occur. If the proposed AMs do not constrain commercial landings at or below the proposed commercial ACL, then there would be an increase in ex-vessel revenue in the fishing year the AMs are triggered and the commercial

sector closes. Additionally, if the conditions are met for a reduction in the following year's commercial ACL by the amount of the commercial ACL overage, a reduction in ex-vessel revenue in the following fishing year would be expected. The status of the GA/NC stock is currently unknown, so both conditions necessary for a reduction in the following year's commercial ACL would not be met and this provision would only affect the FLK/EFL stock. Because of the timeliness of commercial landings data for federally-permitted vessels, overages and corresponding economic effects would likely be small, should they occur.

In summary, when all of the hogfish management changes in this proposed rule are analyzed together, in 2017 they would result in an estimated reduction in ex-vessel revenue of $5,741 (2014 dollars) for the vessels that harvest hogfish from the GA/NC stock and $63,086 for the vessels that harvest hogfish from the FLK/EFL stock. The proposed changes to the minimum size limit and commercial trip limit would also have the potential to reduce profitability by increasing harvest costs, although these economic effects cannot be estimated with available data. In subsequent years, if hogfish landings from the GA/NC stock increase to reach the proposed commercial ACL, the increase in landings would offset the loss in revenue from the proposed minimum size limit and commercial trip limit, and would generate an increase in ex-vessel revenue of $5,187 (2014 dollars). For the vessels that harvest hogfish from the FLK/EFL stock, it is assumed that ex-vessel revenue from hogfish would increase relative to the proposed annual increases in the commercial ACL from 2017 through 2027. This would lessen the negative economic effects of this proposed rule on commercial vessels each year.

The following discussion describes the alternatives that were not selected as preferred by the South Atlantic Council.

The actions to designate two separate stocks of hogfish in the South Atlantic, set management reference points (MSY and MSST) for those stocks, and establish a rebuilding plan for the FLK/EFL stock of hogfish would not be expected to have any direct economic effects on any small entities, and therefore, the issue of significant alternatives is not relevant.

Two alternatives were considered for the action to specify a stock ACL and OY for the GA/NC stock of hogfish. The first alternative, the no action alternative, would retain the current South Atlantic hogfish stock ACL and would not be expected to alter current harvest or use of the resource. This alternative was not selected by the South Atlantic Council because it would not adhere to the best scientific information available from the most recent hogfish stock assessment. The second alternative is the preferred alternative, which would establish a stock ACL specific to the GA/NC stock of hogfish. This alternative includes three sub-alternatives. The first sub-alternative would set the ACL equal to optimum yield (OY), where OY equals acceptable biological catch (ABC). This sub-alternative would result in a commercial ACL for the GA/NC hogfish stock of 24,690 lb (11,199 kg), round weight, which is approximately 5 percent greater than the proposed commercial ACL. Because status quo landings are not expected to exceed any of the sub-alternative commercial ACL values in the short term, the first sub-alternative would not be expected to have any direct economic effects. However, it would allow for greater potential landings and ex-vessel revenue in the future compared to the preferred alternative in this proposed rule. The first sub-alternative was not selected as preferred by the South Atlantic Council, because the Council determined it was prudent to include a buffer in the stock ACL to account for management uncertainty. The second sub-alternative is the preferred sub-alternative in this proposed rule and would set the stock ACL equal to OY, where OY equals 95 percent of ABC. The third sub-alternative would set the stock ACL equal to OY, where OY equals 90 percent of ABC. This sub-alternative would result in a stock ACL that is approximately 5 percent less than the proposed stock ACL. Based on projected landings for 2017, this would not be expected to have direct economic effects on small entities; however, the potential for future increases in ex-vessel revenue would be less than under this proposed rule. Because allowable harvest and potential ex-vessel revenue would be lower than that under the preferred alternative, this alternative was not selected by the South Atlantic Council.

Two alternatives were considered for the action to specify commercial and recreational ACLs and OY for the FLK/EFL stock of hogfish. The first alternative, the no action alternative, would retain the current South Atlantic hogfish stock ACL and would not be expected to alter current harvest or use of the resource. This alternative was not selected by the South Atlantic Council, because it would not adhere to the best scientific information available from the most recent hogfish stock assessment. The second alternative is the preferred alternative, which would establish commercial and recreational ACLs specific to the FLK/EFL stock of hogfish. This alternative includes three sub-alternatives. The first sub-alternative would set the ACL equal to OY, where OY equals ABC. The commercial hogfish ACL for the FLK/EFL stock would be 3,695 lb (1,676 kg) in 2017 and would increase annually up to 17,914 lb (8,126 kg) in 2027. Under the first sub-alternative, the commercial ACL would be approximately 5 percent greater each year than under the preferred sub-alternative. Assuming the entire commercial ACL is harvested annually, hogfish landings and ex-vessel revenue would also be 5 percent greater under the first sub-alternative than under the preferred sub-alternative. As such, the first sub-alternative would be expected to have less negative economic effects on small entities than this proposed rule. However, it was not selected as preferred by the South Atlantic Council, because they determined it was prudent to include a buffer in the stock ACL to account for management uncertainty. The second sub-alternative is the preferred sub-alternative, which would set the stock ACL equal to OY, where OY equals 95 percent of ABC. The third sub-alternative would set the stock ACL equal to OY, where OY equals 90 percent of ABC. This sub-alternative would result in commercial and recreational ACLs that are approximately 5 percent less each year than under the second (preferred) sub-alternative in this proposed rule and, therefore, would be expected to have more direct negative economic effects on small entities than this proposed rule. Because allowable harvest and expected ex-vessel revenue would be lower than that under the preferred alternative, this alternative was not selected by the South Atlantic Council.

Three alternatives were considered for the action to increase the commercial and recreational minimum size limits for the GA/NC and FLK/EFL stocks of hogfish. The first alternative, the no action alternative, would retain the current South Atlantic hogfish minimum size limit of 12 inches (30.5 cm), FL, for both sectors. This would not be expected to alter commercial harvest rates relative to the status quo, so no direct economic effects to small entities would be expected to occur. This alternative was not selected by the South Atlantic Council, because it would fail to acknowledge important biological differences between the two

stocks of hogfish, as well as stock-specific management needs.

The second alternative, which was selected as preferred, would increase the commercial and recreational minimum size limit for the GA/NC stock. The second alternative contains six sub-alternatives. The first sub-alternative would increase the minimum size limit from 12 inches (30.5 cm), FL, to 16 inches (38.1 cm), FL. This would be expected to result in an annual reduction in commercial ex-vessel revenue of only $479 (2014 dollars), which is $1,041 less than the reduction expected under the proposed minimum size limit. This sub-alternative was not selected as preferred because it would be expected to result in fewer hogfish reaching sexual maturity, fewer hogfish transitioning to males, and more negative biological effects than the proposed minimum size limit. The second sub-alternative is the preferred sub-alternative, which would set the commercial and recreational minimum size limit for the GA/NC stock at 17 inches (43.2 cm), FL. The third through the fifth sub-alternatives would set the commercial and recreational minimum size limit at 18, 19, and 20 inches (45.7, 48.3, and 50.8 cm), FL, respectively. These sub-alternatives were not selected because they would be expected to result in a greater decrease in commercial ex-vessel revenue than the proposed minimum size limit. The sixth sub-alternative would set the commercial and recreational minimum size limit at 15 inches (38.1 cm), FL, in the first year of implementation, 18 inches (45.8 cm), FL, in the second year, and 20 inches (50.8 cm), FL, in the third year. This sub-alternative would be expected to have a smaller direct negative economic effect on small entities than the proposed minimum size limit in the first year of implementation only, and a larger direct negative economic effect thereafter. The sixth sub-alternative was not selected by the South Atlantic Council, because there was little public support for step-up size limit increases, and it would not aid in simplifying regulations.

The third alternative, also selected as preferred, would increase the commercial and recreational minimum size limit for the FLK/EFL stock. The third alternative contains five sub-alternatives. The first and second sub-alternatives would increase the commercial and recreational minimum size limit to 14 and 15 inches (35.6 and 38.1 cm), FL, respectively. These sub-alternatives would not be expected to affect aggregate ex-vessel revenue in the short-term; however, by allowing for potentially higher catch rates, they would be less likely to negatively affect profitability than the proposed minimum size limit. The specific effects on profitability cannot be estimated with available data. These sub-alternatives were not selected by the South Atlantic Council, because they would be expected to result in fewer hogfish reaching sexual maturity, fewer hogfish transitioning to males, and more negative biological effects than the proposed minimum size limit. The third sub-alternative is the preferred sub-alternative, which would increase the commercial and recreational minimum size limit to 16 inches (38.1 cm), FL. The fourth sub-alternative would increase the minimum size limit to 17 inches (43.2 cm), FL, which would be more likely to negatively affect profitability than the proposed minimum size limit and, therefore, was not selected as preferred. The fifth sub-alternative would set the commercial and recreational minimum size limit at 14 inches (35.6 cm), FL, in the first year of implementation and 16 inches (38.1 cm), FL, in the third year. This sub-alternative would provide for a more gradual increase in the minimum size limit up to 16 inches (38.1 cm), FL, which would be expected to have less negative economic effects than the proposed minimum size limit in the first year of implementation and equivalent effects in the third year and beyond. The fifth sub-alternative was not selected by the Council, because it would have less immediate biological benefits to the FLK/EFL hogfish stock, which is currently overfished.

Three alternatives were considered for the action to establish commercial trip limits for the GA/NC and FLK/EFL stocks of hogfish. Under the first alternative, the no action alternative, there would be no commercial trip limit specified for either stock. This would not be expected to alter commercial harvest rates relative to the status quo, so no direct economic effects to small entities would be expected to occur. This alternative was not selected by the South Atlantic Council, because they decided it was necessary to implement stock-specific commercial trip limits in order to successfully constrain commercial hogfish landings and to end overfishing of the FLK/EFL stock.

The second alternative, which was selected as preferred, would establish a commercial trip limit for the GA/NC stock. The second alternative contains five sub-alternatives. The first and second sub-alternatives would set the commercial trip limit at 100 lb (45 kg) and 250 lb (113 kg), respectively, which would be expected to reduce aggregate annual landings and ex-vessel revenue by 43 percent and 19 percent, respectively. These reductions in ex-vessel revenue would be larger than what would be expected under the proposed commercial trip limit and, thus, the first and second sub-alternatives were not selected. The third sub-alternative was selected as preferred and would set the commercial trip limit at 500 lb (227 kg), which was estimated to reduce ex-vessel revenue by 6 percent. The fourth sub-alternative would set the commercial trip limit at 700 lb (318 kg). This sub-alternative would be expected to reduce ex-vessel revenue by only 3 percent, which would translate into $2,287 (2014 dollars) more in aggregate ex-vessel revenue than under the proposed trip limit. The fifth sub-alternative would not specify a commercial trip limit, which would be expected to have no effect on status quo hogfish landings or ex-vessel revenue. Under the fifth sub-alternative, ex-vessel revenue would be $4,470 (2014 dollars) greater than what would be expected under the proposed trip limit. The fourth and fifth sub-alternatives were not selected as preferred because the South Atlantic Council chose to take a precautionary approach to setting the commercial trip limit for the GA/NC stock in order to prevent effort shifts as a result of stricter commercial regulations needed to end overfishing of the FLK/EFL stock. Additionally, the vast majority of commercial trips in Georgia and the Carolinas do not land more than 500 lb (227 kg) of hogfish per trip.

The third alternative, also selected as preferred, would establish a commercial trip limit for the FLK/EFL stock. The third alternative contains six sub-alternatives. The first sub-alternative was selected as preferred and would set the commercial trip limit at 25 lb (11 kg). Sub-alternatives 2 through 5 would set the commercial trip limit at 50 lb (23 kg), 100 lb (45 kg), 150 lb (68 kg), and 200 lb (91 kg), respectively. The sixth sub-alternative would not specify a commercial trip limit. These sub-alternatives for commercial trip limits would not be expected to affect aggregate ex-vessel revenue in the short term, given the low proposed commercial ACL. However, for each incremental increase in the commercial trip limit, the likelihood of direct negative effects on profitability would be reduced. Because of the proposed increasing commercial ACL schedule, sub-alternatives 2 through 5 may provide for greater aggregate annual ex-vessel hogfish revenue and increased profitability on hogfish trips in the

medium to long term, relative to the proposed commercial trip limit. These economic effects cannot be estimated with available data. However, sub-alternatives 2 through 6 were not selected by the South Atlantic Council because, given the overfished status of the stock, the South Atlantic Council wanted to be conservative in setting the commercial trip limit in order to end overfishing and prevent commercial ACL overages.

Four alternatives were considered for the action to establish commercial and recreational AMs for the GA/NC and the FLK/EFL stocks of hogfish. The first alternative, the no action alternative, would retain the current South Atlantic hogfish AMs for both sectors. This alternative was not selected by the South Atlantic Council because stock-specific AMs would be required to ensure landings are constrained to the commercial ACL for each stock. The second alternative was selected as preferred and would specify commercial AMs for each stock that are equivalent to the existing AMs for the single South Atlantic stock. The third and fourth alternatives pertain exclusively to recreational anglers and therefore no direct economic effects on any small entities would be expected.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Gulf of Mexico, Hogfish, Recreational, South Atlantic.

Dated: December 12, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is proposed to be amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.1, revise the Table 1 entry for ''FMP for the Snapper-Grouper Fishery of the South Atlantic Region'', and add footnote 8 to Table 1 to read as follows:

§ 622.1 Purpose and scope.

* * * * *

TABLE 1 TO § 622.1—FMPS IMPLEMENTED UNDER PART 622

FMP title	Responsible fishery management council(s)	Geographic area
*	*	*
FMP for the Snapper-Grouper Fishery of the South Atlantic Region	SAFMC	South Atlantic.[1 2 6 8]
*	*	*

[1] Regulated area includes adjoining state waters for purposes of data collection and quota monitoring.

[2] Black sea bass and scup are not managed by the FMP or regulated by this part north of 35°15.9′ N. lat., the latitude of Cape Hatteras Light, NC.

* * * * * * *

[6] Nassau grouper in the South Atlantic EEZ and the Gulf EEZ are managed under the FMP.

* * * * * * *

[8] Hogfish in the Gulf EEZ are managed under the FMP from the South Atlantic and Gulf of Mexico intercouncil boundary specified in § 600.105(c) and south of 25°09′ N. lat. off the west coast of Florida. Hogfish in the remainder of the Gulf EEZ are managed under the FMP for the Reef Fish Resources of the Gulf of Mexico.

■ 3. In § 622.183, add paragraph (b)(4) to read as follows:

§ 622.183 Area and seasonal closures.

* * * * *

(b) * * *

(4) Hogfish recreational sector off the Florida Keys and east coast of Florida. From January through April and from November through December each year, the recreational harvest or possession of hogfish in or from the South Atlantic EEZ off the Florida Keys and east coast of Florida, and in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida is prohibited, and the bag and possession limits are zero.

* * * * *

■ 4. In § 622.185, revise paragraph (c)(3) to read as follows:

§ 622.185 Size limits.

* * * * *

(c) * * *

(3) *Hogfish.* (i) In the South Atlantic EEZ off Georgia, South Carolina, and North Carolina—17 inches (43.2 cm), fork length.

(ii) In the South Atlantic EEZ off the Florida Keys and east coast of Florida, and in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida—16 inches (38.1 cm), fork length.

* * * * *

■ 5. In § 622.187, revise paragraph (b)(3) to read as follows:

§ 622.187 Bag and possession limits.

* * * * *

(b) * * *

(3) *Hogfish.* (i) In the South Atlantic EEZ off Georgia, South Carolina, and North Carolina—2.

(ii) In the South Atlantic EEZ off the Florida Keys and east coast of Florida, and in the Gulf EEZ south of 25°09′ N. lat. off the west coast of Florida—1.

* * * * *

■ 6. In § 622.191, add paragraph (a)(12) to read as follows:

§ 622.191 Commercial trip limits.

* * * * *

(a) * * *

(12) *Hogfish.* (i) Until the commercial ACL specified in § 622.193(u)(1)(iii)(A) is reached or is projected to be reached off Georgia, South Carolina, and North Carolina, 500 lb (227 kg), round weight.

(ii) Until the commercial ACL specified in § 622.193(u)(2)(iii)(A) is reached or is projected to be reached off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida, 25 lb (11 kg), round weight.

(iii) See § 622.193(u)(1)(i) or (2)(i) for the limitations regarding hogfish after a commercial ACL is reached.

* * * * *

■ 7. In § 622.193, revise paragraph (u) to read as follows:

§ 622.193 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(u) *Hogfish*—(1) *Hogfish off Georgia, South Carolina, and North Carolina (Georgia-North Carolina)*—(i) *Commercial sector.* (A) If commercial landings for the Georgia-North Carolina hogfish stock, as estimated by the SRD, reach or are projected to reach the commercial ACL specified in paragraph (u)(1)(iii)(A) of this section, the AA will file a notification with the Office of the Federal Register to close the commercial sector for the remainder of the fishing year. On and after the effective date of such a notification, all sale or purchase of hogfish in or from the South Atlantic EEZ off Georgia, South Carolina, and North Carolina is prohibited, and harvest or possession of this species is limited to the bag and possession limits. These bag and possession limits apply to the Georgia-North Carolina hogfish stock on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such species were harvested, *i.e.,* in state or Federal waters.

(B) If commercial landings for the Georgia-North Carolina hogfish stock, as estimated by the SRD, exceed the commercial ACL specified in paragraph (u)(1)(iii)(A) of this section, and the combined commercial and recreational ACL specified in paragraph (u)(1)(iii)(C) of this section is exceeded during the same fishing year, and the Georgia-North Carolina hogfish stock is overfished based on the most recent Status of U.S. Fisheries Report to Congress, the AA will file a notification with the Office of the Federal Register to reduce the commercial ACL for the stock in the following fishing year by the amount of the commercial ACL overage in the prior fishing year.

(ii) *Recreational sector.* (A) If recreational landings for the Georgia-North Carolina hogfish stock, as estimated by the SRD, reach or are projected to reach the recreational ACL specified in paragraph (u)(1)(iii)(B) of this section, the AA will file a notification with the Office of the Federal Register to close the recreational sector for the remainder of the fishing year regardless if the stock is overfished, unless NMFS determines that no closure is necessary based on the best scientific information available. On and after the effective date of such a notification, the bag and possession limits for hogfish in or from the South Atlantic EEZ off Georgia, South Carolina, and North Carolina are zero.

(B) If recreational landings for the Georgia-North Carolina hogfish stock, as estimated by the SRD, exceed the recreational ACL specified in paragraph (u)(1)(iii)(B) of this section, then during the following fishing year recreational landings will be monitored for a persistence in increased landings. If necessary, the AA will file a notification with the Office of the Federal Register to reduce the length of the following recreational fishing season and recreational ACL in the following fishing year by the amount of the recreational ACL overage if the Georgia-North Carolina hogfish stock is overfished, based on the most recent Status of U.S. Fisheries Report to Congress, and the combined commercial and recreational ACL is exceeded during the same fishing year to ensure recreational landings do not exceed the recreational ACL in the following fishing year. NMFS will use the best scientific information available to determine if reducing the length of the recreational fishing season and recreational ACL is necessary. When a recreational sector is closed as a result of NMFS reducing the length of the following recreational fishing season and ACL, the bag and possession limits for hogfish in or from the South Atlantic EEZ off Georgia, South Carolina, and North Carolina are zero.

(iii) *ACLs for the Georgia-North Carolina stock.* This stock includes hogfish off Georgia, South Carolina, and North Carolina. All weights are given in round weight.

(A) *Commercial ACL*—23,456 lb (10,639 kg).

(B) *Recreational ACL*—988 fish.

(C) The combined commercial and recreational ACL for the Georgia-North Carolina hogfish stock is 33,930 lb (15,390 kg).

(2) *Hogfish off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida (Florida Keys-East Florida)*—(i) *Commercial sector.* (A) If commercial landings for the Florida Keys-East Florida hogfish stock, as estimated by the SRD, reach or are projected to reach the applicable commercial ACL specified in paragraph (u)(2)(iii)(A) of this section, the AA will file a notification with the Office of the Federal Register to close the applicable commercial sector for the remainder of the fishing year. On and after the effective date of such a notification, all sale or purchase of hogfish in or from the EEZ off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida is prohibited, and harvest or possession of this species is limited to the bag and possession limits. These bag and possession limits apply for this hogfish stock on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such species were harvested, *i.e.,* in state or Federal waters.

(B) If commercial landings for the Florida Keys-East Florida hogfish stock, as estimated by the SRD, exceed the applicable commercial ACL specified in paragraph (u)(2)(iii)(A) of this section, and the applicable combined commercial and recreational ACL specified in paragraph (u)(2)(iii)(C) of this section is exceeded during the same fishing year, and the stock is overfished based on the most recent Status of U.S. Fisheries Report to Congress, the AA will file a notification with the Office of the Federal Register to reduce the commercial ACL for the stock in the following fishing year by the amount of the applicable commercial ACL overage in the prior fishing year.

(ii) *Recreational sector.* (A) If recreational landings for the Florida Keys-East Florida hogfish stock, as estimated by the SRD, reach or are projected to reach the applicable recreational ACL specified in paragraph (u)(2)(iii)(B) of this section, the AA will file a notification with the Office of the Federal Register to close the recreational sector for the remainder of the fishing year regardless if the stock is overfished, unless NMFS determines that no closure is necessary based on the best scientific information available. On and after the effective date of such a notification, the bag and possession limits for hogfish in or from the EEZ off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida are zero.

(B) If recreational landings for the Florida Keys-East Florida hogfish stock, as estimated by the SRD, exceed the applicable recreational ACL specified in paragraph (u)(2)(iii)(B) of this section, then during the following fishing year recreational landings will be monitored for a persistence in increased landings. If necessary, the AA will file a notification with the Office of the Federal Register to reduce the length of the following applicable recreational fishing season and recreational ACL in the following fishing year by the amount of the recreational ACL overage if the Florida Keys-East Florida hogfish stock is overfished, based on the most recent Status of U.S. Fisheries Report to Congress, and the applicable combined commercial and recreational ACL is exceeded during the same fishing year to ensure recreational landings do not exceed the recreational ACL in the following fishing year. NMFS will use the best scientific information available to determine if reducing the length of

the recreational fishing season and recreational ACL is necessary. When a recreational sector is closed as a result of NMFS reducing the length of the following recreational fishing season and ACL, the bag and possession limits for hogfish in or from the EEZ off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida are zero.

(iii) *ACLs for the Florida Keys-East Florida stock.* This stock includes hogfish off the Florida Keys and east coast of Florida, and south of 25°09′ N. lat. off the west coast of Florida.

(A) *Commercial ACL.* See the following table. All weights are given in round weight.

Year	Commercial ACL
2017	3,510 lb (1,592 kg).
2018	4,524 lb (2,052 kg).
2019	5,670 lb (2,572 kg).
2020	6,926 lb (3,142 kg).
2021	8,277 lb (3,754 kg).
2022	9,703 lb (4,401 kg).
2023	11,179 lb (5,071 kg).
2024	12,677 lb (5,750 kg).
2025	14,167 lb (6,426 kg).
2026	15,621 lb (7,086 kg).
2027	17,018 lb (7,719 kg).

(B) *Recreational ACL.* See the following table. The recreational ACL is in numbers of fish.

Year	Recreational ACL
2017	15,689
2018	18,617
2019	21,574
2020	25,086
2021	29,096
2022	33,358
2023	37,671
2024	41,934
2025	46,046
2026	49,949
2027	53,610

(C) *Combined commercial and recreational ACL.* See the following table. The combined commercial and recreational ACL is in numbers of fish.

Year	Combined commercial and recreational ACL
2017	17,034
2018	20,350
2019	23,746
2020	27,740
2021	32,267
2022	37,076
2023	41,954
2024	46,791
2025	51,474
2026	55,934
2027	60,130

Foreign-Trade Zones Board

[B–84–2016]

Foreign-Trade Zone (FTZ) 21—Dorchester County, South Carolina, Notification of Proposed Production Activity, AGRU America Charleston, LLC (Industrial Pipes), North Charleston, South Carolina

The South Carolina State Ports Authority, grantee of FTZ 21, submitted a notification of proposed production activity to the FTZ Board on behalf of AGRU America Charleston, LLC (AGRU), located in North Charleston, South Carolina. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on December 9, 2016.

The AGRU facility is located within Site 5 of FTZ 21. The facility is used for the production of large volume industrial pipes for high volume flow applications. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt AGRU from customs duty payments on the foreign-status component used in export production. On its domestic sales, AGRU would be able to choose the duty rate during customs entry procedures that applies to high density polyethylene (HDPE) pipes (duty rate 3.1%) for the foreign-status input noted below. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include high density polyethylene (HDPE) pellets having relative viscosity of 1.44 or more (duty rate 6.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 25, 2017.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Elizabeth Whiteman at *Elizabeth.Whiteman@trade.gov* or (202) 482–0473.

Dated: December 12, 2016.

Andrew McGilvray,

Executive Secretary.

Lightweight Thermal Paper From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 12, 2016, the Department of Commerce (''Department'') published the preliminary results of the administrative review of the antidumping duty order on lightweight thermal paper (''LWTP'') from the People's Republic of China (''PRC''). The period of review (''POR'') is November 1, 2014, through October 31, 2015. The review covers two exporters of subject merchandise: Jaan Huey Co. Ltd. (''Jaan Huey'') and Shanghai Hanhong Paper Co., Ltd. and Hanhong Paper Co. Ltd (together, ''Hanhong''). We invited interested parties to comment on our preliminary results. No party provided comment. Accordingly, for the final results of review, we continue to find that because neither respondent participated in this review, Jaan Huey and Hanhong have not demonstrated eligibility for a separate rate in this segment of the proceeding, and therefore, we are treating both as part of the PRC-wide entity.

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Keith Haynes, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–5139.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2016, the Department of Commerce (''Department'') published the *Preliminary Results* [1] of the instant review, preliminarily finding that because neither respondent participated in this review, Jaan Huey and Hanhong did not demonstrate eligibility for a separate rate in this segment of the proceeding and are, thus, both a part of the PRC-wide entity. We invited interested parties to submit comments on the *Preliminary Results.* We received no comments from interested parties.

The Department has conducted this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (''the Act'').

Scope of the Order

The merchandise covered by this review includes certain lightweight thermal paper, which is thermal paper with a basis weight of 70 grams per square meter (g/m^2) (with a tolerance of $\pm$ 4.0 g/m^2) or less; irrespective of dimensions; [2] with or without a base coat [3] on one or both sides; with thermal active coating(s) [4] on one or both sides that is a mixture of the dye and the developer that react and form an image when heat is applied; with or without

[1] *See Lightweight Thermal Paper from the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2014–2015,* 81 FR 53431 (August 12, 2016) (''*Preliminary Results*'').

[2] LWTP is typically produced in jumbo rolls that are slit to the specifications of the converting equipment and then converted into finished slit rolls. Both jumbo and converted rolls (as well as LWTP in any other form, presentation, or dimension) are covered by the scope of these orders.

[3] A base coat, when applied, is typically made of clay and/or latex and like materials and is intended to cover the rough surface of the paper substrate and to provide insulating value.

[4] A thermal active coating is typically made of sensitizer, dye, and co-reactant.

a top coat; [5] and without an adhesive backing. Certain lightweight thermal paper is typically (but not exclusively) used in point-of-sale applications such as ATM receipts, credit card receipts, gas pump receipts, and retail store receipts. The merchandise subject to this review may be classified in the Harmonized Tariff Schedule of the United States (''HTSUS'') under subheadings 3703.10.60, 4811.59.20, 4811.90.8040, 4811.90.9090, 4820.10.20, 4823.40.00, 4811.90.8030, 4811.90.8050, 4811.90.9030, and 4811.90.9050.[6] [7] Although HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these orders is dispositive.

Final Results of Review

The Department continues to find that Jaan Huey and Hanhong are not eligible for a separate rate and are part of the PRC-wide entity for the period November 1, 2014, through October 31, 2015. Because no party requested a review of the PRC-wide entity, and the Department no longer considers the PRC-wide entity as an exporter conditionally subject to administrative reviews, we did not conduct a review of the PRC-wide entity and the PRC-wide entity's rate is not subject to change in this administrative review.[8]

Assessment Rates

We will instruct U.S. Customs and Border Protection (''CBP'') to apply an *ad valorem* assessment rate of 115.29 percent (the rate applicable to the PRC-wide entity) to all entries of subject merchandise during the POR which were exported by Jaan Huey and Hanhong. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of these final results of review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for Jaan Huey and Hanhong, as part of the PRC-wide entity, will be the PRC-wide rate of 115.29 percent; (2) for previously investigated or reviewed PRC and non-PRC exporters who are not under review in this segment of the proceeding but who have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (3) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 115.29 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

This notice also serves as a reminder to parties subject to administrative protective orders (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: December 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

[FR Doc. 2016–30308 Filed 12–15–16; 8:45 am]

BILLING CODE 3510–DS–P

[5] A top coat, when applied, is typically made of polyvinyl acetone, polyvinyl alcohol, and/or like materials and is intended to provide environmental protection, an improved surface for press printing, and/or wear protection for the thermal print head.

[6] HTSUS subheading 4811.90.8000 was a classification used for LWTP until January 1, 2007. Effective that date, subheading 4811.90.8000 was replaced with 4811.90.8020 (for gift wrap, a non-subject product) and 4811.90.8040 (for ''other'' including LWTP). HTSUS subheading 4811.90.9000 was a classification for LWTP until July 1, 2005. Effective that date, subheading 4811.90.9000 was replaced with 4811.90.9010 (for tissue paper, a non-subject product) and 4811.90.9090 (for ''other,'' including LWTP).

[7] As of January 1, 2009, the International Trade Commission deleted HTSUS subheadings 4811.90.8040 and 4811.90.9090 and added HTSUS subheadings 4811.90.8030, 4811.90.8050, 4811.90.9030, and 4811.90.9050 to the *Harmonized Tariff Schedule of the United States (2009). See Harmonized Tariff Schedule of the United States (2009),* available at <*ww.usitc.gov*>. These HTSUS subheadings were added to the scope of the order in LWTP's LTFV investigation.

Diffusion-Annealed, Nickel-Plated Flat-Rolled Steel Products From Japan: Final Results of Antidumping Duty Administrative Review; 2013–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On June 17, 2016, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on diffusion-annealed, nickel-plated flat rolled steel products from Japan.[1] The review covers one company, Toyo Kohan Co., Ltd. (Toyo Kohan). The period of review (POR) is November 19, 2013 through April 30, 2015. As a result of our analysis of the comments and information received, these final results do not differ from the *Preliminary Results.*

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Dena Crossland or Brian Davis, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3362 or (202) 482–7924, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 17, 2016, the Department published the *Preliminary Results.* In accordance with 19 CFR 351.309(c)(1)(ii), we invited parties to comment on our *Preliminary Results.*[2] We received a case brief from Thomas Steel Strip Corporation (Petitioner) on

[1] *See Diffusion-Annealed, Nickel-Plated Flat-Rolled Steel Products from Japan: Preliminary Results of Antidumping Duty Administrative Review; 2013–2015,* 81 FR 39627 (June 17, 2016) (*Preliminary Results*).

[2] *See Preliminary Results,* 81 FR at 39628.

August 1, 2016,[3] and a rebuttal brief from Toyo Kohan on August 12, 2016.[4]

On October 13, 2016, the Department issued a memorandum extending the time period for issuing the final results of this administrative review from October 15, 2016, to December 9, 2016.[5]

Scope of the Order

The diffusion-annealed, nickel-plated flat-rolled steel products included in this order are flat-rolled, cold-reduced steel products, regardless of chemistry; whether or not in coils; either plated or coated with nickel or nickel-based alloys and subsequently annealed (*i.e.,* ''diffusion-annealed''); whether or not painted, varnished or coated with plastics or other metallic or nonmetallic substances; and less than or equal to 2.0 mm in nominal thickness. For purposes of this order, ''nickel-based alloys'' include all nickel alloys with other metals in which nickel accounts for at least 80 percent of the alloy by volume.

Imports of merchandise included in the scope of this order are classified primarily under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7212.50.0000 and 7210.90.6000, but may also be classified under HTSUS subheadings 7210.70.6090, 7212.40.1000, 7212.40.5000, 7219.90.0020, 7219.90.0025, 7219.90.0060, 7219.90.0080, 7220.90.0010, 7220.90.0015, 7225.99.0090, or 7226.99.0180. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this order is dispositive.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the Issues and Decision Memorandum, which is hereby adopted by this notice.[6] A list of the issues that parties raised and to which we responded is attached to this notice as an Appendix. The Issues and Decision Memorandum is a public document and is on-file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov* and in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/index.html.* The signed Issues and Decision Memorandum and the electronic version of the Issues and Decision Memorandum are identical in content.

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding our *Preliminary Results,* we have not recalculated Toyo Kohan's weighted-average dumping margin for these final results.

Final Results of Review

The Department determines that, for the period November 19, 2013, through April 30, 2015, the weighted-average dumping margin for Toyo Kohan Co., Ltd. is zero.

Duty Assessment

The Department shall determine and U.S. Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries.[7] Because Toyo Kohan's weighted-average dumping margin is zero for these final results of review, we will instruct CBP not to assess duties on any of its entries in accordance with 19 CFR 351.212 and the *Final Modification for Reviews, i.e.,* ''{w}here the weighted-average margin of dumping for the exporter is determined to be zero or *de minimis,* no antidumping duties will be assessed.'' [8] The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.

For entries of subject merchandise during the POR produced by Toyo Kohan for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for intermediate company(ies) involved in the transaction. The all-others rate is 45.42 percent.[9] We intend to issue assessment instructions directly to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of this notice for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication of these final results, as provided by section 751(a)(2) of the Tariff Act of 1930, as amended (Act): (1) No cash deposit will be required for Toyo Kohan since the rate for Toyo Kohan in the final results of this administrative review is zero; (2) for merchandise exported by manufacturers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which that manufacturer or exporter participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the manufacturer of the subject merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 45.42 percent, the all-others rate established in the antidumping investigation.[10] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers Regarding the Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant

[3] *See* Case Brief of Thomas Steel Strip Corporation, dated August 1, 2016 (Petitioner's Case Brief).

[4] *See* Letter from Toyo Kohan to the Department of Commerce regarding ''Toyo Kohan's Rebuttal Brief: Diffusion-Annealed, Nickel-Plated Flat-Rolled Steel Products from Japan,'' dated August 12, 2016 (Toyo Kohan's Rebuttal Brief).

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, from Dena Crossland, International Trade Compliance Analyst, Antidumping and Countervailing Duty Operations, Office VI, through Scot Fullerton, Antidumping and Countervailing Duty Operations, Office VI, on the subject of ''Diffusion-Annealed, Nickel-Plated Flat-Rolled Steel Products from Japan: Extension of Deadline for Final Results of Antidumping; 2013/2015,'' dated October 13, 2016.

[6] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance entitled ''Issues and Decision Memorandum for the Final Results of Administrative Review, 2013–2015: Diffusion-Annealed, Nickel-Plated Flat-Rolled Steel Products from Japan,'' dated concurrently with this notice (Issues and Decision Memorandum).

[7] In these final results, the Department applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings: Final Modification,* 77 FR 8101 (February 14, 2012) (*Final Modification for Reviews*).

[10] *Id.*

entries during the POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(h).

Dated: December 9, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Stainless Steel Bar From India: Initiation of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is initiating a changed circumstances review of the antidumping duty order on stainless steel bar (SSB) from India to determine whether to reinstate the order with respect to Viraj Profiles Ltd. (Viraj) and Venus Wire Industries Pvt. Ltd. and its affiliates Hindustan Inox, Precision Metals and Sieves Manufacturers (India) Pvt. Ltd. (collectively, Venus).

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Thomas Schauer, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–0410.

SUPPLEMENTARY INFORMATION:

Background

On February 21, 1995, the Department published the antidumping duty (AD) order on SSB from India.[1] On September 14, 2004, the Department conditionally revoked the *Order* with respect to merchandise produced and exported by Viraj Alloys, Ltd., Viraj Forgings, Ltd., and Viraj Impoexpo, Ltd. (collectively, Viraj, and now known as Viraj Profiles Limited [2]), based on a finding of three years of no dumping.[3] On September 13, 2011, the Department conditionally revoked the *Order* with respect to merchandise produced and exported by Venus, based on a finding of three years of no dumping.[4]

On September 29, 2016, the petitioners [5] alleged that, since their conditional revocation from the *Order,* there is evidence that Viraj and Venus have both resumed sales to the United States at prices below normal value (NV). The petitioners note that Viraj and Venus agreed in writing to reinstatement into the AD order if either company were found to have resumed dumping, and alleges that, because Viraj and Venus violated this agreement, the Department should initiate a changed circumstances review (CCR) to determine whether to reinstate Viraj and Venus into the *Order.*[6]

In November 2016, Viraj and Venus objected to the petitioners' request for a CCR.[7] On November 28, 2016, the petitioners submitted a rebuttal to Venus' objection to the request for a CCR.[8] Also in November 2016, the Department extended the time period for determining whether to initiate the CCR by 45 days to December 28, 2016.[9]

In accordance with section 751(b) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.216(b), and as discussed in further detail below, the Department finds the information submitted by the petitioners sufficient to warrant initiation of a CCR of the AD order on SSB from India with respect to Viraj and Venus. The period of review (POR) is July 1, 2015, through June 30, 2016.

In this CCR, we intend to determine whether Viraj or Venus sold SSB from India at less than NV subsequent to their revocations from the *Order.* If we make an affirmative preliminarily finding, we will direct U.S. Customs and Border Protection to suspend liquidation of all entries of SSB manufactured in India and exported by the company(ies) for which we made an affirmative finding.

Scope of the Order

The merchandise subject to the order is stainless steel bar. Stainless steel bar

[1] *See Antidumping Duty Orders: Stainless Steel Bar from Brazil, India, and Japan,* 60 FR 9661 (February 21, 1995) (*Order*).

[2] In July 2006, Viraj Forgings Ltd. merged with Viraj Alloys Ltd.; in April 2007, Viraj Alloys and Viraj Impoexpo Ltd. merged into Viraj Profiles Ltd. *See* Letter from the petitioners, ''Stainless Steel Bar From India—Petitioners' Request for Changed Circumstances Reviews,'' dated September 29, 2016 (CCR Request) at Exhibit GEN–1.

[3] *See Stainless Steel Bar From India; Final Results, Rescission of Antidumping Duty Administrative Review in Part, and Determination To Revoke in Part,* 69 FR 55409 (September 14, 2004) (*Viraj Revocation*). The regulatory provision governing partial revocation at the time of Viraj's (and Venus's) revocation was 19 CFR 353.25 (1997). The relevant language remained substantively unchanged when 19 CFR 353.25 was superseded by 19 CFR 351.222 in 1997. *See Antidumping Duties; Countervailing Duties: Notice of Proposed Rulemaking and Request for Public Comments,* 61 FR 7308 (February 27, 1996) (*1996 Notice of Proposed Rulemaking*); *see also Antidumping Duties; Countervailing Duties; Final Rule,* 62 FR 27296, 27325–26, 27399–402 (May 19, 1997) (*Preamble*). The portion of 19 CFR 351.222 related to partial revocations of orders as to specific companies has been revoked for all reviews initiated on or after June 20, 2012. *See Modification to Regulation Concerning the Revocation of Antidumping and Countervailing Duty Orders: Final Rule,* 77 FR 29875 (May 21, 2012) (*Revocation Final Rule*).

[7] *See* Letter from Viraj, ''Stainless Steel Bar from India,'' dated November 14, 2016 (Viraj Rebuttal) and Letter from Venus, ''Stainless Steel Bars (''SSB'') from India—Response to Request for Changed Circumstances Review,'' dated November 4, 2016 (Venus Rebuttal).

[8] *See* Letter from the petitioners, ''Stainless Bar from India—Petitioners' Comments Concerning Venus' Rebuttal Comments to Petitioners' Changed Circumstances Review Request,'' dated November 29, 2016.

[9] *See* Memorandum, ''Extension of Deadline to Initiate Changed Circumstances Review,'' dated November 10, 2016.

means articles of stainless steel in straight lengths that have been either hot-rolled, forged, turned, cold-drawn, cold-rolled or otherwise cold-finished, or ground, having a uniform solid cross section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles, hexagons, octagons, or other convex polygons. Stainless steel bar includes cold-finished stainless steel bars that are turned or ground in straight lengths, whether produced from hot-rolled bar or from straightened and cut rod or wire, and reinforcing bars that have indentations, ribs, grooves, or other deformations produced during the rolling process.

Except as specified above, the term does not include stainless steel semi-finished products, cut-to-length flat-rolled products (*i.e.,* cut-to-length rolled products which if less than 4.75 mm in thickness have a width measuring at least 10 times the thickness, or if 4.75 mm or more in thickness having a width which exceeds 150 mm and measures at least twice the thickness), wire (*i.e.,* cold-formed products in coils, of any uniform solid cross section along their whole length, which do not conform to the definition of flat-rolled products), and angles, shapes, and sections.

Imports of these products are currently classifiable under subheadings 7222.10.00, 7222.11.00, 7222.19.00, 7222.20.00, 7222.30.00 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of the order is dispositive.

Allegation of Resumed Dumping

The allegation of resumed dumping upon which the Department has based its decision to initiate a CCR is detailed below. The sources of data for the adjustments that the petitioners calculated relating to NV and U.S. price are discussed in greater detail in the Changed Circumstances Review Initiation Checklist dated concurrently with this notice.

1. Constructed Export Price

The petitioners based U.S. price upon offers for sale from the respondents' U.S. affiliates to unaffiliated customers in the United States, which they obtained from a proprietary source.[10] The offers for sale identify prices and terms of sale for a number of SSB models sold by the respondents' U.S. affiliates.[11] The petitioners made adjustments for movement expenses consistent with the terms of sale, for the U.S. affiliates' profit and selling expenses, and for imputed credit expenses.[12] We recalculated the imputed expenses to be consistent with Policy Bulletin 98.1.[13]

2. Normal Value

The petitioners based NV on home market prices obtained from a proprietary source.[14] The petitioners made an adjustment for imputed credit expenses.[15]

3. Cost of Production

The petitioners based COP on the costs of an integrated U.S. producer of the subject merchandise, as the best information reasonably available, and made adjustments for known differences in cost between the domestic industry and the respondents.[16] Based on a comparison of home market sales and the COP, the petitioners assert that there is reason to believe or suspect that certain home market sales made by Viraj and Venus were priced below COP.[17] Accordingly, the petitioners consider those home market sales to be outside the ordinary course of trade, and relied on the remaining home market sales above COP to establish normal value.[18]

2. Alleged Margins of Dumping

The petitioners allege that there is evidence that Viraj and Venus have both resumed dumping SSB in the United States that is sufficient to warrant initiation of a CCR to determine whether the respondents should be reinstated into the AD order. The petitioners' estimated dumping margins, as revised to recalculate imputed credit expenses for U.S. sales, range from 9.27 to 45.98 percent for Viraj and from 26.59 to 43.55 percent for Venus.[19]

Comments by Interested Parties

As noted above, in November 2016, Viraj and Venus submitted comments on the petitioners' request that the Department initiate a CCR.[20] These comments are detailed in the Changed Circumstances Review Initiation Checklist.

Initiation of Changed Circumstances Review

Pursuant to section 751(b) of the Act, the Department will conduct a CCR upon receipt of a request ''from an interested party for review of an Aantidumping duty order which shows changed circumstances sufficient to warrant a review of the order.'' After examining the petitioners' allegation and supporting documentation, we find that the petitioners have provided evidence of changed circumstances sufficient to initiate a review to determine whether Viraj or Venus have resumed dumping and should be reinstated in the *Order.*[21]

The Department's authority to reinstate a revoked company into an AD order by means of a CCR derives from sections 751(b) and (d) of the Act.[22] The Department's authority to revoke an order is expressed in section 751(d) of the Act. The statute, however, provides no detailed description of the criteria, procedures, or conditions relating to the Department's exercise of this authority. Accordingly, the Department issued regulations that set forth in detail how the Department will exercise the authority granted to it under the statute. At the time of the respondents' revocations from the *Order,* a Department regulation authorized the partial and conditional revocation of orders as to companies that were determined not to have made sales at less than NV for the equivalent of three consecutive years and that certified to the immediate reinstatement into an order if they resumed dumping.[23] Although the regulatory provision for partial and conditional revocation of companies from orders has since been revoked, we have clarified that all conditionally revoked companies remain subject to their certified agreements to be reinstated into the

Cir. 2011) (*Sahaviriya*) (''{T}his court holds, applying Chevron deference, that Commerce reasonably interpreted its revocation authority under {section 751(d) of the Act} to permit conditional revocation . . . .''); *id.* at 1378–80 (finding that Commerce properly conducted a changed circumstances review for purposes of reconsidering revocation).

[23] *See* 19 CFR 353.25 (1997). As noted above, the relevant language regarding reinstatement remained substantively unchanged when 19 CFR 353.25 was superseded by 19 CFR 351.222 (1997), and the portion of 19 CFR 351.222 related to partial revocations of orders as to specific companies has been revoked for all reviews initiated on or after June 20, 2012. *See 1996 Notice of Proposed Rulemaking; Preamble; Revocation Final Rule.*

order from which they were revoked if the Department finds that the company has resumed dumping.[24] For these reasons, conducting a CCR pursuant to section 751(b) of the Act to determine whether to reinstate Viraj or Venus into the *Order* is consistent with the statute and with the certification that the respondents signed as a precondition to their conditional revocation.[25]

Period of Changed Circumstances Review

The Department intends to request data from Viraj and Venus for the July 1, 2015, through June 30, 2016, period to determine whether it should reinstate the *Order* with respect to these companies because they resumed dumping.

Public Comment

The Department intends to publish in the **Federal Register** a notice of preliminary results of CCR in accordance with 19 CFR 351.221(b)(4) and 351.221(c)(3)(i), which will set forth the Department's preliminary factual and legal conclusions. Pursuant to 19 CFR 351.221(b)(4)(ii), interested parties will have an opportunity to comment on the preliminary results. Unless otherwise extended, the Department intends to issue its final results of review in accordance with the time limits set forth in 19 CFR 351.216(e).

This notice is published in accordance with sections 751(b)(1) and 777(i)(1) of the Act and 19 CFR 351.221(b) of the Department's regulations.

Dated: December 12, 2016.

Christian Marsh,

Deputy Assistant Secretary, for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–475–818]

Certain Pasta From Italy: Final Results of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 12, 2016, the Department of Commerce (the Department) published the preliminary results of the antidumping duty administrative review of certain pasta (pasta) from Italy. The period of review (POR) is July 1, 2014, through June 30, 2015. As a result of our analysis of the comments and information received, these final results differ from the *Preliminary Results* with respect to Industria Alimentare Colavita S.p.A. (Indalco) and Liguori Pastificio Dal 1820 (Liguori). For the final weighted-average dumping margins, *see* the ''Final Results of Review'' section below.

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Joy Zhang (Liguori) or George McMahon (Indalco), AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–1168 or (202) 482–1167, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2016, the Department of Commerce (the Department) published the *Preliminary Results.*[1] In accordance with 19 CFR 351.309(c)(1)(ii), we invited parties to comment on our *Preliminary Results.* On September 7, 2016, Liguori submitted a request for a hearing, which was withdrawn on October 6, 2016.[2] On August 31, 2016, the Department revised the briefing schedule.[3] On September 19, 2016, Petitioners,[4] Indalco, and Liguori submitted their case briefs. On September 26, 2016, Petitioners, Indalco, and Liguori submitted their rebuttal briefs.

Scope of the Order

Imports covered by the order are shipments of certain non-egg dry pasta. The merchandise subject to review is currently classifiable under items 1901.90.90.95 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.[5]

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the Issues and Decision Memorandum. A list of the issues that parties raised and to which we responded is attached to this notice as an Appendix. The Issues and Decision Memorandum is a public document and is on-file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov* and in the Central Records Unit (CRU), room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/index.html.* The signed Issues and Decision Memorandum and the electronic versions of the Issues and Decision Memorandum are identical in content.

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding our *Preliminary Results,* we have recalculated Indalco and Liguori's weighted-average dumping margins.[6] As a result of the

[1] *See Certain Pasta From Italy: Preliminary Results of Antidumping Duty Administrative Review;* 2014–2015, 81 FR 53404 (August 12, 2016) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

[2] *See* Liguori's letter titled, ''Hearing Request of Liguori Pastificio dal 1820 S.p.A.,'' dated September 7, 2016. *See also* Liguori's letter titled, ''Certain Pasta from Italy: Withdrawal of Hearing Request of Liguori Pastificio dal 1820 S.p.A.,'' dated October 6, 2016.

[3] *See* the Department's Memorandum to All Interested Parties titled, ''Postponement of Briefing Schedule,'' dated August 31, 2016.

[4] Petitioners consist of New World Pasta Company, American Italian Pasta Company and Dakota Growers Pasta Company.

[5] For a full description of the scope of the order, *see* the ''Issues and Decision Memorandum for the Final Results of Antidumping Duty Administrative Review and Partial Rescission: Certain Pasta from Italy; 2014–2015'' from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, dated concurrently with this notice (Issues and Decision Memorandum) and incorporated herein by reference.

[6] *See* Issues and Decision Memorandum; *see also* Memorandum to the File, Through Eric B. Greynolds, Program Manager, Office III, from Joy

recalculation of the rates for Indalco and Liguori, the weighted-average dumping margin for the non-selected companies has changed.

Final Results of the Review

As a result of this review, the Department calculated a weighted-average dumping margin of 1.20 percent for Indalco and 10.79 percent for Liguori for the period July 1, 2014, through June 30, 2015. Therefore, in accordance with section 735(c)(5)(A) of the Act, the Department assigned the weighted-average of these two calculated weighted-average dumping margins, 4.00 percent, to the 19 non-selected companies in these final results, as referenced below.[7]

Producer and/or exporter	Weighted-average dumping margin (percent)
Industria Alimentare Colavita S.p.A. (Indalco)	1.20
Liguori Pastificio Dal 1820 (Liguori)	10.79
Agritalia S.r.L. (Agritalia)	4.00
Atar S.r.L. (Atar)	4.00
Corticella Molini e Pastifici S.p.A. (Corticella)	4.00
Delverde Industrie Alimentari S.p.A. (Delverde)	4.00
Domenico Paone fu Erasmo S.p.A. (Domenico)	4.00
F. Divella S.p.A. (F. Divella)	4.00
La Fabbrica della Pasta di Gragnano S.a.s. di Antonio Moccia (La Fabbrica)	4.00
Molino e Pastificio Tomasello S.r.L. (Tomasello)	4.00
P.A.P SNC DI Pazienza G.B. & C. (P.A.P)	4.00
Pasta Zara S.p.A. (Pasta Zara)	4.00
Pastificio Carmine Russo S.p.A. (Carmine)	4.00
Pastificio DiMartino Gaetano & F. Ili S.r.L. (DiMartino)	4.00
Pastificio Fabianelli S.p.A. (Fabianelli)	4.00
Pastificio Felicetti S.r.L. (Felicetti)	4.00
Pastificio Labor S.r.L. (Labor)	4.00
Pastificio Riscossa F. Ili Mastromauro S.p.A. (AKA Pastificio Riscossa F. Ili. Mastromauro S.r.L.) (Riscossa)	4.00
Poiatti S.p.A. (Poiatti)	4.00
Premiato Pastificio Afreltra S.r.L. (Premiato)	4.00
Rustichella d'Abruzzo S.p.A. (Rustichella)	4.00

Duty Assessment

The Department shall determine and Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries.[8] For any individually examined respondents whose weighted-average dumping margin is above *de minimis,* we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of dumping calculated for the importer's examined sales to the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1). Upon issuance of the final results of this administrative review, if any importer-specific assessment rates calculated in the final results are above *de minimis* (*i.e.,* at or above 0.5 percent), the Department will issue instructions directly to CBP to assess antidumping duties on appropriate entries.

We intend to issue assessment instructions directly to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication of the final results of this administrative review, as provided by section 751(a)(2) of the Act: (1) The cash deposit rate for respondents noted above will be the rate established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the manufacturer of the subject merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 15.45 percent, the all-others rate established in the antidumping investigation as modified by the section 129 determination. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers Regarding the Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to

Zhang, Case Analyst, Office III, titled ''Certain Pasta from Italy: Calculation Memorandum—Liguori,'' dated concurrently with this notice, and Memorandum to the File, Through Eric B. Greynolds, Program Manager, Office III, from George McMahon, Case Analyst, Office III, titled ''Certain Pasta from Italy: Calculation Memorandum—Indalco,'' dated concurrently with this notice.

[7] The rate applied to the non-selected companies is a weighted-average percentage margin calculated based on the publicly-ranged U.S. volumes of the two reviewed companies with an affirmative dumping margin, for the period July 1, 2014, through June 30, 2015. *See* Memorandum to the File titled, ''Certain Pasta from Italy: Margin for Respondents Not Selected for Individual Examination,'' dated concurrently with this notice.

[8] In these final results, the Department applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings: Final Modification,* 77 FR 8101 (February 14, 2012).

liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(h).

Dated: December 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''the Department'') has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings with October anniversary dates. In accordance with the Department's regulations, we are initiating those administrative reviews.

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Brenda E. Waters, Office of AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, telephone: (202) 482–4735.

SUPPLEMENTARY INFORMATION:

Background

The Department has received timely requests, in accordance with 19 CFR 351.213(b), for administrative reviews of various antidumping and countervailing duty orders and findings with October anniversary dates.

All deadlines for the submission of various types of information, certifications, or comments or actions by the Department discussed below refer to the number of calendar days from the applicable starting time.

Notice of No Sales

If a producer or exporter named in this notice of initiation had no exports, sales, or entries during the period of review (''POR''), it must notify the Department within 30 days of publication of this notice in the **Federal Register**. All submissions must be filed electronically at *http://access.trade.gov* in accordance with 19 CFR 351.303.[1] Such submissions are subject to verification in accordance with section 782(i) of the Tariff Act of 1930, as amended (''the Act''). Further, in accordance with 19 CFR 351.303(f)(1)(i), a copy must be served on every party on the Department's service list.

[1] *See Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures,* 76 FR 39263 (July 6, 2011).

Respondent Selection

In the event the Department limits the number of respondents for individual examination for administrative reviews initiated pursuant to requests made for the orders identified below, the Department intends to select respondents based on U.S. Customs and Border Protection (''CBP'') data for U.S. imports during the period of review. We intend to place the CBP data on the record within five days of publication of the initiation notice and to make our decision regarding respondent selection within 30 days of publication of the initiation **Federal Register** notice. Comments regarding the CBP data and respondent selection should be submitted seven days after the placement of the CBP data on the record of this review. Parties wishing to submit rebuttal comments should submit those comments five days after the deadline for the initial comments.

In the event the Department decides it is necessary to limit individual examination of respondents and conduct respondent selection under section 777A(c)(2) of the Act:

In general, the Department has found that determinations concerning whether particular companies should be ''collapsed'' (*i.e.,* treated as a single entity for purposes of calculating antidumping duty rates) require a substantial amount of detailed information and analysis, which often require follow-up questions and analysis. Accordingly, the Department will not conduct collapsing analyses at the respondent selection phase of this review and will not collapse companies at the respondent selection phase unless there has been a determination to collapse certain companies in a previous segment of this antidumping proceeding (*i.e.,* investigation, administrative review, new shipper review or changed circumstances review). For any company subject to this review, if the Department determined, or continued to treat, that company as collapsed with others, the Department will assume that such companies continue to operate in the same manner and will collapse them for respondent selection purposes. Otherwise, the Department will not collapse companies for purposes of respondent selection. Parties are requested to (a) identify which companies subject to review previously were collapsed, and (b) provide a citation to the proceeding in which they were collapsed. Further, if companies are requested to complete the Quantity and Value (''Q&V'') Questionnaire for purposes of respondent selection, in general each

company must report volume and value data separately for itself. Parties should not include data for any other party, even if they believe they should be treated as a single entity with that other party. If a company was collapsed with another company or companies in the most recently completed segment of this proceeding where the Department considered collapsing that entity, complete Q&V data for that collapsed entity must be submitted.

Deadline for Withdrawal of Request for Administrative Review

Pursuant to 19 CFR 351.213(d)(1), a party that has requested a review may withdraw that request within 90 days of the date of publication of the notice of initiation of the requested review. The regulation provides that the Department may extend this time if it is reasonable to do so. In order to provide parties additional certainty with respect to when the Department will exercise its discretion to extend this 90-day deadline, interested parties are advised that the Department does not intend to extend the 90-day deadline unless the requestor demonstrates that an extraordinary circumstance has prevented it from submitting a timely withdrawal request. Determinations by the Department to extend the 90-day deadline will be made on a case-by-case basis.

Separate Rates

In proceedings involving non-market economy (''NME'') countries, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assigned a single antidumping duty deposit rate. It is the Department's policy to assign all exporters of merchandise subject to an administrative review in an NME country this single rate unless an exporter can demonstrate that it is sufficiently independent so as to be entitled to a separate rate.

To establish whether a firm is sufficiently independent from government control of its export activities to be entitled to a separate rate, the Department analyzes each entity exporting the subject merchandise under a test arising from the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China,* 56 FR 20588 (May 6, 1991), as amplified by *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China,* 59 FR 22585 (May 2, 1994). In accordance with the separate rates criteria, the Department assigns separate rates to companies in NME cases only if respondents can demonstrate the absence of both *de jure* and *de facto* government control over export activities.

All firms listed below that wish to qualify for separate rate status in the administrative reviews involving NME countries must complete, as appropriate, either a separate rate application or certification, as described below. For these administrative reviews, in order to demonstrate separate rate eligibility, the Department requires entities for whom a review was requested, that were assigned a separate rate in the most recent segment of this proceeding in which they participated, to certify that they continue to meet the criteria for obtaining a separate rate. The Separate Rate Certification form will be available on the Department's Web site at *http://enforcement.trade.gov/nme/nme-sep-rate.html* on the date of publication of this **Federal Register** notice. In responding to the certification, please follow the ''Instructions for Filing the Certification'' in the Separate Rate Certification. Separate Rate Certifications are due to the Department no later than 30 calendar days after publication of this **Federal Register** notice. The deadline and requirement for submitting a Certification applies equally to NME-owned firms, wholly foreign-owned firms, and foreign sellers who purchase and export subject merchandise to the United States.

Entities that currently do not have a separate rate from a completed segment of the proceeding [2] should timely file a Separate Rate Application to demonstrate eligibility for a separate rate in this proceeding. In addition, companies that received a separate rate in a completed segment of the proceeding that have subsequently made changes, including, but not limited to, changes to corporate structure, acquisitions of new companies or facilities, or changes to their official company name,[3] should timely file a Separate Rate Application to demonstrate eligibility for a separate rate in this proceeding. The Separate Rate Status Application will be available on the Department's Web site at *http://enforcement.trade.gov/nme/nme-sep-rate.html* on the date of publication of this **Federal Register** notice. In responding to the Separate Rate Status Application, refer to the instructions contained in the application. Separate Rate Status Applications are due to the Department no later than 30 calendar days of publication of this **Federal Register** notice. The deadline and requirement for submitting a Separate Rate Status Application applies equally to NME-owned firms, wholly foreign-owned firms, and foreign sellers that purchase and export subject merchandise to the United States.

For exporters and producers who submit a separate-rate status application or certification and subsequently are selected as mandatory respondents, these exporters and producers will no longer be eligible for separate rate status *unless* they respond to all parts of the questionnaire as mandatory respondents.

Initiation of Reviews

In accordance with 19 CFR 351.221(c)(1)(i), we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. We intend to issue the final results of these reviews not later than October 31, 2017.

	Period to be reviewed
Antidumping Duty Proceedings	
Mexico: Carbon and Certain Alloy Steel Wire Rod, A–201–830	10/1/15–9/30/16
ArcelorMittal Las Truchas, S.A. de C.V.	
Deacero S.A.P.I. de C.V.	
Ternium Mexico S.A. de C.V.	
The People's Republic of China: Steel Wire Garment Hangers, A–570–918	10/1/15–9/30/16

[2] Such entities include entities that have not participated in the proceeding, entities that were preliminarily granted a separate rate in any currently incomplete segment of the proceeding (*e.g.,* an ongoing administrative review, new shipper review, *etc.*) and entities that lost their separate rate in the most recently completed segment of the proceeding in which they participated.

[3] Only changes to the official company name, rather than trade names, need to be addressed via a Separate Rate Application. Information regarding new trade names may be submitted via a Separate Rate Certification.

Duty Absorption Reviews

During any administrative review covering all or part of a period falling between the first and second or third and fourth anniversary of the publication of an antidumping duty order under 19 CFR 351.211 or a determination under 19 CFR 351.218(f)(4) to continue an order or suspended investigation (after sunset review), the Secretary, if requested by a domestic interested party within 30 days of the date of publication of the notice of initiation of the review, will determine, consistent with *FAG Italia* v. *United States,* 291 F.3d 806 (Fed Cir. 2002), as appropriate, whether antidumping duties have been absorbed by an exporter or producer subject to the review if the subject merchandise is sold in the United States through an importer that is affiliated with such exporter or producer. The request must include the name(s) of the exporter or producer for which the inquiry is requested.

Gap Period Liquidation

For the first administrative review of any order, there will be no assessment of antidumping or countervailing duties on entries of subject merchandise entered, or withdrawn from warehouse, for consumption during the relevant provisional-measures ''gap'' period, of the order, if such a gap period is applicable to the POR.

Administrative Protective Orders and Letters of Appearance

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Those procedures apply to administrative reviews included in this

notice of initiation. Parties wishing to participate in any of these administrative reviews should ensure that they meet the requirements of these procedures (*e.g.,* the filing of separate letters of appearance as discussed at 19 CFR 351.103(d)).

Revised Factual Information Requirements

On April 10, 2013, the Department published *Definition of Factual Information and Time Limits for Submission of Factual Information: Final Rule,* 78 FR 21246 (April 10, 2013), which modified two regulations related to antidumping and countervailing duty proceedings: The definition of factual information (19 CFR 351.102(b)(21)), and the time limits for the submission of factual information (19 CFR 351.301). The final rule identifies five categories of factual information in 19 CFR 351.102(b)(21), which are summarized as follows: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The final rule requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. The final rule also modified 19 CFR 351.301 so that, rather than providing general time limits, there are specific time limits based on the type of factual information being submitted. These modifications are effective for all segments initiated on or after May 10, 2013. Please review the final rule, available at *http://enforcement.trade.gov/frn/2013/1304frn/2013-08227.txt,* prior to submitting factual information in this segment.

Any party submitting factual information in an antidumping duty or countervailing duty proceeding must certify to the accuracy and completeness of that information.[4] Parties are hereby reminded that revised certification requirements are in effect for company/government officials as well as their representatives. All segments of any antidumping duty or countervailing duty proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.[5] The Department intends to reject factual submissions in any proceeding segments if the submitting party does not comply with applicable revised certification requirements.

Revised Extension of Time Limits Regulation

On September 20, 2013, the Department modified its regulation concerning the extension of time limits for submissions in antidumping and countervailing duty proceedings: *Final Rule,* 78 FR 57790 (September 20, 2013). The modification clarifies that parties may request an extension of time limits before a time limit established under Part 351 expires, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the time limit established under Part 351 expires. For submissions which are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Examples include, but are not limited to: (1) Case and rebuttal briefs, filed pursuant to 19 CFR 351.309; (2) factual information to value factors under 19 CFR 351.408(c), or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2), filed pursuant to 19 CFR 351.301(c)(3) and rebuttal, clarification and correction filed pursuant to 19 CFR 351.301(c)(3)(iv); (3) comments concerning the selection of a surrogate country and surrogate values and rebuttal; (4) comments concerning U.S. Customs and Border Protection data; and (5) quantity and value questionnaires. Under certain circumstances, the Department may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, the Department will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. This modification also requires that an extension request must be made in a separate, stand-alone submission, and clarifies the circumstances under which the Department will grant untimely-filed requests for the extension of time limits. These modifications are effective for all segments initiated on or after October 21, 2013. Please review the final rule, available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm*, prior to submitting factual information in these segments.

These initiations and this notice are in accordance with section 751(a) of the Act (19 U.S.C. 1675(a)) and 19 CFR 351.221(c)(1)(i).

Dated: December 7, 2016.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–051]

Certain Hardwood Plywood Products From the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective December 8, 2016.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta at (202) 482–2593 or Amanda Brings at (202) 482–3927, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petition

On November 18, 2016, the Department of Commerce (the Department) received an antidumping duty (AD) petition concerning imports of certain hardwood plywood products (hardwood plywood) from the People's Republic of China (PRC), filed in proper form on behalf of the Coalition for Fair Trade in Hardwood Plywood and its individual members (Petitioners).[1]

On November 22, 2016, the Department requested additional

[1] *See* the Petition for the Imposition of Antidumping and Countervailing Duties Pursuant to Sections 701 and 731 of the Tariff Act of 1930, as Amended, dated November 18, 2016 (the Petition), at Volumes I and II. The members of the Coalition for Fair Trade in Hardwood Plywood are: Columbia Forest Products; Commonwealth Plywood Co., Ltd.; Murphy Plywood; Roseburg Forest Products Co.; States Industries LLC; and Timber Products Company.

information and clarification of certain areas of the Petition.[2] Petitioners filed responses to these requests on November 29, 2016.[3] On December 5, 2016, Far East America, Inc. (FEA), a U.S. importer of hardwood plywood, provided comments on domestic industry support for the Petitions and requested that the Department poll the domestic industry to determine industry support.[4] We also received comments on industry support and a request to poll the domestic industry from Ashley Furniture Industries, Inc.; Heritage Home Group, Inc.; and Standard Furniture Manufacturing Company, U.S. producers of wooden and upholstered furniture and wooden furniture parts, on December 5, 2016.[5] On December 6, 2016, Petitioners provided a response to FEA's comments on industry support and provided further clarification regarding the scope.[6] On December 7, 2016, Petitioners provided a response to the Furniture Producers' Letter.[7] On December 7, 2016, the Government of the PRC (GOC) provided comments on industry support and requested the Department poll the industry to determine industry support.[8]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), Petitioners allege that imports of hardwood plywood from the PRC are being, or are likely to be, sold in the United States at less-than-fair value within the meaning of section 731 of the Act, and that imports of hardwood plywood from the PRC are materially injuring, or threaten material injury to, the domestic industry producing hardwood plywood in the United States. Also, consistent with section 732(b)(1) of the Act, the Petition is accompanied by information reasonably available to Petitioners supporting their allegations.

The Department finds that Petitioners filed this Petition on behalf of the domestic industry because Petitioners are an interested party as defined in section 771(9)(C) and (F) of the Act. The Department also finds that Petitioners demonstrated sufficient industry support with respect to the initiation of the AD investigation that Petitioners are requesting.[9]

Period of Investigation

Because the Petition was filed on November 18, 2016, pursuant to 19 CFR 351.204(b)(1), the period of investigation (POI) is April 1, 2016 through September 30, 2016.

Scope of the Investigation

The product covered by this investigation is hardwood plywood from the PRC. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Comments on Scope of the Investigation

During our review of the Petition, we issued questions to, and received responses from, Petitioners pertaining to the proposed scope to ensure that the scope language in the Petition would be an accurate reflection of the products for which the domestic industry is seeking relief.[10]

As discussed in the preamble to the Department's regulations,[11] we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determination. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on Wednesday, December 28, 2016. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on Monday, January 9, 2017.

The Department requests that any factual information the parties consider relevant to the scope of the investigation be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact the Department and request permission to submit the additional information. All such comments must also be filed on the record of the concurrent CVD investigation.

Filing Requirements

All submissions to the Department must be filed electronically using Enforcement & Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).[12] An electronically filed document must be received successfully in its entirety by the time and date when it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement & Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Comments on Product Characteristics for AD Questionnaires

The Department requests comments from interested parties regarding the appropriate physical characteristics of hardwood plywood to be reported in response to the Department's AD questionnaires. This information will be used to identify the key physical characteristics of the subject merchandise in order to report the relevant factors and costs of production accurately as well as to develop appropriate product-comparison criteria.

Interested parties may provide any information or comments that they feel are relevant to the development of an accurate list of physical characteristics. Specifically, they may provide comments as to which characteristics are appropriate to use as: (1) General product characteristics and (2) product-comparison criteria. We note that it is not always appropriate to use all product characteristics as product-comparison criteria. We base product-comparison criteria on meaningful commercial differences among products. In other words, although there may be some physical product characteristics utilized by manufacturers to describe hardwood plywood, it may be that only a select few product characteristics take into account commercially meaningful physical characteristics. In addition, interested parties may comment on the order in which the physical characteristics should be used in matching products. Generally, the Department attempts to list the most important physical characteristics first and the least important characteristics last.

In order to consider the suggestions of interested parties in developing and issuing the AD questionnaire, all comments must be filed by 5:00 p.m. ET on Wednesday, December 22, 2016. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on Monday, December 28, 2016. All comments and submissions to the Department must be filed electronically using ACCESS, as explained above, on the record of this less-than-fair-value investigation.

Determination of Industry Support for the Petition

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[13] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[14]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petition).

With regard to the domestic like product, Petitioners do not offer a definition of the domestic like product distinct from the scope of the investigation. Based on our analysis of the information submitted on the record, we have determined that hardwood plywood, as defined in the scope, constitutes a single domestic like product and we have analyzed industry support in terms of that domestic like product.[15]

In determining whether Petitioners have standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in Appendix I of this notice. Petitioners provided their own production data of the domestic like product in 2015. Petitioners also provided estimated 2015 production of the domestic like product by the entire U.S. domestic industry.[16] To establish industry support, Petitioners compared their production to the total 2015 production of the domestic like product for the entire domestic industry.[17] We relied on data Petitioners provided for purposes of measuring industry support.[18]

On December 5, 2016, we received comments on industry support from FEA, a U.S. importer of the subject merchandise, and Ashley Furniture Industries, Inc.; Heritage Home Group, Inc.; and Standard Furniture Manufacturing Company, Inc., domestic producers of wooden and upholstered furniture and wooden furniture parts.[19] Petitioners responded to these comments on December 6 and 7, 2016.[20] The GOC also provided comments on industry support on December 7, 2016.[21] For further discussion of these comments, *see* the PRC AD Initiation Checklist, at Attachment II.

Our review of the data provided in the Petition, General Issues Supplement, letters from FEA, the Furniture

[21] *See* GOC Comments.

Producers, the GOC, and Petitioners, and other information readily available to the Department indicates that Petitioners have established industry support.[22] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.,* polling).[23] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[24] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[25] Accordingly, the Department determines that the Petition was filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.

The Department finds that Petitioners filed the Petition on behalf of the domestic industry because they are interested parties as defined in sections 771(9)(C) and (F) of the Act and they have demonstrated sufficient industry support with respect to the AD investigation that they are requesting that the Department initiate.[26]

Allegations and Evidence of Material Injury and Causation

Petitioners allege that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at less than normal value (NV). In addition, Petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[27]

Petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price suppression or depression; lost sales and revenues; and negative impact on the domestic industry's key indicators, including financial performance, production, shipments, and capacity utilization.[28] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[29]

Allegations of Sales at Less-Than-Fair Value

The following is a description of the allegation of sales at less-than-fair value upon which the Department based its decision to initiate an investigation of imports of hardwood plywood from the PRC. The sources of data for the deductions and adjustments relating to U.S. price and NV are discussed in greater detail in the initiation checklist.

Export Price

Petitioners based U.S. price on two offers for sale for hardwood plywood produced in the PRC from a Chinese exporter.[30] Petitioners made deductions from U.S. price for foreign inland freight and foreign brokerage and handling charges consistent with the delivery terms.[31]

Normal Value

Petitioners stated that the Department has found the PRC to be a non-market economy (NME) country in every administrative proceeding in which the PRC has been involved.[32] In accordance with section 771(18)(C)(i) of the Act, the presumption of NME status remains in effect until revoked by the Department. The presumption of NME status for the PRC has not been revoked by the Department and, therefore, remains in effect for purposes of the initiation of this investigation. Accordingly, the NV of the product is appropriately based on factors of production (FOPs) valued in a surrogate market economy country, in accordance with section 773(c) of the Act. In the course of this investigation, all parties, and the public, will have the opportunity to provide relevant information related to the issues of the PRC's NME status and the granting of separate rates to individual exporters.

Petitioners claim that Thailand is an appropriate surrogate country because it is a market economy that is at a level of economic development comparable to that of the PRC and it is a significant producer of comparable merchandise.[33]

Based on the information provided by Petitioners, we determine that it is appropriate to use Thailand as a surrogate country for initiation purposes. Interested parties will have the opportunity to submit comments regarding surrogate country selection and, pursuant to 19 CFR 351.301(c)(3)(i), will be provided an opportunity to submit publicly available information to value FOPs within 30 days before the scheduled date of the preliminary determination.

Factors of Production

Petitioners based the FOPs for materials, labor, and energy on the consumption rates of a producer of hardwood plywood in the United States.[34] Petitioners assert that the production process for hardwood plywood is similar regardless of whether the product is produced in the United States or in the PRC.[35] Petitioners valued the estimated factors of production using surrogate values from Thailand.[36]

Valuation of Raw Materials

Petitioners valued the FOPs for raw materials using public import data for Thailand obtained from the Global Trade Atlas (GTA) for the POI.[37] Petitioners excluded all import values from countries previously determined by the Department to maintain broadly available, non-industry-specific export subsidies and from countries previously determined by the Department to be NME countries.[38] In addition, in accordance with the Department's practice, the average import value excludes imports that were labeled as originating from an unidentified country.[39] The Department determines

that the surrogate values used by Petitioners are reasonably available and, thus, are acceptable for purposes of initiation.

Valuation of Energy

Petitioners valued electricity using electricity rates reported by the Thai Board of Investment.[40] This information was reported in U.S. dollars (USD) per kilowatt hour and multiplied by the U.S. producer's usage rates.[41] Petitioners valued water using water rates reported by the Thai Board of Investment.[42] Petitioners converted the water rates reported from USD/cubic meter to USD/gallon and multiplied by the U.S. producer's usage rates.[43]

Valuation of Labor

Petitioners valued labor using the most-recently-available labor data published by Thailand's National Statistics Office.[44] Specifically, Petitioners relied on data pertaining to wages and benefits earned by Thai workers engaged in the ''manufacturing'' sector of the Thai economy.[45] Petitioners converted Thai Baht to USD using the average exchange rate during the POI.[46]

Valuation of Packing Materials

Petitioners valued the packing materials using import data obtained from GTA for the POI.[47]

Valuation of Factory Overhead, Selling, General and Administrative Expenses, and Profit

Petitioners calculated ratios for factory overhead, selling, general and administrative expenses and profit based on the most recent audited financial statements for Vanachai Group Public Company Limited, a Thai manufacturer of comparable merchandise (*i.e.,* particle board, MDF products, laminated particleboard, and finished door frames, and panels).[48]

Fair Value Comparisons

Based on the data provided by Petitioners, there is reason to believe that imports of hardwood plywood from the PRC are being, or are likely to be, sold in the United States at less-than-fair value. Based on comparisons of EP to NV, in accordance with section 773(c) of the Act, the estimated dumping margins for hardwood from the PRC range from 104.06 to 114.72 percent.[49]

Initiation of Less-Than-Fair-Value Investigation

Based upon the examination of the AD Petition on hardwood plywood from the PRC, we find that the Petition meets the requirements of section 732 of the Act. Therefore, we are initiating an AD investigation to determine whether imports of hardwood plywood from the PRC are being, or are likely to be, sold in the United States at less-than-fair value. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we intend to make our preliminary determination no later than 140 days after the date of this initiation.

On June 29, 2015, the President of the United States signed into law the Trade Preferences Extension Act of 2015, which made numerous amendments to the AD and CVD law.[50] The 2015 law does not specify dates of application for those amendments. On August 6, 2015, the Department published an interpretative rule, in which it announced the applicability dates for each amendment to the Act, except for amendments contained in section 771(7) of the Act, which relate to determinations of material injury by the ITC.[51] The amendments to sections 771(15), 773, 776, and 782 of the Act are applicable to all determinations made on or after August 6, 2015, and, therefore, apply to this AD investigation.[52]

Respondent Selection

In accordance with our standard practice for respondent selection in AD cases involving NME countries, we intend to issue quantity and value (Q&V) questionnaires to producers/exporters of merchandise subject to the investigation and base respondent selection on the responses received. For this investigation, the Department will request Q&V information from known exporters and producers identified, with complete contact information, in the Petition. In addition, the Department will post the Q&V questionnaire along with filing instructions on the Enforcement and Compliance Web site at *http://www.trade.gov/enforcement/news.asp.*

Producers/exporters of hardwood plywood from the PRC that do not receive Q&V questionnaires by mail may still submit a response to the Q&V questionnaire and can obtain a copy from the Enforcement & Compliance Web site. The Q&V response must be submitted by the relevant PRC exporters/producers no later than December 22, 2016. All Q&V responses must be filed electronically via ACCESS.

Separate Rates

In order to obtain separate-rate status in an NME investigation, exporters and producers must submit a separate-rate application.[53] The specific requirements for submitting a separate-rate application in the PRC investigation are outlined in detail in the application itself, which is available on the Department's Web site at *http://enforcement.trade.gov/nme/nme-sep-rate.html.* The separate-rate application will be due 30 days after publication of this initiation notice.[54] Exporters and producers who submit a separate-rate application and have been selected as mandatory respondents will be eligible for consideration for separate-rate status only if they respond to all parts of the Department's AD questionnaire as mandatory respondents. The Department requires that companies from the PRC submit a response to both the Q&V questionnaire and the separate-rate application by the respective deadlines in order to receive consideration for separate-rate status. Companies not filing a timely Q&V response will not receive separate rate consideration.

Use of Combination Rates

The Department will calculate combination rates for certain respondents that are eligible for a separate rate in an NME investigation. The Separate Rates and Combination Rates Bulletin states:

[51] *See Dates of Application of Amendments to the Antidumping and Countervailing Duty Laws Made by the Trade Preferences Extension Act of 2015,* 80 FR 46793 (August 6, 2015) (*Applicability Notice*).

[52] *Id.* at 46794–95. The 2015 amendments may be found at *https://www.congress.gov/bill/114th-congress/house-bill/1295/text/pl.*

[53] *See* Policy Bulletin 05.1: Separate-Rates Practice and Application of Combination Rates in Antidumping Investigation involving Non-Market Economy Countries (April 5, 2005), available at *http://enforcement.trade.gov/policy/bull05-1.pdf* (Policy Bulletin 05.1).

[54] Although in past investigations this deadline was 60 days, consistent with 19 CFR 351.301(a), which states that ''the Secretary may request any person to submit factual information at any time during a proceeding,'' this deadline is now 30 days.

{w}hile continuing the practice of assigning separate rates only to exporters, all separate rates that the Department will now assign in its NME Investigation will be specific to those producers that supplied the exporter during the period of investigation. Note, however, that one rate is calculated for the exporter and all of the producers which supplied subject merchandise to it during the period of investigation. This practice applies both to mandatory respondents receiving an individually calculated separate rate as well as the pool of non-investigated firms receiving the weighted-average of the individually calculated rates. This practice is referred to as the application of ''combination rates'' because such rates apply to specific combinations of exporters and one or more producers. The cash-deposit rate assigned to an exporter will apply only to merchandise both exported by the firm in question *and* produced by a firm that supplied the exporter during the period of investigation.[55]

Distribution of Copies of the Petition

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the government of the PRC via ACCESS. Because of the particularly large number of producers/exporters identified in the Petition, the Department considers the service of the public version of the Petition to the foreign producers/exporters satisfied by delivery of the public version to the government of the PRC, consistent with 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of hardwood plywood from the PRC are materially injuring or threatening material injury to a U.S. industry.[56] A negative ITC determination will result in the investigation being terminated; [57] otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). Any party, when submitting factual information, must specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted [58] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[59] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Please review the regulations prior to submitting factual information in this investigation.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351 expires. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[60] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petition filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.[61] The Department intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under administrative protective order (APO) in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008).

Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed in 19 CFR 351.103(d)).

This notice is issued and published pursuant to section 777(i) of the Act.

Dated: December 8, 2016.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation is hardwood and decorative plywood, and certain veneered panels as described below. For purposes of this proceeding, hardwood and decorative plywood is defined as a generally flat, multilayered plywood or other veneered panel, consisting of two or more layers or plies of wood veneers and a core, with the face and/or back veneer made of non-coniferous wood (hardwood) or bamboo. The veneers, along with the core may be glued or otherwise bonded together. Hardwood and decorative plywood may include products that meet the American National Standard for Hardwood and Decorative Plywood, ANSI/HPVA HP–1–2016 (including any revisions to that standard).

For purposes of this investigation a ''veneer'' is a slice of wood regardless of thickness which is cut, sliced or sawed from a log, bolt, or flitch. The face and back veneers are the outermost veneer of wood on

[55] *See* Policy Bulletin 05.1 at 6 (emphasis added).

[56] *See* section 733(a) of the Act.

[57] *Id.*

[58] *See* 19 CFR 351.301(b).

[59] *See* 19 CFR 351.301(b)(2).

[60] *See* section 782(b) of the Act.

[61] *See Certification of Factual Information to Import Administration during Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (*Final Rule*); *see also* frequently asked questions regarding the *Final Rule,* available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

either side of the core irrespective of additional surface coatings or covers as described below.

The core of hardwood and decorative plywood consists of the layer or layers of one or more material(s) that are situated between the face and back veneers. The core may be composed of a range of materials, including but not limited to hardwood, softwood, particleboard, or medium-density fiberboard (MDF).

All hardwood plywood is included within the scope of this investigation regardless of whether or not the face and/or back veneers are surface coated or covered and whether or not such surface coating(s) or covers obscures the grain, textures, or markings of the wood. Examples of surface coatings and covers include, but are not limited to: Ultra-violet light cured polyurethanes; oil or oil-modified or water based polyurethanes; wax; epoxy-ester finishes; moisture-cured urethanes; paints; stains; paper; aluminum; high pressure laminate; MDF; medium density overlay (''MDO''); and phenolic film. Additionally, the face veneer of hardwood plywood may be sanded; smoothed or given a ''distressed'' appearance through such methods as hand-scraping or wire brushing. All hardwood plywood is included within the scope even if it is trimmed; cut-to-size; notched; punched; drilled; or has underwent other forms of minor processing.

All hardwood and decorative plywood is included within the scope of this investigation, without regard to dimension (overall thickness, thickness of face veneer, thickness of back veneer, thickness of core, thickness of inner veneers, width, or length). However, the most common panel sizes of hardwood and decorative plywood are 1219 x 1829 mm (48 x 72 inches), 1219 x 2438 mm (48 x 96 inches), and 1219 x 3048 mm (48 x 120 inches).

Subject merchandise also includes hardwood and decorative plywood that has been further processed in a third country, including but not limited to trimming, cutting, notching, punching, drilling, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

The scope of the investigation excludes the following items: (1) Structural plywood (also known as ''industrial plywood'' or ''industrial panels'') that is manufactured to meet U.S. Products Standard PS 1–09, PS 2–09, or PS 2–10 for Structural Plywood (including any revisions to that standard or any substantially equivalent international standard intended for structural plywood), and which has both a face and a back veneer of coniferous wood; (2) products which have a face and back veneer of cork; (3) multilayered wood flooring, as described in the antidumping duty and countervailing duty orders on Multilayered Wood Flooring from the People's Republic of China, Import Administration, International Trade Administration. *See Multilayered Wood Flooring from the People's Republic of China,* 76 FR 76690 (December 8, 2011) (*amended final determination of sales at less than fair value and antidumping duty order*), and *Multilayered Wood Flooring from the People's Republic of China,* 76 FR 76693 (December 8, 2011) (*countervailing duty order*), *as amended* by *Multilayered Wood Flooring from the People's Republic of China: Amended Antidumping and Countervailing Duty Orders,* 77 FR 5484 (February 3, 2012); (4) multilayered wood flooring with a face veneer of bamboo or composed entirely of bamboo; (5) plywood which has a shape or design other than a flat panel, with the exception of any minor processing described above; and (6) products made entirely from bamboo and adhesives (also known as ''solid bamboo'').

Imports of hardwood plywood are primarily entered under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4412.10.0500; 4412.31.0520; 4412.31.0540; 4412.31.0560; 4412.31.2510; 4412.31.2520; 4412.31.4040; 4412.31.4050; 4412.31.4060; 4412.31.4075; 4412.31.4080; 4412.31.5125; 4412.31.5135; 4412.31.5155; 4412.31.5165; 4412.31.5175; 4412.31.6000; 4412.31.9100; 4412.32.0520; 4412.32.0540; 4412.32.0565; 4412.32.0570; 4412.32.2510; 4412.32.2525; 4412.32.2530; 4412.32.3125; 4412.32.3135; 4412.32.3155; 4412.32.3165; 4412.32.3175; 4412.32.3185; 4412.32.5600; 4412.94.1030; 4412.94.1050; 4412.94.3105; 4412.94.3111; 4412.94.3121; 4412.94.3131; 4412.94.3141; 4412.94.3160; 4412.94.3161; 4412.94.3171; 4412.94.3175; 4412.94.4100; 4412.99.0600; 4412.99.1020; 4412.99.1030; 4412.99.1040; 4412.99.3110; 4412.99.3120; 4412.99.3130; 4412.99.3140; 4412.99.3150; 4412.99.3160; 4412.99.3170; 4412.99.4100; 4412.99.5115; and 4412.99.5710.

Imports of hardwood plywood may also enter under HTSUS subheadings 4412.39.1000; 4412.39.3000; 4412.39.4011; 4412.39.4012; 4412.39.4019; 4412.39.4031; 4412.39.4032; 4412.39.4039; 4412.39.4051; 4412.39.4052; 4412.39.4059; 4412.39.4061; 4412.39.4062; 4412.39.4069; 4412.39.5010; 4412.39.5030; 4412.39.5050; 4412.99.6000; 4412.99.7000; 4412.99.8000; 4412.99.9000; 4412.10.9000; 4412.94.5100; 4412.94.9500; and 4412.99.9500. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Certain Hardwood Plywood Products From the People's Republic of China: Initiation of Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective December 8, 2016.

FOR FURTHER INFORMATION CONTACT: Justin Neuman at (202) 482–0486, or Matthew Renkey at (202) 482–2312, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petition

On November 18, 2016, the Department of Commerce (Department) received a countervailing duty (CVD) petition concerning imports of certain hardwood plywood products (hardwood plywood) from the People's Republic of China (PRC), filed in proper form on behalf of the Coalition for Fair Trade in Hardwood Plywood and its individual members (Petitioners).[1]

On November 22, 2016, the Department requested additional information and clarification of certain areas of the Petition.[2] Petitioners filed responses to these requests on November 29, 2016.[3] On December 5, 2016, Far East America, Inc. (FEA), a U.S. importer of hardwood plywood, provided comments on domestic industry support for the Petitions and requested that the Department poll the domestic industry to determine industry support.[4] We also received comments on industry support and a request to poll the domestic industry from Ashley Furniture Industries, Inc.; Heritage

Home Group, Inc.; and Standard Furniture Manufacturing Company, U.S. producers of wooden and upholstered furniture and wooden furniture parts, on December 5, 2016.[5] On December 6, 2016, Petitioners provided a response to FEA's comments on industry support and provided further clarification regarding the scope.[6] On December 7, 2016, Petitioners provided a response to the Furniture Producers' Letter.[7] On December 7, 2016, the Government of the PRC provided comments on industry support and requested the Department poll the industry to determine industry support.[8] In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), Petitioners allege that the Government of the PRC (GOC) is providing countervailable subsidies (within the meaning of sections 701 and 771(5) of the Act) with respect to imports of hardwood plywood from the PRC, and that imports of hardwood plywood from the PRC are materially injuring, or threaten material injury to, the domestic industry producing hardwood plywood in the United States. Also, consistent with section 702(b)(1) of the Act, for those alleged programs on which we are initiating a CVD investigation, the Petition is accompanied by information reasonably available to Petitioners supporting their allegations.

The Department finds that Petitioners filed this Petition on behalf of the domestic industry because Petitioners are interested parties as defined in section 771(9)(C) and (F) of the Act. The Department also finds that Petitioners demonstrated sufficient industry support with respect to the initiation of the CVD investigation that Petitioners are requesting.[9]

[9] *See* the ''Determination of Industry Support for the Petition'' section below.

Period of Investigation

Because the Petition was filed on November 18, 2016, pursuant to 19 CFR 351.204(b)(2), the period of investigation is January 1, through December 31, 2015.

Scope of the Investigation

The product covered by this investigation is hardwood plywood from the PRC. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Comments on Scope of the Investigation

During our review of the Petition, we issued questions to, and received responses from, Petitioners pertaining to the proposed scope to ensure that the scope language in the Petition would be an accurate reflection of the products for which the domestic industry is seeking relief.[10]

As discussed in the preamble to the Department's regulations,[11] we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determination. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on Wednesday, December 28, 2016. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on Monday, January 9, 2017.

The Department requests that any factual information the parties consider relevant to the scope of the investigation be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact the Department and request permission to submit the additional information. All such comments must also be filed on the record of the concurrent AD investigation.

Filing Requirements

All submissions to the Department must be filed electronically using Enforcement & Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).[12] An electronically filed document must be received successfully in its entirety by the time and date when it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement & Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to section 702(b)(4)(A)(i) of the Act, the Department notified representatives of the GOC of the receipt of the Petition. Also, in accordance with section 702(b)(4)(A)(ii) of the Act, the Department provided representatives of the GOC the opportunity for consultations with respect to the CVD petition.[13] In response to the Department's letter, the GOC requested that consultations be held on December 16, 2016, which we note is after the initiation date.[14]

Determination of Industry Support for the Petition

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition

[13] *See* Letter of invitation from the Department regarding, ''Countervailing Duty Petition Certain Hardwood Plywood Products from the People's Republic of China,'' dated December 2, 2016.

[14] *See* Department Memorandum, ''Countervailing Duty Petition on Certain Hardwood Plywood Products from the People's Republic of China: GOC Consultations,'' dated December 7, 2016.

does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[15] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[16]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petition).

With regard to the domestic like product, Petitioners do not offer a definition of the domestic like product distinct from the scope of the investigation. Based on our analysis of the information submitted on the record, we have determined that hardwood plywood, as defined in the scope, constitutes a single domestic like product and we have analyzed industry support in terms of that domestic like product.[17]

In determining whether Petitioners have standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in Appendix I of this notice. Petitioners provided their own production of the domestic like product in 2015. Petitioners also provided data from the Hardwood Plywood & Veneer Association (HPVA) to determine total 2015 production of the domestic like product by the entire domestic industry. To establish industry support, Petitioners compared their production to the total 2015 production of the domestic like product for the entire domestic industry.[18] We relied on data Petitioners provided for purposes of measuring industry support.[19]

On December 5, 2016, we received comments on industry support from FEA, a U.S. importer of the subject merchandise, and Ashley Furniture Industries, Inc.; Heritage Home Group, Inc.; and Standard Furniture Manufacturing Company, Inc., domestic producers of wooden and upholstered furniture and wooden furniture parts.[20] Petitioners responded to these comments on December 6, 2016.[21]

Our review of the data provided in the Petition, General Issues Supplement, and other information readily available to the Department indicates that Petitioners have established industry support.[22] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.,* polling).[23] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[24] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[25] Accordingly, the Department determines that the Petition was filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.

The Department finds that Petitioners filed the Petition on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) and (F) of the Act and they have demonstrated sufficient industry support with respect to the CVD investigation that they are requesting the Department initiate.[26]

Injury Test

Because the PRC is a ''Subsidies Agreement Country'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to this investigation. Accordingly, the ITC must determine whether imports of the subject merchandise from the PRC materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

Petitioners allege that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, Petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[27]

Petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price suppression or depression; lost sales and revenues; and negative impact on the domestic industry's key indicators, including financial performance, production, shipments,

and capacity utilization.[28] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[29]

Initiation of Countervailing Duty Investigation

Section 702(b)(1) of the Act requires the Department to initiate a CVD investigation whenever an interested party files a CVD petition on behalf of an industry that: (1) Alleges elements necessary for an imposition of a duty under section 701(a) of the Act; and (2) is accompanied by information reasonably available to Petitioners supporting the allegations.

Petitioners allege that producers/exporters of hardwood plywood in the PRC benefit from countervailable subsidies bestowed by the GOC. The Department examined the Petition and finds that it complies with the requirements of section 702(b)(1) of the Act. Therefore, in accordance with section 702(b)(1) of the Act, we are initiating a CVD investigation to determine whether manufacturers, producers, or exporters of hardwood plywood from the PRC receive countervailable subsidies from the GOC and various authorities thereof.

On June 29, 2015, the President of the United States signed into law the Trade Preferences Extension Act of 2015, which made numerous amendments to the AD and CVD law.[30] The 2015 law does not specify dates of application for those amendments. On August 6, 2015, the Department published an interpretative rule, in which it announced the applicability dates for each amendment to the Act, except for amendments contained in section 771(7) of the Act, which relate to determinations of material injury by the ITC.[31] The amendments to sections 776 and 782 of the Act are applicable to all determinations made on or after August 6, 2015, and, therefore, apply to this CVD investigation.[32]

Based on our review of the petition, we find that there is sufficient information to initiate a CVD investigation on 31 of the 33 alleged programs in the PRC. For a full discussion of the basis for our decision to initiate on each program, *see* the PRC CVD Initiation Checklist. A public version of the initiation checklist for this investigation is available on ACCESS.

In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determination no later than 65 days after the date of this initiation.

Respondent Selection

The Department normally selects respondents in a CVD investigation using CBP entry data. However, for this investigation, the HTSUS numbers the subject merchandise would enter under are basket categories containing many products unrelated to hardwood plywood, and the reported entry data contain differing units of quantity. Therefore, we cannot rely on CBP entry data in selecting respondents. Instead, for this investigation, the Department will request quantity and value (Q&V) information from known exporters and producers identified, with complete contact information, in the Petition. In addition, the Department will post the Q&V questionnaire along with filing instructions on the Enforcement and Compliance Web site at *http://www.trade.gov/enforcement/news.asp.*

Producers/exporters of hardwood plywood from the PRC that do not receive Q&V questionnaires by mail may still submit a response to the Q&V questionnaire and can obtain a copy from the Enforcement & Compliance Web site. The Q&V response must be submitted by the relevant PRC exporters/producers no later than December 22, 2016. All Q&V responses must be filed electronically via ACCESS.

Distribution of Copies of the Petition

In accordance with section 702(b)(4)(A)(i) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the GOC via ACCESS. Because of the particularly large number of producers/exporters identified in the Petition, the Department considers the service of the public version of the Petition to the foreign producers/exporters satisfied by delivery of the public version to the government of the PRC, consistent with 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 702(d) of the Act.

Preliminary Determination by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of hardwood plywood from the PRC are materially injuring, or threatening material injury to, a U.S. industry.[33] A negative ITC determination will result in the investigation being terminated; [34] otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The regulation requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Parties should review the regulations prior to submitting factual information in this investigation.

Extension of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301 expires. For submissions that are due from multiple parties simultaneously,

[28] *See* Volume I of the Petition, at 14–40 and Exhibits I–6 through I–17; *see also* General Issues Supplement, at 1, 8–11 and Exhibits I–Supp–2, I–Supp–5, and I–Supp–6.

[29] *See* PRC CVD Initiation Checklist, at Attachment III, Analysis of Allegations and Evidence of Material Injury and Causation for the Antidumping and Countervailing Duty Petitions Covering Certain Hardwood Plywood Products from the People's Republic of China.

[30] *See* Trade Preferences Extension Act of 2015, Public Law 114–27, 129 Stat. 362 (2015).

[31] *See Dates of Application of Amendments to the Antidumping and Countervailing Duty Laws Made by the Trade Preferences Extension Act of 2015,* 80 FR 46793 (August 6, 2015) (*Applicability Notice*). The 2015 amendments may be found at *https://www.congress.gov/bill/114th-congress/house-bill/1295/text/pl.*

[32] *Id.,* at 46794–95.

[33] *See* section 703(a)(2) of the Act.

[34] *See* section 703(a)(1) of the Act.

an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[35] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.[36] The Department intends to reject factual submissions if the submitting party does not comply with the applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

[35] *See* section 782(b) of the Act.

[36] *See Certification of Factual Information To Import Administration During Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (''*Final Rule*''); *see also* frequently asked questions regarding the *Final Rule,* available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

This notice is issued and published pursuant to sections 702 and 777(i) of the Act.

Dated: December 8, 2016.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation is hardwood and decorative plywood, and certain veneered panels as described below. For purposes of this proceeding, hardwood and decorative plywood is defined as a generally flat, multilayered plywood or other veneered panel, consisting of two or more layers or plies of wood veneers and a core, with the face and/or back veneer made of non-coniferous wood (hardwood) or bamboo. The veneers, along with the core may be glued or otherwise bonded together. Hardwood and decorative plywood may include products that meet the American National Standard for Hardwood and Decorative Plywood, ANSI/HPVA HP–1–2016 (including any revisions to that standard).

For purposes of this investigation a ''veneer'' is a slice of wood regardless of thickness which is cut, sliced or sawed from a log, bolt, or flitch. The face and back veneers are the outermost veneer of wood on either side of the core irrespective of additional surface coatings or covers as described below.

The core of hardwood and decorative plywood consists of the layer or layers of one or more material(s) that are situated between the face and back veneers. The core may be composed of a range of materials, including but not limited to hardwood, softwood, particleboard, or medium-density fiberboard (''MDF'').

All hardwood plywood is included within the scope of this investigation regardless of whether or not the face and/or back veneers are surface coated or covered and whether or not such surface coating(s) or covers obscures the grain, textures, or markings of the wood. Examples of surface coatings and covers include, but are not limited to: Ultra-violet light cured polyurethanes; oil or oil-modified or water based polyurethanes; wax; epoxy-ester finishes; moisture-cured urethanes; paints; stains; paper; aluminum; high pressure laminate; MDF; medium density overlay (''MDO''); and phenolic film. Additionally, the face veneer of hardwood plywood may be sanded; smoothed or given a ''distressed'' appearance through such methods as hand-scraping or wire brushing. All hardwood plywood is included within the scope even if it is trimmed; cut-to-size; notched; punched; drilled; or has underwent other forms of minor processing.

All hardwood and decorative plywood is included within the scope of this investigation, without regard to dimension (overall thickness, thickness of face veneer, thickness of back veneer, thickness of core, thickness of inner veneers, width, or length). However, the most common panel sizes of hardwood and decorative plywood are 1219 x 1829 mm (48 x 72 inches), 1219 x 2438 mm (48 x 96 inches), and 1219 x 3048 mm (48 x 120 inches).

Subject merchandise also includes hardwood and decorative plywood that has been further processed in a third country, including but not limited to trimming, cutting, notching, punching, drilling, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

The scope of the investigation excludes the following items: (1) Structural plywood (also known as ''industrial plywood'' or ''industrial panels'') that is manufactured to meet U.S. Products Standard PS 1–09, PS 2–09, or PS 2–10 for Structural Plywood (including any revisions to that standard or any substantially equivalent international standard intended for structural plywood), and which has both a face and a back veneer of coniferous wood; (2) products which have a face and back veneer of cork; (3) multilayered wood flooring, as described in the antidumping duty and countervailing duty orders on Multilayered Wood Flooring from the People's Republic of China, Import Administration, International Trade Administration. *See Multilayered Wood Flooring from the People's Republic of China,* 76 FR 76,690 (Dec. 8, 2011) (*amended final determination of sales at less than fair value and antidumping duty order),* and *Multilayered Wood Flooring from the People's Republic of China,* 76 FR 76.693 (Dec. 8, 2011) (*countervailing duty order), as amended* by *Multilayered Wood Flooring from the People's Republic of China: Amended Antidumping and Countervailing Duty Orders, 77 FR 5,484 (Feb. 3, 2012);* (4) multilayered wood flooring with a face veneer of bamboo or composed entirely of bamboo; (5) plywood which has a shape or design other than a flat panel, with the exception of any minor processing described above; and (6) products made entirely from bamboo and adhesives (also known as ''solid bamboo'').

Imports of hardwood plywood are primarily entered under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4412.10.0500; 4412.31.0520; 4412.31.0540; 4412.31.0560; 4412.31.2510; 4412.31.2520; 4412.31.4040; 4412.31.4050; 4412.31.4060; 4412.31.4075; 4412.31.4080; 4412.31.5125; 4412.31.5135; 4412.31.5155; 4412.31.5165; 4412.31.5175; 4412.31.6000; 4412.31.9100; 4412.32.0520; 4412.32.0540; 4412.32.0565; 4412.32.0570; 4412.32.2510; 4412.32.2525; 4412.32.2530; 4412.32.3125; 4412.32.3135; 4412.32.3155; 4412.32.3165; 4412.32.3175; 4412.32.3185; 4412.32.5600; 4412.94.1030; 4412.94.1050; 4412.94.3105; 4412.94.3111; 4412.94.3121; 4412.94.3131; 4412.94.3141; 4412.94.3160; 4412.94.3161; 4412.94.3171; 4412.94.3175; 4412.94.4100; 4412.99.0600; 4412.99.1020; 4412.99.1030; 4412.99.1040; 4412.99.3110; 4412.99.3120; 4412.99.3130;9 4412.99.3140; 4412.99.3150; 4412.99.3160; 4412.99.3170; 4412.99.4100; 4412.99.5115; and 4412.99.5710.

Imports of hardwood plywood may also enter under HTSUS subheadings 4412.39.1000; 4412.39.3000; 4412.39.4011; 4412.39.4012; 4412.39.4019; 4412.39.4031;

4412.39.4032; 4412.39.4039; 4412.39.4051; 4412.39.4052; 4412.39.4059; 4412.39.4061; 4412.39.4062; 4412.39.4069; 4412.39.5010; 4412.39.5030; 4412.39.5050; 4412.99.6000; 4412.99.7000; 4412.99.8000; 4412.99.9000; 4412.10.9000; 4412.94.5100; 4412.94.9500; and 4412.99.9500. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–036]

Certain Biaxial Integral Geogrid Products From the People's Republic of China: Extension of Final Determination of Antidumping Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') is extending the time limits for the final determination of the investigation of certain biaxial integral geogrid products (''geogrids'') from the People's Republic of China (''PRC''). The period of investigation (''POI'') is July 1, 2015, through December 31, 2015.

DATES: Effective December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Susan Pulongbarit or Julia Hancock, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4031 or (202) 482–1394, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the notice of initiation of this investigation on February 16, 2016.[1] On June 24, 2016, the companion countervailing duty (''CVD'') investigation of geogrids from the PRC published a notice aligning the final CVD determination with the final determination of the antidumping duty (''AD'') investigation in accordance with section 705(a)(1) of the Tariff Act of 1930, as amended (the ''Act''), and 19 CFR 351.210(b)(4).[2] On August 22, 2016, the Department published the preliminary results of the AD investigation of geogrids from the PRC.[3] In that notice, the Department partially extended the final determination, stating that the final determination would be issued no later than 120 days after the date of publication of the preliminary determination, pursuant to section 735(a)(2) of the Act. The final results are currently due no later than December 20, 2016.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by Petitioners. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On July 11, 2016, pursuant to 19 CFR 351.210(b) and (e), Taian Modern Plastic Co., Ltd. requested that, contingent upon an affirmative preliminary determination of sales at LTFV, the Department postpone the final determination and that provisional measures be extended to a period not to exceed six months.[4]

Because the final determination is not fully extended, and in accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are fully postponing the final determination and extending the provisional measures. Accordingly, we will make our final determination no later than 135 days after the date of publication of the preliminary determination, pursuant to section 735(a)(2) of the Act.[5] Therefore, the final results are now due no later than January 4, 2017.

We are issuing and publishing this notice in accordance with sections 733(f) of the Act.

Dated: December 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Reporting Requirements for Sea Otter Interactions with the Pacific Sardine Fishery; Coastal Pelagic Species Fishery Management Plan.

OMB Control Number: 0648–0566.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 2.

Average Hours per Response: 15 minutes.

Burden Hours: 1.

Needs and Uses: This request is for extension of a currently approved information collection.

On May 30, 2007, the National Marine Fisheries Service (NMFS) published a Final Rule (72 FR 29891) implementing a requirement under the Coastal Pelagic Species Fishery Management Plan (CPS FMP) to report any interactions that may occur between a CPS vessel and/or fishing gear and sea otters.

Specifically, these reporting requirements are:

1. If a southern sea otter is entangled in a net, regardless of whether the animal is injured or killed, such an occurrence must be reported within 24 hours to the Regional Administrator, NMFS West Coast Region.

2. While fishing for CPS, vessel operators must record all observations of otter interactions (defined as otters within encircled nets or coming into contact with nets or vessels, including but not limited to entanglement) with their purse seine net(s) or vessel(s). With the exception of an entanglement, which will be initially reported as described in #2 above, all other observations must be reported within 20 days to the Regional Administrator.

When contacting NMFS after an interaction, fishermen are required to provide information regarding the location, specifically latitude and longitude, of the interaction and a description of the interaction itself. Descriptive information of the interaction should include: Whether or not the otters were seen inside or outside the net; if inside the net, had the net been completely encircled; did contact occur with net or vessel; the number of otters present; duration of interaction; otter's behavior during interaction; and, measures taken to avoid interaction.

Affected Public: Business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: December 12, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Atlantic Highly Migratory Species Release Reports

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before February 14, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Peter Cooper at (301) 427–8503 or *Peter.Cooper@noaa.gov*.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

Under the Magnuson-Stevens Fishery Conservation and Management Act (MSFMCA, 16 U.S.C. 1801 *et seq.*) the National Marine Fisheries Service (NMFS) is to ensure that conservation and management measures promote, to the extent practicable, implementation of scientific research programs that include the tagging and releasing of Atlantic highly migratory species (HMS). The currently approved information collection allows the public to submit volunteered geographic and biological information relating to HMS releases in order to populate an interactive Web site mapping tool. This Web page attracts visitors who are interested in Atlantic HMS and contains information and links to promote HMS tagging programs that the general public can support or become involved with. All submissions are voluntary. Information is used to raise awareness for releasing Atlantic HMS and HMS tagging programs, and is not used as representative results.

II. Method of Collection

Respondents may submit information via electronic form, email, fax, or mail.

III. Data

OMB Control Number: 0648–0628.

Form Number: None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Individuals or households; businesses or other for-profit organizations; not-for-profit institutions; Federal government; and State, Local, or Tribal government.

Estimated Number of Respondents: 13.

Estimated Time per Response: 5 minutes.

Estimated Total Annual Burden Hours: 1.05 (1).

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: December 12, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Approval for the He'eia National Estuarine Research Reserve Management Plan

AGENCY: Stewardship Division, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Public notice.

SUMMARY: Notice is hereby given that the Stewardship Division, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce approves the Management Plan for the He'eia National Estuarine Research Reserve (NERR) located in Hawai'i.

The National Estuarine Research Reserve System (NERRS) is a federal-state partnership administered by

NOAA. The system protects more than 1.3 million acres of estuarine habitat for long-term research, monitoring, education and stewardship throughout the coastal United States. Established by the Coastal Zone Management Act of 1972, as amended, each reserve is managed by a lead state agency or university, with input from local partners. NOAA provides funding and national programmatic guidance.

The He'eia Reserve Management Plan addresses research, monitoring, education, and stewardship/cultural resources needs for the proposed reserve. The Management Plan has been organized with goals, objectives and strategies that are based on an adaptive management planning framework. These goals, focusing on the He'eia estuary, traditional knowledge, coastal resources, and management issues, closely link the NERRS program sectors of education, research and training, and stewardship. The goals of the Management Plan can be applied beyond the five-year timeframe of the Management Plan.

On September 2, 2016, NOAA issued notice of a public hearing and a thirty-day public comment period for the He'eia Reserve Management Plan and a Draft Environmental Impact Statement associated with the Proposed Designation of the He'eia NERR (81 FR 60676). On October 13, 2016, NOAA announced a 13-day extension to the public comment period (81 FR 70666). Responses to the relevant written and oral comments on the Management Plan have been incorporated into Appendix D of the Final Environmental Impact Statement for the He'eia National Estuarine Research Reserve. The final Management Plan and final EIS, including the Appendix D response to comments, are available at the *regulations.gov* Web site by searching for Docket Number NOAA–NOS–2016–0114, and at *https://coast.noaa.gov/czm/compliance/.*

FOR FURTHER INFORMATION CONTACT: Joelle Gore, Chief, Stewardship Division, Office for Coastal Management at 240–533–0813 or via email at *joelle.gore@noaa.gov.*

Federal Domestic Assistance Catalog 11.420 Coastal Zone Management Program Administration

Dated: December 13, 2016.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE201

Notice of Availability of an Alabama Trustee Implementation Group (Alabama TIG) Draft Recreational Use Restoration Plan I and Draft Environmental Impact Statement: Provide and Enhance Recreational Opportunities (RP/EIS)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: In accordance with the Oil Pollution Act of 1990 (OPA) and the National Environmental Policy Act (NEPA), the *Deepwater Horizon* Federal and State natural resource trustee agencies for the Alabama Trustee Implementation Group (Alabama TIG) have prepared a Draft Recreational Use Restoration Plan I and Draft Environmental Impact Statement: Provide and Enhance Recreational Opportunities (Draft RP/EIS). The Draft RP/EIS describes the restoration project alternatives considered by the Alabama TIG to compensate for recreational shoreline use lost as a result of the *Deepwater Horizon* oil spill. The Alabama TIG evaluated these alternatives under criteria set forth in the OPA natural resource damage assessment regulations and evaluated the environmental consequences of the restoration alternatives in accordance with NEPA. The purpose of this notice is to inform the public of the availability of the Draft RP/EIS and to seek public comments on the document.

DATES: The Alabama TIG will consider public comments received on or before January 30, 2017.

Public Meetings: The Alabama TIG will host two public meetings to facilitate public review and comment on the Draft RP/EIS. Both written and verbal public comments will be taken at each public meeting. The Alabama TIG will hold an open house for each meeting followed by a formal meeting where the Alabama TIG will take verbal public comments. Each public meeting will include a presentation of the Draft RP/EIS. Public meetings will be held on January 17 and 18, 2017. The full public meeting schedule is listed in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES:

Obtaining Documents: You may download the Draft RP/EIS at *http://www.gulfspillrestoration.noaa.gov.* Alternatively, you may request a CD of the Draft RP/EIS (see **FOR FURTHER INFORMATION CONTACT**). You may also view the document at any of the public facilities listed at *http://www.gulfspillrestoration.noaa.gov.*

Submitting Comments: You may submit comments on the Draft RP/EIS by one of following methods:

- Via the Web: *http://www.gulfspillrestoration.noaa.gov* or
- *U.S. Mail:* NOAA Gulf of Mexico Disaster Response Center; attn: Alabama Recreational Use Restoration Plan; 7344 Zeigler Blvd.; Mobile, AL 36608. Please note that mailed comments must be postmarked on or before the comment deadline of January 30, 2017 to be considered.

FOR FURTHER INFORMATION CONTACT:

- NOAA—Dan Van Nostrand, *dan.van-nostrand@noaa.gov.*
- AL—Amy Hunter, *amy.hunter@dcnr.alabama.gov.*

SUPPLEMENTARY INFORMATION:

Introduction

On April 20, 2010, the mobile offshore drilling unit *Deepwater Horizon,* which was being used to drill a well for BP Exploration and Production Inc. (BP), in the Macondo prospect (Mississippi Canyon 252—MC252), exploded, caught fire and subsequently sank in the Gulf of Mexico, resulting in an unprecedented volume of oil and other discharges from the rig and from the wellhead on the seabed. The *Deepwater Horizon* oil spill is the largest oil spill in U.S. history, discharging millions of barrels of oil over a period of 87 days. In addition, well over one million gallons of dispersants were applied to the waters of the spill area in an attempt to disperse the spilled oil. An undetermined amount of natural gas was also released to the environment as a result of the spill.

The *Deepwater Horizon* State and Federal natural resource trustees (DWH Trustees) conducted the natural resource damage assessment (NRDA) for the *Deepwater Horizon* oil spill under the Oil Pollution Act 1990 (OPA; 33 U.S.C. 2701 *et seq.*). Pursuant to OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the injured natural resources under their

trusteeship, including the loss of use and services from those resources from the time of injury until the time of restoration to baseline (the resource quality and conditions that would exist if the spill had not occurred) is complete.

The DWH Trustees are:

- U.S. Department of the Interior (DOI), as represented by the National Park Service (NPS), U.S. Fish and Wildlife Service (FWS), and Bureau of Land Management (BLM);
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce (DOC);
- U.S. Department of Agriculture (USDA);
- U.S. Environmental Protection Agency (EPA);
- State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator's Office, Department of Environmental Quality, Department of Wildlife and Fisheries, and Department of Natural Resources;
- State of Mississippi Department of Environmental Quality;
- State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama;
- State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission; and
- For the State of Texas, Texas Parks and Wildlife Department, Texas General Land Office, and Texas Commission on Environmental Quality.

Upon completion of the NRDA, the DWH Trustees reached and finalized a settlement of their natural resource damage claims with BP in a Consent Decree [1] approved by the United States District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in Alabama are now chosen and managed by the Alabama TIG. The Alabama TIG is composed of the following Trustees:

- U.S. Department of the Interior (DOI), as represented by the National Park Service (NPS), U.S. Fish and Wildlife Service (FWS), and Bureau of Land Management (BLM);
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce (DOC);
- U.S. Department of Agriculture (USDA);
- U.S. Environmental Protection Agency (EPA);
- State of Alabama Department of Conservation and Natural Resources; and
- Geological Survey of Alabama.

This restoration planning activity is proceeding in accordance with the *Deepwater Horizon* Oil Spill: Final Programmatic Damage Assessment and Restoration Plan (PDARP) and Final Programmatic Environmental Impact Statement (PEIS). Information on the Restoration Type: Provide and Enhance Recreational Opportunities, as well as the OPA criteria against which project ideas are being evaluated, can be found in the PDARP/PEIS (*http://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan*) and in the Overview of the PDARP/PEIS (*http://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan*).

This restoration planning activity is occurring, in part, in accordance with the February 16, 2016, decision in *Gulf Restoration Network* v. *Jewell,* Case 1:15–cv–00191–CB–C (S.D. Ala.), in which the court enjoined the use of *Deepwater Horizon* early restoration that had been allocated to partially fund construction of a lodge and conference center at Alabama's Gulf State Park (GSP) as part of the GSP Enhancement Project, pending additional analysis under NEPA and OPA. This restoration planning activity fulfills the Federal and State natural resources trustees' responsibilities under this court order while looking more broadly at the potential to provide restoration for lost recreational shoreline use within Alabama.

Background

On July 6, 2016, the Alabama TIG initiated a 30-day formal scoping and public comment period for this Draft RP/EIS (81 FR 44007–44008) through a Notice of Intent to Prepare a RP/EIS, and to Conduct Scoping. The Trustees conducted the scoping in accordance with OPA (15 CFR 990.14(d)), NEPA (40 CFR 1501.7), and State authorities. That NOI requested public input to identify and evaluate a range of restoration types that could be used to compensate the public for lost recreational use opportunities in Alabama caused by the *Deepwater Horizon* oil spill in the Gulf of Mexico.

Overview of the Draft RP/EIS

The Draft RP/EIS is being released in accordance with the OPA, NRDA regulations found in the Code of Federal Regulations (CFR) at 15 CFR part 990, and the NEPA (42 U.S.C. 4321 *et seq.*).

In the Draft RP/EIS, the Alabama TIG presents to the public their plan for compensating for lost recreational shoreline use in Alabama. The Draft RP/EIS proposes ten individual restoration alternatives, including a no action alternative, evaluated in accordance with OPA and NEPA. One or more may be selected for implementation to compensate for lost recreational shoreline use as a result of the *Deepwater Horizon* oil spill.

The ten alternatives under the Draft RP/EIS are as follows:

- Alternative 1 (Preferred Alternative): Gulf State Park Lodge and Associated Public Access Amenities
- Alternative 2 (Preferred Alternative): Fort Morgan Pier Rehabilitation
- Alternative 3: Fort Morgan Peninsula Public Access Improvements
- Alternative 4: Gulf Highlands Land Acquisition and Improvements
- Alternative 5: (Preferred Alternative) Laguna Cove Little Lagoon Natural Resource Protection
- Alternative 6 (Preferred Alternative): Bayfront Park Restoration and Improvements
- Alternative 7 (Preferred Alternative): Dauphin Island Eco-Tourism and Environmental Education Area
- Alternative 8: Mid-Island Parks and Public Beach Improvements (Parcels A, B, and C)
- Alternative 9: (Preferred Alternative): Mid-Island Parks and Public Beach Improvements (Parcels B and C)
- Alternative 10: No Action/Natural Recovery

The Alabama TIG has examined and assessed the extent of injury and the restoration alternatives. In the Draft RP/EIS, the Alabama TIG presents to the public their plan for providing partial compensation to the public for lost recreational use in Alabama. In particular, it considers restoration approaches to help restore, replace, rehabilitate, or acquire the equivalent of the lost recreational shoreline use in Alabama. The Alabama TIG believes that the preferred alternatives in this Draft RP/EIS are most appropriate for addressing lost recreational shoreline use in Alabama at this time. Additional restoration planning for lost recreational use in Alabama will occur at a later time.

Next Steps

The public is encouraged to review and comment on the Draft RP/EIS. As described above, public meetings are scheduled to facilitate the public review and comment process. After the close of the public comment period, the Alabama TIG will consider and address the comments received before issuing a Final RP/EIS. A summary of comments received, the Alabama TIG's responses, and any revisions to the document, as

[1] *https://www.justice.gov/enrd/file/838066/download.*

appropriate, will be included in the final document. After issuing the Final RP/EIS, the Alabama TIG will prepare a Record of Decision that formally selects the restoration project alternatives.

PUBLIC MEETING SCHEDULE

Date	Time (local times)	Location
January 17, 2017	6 p.m. Open House 6:30 p.m. Public Meeting.	Shelby Auditorium, Shelby Fisheries Center, Dauphin Island Sea Lab, 101 Bienville Boulevard, Dauphin Island, AL 36528.
January 18, 2017	6 p.m. Open House 6:30 p.m. Public Meeting.	Erie H. Meyer Civic Center, 1930 W. 2nd Street, Gulf Shores, AL 36542.

Invitation to Comment

The Alabama TIG seeks public review and comment on the Draft RP/EIS. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be publicly available at any time.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Western Alaska Community Development Quota (CDQ) Program.

OMB Control Number: 0648–0269.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 13.

Average Hours per Response: 5 minutes to register and 5 minutes to print letter for CDQ Vessel Registration System; 35 minutes for Groundfish/Halibut CDQ or Prohibited Species Quota (PSQ) Transfer Request; 5 hours for Application for Approval of Use of Non-CDQ Harvest Regulations; and 4 hours for Appeals.

Burden Hours: 25.

Needs and Uses: This request is for extension of a current information collection.

The Western Alaska Community Development Quota (CDQ) Program is an economic development program associated with federally managed fisheries in the Bering Sea and Aleutian Islands Management Area (BSAI). The CDQ Program receives apportionments of the annual catch limits for a variety of commercially valuable species in the BSAI, which are in turn allocated among six different non-profit managing organizations representing different affiliations of communities (CDQ groups). The CDQ Program redistributes a portion of commercially important BSAI fisheries species to adjacent communities. There are 65 communities participating in the program. CDQ groups use the revenue derived from the harvest of their fisheries allocations as a basis both for funding economic development activities and for providing employment opportunities. Thus, the successful harvest of CDQ Program allocations is integral to achieving the goals of the program.

National Marine Fisheries Service (NMFS) manages the groundfish fisheries in the exclusive economic zone off Alaska. NMFS manages the groundfish and crab fisheries of the BSAI under the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area and the Fishery Management Plan for Bering Sea/Aleutian Islands King and Tanner Crabs (FMPs). The North Pacific Fishery Management Council prepared the FMPs under the authority of the Magnuson-Stevens Fishery Conservation & Management Act (16 U.S.C. 1801 *et seq.*) as amended in 2006. The International Pacific Halibut Commission and NMFS manage fishing for Pacific halibut through regulations established under the authority of the Northern Pacific Halibut Act of 1982. Regulations implementing the FMPs appear at 50 CFR parts 300, 679, and 680.

Affected Public: Not for profit institutions; business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at *reginfo.gov.* Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: December 12, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions And Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add products and a service to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete products and a service previously furnished by such agencies.

DATES: Comments must be received on or before January 15, 2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely

Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

The following products and service are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Products

NSN(s)—Product Name(s): 6645–01–NIB–0153—Clock, LCD Digital Display, Radio-Controlled, Silver, 9.75″ x 7.25″ x 1″
Mandatory for: Total Government Requirement
Mandatory Source(s) of Supply: Chicago Lighthouse Industries, Chicago, IL
Contracting Activity: General Services Administration, New York, NY
Distribution: A-List

NSN(s)—*Product Name(s):* MR 357—Tumblers, Red, White and Blue, Includes Shipper 10357
Mandatory for: Military commissaries and exchanges in accordance with the Code of Federal Regulations, Chapter 51, 51–6.4.
Mandatory Source(s) of Supply: Industries for the Blind, Inc., West Allis, WI
Contracting Activity: Defense Commissary Agency
Distribution: C-List

Service

Service Type: Document Destruction Service
Mandatory for: U.S. Department of Labor (DOL), Office of Workers' Compensation Programs, Charles E. Bennett Federal Building, 400 West Bay Street, Suites 722, 826 and 943 Jacksonville, FL
Mandatory Source(s) of Supply: Challenge Enterprises of North Florida, Inc., Green Cove Springs, FL
Contracting Activity: Dept of Labor, Office of the Assistant Secretary for Administration and Management OASAM-Atlanta Reg

Deletions

The following products and service are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s): 8520–00–NIB–0116—PURELL/SKILCRAFT Instant Hand Sanitizer, Gel, 1200ml
Mandatory Source(s) of Supply: Travis Association for the Blind, Austin, TX
Contracting Activity: Department of Veterans Affairs

NSN(s)—Product Name(s): 8950–01–E60–5752—Garlic Powder, 160 oz. Container, 5 lb. per container, 3/CS
Mandatory Source(s) of Supply: CDS Monarch, Webster, NY
Contracting Activities: Department of Veterans Affairs, Defense Logistics Agency Troop Support

NSN(s)—Product Name(s): 5340–01–527–6885—Clamp, Loop, CRES, 1/2″ loop x 1/2″ wide
Mandatory Source(s) of Supply: Provail, Seattle, WA
Contracting Activity: Defense Logistics Agency Troop Support

Service

Service Type: Document Destruction Service
Mandatory for: Internal Revenue Service: 2725 N. Westwood Blvd., Poplar Bluff, MO
Mandatory Source(s) of Supply: Cape Girardeau Community Sheltered Workshop, Inc., Cape Girardeau, MO
Contracting Activity: Department of the Treasury

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Addition and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to and Deletions from the Procurement List.

SUMMARY: This action adds a service to the Procurement List that will be furnished by the nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products and services from the Procurement List previously furnished by such agencies.

DATES: Effective January 15, 2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Addition

On 11/10/2016 (81 FR 78996–78997), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed addition to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agency to provide the service and impact of the addition on the current or most recent contractors, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organization that will provide the service to the Government.

2. The action will result in authorizing small entities to provide the service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the service proposed for addition to the Procurement List.

End of Certification

Accordingly, the following service is added to the Procurement List:

Service

Service Type: Custodial Service
Service Mandatory For: U.S. Army, U.S. Military Academy, First Class Club and Grant Hall, West Point, NY
Mandatory Source(s) of Supply: Access: Supports for Living Inc., Middletown, NY
Contracting Activity: Dept. of the Army, W6QM MICC-West Point

Deletions

On 11/10/2016 (81 FR 78996–78997), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSN(s)—Product Name(s): 7520–00–282–2137—Trimmer, Paper 7520–00–224–7621—Trimmer, Paper, Drop Knife, Beige, 24″ x 24″
Mandatory Source(s) of Supply: The Lighthouse for the Blind, Inc. (Seattle Lighthouse), Seattle, WA.
Contracting Activity: General Services Administration, New York, NY.

NSN(s)—Product Name(s): 7195–01–484–0017—Bulletin Board, Granite Finish, 36″ x 24″, Aluminum Frame.
Mandatory Source(s) of Supply: The Lighthouse for the Blind, Inc. (Seattle Lighthouse), Seattle, WA.
Contracting Activities: Department of Veterans Affairs, Strategic Acquisition Center General Services Administration, Philadelphia, PA.

Services

Service Type: Document Destruction Service
Mandatory for: Internal Revenue Service Offices at the following locations:
Service Locations:
2628 S. Cherry Avenue, Fresno, CA
5104 N. Blyth, Fresno, CA
890 West Ashlan, Fresno, CA
1728 Van Ness, Fresno, CA

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2016–HQ–0003]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by January 17, 2017.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571–372–0493.

SUPPLEMENTARY INFORMATION:

Title, Associated Form and OMB Number: DA Civilian Employment and Marketing Feedback; OMB Control Number 0702–XXXX.

Type of Request: New collection.

Number of Respondents: 128.

Responses per Respondent: 1.

Annual Responses: 128.

Average Burden per Response: 1.5 hours.

Annual Burden Hours: 192 hours.

Needs and Uses: The information collection requirement is necessary to provide the data needed to understand the best strategies and implementation tactics to build awareness of Army civilian opportunities and fill critical occupations.

Affected Public: Individuals or households.

Frequency: One-time.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at *Oira_submission@omb.eop.gov.* Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari. Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directives Division, 4800 Mark Center Drive, East Tower, Suite 03F09, Alexandria, VA 22350–3100.

Dated: December 12, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2016–30214 Filed 12–15–16; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DOD–2016–OS–0117]

Proposed Collection; Comment Request

AGENCY: National Defense University, DoD.

ACTION: Notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* and as part of a Federal Government-wide effort to streamline the process to seek feedback from the public on service delivery, the Center for the Study of Weapons of Mass Destruction at the Institute for National Strategic Studies announces a proposed generic information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 14, 2017.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

Any associated form(s) for this collection may be located within this same electronic docket and downloaded for review/testing. Follow the instructions at *http://www.regulations.gov* for submitting comments. Please submit comments on any given form identified by docket number, form number, and title.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Center for the Study of Weapons of Mass Destruction, Institute for National Strategic Studies, National Defense University, ATTN: Natasha E. Bajema, Ph.D., Washington, DC 20319–5066, or call at 202–685–4234.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Regular Generic Clearance for the Collection of NDU Emergence and Convergence; OMB Control Number 0704–XXXX.

Needs and Uses: The information collection requirement is necessary to assess the impact of emerging technologies (additive manufacturing, advanced robotics, nanotechnology, nuclear energy and synthetic biology) on the threat of weapons of mass destruction (WMD) and governance, tools and measures designed to counter WMD as part of a multi-year study entitled Emergence and Convergence. These surveys will generate important new data on the risk of misuse and governability of these technologies and support in-depth analysis of national security risks.

Current Actions: Processing New as Generic.

Type of Review: New.

Affected Public: Business or other for profit; Not-for-profit institutions.

Estimated Number of Annual Respondents: 65.

Average Expected Annual Number of Activities: 1.

Below we provide projected *average* estimates for the next three years:

Average Number of Respondents per Activity: 65.

Responses per Respondent: 2.

Annual Responses: 130.

Average Burden per Response: 60 minutes.

Annual Burden Hours: 130.

Frequency: On occasion.

Respondents are subject matter experts including scientists, engineers and technologists at academic institutions, non-for-profit organizations and industry. Structured techniques for the elicitation of expert judgment are key tools for national security risk assessments. The Delphi method involves an iterative series of questionnaires designed to build an expert consensus on a topic for which there is little or no existing data. This survey offers significant public benefit by producing a report that will support a dialogue between policymakers and private sector stakeholders. The report generated by this survey will help to educate the private sector on the national security risks associated with emerging technologies.

Dated: December 13, 2016.

Aaron Siegel,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

(viii) *Date Report Delivered to Congress:* December 7, 2016.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

United Arab Emirates—Apache AH–64E Helicopters and Services

The Government of the United Arab Emirates (UAE) has requested a possible sale of twenty-eight (28) AH–64E Remanufactured Apache Attack Helicopters; nine (9) new AH–64E Apache Attack Helicopters; Seventy-six (76) T700–GE–701D Engines (56 remanufactured, 18 new, 2 spares); thirty-nine (39) AN/ASQ–170 Modernized Target Acquisition and Designation Sight/AN/AAR–11 Modernized Pilot Night Vision Sensors (28 remanufactured, 9 new, 2 spares); thirty-two (32) remanufactured AN/APR–48B Modernized—Radar Frequency Interferometers forty-six (46) AAR–57 Common Missile Warning Systems (31 remanufactured, 9 new, 6 spares); eighty-eight (88) Embedded Global Positioning Systems with Inertial Navigation (72 new, 16 spares); forty-four (44) Manned-Unmanned Teaming-International (MUMTi) systems (28 remanufactured, 9 new, 7 spares); and fifteen (15) new MUMTi System Upper Receivers. This request also includes training devices, helmets, simulators, generators, transportation, wheeled vehicles and organization equipment, spare and repair parts, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. Total estimated program cost is $3.5 billion.

This proposed sale will enhance the foreign policy and national security of the U.S. by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East.

The proposed sale will improve the UAE's capability to meet current and future threats and provide greater security for its critical infrastructure. The UAE will use the enhanced capability to strengthen its homeland defense. The UAE will have no difficulty absorbing these Apache aircraft into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Boeing in Mesa, AZ and Lockheed Martin in Orlando, FL. Offsets are a requirement of doing business in UAE; however offsets are negotiated directly between the Original Equipment Manufactures or other vendors and the UAE government and details are not known at this time.

Implementation of this proposed sale will not require the assignment of contractor representatives to the UAE.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 16–15

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) *Sensitivity of Technology:*

1. The AH–64E Apache Attack Helicopter weapon system contains communications and target identification equipment, navigation equipment, aircraft survivability equipment, displays, and sensors. The airframe itself does not contain sensitive technology; however, the pertinent equipment listed below will be either installed on the aircraft or included in the sale:

a. The AN/APG–78 Fire Control Radar (FCR) is an active, low-probability of intercept, millimeter-wave radar, combined with a passive AN/APR–48B Modernized Radar Frequency Interferometer (M–RFI) mounted on top of the helicopter mast. The FCR Ground Targeting Mode detects, locates, classifies and prioritizes stationary or moving armored vehicles, tanks and mobile air defense systems as well as hovering helicopters, helicopters, and fixed wing aircraft in normal flight If desired, the radar data can be used to refer targets to the regular electro-optical Modernized Target Acquisition and Designation Sight (MTADS), This information is provided in a form that cannot be extracted by the foreign user, The content of these items is classified SECRET. User Data Module (UDM) on the RFI processor, contains the Radio Frequency threat library. The UDM, which is a hardware assemblage, is classified CONFIDENTIAL when programmed with threat parameters, threat priorities and/or techniques derived from U.S. intelligence information.

b. The AN/ASQ–170 Modernized Target Acquisition and Designation Sight/AN/AAQ–11 Pilot Night Vision Sensor (MTADS/PNVS) provides day, night, and limited adverse weather target information, as well as night navigation capabilities. The PNVS provides thermal imaging that permits nap-of-the-earth flight to, from, and within the battle area, while TADS provides the co-pilot gunner with search, detection, recognition, and designation by means of Direct View Optics (DVO), EI^{2}television, and Forward Looking Infrared (FLIR) sighting systems that may be used singularly or in combinations. Hardware is UNCLASSIFIED. Technical manuals for authorized maintenance levels are UNCLASSIFIED. Reverse engineering is not a major concern.

c. The AN/APR–48B Modernized Radar Frequency Interferometer (M–RFI) is an updated version of the passive radar detection and direction finding system. It utilizes a detachable UDM on the M–RFI processor, which contains the Radar Frequency (RF) threat library. The UDM, which is a hardware assemblage item is classified CONFIDENTIAL when programmed. Hardware becomes CLASSIFIED when populated with threat parametric data. Releasable technical manuals are Unclassified/restricted distribution.

d. The AAR–57 Common Missile Warning System (CMWS) detects energy emitted by threat missiles in-flight, evaluates potential false alarm emitters in the environment, declares validity of threat and selects appropriate countermeasures. The CMWS consists of an Electronic Control Unit (ECU),

Electro-Optic Missile Sensors (EOMSs), and Sequencer and Improved Countermeasures Dispenser (ICMD). The ECU hardware is classified CONFIDENTIAL; releasable technical manuals for operation and maintenance are classified SECRET.

e. The AN/APR–39 Radar Signal Detecting Set is a system that provides warnings of radar-directed air defense threats and allows appropriate countermeasures. This is the 1553 databuscompatible configuration. The hardware is classified CONFIDENTIAL when programmed with U.S. threat data; releasable technical manuals for operation and maintenance are classified CONFIDENTIAL; releasable technical data (technical performance) is classified SECRET. The system can be programmed with threat data provided by the purchasing country.

f. The AN/AVR–2B Laser Warning Set is a passive laser warning system that receives, processes, and displays threat information resulting from aircraft illumination by lasers on the multi functional display. The hardware is classified CONFIDENTIAL; releasable technical manuals for operation and maintenance are classified SECRET.

g. The Embedded Global Positioning System/Inertial Navigation System plus Multi Mode Receiver (EGI+MMR) The aircraft has two EGIs which use internal accelerometers, rate gyro measurements, and external sensor measurements to estimate the aircraft state, provides aircraft flight and position data to aircraft systems. The EGI is a velocity-aided, strap down, ring laser gyro based inertial unit. The EGI unit houses a GPS receiver. The receiver is capable of operating in either non-encrypted or encrypted. When keyed, the GPS receiver will automatically use anti-spoof/jam capabilities when they are in use. The EGI will retain the key through power on/off/on cycles. Because of safeguards built into the EGI, it is not considered classified when keyed. Integrated within the EGI is an Inertial Measurement Unit (IMU) for processing functions. Each EGI also houses a Multi-Mode Receiver (MMR). The MMR is incorporated to provide for reception of ground based NAVAID signals for instrument aided flight. Provides IMC I IFR integration and certification of improved Embedded Global Positioning System and Inertial (EGI) unit, with attached MMR, with specific cockpit instrumentation allows Apaches to operate within the worldwide IFR route structure. Also includes integration of the Common Army Aviation Map (CAAM), Area Navigation (RNAV), Digital Aeronautical Flight Information File (DAFIF) and Global Air Traffic Management (GATM) compliance.

h. Manned-Unmanned Teaming-International (MUMT–I) provides Manned-Unmanned Teaming with Unmanned Aerial Systems (UASs), other Apaches and other interoperable aircraft and land platforms. Provides ability to display real-time UAS sensor information to aircraft and transmit MTADS video. Capability to receive video and metadata from Interoperability Profile compliant (IOP) as well as legacy systems. It is a data link for the AH–64E that provides a fully integrated multiband, interoperable capability that allows pilots to receive off-board sensor video streaming from different platforms in non-Tactical Common Data Link (TCDL) bands. The MUMT–I data link can retransmit Unmanned Aerial System (UAS) or Apache Modernized Target Acquisition Designation Sight full-motion sensor video and metadata to another MUMT–I-equipped Apache. It can also transmit to ground forces equipped with the One Station Remote Video Terminal. It provides Apache aircrews with increased situational awareness and net-centric interoperability while significantly reducing sensor-to-shooter timelines. This combination results in increased survivability of Apache aircrews and ground forces by decreasing their exposure to hostile fire.

i. Link 16 is a military tactical data exchange network. Its specification is part of the family of Tactical Data Links. Link 16 provides aircrews with enhanced situational awareness and the ability to exchange target information to Command and Control (C2) assets via Tactical Digital Information Link-Joint (TADIL–J). Link 16 can provide a range of combat information in near-real time to U.S. and allies' combat aircraft and C2 centers. This will contribute to the integrated control of fighters by either ground-based or airborne controllers and will greatly increase the fighters' situational awareness and ability either to engage targets designated by controllers or to avoid threats, thereby increasing mission effectiveness and reducing fratricide and attrition. The Link 16 enables the Apache to receive information from the command-and-control platforms and enables it to share this data with all the other services, making it more efficient at locating and prosecuting targets. The material solution for the AH–64E is currently the Small Tactical Terminal (SIT) KOR–24A from Harris to satisfy its requirement for an Airborne and Maritime/Fixed Station (AMF) Small Airborne Link 16 Terminal (SALT). The SIT is the latest generation of small, two-channel, Link 16 and VHF/UHF radio terminals. While in flight, the SIT provides simultaneous communication, voice or data, on two key waveforms.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the recipient country can provide the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the United Arab Emirates.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Department of Defense Military Family Readiness Council (MFRC); Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing this notice to announce a Federal Advisory Committee meeting of the Department of Defense Military Family Readiness Council (MFRC). This meeting will be open to the public.

DATES: Thursday, January 26, 2017, from 1:00 p.m. to 3:00 p.m.

ADDRESSES: Pentagon Library & Conference Center, Room B6 (escorts will be provided from the Pentagon Metro entrance).

FOR FURTHER INFORMATION CONTACT: Ms. Melody McDonald or Dr. Randy Eltringham, Office of the Deputy Assistant Secretary of Defense (Military Community & Family Policy), Office of Family Readiness Policy, 4800 Mark Center Drive, Alexandria, VA 22350–2300, Room 3G15. Telephones (571) 372–0880; (571) 372–5315 or email: OSD Pentagon OUSD P–R Mailbox Family Readiness Council, *osd.pentagon.ousd-p-r.mbx.family-readiness-council@mail.mil.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C. Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, this meeting is open to the public, subject to the availability of space. Members of the public who are entering the Pentagon should arrive at the visitors' center next to the Metro entrance 30 minutes before the scheduled meeting time to allow time to pass through the security check points. Members of the public need to email the Council at *osd.pentagon.ousd-p-rmbx.family-readiness-council@mail.mil* no later than 5:00 p.m., on Thursday, January 12, 2017 to arrange for an escort from the security check point to the Conference Room area.

Pursuant to 41 CFR 102–3.105(j) and 102–3.140, and section 10(a)(3) of the Federal Advisory Committee Act of 1972, interested persons may submit a written statement for consideration by the Council. Persons desiring to submit a written statement to the Council must submit to the email address *osd.pentagon.ousd-p-r.mbx.family-readiness-council@mail.mil,* no later than 5:00 p.m., on Thursday, January 12, 2017.

The purpose of this meeting is to receive information related to programs and services for DoD Family Members with Special Needs, including healthcare and the Exceptional Family Member Program.

Thursday, January 26, 2017 Meeting Agenda

Welcome & Administrative Remarks

Programs and Services for DoD Family Members With Special Needs Healthcare

Exceptional Family Member Program Update

DoD State Liaison Office Update

Closing Remarks

Note: Exact order may vary

Dated: December 13, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

36(b)(1) Arms Sales Notification

AGENCY: Defense Security Cooperation Agency, Department of Defense.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Pam Young, DSCA/SA&E–RAN, (703) 697–9107.

The following is a copy of a letter to the Speaker of the House of Representatives,

Transmittal 16–52 with attached Policy Justification and Sensitivity of Technology.

Dated: December 12, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

DEC 07 2016

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 16-52, concerning the Department of the Army's proposed Letter(s) of Offer and Acceptance to the Kingdom of Morocco for defense articles and services estimated to cost $108 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

For J. W. Rixey
Vice Admiral, USN
Director

Enclosures:
1. Transmittal
2. Policy Justification
3. Sensitivity of Technology
4. Regional Balance (Classified Document Provided Under Separate Cover)

BILLING CODE 5001–06–C

Transmittal No. 16–52

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(l) of the Arms Export Control Act, as Amended

(i) *Prospective Purchaser:* Kingdom of Morocco.

(ii) *Total Estimated Value:*

Major Defense Equipment *	$101 million
Other	$ 7 million
TOTAL	$108 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):
One thousand two-hundred (1,200) TOW 2A, Radio Frequency (RF) Missiles (BGM–71–4B–RF)
Fourteen (14) TOW 2A, Radio Frequency (RF) Missiles (Fly-to-Buy Lot Acceptance Missiles)

Non-MDE includes:
U.S. Government and contractor engineering; technical and logistics support services; and other related elements of logistics and program support.

(iv) *Military Department:* Army (VTG).

(v) *Prior Related Cases, if any:* MO–B–USZ for $137,034.913 signed on 4 May 2016.

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None.

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex.

(viii) *Date Report Delivered to Congress:* December 7, 2016.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Government of Morocco—Radio Frequency (RF) TOW 2A, Radio Frequency (RF) Missile (BGM–71–4B–RF and Support)

The Government of Morocco has requested a possible sale of one thousand two-hundred (1,200) TOW 2A, Radio Frequency (RF) Missiles (BGM–71–4B–RF) and fourteen (14) TOW 2A, Radio Frequency (RF) Missiles (Fly-to-Buy Lot Acceptance Missiles). Also included with this request is U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistics and program support. The estimated MDE sale is $101 million. The total estimated value is $108 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that continues to be an important force for the political stability and economic progress in North Africa. This proposed sale directly supports Morocco and serves the interests of the Moroccan people and the United States.

The proposed sale of TOW 2A Missiles and technical support will advance Morocco's efforts to develop an integrated ground defense capability. Morocco will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors involved in this program are: Raytheon Missile Systems, Tucson, Arizona. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the U.S. Government or contractor representatives to travel to Morocco.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 16–52

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as Amended

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Radio Frequency (RF) TOW 2A Missile (BGM–71E–4B–RF) is designed to defeat armored vehicles, reinforced urban structures, field fortifications and other such targets. TOW missiles are fired from a variety of TOW launchers in the U .S. Army, USMC, and FMS customer forces. The TOW 2A RF missile can be launched from the same launcher platforms as the existing wire-guided TOW 2A missile without modification to the launcher. The TOW 2A missile (both wire & RF) contains two trackers for the launcher to track and guide the missile in flight. Guidance commands from the launcher are provided to the missile by a RF link contained within the missile case. The hardware, software, and technical publications provided with the sale thereof are UNCLASSIFIED. However, the system itself contains sensitive technology that instructs the system on how to operate in the presence of countermeasures.

2. The highest level of classified information that must be disclosed in training to use the end item is UNCLASSIFIED. The highest level of classified information that must be disclosed in maintenance of the end item is UNCLASSIFIED. The highest level of classified information that could be disclosed by sale of the end item is SECRET. The highest level of classified information that could be revealed by testing the end item is SECRET. The highest level of classified information that could be revealed by reverse engineering of the end item is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Morocco.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Implementation of Executive Orders on Floodplain Management and Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The U.S. Army Corps of Engineers (USACE) has developed draft internal agency implementation guidance for the Executive Order on Floodplain Management to incorporate the new requirements of the Executive Order on Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input. USACE is seeking feedback from partners, other government and non-government stakeholders, Tribes, and members of the general public on the proposed draft guidance that has been developed.

DATES: Comments must be submitted on or before January 30, 2017.

ADDRESSES:

Email: USACE–EO11988@usace.army.mil and include ''Implementation Comments'', in the subject line of the message.

Mail: HQ, U.S. Army Corps of Engineers, ATTN: EO13690/CECW–HS/3G68, 441 G Street NW., Washington, DC 20314–1000.

Hand Delivery/Courier: Due to security requirements, we cannot receive comments by hand delivery or courier.

FOR FURTHER INFORMATION CONTACT: Dr. Stephanie Bray, Headquarters, Office of Homeland Security, Washington, DC at 202–761–4827.

SUPPLEMENTARY INFORMATION: Executive Order 11988, Floodplain Management, was issued in 1977 and directed agencies to avoid to the extent possible the long and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct and indirect support of floodplain development wherever there is a practicable alternative. EO 11988 applied to Federal agencies carrying out its responsibilities for:

- Acquiring, managing, and disposing of federal lands and facilities;
- Providing federally-undertaken, financed, or assisted construction and improvements;
- Conducting federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulation, and licensing activities.

It required agencies performing federal actions in the base floodplain (floodplain associated with the 1 percent annual chance (also known as 1 percent annual exceedance probability) flood) to do the following:

1. Determine if a proposed action is in the base floodplain (that area which has a one percent or greater chance of flooding in any given year).

2. Conduct early public review, including public notice.

3. Identify and evaluate practicable alternatives to locating in the base floodplain, including alternative sites outside of the floodplain.

4. Identify impacts of the proposed action.

5. If impacts cannot be avoided, develop measures to minimize the impacts and restore and preserve the floodplain, as appropriate.

6. Reevaluate alternatives.

7. Present the findings and a public explanation.

8. Implement the action.

Following issuance of EO 11988 and the corresponding interagency Implementing Guidelines, USACE developed Engineering Regulation (ER) 1165–2–26 for interpreting and implementing the requirements of EO 11988. The regulation applies to all field operating activities having Civil Works responsibilities, with the exception of the Regulatory Program which implements EO 11988 through its regulations. Section 14 of ER 1165–2–26 explains how EO 11988 applies to specific Civil Works programs.

On January 30, 2015, the White House issued Executive Order 13690—Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Public Input. EO 13690 and the Federal Flood Risk Management Standard (FFRMS), implemented through guidelines established by the Water Resources Council (''Implementing Guidelines''), updated EO 11988 to include the following:

- Requires the use of an expanded floodplain for some actions that are federal investments.
- Requires that the elevation and horizontal extent of the expanded floodplain be determined using one of three approaches: The climate-informed science approach, the freeboard value approach, and the 500-year flood elevation approach.
- Requires agencies to use natural and nature based approaches, where possible.
- Establishes higher standards for critical actions.

USACE established a Product Development Team (PDT) to investigate what impacts EO 13690 and the FFRMS would have on its policies and programs and, in particular, to develop revised implementation guidance for EO 11988, as amended. A draft Engineer Circular (EC) that will ultimately rescind ER 1165–2–26 has been developed to provide overarching guidance for the implementation of EO 11988, as amended. The EC will expire two years from issuance, which will provide USACE time to evaluate the guidance provided, consider initial implementation experience to identify any necessary clarifications or changes, and incorporate any changes introduced by the reassessment of the FFRMS required by EO 13690. After two years, the EC will either be revised and reissued or converted to an ER, which does not expire and is more permanent agency guidance.

The draft EC is intended to provide overarching guidance to all USACE Civil Works mission areas. As such, it does not provide extensive detail about how the requirements will be implemented within specific program areas or activities; instead it establishes intended implementation principles that will be clarified in greater detail in individual program specific guidance documents, to be developed or revised at a later date. Generally, the new requirements will be incorporated into specific guidance documents as they are updated through the agency's regular process and schedule, unless a new guidance document needs to be prepared to address some aspect of implementation of the requirements. USACE now invites review and comment from our partners and stakeholders on the proposed implementation guidance contained within the draft EC.

Instructions for Providing Comments Online

USACE is requesting assistance in the form of data, comments, literature references, or field experiences, to help clarify the policy requirements for implementing EO 11988 and EO 13690 for agency activities. The draft EC is available for review on the USACE EO 13690 Implementation Web site (*http://www.iwr.usace.army.mil/Missions/FloodRiskManagement/FloodRiskManagementProgram/AbouttheProgram/PolicyandGuidance/FederalFloodRiskManagementStandard.aspx*). An Executive Summary of the draft EC is also available on the Web site to provide a high-level overview of the document and summary of the more substantial changes since the original 1984 ER. Additionally, a list of topics and issues for which feedback would be especially helpful is posted for reviewer's consideration. While USACE welcomes any and all feedback on the draft EC, feedback responding to the list of identified topics and issues will be particularly helpful to USACE in clarifying areas requiring new policy or practice. The most useful comments are from specific experiences and case examples. Commenters should use their knowledge of working with USACE on various types of federal actions as well as their understanding of EO 11988 and EO 13690. When comments are being made on specific sections of the document, USACE requests that commenters identify the relevant page and line numbers to which the comment applies.

All comments, literature citations, experiential references, data, other relevant reports, and input in response to the guiding topics and issues are being accepted through email, or through the postal service. All comments submitted by the date identified above will be compiled and sent to the PDT for their consideration.

Future Actions

Feedback and comments provided in response to this notice will be considered and the draft EC will be updated as appropriate. When the final EC is published, a notice will be placed in the **Federal Register** and on the USACE EO 13690 Implementation Web site, and the document itself will be made available through the USACE publications Web site (*http://www.publications.usace.army.mil/*).

Dated: December 12, 2016.

Karen Durham-Aguilera,

Director of Contingency, Operations and Homeland Security.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Department of the Army, U.S. Army Corps of Engineers

Notice of Availability of the Draft Missouri River Recovery Management Plan and Environmental Impact Statement

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The Kansas City and Omaha Districts of the U.S. Army Corps of Engineers (USACE), in cooperation with the U.S. Fish and Wildlife Service (USFWS), have developed the Missouri River Recovery Management Plan and Environmental Impact Statement (MRRMP–EIS). This document is a programmatic assessment of (1) major federal actions necessary to avoid a finding of jeopardy to the pallid sturgeon (*Scaphirhynchus albus*), interior least tern (*Sterna antillarum athalassos*), and the Northern Great Plains piping plover (*Charadrius melodus*) caused by operation of the Missouri River Mainstem and Kansas River Reservoir System and operation

and maintenance of the Missouri River Bank Stabilization and Navigation Project (BSNP) in accordance with the Endangered Species Act (ESA) of 1973, as amended; and (2) the Missouri River BSNP fish and wildlife mitigation plan described in the 2003 Record of Decision (ROD) and authorized by the Water Resources Development Acts (WRDA) of 1986, 1999, and 2007.

DATES: Submit written comments on the draft EIS on or before February 24, 2017.

ADDRESSES: Send written comments to U.S. Army Corps of Engineers, Omaha District, ATTN: CENWO–PM–AC—MRRMP–EIS, 1616 Capitol Ave, Omaha, NE 68102; or provide comments via an online comment form (preferred method) at *http://parkplanning.nps.gov/MRRMP.*

FOR FURTHER INFORMATION CONTACT: The above address or email to *cenwo-planning@usace.army.mil.*

SUPPLEMENTARY INFORMATION: The USACE is issuing this notice pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*) and the Council on Environmental Quality (CEQ) regulations for implementing the procedural provisions of NEPA (43 CFR parts 1500 through 1508). This notice announces the availability of the draft MRRMP–EIS and begins the public comment period. The MRRMP–EIS, its appendices, and other supporting documents can be accessed at: *www.moriverrecovery.org* under the ''Management Plan'' tab on the Web site homepage.

Background Information. The Missouri River flows for 2,341 miles from Three Forks, Montana at the confluence of the Gallatin, Madison, and Jefferson Rivers in the Rocky Mountains through the states of Montana, North Dakota, South Dakota, Nebraska, Iowa, Kansas, and Missouri. It is the longest river in the United States. USACE operates the Missouri River Mainstem Reservoir System (System) consisting of six dams and reservoirs with a capacity to store 72.4 million acre-feet (MAF) of water, the largest reservoir system in North America. The System is operated as an integrated system for eight congressionally authorized purposes, which include flood control, navigation, irrigation, hydropower, water supply, water quality, recreation, and fish and wildlife. USACE operates the System in accordance with the policies and procedures prescribed in the *Missouri River Mainstem Reservoir System Master Water Control Manual* (Master Manual) (USACE, 2006a). The Kansas River Reservoir System includes the primary downstream flood control projects of Clinton, Perry, Tuttle Creek, Milford, Waconda (U.S. Bureau of Reclamation), Wilson, and Kanopolis. USACE also constructed and maintains the Missouri River Bank Stabilization and Navigation Project which provides a 9-foot deep navigation channel with a minimum width of 300 feet during the navigation season from April 1 to November 30 between Sioux City, Iowa, and the mouth near St. Louis, Missouri. The BSNP consists mainly of rock pile structures and revetments along the outsides of bends and transverse dikes along the insides of bends to force the river into a channel alignment that is self-maintaining or self-scouring.

During the course of the Master Manual Review and Update Study, developed from 1989 to 2004, USACE entered into formal consultation with USFWS on the effects of the operation of the Missouri River Mainstem Reservoir System, operation and maintenance of the BSNP, and operation of the Kansas River Reservoir System on the pallid sturgeon, interior least tern, and piping plover. A biological opinion (BiOp) was issued by USFWS in 2000 with a finding of jeopardy for all the listed species and a proposed Reasonable and Prudent Alternative (RPA) that was accepted by the USACE. In 2003, following additional consultation, USFWS provided an amended BiOp that determined the new proposed action by USACE would avoid jeopardizing the continued existence of the two listed bird species, but would continue to jeopardize the continued existence of the pallid sturgeon in the wild. The Missouri River Recovery Program (MRRP) was established in 2005 to implement the RPA requirements contained in the 2000 and 2003 BiOps and the BSNP fish and wildlife mitigation plan.

A substantial amount of new knowledge about the species, their habitats, and management actions has been developed since the 2003 Amended BiOp was completed. The Independent Scientific Advisory Panel (ISAP), established by the Missouri River Recovery Implementation Committee (MRRIC), issued a report in 2011 that recommended development of an overarching adaptive management (AM) plan that would anticipate implementation of combined flow management actions and mechanical habitat construction. They recommended an AM plan should be used to guide future management actions, monitoring, research, and assessment. The ISAP report also recommended basing the AM plan on an effects analysis, which would precede the development of the AM plan and incorporate new knowledge about the species accrued since the 2003 Amended BiOp. Since the 2011 report, the first phase of the effects analysis has been completed and documented for pallid sturgeon, interior least tern, piping plover, and associated habitat analyses.

The purpose of this draft MRRMP–EIS is to develop a suite of actions that allows the USACE to meet its obligations under the Endangered Species Act while still operating its projects for the congressionally authorized purposes. Authorities used to meet this purpose may include existing USACE authorities related to Missouri River System operations for listed species and acquisition and development of land needed for creation of habitat for listed species provided by Section 601(a) of the Water Resources Development Act of 1986, as modified by Section 334(a) of WRDA 1999, and further modified by Section 3176 of WRDA 2007, although alternatives formulation was not limited to these authorities.

The draft MRRMP–EIS assesses the programmatic effects of alternatives for implementing the MRRP, which include actions necessary to avoid a finding of jeopardy to the federally-listed species and associated actions which comply with the BSNP mitigation plan during the implementation timeframe for this EIS. This EIS provides the necessary information for the public to fully evaluate a range of alternatives to best meet the purpose and need of the MRRMP–EIS and to provide thoughtful and meaningful comment for the Agency's consideration. Six alternatives were carried forward from the Effects Analysis results for detailed evaluation in the MRRMP–EIS (the no-action alternative and five action alternatives). The following management actions were included in all six of the alternatives:

—Mechanical construction of emergent sandbar habitat (ESH);
—Vegetation management, predator management, and human restriction measures on ESH;
—Pallid sturgeon propagation and augmentation;
—Pallid early life stage habitat construction downstream of Ponca, Nebraska;
—Habitat development and management of acquired lands; and
—Monitoring and evaluation of management actions.

However the actual scale and extent of mechanical ESH creation and pallid early life stage habitat construction would vary among the alternatives.

Under the no-action alternative, USACE would continue to implement the MRRP as it is currently. In addition to the actions common to all alternatives, the USACE would mechanically construct ESH at a rate of 107 acres per year in the Garrison and Gavins Point reaches and construct pallid early life stage habitat to achieve an average of 20 acres of shallow water habitat per river mile. The no-action alternative would also continue to implement the plenary spring pulse included in the Master Manual.

Alternative 2 represents the USFWS's interpretation of the management actions that could be ultimately implemented as part of the 2003 Amended BiOp RPA. In addition to the actions common to all alternatives, the USACE would mechanically construct ESH at a rate up to 3,546 acres per year in the Garrison, Fort Randall, Lewis and Clark Lake, and Gavins Point reaches and pallid early life stage habitat to achieve an average of 30 acres of shallow water habitat per river mile. Alternative 2 would also include a spring pallid flow release consisting of a bimodal pulse in March and May and a low summer flow.

Under Alternatives 3–6, the USACE would follow the processes and criteria in the AM plan (companion document to the MRRMP–EIS) that was developed based on the results of the Effects Analysis. The AM plan identifies the process and criteria to implement initial management actions, assess hypotheses, and introduce new management actions should they become necessary. Initial management actions include specific study efforts to fill data gaps in knowledge of the pallid sturgeon life cycle, creation of spawning habitat for pallid sturgeon to monitor effectiveness, and the construction of pallid early life stage habitat following the interception and rearing complex (IRC) concept identified in the Effects Analysis.

In addition to the actions common to Alternatives 3–6, Alternative 3 would include mechanical construction of ESH at an average rate of 391 acres per year when construction is needed in the Garrison, Fort Randall, and Gavins Point reaches. Alternative 3 would not implement the plenary spring pulse included in the Master Manual. However, as part of the AM plan the potential for a one-time spawning cue test release, if studies during the first 9–10 years do not provide a clear answer on whether a spawning cue is important, is included in Alternative 3.

In addition to the actions common to Alternatives 3–6, Alternative 4 would include mechanical construction of ESH at an average rate of 240 acres per year when construction is needed in the Garrison, Fort Randall, and Gavins Point reaches. Alternative 4 also includes implementation of a spring ESH creation release if System storage is at 42 MAF or greater on April 1, normal flows that could create 250 acres of ESH have not occurred in the previous four years, and downstream flow is below identified flood control constraints specific to this alternative. Alternative 4 also includes, as part of the AM plan, the potential for a one-time spawning cue release as described for Alternative 3.

In addition to the actions common to Alternatives 3–6, Alternative 5 would include mechanical construction of ESH at an average rate of 309 acres per year when construction is needed in the Garrison, Fort Randall, and Gavins Point reaches. Alternative 5 also includes implementation of a fall ESH creation release if System storage is at 54.5 MAF or greater on October 17, normal flows that could create 250 acres of ESH have not occurred in the previous four years, and downstream flow is below identified flood control constraints specific to this alternative. Alternative 5, also includes, as part of the AM plan, the potential for a one-time spawning cue release as described for Alternative 3.

In addition to the actions common to Alternatives 3–6, Alternative 6 would include mechanical construction of ESH at an average rate of 304 acres per year when construction is needed in the Garrison, Fort Randall, and Gavins Point reaches. Alternative 6 also includes implementation of a spawning cue release, attempted every 3 years, consisting of a bimodal pulse in March and May. These spawning cue releases would not be started or would be terminated whenever downstream flow is at identified flood control constraints specific to this alternative.

The draft EIS evaluates the potential effects on the human environment associated with each of the above alternatives. Resources and uses evaluated include: River infrastructure and hydrological processes; pallid sturgeon; piping plover and interior least tern; fish and wildlife habitat; other special status species; water quality; air quality; cultural resources; land use and ownership; commercial sand and gravel dredging; flood risk management and interior drainage; hydropower; irrigation; navigation; recreation; thermal power; water supply; wastewater facilities; tribal interests (other); human health and safety; environmental justice; ecosystem services; and Mississippi River resources.

Meetings. Six public meetings to share information and to allow the public to provide oral and written comments will be held from 5:00 p.m. to 8:45 p.m. on:

- Tuesday, February 7, 2017—Fort Peck Interpretive Center, Yellowstone Road, Fort Peck, Montana 59223.
- Wednesday, February 8, 2017—Bismarck State College, National Energy Center of Excellence, 1500 Edwards Ave., Bismarck, North Dakota 58506.
- Thursday, February 9, 2017—Ramkota Hotel and Conference Center, 920 W Sioux Avenue, Pierre, South Dakota 57501.
- Tuesday, February 14, 2017—Thompson Alumni Center, Bootstrapper Hall, 6705 Dodge Street, Omaha, Nebraska 68612.
- Wednesday, February 15, 2017—Hilton Kansas City Airport, Shawnee B, 8801 NW 112th Street, Kansas City, Missouri 64153.
- Thursday, February 16, 2017—Double Tree Inn by Hilton Hotel, Ballroom A & B, 16625 Swingley Ridge Road, Chesterfield, Missouri 63017.

Each public meeting will begin with an open house at 5:00 p.m. A formal presentation will be provided at 5:45 p.m. followed by a public hearing session. Several different methods of submitting comments will be available at each public meeting. The public meeting dates or locations may change based on inclement weather or exceptional circumstances. If the meeting date or location is changed, the USACE will issue a press release and post it on *www.moriverrecovery.org* to announce the updated meeting details.

Schedule. Public comments on the draft MRRMP–EIS must be received by February 24, 2017. The USACE will consider and respond to all comments received on the draft MRRMP–EIS when preparing the final MRRMP–EIS. The USACE expects to issue the final EIS in the spring of 2018, at which time a Notice of Availability will be published in the **Federal Register**. A Record of Decision is expected in the spring of 2018.

Special Assistance for Public Meeting. The meeting facilities are physically accessible to people with disabilities. People needing special assistance to attend and/or participate in the meetings should contact: U.S. Army Corps of Engineers, Omaha District, ATTN: CENWO–PM–AC, 1616 Capitol Ave., Omaha, NE 68102 or email *cenwo-planning@usace.army.mil.* To allow sufficient time to process special requests, please contact no later than one week before the public meeting.

Public Disclosure Statement. If you wish to comment, you may mail your comments as indicated under the

ADDRESSES section of this notice. Before including your address, phone number, email address, or any other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made available to the public at any time. While you can request us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: December 8, 2016.

Mark Harberg,

Missouri River Recovery Program Manager, U.S. Army Corps of Engineers.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Notice of Availability—Final Environmental Impact Statement for the Update of the Water Control Manuals and Water Supply Storage Assessment for the Apalachicola-Chattahoochee-Flint River Basin

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that the U.S. Army Corps of Engineers, Mobile District (USACE), has released the Final Environmental Impact Statement (FEIS) for the update of the Apalachicola-Chattahoochee-Flint (ACF) Water Control Master Manual (Master Manual) Alabama, Florida, and Georgia including a water supply storage assessment addressing reallocation of storage in Lake Sidney Lanier (Lake Lanier).

A Notice of Availability was published by the Environmental Protection Agency on December 16, 2016. The review period will end 30 days after that date.

DATES: The review period of the FEIS ends on January 14, 2017.

FOR FURTHER INFORMATION CONTACT: Mr. Lewis Sumner at telephone (251) 694–3857.

SUPPLEMENTARY INFORMATION: The Master Manual includes appendices prepared for individual projects in the ACF Basin and is the guide used by USACE to operate a system of five federal reservoir projects in the basin—Buford Dam and Lake Lanier, West Point Dam and Lake, Walter F. George Lock and Dam and Lake, George W. Andrews Lock and Dam and Lake, and Jim Woodruff Lock and Dam and Lake Seminole.

The purpose and need for the federal action is to determine how federal projects in the ACF Basin should be operated for their authorized purposes, in light of current conditions and applicable law, and to implement those operations through updated water control plans and manuals. The proposed action will result in an updated Master Manual and individual project water control manuals (WCMs) that comply with existing USACE regulations and reflect operations under existing congressional authorizations, taking into account changes in basin hydrology and demands from years of growth and development, new/rehabilitated structural features, legal developments, and environmental issues. The action includes updates to account for a June 28, 2011, decision of the 11th Circuit Court of Appeals.

On May 16, 2000, the Governor of the State of Georgia submitted a formal request to the Assistant Secretary of the Army (Civil Works) to adjust the operation of Lake Lanier, and to enter into agreements with the state or water supply providers to accommodate increases in water supply withdrawals from Lake Lanier and downstream at Atlanta over the next 30 years, culminating in total gross withdrawals of 705 million gallons per day (mgd)—297 mgd from Lake Lanier and 408 mgd downstream—by the year 2030. The Assistant Secretary of the Army (Civil Works) in 2002 denied Georgia's request. The 2011 decision of the 11th Circuit Court of Appeals ordered USACE to reconsider whether it has the legal authority to operate the Buford project to accommodate Georgia's request. USACE provided a legal opinion concluding that it has sufficient authority under applicable law to accommodate that request, but noted that any decision to take action on Georgia's request would require a separate analysis. On January 11, 2013, the Governor of the state of Georgia provided updated demographic and water demand data to confirm the continued need for 705 mgd to meet Georgia's water needs from Lake Lanier and the Chattahoochee River to approximately the year 2040 rather than 2030 as specified in the 2000 request. On December 4, 2015, after the Draft Environmental Impact Statement (DEIS) had been published, the Georgia Environmental Protection Division (GAEPD), on behalf of the State of Georgia, provided additional updated demographic and water demand data (referred to as Georgia's 2015 request) that reduced the state's needs from a total of 705 mgd to a range of 597–621 mgd—242 mgd from Lake Lanier (instead of 297 mgd) and 355–379 mgd downstream (instead of 408 mgd)—through the year 2050 rather than 2040 as specified in the 2013 request.

USACE's objectives for the Master Manual are to develop a water control plan that meets the existing water resource needs of the basin, fulfills its responsibilities in operating for the authorized project purposes, and complies with all pertinent laws. The FEIS presents the results of USACE's analysis of the environmental effects of the Proposed Action Alternative (PAA) that the USACE believes accomplishes these objectives.

USACE evaluated an array of potential water management alternatives and optional water supply amounts during the Master Manual update process, resulting in the selection of the PAA. Additional information on the components of the PAA can be found at *http://www.sam.usace.army.mil/Missions/PlanningEnvironmental/ACFMasterWaterControlManualUpdate/ACFDocumentLibrary.aspx.*

One alternative available to USACE is to continue with current operations. This approach is termed the No Action Alternative (NAA). The PAA would update the water control plans and manuals for the ACF Basin as directed by Secretary of the Army Pete Geren on January 30, 2008. Additionally, the PAA would provide for releases from Buford Dam to satisfy Georgia's 2015 request of 379 mgd from the Chattahoochee River for Metro Atlanta and would reallocate storage in Lake Lanier of 252,950 acre-feet to satisfy Georgia's 2015 request and support average annual water supply withdrawals of up to 222 mgd.

The FEIS responds to, and incorporates agency and public comments received on the DEIS, which was available for public review from October 2, 2015, through January 15, 2016. Five open house style public meetings were held on October 26th through November 9th, 2015, and more than 300 persons attended these workshops, either representing various agencies and organizations or as interested individual citizens. Two hundred seventy (270) comments on the DEIS were submitted by agencies (Federal, state, and local), private organizations, and individuals. The USACE responses to substantive agency and public comments are provided in appendix C of the FEIS.

USACE incorporated pertinent revisions and updates to the EIS and the WCM based on input received during the public review process. The key revisions and updates to the documents

included in the FEIS for the WCM update include:

• Sections 1 through 12 were revised to make minor technical and administrative corrections and updates based on agency and public comments, independent external peer review comments, and relevant additional information obtained since the DEIS was published.

• Section 4 was also updated to more fully describe and clarify (1) the two-phased plan formulation process (water management alternatives/water supply options) to determine the alternatives evaluated in detail in section 6 (see the introduction to section 4); (2) how modeling was used in both phases of the plan formulation process to assess and narrow the array of alternatives considered in detail in section 6 and to provide a technical foundation for environmental impact assessment of the alternatives considered in detail in section 6; (3) the screening process for water management measures; and (4) consideration of an alternative offered by the ACF Stakeholders (ACFS) organization in comments on the DEIS.

• Section 5 was also updated to incorporate additional information provided by the State of Georgia in 2015 regarding (1) future water supply needs for communities withdrawing or expected to withdraw from Lake Lanier; (2) future water supply needs for communities withdrawing from the Chattahoochee River downstream of Buford Dam; and (3) expected return rates associated with lake and river withdrawals. The water supply needs considered in the FEIS were generally revised downward and extend over a longer planning horizon (from 2040 to 2050) than included in the previous 2013 request from Georgia, which was used in the formulation of alternatives presented in the DEIS. Further, the FEIS eliminated Glades Reservoir as a reasonably foreseeable source of future water supply when the GAEPD rescinded the *need certification* for the reservoir in early 2016. This additional information resulted in several new alternatives (including a new PAA), all of which are within the range of the alternatives evaluated in the DEIS.

• Section 6 was further updated to address additional alternatives (including the new PAA) that were developed in accordance with the additional water supply information from Georgia as presented in the updated section 5 of the FEIS. The updated analysis that includes the new alternatives was based on additional Hydrologic Engineering Center Reservoir Simulation and Water Quality models (HEC-ResSim) (HEC–5Q) that incorporated the revised water supply information. All pertinent subsections within section 6 have been updated accordingly.

• Appendix A (Master WCM and Individual Project WCMs) was updated to include pertinent technical corrections and administrative updates based on agency and public comments, independent external peer review comments, and relevant additional information obtained since the DEIS was published.

• Appendix B (Water Supply Storage Assessment Report) was updated to include the analysis of the new alternatives that incorporate additional population projections and water supply demand projections provided by Georgia in December 2015.

• Appendix C (Pertinent Correspondence) was updated to incorporate agency and public comments on the DEIS (with USACE responses) as well as relevant new correspondence.

• Appendix E (HEC-ResSim Modeling Report) was updated to reflect analysis of the additional alternatives based on changes presented in section 5 of the FEIS and to incorporate technical and administrative corrections and updates based on comments from agencies, the public, and independent external peer review.

• Appendix J (USFWS Coordination) was updated to incorporate documentation of Endangered Species Act Section 7 consultation that occurred following agency and public review of the DEIS as well as the final Fish and Wildlife Coordination Act Report for the Master Manual update.

• Appendix K (HEC–5Q Water Quality Modeling Report) was updated to reflect analysis of the additional alternatives based on changes presented in section 5 of the FEIS and to incorporate technical and administrative corrections and updates based on comments from agencies, the public, and independent external peer review.

• Appendix L (Coastal Zone Management Statement of Consistency) was updated to include administrative changes to the Florida Coastal Management Program reference, and to address Florida's comments on the Statement of Consistency in the DEIS.

• Appendix M (Recreation Benefit Analysis) was updated to reflect analysis of the additional alternatives based on changes presented in section 5 of the FEIS.

• Appendix N (USACE Institute for Water Resources ACF Climate Change Support Analysis) was updated to reflect the additional information available following coordination of the DEIS and in response to comments on the DEIS from agencies, the public, and independent external peer review.

• Appendix O (Unimpaired Flow Dataset) was added to describe the development of the unimpaired flow dataset.

Document Availability

The FEIS and appendices are available for review in the following formats:

• Online as PDF documents at *www.sam.usace.army.mil/Missions/PlanningEnvironmental/ACF-Master-Water-Control-Manual-Update/ACF-Document-Library.aspx*

• As a CD when requested in writing to: Commander, U.S. Army Corps of Engineers, Mobile District, Attn: PD–EI (ACF–FEIS), P.O. Box 2288, Mobile, AL 36628.

Next Steps

No sooner than 30 days after filing the final EIS with USEPA and publication of the EPA Notice of Availability for the FEIS in the **Federal Register,** USACE will prepare a Record of Decision (ROD) which documents the final decision on the proposed action. USACE will announce availability of the ROD in a newsletter, distribution to the project mailing list, press releases to local newspapers, radio and television news, and on the project Web site.

Dated: December 6, 2016.

James A. Delapp,

Colonel, District Commander, Mobile District, U.S. Army Corps of Engineers.

[FR Doc. 2016–30295 Filed 12–15–16; 8:45 am]

BILLING CODE 3720–58–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0142]

Agency Information Collection Activities; Comment Request; Rehabilitation Services Administration Grant Re-Allotment Form

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before February 14, 2017.

ADDRESSES: To access and review all the documents related to the information

collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0142. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–349, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact David Steele, 202–245–6520.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Rehabilitation Services Administration Grant Re-allotment Form.

OMB Control Number: 1820–0692.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 140.

Total Estimated Number of Annual Burden Hours: 13.

Abstract: The Rehabilitation Act of 1973, as amended, authorizes the commissioner to re-allot to other grant recipients that portion of a recipient's annual grant that cannot be used. To maximize the use of appropriated funds under the formula grant programs, the Office of Special Education and Rehabilitative Services has established a re-allotment process for the Basic Vocational Rehabilitation State Grants; Supported Employment State Grants; Independent Living State Grants, Part B (IL-Part B); Independent Living Services for Older Individuals Who Are Blind (IL–OB); Client Assistance (CAP) and Protection and Advocacy of Individual Rights (PAIR) Programs. The authority for the Rehabilitation Services Administration to reallot formula grant funds is found at sections 110(b)(2) (VR), 622(b) (SE), 711(c) (IL-Part B), 752(j)(4) (IL–OB), 112(e)(2) (CAP), and 509(e) (PAIR) of the Act. The information will continue to be used by the Rehabilitation Services Administration State Monitoring and Program Improvement Division to reallot formula grant funds for the awards mentioned above. For each grant award, the grantee will be required to enter the amount of funds being relinquished and/or any additional funds being requested.

Dated: December 13, 2016.

Tomakie Washington,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

National Assessment Governing Board Meeting

AGENCY: National Assessment Governing Board, U.S. Department of Education.

ACTION: Notice of open teleconference meeting.

SUMMARY: This notice sets forth the agenda for a teleconference meeting of the National Assessment Governing Board (hereafter referred to as Governing Board) to take action on the Governing Board's response to recommendations made by the National Academy of Sciences on an evaluation of the National Assessment of Educational Progress achievement levels. This notice provides information to members of the public who may be interested in listening to the teleconference or providing written comments on the report recommendations. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act (FACA). Notice of this meeting is required by section 10(a)(2) of the Federal Advisory Committee Act (FACA) (Pub. L. 92–463; as amended, 5 U.S.C., App. 2) and is intended to notify the public of the meeting. This notice is being published less than 15 calendar days prior to the meeting in order to ensure there is a quorum of NAGB members at the meeting to make recommendations related to the National Academy of Sciences report.

DATES: The conference call will be held on Monday, December 19, 2016 from 6:00 p.m. to 7:00 p.m. EST.

FOR FURTHER INFORMATION CONTACT: Munira Mwalimu, Executive Officer/Designated Federal Official of the Governing Board, 800 North Capitol Street NW., Suite 825, Washington, DC 20002, telephone: (202) 357–6938, fax: (202) 357–6945.

SUPPLEMENTARY INFORMATION: *Statutory Authority and Function:* The Governing Board is established under the National Assessment of Educational Progress Authorization Act, Title III of Public Law 107–279. Information on the Governing Board and its work can be found at *www.nagb.gov.*

The Governing Board is established to formulate policy for the National Assessment of Educational Progress (NAEP). The Governing Board's congressionally mandated responsibilities include developing appropriate student achievement levels for each grade and subject tested. Based on recommendations from policymakers, educators, and members of the general public, the Governing Board sets specific achievement levels for each subject area and grade assessed on The Nation's Report Card. Achievement levels are performance standards that show what students should know and be able to do. Results are reported as percentages of students performing at or above the Basic and Proficient levels, and at the Advanced level. Additional information on the achievement levels can be found at *https://nagb.gov/publications/achievement.html.*

The National Assessment Governing Board's standing committees, the Executive Committee and the Committee on Standards, Design and Methodology (COSDAM) will

participate in a conference call on Monday, December 19th from 6:00–7:00 p.m. EST. The purpose of the call is to discuss and take action on the Governing Board's response to the recommendations of the November 2016 evaluation of NAEP achievement levels conducted by the National Academies of Sciences. The report titled *Evaluation of the Achievement Levels for Mathematics and Reading on the National Assessment of Educational Progress* is available at the following URL: *https://www.nap.edu/catalog/23409/evaluation-of-the-achievement-levels-for-mathematics-and-reading-on-the-national-assessment-of-educational-progress.*

The National Assessment Governing Board response will be sent to the Secretary of Education, the Committee on Education and the Workforce of the House of Representatives, and the Committee on Health, Education, Labor, and Pensions of the Senate following the teleconference.

The public is invited to call in ''listen only mode'' to the meeting by using the conference toll free number in the United States at 1–866–766–1003, participant code 7932547. Callers can expect to incur charges for calls they initiate over wireless lines; the National Assessment Governing Board will not refund any incurred charges. Callers will not incur charges for calls they initiate over landline connections to the toll free phone number.

Members of the public will have an opportunity to provide written feedback in advance of the call at *nagb@ed.gov,* with the email subject header titled Teleconference Feedback due to limited time availability for the call. Comments must be received no later than 12:00 p.m. ET on December 19, 2016.

Authority: Pub. L. 107–279, Title III—National Assessment of Educational Progress section 301.

Dated: December 13, 2016.

William J. Bushaw,

Executive Director.

[FR Doc. 2016–30328 Filed 12–15–16; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0143]

Agency Information Collection Activities; Comment Request; Measuring Educational Gain in the National Reporting System for Adult Education

AGENCY: Office of Career, Technical, and Adult Education (OCTAE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before February 14, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0143. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–349, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact John LeMaster, 202–245–6218.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Measuring Educational Gain in the National Reporting System for Adult Education.

OMB Control Number: 1830–0567.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 15.

Total Estimated Number of Annual Burden Hours: 600.

Abstract: Title 34 of the Code of Federal Regulations part 462 establishes procedures the Secretary uses to consider literacy tests for use in the National Reporting System (NRS) for adult education. This information is used by the Secretary to determine the suitability of published literacy tests to measure and report educational gain under the NRS.

Dated: December 13, 2016.

Tomakie Washington,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[P–2514–170]

Appalachian Power Company; Notice of Application Accepted for Filing And Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Non-capacity amendment of license.

b. *Project No.:* 2514–170.

c. *Date Filed:* November 21, 2016.

d. *Applicant:* Appalachian Power Company.

e. *Name of Project:* Byllesby and Buck Hydroelectric Project.

f. *Location:* The project is located on the New River in Carroll County, Virginia.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Bradley R. Jones, Plant Manager—Hydro, American Electric Power Service Corporation, 40 Franklin Road, Roanoke, VA 24011 (703) 985–2300.

i. *FERC Contact:* Steven Sachs, (202) 502–8666, *Steven.Sachs@ferc.gov*

j. Deadline for filing comments, motions to intervene, and protests is 30 days from the issuance of this notice by the Commission. The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/doc-sfiling/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–2514–170.

k. Description of Request: The applicant requests that its license be amended to allow the replacement of flashboards with inflatable Obermeyer crest gates. The applicant proposes to replace four, 31-foot-wide sections of the existing wooden flashboards at each of the project's two development in phases over the next 3 years. The proposal would not significantly modify the permanent reservoir elevations or project operation but the applicant would need to temporarily draw down the affected reservoir for up to 4 months while installing the Obermeyer gates.

l. Locations of the Applications: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 502–8371. The filing may also be viewed on the Commission's Web site at *http://www.ferc.gov/docs-filing/elibrary.asp.* Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. Comments, Motions to Intervene, or Protests: Anyone may submit comments, a motion to intervene, or a protest in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, motions to intervene, or protests must be received on or before the specified comment date for the particular application.

o. Filing and Service of Responsive Documents: Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''MOTION TO INTERVENE'', or ''PROTEST'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to project works which are the subject of the temporary variance request. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: December 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL17–26–000]

Ad Hoc Renewable Energy Financing Group; Notice of Petition for Declaratory Order

Take notice that on December 9, 2016, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2016), Ad Hoc Renewable Energy Financing Group (Petitioner) filed a petition for declaratory order requesting that the Commission find that non-managing, equity interests in a public utility or public utility holding company do not constitute voting securities for purposes of section 203 of the Federal Power Act and the Commission's regulations at 18 CFR part 33, all as more fully explained in the petition.

Any person desiring to intervene or to protest in this proceeding must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the

Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern time on January 9, 2017.

Dated: December 12, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16–38–000; PF15–21–000]

Columbia Gas Transmission, LLC; Notice of Schedule For Environmental Review of the WB XPress Project

On December 30, 2015, Columbia Gas Transmission, LLC (Columbia) filed an application in Docket No. CP16–38–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the WB XPress Project (Project), and would expand the capacity of Columbia's existing natural gas pipeline system by 1.3 million dekatherms per day and provide bi-directional transportation service in order to meet growing market demands.

On January 14, 2016, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—March 24, 2017
90-day Federal Authorization Decision Deadline—June 22, 2017

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Project would involve the replacement of 26.2 miles of replacement pipeline and 3.1 miles of new pipeline composed of varying diameters, two new compressor stations (one gas and one electric), expansions and modifications at seven existing gas compressor stations, and other minor aboveground facilities in West Virginia and Virginia.

Background

On July 22, 2015, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed WB XPress Project and Request for Comments on Environmental Issues* (NOI). The NOI was issued during the pre-filing review of the Project in Docket No. PF15–21–000 and was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comments from Virginia and West Virginia state agencies; Fairfax County, and five landowners. After the NOI period closed, we received additional comments from the U.S. Environmental Protection Agency (Region 3), U.S. Forest Service, West Virginia Department of Natural Resources, Town of Strasburg, Virginia, and organizations such as the Dulles Regional Chamber of Commerce, the Southern Environmental Law Center, West Virginia Oil and Gas Association, Virginia Run Community Association, Sierra Club et al., Shenandoah Valley Network et al., Oil Change International et al., and 26 interested individuals. The primary issues raised included the need for the project; impacts on soils, karst geology, groundwater, waterbodies, wetlands, sensitive and listed species, forests, sensitive National Forest Service lands, air quality, climate change; and cumulative and indirect impacts. Alternatives, public safety, general support for the project, and the need for a programmatic environmental impact statement (EIS) were also raised.

The U.S. Forest Service, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, West Virginia Department of Environmental Protection, and West Virginia Department of Natural Resources are cooperating agencies in the preparation of the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC Web site (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP16–38), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: December 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16–487–000]

Northern Natural Gas Company; Notice of Availability of the Environmental Assessment for the Proposed Cedar Station Upgrade Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Cedar Station Upgrade Project, proposed by Northern Natural Gas Company (Northern) in the above-referenced docket. Northern requests authorization to construct approximately 7.86 miles of natural gas pipeline in Dakota County, Minnesota in order to fulfill its contractual obligation with Northern States Power Company, a Minnesota Corporation (NSP–MN) to increase the delivery pressure to NSP–MN's existing Black Dog Generating Station from 400 pounds per square inch gauge (psig) to 650 psig. As part of NSP–MN's process

of reducing its carbon footprint, it has increased its use of natural gas-fired generation.

The EA assesses the potential environmental effects of the construction and operation of the Cedar Station Upgrade Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The Cedar Station Upgrade Project includes the following facilities:

- Approximately 7.86 miles of new 20-inch-diameter pipeline loop; [1]
- a new pig [2] launcher and takeoff valve setting at Northern's existing Rosemount Junction facility; and
- a new pig receiver, tie-in valve setting, and modification of existing regulators and piping at Northern's existing Cedar Meter Station facility.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. In addition, the EA is available for public viewing on the FERC's Web site (*www.ferc.gov*) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before January 9, 2017.

For your convenience, there are three methods you can use to file your comments to the Commission. In all instances, please reference the project docket number (CP16–487–000) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov*.

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You must select the type of filing you are making. If you are filing a comment on a particular project, please select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.214).[3] Only intervenors have the right to seek rehearing of the Commission's decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (*www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search,'' and enter the docket number excluding the last three digits in the Docket Number field (*i.e.,* CP16–487). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp*.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC17–2–000]

Commission Information Collection Activities (FERC–549D and FERC–733); Consolidated Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of information collections and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the requirements and burden [1] of the information collections described below.

DATES: Comments on the collections of information are due February 14, 2017.

ADDRESSES: You may submit comments (identified by Docket No. IC17–2–000) by either of the following methods:

- *eFiling at Commission's Web site: http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail/Hand Delivery/Courier:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Please reference the specific collection number and/or title in your comments.

[1] The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Type of Request: Three-year extension of the information collection requirements for all collections described below with no changes to the current reporting requirements. Please note that each collection is distinct from the next.

Comments: Comments are invited on: (1) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FERC–549D [Quarterly Transportation and Storage Report for Interstate Gas and Hinshaw Pipelines]

OMB Control No.: 1902–0253.

Abstract: The reporting requirements under FERC–549D are required to carry out the Commission's policies in accordance with the general authority in Sections 1(c) of the Natural Gas Act (NGA) [2] and Sections 311 of the Natural Gas Policy Act of 1978 (NGPA).[3] This collection promotes transparency by collecting and making available intrastate and Hinshaw pipeline transactional information. The Commission collects the data upon a standardized form with all requirements outlined in 18 CFR 284.126.

The FERC Form 549D collects the following information:

- Full legal name and identification number of the shipper receiving service;
- Type of service performed for each transaction;
- The rate charged under each transaction;
- The primary receipt and delivery points for the transaction, specifying the rate schedule/name of service and docket were approved;
- The quantity of natural gas the shipper is entitled to transport, store, and deliver for each transaction;
- The term of the transaction, specifying the beginning and ending month and year of current agreement;
- Total volumes transported, stored, injected or withdrawn for the shipper; and
- Annual revenues received for each shipper, excluding revenues from storage services.

Filers submit the Form-549D on a quarterly basis.

Access to the FERC–549D Information Collection Materials: A copy of the current form and related materials can be found at *http://www.ferc.gov/docs-filing/forms.asp#549d,* but will not be included in the **Federal Register**. The Commission will not publish these materials in the **Federal Register**.

Type of Respondent: Intrastate natural gas and Hinshaw pipelines.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

FERC–549D

[Quarterly transportation and storage report for interstate natural gas and hinshaw pipelines]

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden and cost per response [4]	Total annual burden hours and total annual cost	Cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
PDF filings	76	4	304	12.5, $1,048	3,800, $318,516	$4,191

Total			436		5,120, $429,158	

FERC–733 [Demand Response/Time-Based Rate Programs and Advanced Metering]

OMB Control No.: 1902–0271.

Abstract: Section 1252(e)(3) of the Energy Policy Act of 2005,[5] requires the Federal Energy Regulatory Commission (FERC or Commission) to prepare and publish an annual report, by appropriate region, that assesses demand response resources, including those available from all consumer classes. Specifically, EPAct 2005 Section 1252(e)(3) requires that the Commission identify and review:

(A) Saturation and penetration rate of advanced meters and communications technologies, devices and systems;

(B) existing demand response programs and time-based rate programs;

(C) the annual resource contribution of demand resources;

(D) the potential for demand response as a quantifiable, reliable resource for regional planning purposes;

(E) steps taken to ensure that, in regional transmission planning and operations, demand resources are provided equitable treatment as a quantifiable, reliable resource relative to the resource obligations of any load-serving entity, transmission provider, or transmitting party; and

[2] 15 U.S.C. 717–817–w.

[3] 15 U.S.C. 3301–3432.

[4] The hourly wage figure is $83.82/hour. This cost represents the average cost of four career fields: Legal ($129.12/hour), Accountants ($53.86/hour), Management Analyst ($60.53/hour), and Computer and Information ($91.76/hour); this cost also includes benefit costs within the hourly estimates. These figures were compiled using Bureau of Labor Statistics data that were specific to each occupational category: *http://bls.gov/oes/current/naics2_22.htm.*

[5] Public Law 109–58, 1252(e)(3), 119 Stat. 594, 966 (2005) (EPAct 2005).

(F) regulatory barriers to improved customer participation in demand response, peak reduction and critical period pricing programs.

Type of Respondent: Persons interested in the above topics.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden and cost per response [6]	Total annual burden hours and total annual cost	Cost per respondent ($)
(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
3,400	1	3,400	260.75, $19,426	886,550, $66,047,975	$19,426

Dated: December 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2512–075; Project No. 14439–001]

Hawks Nest Hydro, LLC; Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the applications for new licenses for the Hawks Nest Hydroelectric Project (FERC Project No. 2512–075) and the Glen Ferris Hydroelectric Project (FERC Project No. 14439–001) located in Fayette County, West Virginia, and has prepared a Draft Environmental Assessment (Draft EA) for the projects.

The Draft EA contains the staff's analysis of the potential environmental effects of the projects and concludes that relicensing the projects, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the Draft EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Any comments should be filed within 30 days from the date of this notice.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments.

For assistance, please contact FERC Online Support. In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include the applicable project name(s) and docket number(s) (*e.g.,* Hawks Nest P–2512–075).

For further information, contact Monir Chowdhury at (202) 502–6736.

Kimberly D. Bose,

Secretary.

Certain New Chemicals; Receipt and Status Information for November 2016

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA) to publish in the **Federal Register** a notice of receipt of a premanufacture notice (PMN); an application for a test marketing exemption (TME), both pending and/or expired; and a periodic status report on any new chemicals under EPA review and the receipt of notices of commencement (NOC) to manufacture those chemicals. This document covers the period from November 1, 2016 to November 30, 2016.

DATES: Comments identified by the specific case number provided in this document, must be received on or before January 17, 2017.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2016–2016–0696, and the specific PMN number or TME number for the chemical related to your comment, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Jim Rahai, Information Management Division (7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania

[6] The estimates for cost per response are derived using the 2016 FERC average salary plus benefits of $154,647/year (or $74.50/hour). Commission staff finds that the work done for this information collection is typically done by wage categories similar to those at FERC.

Ave. NW., Washington, DC 20460–0001; telephone number: 202–564–8593; email address: *rahai.jim@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general. As such, the Agency has not attempted to describe the specific entities that this action may apply to. Although others may be affected, this action applies directly to the submitters of the actions addressed in this document.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. What action is the Agency taking?

This document provides receipt and status reports, which cover the period from November 1, 2016 to November 30, 2016, and consists of the PMNs and TMEs both pending and/or expired, and the NOCs to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

III. What is the Agency's authority for taking this action?

Under TSCA, 15 U.S.C. 2601 *et seq.,* EPA classifies a chemical substance as either an ''existing'' chemical or a ''new'' chemical. Any chemical substance that is not on EPA's TSCA Inventory is classified as a ''new chemical,'' while those that are on the TSCA Inventory are classified as an ''existing chemical.'' For more information about the TSCA Inventory, please go to: *http://www.epa.gov/opptintr/newchems/pubs/inventory.htm.*

Anyone who plans to manufacture or import a new chemical substance for a non-exempt commercial purpose is required by TSCA section 5 to provide EPA with a PMN, before initiating the activity. Section 5(h)(1) of TSCA authorizes EPA to allow persons, upon application, to manufacture (includes import) or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a), for ''test marketing'' purposes, which is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: *http://www.epa.gov/oppt/newchems.*

Under TSCA sections 5(d)(2) and 5(d)(3), EPA is required to publish in the **Federal Register** a notice of receipt of a PMN or an application for a TME and to publish in the **Federal Register** periodic reports on the status of new chemicals under review and the receipt of NOCs to manufacture those chemicals.

IV. Receipt and Status Reports

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G) indicates that the information in the table is generic information because the specific information provided by the submitter was claimed as CBI.

For the 147 PMNs received by EPA during this period, Table 1 provides the following information (to the extent that such information is not claimed as CBI): The EPA case number assigned to the PMN; The date the PMN was received by EPA; the projected end date for EPA's review of the PMN; the submitting manufacturer/importer; the potential uses identified by the manufacturer/importer in the PMN; and the chemical identity.

TABLE 1—PMNS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016

Case No.	Received date	Projected notice end date	Manufacturer importer	Use	Chemical
P–16–0300	11/2/2016	1/31/2017	H.B. Fuller Company	(G) Industrial adhesive	(G) Oxirane, 2-methyl-, polymer with 1,3-xylylene diisocyanate, oxirane, and 3-(trimethoxysilyl)propyl isocyanate.
P–16–0359	11/9/2016	2/7/2017	CBI	(G) Pigment additive for industrial coatings	(G) Carbopolycycle-bis(diazonium), dihalo-, chloride (1:2), reaction products with metal hydroxide, 4-[(dioxoalkyl)amino]substituted benzene, 2-[(dioxoalkyl)amino]substituted benzene, 5-[(dioxoalkyl)amino]-2-hydroxy-substituted benzene and oxo-n-phenylalkanamide.
P–16–0379	11/16/2016	2/14/2017	Wacker Chemical Corporation.	(G) Intermediate for polymer synthesis	(S) Silane, 1,1'-(l,2-ethanediyl)bis[1,1-dichloro-1-methyl-, hydrolysis products with chloroethenyldimethylsilane.
P–16–0387	11/1/2016	1/30/2017	CBI	(G) Additives for polymers	(G) Aliphatic polycarboxylic acid, polymer with alicyclic polyhydric alcohol and polyoxyalkylene.
P–16–0399	11/22/2016	2/20/2017	Tryeco, LLC	(S) Compound to be used in preparation of advanced seed coatings.	(S) Starch, polymer with 2-propenoic acid, potassium salt oxidized.
P–16–0399	11/22/2016	2/20/2017	Tryeco, LLC	(S) Agricultural soil amendment for turf applications and direct soil injection with fertilizers.	(S) Starch, polymer with 2-propenoic acid, potassium salt oxidized.
P–16–0399	11/22/2016	2/20/2017	Tryec, LLC	(S) Agricultural soil amendment for filed crops as agrisorb plus granular soil amendment.	(S) Starch, polymer with 2-propenoic acid, potassium salt oxidized.
P–16–0412	11/18/2016	2/16/2017	Cardolite Corporation	(G) Epoxy coating	(G) Cashew, nutshell liq., polymer with amine and formaldehyde.

TABLE 1—PMNS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016—Continued

Case No.	Received date	Projected notice end date	Manufacturer importer	Use	Chemical
P–16–0428	11/21/2016	2/19/2017	Cardolite Corporation	(S) Industrial	(G) Phenol, formaldehyde and amine.
P–16–0439	11/15/2016	2/13/2017	CBI	(G) Coloring agent	(G) Modified carbon black.
P–16–0440	11/15/2016	2/13/2017	CBI	(G) Coloring agent	(G) Modified carbon black.
P–16–0454	11/16/2016	2/14/2017	CBI	(G) Material for highly dispersive use in consumer products.	(G) Trisubstituted alkenol.
P–16–0487	11/18/2016	2/16/2017	CBI	(S) Mass coloration of paper	(G) Benzenesulfonic acid 1,2-diazenediylbis [6-ethenyl]-3-sulfophenyl diazenyl-2-sulfophenyl ethenyl salt.
P–16–0509	11/18/2016	2/16/2017	CBI	(G) For packaging application	(G) Modified ethylene-vinyl alcohol copolymer.
P–16–0509	11/18/2016	2/16/2017	CBI	(G) Resin or film/sheet for the industrial use	(G) Modified ethylene-vinyl alcohol copolymer.
P–16–0578	11/10/2016	2/8/2017	CBI	(G) Reactive polymer for waterborne coating applications.	(G) Alkenoic acid, alkyester, polymer with n-(dialkyl-oxoalkyl)-alkenamide, alkenylbenzene, alkyl alkenoate and alkenoic acid.
P–16–0595	11/15/2016	2/13/2017	CBI	(G) Polymer	(G) Polyether polyurethane.
P–16–0598	11/15/2016	2/13/2017	CBI	(G) Binder resin open non-dispersive use	(G) Styrene acrylate copolymer.
P–16–0599	11/15/2016	2/13/2017	CBI	(G) Binder resin open non-dispersive use	(G) Styrene acrylate copolymer.
P–17–0002	11/10/2016	2/8/2017	CBI	(G) Printing ink applications	(G) Styrene(ated) copolymer with alkyl(meth) acrylate, and (meth)acrylic acid.
P–17–0003	11/10/2016	2/8/2017	CBI	(G) Printing ink applications	(G) Styrene(ated) copolymer with alkyl(meth) acrylate, and (meth)acrylic acid.
P–17–0006	11/1/2016	1/30/2017	CBI	(S) Aerospace sealant	(G) Substituted, polymer with formaldehyde, glycidyl ether, reaction products with alkyl substituted-dioxa thio substituted ether diene, dioxaalkyl substituted thiol, alkylene substituted vinyl ether, alkyl cyclohexane.
P–17–0008	11/2/2016	1/31/2017	CBI	(S) Intermediate for use in the manufacture of polymers.	(G) Modified 1,3-isobenzofurandione, polymer with 1,2-ethanediol, 2-ethyl-2-(alkoxyalkyl)-1,3-propanediol and 1,3-isobenzofurandione, alkanoate.
P–17–0013	11/2/2016	1/31/2017	CBI	(G) Open dispersive use component in liquid paint coating.	(G) Formaldehyde, polymer with arylylpolyamine, 2-(chloromethyl)oxirane and phenol.
P–17–0026	11/3/2016	2/1/2017	CBI	(G) Industrial ink printing applications	(G) Cycloaliphatic diamine, polymer with .alpha-hydro-.omega.-hydroxypoly(oxy-alkanediyl), .alpha-hydro-.omega.-hydroxypoly(oxy-alkanediyl), and cycloaliphatic diisocyanate.
P–17–0027	11/9/2016	2/7/2017	CBI	(G) Industrial use of printing ink	(G) Diol polymer with .alpha.-hydro-.omega.-hydroxypoly[oxy(alkanediyl)] and aromatic diisocyante.
P–17–0028	11/4/2016	2/2/2017	Henkel Corporation	(S) One ingredient in the part a of a two component epoxy encapsulant designed for circuit board protection applications called loctite stycast 2750t kit.	(S) Fatty acid, castor oil, reaction products with epichlorohydrin.
P–17–0030	11/3/2016	2/1/2017	CBI	(G) Metalworking fluid additive	(G) Alkyl morpholine.
P–17–0031	11/1/2016	1/30/2017	CBI	(G) Paint raw material	(G) Unsaturated fatty acids polymer with polyalcohol, carboxylic anhydrides and dicarboxlic acid.
P–17–0033	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0034	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0035	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0036	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0037	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0038	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0039	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0040	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0041	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0042	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0043	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0044	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0045	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) of oil/gas well performance Monitoring ...	(G) Halogenated sodium benzoate salt.
P–17–0046	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.

TABLE 1—PMNS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016—Continued

Case No.	Received date	Projected notice end date	Manufacturer importer	Use	Chemical
P–17–0047	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0048	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0049	11/3/2016	2/1/2017	CBI	(G) Starting material for synthesis	(G) Haloalkyl substituted carbomonocycle.
P–17–0050	11/3/2016	2/1/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0051	11/18/2016	2/16/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.

P–17–0086	11/10/2016	2/8/2017	CBI	(G) Perfume	(G) Cycloalkyl, bis(ethoxyalkyl)-, trans- cycloalkyl, bis(ethoxyalkyl)-, cis-.

TABLE 1—PMNS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016—Continued

Case No.	Received date	Projected notice end date	Manufacturer importer	Use	Chemical
P–17–0087	11/7/2016	2/5/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0090	11/7/2016	2/5/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0093	11/7/2016	2/5/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated sodium benzoate salt.
P–17–0094	11/7/2016	2/5/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0095	11/7/2016	2/5/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0096	11/7/2016	2/5/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0097	11/7/2016	2/5/2017	Spectrum Tracer Services.	(G) Monitoring of oil/gas well performance ...	(G) Halogenated benzoic acid.
P–17–0098	11/7/2016	2/5/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0099	11/7/2016	2/5/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0100	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0101	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0102	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0103	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0104	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0105	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0107	11/15/2016	2/13/2017	CBI	(S) Coreactant used in an adhesive	(G) Hydroxyl terminated polyurethane of methylene diphenyldiisocyanate based on polyester and polyether-polyol.
P–17–0108	11/14/2016	2/12/2017	Crison, LLC	(G) Typically added at a reat of 3–5% of the collector package.	(S) Carbonodithioic acid, o-[2-[(dithiocarboxy)amino]-2-methylpropyl] ester, sodium salt (1:2).
P–17–0111	11/10/2016	2/8/2017	CBI	(S) Ink receptor coating for polyolefin film	(S) Propanoic acid, 3-hydroxy-2-(hydroxymethyl)-2-methyl-, polymer with 1,4-cyclohexanedimethanol, dimethyl carbonate, 1,6-hexanediol, hydrazine and 1,1'-methylenebis[4-isocyanatocyclohexane], pentaerythritol triacrylate-blocked, compds. with triethylamine.
P–17–0112	11/16/2016	2/14/2017	CBI	(S) Production moisture curing pu hot melts adhesive.	(S) 1,4-benzenedicarboxylic acid, polymer with hexanedioic acid and 1,6-hexanediol.
P–17–0113	11/16/2016	2/14/2017	Omg Americas, Inc	(S) Thickener for architectural paint	(S) Zirconium, acetate lactate sodium complexes.
P–17–0114	11/8/2016	2/6/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0115	11/16/2016	2/14/2017	CBI	(S) An adhesion promoter for coating formulations.	(G) Aminoalkyl alkoxysilane.
P–17–0117	11/17/2016	2/15/2017	CBI	(S) Used as a feedstock for hydrogenation to produce a saturated diol for use in urethane chemistry or as an additive in coatings adhesives or sealants.	(S) 1,6,10-dodecatriene, 7,11-dimethyl-3-methylene-, (6e)-, homopolymer, 2-hydroxypropyl-terminated.
P–17–0117	11/17/2016	2/15/2017	CBI	(G) Use as a polyol for polyurethane manufacture reaction of the new substance with a diisocyanate or polyisocyanate and other polyols will produce a higher mw polymer.	(S) 1,6,10-dodecatriene, 7,11-dimethyl-3-methylene-, (6e)-, homopolymer, 2-hydroxypropyl-terminated.
P–17–0118	11/17/2016	2/15/2017	CBI	(S) Used as a feedstock for hydrogenation to produce a saturated diol for use in urethane chemistry or as An Additive In Coatings Adhesives Or Sealants.	(S) 1,6,10-dodecatriene, 7,11-dimethyl-3-methylene-, (6e)-, homopolymer, 2-hydroxyethyl-terminated.
P–17–0118	11/17/2016	2/15/2017	CBI	(G) Use as a polyol for polyurethane manufacture reaction of the new substance with a diisocyanate or polyisocyanate and other polyols will produce a higher mw polymer.	(S) 1,6,10-dodecatriene, 7,11-dimethyl-3-methylene-, (6e)-, homopolymer, 2-hydroxyethyl-terminated.
P–17–0120	11/17/2016	2/15/2017	CBI	(G) Component of coatings	(G) Amine modified alkyl phenol.
P–17–0121	11/18/2016	2/16/2017	CBI	(S) Polyurethane used in an adhesive	(G) Methylene diphenyl diisocyanate terminated polyurethane resin.
P–17–0122	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0123	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0124	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0125	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.

TABLE 1—PMNS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016—Continued

Case No.	Received date	Projected notice end date	Manufacturer importer	Use	Chemical
P–17–0126	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0127	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0128	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0129	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0130	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0131	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0132	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0133	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0134	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0135	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0136	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0137	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0138	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0139	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0140	11/18/2016	2/16/2017	Spectrum Tracer Services.	(S) Chemical tracer pumped into an oil and/or gas well to monitor well performance.	(G) Halogenated benzoic acid ethyl ester.
P–17–0141	11/18/2016	2/16/2017	CBI	(G) Ingredient used in fertilizer manufacturing.	(G) Substituted heteromonocycle, potassium salt.
P–17–0142	11/18/2016	2/16/2017	CBI	(G) Ingredient Used In Fertilizer Manufacturing.	(G) Substituted heteromonocycle, potassium salt.
P–17–0144	11/18/2016	2/16/2017	CBI	(G) Coating component	(S) Amines, c36-alkylenedi-, polymers with octahydro-4,7-methano-1h-indenedimethanamine and pyromellitic dianhydride, maleated.
P–17–0145	11/21/2016	2/19/2017	CBI	(G) Intermediate	(G) Silane ammonium salt.
P–17–0148	11/21/2016	2/19/2017	Robertet, Inc	(S) As an odoriferous component of fragrance compounds.	(S) Oils, hedychium flavescens.
P–17–0149	11/21/2016	2/19/2017	CBI	(G) Electronic device use	(G) Fluorocyanophenyl alkylbenzoate.
P–17–0150	11/21/2016	2/19/2017	CBI	(G) Electronic use	(G) Fluorocyanophenyl alkylbenzoate.
P–17–0150	11/21/2016	2/19/2017	CBI	(G) Electronic device use	(G) Fluorocyanophenyl alkylbenzoate.
P–17–0151	11/21/2016	2/19/2017	CBI	(G) Electronic device use	(G) Fluorocyanophenyl alkylbenzoate.
P–17–0152	11/28/2016	2/26/2017	CBI	(G) Additive in home care products	(G) Poly-(2-methyl-1-oxo-2-propen-1-yl) ester with ethanaminium, n,n,n-trialkyl, chloride and methoxypoly(oxy-1,2-ethanediyl).
P–17–0153	11/23/2016	2/21/2017	Clariant Corporation ..	(S) Neutralizing agent for paints and coatings.	(S) D-glucitol, 1-deoxy-1-(dimethylamino)-.
P–17–0154	11/23/2016	2/21/2017	CBI	(G) Coating	(G) Carboxylic acid amine (1:1).
P–17–0155	11/23/2016	2/21/2017	CBI	(G) Coating	(G) Mix fatty acids compd with amine (1:1).
P–17–0156	11/23/2016	2/21/2017	CBI	(G) Coating	(G) Mix fatty acids, compd with amine (1:1).
P–17–0157	11/29/2016	2/27/2017	CBI	(G) Open, non-dispersive use and destructive use.	(G) Silated urethane polymer.
P–17–0158	11/30/2016	2/28/2017	Dayglo Color Corp	(G) Fluorescent dye	(G) Perylene bisimide.
P–17–0159	11/30/2016	2/28/2017	CBI	(S) Tracer dye	(G) 1-h-benz[de] isoquinoline-1,3(2h)-dione-2-(-alkyl-)-(-alkyl-amino-).

For the 19 NOCs received by EPA during this period, Table 2 provides the following information (to the extent that such information is not claimed as CBI): The EPA case number assigned to the NOC; the date the NOC was received by EPA; the projected date of commencement provided by the submitter in the NOC; and the chemical identity.

TABLE 2—NOCS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016

Case No.	Received date	Commencement date	Chemical
J–16–0006	11/23/2016	11/16/2016	(G) Trichoderma reesei modified.
P–04–0856	11/3/2016	11/2/2016	(G) Long chain alkyl sulfonic acids.
P–12–0578	11/18/2016	11/7/2016	(G) Vegetable oil fatty acids, reaction products with substituted amine, compds. with substituted polyethylene glycol anhydride ester alkyl ethers.
P–13–0948	11/15/2016	8/31/2016	(G) Fatty acid mixed ester, reaction products with phosphorous oxide (p2o5), amine salts.

TABLE 2—NOCS RECEIVED FROM NOVEMBER 1, 2016 TO NOVEMBER 30, 2016—Continued

Case No.	Received date	Commencement date	Chemical
P–14–0323	11/22/2016	10/11/2016	(S) 1-propene, 2-chloro-3,3,3-trifluoro-.

Pesticide Experimental Use Permit; Receipt of Application; Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's receipt of an application 56228–EUP–UG from the United States Department of Agriculture, Animal and Plant Health Inspection Service, requesting an experimental use permit (EUP) for chlorophacinone. EPA has determined that the permit may be of regional or national significance. Therefore, because of the potential significance, EPA is seeking comments on this application.

DATES: Comments must be received on or before January 17, 2017.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2016–0607, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.* Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Michael Goodis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general. Although this action may be of particular interest to those persons who conduct or sponsor research on pesticides, EPA has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, EPA seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide discussed in this document, compared to the general population.

II. What action is the Agency taking?

Under section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136c, EPA can

allow manufacturers to field test pesticides under development. Manufacturers are required to obtain an EUP before testing new pesticides or new uses of pesticides if they conduct experimental field tests on more than 10 acres of land or one surface acre of water.

Pursuant to 40 CFR 172.11(a), EPA has determined that the following EUP application may be of regional or national significance, and therefore is seeking public comment on the EUP application:

Submitter: United States Department of Agriculture, Animal and Plant Health Inspection Service (USDA APHIS), 4700 River Rd., MD 20737, (56228–EUP–UG).

Pesticide Chemical: Chlorophacinone.

Summary of Request: USDA APHIS is submitting an EUP application to test the efficacy of Chlorophacinone-50 Conservation (C-50) (EPA Registration Number 7173–151) under field conditions for control and eradication of wild, non-native house mice (*Mus musculus*) at the Pohakuloa Training Area, U.S. Army Garrison, Island of Hawaii, State of Hawaii.

Following the review of the application and any comments and data received in response to this solicitation, EPA will decide whether to issue or deny the EUP request, and if issued, the conditions under which it is to be conducted. Any issuance of an EUP will be announced in the **Federal Register**.

Authority: 7 U.S.C. 136 *et seq.*

Dated: December 9, 2016.

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (''CAA'' or the ''Act''), notice is hereby given of a proposed consent decree to address a lawsuit filed by the States of New York, State of Connecticut, New Hampshire, Rhode Island, Vermont, and the Commonwealth of Massachusetts (collectively ''Plaintiffs'') in the United States District Court for the Southern District of New York: *State of New York, et al.* v. *McCarthy, et al.* No. 1:16–cv–07827 (S.D. N.Y.). On October 6, 2016, Plaintiffs filed a complaint alleging that Gina McCarthy, in her official capacity as Administrator of the United States Environmental Protection Agency (''EPA'') failed to perform duties mandated by CAA to take final action to approve or disapprove the December 9, 2013 Petition submitted by the Plaintiff states, all of which are currently part of the Ozone Transport Region (''OTR''),

requesting EPA to expand the OTR to include numerous ''upwind'' states. The proposed consent decree would establish deadlines for EPA to take certain specified actions with respect to the December 9, 2013 Petition.

DATES: Written comments on the proposed consent decree must be received by *January 17, 2017.*

ADDRESSES: Submit your comments, identified by Docket ID number EPA–HQ–OGC–2016–0744, online at *www.regulations.gov.* For comments submitted at *www.regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *www.regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA generally will not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the ''For Further Information Contact'' section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Alexander Bond, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone: (202) 564–3822; fax number: (202) 564–5603; email address: *Bond.Alexander@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

On October 6, 2016, Plaintiffs filed a complaint alleging that EPA failed to perform duties mandated by CAA to take final action to approve or disapprove the December 9, 2013 submitted by the Plaintiff states, all of which are currently part of the OTR, requesting EPA to expand the OTR pursuant to 42 U.S.C 7506a(a) to include several upwind states. Under the terms of the proposed consent decree, EPA must sign a notice for public comment that proposes certain actions regarding the December 9, 2013 Petition, no later than January 18, 2017, and must sign a final notice of final action regarding the petition thereon no later than October 27, 2017. See the proposed consent decree for the specific details.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the proposed consent decree from persons who are not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to this proposed consent decree should be withdrawn, the terms of the consent decree will be affirmed.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How can I get a copy of the proposed consent decree?

The official public docket for this action (identified by EPA–HQ–OGC–2016–0744) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

An electronic version of the public docket is available through *www.regulations.gov.* You may use *www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search''.

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at *www.regulations.gov* without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *www.regulations.gov* Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an ''anonymous access'' system. If you send an email comment directly to the Docket without going through *www.regulations.gov,* your email address is automatically captured and included as part of the comment that is placed in the official public

docket, and made available in EPA's electronic public docket.

Dated: December 9, 2016.

Lorie J. Schmidt,

Associate General Counsel.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0526]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before February 14, 2017. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele at (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0526.

Title: Section 69.123, Density Pricing Zone Plans, Expanded Interconnection with Local Telephone Company Facilities.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 13 respondents; 13 responses.

Estimated Time per Response: 48 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 154(j), 201–205, 303(r), and 403.

Total Annual Burden: 624 hours.

Total Annual Cost: $12,025.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: No information of a confidential nature is being sought. However, respondents may request materials or information submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission requires Tier 1 local exchange carriers (LECs) to provide expanded opportunities for third party interconnection with their interstate special access facilities. The LECs are permitted to establish a number of rate zones within study areas in which expanded interconnection are operational. In a previous rulemaking, Fifth Report and Order, CC Docket No. 96–262, the Commission allowed price cap LECs to define the scope and number of zones within a study area. These LECs must file and obtain approval of their pricing plans which will be used by FCC staff to ensure that the rates are just, reasonable and nondiscriminatory.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

[Docket No. R–1535; RIN 7100 AE–49]

Banking Organization Systemic Risk Report (FR Y–15)

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Extension of filing deadline; request for comment.

SUMMARY: The Board is extending the deadline to complete Schedule G of the Banking Organization Systemic Risk Report (FR Y–15) for certain firms.

DATES: Compliance with the filing requirements for Schedule G of the FR Y–15 is immediately extended until December 31, 2017, for certain firms and is immediately extended until June 30, 2018, for certain other firms. Comments must be received on or before February 14, 2017.

ADDRESSES: When submitting comments, please consider submitting your comments by email or fax because paper mail in the Washington, DC area and at the Board may be subject to delay. You may submit comments, identified by Docket No. R–1535; RIN 7100 AE–49, by any of the following methods:

- *Agency Web site: http://www.federalreserve.gov.* Follow the instructions for submitting comments at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: regs.comments@federalreserve.gov.* Include the docket number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Robert deV. Frierson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

All public comments will be made available on the Board's Web site at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room MP–500 of the Board's Martin Building (20th and C Streets NW., Washington, DC 20551) between 9:00 a.m. and 5:00 p.m. on weekdays.

FOR FURTHER INFORMATION CONTACT: Anna Lee Hewko, Associate Director, (202) 530–6260, Constance M. Horsley,

Assistant Director, (202) 452–5239, Elizabeth MacDonald, Manager, (202) 475–6316, or Sean Healey, Supervisory Financial Analyst, (202) 912–4611, Division of Banking Supervision and Regulation; or Benjamin McDonough, Special Counsel, (202) 452–2036, Mark Buresh, Senior Attorney, (202) 452–5270, or Mary Watkins, Attorney, (202) 452–3722, Legal Division. Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551. For the hearing impaired only, Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869.

SUPPLEMENTARY INFORMATION:

I. Background

The Banking Organization Systemic Risk Report (FR Y–15) reporting form collects systemic risk data from U.S. bank holding companies, covered savings and loan holding companies,[1] and intermediate holding companies with total consolidated assets of $50 billion or more. The Federal Reserve primarily uses the FR Y–15 data to monitor, on an ongoing basis, the systemic risk profile of the institutions that are subject to enhanced prudential standards under section 165 of the Dodd-Frank Act. The information reported on the FR Y–15 also is used in the calculation of a bank holding company's method 1 and method 2 scores under the Board's risk-based capital surcharge for global systemically important bank holding companies (GSIB surcharge rule).[2]

In connection with issuance of the GSIB surcharge rule, the Board revised the FR Y–15 to include Schedule G, which contains data used in the calculation of the short-term wholesale funding score that is a component of the method 2 score calculation.[3] The revised FR Y–15 required firms to begin providing Schedule G with the FR Y–15 as of December 31, 2016.[4]

The Board's complex institution liquidity monitoring report (FR 2052a) collects data on an institution's overall liquidity profile. While the FR 2052a collects a broader range of data on a more frequent and granular basis than the FR Y–15, the information collected on the FR 2052a includes the information necessary to complete Schedule G of the FR Y–15. When the Board finalized the FR 2052a reporting form, it provided a phase-in schedule to allow firms sufficient time to implement the systems necessary to complete the FR 2052a.[5] Under the transition periods set forth in FR 2052a, firms with total consolidated assets of less than $700 billion and less than $10 trillion in assets under custody are not required to submit the FR 2052a until at least February 2017, a full year after the current effective date of the FR Y–15.

II. Extension of Deadline

This extension of the filing deadline to complete Schedule G of the FR Y–15 (extension) delays the initial filing date of Schedule G for all firms, except for those that have $700 billion or more in total consolidated assets or $10 trillion or more in assets under custody. This delay will allow the FR 2052a phase-in schedule to be completed before a firm is required to complete Schedule G of the FR Y–15.

Under the extension, firms that are required to file the FR Y–15 that have $700 billion or more in total consolidated assets or $10 trillion or more in assets under custody do not have an extended filing date and must complete Schedule G for the FR Y–15 filed as of December 31, 2016. However, firms that are required to file the FR Y–15 and that have less than $10 trillion in assets under custody and less than $700 billion in total consolidated assets, but have $250 billion or more in total consolidate assets or $10 billion or more in on balance sheet foreign exposure are not required to begin completing Schedule G until the report with the December 31, 2017, as of date. Firms that are required to file the FR Y–15 and that have less than: $10 trillion in assets under custody; $250 billion in total consolidated assets; and $10 billion in on-balance-sheet foreign exposure are not required to begin completing Schedule G until the report with the June 30, 2018, as of date. The table below describes the interaction between initial filing of the FR 2052a and the initial filing of Schedule G of the FR Y–15:

	FR 2052a			FR Y–15
U.S. firms with total consolidated assets:	Filing frequency	First as-of date	First submission date	First as-of date for Schedule G
≥$700 billion or with ≥$10 trillion in assets under custody	Daily	12/14/2015	12/16/2015	12/31/2016
<$700 billion and with <$10 trillion in assets under custody, but total consolidated assets ≥$250 billion or foreign exposure ≥$10 billion.	Monthly	01/31/2017	02/15/2017	12/31/2017
≥$50 billion, but total consolidated assets <$250 billion and foreign exposure <$10 billion.	Monthly	07/31/2017	08/15/2017	06/30/2018

The extension revises the initial filing dates of Schedule G of the FR Y–15 to be consistent with the phase-in schedule for the FR Y 2052a. Without this change, firms would be required to implement the systems necessary to complete both the Schedule G of the FR Y–15 and much of the FR 2052a for the FR Y–15 report as of December 31, 2016. This would create significant immediate expense for firms and would be contrary to the phase-in schedule for completion of the FR 2052a.

III. Request for Comments

The Board seeks comment on all aspects of the extension.

IV. Date of Action; Solicitation of Comments

The interim final rule is being issued without prior notice and opportunity to comment and with an immediate effective date. Pursuant to the Administrative Procedure Act (APA), general notice and opportunity for public comment are not required prior to final agency action, if the agency, for good cause, finds that ''notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [6] Immediate adoption of the extension would give

[1] Covered savings and loan holding companies are those which are not substantially engaged in insurance or commercial activities. For more information, see the definition of ''covered savings and loan holding company'' provided in 12 CFR 217.2.

[2] 12 CFR part 217, subpart H.

[3] *See,* 80 FR 77344 (December 14, 2015); 12 CFR 217.405–406.

[4] 80 FR 77344, 77345.

[5] 80 FR 71795 (November 17, 2015).

[6] 5 U.S.C. 553(b)(B). The APA also generally requires that notice of a final action be published in the **Federal Register** no less than 30 days before its effective date, unless the action grants or recognizes an exception or relieves a restriction, or as otherwise provided by the agency for good cause. 5 U.S.C. 553(d)(3).

effect to the intended phase-in schedule for the FR 2052a by allowing certain firms additional time to complete Schedule G of the FR Y–15. Immediate adoption of this change also would provide clarity to firms required to file the FR Y–15 and FR 2052a regarding the interaction of the forms, and relieve burden on these firms by allowing additional time to develop the systems necessary to complete the FR Y–15 and FR 2052a. Without the revised schedule of Schedule G of the FR Y–15 in the extension, many holding companies would expend significant resources to develop liquidity reporting systems significantly in advance of when these systems would otherwise become necessary. Further, since only certain summary statistics reported on Schedule G are released to the public, allowing certain firms additional time to complete Schedule G will not have a significant impact on the amount of information available to the public.[7]

The Board finds that, under these circumstances, prior notice and comment through the issuance of a proposal are impracticable and that the public interest is best served by making the extension effective as quickly as possible.

VI. Regulatory Analysis

A. Regulatory Flexibility Act Analysis

The requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) are not applicable to this interim extension.[8] Nonetheless, the Board believes that this extention would not have a significant economic impact on a substantial number of small entities. The Board requests comment on its conclusion that the extension should not have a significant economic impact on a substantial number of small entities.

The RFA generally requires an agency to assess the impact a rule is expected to have on small entities.[9] The RFA requires an agency either to provide a regulatory flexibility analysis or to certify that the extension will not have a significant economic impact on a substantial number of small entities. Based on this analysis and for the reasons stated below, the Board believes that the extension will not have a significant economic impact on a substantial number of small entities.

Under regulations issued by the U.S. Small Business Administration, a small entity includes a depository institution, bank holding company, or savings and loan holding company with total assets of $550 million or less (a small banking organization).[10] As of June 30, 2016, there were approximately 3,203 top-tier small bank holding companies and 162 small savings and loan holding companies.

The Board believes that the extension will reduce regulatory burden by providing additional time for certain firms to complete Schedule G of the FR Y–15. The firms required to file the FR Y–15 are bank holding companies, savings and loan holding companies, and intermediate holding companies with $50 billion or more in total consolidated assets, as well as any U.S.-based organization designated as a global systemically important bank holding company. Therefore, neither Schedule G of the FR Y–15 nor this extension apply to small entities.

The Board is aware of no other Federal rules that duplicate, overlap, or conflict with this extension. The Board does not believe that there are significant alternatives to the extension that would reduce the economic impact on small banking organizations supervised by the Board.

B. Solicitation of Comments on Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the agencies to use plain language in all proposed and final rules published after January 1, 2000. The agencies invite comment on how to make this extension easier to understand. For example:

- Have the agencies organized the material to suit your needs? If not, how could it be more clearly stated?
- Are the requirements in the rule clearly stated? If not, how could they be more clearly stated?
- Does the notice contain technical language or jargon that is not clear? If so, what language requires clarification?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the notice easier to understand? If so, what changes would make the notice easier to understand?
- Would more, but shorter, sections be better? If so, which sections should be changed?
- What else could be done to make the notice easier to understand?

C. Paperwork Reduction Act

In accordance with section 3512 of the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521), the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Board reviewed the extension under the authority delegated to the Board by OMB. The extension contains no requirements subject to the PRA.

D. Administrative Procedure Act

As noticed, the Administrative Procedure Act allows an agency to act immediately to adopt a rule without public notice and comment if the agency has ''good cause.'' [11] In this case, the Board has good cause to issue the extension and to have the extension be effective immediately.[12] The extension will provide certain firms additional time to complete Schedule G of the FR Y–15. The delay provides clarity to the industry regarding the Board's expectations for implementation of systems for monitoring and reporting liquidity positions and to ensure that these firms have sufficient time to develop these systems and the related risk management processes.

By order of the Board of Governors of the Federal Reserve System, December 9, 2016.

Robert deV. Frierson,

Secretary of the Board.

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the

assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 17, 2017.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Farmers Bancorp, Inc.,* Blytheville, Arkansas; to acquire 100 percent of Tennessee Bank & Trust, Nashville, Tennessee, a de nova bank.

Board of Governors of the Federal Reserve System, December 13, 2016.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–5521–N]

Medicare Program; Start-Up Funding in Support of the Vermont All-Payer Accountable Care Organization (ACO) Model—Cooperative Agreement

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: The purpose of this notice is to announce issuance of the November 23, 2016 single-source cooperative agreement funding opportunity available solely to Vermont's Agency of Human Services in order to provide care coordination and bolster collaboration for practices and community-based health care providers as part of the Vermont All-Payer Accountable Care Organization (ACO) Model.

DATES: The performance period of the Vermont All-Payer ACO Model will begin on January 1, 2017, and conclude on December 31, 2022.

FOR FURTHER INFORMATION CONTACT: Stephen Cha, (410) 786–1876.

SUPPLEMENTARY INFORMATION:

I. Background

The Vermont All-Payer Accountable Care Organization Model (Model) is the Centers for Medicare & Medicaid Services' (CMS) new test within the Center for Medicare and Medicaid Innovation of an alternative payment model in which the major health care payers—Medicare, Medicaid, and commercial health care payers—incentivize health care value and quality under the same payment structure for health care providers throughout the state's care delivery system to transform health care for the entire state and its population. An Accountable Care Organization (ACO) is an entity formed by certain health care providers that accepts financial accountability for the overall quality and cost of medical care furnished to, and health of, beneficiaries attributed to the entity.

CMS believes that states can be critical partners of the federal government and other health care payers to facilitate the design, implementation, and evaluation of community-centered health systems that can deliver significantly improved cost, quality, and population health performance results for all state residents, including Medicare, Medicaid, and Children's Health Insurance Program (CHIP) beneficiaries. States have policy and regulatory authorities, as well as ongoing relationships with commercial healthcare payers, health plans, and health care providers that can accelerate delivery system reform. CMS has previously partnered with states to accelerate delivery system reform through initiatives such as the State Innovations Model (SIM). SIM provides state-based healthcare transformation efforts with funding to test the ability of states to utilize policy and regulatory levers to accelerate multi-payer health care transformation.

Vermont, a SIM state awardee, approached CMS with a desire to include Medicare in the state's multipayer payment and care delivery model, and Vermont publicly released its proposal on January 25, 2016. CMS reviewed Vermont's proposal and determined that it met the necessary requirements to explore a potential Vermont-specific model in which Medicare aligns with Vermont's healthcare transformation efforts. In October 2016, CMS and the State of Vermont entered into the Vermont All-Payer Accountable Care Organization Model Agreement (''State Agreement'') to implement the Vermont All-Payer ACO Model. The Vermont All-Payer ACO Model will be a 6-year model beginning in 2017 and ending in 2022.

As part of the Model, Vermont health care providers will participate in a Vermont-specific Medicare ACO initiative (the Vermont Medicare ACO Initiative), which is largely based on CMS' Next Generation ACO Model. CMS will provide one-time start-up funding in the amount of $9,500,000 to the State to assist Vermont health care providers with care coordination and bolster their collaboration with community-based resources. CMS will provide the start-up funding as a cooperative agreement funding opportunity available solely to Vermont's Agency of Human Services, as announced in this notice. More information about the Vermont All-Payer ACO Model can be found at *https://innovation.cms.gov/initiatives/vermont-all-payer-aco-model/.*

Through the Model, CMS will test whether the quality of health care for Vermont residents improves and healthcare expenditures for beneficiaries across payers (including Medicare fee-for-service, Vermont Medicaid, Vermont commercial plans, and Vermont self-insured plans) decrease if—

- The aforementioned payers offer Vermont ACOs risk-based arrangements tied to health outcomes and healthcare expenditures;
- The majority of Vermont health care providers enter into such risk-based arrangements; and
- The majority of Vermont residents across payers are aligned to an ACO bound by these arrangements.

CMS and Vermont aim for broad ACO participation throughout the state, across all the significant payers and the majority of the care delivery system, to make redesigning the entire care delivery system a rational business strategy for Vermont health care providers and payers. As set forth in the State Agreement, Vermont commits to achieving statewide health outcomes, financial targets, and ACO scale (percentage of Vermont residents

aligned to an ACO) targets—both for Medicare and across all significant healthcare payers. Additionally, CMS and Vermont aim for this Model to deliver meaningful improvements in the health of a state's entire population by transforming the relationships between and amongst care delivery and public health systems across Vermont.

II. Provisions of the Notice

The purpose of this notice is to announce a single source cooperative agreement funding opportunity in the amount of $9,500,000 available solely to Vermont's Agency of Human Services (AHS) to support care coordination and bolster collaboration for practices and community-based health care providers as part of the Vermont All-Payer ACO Model. A single-source award to the AHS will enable CMS to provide assistance to Vermont for the following purposes: To connect Medicare fee-for-service beneficiaries with community-based resources, coordinate transitions across care settings with appropriate involvement of the Medicare fee-for-service beneficiaries' primary care providers, coordinate care across health care providers, support health promotion and self-management by Medicare fee-for-service beneficiaries, and support practice improvement and transformation. These activities are necessary for Vermont to achieve the health outcomes and financial goals required under the Vermont All-Payer ACO Model.

CMS and Vermont believe the Vermont All-Payer ACO Model can support health care providers, including physicians in small practices, to succeed as health care moves from fee-for-service to value-based payment systems. Participation by health care providers and payers in the model will be voluntary, and CMS and Vermont expect to work closely together to achieve sufficient uptake. In particular, this Model is being implemented using the Secretary's authority in section 1115A of the Social Security Act (the Act) and Vermont's Global Commitment to Health demonstration project authorized under section 1115 of the Act. Together these authorities make it possible for physicians and other clinicians in Vermont to participate the aligned and state-specific Vermont Medicare ACO Initiative and Medicaid ACO initiative. Under the Quality Payment Program, the two-sided risk portion of the Vermont Medicare ACO Initiative meets the criteria to be an Advanced Alternative Payment Model. Health care providers participating in the two-sided risk portion of the Vermont Medicare ACO Initiative may potentially qualify for the APM Incentive Payments starting in performance year 2018.

This single-source funding opportunity to the AHS is designed to meet the goals of the cooperative agreement based on the AHS' existing knowledge and role in supporting the Model, its existing partnerships and collaborations with Vermont health care providers, and its resources and ability to deploy the funding immediately.

III. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: December 6, 2016.

Andrew M. Slavitt,

Acting Administrator, Centers for Medicare & Medicaid Services.

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: the necessity and utility of the proposed information collection for the proper performance of the agency's functions; the accuracy of the estimated burden; ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by February 14, 2017.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ____ Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–4040 Request for Enrollment in Supplementary Medical Insurance
CMS–10156 Retiree Drug Subsidy (RDS) Application and Instructions
CMS–10170 Retiree Drug Subsidy (RDS) Payment Request and Instructions

CMS–10198 Creditable Coverage Disclosure to CMS On-Line Form and Instructions
CMS–10227 PACE State Plan Amendment Preprint
CMS–10344 Elimination of Cost-Sharing for Full Benefit Dual-Eligible Individuals Receiving Home and Community-Based Services
CMS–10501 Healthcare Fraud Prevention Partnership HFPP Data Sharing and Information Exchange
CMS–R–266 Medicaid Disproportionate Share Hospital Annual Reporting
CMS–10282 Conditions of Participation for Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Supporting Regulations

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Request for Enrollment in Supplementary Medical Insurance; *Use:* Form CMS–4040 is used to establish entitlement to and enrollment in Medicare Part B for beneficiaries who file for Part B only. The collected information is used to determine entitlement for individuals who meet the requirements in section 1836(2) of the Social Security Act as well as the entitlement of the applicant (or their spouses) to an annuity paid by OPM for premium deduction purposes. *Form Number:* CMS–4040 (OMB control number: 0938–0245); *Frequency:* Once; *Affected Public:* Individuals or households; *Number of Respondents:* 10,000; *Total Annual Responses:* 10,000; *Total Annual Hours:* 2,500. (For policy questions regarding this collection contact Carla Patterson at 410–786–8911.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Retiree Drug Subsidy (RDS) Application and Instructions; *Use:* Plan sponsors (*e.g.,* employers, unions) who offer prescription drug coverage to their qualified covered retirees are eligible to receive a 28 percent tax-free subsidy for allowable drug costs. To qualify, plan sponsors must submit a complete application with a list of retirees for whom it intends to collect the subsidy. Once we review and analyze the information on the application and the retiree list, notification will be sent to the plan sponsor about its eligibility to participate in the RDS program. *Form Number:* CMS–10156 (OMB control number: 0938–0957); *Frequency:* Yearly and monthly; *Affected Public:* Private sector (Business or other for-profits and Not-for-profit institutions); *Number of Respondents:* 2,482; *Total Annual Responses:* 2,482; *Total Annual Hours:* 158,848. (For policy questions regarding this collection contact Ivan Iveljic at 410–786–3312.)

3. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Retiree Drug Subsidy (RDS) Payment Request and Instructions; *Use:* Plan sponsors (*e.g.,* employers, unions) who offer prescription drug coverage meeting specified criteria to their qualified covered retirees are eligible to receive a 28 percent tax-free subsidy for allowable drug costs. Plan sponsors must submit required prescription drug cost data and other information in order to receive the subsidy. Plan sponsors may elect to submit RDS payment requests on a monthly, quarterly, interim annual, or annual basis; once selected, the payment frequency may not be changed during the plan year. *Form Number:* CMS–10170 (OMB control number: 0938–0977); *Frequency:* Occasionally; *Affected Public:* Private sector (Business or other for-profits and Not-for-profit institutions); *Number of Respondents:* 2,482; *Total Annual Responses:* 2,482; *Total Annual Hours:* 374,782. (For policy questions regarding this collection contact Ivan Iveljic at 410–786–3312.)

4. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Creditable Coverage Disclosure to CMS On-Line Form and Instructions; *Use:* Most entities that currently provide prescription drug benefits to any Medicare Part D eligible individual must disclose whether their prescription drug benefit is creditable (expected to pay at least as much, on average, as the standard prescription drug plan under Medicare). The disclosure must be provided annually and upon any change that affects whether the coverage is creditable prescription drug coverage. *Form Number:* CMS–10198 (OMB control number: 0938–1013); *Frequency:* Yearly and semi-annually; *Affected Public:* Private sector (Business or other for-profits and Not-for-profit institutions), and State, Local, or Tribal Governments; *Number of Respondents:* 85,635; *Total Annual Responses:* 87,265; *Total Annual Hours:* 7,272. (For policy questions regarding this collection contact Tammie Wall at 410–786–3317.)

5. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* PACE State Plan Amendment Preprint; *Use:* If a state elects to offer PACE as an optional Medicaid benefit, it must complete a state plan amendment preprint packet described as ''Enclosures 3, 4, 5, 6, and 7.'' CMS will review the information provided in order to determine if the state has properly elected to cover PACE services as a state plan option. In the event that the state changes something in the state plan, only the affected page must be updated. *Form Number:* CMS–10227 (OMB control number: 0938–1027); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 7; *Total Annual Responses:* 2; *Total Annual Hours:* 140. (For policy questions regarding this collection contact Angela Cimino at 410–786–2638.)

6. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Elimination of Cost-Sharing for Full Benefit Dual-Eligible Individuals Receiving Home and Community-Based Services; *Use:* This collection eliminates Part D cost-sharing for full benefit dual-eligible beneficiaries who are receiving home and community based services. In this regard, states are required to identify the affected beneficiaries in their monthly Medicare Modernization Act Phase Down reports. *Form Number:* CMS–10344 (OMB control number: 0938–1127); *Frequency:* Monthly; *Affected Public:* Private sector (Business or other for-profits and Not-for-profit institutions); *Number of Respondents:* 51; *Total Annual Responses:* 612; *Total Annual Hours:* 612. (For policy questions regarding this collection

contact Roland Herrera at 410–786–0668.)

7. *Type of Information Collection Request:* Revision of a previously approved collection; *Title of Information Collection:* Healthcare Fraud Prevention Partnership (HFPP): Data Sharing and Information Exchange; *Use:* The advance directives requirement was enacted because Congress wanted individuals to know that they have a right to make health care decisions and to refuse treatment even when they are unable to communicate. Steps have been taken at both the Federal and State level, to afford greater opportunity for the individual to participate in decisions made concerning the medical treatment to be received by an adult patient in the event that the patient is unable to communicate to others, a preference about medical treatment. The individual may make his preference known through the use of an advance directive, which is a written instruction prepared in advance, such as a living will or durable power of attorney. This information is documented in a prominent part of the individual's medical record. Advance directives as described in the Patient Self-Determination Act have increased the individual's control over decisions concerning medical treatment. Sections 4206 of the Omnibus Budget Reconciliation Act of 1990 defined an advance directive as a written instruction recognized under State law relating to the provision of health care when an individual is incapacitated (those persons unable to communicate their wishes regarding medical treatment).

All states have enacted legislation defining a patient's right to make decisions regarding medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate advance directives. Participating hospitals, skilled nursing facilities, nursing facilities, home health agencies, providers of home health care, hospices, religious nonmedical health care institutions, and prepaid or eligible organizations (including Health Care Prepayment Plans (HCPPs) and Medicare Advantage Organizations (MAOs) such as Coordinated Care Plans, Demonstration Projects, Chronic Care Demonstration Projects, Program of All Inclusive Care for the Elderly, Private Fee for Service, and Medical Savings Accounts must provide written information, at explicit time frames, to all adult individuals about: (a) The right to accept or refuse medical or surgical treatments; (b) the right to formulate an advance directive; (c) a description of applicable State law (provided by the State); and (d) the provider's or organization's policies and procedures for implementing an advance directive. *Form Number:* CMS–10507 (OMB control number: 0938–1251); Frequency: Occasionally; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 20; *Total Annual Responses:* 20; *Total Annual Hours:* 160. (For policy questions regarding this collection contact Marnie Dorsey at 410–786–5942.)

8. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid Disproportionate Share Hospital (DSH) Annual Reporting Requirements; *Use:* States are required to submit an annual report that identifies each disproportionate share hospital (DSH) that received a DSH payment under the state's Medicaid program in the preceding fiscal year and the amount of DSH payments paid to that hospital in the same year along with other information that the Secretary determines necessary to ensure the appropriateness of DSH payments; *Form Number:* CMS–R–266 (OMB control number: 0938–0746); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 51; *Total Annual Responses:* 51; *Total Annual Hours:* 2,142. (For policy questions regarding this collection contact Robert Lane at 410–786–2015.)

9. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Conditions of Participation for Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Supporting Regulations; *Use:* The Conditions of Participation (CoPs) and accompanying requirements specified in the regulations are used by our surveyors as a basis for determining whether a comprehensive outpatient rehabilitation facility (CORF) qualifies to be awarded a Medicare provider agreement. We believe the health care industry practice demonstrates that the patient clinical records and general content of records are necessary to ensure the well-being and safety of patients and that professional treatment and accountability are a normal part of industry practice. *Form Number:* CMS–10282 (OMB control number: 0938–1091); *Frequency:* Yearly; *Affected Public:* Private sector—Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 549; *Total Annual Responses:* 549; *Total Annual Hours:* 6,945. (For policy questions regarding this collection contact Jacqueline Leach at 410–786–4282.)

Dated: December 13, 2016.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–2744]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: the necessity and utility of the proposed information collection for the proper performance of the agency's functions; the accuracy of the estimated burden; ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by January 17, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *OR* Email: *OIRA_ submission@omb.eop.gov.*

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a previously approved collection; *Title of Information Collection:* End Stage Renal Disease (ESRD) Medical Information Facility Survey; *Use:* The ESRD Program Management and Medical Information System (PMMIS) Facility Certification/Survey Record contains provider-specific and aggregate patient population data on beneficiaries treated by that provider obtained from the Annual Facility Survey form (CMS–2744). The Facility Certification portion of the record captures certification and other information about ESRD facilities approved by Medicare to provide kidney dialysis and transplant services. The Facility Survey portion of the record captures activities performed during the calendar year as well as aggregate year-end population counts for both Medicare beneficiaries and non-Medicare patients. The survey includes the collection on hemodialysis patients dialyzing more than 4 times per week, vocational rehabilitation and staffing. The aggregate patient information is collected from each Medicare-approved provider of dialysis and kidney transplant services. The information is used to assess and evaluate the local, regional and national levels of medical and social impact of ESRD care and is used extensively by researchers and suppliers of services for trend analysis. *Form Number:* CMS–2744 (OMB control number: 0938–0447); *Frequency:* Yearly; *Affected Public:* Business or other for-profit, Not-for-profit institutions; *Number of Respondents:* 5,964; *Total Annual Responses:* 5,964; *Total Annual Hours:* 47,712. (For policy questions regarding this collection contact Renee Dupee at 410–786–6747)

Dated: December 13, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: OCSE–75 Tribal Child Support Enforcement Program Annual Data Report.

OMB No.: 0970–0320.

Description: The data collected by form OCSE–75 are used to prepare the OCSE preliminary and annual data reports. In addition, Tribes administering CSE programs under Title IV–D of the Social Security Act are required to report program status and accomplishments in an annual narrative report and submit the OCSE–75 report annually.

Respondents: Tribal Child Support Enforcement Organizations or the Department/Agency/Bureau responsible for Child Support Enforcement in each tribe.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
OCSE–75	63	1	63	3,969

Estimated Total Annual Burden Hours: 3,969.

Additional Information:

Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington, DC 20201. Attention Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: *infocollection@acf.hhs.gov.*

OMB Comment:

OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, *Email: OIRA_SUBMISSION@OMB.EOP.GOV*, Attn: Desk Officer for the Administration for Children and Families.

Robert Sargis,

Reports Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–D–1352]

International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products; Bioequivalence: Blood Level Bioequivalence Study; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of guidance for industry (GFI) #224 entitled ''Bioequivalence: Blood Level Bioequivalence Study'' (VICH GL52). This guidance has been developed for veterinary use by the International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products (VICH). This VICH guidance document is intended to harmonize the data recommendations associated with in vivo blood level bioequivalence (BE) for veterinary pharmaceutical products.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2014–D–1352 for ''Bioequivalence: Blood Level Bioequivalence Study.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Policy and Regulations Staff (HFV–6), Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Marilyn Martinez, Center for Veterinary Medicine (HFV–100), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240–402–0635, email: *Marilyn.Martinez@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In recent years, many important initiatives have been undertaken by regulatory authorities and industry associations to promote the international harmonization of regulatory requirements. FDA has participated in efforts to enhance harmonization and has expressed its commitment to seek scientifically based, harmonized technical procedures for the development of pharmaceutical products. One of the goals of harmonization is to identify, and then reduce, differences in technical requirements for drug development among regulatory agencies in different countries.

FDA has actively participated in the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) for several years to develop harmonized technical requirements for the approval of human pharmaceutical and biological products among the European Union, Japan, and the United States. The VICH is a parallel initiative for veterinary medicinal products. The VICH is concerned with developing harmonized technical requirements for the approval of veterinary medicinal products in the European Union, Japan, and the United States, and includes input from both regulatory and industry representatives.

The VICH Steering Committee is composed of member representatives from the European Commission and

European Medicines Agency; International Federation for Animal Health—Europe; FDA; the U.S. Department of Agriculture; the U.S. Animal Health Institute; the Japanese Ministry of Agriculture, Forestry, and Fisheries; and the Japanese Veterinary Products Association.

Six observers are eligible to participate in the VICH Steering Committee: One representative from the government of Australia/New Zealand, one representative from the industry in Australia/New Zealand, one representative from the government of Canada, one representative from the industry of Canada, one representative from the government of South Africa, and one representative from the industry of South Africa. The VICH Secretariat, which coordinates the preparation of documentation, is provided by the International Federation for Animal Health (IFAH).

II. Guidance on Bioequivalence: Blood Level Bioequivalence Study

In the **Federal Register** of September 24, 2014 (79 FR 57113), FDA published the notice of availability for a draft guidance for industry entitled ''Bioequivalence: Blood Level Bioequivalence Study'' (VICH GL52) giving interested persons until November 24, 2014, to comment on the draft guidance. FDA received one comment on the draft guidance, and that comment, as well as those received by other VICH member regulatory agencies, was considered as the guidance was finalized. The guidance announced in this notice finalizes the draft guidance dated September 2014. The final guidance is a product of the Bioequivalence Expert Working Group of the VICH.

This VICH guidance document is intended to harmonize the data recommendations associated with in vivo blood level bioequivalence (BE) for veterinary pharmaceutical products. To meet this objective, the guidance addresses the following topics: A harmonized definition of BE, factors/variables that should be considered when developing scientifically sound blood level BE study designs, and information that should be included in a blood level BE study report.

III. Significance of Guidance

This guidance, developed under the VICH process, is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). For example, the document has been designated ''guidance'' rather than ''guideline.'' In addition, guidance documents must not include mandatory language such as ''shall,'' ''must,'' ''require,'' or ''requirement,'' unless FDA is using these words to describe a statutory or regulatory requirement.

This guidance represents the current thinking of FDA on ''Bioequivalence: Blood Level Bioequivalence Study.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 514 have been approved under OMB control number 0910–0032. The collections of information in section 512(n)(1) of the FD&C Act (21 U.S.C. 360K) have been approved under OMB control number 0910–0669.

V. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm* or *http://www.regulations.gov.*

Dated: December 12, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–D–4361]

Gifts to the Food and Drug Administration: Evaluation and Acceptance; Guidance for the Public and Food and Drug Administration; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA, we, or Agency) is announcing the availability of a guidance for industry entitled ''Gifts to FDA: Evaluation and Acceptance.'' The Secretary of the Department of Health and Human Services (HHS) has the authority to accept conditional or unconditional gifts on behalf of the United States. The Secretary has delegated this gift authority to the Commissioner of Food and Drugs. This guidance provides the process and principles we will use in implementing this authority.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–4361 for ''Gifts to FDA: Evaluation and Acceptance: Guidance for the Public and FDA Staff; Availability.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential

Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Office of Policy, Office of Policy, Planning, Legislation, and Analysis, Food and Drug Administration, Bldg. 32, Rm. 4238, 10903 New Hampshire Ave., Silver Spring, MD, 20993. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Robert Berlin, Office of Policy, Office of Policy, Planning, Legislation, and Analysis, Food and Drug Administration, Bldg. 32, Rm. 4238, 10903 New Hampshire Ave., Silver Spring, MD, 20993, 301–796–8828, *robert.berlin@fda.hhs.gov.* Alternate contact: Office of Policy, 301–796–4830.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for the public and FDA staff entitled ''Gifts to FDA: Evaluation and Acceptance.'' The Secretary of HHS has the authority to accept conditional or unconditional gifts on behalf of the United States. The Secretary has delegated this gift authority to the Commissioner of Food and Drugs. This guidance provides the process and principles we will use in implementing this authority.

FDA will consider gifts from all sources except the Reagan-Udall Foundation (RUF) on a case-by-case basis using a balancing test, described in the guidance. While any person may offer a gift, there are five reasons we should reject a gift without additional evaluation. We should not accept a gift if: (1) The donor imposes conditions that are illegal, are contrary to public policy, are unreasonable to administer, are contrary to FDA's current policies and procedures, or are contrary to generally accepted public standards; (2) the donor requires us to provide the donor with some privilege, concession, or other present or future benefit in return for the gift; (3) a debarred entity offers the gift; (4) a different authority or financial mechanism applies; or (5) the total costs associated with acceptance are expected to exceed the cost of purchasing a similar item and the cost of normal care and maintenance.

In the **Federal Register** of June 29, 2016 (81 FR 42365), FDA announced the availability of a draft guidance entitled ''Gifts to FDA: Evaluation and Acceptance: Evaluation and Acceptance.'' FDA received one comment expressing concern regarding the policy described in the guidance. It appears the commenter may have misunderstood the policy and incorrectly believed that gifts would not be limited, would be unreported, and would be provided to Federal employees themselves. As explained in the guidance, that is not the case. Rather, the recipients of any gifts would be the Agency, gifts are extensively reviewed to ensure receipt would be appropriate, and the Agency intends to publish a summary of received gifts. The Agency has made only minor changes to the guidance to clarify that the evaluation of gifts from RUF will reflect RUF's unique role in support of the Agency and the statutory safeguards in 21 U.S.C. 379dd. In addition, the discussion of restrictions on funds for travel has been clarified to better reflect the scope of statutes and policies governing the use of non-Agency funds for travel.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on this matter. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/RegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: December 13, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–3995]

Agency Information Collection Activities; Proposed Collection; Comment Request; Medical Devices; Pediatric Uses of Devices; Requirement for Submission of Information on Pediatric Subpopulations That Suffer From a Disease or Condition That a Device Is Intended To Treat, Diagnose, or Cure

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection associated with the requirement for submission of information on pediatric subpopulations

that suffer from a disease or condition that a device is intended to treat, diagnose, or cure.

DATES: Submit either electronic or written comments on the collection of information by February 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–3995 for ''Medical Devices; Pediatric Uses of Devices; Requirement for Submission of Information on Pediatric Subpopulations That Suffer From a Disease or Condition That a Device Is Intended to Treat, Diagnose, or Cure.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Medical Devices; Pediatric Uses of Devices; Requirement for Submission of Information on Pediatric Subpopulations That Suffer From a Disease or Condition That a Device Is Intended To Treat, Diagnose, or Cure—21 CFR Part 814—OMB Control Number 0910–0748—Extension

Section 515A(a) of the FD&C Act requires applicants who submit certain medical device applications to include readily available information providing a description of any pediatric subpopulations that suffer from the disease or condition that the device is intended to treat, diagnose, or cure, and the number of affected pediatric patients. The information submitted will allow FDA to track the number of approved devices for which there is a pediatric subpopulation that suffers from the disease or condition that the device is intended to treat, diagnose, or cure and the review time for each such device application.

These requirements apply to applicants who submit humanitarian device exemption requests (HDEs), premarket approval applications (PMAs) or PMA supplements, or a product development protocol (PDP).

FDA expects to receive approximately 45 original PMA/PDP/HDE applications

each year, 5 of which FDA expects to be HDEs. This estimate is based on the average of FDA's receipt of new PMA applications. The Agency estimates that 10 of the estimated 40 original PMA submissions will fail to provide the required pediatric use information and their sponsors will therefore be required to submit PMA amendments. The Agency also expects to receive approximately 700 supplements that will include the pediatric use information required by section 515A(a) of the FD&C Act and part 814 (21 CFR part 814).

All that is required is to gather, organize, and submit information that is readily available, using any approach that meets the requirements of section 515A(a) of the FD&C Act and part 814. We believe that because the applicant is required to organize and submit only readily available information, no more than 8 hours will be required to comply. Furthermore, because supplements may include readily available information on pediatric populations by referencing a previous submission, FDA estimates the average time to obtain and submit the required information in a supplement to be 2 hours. FDA estimates that the total estimated burden is 1,760 hours.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN[1]

Activity/21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Pediatric information in an original PMA or PDP—814.20(b)(13)	30	1	30	8	240
Pediatric information in a PMA amendment—814.37(b)(2)	10	1	10	8	80
Pediatric information in a PMA supplement—814.39(c)(2)	700	1	700	2	1,400
Pediatric information in an HDE—814.104(b)(6)	5	1	5	8	40
Total					1,760

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: December 12, 2016.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Alcohol Abuse and Alcoholism; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Advisory Council on Alcohol Abuse and Alcoholism.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council on Alcohol Abuse and Alcoholism.

Date: February 9, 2017.

Closed: 9:00 a.m. to 9:30 a.m.

Agenda: BSC Report: Evaluation of the NIAAA Intramural Program.

Place: National Institutes of Health, National Institute on Alcohol Abuse and Alcoholism, 5635 Fishers Lane, Terrace Conference Rooms, Bethesda, MD 20892.

Closed: 9:40 a.m. to 10:50 a.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, National Institute on Alcohol Abuse and Alcoholism, 5635 Fishers Lane, Terrace Conference Rooms, Bethesda, MD 20892.

Open: 11:00 a.m. to 3:15 p.m.

Agenda: Presentations and other business of the Council.

Place: National Institutes of Health, National Institute on Alcohol Abuse and Alcoholism, 5635 Fishers Lane, Terrace Conference Rooms, Bethesda, MD 20892.

Contact Person: Abraham P. Bautista, Ph.D., Executive Secretary, National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health, 5635 Fishers Lane, Room 2085, Rockville, MD 20852, 301–443–9737 *bautista@mail.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *http://www.niaaa.nih.gov/AboutNIAAA/AdvisoryCouncil/Pages/default.aspx,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Accreditation and Approval of Intertek USA, Inc., as a Commercial Gauger and Laboratory

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of accreditation and approval of Intertek USA, Inc. as a commercial gauger and laboratory.

SUMMARY: Notice is hereby given, pursuant to CBP regulations, that Intertek USA, Inc. has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes for the next three years as of May 25, 2016.

DATES: *Effective Dates:* The accreditation and approval of Intertek USA, Inc. as commercial gauger and laboratory became effective on May 25, 2016. The next triennial inspection date will be scheduled for May 2019.

FOR FURTHER INFORMATION CONTACT: Approved Gauger and Accredited Laboratories Manager, Laboratories and Scientific Services Directorate, U.S. Customs and Border Protection, 1300 Pennsylvania Avenue NW., Suite 1500N, Washington, DC 20229, tel. 202–344–1060.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 19 CFR 151.12 and 19 CFR 151.13, that Intertek USA, Inc., 1211 Belgrove Drive, St. Louis, MO 63137 has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13. Intertek USA, Inc. is approved for the following gauging procedures for petroleum and certain petroleum products from the American Petroleum Institute (API):

API chapters	Title
3	Tank Gauging.
7	Temperature Determination.
8	Sampling.
12	Calculations.
17	Marine Measurement.

Intertek USA, Inc. is accredited for the following laboratory analysis procedures and methods for petroleum and certain petroleum products set forth by the U.S. Customs and Border Protection Laboratory Methods (CBPL) and American Society for Testing and Materials (ASTM):

CBPL No.	ASTM	Title
27–03	D 4006	Standard Test Method for Water in Crude Oil by Distillation.
27–04	D 95	Standard Test Method for Water in Petroleum Products and Bituminous Materials by Distillation.
27–05	D 4928	Standard Test Method for Water in Crude Oils by Coulometric Karl Fischer Titration.
27–06	D 473	Standard Test Method for Sediment in Crude Oils and Fuel Oils by the Extraction Method.
27–08	D 86	Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure.
27–11	D 445	Standard Test Method for Kinematic Viscosity of Transparent and Opaque Liquids (and Calculation of Dynamic Viscosity).
27–13	D 4294	Standard Test Method for Sulfur in Petroleum and Petroleum Products by Energy Dispersive X-ray Fluorescence Spectrometry.
27–46	D 5002	Standard Test Method for Density and Relative Density of Crude Oils by Digital Density Analyzer.
27–48	D 4052	Standard Test Method for Density and Relative Density of Liquids by Digital Density Meter.
27–50	D 93	Standard Test Methods for Flash Point by Pensky-Martens Closed Cup Tester.
27–53	D 2709	Standard Test Method for Water and Sediment in Middle Distillate Fuels by Centrifuge.
27–54	D 1796	Standard Test Method for Water and Sediment in Fuel Oils by the Centrifuge Method (Laboratory Procedure).
27–58	D 5191	Standard Test Method For Vapor Pressure of Petroleum Products (Mini Method).

Anyone wishing to employ this entity to conduct laboratory analyses and gauger services should request and receive written assurances from the entity that it is accredited or approved by the U.S. Customs and Border Protection to conduct the specific test or gauger service requested. Alternatively, inquiries regarding the specific test or gauger service this entity is accredited or approved to perform may be directed to the U.S. Customs and Border Protection by calling (202) 344–1060. The inquiry may also be sent to *CBPGaugersLabs@cbp.dhs.gov*. Please reference the Web site listed below for a complete listing of CBP approved gaugers and accredited laboratories. *http://www.cbp.gov/about/labs-scientific/commercial-gaugers-and-laboratories*.

Dated: December 5, 2016.

Ira S. Reese,

Executive Director, Laboratories and Scientific Services Directorate.

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to *title5@hud.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless* v. *Veterans Administration,* No. 88–2503–OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: December 8, 2016.

Brian P. Fitzmaurice,

Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R5–R–2016–N207; BAC–4333–99]

Silvio O. Conte National Fish and Wildlife Refuge; Final Comprehensive Conservation Plan and Environmental Impact Statement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; final comprehensive conservation plan and environmental impact statement.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability for review of our final comprehensive conservation plan (CCP) and environmental impact statement (EIS) for Silvio O. Conte National Fish and Wildlife Refuge (Conte NFWR). The CCP/EIS describes how we propose to manage the refuge for the next 15 years.

DATES: The Service's decision on issuance of an the final CCP/EIS will occur no sooner than 30 days after the publication of the U.S. Environmental Protection Agency's (EPA) notice of the final EIS in the **Federal Register** and will be documented in a Service Record of Decision (ROD).

ADDRESSES: You may view or obtain copies of the final CCP/EIS by any of the following methods. You may also request a copy on CD–ROM and limited hard copies will be available.

Agency Web site: Download a copy of the document at *https://www.fws.gov/refuge/Silvio_O_Conte/what_we_do/conservation.html.*

Email: Send requests to *northeastplanning@fws.gov,* and include ''Conte NFWR CCP'' in the subject line of your email.

U.S. Mail: Nancy McGarigal, Refuge Planner, 300 Westgate Center Drive, Hadley, MA 01035.

Fax: Attention: Nancy McGarigal, 413–253–8468.

To view comments on the final CCP/EIS from the EPA, or for information on EPA's role in the EIS process, see EPA's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Andrew French, Refuge Manager, 413–548–9725 (phone); *andrew_french@fws.gov* (email).

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process for Conte NFWR, which we began by publishing a notice of intent in the **Federal Register** (71 FR 62006) on October 20, 2006. For more about the initial process and the history of this refuge, please see that notice. On August

18, 2015, we announced the release of the draft CCP/EIS to the public and requested comments in a notice of availability in the **Federal Register** (80 FR 50023). In addition, EPA published a notice in the **Federal Register** (80 FR 52273) announcing the draft CCP/EIS on August 28, 2015, as required under section 309 of the Clean Air Act (CAA) (42 U.S.C. 7401 *et seq.*). We now announce the final CCP/EIS. Under the CAA, EPA also will announce the final CCP/EIS via the **Federal Register**.

EPA's Role in the EIS Process

The EPA is charged under section 309 of the CAA with reviewing all Federal agencies' EISs and commenting on the adequacy and the acceptability of the environmental impacts of proposed actions in the EISs.

EPA also serves as the repository (EIS database) for EISs prepared by Federal agencies and provides notice of their availability in the **Federal Register**. The EIS database provides information about EISs prepared by Federal agencies, as well as EPA's comments concerning the EISs. All EISs are filed with EPA, which publishes a notice of availability on Fridays in the **Federal Register**.

A notice of availability is published at the start of the 45-day public comment period for draft EISs, as well as at the start of the 30-day ''wait period'' for final EISs. With final EISs, agencies are generally required to wait 30 days before making a decision on a proposed action. For more information, see *http://www.epa.gov/compliance/nepa/eisdata.html.* You may search for EPA comments on EISs, along with EISs themselves, at *https://cdxnodengn.epa.gov/cdx-enepa-public/action/eis/search.*

This notice announces the availability of the final CCP/EIS for Conte NFWR in accordance with the National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)). The final CCP/EIS includes a detailed description of the four management alternatives we considered to guide us in managing and administering the refuge for the next 15 years. That document also contains a thorough analysis of impacts predicted from implementing each of the alternatives on the surrounding natural and human environments. We propose that alternative C, the Service-preferred alternative, serve as the foundation for the final, stand-alone CCP. We highlight the modifications we made to alternative C between the draft and final CCP/EIS in Comments, below.

Our next planning step is to complete a record of decision no sooner than 30 days after publication of this notice (40 CFR 1506.10(b)(2)).

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Refuge Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers and the public with a 15-year plan for achieving refuge purposes and goals and contributing to the mission of the National Wildlife Refuge System (NWRS). CCPs should be consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies, as well as respond to key issues and public concerns. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years, in accordance with the Refuge Administration Act.

Silvio O. Conte NFWR

Conte NFWR was established in 1997 to conserve, protect, and enhance the abundance and diversity of native plant, fish, and wildlife species, and the ecosystems on which they depend throughout the 7.2-million-acre Connecticut River watershed (watershed). Currently, the refuge is comprised of 37,000 acres within parts of the four watershed states of New Hampshire, Vermont, Massachusetts, and Connecticut.

CCP Alternatives

During the scoping phase of the planning process, we identified a variety of major issues based on input from the public, State or Federal agencies, other Service programs, and our planning team. We developed refuge management alternatives and strategies to address these issues; help achieve refuge goals, objectives, and purposes; support our partners' conservation efforts, and support the NWRS mission. Our draft CCP/EIS (80 FR 50023) and final CCP/EIS fully analyze four alternatives for the future management of the refuge: (1) Alternative A, Current Management; (2) Alternative B, Consolidated Stewardship; (3) Alternative C, Enhanced Conservation Connections and Partnerships (Service-preferred Alternative); and (4) Alternative D, Conservation Connections Emphasizing Natural Processes. Alternative A satisfies the NEPA requirement of a ''No Action'' alternative. Both the draft and final plans identify alternative C as the Service-preferred alternative, although Alternative C has been slightly modified in the final plan in response to public comments, as discussed below. Please refer to the final CCP/EIS for more details on each of the alternatives.

Comments

We solicited comments on the draft CCP/EIS for Conte NFWR from August 18 to November 16, 2015 (80 FR 50023). During this comment period, we held 14 public information meetings in towns across the Connecticut River watershed and four public hearings; one in each of the four states in the watershed. Overall, we received 363 separate written responses and collected 73 oral comments at the public hearings. We also received a petition to ban trapping at the refuge's Nulhegan Basin Division, signed by approximately 2,546 individuals. We evaluated all of the substantive comments we received, and include a summary of those comments, and our responses to them, as appendix O in the final CCP/EIS.

Changes to the Alternative C, the Service's Preferred Alternative

After considering the comments we received on our draft CCP/EIS, we have made several modifications to alternative C, including adding or revising several management strategies. Below we present a brief overview of these changes; a full description of the changes is included in appendix O in the final CCP/EIS.

- *Conservation Partnership Areas (CPAs)*—We added two CPAs, increased the size of five CPAs, and reduced the size of one CPA.
- *Conservation Focus Areas (CFAs)*—We updated maps to reflect new refuge acquisitions and an updated conserved lands base, and to incorporate core areas identified in the *Connect the Connecticut* landscape conservation design. We increased the size of one CFA. Combined total acreage in CFAs increased by 41 acres.
- *Land Acquisition Process*—We refined our proposal to pursue acquisition of 90 percent of target acreage in CFAs, on average, and 10 percent of target acreage in surrounding CPAs. The total acquisition authority we are seeking (197,337 acres) increased by the 41 acres noted above.
- *Public Uses*—We emphasize our intent to continue to allow priority public uses on newly acquired lands wherever compatible. We withdrew our

proposal to eliminate one section of snowmobile trail on Nulhegan Basin Division. We determined that recreational drone use is not appropriate.

• *Habitat Management*—We emphasize our intent to develop refuge division-specific habitat management plans with state agency and public involvement.

Alternative C, with these changes, is still our preferred alternative in the final CCP/EIS for Conte NFWR for several reasons. First, alternative C comprises a mix of actions that, in our professional judgment, work best towards achieving the refuge's purposes, vision, and goals, NWRS policies, and the goals of other state and regional conservation plans. Second, we also believe that alternative C most effectively addresses key issues raised during the planning process.

Public Availability of Documents

See **ADDRESSES**, above.

Next Steps

We will document the final decision in a record of decision, which will be published in the **Federal Register** after the 30-day ''wait period'' that begins when EPA announces this final CCP/EIS. For more information, see EPA's Role in the EIS Process.

Dated: December 1, 2016.

Deborah Rocque,

Deputy Regional Director, Northeast Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWY920000.L51010000.ER0000. LVRWK09K1000.15X; WYW174597; COC72909; UTU87237]

Notice of Availability of the Record of Decision for the Energy Gateway South Transmission Project and Approved Land Use Plan Amendments in Colorado, Utah, and Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Energy Gateway South Transmission Project (Project) and approved land use plan amendments of the Rawlins, Little Snake, Pony Express, Price, and Vernal Resource Management Plans (RMPs). The ROD constitutes the BLM's final decision regarding: granting a right-of-way to PacifiCorp (doing business as Rocky Mountain Power) to construct and operate an extra-high voltage alternating-current transmission system; and amending certain BLM land use plans. The decisions are effective immediately.

ADDRESSES: The complete text of the ROD along with the Final Environmental Impact Statement (EIS) and supporting documents are available for public viewing on the BLM Web site: *http://bit.ly/2eErxWA.*

Copies of the ROD text will be placed in all involved BLM offices for public viewing as well as at public libraries in Colorado, Utah, and Wyoming. For a list of these libraries, please see the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: Tamara Gertsch, National Project Manager, Bureau of Land Management, Wyoming State Office, P.O. Box 21150, Cheyenne, WY 82003; by telephone at (307) 775–6115; or email to *GatewaySouth_WYMail@blm.gov.* Persons who use a telecommunications device for the deaf may call the Federal Relay Service (FRS) at (800) 877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Copies of the ROD text are available at the following public libraries:

• Carbon County Library, Rawlins, WY;

• Carbon County Library-Little Snake River Branch, Baggs, WY;

• Moffat County Library, Craig, CO;

• Rangely Regional Library District, Rangely, CO;

• Mesa County Library, Grand Junction, CO;

• Grand County Public Library, Moab, UT;

• Uintah County Library, Vernal, UT;

• Duchesne County Library, Duchesne, UT;

• Emery County Library, Castle Dale, UT; and

• Nephi Public Library, Nephi, UT.

PacifiCorp (doing business as Rocky Mountain Power), a regulated public utility, filed an application for a right-of-way to construct, operate and maintain a 500-kilovolt (kV) overhead, alternating current transmission line across public and private lands for the Project on November 28, 2007. Pacificorp amended the application on December 17, 2008; October 11, 2010; January 15, 2013; and April 8, 2015. When completed, the Project will transmit about 1,500 megawatts of electricity generated from renewable sources at planned facilities in Wyoming, as well as from existing thermal sources.

The Project will begin in south central Wyoming near Medicine Bow, at the permitted Aeolus Substation, and traverses from northeast to southwest across northwestern Colorado to the existing Clover Substation near Mona, Utah, a distance of approximately 416 miles.

The facilities will include:

• Construction of a single-circuit, alternating current 500kV overhead transmission line (including associated structures, shield wires, conductors, and insulators) between the Aeolus Substation and Clover Substation;

• Construction of two series compensation stations, at points between the Aeolus and Clover substations, to improve the transport capacity and efficiency of the transmission line;

• Construction of communication regeneration stations associated with the transmission line (approximately every 55 miles);

• Rebuilding of two existing 345kV transmission lines between the Clover and Mona Substations (in the existing rights-of-way);

• Rerouting of the Mona to Huntington 345kV transmission line through the Clover Substation; and

• Relocation of an approximate 2-mile portion of an existing line (Bears Ears to Bonanza 345kV transmission line) to eliminate multiple line crossings in a short distance and avoid the BLM Raven Ridge Area of Critical Environmental Concern.

The Selected Alternative is the Agency Preferred Alternative identified in the Final EIS. The EIS has been developed in accordance with applicable laws, regulations, policies, and plans, and discloses the impacts of the Project. The Selected Alternative was identified as the route that best meets the BLM's purpose and need, and the Applicant's objectives, and that avoids and minimizes minimized impacts to sensitive resources to the extent possible. The ROD addresses the mitigation and monitoring requirements applicable to the Project, including identifying and requiring compensatory mitigation where impacts to sensitive resources cannot be avoided, as further described in the ROD and its appendices.

Based on the analysis in the Final EIS, the ROD also amends five BLM RMPs, as follows:

• Rawlins RMP (Wyoming)—modifies 21 acres of visual resource management (VRM) Class III to Class IV;

• Little Snake RMP (Colorado)—modifies 18 acres of VRM Class III to Class IV;

• Pony Express RMP (Salt Lake Field Office, Utah)—establishes the 1.3 miles of the Project right-of-way as a 250 foot wide utility corridor;

• Price Field Office, Utah—widens a portion of a utility corridor designated in a land use plan from 1 mile to 1.5 miles in width, to include the Project right-of-way; and

• Vernal Field Office, Utah—modifies 58 acres of VRM Class II to Class III.

The approved land use plan amendments specifically amend the RMPs to allow for the development of the Project and ancillary facilities on land managed by the BLM. NEPA disclosure of these plan amendments has been integrated with the EIS process for the Project, including the scoping and public availability periods for the EIS. With these amendments, the Selected Alternative will conform with the applicable the BLM land use plan along the project's route (43 CFR 1610.5–3).

On May 13, 2016, the Notice of Availability (NOA) for the Final EIS and Proposed Land use Plan Amendments for the Project was published in the **Federal Register** (81 FR 29912). The publication of the NOA initiated a 30-day protest period for the proposed land use planning decisions and a 60-day Governors' consistency review. At the close of the 30-day protest period, five protests were received and subsequently resolved as explained in the Director's Protest Resolution Report, available online at *http://bit.ly/2eErxWA*. The proposed land use plan amendments were not modified as a result of the protests. Individual protest response letters were sent to the protesting parties.

Copies of the ROD are available for public inspection during normal business hours at the following locations.

• BLM, Wyoming State Office, Public Reading Room, 5353 Yellowstone Road, Cheyenne, Wyoming 82009;

• BLM, Colorado State Office, Public Reading Room, 2850 Youngfield Street, Lakewood, Colorado 80215–7093; and

• BLM, Utah State Office, Public Reading Room, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101–1345.

Simultaneous with the protest period, the Governors of Wyoming, Colorado, and Utah conducted consistency reviews for the proposed land use plan amendments to identify any inconsistencies with State or local plans, policies, or programs. No inconsistencies were identified.

Authority: 40 CFR 1506.6.

Mary Jo Rugwell,

Wyoming State Director.

Notice of Application for Extension of Public Land Order No. 1144, as Modified by PLO 7325, and Opportunity for Public Meeting; Miller Lake Recreational Area, Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Forest Service (USFS) has filed an application with the Bureau of Land Management (BLM) requesting that the Secretary of the Interior extend the duration of Public Land Order (PLO) No. 1144, as modified by PLO No. 7325, for an additional 20-year term subject to valid existing rights. PLO No. 1144, as modified by PLO 7325, withdrew 949.43 acres of Forest System Lands in the Fremont-Winema National Forest from location and entry under United States mining laws, but not from leasing under the mineral leasing laws. The purpose of the proposed withdrawal extension is to protect the Miller Lake Recreational Area. PLO No. 1144, as modified by PLO No. 7325 will expire on May 20, 2018, unless extended. This notice also gives the public an opportunity to comment on the application and to request a public meeting.

DATES: Comments and public meeting requests must be received by March 16, 2017.

ADDRESSES: Comments and public meeting requests should be sent to the BLM Oregon/Washington State Director, P.O. Box 2965, Portland, OR 97208–2965.

FOR FURTHER INFORMATION CONTACT: Jacob Childers, BLM Oregon/Washington State Office, 503–808–6225 or Candice Polisky, USFS Pacific Northwest Region, 503–808–2479. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact either of the above individuals. The Service is available 24 hours a day, 7 days a week. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The USFS has filed an application requesting that the Secretary of the Interior extend PLO No. 1144, as modified by PLO No. 7325, for an additional 20-year term, subject to valid existing rights. PLO No. 1144 (20 FR 3151 (1955)), as modified by PLO No. 7325 (63 FR 19744 (1998)), withdrew 949.43 acres of National Forest System Lands from location and entry under the United States mining laws, but not from leasing under the mineral leasing laws, to protect the Miller Lake Recreational Area. The withdrawal encompasses Digit Point Campground and Miller Lake Trail. The USFS would not need to acquire water rights to fulfill the purpose of the requested withdrawal extension.

Willamette Meridian

Fremont-Winema National Forest

T. 27 S., R. 6½ E.,
- Sec. 11, those portions of Lots 1, 2, NE¼NW¼ lying outside the Mt. Thielsen Wilderness Area boundary, Lots 3 through 7, SE¼SW¼, and all of unsurveyed Miller Lake lying within the section;
- PB 37, SW¼, SW¼SE¼ lying outside the Mt. Thielsen Wilderness area boundary, and all of unsurveyed Miller Lake lying within aforementioned parts of PB 37;
- Sec. 13, Lots 1 through 7, NW¼SW¼; PB 38.

The area described contains 949.43 acres in Klamath County.

This legal description is identical in size, shape, and location as the description in PLO No. 7325, as published in the **Federal Register** (63 FR 19745 (1998)).

Records related to the application may be examined by contacting Jacob Childers, Bureau of Land Management, at the address or phone number listed above.

For a period until March 16, 2017, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal extension may present their views in writing to the BLM Oregon/Washington State Office State Director at the address indicated above.

Comments, including names and street addresses of respondents, will be available for public review at the address indicated above during regular business hours. Be advised that your entire comment, including your personal identifying information may be made publicly available. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice is hereby given that an opportunity for a public meeting is

afforded in connection with the withdrawal extension application. All interested parties who desire a public meeting for the purpose of being heard on the withdrawal extension application must submit a written request to the BLM State Director at the address indicated above by March 16, 2017. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** and a local newspaper at least 30 days before the scheduled date of the meeting.

This extension will be processed in accordance with 43 CFR 2310.4.

Steve Storo,

Acting Chief, Branch of Land, Mineral, and Energy Resources.

Notice of Availability of the Record of Decision for the TransWest Express Transmission Project in Wyoming, Colorado, Utah and Nevada

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior, Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) approving the TransWest Express 600-kilovolt (kV) Direct Current Transmission Project (Project) right-of-way in Wyoming, Colorado, Utah, and Nevada and associated amendments to the Rawlins Field Office (FO) Resource Management Plan (RMP) in Wyoming, the Little Snake FO RMP in Colorado, the Vernal FO and Pony Express RMPs in Utah, and the Ely District RMP in Nevada.

ADDRESSES: Copies of the ROD are being sent to Federal, State and local governments, public libraries in the Project area, and interested parties who previously requested a copy. Copies of the ROD and support documents are also available for public inspection at the locations identified in the **SUPPLEMENTARY INFORMATION** section of this notice and electronically on the following Web site: *http://bit.ly/TransWestExpress.*

FOR FURTHER INFORMATION CONTACT: Sharon Knowlton, Project Manager, BLM Wyoming State Office, P.O. Box 20879, Cheyenne, WY 82003, by telephone at 307–775–6124, or by email at *sknowlto@blm.gov.* Any persons wishing to be added to a mailing list of interested parties may write or call the Project Manager at this address or phone number. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339. The Service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: In November 2007, National Grid filed a ROW application with the BLM to construct and operate an extra high voltage transmission line between Wyoming and delivery points in the Southwestern United States. An amended application was filed on September 2, 2008, and the Project application was transferred to TransWest Express LLC (TransWest), a subsidiary of the Anschutz Corporation. TransWest submitted additional amended applications to the BLM in 2008, 2010, 2011, 2012, 2014, and 2015 to reflect minor changes and refinements to the proposed Project.

In April 2010, the BLM and Western Area Power Administration (Western) entered into a Memorandum of Understanding (MOU) in which the BLM and Western agreed to act as joint lead agencies in the preparation of an Environmental Impact Statement (EIS) for the Project. The BLM's status as a joint lead agency is based on the BLM's potential Federal action to grant a ROW across BLM lands. Western's status as a joint lead agency is based on its potential Federal action to provide Federal funds for the proposed Project. Western and TransWest entered into a development agreement (executed in September 2011, amended in June 2014) wherein Western agreed to support Project development by providing technical assistance and/or financing.

The U.S. Forest Service (USFS), U.S. Bureau of Reclamation, and Utah Reclamation Mitigation Conservation Commission are cooperating agencies in the proposed Project, based on their potential issuance of permits authorizing the use of lands under their management. Additional cooperating agencies include Federal, State, tribal, and local agencies. On January 4, 2011, the BLM and Western jointly published in the **Federal Register** (76 FR 379) a Notice of Intent to Prepare an EIS in compliance with the requirements of the Federal Land Policy and Management Act (FLPMA) and the National Environmental Policy Act (NEPA). To allow the public an opportunity to review information associated with the proposed Project, the BLM held public scoping meetings from January through March 2011 in Baggs, Rawlins, and Rock Springs, Wyoming; Craig, Grand Junction, and Rangely, Colorado; Castledale, Cedar City, Central, Delta, Duchesne, Enterprise, Milford, Moab, Nephi, Pine Valley, Richfield, and St. George, Utah; and Caliente, Henderson, Las Vegas, and Overton, Nevada. Issues and potential impacts to specific resources were identified during the scoping period and the preparation of the Draft EIS.

The BLM and Western, in coordination with the USFS and other federal, state, and local governments and agencies, considered all public scoping comments received, as well as TransWest's refinements to the Proposed Action, when they identified the Agency Preferred Alternative in the Draft EIS. The Agency Preferred Alternative was developed through a comparative evaluation of routing opportunities and constraints and the relative impacts among the various alternative segments.

The Environmental Protection Agency published a Notice of Availability (NOA) for the Draft EIS/Draft RMP Amendments on June 28, 2013 in the **Federal Register** (78 FR 38975), which began a 90-day public comment period. The BLM and Western published their NOA for the Draft EIS/Draft RMP Amendments on July 3, 2013 in the **Federal Register** (78 FR 40163). To help facilitate the public review of and comment on the Draft EIS, the agencies held public meetings in July, August, and September 2013 in Baggs and Rawlins, Wyoming; Craig, Colorado; Cedar City, Delta, Duchesne, Fort Duchesne, Nephi, Price, St. George, and Vernal, Utah; and Henderson and Panaca, Nevada.

On December 6, 2013, the USFS published an additional NOA in the **Federal Register** (78 FR 73524) to initiate an additional 30-day public comment period specific to the USFS decision whether to authorize the Project across USFS-managed lands. Similarly, the USFS will publish their own NOA to notify the public of their decision whether to authorize the Project.

The agencies received over 1,800 comments, contained in 457 submissions, during the Draft EIS public comment periods. All submitted

comments were addressed in the Final EIS.

As a result of cooperating agency input and public comments, refinements were made to the Agency Preferred Alternative presented in the Final EIS. These refinements include:

- Reduction in the separation distance from existing transmission to reflect updated Western Electricity Coordinating Council guidance;
- Removal of or adjustment to portions of the proposed Project to address resource impacts or conflicts; and
- Reduction in the width of the study area and refinements to the transmission alignment to reflect preliminary engineering designed to reduce resource impacts and conflicts.

In addition to these refinements, the agencies also developed a suite of hierarchical mitigation requirements for application on an on-site, regional and compensatory basis, including landscape-level conservation and management actions to reduce resource impacts and achieve planning objectives across the area impacted by the Project. Project linear mileage lengths of the Agency Preferred Alternative by agency jurisdiction are found in the Final EIS, Chapter 2.0, Tables 2–23 through 2–26 and also below. The Final EIS and proposed RMP Amendments were made available for a 30-day protest period and a 60-day Governors' Consistency Review on May 1, 2015. Six protest letters were received and considered. The Director determined that the BLM followed applicable laws, regulations and policies; therefore, all protests were denied or dismissed. The Governors of Wyoming and Utah provided Consistency Review letters, which the BLM reviewed and considered in developing the route alignment approved in the ROD (referred to as the Selected Alternative).

The Selected Alternative approved by the BLM's ROD is a 728 mile, 600-kilovolt direct current transmission system centered within a 250 foot wide corridor, and includes access roads and ancillary permanent facilities. Approximately 275 miles (38 percent) of the Selected Alternative are located within designated federal utility corridors. It is also co-located with existing transmission lines for a distance of 398 miles (55 percent of the total length).

In Wyoming, the Selected Alternative crosses 58 miles of federal, 4 miles of state, and 29 miles of private land. In Colorado, the Selected Alternative crosses 63 miles of Federal, 13 miles of State, and 15 miles of private land. In Utah, the Selected Alternative crosses 210 miles of Federal, 27 miles of State, and 153 miles of private land. In Nevada, the Selected Alternative crosses 137 miles of Federal, 14 miles of tribal, and 5 miles of private land. The Selected Alternative largely follows the Agency Preferred Alternative, in the Final EIS, except for two minor modifications.

The Final EIS' analysis of the Project was organized into four geographic regions based on region-specific topographical or other resource constraints and issues (Southern Wyoming, Northwestern Colorado; Northwestern Colorado, Eastern Utah, and Central Utah; Central Utah, Southwestern Utah, and Southern Nevada; Southern Nevada-Apex to the Marketplace Hub). The approximately 728-mile Selected Alternative is discussed below, by region.

BLM Decision—ROW Grant: The ROD approves, subject to mitigation measures identified in the ROD, a ROW grant as outlined below by EIS Region:

- *Region I: (Southern Wyoming, Northwestern Colorado).* Final EIS Alternative I–B with the Tuttle Micro-siting Option 4 and the Bolten Ranch ground electrode system siting. The Selected Alternative transmission line route would extend approximately 157 miles from the vicinity of Sinclair, Carbon County, Wyoming to the vicinity of U.S. Highway 40 southwest of Maybell in western Moffat County, Colorado.
- *Region II: (Northwestern Colorado, Eastern Utah, and Central Utah).* Final EIS Alternative II–G. The Selected Alternative transmission line route would extend approximately 252 miles from Maybell Colorado, through eastern Utah, to the vicinity of the Intermountain Power Project (IPP) near Delta, Millard County, Utah.
- *Region III: (Central Utah, Southwest Utah, and Southern Nevada).* Final EIS Alternative III–D with the Halfway Wash-Virgin River ground electrode system siting. The Selected Alternative transmission line route would extend approximately 282 miles from the vicinity of the IPP, Millard County, Utah, to the vicinity of Apex on Interstate 15, northeast of Las Vegas, Nevada.
- *Region IV: (Southern Nevada—Apex to the Marketplace Hub).* Final EIS Alternative IV–A. The Selected Alternative transmission line route would extend approximately 37 miles from Apex on Interstate 15 to the Marketplace Hub in the Eldorado Valley, southeast of Las Vegas.

In addition to approving the configuration identified above, the ROD also affirmatively recognizes two design options that provide minor variations to the approved route. The Applicant has the option of construction either one of these design options with prior notification and approval by the BLM.

BLM Decision—Land Use Plan Amendments: The BLM planning regulations (43 CFR 1610) require authorized uses of public lands to conform to approved land use plans. To bring the Project into conformance, the ROD approves the following amendments to BLM RMPs in the Project area:

- *Rawlins Field Office RMP (Wyoming):* Amendment designates new utility corridor and expands an existing corridor to allow for overhead utilities and exceptions to other resource stipulations if avoidance measures or mitigation are not feasible.
- *Little Snake Field Office RMP (Colorado):* Amendment designates a new utility corridor to allow for overhead utilities and exceptions to other resource stipulations if avoidance measures or mitigation are not feasible.
- *Vernal Field Office RMP (Utah):* Amendment designates a new aboveground utility corridor. This corridor will allow for exceptions to other resource stipulations if avoidance measures or impact mitigation are not feasible.
- *Pony Express RMP (Salt Lake Field Office, Utah):* Amendment designates a new aboveground utility corridor to accommodate future high voltage transmission lines.
- *Ely RMP (Caliente Field Office, Nevada):* Amendment provides a one-time exception to accommodate one high-voltage transmission line through the ROW exclusion area adjacent to the existing utility corridor through the Mormon Mesa-Ely ACEC.

All plan amendments comply with applicable Federal laws and regulations and apply only to Federal lands and mineral estates administered by the BLM.

Approval of the ROW grant is subject to the terms and conditions laid out in the ROD and ROD appendices, and construction cannot begin until TransWest completes satisfies all terms and conditions identified in the ROD necessary to receive a written Notice to Proceed from the BLM (43 CFR 2805).

Copies of the ROD are available for public inspection during normal business hours at the following locations.

- BLM, Wyoming State Office, Public Reading Room, 5353 Yellowstone Road, Cheyenne, Wyoming 82009;
- BLM, Colorado State Office, Public Reading Room, 2850 Youngfield Street, Lakewood, Colorado 80215–7093;

• BLM, Utah State Office, Public Reading Room, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101–1345; and

• BLM, Nevada State Office, Public Reading Room, 1340 Financial Blvd., Reno, Nevada 89502.

The Assistant Secretary of Land and Minerals Management, Department of the Interior, has approved the ROD. That approval constitutes the final decision of the Department and, in accordance with the regulations at 43 CFR 4.410, is not subject to appeal under Departmental regulations at 43 CFR part 4.

Any challenge to these decisions must be brought in the Federal District Court and is subject to 42 U.S.C. 4370m–6.

Mary Jo Rugwell,

Wyoming State Director.

National Park Service

[NPS–WASO–NAGPRA–22526; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intent to Repatriate Cultural Items: Allen County-Fort Wayne Historical Society, Fort Wayne, IN

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Allen County-Fort Wayne Historical Society, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, has determined that the cultural items listed in this notice meet the definition of unassociated funerary objects. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request to the Allen County-Fort Wayne Historical Society. If no additional claimants come forward, transfer of control of the cultural items to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to the Allen County-Fort Wayne Historical Society at the address in this notice by January 17, 2017.

ADDRESSES: Walter Font, Curator, Allen County-Fort Wayne Historical Society, 302 East Berry Street, Fort Wayne, IN 46802, telephone 260–426–2882, email *wfont@comcast.net.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate cultural items under the control of the Allen County-Fort Wayne Historical Society that meet the definition of unassociated funerary objects under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American cultural items. The National Park Service is not responsible for the determinations in this notice.

History and Description of the Cultural Item(s)

In 1912, 76 cultural items were removed from the Miami Chief Little Turtle (Mishikinakaw, 1747–1812) grave in Fort Wayne, Allen County, IN. The objects were excavated at 634 Lawton Place in Fort Wayne, IN, during the construction of a house for George W. Gillie in 1912. Jacob M. Stouder, a local collector, acquired many, but not all, of the objects discovered during the excavations. Most of the objects were acquired by the Allen County-Fort Wayne Historical Society in the 1930s from the J.M. Stouder family, from Mrs. George Gillie (7 items), and E.L. Dotson (3 items). Three objects were donated by George Carey in 1962. The objects were acquired by purchase, donation and loans with each source saying the objects were from the Lawton Place site. The 76 unassociated funerary objects, are 8 Armband/armband fragments; 1 axe head; 3 beads; 2 beads, string of; 1 razor blade; 2 bracelets; 9 brooch/brooch fragments; 1 buckle/leather remnants; 1 bullet mold; 3 buttons; 1 earring; 1 flintlock; 1 flint & steel; 3 gorgets; 1 gun stock fragment; 2 kettles, copper; 1 kettle, iron; 6 knife/knife blades; 3 iron nails; 2 musket barrels; 1 pewter cup; 1 pewter flask; 1 pigment jar; 1 pipe; 2 pocketknife fragments; 2 ramrod guides; 1 scissors; 7 silver crosses; 1 silver necklace; 2 spoons; 2 spurs; 1 sword; 1 tomahawk; and 1 trigger guard.

Jacob M. Stouder's research led him to believe that the site of Little Turtle's grave had been found. A contemporary historian, Calvin M. Young, supported Stouder's observations. The objects were appropriate to Little Turtle's stature as a great chief and they reasoned that the sword and peace medal found in the grave gave weight to their conclusion. Except for a few items (ceramic, stone, or miscellaneous remnants), the funeral-related artifacts are trade items of French, British or American manufacture. Most were made in the late-eighteenth and early-nineteenth centuries. Stouder's research included interviews with old-time residents in the area and published sources available to him at the time. A review of his research and research using additional sources (fourteen altogether) has not negated Stouder's findings, that the objects he collected were from grave of Little Turtle. On June 12, 1960, the Historical Society dedicated a small park along with a memorial plaque at the Lawton Place burial site. An inventory and detailed historical assessment was submitted for review and consultation to representatives of Little Turtle's lineal descendants, the Miami Tribe of Oklahoma, Miami, Oklahoma and the Pokagon Band of Potawatomi Indians, Dowagiac, Michigan. Allen County-Fort Wayne Historical Society staff and the consultants agreed that the objects found at Lawton Place in 1912 were from Little Turtle's burial.

Determinations Made by the Allen County-Fort Wayne Historical Society

Officials of the Allen County-Fort Wayne Historical Society have determined that:

• Pursuant to 25 U.S.C. 3001(3)(B), the 76 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.

• Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the unassociated funerary objects and lineal descendants of Chief Little Turtle. They include families represented by Daryl Baldwin, Oxford, OH, and John Froman, Miami, OK, whose confirmed genealogies are on file at the Allen County-Fort Wayne Historical Society.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to Walter Font, Curator, Allen County-Fort

Wayne Historical Society, 302 East Berry Street, Fort Wayne, IN 46802, telephone 260–426–2882, email *wfont@comcast.net,* by January 17, 2017. After that date, if no additional claimants have come forward, transfer of control of the unassociated funerary objects to the lineal descendants of Little Turtle represented by Daryl Baldwin and John Froman may proceed.

The Allen County-Fort Wayne Historical Society is responsible for notifying the lineal descendants, the Miami Tribe of Oklahoma and the Pokagon Band of Potawatomi Indians that this notice has been published.

Dated: December 6, 2016.

Notice of Inventory Completion: St. Joseph Museums, Inc., St. Joseph, MO

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The St. Joseph Museums, Inc. has completed an inventory of human remains, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the St. Joseph Museums, Inc. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the St. Joseph Museums, Inc. at the address in this notice by January 17, 2017.

ADDRESSES: Trevor Tutt, St. Joseph Museums, Inc., P.O. Box 8096, St. Joseph, MO 64508, telephone (816) 232–8471, email *trevor@stjosephmuseum.org.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the St. Joseph Museums, Inc., St. Joseph, MO. The human remains were donated on April 27, 1928 by Mary S. McNeil.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the St. Joseph Museums, Inc. professional staff in consultation with representatives of the Confederated Salish and Kootenai Tribes of the Flathead Reservation.

History and Description of the Remains

On April 27, 1928, human remains representing, at minimum, one individual were donated to the St. Joseph Museums, Inc. by Mrs. Mary S. McNeil. These human remains were identified at the time of donation as a Flathead Indian skull over forty years old. The exact location of removal of the human remains and the means by which Mrs. McNeil acquired them were not documented. Based on the original documentation, the human remains most likely were removed in the late nineteenth century. Their identification as Flathead was made by Mrs. McNeil, and/or the director of the St. Joseph Museum, Mrs. Orel Andrews, at the time of accession. Mrs. McNeil's collection spans Native American cultures from Alaska to New Mexico, across the plains and in the American Northeast. As she studied these cultures extensively, the St. Joseph Museums, Inc. believes her assignment of these human remains to the Flathead to be correct. No known individuals were identified. No associated funerary objects are present.

Determinations Made by the St. Joseph Museums, Inc.

Officials of the St. Joseph Museums, Inc. have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), no objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Confederated Salish and Kootenai Tribes of the Flathead Reservation.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Trevor Tutt, St. Joseph Museums, Inc., P.O. Box 8096, St. Joseph, MO 64508, telephone (816) 232–8471, email *trevor@stjosephmuseum.org,* by January 17, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation may proceed.

The St. Joseph Museums, Inc. is responsible for notifying the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation that this notice has been published.

Dated: November 29, 2016.

[NPS–WASO–ANRSS–22287; PPWONRADE2, PMP00EI05.YP0000]

Notice of Availability of the Draft Environmental Impact Statement To Address the Presence of Wolves at Isle Royale National Park, Michigan

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Draft Environmental Impact Statement (EIS) to address the presence of wolves at Isle Royale National Park.

DATES: All comments must be postmarked or submitted not later than March 15, 2017.

FOR FURTHER INFORMATION CONTACT: Please contact Superintendent Phyllis

Green, Isle Royale National Park, ISRO Wolves, 800 East Lakeshore Drive, Houghton, Michigan 49931–1896, or by telephone at (906) 482–0984. Information is available online for public review at *http://parkplanning.nps.gov/isrowolves.*

SUPPLEMENTARY INFORMATION: This process is being conducted pursuant to the National Environmental Policy Act of 1969, and the regulations of the Department of the Interior. The purpose of this Draft EIS is to determine whether and how to bring wolves to Isle Royale to function as the apex predator in the near term within a changing and dynamic island ecosystem. A decision is needed because the potential absence of wolves raises concerns about possible effects to Isle Royale's current ecosystem, including effects to both the moose population and Isle Royale's forest/vegetation communities. Although wolves have not always been part of the Isle Royale ecosystem, they have been present for more than 65 years, and have played a key role in the ecosystem, affecting the moose population and other species during that time. The average wolf population on the island over the past 65 years has been about 22, but there have been as many as 50 wolves documented on the island and as few as two. Over the past five years the population has declined steeply, which has given rise to the need to determine whether the NPS should bring additional wolves to the island. There were three wolves documented on the island in 2015 and only two wolves were confirmed in 2016. At this time, natural recovery of the population is unlikely.

This Draft EIS evaluates the impacts of the no-action alternative (Alternative A) and three action alternatives (Alternatives B, C, and D).

Alternative A would continue existing management practices and assume no new management actions would be implemented beyond those available at the outset of the wolf planning process. Wolves may arrive or depart independently via an ice bridge. Under Alternative A, wolves would not be introduced by management to Isle Royale National Park.

The action alternatives include the capture and relocation of wolves from the Great Lakes Region to Isle Royale National Park. The NPS would target wolves for relocation that are known to feed on moose as one of their prey sources, are in good health with no apparent injuries, and have the appropriate genetic diversity to sustain a viable population on the island. Capture and relocation efforts would take place between late fall and late winter when the island is closed to visitors. All of the action alternatives include monitoring which could include radio or GPS collar tracking from ground and air, scat sample collection, visual observations, and other methodology as funding is available.

Under Alternative B, between 20 and 30 wolves with a wide genetic diversity would be introduced to the island. The social makeup of introduced wolves could include packs, established pairs with pups, or unrelated individuals. Wolves may be supplemented as needed up to the third year after initial introduction. After the third year, should an unforeseen event occur that impacts the wolf population, such as a mass die-off or introduction of disease, and the goals of the alternative are not being met due to this event, wolves may be supplemented for an additional two years. No additional wolves would be brought to the island after five years from date of initial introduction.

Alternative C would involve the initial introduction of a smaller number of wolves than Alternative B. The social makeup of introduced wolves could include an established pair with pups, or a pack, as well as unrelated individuals. The NPS would bring wolves to the island as often as needed in order to maintain a population of wolves on the island for at least the next 20 years. Under this alternative, additional wolves may be brought based on one or more resource indicators that could include genetic health of the wolves, ecological health, and prey species population trends.

Under Alternative D, the NPS would not take immediate action and would continue current management, allowing natural processes to continue. This alternative is meant to continue the study of island ecosystem changes without an apex predator and only take action should the weight of evidence suggest an apex predator is necessary to ecosystem function. Resource indicators, such as population size and growth rate of moose would be used to determine if and when wolf introduction actions should be taken. If the weight of evidence indicates wolf introduction actions should be taken, the NPS would follow procedures outlined within Alternative C.

Public Participation: After the Environmental Protection Agency's Notice of Availability is published, the NPS will schedule public meetings to be held during the comment period in the Great Lakes Region near the park. Dates, times, and locations of these meetings will be announced in press releases and on the NPS Planning, Environment, and Public Comment Web site for the Draft EIS at *http://parkplanning.nps.gov/isrowolves.*

How to Comment: You are encouraged to comment on the Draft EIS online at *http://parkplanning.nps.gov/isrowolves.* You may also mail or hand-deliver your written comments to Superintendent Phyllis Green, Isle Royale National Park, ISRO Wolves, 800 East Lakeshore Drive, Houghton, Michigan 49931–1896. Written comments will also be accepted during scheduled public meetings discussed above. Comments will not be accepted by fax, email, or by any method other than those specified above. Bulk comments in any format (hard copy or electronic) submitted on behalf of others will not be accepted. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: October 25, 2016.

Cameron H. Sholly,

Regional Director, Midwest Region.

Notice of Inventory Completion: Seminole Tribe of Florida, Clewiston, FL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Seminole Tribe of Florida has completed an inventory of human remains, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Seminole Tribe of Florida. If no additional requestors come forward, transfer of control of the

human remains to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Seminole Tribe of Florida at the address in this notice by January 17, 2017.

ADDRESSES: Dr. Paul Backhouse, Tribal Historic Preservation Office, Seminole Tribe of Florida, 30290 Josie Billie Highway, PMB 1004, Clewiston, FL 33440, telephone (863) 983–6549 Ext. 12244, email *Paulbackhouse@semtribe.com.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Seminole Tribe of Florida, a federally recognized Indian Tribe organized pursuant to 25 U.S.C. 476, through one of its governmental departments, the Seminole Police Department (Seminole Police Department). The Seminole Tribe of Florida, Tribal Historic Preservation Office (Tribal Historic Preservation Office), another governmental department of the Seminole Tribe of Florida, is handling the NAGRPA process while the human remains continue to be in the physical control of the Seminole Police Department. The human remains were removed from an indeterminate location in Florida.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Seminole Tribe of Florida, (Tribal Historic Preservation Office) professional staff in consultation with representatives of the Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Alabama-Quassarte Tribal Town; Miccosukee Tribe of Indians; Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservation)); and The Muscogee (Creek) Nation. The Coushatta Tribe of Louisiana; Delaware Nation, Oklahoma; Kialegee Tribal Town; Kiowa Indian Tribe of Oklahoma; Mississippi Band of Choctaw Indians; Poarch Band of Creek Indians (previously listed as the Poarch Band of Creek Indians of Alabama); The Chickasaw Nation; The Seminole Nation of Oklahoma; and Thlopthlocco Tribal Town were contacted and invited to consult, but did not participate.

History and Description of the Remains

On an unknown date, human remains representing, at minimum, two individuals were removed from an unknown location in the state of Florida. In 1993, the human remains were anonymously mailed to a member of the Seminole Tribe of Florida. An unsigned handwritten note was included with the remains indicating that they had been excavated approximately 30 years prior from Florida, and that the sender believed the remains were Native American, and possibly Seminole. The tribal member contacted the Seminole Police Department, who then took possession of the remains. The remains were placed in the Seminole Police Department evidence vault as it was unknown if they were of modern forensic significance. In 2009, the remains were examined by the Broward County Medical Examiner's Office, and in 2013, the remains were examined by the Tribal Historic Preservation Office. The remains were determined to be archeological. The human remains include one partial cranium, a separate partial maxilla and mandible, and three cervical vertebrae. Both individuals were adults based on dental wear and cranial suture closure. One individual was likely female and the other male, based on cranio-facial features associated with sexual morphology. The remains were determined to be those of prehistoric Native American individuals, based on condition and anatomy associated with ancestry. No known individuals were identified. No associated funerary objects are present.

Based on the description in the hand written letter that accompanied the remains, as well as the decision of ancestry recorded in the osteological examination performed by District 17 Medical Examiner, the remains are determined to be those of early Seminole Native Americans. The present-day tribes associated with the early Seminole include the Miccosukee Tribe of Indians, Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservation)), and The Seminole Nation of Oklahoma.

Determinations Made by the Seminole Tribe of Florida

Officials of the Seminole Tribe of Florida have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Miccosukee Tribe of Indians; Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservation)); and The Seminole Nation of Oklahoma.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Paul Backhouse, Seminole Tribe of Florida, Tribal Historic Preservation Office, 30290 Josie Billie Hwy, PMB 1004, Clewiston, FL 33440, telephone (863) 983–6549 Ext. 12244, email *Paulbackhouse@semtribe.com,* by January 17, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Miccosukee Tribe of Indians, Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservation)); and The Seminole Nation of Oklahoma may proceed.

The Seminole Tribe of Florida is responsible for notifying the Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Alabama-Quassarte Tribal Town; Coushatta Tribe of Louisiana; Delaware Nation, Kialegee Tribal Town; Kiowa Indian Tribe of Oklahoma; Miccosukee Tribe of Indians; Mississippi Band of Choctaw Indians; Poarch Band of Creek Indians (previously listed as the Poarch Band of Creek Indians of Alabama) Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservation); The Chickasaw Nation; The Muscogee (Creek) Nation; and The Seminole Nation of Oklahoma and Thlopthlocco Tribal Town that this notice has been published.

Dated: December 7, 2016.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the University of Iowa Office of the State Archaeologist Bioarchaeology Program, at the address in this notice by January 17, 2017.

ADDRESSES: Dr. Lara Noldner, Office of the State Archaeologist Bioarchaeology Program, University of Iowa, 700 S Clinton Street, Iowa City, IA 52242, telephone (319) 384–0740, email *lara-noldner@uiowa.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the University of Iowa Office of the State Archaeologist Bioarchaeology Program, Iowa City, IA. The human remains were removed from Woodbury County, IA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the University of Iowa Office of the State Archaeologist Bioarchaeology Program professional staff in consultation with representatives of the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Lower Brule Sioux Tribe of the Lower Brule Reservation; Lower Sioux Indian Community in the State of Minnesota; Oglala Sioux Tribe; Rosebud Sioux Tribe of the Rosebud Indian Reservation; Santee Sioux Nation, Nebraska; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Spirit Lake Tribe; Standing Rock Sioux Tribe; Upper Sioux Community, Minnesota; and the Yankton Sioux Tribe.

History and Description of the Remains

In 1988, human remains representing, at minimum, one individual were removed from the site of the War Eagle Monument (13WD69) in Woodbury County, IA, prior to the monument's relocation. In 1988, erosion caused human remains to be exposed along the upper edge of the bluff. These remains were recovered by personnel from the Office of the State Archaeologist (OSA) and were transferred to the OSA Bioarchaeology Program. An adult of indeterminate age, possibly female, is represented by the lower limb bones (Burial Projects 266 and 648). No known individuals were identified. No associated funerary objects are present.

The number of burials in the vicinity of the War Eagle Monument is unknown. According to various accounts, War Eagle, a Sioux chief, and at least two of his daughters were buried on the bluff. Additionally, some of War Eagle's grandchildren and at least four Euro-American settlers are believed to have been buried in the area. While identification of the individual cannot be determined, based on archival information, the remains represent a Sioux individual.

Determinations Made by the University of Iowa Office of the State Archaeologist Bioarchaeology Program

Officials of the University of Iowa Office of the State Archaeologist Bioarchaeology Program have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Lower Brule Sioux Tribe of the Lower Brule Reservation; Lower Sioux Indian Community in the State of Minnesota; Oglala Sioux Tribe; Rosebud Sioux Tribe of the Rosebud Indian Reservation; Santee Sioux Nation, Nebraska; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Spirit Lake Tribe; Standing Rock Sioux Tribe; Upper Sioux Community, Minnesota; and the Yankton Sioux Tribe.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Lara Noldner, Office of the State Archaeologist Bioarchaeology Program, University of Iowa, 700 S Clinton Street, Iowa City, IA 52242, telephone (319) 384–0740, email *lara-noldner@uiowa.edu,* by January 17, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Lower Brule Sioux Tribe of the Lower Brule Reservation; Lower Sioux Indian Community in the State of Minnesota; Oglala Sioux Tribe; Rosebud Sioux Tribe of the Rosebud Indian

Reservation; Santee Sioux Nation, Nebraska; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Spirit Lake Tribe; Standing Rock Sioux Tribe; Upper Sioux Community, Minnesota; and the Yankton Sioux Tribe may proceed.

The University of Iowa Office of the State Archaeologist Bioarchaeology Program is responsible for notifying the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Lower Brule Sioux Tribe of the Lower Brule Reservation; Lower Sioux Indian Community in the State of Minnesota; Oglala Sioux Tribe; Rosebud Sioux Tribe of the Rosebud Indian Reservation; Santee Sioux Nation, Nebraska; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Spirit Lake Tribe; Standing Rock Sioux Tribe; Upper Sioux Community, Minnesota; and the Yankton Sioux Tribe that this notice has been published.

Notice of Extension of Concession Contracts

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: The National Park Service hereby gives public notice that it proposes to extend the expiring concession contract listed below for 1 year or until the effective date of a new contract, whichever occurs sooner.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Brian Borda, Program Chief, Commercial Services Program, National Park Service, 1201 Eye Street NW., 11th Floor, Washington, DC 20005, Telephone: 202–513–7156.

SUPPLEMENTARY INFORMATION: The following concession contract will expire by its term on or before December 31, 2016. The National Park Service has determined the proposed extensions is necessary to avoid interruption of visitor services and has taken all reasonable and appropriate steps to consider alternatives to avoid such interruption. The publication of this notice merely reflects the intent of the National Park Service and does not bind the National Park Service to extend the contract listed below.

The National Park Service authorizes extension of visitor services for the following contract under the terms and conditions of the current contract (as amended if applicable). The extension of operations does not affect any rights with respect to selection for award of a new concession contract.

Notice of Inventory Completion: Thomas Burke Memorial Washington State Museum, University of Washington, Seattle, WA; Correction

AGENCY: National Park Service, Interior.

ACTION: Notice; correction.

SUMMARY: The Thomas Burke Memorial Washington State Museum, University of Washington (Burke Museum) has corrected an inventory of human remains and associated funerary objects, published in a Notice of Inventory Completion in the **Federal Register** on January 19, 2016. This notice corrects the total number of associated funerary objects and the transfer of control determination. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request to the Burke Museum. If no additional requestors come forward, transfer of control of the human remains and associated funerary objects to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to the Burke Museum at the address in this notice by January 17, 2017.

ADDRESSES: Peter Lape, Burke Museum, University of Washington, Box 353010, Seattle, WA 98195, telephone (206) 685–3849 x2, email *plape@uw.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the correction of an inventory of human remains and associated funerary objects under the control of the Burke Museum, Seattle, WA. The human remains and associated funerary objects were removed from Island County, WA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

This notice corrects the total number of associated funerary objects and to whom the Burke Museum will transfer control of the items published in a Notice of Inventory Completion in the **Federal Register** (81 FR 2901–2902, January 19, 2016). This notice also corrects the list of Indian tribes in the determination of Additional Requestors and Disposition. Transfer of control of the items in this correction notice has not occurred.

Correction

In the **Federal Register** (81 FR 2902, January 19, 2016), column 1, paragraph 3 is corrected by substituting the following sentence:

The 35 associated funerary objects are 2 lots of unmodified wood; 2 lots of wood grave stakes; 2 metal objects; 1 pair of scissors; 1 black plastic comb; 2 shells; 1 modified bone fragment; 1 lot of unmodified bone fragment; 1 stone abrader; 1 .22 caliber gun; 3 bags of buttons (glass, porcelain, bone, copper); 8 U.S. coins; 1 porcelain doll head; 1 bag containing metal buckle fragments; 1 lot of marbles; 1 stone ulu; and 6 composite artifact bags containing wood, nails, charcoal, pebbles, metal, leather, watch faces, a watch chain, and organic and inorganic materials.

In the **Federal Register** (81 FR 2902, January 19, 2016), column 1, paragraph 5 is corrected by replacing the number ''35'' with the number ''36.''

In the **Federal Register** (81 FR 2902, January 19, 2016), column 1, paragraph 6, sentence 2, under the heading ''Additional Requestors and Disposition'' is corrected by substituting the following sentence:

After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to the Stillaguamish Tribe of Indians of Washington (previously listed as the Stillaguamish Tribe of Washington); Swinomish Indian Tribal Community (previously listed as the Swinomish Indians of the Swinomish Reservation of Washington); and the Tulalip Tribes of Washington (previously listed as the Tulalip Tribes of the Tulalip Reservation, Washington) may proceed.

The Burke Museum is responsible for notifying the Lummi Tribe of the Lummi Reservation; Samish Indian Nation (previously listed as the Samish Indian Tribe, Washington); Sauk-Suiattle Indian Tribe; Stillaguamish Tribe of Indians of Washington (previously listed as the Stillaguamish Tribe of Washington); Swinomish Indian Tribal Community (previously listed as the Swinomish Indians of the Swinomish Reservation of Washington); Tulalip Tribes of Washington (previously listed as the Tulalip Tribes of the Tulalip Reservation, Washington); and the Upper Skagit Indian Tribe that this notice has been published.

Dated: November 17, 2016.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2016–0075; MMAA104000]

Atlantic Wind Lease Sale 6 for Commercial Leasing for Wind Power on the Outer Continental Shelf Offshore New York—Final Sale Notice; Correction

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice; correction.

SUMMARY: On Monday, October 31, 2016, the Bureau of Ocean Energy Management (BOEM) published the *Atlantic Wind Lease Sale 6 (ATLW–6) for Commercial Leasing for Wind Power on the Outer Continental Shelf Offshore New York—Final Sale Notice* (FSN) in the **Federal Register** (81 FR 75429). The FSN announced that BOEM will offer for lease an identified area offshore New York, and provided details regarding the terms of Lease OCS–A 0512 and the forthcoming auction. This Notice corrects a statement in the FSN describing the rental rate for the project easement associated with the lease, to ensure consistency with the rental rate for the project easement as specified in Addendum ''D'' to the lease.

DATES: This correction does not affect any of the dates or milestones provided in the FSN.

FOR FURTHER INFORMATION CONTACT: Wright Frank, New York Project Coordinator and Auction Manager, BOEM Office of Renewable Energy Programs, 45600 Woodland Road, VAM–OREP, Sterling, Virginia, 20166, (703) 787–1325 or *Wright.Frank@boem.gov.*

Technical Correction

The FSN at 81 FR 75433 incorrectly stated: ''Annual rent for a project easement is the greater of $5 per acre per year or $450 per year.'' In order to be consistent with the description of the rental rate for the project easement associated with Lease OCS–A 0512, as discussed in Addendum ''D'' to the lease, the above sentence is replaced by the following language from Addendum D:

Correction

In the **Federal Register** of October 31, 2016, in FR Doc. 16–26240, on page 75433, in the third column, correct the last sentence before the heading ''Operating Fee'' to read: ''Annual rent for a project easement 200 feet wide, centered on the transmission cable, is $70.00 per statute mile. For any additional acreage required, the lessee must also pay the greater of $5.00 per acre per year or $450.00 per year.''

Dated: December 13, 2016.

Abigail Ross Hopper,

Director, Bureau of Ocean Energy Management.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–972]

Certain Automated Teller Machines, ATM Products, Components Thereof, and Products Containing the Same; Notice of Request for Statements on the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the presiding administrative law judge (''ALJ'') has issued a recommended determination on remedy and bonding in the above-captioned investigation. The Commission is soliciting submissions from the public on any public interest issues raised by the recommended relief. The ALJ recommended that a limited exclusion order issue against certain automated teller machines, ATM products, components thereof, and products containing the same, imported by respondents Nautilus Hyosung Inc. of Seoul, South Korea; Nautilus Hyosung America Inc. of Irving, Texas; and HS Global, Inc. of Brea, California (collectively, ''Nautilus''). The ALJ also recommended that cease and desist orders be directed to Nautilus. Parties are to file public interest submissions pursuant to 19 CFR 210.50(a)(4).

FOR FURTHER INFORMATION CONTACT: Sidney A. Rosenzweig, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–2532. Copies of non-confidential documents filed in connection with this investigation, including the complaint and the public record, can be accessed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov,* and are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server

(*https://www.usitc.gov*). Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 provides that if the Commission finds a violation it shall exclude the articles concerned from the United States:

unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry.

19 U.S.C. 1337(d)(1). A similar provision applies to cease-and-desist orders. 19 U.S.C. 1337(f)(1).

The Commission is interested in further development of the record on the public interest in these investigations. Accordingly, members of the public are invited to file, pursuant to 19 CFR 210.50(a)(4), submissions of no more than five (5) pages, inclusive of attachments, concerning the public interest in light of the administrative law judge's recommended determination on remedy and bonding issued in this investigation on November 30, 2016. Comments should address whether issuance of the limited exclusion order and the cease and desist orders (''the recommended remedial orders'') in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the recommended remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the recommended remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the recommended remedial orders within a commercially reasonable time; and

(v) explain how the recommended remedial orders would impact consumers in the United States.

Written submissions must be filed no later than by close of business on January 5, 2017.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 972'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary ((202) 205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes (all contract personnel will sign appropriate nondisclosure agreements). All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 13, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–550 and 731–TA–1304–1305 (Final)]

Certain Iron Mechanical Transfer Drive Components From Canada and China; Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded by reason of imports of certain iron mechanical transfer drive components from Canada and China, provided for in subheadings 8483.30.80, 8483.50.60, 8483.50.90, 8483.90.30, and 8483.90.80 of the Harmonized Tariff Schedule of the United States,[2] that have been found by the Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV''), and that have been found by Commerce to be subsidized by the government of China.[3]

Background

The Commission, pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)), instituted these investigations effective October 28, 2015, following receipt of petitions filed with the Commission and Commerce by TB Wood's Incorporated, Chambersburg, Pennsylvania. The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce that imports of certain iron mechanical transfer drive components from China were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and imports of certain iron mechanical transfer drive components from Canada and China were dumped within the meaning of 733(b) of the Act

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] Covered merchandise may also enter under the following HTSUS subheadings: 7325.10.00, 7325.99.10, 7326.19.00, 8431.31.00, 8431.39.00, and 8483.50.40.

[3] All six Commissioners voted in the negative.

(19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 24, 2016 (81 FR 41348). The hearing was held in Washington, DC, on October 18, 2016, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on December 12, 2016. The views of the Commission are contained in USITC Publication 4652 (December 2016), entitled *Certain Iron Mechanical Transfer Drive Components from Canada and China: Investigation Nos. 701–TA–550 and 731–TA–1304–1305 (Final).*

By order of the Commission.

Issued: December 12, 2016.

Lisa R. Barton,

Secretary to the Commission.

Circular Welded Carbon-Quality Steel Pipe From Oman, Pakistan, the United Arab Emirates, and Vietnam; Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of circular welded carbon-quality steel pipe (''CWP'') from Oman, Pakistan, and the United Arab Emirates provided for in subheadings 7306.19.10, 7306.19.51, 7306.30.10, 7306.30.50, 7306.50.10, and 7306.50.50 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV'').[2] The Commission further determines that imports of CWP from Vietnam that have been found by Commerce to be sold in the United States at LTFV and imports of CWP from Pakistan that are subsidized by the government of Pakistan are negligible pursuant to section 771(24) of the Act (19 U.S.C. 1677(24)), and its investigations with regard to these imports are thereby terminated pursuant to sections 705(b) and 735(b) of the Act.

Background

The Commission, pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)), instituted these investigations effective October 28, 2015, following receipt of a petition filed with the Commission and Commerce by Bull Moose Tube Company (Chesterfield, Missouri), EXLTUBE (N. Kansas City, Missouri), Wheatland Tube (Chicago, Illinois), and Western Tube and Conduit (Long Beach, California). The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce regarding the subsidization of imports of CWP from Pakistan within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and sales at LTFV of imports of CWP from Oman, Pakistan, the United Arab Emirates, and Vietnam within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 27, 2016 (81 FR 41592). The hearing was held in Washington, DC, on October 13, 2016, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on December 12, 2016. The views of the Commission are contained in USITC Publication 4651 (December 2016), entitled *Circular Welded Carbon-Quality Steel Pipe from Oman, Pakistan, the United Arab Emirates, and Vietnam: Investigation Nos. 701–TA–549 and 731–TA–1299–1300 and 1302–1303 (Final).*

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–847 and 849 (Third Review)]

Carbon and Alloy Seamless Standard, Line, and Pressure Pipe From Japan and Romania Institution of Five-Year Reviews; Notice of Commission Determination To Conduct Full Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it will proceed with full reviews pursuant to the Tariff Act of 1930 to determine whether revocation of the antidumping duty orders on carbon and alloy seamless standard, line, and pressure pipe from Japan and Romania would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. A schedule for the reviews will be established and announced at a later date.

DATES: Effective December 5, 2016.

FOR FURTHER INFORMATION CONTACT: Justin Enck (202–205–3363), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these reviews may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

For further information concerning the conduct of these reviews and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

SUPPLEMENTARY INFORMATION: On December 5, 2016, the Commission

determined that it should proceed to full reviews in the subject five-year reviews pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). With respect to the order on subject merchandise from Romania, the Commission found that both the domestic and respondent interested party group responses to its notice of institution (81 FR 60383, September 1, 2016) were adequate and determined to proceed to a full review. With respect to the order on subject merchandise from Japan, the Commission found that the domestic interested party group response was adequate and the respondent interested party group was inadequate, but that circumstances warranted conducting a full review. A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements will be available from the Office of the Secretary and at the Commission's Web site.

Authority: These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: December 12, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of a Virtual Public Meeting of the Advisory Committee on Apprenticeship (ACA)

AGENCY: Employment and Training Administration (ETA), Labor.

ACTION: Notice of a virtual public meeting.

SUMMARY: Pursuant to Section 10 of the Federal Advisory Committee Act (FACA), notice is hereby given to announce an open meeting of the Advisory Committee on Apprenticeship (ACA) on Wednesday, January 18, 2017. All meetings of the ACA are open to the public.

DATES: The meeting will begin at approximately 1:00 p.m. Eastern Standard Time on Wednesday, January 18, 2017, at *https://dol.webex.com/dol,* and adjourn at approximately 4:30 p.m. Any updates to the agenda and meeting logistics will be posted on the Office of Apprenticeship's homepage: *http://www.dol.gov/apprenticeship*.

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer, Mr. Daniel Villao, Deputy Administrator for National Office Policy, Office of Apprenticeship, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room C–5321, Washington, DC 20210, Telephone: (202) 693–2796 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The ACA is a discretionary committee established by the Secretary of Labor, in accordance with FACA (5 U.S.C. App. 2 § 10), as amended in 5 U.S.C. App. 2, and its implementing regulations (41 CFR 101–6 and 102–3). In order to promote openness, and increase public participation, webinar and audio conference technology will be used to convene the meeting. Webinar and audio instructions will be posted prominently on the Office of Apprenticeship homepage: *http://www.dol.gov/apprenticeship*.

Notice of Intent To Attend the Meeting

All meeting participants are being asked to submit a notice of intent to attend by Wednesday, January 11, 2017, via email to Mr. Daniel Villao at: *oa.administrator@dol.gov,* with the subject line ''January 2017 ACA Meeting.''

1. If individuals have special needs and/or disabilities that will require special accommodations, please contact Kenya Huckaby on (202) 693–3795 or via email at *huckaby.kenya@dol.gov* no later than Wednesday, January 11, 2017.

2. Any member of the public who wishes to file written data or comments pertaining to the agenda may do so by sending the data or comments to Mr. Daniel Villao via email at *oa.administrator@dol.gov,* subject line ''January 2017 ACA Meeting,'' or to the Office of Apprenticeship, Employment and Training Administration, U.S. Department of Labor, Room C–5321, 200 Constitution Avenue NW., Washington, DC 20210. Such submissions will be included in the record for the meeting if received by Wednesday, January 11, 2017.

3. See below regarding members of the public wishing to speak at the ACA meeting.

Purpose of the Meeting and Topics To Be Discussed

The purpose of the January meeting is to focus on expanding opportunities for youth and discuss priority issues for apprenticeship in the upcoming year.

The Agenda Will Cover the Following Topics

- Expanding Registered Apprenticeship Opportunities for Youth
- Priority Issues for the Upcoming Year
- Recommendations on Continued Apprenticeship Expansion
- Other Matters of Interest to the Apprenticeship Community
- Public Comment
- Adjourn

The agenda and meeting logistics may be updated should priority items come before the ACA between the time of this publication and the scheduled date of the ACA meeting. All meeting updates will be posted to the Office of Apprenticeship's homepage: *http://www.dol.gov/apprenticeship*. Any member of the public who wishes to speak at the meeting should indicate the nature of the intended presentation and the amount of time needed by furnishing a written statement to the Designated Federal Officer, Mr. Daniel Villao, by Wednesday, January 11, 2017. The Chairperson will announce at the beginning of the meeting the extent to which time will permit the granting of such requests.

Portia Wu,

Assistant Secretary for the Employment and Training Administration.

[FR Doc. 2016–30205 Filed 12–15–16; 8:45 am]

BILLING CODE 4510–FR–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Joint Quarterly Narrative Progress Report Template

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), ETA is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, ''Joint Quarterly Narrative Progress Report Template.'' This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.*

DATES: Consideration will be given to all written comments received by February 14, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of

response, and estimated total burden may be obtained free by contacting Jenn Smith by telephone at (202) 693–3597, TTY 1–877–889–5627, (these are not toll-free numbers) or by email at *smith.jenn@dol.gov*.

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Division of Youth Services, Room N–4508, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; by email: *smith.jenn@dol.gov;* or by Fax 202–693–3861.

FOR FURTHER INFORMATION CONTACT: Jenn Smith by telephone at (202) 693–3597 (this is not a toll-free number) or by email at *smith.jenn@dol.gov*.

SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The Workforce Innovation and Opportunity Act (29 U.S.C. 3101) authorizes this information collection. President Barack Obama signed the Workforce Innovation and Opportunity Act (WIOA) into law on July 22, 2014. One of the many goals of WIOA is to develop more consistent instruments for collecting data related to the Department's job training programs. The Joint Quarterly Narrative Progress Report Template consolidates various instruments to collect qualitative data generated by several programs legislatively mandated by WIOA, as well as additional job training programs that are adopting the performance reporting provisions of WIOA to promote alignment across the workforce system. Qualitative data include a particular grantee's progress and milestones during a grant's period of performance and follow-up period, challenges to meeting a grant's expected outcomes, and tracking of grant management and performance indicators during the life of the grant.

The National Farmworkers Job Program and YouthBuild grants are authorized under the Workforce Innovation and Opportunity Act of 2014 (WIOA), which identified performance accountability requirements for these grants. The WIOA performance indicators and reporting requirements also apply to the Dislocated Worker Grants program. While H–1B and Reentry Employment Opportunities grants are not authorized under WIOA, these programs are also adopting the WIOA performance indicators and align with WIOA data element definitions and reporting templates to promote consistency across these DOL-funded programs. For this same reason, the Senior Community Service Employment Program, authorized under the Older Americans Act, as amended, is also adopting this Joint Quarterly Narrative Performance Report.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB Number 1205–0NEW.

Submitted comments will also be a matter of public record for this ICR and posted on the Internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Type of Review: NEW.

Title of Collection: Joint Quarterly Narrative Progress Report Template.

Form: Quarterly Narrative Progress Report Template.

OMB Control Number: OMB 1205–0NEW.

Affected Public: State/local/tribal governments, Federal government, private sector (not-for-profit institutions).

Estimated Number of Respondents: 792.

Frequency: Quarterly.

Total Estimated Annual Responses: 3,008.

Estimated Average Time per Response: 10 hours.

Estimated Total Annual Burden Hours: 30,080 hours.

Total Estimated Annual Other Cost Burden: $480,076.80.

Authority: 44 U.S.C. 3506(c)(2)(A).

Portia Wu,

Assistant Secretary for Employment and Training, Labor.

[FR Doc. 2016–30204 Filed 12–15–16; 8:45 am]

BILLING CODE 4510–FN–P 4510–FT–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2016–0022]

Bay Area Compliance Laboratories Corp.: Application for Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of Bay Area Compliance Laboratories Corp. for recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the Agency's preliminary finding to grant this recognition.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before January 17, 2017.

ADDRESSES: Submit comments by any of the following methods:

1. *Electronically:* Submit comments and attachments electronically at

http://www.regulations.gov, which is the Federal eRulemaking Portal. Follow the instructions online for making electronic submissions.

2. *Facsimile:* If submissions, including attachments, are not longer than 10 pages, commenters may fax them to the OSHA Docket Office at (202) 693–1648.

3. *Regular or express mail, hand delivery, or messenger (courier) service:* Submit comments, requests, and any attachments to the OSHA Docket Office, Docket No. OSHA–2016–0022, Technical Data Center, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3653, Washington, DC 20210; telephone: (202) 693–2350 (TTY number: (877) 889–5627). Note that security procedures may result in significant delays in receiving comments and other written materials by regular mail. Contact the OSHA Docket Office for information about security procedures concerning delivery of materials by express mail, hand delivery, or messenger service. The hours of operation for the OSHA Docket Office are 10:00 a.m.–3:00 p.m., e.t.

4. *Instructions:* All submissions must include the Agency name and the OSHA docket number (OSHA–2016–0022). OSHA places comments and other materials, including any personal information, in the public docket without revision, and these materials will be available online at *http://www.regulations.gov.* Therefore, the Agency cautions commenters about submitting statements they do not want made available to the public, or submitting comments that contain personal information (either about themselves or others) such as Social Security numbers, birth dates, and medical data.

5. *Docket:* To read or download submissions or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket are listed in the *http://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the Web site. All submissions, including copyrighted material, are available for inspection at the OSHA Docket Office. Contact the OSHA Docket Office for assistance in locating docket submissions.

6. *Extension of comment period:* Submit requests for an extension of the comment period on or before January 17, 2017 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3655, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3647, Washington, DC 20210; telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3655, Washington, DC 20210; phone: (202) 693–2110 or email: *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Many of OSHA's workplace standards require that an NRTL test and certify certain types of equipment as safe for use in the workplace. NRTLs are independent laboratories that meet OSHA's requirements for performing safety testing and certification of products used in the workplace. To obtain and retain OSHA recognition, NRTLs must meet the requirements in the NRTL Program regulations at 29 CFR 1910.7. More specifically, to be recognized by OSHA, an organization must: (1) Have the appropriate capability to test, evaluate, and approve products to assure their safe use in the workplace; (2) be completely independent of employers subject to the tested equipment requirements, and manufacturers and vendors of products for which OSHA requires certification; (3) have internal programs that ensure proper control of the testing and certification process; and (4) have effective reporting and complaint handling procedures. Recognition is an acknowledgement by OSHA that the NRTL has the capabilities to perform independent safety testing and certification of the specific products covered within the NRTL's scope of recognition, and is not a delegation or grant of government authority. Recognition of an NRTL by OSHA also allows employers to use products certified by that NRTL to meet those OSHA standards that require product testing and certification.

The Agency processes applications for initial recognition following requirements in Appendix A of 29 CFR 1910.7. This appendix requires OSHA to publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application, provides its preliminary finding, and solicits comments on its preliminary findings. In the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition.

II. Notice of the Application for Recognition

OSHA is providing notice that Bay Area Compliance Laboratories Corp. (BACL) is applying for recognition as an NRTL. According to its application, BACL was incorporated in 1996 to provide product compliance testing services to customers in the areas of Product Safety, Electromagnetic Compatibility and Telecommunications, testing for Emissions, Immunity, Radio, Radio Frequency (RF) Exposure and Telecommunications. The non-profit, third-party, non-governmental accreditation body A2LA accredited BACL for UL 60950–1, the standard for which BACL requests NRTL recognition. In its application, BACL lists the current address of its headquarters as: Bay Area Compliance Laboratories Corp., 1274 Anvilwood Avenue, Sunnyvale, California 94089.

OSHA recognizes each NRTL for a scope of recognition that includes the type of products the NRTL may test, with each type specified by its applicable test standard, and the recognized site(s) that have the technical capability to perform the product-testing and product-certification activities for the applicable test standards within the NRTL's scope of recognition. BACL applied for initial recognition as an NRTL on May 1, 2015, and revised its application on May 12, 2016. In its application and subsequent revision, BACL requested recognition for one test standard and one site (OSHA–2016–0022–0001 and 0002). The following sections set forth the requested scope of recognition included in BACL's application.

A. Standards Requested for Recognition

Table 1 below lists the appropriate test standard found in BACL's application for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARD FOR INCLUSION IN BACL'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 60950–1	Information Technology Equipment-Safety-Part 1: General Requirement.

The test standard listed above may be approved as a U.S. test standard by the American National Standards Institute (ANSI). However, for convenience, the Agency may use the designation of the standards-developing organization for the test standard instead of the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 1–0.3, Appendix C, paragraph XIV), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard.

B. Sites Requested for Recognition

The current address of BACL's site included in its application for recognition as an NRTL is:

1. Bay Area Compliance Laboratories Corp., 1274 Anvilwood Avenue, Sunnyvale, California 94089.

The NRTL Program requires that the recognized site listed above has the capability to conduct the product testing in accordance with the appropriate test standard for the equipment or material being tested and certified.

III. Preliminary Finding on the Application for Recognition as an NRTL

OSHA's NRTL Program recognition process involves a thorough analysis of an NRTL applicant's policies and procedures, and a comprehensive on-site review of the applicant's testing and certification activities to ensure that the applicant meets the requirements of 29 CFR 1910.7. OSHA staff performed a detailed analysis of BACL's application packet and reviewed other pertinent information. OSHA staff also performed a comprehensive on-site assessment of BACL's testing facility, located at 1274 Anvilwood Avenue, Sunnyvale, California 94089, on May 9–11, 2016. An overview of OSHA's assessment of the four requirements for recognition (*i.e.,* capability, control procedures, independence, and creditable reports and complaint handling) is provided below.

A. Capability

Section 1910.7(b)(1) states that, for each specified item of equipment or material to be listed, labeled, or accepted, the NRTL must have the capability (including proper testing equipment and facilities, trained staff, written testing procedures, and calibration and quality-control programs) to perform appropriate testing. OSHA staff performed a detailed analysis of BACL's application packet and reviewed other pertinent information to assess its capabilities to perform test and certification activities. OSHA determined that BACL has demonstrated these capabilities through the following:

- The BACL facility has adequate test areas, energy sources, and procedures for controlling incompatible activities.
- BACL provided a detailed list of its testing equipment. Review of the application shows that the equipment listed is available and adequate for the standards for which it seeks recognition.
- BACL has detailed procedures for conducting testing, review, and evaluation, and for capturing the test and other data required by the test standards for which it seeks recognition.
- BACL has detailed procedures addressing the maintenance and calibration of equipment, and the types of records maintained for, or supporting laboratory activities.
- BACL has sufficient qualified personnel to perform the proposed scope of testing based on their education, training, technical knowledge, and experience.
- BACL has an adequate quality-control system in place to conduct internal audits, as well as track and resolve nonconformances.

OSHA's on-site assessment of BACL's facility confirmed the capabilities described in its application packet.

B. Control Procedures

Section 1910.7(b)(2) requires that the NRTL provide controls and services, to the extent necessary, for the particular equipment or material to be listed, labeled, or accepted. These controls and services include procedures for identifying the listed or labeled equipment or materials, inspections of production runs at factories to assure conformance with test standards, and field inspections to monitor and assure the proper use of identifying marks or labels. OSHA staff performed a detailed analysis of BACL's application packet and reviewed other pertinent information to assess its control procedures. OSHA determined that BACL has demonstrated these control procedures through the following:

- BACL has a quality-control manual and detailed procedures to address the steps involved to list and certify products.
- BACL has a registered certification mark.
- BACL has certification procedures to address the authorization of certifications and audits of factory facilities. The audits apply to both the initial evaluations and the follow-up inspections of manufacturers' facilities.

OSHA's on-site assessment of BACL's facility confirmed the control procedures described in its application packet.

C. Independence

Section 1910.7(b)(3) requires that the NRTL be completely independent of employers that are subject to the testing requirements, and of any manufacturers or vendors of equipment or materials tested under the NRTL Program. OSHA has a policy for the independence of NRTLs that specifies the criteria used for determining whether an organization meets the above requirement (see OSHA Instruction CPL 1–0.3, Appendix C, paragraph V). This policy contains a non-exhaustive list of relationships that would cause an organization to fail to meet the specified criteria. OSHA staff performed a detailed analysis of BACL's application packet and reviewed other pertinent information to assess its independence. OSHA determined that BACL has demonstrated independence through the following:

- BACL is a privately-owned organization, and OSHA found no information regarding ownership that would qualify as a conflict under OSHA's independence policy.
- BACL shows that it has none of the relationships described above or any other relationship that could subject it to undue influence when testing for product safety.

D. Credible Reports and Complaint Handling

Section 1910.7(b)(4) specifies that a NRTL must maintain effective procedures for producing credible findings and reports that are objective and free of bias. The NRTL must also have procedures for handling complaints and disputes under a fair and reasonable system. OSHA staff performed a detailed analysis of BACL's application packet and reviewed other pertinent information to assess its ability to produce credible results and handle complaints. OSHA determined that BACL has demonstrated these capabilities through the following.

- BACL has detailed procedures describing the content of the test reports, and other detailed procedures

describing the preparation and approval of these reports.

• BACL has procedures for recording, analyzing, and processing complaints from users, manufacturers, and other parties in a fair manner.

OSHA's on-site assessment of BACL's facility confirmed the credible reports and complaint handling described in its application packet.

OSHA's review of the application file and pertinent documentation, as well as the results of the on-site assessment, indicate that BACL can meet the requirements prescribed by 29 CFR 1910.7 for recognition as a Nationally Recognized Testing Laboratory for its site located in Sunnyvale, California. The OSHA staff, therefore, preliminarily recommended that the Assistant Secretary approve the application. This preliminary finding does not constitute an interim or temporary approval of BACL's application.

OSHA welcomes public comment as to whether BACL meets the requirements of 29 CFR 1910.7 for recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Room N–3653, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. These materials also are available online at *http://www.regulations.gov* under Docket No. OSHA–2016–0022.

OSHA staff will review all comments submitted to the docket in a timely manner and, after addressing the issues raised by these comments, will recommend to the Assistant Secretary whether to grant BACL's application for recognition as an NRTL. The Assistant Secretary will make the final decision on granting the application. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of this final decision in the **Federal Register.**

Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW., Washington, DC 20210, authorized the preparation of this notice. Accordingly, the Agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012), and 29 CFR 1910.7.

Signed at Washington, DC, on December 12, 2016.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2016–30288 Filed 12–15–16; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0039]

Intertek Testing Services NA, Inc.: Grant of Expansion of Recognition and Modification to the NRTL Program's List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces its final decision to expand the scope of recognition for Intertek Testing Services NA, Inc. as a Nationally Recognized Testing Laboratory (NRTL).

DATES: The expansion of the scope of recognition becomes effective on December 16, 2016.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3647, Washington, DC 20210; telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3655, Washington, DC 20210; telephone: (202) 693–2110; email: *robinson.kevin@dol.gov.* OSHA's Web page includes information about the NRTL Program (see *http://www.osha.gov/dts/otpca/nrtl/index.html*).

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of Intertek Testing Services NA, Inc. (ITSNA), as an NRTL. ITSNA's expansion covers the addition of twenty-eight (28) test standards to its scope of recognition.

OSHA recognition of an NRTL signifies that the organization meets the requirements specified by 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition, and is not a delegation or grant of government authority. As a result of recognition, employers may use products properly approved by the NRTL to meet OSHA standards that require testing and certification of the products.

The Agency processes applications by an NRTL for initial recognition, or for expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding and, in the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational Web page for each NRTL that details its scope of recognition. These pages are available from the Agency's Web site at *http://www.osha.gov/dts/otpca/nrtl/index.html.*

ITSNA submitted an application, received by OSHA on June 3, 2015, (OSHA–2007–0039–0020) to expand its recognition to include thirty (30) additional test standards. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information and determined that OSHA should grant the application to expand ITSNA's recognition to include 28 of the 30 requested standards. OSHA did not perform any on-site reviews in relation to this application.

OSHA published the preliminary notice announcing ITSNA's expansion application in the **Federal Register** on September 14, 2016 (81 FR 63229). The Agency requested comments by September 29, 2016, but it received no comments in response to this notice. OSHA now is proceeding with this final notice to grant expansion of ITSNA's scope of recognition.

To obtain or review copies of all public documents pertaining to ITSNA's application, go to *www.regulations.gov* or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–2625, Washington, DC 20210. Docket No. OSHA–2007–0039 contains all materials in the record concerning ITSNA's recognition.

II. Final Decision and Order

OSHA staff examined ITSNA's expansion application, its capability to meet the requirements of the test standards, and other pertinent information. Based on its review of this evidence, OSHA finds that ITSNA meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the conditions listed below. OSHA, therefore, is proceeding with this final notice to grant ITSNA's scope of recognition. OSHA limits the expansion of ITSNA's recognition to testing and certification of products for demonstration of conformance to the test standards listed in Table 1 below.

Additionally, Table 2, below, lists the test standard new to the NRTL Program's List of Appropriate Test Standards. The Agency evaluated the standard to (1) verify it represents a product category for which OSHA requires certification by an NRTL, (2) verify the document represents end products and not components, and (3) verify the document defines safety test specifications (not installation or operational performance specifications). Based on this evaluation, OSHA finds that it is an appropriate test standard and will add it to the NRTL Program's List of Appropriate Test Standards.

TABLE 1—LIST OF APPROPRIATE TEST STANDARDS FOR INCLUSION IN ITSNA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
ISA 60079–0	Explosive Atmospheres—Part 0: Equipment—General Requirements.
UL 60079–0	Explosive Atmospheres—Part 0: Equipment—General Requirements.
ISA 61241–0	Electrical Apparatus for Use in Zone 20, Zone 21, and Zone 22 Hazardous (Classified) Locations—General Requirements.
ISA 60079–1	Explosive Atmospheres—Part 1: Equipment Protection by Flameproof Enclosures ''d''.
UL 60079–1	Explosive Atmospheres—Part 1: Equipment Protection by Flameproof Enclosures ''d''.
ISA 60079–2	Explosive Atmospheres—Part 2: Equipment Protection by Pressurized Enclosures ''p''.
UL 60079–2	Explosive Atmospheres—Part 2: Equipment Protection by Pressurized Enclosures ''p''.
NFPA 496	Purged and Pressurized Enclosures for Electrical Equipment.
ISA 61241–2	Electrical Apparatus for Use in Zone 21 and Zone 22 Hazardous (Classified) Locations—Protection by Pressurization ''pD''.
ISA 60079–5	Explosive Atmospheres—Part 5: Equipment Protection by Powder Filling ''q''.
UL 60079–5	Explosive Atmospheres—Part 5: Equipment Protection by Powder Filling ''q''.
ISA 60079–6	Explosive Atmospheres—Part 6: Equipment Protection by Liquid Immersion ''o''.
UL 60079–6	Explosive Atmospheres—Part 6: Equipment Protection by Liquid Immersion ''o''.
ISA 60079–7	Explosive Atmospheres—Part 7: Equipment Protection by Increased Safety ''e''.
UL 60079–7	Explosive Atmospheres—Part 7: Equipment Protection by Increased Safety ''e''.
ISA 60079–11	Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety ''i''.
UL 60079–11	Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety ''i''.
ISA 60079–25*	Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems.
ISA 60079–28	Explosive Atmospheres—Part 28: Protection of Equipment and Transmission Systems Using Optical Radiation, Edition 1.1.
ISA 61241–11	Electrical Apparatus for Use in Zone 20, Zone 21, and Zone 22 Hazardous (Classified) Locations—Protection by Intrinsic Safety ''iD''.
ISA 60079–15	Explosive Atmospheres—Part 15: Equipment Protection by Type of Protection ''n'' (Edition 4).
UL 60079–15	Explosive Atmospheres—Part 15: Equipment Protection by Type of Protection ''n''.
ISA 60079–18	Explosive Atmospheres—Part 18: Equipment Protection by Encapsulation ''m''.
UL 60079–18	Explosive Atmospheres—Part 18: Equipment Protection by Encapsulation ''m''.
ISA 61241–18	Electrical Apparatus for Use in Zone 20, Zone 21, and Zone 22 Hazardous (Classified) Locations—Protection by Encapsulation ''mD''.
ISA 60079–26	Explosive Atmospheres—Part 26: Equipment for Use in Class I, Zone 0 Hazardous (Classified) Locations.
ISA 60079–31	Explosive Atmospheres—Part 31: Equipment Dust Ignition Protection by Enclosure ''t''.
ISA 61241–1	Electrical Apparatus for Use in Zone 21 and Zone 22 Hazardous (Classified) Locations—Protection by Enclosures ''tD''.

* Represents a new test standard to the NRTL Program's List of Appropriate Test Standards.

TABLE 2—TEST STANDARD OSHA IS ADDING TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 60079–25	Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems.

OSHA's recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, an NRTL's scope of recognition does not include these products.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 1–0.3, Appendix C, paragraph XIV), any NRTL recognized

for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, ITSNA must abide by the following conditions of the recognition:

1. ITSNA must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as an NRTL, and provide details of the change(s);

2. ITSNA must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. ITSNA must continue to meet the requirements for recognition, including all previously published conditions on ITSNA's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of ITSNA, subject to the limitation and conditions specified above.

III. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW., Washington, DC 20210, authorized the preparation of this notice. Accordingly, the Agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012), and 29 CFR 1910.7.

Signed at Washington, DC, on December 12, 2016.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Notice of Information Collection

AGENCY: National Aeronautics and Space Administration (NASA).

Notice: (16–085).

ACTION: Notice of information collection renewal, with change.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. 3506(c)(2)(A)).

DATES: All comments should be submitted within 60 calendar days from the date of this publication.

ADDRESSES: All comments should be addressed to Frances Teel, National Aeronautics and Space Administration, Washington, DC 20546–0001.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Frances Teel, NASA PRA Officer, NASA Headquarters, 300 E Street SW., JF0000, Washington, DC 20546, (202) 358–2225.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Aeronautics and Space Administration seeks to collect information from members of the public to plan, conduct, and register participants and volunteers for the NASA Human Exploration Rover Challenge, which supports science, technology, engineering, or mathematics (STEM) education. This engineering design challenge focuses on NASA's current plans to explore planets, moons, asteroids, and comets—all members of the solar system family. The challenge will focus on designing, constructing and testing technologies for mobility devices to perform in these different environments, and it will provide valuable experiences that engage students in the technologies and concepts that will be needed in future exploration missions. NASA collects the minimum information necessary from teams, participants, and volunteers to plan and conduct the event.

II. Method of Collection

Electronic and Fillable PDF.

III. Data

Title: NASA Human Exploration Rover Challenge.

OMB Number: 2700–0157.

Type of Review: Renewal, with change, of a currently approved information collection.

Affected Public: Individuals.

Estimated Number of Respondents: 960.

Estimated Total Annual Burden Hours: 78.

Estimated Total Annual Cost: $7,425.00.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Frances Teel,

NASA PRA Clearance Officer.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0158]

Program-Specific Guidance About Possession Licenses for Production of Radioactive Material Using an Accelerator

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft NUREG; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is revising its licensing guidance for possession licenses for the production of radioactive material using an accelerator. The NRC is requesting public comment on draft NUREG–1556, Volume 21, Revision 1, ''Consolidated Guidance About Materials Licenses: Program-Specific Guidance about Possession Licenses for Production of Radioactive Material Using an Accelerator.'' The document has been updated from the original version to include information on safety culture and changes in regulatory policies and practices. This document is intended for use by applicants, licensees, and the NRC staff.

DATES: Submit comments by January 20, 2017. Comments received after this date will be considered if it is practicable to do so, but the NRC is only able to assure consideration of comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0158. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H8, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Robert MacDougall, Office of Nuclear Material Safety and Safeguards; U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5175; email: *Robert.MacDougall@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0158 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this action by the following methods:

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0158.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737 or by email to *pdr.resource@nrc.gov.* The draft NUREG–1556, Volume 21, Revision 1, is available in ADAMS under Accession No. ML16336A536.

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

The draft NUREG–1556, Volume 21, Revision 1, is also available on the NRC's public Web site on the: (1) ''Consolidated Guidance About Materials Licenses (NUREG–1556)'' page at *http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/;* and the (2) ''Draft NUREG-Series Publications for Comment'' page at *http://www.nrc.gov/public-involve/doc-comment.html#nuregs.*

B. Submitting Comments

Please include Docket ID NRC–2016–0158 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS, and the NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Further Information

This NUREG provides guidance to existing licensees that produce radioactive materials using an accelerator, and to applicants preparing license applications to possess such materials. This NUREG also provides NRC reviewers criteria for evaluating such a license application. The purpose of this notice is to provide the public an opportunity to review and comment on draft NUREG–1556, Volume 21, Revision 1, ''Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Possession Licenses for the Production of Radioactive Material Using an Accelerator.'' These comments will be considered in the final version or subsequent revisions.

Dated at Rockville, Maryland, this 9th day of December, 2016.

For the U.S. Nuclear Regulatory Commission.

Daniel S. Collins,

Director, Division of Material Safety, State, Tribal and Rulemaking Programs, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0001]

Sunshine Act Meeting Notice

DATE: December 14, 2016.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public.

Week of December 12, 2016

Thursday, December 15, 2016

9:25 a.m. Affirmation Session (Public Meeting) (Tentative)

1. Florida Power & Light Co. (Turkey Point Nuclear Generating Units 3 and 4), Intervenor's Appeal of LBP–16–8 (Tentative)

2. Duke Energy Carolinas, LLC (William States Lee III Nuclear Station, Units 1 and 2), Mandatory Hearing Decision (Tentative)

This meeting will be webcast live at the Web address—*http://www.nrc.gov/.*

* * * * *

Additional Information

By a vote of 3–0 on December 14, 2016, the Commission determined pursuant to U.S.C. 552b(e) and 9.107(a) of the Commission's rules that the item in the above referenced Affirmation Session be held with less than one week notice to the public. The meeting is scheduled on December 15, 2016.

* * * * *

The schedule for Commission meetings is subject to change on short notice. For more information or to verify the status of meetings, contact Denise McGovern at 301–415–0681 or via email at *Denise.McGovern@nrc.gov.*

* * * * *

The NRC Commission Meeting Schedule can be found on the Internet at: *http://www.nrc.gov/public-involve/public-meetings/schedule.html.*

* * * * *

The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings, or need this meeting notice or the transcript or other information from the

public meetings in another format (*e.g.,* braille, large print), please notify Kimberly Meyer, NRC Disability Program Manager, at 301–287–0739, by videophone at 240–428–3217, or by email at *Kimberly.Meyer-Chambers@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

* * * * *

Members of the public may request to receive this information electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555 (301–415–1969), or email *Brenda.Akstulewicz@nrc.gov* or *Patricia.Jimenez@nrc.gov.*

Dated: December 14, 2016.

Glenn Ellmers,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

OMB No. 3206–0144, More Information Needed for the Person Named Below, OPM Form RI 38–45

AGENCY: U.S. Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: The Retirement Services, Office of Personnel Management (OPM) offers the general public and other Federal agencies the opportunity to comment on a revision of a currently approved information collection request (ICR) OMB No. 3206–0144, More Information Needed for the Person Named, OPM Form RI 38–45. As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection.

DATES: Comments are encouraged and will be accepted until February 14, 2017. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the U.S. Office of Personnel Management, Retirement Services, 1900 E Street NW., Washington, DC 20415–0001, Attention: Alberta Butler, Room 2347–E, or sent by email to *Alberta.Butler@opm.gov.*

FOR FURTHER INFORMATION CONTACT: A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW., Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent by email to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of OPM, including whether the information will have Practical utility;

2. Evaluate the accuracy of OPM's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

RI 38–45 is used by the Civil Service Retirement System and the Federal Employees Retirement System to identify the records of individuals with similar or the same names. It is also needed to report payments to the Internal Revenue Service.

Analysis

Agency: Retirement Operations, Retirement Services, Office of Personnel Management.

Title: More Information Needed for the Person Named Below.

OMB Number: 3206–0144.

Frequency: On occasion.

Affected Public: Individual or Households.

Number of Respondents: 3,000.

Estimated Time per Respondent: 5 minutes.

Total Burden Hours: 250.

U.S. Office of Personnel Management.

Beth F. Cobert,

Acting Director.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing recent Postal Service filings for the Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 19, 2016 (Comment due date applies to Docket No. CP2015–82; Docket Nos. MC2017–35 and CP2017–60; Docket Nos. MC2017–36 and CP2017–61; Docket Nos. MC2017–37 and CP2017–62; Docket Nos. MC2017–38 and CP2017–63); December 20, 2016 (Comment due date applies to Docket Nos. MC2017–39 and CP2017–64; Docket Nos. MC2017–40 and CP2017–65; Docket Nos. MC2017–41 and CP2017–66; Docket Nos. MC2017–42 and CP2017–67; MC2017–43 and CP2017–68); and December 21, 2016 (Comment due date applies to Docket Nos. MC2017–44 and CP2017–69).

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market

dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's Web site (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2015–82; *Filing Title:* Notice of United States Postal Service of Change in Prices Pursuant to Amendment to Priority Mail Contract 125; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Nina Yeh; *Comments Due:* December 19, 2016.

2. *Docket No(s).:* MC2017–35 and CP2017–60; *Filing Title:* Request of the United States Postal Service to Add Priority Mail & First-Class Package Service Contract 38 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Kenneth R. Moeller; *Comments Due:* December 19, 2016.

3. *Docket No(s).:* MC2017–36 and CP2017–61; *Filing Title:* Request of the United States Postal Service to Add Priority Mail & First-Class Package Service Contract 39 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Kenneth R. Moeller; *Comments Due:* December 19, 2016.

4. *Docket No(s).:* MC2017–37 and CP2017–62; *Filing Title:* Request of the United States Postal Service to Add Priority Mail & First-Class Package Service Contract 40 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Kenneth R. Moeller; *Comments Due:* December 19, 2016.

5. *Docket No(s).:* MC2017–38 and CP2017–63; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Express & Priority Mail Contract 38 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Jennaca D. Upperman; *Comments Due:* December 19, 2016.

6. *Docket No(s).:* MC2017–39 and CP2017–64; *Filing Title:* Request of the United States Postal Service to Add First-Class Package Service Contract 68 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Curtis E. Kidd; *Comments Due:* December 20, 2016.

7. *Docket No(s).:* MC2017–40 and CP2017–65; *Filing Title:* Request of the United States Postal Service to Add First-Class Package Service Contract 69 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Curtis E. Kidd; *Comments Due:* December 20, 2016.

8. *Docket No(s).:* MC2017–41 and CP2017–66; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 266 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Gregory Stanton; *Comments Due:* December 20, 2016.

9. *Docket No(s).:* MC2017–42 and CP2017–67; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 267 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Gregory Stanton; *Comments Due:* December 20, 2016.

10. *Docket No(s).:* MC2017–43 and CP2017–68; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 268 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* December 9, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Erin Mahagan; *Comments Due:* December 20, 2016.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79527; File No. SR–IEX–2016–19]

Self-Regulatory Organizations: Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Require Listed Companies To Publicly Disclose Compensation or Other Payments by Third Parties to Any Nominee for Director or Sitting Director in Connection With Their Candidacy for or Service on the Companies' Board of Directors

December 12, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on December 5, 2016, the Investors Exchange LLC (''IEX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Securities Exchange Act of 1934 (''Act''),[4] and Rule 19b–4

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78s(b)(1).

thereunder,[5] Investors Exchange LLC (''IEX'' or ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to require listed companies to publicly disclose compensation or other payments by third parties to any nominee for director or sitting director in connection with their candidacy for or service on the companies' Board of Directors. The Exchange has designated this proposal as non-controversial and provided the Commission with the notice required by Rule 19b–4(f)(6)(iii) under the Act.[6]

The text of the proposed rule change is available at the Exchange's Web site at *www.iextrading.com*, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statement may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On June 17, 2016 the Commission granted IEX's application for registration as a national securities exchange under Section 6 of the Act including approval of rules applicable to the qualification, listing and delisting of companies on the Exchange. The Exchange plans to begin a listing program in 2017 and is proposing additional rules applicable to companies listing on the Exchange in this proposed rule change.

IEX rules require listed companies to make public disclosure in several areas. For example, a listed company is required to publicly disclose material information that would reasonably be expected to affect the value of its securities or influence investors' decisions as well as when non-independent directors serve on a committee that generally requires only independent directors, such as for a controlled company or under exceptional and limited circumstances.[7] A listed company is also required to file required periodic reports with the Commission.[8] A principal purpose of these disclosure requirements is to protect investors and ensure these investors have necessary information to make informed investment and voting decisions.

However, based on press reports and information from market participants, IEX understands there is one area where investors may not have complete or timely information. This is when third parties compensate directors in connection with their candidacy for and/or service on company Board of Directors. This third-party compensation, which may not be publicly disclosed, arises when a shareholder privately offers to compensate nominee directors in connection with those nominees' candidacy or service as directors. These arrangements vary but may include compensating directors based on achieving benchmarks such as an increase in share price over a fixed term.[9]

IEX believes these undisclosed compensation arrangements potentially raise several concerns, including that they may lead to conflicts of interest among directors and call into question the directors' ability to satisfy their fiduciary duties. These arrangements may also tend to promote a focus on short-term results at the expense of long-term value creation. IEX believes that enhancing transparency around third-party board compensation would help address these concerns and would benefit investors by making available information potentially relevant to investment and voting decisions. IEX further believes that the proposed disclosure would not create meaningful burdens on directors or those making these payments nor on the companies required to make the disclosure.[10]

Accordingly, IEX is proposing to adopt Rule 14.207(b)(3) to require listed companies to publicly disclose on or through the companies' Web site or proxy statement or information statement for any shareholders' meeting at which directors are elected (or, if they do not file proxy or information statements, in Form 10–K or Form 20–F),[11] the material terms of all agreements and arrangements between any director or nominee and any person or entity other than the company (the ''Third Party'') relating to compensation or other payment in connection with that person's candidacy or service as a director.[12] [13] A company may make this disclosure through its Web site by hyperlinking to another Web site, which must be continuously accessible. If that Web site subsequently becomes inaccessible or that hyperlink inoperable, the company must promptly restore it or make other disclosure in accordance with this proposed rule.

Consistent with other exemptions afforded certain types of companies, the Exchange is also proposing to amend Rule 14.407(a)(3) to provide that a foreign private issuer may follow home country practice in lieu of the requirements of the proposed rule. A Foreign Private Issuer may follow its home country practice in lieu of the requirements of Rule 14.207(b)(3) by utilizing the process described in Rule 14.407(a)(3), including but not limited to the requirement to submit to IEX a written statement from an independent counsel in such Company's home country certifying that the Company's practices are not prohibited by the home country's laws.

Companies listed at the time this proposed rule becomes effective or initially listed thereafter must disclose all agreements and arrangements in accordance with this proposed rule by no later than the date on which the Company files or furnishes a proxy or information statement subject to Regulation 14A or 14C under the Act in connection with the Company's next shareholders' meeting at which directors are elected (or, if they do not file proxy or information statements, no later than when the Company files next Form 10–K or Form 20–F). Thereafter, a listed company must make this disclosure at least annually until the earlier of the resignation of the director or one year following the termination of

[5] 17 CFR 240.19b–4.

[6] 17 CFR 240.19b–4(f)(6)(iii).

[7] *See* Rules 14.207(b)(1), 14.407(c)(2), 14.405(c)(2)(B), 14.405(d)(2)(B) and 14.405(e)(3).

[8] *See* Rule 14.207(c).

[9] *See,* discussion generally in Securities Exchange Act Release No. 78223 (July 1, 2016), 81 FR 44400 (July 7, 2016) (Order Granting Approval of SR–NASDAQ–2016–13).

[10] *See,* note 9.

[11] This disclosure method is consistent with the method under Rule 14.405(d)(2)(B) for disclosure of the appointment of a non-independent compensation committee member under exceptional and limited circumstances.

[12] The proposal is intended to apply to agreements and arrangements whether or not the right to nominate a director legally belongs to a third party. See Supplementary Material .07 to Rule 14.405 (Independent Director Oversight of Director Nominations).

[13] If the Company provides disclosure in a proxy or information statement, including to satisfy the SEC's proxy disclosure requirements, sufficient to comply with this rule, its obligation to satisfy this rule is fulfilled regardless of the reason for which such disclosure was made.

the agreement or arrangement.[14] The proposed rule does not separately require the initial disclosure of newly entered into agreements or arrangements, provided that disclosure is made pursuant to this rule for the next shareholder meeting at which directors are elected.

If a Company discovers an agreement or arrangement that should have been disclosed pursuant to subparagraph (A) of the proposed rule but was not, the Company must promptly make the required disclosure in accordance with this proposed rule.[15] In addition, for agreements and arrangements not required to be disclosed in accordance with subparagraph (A)(ii) of the proposed rule, such as employment with a third party that existed prior to the nominee's candidacy and is otherwise disclosed, but where the director or nominee's remuneration is thereafter materially increased specifically in connection with such person's candidacy or service as a director of the company, only the difference between the new and previous level of compensation or other payment obligation need be disclosed.

The terms ''compensation'' and ''other payment'' as used in this proposed rule are intended to be construed broadly and apply to agreements and arrangements that provide for non-cash compensation and other payment obligations, such as health insurance premiums or indemnification, made in connection with a person's candidacy or service as a director. Further, at a minimum, the disclosure should identify the parties to and the material terms of the agreement or arrangement relating to compensation.

In recognition of circumstances that do not raise the concerns noted above or where such disclosure may be duplicative, the proposed rule would not apply to agreements and arrangements that existed before the nominee's candidacy and the nominee's relationship with the Third Party has been otherwise publicly disclosed, for example, pursuant to Items 402(a)(2) of Regulation S–K or in a director's biographical summary included in periodic reports filed with the Commission. An example of an agreement or arrangement falling under this exception is a director or a nominee for director being employed by a private equity or venture capital firm, or a fund established by such firm, where employees are expected to and routinely serve on the boards of the fund's portfolio companies and their remuneration is not materially affected by such service. If such a director a [sic] nominee's remuneration is materially increased in connection with such person's candidacy or service as a director of the company, only the difference between the new and previous level of compensation needs to be disclosed under the proposed rule.

Additionally, the proposed rule would not apply to agreements and arrangements that relate only to reimbursement of expenses incurred in connection with candidacy as a director, whether or not such reimbursement arrangement has been publicly disclosed. Further, Commission Rule 14a–12(c) subjects persons soliciting proxies in opposition to companies' proxy solicitation to certain disclosure requirements of Schedule 14A of the Act. The proposed rule relieves the company from the disclosure requirements of the proposed Rule 14.207(b)(3)(A) where an agreement or arrangement for a director or a nominee has been disclosed under Item 5(b) of Schedule 14A of the Act in the current fiscal year. However, such an agreement or arrangement is subject to the continuous disclosure requirements of the proposed Rule 14.207(b)(3)(B) on an annual basis. Similarly, a Company that provides disclosure in the current fiscal year pursuant to the requirement in Item 5.02(d)(2) of Form 8–K requiring ''a brief description of any arrangement or understanding between the new director and any other persons, naming such persons, pursuant to which such director was selected as a director''—would not have to make a separate disclosure under the proposed Rule 14.207(b)(3)(A). Such disclosure under Commission rules, however, shall not relieve a company of its ongoing obligation under the proposed Rule 14.207(b)(3)(B) to make annual disclosure.

In recognition that a company, despite reasonable efforts, may not be able to identify all such agreements and arrangements, the proposed rule provides that a company shall not be deficient with the proposed disclosure requirements if it has undertaken reasonable efforts to identify all such agreements and arrangements, including by asking each director or nominee in a manner designed to allow timely disclosure, and upon discovery of a non-disclosed arrangement, promptly makes the required disclosure by filing a Form 8–K or 6–K, where required by Commission rules, or by issuing a press release. However, such remedial disclosure, regardless of its timing, does not satisfy the ongoing annual disclosure requirements under subparagraph (B).

In cases where a company is considered deficient, the company must provide a plan to regain compliance. Consistent with deficiencies from most other rules that allow a company to submit a plan to regain compliance,[16] IEX proposes to allow companies deficient under the proposed rule 45 calendar days to submit a plan sufficient to satisfy IEX staff that the company has adopted processes and procedures designed to identify and disclose relevant agreements and arrangements in the future. If the company does not do so, it would be issued a Staff Delisting Determination, which the company could appeal to a Hearings Panel pursuant to Rule 14.502.

2. Statutory Basis

IEX believes that the proposed rule change is consistent with Section 6(b) [17] of the Act in general, and furthers the objectives of Section 6(b)(5) of the Act,[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposal accomplishes these objectives by enhancing transparency around third party compensation and payments made in connection with board service. The Exchange believes such disclosure has several benefits: It would provide information to investors to help them make meaningful investing and voting decisions. It would also address potential concerns that undisclosed third party compensation arrangements may lead to conflicts of interest among

[14] A Company posting the requisite disclosure on or through its Web site must make it publicly available no later than the date on which the Company files a proxy or information statement in connection with a shareholders' meeting at which directors are elected (or, if they do not file proxy or information statements, no later than when the Company files its next Form 10–K or Form 20–F).

[15] *See infra* discussion on remedial disclosure.

[16] Pursuant to Rule 14.501(c)(2)(A), a company is provided 45 days to submit a plan to regain compliance with Rules 14.408(c) (Quorum), 14.411 (Review of Related Party Transactions, 14.412 (Shareholder Approval), 14.207(c)(3) (Auditor Registration), 14.208(a) (Direct Registration Program), 14.406 (Code of Conduct), 14.407(a)(4)(E) (Quorum of Limited Partnerships), 14.407(a)(4)(G) (Related Party Transactions of Limited Partnerships), and 14.413 (Voting Rights). A company is generally provided 60 days to submit a plan to regain compliance with the requirements to timely file periodic reports contained in Rule 14.207(c)(1).

[17] 15 U.S.C. 78f.

[18] 15 U.S.C. 78f(b)(5).

directors and call into question their ability to satisfy fiduciary duties.

The Exchange believes that it is consistent with the protection of investors and the public interest, and not unfairly discriminatory, to permit foreign private issuers to comply with home country practice in lieu of the requirements of the proposed rule. This approach is consistent with an existing structure for foreign private issuers whereby such companies may follow home country practice in lieu of certain listing rules, subject to an established process which includes disclosure obligations and submission to IEX of a written statement from an independent counsel in such Company's home country certifying that the Company's practices are not prohibited by the home country's laws.

Further, the Exchange notes that a substantially identical proposed rule change by the Nasdaq Stock Market LLC (''Nasdaq'') was recently approved by the Commission, pursuant to which the Commission found that the Nasdaq proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[19] In particular, the Commission found that the Nasdaq proposed rule change is ''consistent with the requirements of Section 6(b)(5) of the Act, which requires, among other things, that the Exchange's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and not be designed to permit, among other things, unfair discrimination between issuers.'' Accordingly, the Exchange believes that the same considerations apply to this proposed rule change since the proposed changes are substantially identical to the Nasdaq rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

IEX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule to require listed companies to disclose third party compensation and payments in connection with board service is intended to provide meaningful information to investors and to address potential concerns with undisclosed compensation arrangements without creating unnecessary burdens on directors or those making the payments.

Further, the proposed rule change is intended to promote transparency and protect investors. To the extent that a competitor marketplace believes that the proposed rule change places it at a competitive disadvantage, it of course may file with the Commission a proposed rule change to adopt the same or similar rule.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[22] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–IEX–2016–19 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–IEX–2016–19. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–IEX–2016–19, and should be submitted on or before January 6, 2017.

[19] See Securities Exchange Act Release No. 78223 (July 1, 2016), 81 FR 44400 (July 7, 2016).

[20] 15 U.S.C. 78s(b)(3)(A)(iii).

[21] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32389; 812–14663]

Alpha Architect ETF Trust, et al.; Notice of Application

December 12, 2016

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(J) for an exemption from sections 12(d)(1)(A) and 12(d)(1)(B) of the Act. The requested order would permit (a) index-based series of certain open-end management investment companies to issue shares (''Shares'') redeemable in large aggregations only (''Creation Units''); (b) secondary market transactions in Shares to occur at negotiated market prices rather than at net asset value (''NAV''); (c) certain Funds to pay redemption proceeds, under certain circumstances, more than seven days after the tender of Shares for redemption; (d) certain affiliated persons of a fund to deposit securities into, and receive securities from, the fund in connection with the purchase and redemption of Creation Units; and (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the funds (''Funds of Funds'') to acquire Shares of the Funds.

APPLICANTS: Alpha Architect ETF Trust (the ''Trust''), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, Empowered Funds, LLC (the ''Adviser''), a Pennsylvania limited liability company registered as an investment adviser under the Investment Advisers Act of 1940, and Quasar Distributors, LLC (the ''Initial Distributor''), a Delaware limited liability company and broker-dealer registered under the Securities Exchange Act of 1934 (''Exchange Act'').

FILING DATES: The application was filed on June 15, 2016, and amended on October 7, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on January 6, 2017, and should be accompanied by proof of service on applicants, in the form of an affidavit, or for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants: Alpha Architect ETF Trust and Empowered Funds, LLC, 213 Foxcroft Road, Broomall, PA 19008; Quasar Distributors, LLC, 615 East Michigan Street, 4th Floor, Milwaukee, Wisconsin 53202.

FOR FURTHER INFORMATION CONTACT: Emerson S. Davis, Senior Counsel at (202) 551–6868, or Daniele Marchesani, Assistant Chief Counsel, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. Applicants request an order that would allow funds to operate as index exchange traded funds (''ETFs'').[1] Fund Shares will be purchased and redeemed at their NAV in Creation Units only. All orders to purchase Creation Units and all redemption requests will be placed by or through an ''Authorized Participant'', which will have signed a participant agreement with a broker-dealer registered under the Securities Exchange Act of 1943 (''Exchange Act'') (the Initial Distributor, together with any future distributor, the ''Distributor''). Shares will be listed and traded individually on a national securities exchange, where share prices will be based on the current bid/offer market. Any order granting the requested relief would be subject to the terms and conditions stated in the application.

2. Each Fund will hold investment positions selected to correspond generally to the performance of an Underlying Index. In the case of self-indexing Funds, an affiliated person, as defined in section 2(a)(3) of the Act (''Affiliated Person''), or an affiliated person of an Affiliated Person (''Second-Tier Affiliate''), of the Trust or a Fund, of the Adviser, of any sub-adviser to or promoter of a Fund, or of the Distributor will compile, create, sponsor or maintain the Underlying Index.[2]

3. Shares will be purchased and redeemed in Creation Units and generally on an in-kind basis. Except where the purchase or redemption will include cash under the limited circumstances specified in the application, purchasers will be required to purchase Creation Units by depositing specified instruments (''Deposit Instruments''), and shareholders redeeming their Shares will receive specified instruments (''Redemption Instruments''). The Deposit Instruments and the Redemption Instruments will each correspond pro rata to the positions in the Fund's portfolio (including cash positions) except as specified in the application.

4. Because Shares will not be individually redeemable, applicants request an exemption from section 5(a)(1) and section 2(a)(32) of the Act that would permit the Funds to register as open-end management investment companies and issue Shares that are redeemable in Creation Units only.

5. Applicants also request an exemption from section 22(d) of the Act and rule 22c–1 under the Act as

[1] Applicants request that the order apply to the initial series of the Trust and any additional series of the Trust, and any other open-end management investment companies or series thereof that may be created in the future (each, included in the term ''Fund''), each of which will operate as an ETF and will track a specified index comprised of domestic and/or foreign equity securities or domestic and/or foreign fixed income securities (each, an ''Underlying Index''). Any Fund will (a) be advised by the Adviser or an entity controlling, controlled by, or under common control with the Adviser (included in the term ''Adviser'') and (b) comply with the terms and conditions of the application.

[2] Each self-indexing fund (''Self-Indexing Fund'') will post on its Web site the identities and quantities of the investment positions that will form the basis for the Fund's calculation of its NAV at the end of the day. Applicants believe that requiring Self-Indexing Funds to maintain full portfolio transparency will help address, together with other protections, conflicts of interest with respect to such Funds.

secondary market trading in Shares will take place at negotiated prices, not at a current offering price described in a Fund's prospectus, and not at a price based on NAV. Applicants state that (a) secondary market trading in Shares does not involve a Fund as a party and will not result in dilution of an investment in Shares, and (b) to the extent different prices exist during a given trading day, or from day to day, such variances occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in Shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants represent that share market prices will be disciplined by arbitrage opportunities, which should prevent Shares from trading at a material discount or premium from NAV.

6. With respect to Funds that effect creations and redemptions of Creation Units in-kind and that are based on certain Underlying Indexes that include foreign securities, applicants request relief from the requirement imposed by section 22(e) in order to allow such Funds to pay redemption proceeds within fifteen calendar days following the tender of Creation Units for redemption. Applicants assert that the requested relief would not be inconsistent with the spirit and intent of section 22(e) to prevent unreasonable, undisclosed or unforeseen delays in the actual payment of redemption proceeds.

7. Applicants request an exemption to permit Funds of Funds to acquire Fund Shares beyond the limits of section 12(d)(1)(A) of the Act; and the Funds, and any principal underwriter for the Funds, and/or any broker or dealer registered under the Exchange Act, to sell Shares to Funds of Funds beyond the limits of section 12(d)(1)(B) of the Act. The application's terms and conditions are designed to, among other things, help prevent any potential (i) undue influence over a Fund through control or voting power, or in connection with certain services, transactions, and underwritings, (ii) excessive layering of fees, and (iii) overly complex fund structures, which are the concerns underlying the limits in sections 12(d)(1)(A) and (B) of the Act.

8. Applicants request an exemption from sections 17(a)(1) and 17(a)(2) of the Act to permit persons that are Affiliated Persons, or Second Tier Affiliates, of the Funds, solely by virtue of certain ownership interests, to effectuate purchases and redemptions in-kind. The deposit procedures for in-kind purchases of Creation Units and the redemption procedures for in-kind redemptions of Creation Units will be the same for all purchases and redemptions and Deposit Instruments and Redemption Instruments will be valued in the same manner as those investment positions currently held by the Funds. Applicants also seek relief from the prohibitions on affiliated transactions in section 17(a) to permit a Fund to sell its Shares to and redeem its Shares from a Fund of Funds, and to engage in the accompanying in-kind transactions with the Fund of Funds.[3] The purchase of Creation Units by a Fund of Funds directly from a Fund will be accomplished in accordance with the policies of the Fund of Funds and will be based on the NAVs of the Funds.

9. Section 6(c) of the Act permits the Commission to exempt any persons or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Section 17(b) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policies of each registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,

Secretary.

[FR Doc. 2016–30251 Filed 12–15–16; 8:45 am]

BILLING CODE 8011–01–P

[3] The requested relief would apply to direct sales of Shares in Creation Units by a Fund to a Fund of Funds and redemptions of those Shares. Applicants, moreover, are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where a Fund could be deemed an Affiliated Person, or a Second-Tier Affiliate, of a Fund of Funds because an Adviser or an entity controlling, controlled by or under common control with an Adviser provides investment advisory services to that Fund of Funds.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79532; File No. SR–NASDAQ–2016–166]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Transaction Fees at Chapter XV, Section 2

December 12, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 1, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's transaction fees at Chapter XV, Section 2, entitled ''NASDAQ Options Market—Fees and Rebates,'' which governs pricing for Nasdaq members using the NASDAQ Options Market (''NOM''), Nasdaq's facility for executing and routing standardized equity and index options. Nasdaq proposes to implement a new rebate for adding liquidity for Customer and Professional orders in Penny and Non-Penny Pilot Options as described further below.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to create an alternative method for earning a rebate for adding liquidity for both Customers [3] and Professionals [4] in Penny Pilot [5] and Non-Penny Pilot Options. For Customers and Professionals transacting in Penny Pilot Options, the Exchange currently pays a volume-based tiered rebate to add liquidity. That rebate consists of 8 tiers, ranging from $0.20 per contract to $0.48 per contract, with the volume requirements increasing with each tier. Thus, a NOM Participant would qualify for a rebate of $0.20 per contract in Tier 1 for Customers and Professionals if it added Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of up to 0.10% of total industry customer equity and ETF option average daily volume (''ADV'') contracts per day in a month. In comparison, a Participant would qualify for a rebate of $0.48 in Tier 8 for Customers and Professionals if it adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.75% or more of total industry customer equity and ETF option ADV contracts per day in a month, or if the Participant adds: (1) Customer and/or Professional liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 0.25% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) has added liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS.[6]

Currently, Customers and Professionals transacting in Non-Penny Pilot Options on NOM receive a $0.80 per contract Rebate to Add Liquidity. In addition, a Participant that qualifies for a Customer or Professional Penny Pilot Options Rebate to Add Liquidity in Tiers 2, 3, 4, 5 or 6 in a month will receive an additional $0.10 per contract Non-Penny Pilot Options Rebate to Add Liquidity for each transaction which adds liquidity in Non-Penny Pilot Options in that month. Furthermore, a Participant that qualifies for a Customer or Professional Penny Pilot Options Rebate to Add Liquidity in Tiers 7 or 8 in a month will receive an additional $0.20 per contract Non-Penny Pilot Options Rebate to Add Liquidity for each transaction which adds liquidity in Non-Penny Pilot Options in that month.

The Exchange now proposes to add an additional rebate to Customers and Professionals for adding liquidity in both Penny Pilot and Non-Penny Pilot Options. Specifically, a NOM Participant will receive a $0.53 per contract Rebate to Add Liquidity in Penny Pilot Options as a Customer or Professional, and $1.00 per contract Rebate to Add Liquidity in Non-Penny Pilot Options as a Customer or Professional, if that NOM Participant transacts on the NASDAQ Stock Market through one or more of its Nasdaq Market Center MPIDs in the same month, and such transactions in all securities on the NASDAQ Stock Market that month through all of its Nasdaq Market Center MPIDs represent 3.00% or more of Consolidated Volume.[7] Participants that qualify for this rebate would not be eligible for any other rebates in Tiers 1–8 or other rebate incentives on NOM for Customer and Professional order flow in Chapter XV, Section 2(1).

For purposes of calculating the NOM Participant's total volume, the Exchange will add the NOM Participant's total volume transacted on the NASDAQ Stock Market in a given month across its Nasdaq Market Center MPIDs, and will divide this number by the total industry Consolidated Volume.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[9] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [10]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [11] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[12] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.''[13]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker

[3] The term ''Customer'' or (''C'') applies to any transaction that is identified by a Participant for clearing in the Customer range at The Options Clearing Corporation (''OCC'') which is not for the account of broker or dealer or for the account of a ''Professional'' (as that term is defined in Chapter I, Section 1(a)(48)).

[4] The term ''Professional'' or (''P'') means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s) pursuant to Chapter I, Section 1(a)(48). All Professional orders shall be appropriately marked by Participants.

[5] The Penny Pilot was established in March 2008. *See* Securities Exchange Act Release No. 57579 (March 28, 2008), 73 FR 18587 (April 4, 2008) (SR–NASDAQ–2008–026) (notice of filing and immediate effectiveness establishing Penny Pilot). Since that date, the Penny Pilot has been expanded and is currently extended through December 31, 2016 or the date of permanent approval, if earlier. *See* Securities Exchange Act Release No. 78037 (June 10, 2016), 81 FR 39299 (June 16, 2016) (SR–NASDAQ–2016–052).

[6] MARS refers to the Market Access and Routing Subsidy, which is set forth in Chapter XV, Section 6 [sic]. The MARS payment comprises four volume-based tiers, and is paid to NOM Participants that route eligible contracts to NOM through a participating NOM Participant's System. The MARS Payment will be paid on all executed Eligible Contracts that add liquidity. *See* Chapter XV, Section 6 [sic].

[7] Consolidated Volume would be determined as set forth in Nasdaq Rule 7018(a).

[13] *Id.* at 537.

dealers'. . . .'' [14] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange notes that the purpose of the proposed rebates is to incentivize NOM Participants to transact greater volume on the NASDAQ Stock Market in order to qualify for a higher rebate on NOM. The Exchange believes that the amount of the rebate ($0.53 per contract for Penny Pilot Options and $1.00 per contract for Non-Penny Pilot Options) and the volume threshold for qualifying for the rebate (3.00% or more of Consolidated Volume) are reasonable. With respect to the rebate for Penny Pilot Options, the Exchange notes that the proposed $0.53 per contract rebate is the same as the highest rebate currently available to Customers and Professionals for adding liquidity in Penny Pilot Options.[15] The Exchange believes the proposed rebate of $0.53 per contract is reasonable when compared to the highest rebate currently available to Customers and Professionals for adding liquidity in Penny Pilot Options, as the proposed rebate imposes comparable requirements on NOM Participants in order to qualify for that rebate. Similarly, the Exchange believes the proposed $1.00 rebate per contract for Non-Penny Pilot Options is reasonable because it is comparable to the rebates that a NOM Participant currently receives for adding liquidity in Non-Penny Pilot Options as a Customer or Professional, which range from $0.80 per contract to $1.00 per contract.

The Exchange believes that the requirement that a NOM Participant transact 3.00% or more in Consolidated Volume on the NASDAQ Stock Market is reasonable because this requirement, while more stringent than other volume-based requirements that currently apply to NOM Participants that transact as Customers or Professionals in Penny Pilot and Non-Penny Pilot Options, reflects the fact that NOM Participants that qualify for this rebate would generally receive a larger rebate (for Penny Pilot Options, $0.53 per contract versus $0.20–$0.53 per contract and, for Non-Penny Pilot Options, $1.00 per contract versus $0.80–$1.00 per contract) than they would currently receive for transactions as Customer or Professionals in Penny Pilot and Non-Penny Pilot Options.

The Exchange believes it is reasonable to make this rebate exclusive of any other rebates in Tiers 1–8 or other rebate incentives on NOM for Customer and Professional order flow in Chapter XV, Section 2(1). As noted above, the proposed rebates are generally higher, and in some cases significantly higher, than the rebates that a NOM Participant may currently receive for adding liquidity in Penny Pilot and Non-Penny Pilot Options as a Customer or Professional. Given the size of the proposed rebates, the Exchange believes it is reasonable to make these rebates exclusive of other rebates on NOM for Customer and Professional order flow.

The Exchange also believes the other aspects of this proposal are also reasonable, equitable and not unfairly discriminatory. First, the Exchange notes that the proposed rebates apply to both transactions in Penny Pilot and Non-Penny Pilot Options.

Second, the Exchange believes that linking rebates on NOM to activity on the NASDAQ Stock Market is reasonable, equitable, and not unfairly discriminatory. The Exchange notes that previous and current rebates offered by NOM relate to activity on the NASDAQ Stock Market.[16] Similarly, the NASDAQ Stock Market offers reduced transaction fees that are based on activity on NOM.[17] Moreover, the Exchange notes that any NOM Options Participant may trade equities on the NASDAQ Stock Market because they are approved members.[18]

Third, while the requirements for qualifying for the proposed rebates may be more stringent than other requirements for qualifying for other rebates currently offered by NOM, the Exchange believes that these requirements are proportionate to the amount of the proposed rebates and equitably reflect the purpose of the proposed rebates, which is to incentivize NOM Participants to transact greater volume on the NASDAQ Stock Market. Moreover, all similarly-situated NOM Participants, *e.g.,* those that add liquidity in either Penny Pilot

[14] *Id.* at 539 (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

[15] As noted above, a NOM Participant will receive a rebate of $0.48 per contract for adding liquidity as a Customer or Professional in Penny Pilot Options if it qualifies for Tier 8. In addition, as noted in footnote c of Chapter XV, Section 2, a NOM Participant may receive an additional rebate of up to $0.05 per contract in Penny Pilot Options, for a total rebate of $0.53 per contract. Specifically, Participants that: (1) Add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 1.15% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional $0.02 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month; or (2) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 1.30% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional $0.05 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month; or (3)(a) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.80% of total industry customer equity and ETF option ADV contracts per day in a month, (b) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Non-Penny Pilot Options above 0.15% of total industry customer equity and ETF option ADV contracts per day in a month, and (c) execute greater than 0.04% of Consolidated Volume (''CV'') via Market-on-Close/Limit-on-Close (''MOC/LOC'') volume within the NASDAQ Stock Market Closing Cross within a month will receive an additional $0.05 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in a month. Consolidated Volume shall mean the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of an equity member's trading activity, expressed as a percentage of or ratio to Consolidated Volume, the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity.

[16] For example, in SR–NASDAQ–2015–047, the Exchange proposed to make NOM Participants that added liquidity in Penny Pilot Stocks [sic] as a Customer or Professional eligible for the Tier 8 rebate if, among other things, the Participant has certified for the Investor Support Program set forth in Rule 7014, or if the Participant qualified for rebates under the Qualified Market Maker (''QMM'') Program set forth in Rule 7014. *See* Securities Exchange Act Release No. 74931 (May 12, 2015), 80 FR 28308 (May 18, 2015) (SR–NASDAQ–2015–047).

Currently, footnote c of the NOM fee schedule provides that Participants that (1) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.80% of total industry customer equity and ETF option ADV contracts per day in a month, (2) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Non-Penny Pilot Options above 0.15% of total industry customer equity and ETF option ADV contracts per day in a month, and (3) execute greater than 0.04% of Consolidated Volume (''CV'') via Market-on-Close/Limit-on-Close (''MOC/LOC'') volume within the NASDAQ Stock Market Closing Cross within a month will receive an additional $0.05 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in a month.

[17] For example, Nasdaq charges a reduced transaction fee of $0.00295 if the member adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 1.15% or more of total industry ADV in the customer clearing range for Equity and ETF option contracts per day in a month on NOM. *See* Nasdaq Rule 7018.

[18] Although a NOM Participant may incur additional labor and/or costs to establish connectivity to the NASDAQ Stock Market, there are no additional membership fees for NOM Participants that want to transact on the NASDAQ Stock Market.

or Non-Penny Pilot Options as either Customers or Professionals and also transact on the NASDAQ Stock Market, are equally capable of qualifying for the proposed rebates, and the same rebates will be paid to all NOM Participants that qualify for them.

Fourth, the Exchange believes that it is reasonable, equitable and not unfairly discriminatory to offer this rebate to NOM Participants that add liquidity as Customers or Professionals, and not to offer this rebate to NOM Participants that add liquidity as Firms,[19] NOM Market Makers,[20] non-NOM Market Makers, or Broker-Dealers.[21] Nasdaq notes that Customer liquidity offers unique benefits to the market which benefits all market participants by providing more trading opportunities, which attracts Specialists and Market Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The Exchange believes that encouraging Participants to add Professional liquidity is similarly beneficial, as the rebates may cause market participants to select NOM as a venue to send Professional order flow, increasing competition among the exchanges. As with Customer liquidity, the Exchange believes that increased Professional additional order flow should benefit other market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

The Exchange does not believe that the proposed rebates will impose any burden on competition that is not necessary or appropriate. The Exchange notes that the purpose of the proposed rebate is to incentivize NOM Participants to transact on the NASDAQ Stock Market. All similarly-situated NOM Participants, *e.g.,* those that add liquidity in either Penny Pilot or Non-Penny Pilot Options as either Customers or Professionals and also transact the requisite volumes on the NASDAQ Stock Market, are equally capable of qualifying for the proposed rebates. Additionally, the Exchange will pay the same rebates to all NOM Participants that qualify for them. The Exchange believes that Customer and Professional order flow provides unique benefits to all participants on the Exchange and may even facilitate inter-market competition, and is therefore offering the proposed rebates to NOM Participants that add liquidity as either a Customer or a Professional accordingly. With respect to linking the proposed rebates to a participant's activity on the NASDAQ Stock Market, NOM currently offers rebates that are based on activity on the NASDAQ Stock Market. Similarly, the NASDAQ Stock Market currently offers reduced transaction fees that are based on activity on NOM. Finally, because they are approved members, any NOM Options Participant may trade equities on the NASDAQ Stock Market and therefore attempt to qualify for the proposed rebates.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[19] The term ''Firm'' or (''F'') applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC.

[20] The term ''NOM Market Maker'' or (''M'') is a Participant that has registered as a Market Maker on NOM pursuant to Chapter VII, Section 2, and must also remain in good standing pursuant to Chapter VII, Section 4. In order to receive NOM Market Maker pricing in all securities, the Participant must be registered as a NOM Market Maker in at least one security.

[21] The term ''Broker-Dealer'' or (''B'') applies to any transaction which is not subject to any of the other transaction fees applicable within a particular category.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–166 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–166. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public

[22] 15 U.S.C. 78s(b)(3)(A)(ii).

Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2016–166 and should be submitted on or before January 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79524; File No. SR–NYSEArca–2016–156]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Commentary .02 to Rule 6.72

December 12, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 28, 2016, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Commentary .02 to Rule 6.72 in order to extend the Penny Pilot in options classes in certain issues (''Pilot Program'' or ''Pilot'') previously approved by the Securities and Exchange Commission (''Commission'') through June 30, 2017. The Pilot Program is currently scheduled to expire on December 31, 2016. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the Pilot Program,[4] which is currently scheduled to expire on December 31, 2016, until June 30, 2017.[5] The Exchange believes that extending the Pilot would allow for further analysis of the Pilot Program and a determination of how the Pilot Program should be structured in the future.

During this extension of the Pilot, as is the case today, the Exchange may replace any option class that is currently included in the Pilot Program and that has been delisted with the next most actively traded, multiply listed option class that is not yet participating in the Pilot Program (''replacement class''). In light of the extension, the Exchange also proposes that any replacement class would be determined based on national average daily volume in the preceding six months, and would be added on the second trading day following January 1, 2017.[6]

This filing does not propose any substantive changes to the Pilot Program: All classes currently participating will remain the same and all minimum increments will remain unchanged. The Exchange believes the benefits to public customers and other market participants who will be able to express their true prices to buy and sell options have been demonstrated to outweigh the increase in quote traffic.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)[7] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanisms of a free and open market and a national market system.

In particular, the proposed rule change, which extends the Penny Pilot Program for six months, allows the Exchange to continue to participate in a program that has been viewed as beneficial to traders, investors and public customers and viewed as successful by the other options exchanges participating in it. Accordingly, the Exchange believes that the proposal is consistent with the Act because it would allow the Exchange to extend the Pilot Program prior to its expiration on December 31, 2016. The Exchange notes that this proposal does not propose any new policies or provisions that are unique or unproven, but instead relates to the continuation of an existing program that operates on a pilot basis.

The Exchange believes that the Pilot Program promotes just and equitable principles of trade by enabling public customers and other market participants to express their true prices to buy and sell options to the benefit of all market participants.

The proposal to extend the Pilot Program is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 34–55156 (January 23, 2007), 72 FR 4759 (February 1, 2007) (SR–NYSEArca–2006–73) (original approval of Pilot). The Pilot has been extended several times since the original approval, the most recent extension was obtained in earlier this year. *See* Securities Exchange Act Release No. 78174 (June 28, 2016), 81 FR 43332 (July 1, 2016) (SR–NYSEArca–2016–88) (most recent extension of the Pilot until December 31, 2016).

[5] *See* proposed Commentary .02 to Rule 6.72.

[6] *See id.* The month immediately preceding a replacement class's addition to the Pilot Program (*i.e.,* December) would not be used for purposes of the analysis for determining the replacement class. Thus, a replacement class to be added on the second trading day following January 1, 2017 would be identified based on The Option Clearing Corporation's trading volume data from June 1, 2016 through November 30, 2016. The Exchange will announce the replacement issues to the Exchange's membership through a Trader Update.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

impediments to and perfect the mechanisms of a free and open market and a national market system, by allowing the Exchange and the Commission additional time to analyze the impact of the Pilot Program while also allowing the Exchange to continue to compete for order flow with other exchanges in option issues trading as part of the Pilot Program.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that, by extending the expiration of the Pilot Program, the proposed rule change would allow for further analysis of the Pilot Program and a determination of how the Program should be structured in the future. In doing so, the proposed rule change would also serve to promote regulatory clarity and consistency, thereby reducing burdens on the marketplace and facilitating investor protection. The Pilot Program is an industry-wide initiative supported by all other option exchanges. The Exchange believes that extending the Pilot Program would allow for continued competition between Exchange market participants trading similar products as their counterparts on other exchanges, while at the same time allowing the Exchange to continue to compete for order flow with other exchanges in option issues trading as part of the Pilot Program.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[9] and Rule 19b–4(f)(6) thereunder.[10] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[11] and Rule 19b–4(f)(6)(iii) thereunder.[12]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[13] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2016–156 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–156. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Section, 100 F Street NE., Washington, DC 20549–1090 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2016–156 and should be submitted on or before January 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79530; File No. SR–ISE–2016–29]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing of Proposed Rule Change To Amend ISE Rule 723 and To Make Pilot Program Permanent

December 12, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 12, 2016, the International Securities Exchange, LLC (the ''Exchange'' or the ''ISE'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend ISE Rule 723, concerning its Price

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Improvement Mechanism (''PIM''). Certain aspects of PIM are currently operating on a pilot basis (''Pilot''), which was initially approved by the Commission in 2004,[3] and which is set to expire on January 18, 2017.[4] The Pilot concerns (i) the termination of the exposure period by unrelated orders; and (ii) no minimum size requirement of orders eligible for PIM. ISE seeks to make the Pilot permanent, and also proposes to change the requirements for providing price improvement for Agency Orders of less than 50 option contracts.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to make permanent certain pilots within Rule 723, relating to PIM. Paragraph .03 of the Supplementary Material to Rule 723 provides that there is no minimum size requirement for orders to be eligible for PIM. Paragraph .05 concerns the termination of the exposure period by unrelated orders. In addition, ISE proposes to modify the requirements for PIM auctions involving less than 50 contracts (other than auctions involving Complex Orders) where the National Best Bid and Offer (''NBBO'') is only $0.01 wide.

Background

The Exchange adopted PIM in 2004 as a price-improvement mechanism on the Exchange.[5] The PIM is a process that allows Electronic Access Members (''EAM'') to provide price improvement opportunities for a transaction wherein the Member seeks to execute an agency order as principal or execute an agency order against a solicited order (a ''Crossing Transaction''). A Crossing Transaction is comprised of the order the EAM represents as agent (the ''Agency Order'') and a counter-side order for the full size of the Agency Order (the ''Counter-Side Order''). The Counter-Side Order may represent interest for the Member's own account, or interest the Member has solicited from one or more other parties, or a combination of both.

Rule 723 sets forth the criteria pursuant to which the PIM is initiated. Specifically, a Crossing Transaction must be entered only at a price that is equal to or better than the national best bid or offer (''NBBO'') and better than the limit order or quote on the ISE order book on the same side of the Agency Order. The Crossing Transaction may be priced in one-cent increments. The Crossing Transaction may not be canceled, but the price of the Counter-Side Order may be improved during the exposure period.

Rule 723 also sets forth requirements relating to the exposure of orders in PIM and the termination of the exposure period. Upon entry of a Crossing Transaction into the Price Improvement Mechanism, a broadcast message that includes the series, price and size of the Agency Order, and whether it is to buy or sell, will be sent to all Members. This broadcast message will not be included in the ISE disseminated best bid or offer and will not be disseminated through OPRA. Members will be given 500 milliseconds to indicate the size and price at which they want to participate in the execution of the Agency Order (''Improvement Orders''). Improvement Orders may be entered by all Members for their own account or for the account of a Public Customer in one-cent increments at the same price as the Crossing Transaction or at an improved price for the Agency Order, and for any size up to the size of the Agency Order. During the exposure period, Improvement Orders may not be canceled, but may be modified to (1) increase the size at the same price, or (2) improve the price of the Improvement Order for any size up to the size of the Agency Order. During the exposure period, responses (including the Counter Side Order, Improvement Orders, and any changes to either) submitted by Members shall not be visible to other auction participants. The exposure period will automatically terminate (i) at the end of the 500 millisecond period, (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series, or (iii) upon the receipt of a nonmarketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange.

Rule 723 also describes how orders will be executed at the end of the exposure period. Specifically, at the end of the exposure period, the Agency Order will be executed in full at the best prices available, taking into consideration orders and quotes in the Exchange market, Improvement Orders, and the Counter-Side Order. The Agency Order will receive executions at multiple price levels if there is insufficient size to execute the entire order at the best price. At a given price, Priority Customer interest is executed in full before Professional Orders and any other interest of Members (*i.e.,* proprietary interest from Electronic Access Members and Exchange market makers).

After Priority Customer interest at a given price, Professional Orders and Members' interest will participate in the execution of the Agency Order based upon the percentage of the total number of contracts available at the price that is represented by the size of the Members' interest.

In the case where the Counter-Side Order is at the same price as Members' interest (after Priority Customer interest at a given price), the Counter-Side order will be allocated the greater of one (1) contract or forty percent (40%) of the initial size of the Agency Order before other Member interest is executed. Upon entry of Counter-Side orders, Members can elect to automatically match the price and size of orders, quotes and responses received during the exposure period up to a specified

[3] *See* Securities Exchange Act Release No. 50819 (December 8, 2004), 69 FR 75093 (December 15, 2004) (SR–ISE–2003–06) (''PIM Approval Order'').

[4] *See* Securities Exchange Act Release No. 78344 (July 15, 2016), 81 FR 47459 (July 21, 2016) (SR–ISE–2016–17).

[5] In addition to the PIM Approval Order and the most recent extension cited above, the following proposed rule changes have been submitted in connection with PIM. *See* Securities Exchange Act Release Nos. 52027 (July 13, 2005), 70 FR 41804 (July 20, 2005) (SR–ISE–2005–30); 54146 (July 14, 2006), 71 FR 41490 (July 21, 2006) (SR–ISE–2006–39); 56106 (July 19, 2007), 72 FR 40914 (July 25, 2007) (SR–ISE–2007–62); 56156 (July 27, 2007), 72 FR 43305 (August 3, 2007) (SR–ISE–2007–66); 58197 (July 18, 2008), 73 FR 43810 (July 28, 2008) (SR–ISE–2008–60); 60333 (July 17, 2009), 74 FR 36792 (July 24, 2009) (SR–ISE–2009–52); 62513 (July 16, 2010), 75 FR 43221 (July 23, 2010) (SR–ISE–2010–75); 64931 (July 20, 2011), 76 FR 44642 (July 26, 2011) (SR–ISE–2011–41); 67202 (June 14, 2012), 77 FR 36589 (June 19, 2012) (SR–ISE–2012–54); 69853 (June 25, 2013), 78 FR 39390 (July 1, 2013) (SR–ISE–2013–41); 72467 (June 25, 2014), 79 FR 37377 (July 1, 2014) (SRISE–2014–33); 75482 (July 17, 2015), 80 FR 43807 (July 23, 2015) (SR–ISE–2015–23).

limit price or without specifying a limit price. In this case, the Counter-Side order will be allocated its full size at each price point, or at each price point within its limit price if a limit is specified, until a price point is reached where the balance of the order can be fully executed. At such price point, the Counter-Side order shall be allocated the greater of one contract or forty percent (40%) of the original size of the Agency Order, but only after Priority Customer Orders at such price point are executed in full. Thereafter, all other orders, Responses, and quotes at the price point will participate in the execution of the Agency Order based upon the percentage of the total number of contracts available at the price that is represented by the size of the order, Response or quote. An election to automatically match better prices cannot be cancelled or altered during the exposure period.

When a market order or marketable limit order on the opposite side of the market from the Agency Order ends the exposure period, it will participate in the execution of the Agency Order at the price that is mid-way between the best counter-side interest and the NBBO, so that both the market or marketable limit order and the Agency Order receive price improvement. Transactions will be rounded, when necessary, to the $0.01 increment that favors the Agency Order.

The Pilot

As described above, two components of PIM are currently operating on a pilot basis: (i) The termination of the exposure period by unrelated orders; and (ii) no minimum size requirement of orders entered into PIM. The pilot has been extended until January 18, 2017.[6]

As described in greater detail below, during the pilot period the Exchange has been required to submit, and has been submitting, certain data periodically as required by the Commission, to provide supporting evidence that, among other things, there is meaningful competition for all size orders within the PIM, that there is significant price improvement for all orders executed through the PIM, and that there is an active and liquid market functioning on the Exchange both within PIM and outside of the Auction mechanism. The Exchange has also analyzed the impact of certain aspects of the Pilot; for example, situation in which PIM is terminated prematurely by an unrelated order.

The Exchange now seeks to have the Pilot approved on a permanent basis. In addition, the Exchange proposes to modify the scope of PIM so that, with respect to PIM orders for less than 50 option contracts, members will be required to receive price improvement of at least one minimum price improvement increment over the NBBO if the NBBO is only $0.01 wide. For orders of 50 contracts or more, or if the difference in the NBBO is greater than $0.01, and for Complex Orders, the requirements for price improvement remain the same.

Price Improvement for Orders Under 50 Contracts

Currently, the PIM may be initiated if all of the following conditions are met. A Crossing Transaction must be entered only at a price that is equal to or better than the NBBO and better than the limit order or quote on the ISE order book on the same side of the Agency Order. The Crossing Transaction may be priced in one-cent increments. The Crossing Transaction may not be canceled, but the price of the Counter-Side Order may be improved during the exposure period.

ISE proposes to amend Rule 723(b) to require Electronic Access Members to provide at least $0.01 price improvement for an Agency Order if that order is for less than 50 contracts and if the difference between the NBBO is $0.01. For the period beginning January 19, 2017 until a date specified by the Exchange in a Regulatory Information Circular, which date shall be no later than July 15, 2017, ISE will adopt a member conduct standard to implement this requirement.[7] Under this provision, ISE is proposing to amend the Auction Eligibility Requirements to require that, if the Agency Order is for less than 50 option contracts, and if the difference between the NBBO is $0.01, an Electronic Access Member shall not enter a Crossing Transaction unless such Crossing Transaction is entered at a price that is one minimum price improvement increment better than the NBBO on the opposite side of the market from the Agency Order, and better than any limit order on the limit order book on the same side of the market as the Agency Order. This requirement will apply regardless of whether the Agency Order is for the account of a public customer, or where the Agency Order is for the account of a broker dealer or any other person or entity that is not a Public Customer.

To enforce this requirement, ISE also proposes to amend Rule 1614 (Imposition of Fines for Minor Rule Violations). Specifically, ISE will add Rule 1614(d)(4), which will provide that any Member who enters an order into PIM for less than 50 contracts, while the National Best Bid or Offer spread is $0.01, must provide price improvement of at least one minimum price improvement increment better than the NBBO on the opposite side of the market from the Agency Order, which increment may not be smaller than $0.01. Failure to provide such price improvement will result in members being subject to the following fines: $500 for the second offense, $1,000 for the third offense, and $2,500 for the fourth offense. Subsequent offenses will subject the member to formal disciplinary action. The Exchange will review violations on a monthly cycle to assess these violations. This provision shall also be in effect for the period beginning January 19, 2017 until a date specified by the Exchange in a Regulatory Information Circular, which date shall be no later than until September 15, 2017.[8]

The Exchange will conduct electronic surveillance of PIM to ensure that members comply with the proposed price improvement requirements for option orders of less than 50 contracts. Specifically, using an electronic surveillance system that produces alerts of potentially unlawful PIM orders, the Exchange will perform a frequent review of member firm activity to identify instances of apparent violations. Upon discovery of an apparent violation, the Exchange will attempt to contact the appropriate member firm to communicate the specifics of the apparent violation with the intent to assist the member firm in

[6] *See* note 4 above.

[7] The Exchange notes that its indirect parent company, U.S. Exchange Holdings, Inc. has been acquired by Nasdaq, Inc. *See* Securities Exchange Act Release No. 78119 (June 21, 2016), 81 FR 41611 (June 27, 2016) (SR–ISE–2016–11). Pursuant to this acquisition, ISE platforms are migrating to Nasdaq platforms, including the platform that operates PIM. ISE intends to retain the proposed member conduct standard requiring price improvement for options orders of under 50 contracts where the difference between the NBBO is $0.01 until the ISE platforms and the corresponding symbols are migrated to the platforms operated by Nasdaq, Inc.

[8] As noted above, ISE will be eliminating the member conduct standard requiring price improvement for options orders of under 50 contracts, where the difference between the NBBO is $0.01, by July 15, 2017. However, ISE Mercury, LLC (''ISE Mercury'') is filing a rule change that adopts a similar member conduct standard, and that references proposed ISE Rule 1614(d)(4) as the means for enforcing its member conduct standard. ISE Mercury is proposing that its member conduct standard shall be in effect until a date specified by the Exchange in a Regulatory Information Circular, which date shall be no later than September 15, 2017. Accordingly, ISE is proposing that the date for eliminating Rule 1614(d)(4) shall be specified by the Exchange in a Regulatory Information Circular, which date shall be no later than until September 15, 2017.

preventing submission of subsequent problematic orders. The Exchange will review the alerts monthly and determine the applicability of the MRVP and appropriate penalty. The Exchange is not limited to the application of the MRVP, and may at its discretion, choose to escalate a matter for processing through the Exchange's disciplinary program.

The Exchange is also proposing a systems-based mechanism to implement this price improvement requirement, which shall be effective following the migration of a symbol to INET, the platform operated by Nasdaq, Inc. that will also operate the PIM. Under this provision, if the Agency Order is for less than 50 option contracts, and if the difference between the National Best Bid and National Best Offer (''NBBO'') is $0.01, the Crossing Transaction must be entered at one minimum price improvement increment better than the NBBO on the opposite side of the market from the Agency Order and better than the limit order or quote on the ISE order book on the same side of the Agency Order.

The Exchange believes that these changes to PIM may provide additional opportunities for Agency Orders of under 50 option contracts to receive price improvement over the NBBO where the difference in the NBBO is $0.01. ISE notes that the statistics for the current pilot, which include, among other things, price improvement for orders of less than 50 option contracts under the current auction eligibility requirements, show relatively small amounts of price improvement for such orders. ISE believes that the proposed requirements will therefore increase the price improvement that orders of under 50 option contracts may receive in PIM.

The Exchange will retain the current requirements for auction eligibility where the Agency Order is for 50 option contracts or more, or if the difference between the NBBO is greater than $0.01. Accordingly, the Exchange is amending the Auction Eligibility Requirements to state that, if the PIM Order is for 50 option contracts or more or if the difference between the NBBO is greater than $0.01, the Crossing Transaction must be entered only at a price that is equal to or better than the NBBO and better than the limit order or quote on the ISE order book on the same side as the Agency Order.

No Minimum Size Requirement

Supplemental Material .03 to Rule 723 provides that, as part of the current Pilot, there will be no minimum size requirement for orders to be eligible for the Auction.[9] The Exchange proposed the no-minimum size requirement for the PIM because it believed that this would provide small customer orders with the opportunity to participate in the PIM and to receive corresponding price improvement. In initially approving the PIM, the Commission noted that the no minimum size requirement provided an opportunity for more market participants to participate in the auction. The Commission also stated that it would evaluate PIM during the Pilot Period to determine whether it would be beneficial to customers and to the options market as a whole to approve any proposal requesting permanent approval to permit orders of fewer than 50 contracts to be submitted to the PIM.[10]

As noted above, throughout the Pilot, the Exchange has been required to submit certain data periodically to provide supporting evidence that, among other things, there is meaningful competition for all size orders within the PIM, that there is significant price improvement for all orders executed through the PIM, and that there is an active and liquid market functioning on the Exchange both within PIM and outside of the Auction mechanism.

The Exchange believes that the data gathered since the approval of the Pilot establishes that there is liquidity and competition both within PIM and outside of PIM, and that there are opportunities for significant price improvement within PIM.[11]

In the period between January and June 2016, the PIM executed a total of 7.12 million contracts, which represented 2.86% of total ISE contract volume and 0.35% of industry volume. The percent of ISE volume traded in PIM ranged from 2.24% in June 2016 to 3.59% in February 2016. For complex orders, in January 2016, 25,854 complex orders of greater than 50 contracts were entered into PIM, which represents 0.18% of total ISE volume.

The Exchange compiled price improvement data in simple PIM orders from January through June 2016 that divides the data into the following groups: (1) Orders of over 50 contracts where the Agency Order was on behalf of a Public Customer and ISE was at the NBBO; (2) orders of over 50 contracts where the Agency Order was on behalf of a Public Customer and ISE was not at the NBBO; (3) orders of over 50 contracts where the Agency Order was on behalf of a non-customer and ISE was at the NBBO; (4) orders of over 50 contracts where the Agency Order was on behalf of a non-customer and ISE was not at the NBBO; (5) orders of 50 contracts or less where the Agency Order was on behalf of a Public Customer and ISE was at the NBBO; (6) orders of 50 contracts or less where the Agency Order was on behalf of a Public Customer and ISE was not at the NBBO; (7) orders of 50 contracts or less where the Agency Order was on behalf of a non-customer and ISE was at the NBBO; and (8) orders of 50 contracts or less where the Agency Order was on behalf of a non-customer and ISE was not at the NBBO.

For January 2016, where the order was on behalf of a Public Customer, the order was for 50 contracts or less, and ISE was at the NBBO, the most contracts traded (194,249) occurred when the spread was between $0.05 and $0.10.[12] Of these, the greatest number of contracts (43,888) received no price improvement. There was an average number of five participants when the spread was between $0.05 and $0.10. When the spread was $0.01 for this same category, a total of 17,202 contracts traded; 16,032 contracts received no price improvement, and 1,170 received $0.01 price improvement. There was an average number of three participants when the spread was $0.01.

In comparison, in January 2016, where the order was on behalf of a Public Customer, and the order was for greater than 50 contracts, and ISE was at the NBBO, the most contracts traded (14,078) occurred where the spread was between $0.10 and $0.20. Of those contracts, the greatest number of

[9] The provision relating to the no minimum size requirement also requires the Exchange to submit certain data, periodically as required by the Commission, to provide supporting evidence that, among other things, there is meaningful competition for all size orders within the PIM, that there is significant price improvement for all orders executed through the PIM, and that there is an active and liquid market functioning on the Exchange outside of the PIM. Any raw data which is submitted to the Commission will be provided on a confidential basis.

[10] *See* PIM Approval Order, *supra* note 3.

[11] Specifically, the Exchange gathered and reported nine separate data fields relating to simple PIM orders of fewer than 50 contracts, including (1) the number of orders of fewer than 50 contracts entered into the PIM; (2) the percentage of all orders of fewer than 50 contracts sent to ISE that are entered into the PIM; (3) the spread in the option, at the time an order of fewer than 50 contracts is submitted to the PIM; and (4) of PIM trades, the percentage done at the NBBO plus $.01, plus $.02, plus $.03, etc. *See* PIM Approval Order, *supra* note 3.

[12] This discussion of January 2016 data is intended to be illustrative of data that was gathered between January 2016 and July 2016. The complete underlying data for January 2016 through June 2016 for these eight categories is attached as Exhibit 3a for simple orders entered in PIM, and Exhibit 3b for complex orders entered in PIM.

contracts (6,254) received price improvement of $0.05 to $0.10, and 44 contracts received no price improvement. There was an average number of 6 participants where the spread was between $0.10 and $0.20.

In January 2016, where the order was on behalf of a Public Customer, the order was for 50 contracts or less, and ISE was not at the NBBO, the most contracts traded (76,326) occurred when the spread was between $0.05 and $0.10. Of these contracts, the greatest number of contracts (18,008) received no price improvement. There was an average number of four participants when the spread was between $0.05 and $0.10. In comparison, when the spread was $0.01 in this same category, a total of 17,687 contracts traded; 17,270 of those contracts received no price improvement, and 417 of those contracts received $0.01 price improvement. There was an average number of three participants when the spread was $0.01.

In comparison, in January 2016, where the order was on behalf of a Public Customer, the order was for greater than 50 contracts, and ISE was not at the NBBO, the most contracts traded (10,541) occurred when the spread was between $0.10 and $0.20. Of these contracts, the greatest number (3,738) received price improvement of $0.05 to $0.10. There was an average number of 6 participants where the spread was between $0.10 and $0.20.

In January 2016, the greatest number of complex orders traded (2,139) traded when the spread was at $0.05. Of those orders, 181 represented orders of 50 or fewer contracts. During that period, the highest percentage (29.30%) of orders of greater than 50 contracts received $0.01 price improvement, and the highest percentage (20.4%) received no price improvement. For orders of greater than 50 contracts, the greatest number of orders (436) executed where there were no participants (besides the Electronic Access Member that entered the order). For orders of less than 50 contracts, the greatest number of orders (15) executed when there were no participants.

ISE believes that the data gathered during the Pilot period indicates that there is meaningful competition in PIM auctions for all size orders, there is an active and liquid market functioning on the Exchange outside of the auction mechanism, and that, coupled with the proposed requirements for price improvement for options orders of under 50 contracts, there are opportunities for significant price improvement for orders executed through PIM. The Exchange therefore believes that it is appropriate to approve the no-minimum size requirement on a permanent basis.

Early Conclusion of the PIM Auction

Supplemental Material .05 to Rule 723 provides that Rule 723(c)(5) and Rule 723(d)(4), which relate to the termination of the exposure period by unrelated orders shall be part of the current Pilot. Rule 723(c)(5) provides that the exposure period will automatically terminate (i) at the end of the 500 millisecond period,[13] (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series, or (iii) upon the receipt of a nonmarketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange. Rule 723(d)(4) provides that, when a market order or marketable limit order on the opposite side of the market from the Agency Order ends the exposure period, it will participate in the execution of the Agency Order at the price that is mid-way between the best counter-side interest and the NBBO, so that both the market or marketable limit order and the Agency Order receive price improvement. Transactions will be rounded, when necessary, to the $.01 increment that favors the Agency Order.[14]

As with the no minimum size requirement, the Exchange has gathered data on these three conditions to assess the effect of early PIM Auction conclusions on the Pilot.[15]

For the period from January 2016 through June 2016, there were a total of 673 early terminated auctions. The number of orders in early terminated PIM auctions constituted 0.15% of total PIM orders. There were a total of 9,595 contracts that traded through early terminated auctions. The number of contracts in early terminated PIM auctions represented 0.13% of total PIM contracts. Of the early terminated auctions, 49.93% of those auctions

[13] As initially approved, this provision of Rule 723(c)(5) provided that the exposure period would automatically terminate at the end of the three second period. *See* Securities Exchange Act Release No. 49323 (February 26, 2004), 69 FR 10087 (March 3, 2004) (Notice of filing for SR–ISE–2003–06). This exposure period was subsequently reduced to one second, and then to the current 500 milliseconds. *See* Securities Exchange Act Release Nos. 58224 (July 25, 2008), 73 FR 44303 (July 30, 2008) (SR–ISE–2007–94); 68849 (February 6, 2013), 78 FR 9973 (February 12, 2013) (SR–ISE–2012–100). The Exchange notes that it is proposing to further modify the exposure period to a time period of no less than 100 milliseconds and no more than one second. *See* Securities Exchange Act Release No. 79352 (November 18, 2016), 81 FR 85277 (November 25, 2016) (SR–ISE–2016–26).

[14] When the Pilot was initially approved, there were two sections of Rule 723(d) that were approved on a pilot basis. Rule 723(d)(5) was approved on a pilot basis, which was subsequently re-numbered as current Rule 723(d)(4). *See* Securities Exchange Act Release No. 72554 (July 8, 2014), 79 FR 40830 (July 14, 2014) (SR–ISE–2014–35). Rule 723(d)(6) was also approved on a pilot basis, but was subsequently deleted as that functionality was no longer offered on the Exchange. *See* Securities Exchange Act Release No. 68570 (January 3, 2013) (SR–ISE–2012–82).

[15] The Exchange agreed to gather and submit the following data on this part of the Pilot: (1) The number of times that a market or marketable limit order in the same series on the same side of the market as the Agency Order prematurely ended the PIM auction, and the number of times such orders were entered by the same (or affiliated) firm that initiated the PIM that was terminated; (2) the percentage of PIM early terminations due to the receipt of a market or marketable limit order in the same series on the same side of the market that occurred within a ½ second of the start of the PIM auction; the percentage that occurred within one second of the start of the PIM auction; the percentage that occurred within one and ½ second of the start of the PIM auction; the percentage that occurred within 2 seconds of the start of the PIM auction; the percentage that occurred within 2 and ½ seconds of the PIM auction; and the average amount of price improvement provided to the Agency Order where the PIM is terminated early at each of these time periods; (3) the number of times that a market or marketable limit order in the same series on the opposite side of the market as the Agency Order prematurely ended the PIM auction and at what time the unrelated order ended the PIM auction, and the number of times such orders were entered by the same (or affiliated) firm that initiated the PIM that was terminated; (4) the percentage of PIM early terminations due to the receipt of a market or marketable limit order in the same series on the opposite side of the market that occurred within a ½ second of the start of the PIM auction; the percentage that occurred within one second of the start of the PIM auction; the percentage that occurred within one and ½ second of the start of the PIM auction; the percentage that occurred within 2 seconds of the start of the PIM auction; the percentage that occurred within 2 and ½ seconds of the PIM auction; and the average amount of price improvement provided to the Agency Order where the PIM is terminated early at each of these time periods; (5) the number of times that a nonmarketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange prematurely ended the PIM auction and at what time the unrelated order ended the PIM auction, and the number of times such orders were entered by the same (or affiliated) firm that initiated the PIM that was terminated; (6) the percentage of PIM early terminations due to the receipt of a market or marketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange that occurred within a ½ second of the start of the PIM auction; the percentage that occurred within one second of the start of the PIM auction; the percentage that occurred within one and ½ second of the start of the PIM auction; the percentage that occurred within 2 seconds of the start of the PIM auction; the percentage that occurred within 2 and ½ seconds of the PIM auction; and the average amount of price improvement provided to the Agency Order where the PIM is terminated early at each of these time periods; and (7) the average amount of price improvement provided to the Agency Order when the PIM auction is not terminated early (*i.e.,* runs the full three seconds). *See* PIM Approval Order, *supra* note 3.

received price improvement, and 37.31% of contracts that traded in an early-terminated auction received price improvement. Of the PIM auctions that terminated early and received price improvement from January 2016 through June 2016, the total amount of price improvement received was $185.11.

For complex orders, in January 2016, one order terminated early, and the PIM period upon termination was greater than or equal to 0.5 seconds. That order received $0.005 price improvement.

Based on the data gathered during the pilot, the Exchange does not anticipate that any of these conditions will occur with significant frequency in either simple or complex orders, or will otherwise significantly affect the functioning of the PIM. The Exchange also notes 49.93% of auctions in simple orders that terminated early received price improvement, and that, for simple orders, 37.31% of the contracts in auctions that terminated early received price improvement, with a total price improvement of $185.11. The Exchange therefore believes it is appropriate to approve this aspect of the Pilot on a permanent basis.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[16] in general and with Section 6(b)(5) of the Act,[17] in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, or to regulate by virtue of any authority conferred by the Act matters not related to the purposes of the Act or the administration of the Exchange.

The Exchange believes that the proposed rule change is also consistent with Section 6(b)(8) of the Act [18] in that it does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Specifically, the Exchange believes that PIM, including the rules to which the Pilot applies, results in increased liquidity available at improved prices, with competitive final pricing out of the complete control of the Electronic Access Member that initiated the auction. The Exchange believes that PIM promotes and fosters competition and affords the opportunity for price improvement to more options contracts. The Exchange believes that the changes to the PIM requiring price improvement of at least one minimum price improvement increment over the NBBO for Agency Orders of less than 50 option contracts where the difference in the NBBO is $0.01 will provide further price improvement for those orders, and thereby encourage additional submission of those orders into PIM. The Exchange believes that the proposal, which subjects members to the Minor Rule Violation Plan for failing to provide the required price improvement, coupled with the Exchange's surveillance efforts, are designed to facilitate members' compliance with the proposed requirement.

The Exchange believes that approving the Pilot on a permanent basis is also consistent with the Act. With respect to the no minimum size requirement, the Exchange believes that the data gathered during the Pilot period indicates that there is meaningful competition in the PIM for all size orders, there is an active and liquid market functioning on the Exchange outside of the auction mechanism, and that there are opportunities for significant price improvement for orders executed through PIM, including for small customer orders.

With respect to the early termination of the PIM, the Exchange believes that it is appropriate to terminate an auction (i) at the end of the 500 millisecond period, (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series, or (iii) upon the receipt of a nonmarketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange. Based on the data gathered during the pilot, the Exchange does not anticipate that any of these conditions will occur with significant frequency for either simple or complex orders, or will otherwise disrupt the functioning of the PIM. The Exchange also notes that a significant percentage of contracts in auctions that terminated early received price improvement. The Exchange also believes that it is consistent with the Act to require that, when a market order or marketable limit order on the opposite side of the market from the Agency Order ends the exposure period, it will participate in the execution of the Agency Order at the price that is mid-way between the best counter-side interest and the NBBO, so that both the market or marketable limit order and the Agency Order receive price improvement.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposal will apply to all Exchange members, and participation in the PIM process is completely voluntary. Based on the data collected by the Exchange during the Pilot, the Exchange believes that there is meaningful competition in the PIM for all size orders, there are opportunities for significant price improvement for orders executed through PIM, and that there is an active and liquid market functioning on the Exchange outside of the PIM. The Exchange believes that requiring increased price improvement for Agency Orders may encourage competition by attracting additional orders to participate in the PIM. The Exchange believes that approving the Pilot on a permanent basis will not significantly impact competition, as the Exchange is proposing no other change to the Pilot beyond implementing it on a permanent basis.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

[16] 15 U.S.C. 78f.

[17] 15 U.S.C. 78f(b)(5).

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISE–2016–29 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2016–29. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ISE–2016–29 and should be submitted on or before January 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79531; File No. SR–BOX–2016–58]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing of Proposed Rule Change To Amend Interpretive Material to Rule 7150 (Price Improvement Period "PIP") and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period "COPIP") To Make Permanent the Pilot Programs That Permit the Exchange To Have No Minimum Size Requirement for Orders Entered Into the PIP ("PIP Pilot Program") and COPIP ("COPIP Pilot Program")

December 12, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2016, BOX Options Exchange LLC (the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Interpretive Material to Rule 7150 (Price Improvement Period ''PIP'') and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period ''COPIP'') to make permanent the pilot programs that permit the Exchange to have no minimum size requirement for orders entered into the PIP (''PIP Pilot Program'') and COPIP (''COPIP Pilot Program''). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at *http://boxexchange.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the BOX Rules to make permanent the pilot programs that permit the Exchange to have no minimum size requirement for orders entered into the PIP (''PIP Pilot Program'') and COPIP (''COPIP Pilot Program''), collectively known as the (''Programs''). In addition, BOX proposes to modify the requirements for the PIP where the National Best Bid and Offer (''NBBO'') is only $0.01 wide.

Background

The PIP Pilot Program was approved on a pilot basis with the establishment of BOX and the PIP in January 2004 [3] and the COPIP Pilot Program was approved on a pilot basis with introduction of the COPIP in December 2013.[4] Both Programs are scheduled to

Continued

expire on January 18, 2017.[5] The Exchange believes that both the PIP and COPIP Pilot Programs have been successful and well-received by Participants and the investing public.

The PIP and COPIP Pilot Programs guarantee Participants the right to trade with their customer orders that are less than 50 contracts. In particular, any order entered into the PIP is guaranteed an execution at the end of the auction at a price at least equal to the NBBO. Any order entered into the COPIP is guaranteed an execution at the end of the auction at a price at least equal to or better than the cNBBO,[6] cBBO[7] and BBO on the Complex Order Book for the Strategy at the time of commencement.

BOX first introduced the PIP auction process for obtaining customer price improvement to the options market place when it launched in 2004. As part of BOX's commitment to price improvement, the Exchange sought to provide small customer orders with benefits not available under the rules of the other exchanges by having no minimum size requirements for orders entered into the PIP. After concerns were raised that this lack of size requirement would promote internalization and inferior price improvement within the PIP and also lead to reduced order flow and market quality on the regular BOX Book,[8] BOX began the PIP Pilot Program.

In June of 2005 concerns were also raised when BOX introduced Market Orders[9] to the Exchange and detailed how these orders, as well BOX-Top Orders,[10] would be treated when entered while a PIP is in progress. Specifically, submission to BOX of a Market Order or BOX-Top Order on the same side as a PIP Order prematurely terminates the PIP when, at the time of submission of the Market Order or BOX-Top Order, the best Improvement Order is equal to or better than the NBBO on the same side of the market as the best Improvement Order. The Commission was concerned that this premature termination of the PIP could result in a PIP Order being disadvantaged by the early conclusion of a PIP, in that the PIP Order would not have received the full exposure period in which to receive price improvement. BOX then agreed to include in its monthly reports additional information with respect to situations in which the PIP is terminated prematurely or a Market Order or BOX-Top Order interacts with a PIP Order before the PIP's conclusion.[11]

The Exchange then established the COPIP in January 2014 to further BOX's commitment to price improvement.[12] The COPIP mechanism allows Complex Orders to be submitted to the COPIP in substantially the same manner as orders for single options series instruments currently are submitted to the PIP. Because of the similarities between the PIP and COPIP, the Exchange proposed a COPIP Pilot Program and agreed to provide certain information, periodically as required by the Commission, to support that, among other things, there is meaningful competition for all size COPIP orders, that there is significant price improvement for all orders executed through the COPIP and that an active and liquid market is functioning on BOX outside of the COPIP mechanism.

PIP Pilot Program

The Exchange believes that the data submitted to the Commission on a monthly and confidential basis for the PIP Pilot Program, as well as the data reference [sic] below covering January through June 2015 establishes that it has not placed an undue burden on competition; lessened the amount of price improvement in the PIP; nor reduced order flow and liquidity to the BOX Book. The Exchange therefore believes that it appropriate to approve the no minimum size requirement on a permanent basis. In fact, since the launch of the PIP customers have received over $841 million in savings through better executions on BOX, including $12.6 million in October 2016. Order flow and liquidity on BOX has also remained strong through this entire period, with an average daily volume of approximately 434,000 contracts for the first six ten months of 2016. Further, many of the exchanges which first raised concerns have recognized the benefits of price improvement auctions, and have adopted similar mechanisms with no minimum order size since 2004.[13] Approving the PIP Pilot Program on a permanent basis will allow the PIP to continue to offer meaningful price improvement and will not have an adverse effect on the market functioning on the Exchange outside of the PIP.

The Exchange provided the Commission with a summary report, included herein as Exhibit 3, which demonstrates the price improvement benefits of the PIP. Specifically, the Report contains eight categories of non-customer and customer auction data, as well as three categories of summary auction data, during the period January 2015 through June 2015. Each of the eight categories is divided into subcategories based on the spread of the NBBO at the time an auction was initiated. The data is further divided into the number of orders that were

auctioned within each particular subcategory. Finally, for each subcategory, Exchange identified the per contract price improvement that occurred at each NBBO spread; the average number of participants responding to the auctions plus the initiator; the total volume the initiator received; the average percentage of orders the initiator received; and the percentage of contracts received by the auction initiator.

The various categories contained in the Report include:

(1) Non-Public Customer Auction/Under 50 Contracts/BOX not at NBBO
(2) Non-Customer Auction/Under 50 Contracts/BOX at NBBO
(3) Non-Customer Auction/50 Contracts and over/BOX not at NBBO
(4) Non-Customer Auction/50 Contracts and over/BOX at NBBO
(5) Customer Auction/Under 50 Contracts/BOX not at NBBO
(6) Customer Auction/Under 50 Contracts/BOX at NBBO
(7) Customer Auction/50 Contracts and over/BOX not at NBBO
(8) Customer Auction/50 Contracts and over/BOX at NBBO
(9) Summary of all Non-Customer Auctions for the Period
(10) Summary of all Customer Auctions for the Period
(11) Summary of all Auctions for the Period

BOX believes that the data gathered demonstrates there is an active and liquid market functioning on the Exchange outside of the auction mechanism. In the period between January and June 2015, 30.5 million contracts were executed through the BOX PIP, approximately 64% of BOX total contract volume. While during this period average daily contract volume traded through the PIP fell from 339,088 contracts per day in January 2015 to 255,150 contracts per day in June 2015, overall contract volume outside of the PIP also fell during that period. Additionally, with an average number of 4.0 participants in each auction, the data shows there is meaningful competition in PIP auctions for all size orders.

The Exchange also believes there is significant price improvement and significant opportunity for price improvement in the PIP with one modification. Currently, a PIP Order may be submitted to BOX with a matching contra order (''Primary Improvement Order'') that is equal to the full size of the PIP Order and at a price equal to or better than that of the NBBO at the time of the commencement of the PIP (the ''PIP Start Price''), at any NBBO spread. BOX proposes to amend the PIP auction to reject any auction where the quoted NBBO spread [14] is less than or equal to $0.01.[15] While the Exchange believes that opportunities remain for price improvement where the NBBO spread is less than or equal to $0.01, the Exchange notes that the data for the current pilot shows small amounts of price improvement in these orders.[16]

The Exchange does believe, however, that based on the data there is significant price improvement and significant opportunity for price improvement when the NBBO spread is greater than $0.01. During the period, there was an average price improvement of $0.05 per contract for contracts executed through the PIP when BOX was at the NBBO, and $0.01 per contract for contracts executed through the PIP when BOX was not at the NBOO regardless of size.

The Exchange has also gathered data on the premature terminations in the PIP to determine if these could result in a PIP Order being disadvantaged by the early conclusion of a PIP. Between January and June 2015, the number of auctions that terminated early was less than 0.05% of all PIP auctions.

COPIP

The Exchange believes that the data submitted to the Commission on a monthly and confidential basis for the COPIP Pilot Program establishes that it has not placed an undue burden on competition; lessened the amount of price improvement in the COPIP; nor reduced order flow and liquidity to the Complex Order Book.[17] From January 2015 through June 2015 COPIP volume accounted for 41% of all Complex Order volume on BOX. Further, the average price improvement amount (when improved) was $0.11 for this same period. The Exchange believes the COPIP Pilot program does not place an undue burden on competition. In fact, the average number of responders is higher for COPIP Orders of 50 contracts and under (0.23) when compared to COPIP Orders greater than 50 contracts (0.01). While the average numbers of responders in the COPIP is lower than that of the PIP, the Exchange believes that as volume in the COPIP increases, the overall average number of responders will also increase.

The Exchange has also gathered data on the premature terminations in the COPIP to determine if these could result in a COPIP Order being disadvantaged by the early conclusion of or COPIP. Between January and June 2015, the number of auctions that terminated early was less than 0.09% of all COPIP auctions.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act,[18] in general, and Section 6(b)(5) of the Act,[19] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

In particular, the proposed change will allow the Exchange to continue the Programs free of any pilot conditions which the Exchange believes are no longer necessary. The Programs were put in place to determine the full impact that the lack of minimum size requirement would have on competitiveness and price improvement in the PIP and COPIP. The PIP Pilot Program has been in place for over ten years,[20] and the COPIP PIP Program has been in place for over two years. During these time periods there has been no evidence to suggest that the Programs have had the negative effects predicted in the comment letters.[21] As such, removal of the pilot restrictions is the logical next step.

The Exchange believes that the change to the PIP auction which will reject any auction where the quoted NBBO spread is less than or equal to $0.01 will further price improvement for PIP Orders overall. The Exchange notes that statistics for the current pilot show relatively small amounts of price improvement for these orders. The Exchange believes the proposed change will therefore increase the price improvement that orders may receive in the PIP overall.

[14] The NBBO spread is the difference between the NBBO Bid and the NBBO Ask.

[15] All PIP Auctions where the NBBO spread is more than $0.01 will continue to be allowed.

[16] During the six month time period, .05% of auctions where the NBBO spread was less than or equal to $0.01 received price improvement.

[17] The Exchange notes that the COPIP has been in place for significantly less time than the PIP and therefore has generated significantly less data. Given the similarities between the two mechanisms, the Exchange expects the COPIP, if operated on a pilot basis over a longer period of time, would generate data that is comparable to the PIP.

[18] 15 U.S.C. 78f(b).

[19] 15 U.S.C. 78f(b)(5).

[20] *See supra,* note 3.

[21] *See supra,* note 8.

Permanent approval of the Pilot Programs would continue to provide investors with real and significant price improvement regardless of the size of the order. The Exchange believes that allowing price improvement to any size order removes impediments to a free and open market and national market system, therefore creating more competition for the best execution of all orders. The Exchange also believes that making the Pilot Programs permanent does not raise any unique regulatory concerns.

Lastly, the Exchange also believes that the proposed rule change, which provides all market participants, including public investors, with opportunity to trade with small customer orders of less than 50 contracts in the PIP and COPIP, is appropriate in the public interest and for the protection of investors

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition either among BOX Participants, or among the various options exchanges, which is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the PIP and COPIP mechanisms are offered to all BOX Participants and making the Pilot Programs permanent will not impose a competitive burden on any participant. Additionally, the Exchange believes that the proposed change will not have impact on intermarket competition, as noted above many other exchanges have similar pilot programs in place in their auction mechanisms and are free to file to make these permanent as well.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BOX–2016–58 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BOX–2016–58. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BOX–2016–58 and should be submitted on or before January 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79525; File No. SR–NYSEMKT–2016–111]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Commentary .02 to Rule 960NY in Order To Extend the Penny Pilot in Options Classes in Certain Issues

December 12, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 28, 2016, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Commentary .02 to Rule 960NY in order to extend the Penny Pilot in options classes in certain issues (''Pilot Program'' or ''Pilot'') previously approved by the Securities and Exchange Commission (''Commission'') through June 30, 2017. The Pilot Program is currently scheduled to expire on December 31, 2016. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included

[22] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s (b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the Pilot Program,[4] which is currently scheduled to expire on December 31, 2016, until June 30, 2017.[5] The Exchange believes that extending the Pilot would allow for further analysis of the Pilot Program and a determination of how the Pilot Program should be structured in the future.

During this extension of the Pilot, as is the case today, the Exchange may replace any option class that is currently included in the Pilot Program and that has been delisted with the next most actively traded, multiply listed option class that is not yet participating in the Pilot Program (''replacement class''). In light of the extension, the Exchange also proposes that any replacement class would be determined based on national average daily volume in the preceding six months, and would be added on the second trading day following January 1, 2017.[6]

This filing does not propose any substantive changes to the Pilot Program: All classes currently participating will remain the same and all minimum increments will remain unchanged. The Exchange believes the benefits to public customers and other market participants who will be able to express their true prices to buy and sell options have been demonstrated to outweigh the increase in quote traffic.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)[7] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanisms of a free and open market and a national market system.

In particular, the proposed rule change, which extends the Penny Pilot Program for six months, allows the Exchange to continue to participate in a program that has been viewed as beneficial to traders, investors and public customers and viewed as successful by the other options exchanges participating in it. Accordingly, the Exchange believes that the proposal is consistent with the Act because it would allow the Exchange to extend the Pilot Program prior to its expiration on December 31, 2016. The Exchange notes that this proposal does not propose any new policies or provisions that are unique or unproven, but instead relates to the continuation of an existing program that operates on a pilot basis.

The Exchange believes that the Pilot Program promotes just and equitable principles of trade by enabling public customers and other market participants to express their true prices to buy and sell options to the benefit of all market participants.

The proposal to extend the Pilot Program is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanisms of a free and open market and a national market system, by allowing the Exchange and the Commission additional time to analyze the impact of the Pilot Program while also allowing the Exchange to continue to compete for order flow with other exchanges in option issues trading as part of the Pilot Program.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that, by extending the expiration of the Pilot Program, the proposed rule change would allow for further analysis of the Pilot Program and a determination of how the Program should be structured in the future. In doing so, the proposed rule change would also serve to promote regulatory clarity and consistency, thereby reducing burdens on the marketplace and facilitating investor protection. The Pilot Program is an industry-wide initiative supported by all other option exchanges. The Exchange believes that extending the Pilot Program would allow for continued competition between Exchange market participants trading similar products as their counterparts on other exchanges, while at the same time allowing the Exchange to continue to compete for order flow with other exchanges in option issues trading as part of the Pilot Program.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[9] and Rule 19b–4(f)(6) thereunder.[10] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[11] and Rule 19b–4(f)(6)(iii) thereunder.[12]

[4] *See* Securities Exchange Act Release No. 55162 (January 24, 2007), 72 FR 4738 (February 1, 2007) (original approval of Pilot). The Pilot has been extended several times since the original approval, the most recent extension was obtained in earlier this year. *See* Securities Exchange Act Release No. 78176 (June 28, 2016), 81 FR 43320 (July 1, 2016) (SR–NYSEMKT–2016–61) (most recent extension of the Pilot until December 31, 2016).

[5] *See* proposed Commentary .02 to Rule 960NY.

[6] *See id.* The month immediately preceding a replacement class's addition to the Pilot Program (*i.e.,* December) would not be used for purposes of the analysis for determining the replacement class. Thus, a replacement class to be added on the second trading day following January 1, 2017 would be identified based on The Option Clearing Corporation's trading volume data from June 1, 2016 through November 30, 2016. The Exchange will announce the replacement issues to the Exchange's membership through a Trader Update.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78s(b)(3)(A)(iii).

[10] 17 CFR 240.19b–4(f)(6).

[11] 15 U.S.C. 78s(b)(3)(A).

[12] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change along with a brief description and the text of the proposed rule change, at least five business days prior to the date

Continued

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[13] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–111 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–111. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549–1090 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–111 and should be submitted on or before January 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79528; File Nos. SR–DTC–2016–007; SR–FICC–2016–005; SR–NSCC–2016–003]

Self-Regulatory Organizations; The Depository Trust Company; Fixed Income Clearing Corporation; National Securities Clearing Corporation; Notice of Filing of Amendments No. 1 and Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments No. 1, Relating to Clearing Agency Investment Policy

December 12, 2016.

On August 25, 2016, The Depository Trust Company (''DTC''), Fixed Income Clearing Corporation (''FICC''), and National Securities Clearing Corporation (''NSCC,'' and together with DTC and FICC, the ''Clearing Agencies'') filed with the Securities and Exchange Commission (''Commission'') proposed rule changes SR–DTC–2016–007, SR–FICC–2016–005, and SR–NSCC–2016–003 (''Proposed Rule Changes'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] to adopt the Clearing Agency Investment Policy, which governs the investment of funds of the Clearing Agencies.

The Proposed Rule Changes were published for comment in the **Federal Register** on September 13, 2016.[3] The Commission did not receive any comments on the Proposed Rule Changes. Pursuant to Section 19(b)(2) of the Act,[4] on October 26, 2016, the Commission designated a longer period within which to approve the Proposed Rule Changes, disapprove the Proposed Rule Changes, or institute proceedings to determine whether to approve or disapprove the Proposed Rule Changes.[5] On December 7, 2016, DTC, FICC, and NSCC each filed Amendment No. 1 to their respective Proposed Rule Changes (''Amendments No. 1''), as discussed below. The Commission is publishing this notice to solicit comments on Amendments No. 1 from interested persons and is approving on an accelerated basis the Proposed Rule Changes, as modified by Amendments No. 1.[6]

I. Description of the Proposed Rule Changes and Notice of Filing of Amendments No. 1

As described by the Clearing Agencies, the Proposed Rule Changes, as modified by Amendments No. 1, would adopt the Clearing Agency Investment Policy, which would govern the management, custody, and investment of cash deposited to the respective NSCC and FICC Clearing Funds and the DTC Participants Fund,[7] the proprietary liquid net assets (cash and cash equivalents) of the Clearing Agencies, and other funds held by the Clearing Agencies pursuant to their respective rules. Investment of these funds was previously governed by the investment policy of The Depository Trust & Clearing Corporation (''DTCC''), which is the parent company of the Clearing Agencies.

The Clearing Agency Investment Policy would include, generally, a glossary of key terms, the roles and

[3] *See* Securities Exchange Act Release No. 78778 (September 7, 2016), 81 FR 62963 (September 13, 2016) (SR–DTC–2016–007; SR–FICC–2016–005; SR–NSCC–2016–003).

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 79165 (October 26, 2016), 81 FR 75865 (November 1, 2016). The Commission designated December 12, 2016, as the date by which it should approve, disapprove, or institute proceedings to determine whether to approve or disapprove the Proposed Rule Changes.

[6] Capitalized terms not defined herein are defined in the NSCC's Rules & Procedures (''NSCC Rules''), DTC's Rules, By-laws and Organizational Certificate (''DTC Rules''), FICC's Mortgage-Backed Securities Division Clearing Rules (''MBSD Rules''), or FICC's Government Securities Division Rulebook (''GSD Rules''), as applicable, *available at http://dtcc.com/legal/rules-and-procedures.*

[7] The NSCC and FICC Clearing Funds, and the DTC Participants Fund are described further in the rules of each of the Clearing Agencies. *See* Rule 4 (Clearing Fund) of the NSCC Rules, Rule 4 (Participants Fund and Participants Investment) of the DTC Rules, Rule 4 (Clearing Fund and Loss Allocation) of the GSD Rules and Rule 4 (Clearing Fund and Loss Allocation) of the MBSD Rules. *Supra,* note 6.

responsibilities of DTCC staff in administering the Clearing Agency Investment Policy, guiding principles for investments, sources of investable funds, allowable investments of those funds, limitations on such investments, authority required for those investments, and authority required to exceed established investment limits.

The Clearing Agency Investment Policy would be co-owned by DTCC's Treasury group (''Treasury'')[8] and the Counterparty Credit Risk team (''CCR'') within DTCC's Financial Risk Management group.[9] Additionally, the Clearing Agency Investment Policy would be reviewed annually and material changes would be required to be approved by the Board of Directors of each of NSCC, DTC, and FICC (''Boards''), or such other committee to which such authority may be delegated by the Boards from time to time. Future changes to the Clearing Agency Investment Policy would be subject to a subsequent rule filing and approval by the Commission.

Treasury would be responsible for identifying potential counterparties to investment transactions, establishing and managing investment relationships with approved investment counterparties, and making and monitoring all investment transactions with respect to the Clearing Agencies. Additionally, Treasury would be responsible for managing, monitoring, and internal reporting of investment capacity utilization relative to established aggregate investment limits.[10] Requests to exceed counterparty limits would be capped at a certain percent of the respective limits, as set forth in the Clearing Agency Investment Policy.

CCR would be responsible for conducting a credit review of any potential counterparty, updating those reviews on a quarterly basis, and establishing the investment limit for each counterparty approved by CCR. In conducting a credit review, CCR would evaluate the creditworthiness of counterparties based on a number of factors, including the credit ratings provided by external credit rating agencies. Counterparties generally would be required to meet a minimum external credit rating set forth in the Clearing Agency Investment Policy; however, CCR would be permitted to grant an exception to the minimum external credit rating requirement for a particular counterparty where CCR concludes that approving exposures to that counterparty would serve a valid business or investment purpose of the Clearing Agencies and the risk of loss or default to the Clearing Agencies is assessed as minimal. CCR could grant such an exception based on an assessment of the counterparty's capitalization levels, liquidity resources, earnings trends, and any other relevant information. The exception would be approved by a Managing Director in DTCC's Financial Risk Management group in accordance with the Clearing Agency Investment Policy.

Funds invested pursuant to the Clearing Agency Investment Policy would include (i) cash deposits to the respective NSCC and FICC Clearing Funds and the DTC Participants Fund, (ii) general corporate funds of each of the Clearing Agencies, (iii) NSCC's prefunded default liquidity funds raised from the private placement of unsecured debt,[11] (iv) amounts deposited with NSCC by its participants to meet Rule 15c3–3, promulgated under the Act as part of its fully-paid-for service,[12] (v) corporate action payments or principal and interest payments on Securities credited to the Accounts of DTC Participants that are received by DTC too late in the day or missing information needed for same-day allocation,[13] (vi) funds collected from DTC Participants through net funds settlement and held by DTC to cover 130 percent of the market value of ''short positions,'' [14] and (vii) cash debited from Netting Members of FICC's Government Securities Division to satisfy such members' mark-to-market deficits on forward settling transactions.[15]

The Clearing Agency Investment Policy would set forth guiding principles for the investment of funds, which include adherence to a conservative investment philosophy that places the highest priority on maximizing liquidity and avoiding risk. The guiding principles would also mandate the segregation and separation of deposits to the respective NSCC and FICC Clearing Funds and the DTC Participants Fund, so that such amounts are not commingled with each other or with other funds held by the Clearing Agencies. The guiding principles would also address the process for evaluating the credit ratings of counterparties and setting investment limits, which would be evaluated, reviewed, and approved quarterly by CCR. Finally, the guiding principles would make clear that risk of investment loss is addressed by the rules of each of the Clearing Agencies.

The Clearing Agency Investment Policy would identify permitted investments and the parameters of, and limitations on, each type of investment. In general, assets would be required to be held by regulated and creditworthy financial institution counterparties and invested in specified types of financial instruments. Permitted financial investments may include, for example, deposits with banks, including the Federal Reserve Bank of New York, collateralized reverse-repurchase agreements, direct obligations of the U.S. government, money-market mutual funds, and high-grade corporate debt.[16] Additionally, the Clearing Agencies would, pursuant to the Clearing Agency Investment Policy, be permitted to use general corporate funds, and only such funds, to enter into hedge transactions to manage certain corporate exposures, such as interest rate or foreign currency risk; hedge transactions would not be permitted to be engaged in for speculative purposes.

Investments in collateralized reverse repurchase agreements would be secured by debt obligations of the U.S. Government or Agencies guaranteed by the U.S. Government, or by mortgage pass-through obligations issued by the Government National Mortgage Association, the Federal Home Loan Mortgage Corporation, and the Federal National Mortgage Association. Collateral posted by a counterparty to a reverse repurchase agreement (whether securities or a combination of securities and cash) would be required to have a market value equal to 102 percent or greater of the cash invested. Investments

[8] Treasury is a part of the DTCC Finance Department and is responsible for the safeguarding, investment, and disbursement of funds on behalf of the Clearing Agencies and in accordance with the principles outlined in the Clearing Agency Investment Policy.

[9] Among other responsibilities, DTCC's Financial Risk Management group (formerly known as DTCC's Enterprise Risk Management group) is generally responsible for the systems and processes designed to identify and manage credit, market, and liquidity risks to the Clearing Agencies.

[10] All investments are subject to limits set by type of allowable investment and by counterparty. Investment limits are set at an aggregate DTCC-wide level and would apply to investments made by any of DTCC and each of its subsidiaries, including each of the Clearing Agencies.

[11] *See* Securities Exchange Act Release No. 75730 (August 19, 2015), 80 FR 51638 (August 25, 2015) (SR–NSCC–2015–802).

[13] *See supra,* note 6.

[14] In this context, ''short positions'' refer to Securities that have been deposited by, and credited to the Account of, a DTC Participant, pending re-registration into the name of Cede & Co., the DTC nominee, which are nevertheless permitted to be delivered to another DTC Participant; this 130 percent charge is held by DTC until the Securities are re-registered. *See supra,* note 6.

[15] *See supra,* note 6.

[16] Only general corporate funds of a Clearing Agency would be permitted to be invested in high-grade corporate debt.

would also be permitted in money market mutual funds that have a credit rating from one or more recognized rating agencies. All permitted investments would be short-term and readily accessible for liquidity, should the need arise, minimizing market risk.

Notice of Filing of Amendments No. 1

In Amendments No. 1, the Clearing Agencies make a technical correction to the proposed Clearing Agency Investment Policy. The originally filed Clearing Agency Investment Policy referenced a pending request for no action relief with the Commission regarding how NSCC would invest funds in its Fully-Paid-For Account. On December 1, 2016, the Division of Trading and Markets staff (''Division'') took a no-action position regarding how NSCC could invest funds in its Fully-Paid-For Account.[17] As such, Amendments No. 1 would amend the Clearing Agency Investment Policy to reflect that the Division took a no action position.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act [18] directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. The Commission believes the Proposed Rule Changes, as modified by Amendments No. 1, are consistent with Section 17A(b)(3)(F) of the Act and Rule 17Ad–22(d)(3),[19] as described below.

A. Consistency With Section 17A(b)(3)(F)

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds which are in the custody or control of the Clearing Agency or for which it is responsible, and, in general, to protect investors and the public interest.[20]

As described above, the investment guidelines and governance procedures set forth in the Clearing Agency Investment Policy would adhere to a conservative investment philosophy that places the highest priority on maximizing liquidity and avoiding risk to the funds in the custody of the Clearing Agencies. The Clearing Agency Investment Policy would require the segregation of funds of each Clearing Agency, including by fund type, to help ensure that the funds of one Clearing Agency would be protected from the risk of default of another Clearing Agency. Further, the Clearing Agency Investment Policy would require that each Clearing Agency invest its funds in instruments with minimal credit, market, and liquidity risks. For instance, excluding the general corporate funds of the Clearing Agencies, funds could only be invested in collateralized reverse-repurchase agreements, U.S. government debt, certain money market mutual funds, or deposited at a bank, such as the Federal Reserve Bank of New York. Additionally, the Clearing Agency Investment Policy also would require that the Clearing Agencies evaluate the credit risk of investment counterparties to help mitigate exposure of the funds to an investment counterparty default. Similarly, the Clearing Fund Investment Policy would establish investment limits by counterparty, as well as investment type, which would also help limit the Clearing Agencies' exposure to any single investment counterparty and, thus, limit potential losses of investments if a counterparty would default.

Because the Clearing Fund Investment Policy would adhere to a conservative investment philosophy that places a premium on maximizing liquidity and avoiding risk, the invested funds should be readily available to promptly facilitate end-of-day settlement, including in the event of a default by a member of a Clearing Agency. Therefore, the Clearing Agency Investment Policy would help assure the safeguarding of securities and funds in the custody and control of the Clearing Agencies, which, in turn, helps promote the prompt and accurate clearance and settlement of securities transactions by the Clearing Agencies. Likewise, the safeguarding of securities and funds in the Clearing Agencies control would further the protection of investors and the public interest by ensuring that trades are settled even in the event of a default by a member of a Clearing Agency, consistent with Section 17A(b)(3)(F) of the Act.[21]

B. Consistency With Rule 17Ad–22(d)(3)

Rule 17Ad–22(d)(3), promulgated under the Act, requires a clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to hold assets in a manner that minimizes risk of loss or delay in its access to them and to invest assets in instruments with minimal credit, market and liquidity risks.[22] As stated above, the Clearing Agency Investment Policy would follow a conservative investment philosophy, placing the highest priority on maximizing liquidity and avoiding risk of loss. The Clearing Agency Investment Policy would require the segregation of funds of each Clearing Agency, necessitate the use of external credit ratings in the evaluation of counterparties where non-general corporate funds are invested, and establish investment limits by counterparty as well as investment type. Further, the Clearing Agency Investment Policy would require that each Clearing Agency invest its funds in instruments with minimal credit, market, and liquidity risks. As such, the Clearing Agency Investment Policy is consistent with the requirements of Rule 17Ad–22(d)(3), promulgated under the Act.[23]

III. Solicitation of Comments on Amendments No. 1

Interested persons are invited to submit written data, views, and arguments concerning Amendments No. 1 to File Numbers SR–DTC–2016–007, SR–FICC–2016–005, and SR–NSCC–2016–003, including whether Amendments No. 1 are consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–DTC–2016–005, SR–FICC–2016–005, or SR–NSCC–2016–003 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2016–007, SR–FICC–2016–005, or SR–NSCC–2016–003. The file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the Proposed Rule Changes that are filed with the Commission, and all written communications relating to the Proposed Rule Changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filings also will be available for inspection and copying at the principal office of DTCC and on DTCC's Web site (*http://dtcc.com/legal/sec-rule-filings.aspx*). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–DTC–2016–007, SR–FICC–2016–005, or SR–NSCC–2016–003 and should be submitted on or before January 3, 2017.

IV. Accelerated Approval of the Proposed Rule Changes, as Modified by Amendments No. 1

The Commission, pursuant to Section 19(b)(2) of the Act,[24] finds good cause to approve the Proposed Rule Changes, as modified by Amendments No. 1, prior to the thirtieth day after the date of publication of Amendments No. 1 in the **Federal Register**. In Amendments No. 1, the Clearing Agencies make a technical correction to the Clearing Agency Investment Policy. The originally filed Clearing Agency Investment Policy referenced a pending request for no action relief with the Commission regarding how NSCC would invest funds in its Fully-Paid-For Account. On December 1, 2016, the Division took a no-action position regarding how NSCC could invest funds in its Fully-Paid-For Account.[25] As such, Amendments No. 1 would amend the Clearing Agency Investment Policy to reflect the Division's position.

As discussed more fully above, the Commission finds that the Proposed Rule Changes, as modified by Amendments No. 1, will establish a Clearing Agency Investment Policy that adheres to a conservative investment philosophy that places the highest priority on maximizing liquidity and avoiding risk to the funds in the custody of the Clearing Agencies, thereby promoting the prompt and accurate clearance and settlement of securities, consistent with Section 17A(b)(3)(F) of the Act, cited above. The Commission also finds, as discussed above, that via the Proposed Rule Changes, as modified by Amendments No. 1, NSCC will hold the described funds in a manner that minimizes the risk of loss or delay in access to them and will invest the funds in instruments with minimal credit, market and liquidity risks, consistent with Rule 17Ad–22(d)(3) of the Act, cited above. Additionally, the Commission finds that Amendments No. 1 only made a technical, non-substantive change to the Investment Policy as originally proposed. Accordingly, the Commission finds good cause for approving the Proposed Rule Changes, as modified by Amendments No. 1, on an accelerated basis, pursuant to Section 19(b)(2) of the Act.[26]

V. Conclusion

On the basis of the foregoing, the Commission finds that the Proposed Rule Changes, as modified by Amendments No. 1, are consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act[27] and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that proposed rule changes SR–DTC–2016–007, SR–FICC–2016–005, and SR–NSCC–2016–003, as modified by Amendments No. 1, be, and hereby are, *approved* on an accelerated basis.[28]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[29]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79526; File No. SR–BatsEDGX–2016–71]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Rule 21.5 of Bats EDGX Exchange, Inc. To Extend Through June 30, 2017, the Penny Pilot Program in Options Classes in Certain Issues

December 12, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 30, 2016, Bats EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to extend through June 30, 2017, the Penny Pilot Program (''Penny Pilot'') in options classes in certain issues (''Pilot Program'') previously approved by the Commission.[5]

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

[5] The rules of EDGX Options, including rules applicable to EDGX Options' participation in the Penny Pilot, were approved on August 7, 2015. *See* Securities Exchange Act Release No. 75650 (August 7, 2015), 80 FR 48600 (August 13, 2015) (SR–EDGX–2015–18). EDGX Options commenced operations on November 2, 2015. The Penny Pilot was extended for EDGX Options through December 31, 2016. *See* Securities Exchange Act Release No. 78052 (June 13, 2016), 81 FR 39731 (June 17, 2016) (SR–BatsEDGX–2016–22).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to extend the Penny Pilot, which was previously approved by the Commission, through June 30, 2017, and to provide revised dates for adding replacement issues to the Pilot Program. The Exchange proposes that any Pilot Program issues that have been delisted may be replaced on the second trading day following January 1, 2017. The replacement issues will be selected based on trading activity for the most recent six month period excluding the month immediately preceding the replacement (*i.e.,* beginning June 1, 2016, and ending November 30, 2016).

The Exchange represents that the Exchange has the necessary system capacity to continue to support operation of the Penny Pilot. The Exchange believes the benefits to public customers and other market participants who will be able to express their true prices to buy and sell options have been demonstrated to outweigh the increase in quote traffic.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[6] In particular, the proposal is consistent with Section 6(b)(5) of the Act[7] because it would promote just and equitable principles of trade, remove impediments to, and perfect the mechanism of, a free and open market and a national market system. The Exchange believes that the Pilot Program promotes just and equitable principles of trade by enabling public customers and other market participants to express their true prices to buy and sell options. Accordingly, the Exchange believes that the proposal is consistent with the Act because it will allow the Exchange to extend the Pilot Program prior to its expiration on December 31, 2016. The Exchange notes that this proposal does not propose any new policies or provisions that are unique or unproven, but instead relates to the continuation of an existing program that operates on a pilot basis.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard, the Exchange notes that the rule change is being proposed in order to continue the Pilot Program, which is a competitive response to analogous programs offered by other options exchanges. The Exchange believes this proposed rule change is necessary to permit fair competition among the options exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (A) Significantly affect the protection of investors or the public interest; (B) impose any significant burden on competition; and (C) by its terms, become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate it has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and paragraph (f)(6) of Rule 19b–4 thereunder,[9] the Exchange has designated this rule filing as non-controversial. The Exchange has given the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–BatsEDGX–2016–71 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BatsEDGX–2016–71. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. BILLING CODE 8011–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 55 (Sub-No. 767X)]

CSX Transportation, Inc.—Discontinuance of Service Exemption—in Perry County, Ky.

CSX Transportation, Inc. (CSXT), filed a verified notice of exemption under 49 CFR part 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 3.3-mile rail line on CSXT's Northern Region, Louisville Division, EK Subdivision, between milepost 0WV 242.0 and milepost 0WV 245.3 in Hazard, Perry County, Ky. (the Line). The Line traverses United States Postal Service Zip Codes 41701 and 41722. There is one station on the Line, Sigmon, located at milepost 0VD 245 (FSAC 42845/OPSL 17202).[1]

CSXT has certified that: (1) No local traffic has moved over the Line for at least two years; (2) because the Line is not a through route, no overhead traffic has operated, and, therefore, none needs to be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line is pending either with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication) and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance of service shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will be effective on January 17, 2017, unless stayed pending reconsideration.[2] Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2)[3] must be filed by December 23, 2016.[4] Petitions to reopen must be filed by January 5, 2017, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to CSXT's representative: Louis E. Gitomer, Law Offices of Louis E. Gitomer, LLC, 600 Baltimore Avenue, Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available on our Web site at ''*WWW.STB.GOV*.''

Decided: December 13, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. EP 730 (Sub-No. 1)]

Revisions to Arbitration Procedures

By decision served on September 30, 2016, as corrected on October 11, 2016, the Board adopted rules to modify its arbitration procedures so that its regulations, set forth at 49 CFR 1108 and 1115.8, conform to the requirements of the Surface Transportation Reauthorization Act of 2015, Public Law 114–110 (2015). Under Section 13 of that Act (codified at 49 U.S.C. 11708), the Board must ''promulgate regulations to establish a voluntary and binding arbitration process to resolve rail rate and practice complaints'' that are subject to the Board's jurisdiction. Section 11708(f) provides that, unless parties otherwise agree, an arbitrator or panel of arbitrators shall be selected from a roster maintained by the Board. Accordingly, the Board's rules establish a process for creating and maintaining a roster of arbitrators. *See Revisions to Arbitration Procedures,* EP 730, slip op. at 3–4 (STB served Oct. 11, 2016).

To establish the initial roster of arbitrators, the Board now seeks applications from all interested persons who wish to be included on the roster. Each applicant should describe his or her experience with rail transportation and economic regulation, as well as professional or business experience, including agriculture, in the private sector. Further, each applicant should describe his or her training in dispute resolution and/or experience in arbitration or other forms of dispute resolution, including the number of years of experience. Lastly, the applicant should provide his or her contact information and fees.

Applications should be submitted by January 17, 2017.[1] The Board will assess each applicant's qualifications to determine which individuals can ably serve as arbitrators based on the criteria established under 49 CFR 1108.6(b). The Board will then establish the initial roster of arbitrators by no-objection vote. The Board's roster will include a brief biographical sketch of each arbitrator, including information such as background, area(s) of expertise, arbitration experience, and geographical location, as well as contact information and fees, based on the information supplied by the arbitrator. The roster will be published on the Board's Web site, pursuant to 49 CFR 1108.6(b). The roster will be updated every year and may be modified by the Board at any time through a no-objection vote.

It is ordered:

1. Applications to be included on the Board's roster of arbitrators are due by January 17, 2017.

2. This decision is effective on the day of service.

[10] 17 CFR 200.30–3(a)(12).

[1] CSXT states that the Sigmon station can be closed.

[2] Although CSXT states in its verified notice that the proposed consummation date of this transaction is January 16, 2017, this transaction cannot be consummated until January 17, 2017 (50 days from its filing date). 49 CFR 1152.50(d)(2).

[3] Each OFA must be accompanied by the filing fee, which is currently set at $1,700. *See* 49 CFR 1002.2(f)(25).

[4] Because this is a discontinue proceeding and not an abandonment, interim trail use/rail banking and public use conditions are not appropriate. Because there will be an environmental review during abandonment, this discontinuance does not require an environmental review.

[1] Persons who have informally indicated an interest in being included on the arbitrator roster (*e.g.,* correspondence to Board members) should submit an application pursuant to this decision.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Raina S. Contee,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Release From Quitclaim Deed and Grant Assurance Obligations at Reno Stead Airport, Reno, Washoe County, Nevada

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of a land release.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application for a land release of approximately 0.58 acres of airport property and associated 15-foot-wide access easement owned by Reno Stead Airport, Reno, Washoe County, Nevada from the airport use provisions of the Grant Agreement Assurances since the land is not needed for airport purposes. The subject property is located approximately 0.5 miles from the Reno Stead Airport and has no identified airport-related purpose. The airport will be compensated for the fair market value of the released property. Reuse of the property will not interfere with the airport or its operation, thereby protecting the interests of civil aviation.

DATES: Comments must be received on or before January 17, 2017.

FOR FURTHER INFORMATION CONTACT: Comments on the request may be mailed or delivered to the FAA at the following address: Mike N. Williams, Manager, Airports District Office, **Federal Register** Comment, Federal Aviation Administration, Phoenix Airports District Office, 3800 N. Central Avenue, Suite 1025, Phoenix, Arizona 85012. In addition, one copy of the comment submitted to the FAA must be mailed or delivered to Ms. Lissa Butterfield, Senior Airport Planner, Reno-Tahoe Airport Authority, P.O. Box 12490, Reno, NV 89510.

SUPPLEMENTARY INFORMATION: In accordance with the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 106–181 (Apr. 5, 2000; 114 Stat. 61), this notice must be published in the **Federal Register** 30 days before the DOT Secretary may waive any condition imposed on a federally obligated airport by surplus property conveyance deeds or grant agreements.

The following is a brief overview of the request:

The Reno-Tahoe Airport Authority (RTAA) requested a release from the provisions of the Grant Agreement Assurances to permit the disposal of approximately 0.58 acres of land near Reno Stead Airport, Reno, Washoe County, Nevada to permit Artisan Communities to incorporate the 0.58-acre property into their approximately 47-acre community development. The property is located in an area zoned residential and the release will eliminate RTAA's future liability for the property since the property cannot be redeveloped for a commercial or airport purpose. The airport will be compensated for the fair market value of the released property. The RTAA supports disposal of the parcel, which has no identified airport-related purpose or future use, especially since it is 0.5 miles from the airport. Reuse of the property will not interfere with the airport or its operation, thereby protecting the interests of civil aviation. Based on the benefits of fair compensation in exchange for the land, the interests of civil aviation will be properly served.

Issued in Hawthorne, California, on December 8, 2016.

Brian Q. Armstrong,

Manager, Safety and Standards Branch, Airports Division, Western-Pacific Region.

[FR Doc. 2016–30210 Filed 12–15–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0175]

Qualification of Drivers; Exemption Applications; Implantable Cardioverter Defibrillators

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of denials of exemption applications.

SUMMARY: FMCSA announces its decision to deny applications from 11 individuals seeking exemptions from the Federal cardiovascular standard applicable to interstate truck and bus drivers and discusses the reasons for the denials. The Agency reviewed the medical information of each of the individuals who applied for an implantable cardioverter defibrillator (ICD) exemption. Based on a review of the applications and following an opportunity for public comment, FMCSA has concluded that the 11 individuals in the notice did not demonstrate they could achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation.

DATES: Denial letters were sent to each of the individuals listed in this notice on October 11, 2016.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief Medical Programs Division, 202–366–4001, U.S. Department of Transportation, FMCSA, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for up to five years if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' FMCSA can renew exemptions for up to an additional five years at the end of each five-year period.[1]

On August 8, 2016, FMCSA published for public notice and comment, FMCSA 2016–0175, listing 11 individuals seeking exemptions for ICDs. Accordingly, the Agency has evaluated each applicant's request to determine whether granting an exemption will achieve the required level of safety mandated by statute.

Evaluation Criteria—Cardiovascular Medical Standard and Advisory Criteria

The individuals included in this notice have requested an exemption from the provisions of 49 CFR 391.41(b)(4), which applies to drivers who operate CMVs in interstate commerce, as defined in 49 CFR 390.5. Section 391.41(b)(4) states that:

> A person is physically qualified to drive a commercial motor vehicle if—
>
> * * * * *
>
> that person has no current clinical diagnosis of myocardial infarction, angina pectoris, coronary insufficiency, thrombosis, or any other cardiovascular disease of a variety known to be accompanied by syncope [a temporary loss of consciousness due to a sudden decline in blood flow to the brain], dyspnea [shortness of breath], collapse, or congestive cardiac failure.

[1] 49 U.S.C. 31315(b), as amended by section 5206(a) of the FAST Act, Public Law 114–94, div. A, title V, 129 Stat. 1537 (Dec. 4, 2015).

The FMCSA provides medical advisory criteria as recommendations for use by medical examiners in determining whether drivers with certain medical conditions and drivers who have undergone certain procedures and/or treatments should be certified to operate CMVs in interstate commerce in accordance with the various physical qualification standards in 49 CFR part 391, subpart E. The advisory criteria are currently set out in Appendix A to 49 CFR part 391. The advisory criteria for section 391.41(b)(4) provide, in part, that:

The term ''has no current clinical diagnosis of'' is specifically designed to encompass: ''a clinical diagnosis of'' (1) a current cardiovascular condition, or (2) a cardiovascular condition which has not fully stabilized regardless of the time limit. The term ''known to be accompanied by'' is designed to include a clinical diagnosis of a cardiovascular disease (1) which is accompanied by symptoms of syncope, dyspnea, collapse or congestive cardiac failure; and/or (2) which is likely to cause syncope, dyspnea, collapse, or congestive cardiac failure.

It is the intent of the Federal Motor Carrier Safety Regulations to render unqualified, a driver who has a current cardiovascular disease which is accompanied by and/or likely to cause symptoms of syncope, dyspnea, collapse, or congestive cardiac failure. However, the subjective decision of whether the nature and severity of an individual's condition will likely cause symptoms of cardiovascular insufficiency is on an individual basis and qualification rests with the medical examiner and the motor carrier.

In the case of persons with ICDs, the underlying condition for which the ICD was implanted places the individual at high risk for syncope (a transient loss of consciousness) or other unpredictable events known to result in gradual or sudden incapacitation. ICDs may discharge, which could result in loss of ability to safely control a CMV. See the Evidence Report on ''Cardiovascular Disease and Commercial Motor Vehicle Driver Safety,'' April 2007.[2] A focused research report entitled ''Implantable Cardioverter Defibrillators and the Impact of a Shock on a Patient When Deployed,'' completed for the FMCSA in December 2014, indicates that the available scientific data on persons with ICDs and CMV driving does not support that persons with ICDs who operate CMVs are able to meet an equal or greater level of safety and upholds the findings of the April 2007 report. Copies of the April 2007 report and the December 2014 report are included in the docket for this notice.

[2] Now available at *http://ntl.bts.gov/lib/30000/30100/30123/Final_CVD_Evidence_Report_v2.pdf.*

Discussion of Public Comments

On August 8, 2016, FMCSA published in a **Federal Register** Notice the names of 11 individuals seeking ICD exemption and requested public comment. The public comment period closed on September 7, 2016. A total of 29 commenters responded to the notice. Each of the comments was favorable towards the applicants continuing to drive CMV's with ICD's. Many commenters believed that the individuals seeking exemptions were safe drivers with safe professional work histories, and that their exemption request should be considered on an individual case basis based on merit. Several commenters expressed that individual driving records and experience should be factors in allowing persons with ICD's to operate CMVs.

FMCSA's Response

FMCSA acknowledges the commenters' concerns. The Agency reviews and considers each applicant's request individually. Based on the available medical literature cited above, however, FMCSA believes that a driver with an ICD is at risk for incapacitation if the device discharges. This risk is combined with the risks associated with the underlying cardiovascular condition for which the ICD has been implanted as a primary or secondary preventive measure.

Conclusion

FMCSA evaluated the 11 individual exemption requests on their merits, available data from Evidence Reports and Medical Expert Panel opinions on the impact of ICDs on Commercial Motor Vehicle driving, and the public comments received. The Agency has determined that the available medical literature and data does not support a conclusion that granting these exemptions would achieve a level of safety equivalent to or greater than the level of safety maintained without the exemptions. Each applicant has, prior to this notice, received a letter of final disposition on his/her exemption request. Those decision letters fully outlined the basis for the denial and constitute final Agency action. The list published today summarizes the Agency's recent denials as required under 49 U.S.C. 31315(b)(4).

The following 11 applicants are denied exemptions from the cardiovascular standard.

Charles R. Allen (MI)
William Blake (NH)
Roosevelt Tyrone Brown (SC)
Kevin Coulter (CA)
John Dudar (CT)
Timothy Godwin (NC)
James Goslee (MD)
Richard Hacker (MD)
Kathryn Kosse (AZ)
Joseph Skrzyniarz (MI)
Wylanne Deon Sanders (IL)

Issued on: December 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions from the vision requirement in the Federal Motor Carrier Safety Regulations for 131 individuals. FMCSA has statutory authority to exempt individuals from the vision requirement if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these commercial motor vehicle (CMV) drivers.

DATES: Each group of renewed exemptions was effective from the dates stated in the discussions below. Comments must be received on or before January 17, 2017.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. [Docket No. FMCSA–1999–6480; FMCSA–2001–11426; FMCSA–2002–11714; FMCSA–2002–12844; FMCSA–

You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008 (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the vision requirements in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce, for a two-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The procedures for requesting an exemption (including renewals) are set out in 49 CFR part 381.

Exemption Decision

This notice addresses 131 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. FMCSA has evaluated these 131 applications for renewal on their merits and decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are extended subject to the following conditions: (1) That each individual has a physical examination every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the requirements in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provides a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for two years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following group(s) of drivers will receive renewed exemptions effective in the month of May and are discussed below.

As of May 7, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 11 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (69 FR 64806; 70 FR 2705; 71 FR 6826; 71 FR 19602; 72 FR 1054; 73 FR 11989; 74 FR 26464; 74 FR 60022; 75 FR 4623; 75 FR 13653; 76 FR 49528; 76 FR 61143; 76 FR 70212; 77 FR 543; 77 FR 5874; 77 FR 17107; 77 FR 17117; 78 FR 76707; 78 FR 77782; 79 FR 1908; 79 FR 10611; 79 FR 13085; 79 FR 14331; 79 FR 14333; 79 FR 14571; 79 FR 18391; 79 FR 18392; 79 FR 22003; 79 FR 28588; 79 FR 29498):

Stephan P. Adamczyk (ME)
Otto J. Ammer, Jr. (PA)
Alphonso A. Barco (SC)
Teddy S. Bioni (PA)
Darrell Canupp (MI)
John A. Carroll, Jr. (AL)
James A. Champion (WA)
Larry Chinn (WI)
Michael Gargano (FL)
Ronald L. Walker (FL)
Charles G. Warshun, Jr. (NY)

The drivers were included in one of the following dockets: Docket Nos. FMCSA–2003–16241; FMCSA–2007–28695; FMCSA–2004–19477; FMCSA–2006–23773; FMCSA–2009–0303; FMCSA–2011–0142; FMCSA–2011–0366; FMCSA–2013–0174; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0004. Their exemptions are effective as of May 7, 2016 and will expire on May 7, 2018.

As of May 11, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 15184; 77 FR 27850; 79 FR 21996):

Robert L. Brauns (IA)
Bobby R. Brooks (GA)
Clifford W. Doran, Jr. (NC)
Ryan C. Dugan (NY)
Glenn C. Grimm (NJ)
Charles J. Kennedy (OH)
Richard A. Pucker (WI)
John M. Riley (AL)
Jeffery A. Sheets (AR)

Randy L. Stevens (GA)

The drivers were included in one of the following dockets: Docket No. FMCSA–2001–0299; FMCSA–2011–0379; FMCSA–2011–0380. Their exemptions are effective as of May 11, 2016 and will expire on May 11, 2018.

As of May 12, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 14 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (67 FR 68719; 68 FR 2629; 68 FR 74699; 69 FR 10503; 69 FR 71100; 70 FR 71884; 71 FR 4632; 71 FR 6826; 71 FR 6829; 71 FR 19602; 73 FR 5259; 73 FR 11989; 73 FR 15567; 73 FR 27015; 73 FR 76440; 75 FR 9480; 75 FR 13653; 75 FR 19674; 75 FR 22176; 77 FR 17109; 77 FR 23797; 77 FR 27845; 79 FR 23797):

Leo G. Becker (KS)
Stanley W. Davis (TX)
Ray L. Emert (PA)
John W. Forgy (ID)
Julian R. Hall (TX)
Neil W. Jennings (MO)
Mark Meacham (NC)
David A. Miller (NE)
Paul D. Schnautz (TX)
William T. Smiley (MD)
Richard M. Smith (CO)
Aaron S. Taylor (WI)
William B. Thomas (SC)
Michael J. Tisher (AK)

The drivers were included in one of the following dockets: Docket No. FMCSA–2002–12844; FMCSA–2003–16564; FMCSA–2005–22727; FMCSA–2006–23773; FMCSA–2008–0021; FMCSA–2011–0380. Their exemptions are effective as of May 12, 2016 and will expire on May 12, 2018.

As of May 16, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 36 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (79 FR 14571; 79 FR 28588):

Luis A. Agudo (MN)
Dmitriy D. Bayda (WA)
Marvin J. Bensend, Jr. (MS)
Cody W. Christian (OK)
Michael T. Deaton (WI)
Billy D. Devine (WA)
James G. Donze (MO)
Jeffrey D. Duncan (IN)
Charles R. Early (IN)
Dennis A. Feather (SC)
Nicholas C. Georgen (IA)
Robert E. Johnston, Jr. (WA)
Gregory J. Kuhn (NE)
David W. Leach (IL)

John L. Meese (MO)
Thomas G. Ohlson (NY)
Robert D. Reeder (MI)
Craig Robinson (FL)
Michael E. Schlachter (WY)
Kenneth W. Sigl (WI)
Elmer F. Winters (NC)
Eugene T. Wolf (IA)

The drivers were included in one of the following dockets: Docket No. FMCSA–2014–0004. Their exemptions are effective as of May 22, 2016 and will expire on May 22, 2018.

As of May 25, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 18 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (64 FR 68195; 65 FR 20251; 67 FR 10471; 67 FR 17102; 67 FR 19798; 69 FR 17267; 69 FR 19611; 71 FR 4194; 71 FR 13450; 71 FR 14566; 71 FR 16410; 71 FR 19604; 71 FR 30227; 73 FR 27014; 75 FR 1835; 75 FR 9480; 75 FR 9482; 75 FR 22176; 75 FR 27622; 77 FR 10604; 77 FR 17108; 77 FR 20879; 77 FR 26816; 77 FR 31427):

Dwight A. Bennett (MD)
Juan Castanon (NM)
Ronald Flanery (KY)
Joshua G. Hansen (ID)
Daniel W. Henderson (TN)
Edward W. Hosier (MO)
Craig T. Jorgensen (WI)
Jose A. Lopez (CT)
Earl E. Martin (VA)
Brian E. Monaghan (IL)
Joseph C. Powell (VA)
Albert L. Remsburg, 3rd (MD)
David L. Schachle (PA)
Dennis R. Schneider (NM)
Michael See (NY)
Steven Simone (KS)
Mark Sobczyk (WI)
Frankie A. Wilborn (GA)

The drivers were included in one of the following dockets: Docket No. FMCSA–1999–6480; FMCSA–2001–11426; FMCSA–2005–23099; FMCSA–2006–24015; FMCSA–2009–0011; FMCSA–2009–0321; FMCSA–2012–0039. Their exemptions are effective as of May 25, 2016 and will expire on May 25, 2018.

As of May 30, 2016,, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 6 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (67 FR 15662; 67 FR 37907; 69 FR 26206; 71 FR 26602; 73 FR 27017; 75 FR 27621; 77 FR 27849):

Joe W. Brewer (SC)
James W. Ellis, 4th (NJ)
David A. Inman (IN)
Lawrence C. Moody (NJ)
Stanley W. Nunn (TN)
Kevin R. Stoner (PA)

The drivers were included in one of the following dockets: Docket No. FMCSA–2002–11714. Their exemptions are effective as of May 30, 2016 and will expire on May 30, 2018.

Each of the 131 applicants listed in the groups above has requested renewal of the exemption and has submitted evidence showing that the vision in the better eye continues to meet the requirement specified at 49 CFR 391.41(b)(10) and that the vision impairment is stable. In addition, a review of each record of safety while driving with the respective vision deficiencies over the past two years indicates each applicant continues to meet the vision exemption requirements.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by January 17, 2017.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 131 individuals from the vision requirement in 49 CFR 391.41(b)(10). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the qualifications, experience, and medical condition of each applicant for an exemption from the vision requirements. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket numbers FMCSA–1999–6480; FMCSA–2001–11426; FMCSA–2002–11714; FMCSA–2002–12844; FMCSA–2003–16564; FMCSA–2004–19477; FMCSA–2005–21711; FMCSA–2005–22727; FMCSA–2005–23099; FMCSA–2006–23773; FMCSA–2006–24015; FMCSA–2008–0021; FMCSA–2009–0011; FMCSA–2009–0303; FMCSA–2009–0321; FMCSA–2010–0050; FMCSA–2011–0142; FMCSA–2011–0299; FMCSA–2011–0366; FMCSA–2011–0379; FMCSA–2011–0380; FMCSA–2012–0039; FMCSA–2013–0174; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0004 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period. FMCSA may issue a final rule at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–1999–6480; FMCSA–2001–11426; FMCSA–2002–11714; FMCSA–2002–12844; FMCSA–2003–16564; FMCSA–2004–19477; FMCSA–2005–21711; FMCSA–2005–22727; FMCSA–2005–23099; FMCSA–2006–23773; FMCSA–2006–24015; FMCSA–2008–0021; FMCSA–2009–0011; FMCSA–2009–0303; FMCSA–2009–0321; FMCSA–2010–0050; FMCSA–2011–0142; FMCSA–2011–0299; FMCSA–2011–0366; FMCSA–2011–0379; FMCSA–2011–0380; FMCSA–2012–0039; FMCSA–2013–0174; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0004 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: December 2, 2016.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2016–30286 Filed 12–15–16; 8:45 am]

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions of 125 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. FMCSA has statutory authority to exempt individuals from this rule if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers.

DATES: Each group of renewed exemptions are effective from the dates

stated in the discussions below. Comments must be received on or before January 17, 2017.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018, using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *http://www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008, (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the Federal Motor Carrier Safety Regulations 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 125 individuals listed in this notice have recently become eligible for a renewed exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. The drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

Exemption Decision

This notice addresses 125 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. These 125 drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. Therefore, FMCSA has decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are renewed subject to the following conditions: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual submit an annual ophthalmologist's or optometrist's report; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following groups of drivers received renewed exemptions in the month of August and are discussed below.

As of August 6, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (77 FR 36333; 77 FR 46791):

Bruce R. Bennett (MN)
Stephen W. Best (PA)
Steven D. Hancock (IN)
Michael A. Hendrickson (OR)
James B. Hills (KS)
Charles Keegan, Jr. (NJ)
Londell W. Luther (MD)
Darrell L. Meadows (TX)
Allyn E. Smith (SD)
Jason R. Zeorian (NE)

The drivers were included in Docket No. FMCSA–2012–0162. Their exemptions are effective as of August 6, 2016 and will expire on August 6, 2018.

As of August 8, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 26 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (71 FR 32177; 71 FR 45097):

Scott R. Anderson (WI)
Robert R. Chase (NE)
Todd A. Dean (WV)
Dale R. Gansz (IL)
Donald W. Havourd, Sr. (CT)
Jeffrey M. King (OR)
Milton A. Klise (OH)
Jeffrey S. Knight (WA)
Edward V. Kruse (IA)
Lee P. Lembke (WI)
Dominick T. Mastroni (KS)
Ronald S. Mavilla (PA)
Derril W. Nunnally (GA)
Robert L. Pfugler, Jr. (PA)
Ronald B. Purdum (IL)
Wilbert C. Rasely, Jr. (PA)
Ron R. Rawson (AZ)
Duance C. Rieger (ND)
Gregory A. Rigg (MI)

Vernon L. Small (CO)
Walter D. Stowman (NJ)
Antonino S. Vita (NY)
Henry B. Walker-Waltz (OR)
Arthur C. Webber (PA)
Scott A. Wertz (ND)
Danny R. Wood (MO)

The drivers were included in Docket No. FMCSA–2006–24210. Their exemptions are effective as of August 8, 2016, and will expire on August 8, 2018.

As of August 17, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 9 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (75 FR 36775; 75 FR 50797):

Gary L. Alexander (MO)
Daniel E. Bergstresser (NY)
Stephen F. Clendenin (NY)
Donald P. Dean (MI)
Pradip B. Desai (PA)
Howard M. Galton (IL)
Steve Gumienny (CA)
Brian M. Katayama (CA)
Hubert S. Paxton (KY)

The drivers were included in Docket No. FMCSA–2010–0162. Their exemptions are effective as of August 17, 2016, and will expire on August 17, 2018.

As of August 19, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 67 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (79 FR 41723; 79 FR 56105):

Charles Ackerman Jr. (NJ)
William J. Applebee (WI)
Benjamin L. Baxter (MI)
Stephen M. Berggren (MN)
Robert A. Boyle (ID)
Patrick J. Burns (MN)
Robert L. Caudill (OH)
Charles R. Cran (WI)
John W. Crook Jr. (IA)
Kevin W. Elder (NC)
Michael J. Eldridge, Sr. (IA)
Johnathon C. Ely (IN)
Kevin D. Erickson (WI)
Joby E. Foshee, IV (MS)
Lawrence H. Fox (NH)
Troy C. Frank (NE)
Robert T. Frankfurter (CO)
Dale A. Godejohn (ND)
Robert R. Gonzales (CA)
Norman D. Groves (MO)
Kenneth F. Gwaltney (IN)
Mathew R. Hale (KS)
Donald K. Hamilton (FL)
John L. Holtzclaw (MO)
Christopher H. Horn (NH)
Jared E. Hubbard (TX)
Roger C. Hulce (VT)
Kip J. Kauffman (WI)
Christopher J. Kittoe (WI)
Joshua L. Kroetch (MN)
Wesley S. Langham (IL)
Andrew K. Lofton (AL)
Salvador Lopez (AZ)
Joseph M. Macias (NM)
Robert J. Marino (NJ)
David J. McCoy (UT)
William E. Medlin (MN)
Anthony J. Miller (MN)
Carlos A. Napoles, Jr. (NJ)
Kathryn J. Nelms (KS)
Antonio C. Oliveira (PA)
Christopher P. Overton (IL)
Ronald E. Patrick (IN)
Stephen J. Pelton (PA)
Bryant S. Perry (NC)
Kenneth R. Perschon (IL)
Joseph R. Polhamus (LA)
Brian K. Rajkovich (CA)
Joseph E. Resetar (NJ)
Rodney B. Roberts (MS)
Arlan M. Roesler (WI)
Mark J. Rone (IL)
Barry J. Sanderson (MT)
John J. Steigauf (MN)
Berton W. Stroup (PA)
Ronnie P. Thomas (TN)
William L. Thompson (MN)
Juan A. Villanueva (TX)
Robert D. Watts (TX)
Cindy L. Wells (NY)
Charles W. White (IN)
Herman D. Whitehurst (AR)
Michael G. Worl (MT)
Tommy W. Wornick (TX)
Robert T. Yeftich (IN)
Alan C. Yeomans (CT)
Chad C. Yerkey (PA)

The drivers were included in Docket No. FMCSA–2014–0018. Their exemptions are effective as of August 19, 2016, and will expire on August 19, 2018.

As of August 27, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 13 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (77 FR 40941; 77 FR 51845):

Randall W. Amtower (WV)
Steven Brickey (CO)
Ronald K. Coleman (KY)
Randall L. Corrick (ND)
Raymond G. Gravesandy (NY)
John T. Green (TX)
Gregory M. Harris (TX)
Kelly M. Keller (ND)
Joseph L. Miska (MN)
Susan L. Mosel (WI)
Jacob D. Oxford (ID)
Robert D. Regavich (NJ)
Ramon I. Zamora-Ortiz (WA)

The drivers were included in Docket No. FMCSA–2012–0163. Their exemptions are effective as of August 27, 2016, and will expire on August 27, 2018.

Each of the 125 drivers in the aforementioned groups qualifies for a renewal of the exemption. They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of the 125 drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption. The drivers were included in docket numbers FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by January 17, 2017.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 125 individuals from rule prohibiting persons with ITDM from operating CMVs in interstate commerce in 49 CFR 391.41(b)(3). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the medical condition of each applicant for an exemption from rule prohibiting persons with ITDM from operating CMVs in interstate commerce. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these

drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket numbers FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period. FMCSA may issue a final determination at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: December 2, 2016.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2016–0117]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

In accordance with part 235 of Title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated November 28, 2016, CSX Transportation (CSX) petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of a signal system. FRA assigned the petition Docket Number FRA–2016–0117.

Applicant: CSX Transportation, Mr. Jody Cox, Chief Engineer, Communications & Signals, 500 Water Street, Speed Code J—350, Jacksonville, FL 32202.

CSX seeks approval of the discontinuance of the signal system between Milepost (MP) DC32.7 end of track (EOT), and MP DC37.1, Madison Street, on the Altenheim Subdivision, Chicago Division, Chicago, IL.

Presently, CSX current of traffic (COT) 509 Rules and yard limit-signaled (YL–S) 508 Rules are in effect between Madison Street MP-DC37.1 and EOT near MP–DC–30.0 on all tracks. It is proposed to retire COT 509 and YL–S 508 Rules on all tracks and operate under Main Track Yard Limits YL 507 Rules.

The reason given for the proposed discontinuance is that the signal system, COT 509 Rules, and YL–S 508 Rules are no longer needed for present day operation.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov* and in person at the U. S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Avenue SE., W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Web site: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Operations Facility, US Department of Transportation, 1200 New Jersey Avenue SE., W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue SE., Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by January 30, 2017 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable.

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.* See also *https://www.regulations.gov/privacyNotice* for the privacy notice of *regulations.gov.*

Issued in Washington, DC.

Robert C. Lauby,

Associate Administrator for Railroad Safety, Chief Safety Officer.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD 2016–0122]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel OUTRIDER; Invitation for Public Comments

AGENCY: Maritime Administration, DOT.

ACTION: Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before January 17, 2017.

ADDRESSES: Comments should refer to docket number MARAD–2016–0122. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140,1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at *http://www.regulations.gov.* All comments will become part of this docket and will be available for inspection and copying at the above address between 10:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23–453, Washington, DC 20590. Telephone 202–366–9309, Email *Bianca.carr@dot.gov.*

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel OUTRIDER is:

—INTENDED COMMERCIAL USE OF VESSEL: Carry no more than 6 passengers for hire on an occasional basis

—GEOGRAPHIC REGION: ''Hawaii''

The complete application is given in DOT docket MARAD–2016–0122 at *http://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

Authority: 49 CFR 1.93(a), 46 U.S.C. 55103, 46 U.S.C. 12121.

By Order of the Maritime Administrator.
Dated: December 8, 2016.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

DEPARTMENT OF TRANSPORTATION

[Docket No. MARAD 2016- 0125]

Agency Requests for Renewal of a Previously Approved Information Collection(s): Requirements for Establishing U.S. Citizenship

AGENCY: Maritime Administration, DOT.

ACTION: Notice and request for comments.

SUMMARY: The Department of Transportation (DOT) invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995, Public Law 104–13.

DATES: Written comments should be submitted by February 14, 2017.

ADDRESSES: You may submit comments identified by Docket No. MARAD–2016–0125 through one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.
- *Fax:* 1–202–493–2251

FOR FURTHER INFORMATION CONTACT: Michael Pucci, 202–366–5167, Office of Maritime Program, Maritime Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, Email: *Michael.Pucci@dot.gov.* Copies of this collection also can be obtained from that office.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2133–0012.

Title: Requirements for Establishing U.S. Citizenship—46 CFR 355.

Form Numbers:

Type of Review: Renewal of an information collection.

Background: Maritime Administration implementing regulations at 46 CFR parts 355 and 356 set forth requirements for establishing U.S. citizenship in accordance with MARAD statutory authority. Those receiving benefits under 46 U.S.C. Chapters 531, 535, and 537 (formerly the Merchant Marine Act, 1936, as amended), or applicants seeking a fishery endorsement eligibility approval pursuant to the American Fisheries Act must be citizens of the United States within the meaning of 46 U.S.C. 50501, (formerly Section 2 of the Shipping Act, 1916, as amended). In either case, whether seeking program benefits or fishery endorsement eligibility, Section 50501 sets forth the statutory requirements for determining whether an applicant, be it a corporation, partnership, or association is a U.S. citizen. 46 CFR part 356 is distinguished from 46 CFR part 355 in that Part 356 establishes requirements

for U.S. citizenship exclusively in accordance with the AFA while Part 355 is applied for purposes of establishing citizenship across multiple MARAD programs arising under other statutory authority. Most program participants are required to submit to MARAD on an annual basis the form of affidavit prescribed by Part 355 or Part 356.

Number of Respondents: 500.

Frequency: Once annually.

Estimated Average Burden per Response: 5 hours.

Total Annual Burden: 2500.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for the Department's performance; (b) the accuracy of the estimated burden; (c) ways for the Department to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78) or you may visit *http://www.regulations.gov.*

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.93.

By Order of the Maritime Administrator.

Dated: December 6, 2016.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

December 12, 2016.

The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimates, or any other aspect of the information collections, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained by emailing *PRA@treasury.gov,* calling (202) 622–0934, or viewing the entire information collection request at *www.reginfo.gov.*

Internal Revenue Service (IRS)

OMB Control Number: 1545–1714.

Type of Review: Extension without change of a currently approved collection.

Title: Tip Reporting Alternative Commitment (TRAC) for most industries.

Abstract: Information is required by the Internal Revenue Service in its tax compliance efforts to assist employers and their employees in understanding and complying with section 6053(a), which requires employees to report all their tips monthly to their employers.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 4,877.

OMB Control Number: 1545–1716.

Type of Review: Extension without change of a currently approved collection.

Title: Employer-Designed Tip Reporting Program for the Food and Beverage Industry (EmTRAC)—Notice 2001–1.

Abstract: Information is required by the Internal Revenue Service in its compliance efforts to assist employers and their employees in understanding and complying with section 6053(a), which requires employees to report all their tips monthly to their employers.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 870.

OMB Control Number: 1545–1730.

Type of Review: Extension without change of a currently approved collection.

Title: Manner of making election to terminate tax-exempt bond financing.

Abstract: Section 142(f)(4) of the Internal Revenue Code of 1986 permits a person engaged in the local furnishing of electric energy or gas that uses facilities financed with exempt facility bonds under section 142(a)(8) and that expands it service area in a manner inconsistent with the requirements of sections 142(a)(8) and 142(f) to make an election to ensure that those bonds will continue to be treated as tax-exempt bonds. The final regulations (1.142(f)–1) set forth the required time and manner of making this statutory election.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 15.

OMB Control Number: 1545–1735.

Type of Review: Extension without change of a currently approved collection.

Title: Voluntary Compliance on Alien Withholding Program (''VCAP'')—Revenue Procedure 2001–20.

Abstract: The revenue procedure will improve voluntary compliance of colleges and universities in connection with their obligations to report, withhold and pay taxes due on compensation paid to foreign students and scholars (nonresident aliens). The revenue procedure provides an optional opportunity for colleges and universities which have not fully complied with their tax obligations concerning nonresident aliens to self-audit and come into compliance with applicable reporting and payment requirements.

Affected Public: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 346,500.

OMB Control Number: 1545–1862.

Type of Review: Revision of a currently approved collection.

Title: Information Regarding Request for Refund of Social Security Tax Erroneously Withheld on Wages Received by a Nonresident Alien on an F, J, or M Type Visa.

Form: Form 8316.

Abstract: Certain foreign students and other nonresident visitors are exempt from FICA tax for services performed as specified in the Immigration and Naturalization Act. Applicants for refund of this FICA tax withheld by their employer must complete Form 8316 to verify that they are entitled to a refund of the FICA, that the employer has not paid back any part of the tax withheld and that the taxpayer has attempted to secure a refund from his/her employer.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 5,625.

OMB Control Number: 1545–1872.

Type of Review: Extension without change of a currently approved collection.

Title: Request for Transcript of Tax Return.

Form: 4506–T.

Abstract: Internal Revenue Code section 7513 allows taxpayers to request a copy of a tax return or related products. Form 4506–T is used to request all products except copies of returns. The information provided will be used to search the taxpayers account and provide the requested information and to ensure that the requestor is the taxpayer or someone authorized by the taxpayer to obtain the documents requested.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 555,600.

OMB Control Number: 1545–1873.

Type of Review: Extension without change of a currently approved collection.

Title: Waivers of Minimum Funding Standards—Revenue Procedure 2004–15.

Abstract: This revenue procedure describes the process for obtaining a waiver from the minimum funding standards set forth in section 412 of the Code.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 4,730.

OMB Control Number: 1545–2040.

Type of Review: Extension without change of a currently approved collection.

Title: Automatic Consent to change certain elections relating to the apportionment of interest expense and research and experimental expenditures (RP 2006–42).

Abstract: This revenue procedure sets forth the administrative procedures for taxpayers to obtain automatic approval to change certain elections relating to the apportionment of interest expense under §§ 1.861–8T(c)(2) and 1.861–9(i)(2) and research and experimental expenditures (R&E) under § 1.861–17(e). A taxpayer complying with this revenue procedure will be deemed to have obtained the approval of the Commissioner of the Internal Revenue Service to change those elections.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 100.

OMB Control Number: 1545–2194.

Type of Review: Extension without change of a currently approved collection.

Title: Rules for Certain Rental Real Estate Activities.

Abstract: This Revenue Procedure grants relief under Section 1.469–9(g) for certain taxpayers to make late elections to treat all interests in rental real estate as a single rental real estate activity.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 1,000.

Bob Faber,

Acting Treasury PRA Clearance Officer.

Note: This is the second Federal Register's Notice sent on December 12, 2016 for the Internal Revenue Service.

[FR Doc. 2016–30260 Filed 12–15–16; 8:45 am]

DEPARTMENT OF VETERANS AFFAIRS

Health Services Research and Development Service, Scientific Merit Review Board; Notice of Meetings

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the Health Services Research and Development Service Scientific Merit Review Board will conduct in-person and teleconference meetings of its seven Health Services Research (HSR) subcommittees on the dates below from 8:00 a.m. to approximately 5:00 p.m. (unless otherwise listed) at the Hilton Crystal City, 2399 Jefferson Davis Highway, Crystal City, VA, 22202 (unless otherwise listed):

- HSR 1—Health Care and Clinical Management on March 7–8, 2017;
- HSR 2—Behavioral, Social, and Cultural Determinants of Health and Care on March 7–8, 2017;
- HSR 3—Healthcare Informatics on March 7–8, 2017;
- HSR 4—Mental and Behavioral Health on March 7–8, 2017;
- HSR 5—Health Care System Organization and Delivery on March 8–9, 2017;
- HSR 6—Post-acute and Long-term Care on March 9, 2017;
- HSR 8—Randomized Program Evaluations on March 8, 2017;
- CDA—Career Development Award Meeting on March 9–10, 2017; and
- NRI—Nursing Research Initiative from 1:00 p.m. to 5:00 p.m. on March 10, 2017.

The purpose of the Board is to review health services research and development applications involving: the measurement and evaluation of health care services; the testing of new methods of health care delivery and management; and nursing research. Applications are reviewed for scientific and technical merit, mission relevance, and the protection of human and animal subjects. Recommendations regarding funding are submitted to the Chief Research and Development Officer.
