AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* February 21, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Arlette Mussington, Office of Policy, Programs and Legislative Initiatives, PIH, Department of Housing and Urban Development, 451 7th Street SW., (L'Enfant Plaza, Room 2206), Washington, DC 20410; telephone 202–402–4109, (this is not a toll-free number). Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Mussington.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Application for the Resident Opportunities and Self Sufficiency (ROSS) Program.

OMB Approval Number: 2577–0229.

Type of Request: Revision of a currently approved collection.

Form Number: ROSS Grant Application forms: HUD 52752; HUD 52753; HUD–52755; HUD–57268; HUD–96010; SF–424; HUD–2880; HUD–2990; HUD–2991; SF–LLL, HUD–2993, HUD–2994–A.

The Department is submitting this PRA request in order to revise the HUD–52768 form in an effort to streamline the application process. In addition, ROSS will no longer be asking applicants to fill out the HUD–52754 and the HUD–52769 (the HUD–52769 form has been combined with the HUD–52768 form).

Description of the need for the information and proposed use: The forms are used to evaluate capacity and eligibility of applicants to the ROSS program.

Respondents (i.e., affected public): Public Housing Authorities, tribes/TDHEs, public housing resident associations, and nonprofit organizations.

Estimated Number of Respondents: 350.

Estimated Number of Responses: 350.

Frequency of Response: 1.

Average Hours per Response: 5 hours.

Total Estimated Burdens: 1907 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 9, 2016.

Merrie Nichols-Dixon,

Deputy Director, Office of Policy, Programs and Legislative Initiatives.

[FR Doc. 2016–30617 Filed 12–19–16; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5916–N–19]

60-Day Notice of Proposed Information Collection: Exigent Health and Safety Deficiency Correction Certification

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, PIH, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date: February 21, 2017.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–5564 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION, CONTACT: Arlette Mussington, Office of Policy, Programs and Legislative Initiatives, PIH, Department of Housing and Urban Development, 451 7th Street SW., (L'Enfant Plaza, Room 2206), Washington, DC 20410; telephone 202–402–4109, (this is not a toll-free number). Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Mussington.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is

seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Exigent Health and Safety Deficiency Correction Certification.

OMB Approval Number: 2577–0241.

Type of Request: Extension of currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: HUD's Uniform Physical Condition Standards (UPCS) regulation (24 CFR part 5, subpart G) provides that HUD housing must be decent, safe, sanitary, and in good repair. The UPCS regulation also provides that all area and components of the housing must be free of health and safety hazards. HUD conducts physical inspections of the HUD-funded housing to determine if the UPCS standards are being met. Pursuant to the UPCS inspection protocol, at the end of the inspection (or at the end of each day of a multi-day inspection) the inspector provides the property representative with a copy of the ''Notification of Exigent and Fire Safety Hazards Observed'' form. Each exigent health and safety (EHS) deficiency that the inspector observed that day is listed on the form. The property representative signs the form acknowledging receipt. PHAs are to correct/remedy/act to abate all EHS deficiencies within 24 hours. Using the electronic format, PHAs are to notify HUD within three business days of the date of inspection, which is the date the PHA was provided notice of these deficiencies, that the deficiencies were corrected/remedied/acted on to abate within the prescribed time frames (24 CFR part 902).

Respondents (*i.e.,* affected public): Public Housing Agencies.

Estimated Number of Respondents: 971.

Estimated Number of Responses: 971.

Frequency of Response: Once per year.

Average Hours per Response: .28 hours (approximately 17 minutes).

Total Estimated Burdens: Hourly cost per response is $8.36 or $8,5151.48 per year.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: *December 9, 2016.*

Merrie Nichols-Dixon,

Deputy Director, Office of Policy, Programs and Legislative Initiatives.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2016–0146; FXIA16710900000–178–FF09A30000]

Endangered Species; Marine Mammals; Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permit.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications to conduct certain activities with endangered species, marine mammals, or both. With some exceptions, the Endangered Species Act (ESA) and Marine Mammal Protection Act (MMPA) prohibit activities with listed species unless Federal authorization is acquired that allows such activities.

DATES: We must receive comments or requests for documents on or before January 19, 2017. We must receive requests for marine mammal permit public hearings, in writing, at the address shown in the **ADDRESSES** section by January 19, 2017.

ADDRESSES: *Submitting Comments:* You may submit comments by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments on Docket No. FWS–HQ–IA–2016–0146.
- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: Docket No. FWS–HQ–IA–2016–0146; U.S. Fish and Wildlife Service Headquarters, MS: BPHC; 5275 Leesburg Pike, Falls Church, VA 22041–3803.

When submitting comments, please indicate the name of the applicant and the PRT# you are commenting on. We will post all comments on *http://www.regulations.gov.* This generally means that we will post any personal information you provide us (see the Public Comments section below for more information).

Viewing Comments: Comments and materials we receive will be available for public inspection on *http://www.regulations.gov,* or by appointment, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays, at the U.S. Fish and Wildlife Service, Division of Management Authority, 5275 Leesburg Pike, Falls Church, VA 22041–3803; telephone 703–358–2095.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, (703) 358–2104 (telephone); (703) 358–2281 (fax); *DMAFR@fws.gov* (email).

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

A. How do I request copies of applications or comment on submitted applications?

Send your request for copies of applications or comments and materials concerning any of the applications to the contact listed under **ADDRESSES**. Please include the **Federal Register** notice publication date, the PRT-number, and the name of the applicant in your request or submission. We will not consider requests or comments sent to an email or address not listed under **ADDRESSES**. If you provide an email address in your request for copies of applications, we will attempt to respond to your request electronically.

Please make your requests or comments as specific as possible. Please confine your comments to issues for which we seek comments in this notice, and explain the basis for your comments. Include sufficient information with your comments to allow us to authenticate any scientific or commercial data you include.

The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) Those that include citations to, and analyses of, the applicable laws and regulations. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**) or comments

delivered to an address other than those listed above (see **ADDRESSES**).

B. May I review comments submitted by others?

Comments, including names and street addresses of respondents, will be available for public review at the street address listed under **ADDRESSES**. The public may review documents and other information applicants have sent in support of the application unless our allowing viewing would violate the Privacy Act or Freedom of Information Act. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), along with Executive Order 13576, ''Delivering an Efficient, Effective, and Accountable Government,'' and the President's Memorandum for the Heads of Executive Departments and Agencies of January 21, 2009—Transparency and Open Government (74 FR 4685; January 26, 2009), which call on all Federal agencies to promote openness and transparency in Government by disclosing information to the public, we invite public comment on these permit applications before final action is taken. Under the MMPA, you may request a hearing on any MMPA application received. If you request a hearing, give specific reasons why a hearing would be appropriate. The holding of such a hearing is at the discretion of the Service Director.

III. Permit Applications

A. Endangered Species

Multiple Applicants

The following applicants each request a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus pygargus*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: Ian Brimhall, Lakeside, AZ; PRT–12330C

Applicant: Robert Behrend, Wyalusing, PA; PRT–12499C

Applicant: Clyde Crawford, Baker, MT; PRT–11873C

Applicant: Andy Albright, Burlington, NC; PRT–10491C

Applicant: Christopher Olsen, Bend, OR; PRT–06371C

B. Endangered Marine Mammals and Marine Mammals

Applicant: British Broadcasting Corporation—Natural World-Otters, Bristol, UK; PRT–11556C

The applicant requests a permit to film up to 40 sea otters (*Enhydra lutris nereis*) within a 2-day period from a boat at between Santa Cruz and Pt. Lobos, including Elkhorn Slough Estuary, California, for the purpose of education. This notification covers activities to be conducted by the applicant over a 1-year period.

Concurrent with publishing this notice in the **Federal Register**, we are forwarding copies of the above applications to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Brenda Tapia,

Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

Endangered and Threatened Wildlife and Plants; Jaguar Draft Recovery Plan

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of our draft recovery plan for the jaguar, which is listed as endangered under the Endangered Species Act of 1973, as amended (Act). This species is currently found in 19 countries ranging from the United States to Argentina. The draft recovery plan includes specific recovery objectives and criteria to be met to enable us to remove this species from the list of endangered and threatened wildlife and plants. We request review and comment on this plan from local, State, and Federal agencies; Tribes; and the public. We will also accept any new information on the status of the jaguar throughout its range to assist in finalizing the recovery plan.

DATES: To ensure consideration, we must receive written comments on or before March 20, 2017. However, we will accept information about any species at any time.

ADDRESSES: If you wish to review the draft recovery plan, you may obtain a copy by any one of the following methods:

Internet: Access the file at either web address below *http://ecos.fws.gov/ecp0/profile/speciesProfile?spcode=A040* (scroll down to Recovery) *https://www.fws.gov/southwest/es/arizona/Jaguar.htm* (click Recovery Planning)

U.S. mail: U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; or

Telephone: (602) 242–0210.

If you wish to comment on the draft recovery plan, you may submit your comments in writing by any one of the following methods:

- *U.S. mail:* Jaguar Recovery Coordinator, at the Phoenix, AZ, address;
- *Hand-delivery:* Arizona Ecological Services Office, at the Phoenix, AZ, address;
- *Fax:* (602) 242–2513; or
- *Email: Jaguar_Recovery@fws.gov.*

For additional information about submitting comments, see the ''Request for Public Comments'' section below.

FOR FURTHER INFORMATION CONTACT: Steve Spangle, Project Leader Arizona Ecological Services, at the above address and phone number, or by email at *incomingazcorr@fws.gov.*

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Act (16 U.S.C. 1531 *et seq.*). Recovery means improving the listed species' status to the point at which listing is no longer appropriate under the criteria set out in section 4(a)(1) of the Act. The Act requires developing recovery plans for listed species, unless such a plan would not promote the conservation of a particular species. The jaguar was addressed in ''Listed Cats of Texas and Arizona Recovery Plan (with Emphasis on the Ocelot)'' (1990), but only general information and recommendations to assess jaguar status in the United States

and Mexico, and protect and manage occupied and potential habitat in the United States, were presented. No specific recovery recommendations or objectives for the jaguar were provided. In 2007, the USFWS made a determination under section 4(f)(1) of the Act that developing a formal recovery plan at this time would not promote jaguar conservation. The rationale for this determination was that for the purposes of formal recovery planning, the jaguar qualifies as an exclusively foreign species (see Memorandum for details at *http://www.fws.gov/southwest/es/arizona/Documents/SpeciesDocs/Jaguar/Exclusion%20from%20Recovery%20Planning.pdf*). The Service was subsequently litigated on this determination and the presiding judge remanded the decision regarding recovery planning back to the Service. Subsequently, in 2010, the Service made a new determination that developing a recovery plan would contribute to jaguar conservation and, therefore, the Service should prepare a recovery plan (*http://www.fws.gov/southwest/es/arizona/Documents/SpeciesDocs/Jaguar/JaguarRPmemo1-12-10.pdf*).

Species History

The jaguar is fully protected at the national level across most of its range and is recognized by a number of Federal, State, and international lists of protected species. The species was listed as endangered on March 30, 1972 (37 FR 6476), in accordance with the Endangered Species Conservation Act of 1969, a precursor to the Act. The jaguar is currently listed as an endangered species throughout its range under the Act, with critical habitat designated in the southwestern U.S. The species' current recovery priority number is 5C, indicating it has a high degree of threat due to habitat loss, a low potential for recovery, a taxonomic classification as a species, and a state of conflict between it and humans.

In addition to the listing under the Act, the jaguar is fully protected at the national level across most of its range, and in Mexico is listed as endangered by the Secretaría de Medio Ambiente y Recursos Naturales, or Federal Ministry of the Environment and Natural Resource (SEMARNAT 2010). Jaguars in Arizona are also on the Arizona Game and Fish Department's list of ''Species of Greatest Conservation Need.''

The jaguar is the largest felid in the New World (Seymour 1989). Rangewide, jaguars measure about 1.5–2.4 meters (5–8 feet) from nose to tip of tail and weigh from 36–158 kilograms (80–348 pounds) (Seymour 1989, Nowak 1999). Males are typically larger than females (Seymour 1989). The overall coat of a jaguar is typically pale yellow, tan, or reddish yellow above, and generally whitish on the throat, belly, insides of the limbs, and underside of the tail, with prominent dark rosettes or blotches throughout (Seymour 1989).

Jaguars historically ranged from the southern United States to central Argentina (Swank and Teer 1989, Caso *et al.* 2008). Currently, they range from the southwestern United States to northern Argentina, and are found in all countries historically occupied except for El Salvador and Uruguay (Zeller 2007). Tobler *et al.* (2013) estimate that more than 80 percent of the currently occupied range lies in the Amazon. The jaguar is thought to be extant (based on expert opinion) in about 11,700,000 km^2 (4,517,395 mi^2), which represents 61 percent of its historical range (Zeller 2007).

The jaguar, as a large carnivore, is more vulnerable to extinction than many other land mammals. Loss of habitat, direct killing of jaguars, and depletion of prey are the primary factors contributing to its current status; the jaguar is considered to have a decreasing population trend according to the International Union for Conservation of Nature (IUCN) (Caso et al. 2008). The legal protected status in countries throughout its range does not appear to have secured jaguars in their core or corridor areas. Small and isolated jaguar populations do not appear to be highly persistent (Haag *et al.* 2010, Rabinowitz and Zeller 2010). Additionally, jaguars require sufficient prey, and when prey is overharvested, jaguars may turn to livestock to meet their dietary needs, resulting in retaliatory killing of jaguars by humans.

While the recovery plan and strategy consider the jaguar throughout its range, the Service and Jaguar Recovery Team (JRT) focus the details of this recovery plan on the Northwestern Recovery Unit (NRU). The United States contains only a small proportion of the jaguar's range and habitat, and the Service has limited resources and little authority to address the major threats (killing and habitat destruction) to the jaguar's recovery outside its own borders. Also, our knowledge regarding the status of the species in much of its range is very limited, and we lack the resources and authority to coordinate large-scale international research and recovery for the entire species. The management and recovery of listed species outside of United States borders, including the jaguar, are primarily the responsibility of the countries in which the species occur, with the help, as appropriate, of available technical and monetary assistance from the United States. However, we have an established relationship with Mexico to address a number of issues of mutual concern, including managing cross-border populations of rare and endangered species. Thus, it is appropriate to focus our efforts and resources on conservation of the jaguar in the northwestern part of its range (the NRU) as our contribution toward an international effort to conserve and recover the jaguar rangewide. We therefore focused this plan primarily on the NRU, which covers portions of the United States and Mexico, but also include recommendations for the Pan-American Recovery Unit (PARU), which includes the rest of the species' range.

Recovery Plan Goals

The recovery goal is to ultimately delist the jaguar. To achieve that goal, viable jaguar populations should be secured throughout their range by removing, reducing, and mitigating the primary threats to the jaguar (habitat loss and fragmentation, illegal killing, and unsustainable depletion of jaguar prey resources). This will require protecting jaguar habitat quantity, quality, and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. These protections are needed and must remain in place after delisting to ensure the long-term viability of the species. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat (including core and connective areas) and populations will be critical to the recovery of jaguars.

To achieve that goal, the recovery plan for the jaguar identifies the following Recovery Objectives:

(1) Ascertain the status and conservation needs of the jaguar.

(2) Assess and maintain or improve genetic fitness, demographic conditions, and the health condition of the jaguar.

(3) Assess and maintain or improve the status of native prey populations.

(4) Assess, protect, and restore quantity, quality, and connectivity of

habitat to support viable populations of jaguars.

(5) Assess, minimize, and mitigate the effects of expanding human development on jaguar survival and mortality where possible.

(6) Minimize direct human-caused mortality of jaguars.

(7) Ensure long-term jaguar conservation through adequate funding, public education and outreach, and partnerships.

(8) Practice adaptive management in which recovery is monitored and recovery tasks are revised by the USFWS in coordination with the JRT as new information becomes available.

The draft recovery plan contains recovery criteria based on stabilizing or improving current populations, protecting habitat, and reducing threats to the species. To achieve recovery criteria, various management actions are needed. When the status of the jaguar meets these criteria, the species will no longer meet the conditions of being endangered throughout a significant portion of its range and will no longer warrant listing.

Request for Public Comments

Section 4(f) of the Act requires us to provide public notice and an opportunity for public review and comment during recovery plan development. It is also our policy to request peer review of recovery plans (July 1, 1994; 59 FR 34270). We will summarize and respond to the issues raised by the public and peer reviewers and post our responses on our Web site. Substantive comments may or may not result in changes to the recovery plan; comments regarding recovery plan implementation will be forwarded as appropriate to Federal or other entities so they can be taken into account during the course of implementing recovery actions. Responses to individual commenters will not be provided, but we will provide a summary of how we addressed substantive comments on our Web site (*https://www.fws.gov/southwest/es/arizona/Jaguar.htm*).

We invite written comments on the draft recovery plan. In particular, we are interested in additional information regarding the current threats to the species and the costs associated with implementing the recommended recovery actions.

Before we approve our final recovery plan, we will consider all comments we receive by the date specified in **DATES**. Methods of submitting comments are in the **ADDRESSES** section.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials we receive will be available, by appointment, for public inspection during normal business hours at our office (see **ADDRESSES**).

Middlesex County, Massachusetts

The plat of survey represents the dependent resurvey of Hanscom Air

Force Base Middlesex County, in the State of Massachusetts, and was accepted September 29, 2016. We will place a copy of the plat we described in the open files. It will be available to the public as a matter of information.

If BLM receives a protest against this survey, as shown on the plat, prior to the date of the official filing, we will stay the filing pending our consideration of the protest. We will not officially file the plat until the day after we have accepted or dismissed all protests and they have become final, including decisions on appeals.

Dominica VanKoten,

Chief Cadastral Surveyor.

BILLING CODE P

DEPARTMENT OF INTERIOR

National Park Service

[PPSESEROC3, PPMPSAS1Y.YP0000; NPS–SERO–BISO–021991]

Assessment of Eligible and Ineligible Lands for Consideration as Wilderness Areas: Big South Fork National River and Recreation Area and Obed Wild and Scenic River

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent.

SUMMARY: The National Park Service (NPS) intends to assess lands within the authorized boundaries of Big South Fork National River and Recreation Area and Obed Wild and Scenic River for wilderness eligibility.

DATES: It is anticipated that the assessments for both parks will be completed by October 1, 2017.

ADDRESSES: Interested individuals, organizations, and agencies are encouraged to provide written comments or suggestions to assist the NPS in determining the scope of issues related to the eligibility of land considered as wilderness at Big South Fork National River Recreational Area and Obed Wild and Scenic River. Written comments may be sent to: Superintendent, 4564 Leatherwood Road, Oneida, Tennessee 37841.

FOR FURTHER INFORMATION CONTACT: Suggestions, comments, and requests for further information should be directed to Big South Fork National River and Recreation Area Superintendent Niki Stephanie Nicholas, by phone at 423–569–9778, via email at *BISO_Superintendent@nps.gov,* or by mail at Big South Fork National River and Recreation Area, 4564 Leatherwood Road, Oneida, Tennessee 37841.

SUPPLEMENTARY INFORMATION: Pursuant to the Wilderness Act of 1964, and in accordance with NPS *Management Policies* (2006), Section 6.2.1, the NPS intends to assess all lands within the authorized boundaries of Big South Fork National River and Recreation Area and Obed Wild & Scenic River for wilderness eligibility. A determination of eligibility and subsequent future actions will be announced in the **Federal Register** upon completion of the assessment.

Dated: December 7, 2016.

Barclay C. Trimble,

Deputy Regional Director, Southeast Region.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR08100000, 17XR0680A1, RY.1541CH20.WA01701]

Announcement of Requirements and Registration for a Prize Competition Titled: Sub-Seasonal Climate Forecast Rodeo

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation is announcing the following prize competition, Sub-Seasonal Climate Forecast Rodeo. This Challenge seeks to improve on existing sub-seasonal forecasts and asks Solvers (*i.e.,* competitors in the Challenge) to develop systems that perform demonstratively better than existing baseline forecasts for temperature and precipitation over a 15–42-day time frame. Solvers will have approximately 3 months to develop their system, at which point they are asked to provide forecasts every 2 weeks over a 13-month period, with the first month being a ''pre-season'' to become familiar with the submission and evaluation processes.

DATES: Listed below are the specific dates pertaining to this prize competition. Please note that times in meteorology are based upon a world-wide 24-hour clock called Zulu time (Z). Additional detail on Zulu time is available in the **SUPPLEMENTARY INFORMATION** section of this notice.

1. First forecast due on or before 0Z (Zulu) March 21, 2017 (pre-season), and 0Z April 18, 2017 (actual competition).

2. Final forecast and hind-cast due on or before 0Z April 3, 2018.

3. Final submission due on or before 11:59 p.m. (U.S. Eastern Time) May 3, 2018.

4. Judging period ends on August 3, 2018.

5. Winners announced on or before September 5, 2018.

ADDRESSES: The *Sub-Seasonal Climate Forecast Rodeo* Prize Competition will be posted on the following crowd-sourcing platforms where Solvers can register for this prize competition:

1. The Water Pavilion located at the InnoCentive Challenge Center: *www.innocentive.com/water-pavilion/.*

2. U.S. Federal Government Challenge Platform: *www.Challenge.gov.* InnoCentive, Inc. is administering this challenge under a challenge support services contract with the Bureau of Reclamation. *Challenge.gov* will re-direct the Solver community to the InnoCentive Challenge Center as the administrator for this prize competition. Additional details for this prize competition, including background information, templates, and the Challenge Agreement specific for this prize competition, can be accessed through either of these prize competition web addresses. The Challenge Agreement contains more details of the prize competition rules and terms that Solvers must agree with to be eligible to compete.

Information pertaining to this competition will be posted to the Bureau of Reclamation's current prize competitions Web page at *www.usbr.gov/research/challenges/current/.*

FOR FURTHER INFORMATION CONTACT: Challenge Manager: Dr. David Raff, Science Advisor, Bureau of Reclamation, (202) 440–1284, *draff@usbr.gov;* Ken Nowak (303) 445–2197, *knowak@usbr.gov.*

SUPPLEMENTARY INFORMATION: The Bureau of Reclamation (Reclamation) is announcing the following prize competition in compliance with 15 U.S.C. 3719, Prize Competitions. The intent is to spur innovation toward improved forecasts of temperature and precipitation using a real-time competition and cash prizes as incentives.

Prize Competition Summary: Improved sub-seasonal forecasts for weather and climate conditions (lead-times ranging from 15 to 45 days and beyond) would allow water managers to better prepare for shifts in hydrologic regimes such as the onset of drought or occurrence of wet weather extremes. The challenge with sub-seasonal weather and climate forecasting is that it encompasses the time frame where initial state or condition information, such as coupled land-atmosphere processes becomes less important, and

slowly varying long term states, such as sea surface temperature, soil moisture, and snowpack, become more important to predictions. In addition, the relative importance of the initial state or condition, versus the longer term state, depends on the lead time, region of interest, and time of year.

Accurate sub-seasonal weather forecasting has proven to be particularly difficult to accomplish but is of great interest to water managers tasked with predicting sub-seasonal streamflow and water supply. Sub-seasonal forecasting, which spans approximately 15 to 45 days in the future, is difficult because it bridges short-term forecasting, where initial conditions primarily determine upcoming weather, and long-term forecasting in which slowly varying factors become more important.

This Challenge is asking Solvers to develop systems that improve upon existing sub-seasonal temperature and precipitation forecasts. Solvers are not required to develop entire systems from scratch. Methods could include, but are not limited to, approaches for improving the accuracy of existing sub-seasonal forecasts, techniques that leverage climate teleconnections, or statistical models. This Challenge will be active for approximately 17 months, starting with a 3-month development period followed by a 1-month ''pre-season'', and a 12-month competition period. Following the competition period, Solvers will have 1 month to prepare final submissions. During the competition period, Solvers will be required to upload sub-seasonal forecasts every 2 weeks. An online leaderboard hosted by the National Integrated Drought Information System at *drought.gov* will track and display Solvers' performance for the duration of the competition period. Please note that InnoCentive usernames will be shared with the National Oceanic and Atmospheric Administration (NOAA) as part of the forecast evaluation process and leaderboard tracking. At the conclusion of the competition period, a final submission is required.

Prizes total $800,000. Four categories are defined by two forecast outlook periods and two forecast variables (temperature and precipitation). In each category, prizes for eligible solvers are as follows:

1st place—$100,000

2nd place—$50,000

3rd place—$25,000

In addition, one $25,000 prize per category may be awarded to an eligible solver based solely on hind-cast performance, submission of which is a requirement to be eligible for the above listed prizes.

Final submissions to the Challenge should include the following:

1. The detailed description of the proposed Solution addressing the specific Technical Requirements that are presented in the Detailed Description of the Challenge. This description should be accompanied by a well-articulated rationale for the proposed Solution.

2. Locally executable application and corresponding source code to implement the proposed Solution that are documented.

3. Proof-of-concept data obtained as outlined in the Detailed Description of the Challenge.

The Challenge award is contingent upon theoretical evaluation and operational validation of the submitted Solutions by the Seeker (Reclamation).

To receive an award, the Solvers will grant to the Seeker a non-exclusive license to practice their solutions and make the solution available as open source software licensable under either Berkeley Software Distribution or General Public License Open Source license.

Technical Requirements. Water managers and other users have indicated that they want the existing forecasts to be better rather than wanting the development of new forecast systems. Therefore, this competition seeks new and novel forecast method(s) to improve the forecasting of precipitation and temperature that can be incorporated into existing frameworks relied upon for water management. Solvers may leverage existing forecasts or ensembles in their solution, but must be able to demonstrate appreciable value added by the solution relative to any input or foundational framework. Specifically, the competition desires solutions that can outperform current operational forecasts (including forecasts from operational centers outside the U.S.) and a damped persistence forecast at a 1x1 degree gridded resolution for the western United States at two forecast outlooks: 15–28 days (weeks 3–4) and 29–42 days (weeks 5–6) for temperature and precipitation. Overall skill-spatially and across a range of weather/climate conditions- is most important. The ability to skillfully forecast extreme conditions is also very desirable. Any system that meets these criteria is sought.

Evaluation criteria. Forecast skill will be evaluated for temperature and precipitation separately since the drivers responsible for prediction of these variables are different and the subsequent skill level is also expected to be different. Moreover, the 15–28-day and 29–42-day periods will be evaluated individually for similar reasons. Winning forecasts must outperform NOAA's sub-seasonal modeling system, the Climate Forecast System Version 2 (CFSv2) and damped persistence forecasts (see definitions below). Specifically, skill will be evaluated individually for temperature and precipitation for weeks 3–4 and weeks 5–6 as the highest skill over the competition's identified geographic area, averaged over the entire competition time period. To be prize eligible, Solvers must also demonstrate historical skill of statistical significance that is equal to or greater than that of the CFSv2 through submission of a hind-cast analysis described below.

Definitions.

- *Anomaly* is defined as the difference between a given value and climatology for a specific location (grid cell by grid cell) and time.
- *Climatology* is defined as average temperature and precipitation for a specific 2-week period as computed from the Climate Prediction Center's daily unified gauge data set for precipitation at *ftp://ftp.cpc.ncep.noaa.gov/precip/CPC_UNI_PRCP/GAUGE_GLB/,* and the Climate Prediction Center's global gridded temperature data set over the 30 year period of 1981–2010 at *ftp://ftp.cpc.ncep.noaa.gov/precip/wd52ws/global_temp/.*
- A *damped persistence forecast* will be represented using seasonally developed regression coefficients based on the historical climatology period of 1981–2010 that relate observations of the past 2 weeks to the forecast outlook periods on a grid cell by grid cell basis.
- *Skill* is defined as spatial anomaly correlation, averaged over time. Final competition standings will be the average spatial anomaly correlation of all 26 forecasts issued for the western U.S. geographic area, as defined by the forecast submission template.

The CFSv2 forecasts at *https://www.ncdc.noaa.gov/data-access/model-data/model-datasets/climate-forecast-system-version2-cfsv2* will be combined into a forecast baseline over the same time period as Solver submissions using an ensemble mean of the 32 ensemble-member forecasts leading up to each competition submission. The CFSv2 is run out to 45 days, 4 times daily, with four initial conditions per run for a total of 16 forecasts per day. For example, for a forecast due March 1st, the 16 CFSv2 ensemble-member forecasts issued on February 27 and the 16 CFSv2 ensemble-member forecasts issued on

February 28 will be averaged together for each grid and over the two forecast-periods to become the forecast baseline for the March 1st due date. Further, the ensemble mean will be bias corrected using the method employed by NOAA's Climate Prediction Center in developing their operational forecasts. Specifically, this process involves comparing the CFSv2 reforecasts for the period of 1999–2010 with observed data to establish and correct daily bias on a grid cell by grid cell basis. This is done for temperature and precipitation at both forecast outlook periods.

Forecast submission requirements and instructions. Over the course of this Challenge, Solvers will be required to submit 2 pre-season forecasts and 26 forecasts during the year-long competition, for each of the four categories detailed above and must meet the following requirements:

1. Beginning at the start of the competition period and every 2 weeks thereafter (see below for required submission deadlines) for the duration of the competition, Solvers will submit 1x1 degree gridded forecasts corresponding to western U.S. competition geographic area as defined by the forecast template available on Reclamation's current competitions Web page listed in the **ADDRESSES** section of this notice for:

a. Average temperature (degrees C) for days 15–28.

b. Cumulative precipitation (millimeters) for days 15–28.

c. Average temperature (degrees C) for days 29–42.

d. Cumulative precipitation (millimeters) for days 29–42.

2. To be eligible for an award, Solvers must submit all 26 forecasts on time. A grace of two missed forecast per category will be allowed. For the purpose of computing skill, climatology will be substituted for a missed forecast. More than two missed forecast in any category will result in disqualification.

3. Forecast submissions will be made through a portal hosted by NOAA and must utilize the supplied template, available on Reclamation's current prize competitions Web page.

4. The first month of the 13-month competition period (*i.e.* the first two forecasts) will be considered a 'pre-season' for Solvers to become familiar with the submission process and will not count toward their standing in the competition or against the two missed forecast grace described above.

Forecast submission deadlines. The forecast competition will run for 1 year following the 'pre-season' with new forecast submissions required every 2 weeks. All forecasts need to be received by 0Z on the day of the required forecast submission. All aspects of meteorology are based upon a world-wide 24-hour clock called Zulu time (Z), more commonly called Coordinated Universal Time (UTC). More information on this topic is available on the National Weather Service Web site at *http://www.srh.noaa.gov/jetstream/synoptic/time.html*, including conversion to common U.S. time zones. Specific forecast submission deadlines, including dates and times, will be available on Reclamation's current prize competitions Web page listed in the **ADDRESSES** section of this notice, the first of which is due approximately 3 months following the announcement of this challenge.

In addition to requirements listed above for the forecast submissions, proposed solutions must meet the following Technical Requirements:

1. For first, second or third place, systems must outperform, based on the formula described above, cumulatively over the competition time period, the CFSv2 baseline and damped persistence forecasts for at least one category: Week 3–4 temperature, week 5–6 temperature, week 3–4 precipitation, or week 5–6 precipitation.

2. Must demonstrate historical skill of statistical significance that is equal to or greater than that of the CFSv2 through submission of a hind-cast analysis. The CFSv2 reforecasts at *http://nomads.ncdc.noaa.gov/thredds/catalog/cfsr-hpr-ts45/catalog.html* will provide the baseline for the hind-cast, in the same way that the CFSv2 forecasts provide a baseline for the real-time competition. Two notable distinctions between the CFSv2 forecasts and reforecasts are (1) the reforecast baseline will be based on a mean of 8 ensemble members (only one set of initial conditions were used, thereby producing 4 reforecasts per day) and (2) bias correction to the reforecast will be developed and applied for each reforecast year independently, so as to not leverage knowledge of that year's reforecast performance toward bias correcting itself. Note that skill and prize eligibility will be evaluated for each category individually—*i.e.* to be prize eligible in a particular category, Solvers need only outperform the CFSv2 in that category. To do this, Solvers will submit, hind-casts for the four categories, issued every 2 weeks, for the period of 1999–2010, no later than the Challenge final forecast due date. The hind-cast should be performed as a ''leave one out cross validation.'' This is accomplished by removing one year of observed historical data from the period of 1999–2010, calibrating the model based on the remaining years of data, and forecasting that year. Hind-casts are to be issued at the month/day combinations specified in the forecast submission deadlines referenced above. Given the dates of the competition, each hind-cast will span 2 calendar years, thereby resulting in 11 1-year hind-cast periods for the ''leave one out cross validation.'' This process should be repeated until forecasts have been issued for all 11 years. Solvers will submit one historical hind-cast per category for the 11 years. For more information on this technique, see the discussion on cross-validation by Clarke et al. in *Principles and Theory for Data Mining and Machine Learning* (2009).

3. Solvers may utilize any available sub-seasonal forecast as the starting point for their system, but must demonstratively improve upon that forecast.

4. Must be written in C++, R, python, Fortran, or other widely recognized programming languages and be licensable under either Berkeley Software Distribution or General Public License Open Source license.

5. Solvers with winning solutions are required to provide all code, data, and other components of their forecast system necessary to run the system and reproduce the forecasts issued in the competition. Failure of code to reproduce performance during the competition or for the hind-cast may result in disqualification. Furthermore, the Solvers may be required to iterate with competition judges to ensure documentation is sufficient.

Project Deliverables: In addition to the hind-casts, 2 pre-season forecast submissions, and 26 forecast submissions during the year-long competition, Solvers must submit a final proposed Solution by the Challenge deadline. The submitted proposal should include the following:

1. Detailed description of a sub-seasonal forecasting system that meets the Technical Requirements listed in the Detailed Description and Requirements section of the Challenge.

2. A well-reasoned rationale supporting the methodology of the proposed system and addressing each of the Technical Requirements described in the Detailed Description.

3. Locally executable application and corresponding documented source code implementing the proposed Solution.

The Seeker may wish to partner with the Solver at the conclusion of the Challenge. Solver should describe their expertise and include a statement indicating their interest in this opportunity.

The proposal *should not* include any personal identifying information (name, username, company, address, phone, email, personal Web site, resume, *etc.*) or any information the Solvers may consider as their Intellectual Property they do not want to share.

Judging: An online leaderboard hosted by the National Integrated Drought Information System will track and display Solvers' performance for the duration of the competition period. The Challenge award is contingent upon theoretical evaluation and operational validation of the submitted Solutions by the Seeker. If multiple proposals meet all the Solution Requirements, the Seeker reserves the right to award only the top three solutions per category which they believe are of sound technical foundation. After the Challenge final submission deadline, submissions will be identified as potentially prize eligible, as determined by the quantitative forecast evaluation performed by NOAA and described above. Of those potentially prize eligible solutions, the Judging Panel will evaluate each with respect to the Solution Requirements and make a decision on winning solution(s). The Judging Panel may be composed of Federal and/or Non Federal scientists, engineers, and other technical experts, including subject matter experts from the listed collaborators for this Challenge. All Solvers that submit a proposal will be notified on the status of their submissions. Decisions by the Seeker cannot be contested.

Eligibility Rules: To be able to win a prize under this competition, an individual or entity must:

1. Agree to the rules of the competition (15 U.S.C. 3719(g)(1));

2. Be an entity that is incorporated in and maintains a primary place of business in the United States, or (b) in the case of an individual, a citizen or permanent resident of the United States (15 U.S.C. 3719(g)(3)).

However, submissions can be entertained from all Solvers regardless of whether they are U.S. citizens/entities. Meritorious submissions from non-eligible persons and entities, if any, will be recognized in publications issued by the Seeker announcing the results of the competition, such as press releases. Non-U.S citizens/permanent residents or non-U.S entities can also be included on U.S. teams. However, prizes—whether monetary or otherwise—will only be awarded to eligible persons and entities under the authority of the America COMPETES Reauthorization Act of 2010 (15 U.S.C. 3719).

3. Not be a Federal entity or Federal employee acting within the scope of their employment (15 U.S.C. 3719(g)(4)). A Federal entity is defined by 5 U.S.C. Appendix 8G with a list of current Federal entities periodically posted on the **Federal Register**.

4. Assume risks and waive claims against the Federal Government and its related entities (15 U.S.C. 3719(i)(1)(B)); and,

5. Not use Federal facilities, or consult with Federal employees during the competition unless the facilities and employees are made available to all individuals and entities participating in the competition on an equitable basis.

The following individuals or entities are not eligible regardless of whether they meet the criteria set forth above:

1. Any individual or organization who employs an evaluator on the Judging Panel or otherwise has a material business relationship or affiliation with any Judge.

2. Any individual who is a member of any Judge's immediate family or household.

3. The Seeker, participating organizations, and any advertising agency, contractor or other individual or organization involved with the design, production, promotion, execution, or distribution of the prize competition; and all employees, and all members of the immediate family or household of any such individual or organization.

4. Any individual or entity that uses Federal funds to develop the proposed solution now or any time in the past, unless such use is consistent with the grant award, or other applicable Federal funds awarding document. **Note:** Individuals or entities that have been funded by the Federal Government in the past to work within the technical domain of the competition are eligible provided their specific submission was not developed by them with Federal funds. Submissions that propose to improve or adapt existing federally funded technologies for the solution sought in this prize competition are also eligible. Individuals are also encouraged to consult with their employer Ethics Officer for additional guidance and considerations.

Consultation: Reclamation and collaborator scientists, engineers, and technical specialists were consulted in identifying and selecting the topic of this prize competition. Direct and indirect input from various stakeholders and the broader water resources community of practice were also considered.

Public Disclosure: InnoCentive, Inc. is administering this challenge under a challenge support services contract with Reclamation. Participation is conditioned on providing the data required on InnoCentive's online registration form. Personal data will be processed in accordance with InnoCentive's Privacy Policy which can be located at *http://www.innocentive.com/privacy.php.* Before including your address, phone number, email address, or other personal identifying information in your proposal, you should be aware that the Seeker is under no obligation to withhold such information from public disclosure, and it may be made publicly available at any time. Neither InnoCentive nor the Seeker is responsible for human error, theft, destruction, or damage to proposed solutions, or other factors beyond its reasonable control.

Liability and Indemnification: By participating in this Challenge, each Solver agrees to assume any and all risks and waive claims against the federal government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from participation in this Challenge, whether the injury, death, damage, or loss arises through negligence or otherwise. By participating in this Challenge, each Solver agrees to indemnify the federal government against third party claims for damages arising from or related to Challenge activities

No Insurance Required: Based on the subject matter of the Challenge, the type of work that it will possibly require, as well as an analysis of the likelihood of any claims for death, bodily injury, or property damage, or loss potentially resulting from competition participation, Solvers are not required to obtain liability insurance or demonstrate financial responsibility in order to participate in this Challenge.

Dated: December 7, 2016.

Levi Brekke,

Acting Science Advisor.

BILLING CODE 4332–90–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–457–A–D (Fourth Review)]

Heavy Forged Hand Tools From China

Determinations

On the basis of the record [1] developed in the subject five-year reviews, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping duty orders on heavy forged hand tools from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission, pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)), instituted these reviews on July 1, 2016 (81 FR 43235) and determined on October 4, 2016, that it would conduct expedited reviews (81 FR 73417, October 25, 2016).

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on December 15, 2016. The views of the Commission are contained in USITC Publication 4654 (December 2016), entitled *Heavy Forged Hand Tools from China: Investigation Nos. 731–TA–457–A–D (Fourth Review).*

By order of the Commission.

Issued: December 15, 2016.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2016–30636 Filed 12–19–16; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–988]

Certain Pumping Bras Commission Determination To Review In-Part an Initial Determination Granting Complainant's Motion for Summary Determination of Section 337 Violation by Defaulted Respondents

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review in-part an initial determination (''ID'') (Order No. 11) of the presiding administrative law judge (''ALJ'') granting Complainant's motion for summary determination of section 337 violation by Respondents found in default. On review, the Commission has determined to modify the ID to set aside the expenses relating to Complainant's patent and trademark prosecution and maintenance in the ID's domestic industry analysis. The Commission has determined not to review the remainder of the ID. The Commission's determination results in a determination of a violation of section 337. Accordingly, the Commission requests written submissions, under the schedule set forth below, on remedy, the public interest, and bonding.

FOR FURTHER INFORMATION CONTACT: Houda Morad, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–4716. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted Investigation No. 337–TA–988 on March 14, 2016, based on a complaint filed by Complainant Simple Wishes, LLC (''Simple Wishes'') of Sacramento, California. *See* 81 FR 13419–20 (Mar. 14, 2016). The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), based upon the importation into the United States, the sale for importation, and/or the sale within the United States after importation of certain pumping bras by reason of infringement of certain claims of U.S. Patent No. 8,323,070 (''the '070 patent'') and U.S. Patent No. 8,192,247 (''the '247 patent''). *Id.* The notice of investigation identified TANZKY of Luohugu, China; BabyPreg of Shenzhen Guangdong, China; Deal Perfect of Shenzhen Guangdong, China; and Buywish of Nanjing Jiangsu, China, as respondents in this investigation. *Id.* The Office of Unfair Import Investigations is also a party to this investigation. *Id.* Respondent Buywish was subsequently terminated from the investigation. *See Certain Pumping Bras,* USITC Inv. No. 337–TA–988, Comm'n Notice (Aug. 9, 2016). As a result, the '247 patent which was asserted against Respondent Buywish only, is no longer at issue in this investigation. *See* ID at 4 n.1.

On May 12, 2016, Complainant Simple Wishes filed a motion for an order to show cause and for entry of default against Respondents TANZKY, BabyPreg, and Deal Perfect (collectively, ''the Defaulting Respondents'') for failure to respond to the complaint and notice of investigation. On May 19, 2016, the Commission Investigative Attorney (''IA'') filed a response in support of Complainant's motion. On June 22, 2016, the ALJ issued an initial determination granting Complainant's motion and finding TANZKY, BabyPreg, and Deal Perfect in default (Order No. 8). On July 8, 2016, the Commission determined not to review Order No. 8. *See Certain Pumping Bras,* USITC Inv. No. 337–TA–988, Comm'n Notice (July 8, 2016).

On August 30, 2016, Complainant Simple Wishes filed a motion for summary determination on domestic industry and violation of section 337 by the Defaulting Respondents. In addition, Complainant Simple Wishes requested a recommended determination for the Commission to issue a general exclusion order and to set a bond at 100 percent. On September 9, 2016, the IA filed a response in support of Complainant's motion and requested remedy.

On October 31, 2016, the ALJ issued the subject ID (Order No. 11) granting Complainant's motion for summary determination on domestic industry and violation of section 337 by the Defaulting Respondents and recommending that the Commission issue a general exclusion order and set a bond at 100 percent. *See Certain Pumping Bras,* USITC Inv. No. 337–TA–988, Order No. 11 (Oct. 31, 2016).

On November 7, 2016, the IA filed a petition for a limited review of the ID with respect to the ID's consideration of Complainant's expenses relating to patent and trademark prosecution and maintenance in its domestic industry analysis under 19 U.S.C. 1337(a)(3)(C). Complainant did not file a response to the IA's petition.

The Commission has determined to review the ID and on review, to modify the ID in-part to set aside the expenses relating to Complainant's patent and

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

trademark prosecution and maintenance in the domestic industry analysis. As recognized in *Certain Video Game Systems and Controllers,* patent prosecution activities rarely qualify as investments under section 337(a)(3)(C). *See Certain Video Game Systems and Controllers,* Inv. No. 337–TA–743, Comm'n Op., 2011 WL 1523774, *5 (Apr. 14, 2011). Rather, such activities are typically a step towards patent ownership and are insufficient to constitute exploitation of the patent under section 337(a)(3)(C). *See id.;* 19 U.S.C. 1337(a)(3)(C). Complainant made no showing that its patent and trademark prosecution and maintenance expenses are related to engineering, research and development, or licensing, or that such expenses otherwise qualify under 19 U.S.C. 1337(a)(3)(C).

The Commission has determined not to review the remainder of the ID.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue one or more cease and desist orders that could result in the respondent(s) being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, *see Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843 (Dec. 1994) (Comm'n Op.).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit proposed remedial orders for the Commission's consideration. Complainant is also requested to state the HTSUS numbers under which the accused products are imported and the expiration date of the '070 patent. The Complainant is also requested to supply the names of all known importers of the products at issue in this investigation.

Written submissions must be filed no later than close of business on January 4, 2017. Reply submissions must be filed no later than the close of business on January 11, 2017. Such submissions should address the ALJ's recommended determinations on remedy and bonding which were made in Order No. 11. No further submissions on any of these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit eight (8) true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 337–TA–988'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[1] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 14, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–318 and 731–TA–538 and 561 (Fourth Review)]

Sulfanilic Acid From China and India; Scheduling of Expedited Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of expedited reviews pursuant to the Tariff Act of 1930 (''the Act'') to determine whether revocation of the countervailing duty order on sulfanilic acid from India and antidumping orders on sulfanilic acid from China and India would be likely to lead to continuation or recurrence of

[1] All contract personnel will sign appropriate nondisclosure agreements.

material injury within a reasonably foreseeable time.

DATES: *Effective Date:* December 5, 2016.

FOR FURTHER INFORMATION CONTACT: Lawrence Jones (202–205–3358), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these reviews may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.— On December 5, 2016, the Commission determined that the domestic interested party group response to its notice of institution (81 FR 60386, September 1, 2016) of the subject five-year reviews was adequate. The Commission also determined that the respondent interested party group response with respect to the order on sulfanilic acid from China was adequate but that the respondent interested party group response with respect to the orders on sulfanilic acid from India was inadequate. However, on November 18, 2016, the sole participating respondent interested party, in the review on sulfanilic acid from China (Archroma), withdrew its position and statements that advocated for revocation of the order. The Commission therefore determined that it would not be appropriate to conduct a full review of the order concerning China. The Commission did not find any circumstances that warranted conducting full reviews with respect to the orders concerning India.[1] Accordingly, the Commission determined that it would conduct expedited reviews pursuant to section 751(c)(3) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(3)).

For further information concerning the conduct of these reviews and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Staff report.—A staff report containing information concerning the subject matter of the reviews will be placed in the nonpublic record on December 15, 2016, and made available to persons on the Administrative Protective Order service list for these reviews. A public version will be issued thereafter, pursuant to section 207.62(d)(4) of the Commission's rules.

Written submissions.—As provided in section 207.62(d) of the Commission's rules, interested parties that are parties to the reviews and that have provided individually adequate responses to the notice of institution,[2] and any party other than an interested party to the reviews may file written comments with the Secretary on what determinations the Commission should reach in the reviews. Comments are due on or before December 22, 2016 and may not contain new factual information. Any person that is neither a party to the five-year reviews nor an interested party may submit a brief written statement (which shall not contain any new factual information) pertinent to the reviews by December 22, 2016. However, should the Department of Commerce extend the time limit for its completion of the final results of its reviews, the deadline for comments (which may not contain new factual information) on Commerce's final results is three business days after the issuance of Commerce's results. If comments contain business proprietary information (BPI), they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules with respect to filing were revised effective July 25, 2014. *See* 79 FR 35920 (June 25, 2014), and the revised Commission Handbook on E-filing, available from the Commission's Web site at *https://edis.usitc.gov.*

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the reviews must be served on all other parties to the reviews (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Determinations.—The Commission has determined these reviews are extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C. 1675(c)(5)(B).

Authority: These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: December 14, 2016.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2016–30534 Filed 12–19–16; 8:45 am]

BILLING CODE 7020–02–P

[1] A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements will be available from the Office of the Secretary and at the Commission's Web site.

[2] The Commission has found the responses submitted by Nation Ford Chemical Co. and Archroma U.S., Inc. to be individually adequate. Comments from other interested parties will not be accepted (*see* 19 CFR 207.62(d)(2)).

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Water Act

On December 12, 2016, the Department of Justice lodged a proposed consent decree with the United States District Court for the Northern District of Indiana in the lawsuit entitled *United States and State of Indiana* v. *the City of Gary, Indiana, and Gary Sanitary District,* Civil Action No. 2:16–cv–512 (N.D. Ind.).

The United States and the State filed a complaint under the Clean Water Act, alleging violations of the Gary Sanitary District's wastewater discharge permit and duty to respond to an information request issued by the United States Environmental Protection Agency. The Settling Defendants are the Gary Sanitary District and the City of Gary. The proposed consent decree requires the Settling Defendants to: (1) Develop and implement a control plan addressing discharges from the Gary Sanitary District's combined sewer overflow outfalls into the local water bodies; (2) implement additional operational changes focused on improving the wastewater treatment system's efficiency; (3) repay an outstanding loan extended to the City by the District; (4) pay a civil penalty of $75,000; (5) perform a supplemental environmental project costing $175,000; and (6) provide schedules for the remaining remediation of the Ralston Street Lagoon and the remediation of sediment in the Grand Calumet River, which are outstanding Clean Water Act and Toxic Substances Control Act requirements from a consent decree entered into by the Parties in 2003 in Civil Action No. 2:78–cv–29 and 86–540 (N.D. Ind.). The settlement would resolve the Settling Defendants' civil liability for the violations alleged in the complaint that has been filed in the same action also on December 12, 2016. The United States and Indiana reached

a settlement in 2014 pertaining to the same set of violations with the former operator of Gary Sanitary District's wastewater treatment system, United Water, Inc., and several of its subsidiaries, in *United States of America and State of Indiana* v. *United Water, Inc. et al.,* Civil Action No. 2:14–cv–193 JD (N.D. Ind.)

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division and should refer to *United States and State of Indiana* v. *the City of Gary, Indiana, and Gary Sanitary District,* D.J. Ref. No. 90–5–1–1–2601/2. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the proposed consent decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the proposed consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $36.50 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is $18.25.

Randall M. Stone,

Acting Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 2016–30628 Filed 12–19–16; 8:45 am]

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Response, Compensation, and Liability Act and the Clean Water Act

On December 15, 2016, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Virginia in the lawsuit entitled *United States and Commonwealth of Virginia, Secretary of Natural Resources* v. *E.I. du Pont de Nemours and Company,* Civil Action No. 5:16–CV–00082.

The Consent Decree resolves claims against E.I. du Pont de Nemours and Company (''DuPont'') for natural resource damages under the Comprehensive Environmental Response, Compensation, and Liability Act, the Clean Water Act, and the State Water Control Law relating to discharges of mercury from a former acetate fiber manufacturing facility in Waynesboro, Virginia. Under the Consent Decree, DuPont is required to pay certain unreimbursed government assessment costs, pay a total of $42,069,916.78 for natural resource restoration projects to be used by the natural resource Trustees for projects pursuant to the Restoration Plan for the site, and implement a fish hatchery project for modifications and improvements to the Front Royal Fish Hatchery.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Commonwealth of Virginia, Secretary of Natural Resources* v. *E.I. du Pont de Nemours and Company,* D.J. Ref. No. 90–11–3–09419. All comments must be submitted no later than 45 days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $40.25 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is $10.50.

Robert Brook,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Coal Mine Rescue Teams: Arrangements for Emergency Medical Assistance and Transportation for Injured Persons-Agreements, Reporting Requirements, and Posting Requirements

AGENCY: Office of the Secretary, Department of Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA) sponsored information collection request (ICR) titled, ''Coal Mine Rescue Teams: Arrangements for Emergency Medical Assistance and Transportation for Injured Persons-Agreements, Reporting Requirements, and Posting Requirements,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.* Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before January 19, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the *RegInfo.gov* Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201611-1219-002* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–MSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free

number); or by email: *OIRA_submission@omb.eop.gov*. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov*.

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov*.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Coal Mine Rescue Teams: Arrangements for Emergency Medical Assistance and Transportation for Injured Persons-Agreements, Reporting Requirements, and Posting Requirements information collection. More specifically, this ICR covers the following requirements for a coal mine: reporting to the MSHA how the mine will comply with mine rescue team requirements; reporting to the MSHA alternative mine rescue capability for a small and remote mine; providing an annual certification to the MSHA that each mine rescue team designated to provide mine rescue coverage meets applicable requirements; maintaining a record of mine rescue equipment testing, medical physical examinations of mine rescue team members, and mine rescue team training; posting a copy of the mine rescue notification plan and providing a written copy to a designated mine worker representative; and posting at appropriate places of an underground or surface mine the names, titles, addresses, and telephone numbers of all persons or services currently available under medical assistance and transportation arrangements. Coal mine operators, supervisors, and employees, as well as State and Federal mine inspectors use the records to provide assurance that each mine operator and mine rescue team is prepared for a mine emergency. Records also show that mine rescue team equipment has been examined and tested and is in good working order. Training records show that mine rescue team members and the responsible persons at the mine are competent to respond to a mine emergency involving a fire, an explosion, or a gas or water inundation. Federal Mine Safety and Health Act of 1977, as Amended sections 101(a) and 103(h) authorize this information collection. *See* 30 U.S.C. 811(a) and 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0144.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2016. The DOL seeks to extend PRA authorization for this information collection through May 31, 2019, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on July 31, 2016 (81 FR 50023).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219–0144. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–MSHA.

Title of Collection: Coal Mine Rescue Teams: Arrangements for Emergency Medical Assistance and Transportation for Injured Persons-Agreements, Reporting Requirements, and Posting Requirements.

OMB Control Number: 1219–0144.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 275.

Total Estimated Number of Responses: 15,280.

Total Estimated Annual Time Burden: 2,203 hours.

Total Estimated Annual Other Costs Burden: $617,070.

Dated: December 8, 2016.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Attestation by Employers Using Alien Crewmembers for Longshore Activities in U.S. Ports

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting Employment and Training Administration (ETA) sponsored information collection request (ICR) titled, ''Attestation by Employers Using Alien Crewmembers for Longshore Activities in U.S. Ports,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before January 19, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the *RegInfo.gov* Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201611-1205-005* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–

693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–ETA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor—OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Attestation by Employers Using Alien Crewmembers for Longshore Activities in U.S. Ports information collection (*Employers' Attestation to Use Alien Crewmembers for Longshore Activities in U.S. Ports,* Form ETA–9033, and *Employers' Attestation to Use Alien Crewmembers for Longshore Activities in the State of Alaska,* Form ETA–9033A). The ETA collects attestations from shipping companies seeking to use foreign crewmembers for longshore work when no U.S. workers are available. The information employers provide on these forms permits the DOL to meet federal responsibilities for program administration, management, and oversight. Immigration and Nationality Act section 258 authorizes this information collection. *See* 8 U.S.C. 1288.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205–0309.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2016. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on June 30, 2016 (81 FR 42730).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205–0309. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Title of Collection: Attestation by Employers Using Alien Crewmembers for Longshore Activities in U.S. Ports.

OMB Control Number: 1205–0309.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 7.

Total Estimated Number of Responses: 7.

Total Estimated Annual Time Burden: 23 hours.

Total Estimated Annual Other Costs Burden: $0.

Dated: December 7, 2016.

Michel Smyth,

Departmental Clearance Officer.

Office of Workers' Compensation Programs

Advisory Board on Toxic Substances and Worker Health: Working Group on Presumptions

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Announcement of meeting of the Working Group on Presumptions of the Advisory Board on Toxic Substances and Worker Health (Advisory Board) for the Energy Employees Occupational Illness Compensation Program Act (EEOICPA).

SUMMARY: The working group will meet via teleconference on January 10, 2017, from 1:00 p.m. to 3:30 p.m. Eastern Time.

FOR PRESS INQUIRIES CONTACT: *For press inquiries:* Ms. Amanda McClure, Office of Public Affairs, U.S. Department of Labor, Room S–1028, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–4672; email *mcclure.amanda.c@dol.gov.*

SUPPLEMENTARY INFORMATION: The Advisory Board is mandated by Section 3687 of EEOICPA. The Secretary of Labor established the Board under this authority and Executive Order 13699 (June 26, 2015). The purpose of the Advisory Board is to advise the Secretary with respect to: (1) The Site Exposure Matrices (SEM) of the Department of Labor; (2) medical guidance for claims examiners for claims with the EEOICPA program, with respect to the weighing of the medical evidence of claimants; (3) evidentiary requirements for claims under Part B of EEOICPA related to lung disease; and (4) the work of industrial hygienists and staff physicians and consulting physicians of the Department of Labor and reports of such hygienists and physicians to ensure quality, objectivity, and consistency. The Advisory Board sunsets on December 19, 2019. This working group is being assembled to gather and analyze data and continue working on providing EEOICP with updated presumptions.

The Advisory Board operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2) and its implementing regulations (41 CFR part 102–3).

Agenda: The tentative agenda for the meeting of the Working Group on Presumptions includes: general comments on use of disease and exposure presumptions in compensation programs; current use of presumptions in EEOICP; expanding/improving the use of presumptions in EEOICP; any new business as proposed by working group members.

OWCP will transcribe the Advisory Board working group meeting. OWCP will post the transcripts on the Advisory Board Web page, *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm,* along with written comments and other materials submitted to the working group or presented at the working group meeting.

Public Participation, Submissions, and Access to the Public Record

Working group meeting: The working group will meet via teleconference on Tuesday, January 10, 2017, from 1:00 p.m. to 3:30 p.m. Eastern Time. Advisory Board working group meetings are open to the public. The teleconference number and other details for listening to the meeting will be posted on the Advisory Board's Web site no later than 72 hours prior to the meeting. This information will be posted at *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm.*

Requests for special accommodations: Please submit requests for special accommodations to participate in the working group meeting by email, telephone, or hard copy to Ms. Carrie Rhoads, OWCP, Room S–3524, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 343–5580; email *EnergyAdvisoryBoard@dol.gov.*

Submission of written comments for the record: You may submit written comments, identified by the working group name and the meeting date of January 10, 2017, by any of the following methods:

- *Electronically:* Send to: *EnergyAdvisoryBoard@dol.gov* (specify in the email subject line, ''Working Group on Presumptions'').
- *Mail, express delivery, hand delivery, messenger, or courier service:* Submit one copy to the following address: U.S. Department of Labor, Office of Workers' Compensation Programs, Advisory Board on Toxic Substances and Worker Health, Room S–3522, 200 Constitution Ave. NW., Washington, DC 20210. Due to security-related procedures, receipt of submissions by regular mail may experience significant delays.

Comments must be received by January 3, 2017. OWCP will make available publically, without change, any written comments, including any personal information that you provide. Therefore, OWCP cautions interested parties against submitting personal information such as Social Security numbers and birthdates.

Electronic copies of this **Federal Register** notice are available at *http://www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available on the Advisory Board's Web page at *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm.*

FOR FURTHER INFORMATION CONTACT: You may contact Antonio Rios, Designated Federal Officer, at *rios.antonio@dol.gov,* or Carrie Rhoads, Alternate Designated Federal Officer, at *rhoads.carrie@dol.gov,* U.S. Department of Labor, 200 Constitution Avenue NW., Suite S–3524, Washington, DC 20210, telephone (202) 343–5580. This is not a toll-free number.

Signed at Washington, DC, this 14th day of December, 2016.

Leonard J. Howie III,

Director, Office of Workers' Compensation Programs.

BILLING CODE 4510–24–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (16–089)]

Notice of Intent to Grant Partially Exclusive License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Intent to Grant Partially Exclusive License.

SUMMARY: This notice is issued in accordance with 35 U.S.C. 209(e) and 37 CFR 404.7(a)(1)(i). NASA hereby gives notice of its intent to grant a partially exclusive, license in the United States to practice the inventions described and claimed in U.S. Patent No. 7,623,972 entitled ''Detection of Presence of Chemical Precursors''; U.S. Patent No. 7,801,687 entitled ''Chemical Sensors Using Coated Or Doped Carbon Nanotube Networks''; U.S. Patent No. 7,968,054 entitled ''Nanostructure Sensing and Transmission of Gas Data''; U.S. Patent No. 8,000,903 entitled ''Coated or Doped Carbon Nanotube Network Sensors as Affected by Environmental Parameters''; ARC–16292–1 entitled ''Nanosensor/Cell Phone Hybrid for Detecting Chemicals and Concentrations''; ARC–16902–1, entitled ''Nanosensor for Medical Diagnoses''; ARC–17110–1 entitled ''Detection of Gases and Vapors at Low Concentrations'' to ENDO Medical Inc., having its principal place of business at 2345 Yale Street, 1st Floor, Palo Alto, CA 94306. The patent rights in this invention have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The prospective partially exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7.

DATES: The prospective partially exclusive license may be granted unless, within fifteen (15) days from the date of this published notice, NASA receives written objections including evidence and argument that establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7. Competing applications completed and received by NASA within fifteen (15) days of the date of this published notice will also be treated as objections to the grant of the contemplated partially exclusive license.

Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

ADDRESSES: Objections relating to the prospective license may be submitted to Patent Counsel, Office of Chief Counsel, NASA Ames Research Center, Mail Stop 202A–4, Moffett Field, CA 94035–1000. (650) 604–5104; Fax (650) 604–2767.

FOR FURTHER INFORMATION CONTACT: Robert M. Padilla, Chief Patent Counsel, Office of Chief Counsel, NASA Ames Research Center, Mail Stop 202A–4, Moffett Field, CA 94035–1000. (650) 604–5104; Fax (650) 604–2767. Information about other NASA inventions available for licensing can be found online at *http://technology.nasa.gov/.*

Mark P. Dvorscak,

Agency Counsel for Intellectual Property.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–027 and 52–028; NRC–2008–0441]

South Carolina Electric & Gas Company; South Carolina Public Service Authority; Virgil C. Summer Nuclear Station, Units 2 and 3; Containment Hydrogen Igniter Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from elements of the certification information in Tier 1 of the AP1000 generic Design Control Document (DCD), as specified in License Amendment Request 14–18, and is issuing License Amendment No. 54 to Combined Licenses (COLs), NPF–93 and NPF–94. The COLs were issued to South Carolina Electric & Gas Company and the South Carolina Public Service Authority, (both collectively referred to as the licensee); for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3, located in Fairfield County, South Carolina.

The granting of the exemption allows the changes to plant-specific Tier 1 information, and the associated COL Appendix C, requested in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption was issued on November 21, 2016.

ADDRESSES: Please refer to Docket ID NRC–2008–0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2008–0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated May 6, 2015 (ADAMS Accession No. ML15127A177) and supplemented by letter dated December 15, 2015 (ADAMS Accession No. ML15350A193).
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: William Gleaves, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5848; email: *Bill.Gleaves@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, ''Scope and Contents,'' of Appendix d, ''Design Certification Rule for the AP1000,'' to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 54 to COLs, NPF–93 and NPF–94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, ''Processes for Changes and Departures,'' Appendix d, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes to the Updated Final Safety Analysis Report (UFSAR) in the form of departures from the incorporated plant-specific Design Control Document (DCD) Tier 2 information. The proposed amendment also involves related changes to plant-specific Tier 1 information, with corresponding changes to the associated COL Appendix C information. Specifically, the licensee requested changes to plant-specific Tier 1 (and COL Appendix C) tables and UFSAR tables, text, and figures related to the addition of two hydrogen igniters above the in-containment refueling water storage tank roof vents. Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of Appendix d to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML16145A474.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF–93 and NPF–94). The exemption documents for VCSNS Units 2 and 3 can be found in ADAMS under Accession Nos. ML16145A455 and ML16281A132, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF–93 and NPF–94 are available in ADAMS under Accession Nos. ML16145A408 and ML16145A423, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VCSNS Units 2 and Unit 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated May 6, 2015, as supplemented by letter dated December 15, 2015, the licensee requested from the Commission an exemption to allow departures to plant-specific Tier 1, and the associated COL Appendix C, information from the certified AP1000 DCD that was incorporated by reference to 10 CFR part 52, Appendix d, as part of License Amendment Request 14–18, ''Containment Hydrogen Igniter Changes.''

For the reasons set forth in Section 3.1, of the NRC staff's Safety Evaluation that supports this license amendment, which can be found at ADAMS Accession No. ML16145A474, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified AP1000 DCD plant-specific Tier 1 information, with corresponding changes to Appendix C of the Facility Combined License as described in the licensee's request dated May 6, 2015, as supplemented by letter dated December 15, 2015. This exemption is related to, and necessary for, the granting of License Amendment No. 54, which is being issued concurrently with this exemption.

3. As explained in Section 5 of the NRC staff's Safety Evaluation that supports this license amendment, this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated May 6, 2015, as supplemented by letter dated December 15, 2015, the licensee requested that the NRC amend the COLs for VCSNS, Units 2 and 3, COLs NPF–93 and NPF–94. The proposed amendment is described in Section I of this **Federal Register** Notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on September 29, 2015 (80 FR 58519). No comments were received during the 30-day comment period. The supplement contained no information that would change the original proposed no significant hazards consideration determination.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested by letter dated May 6, 2015 and supplemented on December 15, 2015.

The exemption and amendment were issued on November 21, 2016 as part of a combined package to the licensee (ADAMS Accession No. ML16145A391).

Dated at Rockville, Maryland, this 12th day of December 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–025 and 52–026; NRC–2008–0252]

Southern Nuclear Operating Company, Inc., Vogtle Electric Generating Plant, Units 3 and 4; Initial Test Program Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 34 to Combined Licenses (COL), NPF–91 and NPF–92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, MEAG Power SPVM, LLC, MEAG Power SPVJ, LLC, MEAG Power SPVP, LLC, Authority of Georgia, and the City of Dalton, Georgia (the licensee); for construction and operation of the Vogtle Electric Generating Plant (VEGP) Units 3 and 4, located in Burke County, Georgia.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The Exemption was issued on June 4, 2015.

ADDRESSES: Please refer to Docket ID *NRC–2008–0252* when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and is publicly available, using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID *NRC–2008–0252.* Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated November 21, 2014, and available in ADAMS under Accession No. ML14325A835.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Chandu Patel, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3025; email: *Chandu.Patel@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, ''Scope and Contents,'' of Appendix d, ''Design Certification Rule for the AP1000,'' to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing

License Amendment No. 34 to COLs, NPF–91 and NPF–92, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, ''Processes for Changes and Departures,'' Appendix d, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would revise the Updated Final Safety Analysis Report by making changes to the Initial Test Program (ITP), and making changes to the corresponding Tier 1 information. Specifically, the licensee redefined certain ''construction and installation tests'' as ''component tests'' and moved them to the first phase of the ITP. Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of Appendix d to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML15138A140.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VEGP Units 3 and 4 (COLs NPF–91 and NPF–92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML15138A127 and ML15138A132, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF–91 and NPF–92 are available in ADAMS under Accession Nos. ML15138A116 and ML15138A120, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VEGP Units 3 and Unit 4. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated November 21, 2014, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, Appendix d, as part of license amendment request 14–010, ''Initial Test Program Changes.''

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation that supports this license amendment, which can be found in ADAMS under Accession No. ML15138A140, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 Section 3.4, as described in the licensee's request dated November 21, 2014. This exemption is related to, and necessary for, the granting of License Amendment No. 34, which is being issued concurrently with this exemption.

3. As explained in Section 5 of the NRC staff's Safety Evaluation that supports this license amendment (ADAMS Accession No. ML15138A140), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated November 21, 2014, the licensee requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF–91 and NPF–92. The proposed amendment is described in Section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on January 6, 2015 (80 FR 520). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on November 21, 2014.

The exemption and amendment were issued on June 4, 2015, as part of a combined package to the licensee (ADAMS Accession No. ML15138A052).

Dated at Rockville, Maryland, this 13th day of December 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–025 and 52–026; NRC–2008–0252]

Southern Nuclear Operating Company, Inc., Vogtle Electric Generating Plant, Units 3 and 4; Compressed and Instrument Air System High Pressure Air Subsystem Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 46 to Combined Licenses (COL), NPF–91 and NPF–92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, MEAG Power SPVM, LLC, MEAG Power SPVJ, LLC, MEAG Power SPVP, LLC, Authority of Georgia, and

the City of Dalton, Georgia (the licensee); for construction and operation of the Vogtle Electric Generating Plant (VEGP) Units 3 and 4, located in Burke County, Georgia.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The Exemption was issued on February 25, 2016.

ADDRESSES: Please refer to Docket ID NRC–2008–0252 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and is publicly available, using any of the following methods:

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2008–0252. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated August 14, 2014 (ADAMS Accession No. ML14227A707), and supplemented by letter dated January 16, 2015 (ADAMS Accession No. ML15016A416).

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from paragraph B of Section III, ''Scope and Contents,'' of Appendix d, ''Design Certification Rule for the AP1000,'' to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 46 to COLs, NPF–91 and NPF–92, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, ''Processes for Changes and Departures,'' Appendix d, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would revise the Updated Final Safety Analysis Report in the form of departures from the plant-specific licensing basis documents, with regard to removing an air supply line from the compressed and instrument air system to the generator breaker package as a result of the change from an air-blast type generator circuit breaker (GCB) to a sulfur hexafluoride gas type GCB. Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of Appendix d to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML16019A419.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VEGP Units 3 and 4 (COLs NPF–91 and NPF–92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML16019A400 and ML16019A402, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF–91 and NPF–92 are available in ADAMS under Accession Nos. ML16019A390 and ML16019A393, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VEGP Units 3 and Unit 4. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated August 14, 2014, and supplemented by letter dated January 16, 2015, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, Appendix d, as part of license amendment request 14–009, ''Compressed and Instrument Air System High Pressure Air Subsystem Changes.''

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation that supports this license amendment, which can be found in ADAMS under Accession No. ML16019A419, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 information, as described in the licensee's request dated August 14, 2014, and supplemented by letter dated January 16, 2015. This exemption is related to, and necessary for the granting of License Amendment No. 46, which is being issued concurrently with this exemption.

3. As explained in Section 5.0 of the NRC staff's Safety Evaluation (ADAMS Accession No. ML16019A419), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated August 14, 2014, and supplemented by letter dated January 16, 2015, the licensee requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF–91 and NPF–92. The proposed amendment is described in Section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on November 12, 2014 (79 FR 67204). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on August 14, 2014, and supplemented by letter dated January 16, 2015.

The exemption and amendment were issued on February 25, 2016, as part of a combined package to the licensee (ADAMS Accession No. ML16019A374).

Dated at Rockville, Maryland, this 13th day of December 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

[FR Doc. 2016–30607 Filed 12–19–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0256]

Biweekly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Biweekly notice.

SUMMARY: Pursuant to Section 189a. (2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular biweekly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued, from November 22, 2016, to December 5, 2016. The last biweekly notice was published on December 6, 2016.

DATES: Comments must be filed by January 19, 2017. A request for a hearing must be filed by February 21, 2017.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID: NRC–2016–0256. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Shirley Rohrer, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5411, email: *Shirley.Rohrer@nrc.gov*.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0256, facility name, unit number(s), plant docket number, application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID: NRC–2016–0256.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov*. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0256, facility name, unit number(s), plant docket number, application date, and subject in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission.

Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in § 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final no significant hazards consideration determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and a petition to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the NRC's PDR, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. The NRC's regulations are accessible electronically from the NRC Library on the NRC's Web site at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* If a petition is filed within 60 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest. The petition must also set forth the specific contentions which the petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that person's admitted contentions consistent with the NRC's regulations, policies, and procedures.

Petitions for leave to intervene must be filed no later than 60 days from the date of publication of this notice. Requests for hearing, petitions for leave to intervene, and motions for leave to file new or amended contentions that are filed after the 60-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of any amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1).

The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission by February 21, 2017. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may also have the opportunity to participate under 10 CFR 2.315(c).

If a hearing is granted, any person who does not wish, or is not qualified, to become a party to the proceeding may, in the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of position on the issues, but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene (hereinafter ''petition''), and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov*, or by telephone at 301–415–1677, to request: (1) A digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* System requirements for accessing the E-Submittal server are available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/adjudicatory-sub.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Electronic Filing Help Desk will not be able to offer assistance in using unlisted software.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a petition. Submissions should be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html*, by email to *MSHD.Resource@nrc.gov*, or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 7 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *http://ehd1.nrc.gov/ehd/,* unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, in some instances, a petition will require including information on local residence in order to demonstrate a

proximity assertion of interest in the proceeding. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

For further details with respect to these license amendment applications, see the application for amendment which is available for public inspection in ADAMS and at the NRC's PDR. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

Duke Energy Progress, LLC, Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of amendment request: September 26, 2016. A publicly-available version is in ADAMS under Accession No. ML16287A421.

Description of amendment request: The amendment would revise the Safety Limit Minimum Critical Power Ratio (SLMCPR) values contained in the Technical Specifications (TSs) for two recirculation loop operation and for single loop recirculation operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed SLMCPR values have been determined using NRC-approved methods discussed in AREVA Topical Report ANP–10307PA, Revision 0, *AREVA MCPR Safety Limit Methodology for Boiling Water Reactors,* June 2011, as augmented by the associated TS Appendix B Additional Condition related to channel bow model uncertainty. Establishing a two recirculation loop SLMCPR value of ≥1.07 and a single recirculation loop SLMCPR value of ≥1.09 ensures that the acceptance criteria continues to be met (*i.e.,* at least 99.9 percent of all fuel rods in the core do not experience transition boiling).

The probability of an evaluated accident is derived from the probabilities of the individual precursors to that accident. The proposed license amendments do not involve any plant modifications or operational changes that could affect system reliability or performance, or that could affect the probability of operator error. As such, the proposed changes do not affect any postulated accident precursors. Since no individual precursors of an accident are affected, the proposed license amendments do not involve a significant increase in the probability of a previously analyzed event.

The consequences of an evaluated accident are determined by the operability of plant systems designed to mitigate those consequences. The basis for the SLMCPR calculation is to ensure that during normal operation and during anticipated operational occurrences, at least 99.9 percent of all fuel rods in the core do not experience transition boiling if the safety limit is not exceeded.

Based on these considerations, the proposed changes do not involve a significant increase in the probability or consequences of previously analyzed accident.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

Creation of the possibility of a new or different kind of accident requires creating one or more new accident precursors. New accident precursors may be created by modifications of plant configuration, including changes in allowable modes of operation. The SLMCPR is a TS numerical value calculated for two recirculation loop operation and single recirculation loop operation to ensure at least 99.9 percent of all fuel rods in the core do not experience transition boiling if the safety limit is not exceeded. SLMCPR values are calculated using NRC-approved methodology identified in the TS. The proposed SLMCPR values do not involve any new modes of plant operation or any plant modifications and do not directly or indirectly affect the failure modes of any plant systems or components. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The SLMCPR provides a margin of safety by ensuring that at least 99.9 percent of the fuel rods do not experience transition boiling during normal operation and anticipated operational occurrences if the MCPR Safety Limit is not exceeded. Revision of the SLMCPR values in Technical Specification 2.1.1.2, using NRC-approved methodology, will ensure that the current level of fuel protection is maintained by continuing to ensure that the fuel design safety criterion is met (*i.e.,* that no more than 0.1 percent of the rods are expected to be in boiling transition if the MCPR Safety Limit is not exceeded). Therefore, the proposed amendments do not result in a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kathryn B. Nolan, Deputy General Counsel, 550 South Tryon St., M/C DEC45A, Charlotte, NC 28202.

NRC Acting Branch Chief: Jeanne A. Dion.

Entergy Operations, Inc., System Energy Resources, Inc., South Mississippi Electric Power Association, and Entergy Mississippi, Inc., Docket No. 50–416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: October 26, 2016. A publicly-available version is in ADAMS, under Accession No. ML16301A150.

Description of amendment request: The proposed amendment would change the Technical Specifications (TS) to revise requirements for unavailable barriers by adding new Limiting Condition for Operation (LCO) 3.0.9. This LCO establishes conditions under which systems would remain operable when required physical barriers are not capable of providing their related support function. This proposed amendment is consistent with NRC-approved Technical Specification Task Force (TSTF) Improved Standard Technical Specifications Change Traveler, TSTF–427, Revision 2, ''Allowance for Non-Technical Specification Barrier Degradation on Supported System OPERABILITLY.'' The Notice of Availability of this TS improvement and the model application was published in the **Federal Register** on October 3, 2006 (71 FR 58444), as part of the consolidated line item improvement process.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee provided an analysis of the issue of no significant hazards consideration (NSHC) by citing the proposed NSHC determination published by the NRC staff in the **Federal Register** notice referenced above. The proposed NSHC is reproduced below:

Criterion 1—The Proposed Change Does Not Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated.

The proposed change allows a delay time for entering a supported system technical specification (TS) when the inoperability is due solely to an unavailable barrier if risk is

assessed and managed. The postulated initiating events which may require a functional barrier are limited to those with low frequencies of occurrence, and the overall TS system safety function would still be available for the majority of anticipated challenges. Therefore, the probability of an accident previously evaluated is not significantly increased, if at all. The consequences of an accident while relying on the allowance provided by proposed LCO 3.0.9 are no different than the consequences of an accident while relying on the TS required actions in effect without the allowance provided by proposed LCO 3.0.9. Therefore, the consequences of an accident previously evaluated are not significantly affected by this change. The addition of a requirement to assess and manage the risk introduced by this change will further minimize possible concerns. Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Criterion 2—The Proposed Change Does Not Create the Possibility of a New or Different Kind of Accident from any Accident Previously Evaluated.

The proposed change does not involve a physical alteration of the plant (no new or different type of equipment will be installed). Allowing delay times for entering supported system TS when inoperability is due solely to an unavailable barrier, if risk is assessed and managed, will not introduce new failure modes or effects and will not, in the absence of other unrelated failures, lead to an accident whose consequences exceed the consequences of accidents previously evaluated. The addition of a requirement to assess and manage the risk introduced by this change will further minimize possible concerns. Thus, this change does not create the possibility of a new or different kind of accident from an accident previously evaluated.

Criterion 3—The Proposed Change Does Not Involve a Significant Reduction in the Margin of Safety.

The proposed change allows a delay time for entering a supported system TS when the inoperability is due solely to an unavailable barrier, if risk is assessed and managed. The postulated initiating events which may require a functional barrier are limited to those with low frequencies of occurrence, and the overall TS system safety function would still be available for the majority of anticipated challenges. The risk impact of the proposed TS changes was assessed following the three-tiered approach recommended in RG [Regulatory Guide] 1.177. A bounding risk assessment was performed to justify the proposed TS changes. This application of LCO 3.0.9 is predicated upon the licensee's performance of a risk assessment and the management of plant risk. The net change to the margin of safety is insignificant as indicated by the anticipated low levels of associated risk (ICCDP [incremental conditional core damage probability] and ICLERP [incremental conditional large early release probability]) as shown in Table 1 of Section 3.1.1 in the Safety Evaluation. Therefore, this change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: William B. Glew, Jr., Associate General Counsel—Entergy Services, Inc., 440 Hamilton Avenue, White Plains, New York 10601.

NRC Acting Branch Chief: Douglas A. Broaddus.

Exelon Generation Company, LLC, Docket Nos. 50–254 and 50–265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of amendment request: September 12, 2016. A publicly-available version is in ADAMS under Accession No. ML16258A146.

Description of amendment request: The proposed amendment would revise the setpoint for detecting a loss of voltage on the 4.16 kilovolt essential service system (ESS) buses.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change to the 4.16 kV Essential Service System (ESS) bus loss of voltage allowable values allows the protection scheme to function as originally designed. This change will involve alteration of nominal trip setpoints in the field and will also be reflected in revisions to the calibration procedures. The proposed change does not affect the probability or consequences of any accident. Analysis was conducted and demonstrates that the proposed allowable values will allow the normally operating safety related motors to continue to operate without sustaining damage or tripping during the worst-case, non-accident degraded voltage condition for the maximum possible time-delay of 332.3 seconds. Thus, these safety related loads will be available to perform their safety function if a loss-of-coolant accident (LOCA) concurrent with a loss-of offsite power (LOOP) occurs following the degraded voltage condition.

The proposed change does not adversely affect accident initiators or precursors, and do not alter the design assumptions, conditions, or configuration or the plant or the manner in which the plant is operated or maintained. The proposed allowable values ensure that the 4.16 kV distribution system remains connected to the offsite power system when adequate offsite voltage is available and motor starting transients are considered. The emergency diesel generator (EDG) start due to a LOCA signal is not adversely affected by this change. During an actual loss of voltage condition, the loss of voltage time delay will continue to isolate the 4.16 kV distribution system from offsite power before the EDG is ready to assume the emergency loads, which is the limiting time basis for mitigating system responses to the accident. For this reason, the existing loss of power LOCA analysis continues to be valid.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change involves the revision of 4.16 kV ESS bus loss of voltage allowable values to satisfy existing design requirements. The proposed change does not introduce any changes or mechanisms that create the possibility of a new or different kind of accident. The proposed change does not install any new or different type of equipment, and installed equipment is not being operated in a new or different manner. No new effects on existing equipment are created nor are any new malfunctions introduced.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed protection voltage allowable values are low enough to prevent inadvertent power supply transfer, but high enough to ensure that sufficient power is available to the required equipment. The EDG start due to a LOCA signal is not adversely affected by this change. During an actual loss of voltage condition, the loss of voltage time delays will continue to isolate the 4.16 kV distribution system from offsite power before the EDG is ready to assume the emergency loads.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the requested amendments involve no significant hazards consideration.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Nuclear, 4300 Winfield Road, Warrenville, IL 60555.

NRC Acting Branch Chief: G. Edward Miller.

FirstEnergy Nuclear Operating Company, et al., Docket Nos. 50–334 and 50–412, Beaver Valley Power Station, Unit Nos. 1 and 2 (BVPS–1 and BVPS–2), Beaver County, Pennsylvania

Date of amendment request: September 28, 2016. A publicly-available version is in ADAMS under Package Accession No. ML16277A194.

Description of amendment request: The amendments would revise the BVPS–1 and BVPS–2 Emergency Plan by revising the emergency action level (EAL) schemes to one based on Nuclear Energy Institute (NEI) 99–01, Revision 6, ''Development of Emergency Action Levels for Non-Passive Reactors,'' November 2012 (ADAMS Accession No. ML12326A805). NEI 99–01, Revision 6, was endorsed by the NRC by letter dated March 28, 2013 (ADAMS Accession No. ML12346A463).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to BVPS's EAL scheme to adopt the NRC-endorsed guidance of NEI 99–01, Revision 6, do not involve any physical changes to plant systems or equipment. The proposed changes do not alter any of the requirements of the technical specifications. The proposed changes do not modify any plant equipment and do not impact any failure modes that could lead to an accident. Additionally, the proposed changes do not impact the ability of structures, systems, or components (SSCs) to perform their intended safety functions in mitigating the consequences of an initiating event within the assumed acceptance limits.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes to BVPS's EAL scheme to adopt the NRC-endorsed guidance of NEI 99–01, Revision 6, do not involve any physical changes to plant systems or equipment. The proposed changes do not involve the addition of any new plant equipment. The proposed changes will not alter the design configuration, or method of operation of plant equipment beyond its normal functional capabilities. BVPS functions will continue to be performed as required. The proposed changes do not create any new credible failure mechanisms, malfunctions, or accident initiators.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes to BVPS's EAL scheme to adopt the NRC-endorsed guidance of NEI 99–01, Revision 6, do not involve any physical changes to plant systems or equipment. Margins of safety are unaffected by the proposed changes. There are no changes being made to safety analysis assumptions, safety limits, or limiting safety system settings that would adversely affect plant safety as a result of the proposed EAL scheme change. The proposed change does not affect the technical specifications. There are no changes to environmental conditions of any of the SSC or the manner in which any SSC is operated. The applicable requirements of 10 CFR 50.47 and 10 CFR 50, Appendix E will continue to be met.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: David W. Jenkins, FirstEnergy Nuclear Operating Company, FirstEnergy Corporation, 76 South Main Street, Mail Stop A–GO–15, Akron, OH 44308.

NRC Acting Branch Chief: Stephen S. Koenick.

FirstEnergy Nuclear Operating Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of amendment request: November 1, 2016. A publicly-available version is in ADAMS under Accession No. ML16307A029.

Description of amendment request: The proposed amendment would revise Technical Specification 2.1.1, ''Reactor Core [Safety Limits] SLs,'' to reduce the reactor steam dome pressure value.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

Decreasing the reactor steam dome pressure limit in Technical Specification Safety Limits 2.1.1 expands the range of use of the GEXL14 and GEXL17 correlations (applicable to GE14 and GNF2 fuel respectively) and the calculation of the minimum critical power ratio (CPR). The CPR increases during the pressure reduction that occurs during the [Pressure Regulator Failure-Maximum Demand (Open)] PRFO event, so that the initial CPR is the limiting CPR condition during the entire transient. CPR increases during the event relative to the initial CPR value, so fuel cladding integrity is not threatened. Since the change does not involve a modification of any plant hardware, the probability and consequence of the PRFO transient are essentially unchanged.

The proposed change will continue to support the application range of the GEXL correlations applied at PNPP and the calculation of the minimum CPR. The proposed TS revision involves no significant changes to the operation of any systems or components in normal, accident or transient operating conditions.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed reduction in the reactor steam dome pressure limit in Technical Specification Safety Limits 2.1.1 from 785 psig to 686 psig is a change based on NRC approved documents that permit a wider range of applicability for the GEXL critical power correlations for both GE14 and GNF2 fuel types in the reactor core. This change does not involve changes to the plant hardware or its operating characteristics. There are no changes in the method by which any plant systems perform a safety function, nor are there any changes in the methods governing normal plant operation. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of the proposed changes. As a result, no new failure modes are being introduced.

Therefore, the change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The margin of safety is established through the design of the plant structures, systems, and components, and through the parameters for safe operation and setpoints for the actuation of equipment relied upon to respond to transients and design basis accidents. Evaluation of the 10 CFR part 21 condition by GE determined that, since the critical power ratio improves during the PRFO transient, there is no impact on the fuel safety margin, and there is no challenge to fuel cladding integrity. The proposed changes do not change the requirements governing operation or the availability of safety equipment assumed to operate to preserve the margin of safety.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: David W. Jenkins, Senior Attorney, FirstEnergy Corporation, Mail Stop A–GO–15, 76 South Main Street, Akron, OH 44308.

NRC Branch Chief: David J. Wrona.

FirstEnergy Nuclear Operating Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of amendment request: October 27, 2016. A publicly-available version is in ADAMS under Accession No. ML16302A055.

Description of amendment request: The proposed amendment would revise Technical Specification (TS) 3.8.3, ''Diesel Fuel Oil, Lube Oil, and Starting Air,'' by relocating the current stored diesel fuel oil and lube oil numerical volume requirements from the TS to the TS Bases. The proposed changes are consistent with Technical Specifications Task Force Traveler TSTF–501, Revision 1, ''Relocate Stored Fuel Oil and Lube Oil Volume Values to Licensee Control.''

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No

The proposed change relocates the volume of diesel fuel oil and lube oil required to support 7-day operation of each onsite diesel generator, and the volume equivalent to a 6-day supply, to licensee control. The specific volume of fuel oil equivalent to a 7 and 6-day supply is calculated using the NRC-approved methodology described in Regulatory Guide 1.137, Revision 1, ''Fuel-Oil Systems for Standby Diesel Generators'' and ANSI–N195 1976, ''Fuel Oil Systems for Standby Diesel-Generators.'' The specific volume of lube oil equivalent to a 7-day and 6-day supply is based on the diesel generator manufacturer's consumption values for the run time of the diesel generator. Because the requirement to maintain a 7-day supply of diesel fuel oil and lube oil is not changed and is consistent with the assumptions in the accident analyses, and the actions taken when the volume of fuel oil and lube oil are less than a 6-day supply have not changed, neither the probability nor the consequences of any accident previously evaluated will be affected.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No

The proposed change does not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed) or a change in the methods governing normal plant operation. The change does not alter assumptions made in the safety analysis but ensures that the diesel generator operates as assumed in the accident analysis. The proposed change is consistent with the safety analysis assumptions. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No

The proposed change relocates the volume of diesel fuel oil and lube oil required to support 7-day operation of each onsite diesel generator, and the volume equivalent to a 6-day supply, to licensee control. As the bases for the existing limits on diesel fuel oil, and lube oil are not changed, no change is made to the accident analysis assumptions and no margin of safety is reduced as part of this change. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: David W. Jenkins, Senior Attorney, FirstEnergy Corporation, Mail Stop A–GO–15, 76 South Main Street, Akron, OH 44308.

NRC Branch Chief: David J. Wrona.

PSEG Nuclear LLC, Docket No. 50–354, Hope Creek (Hope Creek) Generating Station, Salem County, New Jersey

Date of amendment request: October 7, 2016. A publicly-available version is in ADAMS under Accession No. ML16281A139.

Description of amendment request: The amendment would revise the Hope Creek Technical Specifications by incorporating Nuclear Energy Institute (NEI) topical report 94–01, Revision 3–A, and the conditions and limitations specified in NEI topical report 94–01, Revision 2–A, as the implementation document for the Hope Creek performance-based containment leakage rate testing program. Based on guidance in NEI 94–01, Revision 3–A, the proposed change would allow the Hope Creek Type A Test (Integrated Leak Rate Test, or ILRT) frequency to be extended from 10 to 15 years, and the Type C Tests (Local Leak Rate Tests, or LLRTs) frequency to be extended from 60 to 75 months. In addition, the amendment would delete a one-time extension of the test frequencies previously granted in License Amendment No. 147.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed activity involves revision of the Hope Creek Generating Station (HCGS) Technical Specification (TS) 6.8.4.f, Primary Containment Leakage Rate Testing Program, to allow the extension of the HCGS Type A containment integrated leakage rate test interval to 15 years, and the extension of the Type C local leakage rate test interval to 75 months. The current Type A test interval of 120 months (10 years) would be extended on a permanent basis to no longer than 15 years from the last Type A test. The existing Type C test interval of 60 months for selected components would be extended on a performance basis to no longer than 75 months. Extensions of up to nine months (total maximum interval of 84 months for Type C tests) are permissible only for non-routine emergent conditions.

The proposed extension does not involve either a physical change to the plant or a change in the manner in which the plant is operated or controlled. The containment is designed to provide an essentially leak tight barrier against the uncontrolled release of radioactivity to the environment for postulated accidents. As such, the containment and the testing requirements invoked to periodically demonstrate the integrity of the containment exist to ensure the plant's ability to mitigate the consequences of an accident, and do not involve the prevention or identification of any precursors of an accident.

The change in dose risk for changing the Type A Integrated Leak Rate Test (ILRT) interval from three-per-ten years to once-per-fifteen-years, measured as an increase to the total integrated dose risk for all internal events accident sequences, is 5.15E–03 person-rem/yr (0.01%) using the Electric Power Research Institute (EPRI) guidance with the base case corrosion included. This change meets both of the related acceptance criteria for change in population dose. The change in dose risk drops to 1.38E–03 person-rem/yr (<0.01%) when using the EPRI Expert Elicitation methodology. Therefore, this proposed extension does not involve a significant increase in the probability of an accident previously evaluated.

As documented in NUREG–1493, ''Performance-Based Containment Leak-Test

Program,'' dated January 1995, Types B and C tests have identified a very large percentage of containment leakage paths, and the percentage of containment leakage paths that are detected only by Type A testing is very small. The HCGS Type A test history supports this conclusion.

The integrity of the containment is subject to two types of failure mechanisms that can be categorized as: (1) activity based, and, (2) time based. Activity based failure mechanisms are defined as degradation due to system and/or component modifications or maintenance. Local leak rate test requirements and administrative controls such as configuration management and procedural requirements for system restoration ensure that containment integrity is not degraded by plant modifications or maintenance activities. The design and construction requirements of the containment combined with the containment inspections performed in accordance with American Society of Mechanical Engineers (ASME) Section XI, and TS requirements serve to provide a high degree of assurance that the containment would not degrade in a manner that is detectable only by a Type A test. Based on the above, the proposed test interval extensions do not significantly increase the consequences of an accident previously evaluated.

The proposed amendment also deletes an exception previously granted in amendment 147 to allow a one-time extension of the ILRT test frequency for HCGS. This exception was for an activity that has already taken place; therefore, this deletion is solely an administrative action that does not result in any change in how HCGS is operated.

Therefore, the proposed change does not result in a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed amendment to TS 6.8.4.f, ''Primary Containment Leakage Rate Testing Program,'' involves the extension of the HCGS Type A containment test interval to 15 years and the extension of the Type C test interval to 75 months. The containment and the testing requirements to periodically demonstrate the integrity of the containment exist to ensure the plant's ability to mitigate the consequences of an accident.

The proposed change does not involve a physical modification to the plant (*i.e.,* no new or different type of equipment will be installed), nor does it alter the design, configuration, or change the manner in which the plant is operated or controlled beyond the standard functional capabilities of the equipment.

The proposed amendment also deletes an exception previously granted in amendment 147 to allow a one-time extension of the ILRT test frequency for HCGS. This exception was for an activity that has already taken place; therefore, this deletion is solely an administrative action that does not result in any change in how HCGS is operated.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated for HCGS.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed amendment to TS 6.8.4.f involves the extension of the HCGS Type A containment test interval to 15 years and the extension of the Type C test interval to 75 months for selected components. This amendment does not alter the manner in which safety limits, limiting safety system set points, or limiting conditions for operation are determined. The specific requirements and conditions of the TS Containment Leak Rate Testing Program exist to ensure that the degree of containment structural integrity and leak-tightness that is considered in the plant safety analysis is maintained. The overall containment leak rate limit specified by TS is maintained.

The proposed change involves the extension of the interval between Type A containment leak rate tests and Type C tests for HCGS. The proposed surveillance interval extension is bounded by the 15-year ILRT interval and the 75-month Type C test interval currently authorized within NEI 94–01, Revision 3–A. Industry experience supports the conclusion that Type B and C testing detects a large percentage of containment leakage paths and that the percentage of containment leakage paths that are detected only by Type A testing is small. The containment inspections performed in accordance with ASME Section Xl and TS serve to provide a high degree of assurance that the containment would not degrade in a manner that is detectable only by Type A testing. The combination of these factors ensures that the margin of safety in the plant safety analysis is maintained. The design, operation, testing methods and acceptance criteria for Types A, B, and C containment leakage tests specified in applicable codes and standards would continue to be met, with the acceptance of this proposed change, since these are not affected by changes to the Type A and Type C test intervals.

The proposed amendment also deletes an exception previously granted in amendment 147 to allow a one-time extension of the ILRT test frequency for HCGS. This exception was for an activity that has taken place; therefore, the deletion is solely an administrative action and does not change how HCGS is operated and maintained. Thus, there is no reduction in any margin of safety.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jeffrie J. Keenan, PSEG Nuclear LLC—N21, P.O. Box 236, Hancocks Bridge, NJ 08038.

NRC Acting Branch Chief: Stephen S. Koenick.

South Carolina Electric & Gas Company and South Carolina Public Service Authority, Docket Nos. 52–027 and 52–028, Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3, Fairfield, South Carolina

Date of amendment request: September 29, 2016. A publicly-available version is in ADAMS under Accession No. ML16273A557.

Description of amendment request: The changes would amend Combined License Nos. NPF–93 and NPF–94 for the VCSNS, Units 2 and 3, respectively. The amendments propose changes to the Updated Final Safety Analysis Report (UFSAR) in the form of departures from a plant-specific Design Control Document Tier 2 figure and a Combined Operating License (COL) Appendix C table. Specifically, the proposed departures consist of changes to plant-specific UFSAR Figure 9.3.6–1, Sheet 2 of 2, and COL Appendix C, Table 2.3.2–4, related to the configuration of the boric acid storage tank (BAST) suction point. The change also aligns the Tier 1 Chemical and Volume Control System (CVS) makeup flow rate with previously approved Tier 2 information.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes alter the BAST suction point by relocating the common inlet/outlet line from the bottom of the tank to the side of the tank and to align the Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC) for the maximum CVS flow to the Reactor Coolant System (RCS) with the previously approved Tier 2 descriptions and analyses. No change is made to the minimum required volume of the BAST, the included concentrations, or the overall operation of the system. The proposed changes do not alter any safety related functions, and the analyses previously performed on the potential for an inadvertent dilution event are not affected. Consequently, there is no change to an accident initiator in the UFSAR and accordingly, there is no change to the probabilities of accident previously evaluated. The radioactive source terms and release paths are unchanged, thus the radiological releases in the UFSAR accident analyses are not affected.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of

accident from any accident previously evaluated?

Response: No.

The proposed change to alter the BAST suction point affects only nonsafety-related equipment, reducing the possibility for leaks in the BAST. The basic requirements, including the applicable codes and standards, for the configuration of the BAST are unchanged. In addition, the change to the ITAAC verified CVS makeup flow does not alter the design of the CVS, which is currently limited in the design to 175 gallons per minute of flow. The change to the ITAAC aligns the test with the Tier 2 requirement. Consequently, because the BAST codes and standards are unchanged and the CVS is otherwise unchanged, there is no effect on accidents previously evaluated in the UFSAR.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed change to the BAST piping configuration and to the CVS makeup flow ITAAC does not alter any safety-related equipment, applicable design codes, code compliance, design function, or safety analysis. Consequently, no safety analysis or design basis acceptance limit is challenged or exceeded by the proposed changes, and thus, the margin of safety is not reduced.

Therefore, the proposed amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kathryn M. Sutton, Morgan, Lewis & Bockius, LLC, 1111 Pennsylvania Avenue NW., Washington, DC 20004–2514.

NRC Branch Chief: Michael T. Markley.

South Carolina Electric & Gas Company, Docket Nos. 52–027 and 52–028, Virgil C. Summer Nuclear Station, Units 2 and 3, Fairfield, South Carolina

Date of amendment request: September 2, 2016. A publicly-available version is in ADAMS under Accession No. ML16246A214.

Description of amendment request: The amendment request proposes changes to a plant-specific Tier 1 (and combined license Appendix C) table and the Updated Final Safety Analysis Report (UFSAR) tables to clarify the flow area for the Automatic Depressurization System (ADS) fourth stage squib valves and to reduce the minimum effective flow area for the second and third stage ADS control valves. Pursuant to the provisions of 10 CFR 52.63(b)(1), an exemption from elements of the design as certified in the 10 CFR part 52, Appendix D, design certification rule is also requested for the plant-specific Design Control Document Tier 1 material departures.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes do not adversely affect the operation of any systems or equipment that initiate an analyzed accident or alter any structures, systems, and components (SSC) accident initiator or initiating sequence of events. The proposed changes do not adversely affect the physical design and operation of the second and third stage ADS control valves and fourth stage ADS squib valves, including as-installed inspections, testing, and maintenance requirements, as described in the UFSAR. Therefore, the operation of the second and third stage ADS control valves and fourth stage ADS squib valves is not adversely affected. Inadvertent operation or failure of the second and third stage ADS control valves and fourth stage ADS squib valves are considered as accident initiators or part of an initiating sequence of events for an accident previously evaluated. However, the proposed changes do not adversely affect the probability of inadvertent operation or failure, nor the consequences of such accident precursor sequences. Therefore, the probabilities of the accidents previously evaluated in the UFSAR are not affected.

The proposed changes do not adversely affect the ability of the second and third stage ADS control valves and fourth stage ADS squib valves to perform their design functions. The designs of the second and third stage ADS control valves and fourth stage ADS squib valves continue to meet the same regulatory acceptance criteria, codes, and standards as required by the UFSAR. In addition, the proposed changes maintain the capabilities of the second and third stage ADS control valves and fourth stage ADS squib valves to mitigate the consequences of an accident and to meet the applicable regulatory acceptance criteria. The proposed changes do not adversely affect the prevention and mitigation of other abnormal events, *e.g.,* anticipated operational occurrences, earthquakes, floods and turbine missiles, or their safety or design analyses. Therefore, the consequences of the accidents evaluated in the UFSAR are not affected.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes do not affect the operation of any systems or equipment that may initiate a new or different kind of accident, or alter any SSC such that a new accident initiator or initiating sequence of events is created. The proposed changes do not adversely affect the physical design and operation of the second and third stage ADS control valves and fourth stage ADS squib valves, including as-installed inspections, testing, and maintenance requirements, as described in the UFSAR. Therefore, the operation of the second and third stage ADS control valves and fourth stage ADS squib valves is not adversely affected. These proposed changes do not adversely affect any other SSC design functions or methods of operation in a manner that results in a new failure mode, malfunction, or sequence of events that affect safety-related or nonsafety-related equipment. Therefore, this activity does not allow for a new fission product release path, result in a new fission product barrier failure mode, or create a new sequence of events that results in significant fuel cladding failures.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes maintain existing safety margins. The proposed changes maintain the capabilities of the second and third stage ADS control valves and fourth stage ADS squib valves to perform their design functions. The proposed changes maintain existing safety margin through continued application of the existing requirements of the UFSAR, while updating the acceptance criteria for verifying the design features necessary to confirm the second and third stage ADS control valves and fourth stage ADS squib valves perform the design functions required to meet the existing safety margins in the safety analyses. Therefore, the proposed changes satisfy the same design functions in accordance with the same codes and standards as stated in the UFSAR. These changes do not adversely affect any design code, function, design analysis, safety analysis input or result, or design/safety margin.

No safety analysis or design basis acceptance limit/criterion is challenged or exceeded by the proposed changes, and no margin of safety is reduced. Therefore, the requested amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kathryn M. Sutton, Morgan, Lewis & Bockius, LLC,

1111. Pennsylvania NW., Washington, DC 20004–2514.

NRC Branch Chief: Jennifer Dixon-Herrity.

Southern Nuclear Operating Company, Inc., (SNC) Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendment request: October 11, 2016. A publicly-available version is in ADAMS under Accession No. ML16285A354.

Description of amendment request: SNC stated that the current Technical Specification (TS) 3.8.9, ''Distribution Systems—Operating,'' contains a conservative Completion Time of 8 hours for an inoperable 600 Volt alternating current (AC) load center (LC) 1–2R. The proposed change would add new Action Conditions to TS 3.8.9 and include appropriate Required Actions and associated Completion Times for LC 1–2R.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The licensee's analysis is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed amendment revises the TS requirements to include an appropriate Condition, Required Actions and associated Completion Times to address an inoperable 600 Volt AC LC 1–2R that is required to be operable by TS 3.8.9 ''Distribution Systems—Operating.''

The proposed change does not involve a physical alteration of the plant (no new or different type of equipment will be installed). The 600V LC are not a precursor to any accident previously evaluated. The proposed changes do not adversely affect accident initiators or precursors nor alter the design assumptions, conditions, and configuration of the facility or the manner in which the plant is operated and maintained. The proposed changes do not adversely affect the ability of structures, systems and components (SSCs) to perform their intended safety function to mitigate the consequences of an initiating event within the assumed acceptance limits. The LC 1–2R provides power to equipment that may be used to mitigate the consequences of accidents previously evaluated. The proposed change to TS 3.8.9, ''Distribution Systems—Operating'' provides assurance that the requirements of the TS appropriately address all the equipment that is required to be operable by TS 3.8.9. Thus, the proposed change does not affect the probability or the consequences of any accident previously evaluated.

Therefore, it is concluded that the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed amendment revises the TS to include an appropriate Condition, Required Actions, and associated Completion Times to address inoperable 600 Volt AC LC 1–2R that is required to be operable by TS 3.8.9 ''Distribution Systems- Operating.''

The proposed change does not involve a physical alteration of the plant (no new or different type of equipment will be installed) or a change in the methods governing normal plant operation. The proposed change to the TS assures that the TS appropriately addresses all the equipment required to be operable to support the electrical distribution system. Thus, the proposed change does not adversely affect the design function or operation of any structures, systems, and components important to safety.

Therefore, it is concluded that the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed amendment revises the TS requirements to include an appropriate Condition, Required Actions, and associated Completion Times to address inoperable 600 Volt AC LC 1–2R that is required to be operable by TS 3.8.9 ''Distribution Systems—Operating.''

The proposed change to TS 3.8.9 ''Distribution Systems—Operating'' provides assurance that all the requirements of the TS are appropriately addressed in the Action Conditions. The proposed change serves to make the TS more complete and appropriate for all the equipment required to be operable to support the electrical distribution system. Thus, the proposed change does not involve a change in the margin of safety.

Therefore, it is concluded that the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jennifer M. Buettner, Associate General Counsel, Southern Nuclear Operating Company, 40 Inverness Center Parkway, Birmingham, AL 35201.

NRC Branch Chief: Michael T. Markley.

Southern Nuclear Operating Company, Inc., Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant (VEGP), Units 3 and 4, Burke County, Georgia

Date of amendment request: October 26, 2016. A publicly-available version is in ADAMS under Accession No. ML16300A325.

Description of amendment request: The proposed changes would amend Combined License Nos. NPF–91 and NPF–92 for the VEGP, Units 3 and 4, respectively. The amendments propose changes to the Updated Final Safety Analysis Report (UFSAR) in the form of departures from a plant-specific Design Control Document Tier 2 figure and a Combined Operating License (COL) Appendix C table. Specifically, the proposed departures consist of changes to plant-specific UFSAR Figure 9.3.6–1, Sheet 2 of 2, and COL Appendix C, Table 2.3.2–4, related to the configuration of the boric acid storage tank (BAST) suction point. The changes also align the Tier 1 chemical and volume control system (CVS) makeup flow rate with previously approved Tier 2 information.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes alter the BAST suction point by relocating the common inlet/outlet line from the bottom of the tank to the side of the tank and aligns the Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC) for the maximum CVS flow to the reactor coolant system (RCS) with the previously approved Tier 2 descriptions and analyses. No change is made to the minimum required volume of the BAST, the included concentrations, or the overall operation of the system. The proposed changes do not alter any safety-related functions, and the analyses previously performed on the potential for an inadvertent dilution event are not affected. Consequently, there is no change to an accident initiator in the UFSAR and accordingly, there is no change to the probabilities of accident previously evaluated. The radioactive source terms and release paths are unchanged, thus the radiological releases in the UFSAR accident analyses are not affected.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change to alter the BAST suction point affects only nonsafety-related equipment, reducing the possibility for leaks in the BAST. The basic requirements, including the applicable codes and standards, for the configuration of the BAST are unchanged. In addition, the change to the ITAAC verified CVS makeup flow does not alter the design of the CVS, which is currently limited in the design to 175 gallons per minute of flow. The change to the ITAAC aligns the test with the Tier 2 requirement. Consequently, because the BAST codes and standards are unchanged and the CVS is otherwise unchanged, there is no effect on accidents previously evaluated in the UFSAR.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed change to the BAST piping configuration and to the CVS makeup flow ITAAC does not alter any safety-related equipment, applicable design codes, code compliance, design function, or safety analysis. Consequently, no safety analysis or design basis acceptance limit is challenged or exceeded by the proposed changes, and thus, the margin of safety is not reduced.

Therefore, the proposed amendment does not involve a significant reduction in a margin of safety from any accident previously evaluated.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: M. Stanford Blanton, Balch & Bingham LLP, 1710 Sixth Avenue North, Birmingham, AL 35203–2015.

NRC Branch Chief: Michael T. Markley.

Southern Nuclear Operating Company, Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant, Units 3 and 4, Burke County, Georgia

Date of amendment request: August 31, 2016. A publicly-available version is in ADAMS under Accession No. ML16244A253.

Description of amendment request: The amendment request proposes changes to the Updated Final Safety Analysis Report (UFSAR) in the form of departures from the incorporated plant-specific Design Control Document Tier 2 information and a combined license (COL) License Condition which references one of the proposed changes. Additionally, the proposed changes to the UFSAR eliminate pressurizer spray line monitoring during pressurizer surge line first plant only testing. In addition, these proposed changes correct inconsistencies in testing purpose, testing duration, and the ability to leave equipment in place following the data collection period. These changes involve material which is specifically referenced in Section 2.D.(2) of the COLs. This submittal requests approval of the license amendment necessary to implement these changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below with Nuclear Regulatory Commission (NRC) staff edits in square brackets:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The design functions of the [reactor coolant system (RCS)] include providing an effective reactor coolant pressure boundary. The proposed changes for removing the requirement to install temporary instrumentation on the pressurizer spray line during the monitoring of the pressurizer surge line for thermal stratification and thermal cycling during hot functional testing and during the first fuel cycle for the first plant only, proposed changes to parameter retention requirements, and proposed change to remove the pressurizer spray and surge l ine valve leakage requirement do not impact the existing design requirements for the RCS. These changes are acceptable as they are consistent with the commitments made for the pressurizer surge line monitoring program for the first plant only, and do not adversely affect the capability of the pressurizer surge line and pressurizer spray lines to perform the required reactor coolant pressure boundary design functions.

These proposed changes to the monitoring of the pressurizer surge line for thermal stratification and thermal cycling during hot functional testing and during the first fuel cycle for the first plant only, proposed changes to parameter retention requirements, and proposed change to remove the pressurizer spray and surge line valve leakage requirement as described in the current licensing basis do not have an adverse effect on any of the design functions of the systems. The proposed changes do not affect the support, design, or operation of mechanical and fluid systems required to mitigate the consequences of an accident. There is no change to plant systems or the response of systems to postulated accident conditions. There is no change to the predicted radioactive releases due to postulated accident conditions. The plant response to previously evaluated accidents or external events is not adversely affected, nor do the proposed changes create any new accident precursors.

Therefore, the requested amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes for removing the requirement to install temporary instrumentation on the pressurizer spray line during the monitoring of the pressurizer surge line for thermal stratification and thermal cycling during hot functional testing and during the first fuel cycle for the first plant only, proposed changes to parameter retention requirements, and proposed change to remove the pressurizer spray and surge line valve leakage requirement as described in the current licensing basis maintain the required design functions, and are consistent with other Updated Final Safety Analysis Report (UFSAR) information. The proposed changes do not adversely affect the design requirements for the RCS, including the pressurizer surge line and pressurizer spray lines. The proposed changes do not adversely affect the design function, support, design, or operation of mechanical and fluid systems. The proposed changes do not result in a new failure mechanism or introduce any new accident precursors. No design function described in the UFSAR is adversely affected by the proposed changes.

Therefore, the requested amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

No safety analysis or design basis acceptance limit/criterion is challenged or exceeded by the proposed changes, and no margin of safety is reduced. Therefore, the requested amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: M. Stanford Blanton, Balch & Bingham LLP, 1710 Sixth Avenue North, Birmingham, AL 35203–2015.

NRC Branch Chief: Jennifer Dixon-Herrity.

Southern Nuclear Operating Company, Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant, Units 3 and 4, Burke County, Georgia

Date of amendment request: October 14, 2016. Publicly-available version is in ADAMS under Accession No. ML16288A810.

Description of amendment request: The requested amendment requires a change to the Combined License (COL) Appendix A, as well as plant-specific

Tier 2, Tier 2 *, and COL Appendix C (and corresponding plant-specific Tier 1). The proposed changes would revise the licenses basis documents to add design detail to the automatic depressurization system (ADS) blocking device and to add the blocking device to the design of the in-containment refueling water storage tank injection squib valves actuation logic. An exemption request relating to the proposed changes to the AP1000 Design Control Document Tier 1 is included with the request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below with Nuclear Regulatory Commission (NRC) staff edits in square brackets:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The AP1000 accident analysis previously evaluated a loss of coolant accident caused by an inadvertent ADS valve actuation. Adding design detail to the ADS blocking device, and applying the blocking device to the [in-containment refueling water storage tank (IRWST)] injection valves, does not impact this analysis. Using a blocking device on the ADS and IRWST injection valves is a design feature which further minimizes the probability of a loss of coolant accident caused by a spurious valve actuation. Furthermore, because the blocking device is designed to prevent a spurious valve actuation due to a software [common cause failure (CCF)] and does not adversely impact any existing design feature, it does not involve a significant increase in the probability of an accident previously evaluated.

The proposed amendment does not affect the prevention and mitigation of abnormal events, *e.g.,* accidents, anticipated operation occurrences, earthquakes, floods, turbine missiles, and fires or their safety or design analyses. This change does not involve containment of radioactive isotopes or any adverse effect on a fission product barrier. There is no impact on previously evaluated accidents source terms. The [protection and safety monitoring system (PMS)] is still able to actuate ADS and IRWST injection valves for plant conditions which require their actuation. Therefore, the proposed amendment does not involve a significant increase in the consequences of an accident previously evaluated

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes do not involve a new failure mechanism or malfunction, which affects an SSC accident initiator, or interface with any [structure, system, or component (SSC)] accident initiator or initiating sequence of events considered in the design and licensing bases. There is no adverse effect on radioisotope barriers or the release of radioactive materials. The proposed amendment does not adversely affect any accident, including the possibility of creating a new or different kind of accident from any accident previously evaluated. Therefore, the proposed changes do not create the possibility of a new or different type of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The blocking device is independent of PMS processor hardware and software. It is designed to allow for ADS and IRWST injection actuations when the plant parameters indicate an actual [loss of coolant accident (LOCA)] event. Therefore, the ADS and IRWST are still able to perform their safety functions when required. A postulated failure of a blocking device which would prevent necessary ADS and IRWST injection valve opening would be detected by the proposed periodic surveillance testing within the [Technical Specifications (TS)]. Failure of the ADS actuation or IRWST injection valve opening in a division could also result from concurrent failure of the two Core Makeup Tanks (CMTs) level sensors in one division, with both sensors reading above the blocking setpoint. Failures of the level sensors would be immediately detected due to the deviations in redundant measurements. Furthermore, the proposed TS actions require that the four divisions of blocking devices be capable of automatically unblocking for each CMT. In addition, the TS require that the blocking devices be unblocked in plant modes which allow for the operability of less than two CMTs.

The blocking device will continue to comply with the existing [Updated Final Safety Analysis Report (UFSAR)] regulatory requirements and industry standards. The proposed changes would not affect any safety-related design code, function, design analysis, safety analysis input or result, or existing design/safety margin. No safety analysis or design basis acceptance limit/criterion is challenged or exceeded by the requested changes. Therefore the proposed amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: M. Stanford Blanton, Balch & Bingham LLP, 1710 Sixth Avenue North, Birmingham, AL 35203–2015.

NRC Branch Chief: Jennifer Dixon-Herrity.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

Dominion Nuclear Connecticut, Inc., Docket No. 50–336, Millstone Power Station, Unit No. 2 (MPS2), New London County, Connecticut

Date of amendment request: January 26, 2016, as supplemented by letter dated July 14, 2016.

Brief description of amendment: The amendment revised the MPS2 licensing basis to change the spent fuel pool heat load analysis description contained in the Final Safety Analysis Report.

Date of issuance: November 29, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment No.: 330. A publicly-available version is in ADAMS under Accession No. ML16277A680; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–65: Amendment revised the Renewed Operating License.

Date of initial notice in ***Federal Register:*** May 24, 2016 (81 FR 32804). The supplemental letter dated July 14, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 29, 2016.

No significant hazards consideration comments received: No.

Duke Energy Florida, Inc. (DEF), et al., Docket No. 50–302, Crystal River Nuclear Generating Plant, Unit 3 (CR–3), Citrus County, Florida

Date of application for amendment: August 27, 2015, as supplemented by letters dated March 2, 2016, and July 14, 2016.

Brief description of amendment: The amendment approves the CR–3 Permanently Defueled Emergency Plan, and Permanently Defueled Emergency Action Level Bases Manual, for the Independent Spent Fuel Storage Installation.

Date of issuance: December 5, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment No.: 252. A publicly-available version is in ADAMS under Accession No. ML16244A102; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Operating License No. DPR–72: This amendment revises the License.

Date of initial notice in ***Federal Register:*** November 10, 2015 (80 FR 69711).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 5, 2016.

No significant hazards consideration comments received: No.

Duke Energy Progress, LLC, Docket No. 50–261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: November 2, 2015, as supplemented by letters dated December 22, 2015; and March 31, May 9, and September 14, 2016.

Brief description of amendment: The amendment revised the reactor coolant system (RCS) pressure and temperature limits by replacing Technical Specification (TS) Section 3.4.3, ''RCS Pressure and Temperature (P/T) Limits,'' Figures 3.4.3–1 and 3.4.3–2, with figures that are applicable up to 50 effective full power years (EFPYs).

Date of issuance: November 22, 2016.

Effective date: As of the date of issuance and shall be implemented within 120 days of issuance.

Amendment No.: 248. A publicly-available version is in ADAMS under Accession No. ML16285A404; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–23: Amendment revised the Renewed Facility Operating License and Technical Specifications.

Date of initial notice in ***Federal Register:*** March 1, 2016 (81 FR 10678). The supplemental letters dated March 31, May 9, and September 14, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 22, 2016.

No significant hazards consideration comments received: No.

Duke Energy Progress, LLC, Docket No. 50–400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: August 18, 2015, as supplemented by letters dated September 29, 2015, February 5, 2016, April 28, 2016, and May 19, 2016.

Brief description of amendment: The amendment revised the Technical Specifications (TSs) by relocating specific surveillance frequencies to a licensee-controlled program with the implementation of Nuclear Energy Institute (NEI) 04–10, ''Risk-Informed Technical Specifications Initiative 5b, Risk-Informed Method for Control of Surveillance Frequencies.'' Additionally, the change added a new program, the Surveillance Frequency Control Program, to TS Section 6, ''Administrative Controls.''

Date of issuance: November 29, 2016.

Effective date: As of the date of issuance and shall be implemented within 120 days of issuance.

Amendment No.: 154. A publicly-available version is in ADAMS under Accession No. ML16200A285; documents related to this amendment are listed in the Safety Evaluation (SE) enclosed with the amendment.

Renewed Facility Operating License No. NPF–63: Amendment revised the Facility Operating License and TSs.

Date of initial notice in ***Federal Register:*** The NRC staff initially made a proposed determination that the amendment request dated August 18, 2015, as supplemented by letter dated September 29, 2015, involved no significant hazards consideration (NSHC) (December 8, 2015, 80 FR 76319). By letters dated February 5, 2016, and April 28, 2016, the licensee provided clarifying information that did not expand the scope of the application and did not change the NRC staff's original proposed NSHC determination, as published in the **Federal Register** (FR) on December 8, 2015 (80 FR 76319). Subsequently, by letter dated May 19, 2016, the licensee supplemented its amendment request with a proposed change that expanded the scope of the request. Therefore, the NRC published a second proposed NSHC determination in the FR on July 15, 2016 (81 FR 46118), which superseded the notice dated December 8, 2015 (80 FR 76319).

The Commission's related evaluation of the amendment is contained in an SE dated November 29, 2016.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket No. STN 50–457, Braidwood Station, Unit No. 2, Will County, Illinois

Date of application for amendment: September 30, 2016 (ADAMS Accession No. ML16274A474), as supplemented by letters dated October 26 and 28, 2016, and November 14, 2016 (ADAMS Accession Nos. ML16301A073, ML16302A468, and ML16319A397).

Brief description of amendment: The amendment allows a one-time extension from 72 hours to 200 hours of the technical specification completion time associated with the 2A service water (SX) pump in support of maintenance activities.

Date of issuance: November 23, 2016.

Effective date: As of the date of issuance and shall be implemented prior to the 2A SX pump work window.

Amendment No.: 191. A publicly-available version is in ADAMS under Accession No. ML16315A302; documents related to this amendment

are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No NPF–77: The amendment revises the Technical Specifications and License

Date of initial notice in ***Federal Register:*** October 21, 2016 (81 FR 72838).

The October 26 and 28, 2016 supplements, contained clarifying information and did not change the NRC staff's initial proposed finding of no significant hazards consideration.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 23, 2016.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket Nos. 50–237 and 50–249. Dresden Nuclear Power Station (DNPS), Unit Nos. 2 and 3, Grundy County, Illinois

Date of application for amendment: December 14, 2015, as supplemented by letter dated

June 30, 2016.

Brief description of amendments: The amendment revises the technical specification (TS) for DNPS, Units 2 and 3, standby or emergency diesel generator (EDG) fuel oil day tank volume as described in TS 3.81, ''AC Sources—Operating,'' surveillance requirement (SR) 3.8.1.4, from the current value of greater than or equal to (>) 205 gallons to >245 gallons. Raising the EDG fuel oil day tank volume requirement will assure that each EDG can operate for one hour at the maximum allowable operating conditions. The licensee has identified this issue as a non-conservative Technical Specification and administrative controls are currently in-place to assure sufficient fuel oil is available in each fuel oil day tank.

Date of issuance: November 30, 2016.

Effective date: As of the date of issuance and shall be implemented no later than 60 days from the date of issuance.

Amendment Nos.: 252 and 245. A publicly-available version is in ADAMS under Accession No. ML16305A212; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License Nos. DPR–19 and DPR–25: Amendment revises the Renewed Facility Operating Licenses and Technical Specification.

Date of initial notice in ***Federal Register:*** March 1, 2016 (81 FR 10680). The supplemental letter dated June 30, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety evaluation dated November 30, 2016.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket Nos. 50–352 and 50–353, Limerick Generating Station, Units 1 and 2, Montgomery County, Pennsylvania

Date of amendment request: January 15, 2016, as supplemented by letters dated April 19, 2016; May 9, 2016; and June 21, 2016.

Brief description of amendments: The amendments reduce the reactor vessel steam dome pressure specified in the technical specifications (TSs) for the reactor core safety limits. The amendments also revise the setpoint and allowable value for the main steam line low pressure isolation function in the TSs.

Date of issuance: November 21, 2016.

Effective date: As of the date of issuance and shall be implemented within 120 days of issuance.

Amendment Nos.: 222 and 183. A publicly-available version is in ADAMS under Accession No. ML16272A319; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. NPF–39 and NPF–85: Amendments revised the Renewed Facility Operating Licenses and TSs.

Date of initial notice in ***Federal Register:*** March 15, 2016 (81 FR 13842). The supplemental letters dated April 19, 2016; May 9, 2016; and June 21, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 21, 2016.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket No. 50–410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: February 23, 2016.

Brief description of amendment: The amendment revised the Technical Specifications.

Date of issuance: November 22, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment No.: 159. A publicly-available version is in ADAMS under Accession No. ML16281A596; documents related to this amendment is listed in the Safety Evaluation enclosed with this amendment.

Renewed Facility Operating License No. NPF–69: Amendment revised the Renewed Facility Operating License and Technical Specifications.

Date of initial notice in ***Federal Register:*** May 10, 2016, (81 FR 28897).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 22, 2016.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket No. 50–219, Oyster Creek Nuclear Generating Station (OCNGS), Ocean County, New Jersey

Exelon Generation Company, LLC, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit 1 (NMP1), Oswego County, New York

Date amendment request: August 1, 2016.

Brief description of amendments: The amendments would revise OCNGS's Technical

Specification (TS) Section 2.1, ''Safety Limit—Fuel Cladding Integrity,'' and NMP1's TS Section 2.1.1, ''Fuel Cladding Integrity,'' to reduce the steam dome pressure.

Date of issuance: November 29, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment Nos.: 289 for OCNGS and 225 for NMP1. A publicly-available version is in ADAMS under Accession No. ML16256A567; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–16 and DPR–63: Amendments revised the Licenses and Technical Specifications.

Date of initial notice in ***Federal Register:*** September 27, 2016 (81 FR 66307).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 29, 2016.

No significant hazards consideration comments received: No.

Florida Power & Light Company, et al., Docket Nos. 50–335 and 50–389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendment request: April 31, 2016, as supplemented by a letter dated August 11, 2016.

Brief description of amendments: The amendments revised Appendix B (Environmental Protection Plan, Section 4.2) of the renewed operating licenses to reflect the ''currently applicable'' Biological Opinion issued by the National Marine Fisheries Service March 24, 2016.

Date of issuance: December 5, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment Nos.: 236 and 186. A publicly-available version is in ADAMS under Accession No. ML16251A128; documents related to these amendments are listed in the safety evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–67 and NPF–16: Amendments revised the Renewed Facility Operating Licenses and Appendix B.

Date of initial notice in ***Federal Register***: June 7, 2016 (81 FR 36621). The supplemental letter dated August 11, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a safety evaluation dated December 5, 2016.

No significant hazards consideration comments received: No.

South Carolina Electric & Gas Company and South Carolina Public Service Authority, Docket Nos. 52–027 and 52–028, Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3, Fairfield County, South Carolina

Date of amendment request: December 17, 2015 as supplemented January 11, 2016 and March 16, 2016.

Description of amendment: The amendment authorizes changes to the VCSNS, Units 2 and 3, Updated Final Safety Analysis Report Tier 2* information as well as a change to a license condition to, in part, revise the Wall 11 structure by modifying openings, changing reinforcement detailing, clarifying the classification of building structures for high-energy line break events, crediting the north wall of the Turbine Building first bay wall as a high energy line break barrier and associated missile barriers for protection of Wall 11 from tornado missiles.

Date of issuance: May 31, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 48. A publicly-available version is in ADAMS under Accession No. ML16109A298; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Combined Licenses Nos. NPF–93 and NPF–94: Amendment revised the Facility Combined Licenses.

Date of initial notice in ***Federal Register***: February 2, 2016 (81 FR 5499). The supplemental letters dated January 11, 2016, and March 16, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in the Safety Evaluation dated May 31, 2016.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant (VEGP), Units 3 and 4, Burke County, Georgia

Date of amendment request: May 18, 2016.

Description of amendment: The amendment authorizes changes to the VEGP Units 3 and 4 listed minimum volume of the passive core cooling system core makeup tanks (CMT) reflected in Appendix A, Technical Specifications and the Updated Final Safety Analysis Report of the VEGP Units 3 and 4 Combined Licenses. Specifically, the changes reflect a correction to align licensing documents to reflect the CMT volume given in the VEGP Combined License Tier 1 as 2487 cubic feet is based on and supported by a small-break loss-of-coolant accident safety analysis.

Date of issuance: September 15, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 53. A publicly-available version is in ADAMS under Accession No. ML16216A394; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Combined Licenses No. NPF–91 and NPF–92: Amendment revised the Facility Combined Licenses.

Date of initial notice in ***Federal Register***: July 5, 2016 (81 FR 43646).

The Commission's related evaluation of the amendment is contained in the Safety Evaluation dated September 15, 2016.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant (VEGP), Units 3 and 4, Burke County, Georgia

Date of amendment request: January 29, 2016, and supplemented by letter dated April 8, 2016.

Description of amendment: The amendment authorizes changes to the VEGP, Units 3 and 4, Updated Final Safety Analysis Report in the form of departures from the incorporated plant specific Design Control Document Tier 2* and Tier 2 information. The changes are also approved in plant-specific technical specifications. The changes incorporate information in WCAP–17524–P–A, Revision 1, ''AP1000 Core Reference Report,'' which was approved by the U.S. Nuclear Regulatory Commission on February 19, 2015.

Date of issuance: August 19, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 52. A publicly-available version is in ADAMS under Accession No. ML16201A435; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Combined Licenses Nos. NPF–91 and NPF–92: Amendment revised the Facility Combined Licenses.

Date of initial notice in ***Federal Register***: March 29, 2016 (81 FR 17501). The supplemental letter dated April 8, 2016, provided additional information that clarified the application, did not expand the scope of the application request as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in the Safety Evaluation dated August 19, 2016.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant (VEGP), Units 3 and 4, Burke County, Georgia

Date of amendment request: December 22, 2015, and supplemented by letters dated May 9, 2016, and May 27, 2016.

Description of amendment: The amendment authorizes changes to the VEGP, Units 3 and 4, Updated Final Safety Analysis Report in the form of departures from the incorporated plant-specific Design Control Document Tier 2* and Tier 2 information with respect to proposed changes to the design of auxiliary building Wall 11, and other changes to the licensing basis for use of seismic Category II structures. It also involves a change to a license condition.

Date of issuance: August 3, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 51. A publicly-available version is in ADAMS under Accession No. ML16201A298; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Combined Licenses No. NPF–91 and NPF–92: Amendment revised the Facility Combined Licenses.

Date of initial notice in ***Federal Register***: February 16, 2016 (81 FR 7835). The supplemental letters dated May 9, 2016, and May 27, 2016, provided additional information that clarified the application, did not expand the scope of the application request as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in the Safety Evaluation dated August 3, 2016.

No significant hazards consideration comments received: No.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Final Determination of No Significant Hazards Consideration and Opportunity for a Hearing (Exigent Public Announcement or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual notice of consideration of issuance of amendment, proposed no significant hazards consideration determination, and opportunity for a hearing.

For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards consideration determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License or Combined License, as applicable, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment.

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and a petition to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the NRC's PDR, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. The NRC's regulations are accessible electronically from the NRC Library on the NRC's Web site at *http://www.nrc.gov/reading-rm/doc-collections/cfr/*. If a petition is filed within 60 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest. The petition must also set forth the specific contentions which the petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that person's admitted contentions consistent with the NRC's regulations, policies, and procedures.

Petitions for leave to intervene must be filed no later than 60 days from the date of publication of this notice. Requests for hearing, petitions for leave to intervene, and motions for leave to file new or amended contentions that are filed after the 60-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of any amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1).

The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission by February 21, 2017. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may also have the opportunity to participate under 10 CFR 2.315(c).

If a hearing is granted, any person who does not wish, or is not qualified, to become a party to the proceeding may, in the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of position on the issues, but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene (hereinafter ''petition''), and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to request (1) a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* System requirements for accessing the E-Submittal server are available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/adjudicatory-sub.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Electronic Filing Help Desk will not be

able to offer assistance in using unlisted software.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a petition. Submissions should be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 7 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland, 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *http://ehd1.nrc.gov/ehd/,* unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, in some instances, a petition will require including information on local residence in order to demonstrate a proximity assertion of interest in the proceeding. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

Exelon Generation Company, LLC, Docket No. 50–410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: November 26, 2016.

Brief description of amendment: The amendment revised the High Pressure Core Spray system and Reactor Core Isolation Cooling system actuation instrumentation technical specifications by adding a footnote indicating that the injection functions of Drywell Pressure-High and Manual Initiation are not required to be operable under low reactor pressure conditions.

Date of issuance: November 29, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 160. A publicly-available version is in ADAMS under Accession No. ML16333A000; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–69: Amendment revised the Renewed Facility Operating License and Technical Specifications.

Public comments requested as to proposed no significant hazards consideration (NSHC): No.

The Commission's related evaluation of the amendment, finding of emergency circumstances, state consultation, and final NSHC determination are contained in a Safety Evaluation dated November 29, 2016.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–025 and 52–026; NRC–2008–0252]

Southern Nuclear Operating Company, Inc., Vogtle Electric Generating Plant, Units 3 and 4; Reconciliation of Tier 1 Valve Differences

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 39 to Combined Licenses (COL), NPF–91 and NPF–92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, MEAG Power SPVM, LLC, MEAG Power SPVJ, LLC, MEAG Power SPVP, LLC, Authority of Georgia, and the City of Dalton, Georgia (the licensee); for construction and operation of the Vogtle Electric Generating Plant (VEGP) Units 3 and 4, located in Burke County, Georgia.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The Exemption was issued on September 15, 2015.

ADDRESSES: Please refer to Docket ID NRC–2008–0252 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and is publicly available, using any of the following methods:

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, ''Scope and Contents,'' of Appendix d, ''Design Certification Rule for the AP1000,'' to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 39 to COLs, NPF–91 and NPF–92, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, ''Processes for Changes and Departures,'' Appendix d, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would allow changes in Appendix C to reconcile various valve descriptions and definitions in Updated Final Safety Analysis Report Tier 1 and associated Tier 2 information. Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of Appendix d to 10 CFR part 52. The license amendment was found

to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML15232A176.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VEGP Units 3 and 4 (COLs NPF–91 and NPF–92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML15232A179 and ML15232A181, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF–91 and NPF–92 are available in ADAMS under Accession Nos. ML15232A171 and ML15232A172, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VEGP Units 3 and Unit 4. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated June 4, 2014, and supplemented by the letter dated December 5, 2014, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, Appendix d, as part of license amendment request 13–021, ''Reconciliation of Tier 1 Valve Differences.''

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation, which can be found at ADAMS Accession No. ML15232A176, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1, Combined License Appendix C, Tables 2.1.2–1, 2.2.1–1, 2.2.2–1, 2.2.3–1, 2.2.3–3, 2.2.5–1, 2.3.2–1, 2.3.2–3, and 2.3.6–1, as described in the licensee's request dated June 4, 2014, and supplemented by the letter dated December 5, 2014. This exemption is related to, and necessary for the granting of License Amendment No. 39, which is being issued concurrently with this exemption.

3. As explained in Section 5.0 of the NRC staff's Safety Evaluation (ADAMS Accession No. ML15232A176), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated June 4, 2014, and supplemented by the letter dated December 5, 2014, the licensee requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF–91 and NPF–92. The proposed amendment is described in Section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on September 16, 2014 (79 FR 55514). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on June 4, 2014, and supplemented by the letter dated December 5, 2014.

The exemption and amendment were issued on September 15, 2015, as part of a combined package to the licensee (ADAMS Accession No. ML15232A150).

Dated at Rockville, Maryland, this 13th day of December 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79548; File No. SR–CBOE–2016–085]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fees Schedule

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 1, 2016, Chicago Board Options Exchange, Incorporated (the ''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Fees Schedule. The text of the proposed rule change is also available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule. Specifically, the Exchange proposes to increase the transaction fee for electronic executions by broker-dealers, non-Trading Permit Holder (''non-TPH'') Market-Makers, Professionals/Voluntary Professionals and Joint Back-Offices (''JBOs'') in Penny Pilot equity, ETF, ETN and index options (excluding Underlying Symbol List A) classes from $0.45 per contract to $0.47 per contract. The Exchange notes that this increase is in line with the amount assessed by another exchange for similar transactions.[3]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See e.g.,* NASDAQ PHLX Pricing Schedule, Section II, Multiply Listed Options Fees.

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[6] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

Increasing the fee for electronic executions by broker-dealers, non-TPH Market-Makers, Professionals/Voluntary Professionals and JBOs in Penny Pilot equity, ETF, ETN and index options (excluding Underlying Symbol List A) classes is reasonable because the proposed fee amount is in line with the amount assessed by another exchange for similar transactions.[7] The Exchange believes that this proposed change is also equitable and not unfairly discriminatory because the Exchange will assess broker-dealers, non-TPH Market-Makers, Professionals/Voluntary Professionals and JBOs the same electronic options transaction fees in Penny Pilot options classes. The Exchange notes that it does not assess Customers the electronic options transaction fees in Penny Pilot options because Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Specifically, Customer liquidity benefits all market participants by providing more trading opportunities, which attracts Market-Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The Exchange notes that Market-Makers are assessed lower electronic options transaction fees in Penny Pilot options as compared to Professionals, JBOs, Broker Dealers and non-Trading Permit Holder Market-Makers because they have obligations to the market and regulatory requirements, which normally do not apply to other market participants (*e.g.,* obligations to make continuous markets). Clearing Trading Permit Holder Proprietary orders are assessed lower options transaction fees in Penny Pilot options because they also have obligations, which normally do not apply to other market participants (*e.g.,* must have higher capital requirements, clear trades for other market participants, must be members of OCC). Accordingly, the differentiation between electronic transaction fees for Customers, Market-Makers, Clearing Trading Permit Holders and other market participants recognizes the differing obligations and contributions made to the liquidity and trading environment on the Exchange by these market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that are [sic] not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because, while the proposed fee increase applies only to certain market participants, the other market participants have different obligations and different circumstances (as described in the ''Statutory Basis'' section above). For example, Clearing TPHs have clearing obligations that other market participants do not have. Market-Makers have quoting obligations that other market participants do not have. There is also a history in the options markets of providing preferential treatment to Customers. The Exchange does not believe that the proposed change will cause any unnecessary burden on intermarket competition because the proposed change only affects trading on CBOE. To the extent that the proposed changes make CBOE a more attractive marketplace for market participants at other exchanges, such market participants are welcome to become CBOE market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and paragraph (f) of Rule 19b–4[9] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–CBOE–2016–085 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2016–085. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2016–085, and should be submitted on or before January 10, 2017.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79551; File No. SR–NASDAQ–2016–131]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change To Enhance the Reopening Auction Process Following a Trading Halt Declared Pursuant to the Plan To Address Extraordinary Market Volatility

December 14, 2016.

On October 13, 2016, The Nasdaq Stock Market LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change related to the reopening auction process following a trading halt declared pursuant to the Plan to Address Extraordinary Market Volatility. The proposed rule change was published for comment in the **Federal Register** on November 1, 2016.[3] On December 5, 2016, the Exchange filed Amendment No. 1 to its proposed rule change.[4] The Commission received no comments on the proposed rule change.

Section 19(b)(2) of the Act [5] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is December 16, 2016. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[6] designates January 30, 2017 as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR–NASDAQ–2016–131).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Securities Act of 1933 Release No. 10266/December 14, 2016; Securities Exchange Act of 1934 Release No. 79544/December 14, 2016]

Order Approving Public Company Accounting Oversight Board Budget and Annual Accounting Support Fee for Calendar Year 2017

The Sarbanes-Oxley Act of 2002, as amended (the ''Sarbanes-Oxley Act''),[1] established the Public Company Accounting Oversight Board (''PCAOB'') to oversee the audits of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports. Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the ''Dodd-Frank Act'') [2] amended the Sarbanes-Oxley Act to provide the PCAOB with explicit authority to oversee auditors of broker-dealers registered with the Commission. The PCAOB is to accomplish these goals through registration of public accounting firms and standard setting, inspection, and disciplinary programs. The PCAOB is subject to the comprehensive oversight of the Securities and Exchange Commission (the ''Commission'').

Section 109 of the Sarbanes-Oxley Act provides that the PCAOB shall establish a reasonable annual accounting support fee, as may be necessary or appropriate to establish and maintain the PCAOB. Under Section 109(f) of the Sarbanes-Oxley Act, the aggregate annual accounting support fee shall not exceed the PCAOB's aggregate ''recoverable budget expenses,'' which may include operating, capital and accrued items. The PCAOB's annual budget and accounting support fee are subject to approval by the Commission. In addition, the PCAOB must allocate the annual accounting support fee among issuers and among brokers and dealers.

Section 109(b) of the Sarbanes-Oxley Act directs the PCAOB to establish a budget for each fiscal year in accordance with the PCAOB's internal procedures, subject to approval by the Commission. Rule 190 of Regulation P governs the Commission's review and approval of PCAOB budgets and annual accounting support fees.[3] This budget rule provides, among other things, a timetable for the preparation and submission of the PCAOB budget and for Commission actions related to each budget, a description of the information that should be included in each budget submission, limits on the PCAOB's ability to incur expenses and obligations except as provided in the approved budget, procedures relating to supplemental budget requests, requirements for the PCAOB to furnish on a quarterly basis certain budget-related information, and a list of definitions that apply to the rule and to general discussions of PCAOB budget matters.

In accordance with the budget rule, in March 2016 the PCAOB provided the Commission with a narrative description of its program issues and outlook for the 2017 budget year. In response, the Commission provided the PCAOB with economic assumptions and budgetary guidance for the 2017 budget year. The PCAOB subsequently delivered a preliminary budget and budget justification to the Commission. Staff from the Commission's Office of the Chief Accountant and Office of Financial Management dedicated a substantial amount of time to the review and analysis of the PCAOB's programs, projects and budget estimates; reviewed the PCAOB's estimates of 2016 actual spending; and attended several meetings with management and staff of the

PCAOB to further develop their understanding of the PCAOB's budget and operations. During the course of this review, Commission staff relied upon representations and supporting documentation from the PCAOB. Based on this review, the Commission issued a ''pass back'' letter to the PCAOB. On November 17, 2016, the PCAOB approved its 2017 budget during an open meeting, and subsequently submitted that budget to the Commission for approval.

After considering the above, the Commission did not identify any proposed disbursements in the 2017 budget adopted by the PCAOB that are not properly recoverable through the annual accounting support fee, and the Commission believes that the aggregate proposed 2017 annual accounting support fee does not exceed the PCAOB's aggregate recoverable budget expenses for 2017. The Commission also acknowledges the PCAOB's updated strategic plan and encourages the PCAOB to continue keeping the Commission and its staff apprised of significant new developments. The Commission looks forward to providing views to the PCAOB as future updates are made to the plan. In addition, the PCAOB should submit its 2016 annual report to the Commission by April 1, 2017.

We understand that the Board continues to take steps to implement improvements to the performance and management of the PCAOB's standard-setting process. The Commission directs the PCAOB to continue to provide timely updates throughout the year on the progress of this initiative as well as on any significant recommended or anticipated changes to processes or funding.

The Commission emphasizes the importance of the PCAOB's identifying efficiencies, process improvements, and cost savings wherever possible. Accordingly, the Commission directs the Board to conduct a study assessing its operational efficiency and budgetary needs and submit a supplemental report to the Commission of the Board's assessment in connection with the start of the 2018 budget cycle. The report should identify any areas where specific savings may be achieved while continuing to enable the PCAOB to fully perform its mission. The PCAOB should submit the report to the Commission along with its 2018 budgetary outlook letter.

As part of its review of the 2017 budget, the Commission notes that the Board's management of the Center for Economic Analysis (''Center'') should continue to advance the PCAOB's mission. The Commission directs the PCAOB during 2017 to continue providing quarterly updates to the Commission on the Center's activities and progress towards its stated goals.

The Commission directs the Board during 2017 to continue to provide in its quarterly reports to the Commission detailed information about the state of the PCAOB's information technology (''IT'') program, including planned, estimated, and actual costs for IT projects, and the level of involvement of consultants. These reports also should continue to include: (a) A discussion of the Board's assessment of the IT program; and (b) the quarterly IT report that is prepared by PCAOB staff and submitted to the Board.

The Commission also directs the Board during 2017 to continue to include in its quarterly reports to the Commission information about the PCAOB's inspections program. Such information is to include: (a) Statistics relative to the numbers and types of firms budgeted and expected to be inspected in 2017, including by location and by year the inspections are required to be conducted in accordance with the Sarbanes-Oxley Act and PCAOB rules; (b) information about the timing of the issuance of inspections reports for domestic and non-U.S. inspections; and (c) updates on the PCAOB's efforts to establish cooperative arrangements with respective non-U.S. authorities for inspections required in those countries.

The Commission understands that the Office of Management and Budget (''OMB'') has determined the 2017 budget of the PCAOB to be sequestrable under the Budget Control Act of 2011.[4] For 2016, the PCAOB sequestered $16 million. That amount will become available in 2017. For 2017, the sequestration amount will be $17 million. Accordingly, the PCAOB should submit a revised spending plan for 2017 reflecting a $1 million reduction to budgeted expenditures as a result of the increase in sequestration amount from 2016 to 2017.

The Commission has determined that the PCAOB's 2017 budget and annual accounting support fee are consistent with Section 109 of the Sarbanes-Oxley Act. Accordingly,

It is ordered, pursuant to Section 109 of the Sarbanes-Oxley Act, that the PCAOB budget and annual accounting support fee for calendar year 2017 are approved.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79549; File No. SR–BX–2016–067]

Self-Regulatory Organizations; NASDAQ BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4770 (Compliance With Regulation NMS Plan To Implement a Tick Size Pilot)

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 30, 2016, NASDAQ BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend BX Rule 4770 to modify the Web site data publication requirements relating to the Regulation NMS Plan to Implement a Tick Size Pilot Program (''Plan'') and to clarify the timing and format of publishing Market Maker registration statistics.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On August 25, 2014, BX, and several other self-regulatory organizations (the ''Participants'') filed with the Commission, pursuant to Section 11A of the Act [3] and Rule 608 of Regulation NMS thereunder,[4] the Plan to Implement a Tick Size Pilot Program.[5] The Participants filed the Plan to comply with an order issued by the Commission on June 24, 2014.[6] The Plan was published for comment in the **Federal Register** on November 7, 2014, and approved by the Commission, as modified, on May 6, 2015.[7] The Commission approved the Pilot on a two-year basis, with implementation to begin no later than May 6, 2016.[8] On November 6, 2015, the SEC exempted the Participants from implementing the Pilot until October 3, 2016.[9] Under the revised Pilot implementation date, the Pre-Pilot data collection period commenced on April 4, 2016. On September 13, 2016, the SEC exempted the Participants from the requirement to fully implement the Pilot on October 3, 2016, to permit the Participants to implement the pilot on a phased-in basis, as described in the Participants' exemptive request.[10]

The Plan is designed to allow the Commission, market participants, and the public to study and assess the impact of increment conventions on the liquidity and trading of the common stock of small-capitalization companies. Each Participant is required to comply, and to enforce compliance by its member organizations, as applicable, with the provisions of the Plan.

BX adopted rule amendments to implement the requirements of the Plan, including relating to the Plan's data collection requirements and requirements relating to Web site data publication.[11] Specifically, with respect to the Web site data publication requirements pursuant to Section VII and Appendices B and C to the Plan, BX Rule 4770(b)(2)(B) provides, among other things, that BX shall make the data required by Items I and II of Appendix B to the Plan, and collected pursuant to paragraph (b)(2) of Rule 4770, publicly available on the BX Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. BX Rule 4770(b)(3)(C), provides, among other things, that BX shall make the data required by Item IV of Appendix B to the Plan, and collected pursuant to paragraph (b)(3) of Rule 4770, publicly available on the BX Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. Commentary .08 to Rule 4770 provides, among other things, that the requirement that BX make certain data publicly available on the BX Web site pursuant to Appendix B and C to the Plan shall commence at the beginning of the Pilot Period.

BX is proposing amendments to Rule 4770(b)(2)(B) (regarding Appendix B.I and B.II data) and Rule 4770(b)(3)(C) (regarding Appendix B.IV data) to provide that data required to be made available on BX's Web site be published within 120 calendar days following month end. In addition, the proposed amendments to Commentary .08 to Rule 4770 would provide that, notwithstanding the provisions of paragraphs (b)(2)(B), (b)(3)(C) and (b)(5), BX shall make data for the Pre-Pilot period publicly available on the BX Web site pursuant to Appendix B and C to the Plan by February 28, 2017.[12]

The purpose of delaying the publication of the Web site data is to address confidentiality concerns by providing for the passage of additional time between the market information reflected in the data and the public availability of such information.

BX also proposes to amend Rule 4770(b)(5), which relates to the collection and transmission of Market Maker registration statistics. Currently, Rule 4770(b)(5) provides that the Exchange shall collect and transmit to the SEC the data described in Item III of Appendix B of the Plan relating to daily Market Maker registration statistics in a pipe delimited format within 30 calendar days following month end for (1) transactions in each Pre-Pilot Data Collection Security for the period beginning six months prior to the Pilot Period through the trading day immediately preceding the Pilot Period; and (2) transactions in each Pilot Security for the period beginning on the first day of the Pilot Period through six months after the end of the Pilot Period. Although the Plan requires that such data be made publicly available,[13] Rule 4770(b)(5) does not currently include a provision requiring the Exchange to publish such data to its Web site. The Exchange therefore proposes to amend Rule 4770(b)(5) to provide that the Exchange shall make Market Maker registration data publicly available on the Exchange Web site within 120 calendar days following month end at no charge.

BX has filed the proposed rule change for immediate effectiveness and has requested that the Commission waive the 30-day operative delay. If the Commission waives the 30-day operative delay, the operative date of the proposed rule change will be the date of filing.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, because it is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan and is in furtherance of the objectives of the Plan, as identified by the SEC.

In approving the Plan, the Commission recognized that requiring the publication of Market Maker data may raise confidentiality concerns, especially for Pilot Securities that may

[10] *See* Letter from David S. Shillman, Associate Director, Division of Trading and Markets, Commission, to Eric Swanson, EVP, General Counsel and Secretary, Bats Global Markets, Inc., dated September 13, 2016; *see also* Letter from Eric Swanson, EVP, General Counsel and Secretary, Bats Global Markets, Inc., to Brent J. Fields, Secretary, Commission, dated September 9, 2016.

[11] *See, e.g.,* Securities Exchange Act Release No. 77457 (March 28, 2016), 81 FR 18913 (April 1, 2016) (SR–BX–2016–019); *see also* Letter from David S. Shillman, Associate Director, Division of Trading and Markets, Commission, to Marcia E. Asquith, Senior Vice President and Corporate Secretary, FINRA, dated February 17, 2016.

[12] With respect to data for the Pilot Period, the requirement that BX make data publicly available on the BX Web site pursuant to Appendix B and C to the Plan shall continue to commence at the beginning of the Pilot Period. Thus, the first Web site publication date for Pilot Period data (covering October 2016) would be published on the BX Web site by February 28, 2017, which is 120 days following the end of October 2016.

[13] *See* Section VII.A. 4 of the Plan.

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

have a relatively small number of designated Market Makers.[16] For this reason, the Commission modified the Plan so that the data that would be made publicly available would not contain profitability measures for each security, but would be aggregated by the Control Group and each Test Group. BX believes that this proposal is consistent with the Act in that it is designed to address confidentiality concerns by permitting BX to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information. With respect to the change to Rule 4770(b)(5), BX believes this change will clarify the timing and format of publishing Market Maker registration statistics.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. BX notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan.

The proposal is intended to address confidentiality concerns that may adversely impact competition, especially for Pilot Securities that may have a relatively small number of designated Market Makers, by permitting BX to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information. The proposal also does not alter the information required to be submitted to the SEC.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.[17]

[16] *See* Approval Order at 27543–27544.

[17] BX notes that Financial Information Forum (FIF) submitted a letter to the staff of the Commission raising concerns regarding the publication of certain Appendix B statistics on a disaggregated basis using a unique masked market participant identifier. *See* Letter from Mary Lou Von Kaenel, Managing Director, FIF, to David S. Shillman, Associate Director, Division of Trading and Markets, Commission, dated August 16, 2016, available at *https://www.fif.com/comment-letters.*

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6) [20] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[21] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. In this filing, the Exchange has asked that the Commission waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing.

The Exchange notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan. The proposal is intended to address confidentiality concerns by permitting the Exchange to delay Web site publication to provide for passage of additional time between the market information reflected in the data and public availability of such information. The proposal does not alter the information required to be submitted to the Commission.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the Exchange to implement these proposed changes that are intended to address confidentiality concerns. The Commission notes that some Pilot data was scheduled to be published on November 30, 2016. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative on November 30, 2016.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b–4(f)(6).

[20] *Id.*

[21] 17 CFR 240.19b–4(f)(6)(iii).

[22] For purposes only of waiving the operative delay for this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–BX–2016–067 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2016–067. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions

should refer to File Number SR–BX–2016–067 and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79558; File No. SR–NYSEMKT–2016–114]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Change Modifying the NYSE Amex Options Fee Schedule

December 14, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 1, 2016, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the NYSE Amex Options Fee Schedule (''Fee Schedule''). The Exchange proposes to implement the fee change effective December 1, 2016. The proposed change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Section I. E. of the Fee Schedule,[4] effective December 1, 2016.

Section I. E. of the Fee Schedule describes the Exchange's ACE Program. The ACE Program features five tiers, expressed as a percentage of total industry Customer equity and Exchange Traded Fund (''ETF'') option average daily volume (''CADV'')[5] and provides two alternative methods through which Order Flow Providers (each an ''OFP'') may receive per contract credits for Electronic Customer volume that the OFP, as agent, submits to the Exchange.

The Exchange proposes to make the following changes to the ACE Program:

- First, the Exchange proposes to add a credit tier and re-designate current Tier 1 as the ''Base Tier.''[6] Currently, to achieve any credit under the ACE Program, an OFP must achieve Tier 2 (which offers an $0.18 per contract credit). To qualify for Tier 2, an OFP must execute at least 0.75% to 1.00% of CADV or 0.35% over October 2015 CADV. The Exchange proposes a new Tier 1, for which an OFP to qualify would have to execute at least 0.20% over October 2015 CADV.
- Second, OFPs that qualify for proposed new Tier 1 would be eligible to receive a $0.14 per contract credit. As with all other current tiers of the ACE Program, the take liquidity multiplier would also apply to proposed new Tier 1.[7]
- Third, the Exchange proposes that OFPs qualifying for new Tier 1 would also be eligible for the ACE Initiating Participant Rebate, which is currently available to OFPs that achieve Tiers 2–5 of the ACE Program.[8]
- Fourth, the Exchange proposes that OFPs that achieve Tier 2 would receive a $0.19 per contract credit on electronic Customer Complex Orders. In this regard, the Exchange proposes to define Complex Order in the Key Terms and Definitions section of the Fee Schedule, as ''. . . any order involving the simultaneous purchase and/or sale of two or more different option series in the same underlying security, for the same account, in a ratio that is equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) and for the purpose of executing a particular investment strategy, per Rule 900.3NY(e).'' OFPs that achieve Tier 2 would continue to receive a $0.18 per contract credit on electronic Customer volume (*i.e.,* non-Complex Customer order flow).

The Exchange is not proposing any other changes to the alternative ACE Program Credit Tiers at this time.[9]

The proposed additional Tier would not impact the Firm Monthly Fee Cap of $100,000 per month per Firm, but the Exchange proposes to add reference to the Base Tier in Section I of the Fee Schedule to add clarity and transparency to Exchange fees.[10]

The proposed modifications to the tiers of the ACE Program as well as the additional rebate for electronic Customer Complex Orders are designed to further encourage OFPs to direct additional order flow to the Exchange, which additional volume and liquidity would benefit all Exchange participants through increased opportunities to trade as well as enhancing price discovery.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[11] in general, and

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Fee Schedule, Section I. E. (Amex Customer Engagement (''ACE'') Program—Standard Options), *available here, https://www.nyse.com/publicdocs/nyse/markets/amex-options/NYSE_Amex_Options_Fee_Schedule.pdf.*

[5] The volume thresholds are based on an OFP's Customer volume transacted Electronically as a percentage of total industry CADV as reported by the Options Clearing Corporation (the ''OCC''). *See* OCC Monthly Statistics Reports, *available here, http://www.theocc.com/webapps/monthly-volume-reports.*

[6] The Exchange notes that that the qualification basis for the proposed Base Tier remains the same as it is under current Tier 1 (*i.e.,* an OFP must execute at least 0.00% to 0.75% of CADV) and there are still no credits available under this tier.

[7] *See* Fee Schedule, Section I. E., *supra* note 4 (''In calculating an OFP's Electronic volume, each Customer order that takes liquidity will be weighted as 50% greater (*i.e.,* 1.5 times the contract volume) for determining Customer Electronic ADV and Total Electronic ADV'').

[8] *See* proposed Fee Schedule, Section I. G. at n.2 (''The ACE Initiating Participant Rebate is applied to each of the first 5,000 Customer contracts of a CUBE Order executed in a CUBE Auction. This Rebate is in addition to any additional credits set forth above. Only ATP Holders who qualify for Tiers 1, 2, 3, 4 or 5 of the ACE Program are eligible to receive the Rebate'').

[9] OFPs that achieve a qualification level in one tier, and achieve an alternative qualification level in another tier, will continue to be paid a credit based on the highest achieved tier. *See* Fee Schedule, Section I.E., *supra* note 4.

[10] *See* Fee Schedule, Section I. I. (Firm Monthly Fee Cap), *supra* note 4. The Monthly Firm Fee Cap decreases if Firms achieve Tiers 2–5 of the ACE Program (*i.e.,* greater than the Base Tier or Tier 1).

[11] 15 U.S.C. 78f(b).

furthers the objectives of Sections 6(b)(4) and (5) of the Act,[12] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed addition of new Tier 1 is reasonable, equitable, and not unfairly discriminatory because it provides an alternative means of achieving a rebate, which should attract more volume and liquidity to the Exchange to the benefit of market participants through increased opportunities to trade as well as enhancing price discovery.

The Exchange also believes the additional credit on Complex Orders is reasonable, equitable, and not unfairly discriminatory, as it provides an additional incentive to achieve the ACE Program Tier 2, which should attract more volume and liquidity to the Exchange to the benefit of market participants through increased opportunities to trade as well as enhancing price discovery.

The Exchange believes that the proposed amendments to the ACE Program are reasonable, equitable and not unfairly discriminatory because they would enhance the incentives to OFPs to transact Customer orders, including Complex Orders, on the Exchange, which would benefit all market participants by providing more trading opportunities and tighter spreads, even to those market participants that do not participate in the ACE Program. Additionally, the Exchange believes the proposed changes to the ACE Program are consistent with the Act because they may attract greater volume and liquidity to the Exchange, which would benefit all market participants by providing tighter quoting and better prices, all of which perfects the mechanism for a free and open market and national market system.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[13] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes the proposed amendments to the ACE Program are pro-competitive as the proposed new qualification tier and incentive may encourage OFPs to direct Customer order flow to the Exchange and any resulting increase in volume and liquidity to the Exchange would benefit all Exchange participants through increased opportunities to trade as well as enhancing price discovery.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the degree to which fee changes in this market may impose any burden on competition is extremely limited. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[14] of the Act and subparagraph (f)(2) of Rule 19b–4[15] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[16] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–114 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–114. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–114, and should be submitted on or before January 10, 2017

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32393; 812–14606]

Minnesota Life Insurance Company, et al; Notice of Application

December 14, 2016.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of Application.

SUMMARY: Notice of Application for an order pursuant to section 11(a) of the Investment Company Act of 1940, as amended (the ''Act''), approving the terms of a proposed offer of exchange. Applicants request an order approving the terms of a proposed offer of exchange of a new flexible variable universal life insurance policy for certain outstanding flexible variable universal life insurance policies.

APPLICANTS: Minnesota Life Insurance Company (''Minnesota Life''), a stock life insurance company organized under the laws of Minnesota, Minnesota Life Variable Account (''Variable Life Account'') and Minnesota Life Individual Variable Universal Life Account (''Individual VUL Account,'' and together with the Variable Life Account, the ''Accounts''), each organized and registered under the Act as a unit investment trust and each a ''separate account'' as defined in section 2(a)(37) of the Act, and Securian Financial Services, Inc. (''Securian Financial''), a broker dealer registered under the Securities Exchange Act of 1934 (collectively, the ''Applicants'').

DATES: *Filing Dates:* The application was filed on January 29, 2016 and amended on September 7, 2016, and November 30, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on January 9, 2017, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants, 400 Robert Street North, St. Paul, Minnesota 55101–2098.

FOR FURTHER INFORMATION CONTACT: Bruce R. MacNeil, Senior Counsel, at (202) 551–6817, or Daniele Marchesani, Assistant Chief Counsel, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. Minnesota Life issues variable life insurance policies that are made available through the Variable Life Account (the ''Old Policies'') and the Individual VUL Account (the ''New Policy,'' together with the Old Policies, the ''Policies''). The New Policy and the Old Policies are each offered pursuant to a registration statement under the Securities Act of 1933. Securian Financial serves as principal underwriter for the Policies.

2. The Old Policies are variable adjustable life insurance policies that call for level scheduled premium payments for a specified time or until the policy becomes paid up. The New Policy is a flexible premium variable universal life insurance policy. A New Policy owner may elect to pay a planned premium, and may change the amount and frequency of such planned premium payments at any time. Applicants propose to offer eligible owners of the Old Policies the opportunity to exchange their Old Policy for the New Policy by means of an offer of exchange (the ''Exchange Offer'').[1] The differences between the New Policy and the Old Policies are described in detail in the application.

3. Applicants request that the Commission issue an order pursuant to section 11(a) of the Act approving the terms of the Exchange Offer. Any order approving the Exchange Offer would be subject to the terms and conditions stated in the application.

4. Applicants state that the Exchange Offer will remain open indefinitely until terminated upon two months' notice. Applicants further represent that the Exchange Offer will be made by providing eligible owners of Old Policies with a prospectus for the New Policy, accompanied by a letter explaining the offer and sales literature that compares the two Policies (''Offering Communication''). Each Old Policy owner who expresses an interest in the Exchange Offer will be informed of new charges, differences in rates of charges, and differences in the calculation and assessment of charges under the New Policy. The effect on Old Policy owners of certain of these differences can only be ascertained by personalized illustrations, which will be provided to an Old Policy owner at the time the Exchange Offer is made.

5. Applicants represent that no surrender charge will be deducted upon the surrender of an Old Policy in connection with an exchange, and no premium loads will be deducted from the proceeds of that surrender when applied to the purchase of the New Policy as part of the exchange. Upon acceptance of the Exchange Offer, a New Policy will be issued with the same face amount as the Old Policy surrendered in the exchange, and the cash value (of the Old Policy) will be applied without the deduction of any charges, as the initial premium for the New Policy that commences on the date of the exchange. Applicants state that each New Policy issued in the exchange will provide a 30-day free look period that commences on the date of the exchange.

6. Applicants represent that the terms of the proposed Exchange Offer do not present the abuses against which section 11 was intended to protect. Because the Exchange Offer involves a unit investment trust, Section 11(c) of the Act makes Section 11(a) inapplicable so that the requested relief is necessary to make the Exchange Offer, regardless of the basis of the exchange. As the Exchange Offer will be based on the relative net asset values or unit values of the interests being exchanged, however, it has not been proposed for the purpose of exacting additional selling charges and profits from investors by switching them from one security to another.

[1] Applicants will make the Exchange Offer available to approximately 47,100 owners of Old Policies (i) who have held their Old Policy for at least ten years, (ii) whose Old Policy was not subject to a premium increase during the three years prior to the date of the exchange, (iii) whose Old Policy has a current face amount of at least $10,000, and (iv) whose insured age is 75 or younger. Applicants state that the exchange is available only to Old Policies that do not have any outstanding loans and those loans can be repaid either in cash or by means of a partial surrender. Applicants indicate that new evidence of insurability will not be required as a condition of the exchange unless (i) the policy owner requests a face amount increase; or (ii) to add a rider that requires underwriting on the New Policy.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79550; File No. SR–NYSEArca-2016–120]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To List and Trade Shares of the ForceShares Daily 4X US Market Futures Long Fund and ForceShares Daily 4X US Market Futures Short Fund Under Commentary .02 to NYSE Arca Equities Rule 8.200

December 14, 2016.

On October 17, 2016, NYSE Arca, Inc. filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the ForceShares Daily 4X US Market Futures Long Fund and ForceShares Daily 4X US Market Futures Short Fund under Commentary .02 to NYSE Arca Equities Rule 8.200. The proposed rule change was published for comment in the **Federal Register** on November 4, 2016.[3] The Commission received no comments on the proposed rule change.

Section 19(b)(2) of the Act [4] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is December 19, 2016. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates February 2, 2017, as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR–NYSEArca–2016–120).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79547; File No. SR–NYSEARCA–2016–161]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15

December 14, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 8, 2016, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 governing the release of disciplinary information based on rules of the Exchange's affiliates New York Stock Exchange, LLC and NYSE MKT LLC. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Arca Rule 10.17 (Release of Disciplinary Information through the Public Disclosure Program) and NYSE Arca Equities Rule 10.15 (Release of Disciplinary Information through the Public Disclosure Program) based on Rule 8313 (Release of Disciplinary Complaints, Decisions and Other Information) of the Exchange's affiliates New York Stock Exchange, LLC (''NYSE'') and NYSE MKT LLC (''NYSE MKT'').

Background

In 2013, the NYSE adopted disciplinary rules that are, with certain exceptions, substantially the same as the Financial Industry Regulatory Authority, Inc. (''FINRA'') Rule 8000 Series and Rule 9000 Series, and which set forth rules for conducting investigations and enforcement actions.[4] The NYSE disciplinary rules were implemented on July 1, 2013.[5] In 2016, NYSE MKT also adopted the Rule 8000 Series and Rule 9000 Series, which rules are, with certain exceptions, substantially the same as those of NYSE and FINRA.[6] The NYSE MKT

disciplinary rules were implemented on April 15, 2016.[7]

In August 2016, the NYSE amended its Rule 8313 based on the text of FINRA Rule 8313, which provides that disciplinary complaints and decisions that meet certain criteria will be either published or made available upon request.[8] In September 2016, NYSE MKT also amended its version of Rule 8313 to adopt the text of FINRA Rule 8313.[9]

Current NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 provide for the release to the public of certain disciplinary information concerning OTP Holders and ETP Holders and associated persons, respectively. Specifically, current NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 provide for release of any identified disciplinary decision in response to a request. Rule 10.17(b)(1) provides for release of information to the public with respect to disciplinary decisions that: (i) Impose a suspension, cancellation or expulsion upon an OTP Holder or OTP Firm; (ii) impose the suspension or revocation of the registration of an associated person of an OTP Holder or OTP Firm; (iii) impose the suspension or barring of an OTP Holder, OTP Firm, or associated person from association with all OTP Holders or OTP Firms; (iv) impose monetary sanctions of $10,000 or more upon an OTP Holder, OTP Firm, or associated person; or (v) contain an allegation of a violation of a Designated Rule, defined as (i) Commission Rule 10b–5 under the Act, (ii) NYSE Arca Rule 11.5 (Manipulation), or (iii) NYSE Arca Rule 11.2 (Prohibited Acts). *See* NYSE Arca Rule 10.17(b)(1).

Similarly, under NYSE Arca Equities Rule 10.15, NYSE Arca Equities releases information to the public with respect to disciplinary decisions that: (i) Impose a suspension, cancellation or expulsion upon an ETP Holder; (ii) impose the suspension or revocation of the registration of an associated person of an ETP Holder; (iii) impose the suspension or barring of an ETP Holder or associated person from association with all ETP Holders; (iv) impose monetary sanctions of $10,000 or more upon an ETP Holder or associated person; or (v) contain an allegation of a violation of a Designated Rule, defined as (i) Commission Rule 10b–5 under the Act, (ii) NYSE Arca Equities Rule 6.5 (Manipulation), or (iii) NYSE Arca Equities Rule 6.2 (Prohibited Acts). *See* NYSE Arca Equities Rule 10.15(b)(1).

Current NYSE Arca and NYSE Arca Equities Rules also permit release of information to the public concerning disciplinary decisions that involve significant policy or enforcement determinations where the release of such information is deemed by the President of the Exchange to be in the public interest.[10] Further, the current Rules permit waiving the requirement to release information with respect to a disciplinary decision under extraordinary circumstances where the release of the information would violate fundamental notions of fairness or work as an injustice. Finally, the current Rules permit release to the public of information concerning any disciplinary or other decision issued pursuant to NYSE Arca Rule 10 and NYSE Arca Equities Rule 10 that is not specifically enumerated in NYSE Arca Rule 10.17(b)(1) or NYSE Arca Equities Rule 10.15(b)(1), respectively, regardless of the sanctions imposed, so long as the names of the parties and other identifying information is redacted.[11]

NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 seek to further the same goals of transparency and disclosure as NYSE and NYSE MKT Rule 8313 (''Rule 8313'').[12]

As described below, the Exchange proposes to adopt Rule 8313 in substantially the same form as approved by the Securities and Exchange Commission (''SEC'' or ''Commission'') for NYSE and as published for immediate effectiveness by NYSE MKT. By adopting the proposed amendments to NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15, the Exchange would have uniform options and equities rules that require public release of disciplinary complaints as well as disciplinary decisions, and that are otherwise consistent with the counterpart rules of its NYSE and NYSE MKT affiliates.

Proposed Rule Change

Amendments to NYSE Arca Rule 10.17 Governing Release of Disciplinary Complaints, Decisions and Other Information Based on Rule 8313

The Exchange proposes to delete subsections (a) through (h) of current NYSE Arca Rule 10.17 in order to adopt the requirements of Rule 8313 as proposed new subsections (a) through (e).

The Exchange proposes to amend the heading to delete the clause ''Information Through the Public Disclosure Program'' and replace it with ''Complaints, Decisions and Other Information.'' As proposed, NYSE Arca Rule 10.17 would have the same title as Rule 8313.

General Standards

The Exchange proposes to add the title ''General Standards'' to subsection (a) of NYSE Arca Rule 10.17 and delete the current text of subsection (a). The text of subsections (a)(1)–(3) would also be deleted and replaced as follows.

First, proposed NYSE Arca Rule 10.17(a)(1) would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary complaint or disciplinary decision issued by the Exchange, as defined in subsection (e) of the proposed Rule, other than minor rule violations, on its Web site. Proposed NYSE Arca Rule 10.17(a)(1) would also provide that, in response to a request, the Exchange shall release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed NYSE Arca Rule 10.17(e). These proposed amendments are modeled on Rule 8313(a)(1) and, except for an inapplicable reference to the Rule 9000 Series, would be the same as the NYSE and NYSE MKT Rule.

Second, proposed NYSE Arca Rule 10.17(a)(2) would provide that the Exchange shall release to the public a copy of, and at the Exchange's discretion information with respect to, any statutory disqualification decision, notification, or notice issued by the Exchange pursuant to NYSE Arca Rules 10 or 13 that will be filed with the SEC. Proposed NYSE Arca Rule 10.17(a)(2) is modeled on Rule 8313(a)(2) but substitutes references to NYSE Arca Rules 10 and 13 for references to the NYSE and NYSE MKT Rule 9520 Series, and omits reference to the NYSE and NYSE MKT Rule 9800 Series. NYSE Arca does not have rules governing temporary cease and desist proceedings

[7] *See* NYSE MKT Information Memorandum 16–02 (March 14, 2016).

[8] *See* Securities Exchange Act Release Nos. 78664 (August 24, 2016), 81 FR 59678 (August 30, 2016) (SR–NYSE–2016–40). In adopting the FINRA disciplinary rules in 2013, the NYSE retained its long-standing practice of publishing all final disciplinary decisions, other than minor rule violations, on its Web site and did not adopt the text of FINRA Rule 8313. *See* 2013 NYSE Approval Order, 78 FR at 15395.

[9] *See* Securities Exchange Act Release Nos. 78959 (September 28, 2016), 81 FR 68481 (October 4, 2016) (SR–NYSEMKT–2016–71). In adopting its disciplinary rules in 2016, NYSE MKT also did not adopt the text of FINRA Rule 8313. *See* 2016 MKT Notice, 81 FR at 11321.

[10] *See* NYSE Arca Rule 10.17(b)(1); NYSE Arca Equities Rule 10.15(b)(1).

[11] *See id.*

[12] *See* Securities Exchange Act Release No. 53878 (May 26, 2006), 71 FR 32622, 32624 (June 6, 2006) (SR–NYSEArca–2006–02).

comparable to the Rule 9800 Series. The proposed Rule is otherwise the same as the NYSE and NYSE MKT Rule.

Third, proposed NYSE Arca Rule 10.17(a)(3) would provide that the Exchange shall release to the public information with respect to any suspension, cancellation, expulsion, or bar that constitutes final Exchange action imposed pursuant to NYSE Arca Rule 13, which governs cancellation, suspension and reinstatement and is the Exchange's analogue to the various provisions of the NYSE and NYSE MKT Rule 9550 Series referenced in Rule 8313(a)(3) governing suspensions, cancellations, expulsions and bars, with the exception of NYSE and NYSE MKT Rule 9556, which governs failure to comply with a temporary or permanent cease and desist order issued under the Rule 9200, 9300 or 9800 Series. NYSE Arca does not have rules governing temporary cease and desist proceedings comparable to Rule 9200, 9300 or 9800 Series. Like Rule 8313(a)(3), proposed NYSE Arca Rule 10.17(a)(3) would also encompass proceedings for failure to pay fines, other monetary sanctions, or costs.[13] The proposed Rule is otherwise the same as Rule 8313(a)(3).

To further conform proposed NYSE Arca Rule 10.17 to Rule 8313, the Exchange proposes to add a new subsection (a)(4) modeled on Rule 8313(a)(4) that provides that the Exchange may release to the public a copy of, and information with respect to, any decision or notice appealable to the SEC under Exchange Act Section 19(d). The proposed Rule is the same as Rule 8313(a)(4) but omits reference to any decision or notice issued pursuant to the NYSE and NYSE MKT Rule 9600 Series, which NYSE Arca has not adopted.[14]

Release Specifications

The Exchange proposes to add the title ''Release Specifications'' to subsection (b) of NYSE Arca Rule 10.17 and delete the current text of subsection (b).

The Exchange also proposes to delete the entire text of current Rule 10.17(b)(1) and 10.17(b)(2). The Exchange proposes new subsections (b)(1) and (b)(2) modeled on Rule 8313(b)(1) and (b)(2), as follows.

Proposed NYSE Arca Rule 10.17(b)(1) would provide that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed Rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed Rule would be the same as Rule 8313(b)(1).

Proposed NYSE Arca Rule 10.17(b)(2) provides that copies of, and information with respect to, any disciplinary decision or other decision, order, notification, or notice released to the public pursuant to paragraph (a) of the proposed Rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange rules or the Exchange Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the SEC. The proposed Rule would be the same as Rule 8313(b)(2).

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. The Exchange proposes to add a new subsection (c) to NYSE Arca Rule 10.17 entitled ''Discretion to Redact Certain Information or Waive Publication,'' modeled on Rule 8313(c)(1) and (2). With respect to the limited exceptions, proposed NYSE Arca Rule 10.17(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed Rule would be the same as Rule 8313(c)(1).

Similarly, proposed NYSE Arca Rule 10.17(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint, disciplinary decision or other decision, order, notification, or notice under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice. The proposed Rule would be the same as Rule 8313(c)(2).

Notice of Appeals of Exchange Decisions

The Exchange proposes to add a new subsection (d) to NYSE Arca Rule 10.17 entitled ''Notice of Appeals of Exchange Decisions to the SEC'' modeled on Rule 8313(d). Proposed NYSE Arca Rule 10.17(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the SEC and that the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed Rule would be the same as Rule 8313(d).

Definitions

Finally, the Exchange proposes to add a new subsection (e) to Rule 10.17 entitled ''Definitions.'' Proposed NYSE Arca Rule 10.17(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the Rule, modeled on the definitions contained in Rule 8313(e).

First, Rule 10.17(e)(1) would define the term ''disciplinary complaint'' to mean any complaint issued pursuant to NYSE Arca Rule 10.4, which governs complaints. The proposed text is identical to Rule 8313(e)(1) except that the proposed Rule would substitute ''Rule 10.4'' for ''the Rule 9200 Series.''

Second, proposed NYSE Arca Rule 10.17(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to NYSE Arca Rules 10.4(c) (Summary Determinations), 10.6 (Offers of Settlement), 10.7 (Decision) or 10.8 (Review), including, decisions issued by the Ethics and Business Conduct Committee (''EBCC''), a Conduct Panel, the Committee for Review (''CFR'') or the Board of Directors, and orders accepting offers of settlement. Under proposed subsection (e)(2), the term would not include decisions, notifications, or notices issued pursuant to paragraphs (a)(2), (a)(3) and (a)(4) of the proposed Rule. Proposed NYSE Arca Rule 10.17(e)(2) provides that minor rule violation plan letters issued pursuant to NYSE Arca Rule 10.12 are not subject to the proposed Rule. The proposed Rule would be the same as Rule 8313(e)(2) except that the proposed Rule would substitute references to the relevant NYSE Arca Rules for references to the NYSE and NYSE MKT Rule 9000 Series, Rule 9550 Series, Rule 9600 Series, Rule 9800 Series, Rule 9520 Series, and Rules 9216 and 9217.

[13] In that regard, Rule 8313(a)(3) references summary proceedings under NYSE and NYSE MKT Rule 8320. Unlike a proceeding under NYSE or NYSE MKT Rule 8320, a proceeding under NYSE Arca Rule 13 for failure to pay fines, other monetary sanctions, or costs could not be a summary proceeding.

[14] The NYSE and NYSE MKT Rule 9600 Series set forth procedures for seeking exemptive relief from the requirements of certain enumerated rules.

Amendments to NYSE Arca Equities Rule 10.15 Governing Release of Disciplinary Complaints, Decisions and Other Information Based on Rule 8313

The Exchange proposes parallel changes to NYSE Arca Equities Rule 10.15, which has the same structure as NYSE Arca Rule 10.17, in order to adopt the requirements of Rule 8313.

The Exchange proposes to amend the heading to delete the clause ''Information Through the Public Disclosure Program'' and replace it with ''Complaints, Decisions and Other Information.'' As proposed, NYSE Arca Equities Rule 10.15 would have the same title as Rule 8313.

General Standards

The Exchange proposes to add the title ''General Standards'' to subsection (a) of NYSE Arca Equities Rule 10.15 and delete the current text of subsection (a). The text of subsections (a)(1)–(3) would also be deleted and replaced as follows.

First, proposed NYSE Arca Equities Rule 10.15(a)(1) would provide that the Exchange shall release to the public a copy of and, at the Exchange's discretion, information with respect to, any disciplinary complaint or disciplinary decision issued by the Exchange, as defined in subsection (e) of the proposed Rule, other than minor rule violations, on its Web site. Proposed NYSE Arca Equities Rule 10.15(a)(1) would also provide that, in response to a request, the Exchange shall release to the requesting party a copy of any identified disciplinary complaint or disciplinary decision issued by the Exchange, as defined in proposed NYSE Arca Equities Rule 10.15(e). These proposed amendments are modeled on Rule 8313(a)(1) and, except for an inapplicable reference to the Rule 9000 Series, would be the same as the NYSE and NYSE MKT Rule.

Second, proposed NYSE Arca Equities Rule 10.15(a)(2) would provide that the Exchange shall release to the public a copy of, and at the Exchange's discretion information with respect to, any statutory disqualification decision, notification, or notice issued by the Exchange pursuant to NYSE Arca Equities Rules 10 or 11 that will be filed with the SEC. Proposed NYSE Arca Equities Rule 10.15(a)(2) is modeled on Rule 8313(a)(2) but substitutes references to NYSE Arca Equities Rules 10 and 11 for references to the NYSE and NYSE MKT Rule 9520 Series, and omits reference to the NYSE and NYSE MKT Rule 9800 Series. NYSE Arca Equities does not have rules governing temporary cease and desist proceedings comparable to the Rule 9800 Series. The proposed Rule is otherwise the same as the NYSE and NYSE MKT Rule.

Third, proposed NYSE Arca Equities Rule 10.15(a)(3) would provide that the Exchange shall release to the public information with respect to any suspension, cancellation, expulsion, or bar that constitutes final Exchange action imposed pursuant to NYSE Arca Equities Rule 11, which governs cancellation, suspension and reinstatement and is the Exchange's analogue to the various provisions of the NYSE and NYSE MKT Rule 9550 Series referenced in Rule 8313(a)(3) governing suspensions, cancellations, expulsions and bars, with the exception of NYSE and NYSE MKT Rule 9556, which governs failure to comply with a temporary or permanent cease and desist order issued under the Rule 9200, 9300 or 9800 Series. NYSE Arca Equities does not have rules governing temporary cease and desist proceedings comparable to Rule 9200, 9300 or 9800 Series. Like Rule 8313(a), proposed NYSE Arca Equities Rule 10.15(a)(3) would also encompass proceedings for failure to pay fines, other monetary sanctions, or costs.[15] The proposed Rule is otherwise the same as Rule 8313(a)(3).

To further conform proposed NYSE Arca Equities Rule 10.15 to Rule 8313, the Exchange proposes to add a new subsection (a)(4) modeled on Rule 8313(a)(4) that provides that the Exchange may release to the public a copy of, and information with respect to, any decision or notice appealable to the SEC under Exchange Act Section 19(d). The proposed Rule is the same as Rule 8313(a)(4) but omits reference to any decision or notice issued pursuant to the NYSE and NYSE MKT Rule 9600 Series, which NYSE Arca Equities has not adopted.[16]

Release Specifications

The Exchange proposes to add the title ''Release Specifications'' to subsection (b) of NYSE Arca Equities Rule 10.15 and delete the current text of subsection (b).

The Exchange also proposes to delete the entire text of current Rule 10.15(b)(1) and 10.15(b)(2). The Exchange proposes new subsections (b)(1) and (b)(2) modeled on Rule 8313(b)(1) and (b)(2), as follows.

Proposed NYSE Arca Equities Rule 10.15(b)(1) would provide that copies of, and information with respect to, any disciplinary complaint released to the public pursuant to paragraph (a) of the proposed Rule shall indicate that a disciplinary complaint represents the initiation of a formal proceeding by the Exchange in which findings as to the allegations in the complaint have not been made and does not represent a decision as to any of the allegations contained in the complaint. The proposed Rule would be the same as Rule 8313(b)(1).

Proposed NYSE Arca Equities Rule 10.15(b)(2) provides that copies of, and information with respect to, any disciplinary decision or other decision, order, notification, or notice released to the public pursuant to paragraph (a) of the proposed Rule prior to the expiration of the time period provided for an appeal or call for review as permitted under Exchange rules or the Exchange Act, or while such an appeal or call for review is pending, shall indicate that the findings and sanctions imposed therein are subject to review and modification by the Exchange or the SEC. The proposed Rule would be the same as Rule 8313(b)(2).

Discretion To Redact Certain Information or Waive Publication

The Exchange has determined that, subject to limited exceptions, disciplinary information should be released to the public in unredacted form. The Exchange proposes to add a new subsection (c) to NYSE Arca Equities Rule 10.15 entitled ''Discretion to Redact Certain Information or Waive Publication,'' modeled on Rule 8313(c)(1) and (2). With respect to the limited exceptions, proposed NYSE Arca Equities Rule 10.15(c)(1) would provide that the Exchange reserves the right to redact, on a case-by-case basis, information that contains confidential customer information, including customer identities, or information that raises significant identity theft, personal safety, or privacy concerns that are not outweighed by investor protection concerns. The proposed Rule would be the same as Rule 8313(c)(1).

Similarly, proposed NYSE Arca Equities Rule 10.15(c)(2) provides that, notwithstanding paragraph (a) of the proposed rule, the Exchange may determine, in its discretion, to waive the requirement to release a copy of, or information with respect to, any disciplinary complaint, disciplinary decision or other decision, order, notification, or notice under those extraordinary circumstances where the release of such information would

[15] In that regard, Rule 8313(a) references summary proceedings under NYSE and NYSE MKT Rule 8320. Unlike a proceeding under NYSE or NYSE MKT Rule 8320, a proceeding under NYSE Arca Equities Rule 11 for failure to pay fines, other monetary sanctions, or costs could not be a summary proceeding.

[16] *See* note 14, *supra.*

violate fundamental notions of fairness or work an injustice. The proposed Rule would be the same as Rule 8313(c)(2).

Notice of Appeals of Corporation Decisions

The Exchange proposes to add a new subsection (d) to NYSE Arca Equities Rule 10.15 entitled ''Notice of Appeals of Corporation Decisions to the SEC'' modeled on Rule 8313(d). Proposed NYSE Arca Equities Rule 10.15(d) provides that the Exchange must provide notice to the public when a disciplinary decision of the Exchange is appealed to the SEC and that the notice shall state whether the effectiveness of the decision has been stayed pending the outcome of proceedings before the Commission. The proposed Rule would be the same as Rule 8313(d).

Definitions

Finally, the Exchange proposes to add a new subsection (e) to NYSE Arca Equities Rule 10.15 entitled ''Definitions.'' Proposed NYSE Arca Equities Rule 10.15(e) would set forth definitions of the terms ''disciplinary complaint'' and ''disciplinary decision'' as used in the Rule, modeled on the definitions contained in Rule 8313(e).

First, Rule NYSE Arca Equities 10.15(e)(1) would define the term ''disciplinary complaint'' to mean any complaint issued pursuant to NYSE Arca Rule 10.4, which governs complaints. The proposed text is identical to Rule 8313(e)(1) except that the proposed Rule would substitute ''Rule 10.4'' for ''the Rule 9200 Series.''

Second, proposed NYSE Arca Equities Rule 10.15(e)(2) would define the term ''disciplinary decision'' to mean any decision issued pursuant to NYSE Arca Equities Rules 10.4 (c) (Summary Proceedings), 10.6 (Offers of Settlement), 10.7 (Decision), or 10.8 (Review), including, decisions issued by the Business Conduct Committee (''BCC''), a Conduct Panel, the CFR or the Board of Directors,[17] and orders accepting offers of settlement. Under proposed subsection (e)(2), the term would not include decisions, notifications, or notices issued pursuant to paragraphs (a)(2), (a)(3) and (a)(4) of the proposed Rule. Finally, proposed NYSE Arca Equities Rule 10.15(e)(2) provides that minor rule violation plan letters issued pursuant to NYSE Arca Equities Rule 10.12 are not subject to the proposed Rule. The proposed Rule would be the same as Rule 8313(e)(2) except that the proposed Rule would substitute references to the relevant NYSE Arca Equities Rules for references to the NYSE and NYSE MKT Rule 9000 Series, Rule 9550 Series, Rule 9600 Series, Rule 9800 Series, Rule 9520 Series, and Rules 9216 and 9217.

* * * * *

The Exchange believes that greater access to information regarding disciplinary actions provides valuable guidance and information to permit holders, associated persons, other regulators, and investors. Further, releasing detailed disciplinary information to the public can serve to deter and prevent future misconduct and improve overall business standards in the securities industry as well as allowing investors to consider firms' and representatives' disciplinary histories when considering whether to engage in business with them.

Publishing more detailed information than the Exchange currently does would also allow permit holders to utilize that information to educate associated persons as to compliance matters, highlight potential violations and related sanctions, as well as inform the firms' compliance procedures involving similar business lines, products, or industry practices. Finally, the Exchange believes that any member organization or individual facing allegations of rule violations would also have access to more information to gain greater insight on related facts and sanctions.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[18] in general, and furthers the objectives of Section 6(b)(5) of the Act,[19] in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Exchange Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of NYSE Arc [sic] and NYSE Arca Equities. In particular, the Exchange believes that the proposed changes to NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 regarding release of disciplinary complaints, decisions and other information are consistent with Section 6(b) of the Act because they would establish general standards for the release of disciplinary information to the public in line with those in effect with its affiliates and would provide greater access to information regarding the Exchange's disciplinary actions by enabling the Exchange to also release disciplinary complaints, which current NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 do not provide for.

For the same reasons, the Exchange believes that the proposed changes to NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 further the objectives of Section 6(b)(5) of the Act[20] because the changes are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

In particular, the proposed amendments to NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 further the objectives of Section 6(b)(5) of the Act by providing greater clarity, consistency, and transparency regarding the release of disciplinary complaints, decisions and other information to the public. By adopting the proposed amendments to NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15 modeled on the NYSE's and NYSE MKT's rules, the Exchange would establish standards for the release of disciplinary information to the public in line with those in effect with its affiliates that provide greater access to information regarding the Exchange's disciplinary actions. The Exchange would also describe the scope of information subject to proposed NYSE Arca Rule 10.17 and NYSE Arca Equities Rule 10.15. The Exchange believes that this proposed rule change promotes greater transparency with respect to the Exchange's disciplinary process, and that the proposed rule change provides greater access to information regarding its disciplinary actions because, as noted, it would require the Exchange to release copies of disciplinary complaints, and also provides valuable guidance and information to permit holders, associated persons, other regulators, and the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change is not intended to address competitive issues, but rather it is designed to (1) enhance the Exchange's rules governing the release of disciplinary complaints,

[17] NYSE Arca Equities Rule 10.8(c) and (d) refer to the ''NYSE Arca Board of Governors,'' an outdated reference that has been changed to ''NYSE Arca Board of Directors'' elsewhere in the rules. *See* Securities Exchange Act Release No. 77898 (May 24, 2016), 81 FR 34404 (May 31, 2016) (SR–NYSEArca–2016–11).

[19] 15 U.S.C. 78f(b)(5).

[20] 15 U.S.C. 78f(b)(5).

decisions and other information to the public, thereby providing greater clarity and consistency and resulting in less burdensome and more efficient regulatory compliance and facilitating performance of regulatory functions, and (2) provide greater harmonization among NYSE Arca, NYSE Arca Equities, NYSE and NYSE MKT rules of similar purpose.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[21] and Rule 19b–4(f)(6) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEARCA–2016–161 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–NYSEARCA–2016–161. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEARCA–2016–161 and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32392; 812–14653]

Equus Total Return, Inc.; Notice of Application

December 14, 2016.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 23(a), 23(b) and 63 of the Act; under section 61(a)(3)(B) of the Act permitting awards of common stock purchase options to non-employee directors; under section 57(i) of the Act and rule 17d–1 under the Act permitting certain joint transactions otherwise prohibited by section 57(a)(4) of the Act; and under section 23(c)(3) of the Act for an exemption from section 23(c) of the Act.

Summary of the Application: Equus Total Return, Inc. (''Applicant'' or the ''Fund'') requests an order that would permit Applicant to (a) issue restricted shares of its common stock from treasury (''Restricted Stock'') or common stock purchase options (''Options'') as part of the compensation package for certain participants in its 2016 Equity Incentive Plan (the ''Plan''), (b) grant Options to directors who are not also employees or officers of the Applicant (''Non-Employee Directors'') under the Plan, (c) withhold shares of the Applicant's common stock or purchase shares of Applicant's common stock from participants to satisfy tax withholding obligations relating to the vesting of Restricted Stock or the exercise of Options that will be granted pursuant to the Plan, and (d) permit participants to pay the exercise price of Options with shares of Applicant's common stock.

Filing Dates: The application was filed on May 26, 2016, and amended on August 25, 2016, September 29, 2016 and November 23, 2016.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on January 9, 2017, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the

Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicant, 700 Louisiana Street, 48th Floor, Houston, TX 77002.

FOR FURTHER INFORMATION CONTACT: Robert Shapiro, Senior Counsel, at (202) 551–7758, or Mary Kay Frech, Branch Chief, at (202) 551–6821 (Chief Counsel's Office, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicant's Representations

1. Applicant is an internally managed closed-end investment company that has elected to be regulated as a business development company (''BDC'') under the Act.[1] Applicant represents that it has a total return investment strategy that seeks to provide the highest total return, consisting of capital appreciation and current income. The Fund attempts to maximize the return to shareholders in the form of current investment income and long-term capital gains by investing in the debt and equity securities of companies with a total enterprise value of between $5.0 million and $75.0 million, although the Fund may engage in transactions with smaller or larger investee companies from time to time. Shares of Applicant's common stock are traded on the New York Stock Exchange under the symbol ''EQS.'' As of November 23, 2016, there were 12,673,646 shares of Applicant's common stock outstanding.

2. Applicant is governed by a seven-member board of directors (the ''Board'') of whom five are not ''interested persons'' of Applicant within the meaning of section 2(a)(19) of the Act.

3. Applicant believes that, because the market for superior investment professionals is highly competitive, Applicant's successful performance depends on its ability to offer fair compensation packages to its professionals that are competitive with those offered by other investment management businesses. Applicant states that the ability to offer equity-based compensation to its employees and Non-Employee Directors, which both aligns employee and Board behavior with stockholder interests and provides a retention tool, is vital to Applicant's future growth and success.

4. On April 15, 2016, by unanimous vote, the Board adopted the Plan and recommended the same for approval by the Fund's shareholders, which approval was granted at the annual meeting of the Fund's shareholders held on June 13, 2016. The Plan became effective as of the date of such approval. The Plan authorizes the issuance of Options and Restricted Stock to the Applicant's directors, including Non-Employee Directors, officers and other employees (''Participants'').

5. The Plan will be administered by the Board or the Compensation Committee of the Board (the Board or the Compensation Committee discharged to administer the Plan is referred to as the ''Plan Administrator''). The Plan Administrator has full power to select, from among the individuals eligible for awards, the individuals to whom awards will be granted, to make any combination of awards to Participants, and to determine the specific terms and conditions of each award, subject to the provisions of the Plan. Each issuance of Restricted Stock under the Plan will be approved by the required majority, as defined in section 57(o) of the Act, of the Fund's directors (the ''Required Majority'')[2] on the basis that the issuance is in the best interests of the Fund and its shareholders. The date on which the Required Majority approves an issuance of Restricted Stock will be deemed the date on which the subject Restricted Stock is granted.

6. As described in more detail in the application, under the Plan, upon issuance of the requested order, each Non-Employee Director will receive a one-time grant of up to 21,000 shares of Restricted Stock and 42,000 Options. One fourth of the Restricted Stock and one fourth of the Options will vest immediately upon their grant. If a Non-Employee Director remains in service on the Board, the remainder of his or her Restricted Stock and Options will vest upon the earliest to occur of (i) a change in control of the Fund, or (ii) ratably over a three-year period from the date of grant. The awards of Restricted Stock and Options to Non-Employee Directors contemplated by the Plan are intended to be on a one-time basis. Future awards of Restricted Stock and/or Options under the Plan to the Non-Employee Directors are not contemplated, and any such future awards or changes to the amounts set forth in the application may not be made without Commission approval.

7. The Plan will authorize the issuance of Options and Restricted Stock subject to certain forfeiture restrictions. The Restricted Stock will be subject to restrictions on transferability and other restrictions as required by the Plan Administrator from time to time. Except to the extent restricted by the Plan Administrator, a Participant granted an award of Restricted Stock will have all the rights of any other shareholder, including the right to vote the Restricted Stock and the right to receive dividends. During the restriction period (*i.e.,* prior to the lapse of applicable forfeiture provisions), the Restricted Stock generally may not be sold, transferred, pledged, hypothecated, margined, or otherwise encumbered by the Participant. Except as the Plan Administrator otherwise determines, upon termination of a Participant's service as a director, officer, and employee of the Fund during the applicable restriction period, Restricted Stock, for which forfeiture provisions have not lapsed at the time of such termination, shall be forfeited.

8. Applicant has reserved 2,534,728 shares for issuance under the Plan, whether as awards of Restricted Stock or as Options. If all of the shares of Restricted Stock under the Plan were issued and all Options issued under the Plan were issued and subsequently exercised, the total amount of additional common stock issued from treasury would equal 20% of the Fund's shares of common stock presently outstanding. Any shares withheld from an award, either to satisfy tax withholding requirements, or pursuant to the delivery of shares of common stock or Restricted Stock upon the exercise of Options, will not be returned to the Plan reserve. The combined maximum amount of Restricted Stock that may be issued under the Plan to all Participants will be 10% of the outstanding common shares of the Fund on the effective date of the Plan, plus 10% of the number of shares issued or delivered by the Fund

[1] Section 2(a)(48) of the Act defines a BDC to be any closed-end investment company that operates for the purpose of making investments in securities described in sections 55(a)(1) through 55(a)(3) of the Act and makes available significant managerial assistance with respect to the issuers of such securities.

[2] Section 57(o) of the Act provides that the term ''required majority,'' when used with respect to the approval of a proposed transaction, plan, or arrangement, means both a majority of a BDC's directors or general partners who have no financial interest in such transaction, plan, or arrangement and a majority of such directors or general partners who are not interested persons of such company.

(other than pursuant to compensation plans) during the term of the Plan.[3] The maximum award of Options granted to any one individual will not exceed 1,000,000 shares of common stock (subject to adjustment for stock splits and similar events) for any calendar year period, net of any shares canceled or redeemed in connection with any tax withholding. The maximum award of shares of Restricted Stock issued to any one individual will not exceed 500,000 shares of common stock (subject to adjustment for stock splits and similar events) for any calendar year period, net of any shares canceled or redeemed in connection with any tax withholding.

9. The Plan permits the granting of (1) Options to purchase common stock intended to qualify as incentive stock options under Section 422 of the Code and (2) Options that do not so qualify. Options granted under the Plan will be non-qualified options if they fail to qualify as incentive options or exceed the annual limit on incentive stock options. Incentive stock options may only be granted to employees of the Fund and its subsidiaries. Non-qualified options may be granted to any persons eligible to receive incentive options, officers of the Fund and, subject to the requested order, to Non-Employee Directors. The option exercise price of each Option will be determined by the Plan Administrator but may not be less than 100% of the fair market value of the common stock on the date of grant, or if required under the Act, not less than the net asset value of the common stock on the date of grant. Fair market value for this purpose will be the last reported sale price of the shares of common stock on the New York Stock Exchange on the date of grant. The term of each Option will be fixed by the Plan Administrator and may not exceed ten years from the date of grant. The Plan Administrator will determine at what time or times each Option may be exercised.

10. The Plan provides that the Fund is authorized to withhold stock (in whole or in part) from any award of Restricted Stock granted in satisfaction of a Participant's tax obligations. In addition, as discussed more fully in the application, the exercise of Options will result in the recipient being deemed to have received compensation in the amount by which the fair market value of the shares of the Fund's common stock, determined as of the date of exercise, exceeds the exercise price. Accordingly, Applicant requests relief to withhold shares of its common stock or purchase shares of its common stock from Participants to satisfy tax withholding obligations related to the vesting of Restricted Stock or exercise of Options that will be granted pursuant to the Plan. Applicant also requests an exemption to permit Participants to pay the exercise price of Options with shares of the Fund's common stock.

Applicant's Legal Analysis

Sections 23(a) and (b), Section 63

1. Section 63 of the Act makes applicable to BDCs the provisions of section 23(a) of the Act, which generally prohibit a registered closed-end investment company from issuing securities for services or for property other than cash or securities. These provisions would prohibit the issuance of Restricted Stock as a part of the Plan.

2. Section 23(b) of the Act generally prohibits a registered closed-end investment company from selling any common stock of which it is the issuer at a price below its current net asset value. Section 63(2) of the Act makes section 23(b) applicable to BDCs unless certain conditions are met. Because Restricted Stock that would be granted under the Plan would not meet the terms of section 63(2), sections 23(b) and 63 would prevent the issuance of Restricted Stock.

3. Section 6(c) provides, in part, that the Commission may, by order upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes thereof, from any provision of the Act, if and to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicant requests an order pursuant to section 6(c) of the Act granting an exemption from the provisions of sections 23(a), 23(b) and 63 of the Act. Applicant states that the Plan would not violate the concerns underlying these sections, which include: (a) Preferential treatment of investment company insiders and the use of options and other rights by insiders to obtain control of the investment company; (b) complication of the investment company's structure that made it difficult to determine the value of the company's shares; and (c) dilution of shareholders' equity in the investment company. Applicant asserts that the Plan does not raise concerns about preferential treatment of Applicant's insiders because the Plan is a bona fide compensation plan of the type that is common among corporations generally. In addition, Applicants state that investors in the Fund will be protected to at least the same extent that they are currently protected under section 61(a)(3) of the Act. Applicant also asserts that the issuance of Restricted Stock would not become a means for insiders to obtain control of Applicant because the maximum amount of Restricted Stock that may be issued under the Plan at any one time will be ten percent of the outstanding shares of common stock of Applicant.

5. Applicant further states that the Plan will not unduly complicate Applicant's capital structure because equity-based incentive compensation arrangements are widely used among corporations and commonly known to investors. Applicant notes that the Plan has been submitted to and approved by the Fund's stockholders. Applicant represents that the proxy materials submitted to Applicant's stockholders contain a concise ''plain English'' description of the Plan and its potential dilutive effect. Applicant also states that on an ongoing basis it will comply with the proxy disclosure requirements in Item 10 of Schedule 14A under the Securities Exchange Act of 1934. Applicant further notes that the Plan will be disclosed to investors in accordance with the requirements of the Form N–2 registration statement for closed-end investment companies and pursuant to the standards and guidelines adopted by the Financial Accounting Standards Board for operating companies. Applicant also will comply with the disclosure requirements for executive compensation plans applicable to BDCs.[4] Applicant thus concludes that the Plan will be adequately disclosed to investors and appropriately reflected in the market value of Applicant's shares.

6. Applicant acknowledges that awards granted under the Plan may have a dilutive effect on the stockholders' equity per share in Applicant, but believes that effect would be outweighed by the anticipated benefits of the Plan to Applicant and its stockholders. Applicant asserts that availability of Restricted Stock and

[3] For purposes of calculating compliance with this limit, the Fund will count as Restricted Stock all shares of the Fund's common stock that are issued pursuant to the Plan less any shares that are forfeited back to the Fund and cancelled as a result of forfeiture restrictions not lapsing.

[4] See Executive Compensation and Related Party Disclosure, Securities Act Release No. 8655 (Jan. 27, 2006) (proposed rule); Executive Compensation and Related Party Disclosure, Securities Act Release No. 8732A (Aug. 29, 2006) (final rule and proposed rule), as amended by Executive Compensation Disclosure, Securities Act Release No. 8756 (Dec. 22, 2006) (adopted as interim final rules with request for comments).

Options would enable the Fund to substitute or augment the overall cash compensation to directors, officers, and employees, and compensate its management for the loss of the carried interest that the Fund's investment professionals would receive at a private equity firm, among other things. Applicant further asserts that the Plan will enhance the Fund's ability to compensate its personnel competitively, while also aligning the interests of its personnel with the success of the Fund and the interests of its shareholders and preserving cash for further investment. In addition, Applicant states that its stockholders will be further protected by the conditions to the requested order that assure continuing oversight of the operation of the Plan by the Plan Administrator.

Section 61(a)(3)(B)

7. Section 63(3) of the Act permits a BDC to sell its common stock at a price below current net asset value upon the exercise of any option issued in accordance with section 61(a)(3). Section 61(a)(3)(B) provides, in pertinent part, that a BDC may issue common stock purchase options to non-employee directors pursuant to an executive compensation plan if: (i) The options expire by their terms within ten years; (ii) the exercise price of such options is not less than the current market value at the date of issuance or, if no such market value exists, the then current net asset value of such underlying voting securities; (iii) the proposal to issue such options is authorized by the company's stockholders, and is approved by order of the Commission, upon application, on the basis that the terms of the proposal are fair and reasonable and do not involve overreaching of the company or its stockholders; (iv) the options are not transferable except for disposition by gift, will or intestacy; (v) no investment adviser of the company receives any compensation described in section 205(a)(1) of the Investment Advisers Act of 1940 (*e.g.,* ''performance-based'' compensation), except to the extent permitted by section 205(b)(1) or (2) thereunder; and (vi) that the company does not have a profit-sharing plan described in section 57(n) of the Act.

8. In addition, section 61(a)(3) provides that the amount of the BDC's voting securities that would result from the exercise of all outstanding warrants, options, and rights at the time of issuance may not exceed 25% of the BDC's outstanding voting securities, except that if the amount of voting securities that would result from the exercise of all outstanding warrants, options, and rights issued to the BDC's directors, officers and employees pursuant to any executive compensation plan would exceed 15% of the BDC's outstanding voting securities, then the total amount of voting securities that would result from the exercise of all outstanding warrants, options and rights at the time of issuance will not exceed 20% of the outstanding voting securities of the BDC.

9. Applicant represents that its proposal to grant Options to Non-Employee Directors meets all of the requirements of section 61(a)(3) of the Act. Applicant believes that the Options to be granted to Non-Employee Directors under the Plan will provide significant at-risk incentives to the Fund's Non-Employee Directors to remain on the Board and to devote their best efforts to the success of the Fund's business and the enhancement of stockholder value in the future. Applicant state that the Options will also provide a means for Non-Employee Directors to increase their ownership interests in the Fund, thereby ensuring close alignment of their interests with those of the Fund and its stockholders. Applicant asserts that by providing incentives in the form of such Options to its Non-Employee Directors, the Fund will be better able to maintain continuity in the membership of its Board and to attract, when necessary, and to retain as Non-Employee Directors the highly experienced, successful and motivated business and professional people that are critical to the Fund's success as a BDC.

10. As noted above, Applicant states that the maximum number of voting securities of the Fund that would result from the exercise of all Options issuable under the Plan, combined with all shares of Restricted Stock that would be possible to award under the Plan is not more than 20% of the Fund's outstanding shares of common stock, or 2,534,728 shares, which amount is below the percentage limitations in the Act. Applicant asserts that, given the relatively small number of Restricted Shares and Options that are proposed to be issued to Non-Employee Directors under the Plan, even if all Options granted thereunder were to vest and become immediately exercisable, the issuance of these securities under the Plan should not have a substantial dilutive effect on the net asset value of the common stock of the Fund.

Section 57(a)(4), Rule 17d–1

11. Section 57(a) proscribes certain transactions between a BDC and persons related to the BDC in the manner described in section 57(b) (''57(b) persons''), absent a Commission order. Section 57(a)(4) generally prohibits a 57(b) person from effecting a transaction in which the BDC is a joint participant absent such an order. Rule l7d–1, made applicable to BDCs by section 57(i) to the extent the Commission has not adopted a rule under section 57(a)(4), generally proscribes participation in a ''joint enterprise or other joint arrangement or profit-sharing plan,'' which includes a stock option or purchase plan. Officers, employees and directors of a BDC are 57(b) persons. Thus, the issuance of shares of Restricted Stock or Options could be deemed to involve a joint transaction involving a BDC and a 57(b) person in contravention of section 57(a)(4). Rule 17d–1(b) provides that, in considering relief pursuant to the rule, the Commission will consider (a) whether the participation of the BDC in a joint enterprise is consistent with the policies and purposes of the Act and (b) the extent to which such participation is on a basis different from or less advantageous than that of other participants.

12. Applicant requests an order pursuant to section 57(i) of the Act and rule 17d–1 under the Act to permit Applicant to issue Restricted Stock and Options under the Plan. Applicant acknowledges that its role is necessarily different from the other Participants because the other Participants are its directors, officers, and employees. Applicant asserts, however, that the Fund's participation with respect to the Plan will not be ''less advantageous'' than that of the Participants. Applicant states that the Fund, either directly or indirectly, is responsible for the compensation of the Participants; the Plan is simply the Fund's chosen method of providing such compensation. Moreover, Applicant believes that the Plan will benefit the Fund by enhancing its ability to attract and retain highly qualified personnel. Applicant further asserts that the Plan, although benefiting the Participants and the Fund in different ways, is in the interest of the Fund's stockholders, because it will help align the interests of its directors, officers, and employees with those of its stockholders, which will encourage conduct on the part of these individuals to produce a better return for the Fund's stockholders. Applicant also states that section 57(j)(1) of the Act expressly permits any director, officer or employee of a BDC to acquire warrants, options and rights to purchase voting securities of such BDC, and the securities issued upon the

exercise or conversion thereof, pursuant to an executive compensation plan which meets the requirements of section 61(a)(3)(B) of the Act. Applicant submits that the issuance of Restricted Stock pursuant to the Plan poses no greater risk to stockholders than the issuances permitted by section 57(j)(1) of the Act.

Section 23(c)

13. Section 23(c) of the Act, which is made applicable to BDCs by section 63 of the Act, generally prohibits a BDC from purchasing any securities of which it is the issuer except in the open market pursuant to tenders, or under other circumstances as the Commission may permit to ensure that the purchases are made in a manner or on a basis that does not unfairly discriminate against any holders of the class or classes of securities to be purchased. Applicant states that the withholding or purchase of shares of Restricted Stock and common stock in payment of applicable withholding tax obligations or of common stock in payment for the exercise price of an Option might be deemed to be purchases by the Fund of its own securities within the meaning of section 23(c) and therefore prohibited by the Act.

14. Section 23(c)(3) of the Act permits a BDC to purchase securities of which it is the issuer in circumstances in which the repurchase is made in a manner or on a basis that does not unfairly discriminate against any holders of the class or classes of securities to be purchased. Applicant believes that the requested relief meets the standards of section 23(c)(3).

15. Applicant submits that these purchases will be made in a manner that does not unfairly discriminate against Applicant's stockholders because Applicant will use the closing sales price of its shares of common stock on the New York Stock Exchange (or any primary exchange on which its shares of common stock may be traded in the future) as the ''fair market value'' of its common stock under the Plan (*i.e.,* the public market price on the date of grant of Restricted Stock and the date of grant of Options). Applicant submits that because all transactions with respect to the Plan will take place at the public market price for the Fund's common stock, these transactions will not be significantly different than could be achieved by any stockholder selling in a transaction on the New York Stock Exchange. Applicant represents that no transactions will be conducted pursuant to the requested order on days where there are no reported market transactions involving Applicant's shares.

16. Applicant represents that the withholding provisions in the Plan do not raise concerns about preferential treatment of Applicant's insiders because the Plan is a bona fide compensation plan of the type that is common among corporations generally. Furthermore, the vesting schedule is determined at the time of the initial grant of the Restricted Stock and the option exercise price is determined at the time of the initial grant of the Options. Applicant represents that all purchases may be made only as permitted by the Plan, which has been approved by the Fund's stockholders. Applicant believes that granting the requested relief would be consistent with the policies underlying the provisions of the Act permitting the use of equity compensation as well as prior exemptive relief granted by the Commission under section 23(c) of the Act.

Applicant's Conditions

Applicant agrees that the order granting the requested relief will be subject to the following conditions:

1. The Plan will be authorized by the Fund's shareholders.

2. Each issuance of Restricted Stock to a Participant will be approved by the Required Majority on the basis that such grant is in the best interest of the Fund and its shareholders.

3. The amount of voting securities that would result from the exercise of all of the Fund's outstanding warrants, Options and rights, together with any Restricted Stock issued pursuant to the Plan, at the time of issuance shall not exceed 25% of the outstanding voting securities of the Fund, except that if the amount of voting securities that would result from the exercise of all of the Fund's outstanding warrants, Options and rights issued to the Fund's directors, officers and employees, together with any Restricted Stock issued pursuant to the Plan, would exceed 15% of the outstanding voting securities of the Fund, then the total amount of voting securities that would result from the exercise of all outstanding warrants, Options and rights, together with any Restricted Stock issued pursuant to the Plan, at the time of issuance shall not exceed 20% of the outstanding voting securities of the Fund.

4. The maximum amount of shares of Restricted Stock that may be issued under the Plan will be 10% of the outstanding shares of common stock of the Fund on the effective date of the Plan plus 10% of the number of shares of the Fund's common stock issued or delivered by the Fund (other than pursuant to compensation plans) during the term of the Plan.

5. The Board will review the Plan at least annually. In addition, the Board will review periodically the potential impact that the issuance of Restricted Stock under the Plan could have on the Fund's earnings and net asset value per share, such review to take place prior to any decisions to grant Restricted Stock under the Plan, but in no event less frequently than annually. Adequate procedures and records will be maintained to permit such review. The Board will be authorized to take appropriate steps to ensure that the issuance of Restricted Stock under the Plan will be in the best interest of the Fund and its shareholders. This authority will include the authority to prevent or limit the granting of additional Restricted Stock under the Plan. All records maintained pursuant to this condition will be subject to examination by the Commission and its staff.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79543; File No. 10–227]

In the Matter of the Application of MIAX PEARL, LLC for Registration as a National Securities Exchange; Findings, Opinion, and Order of the Commission

December 13, 2016.

I. Introduction

On August 12, 2016, MIAX PEARL, LLC (''MIAX PEARL'' or ''Exchange'') submitted to the Securities and Exchange Commission (''Commission'') an application for Registration as a National Securities Exchange (''Form 1 Application'') under Section 6 of the Securities Exchange Act of 1934 (''Exchange Act''), seeking registration as a national securities exchange under Section 6 of the Exchange Act.[1] Notice of the Form 1 Application was published for comment in the **Federal Register** on September 14, 2016,[2] and the Commission received no comments.

[1] 15 U.S.C. 78f.

[2] *See* Securities Exchange Act Release No. 78793 (September 8, 2016), 81 FR 63238 (''Notice'').

II. Statutory Standards

Under Sections 6(b) and 19(a) of the Act,[3] the Commission shall by order grant an application for registration as a national securities exchange if the Commission finds, among other things, that the proposed exchange is so organized and has the capacity to carry out the purposes of the Act and to comply, and to enforce compliance by its members and persons associated with its members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the exchange.

As discussed in greater detail below, the Commission finds that MIAX PEARL's application for exchange registration meets the requirements of the Act and the rules and regulations thereunder. Further, the Commission finds that the proposed rules of MIAX PEARL are consistent with Section 6 of the Act in that, among other things, they assure a fair representation of the Exchange's members in the selection of its directors and administration of its affairs and provide that one or more directors will be representative of issuers and investors and not be associated with a member of the exchange, or with a broker or dealer;[4] and that they are designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, and remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest and are not designed to permit unfair discrimination between customers, issuers, or broker-dealers.[5] Finally, the Commission finds that MIAX PEARL's proposed rules do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[6]

III. Discussion

A. Governance of MIAX PEARL

1. MIAX PEARL Board of Directors

The board of directors of MIAX PEARL (''Exchange Board'' or ''MIAX PEARL Board'') will be its governing body and will possess all of the powers necessary for the management of its business and affairs, including governance of MIAX PEARL as a self-regulatory organization (''SRO'').[7]

Under the By-Laws of MIAX PEARL (''MIAX PEARL By-Laws''):[8]

- The Exchange Board will be composed of not less than ten directors;[9]
- One director will be the Chief Executive Officer of MIAX PEARL;[10]
- The number of Non-Industry Directors,[11] including at least one Independent Director,[12] will equal or exceed the sum of the number of Industry Directors[13] and Member Representative Directors;[14] and
- At least 20% of the directors on the Exchange Board will be Member Representative Directors.[15]

For the interim board (discussed below), and subsequently at the first annual meeting and each annual meeting thereafter, Miami International Holdings, Inc. (''Miami Holdings''), as the sole LLC Member of MIAX PEARL, will elect the MIAX PEARL Board pursuant to the MIAX PEARL By-Laws.[16] In addition, Miami Holdings will appoint the initial Nominating Committee[17] and Member Nominating Committee,[18] consistent with each committee's compositional requirements,[19] to nominate candidates for election to the Exchange Board. Each of the Nominating Committee and Member Nominating Committee, after completion of its respective duties for nominating directors for election to the Board for that year, shall nominate candidates to serve on the succeeding year's Nominating Committee or Member Nominating Committee, as applicable. Additional candidates for the Member Nominating Committee may be nominated and elected by MIAX PEARL members pursuant to a petition process.[20]

The Nominating Committee will nominate candidates for each director position, and Miami Holdings, as the sole LLC Member, will elect those directors. For Member Representative Director positions, the Nominating Committee will nominate those candidates submitted to it, and approved, by the Member Nominating Committee.[21] Additional candidates,

---

[4] *See* 15 U.S.C. 78f(b)(3).

[5] *See* 15 U.S.C. 78f(b)(5).

[6] *See* 15 U.S.C. 78f(b)(8).

[7] *See* MIAX PEARL By-Laws, Section 2.1. *See also* MIAX PEARL LLC Agreement, Section 8(b).

[8] The MIAX PEARL By-Laws are included in the Amended and Restated Limited Liability Company Agreement of MIAX PEARL (''MIAX PEARL LLC Agreement'').

[9] *See* MIAX PEARL By-Laws, Article II, Section 2.2(a).

[10] *See* MIAX PEARL By-Laws, Article II, Section 2.2(b).

[11] ''Non-Industry Director'' means a Director who is an Independent Director or any other individual who would not be an Industry Director. *See* MIAX PEARL By-Laws, Article I(aa).

[12] ''Independent Director'' means a ''Director who has no material relationship with [MIAX PEARL] or any affiliate of [MIAX PEARL], or any [MIAX PEARL member] or any affiliate of any such [MIAX PEARL member]; *provided,* however, that an individual who otherwise qualifies as an Independent Director shall not be disqualified from serving in such capacity solely because such Director is a Director of [MIAX PEARL] or [Miami Holdings].'' *See* MIAX PEARL By-Laws, Article I(p).

[13] An ''Industry Director'' is, among other things, a Director that is or has served within the prior three years as an officer, director, employee, or owner of a broker or dealer, as well as any Director who has, or has had, a consulting or employment relationship with MIAX PEARL or any affiliate of MIAX PEARL within the prior three years. *See* MIAX PEARL By-Laws, Article I(r). This definition is consistent with what the Commission has approved for other exchanges. *See* Securities Exchange Act Release Nos. 68341 (December 3, 2012), 77 FR 73065 (December 7, 2012) (File No. 10–207) (order granting the registration of MIAX Exchange) (''MIAX Order''); 58375 (August 18, 2008), 73 FR 49498 (August 21, 2008) (File No. 10–182) (order granting the registration of BATS Exchange, Inc.) (''BATS Order''); and 66871 (April 27, 2012), 77 FR 26323 (May 3, 2012) (File No. 10–206) (order granting the registration of BOX Options Exchange LLC) (''BOX Order'').

[14] *See* MIAX PEARL By-Laws, Article II, Section 2.2 (b)(i). ''Member Representative Director'' means a Director who has been appointed by Miami International Holdings, Inc. as an initial Director pursuant to Section 2.5 of the MIAX PEARL By-Laws to serve until the first annual meeting or who ''has been elected by the Miami International Holdings, Inc. after having been nominated by the Member Nominating Committee or by an Exchange Member pursuant to [the] By-Laws and confirmed as the nominee of Exchange Members after majority vote of Exchange Members, if applicable. A Member Representative Director may, but is not required to be, an officer, director, employee, or agent of an Exchange Member.'' *See* MIAX PEARL By-Laws, Article I(x). *See also* MIAX PEARL By-Laws Article II, Section 2.5.

[15] *See* MIAX PEARL By-Laws, Article II, Section 2.2(b)(ii).

[16] *See* MIAX PEARL By-Laws, Article II, Section 2.4. *See also* MIAX PEARL LLC Agreement, Section 9(a).

[17] The Nominating Committee will be comprised of at least three directors, and the number of Non-Industry members on the Nominating Committee must equal or exceed the number of Industry members. *See* MIAX PEARL By-Laws, Article V, Section 5.2. *See also* MIAX PEARL By-Laws, Article IV, Section 4.2(a).

[18] The Member Nominating Committee will be comprised of at least three directors, and each member of the Member Nominating Committee shall be a Member Representative member and shall not be required to be a Director of the Exchange. *See* MIAX PEARL By-Laws, Article V, Section 5.3. *See also* MIAX PEARL By-Laws, Article IV, Section 4.2(a). Pursuant to MIAX PEARL By-Laws, Article I(y), a ''Member Representative member'' is a member of any committee or hearing panel appointed by the Exchange Board who has been elected or appointed after having been nominated by the Member Nominating Committee pursuant to the By-Laws and who is an officer, director, employee, or agent of an Exchange Member.

[19] *See* MIAX PEARL By-Laws, Article V, Section 5.1.

[20] *See id.*

[21] The Member Nominating Committee will solicit comments from MIAX PEARL members for

however, may be nominated for the Member Representative Director positions by MIAX PEARL members pursuant to a petition process.[22] If no candidates are nominated pursuant to a petition process, then the initial nominees submitted by the Member Nominating Committee will be nominated as Member Representative Directors by the Nominating Committee. If a petition process produces additional candidates, then the candidates nominated pursuant to the petition process, together with those nominated by the Member Nominating Committee, will be presented to MIAX PEARL members for a run-off election to determine the final slate of candidates for the vacant Member Representative Director positions.[23] In the event of a contested run-off election, the candidates who receive the most votes will be nominated as the final slate of Member Representative Director candidates by the Nominating Committee.[24] Miami Holdings, as the sole LLC Member, is obligated to elect the final slate of the Member Representative Director candidates that are nominated by the Nominating Committee.[25]

The Commission believes that the requirement in the MIAX PEARL By-Laws that 20% of the directors be Member Representative Directors and the means by which they will be chosen by MIAX PEARL members provide for the fair representation of members in the selection of directors and the administration of MIAX PEARL and therefore is consistent with Section 6(b)(3) of the Act.[26] The Commission notes that this requirement helps to ensure that members have a voice in the use of self-regulatory authority by MIAX PEARL.[27]

In addition, with respect to the requirement that the number of Non-Industry Directors, including at least one Independent Director, will equal or exceed the sum of the number of Industry Directors and Member Representative Directors, the Commission believes that the proposed composition of the Exchange Board satisfies the requirements in Section 6(b)(3) of the Act,[28] which requires in part that one or more directors be representative of issuers and investors and not be associated with a member of the exchange, or with a broker or dealer. The Commission notes that the inclusion of public, non-industry representatives on exchange oversight bodies is an important mechanism to support an exchange's ability to protect the public interest.[29] Further, the presence of public, non-industry representatives can help to ensure that no single group of market participants has the ability to systematically disadvantage other market participants through the exchange governance process. The Commission believes that public, non-industry directors can provide unique, unbiased perspectives, which are designed to enhance the ability of the Exchange Board to address issues in a non-discriminatory fashion and foster the integrity of the Exchange.[30]

2. Interim Exchange Board

Prior to commencing operations, Miami Holdings will appoint an interim Exchange board of directors (''Interim Exchange Board''), which will include interim Member Representative Directors.[31] With respect to the selection of the interim Member Representative Directors for the Interim Exchange Board, prior to the commencement of operations as an exchange, Miami Holdings will submit the names of its nominees for the interim Member Representative Directors positions to persons that have begun the process of becoming members in the new Exchange.[32] Such persons and firms will be allowed 14 days to submit the names of alternative candidates.[33] Voting will occur no sooner than 5 days after the interim election notice is delivered to confirm the final slate of candidates to become an interim Member Representative Director.[34] All other interim directors, except for the interim Member Representative Directors, will be appointed and elected by Miami Holdings, and must meet the MIAX PEARL board composition requirements as set forth in the MIAX PEARL By-Laws.[35] Once these interim Member Representative Directors are seated on the Interim Exchange Board, then the Interim Exchange Board will meet the board composition requirements set forth in the governing documents of MIAX PEARL.

The Interim Exchange Board will serve until the first initial Exchange Board is elected pursuant to the full nomination, petition, and voting process set forth in the MIAX PEARL By-Laws.[36] MIAX PEARL will complete such process within 90 days after its application for registration as a national securities exchange is granted by the Commission.[37]

The Commission believes that the process for electing the Interim Exchange Board, as proposed, is consistent with the requirements of the Act, including that the rules of the exchange assure fair representation of the exchange's members in the selection of its directors and administration of its affairs.[38] As noted above, MIAX PEARL represents that the initial members of MIAX PEARL will consist substantially of the current group of persons and firms that have begun the membership

---

the purpose of approving and submitting names of candidates for election to the position of Member Representative Director. *See* MIAX PEARL By-Laws, Article II, Section 2.4(b).

[22] *See* MIAX PEARL By-Laws, Article II, Section 2.4(c). The petition must be signed by executive representatives of 10% or more of the MIAX PEARL members. No MIAX PEARL member, together with its affiliates, may account for more than 50% of the signatures endorsing a particular candidate. *See id.*

[23] *See* MIAX PEARL By-Laws, Article II, Sections 2.4(e) and (f). Each MIAX PEARL Member shall have the right to cast one vote for each available Member Representative Director nomination, provided that any such vote must be cast for a person on the List of Candidates and that no MIAX PEARL member, together with its affiliates, may account for more than 20% of the votes cast for a candidate. *See* MIAX PEARL By-Laws, Article II, Section 2.4(f).

The 90-day period is consistent with what the Commission recently approved for ISE Mercury, LLC. *See* ISE Mercury Order, *supra* note 27, at 6068 (allowing ISE Mercury, LLC to appoint an initial interim board to enable it to commence operations as a registered exchange). *See also* MIAX Order, *supra* note 13, at 73067; and BOX Order, *supra* note 13, at 26325.

[38] *See* 15 U.S.C. 78f(b)(3).

application process with MIAX PEARL.[39] MIAX PEARL will engage these persons and firms in the interim board election process by, prior to the commencement of operations as an exchange, providing each of them with the opportunity to participate in the selection of interim Member Representative Directors consistent with the MIAX PEARL By-Laws. Further, MIAX PEARL represents that it will complete the full nomination, petition, and voting process as set forth in the MIAX PEARL By-Laws, which will provide persons that are approved as members after the effective date of this Order with the opportunity to participate in the selection of the Member Representative Directors, within 90 days of when MIAX PEARL's application for registration as a national securities exchange is granted.[40] Therefore, the Commission believes that MIAX PEARL's initial interim board process is consistent with the Act, including Section 6(b)(3), in that it is designed to provide representation among the persons and firms likely to become members when MIAX PEARL commences operations and is sufficient to allow MIAX PEARL to commence operations for an interim period prior to going through the process to elect a new Exchange Board pursuant to the full nomination, petition, and voting process set forth in the MIAX PEARL By-Laws.

3. Exchange Committees

In the MIAX PEARL By-Laws, the Exchange proposed to establish several standing committees, which would be divided into two categories: Committees of the Board (composed of MIAX PEARL directors) and Committees of the Exchange (composed of a mixture of MIAX PEARL directors and persons that are not MIAX PEARL directors).[41] The standing Committees of the Board would be the Audit, Compensation, Appeals, and Regulatory Oversight Committees.[42] In addition, the Exchange Chairman, with approval of the Exchange Board, may appoint an Executive Committee and a Finance Committee, which also would be Committees of the Board.[43]

The Audit Committee will consist of three or more directors, a majority of which will be Non-Industry Directors.[44] Each of the Compensation and Regulatory Oversight Committees will consist of three or more directors, all of which will be required to be Non-Industry Directors.[45] The Appeals Committee will consist of one Independent Director, one Industry Director, and one Member Representative Director.[46] If established, the Finance Committee will consist of at least three persons (who may, but are not required to, be directors) a majority of whom will be Non-Industry Directors.[47] The Executive Committee, if established, will consist of at least three directors. Because the Executive Committee will have the powers and authority of the Exchange Board in the management of the business and affairs of the Exchange between meetings of the Exchange Board, its composition must reflect that of the Exchange Board. Accordingly, the number of Non-Industry Directors on the Executive Committee must equal or exceed the number of Industry Directors and the percentages of Independent Directors and Member Representative Directors must be at least as great as the corresponding percentages on the Exchange Board as a whole.[48]

With respect to Committees of MIAX PEARL, the Exchange has proposed to establish a Nominating Committee [49] and a Member Nominating Committee.[50] As discussed above, these committees will have responsibility for, among other things, nominating candidates for election to the Exchange Board. On an annual basis, the members of these committees will nominate candidates for the succeeding year's respective committees to be elected by Miami Holdings, as the sole LLC Member.[51] In addition, MIAX PEARL has proposed to establish a Quality of Markets Committee,[52] which will provide advice and guidance to the Exchange Board on issues related to the fairness, integrity, efficiency and competiveness of the information, order handling and execution mechanisms of the Exchange from the perspective of individual and institutional investors, retail and market making firms, and other market participants. The Quality of Markets Committee will include a broad representation of participants in the Exchange. Additionally, at least 20% of the members of the committee will be Member Representative members, and the number of Non-Industry members must equal or exceed the total number of Industry and Member Representative members. MIAX PEARL also has proposed to establish a Business Conduct Committee, which shall be appointed by the Chairman of the Exchange Board.[53] Specifically, the Business Conduct Committee, which will not be a Board committee, will have a minimum of three members and will be composed of a number of individuals as determined by the Exchange Chairman, none of whom shall be Directors of MIAX PEARL. In addition, at least one member of the Business Conduct Committee and any panel thereof must be an officer, director or employee of a MIAX PEARL member.

The Commission believes that MIAX PEARL's proposed committees, which are similar to the committees maintained by other exchanges,[54] are designed to help enable MIAX PEARL to carry out its responsibilities under the Act and are consistent with the Act, including Section 6(b)(1), which requires, in part, an exchange to be so organized and have the capacity to carry out the purposes of the Act.[55]

B. Regulation of MIAX PEARL

When MIAX PEARL commences operations as a national securities exchange, the Exchange will have all the attendant regulatory obligations under the Act. In particular, MIAX PEARL will be responsible for the operation and regulation of its trading system and the regulation of its members. Certain provisions in the MIAX PEARL and Miami Holdings governance documents are designed to facilitate the ability of MIAX PEARL and the Commission to fulfill their regulatory obligations. The

[55] 15 U.S.C. 78f(b)(1).

discussion below summarizes some of these key provisions.

1. Ownership Structure: Ownership and Voting Limitations

MIAX PEARL will be structured as a Delaware limited liability company, which will be wholly owned by the sole member of the LLC, Miami Holdings. The Miami Holdings' proposed Amended and Restated Certificate of Incorporation (''Miami Holdings Certificate'') includes restrictions on the ability to own and vote shares of capital stock of Miami Holdings.[56] These limitations are designed to prevent any Miami Holdings shareholder from exercising undue control over the operation of MIAX PEARL and to assure that MIAX PEARL and the Commission are able to carry out their regulatory obligations under the Act.

In particular, for so long as Miami Holdings (directly or indirectly) controls MIAX PEARL, no person, either alone or together with its related persons,[57] may beneficially own more than 40% of any class of capital stock of Miami Holdings.[58] There would be a more conservative restriction for MIAX PEARL members, wherein MIAX PEARL *members,* either alone or together with their related persons, are prohibited from beneficially owning more than 20% of shares of any class of capital stock of Miami Holdings.[59] If any stockholder violates these ownership limits, Miami Holdings would redeem the shares in excess of the applicable ownership limit at their par value.[60] In addition, no person, alone or together with its related persons, may vote or cause the voting of more than 20% of the voting power of the then issued and outstanding capital stock of Miami Holdings.[61] If any stockholder purports to vote, or cause the voting of, shares that would violate this voting limit, Miami Holdings would not honor such vote in excess of the voting limit.[62]

Any person that proposes to own shares of capital stock in excess of the 40% ownership limitation, or vote or grant proxies or consents with respect to shares of capital stock in excess of the 20% voting limitation, must deliver written notice to the Miami Holdings board to notify the Board of its intention.[63] The notice must be delivered to the Board not less than 45 days before the proposed ownership of such shares or proposed exercise of such voting rights or the granting of such proxies or consents.[64] The Miami Holdings board may waive the 40% ownership limitation and the 20% voting limitation, pursuant to a resolution duly adopted by the Board of Directors, if it makes certain findings,[65] except that the Miami Holdings board cannot waive the voting and ownership limits above 20% for MIAX PEARL members and their related persons.[66] Any such waiver would not be effective unless and until approved by the Commission pursuant to Section 19 of the Act.[67]

The Miami Holdings Certificate also contains provisions that are designed to further safeguard the ownership and voting limitation described above, or are otherwise related to direct and indirect changes in control. Specifically, any person that, either alone or together with its related persons owns, directly or indirectly, of record or beneficially, 5% or more of the capital stock of Miami Holdings will be required to immediately notify Miami Holdings in writing upon acquiring knowledge of such ownership.[68] Thereafter, such persons will be required to update Miami Holdings of any increase or decrease of 1% or more in their previously reported ownership percentage.[69]

The MIAX PEARL LLC Agreement does not include change of control provisions that are similar to those in the Miami Holdings Certificate; however the MIAX PEARL LLC Agreement explicitly provides that Miami Holdings is the sole LLC Member of MIAX PEARL.[70] Thus, if Miami Holdings ever proposes to no longer be the sole LLC Member of MIAX PEARL (and therefore no longer its sole owner), MIAX PEARL would be required to amend the MIAX PEARL LLC Agreement and the MIAX

[56] These provisions are consistent with ownership and voting limits approved by the Commission for other SROs. *See, e.g.,* ISE Mercury Order and ISE Gemini Order, *supra* note 27; MIAX Order and BATS Order, *supra* note 13. *See also* Securities Exchange Act Release Nos. 62158 (May 24, 2010), 75 FR 30082 (May 28, 2010) (CBOE–2008–88) (''CBOE Demutualization Approval Order''); 53963 (June 8, 2006), 71 FR 34660 (June 15, 2006) (SR–NSX–2006–03) (''NSX Demutualization Order''); 51149 (February 8, 2005), 70 FR 7531 (February 14, 2005) (SR–CHX–2004–26) (''CHX Demutualization Order''); and 49098 (January 16, 2004), 69 FR 3974 (January 27, 2004) (SR–Phlx–2003–73) (''Phlx Demutualization Order'').

[59] *See* Miami Holdings Certificate, Article NINTH (b)(i)(B).

[60] *See* Miami Holdings Certificate, Article NINTH (e). Any shares which have been called for redemption shall not be deemed outstanding shares for the purpose of voting or determining the total number of shares entitled to vote. Once redeemed by Miami Holdings, such shares shall become treasury shares and shall no longer be deemed to be outstanding. *See id.* Furthermore, if any redemption results in another stockholder owning shares in violation of the ownership limits described above, Miami Holdings shall redeem such shares. *See id.*

[61] *See* Miami Holdings Certificate, Article NINTH (b)(i)(C).

[62] *See* Miami Holdings Certificate, Article NINTH (d). The Miami Holdings Certificate also prohibits the payment of any stock dividends and conversions that would violate the ownership and voting limitations. *See* Miami Holdings Certificate, Article FOURTH A.(b) and (e), and D.7.

[63] *See* Miami Holdings Certificate, Article NINTH (b)(iv).

[64] *See id.*

[65] *See* Miami Holdings Certificate, Article NINTH (b)(ii)(B). The required findings include determinations that (A) such waiver will not impair the ability of MIAX PEARL to carry out its functions and responsibilities under the Act and the rules and regulations promulgated thereunder, (B) such waiver is otherwise in the best interests of MIAX PEARL and Miami Holdings, (C) such waiver will not impair the ability of the Commission to enforce the Act and (D) the transferee in such transfer and its related persons are not subject to any applicable ''statutory disqualification'' (within the meaning of Section 3(a)(39) of the Act). *See* Miami Holdings Certificate, Article NINTH (b)(ii)(B) and (b)(iii). The Commission has previously approved the rules of other exchanges that provide for the ability of the exchange to waive the ownership and voting limitations discussed above for non-members of the exchange. *See, e.g.,* ISE Mercury Order and ISE Gemini Order, *supra* note 27; MIAX Order, *supra* note 13; and Securities Exchange Act Release No. 61698 (March 12, 2010), 75 FR 13151 (March 18, 2010) (order approving DirectEdge exchanges) (''DirectEdge Exchanges Order'').

[66] *See* Miami Holdings Certificate, Article NINTH (b)(ii)(B). These provisions are generally consistent with waiver of ownership and voting limits approved by the Commission for other SROs. *See, e.g.,* ISE Mercury Order, *supra* note 27; MIAX Order, *supra* note 13; BATS Order, *supra* note 13; NSX Demutualization Order, *supra* note 56; CHX Demutualization Order, *supra* note 56; and Securities Exchange Act Release No. 49718 (May 17, 2004), 69 FR 29611 (May 24, 2004) (SR–PCX–2004–08).

[67] *See* Miami Holdings Certificate, Article NINTH (b)(ii)(B).

[68] *See* Miami Holdings Certificate, Article NINTH(c)(i). The notice will require the person's full legal name; the person's title or status; the person's approximate ownership interest in Miami Holdings; and whether the person has power, directly or indirectly, to direct the management or policies of Miami Holdings. *See id.*

[69] *See* Miami Holdings Certificate, Article NINTH(c)(ii). Changes of less than 1% must also be reported to Miami Holdings if they result in such person crossing a 20% or 40% ownership threshold. *See id.* In addition, the MIAX PEARL rules also impose limits on affiliation between MIAX PEARL and a member of MIAX PEARL. *See* MIAX PEARL Rule 201(g) (''Without prior Commission approval, the Exchange or any entity with which it is affiliated shall not directly or indirectly through one or more intermediaries acquire or maintain an ownership interest in an Exchange Member. In addition, without prior Commission approval, no Member shall be or become affiliated with (1) the Exchange; or (2) any affiliate of the Exchange. Nothing herein shall prohibit a Member from acquiring or holding an equity interest in (i) Miami International Holdings, Inc. that is permitted by the Certificate of Incorporation of Miami International Holdings, Inc. or (ii) Miami International Securities Exchange, LLC that is permitted by the Amended and Restated Limited Liability Company Agreement of Miami International Securities Exchange, LLC.'').

[70] *See* MIAX PEARL LLC Agreement and MIAX PEARL By-Laws, Article I(v) (both of which define ''LLC Member'' to mean Miami Holdings, as the sole member of MIAX PEARL).

PEARL By-Laws. Any changes to the MIAX PEARL LLC Agreement or the MIAX PEARL By-Laws, including any change in the provisions that identify Miami Holdings as the sole owner of MIAX PEARL, must be filed with, or filed with and approved by, the Commission pursuant to Section 19 of the Act, as the case may be.[71] Further, pursuant to the MIAX PEARL By-Laws, Miami Holdings may not transfer or assign, in whole or in part, its ownership interest in MIAX PEARL, unless such transfer is filed with and approved by the Commission pursuant to Section 19 of the Act.[72]

As described above, the provisions applicable to direct and indirect changes in control of Miami Holdings and MIAX PEARL, as well as the voting limitation imposed on owners of Miami Holdings who also are MIAX PEARL members, are designed to help prevent any owner of Miami Holdings from exercising undue influence or control over the operation of MIAX PEARL. In addition, these limitations are designed to address the conflicts of interests that might result from a member of a national securities exchange owning interests in the exchange. A member's interest in an exchange, including an entity that controls an exchange, could become so large as to cast doubts on whether the exchange may fairly and objectively exercise its self-regulatory responsibilities with respect to such member.[73] A member that is a controlling shareholder of an exchange could seek to exercise that controlling influence by directing the exchange to refrain from, or the exchange may hesitate to, diligently monitor and conduct surveillance of the member's conduct or diligently enforce the exchange's rules and the federal securities laws with respect to conduct by the member that violates such provisions. As such, the Commission believes that these voting and ownership limitations are designed to minimize the potential that a person or entity can improperly interfere with or restrict the ability of MIAX PEARL to effectively carry out its regulatory oversight responsibilities under the Act.

The Commission believes that MIAX PEARL's and Miami Holding's proposed governance provisions are consistent with the Act, including Section 6(b)(1), which requires, in part, an exchange to be so organized and have the capacity to carry out the purposes of the Act.[74] In particular, these requirements are designed to minimize the potential that a person could improperly interfere with or restrict the ability of the Commission or MIAX PEARL to effectively carry out their regulatory oversight responsibilities under the Act.

2. Regulatory Independence and Oversight

Although Miami Holdings will not itself carry out regulatory functions, its activities with respect to the operation of MIAX PEARL must be consistent with, and must not interfere with, MIAX PEARL's self-regulatory obligations. In this regard, MIAX PEARL and Miami Holdings propose to adopt certain provisions in their respective governing documents that are designed to help maintain the independence of the regulatory functions of MIAX PEARL. These proposed provisions are substantially similar to those included in the governing documents of other exchanges that recently have been granted registration.[75] Specifically:

- The directors, officers, employees, and agents of Miami Holdings must give due regard to the preservation of the independence of the self-regulatory function of MIAX PEARL and must not take actions that would interfere with the effectuation of decisions by the MIAX PEARL Board relating to its regulatory functions or that would interfere with MIAX PEARL's ability to carry out its responsibilities under the Act.[76]
- Miami Holdings must comply with federal securities laws and the rules and regulations promulgated thereunder, and agrees to cooperate with the Commission and MIAX PEARL pursuant to, and to the extent of, their respective regulatory authority. In addition, Miami Holdings' officers, directors, employees, and agents must comply with federal securities laws and the rules and regulations promulgated thereunder and agree to cooperate with the Commission and MIAX PEARL in respect of the Commission's oversight responsibilities regarding MIAX PEARL and the self-regulatory functions and responsibilities of MIAX PEARL.[77]
- Miami Holdings, and its officers, directors, employees, and agents are deemed to irrevocably submit to the jurisdiction of the U.S. federal courts, the Commission, and MIAX PEARL, for purposes of any action, suit, or proceeding pursuant to U.S. federal securities laws, and the rules and regulations thereunder, arising out of, or relating to, MIAX PEARL activities.[78]
- All books and records of MIAX PEARL reflecting confidential information pertaining to the self-regulatory function of MIAX PEARL (including but not limited to disciplinary matters, trading data, trading practices, and audit information) shall be retained in confidence by MIAX PEARL and its personnel and will not be used by MIAX PEARL for any non-regulatory purpose and shall not be made available to persons (including, without limitation, any MIAX PEARL member) other than to personnel of the Commission, and those personnel of MIAX PEARL, members of committees of MIAX PEARL, members of the MIAX PEARL Board, or hearing officers and other agents of MIAX PEARL, to the extent necessary or appropriate to properly discharge the self-regulatory function of MIAX PEARL.[79]
- The books and records of MIAX PEARL and Miami Holdings must be

[71] *See* 15 U.S.C. 78s. *See also* MIAX PEARL LLC Agreement, Section 28(b).

[72] *See* MIAX PEARL By-Laws, Article III, Section 3.4.

[73] *See, e.g.,* ISE Mercury Order, *supra* note 27; MIAX Order, *supra* note 13; BATS Order, *supra* note 13; and DirectEdge Exchanges Order, *supra* note 65.

[74] 15 U.S.C. 78f(b)(1). *See also* ISE Mercury Order, *supra* note 27; MIAX Order, *supra* note 13; and BOX Order, *supra* note 13.

[75] *See, e.g.,* DirectEdge Exchanges Order, *supra* note 65, and BATS Order, *supra* note 13. *See also* Securities Exchange Act Release No. 61152 (December 10, 2009), 74 FR 66699 (December 16, 2009) (''C2 Order'').

[76] *See* Amended and Restated By-Laws of Miami Holdings (''Miami Holdings By-Laws''), Article VII, Section 1.

Similarly, Article II, Section 2.1(d) of the MIAX PEARL By-Laws requires the MIAX PEARL Board to, when managing the business and affairs of MIAX PEARL and evaluating any proposal, consider the requirements of Section 6(b) of the Act. Section 2.1(e) also requires the MIAX PEARL Board, when evaluating any proposal to take into account (among other things and to the extent relevant), the potential impact on the integrity, continuity and stability of the national securities exchange operated by MIAX PEARL and the other operations of MIAX PEARL, on the ability to prevent fraudulent and manipulative acts and practices and on investors and the public, and whether such would promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to and facilitating transactions in securities or assist in the removal of impediments to or perfection of the mechanisms for a free and open market and a national market system. *See, e.g.,* Fourth Amended and Restated By-Laws of BATS, Article III, Section 1.

[77] *See* Miami Holdings By-Laws, Article VII, Section 4.

[78] *See* Miami Holdings By-Laws, Article VII, Section 5.

[79] *See* MIAX PEARL By-Laws Article X, Section 10.4. The Commission notes that the Miami Holdings By-Laws also provide that all books and records of MIAX PEARL reflecting confidential information pertaining to the self-regulatory function of MIAX PEARL will be subject to confidentiality restrictions. *See* Miami Holdings By-Laws Article VII, Section 2. The requirement to keep such information confidential shall not limit the Commission's ability to access and examine such information or limit the ability of officers, directors, employees, or agent of Miami Holdings to disclose such information to the Commission. *See id.*

maintained in the United States [80] and, to the extent they are related to the operation or administration of MIAX PEARL, Miami Holdings books and records will be subject at all times to inspection and copying by the Commission.[81]

• Furthermore, to the extent they relate to the activities of MIAX PEARL, the books, records, premises, officers, directors, employees, and agents of Miami Holdings will be deemed to be the books, records, premises, officers, directors, employees, and agents of MIAX PEARL, for purposes of, and subject to oversight pursuant to, the Act.[82]

• Miami Holdings will take necessary steps to cause its officers, directors, employees, and agents, prior to accepting a position as an officer, director, employee or agent (as applicable) to consent in writing to the applicability of provisions regarding books and records, confidentiality, jurisdiction, and regulatory obligations, with respect to their activities related to MIAX PEARL.[83]

• Miami Holdings Certificate and By-Laws require that, so long as Miami Holdings controls MIAX PEARL, any changes to those documents be submitted to the MIAX PEARL Board, and, if such change is required to be filed with the Commission pursuant to Section 19(b) of the Act and the rules and regulations thereunder, such change shall not be effective until filed with, or filed with and approved by, the Commission.[84]

The Commission believes that the provisions discussed in this section, which are designed to help maintain the independence of MIAX PEARL's regulatory function and help facilitate the ability of MIAX PEARL to carry out its regulatory responsibilities and operate in a manner consistent with the Act, are appropriate and consistent with the requirements of the Act, particularly with Section 6(b)(1), which requires, in part, an exchange to be so organized and have the capacity to carry out the purposes of the Act.[85] Whether MIAX PEARL operates in compliance with the Act, however, depends on how it and Miami Holdings in practice implement the governance and other provisions that are the subject of this Order.

Further, Section 19(h)(1) of the Act [86] provides the Commission with the authority ''to suspend for a period not exceeding twelve months or revoke the registration of [an SRO], or to censure or impose limitations upon the activities, functions, and operations of [an SRO], if [the Commission] finds, on the record after notice and opportunity for hearing, that [the SRO] has violated or is unable to comply with any provision of the Act, the rules or regulations thereunder, or its own rules or without reasonable justification or excuse has failed to enforce compliance'' with any such provision by its members (including associated persons thereof).[87] If Commission staff were to find, or become aware of, through staff review and inspection or otherwise, facts indicating any violations of the Act, including without limitation Sections 6(b)(1) and 19(g)(1), these matters could provide the basis for a disciplinary proceeding under Section 19(h)(1) of the Act.

The Commission also notes that, even in the absence of the governance provisions described above, under Section 20(a) of the Act, any person with a controlling interest in MIAX PEARL would be jointly and severally liable with and to the same extent that MIAX PEARL is liable under any provision of the Act, unless the controlling person acted in good faith and did not directly or indirectly induce the act or acts constituting the violation or cause of action.[88] In addition, Section 20(e) of the Act creates aiding and abetting liability for any person who knowingly provides substantial assistance to another person in violation of any provision of the Act or rule thereunder.[89] Further, Section 21C of the Act authorizes the Commission to enter a cease-and-desist order against any person who has been ''a cause of'' a violation of any provision of the Act through an act or omission that the person knew or should have known would contribute to the violation.[90] These provisions are applicable to all entities' dealings with MIAX PEARL, including Miami Holdings.

3. Regulation of MIAX PEARL

As a prerequisite to the Commission's granting of an exchange's application for registration, an exchange must be so organized and have the capacity to carry out the purposes of the Act.[91] Specifically, an exchange must be able to enforce compliance by its members, and persons associated with its members, with the Act and the rules and regulations thereunder and the rules of the exchange.[92] The discussion below summarizes how MIAX PEARL proposes to structure and conduct its regulatory operations.

a. Regulatory Oversight Committee

The regulatory operations of MIAX PEARL will be monitored by the Regulatory Oversight Committee of the Exchange Board. The Regulatory Oversight Committee will consist of at least three directors, all of whom will be Non-Industry Directors. The Regulatory Oversight Committee will be responsible for overseeing the adequacy and effectiveness of MIAX PEARL's regulatory and SRO responsibilities, assessing MIAX PEARL's regulatory performance, and assisting the Exchange Board (and committees of the Exchange Board) in reviewing MIAX PEARL's regulatory plan and the overall effectiveness of MIAX PEARL's regulatory functions.[93]

Further, a Chief Regulatory Officer (''CRO'') of MIAX PEARL will have general day-to-day supervision over MIAX PEARL's regulatory operations.[94] The Regulatory Oversight Committee also will be responsible for recommending compensation and personnel actions involving the CRO and senior regulatory personnel to the Compensation Committee of MIAX PEARL for action.[95] The CRO will report to the Regulatory Oversight Committee.[96]

b. Regulatory Funding

To help assure the Commission that it has and will continue to have adequate funding to be able to meet its responsibilities under the Act, MIAX PEARL represents in its Form 1 Application that, prior to beginning operations as a national securities exchange, Miami Holdings will provide sufficient funding to MIAX PEARL for the exchange to carry out its

[95] *See* MIAX PEARL By-Laws, Article IV, Section 4.5(c).

[96] *See* MIAX PEARL By-Laws, Article VI, Section 6.10.

responsibilities under the Act.[97] Specifically, MIAX PEARL represents that Miami Holdings has allocated sufficient operational assets to enable its operation and that prior to launching operations, Miami Holdings will make a capital contribution of not less than $5,000,000 into MIAX PEARL's capital account, in addition to any previously-provided in-kind contributions, such as legal, regulatory, and infrastructure-related services.[98] MIAX PEARL represents that such cash and in-kind contributions by Miami Holdings will be adequate to begin operation of the Exchange, including the regulation of the Exchange.

MIAX PEARL also represents in its Form 1 application that there is a written agreement between MIAX PEARL and Miami Holdings that requires Miami Holdings to provide adequate funding for MIAX PEARL's ongoing operations, including the regulation of MIAX PEARL. This agreement provides that MIAX PEARL will receive all fees, including regulatory fees and trading fees, payable by MIAX PEARL's members, as well as any funds received from any applicable market data fees and OPRA tape revenue. The agreement further provides that Miami Holdings will reimburse MIAX PEARL for its costs and expenses to the extent MIAX PEARL's assets are insufficient to meets its costs and expenses.[99]

Further, any revenues received by MIAX PEARL from fees derived from its regulatory function or regulatory penalties will not be used for non-regulatory purposes.[100] Any excess funds, as determined by MIAX PEARL, may be remitted to Miami Holdings, however ''Regulatory Funds'' will not be remitted to Miami Holdings.[101]

c. Rule 17d–2 Agreements; Regulatory Contract With FINRA

Unless the SRO is relieved of this responsibility pursuant to Section 17(d) or Section 19(g)(2) of the Act,[102] Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange, absent reasonable justification or excuse, to enforce compliance by its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO's own rules.[103] Section 17(d) of the Act and Rule 17d–2 thereunder permit SROs to propose joint plans to allocate regulatory responsibilities among themselves for their common rules with respect to their common members.[104] These agreements, which must be filed with and declared effective by the Commission, generally cover areas where each SRO's rules substantively overlap, including such regulatory functions as personnel registration and sales practices. Without this relief, the statutory obligation of each individual SRO could result in a pattern of multiple examinations of broker-dealers that maintain memberships in more than one SRO.[105] Such regulatory duplication would add unnecessary expense for common members and their SROs. A 17d–2 plan that is declared effective by the Commission relieves the specified SRO of those regulatory responsibilities allocated by the plan to another SRO.[106] Many SROs have entered into Rule 17d–2 agreements.[107]

A 17d–2 plan that is declared effective by the Commission relieves the specified SRO of those regulatory responsibilities allocated by the plan to another SRO.[108] MIAX PEARL has represented to the Commission that it intends to become a party to the existing multiparty options Rule 17d–2 plans concerning sales practice regulation and market surveillance.[109] MIAX PEARL has also represented that it will enter into a bi-lateral 17d–2 agreement to allocate regulatory responsibility to FINRA for common rules of dual members between MIAX PEARL and FINRA. Under these agreements, the examining SROs will examine firms that are common members of MIAX PEARL and the particular examining SRO for compliance with certain provisions of the Act, certain rules and regulations adopted thereunder, and certain MIAX PEARL Rules.

In addition, MIAX PEARL has represented that it will enter into a Regulatory Services Agreement (''RSA'') with FINRA, under which FINRA will perform certain regulatory functions on behalf of MIAX PEARL.[110] Pursuant to the RSA, FINRA, in its capacity as service provider to MIAX PEARL, will perform various services on MIAX PEARL's behalf, including assisting MIAX PEARL with member registration and related administrative support services; certain cross-market surveillance services; certain options trading examinations; at MIAX PEARL's request, investigating potential violations of enumerated MIAX PEARL market rules, as well as federal securities laws, and rules and regulations thereunder, related to MIAX PEARL market activity; performing examinations of options, including routine and for cause examinations of

[98] *See id.*

[99] *See id.*

[100] *See* MIAX PEARL By-Laws, Article IX, Section 9.4.

[101] *See* MIAX PEARL Form 1 Application, Exhibit I. *See also* MIAX PEARL LLC Agreement, Section 16; and MIAX PEARL By-Laws, Article IX, Section 9.4. MIAX PEARL By-Laws, Article 1(gg) defines ''Regulatory Funds'' as ''fees, fines, or penalties derived from the regulatory operations of [MIAX PEARL]'', but such term does not include ''revenues derived from listing fees, market data revenues, transaction revenues, or any other aspect of the commercial operations of [MIAX PEARL], even if such revenues are used to pay costs associated with the regulatory operations of [MIAX PEARL].'' This definition is consistent with the rules of other SROs. *See, e.g.,* By-Laws of MIAX Exchange, Article I(ll); By-Laws of NASDAQ PHLX LLC, Article I(ii); and By-Laws of NASDAQ BX, Inc., Article I(ii).

[102] 15 U.S.C. 78q(d) and 15 U.S.C. 78s(g)(2), respectively.

[103] 15 U.S.C. 78s(g)(1).

[104] *See* Section 17(d)(1) of the Act and Rule 17d–2 thereunder, 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) Receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

[105] Section 17(d) was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication with respect to Common Members. *See* Securities Exchange Act Release No. 12935 (October 28, 1976), 41 FR 49091 (November 8, 1976).

[110] *See* MIAX PEARL Form 1 Application, Exhibit L.

MIAX PEARL members under certain MIAX PEARL rules and federal securities laws; bringing formal disciplinary actions, including hearing officer services; and providing arbitration, mediation, and other dispute resolution services to MIAX PEARL member firms.[111] Notwithstanding the RSA, MIAX PEARL, as an SRO, has the ultimate legal responsibility for the regulation of its members and market.

The Commission believes that it is consistent with the Act for MIAX PEARL to contract with other SROs to perform certain examination, enforcement, and disciplinary functions.[112] This regulatory structure would be consistent with that of other SROs.[113] These functions are fundamental elements of a regulatory program, and constitute core self-regulatory functions. The Commission believes that FINRA, as an SRO that provides contractual services to other SROs, should have the capacity to perform these functions for MIAX PEARL.[114] However, MIAX PEARL, unless relieved by the Commission of its responsibility,[115] bears the ultimate responsibility for self-regulatory responsibilities and primary liability for self-regulatory failures, not the SRO retained to perform regulatory functions on MIAX PEARL's behalf. In performing these regulatory functions, however, the SRO retained to perform regulatory functions may nonetheless bear liability for causing or aiding and abetting the failure of MIAX PEARL to perform its regulatory functions.[116] Accordingly, although FINRA will not act on its own behalf in carrying out these regulatory services for MIAX PEARL, as the SRO retained to perform certain regulatory functions, FINRA may have secondary liability if, for example, the Commission finds that the contracted functions are being performed so inadequately as to cause a violation of the federal securities laws by MIAX PEARL.

C. Trading System

1. Access to MIAX PEARL

Access to MIAX PEARL will be granted to individuals or organizations who are approved to become Members.[117] Approved Members will be issued Trading Permits that grant the Member the ability to transact on MIAX PEARL through its electronic systems.[118] Trading Permits will not convey upon Members any ownership interest in MIAX PEARL, and they will not be transferable except in cases where a Member experiences a change in control or corporate reorganization.[119] Membership will be open to any broker-dealer that: (1) Is registered under Section 15 of the Act; [120] and (2) has and maintains membership in another registered options exchange (other than the MIAX Exchange) or FINRA.[121] As explained below, a holder of a MIAX Exchange trading permit will not be required to submit a full application for membership on MIAX PEARL.[122] There will be no limit to the number of Trading Permits that MIAX PEARL can issue, although MIAX PEARL could determine in the future a limit or decrease in the number of Trading Permits issued.[123] Members of MIAX PEARL may be Market Makers,[124] or they may be EEMs.[125]

A holder of a MIAX Exchange trading permit in good standing will be eligible to receive one MIAX PEARL Trading Permit.[126] MIAX Exchange member applicants will not be required to submit a full application for membership on MIAX PEARL, but rather will only need to complete selected MIAX PEARL forms concerning their election to trade on MIAX PEARL, consent to MIAX PEARL's jurisdiction, and other operational matters.[127] This waive-in application process is similar to arrangements in place at other exchanges.[128]

Non-MIAX Exchange members seeking to become members of MIAX PEARL would submit a full application in accordance with procedures established by the Exchange.[129] Entities that become members, and their associated persons, will be required to meet and maintain certain qualification and registration criteria similar to what is required by other options exchanges.[130] In addition, MIAX PEARL proposes further requirements on members that seek to do business with

---

[111] *See id.*

[112] *See, e.g.,* Regulation ATS Release, *supra* note 29. *See also* Securities Exchange Act Release Nos. 50122 (July 29, 2004), 69 FR 47962 (August 6, 2004) (SR–Amex–2004–32) (order approving rule that allowed Amex to contract with another SRO for regulatory services) (''Amex Regulatory Services Approval Order''); 57478 (March 12, 2008), 73 FR 14521 (March 18, 2008) (SR–NASDAQ–2007–004) (''NOM Approval Order''); Nasdaq Order, *supra* note 27; and BATS Order, *supra* note 13.

[113] For example, MIAX Exchange, ISE Mercury, EDGA Exchange, Inc., EDGX Exchange Inc., and BATS have entered into 17d–2 Plans and RSAs with FINRA.

[114] *See, e.g.,* Amex Regulatory Services Approval Order, *supra* note 112; NOM Approval Order, *supra* note 112; and Nasdaq Order, *supra* note 27. The Commission notes that the RSA is not before the Commission and, therefore, the Commission is not acting on them.

[115] *See supra* note 104.

[116] For example, if failings by the SRO retained to perform regulatory functions have the effect of leaving an exchange in violation of any aspect of the exchange's self-regulatory obligations, the exchange will bear direct liability for the violation, while the SRO retained to perform regulatory functions may bear liability for causing or aiding and abetting the violation. *See, e.g.,* Nasdaq Order, *supra* note 27; BATS Order, *supra* note 13; and Release No. 42455 (February 24, 2000), 65 FR 11388 (March 2, 2000) (File No. 10–127) (approval of registration of International Securities Exchange Act, LLC (''ISE'') as a national securities exchange).

[117] A ''Member'' is defined as an individual or organization that is registered with the Exchange pursuant to Chapter II of the MIAX PEARL Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' (''EEM'') or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* MIAX PEARL Rule 100.

[118] *See* MIAX PEARL Rule 200(a). MIAX PEARL represents that it has designed its systems to allow its Members to individually determine the best method for accessing the Exchange, whether by using customized front-end software using protocols determined by the Exchange or through third-party vendors who route orders to MIAX PEARL through a front-end or service bureau configuration. *See* MIAX PEARL Form 1 Application, Exhibit E.

[119] *See* MIAX PEARL Rule 200(e).

[120] *See* MIAX PEARL Rule 200(b).

[121] *See* MIAX PEARL Rule 200(d). If such other options exchange has not been designated by the Commission to examine Members for compliance with financial responsibility rules, then the broker-dealer must have and maintain a membership in FINRA. *Id.*

[122] *See* MIAX PEARL Rule 200(c) and *infra* notes 127–128 and accompanying text.

[123] *See* MIAX PEARL Rule 200(a). MIAX PEARL would announce in advance any limitation or decrease it plans to impose pursuant to Rule 200(a). *See id.* In the event that MIAX PEARL imposes a limitation or decrease, MIAX PEARL, in doing so, may not eliminate the ability of an existing member to trade on the Exchange unless MIAX PEARL is permitted to do so pursuant to a rule filing submitted to the Commission under Section 19(b) of the Act. *See id.* In addition, MIAX PEARL's exercise of authority under proposed Rule 200 would be subject to the provisions of Section 6(c)(4) of the Act. *See id. See also* Chicago Board Options Exchange, Incorporated (''CBOE'') Rule 3.1(a)(vi) and MIAX Exchange Rule 200(a) (concerning limiting or reducing the number of trading permits). Further, MIAX PEARL's exercise of authority under proposed Rule 200 would be subject to the provisions of Section 6(b)(2) of the Act, which requires the rules of an exchange to provide that any registered broker or dealer or any natural person associated with a registered broker or dealer may become a member of such exchange and any person may become associated with a member thereof. *See* 15 U.S.C. 78f(b)(2).

[124] *See* MIAX PEARL Rule 600. Market Maker registration is discussed in greater detail below, *infra* Section III.C.3.

[125] *See supra* note 117.

[126] *See* MIAX PEARL Rule 200(c)(1).

[127] *See id.*

[128] *See, e.g.,* C2 Options Exchange, Inc. Rule 3.1(c)(1) (containing similar expedited waive-in membership process for members of CBOE) and ISE Mercury, LLC Rule 302(a) (containing similar expedited waive-in membership process for members of the ISE and ISE Gemini, LLC).

[129] *See* MIAX PEARL Rule 200(c)(2).

[130] *See* MIAX PEARL Rules Chapter II. Such criteria include, but are not limited to, capital maintenance requirements. *See, e.g.,* MIAX Exchange Rule 200 Series and C2 Options Exchange, Inc. Rules 3.1 and 3.2 (containing similar criteria).

the public.[131] Applicants who are denied membership may appeal MIAX PEARL's decision pursuant to MIAX PEARL's rules governing Hearings, Review, and Arbitration.[132] Every Member will be subject to MIAX PEARL's regulatory jurisdiction, including MIAX PEARL's disciplinary jurisdiction.[133]

The Commission finds that MIAX PEARL's proposed membership rules are consistent with the Act, including Section 6(b)(2) of the Act, which requires the rules of an exchange to provide that any registered broker or dealer or natural person associated with a broker or dealer may become a member of such exchange or associated with a member thereof.[134] MIAX PEARL's proposed rules with respect to exchange membership are substantively similar to the rules of other exchanges.

The Commission notes that pursuant to Section 6(c) of the Act,[135] an exchange must deny membership to any person, other than a natural person, that is not a registered broker or dealer, any natural person that is not, or is not associated with, a registered broker or dealer, and registered broker-dealers that do not satisfy certain standards, such as financial responsibility or operational capacity. As a registered exchange, MIAX PEARL must independently determine if an applicant satisfies the standards set forth in the Act, regardless of whether an applicant is a member of another SRO.[136]

In addition, Members may enter into arrangements with other parties, including non-Members and other Members, to provide ''Sponsored Access'' to trading on MIAX PEARL.[137] Members who provide such Sponsored Access will be responsible for all trading conducted pursuant to the access agreement, and to the same extent as if the Member were trading directly.[138] Accordingly, Members that provide Sponsored Access must maintain and implement policies and procedures to supervise and monitor sponsored trading activity.[139] Additionally, non-Members who seek to trade on MIAX PEARL through Sponsored Access agreements will need to agree to comply with all applicable federal securities laws and rules and Exchange rules.[140] MIAX PEARL's rules governing Sponsored Access arrangements are similar to the rules of other exchanges.[141]

2. Linkage

MIAX PEARL intends to become a participant in the Plan Relating to Options Order Protection and Locked/Crossed Markets or any successor plan (''Linkage Plan'').[142] If admitted as a participant to the Linkage Plan, other plan participants would be able to send orders to MIAX PEARL in accordance with the terms of the plan as applied to the Exchange. The MIAX PEARL Rules include relevant definitions, establish the conditions pursuant to which members may enter orders in accordance with the Linkage Plan, impose obligations on the Exchange regarding how it must process incoming orders, establish a general standard that members and MIAX PEARL should avoid trade-throughs, establish potential regulatory liability for members that engage in a pattern or practice of trading through other exchanges, and establish obligations with respect to locked and crossed markets.

The Commission believes that MIAX PEARL has proposed rules that are designed to comply with the requirements of the Linkage Plan.[143] Further, as provided below, before MIAX PEARL can commence operations as a national securities exchange, it must become a participant in the Linkage Plan.

3. Market Makers

a. Registration of Market Makers

MIAX PEARL Members may register as Market Makers for the purpose of making markets in options contracts traded on the Exchange.[144] Market Makers are entitled to receive certain benefits and privileges in exchange for fulfilling certain affirmative and negative market-making obligations. To begin the process of registering as a Market Maker, a Member will be required to file a written application with MIAX PEARL.[145] MIAX PEARL will consider an applicant's market making ability and other factors it deems appropriate in determining whether to approve an applicant's registration.[146] All Market Makers will be designated as specialists on MIAX PEARL for all purposes under the Act and rules thereunder.[147] The Exchange will not place any limit on the number of entities that may become Market Makers.[148] The good standing of a Market Maker may be suspended, terminated or otherwise withdrawn if the conditions for approval cease to be maintained or the Market Maker violates any of its agreements with MIAX PEARL or any provisions of the MIAX PEARL Rules.[149] A Member that has qualified as a Market Maker may register to make markets in individual series of options.[150]

The Commission finds that the MIAX PEARL qualification requirements are consistent with the Act. MIAX PEARL's rules provide an objective process by which a Member could become a Market Maker on MIAX PEARL. The Commission notes that MIAX PEARL's proposed Market Maker qualification requirements are similar to those of other options exchanges.[151]

b. Market Maker Obligations

Pursuant to MIAX PEARL rules, there will be one class of Market Makers. All Market Makers will be subject to a number of general obligations. In particular, the transactions of a Market Maker must constitute a course of dealings reasonably calculated to contribute to the maintenance of a fair and orderly market.[152] Among other things, a Market Maker must: (1)

[143] *See* Chapter XIV of the MIAX PEARL Rules (incorporating by reference Chapter XIV of the MIAX Exchange Rules).

[144] *See* MIAX PEARL Rule 600.

[145] *See* MIAX PEARL Rule 600(a).

[146] *See id.* The provision permitting MIAX PEARL to consider ''such other factors as [it] deems appropriate'' must be applied in a manner that is consistent with the Act, including provisions that prohibit an exchange from acting in an unfairly discriminatory manner. *See* 15 U.S.C. 78f(b)(5); *see also* C2 Order, *supra* note 75.

[147] *See* MIAX PEARL Rule 600.

[148] *See* MIAX PEARL Rule 600(c).

[149] *See* MIAX PEARL Rule 603(b).

[150] *See* MIAX PEARL Rule 602(a).

[151] *See, e.g.,* Bats BZX Exchange, Inc. (''Bats BZX'') Rules 22.2, 22.3 and 22.4, and NASDAQ Options Market Rules, Chapter VII, Sections 2, 3, and 4.

[152] *See* MIAX PEARL Rule 604(a).

Maintain a two-sided market during trading hours, in a manner that enhances the depth, liquidity, and competitiveness of the market; (2) engage in dealings for its own account when there is a lack of price continuity, a temporary disparity between the supply of (or demand for) a particular option contract, or a temporary distortion of the price relationships between option contracts of the same series; (3) compete with other market makers; (4) make markets that will be honored for the number of contracts entered; (5) update quotations in response to changed market conditions; and (6) maintain active markets.[153] Market Makers must provide continuous two-sided quotes throughout the trading day 90% of the time in 75% of the series in which the Market Maker is registered.[154] Further, a Market Maker may be called upon by MIAX PEARL to submit a single bid or offer or maintain continuous bid and offers in one or more series to which it is registered whenever, in the judgment of the Exchange, it is necessary to do so in the interest of fair and orderly markets.[155] In addition, Market Makers must maintain minimum net capital in accordance with the federal securities laws.[156] In options classes other than to which it is registered, the total number of contracts executed during a quarter by a Market Maker in series in which it is not registered may not exceed 25% of the total number of all contracts executed by such Market Maker.[157] If MIAX PEARL finds any failure by a Market Maker to properly perform as a Market Maker, such Market Maker may be subject to suspension or termination of registration.[158]

Market Makers will receive certain benefits in return for satisfying their responsibilities.[159] For example, a broker-dealer or other lender may extend ''good faith'' credit to a member of a national securities exchange or registered broker-dealer to finance its activities as a market maker or specialist.[160] In addition, market makers are excepted from the prohibition in Section 11(a) of the Act.[161] The Commission believes that a market maker must be subject to sufficient and commensurate affirmative obligations, including the obligation to hold itself out as willing to buy and sell options for its own account on a regular or continuous basis, to justify favorable treatment.[162] The Commission further believes that the rules of all U.S. options markets need not provide the same standards for market maker participation, so long as they impose affirmative obligations that are consistent with the Act.[163] Market Makers on MIAX PEARL will not receive special trading allocations or similar rights vis-à-vis other Members.[164] The Commission believes that MIAX PEARL's Market Maker participation requirements impose sufficient affirmative obligations on MIAX PEARL's Market Makers and, accordingly, that MIAX PEARL's requirements are consistent with the Act. The Commission believes that while Market Makers may become an important source of liquidity on MIAX PEARL, they will likely not be the only source as MIAX PEARL is designed to match buying and selling interest of all MIAX PEARL participants. Therefore, the Commission believes that MIAX PEARL's proposed structure is consistent with the Exchange Act.

4. Order Display, Execution, and Priority

MIAX PEARL will operate a fully automated electronic options marketplace. Liquidity will be derived from orders to buy and orders to sell, including orders from Market Makers,[165] submitted to MIAX PEARL electronically by its members from remote locations. There will be no physical trading floor. Options traded on the Exchange will be subject to Minimum Price Variations (''MPV'') that will begin at $0.05 for option contracts trading at less than $3.00 per option, and $.10 for option contracts trading at $3.00 per option or higher.[166] In addition, MIAX PEARL will participate in the penny pilot program pursuant to which it will permit certain options with premiums under $3 (as well as heavily traded options on certain indices) to be quoted and traded in increments as low as $.01.[167]

Orders submitted to MIAX PEARL will be displayed unless the order is an immediately marketable order or is a contingent order, such as an immediate or cancel order. Additionally, orders may have a non-displayed price that is different than the displayed price, as further described below. Displayed orders and quotes will be displayed on an anonymous basis at a specified price. Non-displayed prices associated with orders will not be displayed to any participant.

Members may submit the following types of orders: Market; Marketable Limit; Cancel-Replacement; Immediate-or-Cancel; Intermarket Sweep; Do Not Route; Day Limit; Good 'Til Cancelled; and Post-Only.[168] All of these order types are based on similar order types available on other options exchanges.[169] The Commission believes that these order types are substantially similar to order types approved by the Commission on other exchanges and thus raise no new regulatory issues.

After the opening, trades will execute on MIAX PEARL when a buy order and a sell order match one another on the MIAX PEARL order book (''MIAX PEARL Book'' or ''Book''). The MIAX PEARL system will continuously and automatically match orders pursuant to price-time priority.[170] The highest bid

[153] *See* MIAX PEARL Rule 604(a).

[154] *See* MIAX PEARL Rule 605(d)(1) and (d)(3). Immediate-or-Cancel Orders from Market Makers will not be counted for the continuous quoting obligations of Market Makers. *See* MIAX PEARL Rule 605, Interpretations and Policies .01.

[155] *See* MIAX PEARL Rule 605(d)(2).

[156] *See* MIAX PEARL Rule 608.

[157] *See* MIAX PEARL Rule 605(e). *See also* Bats BZX Rule 22.6(e) and NASDAQ Options Market Rules, Chapter VII, Section 6(e).

[158] *See* MIAX PEARL Rule 600(b).

[159] *See, e.g.,* NOM Approval Order, *supra* note 112, at 14526 and Securities Exchange Act Release No. 61419 (January 26, 2010), 75 FR 5157, 5159 (February 1, 2010) (''BATS Options Approval Order'') (discussing the benefits and obligations of market makers).

[164] *See* MIAX PEARL Rule 514; *see also* MIAX PEARL Form 1 Application, Exhibit E at 2.

[165] The definition of ''quote'' or ''quotation'' means a bid or offer entered by a Market Maker as a firm order that updates the Market Maker's previous bid or offer, if any. An order entered by the Market Maker in the options series to which such Market maker is registered shall, as applicable, constitute a quote or quotation on MIAX PEARL. *See* MIAX PEARL Rule 100.

[166] *See* MIAX PEARL Rule 510(a).

[167] *See* MIAX PEARL Rule 510, Interpretations and Policies .01. MIAX PEARL has established a scheduled expiration date of December 31, 2016. However, MIAX PEARL may not be operational before December 31, 2016, thus the Exchange may need to file a proposed rule change under Section 19(b) of the Exchange Act to update this proposed rule.

[168] *See* MIAX PEARL Rule 516 for a description of each of the order types. MIAX PEARL notes that some of these order types will be valid only during certain portions of the trading day (*e.g.,* after the opening). MIAX PEARL further notes that not all order types will be available for use on each of the MEO interface and the FIX interface, and that the Exchange will issue a Regulatory Circular listing which order types, among the order types listed above, are available for delivery via the MEO interface and which are available for delivery via the FIX interface.

[169] *See, e.g.,* Bats BZX Rule 21.1(d)(8) (Post Only Order); NASDAQ Options Market Rules, Chapter VI, Section 1(e)(8) (Intermarket Sweep Order) and (1)(e)(1) (Cancel-replacement Order); NASDAQ PHLX LLC Rule 1080(m)(iv)(A) (Do Not Route Order and Immediate or Cancel Order); NYSE MKT LLC Rule 900.3NY(m) (Day Order) and (n) (Good-Til-Cancelled Order).

[170] *See* MIAX PEARL Rule 514(b).

and lowest offer shall have priority on the Exchange. Within each price level, if there are two or more orders at the best price, trading interest will be executed in time priority.[171] MIAX PEARL proposes to make available order processing and matching features, which are based on those features available on MIAX Exchange.[172] MIAX PEARL's system will automatically execute incoming orders that are executable against orders in its system, provided that such incoming orders will not be executed at prices inferior to the NBBO.[173] MIAX PEARL Rule 515 sets forth how the MIAX PEARL system will handle incoming orders that cannot be executed in part or in full. In particular, MIAX PEARL Rule 515 specifies a ''price protection process,'' a Managed Interest Process, and a Post Only Process, each discussed more fully below.

The MIAX PEARL system offers a ''price protection'' process for all orders.[174] Price protection prevents an order from being executed beyond the price designated in the order's price protection instructions (''the price protection limit''). The price protection limit is expressed in units of MPV away from the national best bid and offer (''NBBO'') at the time of the order's receipt, or the MIAX PEARL Best Bid and Offer (''PBBO'') if the best bid or offer on away markets (''ABBO'') is crossing the PBBO.[175] When triggered, price protection will cancel an order or the remaining contracts of an order. The MIAX PEARL system will not execute such orders at prices inferior to the current NBBO.[176]

The MIAX PEARL price protection process is substantially similar to that adopted by MIAX Exchange.[177] The Commission believes that this price protection functionality can benefit all market participants.

The Exchange's rules also provide for a ''Managed Interest Process'' that would apply to non-routable orders [178] that would either lock or cross the current opposite side NBBO where the PBBO is inferior to the NBBO.[179] The MIAX PEARL system will not execute such orders at prices inferior to the current NBBO.[180] The managed order would be displayed at one MPV away from the current opposite side NBBO and placed on the MIAX PEARL Book at a price equal to the opposite side NBBO.[181] Should the NBBO price change to an inferior price level, the order's displayed price will continue to re-price so that it is displayed one MPV away from the new NBBO, and the order's Book price will continuously reprice to lock the new NBBO.[182] Such re-pricing will continue until the managed order is fully executed, reaches its limit price, reaches its price protection limit, or is cancelled.[183]

During the Managed Interest Process, if the Exchange receives a new order or quote on the opposite side of the market from the managed order that could be executed, the MIAX PEARL system will immediately execute the remaining contracts to the extent possible at the initiating order's current booked bid or offer price, provided that it does not trade through the current NBBO.[184]

The Commission believes that the MIAX PEARL's Managed Interest Process is consistent with the managed interest process that the Commission approved for MIAX Exchange.[185] With regard to the treatment of Post-Only Orders under MIAX PEARL's Managed Interest Process, the Commission believes that the rules are consistent with rules that have been adopted by other exchanges governing the execution of Post-Only Orders.[186]

MIAX PEARL will have a process for the handling of certain Post-Only Orders (''POP Process'').[187] The POP Process will apply to Post-Only Orders where the limit price of the Post-Only Order locks or crosses the current opposite side PBBO where the PBBO is the NBBO (*i.e.,* locks or crosses an order on the MIAX PEARL Book).[188] The MIAX PEARL system will display and book such Post-Only Orders one MPV away from the current opposite side PBBO.[189] Should the PBBO price change to an inferior price level, the Post-Only Order's Book price and displayed price would continuously re-price to one MPV away from new PBBO until Post-Only Order is fully executed, reaches its limit price, reaches its price protection limit, or is cancelled.[190]

Under the POP Process, if the Exchange receives a new order or quote on the opposite side of the market from the Post-Only Order that could be executed, the MIAX PEARL system will immediately execute the remaining contracts to the extent possible at the Post-Only Order's current booked bid or offer price, provided that it does not trade through the current NBBO.[191] If the Exchange receives a new Post-Only Order on the opposite side of the market from a Post-Only Order being managed under the POP Process, and the new Post-Only Order locks or crosses the book price of the resting Post-Only Order, the Exchange will book and display the new Post-Only Order one MPV away from the current opposite side PBBO.[192]

The POP Process under MIAX PEARL's rules is substantially similar to the Managed Interest Process described above for MIAX PEARL and that the Commission approved for the MIAX Exchange.[193] The primary difference is that, under the POP Process, Post-Only Orders are booked and displayed at the same price—one MPV away from the current opposite side PBBO. This aspect of the POP Process is consistent with the treatment of Post-Only Orders on other exchanges.[194]

---

[171] *See id.*

[172] *See infra* discussion of MIAX PEARL's proposed price protection process and managed interest process, which are based on substantially similar order processing and matching features on MIAX Exchange.

[173] *See* MIAX PEARL Rule 515(a) and (b).

[174] *See* MIAX PEARL Rule 515(c).

[175] *See* MIAX PEARL Rule 515(c). The Exchange will publish a Regulatory Circular setting a minimum and maximum number of MPVs away from the NBBO (or PBBO if the ABBO is crossing the PBBO) that a market participant may designate for its price protection limit. The Exchange will also set, and announce by Regulatory Circular, a default price protection limit within 1 to 5 MPVs away from the NBBO (or PBBO if the ABBO is crossing the PBBO).

[176] *See* MIAX PEARL Rule 515(c).

[177] *See* MIAX Exchange Rule 515(c)(1). The MIAX Exchange price protection process applies only to non-market maker orders, whereas the MIAX PEARL price protection process applies to all market participants, including market makers. The Commission believes that this is consistent with the price protection rules of other exchanges. *See, e.g.,* NYSE Arca, Inc. Rules 6.60 (Price Protection—Orders) and 6.61 (Price Protection—Quotes).

[178] Non-routable orders would include, for example, orders marked ''Do Not Route'' or Post-Only orders being handled under the Managed Interest Process.

[179] *See* MIAX PEARL Rule 515(d)(2).

[180] *See* MIAX PEARL Rule 515(d)(2).

[194] *See, e.g.,* Bats BZX Rule 21.1(i) (Price Adjust) (providing that an order that, at the time of entry, would lock or cross a protected quotation of another options exchange or Bats BZX will be ranked and displayed by the Bats BZX system at one MPV below the current NBO (for bids) or to one MPV above the current NBB (for offers)); NASDAQ Options Market Rules, Chapter VI, Section 1(e)(11) (providing that if a Post-Only Order would lock or cross an order on the NASDAQ Options Market

The Commission believes that MIAX PEARL's proposed display, execution, and priority rules discussed above in this section are consistent with the Act. In particular, the Commission finds that the proposed rules are consistent with Section 6(b)(5) of the Act,[195] which, among other things, requires that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and to not permit unfair discrimination between customers, issuers, or dealers. The Commission also finds that the proposed rules are consistent with Section 6(b)(8) of the Act,[196] which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The trading rules of MIAX PEARL are substantially similar to the current trading rules of MIAX Exchange and other exchanges, as noted above, which were filed with and approved by the Commission (or otherwise became effective) pursuant to Section 19(b) of the Act.[197] Therefore, the Commission believes that these rules raise no new regulatory issues and are consistent with the Act.

5. Section 11(a) of the Act

Section 11(a)(1) of the Act [198] prohibits a member of a national securities exchange from effecting transactions on that exchange for its own account, the account of an associated person, or an account over which it or its associated person exercises investment discretion (collectively, ''covered accounts''), unless an exception applies. The Exchange has represented that it has analyzed its rules proposed hereunder, and believes that they are consistent with Section 11(a) of the Act and rules thereunder.[199] For the reasons set forth below, based on MIAX PEARL's representations, the Commission believes that MIAX PEARL's order execution algorithm will allow members to meet the requirements of Rule 11a2–2(T) for executions on MIAX PEARL.

Rule 11a2–2(T) under the Act,[200] known as the ''effect versus execute'' rule, provides exchange members with an exemption from the Section 11(a)(1) prohibition. Rule 11a2–2(T) permits an exchange member, subject to certain conditions, to effect transactions for covered accounts by arranging for an unaffiliated member to execute the transactions on the exchange. To comply with Rule 11a2–2(T)'s conditions, a member: (i) May not be associated with the executing member; (ii) must transmit the order from off the exchange floor; (iii) may not participate in the execution of the transaction once it has been transmitted to the member performing the execution; [201] and (iv) with respect to an account over which the member or an associated person has investment discretion, neither the member nor its associated person may retain any compensation in connection with effecting the transaction except as provided in the Rule.

In a letter to the Commission,[202] MIAX PEARL requested that the Commission concur with its conclusion that MIAX PEARL members that enter orders into the MIAX PEARL trading system satisfy the requirements of Rule 11a2–2(T). For the reasons set forth below, the Commission believes that MIAX PEARL members entering orders into the MIAX PEARL trading system will satisfy the conditions of Rule 11a2–2(T).

First, Rule 11a2–2(T) requires that orders for covered accounts be transmitted from off the exchange floor. MIAX PEARL will not have a physical trading floor, and like other automated systems, the MIAX PEARL trading system will receive orders from members electronically through remote terminals or computer-to-computer interfaces. In the context of other automated trading systems, the Commission has found that the off-floor transmission requirement is met if a covered account order is transmitted from a remote location directly to an exchange's floor by electronic means.[203] Since the MIAX PEARL trading system receives all orders electronically through remote terminals or computer-to-computer interfaces, the Commission believes that the MIAX PEARL trading system satisfies the off-floor transmission requirement.

Second, Rule 11a2–2(T) requires that the member not participate in the execution of its order once it has been transmitted to the member performing the execution. MIAX PEARL has represented that the MIAX PEARL trading system will at no time following the submission of an order allow a member or an associated person of such member to acquire control or influence over the result or timing of an order's execution.[204] According to MIAX PEARL, the execution of a member's order is determined solely by what orders, bids, or offers are present in the MIAX PEARL trading system at the time the member submits the order and the order priority based on MIAX PEARL rules.[205] Accordingly, the Commission believes that a MIAX PEARL member will not participate in the execution of its order submitted into the trading system.

Rule 11a2–2(T)'s third condition is that the order be executed by an

system, the order will be re-priced to $.01 below the current low offer (for bids) or above the current best bid (for offers) and displayed at one MPV below the current low offer (for bids) or above the current best bid (for offers)).

Roeser, Associate Director, Office of Market Supervision, Division of Trading and Markets, Commission, dated November 4, 2016 (''MIAX PEARL 11(a) Request Letter'').

[200] 17 CFR 240.11a2–2(T).

[201] This prohibition also applies to associated persons. *See* 15 U.S.C. 78f(b)(8). The member may, however, participate in clearing and settling the transaction. *See* Securities Exchange Act Release No. 14563 (March 14, 1978), 43 FR 11542 (March 17, 1978) (regarding the NYSE's Designated Order Turnaround System) (''1978 Release'').

[202] *See* MIAX PEARL 11(a) Request Letter, *supra* note 199.

[203] *See, e.g.,* Securities Exchange Act Release Nos. 59154 (December 23, 2008), 73 FR 80468 (December 31, 2008) (SR–BSE–2008–48) (order approving proposed rules of BX); 49068, (January 13, 2004), 69 FR 2775 (January 20, 2004) (establishing, among other things, BOX as an options trading facility of BSE); 44983 (October 25, 2001), 66 FR 55225 (November 1, 2001) (approving the PCX's use of the Archipelago Exchange as its equity trading facility); 29237 (May 24, 1991), 56 FR 24853 (May 31, 1991) (regarding NYSE's Off-Hours Trading Facility). *See* 1978 Release, *supra* note 201. *See also* Securities Exchange Act Release No. 15533 (January 29, 1979), 44 FR 6084 (January 31, 1979) (regarding the American Stock Exchange (''Amex'') Post Execution Reporting System, the Amex Switching System, the Intermarket Trading System, the Multiple Dealer Trading Facility of the Cincinnati Stock Exchange, the PCX Communications and Execution System, and the Philadelphia Stock Exchange Automated Communications and Execution System) (''1979 Release'').

[204] *See* MIAX PEARL 11(a) Request Letter, *supra* note 199. Members may change or cancel an order or quote at any time before the order is executed on the Exchange. *See* MIAX PEARL Form 1 Application, Exhibit E. The Commission has stated that the non-participation requirement is satisfied under such circumstances, so long as such modifications or cancellations are also transmitted from off the floor. *See* 1978 Release, *supra* note 201 (stating that the ''non-participation requirement does not prevent initiating members from canceling of modifying orders (or the instructions pursuant to which the initiating member wishes orders to be executed) after the orders have been transmitted to the executing member, provided that any such instructions are also transmitted from off the floor'').

[205] *See* MIAX PEARL 11(a) Request Letter, *supra* note 199.

exchange member who is unaffiliated with the member initiating the order. The Commission has stated that the requirement is satisfied when automated exchange facilities, such as the MIAX PEARL trading system, are used, as long as the design of these systems ensures that members do not possess any special or unique trading advantages over non-members in handling their orders after transmitting them to the Exchange.[206] MIAX PEARL has represented that the design of its trading system ensures that no member has any special or unique trading advantage over non-members in the handling of its orders after transmitting its orders to MIAX PEARL.[207] Based on MIAX PEARL's representation, the Commission believes that the MIAX PEARL trading system satisfies this requirement.

Fourth, in the case of a transaction effected for an account with respect to which the initiating member or an associated person thereof exercises investment discretion, neither the initiating member nor any associated person thereof may retain any compensation in connection with effecting the transaction, unless the person authorized to transact business for the account has expressly provided otherwise by written contract referring to Section 11(a) of the Act and Rule 11a2–2(T).[208] MIAX PEARL members trading for covered accounts over which they exercise investment discretion must comply with this condition in order to rely on the rule's exemption.[209]

D. Discipline and Oversight of Members

As noted above, one prerequisite for the Commission's grant of an exchange's application for registration is that a proposed exchange must be so organized and have the capacity to be able to carry out the purposes of the Act.[210] Specifically, an exchange must be able to enforce compliance by its members and persons associated with its members with the Act and the rules and regulations thereunder and the rules of the exchange.[211]

MIAX PEARL's rules codify MIAX PEARL's disciplinary jurisdiction over its members, thereby facilitating its ability to enforce its members' compliance with its rules and the federal securities laws.[212] MIAX PEARL's rules permit it to sanction members for violations of its rules and violations of any provision of the Exchange Act or the rules and regulations promulgated thereunder, by, among other things, expelling or suspending members; limiting members' activities, functions, or operations; fining or censuring members; suspending or barring a person from being associated with a member; or any other fitting sanction in accordance with MIAX rules.[213]

MIAX PEARL's disciplinary and oversight functions will be administered in accordance with Chapter X of the MIAX PEARL rules, which governs disciplinary actions. Unless delegated to another SRO pursuant to the terms of any effective 17d–2 plan,[214] MIAX PEARL regulatory staff (including regulatory staff of another SRO that may be acting on MIAX PEARL's behalf pursuant to a regulatory services agreement) will, among other things, investigate potential securities laws violations and initiate charges pursuant to MIAX PEARL rules.[215]

Upon a finding of probable cause of a violation within the disciplinary jurisdiction of MIAX PEARL and where further proceedings are warranted,[216] MIAX PEARL will conduct a hearing on disciplinary matters before a professional hearing officer[217] and two members of the Business Conduct Committee[218] (the ''Panel'').[219] The MIAX PEARL member (or their associated person) or the MIAX PEARL regulatory staff may petition for review of the decision of the Panel by the MIAX PEARL Board.[220] Any review would be conducted by the MIAX PEARL Board or a committee thereof composed of at least three Directors of the MIAX PEARL Board[221] (whose decision must be ratified by the MIAX PEARL Board) and such decision will be final.[222] In addition, the MIAX PEARL Board on its own motion may order review of a disciplinary decision.[223]

Appeals from any determination that impacts access to MIAX PEARL, such as termination or suspension of membership, will be instituted under, and governed by, the provisions in the Chapter XI of the MIAX PEARL Rules which incorporates by reference Chapter XI of the MIAX Exchange Rules. MIAX PEARL's Chapter XI applies to persons economically aggrieved by any of the following actions of MIAX PEARL including, but not limited to: (a) Denial of an application to become a Member; (b) barring a person from becoming associated with a Member; (c) limiting or prohibiting services provided by MIAX PEARL or services of any exchange member.[224]

---

[206] In considering the operation of automated execution systems operated by an exchange, the Commission noted that while there is no independent executing exchange member, the execution of an order is automatic once it has been transmitted into each system. Because the design of these systems ensures that members do not possess any special or unique trading advantages in handling their orders after transmitting them to the exchange, the Commission has stated that executions obtained through these systems satisfy the independent execution requirement of Rule 11a2–2(T). *See* 1979 Release, *supra* note 203.

[207] *See* MIAX PEARL 11(a) Request Letter, *supra* note 199.

[208] 17 CFR 240.11a2–2(T)(a)(2)(iv). In addition, Rule 11a2–2(T)(d) requires a member or associated person authorized by written contract to retain compensation, in connection with effecting transactions for covered accounts over which such member or associated person thereof exercises investment discretion, to furnish at least annually to the person authorized to transact business for the account a statement setting forth the total amount of compensation retained by the member in connection with effecting transactions for the account during the period covered by the statement. *See* 17 CFR 240.11a2–2(T)(d). *See also* 1978 Release, *supra* note 201 (stating ''[t]he contractual and disclosure requirements are designed to assure that accounts electing to permit transaction-related compensation do so only after deciding that such arrangements are suitable to their interests'').

[209] *See* MIAX PEARL 11(a) Request Letter, *supra* note 199.

[210] *See* 15 U.S.C. 78f(b)(1).

[211] *See id.*

[212] *See* MIAX PEARL Rule 1000.

[213] *See id. See also* MIAX Rule 1000, CBOE Rule 17.1(a), and ISE Rule 1600(a) (containing similar provisions).

[214] *See supra* Section III.B.3.c (concerning the 17d–2 plans to which MIAX PEARL has committed to join).

[215] *See* MIAX PEARL Rules 1002 and 1004. As noted above, MIAX PEARL has entered into an RSA with FINRA under which FINRA will perform certain regulatory functions on behalf of MIAX PEARL. *See* MIAX PEARL Rule 1015.

[216] *See* MIAX PEARL Rule 1004.

[217] *See* MIAX PEARL Rule 1015, Interpretation and Policy .01.

[218] *See* MIAX PEARL By-Laws, Article IV, Section 4.7.

[219] *See* MIAX PEARL Rule 1006.

[220] *See* MIAX PEARL Rule 1010.

[221] Specifically, the Chairman of the MIAX PEARL Board, with the approval of the Board, shall appoint an Appeals Committee to preside over all appeals related to disciplinary and adverse action determinations. *See* note 46 and accompanying text (detailing the composition of the Appeals Committee). If the Independent Director serving on the Appeals Committee recuses himself or herself from an appeal, due to conflict of interest or otherwise, the Independent Director may be replaced by a Non-Industry Director for purposes of the applicable appeal if there is no other Independent Director able to serve as the replacement. *See* MIAX PEARL By-Laws, Article IV, Section 4.5(d). *See also* MIAX Exchange Amended and Restated By-Laws, Article IV, Section 4.5(d).

[222] *See* MIAX PEARL Rule 1010.

[223] *See id.*

[224] *See* MIAX PEARL Rule 1100 (which incorporates by reference MIAX Exchange Rule 1100). As noted above, MIAX PEARL has entered into a RSA with FINRA under which FINRA will perform certain regulatory functions on behalf of MIAX PEARL. MIAX PEARL may perform some or all of the functions specified in the Chapter XI of the MIAX PEARL Rules, which incorporates by reference Chapter XI of the MIAX Exchange Rules. *See* supra note 110. *See also* MIAX PEARL Rule 1106 (which incorporates by reference MIAX Exchange Rule 1106).

Any person aggrieved by an action of MIAX PEARL within the scope of Chapter XI may file a written application to be heard within thirty days [225] after such action has been taken.[226] Applications for hearing and review will be referred to the Business Conduct Committee, which will appoint a hearing panel of no less than three members of such Committee.[227] The decision of the hearing panel made pursuant to Chapter XI of the MIAX PEARL rules is subject to review by the MIAX PEARL Board, either on its own motion within 30 days after issuance of the decision, or upon written request submitted by the applicant or the President of MIAX PEARL within 15 days after issuance of the decision.[228] The review would be conducted by the MIAX PEARL Board or a committee of the MIAX PEARL Board composed of at least three directors.[229]

The Commission finds that MIAX PEARL's proposed disciplinary and oversight rules and structure, as well as its proposed process for persons economically aggrieved by certain MIAX PEARL actions, are consistent with the requirements of Sections 6(b)(6) and 6(b)(7) of the Act [230] in that they provide fair procedures for the disciplining of members and persons associated with members. The Commission further finds that the proposed MIAX PEARL rules are designed to provide MIAX PEARL with the ability to comply, and with the authority to enforce compliance by its members and persons associated with its members, with the provisions of the Act, the rules and regulations thereunder, and the rules of MIAX PEARL.[231] The Commission notes that MIAX PEARL's proposed disciplinary and oversight rules and structures are similar to the rules of other exchanges.[232]

E. Listing Requirements

MIAX PEARL does not intend to initially list or trade common stock or non-option securities of operating companies but rather intends to initially only trade option contracts that meet the options listing standards of the Exchange.[233]

The Commission finds that MIAX PEARL's proposed initial and continued listing rules are consistent with the Act, including Section 6(b)(5),[234] in that they are designed to protect investors and the public interest, prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade. Before beginning operation, MIAX PEARL will need to become a participant in the Plan for the Purpose of Developing and Implementing Procedures Designed to Facilitate the Listing and Trading of Standardized Options Submitted Pursuant to Section 11A(a)(3)(B) of the Securities Exchange Act of 1934 (''OLPP'').[235] In addition, before beginning operation, MIAX PEARL will need to become a participant in the Options Clearing Corporation.

IV. Exemption From Section 19(b) of the Act With Regard to MIAX Exchange, CBOE, New York Stock Exchange (''NYSE'') and FINRA Rules Incorporated by Reference

MIAX PEARL proposes to incorporate by reference certain MIAX Exchange, CBOE, NYSE and FINRA rules.[236] Thus, for certain MIAX PEARL rules, MIAX PEARL members will comply with a MIAX PEARL rule by complying with the referenced MIAX Exchange, CBOE, NYSE and FINRA rules.

In connection with the proposal to incorporate MIAX Exchange, CBOE, NYSE and FINRA rules by reference, MIAX PEARL requests, pursuant to Rule 240.0–12 under the Act,[237] an exemption under Section 36 of the Act from the rule filing requirements of Section 19(b) of the Act for changes to the MIAX PEARL rules that are effected solely by virtue of a change to a cross-referenced MIAX Exchange, CBOE, NYSE or FINRA rule.[238] MIAX PEARL proposes to incorporate by reference categories of rules, rather than individual rules within a category, that are not trading rules. In addition, MIAX PEARL agrees to provide written notice to its members whenever MIAX Exchange, CBOE, NYSE or FINRA proposes a change to a cross-referenced rule [239] and whenever any such proposed changes are approved by the Commission or otherwise become effective.[240]

Using the authority under Section 36 of the Act, the Commission previously exempted certain SROs from the requirement to file proposed rule changes under Section 19(b) of the Act.[241] The Commission is hereby

[225] An applicant may file for an extension of time as allowed by the Chairman of the Business Conduct Committee within thirty days of MIAX PEARL's action. An application for an extension will be ruled upon by the Chairman of the Business Conduct Committee, and his ruling will be given in writing. Rulings on applications for extensions of time are not subject to appeal. *See* MIAX PEARL Rule 1101 (which incorporates by reference MIAX Exchange Rule 1101).

[226] The application must include: (1) The action for which review is sought; (2) the specific reasons for the applicant's exception to such action; (3) the relief sought; and (4) whether the applicant intends to submit any documents, statements, arguments or other material in support of the application, with a description of any such materials. *See* MIAX PEARL Rule 1101(a) (which incorporates by reference MIAX Exchange Rule 1101(a)).

[227] *See* MIAX PEARL Rule 1102 (which incorporates by reference MIAX Exchange Rule 1102). The decision of the hearing panel will be made in writing and sent to the parties to the proceedings. *See* MIAX PEARL Rule 1103(d) (which incorporates by reference MIAX Exchange Rule 1103(d)).

[228] *See* MIAX PEARL Rule 1104(a) (which incorporates by reference MIAX Exchange Rule 1104(a)). The MIAX PEARL Board, or a committee of the MIAX PEARL Board, will have sole discretion to grant or deny either request. *See id.*

[229] *See* MIAX PEARL Rule 1104(b) (which incorporates by reference MIAX Exchange Rule 1104(b)). The MIAX PEARL Board or its designated committee may affirm, reverse, or modify in whole or in part, the decision of the hearing panel. The decision of the MIAX PEARL Board or its designated committee would be final, and must be in writing and would be sent to the parties to the proceeding. *See* MIAX PEARL Rule 1104(c) (which incorporates by reference MIAX Exchange Rule 1104(c)).

[230] 15 U.S.C. 78f(b)(6) and (b)(7), respectively.

[231] *See* Section 6(b)(1) of the Act, 15 U.S.C. 78f(b)(1).

[232] *See, e.g.,* ISE Mercury Order, *supra* note 27, ISE Gemini Order, *supra* note 27 and MIAX Order, *supra* note 13.

[233] *See* MIAX PEARL Form 1 Application, Exhibit H. MIAX PEARL's listing rules, including the criteria for the underlying securities of the options to be traded, are substantially similar to the listing rules of MIAX Exchange. *See* MIAX PEARL Rules Chapter IV (Option Contracts Traded on the Exchange); MIAX Exchange Rules Chapter IV. *See also* ISE Gemini LLC Rule 500 Series and BOX Options Exchange LLC Rule 5000 Series.

[234] 15 U.S.C. 78f(b)(5).

[235] 15 U.S.C. 78k–1(a)(3)(B).

[236] Specifically, MIAX PEARL proposes to incorporate by reference the following MIAX Exchange Rules: Chapter III (Business Conduct), Chapter VII (Exercises and Deliveries), Chapter VIII (Records, Reports and Audits), Chapter IX (Summary Suspension), Chapter XI (Hearings, Review and Arbitration), Chapter XIII (Doing Business With the Public), Chapter XIV (Order Protection, Locked and Crossed Markets), Chapter XV (Margins), Chapter XVI (Net Capital Requirements). The following rules are cross-referenced in the MIAX Exchange rules: MIAX Exchange Rule 1107 (Arbitration) incorporates by reference the Rule 12000 Series and Rule 13000 Series of the FINRA Manual and FINRA Rule 2268; MIAX Exchange Rule 1321 (Transfer of Accounts) cross-references FINRA Rule 11870; MIAX Exchange Rule 1502 (Margin Requirements) cross-references the CBOE and NYSE rules concerning initial and maintenance margin requirements that may be in effect from time to time.

[238] *See* Letter from Barbara J. Comly, EVP, General Counsel and Corporate Secretary, Miami Holdings, to Brent J. Fields, Secretary, Commission, dated November 4, 2016.

[239] *See id.*

[240] MIAX PEARL will provide such notice through a posting on the same Web site location where MIAX PEARL posts its own rule filings pursuant to Rule 19b–4 under the Act, within the required time frame. The Web site posting will include a link to the location on the MIAX Exchange, CBOE, NYSE or FINRA Web site where MIAX Exchange, CBOE, NYSE or FINRA's proposed rule change is posted. *See id.*

[241] *See, e.g.,* Mercury Order, *supra* note 27, BATS Order, *supra* note 13, C2 Order, *supra* note 75,

Continued

granting MIAX PEARL's request for exemption, pursuant to Section 36 of the Act, from the rule filing requirements of Section 19(b) of the Act with respect to the rules that MIAX PEARL proposes to incorporate by reference. The exemption is conditioned upon MIAX PEARL providing written notice to MIAX PEARL members whenever MIAX Exchange, CBOE, NYSE or FINRA proposes to change an incorporated by reference rule and when the Commission approves any such changes. The Commission believes that the exemption is appropriate in the public interest and consistent with the protection of investors because it will promote more efficient use of Commission's and SROs' resources by avoiding duplicative rule filings based on simultaneous changes to identical rule text sought to be implemented by more than one SRO.

V. Conclusion

It is ordered that the application of MIAX PEARL for registration as a national securities exchange be, and it hereby is, granted.

It is furthered ordered that operation of MIAX PEARL is conditioned on the satisfaction of the requirements below:

A. *Participation in National Market System Plans Relating to Options Trading.* MIAX PEARL must join: (1) The Plan for the Reporting of Consolidated Options Last Sale Reports and Quotation Information (Options Price Reporting Authority); (2) the OLPP; (3) the Linkage Plan; (4) the Plan of the Options Regulatory Surveillance Authority; and (5) the Plan Governing the Consolidated Audit Trail;

B. *Participation in Multiparty Rule 17d–2 Plans.* MIAX PEARL must become a party to the multiparty Rule 17d–2 agreements concerning options sales practice regulation and market surveillance, and covered Regulation NMS rules;

C. *Participation in the Options Clearing Corporation.* MIAX PEARL must become an Options Clearing Corporation participant exchange; and

D. *Participation in the Intermarket Surveillance Group.* MIAX PEARL must join the Intermarket Surveillance Group.

It is further ordered, pursuant to Section 36 of the Act,[242] that MIAX PEARL shall be exempted from the rule filing requirements of Section 19(b) of the Act with respect to the MIAX Exchange, CBOE, NYSE and FINRA rules that MIAX PEARL proposes to incorporate by reference, subject to the conditions specified in this order that MIAX PEARL provide written notice to MIAX PEARL members whenever MIAX Exchange, CBOE, NYSE or FINRA proposes to change an incorporated by reference rule and when the Commission approves any such changes.

By the Commission.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79545; File No. SR–Phlx–2016–118]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 3317 (Compliance With Regulation NMS Plan To Implement a Tick Size Pilot)

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 30, 2016, NASDAQ PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Phlx Rule 3317 to modify the Web site data publication requirements relating to the Regulation NMS Plan to Implement a Tick Size Pilot Program (''Plan'') and to clarify a provision related to the reporting of certain Market Maker profitability data. Phlx also proposes to amend Rule 3317(b)(5) to clarify the timing and format of publication of data related to Market Maker registration.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On August 25, 2014, Phlx and several other self-regulatory organizations (the ''Participants'') filed with the Commission, pursuant to Section 11A of the Act [3] and Rule 608 of Regulation NMS thereunder,[4] the Plan to Implement a Tick Size Pilot Program.[5] The Participants filed the Plan to comply with an order issued by the Commission on June 24, 2014.[6] The Plan was published for comment in the **Federal Register** on November 7, 2014, and approved by the Commission, as modified, on May 6, 2015.[7] The Commission approved the Pilot on a two-year basis, with implementation to begin no later than May 6, 2016.[8] On November 6, 2015, the SEC exempted the Participants from implementing the Pilot until October 3, 2016.[9] Under the revised Pilot implementation date, the Pre-Pilot data collection period commenced on April 4, 2016. On September 13, 2016, the SEC exempted the Participants from the requirement to fully implement the Pilot on October 3, 2016, to permit the Participants to implement the pilot on a phased-in basis, as described in the Participants' exemptive request.[10]

The Plan is designed to allow the Commission, market participants, and the public to study and assess the impact of increment conventions on the liquidity and trading of the common stock of small-capitalization companies. Each Participant is required to comply, and to enforce compliance by its member organizations, as applicable, with the provisions of the Plan.

Phlx adopted rule amendments to implement the requirements of the Plan, including relating to the Plan's data collection requirements and requirements relating to Web site data publication.[11] Specifically, with respect to the Web site data publication requirements pursuant to Section VII and Appendices B and C to the Plan, Phlx Rule 3317(b)(2)(B) provides, among other things, that Phlx shall make the data required by Items I and II of Appendix B to the Plan, and collected pursuant to paragraph (b)(2) of Rule 3317, publicly available on the Exchange Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. Rule 3317(b)(3)(C), provides, among other things, that Phlx shall make the data required by Item IV of Appendix B to the Plan, and collected pursuant to paragraph (b)(3) of Rule 3317, publicly available on the Exchange Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. Commentary .08 to Rule 3317 provides, among other things, that the requirement that Phlx make certain data publicly available on the Exchange Web site pursuant to Appendix B and C to the Plan shall commence at the beginning of the Pilot Period.

Phlx is proposing amendments to Rule 3317(b)(2)(B) (regarding Appendix B.I and B.II data) and Rule 3317(b)(3)(C) (regarding Appendix B.IV data) to provide that data required to be made available on Phlx's Web site be published within 120 calendar days following month end. In addition, the proposed amendments to Commentary .08 to Rule 3317 would provide that, notwithstanding the provisions of paragraphs (b)(2)(B), (b)(3)(C), and (b)(5), Phlx shall make data for the Pre-Pilot period publicly available on the Phlx Web site pursuant to Appendix B and C to the Plan by February 28, 2017.[12]

The purpose of delaying the publication of the Web site data is to address confidentiality concerns by providing for the passage of additional time between the market information reflected in the data and the public availability of such information.

Phlx also proposes to amend Rule 3317(b)(4), which relates to the reporting of Market Maker profitability data for members for the Exchange is the Designated Examining Authority (''DEA''). Currently, Rule 3317(b)(4)(A) states that a Member that is a Market Maker shall collect and transmit to their DEA the data described in Item I of Appendix C of the Plan with respect to executions on any Trading Center that have settled or reached settlement date. Information related to Market Maker profitability will be collected by FINRA and transmitted to the SEC and, on an aggregate basis, also be made publicly available.[13]

The Financial Industry Regulatory Authority, Inc. (''FINRA'') recently submitted a proposed rule change amending FINRA Rule 6191(b), which sets forth FINRA's obligations with respect to data collection and reporting under the Plan. With this rule change, FINRA proposes to publish (1) Market Maker profitability statistics for Market Makers for which FINRA is the DEA; (2) Market Maker profitability statistics collected from other Participants that are DEAs, and (iii) Market Maker profitability statistics for Market Makers whose DEA is not a Participant.[14] As part of its rule change, FINRA also stated that it would make this data publicly available on the FINRA Web site within 120 calendar days following month end at no charge. In its proposal, FINRA noted that the publication by FINRA of Market Maker profitability data on the FINRA Web site, including Market Makers for which FINRA is not the DEA, is intended to address confidentiality concerns with respect to the Appendix C data required to be made publicly available by the Participants. Although the Participants that are DEAs also would not have identified the Market Makers when publishing required Appendix C data, FINRA noted that some of the Participants are DEAs for a very small number of Market Makers, and the published data from these DEAs raised concerns regarding the potential for identifying the Market Makers that correspond to those statistics.[15]

Although the Exchange is currently a DEA for certain member firms, Rule 3317 does not currently require Phlx as DEA to report the information collected pursuant to paragraph (b)(4) to FINRA for publication. Given FINRA's recent proposed rule change, the Exchange is therefore proposing to adopt Rule 3317(b)(4)(C) to address the reporting of Market Maker profitability data for members for which Phlx is the DEA. Rule 3317(b)(4)(C) states that the Exchange, as DEA, shall collect the data required by Item I of Appendix C to the Plan and paragraph (b)(4)(A) for those Members that are Market Makers for which the Exchange is DEA, and on a monthly basis transmit such data, categorized by the Control Group and each Test Group, to the SEC in a pipe delimited format. Rule 3317(b)(4)(C) also provides that the Exchange, as DEA, shall make the data collected pursuant to subparagraph (4) of Rule 3317(b) available to FINRA for aggregation and publication, categorized by the Control Group and each Test Group, on the FINRA Web site pursuant to FINRA Rules. Rule 3317(b)(4)(C) does not alter the information required to be submitted to the SEC.

Finally, Phlx proposes to amend Rule 3317(b)(5), which relates to the collection and transmission of Market Maker registration statistics. Currently, Rule 3317(b)(5) provides that the Exchange shall collect and transmit to the SEC the data described in Item III of Appendix B of the Plan relating to daily Market Maker registration statistics in a pipe delimited format within 30 calendar days following month end for (1) transactions in each Pre-Pilot Data Collection Security for the period beginning six months prior to the Pilot Period through the trading day immediately preceding the Pilot Period; and (2) transactions in each Pilot Security for the period beginning on the first day of the Pilot Period through six months after the end of the Pilot Period. Although the Plan requires that such data be made publicly available,[16] Rule 3317(b)(5) does not currently include a provision requiring the Exchange to publish such data to its Web site. The Exchange therefore proposes to amend Rule 3317(b)(5) to provide that the Exchange shall make Market Maker

Counsel and Secretary, Bats Global Markets, Inc., dated September 13, 2016; *see also* Letter from Eric Swanson, EVP, General Counsel and Secretary, Bats Global Markets, Inc., to Brent J. Fields, Secretary, Commission, dated September 9, 2016.

[11] *See, e.g.,* Securities Exchange Act Release No. 77458 (March 28, 2016), 81 FR 18919 (April 1, 2016) (SR–Phlx–2016–39); *see also* Letter from David S. Shillman, Associate Director, Division of Trading and Markets, Commission, to Marcia E. Asquith, Senior Vice President and Corporate Secretary, FINRA, dated February 17, 2016.

[12] With respect to data for the Pilot Period, the requirement that Phlx make data publicly available on the Phlx Web site pursuant to Appendix B and C to the Plan shall continue to commence at the beginning of the Pilot Period. Thus, the first Web site publication date for Pilot Period data (covering October 2016) would be published on the Phlx Web site by February 28, 2017, which is 120 days following the end of October 2016.

[13] *See* FINRA Rule 6191(b)(4)(B).

[14] *See* SR–FINRA–2016–042.

[15] *Id.*

[16] *See* Section VII.A. 4 of the Plan.

registration data publicly available on the Exchange Web site within 120 calendar days following month end at no charge.

Phlx has filed the proposed rule change for immediate effectiveness and has requested that the Commission waive the 30-day operative delay. If the Commission waives the 30-day operative delay, the operative date of the proposed rule change will be the date of filing.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[17] in general, and furthers the objectives of Section 6(b)(5) of the Act,[18] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, because it is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan and is in furtherance of the objectives of the Plan, as identified by the SEC.

In approving the Plan, the Commission recognized that requiring the publication of Market Maker data may raise confidentiality concerns, especially for Pilot Securities that may have a relatively small number of designated Market Makers.[19] For this reason, the Commission modified the Plan so that the data that would be made publicly available would not contain profitability measures for each security, but would be aggregated by the Control Group and each Test Group. Phlx believes that this proposal is consistent with the Act in that it is designed to address confidentiality concerns by permitting Phlx to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information. With respect to the change to Rule 3317(b)(5), the Exchange believes this change will clarify the timing and format of publication of data related to Market Maker registration.

Phlx believes that the addition of Rule 3317(b)(4)(C) relating to the reporting of Market Maker profitability data to FINRA is consistent with the Act because it effectuates FINRA's recent proposal, which itself is designed to further address confidentiality concerns by permitting FINRA to aggregate and publish Market Maker profitability data for all Participant DEAs, including Market Makers for which FINRA is not the DEA.[20] Phlx notes that this proposal also does not alter the information required to be submitted to the SEC.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Phlx notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan.

The proposal is intended to address confidentiality concerns that may adversely impact competition, especially for Pilot Securities that may have a relatively small number of designated Market Makers, by (1) permitting Phlx to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information; and (2) making Market Maker profitability statistics that Phlx has gathered as DEA available to FINRA for aggregation and publication. The proposal also does not alter the information required to be submitted to the SEC.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.[21]

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[22] and subparagraph (f)(6) of Rule 19b–4 thereunder.[23]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii), the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has filed the proposed rule change for immediate effectiveness and has requested that the Commission waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing so that it may become operative immediately.

The Exchange notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan. The proposal is intended to address confidentiality concerns by permitting the Exchange to (i) Delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information; and (ii) allow for FINRA to aggregate and publish Market Maker profitability data for all Participant DEAs. The Exchange notes that the proposed change will not affect the data reporting requirements for members for which PHLX is the DEA. The proposal also does not alter the information required to be submitted to the Commission.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the Exchange to implement these proposed changes that are intended to address confidentiality concerns. The Commission notes that some Pilot data was scheduled to be published on November 30, 2016. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative on November 30, 2016.[24]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings

to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2016–118 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number *SR–Phlx–2016–118.* This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number *SR–Phlx–2016–118* and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[25]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79557; File No. SR–BOX–2016–57]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Detail How Complex Orders Will Execute Through the Solicitation Auction Mechanism

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 7, 2016, BOX Options Exchange LLC (the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to detail how Complex Orders will execute through the Solicitation Auction mechanism. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at *http://boxexchange.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to detail how the Solicitation Auction mechanism will treat Complex Orders on the Exchange.[3] Pursuant to BOX Rule 7270, the Exchange has two block-sized auction mechanisms, the Solicitation Auction Mechanism and the Facilitation Auction Mechanism whereby Order Flow Providers (OFPs) can provide price improvement opportunities for a transaction where the OFP seeks to facilitate an order it represents as agent, and/or a transaction where the OFP solicited interest to execute against an order it represents as agent. Transactions executed through the Solicitation or Facilitation auction mechanisms are comprised of the order the OFP represents as agent (the ''Agency Order'') and the contra order for the full size of the Agency Order (either the ''Solicitation'' or ''Solicited'' Order).[4] The contra order may represent interest for the Participant's own account or interest the Participant has solicited from one or more other parties, or a combination of both.

This proposal only addresses how the Solicitation Auction mechanism will treat Complex Orders on the Exchange.[5] Similar to the ISE's Block-Trade rules,[6] Complex Orders [7] executed through the Solicitation auction mechanism on BOX function in substantially the same manner as single-leg orders executed through this mechanism. To detail how the Solicitation mechanism treats

[25] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Complex Orders are not currently traded through the Solicitation Auction mechanism. Prior to implementation, BOX will issue an informational circular to inform Participants of the implementation date for Complex Orders to trade through the Solicitation Auction.

[4] The Exchange notes that it does not trade stock option orders.

[5] The Exchange recently adopted rules to allow Complex Orders to execute through the Facilitation Auction mechanism. *See* Securities Release No. 78444 (July 29, 2016), 81 FR 51533 (August 4, 2016)(Notice of Filing and Immediate Effectiveness of file Number SR–BOX–2016–37).

[6] *See* International Securities Exchange Rule 716 and Supplementary Material .08 to Rule 716.

[7] Under Rule 7240(a)(5) a ''Complex Order' is defined as ''any order involving the simultaneous purchase and/or sale of two or more different options series in the same underlying security, for the same account, in a ratio that is equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) and for the purpose of executing a particular investment strategy.) A Complex Order that does not meet this definition will be automatically rejected.

Complex Orders, the Exchange proposes to adopt IM–7270–8. IM–7270–8 will state that Participants may use the Solicitation Mechanism according to paragraph (b) of Rule 7270 to execute block-size Complex Orders at a net price. The OFP must be willing to execute the entire size of the Agency Order through the submission of a contra order; and block-size Complex Orders executed through the Solicitation Mechanism will continue to be limited to Complex Orders of five hundred (500) contracts per leg or more.[8] Each Complex Agency Order entered into the Solicitation Auction shall be all-or-none.

Upon the entry of a block-sized Complex Order into the Solicitation mechanism, a broadcast message will be sent to Options Participants, giving them one second to enter responses with the prices and sizes at which they would be willing to participate opposite the Agency Order (''Responses'').[9] Responses to a Complex Order within the Solicitation Auction mechanism may be submitted for any size up to the size of the entire Complex Order, however, the Responses must be for all Legs of the unique Complex Order.[10] Responses must be priced equal to or better than the Agency Order and cannot exceed the size of the Agency Order.[11] At the end of the one second period for the entry of Responses, the block-sized Solicitation Complex Order will be automatically executed in full or canceled.[12]

As is also the case for single-leg orders executed through the Solicitation mechanism, the Complex Agency Order will execute against the Complex Solicited Order at the proposed execution price if at the time of execution there is insufficient size to execute the entire Complex Agency Order at a better price (or prices) and (A) the execution price is equal to or greater than the NBBO and (B) there are no Book Priority Public Customer Complex Orders on the Complex Order Book. A Book Priority Public Customer Complex Order is a Complex Order (A) at a price equal to or better than the proposed execution price; and (B) on the BOX Complex Order Book within a depth of the BOX Complex Book so that it would otherwise trade with Agency Order if the Agency Order had been submitted to the BOX Complex Book.[13] Both the Solicited Complex Order and the Agency Complex Order will be canceled if an execution would take place at a price that is inferior to the BOX BBO or the NBBO, or if there is a Book Priority Public Customer order on the BOX Book and there is insufficient size to execute the Agency Order, except as provided in BOX Rule 7270(b)(2)(iv).[14]

If at the time of execution there is sufficient size to execute the entire Agency Complex Order at an improved price (or prices), the Agency Complex Order will be executed at the improved price(s) and the Solicited Order will be canceled.[15] The aggregate size of all bids (offers) on the BOX Book and the Complex Order Book and all Responses at each price will be used to determine whether the entire Agency Order can be executed at an improved price (or prices.)[16] For example, an OFP submits a Complex Order through the Solicitation Auction to buy 1000 A+B at $2.10. During the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker Complex Order Response to sell 400 of A+B at $2.08.

(2) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.08.

(3) Public Customer Response to sell 200 A+B at $2.08.

(4) Public Customer Complex Order on the Complex Order Book to sell 300 A+B at $2.08.

Since there is sufficient size to execute the entire Agency Order at an improved price, the Agency Order will execute in time priority [17] against each of the bids (offers) and Responses at $2.08, and the Solicited Order will be canceled.[18] The Agency Order would execute 400 contracts against the Market Maker Response; 300 contracts against the Market Maker offer on the Complex Order Book; 200 contracts against the Public Customer Response and 100 contracts against the Public Customer Complex Order on the Complex Book. The remaining 200 contracts of the Public Customer Complex Order will remain unexecuted.

However, notwithstanding the execution provisions of Rule 7270(b)(2), the execution rules for Complex Orders detailed in BOX Rule 7240(b)(2) and (3) continue to apply for Complex Orders executed through the Solicitation Auction Mechanism.[19] For example, if there is sufficient interest on the BOX Book for the individual legs to be executed at a permissible ratio, this ''Implied Order''[20] will have priority over Responses and Complex Orders on the Complex Order Book. Although an Implied Order will be able to execute against an Agency Order in the Solicitation Auction mechanism, the Implied Order will not be considered a Book Priority Public Customer Order for purposes of Rule 7270(b).

Using the same scenario above, an OFP submits a Complex Order through the Solicitation Auction to buy 1000 A+B at $2.10 and during the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker Complex Order Response to sell 400 of A+B at $2.08.

(2) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.08.

(3) Public Customer Response to sell 200 A+B at $2.08.

(4) Public Customer Complex Order on the Complex Order Book to sell 300 A+B at $2.08.

(5) Interest on the BOX Book (Implied Order):

- Market Maker Option A—Order to sell 300 at $1.04.
- Market Maker Option B—Order to sell 300 at $1.04.

There is sufficient size to execute the entire Agency Order at an improved price so the Solicited Order will be canceled. However, the Agency Order would execute first against the 300 Implied Order contracts and then in time priority against the remaining Complex Order bids (offers) and Responses. After the Implied Order contracts the Agency Order will execute 400 contracts against the Market Maker Response; and 300 contracts against the Market Maker offer on the Complex Order Book. Both the Public Customer Response and Complex Order will receive no trade allocation because the buy order has been exhausted.

[8] *See* proposed IM 7270–8. Complex Orders comprised of less than five hundred (500) contracts on each leg will automatically be rejected.

[9] *See* BOX Rule 7270(b)(1). The Exchange believes that 1 second is an adequate duration for the Solicitation Auction. Specifically, the Exchange believes customers are capable of responding within this duration and has not received any complaints regarding the duration of the Solicitation Auction broadcast since the mechanism was adopted in 2011.

[10] *See* proposed IM–7270–8.

[11] *See* proposed IM–7270–8.

[12] *See* BOX Rule 7270(b)(2).

[13] *See* BOX Rule 7270(b)(2)(i). If the execution price is inferior to the best bid or offer on BOX, the NBBO or if there is a Book Priority Public Customer Order on the BOX Complex Book the Solicited Complex Order and Agency Order will be cancelled.

[14] *See* BOX Rule 7270(b)(2)(i).

[15] *See* BOX Rule 7270(b)(2)(iii).

[16] *See* BOX Rule 7270 (b)(2)(iii) *and* proposed IM–7270–8.

[17] *See* BOX Rule 7270(b)(2)(v).

[18] *See* BOX Rule 7270(b)(2)(iii).

[19] *See* proposed IM–7270–8. The Exchange notes that this includes the Complex Order Filter outlined in BOX Rule 7240(b)(3)(iii).

[20] An ''Implied Order' is a Complex Order that is derived from the orders on the BOX Book for each component leg of a strategy. Each of the Implied Order component Legs must be equal to or better than its respective NBBO.

If at the time of execution, there are one or more Book Priority Public Customer Orders on the Complex Order Book, the Agency Order will execute against the Complex Order Book if there is sufficient size available to execute the entire Agency Order, and the Solicited Order will be cancelled.[21] In this instance, the aggregate size of all bids (offers) on the Complex Order Book at or better than the proposed execution price will be used to determine whether there is sufficient size available to execute the entire Agency Order.[22] BOX Book Interest and Responses [23] are excluded when determining whether sufficient size exists to execute the Agency Order at its proposed price under BOX Rule 7270(b)(2)(ii). However, if there is sufficient interest on the Complex Order Book, the execution rules for Complex Orders will continue to apply and any Implied Orders will have priority.[24] For example, if an OFP submits a Complex Order through the Solicitation Auction to buy1000 A+B at $2.10 and during the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.10.

(2) Public Customer Complex Order on the Complex Order Book to sell 500 A+B at $2.10.

(3) Interest on the BOX Book (Implied Order):

• Market Maker Option A—Order to sell 300 at $1.05.

• Market Maker Option B—Order to sell 300 at $1.05.

(4) Broker Dealer offer on the Complex Order Book to sell 300 A+B at $2.10.

There is a Book Priority Public Customer Order on the Complex Order Book (*i.e.,* the Public Customer Complex Order to sell 500 at $2.10) and there is sufficient size on the Complex Order Book to execute the entire Agency Order. As such, the Agency Order will be executed against the Implied Order and the orders on the Complex Order Book, and the Solicited Complex Order will be canceled. In this example, the Agency Order will execute 300 contracts against the Implied Order, then 300 contracts against the Market Maker and 400 contracts against the Book Priority Public Customer Complex Order. The remaining 100 contracts of the Book Priority Public Customer Complex Order and the Broker Dealer 300 contracts will remain unexecuted, based on price/time priority.

If however, there is a Book Priority Public Customer Order on the Complex Order Book, but there is insufficient size to execute the entire Agency Order at the proposed execution price, both the Agency and Solicited Orders will be canceled, except as provided in BOX Rule 7270(b)(2)(iv).[25] For example, if an OFP submits a Complex Order through the Solicitation Auction to buy1000 A+B at $2.10 and during the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.10.

(2) Public Customer Complex Order on the Complex Order Book to sell 300 A+B at $2.10.

(3) Interest on the BOX Book (Implied Order):

• Market Maker Option A—Order to sell 300 at $1.05.

• Market Maker Option B—Order to sell 300 at $1.05.

In this example, there is a Book Priority Public Customer Order on the Complex Order Book (*i.e.* the Public Customer Complex Order to sell 300 at $2.10) but there is insufficient size on the Complex Order Book to execute the entire Agency Order. As such, both the Solicited Order and the Agency Order will be cancelled [26], unless the OFP has designated a Surrender Quantity.[27]

When starting a Solicitation Auction the OFP may designate, for the Solicited Order, the quantity of contracts of the Agency Order that it is willing to surrender interest to on the Complex Order Book.[28] The Surrender Quantity only applies if at the time of execution there are (1) Book Priority Public Customer Orders on the Complex Order Book or (2) any bids (offers) on the Complex Order Book at any price better than the proposed execution price, but there is insufficient size to execute the entire Agency Complex Order at an improved price.[29]

If there is a Book Priority Public Customer Order on the Complex Order Book, and the aggregate size of the Book Priority Public Customer Order and all bids (offers) on the Complex Order Book at prices better than the proposed execution price, excluding Responses and BOX Book Interest, are equal to or less than the Surrender Quantity, the Agency Complex Order will first execute against all such Book Priority Public Customer Orders and such bids (offers) and then against the Solicited Order. For example, an OFP submits a Complex Order through the Solicitation Auction to buy1000 A+B at $2.10 and designates 200 contracts as the Surrender Quantity. During the one second auction, BOX receives the following bids (offers) in time priority:

(1) Public Customer Complex Order on the Complex Order Book to sell 200 A+B at $2.10.

(2) Market Maker offer on the Complex Order Book to sell 800 A+B at $2.10.

Without the Surrender Quantity, the Agency Order would execute against the Public Customer Order on the Complex Order Book for 200 Contracts and against the Market Maker on the Complex Order Book for 800 contracts. Using the Surrender Quantity, however, the Agency Order would still execute against the Public Customer Order on the Complex Order Book, but would then execute against the Solicited Order for 800 contracts.

As stated above, the Surrender Quantity can also be used to allow Solicitation auction trades which would otherwise be canceled. For example, if an OFP submits a Complex Order through the Solicitation Auction to buy 1000 A+B at $2.10 and designates 200 contracts as the Surrender Quantity. During the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.10.

(2) Public Customer Complex Order on the Complex Order Book to sell 100 A+B at $2.10.

There is a Book Priority Public Customer, but there is insufficient size to execute the entire Agency Order with interest on the Complex Order Book, and this auction would normally be canceled. However, since the OFP designated a Surrender Quantity of 200 that is greater than the total size of the Book Priority Public Customer Order, the Agency Order will execute 100 contracts against the Book Priority Public Customer Order and the remaining 900 contracts against the Solicited Order.

However, if the aggregate size of the Book Priority Public Customer Order and all bids (offers), excluding Responses and BOX Book Interest, on the Complex Order Book at prices better than the proposed execution price exceeds the Surrender Quantity, and there is insufficient size to execute the entire Agency Complex Order, then both the Solicited Complex Order and the

[21] *See* BOX Rule 7270(b)(2).

[22] *See* Rule 7270(b)(2)(ii) and proposed IM–7270–8.

[23] Responses are sent by Options Participants in response to a Facilitation or Solicitation Auction broadcast message.

[24] *See* BOX Rule 7240(b)(2) and (3).

[25] *See* BOX Rule 7270(b)(2)(iv).

[26] *See* BOX Rule 7270(b)(2)(i).

[27] *See* BOX Rule 7270(b)(2)(iv).

[28] *See* BOX Rule 7270(b)(2)(iv).

[29] *See* BOX Rule 7270(b)(2)(iv).

Agency Complex Order will be canceled.[30] For example, the OFP submits a Complex Order through the Solicitation Auction to buy1000 A+B at $2.10 and designates 200 contracts as the Surrender Quantity. During the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker offer on the Complex Order Book to sell 300 A+B at $2.10.

(2) Public Customer Complex Order on the Complex Order Book to sell 300 A+B at $2.10.

Even though the OFP has designated a Surrender Quantity of 200 contracts, the total size of the Book Priority Public Customer Order (300 contracts) is greater than the Surrender Quantity and there is insufficient size on the Complex Order Book to execute the entire Agency Complex Order. Therefore both the Solicited Complex Order and Agency Complex Order will be canceled.

The Surrender Quantity can also be used to allow Solicitation Auction trades when there are bids (offers) on the Complex Book on the opposite side of the Agency Complex Order at a price better than the proposed execution price, but there is insufficient size to execute the entire Agency Order at an improved price.[31] For example, an OFP submits a Complex Order through the Solicitation Auction to buy 1000 A+B at $2.10 and designates 200 contracts as the Surrender Quantity. During the one second auction, BOX receives the following bids (offers) in time priority:

(1) Market Maker offer on the Complex Order Book to sell 100 A+B at $2.09.

(2) Public Customer Complex Order on the Complex Order Book to sell 100 A+B at $2.08.

Since there is insufficient size to execute the entire Agency Complex Order at a better price, this auction would normally be canceled. However, since the OFP designated a Surrender Quantity of 200 that is equal to the aggregate size of these better priced orders, the Agency Order will execute 100 contracts against the Public Customer Order at $2.10, 100 contracts against the Market Maker Order at $2.09 and the remaining 800 contracts against the Solicited Order. Note that even though the Public Customer Order on the Complex Order Book was priced lower than the proposed execution price at $2.08, it is executed at the proposed execution price of $2.10. Public Customer bids (offers) on the Complex Order Book at the time of the Surrender Quantity execution that are priced higher (lower) that the proposed execution price will be executed at the proposed execution price.[32] Non-Public Customer and Market Maker bids (offers) that are priced lower (higher) than the proposed execution price will execute at their stated price.[33]

The Exchange intends to implement the proposed change no later than January 30, 2017. The Exchange will provide Participants with notice, via Information Circular, of the exact implementation date.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act,[34] in general, and Section 6(b)(5) of the Act,[35] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system, and, in general, to protect investors and the public interest. In particular, the Exchange believes that the proposed rule change to amend BOX Rule 7270 to provide for the execution of Complex Orders through the Solicitation Auction mechanism on BOX is designed to help BOX remain competitive among options exchanges and provide market participants additional opportunities to execute block-size crossing transactions in Complex Orders.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed change provides for the execution of Complex Orders through the Solicitation auction mechanism. As such, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposal will impose any burden on intermarket competition, as the proposed rule will allow BOX to compete with other options exchanges in the industry. Specifically, ISE has a similar mechanism in place.[36] Additionally, the Exchange does not believe the proposal will impose any burden on intramarket competition, as the Solicitation Auction mechanism is available to all Participants and all OFPs may submit orders through the mechanism.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [37] and Rule 19b–4(f)(6) thereunder.[38]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BOX–2016–57 on the subject line.

[30] *See* BOX Rule 7270(b)(2)(iv)(A)(1).

[31] *See* BOX Rule 7270(b)(2)(iv)(A)(2).

[32] *See* BOX Rule 7270(b)(2)(iv)(B).

[33] *See* BOX Rule 7270(b)(2)(iv)(B).

[34] 15 U.S.C. 78f(b).

[35] 15 U.S.C. 78f(b)(5).

[36] *See supra* note 6.

[37] 15 U.S.C. 78s(b)(3)(A).

[38] 17 CFR 240.19b–4(f)(6). As required under Rule 19b–4(f)(6)(iii), the Exchange provided the Commission with written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BOX–2016–57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BOX–2016–57, and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[39]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79559; File No. SR–NYSEMKT–2016–115]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Change Modifying the NYSE Amex Options Fee Schedule

December 14, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 1, 2016, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the NYSE Amex Options Fee Schedule (''Fee Schedule''). The Exchange proposes to implement the fee change effective December 1, 2016. The proposed change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Section III. C. of the Fee Schedule to adjust the monthly Rights Fees assessed on Specialists, e-Specialists, Directed Order Market Markers (each a ''DOMM), and to provide alternative means to qualify for a discount on the Rights Fees. The Exchange proposes to implement these changes effective on December 1, 2016.

Currently, the Exchange charges a Rights Fee on each issue in the allocation of an e-Specialist, DOMM, and Specialist.[4] The monthly Rights Fee ranges from $75 to $1,500 and is based on the Average National Daily Customer Contracts (''CADV'') per issue. With one exception, the more active an issue, the higher the Rights Fee assessed. The exception is that the Exchange currently charges a higher rate for the lowest-volume issues (*i.e.,* less than 201 CADV) to offset the Exchange's revenue with the cost of listing and maintaining these low-volume issues.

Proposed Modification to the Rights Fees

The Exchange proposes to align the Rights Fees with the economic benefit of being the e-Specialist, DOMM, or Specialist in a given issue, based on trading activity in an issue. The Exchange therefore proposes that some rates would decrease (for lower-volume issues) and others would increase (for higher-volume issues). Using the same CADV levels currently in place, the Exchange proposes to amend the Rights Fees as follows:

E-SPECIALIST, DOMM, AND SPECIALIST RIGHTS FEE

Average national daily customer contracts per issue	Current fee	Proposed fee
0 to 200	$250	$50
201 to 2,000	75	60
2,001 to 5,000	200	150
5,001 to 15,000	375	375
15,001 to 100,000	750	1,250
Over 100,000	1,500	2,000

[39] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Fee Schedule, Section III. C. (e-Specialist, DOMM and Specialist Monthly Rights Fees) (describing how the Rights Fee is assessed and setting forth the current rates), *available here, https://www.nyse.com/publicdocs/nyse/markets/amex-options/NYSE_Amex_Options_Fee_Schedule.pdf.*

As shown in the chart above, the Exchange proposes to significantly decrease the Rights Fee for the lowest-volume issues (*i.e.,* between 0–200 contracts) to better account for the costs to each e-Specialist, DOMM, and Specialist, irrespective of costs and revenue to the Exchange associated with listing an issue. The Exchange also proposes to slightly decrease the Rights Fee for option issues trading between 201–2,000 CADV and trading between 2,001–5,000 CADV to better align with the cost to the Exchange associated with such issues. The Exchange believes the proposed reduction in the Rights Fee for issues trading under 5,001 CADV would create an incentive for Specialists and e-Specialists to request appointments in these lower-volume issues, which may result in increased liquidity to the benefit of market participants. Similarly, the Exchange believes the proposed reductions would encourage DOMMs to seek to transact more in these less active issues (*i.e.,* to make order flow arrangements with Customers to direct orders in these issues to them), which in turn should increase volume on the Exchange.

In addition, the Exchange proposes to increase the Rights Fees associated with the two most active CADV categories of issues to better reflect the economic benefits of being an e-Specialist, DOMM, or Specialist in more actively-traded issues (*i.e.,* option issues trading more than 5,000 CADV). The Exchange believes the proposed modifications to the Rights Fees are appropriate as an e-Specialist, DOMM, or Specialist would have an opportunity to interact with fewer than 201 contracts per day to cover the proposed $50 per month Rights Fees and would have the opportunity to interact with more than 100,000 contracts per day to cover the proposed $2,000 per month Rights Fee.

Proposed Discounts to the Rights Fees

The Exchange proposes two alternative methods for Specialists, e-Specialists, and DOMMs to qualify for a discount on the monthly Rights Fees. First, as proposed, any Specialist, e-Specialist, or DOMM that participates in the Prepayment Program (outlined in Section I.D. of the Fee Schedule) would be eligible for a 20% discount to their monthly Rights Fees. Alternatively, the Exchange proposes that any Specialist, e-Specialist, or DOMM that achieves one of the Tiers in the Amex Customer Engagement (''ACE'') Program (outlined in Section I.E. of the Fee Schedule) would be eligible for a discount on their Rights Fees, as set forth in the table below.

RIGHTS FEE DISCOUNT

ACE tier	Discount on rights fees %
Base [5]	0
1	0
2	0
3	20
4	30
5	40

In the event that an e-Specialist, DOMM, or Specialist qualified for both discounts in a given month, only the larger discount would be applied. For instance, a Specialist in one of the Prepayment Programs would be eligible to receive a 20% discount on the Rights Fees every month or, if that same Specialist also qualifies for ACE Tier 4, making it eligible for a 30% discount in a given month, the Specialist would receive a 30% discount to the Rights Fees for that month in lieu of the 20% discount.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[7] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed modifications to the Rights Fees are reasonable, equitable and not unfairly discriminatory for a number of reasons. First, the Rights Fees apply solely to e-Specialists, DOMMs, and Specialists (other Market Makers are not subject to this Fee) and are assessed to account for the enhanced allocation opportunities and economic benefits that inure to these market participants. Second, the monthly Rights Fees are directly related to the number of allocations in the appointment of each e-Specialist, DOMM, or Specialist, which appointments are completely voluntary. Any e-Specialist, DOMM, or Specialist can opt to relinquish any issue in its allocation to reduce its total Rights Fee. In addition, the proposed Rights Fees would be more closely aligned with the economic benefit of being e-Specialist, DOMM, or Specialist in a given issue. For example, an e-Specialist, DOMM, or Specialist would have an opportunity to interact with fewer than 201 contracts per day to cover the proposed $50 per month Rights Fee and would have the opportunity to interact with more than 100,000 contracts per day to cover the proposed $2,000 per month Rights Fee. Further, e-Specialists, DOMMs, and Specialists trading issues with similar activity levels would be subject to the same Rights Fees.

The Exchange believes the proposed reduction in the Rights Fee for issues trading under 5,001CADV is reasonable, equitable and not unfairly discriminatory because it would create an incentive for Specialists and e-Specialists to request appointments in these lower-volume issues, which may result in increased liquidity to the benefit of market participants. Similarly, the Exchange believes the proposed reductions would encourage DOMMs to seek to transact more in these less active issues (*i.e.,* to make order flow arrangements with Customers to direct orders in these issues to them), which in turn should increase volume on the Exchange.

The Exchange also believes the proposed discounts on the Rights Fees available to e-Specialists, DOMMs, and Specialists are reasonable, equitable and not unfairly discriminatory for a number of reasons. First, the proposed discounts would reduce the overhead costs of e-Specialists, DOMMs, and Specialists (by reducing the monthly Rights Fees), which would, in turn, enhance their ability to provide liquidity to the benefit of all market participants. Second, because Market Makers that are not e-Specialists, DOMMs, or Specialists are not subject to the Rights Fees (as such fees are assessed to account for the enhanced allocation opportunities and economic benefits that inure to these market participants), the proposed discount would not disadvantage Market Makers. In addition, all e-Specialists, DOMMs, and Specialists (as well as any other Market Makers) are eligible to participate in the Prepayment Program, which would enable them to qualify for the proposed 20% discount on the Rights Fees. Further, the proposed discounts available upon satisfying certain Tiers of the ACE Program are not discriminatory as they are open to all e-Specialists, DOMMS, and Specialists, as well as all other Market Makers who may arrange for ''appointment'' status with an Order Flow Provider (''OFP'').

[5] The Exchange notes that it is proposing to add a Base Tier to the ACE Program in a separate fee filing, also for December 1, 2016. Thus, reference to a Base Tier herein is designed to align with that proposed change. *See* File No. SR–NYSEMKT–2016–114.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(4) and (5).

Finally, the Exchange is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[8] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed modifications on the Rights Fees would not impose an unfair burden on competition because the proposed Rights Fees would more closely align with the economic benefit of being e-Specialist, DOMM, or Specialist in a given issue. Because other Market Makers are not subject to the Rights Fee, the proposed discount would not disadvantage Market Makers. Instead, the proposed ACE-related discounts would operate to incent each e-Specialist, DOMM, or Specialist to achieve higher ACE Tiers to reduce its own Rights Fee. The Exchange believes that the proposed discounts would encourage e-Specialists, DOMMs, or Specialists to quote and trade competitively in their issues and would reduce the burden on competition among e-Specialists, DOMMs, or Specialists in the most actively-traded issues because e-Specialists, DOMMs, or Specialists that achieve the discounts would have reduced overhead.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[8] 15 U.S.C. 78f(b)(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[9] of the Act and subparagraph (f)(2) of Rule 19b–4[10] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[11] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–115 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–115. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–115, and should be submitted on or before January 10, 2017.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79560; File No. SR–CBOE–2016–081]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Move the Web Site and Vendor Through Which It Sells and Disseminates Open and Close Volume Data on the CBOE

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2016, Chicago Board Options Exchange, Incorporated (the ''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change is available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange creates volume data for each Exchange-listed option that consists of opening buys and opening sells and closing buys and closing sells.[3] This opening and closing position data is subdivided by origin code (*i.e.* customer or firm), and the customer data is further subdivided by order size. The volume data is summarized by day and series (symbol, expiration date, strike price, call or put). This volume data is referred to herein as the ''Open/Close Data.'' A fee schedule for the sale of Open/Close data was codified pursuant to a filing noticed [sic] on January 8, 2007.[4]

Current Status

Currently, Open/Close Data is provided to the vendor Intelligent Financial Systems, LTD (''IFS''). IFS hosts and supports a Web site for Market Data Express, LLC (''MDX''), a wholly owned subsidiary of the Exchange. The MDX Web site (*MarketDataExpress.com*) offers the Open/Close Data for sale to CBOE Trading Permit Holders (''TPHs'') and non-TPHs. The fees that MDX assesses for the Open/Close Data are set forth in a price list on MDX's Web site. TPHs and non-TPHs (together, ''Customers'') are charged the same fees for the Open/Close Data.

Customers may purchase Open/Close Data on a subscription basis or by ad hoc request. Daily Open/Close Data covering all CBOE securities may be purchased by subscribing to the Daily Update service at a cost of $600 per month. Subscribers to the Daily Update service receive access to a daily data file via download from MDX's Web site.

Historical Open/Close Data covering all CBOE securities may be purchased on an ad hoc request basis. The charge for historical Open/Close Data covering all CBOE securities is $7,200 per year for requests for one to four years of data. Requests for five or more years of historical Open/Close Data receive a 50% discount beginning with the fifth year of data (*i.e.,* MDX charges $7,200 for each of the first four years of data and $3,600 for year five and each subsequent year of data).

Alternatively, a Customer may purchase historical Open/Close Data on an individual CBOE security at a cost of $4.50 per security per month. This data is received via download from MDX's Web site. A 50% discount is applied for requests for ten or more years of data, beginning with the tenth year of data.

Proposed Change

Development, Web site hosting, and customer support relating to the Open/Close data will be transferred to CBOE Livevol, LLC (''Livevol''), a wholly owned subsidiary of the Exchange's parent company, CBOE Holdings, Inc. CBOE will make Open/Close data available on the Livevol Data Shop Web site (*datashop.cboe.com*). Customer support will be transitioned from *Support@MarketDataExpress.com* to *support@livevol.com*.

Open/Close data (and customer support) will be available on both the MDX and Livevol Web sites during a transition period, which began on November 10, 2016 and is ending no later than January 31, 2017. At least two weeks prior to the end of the transition period, the Exchange will announce the end of the transition period via circular. At the end of the transition period, availability of the Open/Close data through the MDX Web site will be retired and the Open/Close data will only be available through the Livevol Web site. The fees related to the Open/Close Data, including all applicable discounts, will remain the same during the transition period and once Open/Close data is available only through the Livevol Web site. The Exchange is changing the vendor and web address through which the Open/Close Data is purchased and disseminated and adopting a substantively identical fee schedule for Open/Close data on Livevol. At the end of the transition period, Open/Close data will be removed from the MDX fee schedule.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[5] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[6] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[7] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Finally, as discussed below, the Exchange believes the proposed rule change is consistent with Section 6(b)(4)8 of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

The proposed rule change addresses where and how Open/Close data is sold and disseminated. The Exchange believes the proposed rule change is equitable and does not permit unfair discrimination between customers, issuers, brokers or dealers, as the Open/Close Data will be available to all customers, including TPHs and other persons purchasing the data, at the same price and in the same manner. During and after the transition, the fees currently in place will continue to apply.

[3] An opening buy is a transaction to create or increase a long position, and an opening sell is a transaction to create or increase a short position. A closing buy is a transaction to close out a short position, and a closing sell is a transaction to reduce or eliminate a long position.

[6] 15 U.S.C. 78f(b)(5).

[7] *Id.*

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule will have no impact on competition because there is no change to the fee. The proposed rule change is merely changing the Web site on which the data will be available for purchase and adopting a substantively identical fee schedule for the new Web site.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and paragraph (f) of Rule 19b–4 [10] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov. Please include File Number SR–CBOE–2016–081 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2016–081. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2016–081 and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79554; File No. SR–NASDAQ–2016–141]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To Amend Rule 4702 To Adopt a New Retail Post-Only Order

December 14, 2016.

On October 13, 2016, The Nasdaq Stock Market LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Exchange Rule 4702 to adopt a new Retail Post-Only Order. The proposed rule change was published for comment in the **Federal Register** on November 1, 2016.[3] The Commission received one comment letter on the proposed rule change.[4]

Section 19(b)(2) of the Act [5] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is December 16, 2016. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[6] designates January 30, 2017, as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR–NASDAQ–2016–141).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79552; File No. SR–BatsBZX–2016–61]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change To Amend Exchange Rule 11.23, Auctions, To Enhance the Reopening Auction Process Following a Trading Halt Declared Pursuant to the Plan To Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS

December 14, 2016.

On October 13, 2016, Bats BZX Exchange, Inc. filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change related to the reopening auction process following a trading halt declared pursuant to the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS. The proposed rule change was published for comment in the **Federal Register** on November 1, 2016.[3] The Commission received no comments on the proposed rule change.

Section 19(b)(2) of the Act[4] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is December 16, 2016. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates January 30, 2017 as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR-BatsBZX–2016–61).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79555; File No. SR–C2–2016–020]

Self-Regulatory Organizations; C2 Options Exchange, Incorporated; Order Approving a Proposed Rule Change Relating to Price Protection Mechanisms and Risk Controls

December 14, 2016.

I. Introduction

On October 25, 2016, C2 Options Exchange, Incorporated (''C2'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend current and adopt new price protection mechanisms and risk controls for orders and quotes. The Commission published the proposed rule change for comment in the **Federal Register** on November 3, 2016.[3] The Commission received no comments on the proposal. This order approves the proposed rule change.

II. Description of the Proposed Rule Change[4]

The Exchange currently has in place various price check mechanisms and risk controls that are designed to prevent incoming orders and quotes from automatically executing at potentially erroneous prices or to assist Trading Permit Holders (''TPHs'') with managing their risk.[5] The Exchange proposed to amend C2 Rules 6.17 and 8.12 to add new, as well as amend current, price protection mechanisms and risk controls to further assist brokers in their efforts to prevent errors and avoid trading activity that could potentially be unwanted or even disruptive to the market.[6]

A. Limit Order Price Parameter for Simple Orders

The Exchange proposed to amend the limit order price parameter for simple orders in C2 Rule 6.17(b). Currently, the Exchange will not accept for execution an eligible limit order if a limit order to buy (sell) is more than an acceptable tick distance (''ATD'')[7] above (below): (i) The Exchange's previous day's closing price prior to the opening of a series, or (ii) the disseminated Exchange offer (bid) once a series has opened.[8]

The Exchange has now proposed to amend C2 Rule 6.17(b) to reject a limit order to buy (sell) generally when it is more than an ATD above (below) the last disseminated national best offer (''NBO'') (national best bid (''NBB'')).[9] According to the Exchange, using the NBBO or NBO (NBB), if available, will more accurately reflect the then current market, rather than the previous day's closing price or Exchange BBO.[10] The Exchange, however, will continue to use the previous day's closing price or Exchange BBO in certain instances, such as when the NBBO is locked or crossed, or when there is no NBO (NBB) and the closing price does not cross the disseminated NBB (NBO).[11]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 79189 (October 28, 2016), 81 FR 76671 (November 3, 2016) (''Notice'').

[4] A more detailed description of the proposed rule change appears in the Notice. *See id.*

[5] *See, e.g.,* C2 Rules 6.13, Interpretation and Policy .04 (price check parameters for complex orders), 6.17(a) (market-width and drill through price check parameters), Rule 6.17(b) (simple limit order price parameters), 6.17(d) and (e) (price protections), and 8.12 (Quote Risk Monitor Mechanism (''QRM'')).

[6] The proposed rule change also made conforming changes to C2 Rules 6.11, 6.14, and 6.18. A full discussion of those changes may be found in the Notice. *See supra* note 3.

[7] Currently, the Exchange determines the ATD, which may be no less than 5 minimum increment ticks, on a series-by-series and premium basis. Under the proposed rule change, the ATD, which may be no less than two minimum increment ticks, will be determined on a class-by-class and premium basis. In addition, different ATDs may be applied to orders entered during the pre-opening, a trading rotation, or a trading halt. *See* proposed C2 Rule 6.17(b) and Notice, *supra* note 3, at 76673.

[8] *See* C2 Rule 6.17(b).

[9] Specifically, C2 will reject the order if it is more than the ATD above (below): (i) Prior to the opening of a series, (A) the last disseminated NBO (NBB), if a series is open on another exchange, or (B) the Exchange's previous day's closing price, if a series is not yet open on any other exchange; if the NBBO is locked, crossed, or unavailable; or if there is no NBO (NBB) and the previous day's closing price is greater (less) than or equal to the NBB (NBO); (ii) intraday, the last disseminated NBO (NBB), or the Exchange's best offer (bid) if the NBBO is locked, crossed or unavailable; or (iii) during a trading halt, the last disseminated NBO (NBB).

[10] *See* Notice, *supra* note 3 at 76672.

[11] *See id.*

C2 also proposed to apply the limit order price parameter to immediate-or-cancel orders. According to the Exchange, such orders also are at risk of execution at extreme and potentially erroneous prices and thus will benefit from applicability of these checks.[12] However, the limit order price parameter will not apply to orders with a stop contingency.[13] According to the Exchange, buy orders with a stop contingency are generally submitted at a triggering price that is above the NBO, and sell orders with a stop contingency are generally submitted at a triggering price that is below the NBB.[14] As a result, the Exchange believes these orders are expected to be priced outside the NBBO.[15]

B. Drill Through Price Check Parameter

The Exchange proposed to amend the drill through price check parameter in C2 Rule 6.17(a)(2). Currently, the Exchange's trading system (''System'') will not automatically execute a market or marketable limit order[16] if the execution would follow an initial partial execution on the Exchange at a price not within an ATD[17] from the initial execution. Instead, the System cancels the remaining unexecuted portion.[18]

The Exchange now has proposed to amend C2 Rule 6.17(a)(2) to add detail to the rule describing how the System will handle orders in the event that the Exchange activates HAL or SAL.[19] In particular, orders not previously exposed would be exposed via HAL and orders previously exposed via HAL or SAL would rest in the book for a period of time and thereafter be cancelled if they do not execute.[20]

Buy (sell) orders (or any unexecuted portion) that are not eligible for HAL or SAL and do not otherwise cancel by their terms will continue to be cancelled pursuant to proposed C2 Rule 6.17(a)(2)(D). In addition, the drill through price check parameter at the open will be handled pursuant to the separate process set forth in Rule 6.11(g)(2) and Interpretation and Policy .04.[21]

C. TPH-Designated Risk Settings

The Exchange proposed to amend C2 Rule 6.17 to authorize it to share TPH-designated risk settings with a TPH's Clearing TPH. The risk settings that the Exchange may share with Clearing TPHs include, but are not limited to, settings under Rule 8.12 (related to QRM) and proposed C2 Rule 6.17(g) (related to order entry and execution rate checks) and (h) (related to maximum contract size). The Exchange represented that other options exchanges have similar rules permitting them to share member-designated risk settings with other members that clear transactions on the member's behalf.[22]

D. Put Strike Price/Call Underlying Value Checks

The Exchange proposed to amend the put strike price and call underlying value checks in C2 Rule 6.17(d). Currently, the System rejects back to the TPH a quote or buy limit order for (i) a put if the price of the quote bid or order is greater than or equal to the strike price of the option, or (ii) a call if the price of the quote bid or order is greater than or equal to the consolidated last sale price of the underlying security, with respect to equity and exchange-traded fund options, or the last disseminated value of the underlying index, with respect to index options. The Exchange proposed to extend this check to apply to market orders (and any remaining size after a partial execution).[23]

E. Quote Inverting NBBO Check

The Exchange proposed to amend C2 Rule 6.17(e) regarding the quote inverting NBBO check. Currently, if the Exchange is at the NBO (NBB), the System rejects a quote back to a Market-Maker if the quote bid (offer) crosses the NBO (NBB) by more than a number of ticks specified by the Exchange. If C2 is not at the NBO (NBB), the System rejects a quote back to a Market-Maker if the quote bid (offer) locks or crosses the NBO (NBB). If the NBBO is unavailable, locked, or crossed, then this check compares the quote to the BBO (if available). The rule is currently silent on what happens if the BBO is unavailable.

The Exchange has now proposed to amend Rule 6.17(e) to not apply this check to incoming quotes when the BBO is unavailable. The Exchange also proposed to amend the rule to state that it will not apply the check to incoming quotes prior to the opening of a series if the series is not open on another exchange, as well as during a trading halt.[24]

F. Execution of Quotes that Lock or Cross NBBO

The Exchange further proposed to amend the provision concerning the execution of quotes that lock or cross

[12] *See id.* at 76673.

[13] *See* proposed C2 Rule 6.17(b). A stop contingency is triggered for a buy order if there is a last sale or bid at or above the stop price and for a sell order if there is a last sale or offer at or below the stop price.

[14] *See* Notice, *supra* note 3 at 76673.

[15] *See id.*

[16] Currently, the Exchange applies the market-width check to market orders and the drill through check to market and marketable limit orders. The Exchange proposed to codify this current practice into the rules. *See* Notice, *supra* note 3, at 76673 n.12.

[17] Currently, the ATD is determined by the Exchange on a series-by-series and premium basis for market orders and/or marketable limit orders and may be no less than two minimum increment ticks. Under the proposed rule change, the Exchange will determine the ATD on a class and premium basis (which may be no less than two minimum increment ticks), which the Exchange will announce via Regulatory Circular. *See* proposed C2 Rule 6.17(a)(2)(A).

[18] *See* C2 Rule 6.17(c).

[19] Currently, the Exchange has not activated HAL or SAL in any class. *See* Notice, *supra* note 3, at 76673 nn.13 and 15.

[20] Specifically, if a buy (sell) order not yet exposed via HAL partially executes, and the System determines the unexecuted portion would execute at a price higher (lower) than the price that is an ATD above (below) the NBO (NBB) (''drill through price''), the System will not automatically execute the remaining portion but will instead expose it via HAL at the better of the NBBO and the drill through price (if eligible for HAL). If a buy (sell) order exposed via HAL (other than pursuant to the previous sentence) or the Solicitation Auction Mechanism (''SAL'') would, following the exposure period, execute at a price higher (lower) than the drill through price, the System will not automatically execute the order (or unexecuted portion). These orders (or unexecuted portions) will rest in the book (based on the time at which they enter the book for priority purposes) for a time period in milliseconds with a price equal to the drill through price. The Exchange will determine the time period (not to exceed three seconds) and announce it via Regulatory Circular in the event the Exchange activates HAL or SAL. *See* Notice, *supra* note 3, at 76674. If the order (or any unexecuted portion) does not execute during that time period, the System cancels it. In classes in which the Exchange activated SAL, an order eligible for SAL would be exposed immediately and would not partially execute prior to being exposed via SAL. For this reason, SAL is not included in proposed C2 Rule 6.17(a)(2)(A). *See* Notice, *supra* note 3, at 76673 n. 15. Any order (or unexecuted portion) that by its terms cancels if it does not execute immediately (including immediate-or-cancel, fill-or-kill, intermarket sweep, and market-maker trade prevention orders) will be cancelled rather than rest in the book for this time period in accordance with the definition of those order types. *See* proposed C2 Rule 6.17(a)(2)(C).

[21] The proposed rule change also amended the market width price check parameter in C2 Rule 6.17(a)(1) to be determined on a class-by-class basis rather than series-by-series, as well as made additional non-substantive changes to Rule 6.17(a)(1), such as moving provisions regarding the market-width price check parameter from current paragraph (c) to proposed subparagraph (a)(1).

[22] *See* Notice, *supra* note 3 at 76675. *See also, e.g.,* Miami International Securities Exchange, LLC (''MIAX'') Rule 500; NASDAQ OMX BX, Inc. (''BX'') Chapter VI, Section 20; NYSE Arca, Inc. (''Arca'') Rule 6.2A(a); NYSE MKT LLC (''MKT'') Rule 902.1NY(a); and NASDAQ OMX PHLX LLC (''PHLX'') Rule 1016.

[23] The Exchange will not apply these checks to market orders that execute during the opening process, however, in order to avoid impacting the determination of the opening price. According to the Exchange, separate price protections apply during the opening process, including the drill through protection in C2 Rule 6.11. *See* Notice, *supra* note 3, at 76675.

[24] *See* proposed C2 Rule 6.17(e)(2) and (3).

the NBBO.[25] The rule currently states that if the System accepts a quote that locks or crosses the NBBO, it executes the quote and either (i) cancels any remainder or (ii) books any remainder if the price of the quote does not lock or cross the price of an away exchange.

The Exchange has now proposed to amend the rule to not apply the check when the NBBO is locked, crossed, or unavailable.[26] In addition, the Exchange proposed to authorize a senior official at the Exchange's Help Desk to determine not to apply this check in the interest of maintaining a fair and orderly market. For example, the Exchange believes it is appropriate to disable this check in response to a market event or market volatility to avoid inadvertently cancelling quotes not erroneously priced but rather priced to reflect potentially rapidly changing prices.[27]

G. Order Entry, Execution, and Price Parameter Checks

The Exchange proposed to adopt the following four mandatory activity-based risk protections under proposed C2 Rule 6.17(g): [28]

(i) the total number of orders (of all order types) and auction responses entered and accepted by the System (''orders entered'');

(ii) the total number of contracts (from orders and auction responses) executed on the System, which does not count stock contracts executed as part of stock-option orders (''contracts executed'');

(iii) the total number of orders the System books or cancels [29] pursuant to the drill through price check parameter (as amended by this proposed rule change) in proposed Rule 6.17(a)(2) (''drill through events''); and

(iv) the total number of orders the System cancels pursuant to the limit order price parameters in Rules 6.13, Interpretation and Policy .04(f) and (g), and 6.17(b) (''price reasonability events'').

When a TPH exceeds a parameter within one of the time intervals set by C2, the System will (i) reject all subsequent incoming orders and quotes, (ii) cancel all resting quotes, and (iii) for the orders entered and contracts executed checks, if the TPH requests, cancel resting orders in the manner specified by the TPH (either all orders, orders with time-in-force of day, or orders entered on that trading day).[30]

The System will not accept new orders or quotes from a restricted acronym or login until the Exchange receives the TPH's manual notification to reactivate its ability to send orders and quotes. While an acronym or login is restricted, a TPH may continue to interact with any resting orders (*i.e.,* orders not cancelled pursuant to this protection) entered prior to its acronym or login becoming restricted, including receiving trade execution reports and canceling resting orders.

H. Maximum Contract Size

The Exchange proposed to adopt a maximum contact size risk control pursuant to which the System will reject a TPH's incoming order or quote (including both sides of a two-sided quote) if its size exceeds the TPH's designated maximum contract size parameter.[31] Each TPH must provide a maximum contract size for each of simple orders, complex orders, and quotes applicable to an acronym or, if the TPH requests, a login.[32]

I. Kill Switch

The Exchange further proposed to adopt a kill switch, which will be on optional tool allowing a TPH to send a message to the System to, or contact the Exchange Help Desk to request that, the Exchange cancel all its resting quotes, resting orders (either all orders, orders with time-in-force of day, or orders entered on that trading day), or both, and thereafter reject all subsequent incoming quotes and/or orders.[33] The System will send a TPH an automated message when it has processed a kill switch request and thereafter will not accept new orders or quotes from a restricted acronym or login until the Exchange receives the TPH's manual notification to reactivate its ability to send orders and quotes.

According to the Exchange, the kill switch message will be accepted by the System in the order of receipt in the queue and will be processed in that order so that interest already in the System will be processed prior to the kill switch message.[34] Moreover, a Market-Maker's utilization of the kill switch, and subsequent removal of its quotes, will not diminish or relieve the Market-Maker of its obligation to provide continuous two-sided quotes. Market-Makers will continue to be required to provide continuous two-sided quotes on a daily basis, and a Market-Maker's utilization of the kill switch will not prohibit the Exchange from taking disciplinary action against the Market-Maker for failing to meet the continuing quoting obligation each trading day.[35]

J. Quote Risk Monitor Mechanism

Lastly, the Exchange proposed to amend the QRM Mechanism in C2 Rule 8.12. Pursuant to the QRM mechanism, a Market-Maker may establish a (i) maximum number of contracts, (ii) a maximum cumulative percentage of the original quoted size of each side of each series, and (iii) the maximum number of series for which either side of its quote is fully traded, that may trade within a rolling time period in milliseconds also established by the Market-Maker. When these parameters are exceeded within the time interval, the System cancels the Market-Maker's quotes in the class and other classes with the same underlying. In addition, C2 Rule 8.12 allows Market-Makers or TPH organizations to specify

[25] The Exchange proposed to move this provision from current C2 Rule 6.17(e)(iii) to proposed C2 Rule 6.17(f).

[26] *See* Notice, *supra* note 3, at 76676.

[27] *See id.* The Exchange represented that, pursuant to Exchange procedures, any decision to not apply the check and the reason for such decision will be documented, retained, and periodically reviewed. *See id.*

[28] Other exchanges maintain similar activity-based risk protections. *See, e.g.,* International Securities Exchange, LLC (''ISE'') Rule 714(d) and MIAX Rule 519A.

[29] As discussed above, orders (or unexecuted portions) that by their terms cancel if they do not execute immediately will be cancelled rather than rest in the book for a period of time (as proposed in this filing) pursuant to the drill through price check parameter if triggered. According to the Exchange, because these orders will not book or be cancelled pursuant to the drill through price check parameter (but rather because of their terms), these orders will not be included in the count for the drill through event check. *See* Notice, *supra* note 3, at 76676 n.32.

[30] The Exchange expects the initial time intervals for all these checks to be set at one and five minutes. The time intervals set by the Exchange will apply to all TPHs, who will not be able to change these time intervals. *See* Notice, *supra* note 3, at 76676 n.33.

[31] *See* proposed C2 Rule 6.17(h). The Exchange represented that other options exchanges have adopted similar functionality. *See* Notice, *supra* note 3, at 76678 n.40; MIAX Rule 519(b).

[32] For purposes of determining the contract size of an incoming order or quote, the proposed rule states the contract size of a complex order will equal the contract size of the largest option leg of the order (*i.e.,* if the order is a stock-option order, this check will not apply to the stock leg of the order). *See* proposed C2 Rule 6.17(h). If a TPH enters an order or quote to replace a resting order or update a resting quote, and the System rejects the incoming order or quote because it exceeds the applicable maximum contract size, the System also will cancel the resting order or any resting quote in the same series. In addition, the Exchange proposed to apply this check to paired orders submitted to AIM or SAM. Further, the Exchange proposed that for an A:AIR order, if the System rejects the agency order, then the System rejects the contra-side order; however, if the System rejects the contra-side order, the System still accepts the agency order. *See* proposed C2 Rule 6.17(h)(2).

[33] *See* proposed C2 Rule 6.17(i). The Exchange represented that other options exchanges have adopted similar kill switches. *See* Notice, *supra* note 3, at 76678; BOX Options Exchange LLC (''BOX'') Rule 7280 and PHLX Rule 1019(b).

[34] *See* Notice, *supra* note 3 at 76681.

[35] *See id.*

a maximum number of QRM incidents across all classes on an Exchange-wide basis. When the Exchange determines that a Market-Maker or TPH organization has reached its QRM incident limit during the rolling time interval, the System will cancel all of the Market-Maker's electronic quotes and Market-Maker orders resting in the book in all option classes on the Exchange and prevent the Market-Maker or TPH organization from sending additional quotes or orders to the Exchange until the Market-Maker reactivates its ability to send quotes or orders.

Currently, use of the QRM is optional. The Exchange proposed to amend C2 Rule 8.12 to make it mandatory for Market-Makers to enter values for each parameter for all classes in which they quote.[36]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of Section 6 of the Act [37] and the rules and regulations thereunder applicable to the Exchange.[38] Specifically, the Commission finds that the proposed rule change is consistent with the Section 6(b)(5) [39] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Commission believes that the proposed rule change is designed to mitigate the likelihood of orders trading at potentially erroneous prices, clarify when certain price/risk controls will apply, and assist TPHs in managing their risk exposure to avoid potentially harmful and disruptive trading. Moreover, the Commission notes that it recently approved proposed rule changes to CBOE rules that are substantially similar to the C2 proposed rule changes that are the subject of this Order.[40]

As discussed above, C2 is proposing to amend its limit order price parameter for simple orders to use the NBBO when available in lieu of the Exchange's previous day's closing price or BBO. To the extent that the use of the NBBO, when available, rather than the Exchange's previous day's closing price or BBO, may better reflect the then current market, it should provide a suitable measure for purposes of determining the reasonability of the prices of orders. Moreover, the Commission believes that it is reasonable for C2 to exclude orders with a stop contingency from the limit order price check parameter, as application of the limit order price check parameter to such orders may interfere with the application of the stop contingency.

Further, the Commission believes that the proposed rule change to expand the applicability of the put strike price and call underlying value checks to market orders [41] may help TPHs mitigate risks associated with orders trading at prices that exceed a corresponding benchmark, which may indicate an execution at a price that is potentially erroneous.

The proposed changes to the drill through price checks provide additional detail to the rule regarding how the System will handle certain orders in the event that the Exchange activates HAL or SAL, such as orders that were not exposed prior to trading up to the drill through price and orders that traded up to the drill through price following exposure. In addition, allowing the remainder of orders to rest in the book for a brief time period at the drill through price may benefit investors by providing an additional opportunity for execution of their orders. Furthermore, clarifying that an order exposed via HAL pursuant to the drill through price check will not be exposed at a price worse than the NBBO is consistent with the current treatment of other orders exposed via HAL at the NBBO.[42]

The Commission also believes that the proposed amendments to the quote inverting NBBO check will provide market participants with greater clarity that C2 will not apply the check in the absence of an NBBO or BBO. In addition, the proposed rule change eliminates the Exchange's flexibility to apply the check prior to the opening of a series as well as during a trading halt. Removing this flexibility and clearly stating when C2 will not apply the check considerably enhances the transparency of the functionality.

With respect to C2's proposed changes regarding the execution of quotes that lock or cross the NBBO (Proposed Rule 6.17(f)), the Commission believes that the proposed rule change to not apply the check when the NBBO is locked, crossed or unavailable, and to allow the Exchange to disable this check in the interest of maintaining a fair and orderly market, will prevent the System from cancelling quotes when there is no reliable benchmark or when prices on quotes may not be erroneous but rather reflect a rapidly changing market. Moreover, to the extent the Exchange determines to temporarily deactivate the check in the interest of maintaining a fair and orderly market, C2 has represented that all such decisions by C2 will be adequately justified, documented, retained, and periodically reviewed.[43]

Further, the Commission believes that the Exchange's proposed risk protection parameters and mechanisms for orders and quotes are reasonably designed to provide TPHs with additional tools to assist them in managing their risk exposure. Specifically, the order entry, execution, and price parameter rate checks, maximum contract size risk control, and mandatory use of the QRM may help TPHs to mitigate the potential risks associated with entering too many orders or quotes, executing too many contracts, having too many orders cancelled because of price protection parameters, and entering orders or quotes with size that may be potentially erroneous that may result from, for example, technology issues with the broker's electronic trading system. To this extent, these TPH-customizable settings may help act as a backstop to the TPH's own controls and provide an additional layer of protection customized to the TPH's self-selected parameters. In addition to the CBOE filing mentioned above, the Commission notes that other exchanges have established similar risk protection mechanisms.[44] The Commission notes that the proposed functionality, including the cancellation of any resting interest, must be processed in sequence with other interest in the System and

[36] The Exchange represented that other options exchanges have made similar functionality mandatory for all Market-Makers. *See* Notice, *supra* note 3, at 76679; ISE Rule 804(g).

[37] 15 U.S.C. 78f(b).

[38] In approving these proposed rule changes, the Commission has considered the proposed rules' impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[39] 15 U.S.C. 78f(b)(5).

[40] *See* Securities Exchange Act Release No. 79244 (November 4, 2016), 81 FR 79063 (November 10, 2016) (approving CBOE proposed rule changes relating to price protection mechanisms and risk controls).

[41] The checks will not apply to market orders during an opening rotation since separate price protections will apply during the opening process. *See* Notice, *supra* note 3, at 76680.

[42] *See* current and proposed C2 Rule 6.18(b).

[43] *See supra* note 27 and accompanying text.

[44] *See* ISE Rules 714(d) & 804(g); MIAX Rules 519(b) & 519A.

comply with the firm quote obligations in Rule 602 of Regulation NMS.

C2 will require TPHs and Market-Makers to utilize these risk protection parameters and mechanisms. However, TPHs and Market-Makers will have discretion to customize the parameters in accordance with their respective risk management needs. In light of this flexibility, the Commission reminds TPHs to be mindful of their obligations, to among others, seek best execution of orders they handle on an agency basis and consider their best execution obligations when establishing parameters for the order entry, execution, price parameter rate checks, maximum contract size risk control, and QRM.[45] For example, an abnormally low order entry parameter should be carefully scrutinized, particularly if a TPH's order flow to the Exchange contains agency orders. To the extent that a TPH chooses sensitive parameters and those parameters apply to connections over which it transmits customer orders to the Exchange, a TPH should consider the effect of its chosen settings on its ability to receive a timely execution on marketable agency orders that it sends to the Exchange in various market conditions. The Commission cautions brokers considering their best execution obligations to be aware that an agency order they represent may be rejected as a result of these risk protections.

In addition, in light of the Exchange's decision not to set maximum or minimum values, or default values, the Commission expects C2 to periodically assess whether these risk protection measures are operating in a manner that is consistent with the promotion of fair and orderly markets, including whether not utilizing maximum and minimum parameters or default values continues to be appropriate and in accordance with the Act and the rules thereunder.

Further, the Commission believes that Proposed Rule 6.17(i), which creates an optional kill switch mechanism, is consistent with the Act as it may further enhance risk management capabilities of TPHs by providing them with the ability to manage their risk exposure if they experience a significant system failure. To the extent that the kill switch mechanism provides TPHs with an appropriate backstop in this manner, it may encourage firms to provide liquidity on C2 and thus contribute to fair and orderly markets in a manner that protects investors and the public interest. The Commission notes that the Exchange represented in its proposal that the kill switch will operate consistently with a broker-dealer's firm quote obligations pursuant to Rule 602 of Regulation NMS,[46] and that the kill switch does not diminish or relieve a Market-Maker of its obligation to provide continuous two-sided quotes.[47] The Exchange also represented that the kill switch message will be accepted by the System in the order of receipt in the queue and will be processed in such order. As such, the System will process interest already in the System prior to receipt of the kill switch message prior to processing the kill switch message.[48] Based on these representations, the Commission believes that the kill switch is reasonably designed to promote just and equitable principles of trade and perfect the mechanism of a free and open market. Lastly, the Commission notes that in addition to the CBOE filing mentioned above, other exchanges have established kill switches that operate in a manner similar to that proposed by C2.[49]

Finally, the Commission believes that the proposal to authorize C2 to share with Clearing TPHs the risk mitigation settings selected by a TPH for whom the Clearing TPH clears may assist Clearing TPHs manage their clearing risk exposure. In addition to the CBOE filing mentioned above, the Commission notes that other exchanges have adopted similar rules authorizing the sharing of similar risk settings with clearing members.[50]

IV. Conclusion

It Is therefore ordered, pursuant to Section 19(b)(2) of the Act,[51] that the proposed rule change (SR–C2–2016–020), be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[52]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79546; File No. SR–NASDAQ–2016–165]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4770 (Compliance With Regulation NMS Plan To Implement a Tick Size Pilot)

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 30, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Nasdaq Rule 4770 to modify the Web site data publication requirements relating to the Regulation NMS Plan to Implement a Tick Size Pilot Program (''Plan'') and to clarify the timing and format of publishing Market Maker registration statistics.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On August 25, 2014, Nasdaq, and several other self-regulatory organizations (the ''Participants'') filed with the Commission, pursuant to Section 11A of the Act [3] and Rule 608 of Regulation NMS thereunder,[4] the Plan to Implement a Tick Size Pilot Program.[5] The Participants filed the Plan to comply with an order issued by the Commission on June 24, 2014.[6] The Plan was published for comment in the **Federal Register** on November 7, 2014, and approved by the Commission, as modified, on May 6, 2015.[7] The Commission approved the Pilot on a two-year basis, with implementation to begin no later than May 6, 2016.[8] On November 6, 2015, the SEC exempted the Participants from implementing the Pilot until October 3, 2016.[9] Under the revised Pilot implementation date, the Pre-Pilot data collection period commenced on April 4, 2016. On September 13, 2016, the SEC exempted the Participants from the requirement to fully implement the Pilot on October 3, 2016, to permit the Participants to implement the pilot on a phased-in basis, as described in the Participants' exemptive request.[10]

The Plan is designed to allow the Commission, market participants, and the public to study and assess the impact of increment conventions on the liquidity and trading of the common stock of small-capitalization companies. Each Participant is required to comply, and to enforce compliance by its member organizations, as applicable, with the provisions of the Plan.

Nasdaq adopted rule amendments to implement the requirements of the Plan, including relating to the Plan's data collection requirements and requirements relating to Web site data publication.[11] Specifically, with respect to the Web site data publication requirements pursuant to Section VII and Appendices B and C to the Plan, Nasdaq Rule 4770(b)(2)(B) provides, among other things, that Nasdaq shall make the data required by Items I and II of Appendix B to the Plan, and collected pursuant to paragraph (b)(2) of Rule 4770, publicly available on the Nasdaq Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. Nasdaq Rule 4770(b)(3)(C), provides, among other things, that Nasdaq shall make the data required by Item IV of Appendix B to the Plan, and collected pursuant to paragraph (b)(3) of Rule 4770, publicly available on the Nasdaq Web site on a monthly basis at no charge and shall not identify the Trading Center that generated the data. Commentary .08 to Rule 4770 provides, among other things, that the requirement that Nasdaq make certain data publicly available on the Nasdaq Web site pursuant to Appendix B and C to the Plan shall commence at the beginning of the Pilot Period.

Nasdaq is proposing amendments to Rule 4770(b)(2)(B) (regarding Appendix B.I and B.II data) and Rule 4770(b)(3)(C) (regarding Appendix B.IV data) to provide that data required to be made available on Nasdaq's Web site be published within 120 calendar days following month end. In addition, the proposed amendments to Commentary .08 to Rule 4770 would provide that, notwithstanding the provisions of paragraphs (b)(2)(B), (b)(3)(C) and (b)(5), Nasdaq shall make data for the Pre-Pilot period publicly available on the Nasdaq Web site pursuant to Appendix B and C to the Plan by February 28, 2017.[12]

The purpose of delaying the publication of the Web site data is to address confidentiality concerns by providing for the passage of additional time between the market information reflected in the data and the public availability of such information.

Nasdaq also proposes to amend Rule 4770(b)(5), which relates to the collection and transmission of Market Maker registration statistics. Currently, Rule 4770(b)(5) provides that the Exchange shall collect and transmit to the SEC the data described in Item III of Appendix B of the Plan relating to daily Market Maker registration statistics in a pipe delimited format within 30 calendar days following month end for (1) transactions in each Pre-Pilot Data Collection Security for the period beginning six months prior to the Pilot Period through the trading day immediately preceding the Pilot Period; and (2) transactions in each Pilot Security for the period beginning on the first day of the Pilot Period through six months after the end of the Pilot Period. Although the Plan requires that such data be made publicly available,[13] Rule 4770(b)(5) does not currently include a provision requiring the Exchange to publish such data to its Web site. The Exchange therefore proposes to amend Rule 4770(b)(5) to provide that the Exchange shall make Market Maker registration data publicly available on the Exchange Web site within 120 calendar days following month end at no charge.

Nasdaq has filed the proposed rule change for immediate effectiveness and has requested that the Commission waive the 30-day operative delay. If the Commission waives the 30-day operative delay, the operative date of the proposed rule change will be the date of filing.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, because it is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan and is in furtherance of the objectives of the Plan, as identified by the SEC.

In approving the Plan, the Commission recognized that requiring the publication of Market Maker data may raise confidentiality concerns, especially for Pilot Securities that may

[10] *See* Letter from David S. Shillman, Associate Director, Division of Trading and Markets, Commission, to Eric Swanson, EVP, General Counsel and Secretary, Bats Global Markets, Inc., dated September 13, 2016; *see also* Letter from Eric Swanson, EVP, General Counsel and Secretary, Bats Global Markets, Inc., to Brent J. Fields, Secretary, Commission, dated September 9, 2016.

[11] *See, e.g.,* Securities Exchange Act Release No. 77456 (March 28, 2016), 81 FR 18925 (April 1, 2016) (SR–NASDAQ–2016–043); *see also* Letter from David S. Shillman, Associate Director, Division of Trading and Markets, Commission, to Marcia E. Asquith, Senior Vice President and Corporate Secretary, FINRA, dated February 17, 2016.

[12] With respect to data for the Pilot Period, the requirement that Nasdaq make data publicly available on the Nasdaq Web site pursuant to Appendix B and C to the Plan shall continue to commence at the beginning of the Pilot Period. Thus, the first Web site publication date for Pilot Period data (covering October 2016) would be published on the Nasdaq Web site by February 28, 2017, which is 120 days following the end of October 2016.

[13] *See* Section VII.A. 4 of the Plan.

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

have a relatively small number of designated Market Makers.[16] For this reason, the Commission modified the Plan so that the data that would be made publicly available would not contain profitability measures for each security, but would be aggregated by the Control Group and each Test Group. Nasdaq believes that this proposal is consistent with the Act in that it is designed to address confidentiality concerns by permitting Nasdaq to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information. With respect to the change to Rule 4770(b)(5), Nasdaq believes this change will clarify the timing and format of publishing Market Maker registration statistics.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Nasdaq notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan.

The proposal is intended to address confidentiality concerns that may adversely impact competition, especially for Pilot Securities that may have a relatively small number of designated Market Makers, by permitting Nasdaq to delay Web site publication to provide for passage of additional time between the market information reflected in the data and the public availability of such information. The proposal also does not alter the information required to be submitted to the SEC.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.[17]

[16] *See* Approval Order at 27543–27544.

[17] Nasdaq notes that Financial Information Forum (FIF) submitted a letter to the staff of the Commission raising concerns regarding the publication of certain Appendix B statistics on a disaggregated basis using a unique masked market participant identifier. *See* Letter from Mary Lou Von Kaenel, Managing Director, FIF, to David S. Shillman, Associate Director, Division of Trading and Markets, Commission, dated August 16, 2016, available at *https://www.fif.com/comment-letters.*

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6) [20] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[21] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. In this filing, the Exchange has asked that the Commission waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing.

The Exchange notes that the proposed rule change implements the provisions of the Plan, and is designed to assist the Participants in meeting their regulatory obligations pursuant to the Plan. The proposal is intended to address confidentiality concerns by permitting the Exchange to delay Web site publication to provide for passage of additional time between the market information reflected in the data and public availability of such information. The proposal does not alter the information required to be submitted to the Commission.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the Exchange to implement these proposed changes that are intended to address confidentiality concerns. The Commission notes that some Pilot data was scheduled to be published on November 30, 2016. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative on November 30, 2016.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b–4(f)(6).

[20] *Id.*

[21] 17 CFR 240.19b–4(f)(6)(iii).

[22] For purposes only of waiving the operative delay for this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–165 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–165. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions

should refer to File Number SR–NASDAQ–2016–165 and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79556; File No. SR–NASDAQ–2016–167]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify Distributor Fees for ITTO and BONO Data Feeds

December 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on December 2, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Chapter XV of the Options Rules for the Nasdaq Stock Market, entitled ''Options Pricing,'' at Section 4, which governs Nasdaq Options Market (''NOM'') data distributor fees. Specifically, the Exchange proposes to separate the distributor fees for the ITCH [3] to Trade Options (''ITTO'') and Best of Nasdaq Options (''BONO'') data feeds, which are now charged as a single fee, into two separate fees, and conforming language to clarify that there will be no change to the Monthly Non-Display Enterprise License for ITTO and BONO. The proposal is described further below.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to separate the distributor fees for the ITTO and BONO data feeds, which are now charged together as a single fee, into two separate fees.

ITTO and BONO are proprietary data feeds designed to facilitate trading in options markets. ITTO provides in-depth quote and order information, last sale information, and Net Order Imbalance (''NOI'') data for NOM. BONO provides top-of-market data for NOM, including best bid and offer and last sale information. The information provided in BONO can be derived from ITTO. Customers typically purchase either ITTO or BONO, but not both.

Nasdaq currently charges a monthly distributor fee of $1,500 for the internal distribution of either ITTO or BONO or both, and a monthly external distributor fee of $2,000 for the external distribution of either or both feeds. Nasdaq also offers an enterprise license for BONO and ITTO for a monthly fee of $10,000.

Proposed Changes

The Exchange proposes to separate the internal and external distributor fees for ITTO and BONO. After the proposed changes take effect, a firm that distributes either ITTO or BONO, but not both, will be charged the current fee. A firm that elects to distribute both ITTO and BONO, however, will be charged a fee for the distribution of ITTO and a separate fee for the distribution of BONO. The proposal will not affect the other fees associated with ITTO and BONO: the monthly external and internal per user fees and the monthly enterprise license fee will remain the same.

The proposed fee change is reasonable and necessary because of the increase in the value of ITTO and BONO to customers resulting from the growth in NOM listings and recent infrastructure upgrades. NOM listings have increased from 663 in June of 2011 to over 2,800 today—over a 300 percent increase—while NOM's market share has jumped more than 250 percent between July of 2011 and November of 2016, according to data from the Options Clearing Corporation. In addition, in August of 2016, NOM commenced a market-wide technology refresh for several options systems, including ITTO and BONO, to provide a more efficient and robust infrastructure for options trading. The increase in the value of ITTO and BONO to customers generated by the growth in NOM and infrastructure investments, together with Nasdaq's reasonable objective to recoup costs associated with the growth of NOM and infrastructure investments, justify the proposed price increase.

The impact of the proposed change on firms that use BONO and ITTO will be minimal. Because BONO data is a subset of ITTO, most firms buy either ITTO or BONO, but not both. To the extent that firms use both BONO and ITTO, the higher fee is reasonable in light of the higher demands placed on Nasdaq's infrastructure by those firms.

The proposed changes do not affect the enterprise license fee for BONO and ITTO. The Nasdaq Options Rules, Chapter XV, Section 4(a), currently present the Monthly Enterprise License (Non-Display) Fee of $10,000 in the same chart that sets forth the distributor fees for ITTO and BONO. To avoid implying that the enterprise license fee for ITTO and BONO will be separated as well, the Exchange proposes taking the enterprise license fee out of that chart, and placing it in a separate paragraph under Section 4(a).

The new paragraph will not change current fees: the $10,000 per month enterprise license fee will permit the distribution of BONO and ITTO as provided in Section 4(c), and the fee will be in addition to the monthly distributor fees set forth in Section 4(a). This is consistent with the current rule and practice.

The ITTO and BONO internal and external distributor fees are entirely optional in that they apply only to firms that opt to distribute ITTO and BONO. The proposed changes do not impact or raise the cost of any other Nasdaq product.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b)

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] ITCH is a direct data feed interface for NOM.

of the Act,[4] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[5] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [6]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [7] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[8] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [9]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers' . . . .'' [10] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange believes that the proposed separation of distributor fees for the ITTO and BONO data feeds is fair and equitable in accordance with Section 6(b)(4) of the Act, and not unreasonably discriminatory in accordance with Section 6(b)(5) of the Act. As described above, the proposed change in fees is reasonable and necessary to reflect the growing value of these products to customers and to offset the cost of systems upgrades and greater data demands resulting from growing NOM listings.

The Exchange believes that the proposed changes are reasonable and will benefit the investing public by supporting the distribution of these products and encouraging investment in infrastructure. Moreover, the fees for ITTO and BONO, like all proprietary data fees, are constrained by the Exchange's need to compete for order flow, and are subject to competition from other products and among distributors of ITTO and BONO data for customers.

The Exchange believes that the proposed change in fees is an equitable allocation and is not unfairly discriminatory because the Exchange will apply the same fee to all similarly-situated distributors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes establish separate monthly internal and external distributor fees for BONO and ITTO, which are justified by the increasing value of the product and the greater data demands created by growing NOM listings and a technology refresh for the options market. If the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

Specifically, market forces constrain fees for ITTO and BONO in three respects. First, all fees related to ITTO and BONO are constrained by competition among exchanges and other entities attracting order flow. Firms make decisions regarding proprietary data based on the total cost of interacting with the Exchange, and order flow would be harmed by the supracompetitive pricing of any proprietary data product. Second, prices for ITTO and BONO are constrained by the existence of substitutes that are offered, or may be offered, by other entities. Third, competition among options market data distributors will further constrain the cost of ITTO and BONO.

Competition for Order Flow

Fees related to ITTO and BONO are constrained by competition among exchanges and other entities seeking to attract order flow. Order flow is the ''life blood'' of the exchanges. For a variety of reasons, competition from new entrants, especially for order execution, has increased dramatically over the last decade, as demonstrated by the proliferation of new options exchanges such as ISE Mercury, BATS EDGX, ISE Gemini and MIAX Options within the last four years. Each options exchange is permitted to produce proprietary data products.

The markets for order flow and proprietary data are inextricably linked: a trading platform cannot generate market information unless it receives trade orders. As a result, the competition for order flow constrains the prices that platforms can charge for proprietary data products. Firms make decisions on how much and what types of data to consume based on the total cost of interacting with Nasdaq and other exchanges. Data fees are but one factor in a total platform analysis. If the cost of the product exceeds its expected value, the broker-dealer will choose not to buy it. A supracompetitive increase in the fees charged for either transactions or proprietary data has the potential to impair revenues from both products. In this manner, the competition for order flow will constrain prices for proprietary data products.

Substitute Products

The price of depth-of-book data is constrained by the existence of multiple substitutes offered by numerous entities, including both proprietary data offered by other SROs or other entities, and non-proprietary data disseminated by the Options Price Reporting Authority, LLC (''OPRA''). OPRA is a securities information processor that disseminates last sale reports and quotations, as well as the number of options contracts traded, open interest and end-of-day summaries. As noted above, ITTO provides in-depth quote and order information, last sale information, and NOI data, while BONO provides best bid and offer and last sale information.

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(4) and (5).

[6] Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[7] *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[8] *See NetCoalition,* at 534—535.

[9] *Id.* at 537.

[10] *Id.* at 539 (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

Many customers that obtain information from OPRA do not also purchase ITTO and BONO, but in cases where customers buy both products, they may shift the extent to which they purchase one or the other based on price changes. OPRA constrains the price of ITTO and BONO because no purchaser would pay an excessive price for these products when similar data is also available from OPRA. It is not necessary that products be identical in order to be reasonable substitutes for each other.

Proprietary data sold by other exchanges also constrain the price of ITTO and BONO. NYSE, BATS and CBOE, like Nasdaq, sell proprietary data for options markets. Other proprietary data products constrain the price of ITTO and BONO because no customer would pay an excessive price for these products when substitute data is available from other proprietary sources.

Competition Among Distributors

Distributors provide another form of price discipline for proprietary data products because they control the primary means of access to users. Distributors are in competition for users, and can simply refuse to purchase any proprietary data product that fails to provide sufficient value for the price. Nasdaq and other producers of proprietary data products must understand and respond to the needs of distributors to market such products successfully.

In summary, market forces constrain the price of depth-of-book data such as ITTO and BONO through competition for order flow, competition from similar products, and in the competition among distributors for customers. For these reasons, the Exchange has provided a substantial basis demonstrating that the fee is equitable, fair, reasonable, and not unreasonably discriminatory, and therefore consistent with and in furtherance of the purposes of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–167 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–167. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2016–167, and should be submitted on or before January 10, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Robert W. Errett,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

AGENCY: Small Business Administration.

ACTION: Notice of 30 day Reporting Requirements Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATES: Submit comments on or before January 19, 2017. If you intend to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

ADDRESSES: Address all comments concerning this notice to: *Agency Clearance Officer,* Curtis Rich, Small Business Administration, 409 3rd Street SW., 5th Floor, Washington, DC 20416; and *OMB Reviewer,* Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Curtis Rich, Agency Clearance Officer, (202) 205–7030 *curtis.rich@sba.gov.*

SUPPLEMENTARY INFORMATION:

Copies: Request for clearance (OMB 83–1), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer.

Abstract: The information collected on SBA Form 480, ''Size Status Declaration'' is a certification of small business size status. This information collection is used to determine whether SBDC financial assistance is provided only to small business concerns as defined in the Small Business Investment Act and SBA size regulations. Without this certification, businesses that exceed SBA's size standards could benefit from program resources meant for small businesses.

Title: Size Status Declaration.

Frequency: On Occasion.

SBA Form Number: 480.

Description of Respondents: Investment Companies.

Responses: 1,705.

Annual Burden: 417.

Curtis Rich,

Management Analyst.

BILLING CODE P

DEPARTMENT OF STATE

[Public Notice 9820]

Overseas Schools Advisory Council Notice of Meeting

The Overseas Schools Advisory Council, Department of State, will hold its Executive Committee Meeting on Thursday, January 26, 2017, at 9:30 a.m. in conference room 1482, Marshall Center, Department of State Building, 2201 C Street NW., Washington, DC. The meeting is open to the public and will last until approximately 12:00 p.m.

The Overseas Schools Advisory Council works closely with the U.S. business community to improve American-sponsored schools overseas that are assisted by the Department of State and attended by dependents of U.S. government employees, and children of employees of U.S. corporations and foundations abroad.

This meeting will deal with issues related to the work and support provided by the Overseas Schools Advisory Council to the American-sponsored overseas schools. There will be a report and discussion about the status of the Council-sponsored projects such as The World Virtual School and The Child Protection Project. The Regional Education Officers in the Office of Overseas Schools will make presentations on the activities and initiatives in the American-sponsored overseas schools.

Members of the public may attend the meeting and join in the discussion, subject to the instructions of the Chair. Admittance of public members will be limited to the seating available. Access to the State Department is controlled, and individual building passes are required for all attendees. Persons who plan to attend should advise the office of Dr. Keith D. Miller, Department of State, Office of Overseas Schools, telephone 202–261–8200, prior to January 15, 2017. Each visitor will be asked to provide his/her date of birth and either a driver's license or passport number at the time of registration and attendance, and must carry a valid photo ID to the meeting.

Personal data is requested pursuant to Public Law 99–399 (Omnibus Diplomatic Security and Antiterrorism Act of 1986), as amended; Public Law 107–56 (USA PATRIOT Act); and Executive Order 13356. The purpose of the collection is to validate the identity of individuals who enter Department facilities. The data will be entered into the Visitor Access Control System (VACS–D) database. Please see the Security Records System of Records Notice (State-36) at *http://foia.state.gov/_docs/SORN/State-36.pdf* for additional information.

Any requests for reasonable accommodation should be made at the time of registration. All such requests will be considered, however, requests made after January 15, 2017, might not be possible to fill. All attendees must use the 21st Street entrance to the building.

Keith D. Miller,

Executive Secretary, Overseas Schools Advisory Council.

BILLING CODE 4710–24–P

SURFACE TRANSPORTATION BOARD

[Docket No. MCF 21074]

Monarch Ventures Inc.—Acquisition of Control—Quick Coach Lines Ltd. and Vancouver Tours and Transit Ltd. D/B/A Charter Bus Lines of British Columbia

AGENCY: Surface Transportation Board.

ACTION: Notice Tentatively Approving and Authorizing Finance Transaction.

SUMMARY: On November 21, 2016, Monarch Ventures Inc. (Monarch), a noncarrier, filed an application under 49 U.S.C. 14303 for Monarch to acquire from Royal City Charter Coach Lines Ltd. (Royal), a noncarrier, control of the assets and business operations of Quick Coach Lines Ltd. (QCL) and Vancouver Tours and Transit Ltd. d/b/a Charter Bus Lines of British Columbia (VTT). The Board is tentatively approving and authorizing the transaction, and, if no opposing comments are timely filed, this notice will be the final Board action. Persons wishing to oppose the application must follow the rules at 49 CFR 1182.5 and 1182.8.

DATES: Comments must be filed by February 6, 2017. Monarch may file a reply by February 20, 2017. If no opposing comments are filed by February 6, 2017, this notice shall be effective February 7, 2017.

ADDRESSES: Send an original and 10 copies of any comments referring to Docket No. MCF 21074 to: Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001. In addition, send one copy of comments to Monarch's representative: Stephen P. Flott, Flott & Co. PC, P.O. Box 17655, Arlington, VA 22216.

FOR FURTHER INFORMATION CONTACT: Amy Ziehm (202) 245–0391. Federal Information Relay Service (FIRS) for the hearing impaired: 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Monarch, a noncarrier, owns and controls 100% of

Traxx Transportation Ltd. (Traxx), a passenger carrier operating in Western Canada and the Western United States (MC–215048). Royal, a noncarrier, owns and controls 100% of QCL, a passenger carrier operating between various points in southern British Columbia, Seattle, and SeaTac Airport (MC–205116). Royal also owns and controls 100% of VTT, a passenger carrier operating in western Canada, as well as the western United States (MC–108204).[1]

Monarch states that, under the proposed transaction, QCL, VTT, and Traxx would be owned by 1997553 Alberta Ltd. (Alberta Ltd.), a noncarrier, of which Monarch would own 77.2% of the shares and Royal would own 22.8%. Monarch states that Alberta Ltd. would acquire 100% of the shares (including all of the assets, vehicles, and business operations) of QCL, VTT, and Traxx. Upon completion of the transaction, Monarch would (indirectly) control QCL and VTT and would continue to (indirectly) control Traxx through its control of Alberta Ltd. Under the transaction, Monarch states that the principals of Royal would be the principal managers of QCL, VTT, and Traxx, with the goals of increasing revenues through enhanced marketing, investment in new products, and selected strategic acquisitions and increasing profitability of all three carriers through operational improvements.

Under 49 U.S.C. 14303(b), the Board must approve and authorize a transaction that it finds consistent with the public interest, taking into consideration at least: (1) The effect of the proposed transaction on the adequacy of transportation to the public; (2) the total fixed charges that result; and (3) the interest of affected carrier employees. Monarch has submitted the information required by 49 CFR 1182.2, including information to demonstrate that the proposed transaction is consistent with the public interest under 49 U.S.C. 14303(b) and a statement that the aggregate gross operating revenues of QCL and VTT exceeded $2 million for the preceding 12-month period. *See* 49 U.S.C. 14303(g).[2]

Monarch asserts that the transaction would have no adverse impact on the adequacy of transportation services available to the public. Monarch states that Royal's management team would continue to run the operations of QCL and VTT and that Monarch intends to continue the businesses of QCL, VTT, and Traxx essentially in the same manner in which they are now being conducted. Monarch states that the proposed transaction would have no effect on total fixed charges. Further, Monarch states that no employees would be adversely affected by the proposed transaction, as there would be no change in the day-to-day operations of QCL and VTT.

On the basis of the application, the Board finds that the proposed acquisition is consistent with the public interest and should be tentatively approved and authorized. If any opposing comments are timely filed, these findings will be deemed vacated, and, unless a final decision can be made on the record as developed, a procedural schedule will be adopted to reconsider the application. *See* 49 CFR 1182.6(c). If no opposing comments are filed by the expiration of the comment period, this notice will take effect automatically and will be the final Board action.

This action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available on our Web site at ''*WWW.STB.GOV*.''

It is ordered:

1. The proposed transaction is approved and authorized, subject to the filing of opposing comments.

2. If opposing comments are timely filed, the findings made in this notice will be deemed as having been vacated.

3. This notice will be effective February 7, 2017, unless opposing comments are filed by February 6, 2017.

4. A copy of this notice will be served on: (1) The U.S. Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; (2) the U.S. Department of Justice, Antitrust Division, 10th Street & Pennsylvania Avenue NW., Washington, DC 20530; and (3) the U.S. Department of Transportation, Office of the General Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590.

Decided: December 13, 2016.

By the Board, Chairman Elliott, Vice Chairman Miller, and Commissioner Begeman.

Kenyatta Clay,

Clearance Clerk.

[FR Doc. 2016–30489 Filed 12–19–16; 8:45 am]

BILLING CODE 4915–01–P

[1] Monarch states that VTT is a passenger carrier pursuant to MC–212649. (*See* Appl. 3.) However, the record indicates that VTT holds a federally issued operating authority under MC–108204. (*See* Appl., Ex. B, VTT Company Snapshot & Ex. C, VTT Licensing & Insurance.)

[2] Applicants with gross operating revenues exceeding $2 million are required to meet the requirements of 49 CFR 1182.2(a)(5).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Forty Sixth RTCA SC–224 Plenary

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: Forty Sixth RTCA SC–224 Plenary.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of Forty Sixth RTCA SC–224 Plenary.

DATES: The meeting will be held February 02, 2017 10:00 a.m.–01:00 p.m.

ADDRESSES: The meeting will be held at: RTCA Headquarters, 1150 18th Street NW., Suite 910, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Karan Hofmann at *khofmann@rtca.org* or 202–330–0680, or The RTCA Secretariat, 1150 18th Street, NW., Suite 910, Washington, DC, 20036, or by telephone at (202) 833–9339, fax at (202) 833–9434, or Web site at *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App.), notice is hereby given for a meeting of the Forty Sixth RTCA SC–224 Plenary. The agenda will include the following:

Thursday, February 2, 2017–10:00 a.m.–1:00 p.m.

1. Welcome/Introductions/ Administrative Remarks
2. Review/Approve Previous Meeting Summary
3. Report on TSA participation
4. Report on the New Guidelines and other Safe Skies Reports
5. Review of DO–230H Sections
6. Terms of Reference Revisions
7. Action Items for Next Meeting
8. Time and Place of Next Meeting
9. Any Other Business
10. Adjourn

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC on December 14, 2016.

Mohannad Dawoud,

Management & Program Analyst, Partnership Contracts Branch, ANG–A17, NextGen, Procurement Services Division, Federal Aviation Administration.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Pilot Records Improvement Act of 1996 (PRIA)/Pilot Records Database (PRD)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew a previously approved information collection. Title 49 United States Code (49 U.S.C.) § 44703(h): Records of Employment of Pilot Applicants, which was established by the Pilot Records Improvement Act of 1996 (PRIA), mandates that air carriers who have been issued a part 119 air carrier certificate and are authorized to conduct operations under Title 14 of the Code of Federal Regulations (14 CFR) part 121 or part 135 as well as part 125 and 135 operators, request and receive FAA records, air carrier and other operator records, and the National Driver Register records before allowing an individual to begin service as a pilot.

DATES: Written comments should be submitted by January 19, 2017.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to *oira_submission@omb.eop.gov,* or faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

FOR FURTHER INFORMATION CONTACT: Ronda Thompson by email at: *Ronda.Thompson@faa.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2120–0607.

Title: Pilot Records Improvement Act (PRIA)/Pilot Records Database (PRD).

Form Numbers: FAA Forms 8060–10, 8060–10A, 8060–11, 8060–11A, 8060–12, 8060–13.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on October 13, 2016 (81 FR 7073). There were no comments. Title 49 United States Code (49 U.S.C.) 44703(h): Records of Employment of Pilot Applicants, which was established by the Pilot Records Improvement Act of 1996 (PRIA), mandates that air carriers who have been issued a part 119 air carrier certificate and are authorized to conduct operations under Title 14 of the Code of Federal Regulations (14 CFR) part 121 or part 135 as well as part 125 and 135 operators, request and receive FAA records, air carrier and other operator records, and the National Driver Register records before allowing an individual to begin service as a pilot. Additionally, fractional ownerships operating in accordance with subpart K of part 91 are required to complete a pilot safety background check before allowing an individual to begin service as a pilot (reference § 91.1051). Furthermore, air tour operators operating in accordance with § 91.147 are required to obtain an individual's previous drug and/or alcohol testing records before allowing an individual to begin service as a pilot. All requestors are heretofore referred to as ''air carriers.'' The FAA is also deploying a web-based online application called the Pilot Records Database (PRD) in December 2016 that is expected to benefit hiring air carriers, operators, and pilots required to comply with PRIA. This application automates the current PRIA process and provides an air carrier with immediate access to a consenting pilot's FAA records. FAA's externally facing applications require access control through MyAccess. Members of the public will authenticate via an externally-facing registration Web page; MyAccess. The MyAccess externally-facing registration Web page allows a member of the public desiring access to an application to choose between entering Driver's License or Social Security Number to establish the proof of identity needed for authentication.

Respondents: Approximately 600 pilots.

Frequency: On occasion.

Estimated Average Burden per Response: 10 minutes.

Estimated Total Annual Burden: 100 hours.

Issued in Washington, DC, on December 14, 2016.

Ronda L Thompson,

FAA Information Collection Clearance Officer, Performance, Policy & Records Management Branch, ASP–110.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Franklin Boulevard: I–5—McVay Highway. City of Springfield, Lane County, OR

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of Limitations on Claims for Judicial Review of Actions by FHWA and other Federal agencies.

SUMMARY: This notice announces the final environmental action taken by the FHWA that is final within the meaning of 23 U.S.C. 139(l)(1). The action relates to a proposed highway project, Franklin Boulevard: I–5—McVay Highway in the City of Springfield, Lane County, Oregon. The final environmental action taken by FHWA grants approval for the project.

DATES: By this notice, FHWA is advising the public of the categorical exclusion as the final agency action on the Franklin Boulevard: I–5—McVay Highway project, subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the transportation project will be barred unless the claim is filed on or before May 19, 2017. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Michelle Eraut, Program Development Team Leader, Federal Highway Administration, 530 Center Street NE., Suite 420, Salem, Oregon 97301, Telephone: (503) 316–2559, Email: *Michelle.Eraut@dot.gov*. The Franklin Boulevard: I–5—McVay Highway categorical exclusion is available upon written request from FHWA at the address shown above. Comments or questions concerning this proposed action and the Franklin Boulevard: I–5—McVay Highway project should be directed to FHWA at the address provided above.

SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA, has taken final agency action subject to 23 U.S.C. 139(l)(1) by issuing a categorical exclusion pursuant to the National Environmental Policy Act and approval for the following highway project in the State of Oregon: Franklin Boulevard: I–5—McVay Highway. The project will reconstruct Franklin Boulevard to reconfigure the existing five travel lanes to increase the accessibility of alternative modes of travel. The reconfiguration will include: roundabouts at four intersections; bus turn-out lanes and stops; a buffered bike lane in each direction that is adjacent and separated from the travel lanes; landscaped medians and stormwater treatment facilities; sidewalks, and local access lanes, which are short, single lane, single direction frontage roads separated from the main through lanes. The actions by the Federal agencies and the laws under which such actions were taken are described in the categorical exclusion issued on December 9, 2016. The categorical exclusion is available by contacting FHWA at the address provided above. This notice applies to all Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to FHWA Oregon Division programmatic agreements and FHWA Oregon Division programmatic biological opinions, as well as:

1. General: National Environmental Policy Act (NEPA) [42 U.S.C. 4321–4347]; Federal-Aid Highway Act [23 U.S.C. 109 and 23 U.S.C. 128].

2. Air: Clean Air Act [42 U.S.C. 7401–7671(q)].

3. Land: Section 4(f) of the Department of Transportation Act of 1966 [23 U.S.C. 138 and 49 U.S.C. 303]; Section 6(f) of the Land and Water Conservation Fund Act (LWCF) [16 U.S.C. 460*l*–4–460*l*–11.].

4. Wildlife: The Endangered Species Act [16 U.S.C. 1531–1544]; Fish and Wildlife Coordination Act [16 U.S.C. 661–667 (e)]; Migratory Bird Treaty Act [16 U.S.C. 703–712].

5. Historic and Cultural Resources: Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) *et seq.*]; Archeological Resources Protection Act of 1977 [16 U.S.C. 470aa–mm]; Archeological and Historic Preservation Act [16 U.S.C. 469–469(c)].

6. Social and Economic: Title VI of the Civil Rights Act of 1964 [42 U.S.C. 2000(d)–2000(d)(1)]; American Indian Religious Freedom Act [42 U.S.C. 1996].

7. Wetlands and Water Resources: Clean Water Act [33 U.S.C. 1251–1376]; Safe Drinking Water Act (SDWA) [42 U.S.C. 300(f)–300(j–26)];

8. DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2010–0328; FMCSA–2012–0282; FMCSA–2012–0283; FMCSA–2014–0308; FMCSA–2014–0309]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions of 110 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. FMCSA has statutory authority to exempt individuals from this rule if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers.

DATES: Each group of renewed exemptions was effective from the dates stated in the discussions below. Comments must be received on or before January 19, 2017.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. FMCSA–2010–0328; FMCSA–2012–0282; FMCSA–2012–0283; FMCSA–2014–0308; FMCSA–2014–0309, using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *http://www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the

name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008 (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the Federal Motor Carrier Safety Regulations 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 110 individuals listed in this notice have recently become eligible for a renewed exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. The drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

Exemption Decision

This notice addresses 110 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. These 110 drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. Therefore, FMCSA has decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are renewed subject to the following conditions: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual submit an annual ophthalmologist's or optometrist's report; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following groups of drivers received renewed exemptions in the month of December and are discussed below.

As of December 9, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 37 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (79 FR 66451; 80 FR 2479):

Travis L. Beck (OH)
Corey C. Bennett (MS)
Nicholas J. Borelli (NJ)
Elvis P. Butler (TN)
John H. Butler (OH)
Michael E. Calvert (TX)
Keith J. Cole (WI)
Kevin E. Conti (OH)
Marsh L. Daggett (TX)
Chad E. Hales (UT)
Dennis L. Hooyman (WI)
Lorenza K. Jefferson (VA)
Edward Johnson (TN)
William O. Johnson, Jr.
Michael E. Kroll (WI)
Isolina Matos (NJ)
Rex D. McManaway (IL)
Steven A. Metternick (MI)
Daniel P. Miller (PA)
James K. Ollerich (SD)
Scott B. Olson (ND)
Raymond E. Pawloski (MI)
Loren A. Pingel (CO)
Douglas S. Pitcher (NY)
Terrence A. Proctor (MD)
Salvador Ramirez, Jr. (IL)
Heber E. Rodriguez (VA)
Lukas N. Skutnik (NE)
Daniel C. Sliman (OH)
Jeffrey A. Sturgill (OH)
Maurice S. Styles (MN)
Richard J. Thomas (IN)
Kevin E. Tucker
Robert Vassallo (NY)
Clifford L. White (KS)
Jason L. Woody (KS)
Wesley B. Yokum (PA)

The drivers were included in Docket No. FMCSA–2014–0308. Their exemptions are effective as of December 9, 2016 and will expire on December 9, 2018.

As of December 14, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 11 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (75 FR 63536; 75 FR 77952):

William V. Barbrie (RI)
John P. Catalano (NJ)
Gary J. Dionne (ID)
Thomas C. Donahue (MA)
Marlin K. Johnson (MN)
George Long, Jr. (NM)
Robert Minacapelli (NY)
Joe E. L. Radabaugh (OH)
Ben D. Shelton, Jr. (IL)
Nestor P. Vargas, Jr. (WA)
Harold A. Wendt (MN)

The drivers were included in Docket No. FMCSA–2010–0328. Their exemptions are effective as of December 14, 2016 and will expire on December 14, 2018.

As of December 20, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 17 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (77 FR 63411; 77 FR 64181; 77 FR 75492; 77 FR 75493):

James D. Astle (OH)
Robert E. Carroll (FL)
Thomas L. Gilmore (IA)
Kenneth M. Hansen (IA)
David J. Heppelmann (MN)
Dennis R. Johnson (TN)
Ronald D. Johnston (VA)
Steven M. Knezevich (MI)
Phil J. Kunkel (IN)
Carl E. McCartney (PA)
Fred Nelson, Jr. (PA)
Ricky L. Osterback (WA)
Joseph M. Polkowski, Sr. (PA)
Dan R. Stark (MN)
Chad E. Vanscoy (OH)
Mark A. Welch, Jr. (PA)
Bailey G. Zickefoose, Jr. (WV)

The drivers were included in Docket No. FMCSA–2012–0283. Their exemptions are effective as of December 20, 2016 and will expire on December 20, 2018.

As of December 29, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 45 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (79 FR 70920; 80 FR 5613):

Andrew P. Bivens (TN)
Everett D. Blevins (KY)
Kirk J. Brummeler (GA)
Travis M. Bryan (MA)
Robert A. Chess (PA)
John W. Condy (NY)
Kevin V. Cook (MO)
Guido Criscuolo, Jr. (CT)
Zachary L. Diehl (IL)
Andrea I. Dirksen (IA)
David D. Dowdy (IL)
Clarice L. Dunklin (LA)
Ricky L. Exler (FL)
Paul B. Fuerstenberg (WI)
Nathan M. Gallant (TX)
Louis A. Goodenough (IN)
Tyler L. Gravatt (ID)
Gary W. Honaker (VA)
David G. Horne (VA)
Glenn A. Keifer (SD)
Rex L. Kreutzer (NE)
Larry D. Lloyd (OR)
Dennis D. Markowski (WA)
William F. Melchert-Dinkel (MN)
Brit K. Miller (SD)
Charles B. Petersen (ID)
Anthony J. Politan (IN)
Emil T. Ricci (PA)
Arturo Robles (WY)
Robert F. Rothbauer (WI)
Michael A. Runyan, Jr. (NC)
John D. Sheets (NH)
Kyle L. Shuman (NY)
Jerry W. Smay (CA)
Gregory A. Smith (GA)
William S. Spaeth (WI)
Eloy G. Tijerina (TX)
Santos R. Torres (TX)
Leroy A. Traudt (NE)
Arthur R. Vance (VA)
Gerald S. Volpone, Jr. (MA)
Galen R. Watts (TX)
William R. Welch, Jr. (VA)
John E. Wildenmann (KY)
Edward D. Wright (IN)

The drivers were included in Docket No. FMCSA–2014–0309. Their exemptions are effective as of December 29, 2016 and will expire on December 29, 2018.

Each of the 110 drivers in the aforementioned groups qualifies for a renewal of the exemption. They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of the 110 drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption. The drivers were included in docket numbers FMCSA–2010–0328; FMCSA–2012–0282; FMCSA–2012–0283; FMCSA–2014–0308; FMCSA–2014–0309.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by January 19, 2017.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 110 individuals from rule prohibiting persons with ITDM from operating CMVs in interstate commerce in 49 CFR 391.41(b)(3). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the medical condition of each applicant for an exemption from rule prohibiting persons with ITDM from operating CMVs in interstate commerce. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket numbers FMCSA–2010–0328; FMCSA–2012–0282; FMCSA–2012–0283; FMCSA–2014–0308; FMCSA–2014–0309 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period. FMCSA may issue a final determination at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2010–0328; FMCSA–2012–0282; FMCSA–2012–0283; FMCSA–2014–0308; FMCSA–2014–0309 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: December 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions for 125 individuals from the vision requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) for interstate commercial motor vehicle (CMV) drivers. The exemptions enable these individuals to continue to operate CMVs in interstate commerce without meeting the vision requirement in one eye.

DATES: Each group of renewed exemptions was effective on the dates stated in the discussions below and will expire on the dates stated in the discussions below.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http//www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

II. Background

On October 14, 2016, FMCSA published a notice announcing its decision to renew exemptions for 125 individuals from the vision requirement in 49 CFR 391.41(b)(10) to operate a CMV in interstate commerce and requested comments from the public (81 FR 71173). The public comment period ended on November 14, 2016 and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(10).

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to driver a CMV if that person:

> Has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing red, green, and amber.

III. Discussion of Comments

FMCSA received no comments in this preceding.

VI. Conclusion

As of October 6, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 58 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (65 FR 20245; 65 FR 57230; 67 FR 15662; 67 FR 37907; 67 FR 46016; 67 FR 57266; 67 FR 57627; 69 FR 17263; 69 FR 26206; 69 FR 26921; 69 FR 31447; 69 FR 51346; 69 FR 52741; 70 FR 48797; 70 FR 61493; 71 FR 19602; 71 FR 26602; 71 FR 27033; 71 FR 27034; 71 FR 32183; 71 FR 41310; 71 FR 6826; 71 FR 50970; 71 FR 53489; 72 FR 39879; 72 FR 52419; 73 FR 6242; 73 FR 6244; 73 FR 16950; 73 FR 16952; 73 FR 27018; 73 FR 35194; 73 FR 35200; 73 FR 36955; 73 FR 38498; 73 FR 48270; 73 FR 48273; 73 FR 48275; 73 FR 51336; 73 FR 75807; 74 FR 41971; 74 FR 60022; 75 FR 4623; 75 FR 22179; 75 FR 25918; 75 FR 27622; 75 FR 34209; 75 FR 34211; 75 FR 36778; 75 FR 36779; 75 FR 39725; 75 FR 44050; 75 FR 44051; 75 FR 47886; 75 FR 47888; 75 FR 52062; 75 FR 61833; 75 FR 77942; 76 FR 5425; 76 FR 54530; 77 FR 5874; 77 FR 15184; 77 FR 17109; 77 FR 17117; 77 FR 23797; 77 FR 23799; 77 FR 26816; 77 FR 27845; 77 FR 27850; 77 FR 33558; 77 FR 36338; 77 FR 38381; 77 FR 38384; 77 FR 40945; 70 FR 40946; 77 FR 41879; 77 FR 46153; 77 FR 46793; 77 FR 51846; 77 FR 52388; 77 FR 52389; 77 FR 52391; 77 FR 56262; 77 FR 59245; 78 FR 64271; 78 FR 64274; 78 FR 67454; 78 FR 77778; 78 FR 78477; 79 FR 4803; 79 FR 1908; 79 FR 2748; 79 FR 14333; 79 FR 14571; 79 FR 18392; 79 FR 23797; 79 FR 27365; 79 FR 27681; 79 FR 28588; 79 FR 29498; 79 FR 35212; 79 FR 35218; 79 FR 35220; 79 FR 37842; 79 FR 38649; 79 FR 38659; 79 FR 38661; 79 FR 40945; 79 FR 40945; 79 FR 41735; 79 FR 41740; 79 FR 45868; 79 FR 46153; 79 FR 46300; 79 FR 47175; 79 FR 51642; 79 FR 51643; 79 FR 52388; 79 FR 53514; 79 FR 64001):

The drivers were included in one of the following dockets: Docket Nos. FMCSA–2000–7006; FMCSA–2002–11714; FMCSA–2002–12294; FMCSA–2004–17195; FMCSA–2005–21711; FMCSA–2006–23773; FMCSA–2006–24783; FMCSA–2007–0071; FMCSA–2007–27897; FMCSA–2008–0106; FMCSA–2008–0174; FMCSA–2009–0303; FMCSA–2010–0082; FMCSA–2010–0114; FMCSA–2010–0161; FMCSA–2010–0385; FMCSA–2011–0366; FMCSA–2011–0379; FMCSA–2011–0380; FMCSA–2012–0040; FMCSA–2012–0160; FMCSA–2012–0161; FMCSA–2012–0214; FMCSA–2013–0167; FMCSA–2013–0169; FMCSA–2013–0170; FMCSA–2013–0174; FMCSA–2014–0003; FMCSA–2014–0004; FMCSA–2014–0005; FMCSA–2014–0006; FMCSA–2014–0007; FMCSA–2014–0010. Their exemptions are effective as of October 6, 2016 and will expire on October 6, 2018.

As of October 15, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 17 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (67 FR 10471; 67 FR 19798; 69 FR 33997; 69 FR 51346; 69 FR 61292; 71 FR 50970; 71 FR 55820; 73 FR 38497; 73 FR 46973; 73 FR 48270; 73 FR 48271; 73 FR 54888; 73 FR 65009; 75 FR 39725; 75 FR 44050; 75 FR 47883; 75 FR 50799; 75 FR 52063; 75 FR 57105; 75 FR 61833; 75 FR 63257; 77 FR 38381; 77 FR 48590; 77 FR 51846; 77 FR 52388; 77 FR 60010):

William C. Ball (NC)
Julian Collins (GA)
Ivory Davis (MD)
Timothy J. Droeger (MN)
Edward P. Hynes II (VA)
Richard L. Kelley (MN)
Theodore Kirby (MD)
Kelly R. Konesky (AZ)
Joseph A. Leigh, Jr. (NC)
Hollis J. Martin (AL)
Kevin C. Palmer (OR)
Charles O. Rhodes (FL)
Gordon G. Roth (KS)
Julius Simmons, Jr. (SC)
Ted L. Smeltzer (IN)
Stephen B. Whitt (NC)
Darrell F. Woosley (IL)

The drivers were included in one of the following dockets: Docket No. FMCSA–2001–11426; FMCSA–2004–17984; FMCSA–2008–0174; FMCSA–2008–0321; FMCSA–2010–0161; FMCSA–2010–0187; FMCSA–2012–0160. Their exemptions are effective as of October 15, 2016 and will expire on October 15, 2018.

As of October 21, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 7 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (79 FR 56099; 79 FR 70928):

Terry L. Allen (IL)
Todd A. Carlson (MN)
Ronald Gaines (FL)
Russel K. Gray (OH)
Billy R. Hampton (NC)
Raymond Holt (CA)
Juan C. Puente (TX)

The drivers were included on the following docket: Docket No. FMCSA–2014–0011. Their exemptions are effective as of October 21, 2016 and will expire on October 21, 2018.

As of October 22, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 8 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (73 FR 35194; 73 FR 51689; 73 FR 63047; 75 FR 39725; 75 FR 47883; 75 FR 61883; 75 FR 63257; 75 FR 64396; 77 FR 64582; 79 FR 56104):

Randall J. Benson (MN)
James D. Drabek, Jr. (IL)
Delone W. Dudley (MD)
James W. Lappan (KS)
Jeromy W. Leatherman (PA)
Ernest B. Martin (KY)
Mark L. McWhorter (FL)
Sylvester Silver (VA)

The drivers were included on the following docket: Docket No. FMCSA–2008–0106; FMCSA–2008–0266; FMCSA–2010–0161; FMCSA–2010–0187. Their exemptions are effective as of October 22, 2016 and will expire on October 22, 2018.

As of October 23, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 7 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 52381; 77 FR 64841; 79 FR 56097):

Ronald A. Duester (TX)
Charlene E. Geary (SD)
David N. Hinchliffe (TX)
Michael C. Hoff (WA)
Benny L. Sanchez (CA)
Sandeep Singh (CA)
James T. Stalker (OH)

The drivers were included on the following docket: Docket No. FMCSA–2012–0215. Their exemptions are effective as of October 23, 2016 and will expire on October 23, 2018.

As of October 27, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (65 FR 33406; 65 FR 57234; 65 FR 78256; 66 FR 16311; 67 FR 57266; 69 FR 52741; 69 FR 53493; 69 FR 62742; 71 FR 53489; 71 FR 62148; 73 FR 61925; 75 FR 59327; 77 FR 64583; 79 FR 56117):

David W. Brown (TN)
Monty G. Calderon (OH)
Awilda S. Colon (TN)
Zane G. Harvey, Jr. (VA)
Jeffrey M. Keyser (OH)
Donnie A. Kildow (ID)
David G. Meyers (NY)
Rodney M. Pegg (PA)
Zbigniew P. Pietranik (WI)
Joseph F. Wood (MS)

The drivers were included on the following docket: Docket No. FMCSA–2000–7165; FMCSA–2000–8398; FMCSA–2004–18885. Their exemptions are effective as of October 27, 2016 and will expire on October 27, 2018.

As of October 31, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 18 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 56261; 77 FR 65933; 79 FR 58856; 79 FR 59348; 79 FR 72754):

Richard J. Beck (IL)
Donald L. Blakeley II (NV)
Marty R. Brewsteer (KS)
Henry L. Chrestensen (IA)
Sanford L. Goodwin (TX)
Tonia L. Graves (AZ)
Roger S. Hardin (AL)
Gregory S. Hatten (LA)
Thomas J. Long III (PA)
Matthew J. Mantooth (KY)
Thomas J. McClure (IA)
Steven W. Miller (PA)
James J. Monticello (IN)
Aaron F. Naylor (PA)

Klifford N. Siemens (KS)
Steven R. Smith (ID)
Scott E. Tussey (KY)
Aaron H. Walser (ID)

The drivers were included on the following docket: Docket No. FMCSA–2012–0216; FMCSA–2014–0296. Their exemptions are effective as of October 31, 2016 and will expire on October 31, 2018.

In accordance with 49 U.S.C. 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

Issued on: December 9, 2016.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2010–0288; FMCSA–2012–0281; FMCSA–2014–0306; FMCSA–2014–0307]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions of 71 individuals from its prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals with ITDM to continue to operate CMVs in interstate commerce.

DATES: Each group of renewed exemptions was effective on the dates stated in the discussions below and will expire on the dates stated in the discussions below.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to http//*www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

II. Background

On October 20, 2016, FMCSA published a notice announcing its decision to renew exemptions for 71 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (81 FR 72658). The public comment period ended on November 21, 2016 and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received no comments in this preceding.

IV. Conclusion

Based upon its evaluation of the 71 renewal exemption applications and that no comments were received, FMCSA confirms its' decision to exempt the following drivers from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce in 49 CFR 391.64(3):

As of November 1, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 27 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (79 FR 59351; 79 FR 77082):

Noe D. Aguilar (CA)
David N. Banks (NC)
Wayne W. Best (PA)
Gregory K. Blythe (IL)
Justin M. Brown (MT)
Clayton G. Hardwick (KY)
Audie C. Holton (GA)
John F. Kincaid (IL)
Craig T. LaPresti (PA)
Lester M. Lee, Jr. (GA)
Aretha Lewis (VA)
Marvin D. Mathis (NC)
Brian M. McFadden (MA)
Sean K. Myhand (GA)
Glen R. Parry (NM)
George E. Patton (AL)
Michael J. Ramey (CO)
Richard J. Rasmussen (NE)
Mark L. Rigby (UT)
Jeffrey K. Roberts (WI)
Marvin A. Ryan (IN)
Eric R. Storm (GA)
Daniel A. Swain (TX)
Sean P. Thomas (IN)
Glenn R. Tyrrell (MN)
Lewis W. Vaught Jr. (NC)
William L. Wiltrout (PA)

The drivers were included in Docket No. FMCSA–2014–0306. Their exemptions are effective as of November 1, 2016 and will expire on November 1, 2018.

As of November 16, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 14 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (75 FR 59788; 75 FR 70077):

Shale W. Anderson (FL)
Charles L. Arnburg (IA)
Ronald D. Ayers (WV)
Garrett D. Couch (MI)
Mark W. Garver (MN)
Donald S. Keller (MI)
Jason M. Luper (MO)
Harold L. Phillips (OK)
Heath A. Senkel (TX)
Roland R. Unruh (KS)
Norman J. VanTuyle II (MI)

John M. Warden (TX)
Donald E. Weadon (MD)
Douglas W. Williams (TN)

The drivers were included in Docket No. FMCSA–2010–0288. Their exemptions are effective as of November 16, 2016 and will expire on November 16, 2018.

As of November 22, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 21 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (79 FR 63214; 80 FR 1070):

Jeffrey S. Argabright (OH)
James L. Crane (MS)
Donald L. Feltman (MN)
Benjamin T. Filip (ND)
Harold L. Gomez (LA)
Arthur M. Gonzalez (TX)
William T. Jensen (NJ)
Robert W. Johnson, Sr. (NY)
Joseph J. Karas (NJ)
Randy C. Lee (NY)
John R. Miller II (OR)
Robert A. Nicolai (MO)
William P. Pearson, II (WI)
Alan M. Primus (IA)
Danny L. Reimers (NM)
Michael L. Reynolds (NC)
Samuel H. Schmidt (MN)
Timothy W. Selk (AK)
Dennis J. Stanley (WI)
Steven M. Weimer (PA)
Michael L. Westbury (SC)

The drivers were included in Docket No. FMCSA–2014–0307. Their exemptions are effective as of November 22, 2016 and will expire on November 22, 2018.

As of November 26, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 9 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (77 FR 59447; 77 FR 70529):

Charles E. Castle (OH)
Larry W. Dearing (IN)
Bradley E. DeWitt (WA)
Leonard R. Dobosenski (MN)
Michael L. Kiefer (SD)
Marcus J. Kyle (IA)
Robert C. Moore (PA)
Jedediaha C. Record (WY)
Jessie L. Webster (KY)

The drivers were included in Docket No. FMCSA–2012–0281. Their exemptions are effective as of November 26, 2016 and will expire on November 26, 2018.

Each of the 71 drivers in the aforementioned groups qualifies for a renewal of the exemption. They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of the 71 drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption. The drivers were included in docket numbers FMCSA–2010–0288; FMCSA–2012–0281; FMCSA–2014–0306; FMCSA–2014–0307.

In accordance with 49 U.S.C. 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

Issued on: December 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Part 395

[Docket No. FMCSA–2016–0420]

Commercial Driver's License Standards: Application for Exemption; New Prime, Inc. (Prime)

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that New Prime, Inc. (Prime) has applied for an exemption from the requirement in 49 CFR 383.25(a)(1) that a commercial learner's permit (CLP) holder must be accompanied by a commercial driver's license (CDL) holder with the proper CDL class and endorsements seated in the front seat of the vehicle while the CLP holder is operating a commercial motor vehicle (CMV) on public roads or highways. Prime requests an exemption to allow CLP holders who have successfully passed the CDL skills test to be able to drive a CMV without having a CDL holder seated in the front seat beside them. Prime states that the CDL holder would remain in the CMV at all times while the CLP holder is driving, but not necessarily in the passenger seat. Prime believes that the exemption, if granted, would promote greater productivity and help individuals who have passed the CDL skills test return to actively earning a living faster, while achieving a level of safety that is equivalent to or greater than the level of safety provided by complying with the regulations. FMCSA requests public comment on Prime's application for exemption.

DATES: Comments must be received on or before January 19, 2017.

ADDRESSES: You may submit comments identified by Federal Docket Management System (FDMS) Number FMCSA–2016–0420 by any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* See the *Public Participation and Request for Comments* section below for further information.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* 1–202–493–2251.
- Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *www.regulations.gov,* including any personal information included in a comment. Please see the *Privacy Act* heading below.

Docket: For access to the docket to read background documents or comments, go to *www.regulations.gov* at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. FOR FURTHER INFORMATION CONTACT: For information concerning this notice, contact Mr. Tom Yager, Chief, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: 614–942–6477. Email: *MCPSD@dot.gov.* If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2016–0420), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comments online, go to *www.regulations.gov* and put the docket number, ''FMCSA–2016–0420'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may grant or not grant this application based on your comments.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

Prime seeks an exemption from 49 CFR 383.25(a)(1) that would allow CLP holders who have successfully passed a CDL skills test and are thus eligible to receive a CDL, to drive without having a CDL holder seated beside them in the CMV. Prime indicates that the CDL holder will remain in the CMV at all times while the CLP holder is driving—just not in the front seat. At present, Prime's compliance with 49 CFR 383.25(a)(1) delays the second phase of CMV training of its CLP holders who have passed the CDL skills test.

Prime is one of the nation's largest transportation companies with a fleet of more than 7,500 CMVs. Prime advises that 2,500 to 3,500 CLP holders would operate under the terms of the exemption each year. The exemption application states that § 383.25(a)(1) creates undue burdens on Prime and its CLP holders, while also contributing to the unprecedented driver shortage that continues to plague the commercial trucking industry. Presently, the constraints that Prime faces in adhering to the requirements of 49 CFR 383.25(a)(1) are exceptionally cost-intensive. Prior to the implementation of this section of the regulations, it was not uncommon for States to issue temporary CDLs to CLP holders for the return trip to collect the CDL document from their State of domicile. During that time, CDL holders were neither required to log themselves ''on duty'' when supervising the CLP holder who had a temporary CDL, nor were they required to remain in the passenger seat of the CMV. Under that scenario, the productivity of the CMV, the earnings capacity of the CDL and CLP holders, and the logistics of the motor carrier's freight network all went undisturbed. Under the current rule, however, carriers must staff two drivers in the cab of the tractor to accomplish the on-duty work of one.

Prime contends that compliance with the CDL rule leaves it with only two options. It can either: (1) Secure some mode of public transportation to allow the CLP holder to collect his or her CDL document before returning to Prime; or (2) the company can route the driver to his or her State of domicile, often against the natural flow of the freight network. Prime argues that securing public transit for each of these CLP holders under Option 1 entails extreme cost burdens to the company; and option 2 is no more beneficial because routing CLP holders to their home States, commonly without reference to shipper demand, introduces extreme cost inefficiencies.

Other reasons cited by Prime in support of the exemption request include: (1) CDL issuing agencies across States may require many days, if not weeks, to secure the CLP holder's licensure materials. CLP holders suffer great financial hardship during this waiting period. As commercial truck driving is already notorious for its high turnover rates, requiring such protracted waiting periods will greatly augment driver attrition levels. (2) A marked reduction of CLP holders' functional driving skills: CLP holders who are sidelined for many days or weeks will experience a material diminishment in their driving skills, as continuous experiential exposure to commercial driving is required to keep such skills suitably honed; and (3) The industry-wide driver shortage is exacerbated by the current rule. Prospective drivers who learn that they might have to wait several days and be inefficiently routed baci to their home State for CDL licensure, are less likely to enlist in the trucking profession.

The exemption sought would apply only to those Prime drivers who have passed the CDL skills test and hold a valid CLP.

IV. Method To Ensure an Equivalent or Greater Level of Safety

Prime states that granting this exemption will result in a level of safety that is equal to or greater than the level of safety without the exemption. The practical result of the exemption is that a CLP holder who has passed a CDL skills test would be able to drive without complying with § 383.25(a)(1) and begin immediate and productive

on-the-job operation of a CMV on a public road or highway. Anyone who obtained training and took the CDL skills test near his or her home could go directly to the licensing agency, collect the CDL, and begin driving without onboard supervision. It is only when the new driver completes the training and testing in another State that the trip back to obtain the CDL from the State of residence becomes problematic. Allowing CLP holders who have passed the skills test to function as a team driver on the trip home enables these new operators to continue to sharpen their driving skills under the mentoring and observation of a more experienced driver—and they immediately earn an income.

FMCSA has granted an exemption similar to the Prime request on two prior occasions. In the September 23, 2016, **Federal Register**, FMCSA granted a similar exemption from 49 CFR 383.25(a)(1) to CRST Expedited (81 FR 65696). In the June 11, 2015, **Federal Register**, FMCSA also granted this exemption to C.R. England, Inc. (80 FR 33329). Under the terms and conditions of both of these exemptions, a CLP holder who has documentation of passing the CDL skills test may drive a CMV for either of these companies without being accompanied by a CDL holder in the front seat of the vehicle. The Agency believed that both of these requests for exemption would achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

A copy of Prime's application for exemption is available for review in the docket for this notice.

Issued on: December 15, 2016.

Larry W. Minor,

Associate Administrator for Policy.

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions of 174 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. FMCSA has statutory authority to exempt individuals from this rule if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers.

DATES: Each group of renewed exemptions was effective from the dates stated in the discussions below. Comments must be received on or before January 19, 2017.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. FMCSA–2010–0083; FMCSA–2010–0115; FMCSA–2010–0138; FMCSA–2012–0108; FMCSA–2012–0109; FMCSA–2014–0016; FMCSA–2014–0017, using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *http://www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t, Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008 (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m. e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the Federal Motor Carrier Safety Regulations 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 174 individuals listed in this notice have recently become eligible for a renewed exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. The drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

Exemption Decision

This notice addresses 174 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. These 174 drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. Therefore, FMCSA has decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are renewed subject to the following conditions: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual submit an annual ophthalmologist's or optometrist's report; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following groups of drivers received renewed exemptions in the month of July and are discussed below.

As of July 2, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 30 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (75 FR 25919; 75 FR 28677; 75 FR 38597; 75 FR 38598):

Spencer W. Alexander (UT)
Cody R. Anderson (MT)
Ronnie L. Barker (GA)
Joseph P. Beagan (RI)
Brian C. Blevins (VA)
John M. Charlton (UT)
Stuart A. Dietz (KS)
Michael G. Eikenberry (IN)
Francisco K. Gallardo (AZ)
Devin S. Gibson (UT)
Jason C. Green (MS)
Kimmy D. Hall (AR)
Edward G. Harbin (AR)
Lewis M. Hendershott (NJ)
Mark E. Henning (NY)
Christopher M. Hultman (WI)
Duane K. Kohls (MN)
John F. Lohmuller (IN)
Jerry A. McMurdy (PA)
Steven L. Miller (ND)
H. A. Miller (OR)
Andrew D. Monson (MN)
Timothy J. Nowak (FL)
Peter J. Pendola (VA)
Ross R. Romano (MI)
Max S. Sklarski (NM)
Jason D. Sweet (CA)
Robert M. Thomson (IL)
James P. Tomasik (PA)
Joseph H. Watkins (IN)

The drivers were included in Docket No. FMCSA–2010–0083; FMCSA–2010–0115. Their exemptions are effective as of July 2, 2016 and will expire on July 2, 2018.

As of July 22, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 44 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (79 FR 29484; 79 FR 42628):

Curtis D. Andersen (MT)
Thomas E. Armburst (IL)
Michael A. Barrett (MI)
Jerry G. Clise Jr. (MD)
Richard K. Cressman (ND)

Justin J. Day (SD)
Charles G. Denegal (WA)
Wayne H. Dirks (WA)
Charles G. Elliott (IN)
Joseph S. Farrow (MN)
James R. Fiecke (ND)
Eric C. Gambill (OH)
Mark P. Gerrits (WI)
Michael Gilon (NH)
Chance A. Gooch (GA)
Robert L. Harris (IN)
Darrell S. Haynes (PA)
Joseph D. Helget (OR)
Charles D. Henderson (NY)
Marvin S. Howard (OH)
Eric A. Knox (KY)
Erik M. Lindquist (WA)
Thomas K. Linkel (IN)
Christine I. Llewellyn (IL)

Ryan A. Malandrone (WI)
Thomas J. Manning (MN)
Steve A. Meharry (WA)
Robert A. Miller Jr. (WV)
Ben G. Moore (IL)
Chad M. Morris (NY)
Paul C. Mortenson (WI)
William D. Murray (AL)
Jacob D. Nafziger (OH)
Edward T. Nauer (VA)
Keith W. Nichols (TX)
Colin R. Parmelee (IN)
Matthew P. Sczpanski (OH)
Anthony S. Sobreiro (NJ)
Colby E. Starner (PA)
Daniel E. Stephens (NY)
Bartholomew Taliaferro (PA)
Johnathan D. Truitt (IL)
Rylan P. Wheeler (IL)
Gordon J. White (MO)
Kelly L. Whitley (NC)
Jerry R. Williams (GA)
Charles L. Wojton (PA)
Michelle L. York (WA)
Steven L. Zimmer (OH)

The drivers were included in Docket No. FMCSA–2014–0017. Their exemptions are effective as of July 25, 2016 and will expire on July 25, 2018.

As of July 26, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 15 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (77 FR 33551; 77 FR 43901):

Larry J. Anderson (MN)
Wade D. Calvin (WA)
Carl A. Candelaria (NM)
Owen R. Dossett (AL)
Jennifer A. Ferguson (SC)
Michael E. Fritz (NV)
Lee A. Haerterich (WI)
Eric W. Holland (CO)
Richard P. Holmen (MN)
Edward Jones (GA)
Paul A. Lacina (ND)
Bradley J. Moore (MO)
Ross W. Petermann (MN)
Randall J. Tatum (MA)
Curtis J. Young (FL)

The drivers were included in Docket No. FMCSA–2012–0108. Their exemptions are effective as of July 26, 2016 and will expire on July 26, 2018.

As of July 27, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 12 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (75 FR 34206; 75 FR 44049):

Clinton R. Carlson II (RI)
Brandon L. Cheek (NC)
Richard A. Dufton, Jr. (NH)
Kenneth Dunn (IN)
Robert J. Dyxin (IL)
Michael H. Hayden (NY)
John T. Jones (OK)
Blake A.S. Keeten (NE)
Randall L. Koegel (NY)
Worden T. Price (NC)
Gary L. Sager (IL)
Darrel D. Schroeder (KS)

The drivers were included in Docket No. FMCSA–2010–0138. Their exemptions are effective as of July 27, 2016 and will expire on July 27, 2018.

Each of the 174 drivers in the aforementioned groups qualifies for a renewal of the exemption. They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of the 174 drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption. The drivers were included in docket numbers FMCSA–2010–0083; FMCSA–2010–0115; FMCSA–2010–0138; FMCSA–2012–0108; FMCSA–2012–0109; FMCSA–2014–0016; FMCSA–2014–0017.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by January 19, 2017.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 174 individuals from rule prohibiting persons with ITDM from operating CMVs in interstate commerce in 49 CFR 391.41(b)(3). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the medical condition of each applicant for an exemption from rule prohibiting persons with ITDM from operating CMVs in interstate commerce. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket numbers FMCSA–2010–0083; FMCSA–2010–0115; FMCSA–2010–0138; FMCSA–2012–0108; FMCSA–2012–0109; FMCSA–2014–0016; FMCSA–2014–0017 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period. FMCSA may issue a final determination at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number

FMCSA–2010–0083; FMCSA–2010–0115; FMCSA–2010–0138; FMCSA–2012–0108; FMCSA–2012–0109; FMCSA–2014–0016; FMCSA–2014–0017 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: December 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions for 43 individuals from the vision requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) for interstate commercial motor vehicle (CMV) drivers. The exemptions enable these individuals to continue to operate CMVs in interstate commerce without meeting the vision requirement in one eye.

DATES: Each group of renewed exemptions were effective on the dates stated in the discussions below and will expire on the dates stated in the discussions below.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http//www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

II. Background

On May 9, 2016, FMCSA published a notice announcing its decision to renew exemptions for 43 individuals from the vision requirement in 49 CFR 391.41(b)(10) to operate a CMV in interstate commerce and requested comments from the public (81 FR 28138). The public comment period ended on June 8, 2016 and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(10).

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to driver a CMV if that person:

> Has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing red, green, and amber.

III. Discussion of Comments

FMCSA received no comments in this preceding.

VI. Conclusion

As of June 3, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 34 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (64 FR 68195; 65 FR 20251; 65 FR 45817; 65 FR 77066; 67 FR 17102; 67 FR 38311; 68 FR 1654; 69 FR 17263; 69 FR 17267; 69 FR 26921; 69 FR 31447; 70 FR 7545; 71 FR 4194; 71 FR 13450; 71 FR 16410; 71 FR 27033; 73 FR 6242; 73 FR 9158; 73 FR 11989; 73 FR 16950; 73 FR 28186; 74 FR 60022; 74 FR 65842; 75 FR 4623; 75 FR 9477; 75 FR 9480; 75 FR 9482; 75 FR 9484; 75 FR 14656; 75 FR 22176; 75 FR 27623; 75 FR 28682; 77 FR 10604; 77 FR 10606; 77 FR 13689; 77 FR 15184; 77 FR 17107; 77 FR 17108; 77 FR 17109; 77 FR 27845; 77 FR 27849; 77 FR 27850; 77 FR 29447; 79 FR 1908; 79 FR 10606; 79 FR 10619; 79 FR 14328; 79 FR 14331; 79 FR 14333; 79 FR 14571; 79 FR 17642; 79 FR 18391; 79 FR 18392; 79 FR 21996; 79 FR 22003; 79 FR 27043; 79 FR 28588; 79 FR 29498):

Thomas R. Abbott (TN)
Dean R. Allen (OR)
Robert J. Ambrose (MA)
Rodney R. Anderson (PA)
Ernie E. Black (NC)
Gary O. Brady (WV)
Marland L. Brassfield (TX)
Larry D. Buchanan (NM)
Michael B. Canedy (MN)
Melvin D. Clark (GA)
Dean E. Dexter (SD)
Scott E. Elliot (NH)
Rojelio Garcia-Pena (MI)
Grant G. Gibson (MN)
Stephen H. Goldcamp (OH)
Wai F. King (IL)
Eric W. Kopmann (MO)
Dennis E. Krone (IL)
George E. Lewis (OH)
Travis J. Luce (MI)
Phillip D. Mathys (OH)
Thomas J. Mavraganis (IL)
Richard J. McKenzie, Jr. (MD)
Christopher J. Meerten (OR)
Jason T. Montoya (NM)
Michael Pace (TX)
Tommy L. Ray, Jr. (AL)
George S. Rayson (OH)
Joe A. Root (MN)
Carl D. Short (MO)
Lewis H. West, Jr. (MA)
Donald G. Wilcox (OR)
David E. Williford (NC)
Jimmy S. Zamora, Jr. (TX)

The drivers were included in one of the following dockets: Docket Nos. FMCSA–1999–6480; FMCSA–2000–7363; FMCSA–2004–17195; FMCSA–2005–23099; FMCSA–2007–0071; FMCSA–2009–0011; FMCSA–2009–0291; FMCSA–2009–0303; FMCSA–2010–0050; FMCSA–2011–0379; FMCSA–2011–0380; FMCSA–2013–0174; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0004. Their

exemptions are effective as of June 3, 2016 and will expire on June 3, 2018.

As of June 6, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 3 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 23799; 77 FR 33558; 79 FR 27365):

Rudolph Bisschop (MA)
Richard Doroba (IL)
Tommy Thomas (CA)

The drivers were included in one of the following dockets: Docket No. FMCSA–2012–0040. Their exemptions are effective as of June 6, 2016 and will expire on June 6, 2018.

As of June 17, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following individual, DelRay V. Ryckman (SD), has satisfied the conditions for obtaining a renewed exemption from the vision requirements (79 FR 27681; 79 FR 38649).

This driver was included in the following docket: Docket No. FMCSA–2014–0005. The exemption is effective as of June 17, 2016 and will expire on June 17, 2018.

As of June 27, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 5 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 27847; 77 FR 38386; 79 FR 29495):

Matthew G. Epps (FL)
Michael E. McAfee (KY)
Joe Ramirez (CA)
James E. Sikkink (IL)
John C. Smith (IL)

The drivers were included on the following docket: Docket No. FMCSA–2012–0104. Their exemptions are effective as of June 27, 2016 and will expire on June 27, 2018.

In accordance with 49 U.S.C. 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

Issued on: December 9, 2016.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Federal Fiscal Year 2017 Annual List of Certifications and Assurances for Federal Transit Administration Grants and Cooperative Agreements

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of the Federal Transportation Administration's (FTA) Fiscal Year (FY) 2017 Annual List of Certifications and Assurances for FTA Grants and Cooperative Agreements, which can be found at FTA's Web site, *www.transit.dot.gov/certs.* This notice provides a condensed list of the pre-award Certifications and Assurances that may apply to an Applicant to FTA for federal assistance and the Award that may be made in FY 2017. This notice also describes both the Applicant and FTA's responsibilities with respect to the Certifications and Assurances and highlights the differences between the FY 2017 Certifications and Assurances and those published for FY 2016. Each Applicant to FTA for federal assistance must submit the Certifications and Assurances that apply to it and any Award for which it seeks federal assistance during FY 2017. An Applicant to FTA typically acts through its authorized representative (You). You, as the Applicant's Authorized Representative, must have the authority to sign the Applicant's Certifications and Assurances and to bind your Applicant's compliance with the Certifications and Assurances you select on its behalf. Your Applicant's Certifications and Assurances must be affirmed by your Applicant's attorney. This notice provides instructions on how and when you should submit your Applicant's Certifications and Assurances for FY 2017.

DATES: *Effective Date:* These FY 2017 Certifications and Assurances are effective October 1, 2016, the first day of FY 2017.

FOR FURTHER INFORMATION CONTACT: The appropriate Regional or Metropolitan Office listed in this notice. For copies of related documents and information, see our Web site at *www.transit.dot.gov/certs* or contact our Office of Administration at 202–366–4007.

SUPPLEMENTARY INFORMATION:

1. What are FTA's responsibilities?

The second sentence of 49 U.S.C. 5323(n) states in pertinent part that, ''[t]he Secretary [of Transportation] shall publish annually a list of all certifications required under this chapter [49 U.S.C. chapter 53]. . . .'' The first sentence of 49 U.S.C. 5323(n) states that, ''[a] certification required under this chapter [53] and any additional certification or assurance required by law or regulation to be submitted to the Secretary [who delegated that authority to the Federal Transit Administrator] may be consolidated into a single document to be submitted annually as part of a grant application under this chapter [53].'' Therefore, FTA has assembled those Certifications and Assurances into the following twenty-three (23) categories:

Category 01. Required Certifications and Assurances for Each Applicant,

Category 02. Lobbying,

Category 03. Procurement and Procurement Systems,

Category 04. Private Sector Protections,

Category 05. Rolling Stock Reviews and Bus Testing,

Category 06. Demand Responsive Service,

Category 07. Intelligent Transportation Systems,

Category 08. Interest and Financing Costs and Acquisition of Capital Assets by Lease,

Category 09. Transit Asset Management Plan and Public Transportation Agency Safety Plan,

Category 10. Alcohol and Controlled Substances Testing,

Category 11. Fixed Guideway Capital Investment Grants Program (New Starts, Small Starts, and Core Capacity Improvement),

Category 12. State of Good Repair Program,

Category 13. Grants for Buses and Bus Facilities and Low or No Emission Vehicle Deployment Grant Programs,

Category 14. Urbanized Area Formula Grants Programs and Passenger Ferry Grant Program,

Category 15. Enhanced Mobility of Seniors and Individuals with Disabilities Programs,

Category 16. Rural and Appalachian Development Programs,

Category 17. Tribal Transit Programs (Public Transportation on Indian Reservations Programs),

Category 18. State Safety Oversight Grant Program,

Category 19. Public Transportation Emergency Relief Program,

Category 20. Expedited Project Delivery Pilot Program,

Category 21. Infrastructure Finance Programs,

Category 22. Paul S. Sarbanes Transit in Parks Program, and

Category 23. Construction Hiring Preferences.

Since 1995, FTA has consolidated the pre-award Certifications and Assurances required by law or regulation into a single document for publication in the **Federal Register**. To receive federal assistance appropriated or made available for the Grant, Cooperative Agreement, Loan, Loan Guarantee, Line of Credit, and Major Credit Instrument programs FTA/DOT administers, your Applicant must submit the annual Certifications and Assurances required for the type of federal assistance it seeks.

These FY 2017 Certifications and Assurances supersede any Certifications and Assurances published in an earlier fiscal year. After publication in the **Federal Register**, each Applicant must submit applicable FY 2017 Certifications and Assurances before FTA may award federal assistance to support that Applicant's request.

2. What is the legal effect of these certifications and assurances?

a. Pre-Award Representations. These Certifications and Assurances are pre-award representations typically required by federal law or regulation that your Applicant must submit before FTA may provide federal assistance for its Award. In general, these FY 2017 Certifications and Assurances are effective October 1, 2016, except as FTA determines otherwise in writing.

Upon publication in the **Federal Register**, FTA may not provide federal assistance until you submit your Applicant's FY 2017 Certifications and Assurances.

b. Binding Commitment. Your Applicant must comply with any Certifications or Assurances you make on its behalf, irrespective of whether you remain your Applicant's authorized representative. When you submit its Certifications and Assurances to FTA, both you and your Applicant are agreeing to comply with those terms.

c. Length of Commitment. Your Applicant's FY 2017 Certifications and Assurances remain in effect until its Award is closed or the end of the useful life of its federally assisted assets, whichever is later. If your Applicant provides different Certifications and Assurances in a later fiscal year, the later Certifications and Assurances will usually apply, except as FTA determines otherwise in writing.

d. Duration. You and your Applicant may use the FY 2017 Certifications and Assurances at FTA's Web site, *www.transit.dot.gov/certs* to support applications for federal assistance until FTA issues its FY 2018 Certifications and Assurances.

e. *The FY 2017 Certifications and Assurances Are Not a Complete List of Federal Requirements.* FTA cautions that the FY 2017 Certifications and Assurances focus mainly on those representations that your Applicant is required to submit to FTA before FTA may award federal assistance. Consequently, these Certifications and Assurances do not include many other federal requirements that will apply to your Applicant and its Award. Your Applicant is responsible for compliance with all applicable federal requirements.

f. Federal Requirements. In addition to the information in this notice and FTA's FY 2017 Apportionments Notice, which will be published separately from this notice, FTA also strongly encourages you and your Applicant's staff and prospective and current Third Party Participants to review all federal legislation, regulations, safety directives, and guidance that apply to them and to your Applicant's proposed Award. The FY 2017 Master Agreement identifies many of those requirements and applicable guidance, and may be accessed at *www.transit.dot.gov.*

g. Penalties for False or Fraudulent Statements. If you provide any false or fraudulent statement to the Federal Government on behalf of your Applicant or yourself, you may incur both federal civil and criminal penalties under the following statutes: (1) The Program Fraud Civil Remedies Act of 1986, as amended, 31 U.S.C. 3801 *et seq.,* (2) U.S. Department of Transportation (U.S. DOT) regulations, ''Program Fraud Civil Remedies,'' 49 CFR part 31, and (3) Section 5323(l)(1) of title 49, United States Code, which authorizes federal criminal penalties and termination of federal assistance if you provide, on behalf of your Applicant or yourself, a false or fraudulent certificate, submission, or statement in connection

with the Federal Transit Program authorized by 49 U.S.C. chapter 53.

3. What are your responsibilities?

a. Make sure that all involved with your Applicant's Award understand the federal requirements that will apply to your Applicant and its Award. FTA strongly advises you, as your Applicant's authorized representative, to read this notice and the Certifications and Assurances on the FTA Web site *www.transit.dot.gov* before selecting Certifications and Assurances on behalf of your Applicant. FTA also advises you to read the information accompanying the apportionment tables when FTA publishes its FY 2017 Apportionment Notices.

Your Applicant is responsible for compliance with all federal requirements that apply to itself and its Award. Other entities and people, including Subrecipients, Third Party Contractors, and Third Party Subcontractors (Third Party Participants) can adversely affect your Applicant's ability to comply with those federal requirements. Accordingly, all Third Party Participants involved in its Award need to know and should agree to comply with the federal requirements that affect your Applicant's Award and themselves, as Third Party Participants.

b. Subrecipient and Other Third Party Participation. Except when FTA has determined otherwise in writing, your Applicant is ultimately responsible for compliance with all Certifications and Assurances that you select on its behalf, even if the Award and some or all of the activities therein will be carried out by Subrecipients or other Third Party Participants. Therefore, FTA strongly recommends that you take appropriate measures to ensure that Subrecipients and other Third Party Participants involved in carrying out your Applicant's Award do not take actions that will cause your Applicant to violate the representations made in its Certifications and Assurances.

c. Submit Your Applicant's Certifications and Assurances. You must submit all Categories of the FY 2017 Certifications and Assurances that apply to your Applicant and the Award(s) it seek in FY 2017. For your convenience, FTA recommends that you submit all twenty-three (23) Categories of Certifications and Assurances. Those provisions of the Certifications and Assurances that do not apply to your Applicant or its Award will not be enforced.

d. Submit Your Applicant's Required Documentation. You must ensure that your Applicant has submitted to FTA a correct, current version of the following documents: (1) Authorizing Resolution; (2) Opinion of Counsel; and (3) Designation of Signature Authority. A new Authorizing Resolution may be needed if a previous Authorizing Resolution does not cover the work in the new application. A new Opinion of Counsel may be needed if your Applicant's legal status has changed. FTA requires that the Designation of Signature Authority reflect the current status of the appropriate officials with authority to bind your Applicant. Should you already have documentation on file reflecting the correct status of your Applicant's officials, further action to simply update the Designation of Signature Authority is not required. Sample templates for the above documents may be accessed at *https://www.transit.dot.gov/trams.* You must upload any updated documents concurrently with your Certifications and Assurances.

e. Obtain the Affirmation of Your Applicant's Attorney. You must obtain an affirmation of your Applicant's Attorney, signed in FY 2017, stating that your Applicant has sufficient authority under its state and local laws to certify its compliance with the FY 2017 Certifications and Assurances that you have selected on its behalf; the Certifications and Assurances have been legally made and constitute legal and binding obligations on your Applicant; and there is no legislation or litigation pending or imminent that might adversely affect the validity of these Certifications and Assurances, or of the performance of your Applicant's FTA assisted Award. Your Applicant's Attorney must sign this affirmation during FY 2017. An Affirmation of your Applicant's Attorney dated in a previous fiscal year is insufficient, unless FTA expressly determines otherwise in writing.

f. When to Submit.

(1) If your Applicant is applying for federal assistance under any of FTA's competitive capital programs (*e.g.,* New Starts, Small Starts, or Core Capacity Improvement) or formula programs, FTA expects to receive your Applicant's FY 2017 Certifications and Assurances within ninety (90) days from the date FTA opens its new electronic award and management system, Transit Award Management System (TrAMS) or soon after the submittal of your Applicant's request for federal assistance for FY 2017.

(2) If your Applicant seeks federal assistance from an FTA program other than a formula program or a discretionary capital or operating program, *e.g.,* for a Public Transportation Innovation (formerly, Research, Development, Demonstration, and Deployment) Award, FTA expects to receive your Applicant's FY 2017 Certifications and Assurances with the submission of its Application for federal assistance or an amendment soon thereafter.

4. Where are FTA's FY 2017 certifications and assurances?

FTA's FY 2017 Certifications and Assurances are available at:

a. FTA's Web site, *www.transit.dot.gov,* and

b. TrAMS, including at *https://www.transit.dot.gov/trams.*

5. What changes have been made since the FY 2016 certifications and assurances were published?

The most significant changes are:

a. In the Preface, we added master credit agreement and State Infrastructure Bank (SIB) to the list of instruments to which the Master Agreement applies.

b. In Category 1.E, ''Suspension and Debarment Certification,'' we have added two new certifications: Category 1.E.2, ''Tax Liability,'' and Category 1.E.3, ''Felony Convictions.''

c. In Category 5.B, ''Bus Testing,'' we note that FTA regulations, ''Bus Testing,'' 49 CFR part 665 are now consistent with 49 U.S.C. 5318.

d. In Category 8.B, ''Acquisition of Capital Assets by Lease,'' we have added an exception to our Capital Leases regulations to provide an exception for rolling stock and related equipment subject to the provisions of section 3019(c) of the FAST Act.

e. In Category 9.A, ''Transit Asset Management Plan,'' we have added references to FTA regulations, ''Transit Asset Management,'' 49 CFR part 625.

f. In Category 9.B, ''Public Transportation Safety,'' FTA is required to establish a comprehensive Public Transportation Safety Program. Three provisions of this Program include the National Public Transportation Safety Plan, the Public Transportation Safety Certification Training Program, and the Public Transportation Agency Safety Plan (*See* 49 U.S.C. 5329(b) through (d)). FTA believes consolidating these provisions into one certification is appropriate for the FY 2017 List of Certifications and Assurances.

g. We added a new Category 9.C, ''State Safety Oversight Requirements,'' which references to 49 U.S.C. 5329(e) and FTA regulations, ''State Safety Oversight,'' 49 CFR part 674.

h. In Category 11, ''Fixed Guideway Capital Investment Grants Program (New Starts, Small Starts, and Core

Capacity Improvement),'' we have added a reference to:

(1) FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625, and

(2) The updated ''Final Interim Policy Guidance, Federal Transit Administration Capital Investment Grant Program,'' June 2016.

i. In Category 12, ''State of Good Repair Program,'' we have added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

j. In Category 13.A, ''Grants for Buses and Bus Facilities Program,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

k. In Category 13.B, ''Low or No Emission Vehicle Deployment,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

l. In Category 14.A, ''Urbanized Area Formula Grants Program,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

m. In Category 14.B, ''Passenger Ferry Grant Program,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

n. In Category 15, ''Enhanced Mobility of Seniors and Individuals with Disabilities Programs,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

o. In Category 16.A, ''Formula Grants for Rural Areas Programs,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

p. In Category 16.B, ''Appalachian Development Public Transportation Program,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

q. In Category 17, ''Tribal Transit Programs (Public Transportation on Indian Reservations Programs,'' we have added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

r. In Category 18, ''State Safety Oversight Grant Program,'' we have:

(1) Explained that, depending on how far the Recipient has progressed in developing a State Safety Oversight program fully compliant with 49 CFR part 674, the following FTA regulations will apply:

(a) The Recipient agrees that FTA regulations, ''State Safety Oversight,'' 49 CFR part 674, will apply when its State Safety Oversight program is fully compliant with FTA's requirements, but

(b) The Recipient agrees that FTA regulations, ''Rail Fixed Guideway Systems; State Safety Oversight,'' 49 CFR part 659, will continue to apply to those states that have not yet implemented a fully compliant Public Transportation Safety Program.

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

s. In Category 20, ''Expedited Project Delivery Pilot Program,'' we have added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

t. In Category 21.A, ''Transportation Infrastructure Finance and Innovation Act (TIFIA) Program,'' we have:

(1) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(2) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

u. In Category 21.B, ''State Infrastructure Banks (SIB) Program, we have:

(1) Noted that the U.S. DOT Build America Bureau will enter into SIB Cooperative Agreements with the state,

(2) Added references to 49 U.S.C. 5329(b) guidance and other final regulations and directives, in effect or when issued, that implement the Public Transportation Safety Programs authorized by 49 U.S.C. 5329, and

(3) Added a reference to FTA Regulations, ''Transit Asset Management,'' 49 CFR part 625.

6. How do you submit the certifications and assurances?

a. Electronic Submission. Except in rare circumstances and if permitted by FTA, you must submit your Applicant's FY 2017 Certifications and Assurances and your attorney's Affirmation in TrAMS. To submit the Certifications and Assurances, you must be registered in TrAMS. TrAMS contains fields for individually selecting among the twenty-three (23) Categories of Certifications and Assurances that apply to your Applicant and also a designated field for selecting all twenty-three (23) Categories, of which only the requirements that apply to you or your Applicant will be enforced.

As an authorized representative of the Applicant, you must enter your personal identification number (PIN), which is your electronic signature, in TrAMS. The Attorney must enter his or her PIN in TrAMS, affirming your Applicant's legal authority to make and comply with the Certifications and Assurances you have selected on its behalf. You may enter your PIN in place of the Attorney's PIN, provided that your Applicant has on file and uploads to TrAMS a similar affirmation that has been written, dated, and signed by its Attorney in FY 2017.

b. Paper Submission. Only in very limited circumstances may your Applicant submit its FY 2017 Certifications and Assurances solely on paper. For example if the Applicant has demonstrated that it is unable to submit its Certifications and Assurances electronically in TrAMS or is a one-time recipient, and if FTA has agreed in writing to accept your Applicant's Certifications and Assurances on paper, then your Applicant may indicate the Categories of Certifications and Assurances your Applicant is submitting in typewritten hard copy on the Signature Pages.

To do so, you may place a single mark in the designated space to signify your Applicant's agreement to comply with all Categories of Certifications and Assurances to the extent that they apply

to it, or select the specific Categories of Certifications and Assurances that apply to your Applicant and its Award. You must obtain your Attorney's signature, whether on the Signature Page or on a separate document that makes the same affirmation as on the Signature Page. In such a case, the Regional Office or the Headquarters Program Office must attach the paper submission to TrAMS.

For more information, you may contact the appropriate FTA Regional or Metropolitan Office.

Authority. 49 U.S.C. chapter 53; the Fixing America's Surface Transportation (FAST) Act, Pub. L. 114–94, December 4, 2015; and other federal laws administered by FTA; U.S. DOT and FTA regulations codified or to be codified in Title 49, Code of Federal Regulations; and FTA Circulars.

Issued in Washington, DC.

Matthew Welbes,

Executive Director.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2016–0128]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel ANDANTE MAR; Invitation for Public Comments

AGENCY: Maritime Administration.

ACTION: Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before January 19, 2017.

ADDRESSES: Comments should refer to docket number MARAD–2016–0128. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at *http://www.regulations.gov.* All comments will become part of this docket and will be available for inspection and copying at the above address between 10:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23–453, Washington, DC 20590. Telephone 202–366–9309, Email *Bianca.carr@dot.gov.*

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel ANDANTE MAR is:

—INTENDED COMMERCIAL USE OF VESSEL: ''Six-Pack Charter Sport Fishing and Cruising on the Gulf Coast''

—GEOGRAPHIC REGION: ''Louisiana, Mississippi, Alabama, Florida''

The complete application is given in DOT docket MARAD–2016–0128 at *http://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

(Authority: 49 CFR 1.93(a), 46 U.S.C. 55103, 46 U.S.C. 12121)

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration (MARAD)

[Docket No. DOT–MARAD 2016–0127]

Request for Comments of a Previously Approved Information Collection

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this notice announces that the Information Collection Request (ICR) abstracted below is being forwarded to the Office of Management and Budget (OMB) for review and comments. A **Federal Register** Notice with a 60-day comment period soliciting comments on the following information collection was published on August 30, 2016 (81 FR 59732).

DATES: Comments must be submitted on or before January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Rodney McFadden, Office of Workforce Development, Maritime Administration, 1200 New Jersey Avenue SE., W23–457, Washington, DC 20590. Telephone: 202–366–2647; or email: *rod.mcfadden@dot.gov.*

SUPPLEMENTARY INFORMATION:

Title: Information to Determine Seamen's Reemployment Rights—National Emergency.

OMB Control Number: 2133–0526.

Type of Request: Renewal of a Previously Approved Information Collection.

Abstract: This collection is needed in order to implement Title 46, United States Code § 52101 which provides the procedures by which MARAD is able to certify that certain merchant seamen are entitled to reemployment rights after completion of their service on U.S. vessels during times of national emergency.

Affected Public: U.S. merchant seamen who have completed designated national service during a time of maritime mobilization need and are seeking re-employment with a prior employer.

Average Expected Annual Number of Activities: 10.

Estimated Number of Respondents: 10.

Estimated Number of Responses: 10.

Annual Estimated Total Annual Burden Hours: 10.

Frequency of Response: Annually.

Send comments regarding the burden estimate, including suggestions for reducing the burden, to the Office of Management and Budget, Attention: Desk Officer for the Office of the Secretary of Transportation, 725 17th Street NW., Washington, DC 20503.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.93.

By Order of the Maritime Administrator.

Dated: December 13, 2016.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

[FR Doc. 2016–30650 Filed 12–19–16; 8:45 am]

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[U.S. DOT Docket Number NHTSA–2016–0085]

Reports, Forms, and Record Keeping Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation.

ACTION: Notice.

SUMMARY: Before a Federal agency can collect certain information from the public, it must receive approval from the Office of Management and Budget (OMB). Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections.This document describes a collection of information for which NHTSA intends to seek OMB approval.

DATES: Comments must be submitted to OMB on or before January 19, 2017.

ADDRESSES: Send comments to the Office of Information and Regulatory Affairs, OMB, 725 17th Street NW., Washington, DC 20503, Attention: Desk Officer.

FOR FURTHER INFORMATION CONTACT: Leo Yon, Trends Analysis Division (NEF–170), Room W45–215, NHTSA, 1200 New Jersey Ave., Washington, DC 20590. Telephone: (202) 366–7028.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in

such a document. Under OMB's regulation, *see* 5 CFR 1320.8(d), an agency must ask for public comment on the following:

(i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) how to enhance the quality, utility, and clarity of the information to be collected; and

(iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.* permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks for public comments on the following collection of information:

Title: Reporting of Information and Documents about Potential Defects.

Type of Request: Revision of a currently approved information collection.

OMB Control Number: 2127–0616.

Affected Public: Businesses or individuals.

Abstract: This notice requests comment on NHTSA's proposed extension to approved collection of information OMB No. 2127–0616. The Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act (Pub. L. 106–414) was enacted on November 1, 2000. These TREAD requirements of the Act are found in 49 U.S.C. 30166 and many of these requirements are implemented through, and addressed with more specificity in, 49 CFR part 579 *Reporting of Information and Communications about Potential Defects.*

These Early Warning Reporting (EWR) requirements specify that manufacturers of motor vehicles and motor vehicle equipment submit information, periodically or upon NHTSA's request, that includes claims for deaths and serious injuries, property damage data, communications from customers and others, information on incidents resulting in fatalities or serious injuries from possible defects in vehicles or equipment in the United States or in identical or substantially similar vehicles or equipment in a foreign country, and other information that assist NHTSA in identifying potential safety-related defects. The intent of this information collection is to provide early warning of such potential safety-related defects.

Estimated Burden Hours: This approved information collection was last renewed in August 2013, when additional component type codes were added to manufacturer EWR submissions. *See* 78 FR 51412. Due to one-time investments and other associated costs, the collection was approved for 85,193 burden hours and $10.3 million dollars in the first year. We estimated subsequent years would require 45,897 burden hours and $5.75 million dollars. Today we update these estimates by removing the first-year costs associated with the 2013 rulemaking, as well as revising estimates to better align with current EWR volume.

First, the below estimates are adjusted to better reflect current EWR submission volume. Table 1 provides an average annual submission count for each claim category submitted per the requirements of 49 CFR 579:

TABLE 1—ANNUAL AVERAGE OF SUBMISSIONS BY MANUFACTURERS
[2013–2015]

Category of claims	Light vehicles	Heavy, med vehicles	Trailers	Motorcycles	Emergency vehicles	Buses	Tires	Child restraints	Equipment mfr.	Totals
Injury Fatality	9,082	97	13	135	3	12	74	378	8	9,804
Property Damage*	8,554	572	21	16	2	55	2,261	N/A	N/A	11,481
Warranty Claims	Aggregate Data									
Consumer Complaints	Aggregate Data									
Mfr. Field Reports	66,064	7,221	13	1,276	3	461	N/A	4,259	N/A	79,297
Dealer Field Reports	Aggregate Data									
Foreign Death Claims	59	1	1	2	0	0	2	35	0	101
Totals	83,759	7,891	48	1,429	8	528	2,337	4,672	8	100,683

* Property damage claims are aggregate data but are counted differently because they require more time to manually review.

The above updated submission totals represent a 17% increase from the currently approved information collection. Submission totals for each category have risen with an average of 9,804 injury and fatality claims (previously 6,041 claims), 11,481 property damage claims (previously 11,402 claims), 79,297 manufacturer field reports (previously 68,574 field reports), 101 foreign death claims (previously 41 claims), totaling 100,683 submissions on average (previously estimated at 86,058 submissions).

The agency estimates that an average of 5 minutes is required for a manufacturer to process each report, with the exception of foreign death claims. We estimate foreign death claims require an average of 15 minutes to process. Multiplying this average number of minutes by the number of submissions NHTSA receives in each reporting category yields the burden hour estimates found below in Table 2:

TABLE 2—ESTIMATED ANNUAL BURDEN HOURS

Category of claims	Light vehicles	Heavy, med vehicles	Trailers	Motorcycles	Emergency vehicles	Buses	Tires	Child restraints	Equipment mfr.	Totals
Injury Fatality	757	8	1	11	0	1	6	32	1	817
Property Damage*	713	48	2	1	0	5	188	N/A	N/A	957
Warranty Claims	Aggregate Data									
Consumer Complaints	Aggregate Data									
Mfr. Field Reports	5,505	602	1	106	0	38	N/A	355	N/A	6,608
Dealer Field Reports	Aggregate Data									
Foreign Death Claims	15	0	0	1	0	0	1	9	0	25
Totals	6,990	658	4	119	1	44	195	395	1	8,407

* Property damage claims are aggregate data but are counted differently because they require more time to manually review.

Our previous estimates totaled 7,178 burden hours associated with these Early Warning submissions. We now update that total to 8,407 burden hours, a 17% increase, associated with the above noted claim categories.

The burden hours associated with aggregate data submissions for consumer complaints, warranty claims, and dealer field reports are included in reporting and computer maintenance hours. The burden hours for computer maintenance are calculated by multiplying the hours of computer use (for a given category) by the number of manufacturers reporting in a category. Similarly, reporting burden hours are calculated by multiplying hours used to report for a given category by the number of manufacturers for the category. Using these methods and the average number of manufacturers who report annually, we estimate the burden hours for reporting cost and computer maintenance below in Table 3:

TABLE 3—ESTIMATED ANNUAL BURDEN HOURS FOR REPORTING AND COMPUTER MAINTENANCE

Vehicle/equipment category	Average number of manufacturers	Quarterly hours to report per manufacturer	Annual burden hours for reporting	Hours for computer maintenance per manufacturer	Annual burden hours for computer maintenance
Light Vehicles	39	8	1,248	347	13,533
Medium-Heavy Vehicles	39	5	780	86.5	3,374
Trailers	80	1	320	86.5	6,920
Motorcycles	15	2	120	86.5	1,298
Emergency Vehicles	7	5	140	86.5	606
Buses	38	5	760	86.5	3,287
Tires	34	5	680	86.5	2,941
Child Restraints	34	1	136	86.5	2,941
Vehicle Equipment	6	1	24	.....	.....
Totals	.....	.....	4,208	.....	34,899

Thus, the total burden hours for EWR death and injury data, aggregate data and non-dealer field reports is 8,407 (Table 2) + 4,208 (Table 3) + 34,899 (Table 3) = 47,514 burden hours.

In order to provide the information required for foreign safety campaigns, manufacturers must (1) determine whether vehicles or equipment that are covered by a foreign safety recall or other safety campaign are identical or substantially similar to vehicles or equipment sold in the United States, (2) prepare and submit reports of these campaigns to the agency, and (3) where a determination or notice has been made in a language other than English, translate the determination or notice into English before transmitting it to the agency. NHTSA estimates that preparing and submitting each foreign defect report (foreign recall campaign) requires 1 hour of clerical staff and that translation of determinations into English requires 2 hours of technical staff (note: This assumes that all foreign campaign reports require translation, which is unlikely). Between 2013 and 2015, NHTSA received a yearly average of 133 foreign recall reports which results in 133 hours for preparation and submission of the reports (133 defect reports × 1 hour clerical = 133 hours) and 266 hours for technical time (133 foreign recall reports × 2 hours technical = 266 hours.

With respect to the burden of determining identical or substantially similar vehicles or equipment to those sold in the United States, manufacturers of motor vehicles are required to submit not later than November 1 of each year, a document that identifies foreign products and their domestic counterparts. NHTSA continues to estimate that the annual list could be developed with 8 attorney hours and 1 hour for IT work. NHTSA receives these

lists from 83 manufacturers, on average, resulting in 747 burden hours (83 vehicle manufacturers × 8 hours for attorney support = 664 hours) + (83 vehicle manufacturers × 1 hour for IT support = 83 hours).

TABLE 4—HOURLY BURDEN FOR FOREIGN REPORTING

Task	Quantity	Occupation	Burden hours	
			Per unit	Total
Annual List	83	Attorney	8	664
Annual list—Electronic	83	IT	1	83
Foreign Defect Report	133	Clerical	1	133
Foreign Defect report	133	Technical	2	266
Total				1,146

Therefore, the total annual hour burden on manufacturers for reporting foreign safety campaigns and substantially similar vehicles/equipment is 1,146 hours (774 hours professional time + 133 hours clerical time + 266 hours technical time). This is an increase of 154 burden hours from our previous estimate (1,146 hours for current estimate − 992 hours for previous estimate).

Section 579.5 also requires manufacturers to submit notices, bulletins, customer satisfaction campaigns, consumer advisories and other communications that are sent to more than one dealer or owner. Manufacturers are required to submit this information monthly. Section 579.5 does not require manufacturer to create these documents; rather, only copies of these documents must be submitted to NHTSA. Therefore, the burden hours are only those associated with collecting the documents and submitting copies to NHTSA. Manufacturers must index these communications and email them to NHTSA within 5 working days after the end of the month in which they were issued.

NHTSA continues to estimate that we receive about 7,000 notices a year. We estimate that it takes about 5 minutes to collect, index, and send each notice to NHTSA. Therefore, we continue to estimate that it takes 7,000 documents × 5 minutes = 35,000 minutes or 583 hours for manufacturers to submit notices as required under Part 579.5.

TABLE 5—TOTAL BURDEN HOURS FOR THIS COLLECTION

Reporting type	Annual burden hours
EWR Reporting (Table 3)	47,514
Foreign Reporting (Table 4)	1,146
Part 579.5	583
Total	49,243

Estimated Cost Burdens—We now estimate the calculated cost burdens that this collection imposes on industry. The hourly wage rates shown below have been utilized in previous renewals of this collection and are now updated through June 2016. These current rate adjustments are derived from the Employment Cost Index Historical Listing (Volume III) provided by the U.S. Bureau of Labor Statistics to adjust for inflation. The non-seasonally adjusted wages and salaries, for private industry workers, were referenced to calculate the following updated 2016 wage rates:

TABLE 6—HOURLY WAGE RATES BY OCCUPATION

Occupation	Wage rate	
	2011	2016
Attorney	$130.39	$144.47
Engineer	130.39	144.47
IT	145.59	161.31
Technical	94.09	104.25
Clerical	30.69	34.00

2016 wage data from U.S. Department of Labor.

We have also constructed various breakdowns of the average five minutes of labor among the various occupations depending on the type of document that was reviewed. For example, to combine three minutes of technical labor and two minutes of clerical labor produces a combined wage rate of $76.15 per hour, using the adjusted 2016 wage rates in Table 6. Table 7 shows the time allocations and weighted hourly rate by report:

TABLE 7—TIME ALLOCATION AND WEIGHTED HOURLY RATE BY REPORT

Claim type	Attorney	Engineer	IT	Technical	Clerical	Total time	Weighted hourly rate
Claims of Injury/Death	3	0	0	0	2	5	$100.29
Property Damage	0	0	0	3	2	5	76.15
Mfr. Field Reports	0	0	0	3	2	5	76.15
Foreign Deaths	3	10	0	0	2	15	129.74

The total cost for 2016 Claims documents were obtained using the following formula:

K × T × W = Costs for claim type

Where:

K = Documents submitted by industry
T = Average time spent on a document
W = Wage rate based on U.S. Department of Labor and skill mix.

For example, the estimated cost to report light vehicle death and injury claims is $75,899 (9,082 death and injury claims reported × 5/60 hours × $100.29 wage rate).

NHTSA estimates the reporting costs as a function of

- The number of manufacturers reporting;
- The frequency of required reports;
- The number of hours required per report; and
- The cost of personnel to report.

The number of manufacturers reporting is estimated from EWR submission. The frequency of reports is fixed at 4 times per year. The number of hours for reporting ranges from 1

hour for trailer manufacturer to 8 hours for light vehicle manufacturers (*See* Table 3). In addition, we assume that 50 percent of the total burden hours are utilized by technical personnel while clerical staff consumes the remaining 50 percent. In other words, the hourly wage rate for each quarterly report is split evenly between technical and clerical personnel and a weighted average of the wage hour is developed from this assumption. For 2016 the wage rate is $69.13 ([$104.25 × 0.5] + [$34.00 × 0.5]).

The reporting costs are calculated as follows:

$M \times T_p \times 4 \times \$69.13$ = cost of reporting

Where:

M = Manufacturers reporting data in the category

T_p = Reporting time for the category

4 = Quarterly reports per year

$69.13 = Reporting cost wage rate (rounded).

Thus, the estimated reporting cost for light vehicles is $86,272 (39 manufacturers × 8 hours × 4 quarters × $69.13 wage rate).

The costs for computer maintenance including software, hardware, data storage, etc. were calculated using the following formula:

$M \times T_c \times I_T$ = cost of computer maintenance

Where:

M = Manufacturers reporting data in the category

T_c = Annual computer maintenance time per manufacturer for the category

I_T = IT wage rate

The computer maintenance costs for light vehicles are $2,183,059 (39 manufacturers × 347 hours × $161.31 wage rate).

Table 8 shows the annual cost of reporting EWR information to NHTSA using the information outlined in tables 1, 2, 3, 6, and 7:

TABLE 8—ESTIMATE EWR COSTS BY SUBMISSION TYPE

Category	Light vehicles	Heavy, med vehicles	Trailers	Motorcycles	Emergency vehicles	Buses	Tires	Child restraints	Equipment mfr.	Totals
(Injury/Fatality) ...	75,899	811	109	1,128	25	100	618	3,159	67	81,916
Property Damage*	54,284	3,630	133	102	13	349	14,348	0	0	72,859
Warranty Claims	Aggregate Data									
Consumer Complaints	Aggregate Data									
Mfr. Field Reports	419,247	45,825	82	8,098	19	2,926	0	27,028	0	503,224
Dealer Field Reports	Aggregate Data									
Foreign Death Claims	1,914	32	32	65	0	0	65	1,135	0	3,244
Reporting Cost ..	86,272	53,920	22,121	8,295	9,678	52,537	47,007	9,401	1,659	290,891
Computer Maintenance	2,183,059	544,192	1,116,291	209,305	97,675	530,238	474,424	474,424	0	5,629,607
Totals	2,820,674	648,410	1,138,769	226,992	107,410	586,150	536,463	515,147	1,726	6,581,741

Note: Totals may not be exact due to rounding.

Table 9 details the total annual costs for reporting annual list of substantially similar vehicles and foreign safety campaigns:

TABLE 9—ESTIMATED ANNUAL COSTS FOR SUBSTANTIALLY SIMILAR VEHICLES AND FOREIGN SAFETY CAMPAIGNS

Task	Qty	Occupation	2016 wage rate (from Table 6)	Burden hours		Cost
				Per unit	Total	
Annual list	83	Attorney	$144.47	8	664	$95,929
Annual list—Electronic	83	IT	161.31	1	83	13,389
Defect report	133	Clerical	34.00	1	133	4,523
Defect report	133	Technical	104.25	2	266	27,731
Foreign Campaign Totals	.....	.....	.....	.....	1,146	141,572

The cost associated for manufacturers to submit Part 579.5 notices, bulletins, customer satisfaction campaigns, consumer advisories and other communications that are sent to more than one dealer or owner can be estimated from the number of hours and wage of personal submitting the documents. We understand that some manufacturers have clerical staff collect and submit the documents and other have technical staff. Because we do not know how many documents are sent by a particular staff we will assume they are done the higher paid staff. Thus, we estimated the cost to collect and submit Part 579.5 documents at 583 hours × $104.25 for Technical staff = $60,779 for manufacturers to submit notices as required under Part 579.5.

Table 10 shows the estimated cost for manufacturers to report EWR data, foreign campaigns, and Part 579.5 documents through this collection:

TABLE 10—TOTAL DOLLAR ESTIMATES FOR MANUFACTURERS TO COMPLY WITH EWR REPORTING, FOREIGN REPORTING, AND PART 579.5 REPORTING

Reporting type	Annual cost ($)
EWR Reporting (Table 8)	$6,581,741
Foreign Reporting (Table 9)	141,572
Part 579.5 Submissions	60,779
Total	6,784,092

Removed Burdens—Our previous renewal of this collection included one-time cost estimates associated with adding a new vehicle type, fuel and/or propulsion system type, and four new components (stability control, forward collision avoidance, lane departure prevention, and backover prevention) to vehicle EWR reporting. These one-time costs were estimated for manufacturers to amend their reporting templates and revise their software system to support the new reporting requirements. *See* 78 FR 51415. Manufacturers were required to make these changes to their vehicle EWR reporting by January 1, 2015. *See* 79 FR 47591. As these one-time costs have already been incurred and manufacturers have already made the necessary modifications to their systems, a total of 39,296 burden hours and $4.57 million dollars will be removed from this collection.

Summary of Burden Estimate—Based on the foregoing, we estimate the burden hours for industry to comply with the current EWR requirements, foreign campaign requirements and Part 579.5 requirements total 49,243 burden hours (47,514 for EWR requirements + 1,146 hours for foreign campaign requirements + 583 hours for Part 579.5). This is a decrease of 35,950 hours from the currently approved collection, mostly due to the one-time costs we previously estimated and have now removed from this collection. We now estimate the cost burden for current EWR requirements, foreign campaign requirements, and Part 579.5 requirements to total $6,784,092 annually.

Estimated Number of Respondents—NHTSA receives EWR submissions, foreign campaigns, and Part 579.5 submissions from roughly 292 manufacturers per year.

In summary, we estimate that there will be a total of 292 respondents per year associated with OMB No. 2127–0616.

Michael L. Brown,

Acting Director, Office of Defects, Investigation.

[FR Doc. 2016–30637 Filed 12–19–16; 8:45 am]

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0093; Notice 2]

General Motors, LLC, Grant of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Grant of petition.

SUMMARY: General Motors, LLC (GM), has determined that certain model year (MY) 2016–2017 Cadillac CTS, CT6, XTS and Escalade motor vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 135, *Light Vehicle Brake Systems.* GM filed a defect report dated August 17, 2016. GM then petitioned NHTSA on August 22, 2016, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety.

ADDRESSES: For further information on this decision contact Stu Seigel, Office of Vehicle Safety Compliance, the National Highway Traffic Safety Administration (NHTSA), telephone (202) 366–5287, facsimile (202) 366–3081.

SUPPLEMENTARY INFORMATION:

I. Overview

General Motors, LLC (GM), has determined that certain model year (MY) 2016–2017 Cadillac CTS, CT6, XTS and Escalade motor vehicles do not fully comply with paragraph S5.5.5(a) of Federal Motor Vehicle Safety Standard (FMVSS) No. 135, *Light Vehicle Brake Systems.* GM filed a defect report dated August 17, 2016, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* GM then petitioned NHTSA on August 22, 2016, pursuant to 49 U.S.C. 30118(d) and 30120(h) and their implementing regulations at 49 CFR part 556, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of receipt of the petition was published, with a 30-day public comment period, on September 29, 2016, in the **Federal Register** (81 FR 67057). No comments were received. To view the petition and all supporting documents log onto the Federal Docket Management System (FDMS) Web site at: *https://www.regulations.gov/.* Then follow the online search instructions to locate docket number ''NHTSA–2016–0093.''

II. Vehicles Involved

Affected are 46,205 of the following MY 2016–2017 Cadillac motor vehicles manufactured between March 10, 2015, and June 13, 2016.

- Cadillac CT6
- Cadillac CTS
- Cadillac Escalade
- Cadillac Escalade ESV
- Cadillac XTS

III. Noncompliance

GM explains that the noncompliance is that when the parking brake is applied on the subject vehicles the indicator light that illuminates within the cluster does not meet the lettering height requirements as specified in paragraph S5.5.5(a) of FMVSS No. 135 and also referenced in table 1; column 1, of FMVSS No. 101. Specifically, the lettering height for the indicator on the subject vehicles is 2.44 mm when it should be a minimum height of 3.2 mm.

IV. Rule Text

Paragraph S5.5.5(a) of FMVSS No. 135 states, in pertinent part:

S5.5.5 *Labeling.* (a) Each visual indicator shall display a word or words in accordance with the requirements of Standard No. 101 (49 CFR 571.101) and this section, which shall be legible to the driver under all daytime and nighttime conditions when activated. Unless otherwise specified, the words shall have letters not less than 3.2 mm (⅛ inch) high and the letters and background shall be of contrasting colors, one of which is red . . .

V. Summary of GM's Petition

GM described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, GM submitted the following reasoning:

(a) The park brake applied telltale (identified by the word ''PARK'') is red in color contrasted against a black screen, as required by S5.5.5(a) and (d)(4), conspicuously located and readily visible at the top left-of-center position of the instrument panel cluster. Additionally, the four letters of the word ''PARK'' are all capitalized such

that the 2.44 mm height is preserved across the width of the word.

(b) In addition to the park brake applied telltale required by FMVSS No. 135, all of the affected vehicles also have a driver information center (DIC) message ''Park Brake Set'' that illuminates when the parking brake is applied. The lettering height of this DIC message is 3.24 mm, greater than the 3.2 mm minimum specified for visual indicators in FMVSS No. 135. The DIC message is also substantially wider than the typical width of the telltale required by the standard. The redundant telltale and the DIC message, assure ample communication to the driver that the parking brake is applied.

(c) The operation and performance of the park brake itself is unaffected by this telltale condition. The park brake complies with all applicable requirements of FMVSS No. 135.

(d) The NHTSA has previously granted inconsequential treatment for labeling issues across various motor vehicle safety standards, including for discrepancies involving lettering height, missing information, incorrect information, and misplaced or obscured information. For example, two comparable petitions for inconsequential treatment involving brake telltale lettering height were granted to Kia and Hyundai (reference Docket numbers ''NHTSA–2004–17439'', Notice 2 and ''NHTSA–2004–17439'' (sic), Notice 2, published in the **Federal Register** on July 8, 2004, and July 9, 2004, respectively). The Kia petition cited multiple previous petitions for inconsequential treatment for brake telltale noncompliance granted by NHTSA, and we ask to incorporate them here by reference.

(e) After searching VOQ, TREAD and internal GM databases, GM is not aware of any crashes, injuries, or customer complaints associated with this condition.

(f) GM has corrected this condition in production. All vehicles produced after June 13, 2016, comply with the telltale lettering height specified in FMVSS No. 135.

GM concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA'S Decision

NHTSA's Analysis: NHTSA has reviewed GM's analysis that the subject noncompliance is inconsequential to motor vehicle safety. Specifically, the lettering height for the park brake applied indicator ''Park'' at 2.44 mm versus the FMVSS No. 135 requirement of 3.2 mm poses little if any risk to motor vehicle safety. This decision is based on the following:

1. The subject vehicles appear to meet all of the other parking brake indicator labeling requirements as specified in S5.5.5 of FMVSS No. 135. If a separate indicator is provided for application of the parking brake, the single word ''Park'' or the words ''Parking Brake'' may be used. GM has opted to comply with this section by use of the single word ''PARK'' and has capitalized all four letters of the word providing a more pronounced indicator. The indicator used is legible to the driver under all daytime and nighttime conditions when activated. The indicator is conspicuously located in the top left-of-center position on the instrument panel which is in front of and in clear view of the driver. The ''Park'' indicator is red in color when illuminated and has a black contrasting background. All of these required features help ensure that the indicator can be seen and recognized by the driver when illuminated.

2. The affected vehicles are equipped with a driver information center which is located in the instrument cluster and adjacent to the speedometer, in direct view of the driver. When the parking brake is applied, the FMVSS No. 135 required ''PARK'' indicator is illuminated. Simultaneously, in addition to the ''PARK'' indicator, the information center provides a message that the parking brake is activated with the wording ''Park Brake Set.'' GM stated that the height of this message is 3.24 mm and is substantially wider than the typical width of the required indicators. Illumination of both the ''PARK'' indicator combined with the information center statement ''Park Brake Set'' provides ample communication to the driver that the parking brake has been applied.

NHTSA'S Decision: In consideration of the foregoing, NHTSA decided that GM has met its burden of persuasion that the FMVSS No. 135 noncompliance in the affected vehicles is inconsequential to motor vehicle safety. Accordingly, GM's petition is hereby granted and GM is consequently exempted from the obligation of providing notification of, and a free remedy for, that noncompliance under 49 U.S.C. 30118 and 30120.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, this decision only applies to the subject vehicles that GM no longer controlled at the time it determined that the noncompliance existed. However, the granting of this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after GM notified them that the subject noncompliance existed.

Authority (49 U.S.C. 30118, 30120: Delegations of authority at 49 CFR 1.95 and 501.8)

Jeffrey M. Giuseppe,

Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0109; Notice 1]

Mercedes-Benz USA, LLC, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: Mercedes-Benz USA, LLC (MBUSA), has determined that certain model year (MY) 2015–2016 Mercedes-Benz CLS-Class motor vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 110, *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or Less.* MBUSA filed a Safety Recall Report dated September 12, 2016. MBUSA also petitioned NHTSA on October 4, 2016, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety.

DATES: The closing date for comments on the petition is January 19, 2017.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this

notice and submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) Web site at *https://www.regulations.gov/*. Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the Internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

SUPPLEMENTARY INFORMATION:

I. Overview

Mercedes-Benz USA, LLC (MBUSA), has determined that certain model year (MY) 2015–2016 Mercedes-Benz CLS-Class motor vehicles do not fully comply with paragraph S4.3(a) of Federal Motor Vehicle Safety Standard (FMVSS) No. 110, *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or Less.* MBUSA filed a report dated September 12, 2016, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* MBUSA also petitioned NHTSA on October 4, 2016, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of MBUSA's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

II. Vehicles Involved

Approximately 6,678 MY 2015–2016 Mercedes-Benz CLS 400 and Mercedes-Benz CLS 400 4MATIC motor vehicles manufactured between May 23, 2014 and April 21, 2016, are potentially involved.

III. Noncompliance

MBUSA explains that the noncompliance is that the subject vehicles have tire and loading information placards affixed to their B-pillars that incorrectly identify the maximum combined weight of occupants and cargo. Specifically, the Mercedes CLS 400 was manufactured with a tire information placard that identifies a maximum combined weight of 420 kilograms (926 pounds) and the Mercedes CLS 400 4MATIC was manufactured with a tire information placard that identifies a maximum combined weight of 355 kilograms (783 pounds). However, the maximum combined weight of occupants and cargo should be 315 kilograms (694 pounds) for the Mercedes CLS 400 and 325 kg (717 pounds) for the CLS 400 4MATIC. Therefore, the vehicles do not comply with paragraph S4.3 of FMVSS No. 110.

IV. Rule Text

Paragraph S4.3 of FMVSS No. 110 states:

S4.3 *Placard.* Each vehicle, except for a trailer or incomplete vehicle, shall show the information specified in S4.3 (a) through (g), and may show, at the manufacturer's option, the information specified in S4.3 (h) and (i), on a placard permanently affixed to the driver's side B-pillar. . . .

(a) Vehicle capacity weight expressed as ''The combined weight of occupants and cargo should never exceed XXX kilograms or XXX pounds''

V. Summary of MBUSA's Petition

MBUSA described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, MBUSA submitted the following reasoning:

(a) The tires originally equipped on the subject vehicles are able to carry the additional weight indicated on the tire label. Further, the tire pressure detailed on the label is sufficient to carry those weights. The maximum tire and vehicle load information detailed in the table below demonstrates that the tire is designed to carry a higher load than that which was incorrectly set out on the tire label:

Tire dimension	Maximum tire load (lbs)	Maximum vehicle load (per tire)	
		CLS 400 (lbs)	CLS 400 4MATIC (lbs)
18″ front	1708	1243	1289
18″ rear	1609	1256	1278
19″ front	1565	1243	1289
19″ rear	1653	1256	1278

(b) Should the driver follow the values displayed on the tire label, motor vehicle safety is not negatively impacted. The vehicle platform (including chassis and axles) serves other CLS vehicle lines and is designed for vehicles with a higher gross vehicle weight rating (''GVWR''). The platform therefore can handle the potential additional weight.

(c) Subject vehicles are equipped with the B-pillar certification information label in accordance with 49 CFR part 567 indicating a GVWR of 2260 kilograms (4982 pounds) for vehicle type 218.365, the CLS 400, and a GVWR of 2330 kg (5137 pounds) for vehicle type 218.367, the CLS 400 4MATIC. The information detailed on the B-pillar certification information label is correct. Therefore, the driver can refer to this alternative source of information in order to determine the correct maximum load weight of the vehicle.

(d) After identifying the potentially incorrect values in the tire label, Daimler AG (DAG) analyzed potential technical implications, specifically with respect to the requirements of FMVSS No. 110, including potential effects on axles, suspension, brakes, driving dynamic, and crashworthiness. Based on this analysis, an impact on steering, braking or other vehicle dynamics as a result of the tire label weight discrepancy can be excluded.

(e) Moreover, MBUSA is not aware of any customer complaints, accidents or injuries alleged to have occurred as a result of this non-compliance. Hence, field data supports the assertion that the issue described above will have an inconsequential impact on safety.

MBUSA concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that MBUSA no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after MBUSA notified them that the subject noncompliance existed.

Authority: (49 U.S.C. 30118, 30120: delegations of authority at 49 CFR 1.95 and 501.8)

Jeffrey M. Giuseppe,

Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[No. DOT–OST–2016–0239]

Update to U.S. Department of Transportation's NEPA Implementing Procedures

AGENCY: Office of the Secretary, DOT.

ACTION: Notice of availability and request for comment.

SUMMARY: The United States Department of Transportation (Department) is issuing a proposed update to its National Environmental Policy Act (NEPA) implementing procedures, DOT Order 5610.1D, Procedures for Considering Environmental Impacts. Consistent with the Council on Environmental Quality's regulations implementing NEPA, the Department is proposing this update and seeking public review and comment on the proposals.

DATES: Submit comments on or before January 10, 2017.

ADDRESSES: To ensure you do not duplicate your docket submissions, please submit them by only one of the following means:

Federal eRulemaking Portal: Go to *http://www.regulations.gov* and follow the online instructions for submitting comments.

Mail: Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: West Building Ground Floor, Room W12–140, 1200 New Jersey Ave. SE., between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 366–9329.

Instructions: You must include the agency name and docket number at the beginning of your comments. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Amy Coyle, Senior Attorney Advisor, U.S. Department of Transportation, Office of the General Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590, 202–366–0691, *amy.coyle@dot.gov*; or Camille Mittelholtz, Environmental Policies Team Leader, U.S. Department of Transportation, Office of the Assistant Secretary for Transportation Policy, 1200 New Jersey Avenue SE., Washington, DC 20590, 202–366–4861, *camille.mittelholtz@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Department of Transportation (Department or DOT) is proposing to update its National Environmental Policy Act (NEPA) implementing procedures. The Department last updated its current procedures, DOT Order 5610.1C, Procedures for Considering Environmental Impacts, in 1985 (5610.1C).[1] The proposed Order, DOT Order 5610.1D, Procedures for Considering Environmental Impacts (updated NEPA Order) seeks to achieve the following objectives: (1) Ensure a full and fair NEPA process that includes meaningful public involvement throughout, and the balanced consideration of a reasonable range of alternatives and their impacts on the human environment; (2) improve efficiency and expedite project delivery; (3) provide good customer service to stakeholders through consistent implementation of NEPA across the Department; (4) provide the requisite flexibility for the Department's Operating Administrations (OAs) to apply their NEPA implementing procedures to their specific programs; and (5) balance the needs of all OAs, from those with well-established NEPA programs to those seeking more guidance.

Additionally, the updated NEPA Order addresses relevant project delivery provisions of the Fixing America's Surface Transportation Act (FAST Act) that apply Department-wide, including the following:

- Section 1301 directs the Secretary to align, to the maximum extent practicable, the requirements of Section 4(f) (23 U.S.C. 138/49 U.S.C. 303), Section 106 of the Historic Preservation Act (54 U.S.C. 306108), and NEPA.

[1] 44 FR 56420, Oct. 1, 1979, *available at https://www.transportation.gov/office-policy/transportation-policy/procedures-considering-environmental-impacts-dot-order-56101c.*

Section 23 of the updated NEPA Order addresses section 1301.

- Section 1310 amends 49 U.S.C. 304, which was created by section 1314 of the Moving Ahead for Progress in the 21st Century Act (MAP–21). Under 49 U.S.C. 304 provision, one OA may apply the categorical exclusion established in the procedures of another OA for multimodal projects as defined in 23 U.S.C. 139(a)(5). Section 10(d) of the updated NEPA Order addresses section 1310.
- Section 1311 creates 49 U.S.C. 304a, which provides for use of errata sheets for final environmental impact statements (FEISs), directs the Department to issue a combined FEIS and record of decision (ROD) (FEIS/ROD) to the maximum extent practicable, and provides discretionary processes for incorporation by reference and for one OA to adopt environmental assessments (EAs) and EISs prepared by another OA. Paragraphs 14(b) and 15(c) of the updated NEPA Order address the combined FEIS/ROD. Paragraph 20(g) of the updated NEPA Order addresses adoption. Paragraph 15(b) of the updated NEPA Order addresses errata sheets. The Department does not address incorporation by reference in the updated NEPA Order. However, the Department welcomes comments on whether to add a paragraph to address it.
- Section 1313 creates 49 U.S.C. 310, Aligning Federal Environmental Reviews, which directs the Department to perform several activities: Develop a coordinated and concurrent environmental review and permitting process for transportation projects as well as a program to measure and report on progress towards alignment of Federal reviews and reducing permitting and project delivery timelines; develop a checklist to help project sponsors identify potential natural, cultural, and historic resources in the area of a proposed project; and facilitate annual interagency collaboration sessions. While the Department has undertaken efforts to implement this provision, including developing a checklist [2] and engaging in several interagency collaboration sessions, the Department has not addressed this provision in the updated NEPA Order. In light of the savings provision in 49 U.S.C. 310(g), which makes this section inapplicable to projects subject to 23 U.S.C. 139 (most highway, transit, and railroad projects requiring an EIS), the Department is requesting comment on how it might further implement the provisions of 49 U.S.C. 310 in the updated NEPA Order.
- Section 1432 provides for exemptions and expedited procedures for certain environmental review processes during emergencies. Section 19 of the updated NEPA Order references the availability of this provision.
- Section 9001 establishes the National Surface Transportation and Innovative Finance Bureau, known as the Build America Bureau (Bureau). The Bureau streamlines credit opportunities and grants and provides access to the credit and grant programs with more speed and transparency, while also providing technical assistance and encouraging innovative best practices in project planning, financing, delivery, and monitoring. It also administers several transportation financial assistance programs, including the Transportation Infrastructure Finance and Innovation Act (TIFIA) and Railroad Rehabilitation and Improvement Financing (RRIF) credit programs. The Bureau is a Secretarial Office. As the proposed Order explains, a Secretarial Office may in some situations rely on the OA with the most expertise on the potential environmental impacts of a project to conduct the environmental review process on the Secretarial Office's behalf.

Consistent with the Council on Environmental Quality's (CEQ's) Regulations for Implementing the Procedural Provisions of NEPA, 40 CFR parts 1500–1508 (CEQ regulations), the Department consulted with CEQ on the preparation of the updated NEPA Order. *See* 40 CFR 1507.3(a). In accordance with 40 CFR 1507.3(a), the Department is proposing this updated NEPA Order and seeking public review and comment on the proposals. To facilitate this process, the following section summarizes the general updates made throughout the updated NEPA Order and then the changes or additions by section.

The Department requests comments on the updated NEPA Order, which is available in the docket (DOT–OST–2016–0239) at *www.regulations.gov.* The docket also contains the ''Administrative Record to Update Existing and Support New Categorical Exclusions under the National Environmental Policy Act'' file (supporting information). DOT will respond to comments received on the proposed NEPA Order revisions in a future **Federal Register** notice, to be published after the close of the comment period. That notice will also announce the availability of the final NEPA Order, reflecting any changes implemented as a result of comments received, should a final NEPA Order be issued.

II. Section-by-Section Analysis

General Updates

As a general principle, the Department strived to draft the updated NEPA Order at a high level to apply to the Department's diverse programs and actions, and to the extent possible, avoid creating direct conflicts with existing OA programs and actions. To that end, the Department eliminated the more detailed guidance set forth in Attachment 2 of 5610.1C. Instead, the Department will issue a ''Desk Reference'' that provides more specific guidance on particular provisions of the updated NEPA Order. This will allow the Department to update the Desk Reference when appropriate without having to update the updated NEPA Order. This approach is consistent with CEQ's recommendation that agencies issue ''explanatory guidance'' on their implementing procedures. *See* 40 CFR 1507.3(a).

Another overall goal of the updated NEPA Order is to improve clarity. This includes rephrasing to make clear who is responsible for taking the actions specified in the updated NEPA Order. To improve readability, the updated NEPA Order uses ''OA'' as the entity responsible, and defines ''OA'' to include a Secretarial Office that carries out its own NEPA responsibilities (as opposed to that office relying on an OA's expertise to prepare the NEPA document). The updated NEPA Order also updates the names of the relevant offices that have responsibilities, including the Office of Policy and Office of the General Counsel (and relevant subdivisions thereof). Finally, the updated NEPA Order updates terminology to be consistent with modern NEPA practice and the Department's current operations.

Section 1: Introduction

Section 1 of the updated NEPA Order is a new section added to reflect the historical context of how past transportation decisions impacted communities. The new text further discusses the role of NEPA as a tool to make future transportation decisions that expand opportunity, support socio-economic mobility, and are inclusive of, responsive to, and reflective of communities they impact. It reflects the Department's intent to engage stakeholders earlier in the NEPA

[2] *Available at https://www.transportation.gov/administrations/office-policy/checklist-environmental-requirements-and-resources-1313-and-appendix.*

process to achieve better outcomes that serve all users and to improve the efficiency of the project delivery process.

Section 2: Policy and Intent

The Department made significant revisions to 5610.1C section 2, Policy and Intent. This section emphasizes the Department's goal to achieve an optimal process that equitably considers impacts and provides opportunity for meaningful public involvement throughout the process. Paragraph (a) emphasizes the goals of the updated NEPA Order are to facilitate a collaborative process to achieve optimal outcomes while protecting and enhancing the environment, addressing climate change, and engaging the public, as well as to use the NEPA process as an umbrella to achieve a single environmental review process. Paragraph (b) sets forth the Department's overarching environmental policy, including the need to connect people to opportunity through a safe, efficient, and accessible transportation system. Finally, paragraph (c) sets forth the goals the Department seeks to achieve through the NEPA process, including meaningful public participation and collaboration and consideration of climate change effects.

Section 3: Definitions

The Department is adding a Definitions section to provide further clarity on the meaning of certain terms used in the updated NEPA Order. The Definitions section incorporates by reference the CEQ regulatory definitions set forth in 40 CFR part 1508, and then supplements those definitions where the Department found additional clarity was needed.

Action: In addition to relying upon the definition of action in 40 CFR 1508.18, the Department includes a list of examples of typical DOT actions. Among these are ''policies and plans (including those submitted to DOT by State, tribal, or local agencies, or other public or private applicants, unless otherwise exempted).'' This would not include, for example, transportation improvement plans (TIPs) and statewide improvement plans (STIPs) conducted pursuant to 23 U.S.C. 134 and 135, respectively; STIPs and TIPs are specifically statutorily exempted (23 U.S.C. 134(q) and 23 U.S.C. 135(k), respectively). Additionally, the definition clarifies that a proposal is not an action subject to NEPA if it does not allow for agency discretion to consider environmental impacts in decision making or is not subject to DOT control and responsibility.

Administrator: Recognizing that the responsibilities of the Administrator are often delegated, the updated NEPA Order defines the Administrator as the head of an OA or his/her designee.

Applicant: The updated NEPA Order defines applicant broadly to reflect the variety of applicants encountered across the Department. The updated NEPA Order also recognizes that some OA NEPA implementing procedures (OA Procedures) provide that the applicant will carry out the responsibilities of the OA on its behalf, and therefore could conduct activities under this Order on behalf of that OA.

Class of action: The Department is adopting this term, consistent with its use in 40 CFR 1507.3(b)(2), to mean the level of NEPA review required for a particular action (*i.e.,* a categorical exclusion (CE), an EA, or an EIS).

Council on Environmental Quality (CEQ): The updated NEPA Order makes reference to CEQ on several occasions so the Department is identifying it in the Definitions section.

Cumulative impact: The updated NEPA Order incorporates the definition of cumulative impact from the CEQ regulation with a minor edit to correct an error in the original drafting. This edit was made at the recommendation of CEQ.

Environment: The Department included a definition of environment consistent with the CEQ definition of ''human environment'' at 40 CFR 1508.14 to emphasize the holistic nature of the term.

Environmental review process: The updated NEPA Order includes this term to emphasize that the Department strives to comply not just with NEPA, but all applicable environmental requirements in a single process to ensure efficient project delivery.

Multimodal project: The updated NEPA Order includes both a broad definition of ''multimodal project'' as well as a reference to multimodal project as defined in 23 U.S.C. 139, where this term is used in that context, because this narrower definition is not appropriate for all references to multimodal projects in the updated NEPA Order.

NEPA: The updated NEPA Order provides the full statutory citation for NEPA.

NEPA Document: The updated NEPA Order uses the term NEPA Document in lieu of environmental document as used in the CEQ regulations, and defines it more broadly to include an EIS, record of decision (ROD), EA, finding of no significant impact (FONSI), or any documentation that may be prepared in the application of a CE to a proposed action.

Operating Administration (OA): The updated NEPA Order defines OA to mean any agency established within the Department, and lists the current OAs. As noted in *General Updates* above, to improve readability of the updated NEPA Order, OA would also include a Secretarial Office where that office is carrying out its own NEPA responsibilities.

Shared Use Corridor: The updated NEPA Order defines shared use corridor to provide clarity on its distinction from a multimodal project.

Section 4: Implementation of the Order

This new section addresses the operations of the updated NEPA Order. It updates certain paragraphs from 5610.1C section 1, Background, regarding cancellation and authority, and pulls in the effective date of the updated NEPA Order, which 5610.1C listed separately in section 18.

Paragraph (a)(1) establishes that the updated NEPA Order serves as the overarching procedures for the Department as well as the specific procedures for any Secretarial Office carrying out its own NEPA responsibilities. For example, if the Office of Facilities, which is a Secretarial Office, was constructing a new building, it would rely on the updated NEPA Order for its NEPA implementing procedures. In contrast, if for example, the Federal Railroad Administration (FRA) were delegated or otherwise assigned responsibility to conduct a NEPA review on behalf of the Build America Bureau on a project applying for a RRIF loan, the FRA's NEPA procedures would guide FRA's work on the environmental review for the Bureau.

Consistent with 40 CFR 1507.3(a), paragraph (a)(2) reminds OAs that the updated NEPA Order supplements rather than supplants the CEQ regulations, and that they must comply with the CEQ regulations, the updated NEPA Order, and their own OA Procedures. Because some OAs have unique statutory authorities that govern the environmental review process, the paragraph also acknowledges that those statutes and their implementing regulations govern any conflicts with the updated NEPA Order.

Paragraph (a)(3) provides that OAs may establish in their own OA Procedures more specific processes and standards than those set forth in the updated NEPA Order. Further OA Procedures may contain more stringent timeframes or standards, but the OA

must follow the process set forth in paragraph 30(c) to obtain concurrence from the Office of Policy and Office of the General Counsel.

Paragraph (a)(4) provides clarity on the use of the terms ''must'' and ''should'' in the updated NEPA Order. ''Must'' denotes mandatory activities; ''should'' indicates that the OA has discretion to determine whether the activity is practicable or appropriate.

Paragraph (b) explains the intended treatment of the term ''Office of Policy'' as used throughout the updated NEPA Order. In particular, it specifies that whenever an OA must consult or notify the Office of Policy, the Office of Policy must in turn consult or notify the Office of the General Counsel. This streamlined approach means the OAs only need to make one notification and is consistent with the Department's current practice.

Paragraph (c) provides the authority under which the Department is issuing the updated NEPA Order. Paragraph (d) cancels 5610.1C. Finally, paragraph (e) makes the updated NEPA Order effective upon final publication.

Section 5: General Provisions

The updated NEPA Order includes a new section 5, General Provisions, which provides general direction on the NEPA process, irrespective of the class of action. This section updates and builds upon several provisions from 5610.1C, including section 2, Policy and Intent, paragraphs (b), which addresses the purpose and (c), which addresses the administrative record; and section 7, Preparation and Processing of Draft Environmental Statements, paragraphs (b) Timing of Preparation of Draft Statements and (c) Interdisciplinary Approach and Responsibilities of EIS Preparation.

Paragraph (a) of the updated NEPA Order addresses the timing of the environmental review process, encouraging OAs to begin it as early as possible in the development of the action. It also includes the CEQ regulatory prohibition against taking actions that would have adverse impacts or limit alternatives, including notifying applicants, consistent 40 CFR 1506.1(a)–(b) and 1502.2(f)–(g). Paragraph (b) requires OAs to use an interdisciplinary approach, consistent with 40 CFR 1502.6, and provides that they may use professional services but must have staff with the capacity to evaluate these services and take responsibility for the final content of their NEPA documents, consistent with 40 CFR 1506.5 and 1507.2. Paragraph (c) directs OAs to coordinate all applicable environmental reviews with the NEPA process, and lists the most common examples of other applicable environmental laws, regulations, and Executive Orders for DOT actions. Paragraph (d) sets forth general requirements for NEPA documents including that they be written in plain language and address impacts in proportion to their significance.

Paragraph (e) reminds OAs of the requirement to consider environmental justice, where appropriate, in their NEPA documents, including compliance with Executive Order (E.O.) 12898 and DOT Order 5610.2(a), *Department of Transportation Actions to Address Environmental Justice in Minority Populations and Low-Income Populations.* It specifically notes the requirement's applicability regardless of NEPA class of action, noting the need to consider whether the proposed action, individually or cumulatively with other past and present infrastructure decisions, would have disproportionately high and adverse effects on minority or low income populations.

Paragraph (f) reminds OAs of the differences between NEPA and Title VI of the Civil Rights Act, and that fulfilment of the NEPA process does not necessarily result in compliance with Title VI. Paragraph (f) also notes that compliance with the updated NEPA Order can sometimes play a role in supporting compliance with Title VI.

Paragraph (g) reminds OAs of their responsibility to maintain an administrative record. Paragraph (h) addresses use of contractors in preparing NEPA documents and sets forth requirements consistent with 40 CFR 1506.5. This provision expands upon language in 5610.1C section 13, Responsibility, to emphasize the responsibility of the OA to use flexibilities to ensure contractors are unbiased and produce quality work. It also expressly notes the requirement that OAs assess contractors' adequacy of performance, taking into account how the work product ensures the process adequately considers impacts.

Paragraph (i) addresses tracking of NEPA documents. Consistent with 23 U.S.C. 139(o) and current DOT policy guidance, all OAs must post information for all infrastructure projects requiring an EA or EIS on the Permitting Dashboard, *www.permits.performance.gov.* Consistent with 40 CFR 1506.6(e), paragraph (j) identifies where an outside party may request additional information about the environmental process.

Section 6: Planning and Early Coordination

Section 6 of the updated NEPA Order significantly revises 5610.1C section 3, Planning and Early Coordination. Paragraph (a) encourages early and ongoing coordination with all relevant parties including other OAs, Federal, State and local resource and regulatory agencies, stakeholders, and the public. Paragraph (b) directs OAs to consider impacts of a proposed action as early as reasonably possible, preferably during the planning stages of a proposed action. Note that while the updated NEPA Order encourages consideration of environmental impacts during transportation planning, as noted above, this process is explicitly exempted from NEPA pursuant to 23 U.S.C. 134(q) and 135(k). Paragraph (c) encourages reliance on information developed during the planning process so as to avoid duplicating efforts in the NEPA process. Paragraph (d) directs OAs to ensure that their applicants are aware of environmental analysis and review requirements.

Paragraph (e) discusses the scoping process and how it must inform the development of reasonable alternatives. New language emphasizes that the selection of a range of alternatives for further study, where applicable, be thorough and objective, and include reasonable and comparable best estimates of cost, as appropriate. Consistent the CEQ regulations, paragraph (e) notes the selection of a range of alternatives for further study must not predetermine a particular outcome. Paragraphs (f) and (g) encourage tools to improve early coordination, including Memoranda of Understanding (MOUs) and the use of conflict resolution. Finally, paragraph (h) addresses the requirement in 42 U.S.C. 4332(2)(D) to provide early notice to and solicit the views of State or Federal land management entities when a State's proposed action may have significant impacts on another State or a Federal land management entity.

Section 7: Operating Administration Coordination

The Department is adding this new section to specifically address and improve coordination within the Department. Paragraph (a) requires OAs to coordinate if it is reasonably foreseeable that more than one OA may have an action on the same project. Paragraph (b) encourages OAs to determine their respective roles, though the Office of Policy may resolve any disputes. Finally, paragraph (c)

encourages use of conflict resolution to resolve any disputes between OAs.

Section 8: Lead and Cooperating Agencies

Section 8 of the updated NEPA Order revises, but is generally consistent with 5610.1C section 6, Lead Agencies and Cooperating Agencies. This section outlines the responsibilities of lead, joint lead, and cooperating agencies consistent with the CEQ regulations and provides best practices for OAs with respect to working with or serving as a cooperating agency. Finally, paragraph (d) recommends engaging other agencies that do not otherwise meet the definition of a joint lead or cooperating agency to participate in the environmental review process. This is similar to the participating agency role as provided in 23 U.S.C. 139(d).

Section 9: Class of Action Determination

Section 9 of the updated NEPA Order builds upon section 4, Environmental Processing Choice, while moving and expanding the paragraphs on CEs and EAs to their own sections. Paragraph (a) sets forth the standard for determining the appropriate class of action, which is the significance of the impacts on the human environment, including consideration of their context and intensity. See 40 CFR 1508.27. Paragraph (b) requires OAs to establish the scope of the action, consistent with 40 CFR 1508.25, in order to determine the appropriate class of action. Paragraph (c) expands on the issue of scope to ensure that the proposed action has independent utility or significance; does not restrict consideration of alternatives for other reasonably foreseeable actions; and where applicable, connects logical termini or is of sufficient length to address environmental impacts on a broad scope. Paragraph (d) requires OAs to consider potential impacts of the proposed action on the human and natural environment. This includes consideration of the potential for the proposed action, either individually or cumulatively with other actions, including the impacts of other past or present Federal, State or local actions, to significantly affect communities protected by E.O. 12898 and DOT Order 5610.2(a). Paragraph (d) also reminds OAs that they may engage the public to help identify potential impacts. Finally, paragraph (d) reiterates the requirement to consider extraordinary circumstances before determining a CE is the appropriate class of action.

Section 10: Categorical Exclusions (CEs)

Section 10 is a new section that updates 5610.1C paragraph (c), Categorical Exclusions, within section 4, Environmental Processing Choice. CEQ's guidance, *Establishing, Applying, and Revising Categorical Exclusions Under the National Environmental Policy Act,*[3] recommends that agencies periodically review their existing CEs to ensure they remain current and appropriate. The Department undertook such a review. Paragraph 10(c) provides the results of this review of the list of categories of actions that DOT has determined do not normally individually or cumulatively have a significant effect on the human environment, and therefore normally do not require the preparation of an EA or EIS. Consistent with CEQ's guidance, the Department also developed an Administrative Record to document its conclusions to remove, revise, or establish new CEs. This document is available for public review in the docket.

Paragraph (a) provides the definition of CEs, consistent with 40 CFR 1508.4, as well as the requirement to consider whether extraordinary circumstances are present requiring the preparation of an EA or EIS. Paragraph (a) instructs OAs to conduct environmental studies to determine whether application of the CE is appropriate or whether the OA must prepare an EA or EIS when significant environmental effects could exist.

Paragraph (b) provides a list of extraordinary circumstances that OAs must consider before applying a CE listed in this Order. Among such circumstances are the potential for the action to be inconsistent with applicable Federal, State, Tribal, or local requirements relating to protection of the environment; the potential to have impacts on protected species, lands or other resources; and the potential to have disproportionately high and adverse impacts on minority and low-income populations. This list is only applicable to the CEs listed in the updated NEPA Order. However, when updating OA Procedures, OAs must consider whether any of the extraordinary circumstances provided in paragraph (b) are appropriate to add to their list.

Paragraph (c) provides the list of CEs. Based on its review, the Department proposes to add 10 new CEs, modify five of the existing CEs, and eliminate one CE and part of a CE no longer deemed useful or appropriate. Modifications to existing CEs provide clarity and reflect DOT experience with these activities.

Of the new proposed new CEs, DOT has identified routine operational activities including training and educational activities (c)(3); leasing of space in existing buildings (c)(6); remodeling existing facilities (c)(7); landscaping and landscape maintenance that does not cause introduction or spread of invasive species (c)(8); hearings and public meetings (c)(12); and Administrative actions and proceedings (c)(13).

Paragraph (c)(5) updates existing CE 5 in 5610.1C, which incorporates by reference CEs identified in OA Procedures, and would now allow one OA to apply the CE of another OA. In order to effectively apply the CE of an OA to an action being administered by another OA, the OA making the CE determination must ensure the application of the CE is appropriate and that the action to which the CE is being applied was contemplated when the CE was established. Therefore, the Department has revised the CE to read, ''Action categorically excluded in an OA's Procedures where the action is administered by another OA. The OA with the CE must provide a written determination that the CE applies to the action proposed by the other OA and provide expertise in reviewing the action being categorically excluded.''

Over the last decade, the Department has seen a number of new programs and projects that go beyond the bounds of a particular OA. This updated CE will allow the Department the flexibility to administer its projects and programs more effectively and efficiently, taking advantage of multiple OAs' resources and expertise, while ensuring that CEs are appropriately applied to proposed actions. For example, the Department may ask one OA to administer a grant because it has extensive experience with that type of grantee, but the underlying project falls within the environmental expertise of another OA. The latter OA would determine whether application of its CE to the project is appropriate because it is contemplated within that category of action and no extraordinary circumstances are present such that preparation of an EA or EIS is required. The Department does not intend for this CE to be used to apply a CE to an action that the OA never contemplated when establishing the CE. The Department plans to issue guidance to the OAs to ensure efficient and effective use of this CE.

DOT proposes two new CEs relating to rulemaking and policy activities. The

[3] 75 FR 8045, Apr. 9, 2010, *available at https://ceq.doe.gov/ceq_regulations/NEPA_CE_Guidance_Nov232010.pdf.*

first is the promulgation, modification, or revocation of rules and development of policies, notices, and other guidance documents that are strictly administrative, organizational, or procedural in nature; or are corrective, technical, or minor ((c)(10)). A second is the promulgation, modification, revocation, or interpretation of safety standards, rules, and regulations that do not result in a substantial increase in emissions of air or water pollutants, noise, or traffic congestion, or increase the risk of reportable release of hazardous materials or toxic substances ((c)(11)). Finally, DOT proposes to list financial assistance to an applicant solely for the purpose of refinancing outstanding debt, where the debt funds an action that is already completed as a categorically excluded activity ((c)(14)).

Paragraph (d) recognizes the process created in 49 U.S.C. 304 for the application of another OA's CE for projects that meet the ''multimodal project'' definition in 23 U.S.C. 139(a). The Department is working on an update to its existing guidance on this provision.

Finally, paragraph (e) reminds OAs that they are responsible for complying with all other applicable environmental requirements related to a proposed action when processing the action as a CE. It also cross references to paragraph 5(c), which lists many of the most common requirements.

Section 11: Environmental Assessments (EAs)

Section 11 is a new section to address the preparation of environmental assessments; it updates paragraph (d) of 5610.1C section 4, Environmental Processing Choice, which sets forth situations where the Department must prepare an EA or an EIS. In the updated NEPA Order, paragraph (a) provides the definition of an EA and addresses the requirement to independently evaluate the EA when an applicant prepares it. Paragraph (b) sets forth when an OA must prepare an EA, but paragraph (d) notes that an OA need not prepare an EA if it has determined to prepare an EIS. Paragraph (c) provides examples of typical classes of actions that normally require an EA, consistent with 40 CFR 1507.3(b)(2)(iii). Paragraph (e) addresses public notice and paragraph (f) addresses public involvement for EAs. Paragraph (g) provides the required elements for an EA consistent with 40 CFR 1508.9. Paragraph (h) addresses the alternatives analysis for EAs. To avoid any indication of bias toward a particular alternative where there is more than one alternative, paragraph (h) emphasizes the need to objectively evaluate each alternative at comparable levels of detail and to include, where appropriate, best estimates of costs using consistent methodologies. Paragraph (i) notes that EAs should reflect compliance or plans for compliance with other applicable environmental requirements. Paragraph (j) provides OAs the discretion to solicit public comments on an EA, but requires them to address comments received. Finally, paragraph (k) cross-references to section 18, which addresses re-evaluation and supplemental EAs.

Section 12: Findings of No Significant Impact (FONSIs)

Section 12 updates 5610.1C section 5, Finding of No Significant Impact, continuing to focus on the CEQ regulatory requirements for a FONSI set forth in 40 CFR 1508.13, 1501.7(a)(5), 1506.6, and 1501.4(e). It also addresses mitigated FONSIs, consistent with CEQ guidance, *Appropriate Use of Mitigation and Monitoring and Clarifying the Appropriate Use of Mitigated Findings of No Significant Impact*.[4] Paragraph (c) sets forth the basic requirements for relying on a mitigated FONSI, including identifying the mitigation measures necessary to reduce the potential impacts below significance; ensuring the existence of sufficient legal authority and adequate commitment and resources to execute the mitigation measures; requiring implementation of the mitigation measures in any agreement with an outside party; and where appropriate, providing for monitoring and further action when there is a failure to implement mitigation measures or a failure in their effectiveness.

Section 13: Environmental Impact Statements (EISs)

Sections 13 through 15 address the requirements for EISs. To improve clarity, the Department includes the requirements that apply to both draft and final EISs in Section 13, and then addresses those requirements specific to draft environmental impact statements (DEISs) in Section 14, and FEISs in Section 15. Generally, these sections articulate the requirements from the CEQ regulations, including those in part 1502, as well as those set forth in 5610.1C section 7, Preparation and Processing of Draft Environmental Statements, section 8, Inviting Comments on the Draft EIS, and section 11, Final Environmental Impact Statements. However, as noted above, some of these paragraphs are now addressed in *General Provisions* where the concepts apply more broadly than to EISs only.

Section 13, paragraph (a) sets forth when NEPA requires an EIS, as well as the requirement to prepare a combined FEIS/ROD pursuant to 49 U.S.C. 304a(b)/23 U.S.C. 139(n). Consistent with 40 CFR 1507.3(b)(2)(i), paragraph (b) provides examples of typical classes of actions that normally require an EIS. Paragraph (c) sets forth scoping requirements pursuant to 40 CFR 1501.7 and emphasizes that project scoping includes opportunities to receive input from the public, Federal agencies, State and local governments, and tribes on issues, including alternatives to be evaluated in the EIS. Paragraph (d) addresses the format and content of EISs, including purpose and need, alternatives, affected environment, environmental consequences, and mitigation. Paragraph (d)(2)(a) emphasizes the requirement that the alternatives analysis describe criteria used to identify the range of alternatives and how public and agency input was considered to determine which alternatives to evaluate and which to eliminate. The paragraph also notes that alternatives should be evaluated fully at comparable levels of detail, except where legally permitted to develop a preferred alternative to a higher level of detail, and, where appropriate, include best estimates of cost that are reasonable, comparable, and developed using consistent methodologies. Paragraph (d)(2)(b) addresses the need for the EIS to include information regarding the process used to eliminate alternatives. Paragraph (e) addresses public notice and notice of availability requirements consistent with 40 CFR 1506.6. Paragraph (f) addresses review of EISs prepared pursuant to NEPA Section 102(2)(D). Paragraph (g) sets forth the requirement to file EISs with the Environmental Protection Agency (EPA) pursuant to 40 CFR 1506.9 and notes EPA's guidance on filing. Paragraph (h) sets forth the timing requirements, including the ability to reduce or extend time periods.

Section 14: Draft Environmental Impact Statements (DEISs)

As noted above, Section 14 only addresses those requirements specific to the preparation of DEISs. Paragraph (a) encourages early preparation of the DEIS to ensure the decision maker can meaningfully consider the analysis in the decision-making process. Paragraph (b) encourages OAs to indicate in the DEIS when they intend to issue a

[4] 76 FR 3843, Jan. 21, 2011, *available at https://ceq.doe.gov/current_developments/docs/Mitigation_and_Monitoring_Guidance_14Jan2011.pdf.*

combined FEIS/ROD pursuant to 49 U.S.C. 304a(b)/23 U.S.C. 139(n). Finally, paragraph (c) sets forth the specific circulation and request for comment requirements for DEISs.

Section 15: Final Environmental Impact Statements (FEISs)

As noted above, Section 15 only addresses those requirements specific to the preparation of FEISs. Consistent with 40 CFR 1503.4, paragraph (a) provides guidance on responding to comments on the DEIS in the FEIS. Paragraph (b) provides for the use of errata sheets consistent with 49 U.S.C. 304a(a)/23 U.S.C. 139(n) and 40 CFR 1503.4(c). Paragraph (c) sets forth the 49 U.S.C. 304a(b)/23 U.S.C. 139(n) requirement to issue a combined FEIS/ROD to the maximum extent practicable, unless the FEIS makes substantial changes to the proposed action that are relevant to environmental or safety concerns; or there is a significant new circumstance or information relevant to environmental concerns that bears on the proposed action or the impacts of the proposed action. Paragraph (d) directs the FEIS to reflect compliance or plans for compliance with other environmental requirements. Paragraph (e) reiterates existing delegations for approval of FEISs. Paragraph (f) sets forth requirements to notify the Office of Policy for certain FEISs (*e.g.,* highly controversial actions). Finally, paragraph (g) addresses circulation requirements for the FEIS.

Section 16: Record of Decision

This new section sets forth the topics to be addressed in the ROD, including alternatives, factors balanced in decision making, and mitigation measures. Paragraph (b) sets forth the 30-day waiting period required by 40 CFR 1506.10(b)(2) in those instances where the OA determines it is not practicable to issue a combined FEIS/ROD pursuant to 49 U.S.C. 304a(b)/23 U.S.C. 139(n). Finally, paragraph (c) provides that OAs may develop a single ROD for multimodal actions.

Section 17: Tiering and Programmatic Approaches

While 5610.1C section 7(g) addresses tiering, the Department finds tiering and programmatic approaches expedite project delivery, and therefore is devoting a separate section of the updated NEPA Order to this topic. Paragraph (b) defines tiering and emphasizes when use of tiering may be appropriate. Paragraph (c) addresses when programmatic EAs or EISs might be helpful. Finally, paragraph (d) encourages the use of Programmatic Agreements to streamline routine actions or environmental requirements, developing them as broadly as possible to cover the actions of multiple OAs.

Section 18: Re-evaluation and Supplementation

Section 18 updates and clarifies the existing practice for re-evaluation outlined in 5610.1C section 19, Time in Effect of Statements. Re-evaluation is a longstanding practice of the Department to determine whether new information triggers the requirement to supplement an EIS pursuant to 40 CFR 1502.9. Additionally, the Department is revising its dates for re-evaluation from 3 to 5 years to be consistent with Question 32 of the Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations (Forty Questions).[5] Paragraph (a) encourages the use of re-evaluation when there are changes to the proposed action or new circumstances or information relevant to environmental concerns. Additionally, it encourages OAs to re-evaluate in writing DEISs if the OA has not issued an FEIS within 5 years of circulation of the DEIS, and FEISs if major steps toward implementation have not commenced within 5 years of FEIS approval. Paragraphs (b)(1) and (b)(2) address the CEQ regulatory criteria for a supplemental EIS, as well as the discretion to supplement. Paragraph (b)(3) addresses the process for preparing a supplemental EA or EIS.

Section 19: Emergency Actions

The Department added a separate section regarding emergency actions to address the CEQ regulation on emergencies, 40 CFR 1506.11, and guidance, *Memorandum for Heads of Federal Departments and Agencies regarding Emergencies and the National Environmental Policy Act,*[6] as well as section 1432 of the FAST Act. This builds on the existing paragraph (c) in 5610.1C section 17, Timing of Agency Action, which details the internal process for consulting with CEQ. The updated NEPA Order addresses generally emergency situations in paragraph (a) and then provides mechanisms for NEPA compliance where the OA anticipates significant impacts in paragraph (b) or non-significant impacts in paragraph (c). In both instances, the updated NEPA Order provides the internal coordination process for such compliance.

Section 20: Adoption of EISs and EAs

The Department added this new section to address adoption of NEPA documents pursuant to the CEQ regulation, 40 CFR 1506.3, and the Department's discretionary adoption authority under 49 U.S.C. 304a(c)(2). Paragraphs (a) through (c) outline the same requirements set forth in 40 CFR 1506.3 for the adoption of EISs. Where the OA was not a cooperating agency, paragraphs (b) and (c) direct the OA to issue a combined FEIS/ROD consistent with the directive in 49 U.S.C. 304a/23 U.S.C. 139(n). Paragraph (d) sets forth the adoption process for EAs. Consistent with Question 32 of the Forty Questions, paragraph (e) requires OAs to reevaluate an EA or EIS that is more than 5 years old before adopting another Federal agency's EA or EIS. Paragraph (f) addresses the notification process. Finally, paragraph (f) acknowledges the discretionary adoption process under 49 U.S.C. 304a(c)(2). The Department intends to issue guidance on the application of this provision, which it will incorporate into the Desk Reference.

Section 21: Mitigation and Monitoring

The Department added this new section to address generally mitigation and monitoring in the NEPA process. Consistent with the approach in 5610.1C, the updated NEPA Order continues to reference mitigation in the context of specific NEPA documents (*e.g.,* EAs, FONSIs, EISs, RODSs). This section is based on the CEQ regulations and guidance, *Appropriate Use of Mitigation and Monitoring and Clarifying the Appropriate Use of Mitigated Findings of No Significant Impact.*[7] Paragraph (a) describes the purpose of mitigation and paragraph (b) encourages early development of mitigation measures. Paragraph (c) addresses appropriate documentation of mitigation measures and paragraph (d) addresses mitigation commitments. The goal of these provisions is to document the mitigation that the OA both considered and adopted in the NEPA analysis and decision. Due to the importance of ensuring implementation of mitigation measures, the Department has included provisions on ensuring the implementation of mitigation measures, and related monitoring provisions in paragraphs (e) and (f).

Section 22: Responsible Official for Secretarial Office Actions

Because the updated NEPA Order serves as the NEPA implementing procedures for Secretarial Offices that may undertake their own NEPA review for actions where they are not relying on the NEPA expertise of an OA, Section 22 provides that the office director serves as the responsible official for approving NEPA documents. Section 22 also provides that the Office of Policy, in conjunction with the Assistant General Counsel for Operations within the Office of the General Counsel, is responsible for general oversight and advice on environmental matters. This section maintains the responsible official set forth in 5610.1C section 21, Responsible Office for Office of the Secretary Actions, but provides clarity that this only applies when the Secretarial Office is serving as the lead agency.

Section 23: Determinations Under Section 4(f) and Integration With NEPA

Section 23 updates 5610.1C's guidance in section 12, Determinations Under Section 4(f) of the DOT Act. This section reflects the current statutory language for protection of certain parklands, refuges, recreation areas, and historic sites under Section 4(f) (49 U.S.C. 303/23 U.S.C 138). Because the Department intends to issue separate DOT-wide guidance or regulations for implementation of Section 4(f) to further reflect current policy and practice in implementing Section 4(f), and because Attachment 2 of 5610.1C would be eliminated, some of the detailed guidance would no longer be part of the updated NEPA Order.

Paragraph 23(a) revises the discussion of findings required by Section 4(f) previously provided in 5610.1C section 12. It no longer provides that an action having more than a minimal effect on lands protected under Section 4(f) normally requires an EIS because DOT experience has shown that use of Section 4(f) lands is not necessarily a significant impact.

Paragraph 23(b) provides that an OA may approve the use of Section 4(f) property if it determines that the proposed action, including any measures to minimize harm, would have a *de minimis* impact on the property. In addition, pursuant to section 1301 of the FAST Act, the revisions in paragraph 23(c) note opportunities to integrate requirements for Section 4(f) with those for NEPA and Section 106 of the National Historic Preservation Act. DOT seeks public comment on the opportunities identified in paragraph 23(c) and also seeks comment on additional opportunities for integration of Section 4(f), NEPA, and Section 106.

Section 24: Review of NEPA Documents Prepared by Other Agencies

Section 24 revises 5610.1C section 9, Review of Environmental Statements Prepared by Other Agencies. The level of detail provided in 5610.1C is no longer necessary because the OAs have decades of experience with these reviews. Therefore, the Department streamlined this section to summarize its general responsibilities and internal coordination process.

Section 25: Public Involvement

Section 25 greatly expands upon 5610.1C section 14, Citizen Involvement Procedures, to give the Department additional guidance on the purpose of public involvement in the NEPA process (paragraph (a)) and provide a variety of mechanisms (paragraph (b)) to achieve the goal of promoting meaningful public involvement early in the process to ensure an efficient project delivery process that meets the needs of stakeholders. Paragraph (c) states the OAs' obligation to comply with E.O. 12372, *Intergovernmental Review of Federal Programs,* and the implementing regulations in 49 CFR part 17, when applicable. Paragraph (d) updates 5610.1C section 14(e) regarding the requirements for public hearings and public meetings consistent with 40 CFR 1506.6(c). Finally, paragraph (e) requires posting of NEPA documents online where appropriate and practicable.

Section 26: Conflict Resolution

This new section promotes the use of both informal conflict resolution as well as environmental collaboration and conflict resolution (ECCR) consistent with the September 7, 2012 CEQ/OMB joint *Memorandum on Environmental Collaboration and Conflict Resolution.*[8] Because the Department has a separate, more detailed Order on conflict resolution, DOT Order 5611.1a, *U.S. Department of Transportation National Procedures for Elevating Highway and Transit Environmental Disputes,*[9] the updated NEPA Order only provides a high-level overview of informal conflict resolution and ECCR, with a cross-reference to that Order.

Section 27: Pre-Decision Referrals to the Council on Environmental Quality

Section 27 of the updated NEPA Order revises 5610.1C section 10, Pre-decision Referrals to the Council on Environmental Quality. This section addresses the internal process for addressing or making referrals to CEQ. Overall, the process remains the same, but the Department revised this section to provide clarity consistent with the general updates discussed above.

Section 28: Proposal for Legislation

Section 28 of the updated NEPA Order addresses the requirements for legislative EISs consistent with 40 CFR 1506.8. The updated NEPA Order revises 5610.1C section 15, Proposal for Legislation, for clarity consistent with the general updates discussed above.

Section 29: International Actions

Section 29 of the updated NEPA Order addresses the implementation of E.O. 12114, *Environmental Effects Abroad of Major Federal Actions.* Section 29 streamlines 5610.1C section 16, International Actions, by cross referencing to the E.O. rather than repeating the E.O.'s applicability criteria. It also provides that OAs must prepare any required EIS consistent with the updated NEPA Order and OA Procedures. Finally, this section reflects edits for clarity consistent with the general updates discussed above.

Section 30: Operating Administration Implementing Procedures

Section 30 updates and supplements 5610.1C section 20, Implementing Instructions. Consistent with the Department's existing procedures, Section 30(a) of the updated NEPA Order requires OAs to either issue their own implementing procedures (OA Procedures) or rely upon the NEPA Order, but issue supplemental guidance. In addition to setting forth the basic requirements for OA Procedures, consistent with 40 CFR 1505.1 and 1507.3, Section 30 also details the relationship between the updated NEPA Order and existing OA Procedures. Consistent with paragraph (d), once the Department finalizes the updated NEPA Order, OAs must evaluate their existing procedures to determine whether they are consistent with the updated NEPA Order. If not, the OAs must develop a plan and schedule to make revisions and obtain concurrence from the Office of Policy and Office of the General Counsel on the plan and schedule. In the interim period, paragraph (e) provides that OAs may continue to follow their existing OA Procedures, but have the discretion to rely on new

[8] *Available at https://www.udall.gov/documents/Institute/OMB_CEQ_Memorandum_2012.pdf.*

[9] *Available at https://www.environment.fhwa.dot.gov/strmlng/dot5611_order.asp.*

provisions in the updated NEPA Order. Finally, paragraph (f) sets forth the internal review and concurrence process for establishing or updating OA Procedures, and paragraph (g) directs the Office of Policy to maintain them on a DOT Web site.

Issued in Washington, DC, on December 15, 2016.

Anthony Foxx,

Secretary of Transportation.

[FR Doc. 2016–30660 Filed 12–19–16; 8:45 am]

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Comment Request: Record and Disclosure Requirements—Consumer Financial Protection Bureau Regulations B, C, E, M, Z, and DD and Board of Governors of the Federal Reserve System Regulation CC

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the renewal of an information collection as required by the Paperwork Reduction Act of 1995 (PRA).

An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment concerning the renewal of an information collection titled, ''Record and Disclosure Requirements—Consumer Financial Protection Bureau (CFPB) Regulations B, C, E, M, Z, and DD and Board of Governors of the Federal Reserve System (FRB) Regulation CC.''

DATES: Comments must be submitted on or before February 21, 2017.

ADDRESSES: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557–0176, 400 7th Street SW., Suite 3E–218, mail stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465–4326 or by electronic mail to *pracomments@occ.treas.gov*. You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, OCC Clearance Officer, (202) 649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, mail stop 9W–11, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information that they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing this notice of the renewal of the following information collection:

Title: Record and Disclosure Requirements—Consumer Financial Protection Bureau (CFPB) Regulations B, C, E, M, Z, and DD and Board of Governors of the Federal Reserve System (FRB) Regulation CC.

OMB Control No.: 1557–0176.

Type of Review: Regular review.

Affected Public: Businesses or other for-profit.

Frequency of Response: On occasion.

Burden Estimates:

Estimated Number of Respondents: 1,390.

Estimated Annual Burden: 3,887,872 hours.

Description: This information collection covers CFPB Regulations B, C, E, M, Z, and DD and FRB Regulation CC. The CFPB and FRB regulations include the following provisions:

Reg B—12 CFR 1002—Equal Credit Opportunity Act

This regulation implements the Equal Credit Opportunity Act (15 U.S.C. 1601 *et seq.*). The regulation prohibits lenders from discriminating against credit applicants on a prohibited basis, establishes rules for retaining records of credit applications and collecting information about the applicant's race and other personal characteristics in applications for certain dwelling-related loans, requires lenders to report the credit history in the names of both spouses on an account, requires lenders to provide applicants with copies of appraisal reports in connection with credit transactions, and requires notification of action taken on a credit application.

Reg C—12 CFR 1003—Home Mortgage Disclosure

This regulation implements the requirements of the Home Mortgage Disclosure Act (12 U.S.C. 2801 *et seq.*). The regulation requires certain financial institutions to report data to the appropriate Federal agency about home purchase loans, home improvement loans, and refinancings that it originates or purchases, or for which it receives certain applications, and to disclose certain data to the public.

Reg E—12 CFR 1005—Electronic Fund Transfers

This regulation carries out the purposes of the Electronic Fund Transfer Act (15 U.S.C. 1693 *et seq.*), which establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfers and remittance transfer services and the financial institutions or other persons that offer these services.

Reg M—12 CFR 1013—Consumer Leasing

This regulation implements the consumer leasing provisions of the Truth in Lending Act (12 U.S.C. 1601 *et seq.*). The regulation: Ensures that lessees of personal property receive meaningful disclosures that enable them to compare lease terms with other leases and, where appropriate, with credit transactions; limits the amount of balloon payments in consumer lease

transactions; and provides for accurate disclosure of lease terms in advertising.

Reg Z—12 CFR 1026—Truth in Lending

This regulation implements the Truth in Lending Act (15 U.S.C. 1601 *et seq.*) and certain provisions of the Real Estate Settlement Procedures Act (12 U.S.C. 2601 *et seq.*). The regulation prescribes uniform methods for computing the cost of credit, disclosing credit terms and costs, and resolving errors on certain types of credit accounts.

Reg CC—12 CFR 229—Availability of Funds and Collection of Checks

This regulation implements the Expedited Funds Availability Act (12 U.S.C. 4001–4010) and the Check Clearing for the 21st Century Act (12 U.S.C. 5001–5018). The regulation contains: Rules regarding the duty of banks to make funds deposited into accounts available for withdrawal, including availability schedules and the disclosure of funds availability practices; rules to expedite the collection and return of checks by banks; and general provisions relating to substitute checks, including the disclosure and notices that banks must provide.

Reg DD—12 CFR 1030—Truth in Savings

This regulation implements the Truth in Savings Act (12 U.S.C. 4301 *et seq.*). The regulation requires depository institutions to provide disclosures so that consumers can meaningfully compare accounts at different depository institutions.

Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: December 13, 2016.

Karen Solomon,

Deputy Chief Counsel, Office of the Comptroller of the Currency.

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY

Open Meeting of the Federal Advisory Committee on Insurance

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces that the Department of the Treasury's Federal Advisory Committee on Insurance (''Committee'') will convene a meeting on Thursday, January 5, 2017, in the Cash Room, 1500 Pennsylvania Avenue NW., Washington, DC 20220, from 1:00–5:00 p.m. Eastern Time. The meeting is open to the public, and the site is accessible to individuals with disabilities.

DATES: The meeting will be held on Thursday, January 5, 2017, from 1:00–5:00 p.m. Eastern Time.

ADDRESS: The Federal Advisory Committee on Insurance meeting will be held in the Cash Room, Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, DC 20220. The meeting will be open to the public. Because the meeting will be held in a secured facility, members of the public who plan to attend the meeting must either:

1. *Register online.* Attendees may visit *http://www.cvent.com/d/hvq26p?ct=6128d144-9ad5-45f5-910c-c7b44560aae0&RefID=FACI+General+Registration* and fill out a secure online registration form. A valid email address will be required to complete online registration.

NOTE: online registration will close at 11:59 p.m. Eastern Time on Friday, December 30, 2016.

2. Contact the Federal Insurance Office (FIO), at (202) 622–0512, by 5:00 p.m. Eastern Time on Friday, December 30, 2016, and provide registration information.

Requests for reasonable accommodations under Section 504 of the Rehabilitation Act should be directed to Marcia Wilson, Office of Civil Rights and Diversity, Department of the Treasury at (202) 622–8177, or *marcia.wilson@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Chester McPherson, Deputy Director, Consumer Affairs, FIO, Room 1410, Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, DC 20220, at (202) 622–0512 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: Notice of this meeting is provided in accordance with the Federal Advisory Committee Act, 5 U.S.C. App. II, 10(a)(2), through implementing regulations at 41 CFR 102–3.150.

Public Comment: Members of the public wishing to comment on the business of the Federal Advisory Committee on Insurance are invited to submit written statements by any of the following methods:

Electronic Statements

- Send electronic comments to *faci@treasury.gov.*

Paper Statements

- Send paper statements in triplicate to the Federal Advisory Committee on Insurance, Room 1410, Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

In general, the Department of the Treasury will post all statements on its Web site *http://www.treasury.gov/about/organizational-structure/offices/Pages/Federal-Insurance.aspx* without change, including any business or personal information provided such as names, addresses, email addresses, or telephone numbers. The Department of the Treasury will also make such statements available for public inspection and copying in the Department of the Treasury's Library, 1500 Pennsylvania Avenue NW., Washington, DC 20220, on official business days between the hours of 10:00 a.m. and 5:00 p.m. Eastern Time. You can make an appointment to inspect statements by telephoning (202) 622–0990. All statements, including attachments and other supporting materials, received are part of the public record and subject to public disclosure. You should submit only information that you wish to make available publicly.

Tentative Agenda/Topics for Discussion: This is a periodic meeting of the Federal Advisory Committee on Insurance. In this meeting, the Committee will discuss a number of issues, including blockchain technology in the insurance sector, the changing auto safety landscape, and an overview of insurance fraud. The Committee will

also receive updates from its subcommittees.

Michael T. McRaith,

Director, Federal Insurance Office.

[FR Doc. 2016–30632 Filed 12–19–16; 8:45 am]

BILLING CODE 4810–25–P

DEPARTMENT OF VETERANS AFFAIRS

Reimbursement for Caskets and Urns for Burial of Unclaimed Remains in a National Cemetery

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs (VA) is updating the monetary reimbursement rates for caskets and urns purchased for the interment in a VA national cemetery of Veterans who die with no known next of kin and where there are insufficient resources for furnishing a burial container. The purpose of this notice is to notify interested parties of the rates that will apply to reimbursement claims that occur during calendar year (CY) 2017.

FOR FURTHER INFORMATION CONTACT: Eric Axelbank, Budget Operations and Field Support Division, National Cemetery Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. Telephone: (202) 632–7236 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Section 2306(f) of title 38, U.S.C., authorizes VA National Cemetery Administration (NCA) to furnish a casket or urn for interment in a VA national cemetery of the unclaimed remains of Veterans for whom VA cannot identify a next of kin and determines that sufficient financial resources for the furnishing of a casket or urn for burial are not available. VA implemented regulations to administer this authority as a reimbursement benefit in section 38.628 of title 38, Code of Federal Regulations.

Reimbursement for a claim received in any CY will not exceed the average cost of a 20-gauge metal casket or a durable plastic urn during the fiscal year (FY) preceding the CY of the claim. Average costs are determined by market analysis for 20-gauge metal caskets, designed to contain human remains, with a gasketed seal, and external rails or handles. The same analysis is completed for durable plastic urns, designed to contain human remains, which include a secure closure to contain the cremated remains.

Using this method of computation, in FY 2016, the average costs for caskets were determined to be $2,069 and $163 for urns. Accordingly, the reimbursement rates payable for qualifying interments occurring during CY 2017 are $2,069 for caskets and $163 for urns.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on December 13, 2016, for publication.

Dated: December 13, 2016.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

RIN 1651–AB02

Regulatory Implementation of the Centers of Excellence and Expertise

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: Interim final rule.

SUMMARY: In 2012, U.S. Customs and Border Protection (CBP) developed a test to incrementally transition the operational trade functions that traditionally reside with port directors to the Centers of Excellence and Expertise (Centers). The purpose of the test was to broaden the ability of the Centers to make decisions by waiving certain identified regulations to the extent necessary to provide the Center directors, who manage the Centers, with the authority to make the decisions normally reserved for the port directors. At this time, CBP is prepared to end the test and establish the Centers as a permanent organizational component of the agency and to transition certain additional trade functions to the Centers. This rule amends the CBP regulations on an interim basis to implement this organizational change by: Defining the Centers and the Center directors; amending the definition for port directors to distinguish their functions from those of the Center directors; identifying the Center management offices; explaining the process by which importers will be assigned to Centers; providing the importer with an appeals process for its Center assignment; identifying the regulatory functions that will be transitioned from the port directors to the Center directors and those that will be jointly carried out by the port directors and the Center directors; and providing clarification in applicable regulations that payments and documents may continue to be submitted at the ports of entry or electronically.

DATES: *Effective date:* This interim rule is effective January 19, 2017.

Comment date: Written comments must be submitted on or before January 19, 2017.

ADDRESSES: You may submit comments identified by *docket number,* by *one* of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments via docket number USCBP–2016–0075.
- *Mail:* Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, Attention: Trade and Commercial Regulations Branch, 90 K Street NE., 10th Floor, Washington, DC 20229–1177.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments and additional information on this rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read comments received, go to *http://www.regulations.gov.* Submitted comments may also be inspected on regular business days between the hours of 9 a.m. and 4:30 p.m. at Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, 90 K Street NE., 10th Floor, Washington, DC. Arrangements to inspect submitted comments should be made in advance by calling Mr. Joseph Clark at (202) 325–0118.

FOR FURTHER INFORMATION CONTACT: Lori Whitehurst, CBP Office of Field Operations by telephone (202) 344–2536 or by email, *lori.j.whitehurst@cbp.dhs.gov;* or Susan S. Thomas, CBP Office of Field Operations by telephone (202) 344–2511 or by email, *susan.s.thomas@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of this interim final rule. U.S. Customs and Border Protection (CBP) also invites comments that relate to the economic, environmental, or federalism effects that might result from this regulatory change. Comments that will provide the most assistance to CBP will reference a specific portion of the rule, explain the reason for any recommended change, and include data, information or authority that support such recommended change. Written comments must be submitted on or before January 19, 2017. CBP will consider those comments and make any changes appropriate after consideration of those comments.

Background

Table of Contents

I. Purpose and History of the Centers of Excellence and Expertise (Centers)

A. Purpose of the Centers

U.S. Customs and Border Protection (CBP) established ten Centers of Excellence and Expertise (Centers) managed from strategic locations around the country to focus CBP's trade expertise on industry-specific issues and provide tailored support for importers. The concept of the Centers arose in response to claims that CBP's port-by-port trade processing authority sometimes resulted in similar goods entered at different ports of entry receiving disparate processing treatment causing trade disruptions, increased transaction costs, and information lapses for both CBP and the importer. CBP established the Centers to facilitate trade, reduce transaction costs, increase compliance with applicable import laws, and achieve uniformity of treatment at the ports of entry for the identified industries. CBP believes that providing broad decision-making authority to the Centers will better enable the Centers to achieve these goals for CBP and the trade.

B. History of the Centers

The concept of Centers was developed as a result of discussions with the Advisory Committee on Commercial Operations of U.S. Customs and Border Protection (COAC), which promoted the management by account framework. The COAC is an advisory committee established in accordance with the provisions of the *Federal Advisory Committee Act* (FACA), 5 U.S.C. App. 2. COAC provides advice and makesrecommendations to the Commissioner of CBP, the Secretary of the Department of Homeland Security, and the Secretary of the Treasury on all matters involving the commercial operations of CBP and related U.S. Department of Homeland Security (DHS) and Treasury functions. CBP has continually consulted COAC throughout the development of the Centers.

In October 2011, CBP established the first two Centers: The Electronics Center managed from Long Beach, California; and the Pharmaceuticals Center (later renamed the *Pharmaceuticals, Health & Chemicals Center*) managed from New York City, New York.

On May 10, 2012, the Acting Commissioner of CBP announced at the West Coast Trade Symposium two new Centers: The Automotive & Aerospace Center managed from Detroit, Michigan, and the Petroleum, Natural Gas & Minerals Center managed from Houston, Texas.

On August 28, 2012, CBP published a General Notice in the **Federal Register** (77 FR 52048) announcing a test broadening the ability of the Centers to make decisions by waiving certain identified regulations under title 19 of the Code of Federal Regulations (19 CFR) to provide the Center directors with the authority to make the decisions normally reserved for the port directors. The notice provided centralized decision-making authority to the following Centers: Electronics; Pharmaceuticals, Health & Chemicals; Automotive & Aerospace; and Petroleum, Natural Gas & Minerals. The notice invited all businesses that met the eligibility criteria set forth in the notice to apply, including, but not limited to Customs-Trade Partnership Against Terrorism (C–TPAT) and Importer Self Assessment (ISA) program members.

On November 27, 2012, the Deputy Commissioner of CBP announced at the East Coast Trade Symposium six new Centers: The Agriculture & Prepared Products managed from Miami, Florida; the Apparel, Footwear & Textiles managed from San Francisco, California; the Base Metals managed from Chicago, Illinois; the Consumer Products & Mass Merchandising managed from Atlanta, Georgia; the Industrial & Manufacturing Materials managed from Buffalo, New York; and the Machinery managed from Laredo, Texas.

On April 4, 2013, CBP published a General Notice in the **Federal Register** (78 FR 20345) to announce the six new Centers and list the additional regulations that would be waived for test participants.

On March 10, 2014, CBP published a General Notice in the **Federal Register** (79 FR 13322) to modify the existing test by changing the scope of coverage for some of the Centers and the types of entries that would be processed by the Centers, waiving an additional regulation for Center test participants, and clarifying the submission process for responses to Requests for Information and Notices of Action.

Since their establishment in October 2011, the Centers have been staffed with CBP employees who facilitate trade by providing account management for members in the identified industries, engaging in risk segmentation, and by strengthening trade outreach.

Under the test, the Centers have had the ability to review entries and the Center directors, who are tasked with leading the Centers, have had decision-making authority for the functions identified by regulation in the test notices, which, for the most part, dealt with the post-release environment. Under the test, the Center directors have also had the ability to make recommendations to the port directors concerning decisions that were retained by the port directors notwithstanding the test.

On September 11, 2014, Commissioner R. Gil Kerlikowske signed Delegation Order number 14–004, which delegated to the Center directors all functions, authorities, rights, privileges, powers, and duties vested in port directors by law, regulation, or otherwise. The delegation enabled these functions, authorities, rights, privileges, powers, and duties to be exercised concurrently by port directors and Center directors. CBP began implementing the delegation order on January 28, 2015, for the Electronics Center, the Pharmaceutical, Health & Chemicals Center, and the Petroleum, Natural Gas & Minerals Center.

II. Finalization of the Centers of Excellence and Expertise Test

During the Centers' test period, CBP incrementally transitioned to the Center directors some of the trade functions that traditionally reside with the port directors, such as determinations, notifications, and processing concerning duty refund claims based on 19 U.S.C. 1520(d) and issuance of all Requests for Information (CBP Form 28). As explained in the Executive Order 13563 and Executive Order 12866 section below, the Centers met their trade enhancement goals and the test was a success. Moreover, section 110 of the

Trade Facilitation and Trade Enforcement Act of 2015 (Pub. L. 114–125, 130 Stat. 122, February 24, 2016) required that the Centers of Excellence and Expertise be developed and implemented. Therefore, at this time, CBP is prepared to end the Centers' test and establish the Centers as a permanent organizational component of the agency and to transition certain additional trade functions to the Centers, such as the processing of quota entry summaries (*see* 19 CFR part 132) and determining whether to provide importers with a reasonable opportunity to label products (*see* 19 CFR part 11). To accomplish this goal, CBP is realigning and shifting certain staff positions from the port director chain of command to the Center director chain of command. The staff that is handling the trade functions under the port director will continue to handle those same functions under the Center directors, but they will be reallocated by industry specialization and will report to one of the ten Centers. The staff who will report to the Centers includes: Import Specialists, Entry Specialists, and Liquidation Specialists. As explained in the Executive Order 13563 and Executive Order 12866 section below, this realignment is virtual, in that Center personnel will remain at their current location, primarily at ports of entry, to stay accessible to the trade community and to continue to assist with enforcement and compliance issues that arise. The staff who will continue to report to the port directors includes: CBP Officers, Agriculture Specialists, FPF Officers, and Seized Property Specialists.

CBP notes that certain authorities and responsibilities that were provided to the Center directors by waiving certain regulatory sections in the test notices will not be transitioned to the Centers under the regulations. CBP has made the decision to maintain the current regulatory authorities for: The control, movement, examination and release of cargo; export; drawback; and Fines, Penalties & Forfeitures. The sections that will not be transitioned to the Centers under the regulations that were transitioned in the test notices are listed here along with parenthetical explanations: § 10.66 (exportation of goods); § 10.67 (exportation of goods); § 12.3 (condition of release); § 12.73(k) (detention of motor vehicle); § 12.80 (condition of release); § 134.3(b)(2) (location of examination); § 141.58(c) (request to ship merchandise separately); § 142.13 (condition of release); § 144.34(a) (physical transport of goods from warehouse); § 141.57 (incremental release of split shipments); § 146.63 (Foreign Trade Zone release); § 162.79b (involves Fines, Penalties & Forfeitures officers); § 181.13 (involves Fines, Penalties & Forfeitures officers); and § 191.61 (drawback).

This document also amends certain regulations to jointly authorize the port directors and Center directors to implement certain functions, such as the authority to accept certain documentation (*see, e.g.,* 19 CFR 10.41a(e)) and collect payments (*see, e.g.,* 19 CFR 24.2). The reason for providing joint authority to the port directors and Center directors is to ensure that the trade mission and security mission are met regardless of the hour of operation for either of the personnel. CBP believes that providing broad decision-making authority to the Centers will better enable the Centers to facilitate trade, reduce transaction costs, increase compliance with applicable import laws, and achieve uniformity of treatment at the ports of entry for the identified industries. As such, this document amends the CBP regulations on an interim basis to more fully implement the Centers by: Defining the Centers and the Center directors; amending the definition for port directors to distinguish their functions from those of the Center directors; identifying the Center management offices; explaining the process by which importers will be assigned to Centers; providing the importer with an appeals process for its Center assignment; identifying the regulatory functions that will be transitioned from the port directors to the Center directors and those that will be jointly carried out by the port directors and the Center directors; and providing clarification in applicable regulations that payments and documents may continue to be submitted at the ports of entry or electronically.

This document also provides a list of industries that will be covered by each of the Centers.

A. Definition for the Centers

This document amends § 101.1 of title 19 of the regulations (19 CFR 101.1) to define the Centers of Excellence and Expertise as national CBP offices that are responsible for performing certain trade functions and making certain determinations as set forth in this title, regarding importations of merchandise by their assigned importers, regardless of the ports of entry at which the importations occur. The Centers are organized by industry sectors, which are categorized by the Harmonized Tariff Schedule of the United States (HTSUS) numbers. The list of HTSUS numbers is published in this document and any change made to that list will be announced in a subsequent **Federal Register** document.

B. Definition for Center Director

This document amends § 101.1 of title 19 of the regulations (19 CFR 101.1) to define the term ''Center director'' as the person who manages their designated Center and is responsible for certain trade decisions and functions concerning that Center and the importers that are processed by that Center.

C. Revised Definition for Port and Port of Entry

This document amends § 101.1 by revising the definition of ''Port'' and ''Port of Entry'' by updating the term ''Customs'' to ''U.S. Customs and Border Protection (CBP)'' or ''customs'', as applicable, to reflect the nomenclature changes made necessary by the transfer of the legacy U.S. Customs Service of the Department of the Treasury to the Department of Homeland Security (DHS) and DHS' subsequent renaming of the component as U.S. Customs and Border Protection on March 31, 2007 (*see* 72 FR 20131, dated April 23, 2007).

D. Definition for Port Director

This document amends § 101.1 to add a definition of ''Port director'' that is consistent with the description currently found in the definition for ''port'' and ''port of entry'' but also distinguishes the port directors responsibilities from those of the Center director. The new definition for ''Port director'' is the person who has jurisdiction within the geographical boundaries of their port of entry unless the regulations provide that particular trade functions or determinations are exclusively within the purview of a Center Director or other CBP personnel.

E. Designation of Center Management Offices

This document creates a new § 101.10 in title 19 of the regulations (19 CFR 101.10) to provide a list of the existing Centers and their management offices. The Center management offices will continue to be located in the cities that were designated in the published test notices noted above. The Centers and the cities wherein each management office is located is as follows: *Agriculture & Prepared Products,* Miami, Florida; *Apparel, Footwear & Textiles,* San Francisco, California; *Automotive & Aerospace,* Detroit, Michigan; *Base Metals,* Chicago, Illinois; *Consumer Products and Mass Merchandising,* Atlanta, Georgia;

Electronics, Long Beach, California; *Industrial & Manufacturing Materials,* Buffalo, New York; *Machinery,* Laredo, Texas; *Petroleum, Natural Gas & Minerals,* Houston, Texas; *Pharmaceuticals, Health & Chemicals,* New York City, New York.

F. Assignment of Importers to the Centers

Generally, each importer will be assigned to an industry-category administered by a specific Center based on the tariff classification in the HTSUS of the predominant number of goods imported. The list of HTSUS numbers that will be used by CBP for the importer's placement in a Center is the same list of HTSUS numbers that are referenced in the definition for Centers (see § 101.1). Factors that may cause CBP to place an importer in a Center not based on the tariff classification of the predominant number of goods imported include the importer's associated business practices within an industry, the intended use of the predominant number of goods imported, or the high relative value of goods imported. Brokers acting as the IOR will have their entry summary processed by the Center relating to the predominant HTSUS number for the entry summary since brokers' business models do not necessarily align within a particular industry sector.

G. Appeal of Center Assignment

All importers may appeal the Center assignment at any time by submitting a written appeal, with a subject line identifier reading ''Appeal Regarding Center Assignment'', to U.S. Customs and Border Protection, Office of Field Operations, Executive Director, Cargo and Conveyance Security (CCS) Division, 1300 Pennsylvania Ave. NW., Suite 2.3D, Washington, DC 20229–1015 or by email to *CEE@cbp.dhs.gov.* Appeals must include the following information: (1) Current Center assignment;

(2) Preferred Center assignment; (3) All affected Importer of Record (IOR) numbers and associated bond numbers; and (4) Written justification for the change in Center assignments; and (5) Import data, as follows:

(i) *For new importers.* Projected importations at the four (4) digit HTSUS heading level during the current year; or

(ii) *For importers with less than one year of prior import history.* Projected importations and prior import data with entry summary lines and value at the four (4) digit HTSUS heading level; or

(iii) *For importers with more than one year of prior import history.* One year of prior import data with entry summary lines and value at the four (4) digit HTSUS heading level.

H. Transitioning of Trade Functions to the Centers

This document amends certain regulations to transition to the Center directors a variety of post-release trade functions that are currently handled by the port directors, including decisions and processing related to entry summaries; decisions and processing related to all types of protests; suspension and extension of liquidations; decisions and processing concerning free trade agreements and duty preference programs; decisions concerning warehouse withdrawals wherein the goods are entered into the commerce of the United States; all functions and decisions concerning country of origin marking issues; functions concerning informal entries; and classification and appraisement of merchandise, including valuation of merchandise.

This document also amends some regulations to identify the circumstances where the port directors and the Center directors will have joint authority. For example, § 141.56(a) is amended to note that CBP may accept, either at the port of entry or electronically, one entry summary for consumption or for warehouse for merchandise covered by multiple entries for immediate transportation, subject to the requirements of § 142.17(a), provided the merchandise covered by each immediate transportation entry is released at the port of destination under a separate entry, in accordance with § 142.3. The reference to ''port directors'' is being removed and replaced with ''CBP'' because the authority to accept the entry summary will continue to reside with the personnel working for the port directors and will also be extended to the personnel working for the Center directors. Importers will continue to have the ability to submit the documentation at the port or electronically and this ability is merely being reflected in the regulation. In this example, if the entry summary were submitted electronically to CBP, it would be internally routed to the appropriate Center. As a second example, the port director and Center director personnel will have joint authority for all functions involving sampling and redelivery requests (*see, e.g.,* 19 CFR 132.14(a)(4)(i)(A)). CBP notes that while the redelivery notices may be sent out by either personnel working for the port director or the Center director, the resolution of marking issues will be the sole authority of the Center directors.

This document also amends the regulations to provide that port directors and the Center directors will have joint authority to collect payments. These amendments do not affect the public's responsibility to continue to submit payments using the same methods of payment that are prescribed in the regulations today; they merely extend the authority to accept payments to Center directors as well (*see e.g.,* 19 CFR 10.49(d) and 24.2). For example, § 24.2 is amended in this document to include a reference to Center directors as persons authorized to receive customs collections. The revised text would read as follows: ''Center directors, port directors, CBP cashiers, CBP officers, CBP dock tellers, and such other officers and employees as the Center director or port director will designate will receive Customs collections.''

Any functions that are not identified in this package as being transferred to the Centers will remain with the parties who are currently engaging in those activities, as per the regulations. While the language in § 4.14 of the regulations need not be amended to show that the function is being transitioned to the Center directors, CBP notes that the Vessel Repair Units (VRUs) will no longer report to the port directors and will instead report to the Automotive & Aerospace Center.

The responsibilities of the public remain unchanged after the amendments are implemented. Importers of record may continue to file entry documentation where the importer's merchandise is entered. Importers and brokers who file electronically through the Automated Broker Interface (ABI) will continue to use CBP's authorized electronic data interchange system to submit required import data with CBP. Paper filings at the ports of entry will remain unchanged. Importers and brokers who file paper entries may continue to file at the port of entry where the paper documents will be processed, reviewed, and accepted by CBP, which may be personnel working for either the Center director or the port director. When necessary, CBP will internally route the data to the appropriate Center for review and processing. As per usual, CBP will continue its process of contacting the filer if there are any problems and will notify the filer of the appropriate person at CBP to contact if a response is necessary.

Any decisions or requests for information or samples that were made by the port director prior to the publication of this document will

remain valid and effective. Any protest that was filed with a port director prior to the effective date of this document, will be transferred to the relevant Center director to make a decision on the protest. When applicable, this document amends certain regulations to provide that determinations made by the port directors or Center directors before the effective date of this document are valid to the same extent as determinations made by a Center director after the effective date of this document. Similarly, when applicable, this document amends certain regulations to note that submission of information to the port directors or Center directors before the effective date of this document is valid to the same extent as submission of information made to a Center director after the effective date of this document. Center directors may have made determinations or accepted documents prior to the effective date of this document pursuant to the Center test or the Delegation Order described in section I.B. of the Background section of this document.

I. Scope of Industries Covered by Each Center

The test notices defined the types of merchandise for which each Center is responsible by identifying the Harmonized Tariff Schedule of the United States (HTSUS) headings for which each Center is responsible. CBP will continue to define the scope of industries covered by each Center by the HTSUS heading that will be handled by each Center. The scope of industries covered by each Center has been defined as noted below.

If changes are made to the scope of coverage for any of the Centers, CBP will announce the change in the **Federal Register**.

1. Agriculture & Prepared Products Center

For inclusion in the Agriculture & Prepared Products Center, importers must be part of the agriculture, aquaculture, animal products, vegetable products, prepared food, beverage, alcohol, tobacco or similar industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''agriculture and prepared products'' to consist of merchandise classified under Chapters 1 through 24 of the HTSUS.

2. Apparel, Footwear & Textiles Center

For inclusion in the Apparel, Footwear & Textiles Center, importers must be part of the wearing apparel, footwear, textile mill, textile mill products, or similar industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''apparel, footwear, and textiles'' to consist of merchandise classified under headings 4015, 4203, 4303, 4304, 5001 through 5007, 5101 through 5113, 5201 through 5212, 5301, 5302, 5303, 5305 through 5311, 5401 through 5408, 5501 through 5516, 5601 through 5609, 5701 through 5705, 5801 through 5811, 5901 through 5911, 6001 through 6006, 6101 through 6117, 6201 through 6217, 6301 through 6310, 6401 through 6406, 6501, 6502, 6504, 6505 6506, and 6507 of the HTSUS.

3. Automotive & Aerospace Center

For inclusion in the Automotive & Aerospace Center, importers must be part of the automotive, aerospace, or other transportation equipment and related parts industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''automotive'' to consist of merchandise classified under headings 8701 through 8711, 8713, 8714, and 8716, HTSUS. For purposes of assigning an importer to this Center, CBP considers the term ''aerospace'' to consist of merchandise classified under headings 8801 through 8805, HTSUS. For purposes of assigning an importer to this Center, CBP considers the term ''other transportation equipment and related parts'' to consist of merchandise classified under headings 4011 through 4013, 8406 through 8412, 8511, 8512, 8601 through 8609, 8901 through 8908, HTSUS.

4. Base Metals Center

For inclusion in the Base Metals Center, importers must be part of the steel, steel mill products, ferrous and nonferrous metal, or similar industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''base metals'' to consist of merchandise classified under headings 7201 through 7308, 7312 through 7318, 7320, 7322, 7324 through 7413, 7415, 7419 through 7614, 7616 through 8113, and 8307 through 8311 of the HTSUS.

5. Consumer Products & Mass Merchandising Center

For inclusion in the Consumer Products and Mass Merchandising Center, importers must be part of the household goods, consumer products, or similar industries, and or mass merchandisers of products typically sold for home use based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''consumer products and mass merchandising'' to consist of merchandise classified under headings 3303 through 3307, 3401, 3406, 3605, 3924, 3926, 4201, 4202, 4205, 4206, 4414, 4419, 4420, 4421, 4602, 4803, 4817, 4818, 4820, 4901 through 4911, 6601 through 6603, 6701 through 6704, 6911 through 6913, 7113 through 7118, 7319, 7321, 7323, 7418, 7615, 8210 through 8215, 8301, 8303 through 8306, 8469, 8470, 8508, 8509, 8510, 8513, 8516, 8539, 8712, 8715, 9001 through 9006, 9013, 9101 through 9114, 9201, 9202, 9205 through 9209, 9401, 9403 through 9405, 9503 through 9508, 9601 through 9619, and 9701 through 9706 of the HTSUS.

6. Electronics Center

For inclusion in the Electronics Center, importers must be part of the electronics industry based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''electronics'' to consist of merchandise classified under headings 3818, 8471, 8473, 8501 through 8504, 8517 through 8538, and 8540 through 8548 of the HTSUS.

7. Industrial & Manufacturing Materials Center

For inclusion in the Industrial & Manufacturing Materials Center, importers must be part of the plastics, polymers, rubber, leather, wood, paper, stone, glass, precious stones or precious metals, or similar industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''industrial and manufacturing materials'' to consist of merchandise classified under headings 2501 through 2530, 3901 through 3923, 3925, 4001 through 4010, 4016 through 4115, 4301, 4302, 4401 through 4413, 4415 through 4418, 4501 through 4601, 4701 through 4802, 4804 through 4814, 4816, 4819, 4821, 4822, 4823, 6801 through 6910, 6914 through 7011, 7013, 7014 through 7112, 7309 through 7311, and 9406 of the HTSUS.

8. Machinery Center

For inclusion in the Machinery Center, importers must be part of the tools, machine tools, production

equipment, instruments, or similar industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''machinery'' to consist of merchandise classified under headings 8201 through 8209, 8302, 8401 through 8405, 8413 through 8468, 8472, 8474 through 8484, 8486, 8487, 8505 through 8507, 8514, 8515, 9007, 9008, 9010, 9011, 9012, 9014 through 9017, 9020, 9023 through 9033, and 9301 through 9307 of the HTSUS.

9. Petroleum, Natural Gas & Minerals Center

For inclusion in the Petroleum, Natural Gas & Minerals Center, importers must be part of the petroleum, natural gas, petroleum related, minerals, or mining industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the terms ''petroleum'' and ''natural gas'' to consist of merchandise classified under headings 2709 through 2713, HTSUS. For purposes of assigning an importer to this Center, CBP considers the term ''petroleum related'' to consist of merchandise classified under headings 2701, 2705, 2707, 2708, 2714, 2715, 2716, and 3826, HTSUS. For purposes of assigning an importer to this Center, CBP considers the terms ''minerals'' or ''mining'' to consist of merchandise classified under headings 2601 through 2621, 2702, 2703, 2704, and 2706, HTSUS.

10. Pharmaceuticals, Health & Chemicals Center

For inclusion in the Pharmaceuticals, Health & Chemicals Center, importers must be part of the pharmaceuticals, health, or chemical and allied industries based on the tariff classification in the HTSUS of the predominant number of goods imported. For purposes of assigning an importer to this Center, CBP considers the term ''pharmaceuticals'' to consist of merchandise classified under headings 2936, 2937, 2939, 2941, 3001 through 3006, HTSUS. For purposes of assigning an importer to this Center, CBP considers the term ''health equipment'' to consist of merchandise classified under headings 4014, 9018, 9019, 9021, 9022, and 9402, HTSUS. For purposes of assigning an importer to this Center, CBP considers the term ''chemicals'' to consist of merchandise classified under headings 2801 through 2935, 2938, 2940, 2942, 3101 through 3302, 3402 through 3405, 3407 through 3604, 3606 through 3817, and 3819 through 3825, HTSUS.

III. Explanation of Amendments

This section of the document explains the amendments that are being made in various parts of title 19 of the Code of Federal Regulations (19 CFR) to: Transition functions from the port directors to the Center directors; jointly authorize the port directors and Center directors to implement certain functions; or provide clarification that payments and documents may continue to be submitted at the ports of entry or electronically. CBP has decided not to amend the following parts of 19 CFR because the functions are not transitioning to the Centers or because the parts are included in another regulatory package: 111, 114, 118, 122, 123, 125, 127, 191 and 192.

A. Part 4—Vessels in Foreign and Domestic Trades

Section 4.94a(d) is amended to provide that upon entry completion and deposit of duty under § 4.94a(d), the bond posted with CBP will be returned to the importer of record, and a new bond on CBP Form 301, containing the bond conditions set forth in 19 CFR 113.62, may be required by the Center director, rather than by the port director. This bond function is being transferred from the port directors to the Center directors because it is a post-release function.

B. Part 7—Customs Relations With Insular Possessions and Guantanamo Bay Naval Station

Section 7.3(e)(1)(iii)(B) is amended to provide the Center director, rather than the port director, with the authority to determine whether an importation into an insular possession or the United States results from the original commercial transaction between the importer and the producer or the latter's sales agent.

Section 7.3(e)(2) is amended to provide that the Center director, rather than the port director, will have the authority to require that appropriate shipping papers, invoices, or other documents be submitted within 60 days of the date of entry as evidence that the goods were shipped to the United States directly from an insular possession or shipped from the United States directly to an insular possession and returned from the insular possession to the United States by direct shipment within the meaning of section 7.3(e)(1). The Center director, rather than the port director, will also have the authority to determine whether evidence of direct shipment will be subject to verification. The section is also being amended to provide that evidence of direct shipment will not be required when the Center director, rather than the port director, is otherwise satisfied, taking into consideration the kind and value of the merchandise, that the goods qualify for duty-free treatment under General Note 3(a)(iv), HTSUS, and section 7.3(a).

Section 7.3(f)(1) is amended to provide the Center director, rather than the port director, with the authority to decide whether goods qualify for duty-free treatment under section 7.3(a)(1).

Section 7.3(f)(2) is amended to provide that the declarations noted in § 7.3(f)(2)(i)–(ii) must be filed with the entry/entry summary unless the Center director, rather than the port director, is satisfied by reason of the nature of the goods or otherwise that the goods qualify for such duty-free entry.

C. Part 10—Articles Conditionally Free, Subject to a Reduced Rate, etc.

In Part 10, the responsibilities and functions currently designated by the regulations for the port directors will be transferred to the Center directors, except for those found in the following sections and those described further below:

- 10.5(d), (e), (g), and (h): *Shooks and staves; cloth boards; port director's account.*
- 10.6: *Shooks and staves; claim for duty exemption.*
- 10.7: *Substantial containers or holders.*
- 10.31(b): *Entry; bond.*
- 10.36(a): *Commercial travelers' samples; professional equipment and tolls of trade; theatrical effects and other articles.*
- 10.38(a), (f), and (g): *Exportation.*
- 10.39(d)(2), (e)(2), (e)(3), and (g): *Cancellation of bond charges.*
- 10.41b(b), (b)(1), (b)(2)(vi), (b)(3)–(b)(6), and (i): *Clearance of serially numbered substantial holders or outer containers.*
- 10.53(e)(5): *Antiques.*
- 10.59(a)(3) and (e): *Exemption from customs duties and internal-revenue tax.*
- 10.60(f) and (h): *Forms of withdrawals; bond.*
- 10.61: *Withdrawal permit.*
- 10.62(c)(1), (e), and (f): *Bunker fuel oil.*
- 10.62a(b): *Blanket withdrawals for certain merchandise.*
- 10.62b(g)(9): *Aircraft turbine fuel.*
- 10.64(a) and (b): *Crediting or cancellation of bonds.*
- 10.65(c)(2): *Cigars and cigarettes.*
- 10.66(b), (a)(3) and (c)(1): *Articles exported for temporary exhibition and returned; horses exported for horse*

racing and returned; procedure on entry.

- 10.67(c): *Articles exported for scientific or educational purposes and returned; procedure on entry.*
- 10.68(a): *Procedure.*
- 10.71(e): *Purebred animals; bond for production of evidence; deposit of estimated duties; stipulation.*
- 10.75: *Wild animals and birds; zoological collections.*
- 10.81(a): *Use in any port.*
- 10.101(c) and (d): *Immediate delivery.*
- 10.107(b) and (c): *Equipment and supplies; admission.*
- 10.151: *Importations not over $800.*
- 10.152: *Bona-fide gifts.*

These functions, which generally occur at the ports and relate to pre-release decisions, will remain with the port directors: Collection of information used to make release decisions; functions concerning exportation; determinations concerning destruction of merchandise; decisions and functions concerning the physical control of warehoused goods and the transfer of those goods from warehouse to warehouse or warehouse to port and the final disposition regarding entry; decisions and functions concerning vessels; decisions concerning passengers; pre-release decisions and functions; and decisions concerning importations not over $800 and bona-fide gifts.

The following sections in Part 10 include either the responsibilities and functions for personnel working for either the port director and Center director or the section contains additional regulatory changes as noted below:

- Sections 10.8(d) (*Articles exported for repairs or alterations*) and 10.9(d) (*Articles exported for processing*): From the *port director* to *port director or Center director* because personnel working for either the port director or the Center director will have the authority to require at the time of entry a deposit of estimated duties.
- Section 10.37 (*Extension of time for exportation*): From the *director of the port where the entry was filed* to the *Center director* for purposes of permitting the Center director, rather than the port director, to grant extensions of time for exportation upon written application on CBP Form 3173, provided the articles have not been exported or destroyed before the receipt of the application, and liquidated damages have not been assessed under the bond before receipt of the application. Also, this document adds language to the section to provide that the written application on CBP Form 3173 may be submitted *to CBP, either at the port of entry or electronically* meaning here that the application may be submitted using the means currently permitted; however, the authority to collect the form will be extended to the personnel working for both Center directors and the port directors.
- Section 10.40(b) (*Refund of cash deposits*): From the *port director* to the *Center director* to provide that the Center director, rather than the port director will notify the importer in writing that the entire cash deposit will be transferred to the regular account as liquidated damages. Also, this document adds language to the section to provide that the written application for relief from the payment of the full liquidated damages must be filed with the *Center director.*
- Section 10.41a(e) (*Lift vans, cargo vans, shipping tanks, skids, pallets, and similar instruments of international traffic; repair components*): From *the port director* to *CBP, either at the port of entry or electronically* so that the consumption entry may be submitted using the means currently permitted; however, the authority to collect the document will be extended to the personnel working for both Center directors and the port directors.
- Section 10.49(d) (*Articles for exhibition; requirements on entry*): From the *director of the port of entry* to *CBP, either at the port of entry or electronically* so that the duties may be submitted using the means currently permitted (*e.g.,* through the Automated Clearing House (ACH)); however, the authority to collect and deposit the duties will be extended to the personnel working for both Center directors and the port directors.
- Section 10.71(c) (*Purebred animals; bond for production of evidence; deposit of estimated duties; stipulation*) and 10.121(b) (*Visual or auditory materials of an educational, scientific, or cultural character*): From the *port director* to *CBP, either at the port of entry or electronically* to indicate that the importer may continue to make its submission of stipulation documentation and duties using the means currently permitted; however, the authority to accept the payments and documentation will be extended to both the port director and Center director personnel.
- Section 10.84(e) (*Automotive vehicles and articles for use as original equipment in the manufacture of automotive vehicles*): From *the director of the port where entry was made* to *CBP, either at the port of entry or electronically* so as to allow the written notice concerning the intended use of motor-vehicle equipment to be submitted using the means of submission currently permitted and to also extend the authority to collect the notice to both the Center director and port director personnel.
- Section 10.91(c)(2) (*Prototypes used exclusively for product development and testing*): From *the port director where the entry or withdrawal of the prototype was made* to *CBP, either at the port of entry or electronically* and from *port director* to *Center director.* This document removes the words ''the port director where the entry or withdrawal of the prototype was made'' and adds in their place the words ''CBP, either at the port of entry or electronically'' to provide that notice of the sale of the prototype or any part(s) of the prototype must be submitted using the means currently permitted, but the authority to collect the notice is extended to both Center director and port director personnel. The term ''port director'' in the final sentence is replaced with ''Center director'' to provide that the Center director, rather than the port director, has the authority to request proof of actual use of the prototype.
- Section 10.102(a) (*Duty-free entries*): From the *port director* to the *Center director* because duty assessment is being transitioned to the Center director personnel. Also, this document adds language to the section to provide that the required certification may be received *either at the port of entry or electronically.*
- Section 10.179(b)(1) (*Canadian crude petroleum subject to a commercial exchange agreement between United States and Canadian refiners*): From the *director of the port where the original entry was made* to *CBP, either at the port of entry or electronically,* so as to allow the certification required under § 10.179(a) to continue to be filed using the means permitted currently.
- Section 10.235(b) (*Filing of claim for preferential tariff treatment*): From *the Customs port where the declaration was originally filed* to *CBP, either at the port of entry or electronically* because the declarations that the imported article qualifies for preferential tariff treatment may continue to be submitted using the means permitted currently and the authority to collect the declarations will be extended to both the Center director and port director personnel.
- Section 10.245(b) (*Filing of claim for preferential treatment*): From *the CBP port where the declaration was originally filed* to *CBP, either at the port of entry or electronically* to provide that

the corrected declaration will be effected by submission of a letter or other written statement using the means permitted currently and the authority to collect the corrected declarations will be extended to both the Center director and port director personnel.

- Sections 10.441(a) (*Filing procedures*), 10.591(a) (*Filing procedures*), 10.870(a) (*Filing procedures*), 10.911(a) (*Filing procedures*), 10.1011(a) (*Filing procedures*), 10.2011(a) (*Filing procedures*), and 10.3011(a) (*Filing procedures*): From *the director of the port at which the entry covering the good was filed* to *CBP, either at the port of entry or electronically* so that the post-importation claim for a refund may be submitted using the means currently permitted; however, the authority to collect the document will be extended to the personnel working for both Center directors and the port directors.
- Section 10.847(c) (*Filing of claim for duty-free treatment*): From *the CBP port where the claim was originally filed* to *CBP, either at the port of entry or electronically* so that the post-entry documentation for a refund, including corrections to claims for duty-free treatment, may be submitted using the means currently permitted; however, the authority to collect the document will be extended to the personnel working for both Center directors and the port directors.

D. Part 11—Packing and Stamping; Marking

Section 11.12(b) is amended to provide the Center director, rather than the port director, with the authority to allow the importer a reasonable opportunity to label imported wool products that were not correctly labeled where the Center director is satisfied that the error or omission did not involve fraud or willful neglect.

Section 11.12(c) is amended to provide that the Center director, rather than the port director, will set the bond amount for packages of wool products that are not designated for examination and are released.

Section 11.12(d) is amended to require the Center director, rather than the port director, to provide written notice to the importer of any lack of compliance with the Wool Products Labeling Act of 1939 in respect of an importation of wool products, and to note that pursuant to § 141.113 the Center director, rather than the port director, will demand the immediate return of the involved products to Customs custody, unless the lack of compliance is forthwith corrected.

Section 11.12(e) is amended to give the Center director, rather than the port director, the discretion to determine whether the imported wool products have been brought into compliance with the Wool Products Labeling Act of 1939.

Section 11.12(f) is amended to state that if any fraudulent violation of the Wool Products Labeling Act of 1939 with respect to imported articles comes to the attention of the Center director, the involved merchandise shall be placed under seizure, or a demand shall be made for the redelivery of the merchandise if it has been released from Customs custody, and the case shall be reported to the Federal Trade Commission, Washington, DC.

Section 11.12a(b) is amended to provide that if imported fur products are not correctly labeled and the Center director, rather than the port director, is satisfied that the error or omission involved no fraud or willful neglect, the importer shall be afforded a reasonable opportunity to label the merchandise under Customs supervision to conform with the requirements of such act and the rules and regulations of the Federal Trade Commission.

Section 11.12a(c) is amended to provide that the Center director, rather than the port director, will set the bond amount for packages of fur products that are not designated for examination and are released.

Section 11.12a(d) is amended to provide that the Center director, rather than the port director, will give written notice to the importer of any lack of compliance with the Fur Products Labeling Act (15 U.S.C. 69b) in respect of an importation of fur products, and pursuant to § 141.113 the Center director, rather than the port director, will demand the immediate return of the involved products to Customs custody, unless the lack of compliance is forthwith corrected.

Section 11.12a(e) is amended to provide that the Center director, rather than the port director, needs to be fully satisfied that a product covered by a notice and demand given pursuant to § 11.12a(d), that has not been promptly returned to Customs custody, has been brought into compliance with the Fur Products Labeling Act.

Section 11.12a(f) is amended to provide that if any fraudulent violation of the act with respect to imported articles comes to the attention of a Center director, the involved merchandise shall be placed under seizure, or a demand shall be made for the redelivery of the merchandise if it has been released from Customs custody, and the case shall be reported to the Federal Trade Commission, Washington, DC 20580.

Section 11.12b(b) is amended to provide that if imported fiber products are not correctly labeled and the Center director, rather than the port director, is satisfied that the error or omission involved no fraud or willful neglect, the importer shall be afforded a reasonable opportunity to label the merchandise under customs supervision to conform with the requirements of such Act and the rules and regulations of the Federal Trade Commission.

Section 11.12b(c) is amended to provide that the Center director, rather than the port director, will set the bond amount for packages of fiber products that are not designated for examination and are released.

Section 11.12b(d) is amended to require the Center director, rather than the port director, to provide written notice to the importer of any lack of compliance with the Textile Fiber Products Identification Act in respect of an importation of fiber products, and pursuant to § 141.113 of this chapter to demand the immediate return of the involved products to customs custody, unless the lack of compliance is corrected.

Section 11.12b(e) is amended to provide that the Center director, rather than the port director, needs to be fully satisfied that a product covered by a notice and demand given pursuant to § 11.12b(d), that has not been promptly returned to Customs custody, has been brought into compliance with the Fiber Products Identification Act (15 U.S.C. 70 through 70k).

Section 11.12b(f) is amended to provide that if any willful or flagrant violation of the Act with respect to the importation of articles comes to the attention of a Center director, the involved merchandise shall be placed under seizure, or a demand shall be made for the redelivery of the merchandise if it has been released from Customs custody, and the case shall be reported to the Federal Trade Commission, Washington DC 20580.

E. Part 12—Special Classes of Merchandise

Section 12.26(f) is amended to provide that if the permit referred to in § 12.26(e) is refused by the Fish and Wildlife Service, or if the permit is not produced within the said 30 days, an authorized CBP official (a CBP employee working for either the port director or the Center director) shall promptly recall the property, if delivered under bond, and shall require its immediate exportation at the expense of the importer or consignee.

Section 12.39(b)(2)(i) is amended to provide that, to enter merchandise that is the subject of a Commission exclusion order, importers must file with CBP prior to entry a bond in the amount determined by the Commission that contains the conditions identified in the special importation and entry bond set forth in appendix B to part 113 of this chapter. The term ''CBP'' here means that importers may file the bond with personnel working for either the port director or the Center director.

Section 12.39(b)(3) is amended to provide that CBP shall notify each importer or consignee of articles released under bond pursuant to § 12.39(b)(2) when the Commission's determination of a violation of § 337 becomes final and that entry of the articles is refused. The term ''CBP'' here means personnel working for either the port director or the Center director.

Section 12.39(b)(4) is amended to provide that in addition to the notice given to importers or consignees of articles released under bond, CBP shall provide written notice to all owners, importers or consignees of articles which are denied entry into the United States pursuant to an exclusion order that any future attempt to import such articles may result in the articles being seized and forfeited. The term ''CBP'' here means personnel working for either the port director or the Center director. The paragraph is also amended by removing ''by port directors'' in the last sentence to read as follows: Copies of all such notices are to be forwarded to the Executive Director, Commercial Targeting and Enforcement, Office of Trade, at CBP Headquarters, and to the Office of The General Counsel, USITC, 500 E Street SW., Washington, DC 20436.

Section 12.39(c)(1)(iii) is amended to conform with the modification to paragraph (b)(4), above. Similarly, the term ''CBP'' in this instance means personnel working for either the port director or the Center director.

Section 12.39(e)(2) is amended to provide that CBP shall enforce any court order or USITC exclusion order based upon a mask work registration in accordance with the terms of such order. The term ''CBP'' here means personnel working for either the port director or the Center director.

Section 12.73(j) is amended to provide that, if good cause is shown, the Center director, rather than the port director, has the authority to extend the period of time that the importer has to submit a U.S. Environmental Protection Agency (EPA) statement that the vehicle or engine is conformity with Federal emission requirements. The prescribed statement must be delivered by the importer to CBP, either to the port of entry or electronically. This means that the importer may continue to submit the statement using the means currently permitted, but the authority to collect the statement will be extended to the personnel working for either the Center director or port director.

Section 12.121(a)(2)(ii) is amended to provide that a Center director, rather than the port director, may, in his discretion, approve an importer's use of a ''blanket'' certification, in lieu of filing a separate certification for each chemical shipment, for any chemical shipment that conforms to a product description provided to Customs pursuant to § 12.121(a)(2)(ii)(A). This document also amends the section to provide that in approving the use of a ''blanket'' certification, the Center director, rather than the port director, should consider the reliability of the importer and Customs broker.

Section 12.121(a)(2)(ii)(A) is amended to provide that a ''blanket'' certification must be filed with CBP, either at the port of entry or electronically. This means that the importer may continue to submit the statement using the means currently permitted, but the authority to collect the statement will be extended to the personnel working for either the Center director or port director.

Section 12.121(a)(2)(ii)(B) is amended to provide that a ''blanket'' certification will remain valid, and may be used, for 1 year from the date of approval unless the approval is revoked earlier for cause by the Center director.

F. Part 24—Customs Financial and Accounting Procedure

Section 24.1(a)(3)(i) is amended to provide that an uncertified check drawn by an interested party on a national or state bank or trust company of the United States or a bank in Puerto Rico or any possession of the United States if such checks are acceptable for deposit by a Federal Reserve bank, branch Federal Reserve bank, or other designated depositary shall be accepted if there is on file with CBP a bond to secure the payment of the duties, taxes, fees, interest, or other charges, or if a bond has not been filed, the organization or individual drawing and tendering the uncertified check has been approved by an authorized CBP official (a CBP employee working for either the port director or the Center director) to make payment in such manner. In determining whether an uncertified check shall be accepted in the absence of a bond, an authorized CBP official shall use available credit data obtainable without cost to the Government, such as that furnished by banks, local business firms, better business bureaus, or local credit exchanges, sufficient to satisfy him of the credit standing or reliability of the drawer of the check.

Section 24.1(a)(3)(ii) is amended to provide that if, during the preceding 12-month period, an importer or interested party has paid duties or any other obligation by check and more than one check is returned dishonored by the debtor's financial institution, an authorized CBP official (a CBP employee working for either the port director or Center director) shall require a certified check, money order or cash from the importer or interested party for each subsequent payment until such time that an authorized CBP official is satisfied that the debtor has the ability to consistently present uncertified checks that will be honored by the debtor's financial institution.

Section 24.2 is amended to include Center directors to the list of CBP employees that are authorized to receive Customs collections. They are also permitted, along with the port directors, to designate employees who are authorized to receive Customs collections.

Section 24.4(a) is amended to provide that an importer, including a transferee of alcoholic beverages in a customs bonded warehouse who wishes to pay on a semi-monthly basis the estimated import taxes on alcoholic beverages entered, or withdrawn from warehouse, for consumption by him during such a period may apply by letter to the Center director, either at a port of entry or electronically, rather than to the director of each port at which he wishes to defer payment. The reason the language ''Center director, either at the port of entry or electronically'' is used rather than ''CBP, either at the port of entry or electronically'' is because the Center director will have the authority to permit a deferral of payment, but the importer may submit the letter either to the port of entry or electronically. The paragraph is also amended to provide that an importer who receives approval from the Center director, rather than the port director, to defer such payments may, however, continue to pay the estimated import taxes due at the time of entry, or withdrawal from warehouse, for consumption. While the Center directors will be responsible for the duty impact and entry summary aspects of the bonded warehouses, the port directors will remain responsible for the physical control and supervision of the bonded warehouses.

Section 24.4(b) is amended to provide that an importer may begin the deferral of payments of estimated tax to a

Customs port in the first deferral period beginning after the date of the written approval by the Center director, rather than the port director. An importer may use the deferred payment system until the Center director, rather than the port director, advises such importer that he is no longer eligible to defer the payment of such taxes.

Section 24.4(c)(1) is amended to provide that an importer must state his estimate of the largest amount of taxes to be deferred in any semimonthly period based on the largest amount of import taxes on alcoholic beverages deposited with CBP in such a period during the year preceding his application. He must also identify any existing bond or bonds that he has on file with CBP and shall submit in support of his application the approval of the surety on his bond or bonds to the use of the procedure and to the increase of such bond or bonds to such larger amount or amounts as may be found necessary by the Center director. These changes are being made to reflect that bonds will be maintained by both the port directors and Center directors and that bonds amount determinations related to the importation of alcoholic beverages will be made by the Center directors.

Section 24.4(c)(2) is amended to provide that each application noted in § 24.4 must include a declaration in substantially the following language: I declare that I am not presently barred by CBP from using the deferred payment procedure for payment of estimated taxes upon imports of alcoholic beverages, and that if I am notified by a Center director to such effect I shall advise any future Center director where approval has been given to me to use such procedure. The purpose of using the term ''CBP'' rather than keeping ''port director'' in this declaration is to take into account if the importer is presently barred by a port director or a Center director. The other instances of ''port director'' have been changed to ''Center director'' because this document is transferring from the port directors to the Center directors the authority to bar importers from using the deferred payment procedures for payment of estimated taxes upon imports of alcoholic beverages. Future Center directors are accounted for in this language in case an importer's industry changes and the importer is placed in a new Center.

Section 24.4(d)(1) is amended to provide that the Center director, rather than the port director, will notify the importer, or his authorized agent if requested, of approval for using the deferred payment procedures.

Section 24.4(i) is amended to provide that the deferred payment privilege once approved by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, will remain in effect until terminated under the provisions of § 24.4(h) or the importer or surety requests termination. This section is being amended to include date ranges because the decisions made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the decisions made on or after the effective date of these regulatory amendments will be made by the Center director.

Section 24.14(c) is amended to provide that CBP's stamp, rather than the port director's stamp, will be impressed upon a completely prepared bill or receipt for the purchase of customs forms that is presented by the purchaser at the time of purchase.

G. Part 54—Certain Importations Temporarily Free of Duty

Section 54.5(b) is amended to provide that no deposit of estimated duty shall be required upon the entry, or withdrawal from warehouse for consumption, of the articles described in paragraph (a) of this section if the Center director, rather than the port director, is satisfied at the time of entry, or withdrawal, by written declaration of the importer that the merchandise is being imported to be used in remanufacture by melting, or to be processed by shredding, shearing, compacting, or similar processing which renders it fit only for the recovery of the metal content. The reason this authority is being transitioned to the Center director is because Center director personnel, rather than port director personnel, will be in the position to determine whether goods meet the requirements for duty free entry and determine rates of duty generally.

Section 54.6(c) is amended to require the importer to submit to CBP, either at the port of entry or electronically, a statement from the superintendent or manager of the plant at which the articles were used in remanufacture by melting, or were processed by shredding, shearing, compacting, or similar processing which rendered them fit only for the recovery of the metal content showing the information contained in § 54.6(c)(1)–(c)(4). Currently, the importer is required to submit this statement to the port director. The language is being amended to permit the importer to submit the statement using the means currently permitted, while also extending the authority to collect the statement to personnel working for either the Center director or the port director.

Section 54.6(c)(4) is amended to provide that the statement submitted by the importer must contain a description of the remanufacture or processing in sufficient detail to enable the Center director, rather than the port director, to determine whether it constituted a use in remanufacture by melting, or processing by shredding, shearing, compacting, or similar processing which rendered the articles fit only for the recovery of the metal content.

H. Part 101—General Provisions

Section 101.1 is amended to include: The definition for the Centers; the definition for Center director; the revised definition for port and port of entry; and the definition for port director. A new section 101.10 includes language describing the designation of Center Management Offices; the factors considered for the assignment of importers to the Centers; and the process for appealing a Center assignment. The new or amended language is described in detail in Section II.E of this document.

I. Part 102—Rules of Origin

Section 102.23(a) is amended to provide that if an entry filed for commercial importations of textile or apparel products fails to include the manufacturer identification code (MID) properly constructed from the name and address of the manufacturer, the Center director, rather than the port director, may reject the entry or take other appropriate action. The reason for this change is because entry rejection or other appropriate action will be done by personnel working for the Center director, rather than the port director.

Section 102.23(b) is amended to provide that if the Center director, rather than the port director, is unable to determine the country of origin of a textile or apparel product, the importer must submit additional information as requested by the Center director.

Section 102.25 is amended to provide that if the Center director, rather than the port director, is unable to determine the country of origin of the textile or apparel products for which preferential tariff treatment is sought, they will not be entitled to preferential tariff treatment or any other benefit under the NAFTA for which they would otherwise be eligible.

J. Part 103—Availability of Information

Section 103.26 is amended to add Center directors to the list of officials that may, in the interest of federal, state, and local law enforcement, upon receipt of demands of state or local authorities, and at the expense of the State, authorize employees under their supervision to attend trials and administrative hearings on behalf of the government in any state or local criminal case, to produce records, and to testify as to facts coming to their knowledge in their official capacities.

Section 103.32 is amended to add ''Center directors'' to the list of CBP officials who must refrain from disclosing facts concerning seizures, investigations, and other pending cases until Customs action is completed.

K. Part 113—Customs Bonds

Appendix B to part 113 is amended to provide that if it is determined, as provided in § 337 of the Tariff Act of 1930, as amended, to exclude merchandise from the United States, then, on notification from CBP, the principal is obligated to export or destroy under Customs supervision the merchandise released under this stipulation within 30 days from the date of the CBP's notification. The purpose of this change is to enable CBP to transition to the Center directors the exclusion order functions provided in section 12.39 of title 19 of the CFR (19 CFR 12.39).

Appendix C to part 113 currently notes that the corporate seal is to be used when no power of attorney has been filed with the port director of customs. This document amends Appendix C to part 113 by removing the words ''the port director of customs'' and adding in their place the term ''CBP'', which means personnel working for either the port director or the Center director.

L. Part 132—Quotas

Section 132.11a(c) is amended to provide that if presentation is chosen to be made pursuant to § 132.11a(a)(2) and payment is not made as required through the statement processing method, the Center director, rather than the port director, may require filing of an entry summary for consumption with estimated duties attached as described in § 132.11(a)(1) for future filings.

Section 132.12(a) is amended to provide that the Center director, rather than the port director, will approve the opening of the quota period.

Section 132.13(a)(1)(i) is amended to provide that when instructed by Headquarters, the Center director, rather than the port director, will require an importer to present an entry summary for consumption, or its electronic equivalent, with estimated duties attached, at the over-quota rate of duty until Headquarters has determined the quantity, if any, of the merchandise entitled to the quota rate.

Section 132.13(a)(1)(ii) is amended to provide that the documentation must be presented to CBP, either at the port of entry or electronically, which here means that the importer may use the method(s) of submission currently permitted to submit the documentation; however, the authority to collect the documentation is being extended to the personnel working for either the port director or the Center director.

Section 132.13(a)(2) is amended to remove the words ''at the port of entry'' and replaced with ''to CBP, either at the port of entry or electronically'' so as to provide that the entry summary for consumption or withdrawal for consumption, or their electronic equivalents, must be presented to CBP, which means personnel working for either the port director or the Center director, using the means currently permitted.

Section 132.14(a)(4)(i)(A) is amended to provide that an authorized CBP official (a CBP employee working for either the port director or the Center director) may demand the return to Customs custody of the released merchandise in accordance with § 141.113.

Section 132.14(a)(4)(i)(B) is amended to provide that the Center director shall require the timely presentation to CBP, either at the port of entry or electronically, of the entry summary for consumption, or a withdrawal for consumption, with the estimated duties attached. The term to ''CBP, either at the port of entry or electronically'', here means that the documentation may be presented to CBP using the means currently permitted; however, the authority to collect the documentation is being extended to the personnel working for either the port director or the Center director.

Section 132.14(a)(4)(ii)(A) is amended to provide that the Center director shall require the timely presentation, to CBP, either at the port of entry or electronically, of the entry summary for consumption, or a withdrawal for consumption, with estimated duties attached. The term to ''CBP, either at the port of entry or electronically'', here means that the documentation may be presented to CBP using the means currently permitted; however, the authority to collect the documentation is being extended to the personnel working for either the port director or the Center director.

M. Part 133—Trademarks, Trade Names, and Copyrights

Section 133.26 is amended by permitting an authorized CBP official to demand redelivery of released merchandise. This section is amended by removing the words ''the port director'' and adding in their place the words ''an authorized CBP official'' so as to extend the authority to demand redelivery of released merchandise to a CBP employee working for either the port director or the Center director.

Section 133.46 is amended to provide that if it is determined that articles which have been released from CBP custody are subject to the prohibitions or restrictions of this subpart, an authorized CBP official (a CBP employee working for either the port director or the Center director) shall promptly make demand for redelivery of the articles under the terms of the bond on CBP Form 301, containing the bond conditions set forth in § 113.62, in accordance with § 141.113.

N. Part 134—Country of Origin Marking

Section 134.3(b) is amended by removing the words ''[t]he port director'' and replacing it with ''[a]n authorized CBP official'' so as to provide that CBP employees working for either the port director or the Center director have joint authority to demand redelivery of released articles that were not marked legally with the country of origin. CBP notes that while the redelivery notices may be sent out by either personnel working for the port director or the Center director, the resolution of marking issues will be the sole authority of the Center directors.

Section 134.25(a) is amended by removing the words ''port director having custody of the article,'' and adding in their place the words ''Center director'' to provide that the Center director, rather than the port director, is the party who will make the determination as to whether the article in question will be repacked after its release. Moreover, the paragraph is amended to require the importer to certify to the Center director that: (1) If the importer does the repacking, the new container shall be marked to indicate the country of origin of the article in accordance with the requirements of this part; or (2) if the article is intended to be sold or transferred to a subsequent purchaser or repacker, the importer shall notify such purchaser or transferee, in writing, at the time of sale or transfer, that any repacking of the article must conform to

these requirements. This section is also amended by removing the words ''at each port where the article is entered'' and adding in their place the words ''CBP, either at the port of entry or electronically.'' The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the certification is being extended to personnel working for either the port director or the Center director.

Section 134.25(c) is amended to require the certificate of marking for repacked J-list articles and articles incapable of being marked to be filed with the Center director, rather than with the port director. The section is also amended to provide that in case of failure to timely file the certification required under § 134.25, the Center director may decline to accept a bond for the missing document and demand redelivery of the merchandise under § 134.51.

Section 134.26(a) is amended by removing the words ''port director having custody of the article,'' and adding in their place the words ''Center director'' to provide that the Center director, rather than the port director, is the party who will make the determination as to whether the article in question will be repacked after its release. Moreover, the paragraph is amended to require the importer to certify to CBP, either at the port of entry or electronically, that: (1) If the importer does the repacking, he shall not obscure or conceal the country of origin marking appearing on the article, or else the new container shall be marked to indicate the country of origin of the article in accordance with the requirements of this part; or (2) if the article is intended to be sold or transferred to a subsequent purchaser or repacker, the importer shall notify such purchaser or transferee, in writing, at the time of sale or transfer, that any repacking of the article must conform to these requirements. This section is also amended by removing the words ''at each port where the article(s) is entered'' and adding in their place the words ''CBP, either at the port of entry or electronically.'' The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the certification is being extended to personnel working for either the port director or the Center director.

Section 134.26(c) is amended by noting that the certificate of marking statement required in § 134.26(a) must be filed with the Center director, rather than the port director, and in case of repeated failure to timely file the required certification, the Center director, rather than the port director, may decline to accept a bond for the missing document and demand redelivery of the merchandise under § 134.51.

Section 134.34(a) is amended to allow the Center director, rather than the port director, to make an exception under § 134.32(d).

Section 134.34(b) is amended by noting that the Center director, rather than the port director, will have the authority to extend the sixty (60)-day deferral period for liquidation of entries of imported articles which are to be repacked after release from CBP custody.

Section 134.51(a) is amended by requiring the Center director, rather than the port director, to notify the importer on Customs Form 4647, or its electronic equivalent, to arrange with the Center director's office, rather than the port director's office, to properly mark an article or container that has not been legally marked, or to return all released articles to CBP custody for marking, exportation, or destruction.

Section 134.51(b) is amended by requiring that the identity of the imported article, which was not legally marked and is to be exported, destroyed, or marked under CBP supervision, to be established to the satisfaction of the Center director, rather than the port director.

Section 134.51(c) is amended by noting that the Center director, rather than the port director, may accept a certificate of marking as provided for in § 134.52 in lieu of marking under CBP supervision.

Section 134.52(a) is amended by noting that Center directors, rather than port directors, may accept certificates of marking supported by samples of articles required to be marked, for which Customs Form 4647, or its electronic equivalent, was issued, from importers or from actual owners complying with the provision of § 141.20, to certify that marking of the country of origin on imported articles as required by this part has been accomplished.

Section 134.52(b) is amended by requiring that the certificates of marking must be filed in duplicate with CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of filing the certificates of marking as currently permitted; however, the authority to collect the certification is being extended to personnel working for either the port director or the Center director. Moreover, the Center director, rather than the port director, will now have the authority to waive the production of the marked sample when he is satisfied that the submission of such sample is impracticable.

Section 134.52(c) is amended by requiring the Center director, rather than the port director, to notify the importer or actual owner when the certificate of marking is accepted. Moreover, the paragraph is amended to authorize the Center director, rather than the port director, to spot check the marking of articles on which a certificate has been filed.

Section 134.52(d) is amended by removing the words ''port director'' and adding in their place the words ''Center director'', thereby stating that if a false certificate of marking is filed with the Center director indicating that goods have been properly marked when in fact they have not been so marked, a seizure shall be made or claim for monetary penalty reported under section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592).

Section 134.52(e) is amended by noting that the Center director, rather than the port director, may require physical supervision of marking as specified in § 134.51(c) in those cases in which he determines that such action is necessary to insure compliance with part 134.

Section 134.53(a)(2) is amended by providing the Center director, rather than the port director, with the discretion to accept a bond on CBP Form 301, containing the basic importation and entry bond conditions set forth in § 113.62 as security for the requirements of 19 U.S.C. 1304(f) and (g).

Section 134.54(a) is amended to provide that the Center director, rather than the port director, is allowed, for good cause shown, to extend the 30 day period of time that the importer has to properly mark or redeliver all merchandise previously released to him.

The ability to demand payment of liquidated damages incurred under the bond will remain with the port director.

O. Part 141—Entry of Merchandise

Section 141.20(a)(1) is amended to provide that a consignee in whose name an entry summary for consumption, warehouse, or temporary importation under bond is filed, or in whose name a rewarehouse entry or a manufacturing warehouse entry is made, and who desires, under the provisions of section

485(d), Tariff Act of 1930, as amended (19 U.S.C. 1485(d)), to be relieved from statutory liability for the payment of increased and additional duties shall declare at the time of the filing of the entry summary or entry documentation, as provided in § 141.19(a), that he is not the actual owner of the merchandise, furnish the name and address of the owner, and file with CBP, either at the port of entry or electronically, within 90 days from the time of entry (see § 141.68) a declaration of the actual owner of the merchandise acknowledging that the actual owner will pay all additional and increased duties. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the declaration is being extended to personnel working for either the port director or the Center director.

Section 141.20(a)(2) is amended to provide that if the consignee desires to be relieved from contractual liability for the payment of increased and additional duties voluntarily assumed by him under the single-entry bond which he filed in connection with the entry documentation and/or entry summary, or under his continuous bond against which the entry and/or entry summary is charged, he shall file a bond of the actual owner on Customs Form 301, containing the bond conditions set forth in § 113.62 of this chapter, with CBP, either at the port of entry or electronically, within 90 days from the time of entry. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the bond is being extended to personnel working for either the port director or the Center director.

Section 141.35 is amended to provide that any power of attorney shall be subject to revocation at any time by written notice given to and received by CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the written notice is being extended to personnel working for either the port director or the Center director.

Section 141.38 is amended to provide that a power of attorney shall not be required if the person signing Customs documents on behalf of a resident corporation is known to CBP to be the president, vice president, treasurer, or secretary of the corporation. When a power of attorney is required for a resident corporation, it shall be executed by a person duly authorized to do so. The term ''CBP'' here means either the personnel working for the port director or the personnel working for the Center director.

Section 141.44 is amended to provide that unless a power of attorney specifically authorizes the agent to act thereunder at the appropriate Center and at all Customs ports, the name of the appropriate Center or each port where the agent is authorized to act thereunder shall be stated in the power of attorney. The power of attorney shall be filed with CBP, either at the port of entry or electronically, in a sufficient number of copies for distribution to the appropriate Center and each port where the agent is to act, unless exempted from filing by § 141.46. The Center director or port director with whom a power of attorney is filed, irrespective of whether his Center or port is named therein, shall approve it, if it is in the correct form and the provisions of this subpart are complied with, and forward any copies intended for other ports or another Center as appropriate. The language ''CBP, either at the port of entry or electronically'' here means that the power of attorney may be filed using the means of submission currently permitted; however, the authority to collect the power of attorney documentation is being extended to personnel working for either the port director or the Center director.

Section 141.45 is amended to provide that upon request of a party in interest, the Center director or a port director may have on file an original power of attorney document and will forward a certified copy of the document to another Center director or port director.

Section 141.46 currently states that a customhouse broker is required to obtain a valid power of attorney but he is not required to file the power of attorney with a port director. This document amends § 141.46 by removing the words ''a port director'' and adding in their place the term ''CBP'' to mean either the port director personnel or the Center director personnel.

Section 141.52 is amended to provide that under certain delineated circumstances, if the Center director, rather than the port director, is satisfied that there will be no prejudice to: Import admissibility enforcement efforts; the revenue; and the efficient conduct of CBP business, separate entries may be made for different portions of all merchandise arriving on one vessel or vehicle and consigned to one consignee. One of the delineated circumstances, specifically § 141.52(i), is also amended to remove the reference to the ''port director'' and add ''Center director'' to read as follows: A special application is submitted to the Commissioner of Customs with the recommendation of the Center director concerned and is approved by the Commissioner.

Section 141.56(a) is amended to provide that CBP may accept, either at the port of entry or electronically, one entry summary for consumption or for warehouse for merchandise covered by multiple entries for immediate transportation, subject to the requirements of § 142.17(a), provided the merchandise covered by each immediate transportation entry is released at the port of destination under a separate entry, in accordance with § 142.3. The reference to ''port directors'' is being removed and replaced with ''CBP may accept, either at the port of entry or electronically'' because the authority to accept the entry summary will continue to reside with the personnel working for the port directors and will also be extended to the personnel working for the Center directors. Importers will continue to have the ability to submit the documentation at the port or electronically and this ability is merely being reflected in the regulation.

Section 141.61(e)(2) is amended to provide that a Center director, rather than a port director, may require additional documentation to substantiate the statistical information required by § 141.61(e)(1).

Section 141.61(e)(2)(ii) is amended to provide that a Center director, rather than a port director, may grant a reasonable extension of time to produce the required documentation for good cause shown. (See § 141.91(d) for bond requirements relating to failure to produce an invoice.)

Section 141.61(e)(4) is amended to provide that a Center director, rather than a port director, will reject a form for failure to provide required statistical information if the information is omitted or if the information provided clearly appears on its face, or is known to the CBP officer, to be erroneous.

Section 141.63(a) is amended to provide that under certain delineated circumstances, entry summary documentation may be submitted at the customhouse for preliminary review, without estimated duties attached, within such time before arrival of the merchandise as may be fixed by the Center director, rather than by the port director.

Section 141.63(b) is amended to provide that entry summary documentation may be submitted at the

customhouse for preliminary review, without estimated duties attached, within such time after arrival of quota-class merchandise as may be fixed by the Center director, if the entry summary for consumption will be presented at the opening of the quota period, as provided in § 132.12(a).

Section 141.69(c) is amended by removing the words ''the port director'' and adding in their place the words ''CBP'' so as to provide that personnel working for either the port director or the Center director may require documentary evidence as to the movement of merchandise between its removal from the port of entry or the place of intended release and its return to the port of entry.

Section 141.83(c)(2) is amended by removing the words ''[t]he port director'' and replacing it with ''CBP''. The first sentence of the paragraph would therefore read: ''CBP may accept a copy of a required commercial invoice in place of the original.'' This change would allow the commercial invoice when necessary for entry (for purposes of release) to remain with the port director and when necessary for entry summary and withdrawal for consumption to be handled by the Center director.

Section 141.85 the Pro Forma Invoice language is amended by removing the words ''Advices of the Port Director'' and adding in their place the term ''CBP''. The purpose of this change is to note that the prices, or in the case of consigned goods the values, of the merchandise may be based on the advices of the port director personnel or the Center director personnel. This document also amends § 141.85 by removing the words ''file it with the Port Director'' and adding in their place the words ''file it with an authorized CBP official''. The purpose of this change is to note that the invoice may be filed with an ''authorized CBP official'', meaning a CBP employee working for either the port director or the Center director.

Section 141.86(a) includes a list of information that must be included in each invoice of imported merchandise. Paragraph 141.86(a)(11) provides that the invoice must set forth all goods or services furnished for the production of the merchandise *(e.g.,* assists such as dies, molds, tools, engineering work) not included in the invoice price. However, goods or services furnished in the United States are excluded. The paragraph is being amended to provide that annual reports for goods and services, when approved by the Center director, rather than the port director, will be accepted as proof that the goods or services were provided.

Section 141.88 is amended to provide that when the Center director, rather than the port director, determines that information as to computed value is necessary in the appraisement of any class or kind of merchandise, he shall so notify the importer, and thereafter invoices of such merchandise shall contain a verified statement by the manufacturer or producer of computed value as defined in § 402(e), Tariff Act of 1930, as amended by the Trade Agreements Act of 1979 (19 U.S.C. 1401a(e)).

Section 141.91(a) is amended by removing the words ''[t]he port director'' and adding in their place the term ''CBP''. This change would allow the port director personnel to accept entry documentation without the invoice and would allow the Center director personnel to accept entry summary documentation without the invoice if they are satisfied that the failure to produce the required invoice is due to a cause beyond the control of the importer.

Section 141.91(d) is amended to provide that if needed for statistical purposes, the invoice shall be produced within 50 days after the date of the entry summary (or the entry, if there is no entry summary) is required to be filed, unless a reasonable extension of time is granted by the Center director, rather than the port director, for good cause shown.

Section 141.92(a) is amended by removing the words ''[t]he port director'' and adding in their place the term ''CBP''. This change would allow the port director personnel (at entry stage) and the Center director personnel (at the entry summary stage) to waive production of a required invoice when they are satisfied that either: (1) the importer cannot by reason of conditions beyond his control furnish a complete and accurate invoice; or (2) the examination of merchandise, final determination of duties, and collection of statistics can be effected properly without the production of the required invoice.

Section 141.92(b) includes a list of documents that are required to be filed by the importer with the entry as a condition to the granting of a waiver for the production of a required invoice. This document amends § 141.92(b)(4) to provide that the Center director, rather than the port director, may require other information for either appraisement or classification of the merchandise, or for statistical purposes. This responsibility is being provided to only the Center director because it concerns appraisement and classification issues.

Section 141.105 is amended to provide that if either the importer of record or the actual owner whose declaration and superseding bond have been filed in accordance with § 141.20 desires, he may estimate, on the basis of information contained in the entry papers or obtainable from the Center director, rather than the port director, the probable amount of unpaid duties which will be found due on the entire entry and deposit them in whole or in part with CBP, either at the port of entry or electronically. The deposit shall be tendered in writing in the form provided in § 141.105 and instead of using the words ''To the Port Director'' the form should state ''To CBP''. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the unpaid duties is being extended to personnel working for either the port director or the Center director.

Section 141.113(a)(2) is amended to provide that the Center director, rather than the port director, may demand the return to CBP custody of merchandise that is found after release to be not legally marked. Demand may be made no later than 30 days after the date of examination in the case of merchandise examined at the importer's premises or such other appropriate places as determined by the port director or Center director.

Section 141.113(b) is amended to provide that if the Center director, rather than the port director, finds during the conditional release period that a textile or textile product is not entitled to admission into the commerce of the United States because the country of origin of the textile or textile product was not accurately represented to CBP, he shall promptly demand its return to CBP custody.

Section 141.113(c)(3) is amended to provide that the FDA will communicate to the Center director, rather than the port director, if the FDA refuses admission of a food, drug, device, cosmetic, or tobacco product into the United States, or if any notice of sampling or other request is not complied with. The paragraph is also amended to provide that the demand for redelivery of the product to CBP custody may be carried out by an authorized CBP official (a CBP employee working for either the port director or the Center director). The prescription of a bond, described in the last sentence of the paragraph, will remain with the port director.

Section 141.113(d) is amended by removing the words ''the port director'' and adding in their place the words ''an authorized CBP official'' and by removing the words ''he'' and adding in its place the words ''an authorized CBP official''. The reason for these changes is to note that if at any time after entry an authorized CBP official, which may be a CBP employee working for either the port director or the Center director, finds that any merchandise contained in an importation is not entitled to admission into the commerce of the United States for any reason not enumerated in §§ 141.113(a), (b), or (c), that same authorized CBP official or a different authorized CBP official shall promptly demand the return to CBP custody of any such merchandise which has been released.

Section 141.113(e) is amended by removing the words ''the port director'' and adding in their place the words ''an authorized CBP official''. The reason for this amendment is to note that if the importer has not promptly complied with a request for samples or additional examination packages made by an authorized CBP official (which may be a CBP employee working for either the port director or the Center director) pursuant to § 151.11, that same authorized CBP official or a different authorized CBP official may demand the return of the necessary merchandise to CBP custody.

Section 141.113(g) is amended by noting that an authorized CBP official, which is a CBP employee working for either the port director or the Center director, will retain one copy, with the date of mailing or delivery noted thereon, of the demand for the return of merchandise to CBP, which is made on Customs Form 4647, or its electronic equivalent, other appropriate form, or by letter, and it will be made part of the entry record.

Section 141.113(i) is amended to reflect that an authorized CBP official (a CBP employee working for either the port director or the Center director) may demand return of merchandise to CBP custody.

P. Part 142—Entry Process

Section 142.3(c) is amended by removing the reference to ''port director'' and replacing it with ''CBP'' because the authority to require additional copies of the entry summary documentation will continue to reside with the personnel working for the port directors and will also be extended to the personnel working for the Center directors.

Section 142.11(b) is amended by removing the reference to ''port director'' and replacing it with ''CBP'' because the authority to require additional copies of the entry summary will continue to reside with the personnel working for the port directors and will also be extended to the personnel working for the Center directors.

Section 142.13(a) is amended to provide that CBP, meaning either the personnel working for the Center director or the port director, may require that the entry summary documentation be filed and that estimated duties, if any, be deposited at the time of entry before the merchandise is released if any of the circumstances noted in § 142.13(a)(1)–(4) apply. The reason that the Center director personnel and the port director personnel will have joint authority for live entries is to ensure that the trade mission and security mission are met regardless of the hour of operation for either of the personnel.

Section 142.17(a) is amended to provide that the Center director, rather than the port director, has the authority to permit the filing of one entry summary for merchandise the subject of separate entries if certain delineated circumstances are met.

Section 142.17a(a) is amended to provide that the Center director, rather than the port director, may permit a broker as nominal consignee to file a consolidated entry summary in his own name under his own bond covering shipments of like or similar merchandise consigned to various ultimate consignees as long as certain delineated circumstances are met.

Section 142.18(a) is amended to provide that an authorized CBP official (a CBP employee working for either the port director or the Center director) will demand return to CBP custody of merchandise released at time of entry that is later found to be prohibited in accordance with § 141.113.

Section 142.28(a) is amended to provide that that an authorized CBP official (a CBP employee working for either the port director or the Center director) will demand return to CBP custody if merchandise released under a special permit for immediate delivery later is found to be prohibited.

Q. Part 143—Special Entry Procedures

Section 143.22 is amended to provide that CBP may require a formal consumption or appraisement entry for any merchandise if deemed necessary for import admissibility enforcement purposes; revenue protection; or the efficient conduct of customs business. This means that either port director or Center director personnel may require a formal consumption or appraisement entry in these circumstances. While the handling of informal entries will be transitioned to the Center directors, in this case, personnel working for either the port director or the Center director need to have the authority to require formal entry to ensure that the trade mission is met regardless of the hour of operation for either of the personnel.

Section 143.23 is amended to provide that except for the types of merchandise listed in § 143.23 which may be entered on the forms indicated, merchandise to be entered informally must be entered on a CBP Form 368 or 368A, (serially numbered) or CBP Form 7501, or its electronic equivalent or, if authorized by the Center director, rather than the port director, upon the presentation of a commercial invoice which contains the declaration noted in § 143.23, signed by the importer or his agent. This function is being transitioned to the Center directors because it involves informal entry.

R. Part 144—Warehouse and Rewarehouse Entries and Withdrawals

Section 144.5 is amended to provide that merchandise must not remain in a bonded warehouse beyond 5 years from the date of importation or such longer period of time as the Center director, rather than the port director, may at his discretion permit upon proper request being filed and good cause shown. While the Center directors will be responsible for the duty impact and entry summary aspects of the bonded warehouses, the port directors will remain responsible for the physical control and supervision of the bonded warehouses.

Section 144.12 is amended to provide that the entry summary, Customs Form 7501, or its electronic equivalent shall show the value, classification, and rate of duty as approved by the Center director, rather than the port director, at the time the entry summary is filed.

Section 144.13 is amended to provide that a bond on Customs Form 301, containing the bond conditions set forth in § 113.62 shall be filed in the amount required by the Center director, rather than the port director, to support the entry documentation. The reason that the Center director will be determining the amounts for these bonds is because the bond is for the purpose of protecting the revenue.

Section 144.38 concerns withdrawals for consumption. Section 144.38(d) is amended to provide that the Center director, rather than the port director, may increase or decrease the amount of estimated duties to be deposited on the final withdrawal to bring the aggregate amount of duties deposited into balance

with the amount which he estimates will be finally due upon liquidation.

Section 144.41(h) is amended to provide that a protest may be filed with CBP, either at the port of entry or electronically, against a liquidation made under § 159.7(a) or (b) of this chapter, or against a refusal to liquidate pursuant to said sections. In all other cases, any protest shall be filed against the original warehouse entry. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the protest is being extended to personnel working for either the port director or the Center director.

S. Part 145—Mail Importations

Section 145.12(a) is amended to provide that CBP, meaning personnel working for either the Center director or the port director, may require formal entry of any mail shipment regardless of value if it is necessary to protect the revenue. The reason that the Center director personnel and the port director personnel will have joint authority for requiring formal entry is to ensure that the trade mission is met regardless of the hour of operation for either of the personnel.

Section 145.14(b) is amended to provide that since there is no provision for post office supervision of these special marking requirements, such as those contained in the Textile Fiber Products Identification Act, the Wool Products Labeling Act, and the Trademark Act, CBP shall require compliance with the law and regulations (see parts 11 and 133 of this chapter). Currently, the regulatory language provides that the ''port director shall require compliance'', but the language is being amended in this document to note that ''CBP'' shall require compliance since both Center director and port director personnel will be enforcing the applicable laws and regulations.

T. Part 146—Foreign Trade Zones

Section 146.65(b)(3) is amended to provide that an allowance in the dutiable value of foreign trade zone merchandise may be made by the Center director, rather than by the port director, in accordance with the provisions of subparts B and C of part 158 (19 CFR part 158, subparts B and C), for damage, deterioration, or casualty while the merchandise is in the zone.

Section 146.65(c) is amended to provide that the Center director, rather than the port director, is authorized to provide an extension of liquidation.

U. Part 147—Trade Fairs

Section 147.32 is amended to provide that the Center director, rather than the port director, will detail an officer to act as his representative at the fair and shall station inside the buildings as many additional Custom officers and employees as may be necessary to properly protect the revenue.

Section 147.33 is amended to read as follows: [a]ll actual and necessary charges for labor, services, and other expenses in connection with the entry, examination, appraisement, custody, abandonment, destruction, or release of articles entered under the regulations of this part, together with the necessary charges for salaries of Customs officers and employees in connection with the accounting for, custody of, and supervision over, such articles, shall be reimbursed by the fair operator to the Government, payment to be made to CBP, either at the port of entry or electronically, on the port director's or Center director's demand made before January 19, 2017 or on the Center director's demand made on or after January 19, 2017, for deposit to the appropriation from which paid. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the payment is being extended to personnel working for either the port director or the Center director. This section is being amended to include date ranges because the demands made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the demands made on or after the effective date of these regulatory amendments will be made by the Center director.

Section 147.41 is amended by noting that the Center director, rather than the port director, may demand payment of any unpaid duty, tax, fees, charges, or exaction due on any article removed from the trade fair premises or disposed of contrary to subpart E of part 147, including any article lost or stolen regardless of the fair operator's fault. The section is also amended to provide that the payment must be made to CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the payment is being extended to personnel working for either the port director or the Center director.

V. Part 151—Examination, Sampling, and Testing of Merchandise

Section 151.10 is amended to provide that when necessary, an authorized CBP official, which includes personnel working for either the port director or the Center director, may obtain samples of merchandise for appraisement, classification, or other official purposes.

Section 151.11 is amended to provide that if an authorized CBP official (a CBP employee working for either the port director or the Center director) requires samples or additional examination packages of merchandise which has been released from CBP custody, an authorized CBP official (either the CBP official that made the initial requestor a different CBP official) will send the importer a written request, on Customs Form 28, or its electronic equivalent, Request for Information, or other appropriate form, to submit the necessary samples or packages. If the request is not promptly complied with, that same authorized CBP official or a different authorized CBP official may make a demand under the bond for the return of the necessary merchandise to CBP custody in accordance with § 141.113 of this chapter.

Section 151.12(c)(5) is amended to provide that a commercial laboratory accredited by Customs agrees to promptly investigate any circumstance which might affect the accuracy of work performed as an accredited laboratory, to correct the situation immediately, and to notify the port director, the Executive Director, and the Center director of such matters, their consequences, and any corrective action taken or that needs to be taken. The amendment adds ''Center director'' to the list of persons who must be provided notification.

Section 151.12(c)(6) is amended to provide that a commercial laboratory accredited by Customs agrees to immediately notify the port director, the Executive Director, and the Center director of any attempt to impede, influence, or coerce laboratory personnel in the performance of their duties, or of any decision to terminate laboratory operations or accredited status. The amendment adds ''Center director'' to the list of persons who must be provided notification.

Section 151.13(b)(5) is amended to provide that a commercial gauger approved by Customs agrees to promptly investigate any circumstance which might affect the accuracy of work performed as an approved gauger, to correct the situation immediately, and

to notify the port director, the Executive Director, and the Center director of such matters, their consequences, and any corrective action taken or that needs to be taken. The amendment adds ''Center director'' to the list of persons who must be provided notification.

Section 151.13(b)(6) is amended to provide that a commercial gauger approved by Customs agrees to immediately notify the port director, the Executive Director, and the Center director of any attempt to impede, influence, or coerce gauger personnel in the performance of their duties, or of any decision to terminate gauger operations or approval status. The amendment adds ''Center director'' to the list of persons who must be provided notification.

Section 151.51(b) is amended to provide that when, on the basis of invoice information, the nature of any available sample, knowledge of prior importations of similar materials, and other data, the Center director, rather than the port director, is satisfied that metal-bearing ores entered under heading 2617, HTSUS, as containing less than 1 percent of metals dutiable under headings 2603, 2607, and 2608, HTSUS, are properly entered, he may liquidate the entry on the basis of the assay information contained in the entry papers.

Section 151.52(c) is amended to provide that where no commercial samples have been taken, an authorized CBP official (a CBP employee working for either the port director or the Center director) shall take representative samples from different parts of the shipment.

Section 151.54 is amended to provide that an authorized CBP official (a CBP employee working for either the port director or the Center director) may secure from the importer a certified copy of the commercial settlement tests for moisture and for assay which shall be transmitted with the commercial samples to the Custom laboratory.

Section 151.55 is amended to provide that deductions for the loss of copper, lead, or zinc content during processing, as authorized by Chapter 26, Additional U.S. Note 1, Harmonized Tariff Schedule of the United States (19 U.S.C. 1202), shall be made by the Center director, rather than the port director, in the liquidation of any entry only if the importer has followed the procedures set forth in that headnote.

Section 151.65 is amended to provide that duties on wool or hair subject to duty at a rate per clean kilogram may be estimated at the time of filing the entry summary on the basis of the clean yield shown on the entry summary if the Center director, rather than the port director, is satisfied that the revenue will be properly protected. Liquidated duties shall be based upon the Center director's, rather than the port director's, final determination of clean yield. Moreover, the section is amended to provide that this adjustment shall be made by increasing or decreasing such estimated percentage clean yield of each lot by the difference between the percentage clean yield of the related sampling unit, as determined by the Center director, rather than the port director, and the weighted average percentage clean yield for the sampling unit, as computed from the estimated percentages clean yield and net weights shown on the entry summary for the lots included in the sampling unit.

Section 151.68(c) is amended to provide that an authorized CBP official (a CBP employee working for either the port director or the Center director) may designate other imported wool or hair to be weighed, sampled, and tested for clean yield, unless such sampling or testing is not feasible.

Section 151.69(b) is amended to provide that when part of an original sampling unit, which has been weighed, sampled, and tested in accordance with subpart E of part 151, is exported from continuous Customs custody without having been manipulated as provided for in section 562, Tariff Act of 1930, as amended (19 U.S.C. 1562), the percentage clean yield of the part not exported shall be determined, at the discretion of the Center director, rather than the port director, either on the basis of a new determination by reweighing, resampling, and retesting, or by a computation as described in § 151.69(a), for either the exported or the remaining part.

Section 151.70 is amended to provide that the Center director or chief chemist, rather than the port director, may desire a second test for clean yield of wool or hair.

Section 151.71(a) is amended to provide that a report of the percentage clean yield of each general sample as established by test in a Customs laboratory, or a statement of the reason for not testing a general sample, shall be forwarded to the Center director, rather than to the port director.

Section 151.71(b) is amended to provide that where samples of wool or hair have been tested in a Customs laboratory and the Center director, rather than the port director, has received a copy of the Laboratory Report, Customs Form 6415, the Center director, rather than the port director, shall promptly provide notice of the test results by mailing a copy of that report to the importer.

Section 151.71(c) is amended to provide that if the importer is dissatisfied with the port director's or Center director's finding of clean yield, made before January 19, 2017, or the Center director's finding of clean yield made on or after January 19, 2017, he may file with CBP, either at the port of entry or electronically, a written request in duplicate for another laboratory test for percentage clean yield. Such request shall be filed within 14 calendar days after the date of mailing of the notice of the port director's or Center director's finding of clean yield. The request shall be granted if it appears to the Center director to be made in good faith and if a second general sample as provided for in § 151.70 is available for testing, or if all packages or, in the opinion of the Commissioner of Customs, an adequate number of the packages represented by the general sample are available and in their original imported condition. This section is being amended to include date ranges because the decisions made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the decisions made on or after the effective date of these regulatory amendments will be made by the Center director. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the written request for another laboratory test for percentage clean yield is being extended to personnel working for either the port director or the Center director.

Section 151.73(b) is amended to provide that the importer's request shall be filed in writing with the Center director within 14 calendar days after the date of mailing of the notice of the port director's or Center director's findings based on the retest mailed before January 19, 2017, or within 14 calendar days after the date of mailing of the notice of the Center director's findings based on the retest mailed on or after January 19, 2017. This provision is amended to include reference to mailings sent before and after the effective date of this document in the **Federal Register** because before the effective date of this document, the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) will have issued the findings and the findings issued on or

after the effective date of this document, will be issued by the Center director.

Section 151.73(c) is amended to provide that the Center director, rather than the port director, shall cause a representative quantity of the wool or hair in dispute to be selected and tested by a commercial method approved by the Commissioner of Customs. Moreover, the paragraph is amended to note that such test shall be made under the supervision and direction of the Center director, rather than the port director, at an establishment approved by him, and the expense thereof, including the actual expense of travel and subsistence of Customs officers but not their compensation, shall be paid by the importer.

Section 151.74 is amended to provide that if the Center director, rather than the port director, is not satisfied with the results of any test provided for in § 151.71 or § 151.73, he may, within 14 calendar days after receiving the report of the results of such test, proceed to have another test made upon a suitable sample of the wool or hair at the expense of the Government. When the Center director, rather than the port director, is proceeding to have another test made, he shall, within the 14-day period specified in this paragraph, notify the importer by mail of that fact.

Section 151.75 is amended to provide that the Center director, rather than the port director, has the authority to make a final determination on clean yield and must base that determination upon a consideration of all the tests made in connection with the wool or hair concerned.

Section 151.76(a) is amended to provide that the Center director, rather than the port director, shall cause wool dutiable at a rate per clean kilogram to be examined for grade.

Section 151.76(b) is amended to provide that if classification of the wool at the grade or grades determined on the basis of the examination will result in the assessment of duty at a rate higher than the rate provided for wool of the grade stated in the entry, the Center director, rather than the port director, shall promptly notify the importer by mail.

Section 151.76(c) is amended to provide that if the importer is dissatisfied with the port director's or Center director's findings as to the grades of wool, made before January 19, 2017, or the Center director's findings as to the grade or grades of the wool made on or after January 19, 2017, he may, within 14 calendar days after the date of mailing of the notice of the port director's or Center director's findings, file in duplicate a written request with the Center director for another determination of grade or grades, stating the reason for the request. Notice of the Center director's findings on the basis of the reexamination of the wool shall be mailed to the importer. This section is being amended to include date ranges because the decisions made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the decisions made on or after the effective date of these regulatory amendments will be made by the Center director. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the written request for another determination of grade or grades of wool is being extended to personnel working for either the port director or the Center director.

Section 151.84 is amended to provide that the Center director, rather than the port director, shall have one or more samples of each sampled bale of cotton stapled by a qualified Customs officer, or a qualified employee of the Department of Agriculture designated by the Commissioner of Customs for the purpose, and shall promptly mail the importer a notice of the results determined.

Section 151.85 is amended to provide that if the importer is dissatisfied with the port director's or Center director's determination, made before January 19, 2017, or the Center director's determination made on or after January 19, 2017, he may file with the Center director, within 14 calendar days after the mailing of the notice, a written request in duplicate for a redetermination of the staple length. Each such request shall include a statement of the claimed staple length for the cotton in question and a clear statement of the basis for the claim. The request shall be granted if it appears to the Center director to be made in good faith. In making the redetermination of staple length, the Center director may obtain an opinion of a board of cotton examiners from the U.S. Department of Agriculture, if he deems such action advisable. This section is being amended to include date ranges because the decisions made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the decisions made on or after the effective date of these regulatory amendments will be made by the Center director.

W. Part 152—Classification and Appraisement of Merchandise

Section 152.1(c) is amended to provide that if there is no positive evidence at hand as to the actual date of exportation, the Center director, rather than the port director, shall ascertain or estimate the date of exportation by all reasonable ways and means in his power, and in so doing may consider dates on bills of lading, invoices, and other information available to him.

Section 152.2 is amended to provide that if the Center director, rather than the port director, believes that the entered rate or value of any merchandise is too low, or if he finds that the quantity imported exceeds the entered quantity, and the estimated aggregate of the increase in duties on that entry exceeds $15, he shall promptly notify the importer on Customs Form 29, or its electronic equivalent, specifying the nature of the difference on the notice. Liquidation shall be made promptly and shall not be withheld for a period of more than 20 days from the date of mailing of such notice unless in the judgment of the Center director, rather than the port director, there are compelling reasons that would warrant such action.

Section 152.13(a) is amended to provide that the Center director, rather than the port director, will give written notice to the importer as promptly as possible after any commingling of merchandise is discovered.

Section 152.13(c)(1) is amended to provide that to obtain the benefit of General Note 3(f), HTSUS, the importer shall, within 30 days after the date of mailing or personal delivery of the notice provided for in § 152.13(a), file with the Center director, rather than the port director, evidence showing performance of the commercial settlement tests specified in General Note 3(f), HTSUS.

Section 152.13(c)(3) is amended to provide that to obtain the benefit of General Note 3(f), HTSUS, the importer shall, within 30 days after the date of mailing or personal delivery of the notice provided for in § 152.13(a), file with the Center director, rather than the port director, documentary proof which will satisfy him that the merchandise is entitled to the lower rate of duty under General Note 3(f), HTSUS.

Section 152.13(d) is amended to provide that the 30-day limit for filing the evidence specified in General Note 3(f) or for performing the segregation

specified in General Note 3(f), Harmonized Tariff Schedule of the United States, may be extended by the Center director, rather than the port director, for additional periods of 30 days each, but not beyond 6 months from the date of mailing or personal delivery of the notice provided for in paragraph (a) of this section, if the importer makes written application for each extension and gives satisfactory reasons for its allowance. The paragraph is also amended to provide that the written application must be filed with the Center director, rather than the port director.

Section 152.16(c) is amended to provide that if a court decision overruling a protest contains a definite statement that a higher rate than that assessed by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, was properly chargeable, such higher rate shall be applied to all merchandise, whether identical or similar to that passed on by the court, which is affected by the principles of the court's decision and which is entered or withdrawn for consumption after 30 days from the date of the publication of the court's decision in the Customs Bulletin. The Center director is included for the dates prior to the effective date of this document because under the Center test, the assessments for the Center test participants may have been made by the Center director. Moreover, pursuant to the Delegation Order (noted in section I.B. of the Background section of this document) the assessments may have been made by the Center director as well. However, the assessments made on or after the effective date of these regulatory amendments will be made by the Center director.

Section 152.26 is amended to provide that the Center director, rather than the port director, shall furnish to importers the latest information as to values in his possession, subject to certain conditions. This document amends the conditions by removing the words ''port director'' or ''port director's'' where they appear and replacing them with ''Center director'' or ''Center director's'' so as to note that the information shall be given only in regard to merchandise to be appraised by, or under the jurisdiction of, the Center director who receives the request, and only with respect to merchandise for which there is presented evidence of a firm commitment or intent to import such merchandise into the United States. Also, the section is amended to provide that value information shall be given by the Center director only with an understanding and agreement in each case that the information is in no sense an appraisement and is not binding upon the Center director's action when he appraises the merchandise. Moreover, the section is amended to provide that the Center director shall not be required to reply to a written request for value information after a value for the merchandise has been declared on entry unless he has information indicating a probable appraised value different from such entered value.

Section 152.101(c) is amended to provide that the importer's request for the application of the computed value method before the deductive value method must be made at the time the entry summary for the merchandise is filed with CBP, either at the port of entry or electronically (see § 141.0a(b) of this chapter). The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the entry summary is being extended to personnel working for either the port director or the Center director.

Section 152.101(d) is amended to provide that upon receipt of a written request from the importer within 90 days after liquidation, the Center director, rather than the port director shall provide a reasonable and concise written explanation of how the value of the imported merchandise was determined.

Section 152.103(a)(5)(iii) is amended to provide that a sale for export and placement for through shipment to the United States under § 152.103(a)(5)(ii) shall be established by means of a through bill of lading to be presented to CBP, either at the port of entry or electronically. The paragraph is also amended to provide that only in those situations where it clearly would be impossible to ship merchandise on a through bill of lading (*e.g.,* shipments via the seller's own conveyance) will other documentation satisfactory to the Center director, rather than the port director, showing a sale for export to the United States and placement for through shipment to the United States be accepted in lieu of a through bill of lading. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the bill of lading is being extended to personnel working for either the port director or the Center director.

Section 152.103(d) is amended to provide that if the value of an assist is to be added to the price actually paid or payable, or to be used as a component of computed value, the Center director, rather than the port director, shall determine the value of the assist and apportion that value to the price of the imported merchandise in one of the manners delineated in § 152.103(d)(1)–(d)(2).

Section 152.103(l) is amended to provide that the Center director, rather than the port director, shall not disregard a transaction value solely because the buyer and seller are related.

Section 152.103(l)(2)(iii) is amended to provide that if one of the test values provided in § 152.103(j)(2)(i) has been found to be appropriate, the Center director shall not seek to determine if the relationship between the buyer and seller influenced the price. If the Center director already has sufficient information to be satisfied, without further detailed inquiries, that one of the test values is appropriate, he shall not require the importer to demonstrate that the test value is appropriate.

Section 152.103(m) is amended to provide that when CBP has grounds for rejecting the transaction value declared by an importer and that rejection increases the duty liability, the Center director, rather than the port director, shall inform the importer of the grounds for the rejection. The importer will be afforded 20 days to respond in writing to the Center director, rather than the port director, if in disagreement.

Section 152.105(h)(3)(i)(2) is amended to provide that the Center director, rather than the port director, will review on its merits each case involving the following issues: If the imported merchandise loses its identity as a result of further processing, the method specified in § 152.105(c)(3) will not be applicable unless the value added by the processing can be determined accurately without unreasonable difficulty for either importers or Customs; and if the imported merchandise maintains its identity but forms a minor element of the merchandise sold in the United States, the use of § 152.105(c)(3) will be unjustified.

Section 152.106(f)(2) is amended to provide that, if not contrary to domestic law regarding disclosure of information, and if information other than that supplied by or on behalf of the producer is used to determine computed value, the Center director, rather than the port director, shall inform the importer, upon written request, of: (i) The source of the information, (ii) the data used,

and (iii) the calculation based upon the specified data.

X. Part 158—Relief From Duties on Merchandise Lost, Damaged, Abandoned, or Exported

Section 158.3 is amended to provide that allowance shall be made in the assessment of duties for lost or missing packages of merchandise included in an entry summary whenever it is established to the satisfaction of the Center director, rather than the port director, before the liquidation of the entry summary becomes final that the merchandise claimed to be lost or missing was not ''permitted.''

Section 158.5(a) is amended to provide that an allowance shall be made in the assessment of duties for deficiencies in the contents of packages when, before the liquidation of the entry becomes final, the importer files in the case of a concealed shortage, a Customs Form 5931, in triplicate, executed by the importer alone, and the Center director, rather than the port director, is satisfied as to the validity of the claim.

Section 158.13(b) is amended to provide that if the port director is satisfied after any necessary investigation that the merchandise contains moisture or impurities as described in § 158.13(a), the Center director, rather than the port director, will make allowance for the amount thereof in the liquidation of the entry. The reason that the term ''port director'' is being maintained the first time it appears in this provision is because entry and condition of release issues will continue to be handled by the personnel working for the port directors. The word ''he'' in the provision originally meant ''the port director''; however, the words ''he shall'' is being removed and replaced with ''the Center director will'' because the authority to make liquidation determinations is being transitioned to the Center directors.

Y. Part 159—Liquidation of Duties

Section 159.7(b) is amended by removing the words ''at the port where the merchandise is held in CBP custody'' and replacing them with the words ''by the Center director'' to specifically provide that the Center director personnel will effectuate on the effective date of the change any necessary reliquidations of customs duty or tax on merchandise covered by a rewarehouse entry which may be required by reason of a change in rate of customs duty or tax made by an act of Congress or a proclamation of the President.

Section 159.7(c) is amended by removing the words ''port director of the port where the merchandise is entered for rewarehouse'' and replacing them with ''Center director'' to provide that the Center director, rather than the port director where the merchandise is entered for rewarehouse, has the authority to determine that circumstances that make it advisable to follow the liquidation of the original warehouse entry and to make an appropriate adjustment in the amount of duties to be assessed under the rewarehouse entry.

Section 159.12(a)(1) is amended to provide that the Center director, rather than the port director, may extend the one (1)-year statutory period for liquidation for an additional period not to exceed one (1)-year under certain circumstances, including if the importer requests an extension in writing before the statutory period expires and shows good cause why the extension should be granted.

Section 159.12(a)(1)(ii) is amended by stating that ''good cause'' is demonstrated when the importer satisfies the Center director, rather than the port director, that more time is needed to present to CBP information which will affect the pending action, or there is a similar question under review by CBP.

Section 159.12(b) is amended by noting that if the Center director, rather than the port director, extends the time for liquidation, as provided in § 159.12(a)(1), he promptly will notify the importer or the consignee and his agent and surety on CBP Form 4333–A, appropriately modified, that the time has been extended and the reasons for doing so.

Section 159.12(c) is amended to provide that if the liquidation of an entry is suspended as required by statute or court order, as provided in § 159.12(a)(2), the Center director, rather than the port director, promptly will notify the importer or the consignee and his agent and surety on CBP Form 4333–A, appropriately modified, of the suspension.

Section 159.12(d)(1) is amended to provide that if an extension has been granted because CBP needs more information and the Center director, rather than the port director, thereafter determines that more time is needed, he may extend the time for liquidation for an additional period not to exceed 1 year provided he issues the notice required by § 159.12(b) before termination of the prior extension period.

Section 159.12(d)(2) is amended to provide that if the Center director, rather than the port director, finds that good cause (as defined in § 159.12(a)(1)(ii)) exists, he will issue a notice extending the time for liquidation for an additional period not to exceed 1 year.

Section 159.12(e) is amended to provide that the total time for which extensions may be granted by the Center director may not exceed 3 years. Currently, the regulation states that the extension granted by the port director may not exceed 3 years. This provision is being amended because the authority to make liquidation determinations is being transitioned to the Center directors.

Section 159.22(d)(2) is amended to provide that if the Center director, rather than the port director, is of the opinion that the invoice or schedule tare does not correctly represent the tare of the merchandise the actual tare shall be ascertained and in so doing the weigher shall empty and weigh as many casks, boxes, and other coverings as he may deem necessary.

Section 159.36(b) is amended to provide that when multiple rates have been certified for a foreign currency, the rate to be used for Customs purposes shall be the type of certified rate which the Center director, rather than the port director, is satisfied, from information in his own files, information obtained and presented to him by the importer, or information obtained from other sources, is uniformly applicable under the laws and regulations of the country of exportation to the particular class of merchandise on the date of exportation.

Section 159.36(c) is amended to provide that if the Center director, rather than the port director, has credible information that a type of rate or combination of types of rates which would otherwise be applicable under § 159.36(b) were not required or permitted, as the case may be, under the laws and regulations of the country of exportation to be used uniformly during any period in connection with the payment for all merchandise of the class involved, he shall immediately submit a detailed report to the Commissioner of Customs, and shall suspend appraisement and liquidation as to all merchandise of the class involved exported to the United States during the period involved, until instructions are received from the Commissioner of Customs.

Section 159.36(d) is amended to provide that if the Center director, rather than the port director, has credible information that a type of rate or combination of types of rates not applicable to payment for the merchandise was required or permitted

in payment of costs, charges, or expenses, the currency conversions for the exchange covering payment for the merchandise and for the exchange covering such costs, charges, or expenses shall be calculated separately. Moreover, the paragraph is amended to provide that in the event that any type of rate uniformly applicable to payment of such dutiable costs, charges, or expenses for merchandise of the class involved was a type of rate not certified in accordance with § 159.34 or § 159.35, the Center director, rather than the port director, shall immediately submit a detailed report to the Commissioner of Customs, and shall suspend appraisement and liquidation as to all merchandise of the class involved exported to the United States during the period involved, until instructions are received from the Commissioner.

Section 159.38 is amended to provide that for purposes of calculating estimated duties, the Center director, rather than the port director, shall use the rate or rates appearing to be applicable under the instructions in this subpart to the merchandise involved. When it is not yet known what certified rate or rates are applicable or no rate has been certified, the Center director, rather than the port director, shall take into account all the information in his possession and shall use the highest rate or combination of rates (*i.e.,* the rate or combination of rates showing the highest amount of United States money), certified or uncertified as the case may be, which could be applicable.

Section 159.44 is amended to provide that whenever it appears that imported articles may be subject to the special duties provided for in section 802, Act of September 8, 1916 (15 U.S.C. 73), the Center director, rather than the port director, shall report the matter to the Commissioner of Customs and await instructions with respect to the imposition of such duties.

Section 159.58(a) is amended to provide that upon receipt of notification from the Commissioner, the Center director will suspend liquidation on merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the ''Notice of Preliminary Affirmative Antidumping Determination,'' ''Notice of Final Affirmative Antidumping Determination'' or ''Notice of Violation of Agreement'' as provided by part 353, chapter III, of this title. The Center director will immediately notify the importer, consignee, or agent of each entry of merchandise in question with respect to which liquidation is suspended.

Section 159.58(b) is amended to provide that upon receipt of notification from the Commissioner, the Center director will suspend liquidation on merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the ''Notice of Preliminary Affirmative Countervailing Duty Determination,'' ''Notice of Final Affirmative Countervailing Duty Determination'' or ''Notice of Violation of Agreement,'' as provided by part 355, Chapter III, of this title. The Center director will immediately notify the importer, consignee, or agent of each entry of merchandise in question with respect to which liquidation is suspended.

Z. Part 161—General Enforcement Provisions

Section 161.16 concerns the filing of a claim for informant compensation. Paragraph (b) is amended to provide that the Special Agent in Charge, U.S. Immigration and Customs Enforcement, Homeland Security Investigations will forward the form to the Center director (rather than the port director), who will make a recommendation on the form as to approval and the amount of the award. The Center director, rather than the port director, will forward the form to CBP Headquarters for action. If for any reason a claim has not been transmitted by the Center director, the claimant may apply directly to CBP Headquarters.

AA. Part 162—Inspection, Search, and Seizure

Section 162.74(c) is amended to provide that concerning prior disclosures, after Headquarters reviews the actual loss of duties, taxes and fees and renders its decision, the concerned Fines, Penalties, and Forfeitures Officer will be notified and the concerned Center director, rather than the CBP port, will recalculate the loss, if necessary, and notify the disclosing party of any actual loss of duties, taxes or fees increases.

Section 162.80(a)(1) is amended to provide that when an entry is the subject of an investigation for possible violation of section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592), or of a penalty action established under that section, the Center director, rather than the port director, subject to the provisions of paragraph (a)(2) of this section, may liquidate the entry and CBP, either at the port of entry or electronically, may collect duties before the conclusion of the investigation or final disposition of the penalty action if the Center director, rather than the port director, determines that liquidation would be in the interest of the Government. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the duties is being extended to personnel working for either the port director or the Center director.

Section 162.80(a)(2)(i) is amended to provide that an entry not liquidated within one (1)-year from the date of entry or final withdrawal of all merchandise covered by a warehouse entry shall be deemed liquidated at the rate of duty, value, quantity, and amount of duties asserted at the time of entry by the importer, his consignee, or agent unless the time for liquidation is extended by the Center director (rather than the port director) because of certain circumstances delineated in § 162.80(a)(2)(i)(A)–(C).

Section 162.80(a)(2)(iii) is amended to provide that the Center director, rather than the port director, promptly shall notify the importer or consignee concerned and any authorized agent and surety of the importer or consignee in writing of any extension or suspension of the liquidation period.

BB. Part 163—Recordkeeping

Section 163.1(a)(2)(vii) is amended to provide that the maintenance of any documentation that the importer may have in support of a claim for preferential tariff treatment under the United States-Singapore Free Trade Agreement (SFTA), including a SFTA importer's supporting statement if previously required by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017. This section is being amended to include date ranges because the decision to require a SFTA importer's supporting statement made prior to the effective date of these regulatory amendments will have been made by the port director or Center director (pursuant to the Delegation Order described in section I.B. of the Background section of this document) and the decision made on or after the effective date of these regulatory amendments will be made by the Center director.

Section 163.7(a) is amended by including Center directors to the list of individuals, who may in certain noted situations, issue a summons requiring a person within a reasonable period of time to appear before the appropriate CBP officer and to produce records or give relevant testimony under oath or both.

The appendix to part 163 is amended at section 10.512 of part IV to add the

Center director to the port director regarding importer's supporting statements related to Singapore Free Trade Agreement claims before the effective date of this document and changing port director to Center director for importer's supporting statements on or after the effective date of this document.

CC. Part 173—Administrative Review in General

Section 173.1 is amended to provide that Center directors, rather than port directors, have broad responsibility and authority to review transactions to ensure that the rate and amount of duty assessed on imported merchandise is correct and that the transaction is otherwise in accordance with the law.

Section 173.2 is amended to provide that the Center director, rather than the port director, may review transactions for correctness, and take appropriate action under his general authority to correct errors, including those in appraisement where appropriate, at the time of: (a) Liquidation of an entry; (b) Voluntary reliquidation completed within 90 days after liquidation; (c) Voluntary correction of an exaction within 90 days after the exaction was made; (d) Reliquidation made pursuant to a valid protest covering the particular merchandise as to which a change is in order; or (e) Modification, pursuant to a valid protest, of a transaction or decision which is neither a liquidation or reliquidation.

Section 173.3(a) is amended to provide that the Center director, rather than the port director, may reliquidate on his own initiative a liquidation or a reliquidation to correct errors in appraisement, classification, or any other element entering into the liquidation or reliquidation, including errors based on misconstruction of applicable law. A voluntary reliquidation may be made even though a protest has been filed, and whether the error is discovered by the Center director or is brought to his attention by an interested party.

Section 173.4(a) is amended to provide that even though a valid protest was not filed, the Center director, rather than the port director, upon timely application and for entries of merchandise made, or withdrawn from warehouse for consumption, before December 18, 2004, may correct pursuant to section 520(c)(1), Tariff Act of 1930, as amended, a clerical error, mistake of fact, or other inadvertence meeting the requirements of § 173.4(a)(1), by reliquidation or other appropriate action.

Section 173.4(a)(2) is amended to provide that a clerical error, mistake of fact, or other inadvertence meeting the requirements of § 173.4(a)(1) must be brought to the attention of the Center director or other appropriate CBP officer within 1 year after the date of liquidation or exaction. The term ''other appropriate CBP officer'' includes personnel working for the port director.

Section 173.4a is amended to provide that pursuant to section 520(a)(4), Tariff Act of 1930, as amended (19 U.S.C. 1520(a)(4)), the Center director, rather than the port director may, prior to liquidation of an entry, take appropriate action to correct a clerical error that resulted in the deposit or payment of excess duties, fees, charges, or exactions.

DD. Part 174—Protests

Section 174.0 is amended to provide that part 174 deals with the administrative review of decisions of the both the port director and Center director.

Section 174.3(b)(1) states that a corporate power of attorney to file protests shall be signed by a duly authorized officer or employee of the corporation. Paragraph (b)(1) is amended to provide that if the Center director, rather than the port director, is otherwise satisfied as to the authority of such corporate officer or employee to grant such power of attorney, compliance with the requirements of § 141.37 of this chapter may be waived with respect to such power.

Section 174.3(c) is amended to provide that powers of attorney issued by a partnership shall be limited to a period not to exceed 2 years from the date of receipt thereof by the Center director. The date on which the power of attorney information is input into CBP's authorized electronic data interchange system will be considered the date of receipt by the Center director.

Section 174.3(d) is amended to provide that any power of attorney shall be subject to revocation at any time by written notice given to and received by CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to collect the notice is being extended to personnel working for either the port director or the Center director.

Section 174.12(d) is amended by removing the words ''port director whose decision is protested'' and replacing it with ''CBP, either at the port of entry or electronically''. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to receive the protest is being extended to personnel working for either the port director or the Center director.

Section 174.13(b) is amended to provide that a single protest may be filed with respect to more than one entry with CBP, either at any port or electronically, if all such entries entries involve the same protesting party, and if the same category of merchandise and a decision or decisions common to all entries are the subject of the protest. The language ''with CBP, either at any port or electronically'' here means that the importer may choose the means of submission; however, the authority to receive the protest is being extended to personnel working for either the port director or the Center director.

Section 174.14(e) is amended to provide that rather than the amendment to a protest being filed with the port director with whom the protest was filed, an amendment to a protest shall be filed with CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the importer may use the means of submission currently permitted; however, the authority to receive the protest is being extended to personnel working for either the port director or the Center director.

Section 174.15(b)(2) is amended to provide that consolidation of protests under § 174.15(a) may be done by the port director or Center director, before January 19, 2017, or the Center director on or after January 19, 2017. The Center director is included for the dates prior to the effective date of this document because under the Center test, protests for the test participants were processed and decided upon by the Center director. Moreover, pursuant to the Delegation Order (described in section **I.B.** of the **Background** section of this document) protests may have been processed and decided upon by the Center director as well. Therefore, before the effective date of this document, the consolidation of protests may be done by the port director or Center director, and on or after the effective date of this document, any consolidation of protests covered by this provision will be handled by the Center director, rather than by the port director.

Section 174.16 is amended to provide that a protest shall not be filed against the reliquidation decision of the port director or Center director made before

January 19, 2017, or the reliquidation decision of the Center director made on or after January 19, 2017, upon any question not involved in the reliquidation. The Center director is included for the dates prior to the effective date of this document because under the Center test, reliquidation determinations for the test participants were made by the Center director and pursuant to the Delegation Order (described in section **I.B.** of the **Background** section of this document), reliquidation determinations for others may have been made by the Center director as well. Moreover, on or after the effective date of this document, reliquidation determinations will be made by the Center director, rather than by the port director.

Section 174.21(a) is amended to provide that, except as provided in § 174.21(b), the Center director, rather than the port director, shall review and act on a protest filed in accordance with section 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), within 2 years from the date the protest was filed.

Section 174.21(b) is amended to provide that if the protest relates to an administrative action involving exclusion of merchandise from entry or delivery under any provision of the Customs laws, the Center director, rather than the port director, shall review and act on a protest filed in accordance with section 514(a)(4), Tariff Act of 1930, as amended (19 U.S.C. 1514(a)(4)), within 30 days from the date the protest was filed.

Section 174.22(a) is amended to provide that written requests for accelerated disposition of protests may be filed with the port director, Center director, or other CBP officer with whom the protest was filed. Accordingly, the authority to receive the written requests for accelerated disposition of protests resides with personnel working for either the port director or the Center director.

Section 174.22(c) is amended to provide that the Center director shall review the protest which is the subject of the request for accelerated disposition within 30 days from the date of mailing of a request for accelerated disposition filed in accordance with the provisions of § 174.22, and may allow or deny the protest in whole or in part.

Section 174.22(d) is amended to provide that the Center director, rather than the port director, will be responsible for allowing or denying a protest which is the subject of a request for accelerated disposition. As amended, it will be the Center director's, rather than the port director's, failure to do so within thirty days from the date of mailing such request that will result in the protest being deemed to have been denied at the close of the thirtieth day following such date of mailing.

Section 174.23 is amended to provide that a protesting party may seek further review of a protest in lieu of review by the Center director by filing, on the form prescribed in § 174.25, an application for such review within the time allowed and in the manner prescribed by § 174.12 for the filing of a protest. The filing of an application for further review shall not preclude a preliminary examination by the Center director for the purpose of determining whether the protest may be allowed in full. If such preliminary examination indicates that the protest would be denied in whole or in part by the Center director in the absence of an application for further review; however, he shall forward the protest and application for consideration in accordance with § 174.26.

Section 174.24 is amended to provide that a further review of a protest which would otherwise be denied by the Center director, rather than the port director, shall be accorded a party filing an application for further review which meets the requirements of § 174.25 when the decision against which the protest was filed meets one of the listed criteria in § 174.24.

Section 174.24(a) is amended to state that further review shall be accorded when a decision against which the protest was filed is alleged to be inconsistent with a ruling of the Commissioner of CBP or his designee, or with a decision made by CBP with respect to the same or substantially similar merchandise.

Section 174.24(b) is amended to state that further review shall be accorded when a decision against which the protest was filed is alleged to involve questions of law or fact which have not been ruled upon by the Commissioner of CBP or his designee or by the Customs courts.

Section 174.24(c) is amended to state that further review shall be accorded when a decision against which the protest was filed involves matters previously ruled upon by the Commissioner of CBP or his designee or by the Customs courts but facts are alleged or legal arguments presented which were not considered at the time of the original ruling.

Section 174.24(d) is amended to state that further review shall be accorded when a decision against which the protest was filed is alleged to involve questions which the Headquarters Office, U.S. Customs and Border Protection, refused to consider in the form of a request for internal advice pursuant to § 177.11(b)(5).

Section 174.26(a) is amended to provide that if upon examination of a protest for which an application for further review was filed the Center director, rather than the port director, is satisfied that the claim is valid, he shall allow the protest.

Section 174.26(b) is amended to provide that if upon examination of a protest for which an application for further review was filed the Center director, rather than the port director, decides that the protest in his judgment should be denied in whole or in part, the Center director, rather than the port director, will forward the application together with the protest and appropriate documents to be reviewed as delineated in § 174.26(b)(1)–(2).

Section 174.26(b)(2) is amended to provide that all other protests shall be reviewed by a designee of the Center director (rather than by a designee of the port director) who did not participate directly in the decision which is the subject of the protest.

Section 174.27 is amended to provide that upon completion of further review, the protest and appropriate documents forwarded for review shall be returned to the Center director, rather than the port director, together with directions for the disposition of the protest.

Section 174.29 is amended to provide that the Center director, rather than the port director, shall allow or deny in whole or in part a protest filed in accordance with section 514, Tariff Act of 1930, as amended, (19 U.S.C. 1514) within 2 years from the date the protest was filed. If the protest is allowed in whole or in part the Center director, rather than the port director, shall remit or refund any duties, charge, or exaction found to have been collected in excess, or pay any drawback found due. Moreover, the section is amended to provide that if the protest is denied in whole or in part the Center director, rather than the port director, shall give notice of the denial in the form and manner prescribed in § 174.30.

Section 174.30(b) is amended to provide that the importer of record or consignee may give notice to CBP, either at the port of entry or electronically, instructing that notice of denial of any protest involving merchandise imported in his name or on his behalf shall be mailed to a person other than the person filing such protest or the designee of such person. This document also amends the provision to note that notice of denial of a protest shall be mailed to the substituted person so designated only if the notice of substitution is

received by CBP prior to a denial by him of such protest. The language ''CBP, either at the port of entry or electronically'' here means that the importer of record or consignee may use the means of submission currently permitted; however, the authority to receive the notice is being extended to personnel working for either the port director or the Center director.

Section 174.30(c) is amended to provide that the Center director, rather than the port director, shall note on the notice of denial of a protest the payment of all liquidated duties, charges, or exactions, if he has actual knowledge of such payment at the time that the protest is denied.

EE. Part 176—Proceedings in the Court of International Trade

Section 176.1 is amended to provide that when an action is initiated in the Court of International Trade a copy of the summons shall be served in the manner prescribed by the Court of International Trade upon the CBP official(s) who denied the protest(s), and an additional copy shall be served upon the Assistant Chief Counsel for Court of International Trade Litigation, United States Customs and Border Protection, 26 Federal Plaza, New York, N.Y. 10007. The term ''CBP official(s)'' is added here in place of ''director of each port where a protest cited in the summons was denied'' because the protest may have been denied by either a CBP employee working for either the Center director or the port director depending on the date on which the protests were denied.

FF. Part 181—North American Free Trade Agreement

Section 181.12(b)(1) is amended by noting that for purposes of determining compliance with the provisions of part 181 (19 CFR part 181), the records required to be maintained under § 181.12 shall be made available for examination and inspection by the Center director or other appropriate Customs officer in the same manner as provided in part 163 of this chapter in the case of U.S. importer records.

Section 181.22(b) is amended to provide that an importer who claims preferential tariff treatment on a good under § 181.21 shall provide, at the request of the Center director, rather than the port director, a copy of each Certificate of Origin pertaining to the good which is in the possession of the importer.

Section 181.22(b)(3) is amended to provide that a Certificate of Origin submitted to CBP under § 181.22(b) or under § 181.32(b)(3) shall be completed either in the English language or in the language of the country from which the good is exported. If the Certificate is completed in a language other than English, the importer shall also provide to the Center director (rather than the port director), upon request, a written English translation thereof.

Section 181.22(c) is amended to provide that a Certificate of Origin shall be accepted by the Center director, rather than the port director, as valid for the purpose set forth in § 181.11(a), provided that the Certificate is completed, signed and dated in accordance with the requirements of § 181.22(b). The paragraph is also amended to provide that if the Center director, rather than the port director, determines that a Certificate is illegible or defective or has not been completed in accordance with § 181.22(b), the importer shall be given a period of not less than five working days to submit a corrected Certificate. Acceptance of a Certificate will result in the granting of preferential tariff treatment to the imported good unless, in connection with an origin verification initiated under subpart G of part 181 (19 CFR part 181) or based on a pattern of conduct within the meaning of § 181.76(c), the Center director determines that the imported good does not qualify as an originating good or should not be accorded such treatment for any other reason as specifically provided for elsewhere in part 181 (19 CFR part 181). A Certificate shall not be accepted in connection with subsequent importations during a period referred to in § 181.22(b)(5)(ii) if, based on an origin verification under subpart G of part 181 (19 CFR part 181), the Center director, rather than the port director, determined that a previously imported identical good covered by the Certificate did not qualify as an originating good.

Section 181.22(d)(1)(i) is amended to provide that except as otherwise provided in § 181.22(d)(2), an importer shall not be required to have a Certificate of Origin in his possession for an importation of a good for which the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, has in writing waived the requirement for a Certificate of Origin because the port director or Center director is otherwise satisfied that the good qualifies for preferential tariff treatment under the NAFTA. This provision is amended to include reference to dates before and after the effective date of this document in the **Federal Register** because the port director or the Center director (pursuant to the Center test or the Delegation Order described in section I.B. of the Background section of this document), may have waived the Certificate of Origin before the effective date of this document in the **Federal Register** and only the Center director may waive the Certificate of Origin on or after the effective date of this document in the **Federal Register**.

Section 181.22(d)(1)(iii) is amended to provide that except as otherwise provided in § 181.22(d)(2), an importer shall not be required to have a Certificate of Origin in his possession for a commercial importation for which the total value of originating goods does not exceed US$2,500, provided that, unless waived by the Center director (rather than the port director), the producer, exporter, importer or authorized agent includes on, or attaches to, the invoice or other document accompanying the shipment the signed statement as noted in § 181.22(d)(1)(iii).

Section 181.22(d)(2) is amended to provide that if the Center director, rather than the port director, determines that an importation described in § 181.22(d)(1) forms part of a series of importations that may reasonably be considered to have been undertaken or arranged for the purpose of avoiding a certification requirement set forth in part 181 (19 CFR part 181), the Center director, rather than the port director, shall notify the importer in writing that for that importation the importer must have in his possession a valid Certificate of Origin to support the claim for preferential tariff treatment.

Section 181.23(a) is amended to note that if the importer fails to comply with any requirement under part 181 (19 CFR part 181), including submission of a Certificate of Origin under § 181.22(b) or submission of a corrected Certificate under § 181.22(c), the Center director, rather than the port director, may deny preferential tariff treatment to the imported good.

Section 181.23(b) is amended to provide that where the requirements for preferential tariff treatment set forth elsewhere in part 181 (19 CFR part 181) are met, the Center director, rather than the port director, nevertheless may deny preferential tariff treatment to an originating good if the good is shipped through or transshipped in a country other than the United States, Canada or Mexico and the importer of the good does not provide, at the request of the Center director, copies of the customs control documents that indicate to the satisfaction of the Center director that the good remained under customs control while in such other country.

Section 181.32(a) is amended to require that a post-importation claim for a refund under § 181.31 be filed with

CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the means of submission currently permitted may be used; however, the authority to receive the post-importation claim for a refund is being extended to personnel working for either the port director or the Center director.

Section 181.33(a) is amended to provide that after receipt of a post-importation claim under § 181.32, the Center director, rather than the port director, shall determine whether the entry covering the good has been liquidated and, if liquidation has taken place, whether the liquidation has become final.

Section 181.33(b) is amended to provide that if the Center director, rather than the port director, determines that any protest or any petition or request for reliquidation relating to the good has not been finally decided, the Center director, rather than the port director, shall suspend action on the claim filed under this subpart until the decision on the protest, petition or request becomes final. If a summons involving the tariff classification or dutiability of the good is filed in the Court of International Trade, the Center director, rather than the port director, shall suspend action on the claim filed under this subpart until judicial review has been completed.

Section 181.33(c)(1) is amended to provide that if the Center director, rather than the port director, determines that a claim for a refund filed under this subpart should be allowed and the entry covering the good has not been liquidated, the Center director, rather than the port director, shall take into account the claim for refund under this subpart in connection with the liquidation of the entry.

Section 181.33(c)(2) is amended to provide that if the Center director, rather than the port director, determines that a claim for a refund filed under subpart D of part 181 (19 CFR part 181, subpart D) should be allowed and the entry covering the good has been liquidated, whether or not the liquidation has become final, the entry must be reliquidated in order to effect a refund of duties pursuant to this subpart. If the entry is otherwise to be reliquidated based on administrative review of a protest or petition for reliquidation or as a result of judicial review, the Center director, rather than the port director, shall reliquidate the entry taking into account the claim for refund under this subpart.

Section 181.33(c)(3) is amended to provide that if any information is provided to Customs pursuant to § 181.32(b)(4) or (5) of part 181 (19 CFR part 181), that information, together with notice of the allowance of the claim and the amount of duty refunded pursuant to this subpart, shall be provided by the Center director, rather than the port director, to the customs administration of the country from which the good was exported.

Section 181.33(d)(1) is amended to provide that the Center director, rather than the port director, may deny a claim for a refund filed under this subpart if the claim was not filed timely, if the importer has not complied with the requirements of this subpart, if the Certificate of Origin submitted under § 181.32(b)(3) of part 181 (19 CFR part 181) cannot be accepted as valid (see § 181.22(c)), or if, following initiation of an origin verification under § 181.72(a), the Center director, rather than the port director, determines either that the imported good did not qualify as an originating good at the time of importation or that a basis exists upon which preferential tariff treatment may be denied under § 181.72(d), § 181.74(c) or § 181.76(c).

Section 181.33(d)(2) is amended to provide that if the Center director, rather than the port director, determines that a claim for a refund filed under this subpart should be denied and the entry covering the good has not been liquidated, the Center director, rather than the port director, shall deny the claim in connection with the liquidation of the entry, and written notice of the denial and the reason therefor shall be given to the importer and, in the case of a denial on the merits, to any person who completed and signed a Certificate of Origin relating to the good.

Section 181.33(d)(3) is amended to provide that if the Center director, rather than the port director, determines that a claim for a refund filed under subpart D of part 181 (19 CFR part 181, subpart D) should be denied and the entry covering the good has been liquidated, whether or not the liquidation has become final, the claim may be denied without reliquidation of the entry. If the entry is otherwise to be reliquidated based on administrative review of a protest or petition for reliquidation or as a result of judicial review, such reliquidation may include denial of the claim filed under this subpart. In either case, the Center director, rather than the port director, shall give written notice of the denial and the reason therefor to the importer and, in the case of a denial on the merits, to any person who completed and signed a Certificate of Origin relating to the good.

Section 181.64(c)(2) is amended to provide that Center director, rather than the port director, may require such additional documentation as is deemed necessary to prove actual exportation of the goods from the United States for repairs or alterations, such as a foreign customs entry, a foreign customs invoice, a foreign landing certificate, bill of lading, or airway bill.

Section 181.64(c)(3) is amended to provide that if the Center director, rather than the port director, is satisfied, because of the nature of the goods or production of other evidence, that the goods are imported under circumstances meeting the requirements of § 181.64, he may waive submission of the declarations provided for in § 181.64(c)(1).

Section 181.64(c)(4) is amended to provide that for goods returned after having been repaired or altered in Canada other than pursuant to a warranty, the Center director, rather than the port director, shall require a deposit of estimated duties based upon the full cost or value of the repairs or alterations. The paragraph is also amended to provide that the duties must be deposited with CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the means of submission currently permitted may be used; however, the authority to collect the duties is being extended to personnel working for either the port director or the Center director.

Section 181.112(a) is amended to provide that the term ''*Adverse marking decision*'' means a decision made by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, which an exporter or producer of merchandise believes to be contrary to the provisions of Annex 311 of the NAFTA and which may be protested by the importer pursuant to § 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), and part 174 of this chapter. The paragraph is also amended to provide that examples of adverse marking decisions include determinations by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017: that an imported article is not a good of a NAFTA country, as determined under the Marking Rules, and that it therefore cannot be marked ''Canada'' or ''Mexico''; that a good of a NAFTA country is not marked in a manner which is sufficiently permanent; and that a good of a NAFTA country does not qualify for an exception from marking specified in Annex 311 of the NAFTA. The Center

director is included for the dates prior to the effective date of this document because under the Center test this provision was waived to the extent to allow adverse marking decisions for the test participants to be made by the Center director. Moreover, before the effective date of this document, the Center director may have made adverse marking decisions pursuant to the Delegation Order (described in section I.B. of the Background section of this document). However, on and after the effective date of this document, any adverse marking decisions concerning this provision will be handled by the Center director, rather than by the port director.

Section 181.113(a) is amended to provide that the exporter or producer of the merchandise which is the subject of an adverse marking decision may request a statement concerning the basis for the decision by filing a typewritten request, in English, with CBP, either at the port of entry or electronically. The language ''CBP, either at the port of entry or electronically'' here means that the means of submission currently permitted may be used; however, the authority to receive the petition is being extended to personnel working for either the port director or the Center director and the request may be submitted electronically.

Section 181.114(a) is amended to provide that the Center director, rather than the port director, will issue a written response to the requestor within 30 days of receipt of a request containing the information specified in § 181.113. If the request is incomplete, such that the transaction in question cannot be identified, the Center director, rather than the port director, will notify the requestor in writing within 30 days of receipt of the request regarding what information is needed.

Section 181.114(b) is amended to reflect that the Center director, rather than the port director, will be providing the response noted in § 181.114(a).

Section 181.115(b) is amended by removing the words ''port director with whom the protest was filed'' and adding in their place the words ''Center director'' to reflect that if an exporter or producer of merchandise want to intervene in an importer's protest of an adverse marking decision, the party must file their intervention with the Center director.

Section 181.115(e) is amended to provide that if final administrative action has already been taken with respect to the importer's protest at the time the intervention is filed, the Center director, rather than the port director, shall so advise the exporter or producer and, if the importer has filed a civil action in the Court of International Trade as a result of a denial of the protest, the Center director, rather than the port director, shall advise the exporter or producer of that filing and of the exporter's or producer's right to seek to intervene in such judicial proceeding. If final administrative action has not been taken on the protest, the Center director, rather than the port director, shall forward the intervention letter to the CBP office which has the importer's protest under review for consideration in connection with the protest.

Section 181.116(a) is amended to provide that if the importer filed a protest on which final administrative action has not been taken and notice of the pending protest was not provided to the exporter or producer under § 181.114, a petition filed under § 181.116 shall be treated by the Center director, rather than the port director, as an intervention under § 181.115.

Section 181.116(b) is amended to provide that a petition under § 181.115 shall be typewritten, in English, and shall be filed, in triplicate, with the port of entry or filed electronically with CBP.

Section 181.116(d)(1) is amended to provide that within 60 days of the date of receipt of the petition, the Center director, rather than the port director, shall determine if the petition is to be granted or denied, in whole or in part. The paragraph is also amended to provide that if, after reviewing the petition, the Center director, rather than the port director, agrees with all of the petitioner's claims and determines that the initial adverse marking decision was not correct, a written notice granting the petition shall be issued to the petitioner. The paragraph is also amended to provide that a description of the merchandise, a brief summary of the issue(s) and the Center director's findings shall be forwarded to the Director, Tariff Classification Appeals Division, Customs Headquarters, for publication in the Customs Bulletin. The paragraph is further amended to provide that if, after reviewing the petition, the Center director, rather than the port director, determines that the initial adverse marking decision was correct in its entirety, a written notice shall be issued to the petitioner advising that the matter has been forwarded to the Director, Tariff Classification Appeals Division, Customs Headquarters, for further review and decision. Finally, the paragraph is amended to provide that all relevant background information, including available samples, a description of the adverse marking decision and the reasons for the decision, and the Center director's recommendation shall be furnished to Headquarters.

Section 181.121 is amended by removing the words ''port director or other Customs officer'' and adding in their place the words ''port director, Center director, or other CBP officer'' to specify that Center directors, in addition to port directors and other CBP officers who have possession of confidential business information collected pursuant to part 181 (19 CFR part 181) shall, in accordance with part 103 (19 CFR part 103), maintain its confidentiality and protect it from any disclosure that could prejudice the competitive position of the persons providing the information.

IV. Statutory and Regulatory Requirements

A. Executive Order 13563 (Improving Regulation and Regulatory Review) and Executive Order 12866 (Regulatory Planning and Review)

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

1. Purpose of the Rule

Prior to the launch of the Centers test, CBP port directors overseeing imports were solely responsible for facilitating lawful importation; protecting U.S. revenue by assessing and collecting customs duties, taxes and fees; and detecting, interdicting, and investigating illegal international trafficking in arms, munitions, counterfeit goods, currency, and acts of terrorism at their U.S. port of entry. Historically, when a shipment reached the United States, the importer of record (*i.e.,* the owner, purchaser, or licensed customs broker designated by the owner, purchaser, or consignee) would file entry documents and a bond for the imported goods with the director of the port where the merchandise was entered. If necessary, CBP staff working under the port director would then hold or examine the shipment or validate the entry documents to ensure the

merchandise's safety, security, and customs compliance with U.S. importing guidelines, or its general admissibility. The port director would release the shipment from CBP custody if no legal or regulatory violations occurred, allowing post-cargo release (hereafter, post-release) processing to commence. Within 10 working days of the merchandise's entry at a designated customhouse, CBP would require the importer to file entry summary documentation consisting of a return of the entry package to the importer, broker, or his authorized agent after merchandise is permitted release and an entry summary (CBP Form 7501), and to deposit any estimated duties on the shipment. In some cases, CBP would send a formal request for other invoices and documents (via a CBP Form 28: Request for Information) to the importer to assess duties, collect statistics, or determine that import requirements have been satisfied prior to processing the entry summary. Before completing the importation process, CBP Import Specialists and Entry Specialists working under the port director would review and process all entry summary and related documentation; classify and appraise the merchandise; collect final duties, taxes, and fees on the goods entered; and liquidate entry summaries. If necessary, these CBP trade personnel would also review and process protests, perform importer interviews, initiate monetary trade penalties, and initiate liquidated damages cases. Due to CBP's port-by-port trade processing authority and scope, the length, holds, exams, document submission requirements, and determinations of cargo entry and release vary widely among ports of entry. Importers often claim to receive disparate processing treatment for similar goods entered at different ports of entry, causing trade disruptions, increased transaction costs, and information lapses for not only the importer but also CBP. With an intent to facilitate trade, provide consistent import processing treatment, reduce transaction costs, and strengthen the agency's trade knowledge and enforcement posture, CBP began testing an organizational concept in 2011 that grouped agency trade expertise and operational responsibilities by industry and related import accounts into designated Centers of Excellence and Expertise.

Since their test implementation, the Centers have successfully met their trade enhancement goals. Based on such success, CBP would like to discontinue the Centers test and establish the Centers as permanent organizational components of CBP through regulatory amendments.

With this rule, CBP will formally transition certain trade enforcement responsibilities in addition to the majority of post-release trade functions from the purview of port directors to Center directors.[1] Port directors will continue to retain singular authority over regulations pertaining to the control, movement, examination, and release of cargo. The Centers will focus on nationwide entry summary processing and other trade oversight on a per-importer account basis through a virtual means, which will replace traditional post-release import processing *per* entry at *each* port of entry with processing by a single assigned Center according to the importer account. To conduct such national, industry-focused processing, CBP will permanently staff the Centers with personnel specializing in trade matters through an internal realignment, which will impose no costs onto CBP. All Centers personnel will remain at their current location, primarily at ports of entry, to stay accessible to the trade community and to continue to assist with enforcement and compliance issues that arise at ports of entry with the physical importation of cargo. CBP will remotely manage employees through multidisciplinary teams located across the nation, thereby enabling CBP to extend the Centers' hours of service to trade members, maintain a high level of industry expertise in major port cities, and staff Centers with industry experts from across the country.

2. Costs and Benefits of Rule

In this regulatory impact analysis, CBP discusses the costs and benefits that CBP and trade members will experience with the regulatory implementation of the Centers of Excellence and Expertise in qualitative and, when possible, quantitative terms. CBP excludes any sunk costs already incurred during the Centers test phase from this assessment as such costs are not a result of this rule. The document ''Program Assessment of the Centers of Excellence and Expertise,'' available in the docket for this rulemaking, assesses certain impacts of the Centers test phase.

a. Costs

This rule will introduce minimal costs to CBP and the trade community because it largely meets its objectives through low- to no-cost internal organization changes. The transition of post-release import processing and trade-related responsibilities from ports of entry to Centers will not affect the duties, taxes, and fees payment and entry summary submission process for importers, nor will it adversely impact other post-release activities (*e.g.,* processing duty refund claims, reviewing protests). Even with the Centers, importers may continue to file payments and paper entry summary documentation to CBP either at the port of entry or electronically. All payments from the trade community, whether submitted to a Center, at a port of entry, or electronically, will continue to go directly to CBP's Office of Administration. If trade enforcement or post-release processing issues emerge, CBP will maintain its formal importer notification and remedy process. Upholding these administrative processes will generate no related costs to the agency. CBP will only experience costs from this rule with regards to entry summary document rerouting and Center assignment appeals.

Following this rule's implementation, if an importer or broker submits paper entry summary documentation at a port of entry without an appropriate Center representative on site, CBP staff at the port will reroute the documents internally by electronic means to the Center assigned to manage the importer's account. This electronic rerouting system will not introduce costs to CBP because the agency created such necessary technological capabilities during the Centers test phase. However, document rerouting will create time, or opportunity, costs. CBP estimates that it will need to reroute 9,000 entry summary documents each year based on historical paper documentation rerouting needs and an anticipated lack of physical Center representation at certain ports of entry.[2] This estimate does not take into account CBP system enhancements recently completed and in development that would minimize document rerouting costs. Each document will take a CBP port employee an average of 8 minutes (0.13 hours) to reroute electronically to the appropriate Center.[3] Multiplying this time burden by the projected number of forms rerouted per year, CBP finds that CBP will incur an annual time burden of 1,200 hours to reroute paper documentation for post-release processing.

[1] *See* the ''Explanation of Amendments'' section for a detailed list of trade function transitions occurring with this rule.

[2] Source: CBP's Office of Field Operations, January 15, 2015.

[3] Source: CBP's Office of Field Operations, January 15, 2015.

In addition to sustaining document rerouting costs on account of the Centers, CBP will experience costs from processing (*i.e.,* reviewing and making a determination on) Center assignment appeals. Generally, CBP will assign each importer to a specific Center based on the HTSUS classification and industry sector corresponding to the predominant number of goods they import.[4] If an importer is displeased with their Center assignment, they may appeal it at any time by submitting a written appeal to CBP by mail or email. Appeals must include the following information: (1) Current Center assignment; (2) Preferred Center assignment; (3) All affected IOR numbers and associated bond numbers; (4) Written justification for the change in Center assignment; and (5) Import data, as described in the ''Finalization of the Centers of Excellence and Expertise Test'' section. CBP projects that importers will file a total of 60 Center assignment appeals each year.[5] Each appeal will take an estimated 60 minutes (1 hour), on average, for CBP Headquarters staff to process.[6] CBP will generally notify trade members of its Center appeal decisions by electronic means, thus imposing no additional cost to the agency.[7] Based on the expected number of Center appeals submitted annually and CBP's time burden to manage each appeal, CBP will sustain a yearly time burden of 60 hours from this rule's Center assignment appeals process.

As outlined throughout this rule, the responsibilities of the trade community will remain largely unchanged after the Centers' regulatory implementation. Importers may continue to file pre- and post-cargo release documentation and payments where their merchandise is entered. CBP personnel, who may work for either a Center director or a port director will accept all paper import documents from trade members. When necessary, CBP will internally route documentation to the appropriate Center for review and processing. Importers and brokers who file electronically will continue to use CBP's automated systems, such as ABI, to submit required import data and payments to CBP. Meanwhile, CBP will maintain a consistent formal notification and remedy process with importers regarding post-release and other trade-related issues following the Centers' establishment. Trade members will only incur costs from this rule when appealing a Center assignment.

Importers may choose to appeal their Center assignment for a number of reasons, including the expectation of better service or product knowledge at another Center. As previously discussed, if an importer chooses to appeal their Center assignment, they must submit a written appeal to CBP by mail or email that includes information about their current and preferred Center assignments (see ''Finalization of the Centers of Excellence and Expertise Test'' for specific appeal requirements). CBP estimates that each appeal will take 60 minutes (1 hour) for an importer to complete,[8] at an opportunity cost of $30.05 based on an importer's $30.05 hourly value of time.[9] [10] Due to the relative affordability of submitting a Center assignment appeal via email rather than mail, CBP believes that the vast majority of importers will file appeals electronically. Therefore, CBP does not consider the printing or mailing costs for an importer to submit a Center assignment appeal in this analysis. By applying the cost for importers to complete and submit a Center assignment appeal to the previously mentioned expected number of Center assignment appeals filed annually, CBP finds that this rule's appeals process will generate $1,803 in yearly costs to the trade community.

Certain trade members, particularly Customs-accredited laboratories and Customs-approved gaugers, may incur added costs with this rule's amendments to their obligations outlined in 19 CFR 151.12(c)(5)-(6) and 19 CFR 151.13(b)(5)-(6). As amended, CBP will require Customs-accredited laboratories to notify an additional CBP representative, the Center director, of ''any circumstance which might affect the accuracy of work performed as an accredited laboratory, . . . their consequences, and any corrective action taken or that needs to be taken'' and ''. . . of any attempt to impede, influence, or coerce laboratory personnel in the performance of their duties, or of any decision to terminate laboratory operations or accredited status.'' [11] Similarly, CBP will require Customs-approved gaugers to notify an additional CBP representative, the Center director, of ''any circumstance which might affect the accuracy of work performed as an approved gauger, . . . their consequences, and any corrective action taken or that needs to be taken'' and ''. . . of any attempt to impede, influence, or coerce gauger personnel in the performance of their duties, or of any decision to terminate gauger operations or approval status.'' [12] Under current regulations, CBP mandates Customs-accredited laboratories and Customs-approved gaugers to contact the port director and Executive Director on these matters described. Given that CBP has not received any notifications currently required under 19 CFR

[4] The list of HTSUS numbers that will be used by CBP for the importer's placement in a Center is the same list of HTSUS numbers that are referenced in the definition for Centers (*see* § 101.1). Factors that may cause CBP to place an importer in a Center not based on the HTSUS classification of the predominant number of goods imported include the importer's associated business practices within an industry, the intended use of the predominant number of goods imported, or the high relative value of goods imported.

[9] CBP bases the $30.05 wage rate on the Bureau of Labor Statistics' (BLS) 2014 median hourly wage rate for Cargo and Freight Agents ($19.89), which CBP assumes best represents the wage for importers, multiplied by the ratio of BLS' average 2014 total compensation to wages and salaries for Office and Administrative Support occupations (1.4813), the assumed occupational group for importers. CBP then rounded and adjusted this figure, which was in 2014 U.S. dollars, to 2016 U.S. dollars using a 1.0 percent annual growth rate, as recommended by the U.S. Department of Transportation's value of travel time guidance. Source of median wage rate: U.S. Bureau of Labor Statistics. Occupational Employment Statistics, ''May 2014 National Occupational Employment and Wage Estimates, United States- Median Hourly Wage by Occupation Code: Occupation Code 43–5011.'' Updated March 25, 2015. Available at *http://www.bls.gov/oes/2014/may/oes435011.htm.* Accessed June 15, 2015. [10] The opportunity cost estimate is equal to the median hourly wage of an importer ($30.05) multiplied by the hourly time burden for an importer to complete and submit a Center assignment appeal (1 hour), and then rounded.

[11] *See* 19 CFR 151.12(c)(5) and 151.12(c)(6).

[12] *See* 19 CFR 151.13(b)(5) and 151.13(b)(6).

151.12(c)(5)–(6) and 19 CFR 151.13(b)(5)–(6) in the past 20 years, CBP assumes in this analysis that the Centers rule's additional CBP notification step for Customs-accredited laboratories and Customs-approved gaugers will not introduce any costs to these parties.[13]

In all, the Centers rule will introduce a time burden of 1,260 hours to CBP each year and an annual cost of $1,803 to trade members.

b. Benefits

This rule will likely produce valuable benefits to CBP and the trade community. This section of the analysis largely discusses the benefits of the rule qualitatively due to quantitative data limitations. Based on the success of the Centers test, CBP believes that as permanent organizational components, the Centers will continue to provide uniform post-release processing and trade-related decision-making, strengthen critical agency knowledge of industry practices and products, heighten CBP's trade enforcement skills, and improve trade communication, though on a much grander scale than observed during the test phase because of the expansion of the Centers concept to all importers.

The Centers allow CBP to conduct uniform entry summary processing and trade-related decision-making nationwide on an industry-specific, importer account basis by transitioning the post-release processing of an importer's goods from a transactional level at each port of entry to one assigned Center. Such organization has already benefited at least one Center test participant, who claims that they have gained numerous administrative efficiencies since joining the Center, including time and cost savings from reduced paperwork submission requirements.[14] Once established as permanent CBP components, the Centers will presumably require fewer information requests and conduct better informed trade compliance actions than in the current environment, leading to time and cost savings to CBP and trade members. Currently, when a non-Center test participating importer enters similar merchandise at different U.S. ports of entry that requires supplemental information for entry summary processing, CBP personnel at each port of entry will generally submit a CBP Form 28: Request for Information to the importer. In this case, the importer must respond to each request, even if the responses are identical, and CBP personnel at each port of entry must review the duplicative information received from the importer. With the Centers, the importer will receive only one CBP Form 28 for the merchandise's entry summary processing, requiring CBP personnel to review the importer's supplemental information only once. For each avoidance of a CBP Form 28, CBP will save 10 minutes (0.17 hours) of time in issuing the request and reviewing the requested information.[15] Importers can expect to save an estimated 120 minutes (2 hours) in preparation time for each avoided CBP Form 28 response[16] and $60.10 in averted opportunity costs.[17] CBP and some importers may experience additional printing and mailing cost savings through reduced CBP Form 28 submissions, though the extent of these savings is unknown.

With a single Center conducting all post-release processing for a particular importer, determinations on protests, marking, and classification matters will also now be consistent rather than sometimes contrasting as in the current environment, where importers occasionally receive different determinations on similar trade compliance issues depending on the port of entry where their merchandise is processed that sometimes requires duplicative action on behalf of CBP and the importer. This consistency may enhance importers' awareness of CBP's positions on trade compliance issues, which may lead to improved compliance and an unknown amount of subsequent savings to both parties in the future. To the extent that this rule's uniform processing and determinations also decrease post-entry amendments, post-summary corrections, exams, hold times, and other trade obstacles, the benefits of this rule will be higher.

In addition to creating uniform post-release processing and determinations, the Centers will strengthen CBP trade personnel's industry knowledge by concentrating their expertise into a specific import industry set as opposed to the entire range of import industries. According to outreach conducted while evaluating this rule, such focused expertise has already enriched CBP-Trade relations, as demonstrated through a Centers test participant's claim that Center account managers are very knowledgeable of their industry and are now more familiar with their imports and trade issues.[18] As Centers staff increase their awareness of importers and their merchandise, they may issue fewer requests for information, exams, or holds, which would provide significant time and cost savings to CBP and trade members. The Centers' industry focus has also enriched trade enforcement. Using knowledge gathered through processing solely entry summaries for the electronics industry, Electronics Center employees uncovered a counterfeit electronic adapter import operation. Since discovering the counterfeiting operation, the Electronics Center has worked with the rights holder to add a trademark onto their electronic device to prevent future intellectual property rights (IPR) violations and subsequent economic losses.[19] Based on the benefits of enhanced industry knowledge gained during the Centers test phase, the permanent establishment of the Centers will likely enhance CBP-Trade relations, facilitate trade, and result in an improved ability to identify high-risk commercial importations that could enhance import safety, increase revenue protection, and reduce economic losses associated with trade violations.

Furthermore, the Centers will improve communication among CBP and the entire U.S. importing universe by replacing communication with each port of entry with communication with one Center. The Centers will serve as a single source for trade members to contact regarding such subjects as importing requirements, IPR infringement or other trade violations, merchandise holds, and PGA issues, eliminating the need for trade members to contact multiple CBP employees and for multiple CBP employees to share duplicative information with members of the trade. Such a decrease in redundant information requests and

[19] Source: Teleconference with CBP's Electronics Center test on December 3, 2013.

sharing will produce time and cost savings to the trade community and CBP. The Centers will also allow for enhanced communication with importers by offering extended hours of service compared to port of entry service hours, which may expedite trade. Without information on the amount of duplicative communication eliminated with the emergence of the Centers or the volume of trade expedited through the Centers' extended hours of service, the overall value of these communication benefits is unknown.

c. Net Impact of Rule

In summary, this rule's formal establishment of the Centers of Excellence and Expertise will introduce costs and benefits. CBP will sustain 1,260 added work hours each year from rerouting paper documentation and reviewing Center assignment appeals, while trade members will bear an annual cost of $1,803 attributable to Center assignment appeals. CBP and trade members will also experience benefits from this rule's decreased import costs and time burdens, streamlined trade processing, broadened industry and trade compliance knowledge, enhanced trade enforcement posture, and improved communication, though the overall value of these benefits is unknown. Although not fully quantified, CBP believes this rule's benefits to CBP and the trade community will be considerable, while its costs to these parties will be relatively negligible. For these reasons, CBP asserts that the benefits of this rule will outweigh its costs, thus providing an overall net benefit to the agency and members of the trade community.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires agencies to assess the impact of regulations on small entities. A small entity may be a small business (defined as any independently owned and operated business not dominant in its field that qualifies as a small business concern per the Small Business Act); a small not-for-profit organization; or a small governmental jurisdiction (locality with fewer than 50,000 people). CBP is issuing this rule as an interim final rule under the agency management and personnel and procedural rule exceptions of the Administrative Procedure Act. Thus, a Regulatory Flexibility Act analysis is not required. *See* 5 U.S.C. 553. Nonetheless, CBP considered the economic impact of this rule on small entities.

Through this rule, CBP will formally transition certain trade enforcement responsibilities in addition to the majority of post-release trade functions from the purview of port directors to Center directors.[20] Port directors will continue to retain singular authority over regulations pertaining to the control, movement, examination, and release of cargo. Because the Centers will introduce a new post-release processing method for all U.S. imports, this rule's regulatory changes will affect all importers and related members of the trade who enter goods into the United States, including those considered ''small'' under the Small Business Administration's (SBA) size standards.[21] For this reason, CBP believes that this rule will impact a substantial number of small entities.

This rule will generate costs and benefits to importers and related members of the trade. As outlined throughout this rule, the responsibilities of the trade community remain largely unchanged after the Centers' regulatory implementation. However, trade members may experience costs when filing a Center assignment appeal and when notifying a Center under amended 19 CFR 151.12(c)(5)–(6) and 19 CFR 151.13(b)(5)–(6) requirements.

As previously mentioned in the ''Executive Order 13563 (Improving Regulation and Regulatory Review) and Executive Order 12866 (Regulatory Planning and Review)'' section, importers will incur an opportunity cost of $30.05 per Center assignment appeal. With 60 appeals expected each year, the annual cost of Center assignment appeals to the entire trade community will equal $1,803. It is likely that some small entities will file Center assignment appeals, though the exact number is unknown. Regardless of the number of small entities impacted by this requirement, CBP does not believe that a cost of $30.05 to file a Center assignment appeal will amount to a ''significant'' level to these entities.

Under current regulations, CBP mandates Customs-accredited laboratories and Customs-approved gaugers to contact the port director and Executive Director on the matters described in 19 CFR 151.12(c)(5)–(6) and 19 CFR 151.13(b)(5)–(6). Given that CBP has not received any such notifications in the past 20 years, CBP assumes that this rule's added requirement to contact a Center director per 19 CFR 151.12(c)(5)–(6) and 19 CFR 151.13(b)(5)–(6)'s amendments will not impact a substantial number of small entities. In the event that a Customs-accredited laboratory or Customs-approved gauger considered ''small'' has to notify an additional CBP representative according to these regulatory changes, CBP does not believe that requiring one more phone call, letter, or email will cause a significant economic impact to the entity.

Besides costs, importers and related members of the trade will experience benefits from this rule, though the value of these benefits is unknown due to data limitations. The trade community will likely benefit from this rule's uniform post-release processing and decision-making, increased agency knowledge of industry practices and products, and improved communication with CBP, based on observations from the Centers test. CBP expects the Centers' uniform post-release processing and trade-related determinations to decrease administrative burdens on the trade, resulting in time and cost savings. This uniformity may also enhance the trade community's awareness of CBP's position on trade compliance issues, which may improve compliance and generate an unknown amount of subsequent savings to trade members in the future. The Centers' strengthened industry focus will likely enhance CBP-Trade relations, facilitate trade, and result in an improved ability to identify high-risk commercial importations that could increase import safety, increase revenue protection, and reduce economic loss associated with trade violations. By replacing port-by-port communication with communication with one Center, the Centers will serve as a single source for trade members to contact regarding such subjects as importing requirements, IPR or other trade violation reports, merchandise holds, and PGA issues. This sole communication source will eliminate the need for trade members to contact multiple CBP resources, which will likely produce additional time and cost savings. The Centers will also allow for enhanced communication between CBP and the trade community by offering extended hours of service compared to port of entry service hours, which may expedite trade. Despite their unknown value, CBP notes that the economic impact of these changes on small entities, if any, will be entirely beneficial.

Although CBP presumes that this rule will affect a substantial number of small entities, CBP does not believe that the

[20] *See* the ''Explanation of Amendments'' section for a detailed list of trade function transitions occurring with this rule.

[21] *See* 13 CFR 121.101–13 CFR 121.201.

economic impact of this rule on small entities will be significant. Accordingly, CBP believes that this regulation will not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that CBP consider the impact of paperwork and other information collection burdens imposed on the public. As this document does not involve any collections of information under the Act, the provisions of the Act are inapplicable.

V. Administrative Procedure Act

The Administrative Procedure Act (APA) requires agencies to provide advance public notice and seek public comment on substantive regulations. *See* 5 U.S.C. 553. The APA, however, provides several exceptions to these requirements.

Pursuant to 5 U.S.C. 553(a)(2), public notice and the opportunity to provide public comment are inapplicable to matters relating to ''agency management or personnel.'' This interim final rule relates to agency management and personnel because it involves the transitioning of certain work functions from the port directors and the port director personnel to the Center directors and the Center director personnel.

Pursuant to 5 U.S.C. 553(b)(A), rules of ''agency organization, procedure, and practice'' are also exempted from the notice-and-comment requirements of the APA. This interim final rule permanently creates the Centers, which have been operating under a test period that began in 2012 and have been implemented through **Federal Register** Notices and a CBP Delegation Order. Through this interim final rule, CBP is ending the test period and establishing the Centers as a permanent organizational component of the agency.

Finally, 5 U.S.C. 553(b)(B) of the APA authorizes CBP to dispense with notice and comment requirements when CBP for good cause finds that notice and comment is ''impracticable, unnecessary, or contrary to the public interest.'' CBP has been operating the Centers as a test for several years pursuant to 19 CFR 101.9(a), which authorizes CBP to conduct test programs or procedures to evaluate the effectiveness of certain operational procedures. The Centers have been staffed with CBP employees who facilitate trade by providing account management for members in the identified industries; engaging in risk segmentation; and strengthening trade outreach. This interim final rule codifies CBP personnel adjustments and internal agency procedures that reflect a realignment of certain trade functions within CBP, rather than a substantive change in policy. Therefore, advance notice and comment is unnecessary.

VI. Signing Authority

This document is being issued in accordance with 19 CFR 0.2(a), which provides that the authority of the Secretary of the Treasury with respect to CBP regulations that are not related to customs revenue functions was transferred to the Secretary of Homeland Security pursuant to section 403(1) of the Homeland Security Act of 2002. Accordingly, this interim final rule to amend such regulations may be signed by the Secretary of Homeland Security (or his delegate).

List of Subjects

19 CFR Part 4

Customs duties and inspection, Exports, Freight, Harbors, Maritime carriers, Oil pollution, Reporting and recordkeeping requirements, Vessels.

Amendments to the Regulations

■ For the reasons given above and under the authority of 19 U.S.C. 2, 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), and 1624, CBP amends parts 4, 7, 10, 11, 12, 24, 54, 101, 102, 103, 113, 132, 133, 134, 141, 142, 143, 144, 145, 146, 147, 151, 152, 158, 159, 161, 162, 163, 173, 174, 176, and 181 of the CBP regulations (19 CFR Parts 4, 7, 10, 11, 12, 24, 54, 101, 102, 103, 113, 132, 133, 134, 141, 142, 143, 144, 145, 146, 147, 151, 152, 158, 159, 161, 162, 163, 173, 174, 176, and 181) as set forth below: Also, for the reasons given above and under the authority of 19 U.S.C. 2, 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), and 1624, those parts of Chapter I of the CBP regulations (chapter I) listed below are amended as set forth below:

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

■ 1. The general authority citation for part 4 and the specific authority citation for section 4.94a continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1431, 1433, 1434, 1624, 2071 note; 46 U.S.C. 501, 60105.

* * * * *

Section 4.94a also issued under 19 U.S.C. 1484b;

* * * * *

■ 2. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
4.94a(d)	appropriate port director	Center director.

PART 7—CUSTOMS RELATIONS WITH INSULAR POSSESSIONS AND GUANTANAMO BAY NAVAL STATION

■ 3. The authority citation for part 7 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1623, 1624; 48 U.S.C. 1406i.

■ 4. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
7.3(e)(1)(iii)(B)	port director	Center director.
7.3(e)(2)	port director	Center director.
7.3(f)(1)	port director	Center director.
7.3(f)(2)	port director	Center director.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

■ 5. The general authority citation for part 10 and the specific authority citations for §§ 10.804, 10.864, 10.866, 10.906, 10.1006, and 10.3006 continue to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States (HTSUS)), 1321, 1481, 1484, 1498, 1508, 1623, 1624, 3314.

* * * * *

Sections 10.801 through 10.829 also issued under 19 U.S.C. 1202 (General Note 30, HTSUS) and Pub. L. 109–169, 119 Stat. 3581 (19 U.S.C. 3805 note).

* * * * *

Sections 10.861 through 10.890 also issued under 19 U.S.C. 1202 (General Note 31, HTSUS) and Pub. L. 109–283, 120 Stat. 1191 (19 U.S.C. 3805 note).

* * * * *

Sections 10.901 through 10.934 also issued under 19 U.S.C. 1202 (General Note 32, HTSUS), 19 U.S.C. 1520(d), and Pub. L. 110–138, 121 Stat. 1455 (19 U.S.C. 3805 note).

■ 7. Section 10.40(b) is revised to read as follows:

§ 10.40 Refund of cash deposits.

* * * * *

(b) If any article entered under Chapter 98, subchapter XIII, Harmonized Tariff Schedule of the United States, is not exported or destroyed within the period of time during which articles may remain in the

customs territory of the United States under bond (including any lawful extension), the Center director shall notify the importer in writing that the entire cash deposit will be transferred to the regular account as liquidated damages unless a written application for relief from the payment of the full liquidated damages is filed with the Center director within 60 days after the date of the notice. If such an application is timely filed, the transfer of the cash deposit to the regular account as liquidated damages shall be deferred pending the decision of the Headquarters, U.S. Customs and Border Protection or, in appropriate cases, the Center director on the application.

§ 10.91 [Amended]

■ 8. Section 10.91(c)(2) is amended by removing the words ''the port director where the entry or withdrawal of the prototype was made'' in the first sentence and adding in their place the words ''CBP, either at the port of entry or electronically'' and by removing the words ''port director'' in the last sentence and adding in their place the words ''Center director''.

§ 10.102 [Amended]

■ 9. Section 10.102(a) is amended by removing the words ''port director'' and adding in their place the words ''Center director'' and by removing the words ''upon the receipt'' and adding in their place the words ''upon the receipt, either at the port of entry or electronically,''.

§ 10.804 [Amended]

■ 10. Section 10.804(a) introductory text is amended by removing the words ''to CBP'' and by removing the words ''port director'' and adding in their place the words ''Center director''.

§ 10.864 [Amended]

■ 11. Section 10.864(a) introductory text is amended by removing the words ''to CBP'' and by removing the words ''port director'' and adding in their place the words ''Center director''.

§ 10.866 [Amended]

■ 12. Section 10.866(b) is amended by removing the words ''port director'' each place that it appears and adding in their place the words ''Center director'' and by removing the words ''to CBP''.

§ 10.906 [Amended]

■ 13. Section 10.906(b) is amended by removing the words ''port director'' each place that it appears and adding in their place the words ''Center director'' and by removing the words ''to CBP''.

§ 10.1006 [Amended]

■ 14. Section 10.1006(b) is amended by removing the words ''port director'' each place that it appears and adding in their place the words ''Center director'' and by removing the words ''to CBP''.

§ 10.3006 [Amended]

■ 15. Section 10.3006(b) is amended by removing the words ''port director'' each place that it appears and adding in their place the words ''Center director'' and by removing the words ''to CBP''.

PART 11—PACKING AND STAMPING; MARKING

■ 16. The authority citation for part 11 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(i) and (j), Harmonized Tariff Schedule of the United States), 1624.

■ 17. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
11.12(b)	port director	Center director.
11.12(c)	port director	Center director.
11.12(d)	port director	Center director.
11.12(e)	port director	Center director.
11.12(f)	port director	Center director.
11.12a(b)	port director	Center director.
11.12a(c)	port director	Center director.
11.12a(d)	port director	Center director.
11.12a(e)	port director	Center director.
11.12a(f)	port director	Center director.
11.12b(b)	port director	Center director.
11.12b(c)	port director	Center director.
11.12b(d)	port director	Center director.
11.12b(e)	port director	Center director.
11.12b(f)	port director	Center director.

PART 12—SPECIAL CLASSES OF MERCHANDISE

■ 18. The general authority citation for part 12 and the specific authority citations for § 12.73 continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States (HTSUS)), 1624.

* * * * *

Sections 12.73 and 12.74 also issued under 19 U.S.C. 1484, 42 U.S.C. 7522, 7601;

* * * * *

■ 19. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
12.26(f)	the port director	an authorized CBP official.
12.39(b)(2)(i)	the port director	CBP.
12.39(b)(3)	Port directors	CBP.
12.39(b)(4)	under bond, port directors	under bond, CBP.
12.39(b)(4)	20436 by port directors	20436.

Section	Remove	Add
12.39(c)(1)(iii)	the port director of the port in which the entry was attempted.	CBP.
12.39(e)(2)	The port director	CBP.
12.121(a)(2)(ii) introductory text	port director	Center director.
12.121(a)(2)(ii)(A)	port director	CBP, either at the port of entry or electronically.
12.121(a)(2)(ii)(B)	port director	Center director.

■ 20. Section 12.73(j) is revised to read as follows:

§ 12.73 Motor vehicle and engine compliance with Federal antipollution emission requirements.

* * * * *

(j) *Release under bond.* If a declaration filed in accordance with paragraph (i)(2) of this section states that the entry is being filed under circumstances described in either paragraph (c)(4), (h)(1), (h)(2), (h)(3) or (h)(4) of this section, the entry shall be accepted only if the importer or consignee gives a bond on Customs Form 301, containing the bond condition set forth in § 113.62 of this chapter for the production of an EPA statement that the vehicle or engine is in conformity with Federal emission requirements. Within the period in paragraph (h)(2), (h)(3) or (c)(4) of this section, or in the case of paragraph (h)(1) or (h)(4) of this section, the period specified by EPA in its authorization for an exemption, or such additional period as the Center director may allow for good cause shown, the importer or consignee shall deliver to CBP, either at the port of entry or electronically, the prescribed statement. If the statement is not delivered to CBP within the specified period, the importer or consignee shall deliver or cause to be delivered to the port director those vehicles which were released under a bond required by this paragraph. In the event that the vehicle or engine is not redelivered within five days following the date specified in the preceding sentence, liquidated damages shall be assessed in the full amount of the bond, if it is a single entry bond, or if a continuous bond is used, the amount that would have been taken under a single entry bond.

* * * * *

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

■ 21. The general authority citation for part 24 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 58a–58c, 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1505, 1520, 1624; 26 U.S.C. 4461, 4462; 31 U.S.C. 3717, 9701; Pub. L. 107–296, 116 Stat. 2135 (6 U.S.C. 1 *et seq.*).

* * * * *

■ 22. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right colum:

Section	Remove	Add
24.1(a)(3)(ii)	the port director	an authorized CBP official.
24.4(a)	director of each port at which he wishes to defer payment.	Center director, either at a port of entry or electronically.
24.4(a)	a port director	the Center director.
24.4(b)	port director	Center director.
24.4(d)(1)	port director	Center director.
24.14(c)	port director's	CBP's.

■ 23. Section 24.1(a)(3)(i) is revised to read as follows:

§ 24.1 Collection of Customs duties, taxes, fees, interest, and other charges.

* * * * *

(a) * * *

(3)(i) An uncertified check drawn by an interested party on a national or state bank or trust company of the United States or a bank in Puerto Rico or any possession of the United States if such checks are acceptable for deposit by a Federal Reserve bank, branch Federal Reserve bank, or other designated depositary shall be accepted if there is on file with CBP a bond to secure the payment of the duties, taxes, fees, interest, or other charges, or if a bond has not been filed, the organization or individual drawing and tendering the uncertified check has been approved by an authorized CBP official to make payment in such manner. In determining whether an uncertified check shall be accepted in the absence of a bond, an authorized CBP official shall use available credit data obtainable without cost to the Government, such as that furnished by banks, local business firms, better business bureaus, or local credit exchanges, sufficient to satisfy him of the credit standing or reliability of the drawer of the check. For purposes of this paragraph, a customs broker who does not have a permit for the district (see the definition of ''district'' at § 111.1 of this chapter) where the entry is filed, is an interested party for the purpose of CBP's acceptance of such broker's own check, provided the broker has on file the necessary power of attorney which is unconditioned geographically for the performance of ministerial acts. CBP may look to the principal (importer) or to the surety should the check be dishonored.

* * * * *

■ 24. Section 24.2 is revised to read as follows:

§ 24.2 Persons authorized to receive Customs collections.

Center directors, port directors, CBP cashiers, CBP officers, CBP dock tellers, and such other officers and employees as the Center director or port director will designate will receive Customs collections.

■ 25. Section 24.4(c) and (i) are revised to read as follows:

§ 24.4 Optional method for payment of estimated import taxes on alcoholic beverages upon entry, or withdrawal from warehouse, for consumption.

* * * * *

(c) *Content of application and supporting documents.* (1) An importer must state his estimate of the largest amount of taxes to be deferred in any semimonthly period based on the largest amount of import taxes on alcoholic

beverages deposited with CBP in such a period during the year preceding his application. He must also identify any existing bond or bonds that he has on file with CBP and shall submit in support of his application the approval of the surety on his bond or bonds to the use of the procedure and to the increase of such bond or bonds to such larger amount or amounts as may be found necessary by the Center director.

(2) Each application must include a declaration in substantially the following language:

I declare that I am not presently barred by CBP from using the deferred payment procedure for payment of estimated taxes upon imports of alcoholic beverages, and that if I am notified by a Center director to such effect I shall advise any future Center director where approval has been given to me to use such procedure.

* * * * *

(i) *Duration of deferred payment privilege.* The deferred payment privilege once approved by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, will remain in effect until terminated under the provisions of paragraph (h) or the importer or surety requests termination.

* * * * *

PART 54—CERTAIN IMPORTATIONS TEMPORARILY FREE OF DUTY

■ 26. The authority citation for part 54 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i); Section XV, Note 5, Harmonized Tariff Schedule of the United States), 1623, 1624.

■ 27. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
54.5(b)	port director	Center director.
54.6(c)(4)	port director	Center director.

§ 54.6 [Amended]

■ 28. Section 54.6(c) introductory text is amended by removing the words ''the director of the port of entry'' and adding in their place the words ''CBP, either at the port of entry or electronically,''.

PART 101—GENERAL PROVISIONS

■ 29. The general authority citation for part 101 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 2, 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1623, 1624, 1646a.

* * * * *

■ 30. In § 101.1:

■ a. Add in alphabetical order, definitions of *Center director, Centers of Excellence and Expertise* or *Centers,* and *Port director.*

■ b. Revise the definitions of *Port* and *port of entry*

The additions and revision read as follows:

§ 101.1 Definitions.

* * * * *

Center director. The term ''Center director'' means the person who manages their designated Center and is responsible for certain trade decisions and functions concerning that Center and the importers that are processed by that Center.

* * * * *

Centers of Excellence and Expertise or *Centers.* The terms ''Centers of Excellence and Expertise'' or ''Centers'' refer to national CBP offices that are responsible for performing certain trade functions and making certain determinations as set forth in particular regulatory provisions regarding importations by importers that are considered by CBP to be in the industry sector, regardless of the ports of entry at which the importations occur. Industry sectors are categorized by the Harmonized Tariff Schedule of the United States (HTSUS) numbers representing an industry sector. The list of HTSUS numbers will be published in a **Federal Register** document and any change made to that list will be announced in a subsequent **Federal Register** document.

* * * * *

Port and *port of entry.* The terms ''port'' and ''port of entry'' refer to any place designated by Executive Order of the President, by order of the Secretary of the Treasury, or by Act of Congress, at which a U.S. Customs and Border Protection (''CBP'') officer is authorized to accept entries of merchandise to collect duties, and to enforce the various provisions of the customs and navigation laws. The terms ''port'' and ''port of entry'' incorporate the geographical area under the jurisdiction of a port director. (The customs ports in the Virgin Islands, although under the jurisdiction of the Secretary of the Treasury, have their own customs laws (48 U.S.C. 1406(i)). These ports, therefore, are outside the customs territory of the United States and the ports thereof are not ''ports of entry'' within the meaning of these regulations).

* * * * *

Port director. The term ''port director'' means the person who has jurisdiction within the geographical boundaries of their port of entry unless the regulations provide that particular trade functions or determinations are exclusively within the purview of a Center Director or other CBP personnel.

* * * * *

■ 31. Add § 101.10 to read as follows:

§ 101.10 Centers of Excellence and Expertise.

(a) *Center Management Offices.* The Centers of Excellence and Expertise (Centers) (see definition in § 101.1) are managed out of the following locations:

Centers of Excellence and Expertise (Centers)	Management offices
Agriculture & Prepared Products.	Miami, Florida.
Apparel, Footwear & Textiles.	San Francisco, California.
Automotive & Aerospace.	Detroit, Michigan.
Base Metals	Chicago, Illinois.
Consumer Products & Mass Merchandising.	Atlanta, Georgia.
Electronics	Long Beach, California.
Industrial & Manufacturing Materials.	Buffalo, New York.
Machinery	Laredo, Texas.
Petroleum, Natural Gas & Minerals.	Houston, Texas.
Pharmaceuticals, Health & Chemicals.	New York, New York.

(b) *Assignment of importers to the Centers.* Generally, each importer will be assigned to an industry-category administered by a specific Center based on the tariff classification in the HTSUS of the predominant number of goods imported. The list of HTSUS numbers that will be used by CBP for the importer's placement in a Center is the same list of HTSUS numbers that are referenced in the definition for Centers

(see § 101.1). Factors that may cause CBP to place an importer in a Center not based on the tariff classification of the predominant number of goods imported include the importer's associated business practices within an industry, the intended use of the predominant number of goods imported, or the high relative value of goods imported.

(c) *Appeal of Center assignment.* An importer may appeal the Center assignment at any time by submitting a written appeal, with a subject line identifier reading ''Appeal Regarding Center Assignment'', to U.S. Customs and Border Protection, Office of Field Operations, Executive Director, Cargo and Conveyance Security (CCS), 1300 Pennsylvania Ave. NW., Suite 2.3D, Washington, DC 20229–1015 or by email to *CEE@cbp.dhs.gov*. Appeals must include the following information:

(1) Current Center assignment;

(2) Preferred Center assignment;

(3) All affected Importer of Record (IOR) numbers and associated bond numbers;

(4) Written justification for the change in Center assignments; and

(5) Import data:

(i) *For new importers.* Projected importations at the four (4) digit HTSUS heading level during the current year; or

(ii) *For importers with less than one year of prior import history.* Projected importations and prior import data with entry summary lines and value at the four (4) digit HTSUS heading level; or

(iii) *For importers with more than one year of prior import history.* One year of prior import data with entry summary lines and value at the four (4) digit HTSUS heading level.

PART 102—RULES OF ORIGIN

■ 32. The authority citation for part 102 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1624, 3314, 3592.

■ 33. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
102.23(a)	port director	Center director.
102.23(b)	port director	Center director.
102.25	port director	Center director.

PART 103—AVAILABILITY OF INFORMATION

■ 34. The general authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a; 19 U.S.C. 66, 1624; 31 U.S.C. 9701.

* * * * *

■ 35. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
103.32	port directors and other CBP officers	port directors, Center directors, and other CBP officers.

§ 103.26 [Amended]

■ 36. Section 103.26 is amended by removing the words ''Port directors'' and adding in their place the words ''Center directors, port directors''.

PART 113—CBP BONDS

■ 37. The general authority citation for part 113 is revised to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624.

* * * * *

■ 38. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
Appendix B to Part 113	port director of CBP	CBP.
Appendix B to Part 113	port director's	CBP's.
Appendix C to Part 113	the port director of customs	CBP.

PART 132—QUOTAS

■ 39. The general authority citation for part 132 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States (HTSUS)), 1623, 1624.

* * * * *

■ 40. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
132.11a(c)	port director	Center director.
132.12(a)	port director	Center director.
132.13(a)(1)(i)	port director	Center director.
132.13(a)(1)(ii)	presented	presented to CBP, either at the port of entry or electronically,.
132.13(a)(2)	at a port of entry	to CBP, either at the port of entry or electronically.

■ 41. Section 132.14 is amended by revising paragraphs (a)(4)(i)(A) and (B) and (a)(4)(ii)(A) to read as follows:

§ 132.14 Special permits for immediate delivery; entry of merchandise before presenting entry summary for consumption; permits of delivery.

* * * * *

(a) * * *

4) * * *

(i) * * *

(A) An authorized CBP official may demand the return to Customs custody of the released merchandise in accordance with § 141.113 of this chapter;

(B) The Center director shall require the timely presentation to CBP, either at the port of entry or electronically, of the entry summary for consumption, or a withdrawal for consumption, with the estimated duties attached;

* * *

(ii) * * *

(A) The Center director shall require the timely presentation to CBP, either at the port of entry or electronically, of the entry summary for consumption, or a withdrawal for consumption, with estimated duties attached;

* * * * *

PART 133—TRADEMARKS, TRADE NAMES, AND COPYRIGHTS

■ 42. The authority citation for part 133 continues to read as follows:

Authority: 15 U.S.C. 1124, 1125, 1127; 17 U.S.C. 101, 601, 602, 603; 19 U.S.C. 66, 1202, 1499, 1526, 1624; 31 U.S.C. 9701. Sections 133.21 through 133.25 also issued under 18 U.S.C. 1905; Sec. 818(g), Pub. L. 112–81 (10 U.S.C. 2302).

■ 43. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column;:

Section	Remove	Add
133.26	the port director	an authorized CBP official.
133.46	the director of the port of entry	an authorized CBP official.

PART 134—COUNTRY OF ORIGIN MARKING

■ 44. The authority citation for part 134 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1304, 1624.

■ 45. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
134.3(b) introductory text	The port director	An authorized CBP official.
134.25(c)	port director	Center director.
134.26(c)	port director	Center director.
134.34(a) introductory text	port director	Center director.
134.34(b)	port director	Center director.
134.51(a)	port director	Center director.
134.51(a)	port director's office	Center director's office.
134.51(b)	port director	Center director.
134.51(c)	port director	Center director.
134.52(a)	Port directors	Center directors.
134.52(c)	port director	Center director.
134.52(d)	port director	Center director.
134.52(e)	port director	Center director.
134.53(a)(2)	port director	Center director.

§ 134.25 [Amended]

■ 46. Section 134.25(a) is amended by:

■ a. Removing the words ''port director having custody of the article,'' and adding in their place the words ''Center director'';

■ b. Removing the words ''the port director'' and adding in their place the words ''the Center director''; and

■ c. Removing the words ''at each port where the article is entered'' and adding their place the words ''with CBP, either at the port of entry or electronically''.

§ 134.26 [Amended]

■ 47. Section 134.26(a) is amended by:

■ a. Removing the words ''port director having custody of the article,'' and adding in their place the words ''Center director'';

■ b. Removing the words ''the port director'' and adding in their place the words ''the Center director''; and

■ c. Removing the words ''at each port where the article(s) is entered'' and adding their place the words ''with CBP, either at the port of entry or electronically''.

§ 134.52 [Amended]

■ 48. Section 134.52(b) is amended by removing the words ''the port director'' in the first sentence and adding in their place the words ''CBP, either at the port of entry or electronically'' and by removing ''The port director'' in the second sentence and adding in their place the words ''The Center director''.

§ 134.54 [Amended]

■ 49. Section 133.54(a) is amended by removing the words ''port director'' in the first instance and adding in their place the words ''Center director''.

PART 141—ENTRY OF MERCHANDISE

■ 50. The general authority citation for part 141 and the specific authority citations for §§ 141.83 and 141.105 continue to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1498, 1624.

* * * * *

Subpart F also issued under 19 U.S.C. 1481;

Subpart G also issued under 19 U.S.C. 1505;

* * * * *

■ 51. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the

section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
141.20(a)(1)	the port director	CBP, either at the port of entry or electronically.
141.20(a)(2)	the port director	CBP, either at the port of entry or electronically.
141.35	the port director	CBP, either at the port of entry or electronically.
141.38	the port director	CBP.
141.45	port director	Center director or port director.
141.46	a port director	CBP.
141.52 introductory text	port director	Center director.
141.52(i)	port director	Center director.
141.56(a)	Port directors may accept	CBP may accept, either at the port of entry or electronically.
141.61(e)(2) introductory text	port director	Center director.
141.61(e)(2)(ii)	port director	Center director.
141.61(e)(4)	port director	Center director.
141.63(a) introductory text	port director	Center director.
141.63(b)	port director	Center director.
141.69(c)	the port director	CBP.
141.83(c)(2)	The port director	CBP.
141.85	Advices of the Port Director	Advice by CBP.
141.85	file it with the Port Director	file it with an authorized CBP official.
141.86(a)(11)	port director	Center director.
141.88	port director	Center director.
141.91(a)	The port director	CBP.
141.91(d)	port director	Center director.
141.92(a) introductory text	The port director	CBP.
141.92(b)(4)	port director	Center director.
141.113(a)(2)	port director may	Center director may.
141.113(a)(2)	port director	port director or Center director.
141.113(b)		
141.113(d)	the port director	an authorized CBP official.
141.113(d)	he	an authorized CBP official.
141.113(e)	the port director	an authorized CBP official.
141.113(g)	the port director	an authorized CBP official.
141.113(i)	the port director	an authorized CBP official.

■ 52. Section 141.44 is revised to read as follows:

§ 141.44 Designation of Center and Customs ports in which power of attorney is valid.

Unless a power of attorney specifically authorizes the agent to act thereunder at the appropriate Center and at all CBP ports, the name of the appropriate Center or each port where the agent is authorized to act thereunder shall be stated in the power of attorney. The power of attorney shall be filed with CBP, either at the port of entry or electronically, in a sufficient number of copies for distribution to the appropriate Center and each port where the agent is to act, unless exempted from filing by § 141.46. The Center director or port director with whom a power of attorney is filed, irrespective of whether his Center or port is named, shall approve it, if it is in the correct form and the provisions of this subpart are complied with, and forward any copies intended for other ports or another Center as appropriate.

§ 141.105 [Amended]

■ 53. Section 141.105 is amended by:

■ a. Removing the words ''from the port director'' and adding in their place the words ''from the Center director'';

■ b. Removing the words ''with the port director'' and adding in their place the words ''with CBP, either at the port of entry or electronically''; and

■ c. Removing the words ''To the Port Director'' and adding in their place the words ''To CBP''.

§ 141.113 [Amended]

■ 54. Section 141.113(c)(3) is amended by removing the words ''CBP port director who will demand the redelivery of the product to CBP custody'' and adding in their place the words ''Center director. An authorized CBP official will demand the redelivery of the product to CBP custody''.

PART 142—ENTRY PROCESS

■ 55. The authority citation for part 142 continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

■ 56. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
142.3(c)	port director	CBP.
142.11(b)	port director	CBP.
142.17(a) introductory text	port director	Center director.
142.17a(a) introductory text	port director	Center director.
142.18(a) introductory text	the port director	an authorized CBP official.

Section	Remove	Add
142.28(a) introductory text	the port director	an authorized CBP official.

§ 142. 13 [Amended]

■ 57. Section 142.13(a) is amended in its heading and in its introductory text by removing the words ''port director'' and adding in their place ''CBP''.

PART 143—SPECIAL ENTRY PROCEDURES

■ 58. The authority citation for part 143 continues to read as follows:

Authority: 19 U.S.C. 66, 1321, 1414, 1481, 1484, 1498, 1624, 1641.

■ 59. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
143.22	The port director	CBP.
143.23 introductory text	port director	Center director.

PART 144—WAREHOUSE AND REWAREHOUSE ENTRIES AND WITHDRAWALS

■ 60. The general authority citation for part 144 continues to read as follows:

Authority: 19 U.S.C. 66, 1484, 1557, 1559, 1624.

* * * * *

■ 61. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
144.5	port director	Center director.
144.12	port director	Center director.
144.13	port director	Center director.
144.38(d)	port director	Center director.

■ 62. Section 144.41(h) is revised to read as follows:

§ 144.41 Entry for rewarehouse.

* * * * *

(h) *Protest.* A protest may be filed with CBP, either at the port of entry or electronically, against a liquidation made under § 159.7(a) or (b) of this chapter, or against a refusal to liquidate pursuant to said sections. In all other cases, any protest shall be filed against the original warehouse entry.

PART 145—MAIL IMPORTATIONS

■ 63. The general authority citation for part 145 and the sectional authority for § 145.12 continue to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States, 1624.

* * * * *

Section 145.12 also issued under 19 U.S.C. 1315, 1484, 1498;

* * * * *

■ 64. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
145.12(a)(1)	The port director	CBP.
145.12(a)(1)	if in his opinion	if
145.14(b)	port director	CBP.

PART 146—FOREIGN TRADE ZONES

■ 65. The authority citation for part 146 continues to read as follows:

Authority: 19 U.S.C. 66, 81a–81u, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1623, 1624.

■ 66. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
146.65(b)(3)	port director	Center director.
146.65(c)	port director	Center director.

PART 147—TRADE FAIRS

■ 67. The authority citation for part 147 continues to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624, 1751–1756, unless otherwise noted.

■ 68. In the table below, for each section indicated in the left column, remove the words indicated in the middle column

from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
147.32	port director	Center director.
147.41	on demand by the port director	on the Center director's demand to CBP, either at the port of entry or electronically.

■ 69. Section 147.33 is revised to read as follows:

§ 147.33 Reimbursement by fair operator.

All actual and necessary charges for labor, services, and other expenses in connection with the entry, examination, appraisement, custody, abandonment, destruction, or release of articles entered under the regulations of this part, together with the necessary charges for salaries of Customs officers and employees in connection with the accounting for, custody of, and supervision over, such articles, shall be reimbursed by the fair operator to the Government, payment to be made to CBP, either at the port of entry or electronically, on the port director's or Center director's demand made before January 19, 2017 or on the Center director's demand made on or after January 19, 2017, for deposit to the appropriation from which paid.

PART 151—EXAMINATION, SAMPLING, AND TESTING OF MERCHANDISE

■ 70. The general authority citation for part 151 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i) and (j), Harmonized Tariff Schedule of the United States (HTSUS)), 1624;

* * * * *

■ 71. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
151.10	the port director	an authorized CBP official.
151.11	the port director	an authorized CBP official.
151.11	he shall	an authorized CBP official will.
151.12(c)(5)	both the port director and the Executive Director.	the port director, the Executive Director, and the Center director.
151.12(c)(6)	both the port director and the Executive Director.	the port director, the Executive Director, and the Center director.
151.13(b)(5)	both the port director and the Executive Director.	the port director, the Executive Director, and the Center director.
151.13(b)(6)	both the port director and the Executive Director.	the port director, the Executive Director, and the Center director.
151.51(b)	port director	Center director.
151.52(c)	the port director	an authorized CBP official.
151.54	The port director	An authorized CBP official.
151.55	port director	Center director.
151.65	port director	Center director.
151.65	port director's	Center director's.
151.68(c)	the port director	an authorized CBP official.
151.69(b)	port director	Center director.
151.70	port director	Center director.
151.71(a)	port director	Center director.
151.71(b)	port director	Center director.
151.73(c)	port director	Center director.
151.75	port director	Center director.
151.76(a)	port director	Center director.
151.76(b)	port director	Center director.
151.84	port director	Center director.

■ 72. Section 151.71(c) is revised to read as follows:

§ 151.71 Laboratory testing for clean yield.

* * * * *

(c) *Importer's request for retest.* If the importer is dissatisfied with the port director's or Center director's finding of clean yield, made before January 19, 2017, or the Center director's finding of clean yield made on or after January 19, 2017, he may file with CBP, either at the port of entry or electronically, a written request in duplicate for another laboratory test for percentage clean yield. Such request shall be filed within 14 calendar days after the date of mailing of the notice of the port director's or Center director's finding of clean yield. The request shall be granted if it appears to the Center director to be made in good faith and if a second general sample as provided for in § 151.70 is available for testing, or if all packages or, in the opinion of the Commissioner of Customs, an adequate number of the packages represented by the general sample are available and in their original imported condition.

* * * * *

■ 73. Section 151.73(b) is revised to read as follows:

§ 151.73 Importer's request for commercial laboratory test.

* * * * *

(b) *Time for filing request.* The importer's request shall be filed in writing with the Center director within 14 calendar days after the date of mailing of the notice of the port

director's or Center director's findings based on the retest mailed before January 19, 2017, or within 14 calendar days after the date of mailing of the notice of the Center director's findings based on the retest mailed on or after January 19, 2017.

* * * * *

■ 74. Section 151.74 is revised to read as follows:

§ 151.74 Retest at Center director's request.

If the Center director is not satisfied with the results of any test provided for in § 151.71 or § 151.73, he may, within 14 calendar days after receiving the report of the results of such test, proceed to have another test made upon a suitable sample of the wool or hair at the expense of the Government. When the Center director is proceeding to have another test made, he shall, within the 14-day period specified in this paragraph, notify the importer by mail of that fact.

■ 75. Section 151.76(c) is revised to read as follows:

§ 151.76 Grading of wool.

* * * * *

(c) *Importer's request for reexamination.* If the importer is dissatisfied with the port director's or Center director's findings as to the grade or grades of the wool, made before January 19, 2017, or the Center director's findings as to the grade or grades of wool made on or after January 19, 2017, he may, within 14 calendar days after the date of mailing of the notice of the port director's or Center director's findings, file in duplicate a written request with the Center director for another determination of grade or grades, stating the reason for the request. Notice of the Center director's findings on the basis of the reexamination of the wool shall be mailed to the importer.

■ 76. Section 151.85 is revised to read as follows:

§ 151.85 Importer's request for redetermination.

If the importer is dissatisfied with the port director's or Center director's determination made before January 19, 2017, or the Center director's determination made on or after January 19, 2017, he may file with the Center director, within 14 calendar days after the mailing of the notice, a written request in duplicate for a redetermination of the staple length. Each such request shall include a statement of the claimed staple length for the cotton in question and a clear statement of the basis for the claim. The request shall be granted if it appears to the Center director to be made in good faith. In making the redetermination of staple length, the Center director may obtain an opinion of a board of cotton examiners from the U.S. Department of Agriculture, if he deems such action advisable. All expenses occasioned by any redetermination of staple length, exclusive of the compensation of CBP officers, shall be reimbursed to the Government by the importer.

PART 152—CLASSIFICATION AND APPRAISEMENT OF MERCHANDISE

■ 77. The general authority citation for part 152 and the specific authority citation for § 152.26 continue to read as follows:

Authority: 19 U.S.C. 66, 1401a, 1500, 1502, 1624;

* * * * *

Subpart C also issued under 19 U.S.C. 1503;

* * * * *

■ 78. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
152.1(c)	port director	Center director.
152.2	port director	Center director.
152.13(a)	port director	Center director.
152.13(c)(1)	port director	Center director.
152.13(c)(3)	port director	Center director.
152.13(d)	port director	Center director.
152.13(d)	application	application to the Center director.
152.101(c)	the port director	CBP, either at the port of entry or electronically.
152.101(d)	port director	Center director.
152.103(d) introductory text	port director	Center director.
152.103(l)(1) introductory text	port director	Center director.
152.103(l)(2)(iii)	port director	Center director.
152.105(i)(2)	port director	Center director.
152.106(f)(2) introductory text	port director	Center director.

■ 79. Section 152.16(c) is revised to read as follows:

§ 152.16 Judicial changes in classification.

* * * * *

(c) *Higher rate.* If a court decision overruling a protest contains a definite statement that a higher rate than that assessed by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, was properly chargeable, such higher rate shall be applied to all merchandise, whether identical or similar to that passed on by the court, which is affected by the principles of the court's decision and which is entered or withdrawn for consumption after 30 days from the date of the publication of the court's decision in the Customs Bulletin.

* * * * *

■ 80. Section 152.26 is revised to read as follows:

§ 152.26 Furnishing value information to importer.

The Center director will furnish to importers the latest information as to values in his possession, subject to the following conditions:

(a) *Before appraisement.* Value information will be given before appraisement only in response to a specific oral or written request by the importer, supported by an adequate reason for the request, or where required by CBP purposes, such as in determining proper estimated duties to be deposited or notification of increased duties in accordance with § 152.2.

(b) *Only for merchandise under Center director's jurisdiction.* The information will be given only in regard to merchandise to be appraised by, or under the jurisdiction of, the Center director who receives the request, and

only with respect to merchandise for which there is presented evidence of a firm commitment or intent to import such merchandise into the United States.

(c) *Information by importer.* Each request must be accompanied by the latest information as to the values in question which the importer has or can reasonably obtain.

(d) *Information not binding.* Value information will be given by the Center director only with an understanding and agreement in each case that the information is in no sense an appraisement and is not binding upon the Center director's action when he appraises the merchandise.

(e) *No reply required after entry.* The Center director will not be required to reply to a written request for value information after a value for the merchandise has been declared on entry unless he has information indicating a probable appraised value different from such entered value.

§ 152.103 [Amended]

■ 81. In § 152.103:

■ a. Paragraph (a)(5)(iii) is amended by removing ''the port director'' in the first sentence and adding in their place the words ''CBP, either at the port of entry or electronically'' and by removing the words ''port director'' in the second sentence and adding in their place the words ''Center director''; and

■ b. Paragraph (m) is amended by removing the word ''Customs'' each place it appears and adding in its place the term ''CBP'' and by removing the words ''port director'' each place it appears and adding in their place the words ''Center director''.

PART 158—RELIEF FROM DUTIES ON MERCHANDISE LOST, DAMAGED, ABANDONED, OR EXPORTED

■ 82. The authority citation for part 158 continues to read as follows:

Authority: 19 U.S.C. 66, 1624, unless otherwise noted. Subpart C also issued under 19 U.S.C. 1563.

■ 83. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
158.3	port director	Center director.
158.5(a)	port director satisfies himself	Center director is satisfied.

■ 84. Section 158.13(b) is revised to read as follows:

§ 158.13 Allowance for moisture and impurities.

* * * * *

(b) *Allowance by Center director.* If the port director is satisfied after any necessary investigation that the merchandise contains moisture or impurities as described in paragraph (a) of this section, the Center director will make allowance for the amount thereof in the liquidation of the entry.

PART 159—LIQUIDATION OF DUTIES

■ 85. The general authority citation for part 159 continues to read as follows:

Authority: 19 U.S.C. 66, 1500, 1504, 1624.

* * * * *

■ 86. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
159.7(b)	at the port where the merchandise is held in CBP custody.	by the Center director.
159.7(c)	port director of the port where the merchandise is entered for rewarehouse.	Center director.
159.12(a)(1) introductory text	port director	Center director.
159.12(a)(1)(ii)	port director	Center director.
159.12(b)	port director	Center director.
159.12(c)	port director	Center director.
159.12(d)(1)	port director	Center director.
159.12(d)(2)	port director	Center director.
159.12(e)	port director	Center director.
159.22(d)(2)	port director	Center director.
159.36(b)	port director	Center director.
159.36(c)	port director	Center director.
159.36(d)	port director	Center director.
159.38	port director	Center director.
159.44	port director	Center director.

■ 87. Section 159.58 is revised to read as follows:

§ 159.58 Dumping and countervailing duties; action by Center director.

(a) *Antidumping matters.* Upon receipt of notification from the Commissioner, the Center director will suspend liquidation on merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the ''Notice of Preliminary Affirmative Antidumping Determination,'' ''Notice of Final Affirmative Antidumping Determination'' or ''Notice of Violation of Agreement'' as provided by part 353, chapter III, of this title. The Center director will immediately notify the importer, consignee, or agent of each entry of merchandise in question with respect to which liquidation is suspended. The notice will indicate the relevant ascertained and determined or estimated antidumping duty.

(b) *Countervailing matters.* Upon receipt of notification from the Commissioner, the Center director will suspend liquidation on merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the ''Notice of Preliminary Affirmative Countervailing Duty Determination,'' ''Notice of Final Affirmative Countervailing Duty

Determination'' or ''Notice of Violation of Agreement,'' as provided by part 355, Chapter III, of this title. The Center director will immediately notify the importer, consignee, or agent of each entry of merchandise in question with respect to which liquidation is suspended. The notice will indicate the relevant ascertained and determined or estimated countervailing duty.

PART 161—GENERAL ENFORCEMENT PROVISIONS

■ 88. The general authority citation for part 161 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1600, 1619, 1624.

* * * * *

■ 89. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
161.16(b)	port director	Center director.

PART 162—INSPECTION, SEARCH, AND SEIZURE

■ 90. The general authority citation for part 162 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1592, 1593a, 1624, 6 U.S.C. 101, 8 U.S.C. 1324(b).

* * * * *

■ 91. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
162.74(c)	CBP port	Center director.
162.80(a)(2)(i)	port director	Center director.
162.80(a)(2)(iii)	port director	Center director.

§ 162.80 [Amended]

■ 92. Section 162.80(a)(1) is amended by:

■ a. Removing the words ''port director'' and adding in their place the words ''Center director'';

■ b. Removing the words ''and collect duties'' and adding in their place the words ''and CBP, either at the port of entry or electronically, may collect duties''; and

■ c. Removing the word ''he'' and adding in its place the words ''the Center director''.

PART 163—RECORDKEEPING

■ 93. The general authority citation for part 163 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1484, 1508, 1509, 1510, 1624.

* * * * *

■ 94. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
163.7(a) introductory text	port director, field director of regulatory audit	port director, Center director, field director of regulatory audit.

■ 95. Section 163.1(a)(2)(vii) is revised to read as follows:

§ 163.1 Definitions.

* * * * *

(a) * * *

(2) * * *

(vii) The maintenance of any documentation that the importer may have in support of a claim for preferential tariff treatment under the United States-Singapore Free Trade Agreement (SFTA), including a SFTA importer's supporting statement if previously required by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017.

* * * * *

■ 96. The Appendix to Part 163 is amended under section IV by revising the entry for ''§ 10.512'' to read as follows:

Appendix to Part 163—Interim (a)(1)(A) List

* * * * *

IV. * * *

§ 10.512 SFTA records that the importer may have in support of a SFTA claim for preferential tariff treatment, including an importer's supporting statement if previously required by the port director or Center director before January 19, 2017 or the Center director on or after January 19, 2017.

* * * * *

PART 173—ADMINISTRATIVE REVIEW IN GENERAL

■ 97. The authority citation for part 173 continues to read as follows:

Authority: 19 U.S.C. 66, 1501, 1520, 1624.

■ 98. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
173.1	Port directors	Center directors.

Section	Remove	Add
173.2 introductory text	port director	Center director.
173.3(a)	port director	Center director.
173.4(a) introductory text	port director	Center director.
173.4(a)(2)	director of the port of entry	Center director.
173.4a	port director	Center director.

PART 174—PROTESTS

■ 99. The general authority citation for part 174 and the specific authority citation for § 174.21 continue to read as follows:

Authority: 19 U.S.C. 66, 1514, 1515, 1624. Section 174.21 also issued under 19 U.S.C. 1499.

■ 100. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
174.0	port director	port director and Center director.
174.12(d)	the port director whose decision is protested ..	CBP, either at the port of entry or electronically.
174.13(b)	at any port	with CBP, either at any port or electronically,.
174.21(a)	port director	Center director.
174.21(b)	port director	Center director.
174.22(a)	the port director or other CBP officer with whom the protest was filed.	the port director, Center director, or other CBP officer with whom the protest was filed.
174.22(c)	port director	Center director.
174.22(d)	port director	Center director.
174.24 introductory text	port director	Center director.
174.24(a)	Commissioner of Customs	Commissioner of CBP.
174.24(a)	at any port	by CBP.
174.24(b)	Commissioner of Customs	Commissioner of CBP.
174.24(c)	Commissioner of Customs	Commissioner of CBP.
174.24(d)	United States Customs Service	U.S. Customs and Border Protection.
174.26(a)	port director	Center director.
174.26(b) introductory text	port director	Center director.
174.26(b) introductory text	he shall	the Center director will.
174.26(b)(2)	port director	Center director.
174.27	port director	Center director.
174.29	port director	Center director.
174.29	19 U.S.C. 1514)	(19 U.S.C. 1514).

§ 174.3 [Amended]

■ 101. In § 174.3:

■ a. Paragraph (b)(1) is amended by removing the words ''port director'' and adding in their place the words ''Center director'';

■ b. Paragraph (c) is amended by removing the words ''port director'' and adding in their place the words ''Center director''; and

■ c. Paragraph (d) is amended by removing the words ''the port director'' and adding in their place the words ''CBP, either at the port of entry or electronically''.

§ 174.14 [Amended]

■ 102. Section 174.14(e) is amended by removing the words ''the port director with whom the protest was filed'' and adding in their place the words ''CBP, either at the port of entry or electronically'', and by removing the words ''with whom it is required to be filed''.

§ 174.15 [Amended]

■ 103. Section 174.15(b)(2) is amended by removing the words ''port director'' and adding in their place the words ''port director or Center director, before January 19, 2017, or the Center director on or after January 19, 2017,''.

■ 104. Section 174.16 is revised to read as follows:

§ 174.16 Limitation on protests after reliquidation.

A protest shall not be filed against the reliquidation decision of the port director or Center director made before January 19, 2017, or the reliquidation decision of the Center director made on or after January 19, 2017, upon any question not involved in the reliquidation.

■ 105. Section 174.23 is revised to read as follows:

§ 174.23 Further review of protests.

A protesting party may seek further review of a protest in lieu of review by the Center director by filing, on the form prescribed in § 174.25, an application for such review within the time allowed and in the manner prescribed by § 174.12 for the filing of a protest. The filing of an application for further review shall not preclude a preliminary examination by the Center director for the purpose of determining whether the protest may be allowed in full. If such preliminary examination indicates that the protest would be denied in whole or in part by the Center director in the absence of an application for further review; however, he shall forward the protest and application for consideration in accordance with § 174.26.

§ 174.30 [Amended]

■ 106. In § 174.30:

■ a. Paragraph (b) is amended by removing ''the port director'' the first time it appears and adding in their place the words ''CBP, either at the port of entry or electronically,'', and by removing the words ''the port director'' the second time it appears and adding in their place the term ''CBP''; and

■ b. Paragraph (c) is amended by removing the words ''port director'' and adding in their place the words ''Center director''.

PART 176—PROCEEDINGS IN THE COURT OF INTERNATIONAL TRADE

■ 107. The authority citation for part 176 continues to read as follows:

Authority: R.S. 251, as amended, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1624, unless otherwise noted.

■ 108. Section 176.1 is revised to read as follows:

§ 176.1 Service of summons.

When an action is initiated in the Court of International Trade a copy of the summons will be served in the manner prescribed by the Court of International Trade upon the CBP official(s) who denied the protest(s), and an additional copy will be served upon the Assistant Chief Counsel for Court of International Trade Litigation, United States Customs and Border Protection, 26 Federal Plaza, New York, N.Y. 10007.

PART 181—NORTH AMERICAN FREE TRADE AGREEMENT

■ 109. The general authority citation for part 181 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1624, 3314;

* * * * *

■ 110. In the table below, for each section indicated in the left column, remove the words indicated in the middle column from wherever they appear in the section, and add, in their place, the words indicated in the right column:

Section	Remove	Add
181.12(b)(1)	port director	Center director.
181.22(b) introductory text	port director	Center director.
181.22(b)(3)	port director	Center director.
181.22(c)	port director	Center director.
181.22(d)(1)(iii)	port director	Center director.
181.22(d)(2)	port director	Center director.
181.23(a)	port director	Center director.
181.23(b)	port director	Center director.
181.32(a)	the director of the port at which the entry covering the good was filed.	CBP, either at the port of entry or electronically.
181.33(a)	port director	Center director.
181.33(b)	port director	Center director.
181.33(c)(1)	port director	Center director.
181.33(c)(2)	port director concerned	Center director.
181.33(c)(3)	port director	Center director.
181.33(d)(1)	port director	Center director.
181.33(d)(2)	port director	Center director.
181.33(d)(3)	port director	Center director.
181.64(c)(2)	port director	Center director.
181.64(c)(3)	port director	Center director.
181.64(c)(4)	port director	Center director.
181.64(c)(4)	duties	duties to CBP, either at the port of entry or electronically.
181.113(a)	the port director who issued the decision	CBP, either at the port of entry or electronically.
181.114(a)	port director	Center director.
181.114(b) introductory text	port director	Center director.
181.115(b)	port director with whom the protest was filed	Center director.
181.116(a)	port director	Center director.
181.116(b)	the port director who issued the adverse marking decision.	with the port of entry or filed electronically with CBP.
181.121	port director or other Customs officer	port director, Center director, or other CBP officer.

■ 111. Section 181.22(d)(1)(i) is revised to read as follows:

§ 181.22 Maintenance of records and submission of Certificate by importer.

* * * * *

(d) * * *

(1) * * *

(i) An importation of a good for which the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, has in writing waived the requirement for a Certificate of Origin because the port director or Center director is otherwise satisfied that the good qualifies for preferential tariff treatment under the NAFTA;

* * * * *

■ 112. Section 181.112(a) is revised to read as follows:

§ 181.112 Definitions.

* * * * *

(a) *Adverse marking decision* means a decision made by the port director or Center director before January 19, 2017, or the Center director on or after January 19, 2017, which an exporter or producer of merchandise believes to be contrary to the provisions of Annex 311 of the NAFTA and which may be protested by the importer pursuant to § 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), and part 174 of this chapter. Notification of an adverse marking decision is given to an importer in the form of a CBP Form 4647, or its electronic equivalent, (Notice to Mark and/or Notice to Redeliver) and/or by assessing marking duties on improperly marked merchandise. Examples of adverse marking decisions include determinations by the port director or Center director before December 20, 2016, or the Center director on or after January 19, 2017: That an imported article is not a good of a NAFTA country, as determined under the Marking Rules, and that it therefore

cannot be marked ''Canada'' or ''Mexico''; that a good of a NAFTA country is not marked in a manner which is sufficiently permanent; and that a good of a NAFTA country does not qualify for an exception from marking specified in Annex 311 of the NAFTA. Adverse marking decisions do not include: Decisions issued in response to requests for advance rulings under subpart I of this part or for internal advice under part 177 of this chapter; decisions on protests under part 174 of this chapter; and determinations that an article does not qualify as an originating good under General Note 12, HTSUS, and the appendix to this part.

* * * * *

§ 181.115 [Amended]

■ 113. Section 181.115(e) is amended by removing the words ''port director'', in its heading and in its text, each place that they appear and adding in their place the words ''Center director''.

§ 181.116 [Amended]

■ 114. Section 181.116(d)(1) is amended by removing the words ''port director'', in its heading and in its text, each place that they appear and adding in their place the words ''Center director'', and by removing the words ''port director's'' each place that they appear and adding in their place the words ''Center director's''.

Dated: December 7, 2016.

Jeh Charles Johnson,

Secretary.

45 CFR Part 1351
Runaway and Homeless Youth; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1351

RIN 0970–AC43

Runaway and Homeless Youth

AGENCY: Family and Youth Services Bureau (FYSB), Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule reflects existing statutory requirements in the Runaway and Homeless Youth Act and changes made via the Reconnecting Homeless Youth Act of 2008. More specifically, the rule establishes program performance standards for Runaway and Homeless Youth grantees providing services to eligible youth and their families. Revisions have been made to the rule regarding additional requirements that apply to the Basic Center, Transitional Living, and Street Outreach Programs, including non-discrimination, background checks, outreach, and training. Furthermore, the rule updates existing regulations to reflect statutory changes made to the Runaway and Homeless Youth Act, and updates procedures for soliciting and awarding grants. This final rule makes changes to the proposed rule published on April 14, 2014, and is in response to public comments recommending ways to improve the rule.

DATES: This final rule is effective January 19, 2017. However, compliance with the new performance standards is not required until the beginning of the next budget period after promulgation of this final rule.

FOR FURTHER INFORMATION CONTACT: Christopher Holloway, (202) 205–9560 (not a toll-free call). Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 between 8 a.m. and 7 p.m. Eastern Time.

SUPPLEMENTARY INFORMATION:

I. Statutory Authority

This final rule is published under the authority granted to the Secretary of Health and Human Services by the Runaway and Homeless Youth Act (Title III of the Juvenile Justice and Delinquency Prevention Act of 1974), 42 U.S.C. 5701 *et seq.* as amended by the Reconnecting Homeless Youth Act of 2008 (Pub. L. 110–378). Specifically, under 42 U.S.C. 5702, ''the Secretary of Health and Human Services . . . may issue such rules as the Secretary considers necessary or appropriate to carry out the purposes of this subchapter.''

II. Background

The Runaway and Homeless Youth Act (''the Act'') authorizes three major grant programs administered by the Family and Youth Services Bureau (FYSB), Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), in the Department of Health and Human Services (HHS). These programs support local efforts to assist youth who have run away or are homeless.

The Basic Center Grant Program (hereafter referred to as the Basic Center Program) funds grants to community-based public and nonprofit private agencies (and combinations of such entities) to establish and operate local centers to provide services for runaway and homeless youth and for the families of such youth. Services provided include the provision of outreach, crisis intervention, temporary shelter, counseling, family unification, and aftercare services to runaway and homeless youth and their families. Basic Center projects generally serve youth under 18 years of age and can provide up to 21 days of shelter.

The Transitional Living Grant Program (hereafter referred to as the Transitional Living Program) provides grants to public and private organizations to establish and operate transitional living youth projects for homeless youth, including for community-based shelter including group homes, host family homes, and supervised apartments for youth, ages 16 to under 22, who cannot safely live with their own families. Transitional Living projects provide a safe, stable, and nurturing environment for up to 21 months. Young people who have not yet reached their 18th birthday at the end of the 21-month period may continue to receive services until they turn 18. Services include counseling in basic life skills, interpersonal skill building, educational advancement, job attainment skills, and physical and mental health care. These services are designed to help youth who are homeless develop the skills necessary to make a successful transition to self-sufficient living. The Transitional Living Program also funds Maternity Group Homes, which are specifically designed to meet the needs of pregnant and parenting youth.

The Sexual Abuse Prevention Program (hereafter referred to as the Street Outreach Program) provides grants to nonprofit private agencies for street-based outreach and education, including treatment, counseling, provision of information, and referrals for runaway, homeless, and street youth 21 years and younger who have been subjected to or are at risk of being subjected to sexual abuse, prostitution or sexual exploitation.

The Act also authorizes additional activities conducted through grants, including grants for research, evaluation, and service projects; grants for a national communications system to assist runaway and homeless youth in communicating with their families and service providers; and grants for technical assistance and training. This final rule covers all of these activities.

The Reconnecting Homeless Youth Act of 2008 (hereafter referred to as ''the 2008 Act'') (Pub. L. 110–378) reauthorized the Runaway and Homeless Youth Act (hereafter referred to as ''the Act'') through federal fiscal year (FY) 2013, and made a number of changes to the Act, including a requirement for the establishment of performance standards. Specifically, section 386A of the 2008 Act, Performance Standards, requires that: (1) HHS issue rules that specify performance standards; (2) HHS consult with grantees and national nonprofit organizations concerned with youth homelessness in developing those standards; and (3) HHS integrate the performance standards into the HHS processes for grant making, monitoring, and evaluation for the three major grant programs under the Act.

We have already implemented elements of these statutory mandates through funding opportunity announcements, technical assistance and training, and data collection. This final rule allows us to complete implementation of these legislative requirements. In addition, it will bring the program's codified regulations, last updated August 17, 2000 (65 FR 50139), into conformity with existing statutory provisions, the administrative and managerial procedures we already use in accordance with the 2008 Act, and previous statutory changes.

We intend to provide technical assistance to grantees that focuses on effective implementation of these performance standards, and to implement them as new budget periods begin, after promulgation of this final rule, rather than in the middle of an existing budget period.

III. Consultation and the Development of the Final Rule

In keeping with the requirements of the 2008 Act, the Family and Youth Services Bureau (FYSB) sought input from grantees and other stakeholders prior to the development of the proposed rule. In April 2009, FYSB conducted a consultation forum that brought together forty-four individuals including subject experts, technical assistance providers, Runaway and Homeless Youth (RHY) grantees, federal staff, persons with extensive program monitoring experience, and national, regional and statewide youth servicing organization representatives.

FYSB also obtained stakeholder perspectives and other information to inform the proposed rule in a number of additional ways. Since 2008, we have conducted national conferences bringing together all stakeholder groups and allowing for broad, informal exchanges of views. One such conference, the 2008 Runaway and Homeless Youth Grantee Conference was attended by 442 participants (including representatives from 252 grantee organizations) to share ideas, promising approaches, and best practices. Participants met in over 30 different workshops addressing both universal issues and specific programmatic needs of the three major RHY programs. Through the Runaway and Homeless Youth Training and Technical Assistance Centers, we have conducted an extensive training, technical assistance, and monitoring effort aimed not only at assisting grantees, but also at obtaining their feedback on operational issues. In tandem with these efforts, we conducted an in-depth review of existing regulatory and sub-regulatory issuances and developed a comprehensive set of on-site review materials, in use since February 2009.

These consultative processes provided valuable input that we used in formulating the performance and procedural standards. Importantly, the input we received emphasized that:

- The standards should promote an integrated, holistic approach to service delivery.
- The standards should be responsive to the complex social identities (*i.e.,* race, ethnicity, nationality, religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, disability, language, beliefs, values, behavior patterns, or customs) of clients.
- The standards should serve as models for program quality and encourage programs to strive for excellence.
- The standards should achieve a balance between clarity and precision of regulatory intent and regulatory flexibility so that programs can be most responsive to local needs, settings, and circumstances.
- The standards should place emphasis on family-focused aspects of the program by strengthening links with local community providers, and helping families identify and address individualized goals.
- Standards of any kind—whether performance or procedural—should facilitate rather than impede local flexibility in creating and operating effective programs that respond to local needs and priorities.
- Standards should not unnecessarily impose burdensome requirements that would divert local resources away from service.

We retained these principles in developing the final rule. As we stated in the proposed rule, we believe that ''Regular measurement of progress toward specified outcomes is a vital component of any effort at managing-for-results.'' (Harry P. Hatry, *Performance Measurement,* Urban Institute Press, 2006). However, we recognized that effective, workable, and successful performance standards are extremely difficult to formulate and often need amending over time. Among the difficulties encountered are: (1) Some of the most important goals may be qualitative rather than quantitative; (2) near-term results may not correctly signal long-term effects; (3) measurement and appraisal may reduce the resources available for services; and (4) local circumstances may vary and achieving a lower absolute result in some settings may actually reflect superior performance over other settings because difficulties were greater. Despite these difficulties, we have increasingly incorporated performance measures and standards into the Runaway and Homeless Youth Program's ongoing operations to drive program improvement and help assure accountability. The standards and measures in this rule are appropriate, realistic, and consistent with the underlying complexity of the problems and processes involved in serving homeless and runaway youth.

In the proposed rule preamble, we stated that we welcomed comments on whether our proposed standards struck the proper balance in meeting the objectives stated above, including measuring the most important program goals that are feasible to measure, preserving flexibility to grantees, and minimizing unnecessary burden. We asked for suggestions, particularly those supported by research or evaluative evidence, for improvements in the proposed standards. To assist in such comments, we provided specific regulatory text that commenters could review and suggest changes. As described later in this preamble, we received useful and detailed comments from individuals, providers, advocacy groups, government agencies, and others that have assisted us in making the decisions reflected in this final rule.

As a result of the consultative and rulemaking process, this final rule codifies a targeted number of process and procedural requirements in order to minimize burden to grantees and to provide grantees flexibility in meeting their performance standards and in dealing with unique circumstances in their communities. This final rule reflects that there are many effective practices that are best handled through technical assistance and training rather than established as regulatory standards.

We will work closely with our grantees in implementation of this final rule through our training and technical assistance activities to ensure they thoroughly understand the new standards and reporting requirements.

IV. Scope of the Final Rule

This final rule establishes Runaway and Homeless Youth Program Performance Standards to help assess the quality and effectiveness of the Runaway and Homeless Youth Program nationally by providing indicators of successful outcomes for youth. The performance standards will be used to monitor individual grantee performance in achieving the purposes of the Act. Program projects will also be subject to other requirements including other applicable regulations (*e.g.,* civil rights regulations), and those cited in funding opportunity announcements.

This final rule also makes largely technical changes to existing program rules to conform to current law and to correct outdated provisions. Equally important, it revises our regulatory provisions on making awards to reflect the performance standards and to reflect onsite review and monitoring procedures that have been in place for a number of years.

This final rule is effective 30 days after publication in the **Federal Register**; however, compliance with the new performance standards will not be required until the beginning of the next budget period (October 1) after the effective date of the final rule. This will allow existing grantees time to come into compliance with the new

standards, and provide time for us to assist grantees, and avoid confusion that may result from changing standards in the middle of budget periods. To assist grantees, we will provide them with guidance on best practices for implementing the standards. We will also conduct additional technical assistance to help grantee agencies understand and implement the new standards. We intend the final rule to complement our other efforts to strengthen Runaway and Homeless Youth grantee monitoring and to improve the overall program.

V. Summary of Public Comments

We received 72 responsive and unique comments or sets of comments on the proposed rule, not including comments that were word-for-word identical. Multiple organizations and individuals endorsed several of these comment sets, and the total number of commenting individuals and organizations was about 300. About a dozen comments expressed overall support for the rule and made no specific suggestions for change.

Without exception, the substantive comments reflect an understanding of the many problems affecting runaway and homeless youth, and of the many challenges that arise in administering programs for these youth. This understanding was evident in not only comments from advocacy groups and other organized commenters, but also the comments from individual service providers and from concerned individuals. We were able to accommodate many, but not all, of the recommendations in these comments. In some cases, the statute gives us little or no flexibility to accept commenter recommendations. In other cases, we agree that the comment raises an important issue, but not that the issue can or should be addressed through this regulation. Many recommendations in the comments address issues that we believe are best addressed either in implementation guidance, in funding opportunity announcements, or in individual decisions by service providers themselves. Other issues raised involved the respective roles of federal and state governments, or of other agencies or programs involved in the lives of these youth (*e.g.,* housing programs, juvenile justice system). In our response to each issue raised by commenters, we address these factors insofar as they affect the decision in the final rule. These exceptions aside, we accepted many dozens of suggested changes in whole or in part, and believe that the comments were helpful in improving the final rule.

VI. Section-by-Section Discussion of the Regulatory Provisions, Issues, and Comments

We received a number of comments that did not address a particular section of the proposed rule either directly or by inference. We address those first.

Comment: One commenter said that the law needs to make room for faith-based programs.

Response: We did not make any changes to the final rule in response to this comment because the existing ACF Policy on Grants to Faith-Based Organizations already establishes ACF's commitment to partnering with faith-based organizations.

More specifically, the ACF Policy on Grants to Faith-Based Organizations states the following: ''This administration is committed to providing the full range of legally permissible services to people who need them, and to doing so in a timely fashion and in a manner that respects the diverse religious and cultural backgrounds of those we serve. At the same time, we also are committed to finding ways for organizations to partner with us even if they object to providing specific services on religious grounds.'' The full policy can be found here: *http://www.acf.hhs.gov/acf-policy-on-grants-to-faith-based-organizations.*

Comment: One commenter pointed out that our background preamble discussion of transitional housing being a ''long-term environment,'' in light of the 21-month period for which such housing can be provided in the Transitional Living Program as compared to the 21-day period allowed in the Basic Center Program, is not seen as a long-term solution in housing programs administered by HUD.

Response: We agree that the Transitional Living Program services are not permanent housing solutions, or even long-term when compared to the housing options that HUD offers. As indicated throughout the proposed and final rules, one of the major priorities of the RHY Program is, whenever reasonably and safely possible, to return youth to their family homes for support until they can find their own longer-term solutions, or, when reunification is not possible, to assist youth in establishing more permanent arrangements. Within the context of the Continuum of Care Program, as defined by HUD, and its housing and service structure, TLP is considered transitional housing and BCP is considered emergency shelter. Neither is considered to be a permanent placement. We have therefore deleted references to ''long-term'' transitional living services throughout this rule.

Comment: One commenter asked that we add a requirement that youth served by these programs be actively involved in developing these services, through meaningful leadership positions and involvement in policy development and evaluation. Research supporting this position was provided.

Response: The idea is worth future consideration. We think it would likely present concerns if established as a regulatory requirement at this point in time, in part because it was not presented as a proposal for the public, including stakeholders, to comment on.

Subpart A. Definition of Terms

The significant terms in § 1351.1 reflect current statutory terminology and operating practice. We proposed to revise a number of existing definitions, to add a number of definitions, to delete a few definitions that we do not believe are useful or necessary, and to change the format of the definitions. We requested comment on each new or revised definition. The additions and revisions are intended to reflect both recent changes to the statute and important practices in the administration of the program. The definitions section applies to all grants under the Act. Each individual definition only applies where it is applicable to each type of grant. We received comments on many, but not all, of the definitions.

We are leaving unchanged and as proposed the definitions on which we received no comments. These include the following terms: Act, client, drop-in center, drug abuse education and prevention services, runaway and homeless youth project, short-term training, state, supervised apartments, and technical assistance.

Act

We received no comments on this definition and have retained it in this final rule.

Aftercare

We proposed to revise the definition of Aftercare to read: 'Aftercare means additional services provided beyond the period of residential stay that offer continuity and supportive follow-up to youth served by the program.'

Comment: We received one comment on this definition. That comment suggested that we not limit this term to residential care, pointing out that aftercare could apply to non-residential services. The commenter also suggested adding a reference to the family.

Response: The only two programs affected by this regulation that would have an aftercare component are residential programs (BCP and TLP), so it is not appropriate to expand the aftercare definition to programs that are not residential. Regarding the request to add references to families receiving aftercare services, our statutory mission under § 312(b)(5) of the Act includes a provision to ''develop an adequate plan for providing counseling and aftercare services to such youth, [and] for encouraging the involvement of their parents or legal guardians in counseling . . . '' We interpret the statute as intending the aftercare provision to be provided for youth specifically but we do encourage parental involvement. Therefore, we have retained the proposed rule language in this final rule.

Area

We proposed to delete the existing regulatory definition of ''area'' in the NPRM because a precise definition is not required for the purposes of the program. Receiving no comments, we have deleted it in this final rule.

Background Check

We received a dozen unique comments on this definition and/or on the related requirement in proposed § 1351.20(l), which is numbered § 1351.23(j) in this final rule, (requirements that apply to all Runaway and Homeless Youth Program local services grants) that all grantees ''shall conduct complete background checks on all employees and volunteers.'' These comments represent in total over a hundred individuals and organizations. Most of the comments argued that the definition and/or requirement as worded were too broad and would be both expensive, time consuming (weeks for responses from some states), and disruptive of program operations.

Comments: Several comments objected to making this a national background check, rather than one focused on state records. These comments argued that this would be both burdensome and time consuming. One commenter suggested adding consultants as individuals who should be subject to background checks.

Several commenters objected to subjecting volunteers to the same check as employees (*e.g.,* checking employment records and driving records for volunteers). Other commenters felt that the proposed definition was ambiguous as to what was required for volunteers' background checks. In particular, several commenters pointed out that many volunteers may be one-time attendees at particular events, that some staff and volunteers may not work directly with youth, and that some volunteers may not have unsupervised contact with youth; these commenters recommended exemptions in cases such as these. As examples, volunteers might be used to cook hot meals on holidays, might be guest speakers, or might visit one time as a member of a community group.

Several commenters asked whether the driving record check would apply only to those who transport youth. One commenter pointed out that some kinds of criminal backgrounds do not pose serious risk of harm to the grantee or clients, and asked for clarification that employment of such persons (who might have committed minor crimes as youth) not be prohibited. Several commenters noted that there was ambiguity as to what kind of national check might be required and several pointed out that at least one state performed an out-of-state check only for states in which the person has recently lived.

Response: In order to provide clarity, we have revised the final rule to address many of the above comments. We agree that the proposed rule needed more clarity regarding what kinds of background checks are required. As a result, we have revised the final rule at § 1351.23(j) to clarify that grantees shall conduct a background check on all employees, contractors, volunteers, and consultants who have regular and unsupervised private contact with youth served by the grantee, and on all adults who reside in or operate host homes.

We do not agree with the comments that request background checks only include state records. Both state and national records are necessary for youth safety. However, we did revise the final rule to provide clarity on which background checks are required.

We did not address background check fees in this rule. We understand programs may bear costs associated with background checks and we encourage programs to use the resources available to them and consider ways to allocate funds differently to cover these costs.

In the interest of youth safety and to be mindful that all parties have an obligation to exercise due diligence, our proposed definition and related requirements for background checks have been revised in the final rule. We have revised the definition of background check for employees, consultants, contractors, and employment applicants to include: State or tribal criminal history records (including fingerprint checks); Federal Bureau of Investigation criminal history records including fingerprint checks, (to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award); a child abuse and neglect registry check (to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award); and a sex offender registries check.

The plans, procedures, and standards must identify background check findings that would disqualify an applicant from consideration for employment to provide services for which assistance is made available in accordance with this part. To further protect children's safety, in § 1351.20(l), which is numbered § 1351.23(j) in this final rule, we also require that programs document the justification for any hire where an arrest, pending criminal charge, or conviction is present.

Budget Period

In the NPRM, we proposed defining the term Budget Period as ''*Budget period* means the interval of time into which a multi-year period of assistance (project period) is divided for budgetary and funding purposes. '' We received no comments on this definition. However, this definition was used only in proposed § 1351.34, which, as described below, has been removed from this final rule. Therefore, we are also removing this definition from the final rule.

Case Management

Case management is a central concept in serving client youth, and we proposed to add a definition to read: Case management means assessing the needs of the client and, as appropriate, arranging, coordinating, monitoring, evaluating, and advocating for a package of services to meet the specific needs of the client.

Comment: We received one comment on this definition, asking that we add the phrase ''identification of needs.''

Response: In the interest of clarity we have made the requested change, and have also included new language making clear that identifying the needs of a client should be done in consultation with the client.

Client

We did not receive any comments on this definition and therefore have retained the proposed definition in the final rule.

Congregate Care

We proposed congregate care to read: Congregate care means a shelter type that combines living quarters and restroom facilities with centralized dining services, shared living spaces, and access to social and recreational activities.

Comments: We received two comments on the definition of congregate care suggesting that it too closely aligned with the definition of family home.

Response: We agree with the comments and have adjusted the definition to add the qualification that a congregate care shelter is not a family home.

Contact

Contacting homeless youth is a core function of the entire program, and the primary function of the Street Outreach Program. We proposed to define Contact to read: Contact means the engagement between Street Outreach Program staff and homeless youth in need of services that could reasonably lead to shelter or significant harm reduction. Closely related to this definition, and dependent on this definition, is § 1351.32, where we proposed as a performance measure for the Street Outreach Program the total number of contacts made by the project, giving the projects credit for repeatedly reaching youth.

Comment: We received twelve comments on, either, the definition of contact, the performance measure, or both. Some comments represented multiple individuals and organizations, about 200 in total. Several of these comments argued that the definition should include explicit references to locations frequented by homeless youth. Most argued it should be broadened to include street youth at risk of homelessness or runaway status, not just those already in those situations, pointing out that the statute uses the term ''at risk'' in describing the purpose of the Street Outreach Program.

Response: We appreciate these comments and have made most of the suggested changes. Although the multiple settings in which youth might be contacted are implicit in the proposed definition, we agree that it adds clarity to list some of them. We agree that ''at risk'' youth should count as contacts and are adding this to the definition. Accordingly, we have revised the definition to say that Contact includes ''youth who are at risk of homelessness or runaway status or homeless youth in need of services that could reasonably lead to shelter or significant harm reduction'' and have added a sentence saying, ''[t]his contact may occur on the streets, at a drop-in center, or at other locations known to be frequented by homeless, runaway, or street youth.''

Core Competencies of Youth Worker

Core competencies are essential in providing services that lead to improved outcomes for clients. We proposed to add a definition for core competencies of youth worker to read: Core competencies of youth worker means the ability to demonstrate skills in six domain areas: (1) Professionalism (including, but not limited to, consistent and reliable job performance, awareness and use of professional ethics to guide practice), (2) applied positive youth development approach (including, but not limited to, skills to develop a positive youth development plan and identifying the client's strengths in order to best apply a positive youth development framework), (3) cultural and human diversity (including, but not limited to, gaining knowledge and skills to meet the needs of clients of a different race, ethnicity, nationality, religion/spirituality, gender identity/expression, sexual orientation), (4) applied human development (including, but not limited to, understanding the needs of those at risk and with special needs), (5) relationship and communication (including, but not limited to, working with clients in a collaborative manner), and (6) developmental practice methods (including, but not limited to, utilizing methods focused on genuine relationships, health and safety, intervention planning).

Comment: We received six unique comments on the definition of core competencies of youth workers. One commenter expressed the hope that items number (3) and (4) mean to address and include lesbian, gay, bisexual, transgender, and/or questioning (LGBTQ) youth. Another commenter recommended that item number (6) add the importance of working within an ''ecological framework'' that understands family and community and the role of the worker and client within that framework. Two commenters expressed the hope that youth workers will progress toward becoming certified by either state or national certifying bodies, and are guided in their professional development by competency domains and manuals developed by a national certifying body. One commenter said that all staff need not be trained in all competencies.

Response: We appreciate these comments and have made no changes in the final rule. The details of skills development among youth workers within the domain areas we identify will depend on education, training, and on-the-job experience, much of which will be unique to individual workers and their work assignments. We expect that such education and training will often utilize the perspectives and materials mentioned in the comments, but see no reason to add such detail in a codified rule. Regarding lesbian, gay, bisexual, transgender or questioning (LGBTQ) youth, we do intend the core competencies of youth workers to address and include the needs of these youth, and believe that this is clear in the standards as written. As for the comment on not all staff needing training in all competencies, we agree. We address this in the final text of § 1351.23. We expect youth workers to complete core competency training in order to effectively fulfill their job responsibilities working with runaway and homeless youth. We do not expect that every staff person to be trained in core competencies, but all staff members who work directly with youth should receive training sufficient to meet the stated core-competencies of youth workers.

Counseling Services

We proposed to revise the definition of counseling services to include runaway prevention and intervention related services as follows: Counseling services means the provision of guidance, support, referrals for services including, but not limited to, health services, and advice to runaway or otherwise homeless youth and their families, as well as to youth and families when a young person is at risk of running away. These services are designed to alleviate the problems that have put a youth at risk of running away or contributed to his or her running away or being homeless. We received six unique comments on our proposed revision, several of them endorsed by many individuals or organizations.

Comment: One commenter asked why the first sentence of the definition didn't directly say homeless.

Response: We think that the definition as worded, which includes the phrase ''runaway or otherwise homeless youth'', clearly includes homeless youth, and have not made this change.

Comment: One commenter said that counseling services should explicitly include therapeutic services, including trauma-informed psychotherapy. Relatedly, two other comments recommended removing the word ''advice'' and replacing it with ''clinical

services'' to include mental health counseling and psychotherapy.

Response: We do not agree with the comments suggesting that we require therapeutic or clinical mental health care services in place of ''advice.'' The Act does not authorize grantees to provide health care services directly and our grants do not include funding for professional health care providers. Our grantees' counseling services are intended to provide both advice and referrals when mental health services are needed (see our following discussion of health care services). Accordingly, we have not made this change.

Comment: Two commenters said that many youth were ''forced out'' of family homes because of their sexual orientation or gender identity, that a term such as ''where appropriate and in the best interest of youth'' should condition the language concerning advice and counseling for families, and that the word ''families'' should include ''individuals identified by such youth as family'' (to include legally unrelated individuals with whom youth have ''strong, supportive relationships''). These comments pointed out that parental abandonment or rejection is often the cause of runaway or homeless status among LGBTQ youth.

Response: We agree with the commenters who focused on the point that youth are often ''forced out'' of family homes. As to advice and counseling, the Act expresses a strong preference for reuniting youth and their families, and therefore, we expect grantees to work towards reunification as appropriate and safe for youth. Sometimes it will be impossible to locate families; the youth or family or both may refuse counseling; or some other impediment to reunification may arise. Grantees are not expected to achieve the impossible. Taking into consideration the statute and this comment, we have added language that counseling should be provided ''as appropriate.'' We have also added the phrase ''in consultation with clients'' to emphasize that these services and advice must reflect the unique situation that faces each particular youth.

Furthermore, based on a comment received urging ACF to specifically prohibit conversion therapy in § 1351.19 of the proposed rule we are adding a sentence to the definition of ''counseling services'' to specifically exclude conversion therapy and referrals to conversion therapy by adding language at the end of the definition that says ''[a]ny treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression is prohibited.'' This change is described further in the comments to § 1351.19 of the proposed rule in this preamble.

Demonstrably Frequented by or Reachable

We proposed to delete the existing regulatory definition of ''Demonstrably frequented by or reachable''. The definition is unnecessary. No commenters raised any concern over this change and this final rule deletes it.

Drop-In Center

We received no comments on the proposed definition and have left it unchanged in the regulatory text.

Drug Abuse Education and Prevention Services

Drug abuse education and prevention services are important, and are defined under that term in the Act (section 387(1)). We proposed to broaden the substance of the statutory definition in regulatory text to read: 'Drug abuse education and prevention services means services to prevent or reduce drug and/or alcohol abuse by runaway and homeless youth, and may include (1) individual, family, group, and peer counseling; (2) drop-in services; (3) assistance to runaway and homeless youth in rural areas (including the development of community support groups); (4) information and training relating to drug and/or alcohol abuse by runaway and homeless youth to individuals involved in providing services to such youth; and (5) activities to improve the availability of local drug and/or alcohol abuse prevention services to runaway and homeless youth.' Our reasons for the broadening of this definition are two-fold. First, we note that the RHY statute explicitly contemplates services to address alcohol abuse in section 387(5). Second, the inclusion of alcohol abuse in addition to drug abuse is standard practice in the substance abuse field as is demonstrated in the definition used by the Substance Abuse and Mental Health Services Administration: 'substance abuse means the abuse of alcohol or other drugs.' We received no comments on this definition and it is retained as proposed.

Health Care Services

In the proposed rule, the definition of health care services read: 'Health care services means physical, mental, behavioral and dental health services and, in the case of Maternity Group Homes mean those provided to the child of the youth; and where applicable and allowable within a program, family or household members of the youth shall receive information on appropriate health related services.'

Comment: We received four unique comments on the proposed definition, some of these representing multiple individuals and organizations. Three comments pointed out that the language as drafted did not clearly cover both youth and any children of these youth. A fourth comment generally praised the proposed definition, but raised two issues, one concerning the need for longer-term treatment, and one concerning the confidentiality of private health information that might be provided to family members.

Response: We have revised the definition to state more clearly that health care is not only for the client youth, but also in some cases for the child of the youth. We agree that longer-term treatment and privacy of medical information are important issues. We do not believe, however, that they should be addressed in a definition and respond to this comment in our discussion of requirements concerning referral services and information confidentiality. Additionally, based on a comment received in § 1351.19 of the proposed rule to specifically prohibit conversion therapy, we are adding a sentence to the definition of ''health care services'' in § 1351.1 to specifically exclude conversion therapy and referrals to conversion therapy by adding language at the end of the definition that says ''[a]ny treatment or referral to treatment that aims to change someone's sexual orientation, gender identity, or gender expression is prohibited.''

Home-Based Services

We proposed to follow the substance of the statutory definition (section 387(2)) of home-based services to read as follows: Home-based services means services provided to youth and their families for the purpose of preventing such youth from running away or otherwise becoming separated from their families and assisting runaway youth to return to their families. It includes services that are provided in the residences of families (to the extent practicable), including intensive individual and family counseling and training related to life skills and parenting.

Comment: We received three unique comments on the proposed definition of home-based services, representing in total about 50 individuals and organizations. One commenter suggested that we retitle this definition to refer to ''family support and reunifications services'' rather than ''home-based'' services, to reflect the

clear purpose of the services as defined. This commenter also recommended adding a definition for supportive housing to capture the need for in-home services when the youth does not live with his or her family. The other commenters said that the definition should specifically allow for the case where family reunification is not in the best interest of the youth.

Response: We have not changed the definition. The term ''home-based'' is the statutory term used in the Runaway and Homeless Youth Act and we see no compelling reason to depart from the terminology of the statute. The commenters are correct that the focus is on family reunification, but we think ''home-based'' is well understood to mean services provided in the home of the youth's family. Underlying both sets of comments is the point that there will be cases where family reunification is not in the best interest of the youth. We agree with this point. However, nothing in this definition (or elsewhere in the rule) prevents or inhibits either youth or their service providers from considering that question and reaching a decision that home-based services are not possible or appropriate in a particular case, even though they are the preferred outcome in the great majority of cases. We deal further with the issue of ''best interest of the youth'' in our discussion of additional requirements that apply to all local services grants.

Homeless Youth

Homeless youth is an essential definition because it identifies individuals eligible to be served under the Act. We proposed to revise the previous definition to read as follows, paraphrasing the Act (section 387(3)): 'Homeless youth means an individual who cannot live safely with a parent, guardian or relative, and who has no other safe alternative living arrangement. For purposes of Basic Center Program eligibility, a homeless youth must be less than 18 years of age (or higher if allowed by a state or local law or regulation that applies to licensure requirements for child- or youth-serving facilities). For purposes of Transitional Living Program eligibility, a homeless youth cannot be less than 16 years of age and must be less than 22 years of age (unless the individual commenced his or her stay before age 22, and the maximum service period has not ended).'

Comment: We received six unique comments on this definition, one endorsed by many individuals and organizations, focusing on a number of specific issues. One commenter asked if a youth could stay in the Basic Center program if an individual enrolled before age 18 and turned 18 while in the programs, or whether that meant that the newly 18 year old individual would become his or her own legal guardian. Another asked whether the Basic Center age could be raised to 19. Two commenters asked whether the age for Transitional Living could be raised, mentioning 24, 24½, or 25 as options. One commenter recommended that the term ''guardian'' be replaced by ''legal guardian.'' One commenter requested clarification that ''safety'' be interpreted broadly to include not only safety from physical harm, but also from emotional and mental harm. Another comment noted conflicts between state laws and federal policies which include different ages for services. The commenter also noted that the terms ''cannot live safely'' and ''no other safe alternative'' are not included in some state definitions but are included in the federal definition of youth homelessness.

Response: These age limits and the restrictions related to safe environments are taken from the federal statute's definition of homeless youth in section 387(3) of the Act. We agree that there are circumstances where these strict limitations may inhibit service provision, but note that nothing prevents a state government, a local government, or a private organization from funding services directly for older youth or those who otherwise do not qualify under federal law. Regarding the Basic Center program age limits, section 387(3)(A)(i) says in the case of a youth seeking shelter in a center under the Basic Center program, a homeless youth is ''less than 18 years of age or is less than a higher maximum age if the State where the center is located has an applicable State or local law (including a regulation) that permits such higher maximum age in compliance with licensure requirements for child- and youth-serving facilities.'' For the Transitional Living Program, section 387(3)(A)(ii) says youth who can be served in the program must be not less than 16 years of age and either (I) less than 22 years of age; or (II) not less than 22 years of age, as the expiration of the maximum period of stay permitted if such individual commences such stay before reaching 22 years of age.

The word ''guardian'' normally means an officially appointed legal guardian, but for consistency with other text we have added the word ''legal'' to our definition. We agree with the comment that ''safe'' and ''safely'' encompass avoiding mental (including emotional) and physical harm. We further note that Runaway and Homeless Youth projects must also serve youth at risk of running away or becoming homeless, which is particularly important when either physical or mental abuse or family instability is involved. Finally, while there are some instances in which state definitions of ''youth homelessness'' differ from federal law, the federal statutory language which governs RHY programs is very specific and cannot be amended without action from Congress. This definition aligns with the existing statutory language in the Act.

Host Family Home

We proposed host family home to read: Host family home means a family or single adult home that provides shelter to a homeless youth.

Comment: We received four unique comments on this definition, with over 100 individuals and organizations endorsing one set of comments. Two comments said that our definitions of congregate care and host family home were essentially identical. A third comment said that in at least one state what we called a host family home would be allowed to serve two homeless youth, not merely a single youth. The fourth comment asked why the word family was used rather than host, and whether a home could be a family home if only one adult was present.

Response: While we agree that the definitions of 'congregate care' and 'host family home contain similar elements, we do not agree that our definitions are essentially identical. A host family home implies the presence of a person or family who rents or owns the building or apartment and uses it as its own domicile, and takes in or ''hosts'' one or possibly two homeless youth who will live with the person or family. If no homeless youth are present, it is still that person's or family's domicile. For clarity, we have revised the definition to include that a host family home means a home or domicile. A family retains discretion as to whether it hosts a particular youth or any youth. In contrast, a congregate care shelter need not be and ordinarily would not be the domicile of a family, would ordinarily serve a larger number of homeless youth, would have essentially all spaces shared, and would have organized social and recreational activities. Congregate care facilities are also normally licensed as shelters, whereas a family host home may be able to host unrelated individuals without a license. As to calling the home by that term, we were following the statutory terminology. As our definition states, a family may be a single adult. We do agree that there are circumstances where a family might be willing and able to host more than one youth (for example,

multiple siblings), and have revised the definition to allow for that option.

Intake

Intake services are essential functions under the Act. We proposed to define intake to read: 'Intake means a process for gathering information to assess eligibility and the services required to meet the immediate needs of the client.'

Comment: We received three comments on the definition of intake, One commenter recommended that the intake definition include a clause stating that ''intake may occur in the context of a community-level coordinated entry or assessment system,'' with the justification that HUD has Continuum of Care regulations that can serve an important intake role. Another comment made the same point about the HUD process without recommending specific language. One commenter suggested that it would be beneficial for the program if ACF encouraged grantees to participate in broader planning processes within Continuum of Care areas.

Response: We agree that all the comments raise valid concerns. We have added to the intake definition: 'The intake process may be operated independently but grantees should, at minimum, ensure they are working with their local Continuum of Care to ensure that referrals are coordinated and youth have access to all of the community's resources, given the major role that HUD-funded programs perform in serving homeless individuals of all ages. We have not, however, limited it to any particular system or process, since states or communities need flexibility to experiment or supplement. We did not include a planning and coordination requirement in the definition, as it more appropriately belongs in our requirements. We proposed a requirement for participating in training and technical assistance related to coordinated services in local networks in proposed § 1351.20(a), which applies to all local service grants, and are revising it in this final rule to include participation in coordinated networks (one of which would be Continuum of Care areas).

Juvenile Justice System

Extremely important in this program are interfaces between Runaway and Homeless Youth projects and the juvenile justice system. We received no comments on our proposed language but have recognized that only the term ''juvenile justice system'' is referenced in the Act and in other places in regulatory text. For this reason, we have deleted the words ''institutions, or authorities'' from the defined term.

''Law Enforcement Structure'' and ''A Locality''

In the proposed rule, we stated that ''law enforcement structure'' and ''a locality'' are definitions that are unnecessary in these regulations and accordingly we proposed to delete them. We received no comments on these proposals, and the final rule deletes these definitions.

Maternity Group Home

For runaway and homeless youth who are pregnant or who have children, congregate or scattered-site maternity-related services are essential. Accordingly, we proposed: 'Maternity group home means a community-based, adult-supervised transitional living arrangement where client oversight is provided on site or on-call 24 hours a day and that provides pregnant or parenting youth and their children with a supportive environment in which to learn parenting skills, including child development, family budgeting, health and nutrition, and other skills to promote their long-term economic independence and ensure the well-being of their children.'

Comment: We received one comment. The commenter asked what was meant by ''transitional'' and what justification there would be for placement into other settings such as individual apartments if more time were needed to assess youth functioning.

Response: For the purposes of the RHY Maternity Group Home program, ''transitional'' simply means that these services are temporary and limited either by age and/or by function. For example, maternity group homes may be specifically tailored to serve pregnant or parenting youth who are transitioning to self-sufficiency. The basic purpose of a maternity group home is to prepare youth for a more permanent home, and the duties of a group home include assessing readiness for that change. The final rule leaves this definition unchanged.

Outreach

We proposed to add a definition for outreach to read as follows: 'Outreach means finding runaway, homeless, and street youth, or youth at risk of becoming runaway or homeless, who might not use services due to lack of awareness or active avoidance, providing information to them about services and benefits, and encouraging the use of appropriate services.' Outreach includes low-barrier services such as food packs and personal hygiene packs.

Comment: We received two comments on this definition. One commenter asked if a drop-in center could perform properly, and be funded, without performing a street outreach function. The other commenter suggested that the definition include, as one outreach service purpose, providing information about housing options and family reunification.

Response: We think that both commenters raise good points but the first does not distinguish between the definition of a function and the obligations of grantees. Our definitions are not intended to prescribe the obligations of grantees, but simply to describe the function or service to reduce ambiguity. Regarding the first comment, while many grantees may perform both drop-in center and outreach functions, our rules do not require that all grantees perform both functions. These are distinct services. We do not prohibit outreach providers from giving additional information, beyond that which is part of the core function. Regarding the second comment, our standards for Street Outreach Program grantees require them to provide services that are designed to assist clients in leaving the streets, which may include housing or family reunification (see § 1351.27 of the final rule) as well as to perform outreach services. Accordingly, we have not changed the definition of outreach in the final rule.

Risk and Protective Factors

We include risk and protective factors under the list of technical assistance or short-term training that may be determined as necessary by HHS as a condition of funding. Therefore, we proposed a definition of risk and protective factors to read: 'Risk and protective factors mean those factors that are measureable characteristics of a youth that can occur at multiple levels, including biological, psychological, family, community, and cultural levels, that precede and are associated with an outcome. Risk factors are associated with higher likelihood of problematic outcomes, and protective factors are associated with lower likelihood of problematic outcomes. While we received no comments on this change, it was deemed appropriate to frame protective factors as positive impact outcomes and so we have made minor wording changes to reflect that protective factors are associated with a higher likelihood of positive outcomes. We made other minor changes in order to mirror the definition used across the

federal government and on the *Youth.gov* Web site.

Runaway Youth

Another core statutory term is runaway youth. We proposed to update the existing definition to reflect the Act (section 387(4)) and to read: Runaway youth means an individual under 18 years of age who absents himself or herself from home or a place of legal residence without the permission of a parent or legal guardian.

Comment: We received one comment on the proposed definition. This comment, representing the views of many individuals and organizations, supported our proposed definition but asked whether it limited the ability of grantees to serve youth who leave their place of legal residence at the behest of a parent or legal guardian.

Response: We appreciate the importance of this question, since it is vital that the program serve youth who are forced or coerced to leave their homes. The answer, however, is not to change the definition of runaway youth, but to recognize that the program serves both runaway and homeless youth, and that the latter group includes those who have lost their family home, such as through physical or verbal pressure from parents or guardians. Therefore, we have left this definition unchanged in this final rule.

Runaway and Homeless Youth Project

We received no comments on the proposed definition and it is unchanged in the final rule.

Safe and Appropriate Exits

We proposed to add a definition of Safe and Appropriate Settings When Exiting Basic Center Program Services or Transitional Living Program Services. The proposed definition said that Safe and Appropriate Settings When Exiting Basic Center Program Services or Transitional Living Program Services means settings that reflect achievement of the intended purposes of the Basic Center and Transitional Living Programs as outlined in section 382(a) of the Act. Safe and appropriate settings when exiting Basic Center Program Services or Transitional Living Program Services are *not* exits:

- To another shelter;
- to the street;
- to a private residence, other than a youth who is staying stably with family, if the youth is not paying rent;
- to another residential program if the youth is not paying rent or if the youth's transition to the other residential program was unplanned;
- to a correctional institute or detention center if the youth became involved in activities that lead to this exit after entering the program;
- to an unspecified other living situation; or
- to a living situation that is not known.

By defining ''Safe and Appropriate Settings when exiting Basic Center Program services or Transitional Living Program services,'' our intent was to move the field beyond just finding a place for the youth to stay. However, as discussed in the following responses to the several dozen comments we received, all requesting clarifications or changes to the proposed definition, we have made significant changes to the definition in the final rule. Almost all commenters found the proposed limitations on safe and appropriate settings to be inconsistent with commonly used best practices and some desirable outcomes. Some of these commenters also raised concerns about achieving performance standards with such restrictions in the definition.

Comment: We received many unique comments arguing that in some situations a youth may need to go to another shelter, including shelters that provide for special needs. Most of these commenters pointed out that a minor is allowed to stay in a Basic Center for 21 days, and if not unified with this family or placed in Foster Care in that period of time might appropriately go to a Transitional Living Program, which provides services up to 21 months. Also, one commenter pointed out 21 days is often not enough time to resolve issues and transition to a stable family arrangement.

Response: We agree. Indeed, one of the appropriate exits from the Basic Shelter Program is to the Transitional Living Program. We have revised the final rule to delete ''another shelter'' from the list of unsafe exits.

Comment: Many unique comments addressed the clause concerning exit to a private residence. Most of these pointed out that the private residence of a friend might not involve rent payment and might be an appropriate exit, that in most cases minors will not be able to sign a lease and pay rent, and that some programs such as Job Corps, Foster Care, and Transitional Living do not charge rent. Several commenters pointed out subsidized housing sometimes involves rent-free accommodation until the renter has income. These commenters recommended that we delete this prohibition on the use of free rental housing. Some commenters also recommended that we redefine family to include unrelated individuals thought of as family by the youth.

Response: We agree that payment of rent is not a useful demarcation and have modified the definition accordingly, both as it applies to private residences and other residential programs. We also agree that there are cases where stays with an adult relative who is not a member of the immediate family (*e.g.,* grandparent, aunt, or uncle), with an adult family friend, or with an adult friend, would be appropriate exits. Accordingly, we have modified the clause on private residences to allow for such situations, where they involve a stable arrangement. To address the recommendations about unrelated individuals, we revised the rule to allow for placement with unrelated individuals in some cases.

Comment: Several commenters addressed other possible safe exits that were not clearly addressed under the clauses on either private housing or other residential programs. The commenters who raised the issue about supportive housing (rent free or not rent-free) also implicitly made the point that some older homeless youth will be placed into their own housing units, without any other resident. One commenter asserted that the proposed clause concerning other residential programs did not clearly include Child Welfare Services.

Response: We agree that the pertinent clauses under the definition as proposed were ambiguous as to supportive housing as well as Foster Care or other Child Welfare Services. We have revised the clause on other residential programs to more clearly include such programs. In particular, our recognition of planned exits to other residential programs as being safe is intended to cover exits to permanent housing and to permanent supportive housing, as well as to foster home placement.

Comment: Several commenters recommended that we drop from the list of unsafe exits the case where a youth's activities after entering the program lead to placement in a correctional institute or detention center. The commenters argued that clearing up prior warrants might lead to jail time, or that this could create barriers to serving youth with many prior law enforcement encounters, such as human trafficked youth. One commenter was concerned that it could count against discharge rates for shelter providers.

Response: We do not agree that clearing up warrants that apply to actions before the youth entered the program come within this definition. The proposed definition was worded to

exclude such actions. We do not believe distinguishing prior and new law enforcement encounters and issues will be difficult for grantees or will create barriers. Within the Runaway and Homeless Youth Program, we are committed to building capacity amongst RHY providers to identify and assist trafficking victims through training and funding opportunity announcements. We are also running a demonstration program initiative with our RHY and family violence program to expand outreach to service providers that may have contact with domestic victims of human trafficking. Since many programs for human trafficking victims are run by law enforcement, we have slightly refined our definition of exits that are not safe and appropriate.

Comment: One commenter asked that we exempt an exit to a living situation that is not known by short stay residents who leave the program after fewer than seven days of residence.

Response: We agree that transitory stays are a problem. Nonetheless, those that result in exits to unknown destinations must be characterized as unsuccessful. We have not accepted the proposed change.

Comment: One commenter asked that we delete ''unplanned'' exits to another residential program from the list of unsafe exits.

Response: We agree that there are cases in which the needs assessment, counseling, and guidance provided by the program will not have identified some particular option that would be beneficial. Indeed, the client himself may find that option, or learn of it from other sources to which he had been referred. We have changed the language to refer to ''inconsistent with the youth's needs.''

Comment: We received several comments arguing that it would be better to define safe and appropriate exits in terms of those that are safe rather than those that are not, or alternatively as those that are both. One listing of safe exits included independent living, residential apprenticeships, higher education, family, mental health or substance abuse program, military service, or any other planned residential program.

Response: We agree that defining safe and appropriate exits in terms of those that are safe and are not safe is a good approach and have changed this in the final regulatory text. We have crafted language in an effort to demonstrate what safe and appropriate exits generally look like and have incorporated some of the concepts suggested so that a safe and appropriate exit will include: (1) To the private residence of a parent, guardian, another adult relative, or adult family friend that has the youth's best interest in mind and can provide a stable arrangement; (2) to another residential program if the youth's transition to the other residential program is consistent with the youth's needs; or (3) to independent living if that is consistent with the youth's needs and abilities. In addition, we note that in comments received, commenters referred to ''safe and appropriate exits'' instead of the longer title proposed that read ''safe and appropriate settings when exiting Basic Center Program services or Transitional Living Program services.'' For this reason, we have shortened the definition to only refer to ''safe and appropriate exits'' in this final rule.

Service Plan or Treatment Plan

We also proposed to define a service plan, sometimes called a treatment plan, to read: Service plan or treatment plan means a written plan of action based on the assessment of client needs and strengths and engagement in joint problem solving with the client that identifies problems, sets goals, and describes a strategy for achieving those goals. To the extent possible, the plan should incorporate the use of evidence-based or evidence-informed interventions.

Comment: We received two unique comments on this proposed definition. One commenter asked whether training and technical assistance will include information on evidence-based practices. The other comment (joined by many individuals and organizations) pointed out that the preamble text, but not the regulatory text, included the concept of safety planning. That comment also asked that safety planning include suicide prevention and other mental health crises.

Response: FYSB will provide training and technical assistance to grantees by sharing evidence-based service planning practices. As to safety planning, we acknowledge the oversight and have added safety planning to the regulatory definition in the final rule. We have revised the proposed definition to include, in the final rule, ''As appropriate, the service and treatment plans should address both physical and mental safety issues.'' This covers all such issues, but does not require that plans explicitly address every unforeseen circumstance.

Short-Term Training

We received no comments and the final rule contains the proposed definition unchanged.

State

We did not receive any comments and have left this definition unchanged in the final rule.

Street Youth

We proposed to define street youth to read: 'Street youth means an individual who is a runaway youth or an indefinitely or intermittently homeless youth who spends a significant amount of time on the street or in other areas that increase the risk to such youth for sexual abuse, sexual exploitation, prostitution, or drug and/or alcohol abuse. For purposes of this definition, youth means an individual who is age 21 or less.' This definition reflects the statutory language from the Act (section 387(6)).

Comment: We received one comment, which asked why we used age 21 or less in the definition.

Response: The statute defines street youth to include a runaway youth or indefinitely or intermittently homeless youth. The statutory definition of homeless youth as defined in section 387(3) states that youth must be less than 22 years old. Accordingly, we have made no change in the final rule.

Supervised Apartments

We received no comments on the definition of 'supervised apartments' and have left the regulatory text unchanged in this final rule.

Technical Assistance

We received no comments on this definition and have left it unchanged in the final rule.

Temporary Shelter

Finally, we proposed to update the definition of temporary shelter to read: 'Temporary shelter means all shelter settings in which runaway and homeless youth are provided room and board, crisis intervention, and other services on a 24-hour basis for up to 21 days.'

Comment: We received three unique comments on the proposed definition. One commenter said that 21 days was too short and should be extended to 30 days. One said that the definition should say explicitly up to 21 days ''or until such time as the statute allows.'' One said that the federal rule should allow longer periods of stay ''where permitted by state law.''

Response: We appreciate these suggestions. Regarding the 21 day time limit, the Act is explicit at § 311(a)(2)(B) that services provided through the Basic Center Program shall include ''safe and appropriate shelter provided for not to exceed 21 days.'' As to state law,

nothing precludes a state or private organization from subsidizing longer stays with state or private funding. We have modified the definition to make clear that 21 days is a restriction on the use of RHY funds through the Basic Center Program, not a restriction on the length of stay permitted by the facility. Temporary shelter is now defined as all Basic Center Program shelter settings in which runaway and homeless youth are provided room and board, crisis intervention, and other services on a 24-hour basis for up to 21 days. The 21 day restriction is on the use of RHY funds through the Basic Center Program, not a restriction on the length of stay permitted by the facility.

We also received a number of comments suggesting that we add definitions to the final rule. We address these suggestions below.

Culturally and Linguistically Appropriate Services

Comment: One comment endorsed by about 50 individuals and organizations recommended that we add a definition for ''culturally and linguistically appropriate services.'' This comment acknowledged that throughout the proposed rule ACYF had demonstrated a clear intent that grantees provide services that are culturally sensitive and that meet the needs of diverse youth. The commenters suggested that this obligation be defined and that the definition include as its only substantive content reference to a set of service and governance standards that are promoted by the U.S. Public Health Service for use in health care settings (these standards are titled ''Culturally and Linguistically Appropriate Standards in Health and Health Care,'' and abbreviated CLAS). In effect, the commenters proposed that we make CLAS a binding standard for our grantees.

Response: Though this final rule does not adopt the CLAS standards, it maintains the proposed rule's intent that grantees provide culturally and linguistically sensitive services and we include training on this for grantees in § 1351.23(a) of this final regulation.

Family

Comment: One commenter asked that we add a definition for ''family,'' pointing out that many LGBTQ youth have adopted ''families of choice'' with adults or caregivers other than their parents or legal guardians. Other commenters made similar points in comments on specific definitions or requirements that referred to families.

Response: We appreciate and agree with the underlying concern. In key places in the proposed and final rule, we make clear that while family reunification with the legal parents or guardian is the preferred option and in most cases in the best interest of youth, we allow for exceptions. While we are not defining the term ''family'', we have revised language throughout this final rule to allow for flexibility in instances where it may not be safe or appropriate for the grantee to contact a client's parents or legal guardians.

Supportive Housing

Comment: We received one comment requesting that we add a definition for supportive housing.

Response: In as much as supportive housing is not a service provided through these grants, we see no need to define it or any other type of non-time-limited housing. Aftercare plans can, as appropriate, address this or any other service.

Subpart B. Runaway and Homeless Youth Program Grants

The previous rule contained a number of sections dealing with the purposes of the program, eligibility for grants, priority for grants, matching requirements, the period of grant awards, allowable costs, application procedures, criteria for grant funding decisions, and additional information for grantees. We proposed revisions to all of these sections as well as to the title of the subpart to be Runaway and Homeless Youth Program Grants. These sections apply to all grants under the program.

Purpose

Currently § 1351.10 asks, ''What is the purpose of the Runaway and Homeless Youth Program grant?'' We proposed to re-title this section ''What is the purpose of Runaway and Homeless Youth Program grants?'' This change in title reflects the growth of the program over time from the core Basic Center Program to a broader range of grant types and purposes. Relatedly, we proposed to amend the statement of purpose to emphasize not only transitional living services and other services added in recent years, but also the increasing emphasis on prevention and identifying the vulnerability of these youth. Under the proposal, the purpose of Runaway and Homeless Youth Program grants would be to establish or strengthen community-based projects to provide runaway prevention, outreach, shelter, and transition services to runaway, homeless, or street youth or youth at risk of running away or becoming homeless. We stated that youth who have become homeless or who leave and remain away from home without parental permission are disproportionately subject to serious health, behavioral, and emotional problems.[1] [2] They lack sufficient resources to obtain care and may live on the street for extended periods, unable to achieve stable, safe living arrangements, during which they may be in danger.[3] [4] Many are urgently in need of temporary shelter and services,[5] including services that are linguistically appropriate, responsive to their complex social identities (*i.e.,* race, ethnicity, nationality, age, religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, physical ability, language, beliefs, values, behavior patterns, or customs), and acknowledge the environment they come from. We proposed that services should have a positive youth development approach that ensures a young person has a sense of safety and structure; belonging and membership; self-worth and social contribution; independence and control over one's life; skills to develop plans for the future and set goals; and, closeness in interpersonal relationships.[6] To make a successful transition to adulthood, runaway youth, homeless youth, and other street youth also need opportunities to complete high school or earn a general equivalency degree, learn job skills, and obtain employment. HHS operates three programs to carry out these purposes through direct local services: The Basic Center Program, the Transitional Living Program (including Maternity Group Homes), and the Street Outreach Program. HHS conducts three additional activities to support achievement of these purposes: Research, evaluation, and service projects; a national communications system to assist runaway and homeless youth in communicating with service providers; and technical assistance and

training. The proposed rule covers all of these activities.

Comment: We received several comments on the purpose of the program. Two commenters praised the proposed text for its inclusion of LGBTQ in its statement of the need to serve all runaway and homeless youth. One commenter praised the statement of purpose and proposed that we adopt the U.S. Public Health Service's guidelines of Culturally and Linguistically Appropriate Services in Health Care (CLAS) as standards. A third commenter stated that we should add ''trauma-informed care'' as one of two practice frameworks for youth intervention to this section.

Response: As previously explained, though this final rule does not adopt the CLAS standards, it maintains the proposed rule's intent that grantees provide culturally and linguistically sensitive services and we include training on this for grantees in § 1351.23(a) of this final regulation. As to ''trauma-informed care,'' we believe that the statement of purpose already encompasses this and other practices on dealing with the traumatic circumstances that affect runaway and homeless youth. The proposed text is adopted virtually without change (or with only stylistic changes) to the final rule.

Eligibility for Grants

The existing rule asks in § 1351.11 ''Who is eligible to apply for a Runaway and Homeless Youth Program grant?'' The eligibility requirements of the program have not changed significantly over the years but we proposed changes to this section to conform the regulatory language to the current statute. We proposed to state that all 'public (state and local) and private non-profit entities, and coordinated networks of such entities, are eligible to apply for a Runaway and Homeless Youth Program grant unless they are part of the law enforcement structure or the juvenile justice system.' While specific regulatory language is not needed, we pointed out that most faith-based organizations meet the regulatory definition of non-profit. We received no comments on this section. However, because we are removing the definition of ''law enforcement structure'' in this final rule, we have deleted the reference to ''law enforcement structure'' in this section.

Priority for Awards

The existing regulation addresses priority for awards. In consideration of the numerous comments and varying points of view on these issues, we proposed significant and streamlined changes to the language regarding grant award priorities in § 1351.12. We received more than a half dozen unique comments on the proposed priorities and on ways to improve or refine them.

Comment: Several commenters stated that our proposed language did not clearly show consistency with the statutory preference for awarding grants to applicants with past experience in serving runaway or otherwise homeless youth and recommended regulatory language to say this. One commenter suggested preference for grantees seeking continuation funding. One commenter gave specific recommendations for the amount of preference, *e.g.,* 1 to 2 points for 10 years of successful experience. Another commenter recognized that the language did allow credit for experience but asked what objective measures or weights could be used. Several commenters recommended that points be given for successful monitoring visits. One of these stated that his project had been funded annually since 1986 but was dropped from funding despite successful performance and excellent monitoring scores. This commenter argued there should be an appeal process in case of mistakes in the award process.

Response: With respect to the comments raising the issue of the statutory preference for prior experience, it is important to note that the proposed regulatory text mirrors the statutory language exactly. We note that the statute itself does not require us to give preference to an applicant with prior experience who has not performed as well as other applicants are likely to perform. The RHY statute requires that performance standards are incorporated into grantmaking, monitoring, and evaluation. For clarity and consistency, this requirement was added to the regulatory text. As to those comments proposing specific weights for our priorities or asking that those weights be included in the final rule, or suggesting other priorities for existing grantees, we are also not making those suggested changes. Annual funding opportunity announcements (FOAs) provide far more flexibility than codified regulations to enable HHS to tailor detailed rating factors or their weights to best accommodate the needs of the particular activities. We will, however, consider the specific proposals we received in modifying our priorities and rating methods in the next round of FOAs.

Comment: A number of commenters addressed our proposed preference for applications costing $200,000 or less. Most of these commenters noted that the statute imposes this dollar limit only on the Basic Center Program. Some commenters also criticized what one called a ''flat cap'' on a funding preference for Street Outreach and Transitional Living projects with budgets of $200,000 or less, and expressed concern that this is an absolute priority. One commenter pointed out that the proposed preference would reduce incentives to obtain other public or private resources, and recommended that at the very least the preference not include in-kind resources. This same commenter also argued that larger organizations with multiple grants could use creative accounting techniques to allocate overhead costs. Several of the commenters on this issue also pointed out that this priority would penalize more effective programs with higher budgets. Some of these commenters also suggested that the dollar limit created adverse incentives with respect to hard to serve youth or the most disadvantaged youth, such as many LGBTQ youth.

Response: We agree with comments that pointed out that the statutory limit relates only to the Basic Center Program and have revised the regulatory text in paragraph (a) to follow section 313(b)(2) of the Act which only applies a preference for applications less than $200,000 to Basic Center grants. We have added a clause to this provision to say that the preference will be for applications less than $200,000 ''or such figure as Congress may specify'' to account for future statutory changes. In addition, we have added in statutory language for prioritizing other types of RHY grants.

In paragraph (b), for the Transitional Living Program, we added language from section 322(b) of the Act for prioritizing grants which says ''[i]n selecting eligible applicants to receive grants under this part, the Secretary shall give priority to entities that have experience in providing to homeless youth shelter and services of the types described in subsection (a)(1)'', which references Transitional Living Programs.

In paragraph (c), we have added language from section 351(b) of the Act which says that in selecting applicants to receive grants under the Street Outreach Program, the Secretary shall give priority to public and nonprofit private agencies that have experience in providing services to runaway and homeless and street youth.

In paragraph (d), for the national communications system, we have added language that follows section 331 of the Act with a slight modification. The

current statutory requirement is that the ''Secretary shall give priority to grant applicants that have experience in providing telephone services to runaway and homeless youth.'' To account for changes in technology, in this final rule we will prioritize grantees who have experience providing ''electronic communications services'' to runaway and homeless youth, including telephone, Internet, mobile applications, and other technology-driven services. This change is in keeping with the purposes of the provision and advances those purposes. We note that section 303 of the Act authorizes the Secretary to issue rules she considers necessary or appropriate to carry out the purposes of the Act.

In paragraph (e), to prioritize grants for research, evaluation, demonstration and service projects, we added language to this section in accordance with section 343(b) and (c) of the Act.

In paragraph (f), we added language to specify that the performance standards will be integrated into the grantmaking, monitoring, and evaluation processes for the Basic Center Program, Transitional Living Program, and the Street Outreach Program. We also indicated that specific details about how performance standards will be considered, along with examples of performance documentation, will be provided in the annual funding opportunity announcements.

To be clear, a grant application in an amount larger than $200,000 from a project with demonstrated or likely superior performance can indeed receive an award.

We also understand that serving disadvantaged youth can require additional financial investment. We want to emphasize our dedication to ensuring that all youth are served, including LGBTQ youth (as noted by the commenter) and youth who have experienced adverse circumstances, including physical and mental abuse, drug use, human trafficking, and other circumstances. We will address additional criteria for prioritizing grants to serve these vulnerable young people within our annual FOAs.

Comment: One commenter recommended that funding priority under § 1351.12 be given to applicants currently accredited by a national accrediting body.

Response: Accreditation is another example of a possible future criterion for use in setting priorities or rating factors in annual FOAs. From currently available evidence, we do not have a sufficient basis to justify including such preference in a codified rule.

Comment: A commenter endorsed by many individuals and organizations argued a priority be added to § 1351.12 for applicants providing services without discrimination on the basis of sexual orientation or gender identity and that can best provide services meeting the needs of LBGT youth. This commenter also suggested adoption of ''culturally and linguistically appropriate'' (CLAS) services as a priority, and for adoption of nondiscrimination requirements at 42 U.S.C. 18116 (section 1557 of the Affordable Care Act).

Response: These civil rights issues are dealt with elsewhere in this final rule preamble and in sections of the final rule text. For example, see §§ 1351.20 through 1351.22 which discuss additional requirements for RHY grantees.

Based on comments received and for clarity, we have revised the final rule language in this section to mirror the language in the Act.

Matching Requirements

We proposed a change to § 1351.13 regarding matching share. The previous regulatory language conflicted with the updated statute on the amount of funding required by grantees to satisfy the match requirement. The previous language required a non-federal match amount which was at least equal to 10 percent of the federal funds received. To align the statute and the regulations, we proposed that the federal share of the project represents 90 percent of the total project cost supported by the federal government, thus the remaining 10 percent represents the required project match cost by the grantee. This may be a cash or in-kind contribution.

We note that the language of the statute is phrased in terms implying an exact 10 percent matching share, but HHS has always taken the position that the language should not be interpreted to prevent grantees from spending additional funds from their own resources. We received no comments on these proposed changes and have left them unchanged in the final rule.

Project Period

We did not propose changes to § 1351.14, providing that the period for which a grant will be awarded is generally one year, renewable annually. We received no comments on this section and have left it unchanged.

Supportable Costs

We proposed minor changes to update the language under § 1315.15 to more fully describe costs allowed under Runaway and Homeless Youth Program grants. Costs that can be supported include, but are not limited to, staff training and core services such as outreach, intake, case management, data collection, temporary shelter, transitional living arrangements, referral services, counseling services, and aftercare services. We proposed to retain the existing prohibition against acquisition or renovation costs that exceed 15 percent of the grant award, subject to potential waiver. We also proposed adding language that clarifies that research and evaluation, communications, and technical assistance grants are allowable costs that pertain to their unique purposes.

Comment: We received one comment on these provisions. That commenter recommended that the list of supportable costs be amended to include transition to permanent housing. Examples were suggested, including first month of rent, move in costs, or utility fees.

Response: The proposed definition excluded no reasonable costs related to achieving the goals of the program, other than a few specific limitations and those listed in costs not allowable. It used the phrase ''include, but are not limited to.'' Hence, in some circumstances we may pay for costs related to transition to permanent housing. It would be inappropriate, however, to pay for costs that are the legal obligation of another program. We have not changed the language in the final rule.

Costs Not Allowable

We proposed a change to the language under § 1351.16, now § 1351.16(a) of the final rule, that currently states only that capital costs for new facilities are not allowed under Runaway and Homeless Youth Program grants. We proposed retaining this prohibition and also explicitly prohibiting payment for the operating costs of existing community centers or other facilities that are used partially or incidentally for services to runaway or homeless youth clients. This does not mean that a reasonable fraction of utility or other overhead costs could not be charged to our grant when a facility provides multiple services, but it does mean that such fraction would have to be based on a reasonable cost allocation method approved by HHS, such as proportion of square footage devoted exclusively to each service in the facility. Separable costs of the Runaway and Homeless Youth project are, of course, fully reimbursable. The reason for this clarification is that we have seen proposed project budgets that include disproportionate allocations of facility-wide or overhead costs to

Runaway and Homeless Youth projects that use only a small portion of the facility. We received no comments on this section and have left it unchanged in the final rule.

However, we have revised the final rule by adding a new § 1351.16(b) that states, ''A Runaway and Homeless Youth Program grant does not cover any treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression.'' This is further discussed later in the preamble.

Application Procedures

The current rule under § 1351.17 provides that HHS will publish program announcements of availability of grant funds annually in the **Federal Register**, and includes specific but outdated procedures for obtaining announcements and submitting applications. We proposed to change § 1351.17 to address three changes since the rule was last revised. First, proposed paragraph (a) recognized that we now rely primarily on the Internet (rather than the **Federal Register**) for publication of our funding opportunity announcements. Second, under proposed paragraph (b) we allowed for electronic submission of completed grant applications through the federal government's *http://www.grants.gov* Web site. We would continue to allow for paper applications for grants. Third, our proposed language said that we will publish such announcements periodically rather than annually. The timing and frequency varies by type of grant and has changed over time. We received no comments on these proposed changes but are seeking to maximize flexibility as technology and procedures change in the future. Therefore, we have changed the language to say that an applicant should follow instructions included in funding opportunity announcements, which describe procedures for receipt and review of applications.

Funding Criteria

Under existing § 1351.18 we listed a number of criteria that we use for deciding which grant applications to fund. We proposed small technical changes to these criteria.

Under paragraph (a) we proposed to retain the criteria that proposed projects meet funding priorities. We also added a clause making specific reference to our use of FOAs to establish specific details of the broad requirements, standards, and evaluation criteria contained in the proposed rule. Under the proposal, in reviewing applications, HHS would take into consideration whether the grant application meets the particular priorities, requirements, standards, or evaluation criteria established in funding opportunity announcements. We renumbered these criteria accordingly.

In paragraph (b), we proposed to modify and combine the current requirements of paragraphs (b) and (c) for demonstrating ''need'' to require that the likely estimated number of unserved runaway and homeless youth in the area exceed the capacity of existing services. That is, we would not require a census-like count of such youth, but merely a reasonable estimate that the number of such youth exceeds the capacity of existing services.

We received no comments on subsections (a) or (b) and the proposed text in these subsections are unchanged in the final rule.

Under proposed paragraph (c), we proposed to retain the existing requirement that runaway and homeless youth centers maintain a minimum residential capacity of four and a maximum of 20 youth in a single structure (except where the applicant assures that the state where the center or locally controlled facility is located has a state or local law or regulation that requires a higher maximum to comply with licensure requirements for child and youth serving facilities as authorized in § 312(b)(2) of the Act) for all youth residing at the shelter on any given night. We proposed to clarify that the capacity standards apply only to grants that include such centers. We also proposed to revise the regulation to require centers to have the number of staff sufficient to assure adequate supervision of and treatment for the number of clients served rather than a mandatory ratio of staff to clients. This change is for consistency with the statute at section 312(b)(2)(B) of the Act. While we are not aware of any uniform best practice for establishing such a ratio, an agency would refer to state laws and licensing regulations as they pertain to runaway and homeless youth shelters for guidelines. If no runaway and homeless youth shelter laws and licensing regulations have been established in a state, the agency would refer to state child welfare laws and regulations for youth. Agencies would be required to cite the guidelines they are following for the staff ratios they deem to be appropriate. To clarify this, we have added language to paragraph (c) to say that criteria used when determining which grant applications to fund must consider the guidelines followed for determining the appropriate staff ratio.

Comment: We received one comment on proposed § 1351.18(c) on residential capacity, asking whether there should be a minimum number of youth to be served by host family homes (such as 4) and when federal requirements take precedence over state or local licensing requirements.

Response: We do not believe there should be any minimum number of youth served in host family homes. Some of the best domiciles may involve room for, or willingness to supervise and host, just one youth. Our residential capacity requirements are not intended to preempt state or local rules in any way, and we specifically allow state or local licensure requirements to impose higher maximum standards.

Under paragraph (d), we proposed to slightly modify the criteria under current paragraph (e) removing the language concerning the 72-hour timeframe from admission for the program to make contact with family. The requirement is contained in Subpart C, at new § 1351.24(e).

We received six unique comments on this section, and address the concerns of these commenters separately below.

Comment: Section 1351.18(d) of our funding criteria contains our proposed provision on making ''best interest of the child'' an important requirement. Several comments on other sections had mentioned a concern over making that criterion clear. One commenter recommended that this term also be incorporated into the definitions of counseling services, health care services, and home-based services; addressed or added in three paragraphs of this section, and added to sections on requirements for Basic Center projects and performance standards for these grantees. Two other commenters on best interest of the child also suggested amending the proposed language dealing with alternative living arrangements.

Response: We placed this important requirement in our section on overall criteria for funding priorities, a core section of the rule. We agree that the best interest of the child will in some cases prevent either counseling with or reunification with the family. In some cases (*e.g.,* involving sexual orientation or gender identity) the family will have forced the youth to leave and be unwilling to discuss the matter, and in some cases physical abuse or other criminal behaviors will prevent family involvement. We appreciate that there are many other specific provisions where we could add requirements or references to best interest of the child and we do reference the best interest of the child consistently throughout this

rule. It is in this section that we explicitly make best interest of the child one of the major priorities to be addressed in all funding awards and all runaway and homeless youth services. Our proposed language explicitly conditioned joint involvement of youth and family to cases ''when possible.'' We did not intend ''possible'' to mean only literal impossibility (though this will sometimes be the case), but ''reasonably possible,'' and taking into account the circumstances of each case and the best interest of the client youth. We have revised the rule to reflect this. Consistent with section 312 of the statute, our proposed language also required that grantees develop adequate ''plans,'' which includes in this context carefully considered methods and procedures for handling the most difficult circumstances and situations where family involvement may not be reasonably possible. We think that the proposed rule language provides a clear ''best interest'' policy applicable to all services for the client youth, and have not revised either this section or other sections in response to these comments.

As for the comments suggesting that we revise the text concerning best interest of the child to more clearly indicate that alternative living arrangements (not just to return home or to law enforcement) are an option that will sometimes be in the best interest of the child, we agree that alternative living arrangements should be considered when developing plans for Basic Center grantees. We have modified the language to cite the statute more closely, which says in section 312(b)(3) that such grantees ''shall develop adequate plans for contacting the parents or other relatives of the youth and ensuring the safe return of the youth according to the best interests of the youth, for contacting local government officials pursuant to informal arrangements established with such officials by the runaway and homeless youth center, and for providing for other appropriate alternative living arrangements.''

We proposed to retain the language in paragraphs (f) through (h) of the previous version of this regulation and renumber them (e) through (g). This language ensures that HHS criteria for deciding which RHY grant applications to fund include:

(e) Plans for the delivery of aftercare or counseling services to runaway or otherwise homeless youth and their families;

(f) Whether the estimated cost to HHS for the Runaway and Homeless Youth project is reasonable considering the anticipated results; and

(g) Whether the proposed personnel are well qualified and the applicant agency has adequate facilities and resources.

We added a new paragraph (h) to ensure that HHS criteria for deciding which RHY grant applications to fund includes past performance on a RHY grant, including but not limited to program performance standards. In fact, paragraph (h) clearly states our intent to consider a grantee's past performance, including measures associated with the performance standards outlined in §§ 1351.30, 1351.31, and 1351.32, when deciding which RHY grantee applications to fund.

Paragraphs (i) and (j) outline funding criteria for whether the proposed project design, if well executed, is capable of attaining program objectives. The paragraphs also outline funding criteria for whether the grant application is consistent with the provisions of the Act and these regulations. These paragraphs were unchanged. A new paragraph (k) was proposed to include other factors as outlined in the funding opportunity announcements.

Comment: One commenter discussing § 1351.18 argued for adding a reference to a new civil rights law, and for requiring ''culturally and linguistically appropriate services'' in five separate paragraphs within this section. This same commenter argued for adding such a reference or requirement in many other sections of the rule.

Response: The final rule maintains the proposed rule's intent that grantees provide culturally and linguistically sensitive services. See § 1351.23(a) of this final regulation.

Comment: One commenter asked that we include appeals procedures to deal with mistakes in the review process and involve regional staff in the grant review process to § 1351.18.

Response: This rule governs primarily the operation of the Runaway and Homeless Program by grantees, and does not address or govern the internal administrative processes of the federal government. Hence, while we appreciate the suggestions as to the grant review process, we do not address them in the final rule. We will take them into account in our internal decision making. We note that we already involve regional staff in the grant review process, since they bring unique expertise and knowledge of local conditions and grantees to that process. In addition, in accordance with the HHS Grants Policy Statement, ''The decision not to award a grant, or to award a grant at a particular funding level, is discretionary and is not subject to appeal to any OPDIV or HHS official or board.''

Comment: Two commenters asked that we add as a criterion to § 1351.18 ''demonstrated engagement in efforts with the local Continuum of Care'' activity and one of these suggested adding partnerships with adult homeless agencies as a requirement. One of these commenters also recommended that grant applicants should show that they are integrating Runaway and Homeless Youth Management Information System (RHYMIS) reporting with the HUD Homeless Management Information System (HMIS) reporting.

Response: Coordination with other agencies and programs is very important to the program, both to improve outcomes and to reduce wasted or duplicative effort. Continuum of Care is one of the most important of these in many areas served by our grantees. We have chosen not to make such coordination a criterion for funding decisions on individual grant awards, but have instead included it in our additional requirements, discussed in our response to comments on the next section of the rule. As for program reporting, the integration of these two systems is proceeding and once completed will be enforced under § 1351.23(c) of the final rule. See our subsequent discussion of that subsection.

Other Federal Requirements and Program Policies

After reviewing comments, the final rule has expanded upon § 1351.19 of the proposed rule to provide clarity by separating the section into §§ 1351.20 through 1351.22 in subpart A of the final rule. This is discussed in detail below. Under the previous rule, § 1351.19 contains a list of other rules and regulations that apply to applicants for, or recipients, of program funds. These include, for example, regulations concerning civil rights obligations of recipients and regulations concerning fraud, waste, and abuse. We proposed amending that rule to include additional rules that also are specifically intended to apply to all HHS grantees or, in some cases, to all federal grantees.

The expanded list under proposed paragraph (a) included rules related to civil rights requirements, to other client protections, to administrative requirements in HHS grant programs, and to preventing fraud or abuse. This expanded list does not attempt to list all of the federal laws and regulations (*e.g.,* provisions of the Internal Revenue Code regarding non-profit status, minimum wage requirements, and numerous

others) that pertain to organizations that may be grant applicants or awardees. The provisions we listed here are not for the most part administered through either the Administration for Children and Families or its Runaway and Homeless Youth Program (though the agency may in some instances assist in their enforcement), but by other HHS components or by other federal agencies that set the conditions and enforcement mechanisms that apply to those provisions, and that determine whether and in what circumstances grant-related penalties may apply. For example, the HHS Office for Civil Rights enforces civil rights protections. This section already contains in paragraph (b) several additional provisions, mainly client confidentiality protections, that we did not propose to change, as well as new and expanded protections concerning protection of youth and providing non-discriminatory services that comprehensively address individual needs. In paragraph (c), we proposed to update our reference to the Act as defined in the proposed rule. We also proposed to amend the title of the section to include ''other Federal Requirements'' in the title. We received no comments on many of these subsections and have left the language of those subsections unchanged in the final rule.

Comment: We received several comments on § 1351.19 suggesting that we add a civil rights law, 42 U.S.C. 18116, enacted as section 1557 of the Affordable Care Act (ACA), to the list of applicable rules in subsection (a). This statute prohibits discrimination on the basis of race, color, national origin, sex, age, or disability in certain health programs or activities, including those funded by federal grants or established under Title I of ACA. Existing laws and regulations already prohibit most of these types of discrimination, at least for federal grantees and in some cases for all or most service providers, whether or not involving health. The most notable addition in the recently enacted statute is the prohibition against sex discrimination in the provision of health care services. Current sex discrimination regulations applicable directly to grantees cover only those grantees providing education services (of course, there also exist employment-related prohibitions on sex discrimination by private or public employers that are enforced by yet other agencies, such as the Equal Employment Opportunity Commission, regardless of grantee status). Some persons, including these commenters, hope or expect that this new and far broader prohibition on sex discrimination will extend to sexual orientation and gender identity.

Response: Section 1351.22 has been added to address discrimination in RHY grantee programs and facilities. The new language added in § 1351.22(a) prohibits discrimination on the basis of sex, sexual orientation, and gender identity and expression. This section clarifies the intent of the section as initially written in the notice of proposed rulemaking (NPRM). To be clear, the rule does not bar grantees from considering the needs of each applicant and the health and safety of other beneficiaries when determining eligibility for programs, activities, or services. Language has been added in § 1351.22 making this part of coordinated entry explicitly permissible.

A preceding clause at § 1351.20 includes references to 45 CFR part 86 and 92, both which prohibit discrimination on the basis of sex, which includes gender identity. The former rule, at 45 CFR 86.31, applies to education programs or activities that are carried out under various HHS-funded grant programs including RHY grants. The latter rule, at 45 CFR part 92, applies to the provision of mental health counseling and other health activities carried out by the RHY programs.

Section 1351.20 of the final rule lists fourteen codified regulations that apply or potentially apply to all federal grantees (as applicable). Title 42 U.S.C. 18116 was enacted in 2010 and conforming regulations were issued on May 18, 2016 at 45 CFR part 92, entitled ''Nondiscrimination in Health Programs and Activities,'' which implements the prohibition of discrimination under section 1557 of the Affordable Care Act (ACA) of 2010. These regulations prohibit discrimination on the basis of sex, including gender identity in HHS-funded health programs or activities. To the extent that an RHY grantee operates health programs or activities, any part of which receives federal financial assistance, section 1557 and the corresponding regulations under 45 CFR part 92 will apply to that health program or activity.

For these reasons we revised our list of regulations that apply or potentially apply to Runaway and Homeless Youth Program grantees to include 45 CFR part 92.

Comment: Another commenter asked that we apply the language of a New York State nondiscrimination statute to Runaway and Homeless Youth grantees, on behalf of LGBTQ youth. The commenter stated that the New York law explicitly prohibits programs, program staff, and program volunteers from engaging in or condoning discrimination or harassment on the basis of race, creed, national origin, age, sex, sexual orientation, gender identity or expression, marital status, religion, or disability. Other commenters asked that we not merely require that our grantees be responsive to the needs of LGBTQ youth, but also prohibit discrimination against such youth.

Response: We have included language in § 1351.22 of the final rule that requires service delivery and staff training to comprehensively address the individual strengths and needs of youth as well as be language appropriate, gender appropriate (interventions that are sensitive to the diverse experiences of male, female, and transgender youth), and culturally sensitive and respectful of the complex social identities of youth (*i.e.,* race, ethnicity, nationality, age, religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, physical or cognitive ability, language, beliefs, values, behavior patterns, or customs). No runaway youth or homeless youth shall, on any of the foregoing bases, be excluded from participation in, be denied the benefits of, or be subject to discrimination under, any program or activity funded in whole or in part under the Act. Additionally, after publication of this rule, we will produce a best-practices guide focused on sheltering and serving LGBTQ youth. This document will serve as a tool for grantees and will include information about how to create safe and affirming spaces for transgender youth.

Comment: One commenter asked that we specifically prohibit for LGBTQ youth so-called ''conversion therapy,'' meaning ''[a]ny treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression.''

Response: We are not aware of any instance where an RHY grantee has used ''conversion therapy'' or ''reparative therapy'' to aim to change an individual's sexual orientation or gender identity. However, we agree it would be wholly inappropriate for this to take place and are amending this final rule to explicitly exclude, by definition, conversion therapy from allowable counseling services and health care services. Additionally, we have revised the final rule by adding a new § 1351.16(b) that states, ''A Runaway and Homeless Youth Program grant does not cover any treatment or referral to treatment that aims to change someone's sexual orientation, gender identity, or gender expression.''

Additionally, we have revised ''counseling services'' and ''health care

services'' in § 1351.1 to specifically exclude conversion therapy by adding language at the end of the definition that says ''[a]ny treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression is prohibited.''

Conversion therapy is a controversial practice and a number of states, including Oregon, California, New Jersey and Washington, DC, have passed laws in recent years banning it. In 2001, U.S. Surgeon General issued a report stating that ''there is no valid scientific evidence that sexual orientation can be changed.'' [7] Over recent years, the Pan American Health Organization, American Psychological Association and other organizations have concluded that the practice is unethical and should be banned.[8] [9] [10] [11]

Comment: Another commenter argued that we should point out the recent issuances of the Department of Education (ED) stating that the protections of title IX of the Education Act extend to gender identity and expression.

Response: We agree that title IX of the Education Amendments of 1972 is an important statute. While the recent guidelines from ED are a new interpretation under the statute, title IX applies only to education programs. Services provided under Runaway and Homeless Youth grants in the three main service programs are not considered education programs, and therefore, title IX will rarely, if ever, apply to Runaway and Homeless Youth Programs. Title IX applies to the education programs (typically public or private schools, colleges, and universities receiving federal grants from the Department of Education) to which runaway or homeless youth are sometimes referred. Therefore, we did not make changes in response to this comment.

Comment: Six commenters addressed the confidentiality and information disclosure requirements proposed in § 1351.19(b)(1). We had proposed this language unchanged from the present rule. Most of these commenters addressed potential disclosure to state law enforcement authorities or pursuant to court order, and argued that this would reduce the protection afforded to youth. Most commenters argued for eliminating or reducing the scope of our proposed language, which created an exception for cases in which release is ''compelled by a court or statutory mandate.'' These commenters seemed to assume that this would place youth in danger, and asserted that youth would be dissuaded from seeking help by what they perceived as weakened privacy protections. One of these commenters asked whether a subpoena would apply. Yet another commenter suggested that we create a different standard for youth served in the Basic Center and Transitional Living Programs, because the statutory text differs as to parental consent and whether consent must be informed.

Response: We very much appreciate these thoughtful responses, which we have used to make important changes to the proposed language. Based on the comments received, we have modified the regulatory text to reflect the different statutory standards for youth served in the Basic Center and Transitional Living Programs, and to interpret confidentiality requirements more narrowly.

With respect to the Basic Center Program, section 312(b)(7) of the Act is clear that grantees ''shall keep adequate statistical records profiling the youth and family members whom it serves (including youth who are not referred to out-of-home shelter services), except that records maintained on individual runaway and homeless youth shall not be disclosed without the consent of the individual youth and parent or legal guardian to anyone other than another agency compiling statistical records or a government agency involved in the disposition of criminal charges against an individual youth. Reports or other documents based on such statistical records shall not disclose the identity of individual runaway and homeless youth.''

For youth in Transitional Living Programs, section 322(a)(13) of the Act requires grantees ''not to disclose records maintained on individual homeless youth *without the informed consent of the individual youth* to anyone other than an agency compiling statistical records.'' Specific to Transitional Living Programs, the Act only requires consent from the youth to release records, which is different from the Basic Center Programs which require informed consent from the individual youth and their legal guardian.

Section 384 of the Act reads: ''Records containing the identity of individual youth pursuant to this Act may under no circumstances be disclosed or transferred to any individual or to any public or private agency.'' It is important to note that there are exceptions to this provision. For example, as noted previously, records may be released after proper consent of youth or parent/guardian. Further, de-identified information can be released for research purposes. De-identified is a technical term that applies to methods commonly used in sensitive research to prevent identification of individuals from a dataset. For example, names might be replaced by numbers (often much more complex steps need to be taken as well). This is further explained in the response to the comment below. We have changed the regulatory text to reflect these statutory requirements.

Comment: Another commenter asked whether de-identified information could be released for purposes of program evaluation or academic research, pointing out that research using such information is essential to improving the quality of services over time.

Response: The Act allows and requires research on service effectiveness (section 343), which normally cannot be measured without records on individual outcomes, but specifically prohibits disclosure or release of ''records containing the identity of individual youth'' to ''any individual or any public or private agency'' (section 384). In other places, the Act requires shelter grantees to ''keep adequate statistical records'' and allows their use in reports ''based on such statistical records'' (section 312(b)(7) for Basic Center grants; similar language applies to other services). In the light of these provisions, we interpret the statute to state that research, evaluation, and statistical reports funded by grants provided under section 343 of the Act are allowed to be based on individual data but only if such data are de-identified in ways that preclude disclosing identifiable information on individuals. We have added language in § 1351.21(a)(3) to codify this interpretation.

Comment: Several other unique comments pointed out that requiring consent of both the youth and the family will not always be appropriate or consistent with state law, or consistent with the emancipated status of many

youth served. One commenter pointed out that the statutory requirements for consent to release of information differ for Basic Center and Transitional Living Programs.

Response: We appreciate commenters bringing these issues to our attention. We agree that for the Transitional Living Program, only the individual youth's informed consent is required under section 322(a)(13) of the Act. In addition, the Basic Center grant has different disclosure criteria under section 312(b)(7) of the Act. For Basic Center Programs, youth and parents must provide consent. We have revised the regulatory text in § 1351.21(a)(1) to reflect the statute accordingly.

We did not receive any comments on paragraphs (a)(2) through (a)(4) and therefore did not make any changes to the proposed text in this final rule.

Section 1351.19(b)(5) proposed requirements that grantees serve, in a non-discriminatory fashion, individual needs of youth without regard to language, gender, or LGBTQ status, and to be ''culturally sensitive and respectful of the complex social identities of youth,'' including ''religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, disability, language, beliefs, values, behavior patterns, or customs'' as well as race and physical abilities. The inclusion of the term ''behavior patterns'' in this section will of course not prevent grantees from determining ineligible for services youth with a history or criminal record that poses a potential safety risk to other youth in the grantee's care.

Comment: We received six comments regarding proposed § 1351.19(a)(5), now § 1351.22(a), concerning ''non-discriminatory services and training'' and ''culturally sensitive'' services. The comments principally requested that the rule establish a new legal right of individuals for protection against discrimination aimed at them personally, or including such terms as ''cultural and linguistically appropriate'' throughout the rule.

Response: In response, § 1351.22 has been added, addressing discrimination in RHY grantee programs and facilities. We are changing the title of subsection (a) to clarify that this section does require that runaway and homeless youth services and training must be both ''non-discriminatory and culturally and linguistically sensitive.'' We believe it is important that all grantees and other stakeholders understand that our practice and intent is to hold grantees to practices that meet individual needs, regardless of racial, sexual orientation, cultural, or other diverse backgrounds.

We specifically do not intend this change to reference the CLAS voluntary guideline standards of the U.S. Public Health Service, which as previously explained are inappropriate for a number of reasons (*e.g.,* intended only for health care programs and conflicting in some respects with the requirements of the Act and best practices for runaway and homeless youth). We will continue to provide appropriate guidance to grantees on our approach through training and technical assistance. For example, there are differences among Native American tribes and some immigrant groups as to whether the locus of family authority is patrilineal or matrilineal. This should influence the practices that grantees use to approach and counsel certain families and youth they serve. We believe that our grantees generally understand these nuances quite well, since they have significant experience working with these populations.

We emphasize that the language of this final rule is in no way intended to create new individual rights. Civil rights for individuals served by HHS programs are enforced through the Office for Civil Rights under its regulations and guidance and in compliance with federal civil rights law. Grantees who are unfamiliar with these laws and regulations should review our list of civil rights and other regulations that apply to HHS grantees but that are administered by other agencies.

Comment: One commenter pointed out that often the provision of gender appropriate services is a matter of allowing a youth to participate in programming that is appropriate for their gender identity, or with the gendered group where they feel most safe and supported. The commenter also highlighted that the provision of gender appropriate services requires sensitivity to the diverse experiences of youth, and the process of determining what services are appropriate for a transgender youth may require individualized consultation with the youth, rather than a blanket determination of what services are necessary or appropriate based on their gender identity, sex assigned at birth, gender expression, or the status of their identity documents.

Response: We agree. Section 1351.22(a) of this final regulation includes a provision to require that service delivery and staff training comprehensively address the individual strengths and needs of youth, including the youth's gender and gender identity. We note that best practices in this area include asking transgender, questioning and intersex clients to identify their gender and to assign them housing based on their gender self-identification. Technical assistance to grantees will be provided on this issue.

Comment: One commenter mentioned a recent HUD rule adding a new non-discrimination right for LGBTQ adults participating in subsidized housing programs and recommended including an explicit nondiscrimination provision into these rules to harmonize the requirements applicable to the many grantees receiving funding from both HUD and HHS.

Response: The HUD rule mentioned is grounded in the applicable housing statutes. Therefore, we did not add these specific provisions to the rule. However, § 1351.22 of the final rule was added to address discrimination in RHY grantee programs and facilities. This section includes strong non-discrimination standards for LGBTQ individuals.

Comment: Two commenters argued that our use of the term ''gender specific'' might be misinterpreted as requiring segregation, such as segregation of transgender youth from their male or female peers, or separate programming on the basis of gender.

Response: The full phrasing in the proposed rule stated that gender specific meant ''interventions that are sensitive to the diverse experiences of male, female, and transgender youth'' and ''respectful of the complex social identities of youth'' including ''gender identity/expression'' and ''sexual orientation.'' However, to ensure that our language is not misunderstood we have changed the term ''gender specific'' to ''gender appropriate'' in the final rule, as suggested.

Comment: One commenter recommended that education, age, cognitive ability, and physical ability be added to the list of ''complex social identities of youth in § 1351.19(b)(5)'' of the proposed rule.

Response: We have reviewed these suggestions. We do not believe that ''education'' is needed on a list of ''complex social identities of youth,'' as education is not part of a youth's social identity and is instead something that a youth achieves.

However, we do agree that ''age'' and ''cognitive'' ability, as well as ''physical ability,'' should be included in paragraph (a). We have made these changes in the final rule.

Subpart C. Additional Requirements

As discussed in the previous section of this preamble, the final rule expands on § 1351.19 of the proposed rule and provisions of this section have been reorganized in §§ 1351.20 through 1351.22 to address, ''What Government-

wide and HHS-wide regulations apply to these programs?,'' ''What confidentiality requirements apply to these programs?,'' and ''What additional requirements apply to these programs?,'' respectively, and these sections are now included in subpart C of the final rule. Additional changes to subpart C of the proposed rule are discussed below.

We requested comments on whether there is substantial evidence that these or any other requirements not proposed here would improve program outcomes, either overall or for each type of grant, at reasonable effort and cost. We also requested comment on whether placing either the proposed standards or additional standards in funding opportunity announcements rather than in regulations would allow sufficient flexibility to grantees or would hinder our ability to use targeted initiatives to improve program practices.

Under § 1351.20(a), we proposed revising the language requiring grantees to participate in technical assistance and training in order to allow flexibility in which techniques will be used, and proposed clarifying that grantees must also accept monitoring. This list of technical assistance and training options reflected primarily the evolution and expansion over the years of the training and technical assistance program, and the items listed are all conducted currently under the program. Requirements we proposed to add are core competencies for youth workers, core support services, cultural and linguistic diversity, background checks, ethics, and staff safety. In particular, we proposed positive youth development as a priority area for training or technical assistance. Under our proposal, grantees would participate in technical assistance or short-term training as a condition of funding, as determined necessary by HHS, in areas such as, but not limited to:

- Aftercare services or counseling;
- Background checks;
- Core competencies of youth workers;
- Core support services;
- Crisis intervention techniques;
- Cultural and linguistic diversity;
- Development of coordinated networks of private nonprofit agencies and/or public agencies to provide services;
- Ethics and staff safety;
- Fiscal management;
- Low cost community alternatives for runaway or otherwise homeless youth;
- Positive youth development;
- Program management;
- Risk and Protective Factors related to youth homelessness;
- Screening and assessment practices;
- Shelter facility staff development;
- Special populations (tribal youth; LGBTQ; intersex youth; youth with disabilities; youth victims of trafficking, sexual exploitation or sexual abuse),
- Trauma and the effects of trauma on youth;
- Use of evidence-based and evidence-informed interventions;
- Youth and family counseling; and
- Confidentiality policies and protocols.

This is a substantial addition but one that we believe is useful to reflect the current set of policy and program priorities as set forth in the Act and in the program solicitations and management improvements that have been made in the overall program in recent years. Virtually all of these proposed provisions were derived from specific statutory mandates and are already part of standard operating procedures. Many participants in our consultative process also suggested most of these items, reflecting the general consensus as to their importance in operating effective services. We received six comments on this subsection.

Comment: Several comments were supportive and raised no questions. Several comments posed questions about the training requirements. Four commenters asked whether all individuals on grantee staff would have to receive training or technical assistance, or if this requirement could be applied to certain grantee staff but not all, particularly when staff members are not regularly in contact with youth. One commenter asked whether all individuals would have to receive all types of training, or whether training could be tailored to each individual's role in providing services. Several commenters asked that only individuals in contact with youth more than 10 hours a week be required to participate in training. Another commenter asked who would decide what technical assistance is needed and who will provide it. One commenter asked whether new hires would have to be trained before employment begins. Yet another commenter asked several questions about whether grantees could provide their own training or whether the federal government would provide the curriculum.

Response: First, the new language would not require every single individual to participate in every kind of training.

To clarify this provision further, we have added a sentence at the end of paragraph (a) that highlights that this it is not a requirement that every staff person receive training in every subject but all youth-serving workers on staff should receive training sufficient to meet the stated core competencies of youth workers. This training is offered by ACF.

ACF will provide the development of the curriculum for all training and technical assistance as well as provide access to courses and materials. The vast majority of these trainings will be available on the internet. We hope that this will provide the greatest flexibility for our grantees.

If for any reason, a staff member is not able to participate in the training from the federal government, the grantee can provide its own training based on the ACF materials.

Additionally, grantees are expected to provide in-house training to new hires on some of the most critical responsibilities, without waiting for the next available Runaway and Homeless Youth Training and Technical Assistance Center (RHYTTAC) course. Some kinds of training or technical assistance, beyond core competencies, may be mandated for all grantees in funding opportunity announcements, in other cases only for those identified as needing help.

In still other cases, grantees will request help in particular areas. ACF offers different formats and levels of training within a variety of subjects, allowing quick training for many and in-depth training for few. More information about these resources is available at our online Runaway and Homeless Youth Training and Technical Assistance Center (see: *http://www.rhyttac.net/about/what-rhyttac*).

Comment: One commenter asked us to add ''secondary trauma and self-care'' to our list of required subjects in § 1351.20(a) of the proposed rule.

Response: We agree that trauma is an extremely important issue and think that proposed list of training and technical assistance sufficiently addresses trauma and the effects of trauma on youth. We encourage grantees to include secondary trauma in their training when discussing the effects of trauma on youth. Grantees are welcome and encouraged to train staff beyond requirements listed in this regulation. In addition, there are multiple ways to propose changes as identified on the RHYTTAC Web site, including contacting RHYTTAC leadership, membership on or contact with the National Advisory Board, using the RHYTTAC Community of Practice, participating in workshops, or contacting subject matter experts.

Comment: One commenter asked us to change ''cultural and linguistic diversity'' in paragraph (a) to ''culturally

and linguistically appropriate.'' This commenter also asked that we clarify that crisis intervention techniques be interpreted to include knowledge and learning for suicide prevention and crisis intervention.

Response: We agree and have made the change to ''culturally and linguistically sensitive services'' in the final rule. We agree that crisis intervention techniques include suicide prevention. No change is needed in the wording of the final rule, however, on this latter point.

Under § 1351.20(b), we proposed minor technical revisions to update the existing provision requiring coordination with the National Runaway Safeline. Under our proposal, grantees shall coordinate their activities with the 24-hour national toll-free communication system, which links Runaway and Homeless Youth projects and other service providers with runaway or otherwise homeless youth, as appropriate to the specific activities provided by the grantee. At present, this system is called the National Runaway Safeline, its Web site is *www.1800runaway.org,* and the toll-free number is 1–800–RUNAWAY. We received no comments on this provision and the language is unchanged in the final rule.

Under § 1351.20(c), we proposed a technical revision to the reporting provision to require grantees to submit statistical reports that profile the clients served and that provide management and performance information in accordance with guidance provided by HHS. Such data submission was handled through the Runaway and Homeless Youth Management Information System (RHYMIS) and is now being handled through an integrated RHYMIS/HUD Management Information System (HMIS). While these information systems are a major innovation and improvement tool in program data collection, updating the regulatory reference is a minor change from a regulatory perspective. The existing rule quotes specific statutory language in place when the rule was written. The Act now contains additional requirements (see in particular sections 312(b)(7) and (8), and section 322(a)(9)). For example, it explicitly states that Runaway and Homeless Youth projects ''shall keep adequate statistical records profiling the youth and family members whom it serves,'' that grantees ''shall submit annual reports to the Secretary detailing how the center has been able to meet the goals of its plans,'' and that grantees shall submit ''statistical summaries describing . . . the number and characteristics of the runaway and homeless youth . . . who participate . . . and the services provided to such youth.'' We proposed to revise this section to require appropriate reporting and to delete specific quotations from the Act.

Comment: We received two comments directly on § 1351.20(c). One commenter argued for acceptance of data from a system called Child and Adolescent Needs and Strengths (CANS) in RHYMIS. One commenter quoted several research studies in arguing that the RHYMIS data significantly understate the number of LBGT youth who are homeless and recommended improving grantee recording of such information through technical assistance and training.

Response: We are continually working to improve our data collection system. We will continue to work to improve data reporting and will consider these comments under the integrated HMIS system, which has now incorporated RHYMIS. The Office of Management and Budget (OMB) Control Number for RHYMIS is 0970–0123, which has a current expiration date of February 28, 2018. We are looking to revise data standards to reduce the burden associated with filling out the data for the RHY program by the Spring of 2017, with the effective date of October 1, 2017.

Comment: Six comments on either the preamble or this provision recommended that RHYMIS be coordinated or combined with the HMIS system used in HUD's homeless programs. Several of these commenters also mentioned the Point In Time (PIT) counts used by HUD to estimate the number of homeless. One commenter pointed out that it is essentially forced to use three database systems: Its own internal system, RHYMIS, and HMIS.

Response: We agree and as noted, ACF and HUD are coordinating the integration of the RHYMIS with HMIS systems. Specific information about the integration process and the data standards grantees are required to comply with has been and will continue to be provided to grantees in separate guidance from FYSB.

Comment: One unique comment recommended that client confidentiality be protected under the merged system.

Response: We agree and the confidentiality standards set forth in the Act will apply to access to information in the integrated system.

We proposed adding a new regulatory requirement for outreach for the three major grant programs. Outreach is a key statutory requirement of these programs. We proposed in § 1351.20(d) that grantees perform outreach to locate runaway and homeless youth, and to coordinate activities with other organizations serving the same or similar clients.

Comment: We received several comments on these provisions. One commenter was strongly supportive and raised no issues. One commenter asked what expectation we had for Basic Center grantees. One commenter pointed out that outreach efforts are needed to ensure that vulnerable youth, including LGBTQ youth, are made aware of available services, and that training related to special populations such as these that is culturally and linguistically appropriate is important. Another commenter suggested coordinated outreach and services with Continuums of Care, child welfare, and law enforcement.

Response: While the roles and level of effort of each type of grantee will differ, the Basic Center, Transitional Living and Street Outreach Program grantees are all expected to perform at least some outreach services. We point out that local coordination is also part of this requirement, and that for this as well there will be differences among types of grantees as to how that is performed and the appropriate level of effort. With regards to the question of what expectations for outreach will be for Basic Center grantees, under section 312(c) and (e) of the Act, Basic Center grantees must outreach to youth if the grantees are providing street-based or drug abuse services. Beyond these statutory requirements, outreach by Basic Centers grantees is appropriate in other circumstances as well. Therefore, we maintained this requirement for Basic Center Programs. Additionally, in the final rule, based on comments related to coordination of activities and services, we specified that coordination should occur with organizations, such as child welfare agencies, juvenile justice systems, schools, and Continuums of Care, as defined by HUD.

We requested comments on the following two proposed requirements. First, under paragraph (e), we proposed that grantees shall develop and implement a plan for addressing youth who have run away from foster care placement or correctional institutions and for returning those youth appropriately to the responsible organizations, in accordance with federal, state, or local laws or regulations that apply to these situations.

Second, under § 1351.20(f) of the proposed rule, we proposed that grantees take steps to ensure that youth who are under the legal jurisdiction of

the juvenile justice or child welfare systems receive services from those systems until such time as they are released from the jurisdiction of those systems. The purpose of these provisions is to provide a clear demarcation between services that are the legal and financial responsibility of other programs, and services that are the responsibility of the Runaway and Homeless Youth Program.

Comment: We received six comments on § 1351.20(e) and (f). One commenter asked what federal, state, and local laws we were referencing. One commenter questioned whether returning a child to foster care or the criminal justice system would always be in the best interest of the child. The commenter proposed language that essentially said the return need not be immediate, but that grantees had to act in accordance with applicable laws. Another commenter asked about the case where a youth might be eligible for child welfare services but was not currently enrolled.

Response: Regarding applicable laws, the federal law likely to apply in such cases is title IV–B and IV–E of the Social Security Act, implemented through regulations at 45 CFR parts 1355 through 1357. The programs authorized by these statutes are operated through the states and tribes. There are various state and local juvenile justice and foster care laws in all states and some older youth may also be subject to laws that apply to adults. In addition to federal law, grantees are expected to know the applicable laws and systems in their own jurisdictions and to coordinate with the responsible agencies. One specific example of a possible problem given by the commenter was of a child fleeing from an abusive foster home. In such cases, the foster care agency would be legally responsible for finding an alternative, safe foster home placement. As to the criminal justice system, grantees that failed to act in accordance with state law (*e.g.,* regarding escapees from correctional institutions) could find themselves in violation of criminal statutes. We have not changed our proposed language to address these suggestions in the final rule because, as a practical matter, RHY grantees have little or no discretion in such situations. However, in paragraph (e) we have incorporated the statutory requirement in section 312(b)(4) of the Act which requires Basic Center grantees to develop a plan that ensures the return of youth who have run away from correctional institutions to those institutions. In all cases, grantees are responsible for seeking outcomes that are in the best interest of the child and are expected to do so within the legal and regulatory frameworks in which they operate. This includes, for example, seeking to place youth into child welfare systems if reuniting the family is not reasonably possible. All of these steps are relevant to the aftercare requirement that follows.

We proposed to codify three provisions focused on the need to serve youth outside the program, which have previously been included in RHY funding opportunity announcements. Under proposed § 1351.20(g), which in the final rule is § 1351.26(a), grantees shall develop and implement an aftercare plan, covering at least six months, to stay in contact with youth who leave the program in order to ensure their ongoing safety. A youth's individual aftercare plan shall outline what services were provided, including appropriate referrals for needed health care services, the youth's housing status, and the rate of participation and completion of the services in the plan at three months and at six months after exiting the program. In § 1351.20(h), which in the final rule is § 1351.26(b), we proposed that grantees shall develop and implement a plan for health care service referrals for youth during the service and aftercare periods. Under proposed § 1351.20(i), which in the final rule is § 1351.26(c), we proposed that grantees shall assist youth to stay connected with their schools or to obtain appropriate educational services. This includes coordination with McKinney-Vento school district liaisons, designated under the McKinney-Vento Homeless Assistance Act, to assure that runaway and homeless youth are provided information about the services available under that Act. Under that law, which is the primary piece of federal legislation dealing with the education of homeless children in U.S. public schools, school districts are required to provide equal access to the same free, appropriate public education provided to other children and youth and to undertake additional steps as needed for such access. For example, school districts must identify potential barriers to the education of homeless youth, and homeless youth may not be segregated from other students. We received almost 24 unique comments on these proposed requirements, some of which represented individuals, while others represented several hundred individuals and/or organizations.

Comment: More than six unique comments raised an issue as to whether it is appropriate under § 1351.20(g) of the proposed rule to require Street Outreach Program grantees to provide aftercare plans. Several commenters noted that the Act does not include such a requirement for these grantees. Commenters argued that these grantees rarely had more than brief contact with youth, and were expected to refer them to other service providers (including Basic Center and Transitional Housing grantees) who would be both qualified and responsible for developing such plans.

Response: We agree that this requirement should not apply to the Street Outreach Program and have revised the final rule to exclude those grantees from its coverage.

Comment: Another six unique commenters, some of which represent numerous individuals and organizations, on § 1351.20(g) of the proposed rule, which in the final rule is § 1351.26(a), stated that six months was far too long to continue a youth's aftercare plan and to stay in contact with youth who leave the program. Commenters expressed concern that youth would no longer be participating in the program and it would be difficult or impossible to contact them six months after exiting the programs. One commenter suggested limiting the aftercare requirement to two months.

Response: In response to comments raising concerns as to whether most youth can be contacted in six months, we have modified the final rule to provide for such contacts and documentation of service completion at three months after exiting the BCP and TLP programs. Three months will provide youth the time they need to transition out of the RHY program and adjust to their new housing arrangement while avoiding the challenges associated with the longer six month timeframe. While a two month after care plan was also proposed by one commenter, we did not feel this was enough time to allow youth to fully adjust after their participation in an RHY program.

Comment: More than six unique commenters, all from service providers or organizations representing service providers, on § 1351.20(g) of the proposed rule, which in the final rule is § 1351.26(a), stated that the overall requirement of providing aftercare services for six months after a child's exit from the program was unduly burdensome and cost prohibitive to meet. Several of these pointed out that such follow-up would be impossible in several common situations that affect many of those served. For example: Youth cannot be located after leaving program; youth can be located but refuse to stay in contact; foster care agencies taking over service planning

and refusing to share information or allow contact; or parental refusal to allow further contact. Several suggested that the requirement be limited to those clients who were in contact with the program for some minimum length of stay, such as two weeks for the Basic Center Program and three months for the Transitional Living Program. These same commenters suggested that the requirement be limited to those clients who requested and consented to follow-up. One commenter endorsed the requirements of the proposed rule and argued it should be even stronger, by incentivizing programs to build strong relationships with other service providers in the community and leverage those to better client outcomes. One commenter said this was an important area for improvement, but that ''we struggle with keeping track of youth after they leave our program,'' a problem cited in a number of comments. One commenter suggested that the requirement be changed to offering youth aftercare services and documenting those actually provided, with ratings only on participation rates. Another commenter said that the grantee calls all youth and their guardians at four to six weeks post-exit, but is able to locate only about 25 percent due to ''ever changing residences and cell phone numbers.'' Yet another comment in the same vein said that its success rate in contacting youth was only about 5 percent at six months, and that those who actually needed assistance generally contacted the center themselves. Finally, one commenter questioned whether grantees had the resources to follow the youth into such systems or upon release from such systems.

Response: We are persuaded by these comments that the requirement as proposed was unrealistically burdensome. The revisions to exclude the Street Outreach Program and to require contact only after three months will reduce the burden substantially. We have revised the final rule to require that such plans be developed for all BCP and TLP youth, and included in exit counseling, covering at least three months after the youth leaves the program. Grantees should follow up with youth during and at the end of the three month timeframe. We understand that it may be difficult to contact 100 percent of youth, but grantees should attempt to contact all youth within this period.

In addition, we have added the requirement in section 312(b)(5) of the Act that, as possible, Basic Center program grantees should provide counseling and aftercare services to youth who are returned beyond the state in which a runaway and homeless youth services is located, as possible.

Comment: Three commenters suggested that the requirement in § 1351.20(h) of the proposed rule regarding access to health care services also include connecting youth with organizations that assist in enrolling in public or private health insurance. One commenter asked how health care would be paid for and objected to the expense of a new health care service plan. One commenter said that the text of this provision should not include aftercare, since that was covered under the previous provision, arguing that this was duplicative, confusing, and potentially very costly if it were read to require a detailed referral plan for each client's specific services. Another commenter said that the aftercare requirement should include not only health care services, but also health insurance.

Response: We think the idea of including referrals for health insurance advice (where appropriate) in the health services plan is a useful addition to the planning requirement. Many sources of information which can assist in providing insurance information are available to youth. Key among these resources are the state Medicaid agency and local Navigators and Application Assisters established under the Affordable Care Act (ACA). Some youth will be insured under an existing parental plan funded through employer insurance (such plans cover some families). In all states, youth are eligible for Medicaid if they are in a household with income below 133 percent of the federal poverty level (FPL) and meet other non-financial eligibility requirements, such as citizenship or eligible immigration status and state residence. It is also important to note that most states cover children under 19 at higher income levels. Youth over 19 may be eligible for Medicaid coverage in a variety of eligibility categories; their eligibility for Medicaid may also depend on whether they live in a state that has chosen to expand Medicaid for adults age 19 to 65. In addition, some youth may have sufficient income (above 100% of the FPL) to receive financial assistance to purchase coverage through the Health Insurance Marketplace. We are not asking grantees to plan specific services for each youth, but to plan for and, as appropriate, provide referrals to health care providers, such as health centers and other service providers for low-income and vulnerable patients, with or without insurance. Grantees should also consider additional referrals as appropriate. We are also not asking grantees to manage or finance the provision of health care. Accordingly, we have revised the final rule text to include health insurance referrals in the health services plan. In most cases, this would be handled through family counseling and reunification services since the great majority of parents have family insurance. In this regard, we note that the great majority of family health insurance policies now cover children up to age 26. Also, youth under 26 who age-out of Foster Care and are enrolled in Medicaid at the time that they age out are eligible for Medicaid from their state, with no income eligibility requirements. We did not eliminate the reference to aftercare in the rule, as we consider it critical that referrals to health services should extend into the aftercare period. We have also revised the text to exempt Street Outreach Program grantees from this requirement, per the discussion above.

Comment: We received several comments on § 1351.20(i) of the proposed rule regarding schooling and education. One commenter asked that we add a mandated service linkage to employment and training programs, since these provide a path towards economic self-sufficiency. Two commenters asked that we add college as an option and specifically referenced grantees making youth aware of the Free Application for Federal Student Aid (FAFSA) service. The commenter noted that FAFSA does not necessarily require parental tax information precisely because it recognizes that there are situations where that is not feasible.

Response: These are valid suggestions. While returning to school will be the typical pathway for runaway and homeless youth, some of them (particularly older youth) will prefer job training or employment and some will have already graduated from high school. Many federally-funded and state and local job placement and training programs are aimed at school dropouts or recent graduates. College is an obvious option for many youth. For many, employment and education can often be managed together, to the benefit of youth with little or no other source of income. We have modified the text of the final rule to cover these options. We have also changed the text to exempt Street Outreach Program grantees from this requirement, and to make the language parallel with the language on health care services.

The Act, at sections 312(b)(13) and 322(a)(16), specifically requires grantees to develop emergency plans. We proposed to adopt this requirement under § 1351.20(j) of the proposed rule by requiring that grantees develop and

document plans that address steps to be taken in case of a local or national situation that poses risk to the health and safety of staff and youth. Emergency preparedness plans should, at a minimum, include routine preventative maintenance of facilities (*e.g.,* fire extinguishers and alarms checked, furnace serviced) as well as preparedness, response, and recovery efforts. The plan should contain strategies for addressing evacuation, security, food, medical supplies, and notification of youths' families, as appropriate. In the event of an evacuation due to specific facility issues, such as a fire, loss of utilities, or mandatory evacuation by the local authorities, an alternative location needs to be designated and included in the plan. Grantees must immediately provide notification to their project officer and grants officer when evacuation plans are executed. ACF has an Office of Human Services Emergency Preparedness and Response that can provide technical assistance, in collaboration with FYSB/ACYF and the ACF Regions, to support grantee development of emergency preparedness plans.

Comment: One commenter asked that we include suicide prevention and post-intervention plans in the requirement for emergency planning under § 1351.20(j) of the proposed rule.

Response: We did not make this change because this provision is intended to cover emergencies that affect entire facilities or all or most clients, not individual health crises. We already require that individual client treatment plans cover both physical and mental health, which is inclusive of suicide prevention.

In § 1351.20(k), which is numbered § 1351.23(h) in this final rule, we clarify that shelters operated by grantees must meet any applicable state or local licensure requirements, and that grantees determine that any shelters to which they regularly refer clients also meet such requirements. We did not propose to establish as a federal requirement that grantees meet any other state or local laws.

Comment: One comment stated that ACF should develop guidance for cases where such licensure requirements conflicted with nondiscrimination or other standards established by these rules or other HHS requirements.

Response: In the event there appears to be a conflict between federal law or regulations and state or local licensing standards, we will handle these on a case-by-case basis through monitoring and regular contact with grantees, since licensing laws differ in every state and jurisdiction. Based on this case-by-case approach, we did not amend the final rule to respond to this comment.

Comment: One commenter asked how we proposed to monitor the requirement of § 1351.20(k) that shelters operated by grantees meet any applicable state or local licensure requirements, and that grantees determine that any shelters to which they regularly refer clients also meet such requirements. The commenter also asked how the federal government would know whether a state requirement existed or had been met.

Response: Our regional staff will review licensure issues as part of their compliance reviews and monitoring visits. FOAs may include requiring an agency to provide documentation of a valid license, as well as coordination with the state or local agency when licensing is in question. In addition, if a facility is found by a state or local agency to fail licensure requirements, the state or local agency will presumably act to impose proper sanctions. Likewise, grantees themselves have huge incentives to meet state licensure requirements not only to remain open, but also because that is a condition of grant award and there are sanctions that can be levied for non-compliance, including loss of funding and debarment from future awards (see non-procurement debarment, which is second on our list of applicable federal regulations).

We have revised the regulatory language to require grantees to report to HHS instances when they fail to meet licensing requirements or lose their license. The rule now states, ''grantees shall promptly report to HHS instances in which shelters are cited for failure to meet licensure or related requirements, or lose licensure. For grantee-operated facilities, failure to meet any applicable state or local legal requirements as a condition of operation may be grounds for grant termination''.

Under § 1351.20(l), which is numbered § 1351.23(j) in this final rule, we initially proposed to require that all employees and volunteers be subject to a broad range of background checks for criminality and suitability (see the definition of background check). We also proposed to require that all adult host homes occupants be subjected to criminal and child abuse checks.

Comment: One commenter suggested adding consultants as individuals who should be subject to background checks. Several commenters objected to subjecting volunteers to the same check as employees (*e.g.,* why employment records or driving records for volunteers?) or argued that the proposed definition was ambiguous as to what was required for volunteers. In particular, several commenters pointed out that many volunteers may be one-time attendees at particular events that some staff and volunteers may not work directly with youth, that some volunteers may not have unsupervised contact with youth, and recommended exemptions in cases such as these. As examples, volunteers might be used to cook hot meals on holidays, might be guest speakers, or might visit as members of a community group.

Response: We agree with these points. We have modified the text of the final rule, as described below, to clarify that for volunteers, employees, consultants, and contractors, who have regular unsupervised contact with individual youth, and all adults who reside in or operate host homes, a background check includes an examination of criminal records, sex offender registries, a request for child abuse and neglect history, and any other checks required under state or tribal law.

Comment: Several commenters asked whether the driving record check would apply only to those who transport youth. One commenter pointed out that some kinds of criminal backgrounds do not pose serious risks of harm to the grantee or clients, and asked for clarification that employment of such persons (who might have committed minor crimes as youth) not be prohibited. Several commenters noted that there was ambiguity as to what kind of national check might be required and several pointed out that at least one state performed an out-of-state check only for states in which the person has recently lived.

Response: We agree that most of these comments raise valid points and have made several changes in the final rule. First, we have revised the text at § 1351.22(j) in this final rule to read that grantees shall have a plan, procedures, and standards for ensuring background checks on all employees, contractors, volunteers and consultants who have regular and unsupervised private contact with youth served by the grantee, and on all adults who reside in or operate host homes. The plans, procedures and standards must identify background check findings that would disqualify an applicant from consideration for employment to provide services for which assistance is made available in accordance with this part. This provides grantees' discretion for the kinds of volunteer help that the commenters identified, and discretion to reduce the scope of the background check for those volunteers who do not work directly with youth. It also gives

flexibility to grantees to avoid the time and trouble of background checks for job applicants who will not be offered employment for other reasons. We agree with the commenter who pointed out that consultants may take on duties similar to employees, perhaps involving unsupervised contact with youth, and should therefore be subject to background checks. We also added new provisions to § 1351.23(j) to clarify that programs are required to obtain state or tribal criminal history records with fingerprint checks, federal criminal history records with fingerprints (to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award), a sex offender registries check, and a child abuse and neglect registry check (to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award).

We point out that the rule also requires training in a number of subjects, including the administration and use of background checks that will cover cases such as these. Also, while we note that the requirement in the rule does not propose a specific standard or criterion for ''passing'' a background check, grantees should have a set of ''passing'' criteria in place. In this regard, we note there are issues of fiduciary stewardship such as potential embezzlement, not just crimes such as rape or assault that may be identified by background checks.

In the final rule, we did not limit background checks to the state of the grantee, as suggested by several commenters. Instead we are requiring state or tribal criminal history records including fingerprint checks as well as Federal Bureau of Investigation criminal history records including fingerprint checks, to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award. The federal background check will provide RHY providers with critical information about both in-state and out-of-state histories of prospective employees and volunteers. Criminal activity may not be limited to one state, and not all states share information through reciprocal agreements. As such, limiting a background check to only a single state could miss important criminal history. We also are aware that there may be complications or challenges with securing federal background checks. The background check requirements also include a child abuse and neglect state registry check (to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award), sex offender registries checks, and other checks required by state or local law. The essence of the final requirement is that grantees are responsible for developing plans and procedures that reasonably protect youth while minimizing unnecessary costs and burden while allowing for effective services.

Under proposed § 1351.20(m), which is numbered § 1351.23(a) in this final rule, positive youth development (PYD), which has been a central framework of the program for years, would be required. PYD emphasizes:

- Healthy messages to adolescents about their bodies, behaviors, interpersonal relationships, and interactions;
- Safe and structured places for teens to study, recreate, and socialize;
- Strong relationships with adult role models;
- Skill development in literacy competence, work readiness, and social skills; and
- Opportunities for youth to serve others and build self-esteem.

Runaway and Homeless Youth projects that adopt these principles provide the youth they serve with opportunities for positive use of time, for positive self-expression and self-development, and for constructive civic and social engagement. Accordingly, we proposed under this section to require PYD on a program-wide basis. Under this paragraph, grantees must utilize and integrate into the operation of their projects the principles of positive youth development, including healthy messages, safe and structured places, adult role models, skill development, and opportunities to serve others.

Comment: We received one comment on this section. That commenter praised this provision but pointed out that LGBTQ youth were at greater risk than heterosexual peers for a variety of physical and mental problems, and could therefore benefit disproportionately from skills and messages associated with positive youth development services. This comment asked that ACF provide additional non-regulatory guidance on messaging to assist such youth in developing identity formation and acceptance.

Response: Our Runaway and Homeless Youth Training and Technical Assistance Center provides extensive tools and technical assistance, including those aimed at LGBTQ youth (see, for example, our recent ''Research Review of Evidence-Based Practices for RHY in the Doman of LGBTQ'' at *http://www.rhyttac.net/sites/default/files/resources/EBP%20Literature%20Review%20for%20LGBTQ%20Services.pdf*). We will continue to work with stakeholders and researchers to develop information and guidance to improve services to these youth. We have made no changes to this provision.

We preface § 1351.23(a) of this final rule with the statement that there are numerous other possible requirements related to positive youth development that could have been included in this section of the final rule. We did not propose such additional requirements for three reasons. First, it is difficult to craft requirements that do not unduly constrain grantee flexibility by imposing a ''one size fits all'' approach that does not in fact reasonably apply to particular grantees, particular situations, or particular staff. Second, such requirements almost by necessity create burdens, *e.g.* for recordkeeping or reporting to demonstrate that grantees meet the requirement. Third, we use funding opportunity announcements to further clarify requirements and guidance for particular grant recipients. These announcements provide the flexibility to add particular requirements (including temporary priorities) without going through a rulemaking process and, more importantly, allow far more flexibility to adapt as needed over time. For instance, the 2014 funding opportunity announcement for the Basic Center Program (*http://www.acf.hhs.gov/grants/open/foa/view/HHS-2014-ACF-ACYF-CY-0792*) gives examples of practices to follow or services that agencies can provide. This language allows grantees the option to provide most but not all of these services. This would allow, for example, for the situation in which another agency provides a key service and the grantee can use referral arrangements. Particularly in a program dealing with such complex problems, and given the extreme variation in service availability from other providers in particular localities, we believe that funding opportunity announcements are often a preferable vehicle for encouraging certain practices and partnerships.

To this end, we have included language in § 1351.22(l) in this final rule, stating that grantees must provide such other services and meet such additional requirements as HHS determines are necessary to carry out the purposes of the statute, as appropriate to the services and activities for which they are funded. These services and requirements will be articulated in the funding opportunity

announcements and other guidance issued by FYSB. This includes operational instructions and standards of execution determined by the Secretary or Secretarial designees to be necessary to properly perform or document meeting the requirements applicable to particular programs or projects. We received no comments on this provision, and it is retained unchanged in the final rule.

Language has been moved from § 1351.22(b) to § 1351.23(m) as it applies to all programs, stating that nothing in this rule gives the federal government control over staffing and personnel decisions. This will be interpreted to mean that FYSB will not make direct hiring decisions. At the same time, rules regarding nondiscrimination and background checks, and other requirements still apply.

In addition to the requirements that all RHY grantees must meet, there are additional requirements specific to each of the three core RHY programs which stem from the Act and the unique purposes of each program.

We proposed to create a new § 1351.21 ''What are the additional requirements that the Basic Center Program grantees must meet?'' This section addresses the additional program specific requirements that are central to the purposes of the Basic Center Program. First, we proposed under paragraph (a) that all Basic Center grantees shall have an intake procedure that is available 24 hours a day and 7 days a week to all youth seeking services and temporary shelter. The intake process must, at all hours, enable staff to address and respond to young people's immediate needs for crisis counseling, food, clothing, shelter, and health care services. The second proposed requirement under paragraph (b) describes the primary function described under the Act for Basic Center grantees, requiring that grantees shall provide, either directly or through arrangements, access to temporary shelter 24 hours a day and 7 days a week. Any grantee that did not provide temporary living services to eligible youth would not be meeting an essential function of the program (section 311(a)(2) of the Act). Note that this requirement allows for a combination of facilities that are directly operated by the grantee, operated by others, or accessible through referral. Third, under paragraph (c), we proposed to require that Basic Center grantees provide case management, counseling and referral services that meet client needs and that encourage, when in the best interests of youth particularly with regard to safety, the involvement of parents or legal guardians. Under paragraph (d), we proposed to require that grantees provide additional core support services to clients both residentially and non-residentially, as appropriate. The core services must include case planning, skill building, recreation and leisure activities, and aftercare. Again, this is an essential function of the program established by the Act and codification in this final rules does not require changes in program operations. Under paragraph (e), we proposed to require that grantees make contact with the parent(s), legal guardian or other relatives of each client within 72 hours of entering the program with a ''best interest of the youth'' exception allowed for disclosure of the location if additional information is needed to ensure the safety of the youth. The ''best interest of the youth'' would be defined by the state child welfare legal requirements with respect to child protective services and law enforcement mandated reporting. Finally, under paragraph (f), we proposed that grantees be subject to any additional requirements that are included in the FOA. We received several comments on these proposals and made revisions as appropriate.

Comment: We received two comments on the proposed requirement in § 1351.21(a) and (b) of the proposed rule for 24/7 assistance to youth seeking shelter, crisis counseling, shelter, health care, and other services. One commenter strongly endorsed the proposal. One commenter on crisis counseling asked for clarification to indicate that this should be interpreted broadly to include immediate needs for suicide prevention counseling and treatment as well as other immediate mental health crises.

Response: ''Health care services'' as proposed covers both physical and mental health needs and services, whether related to suicide prevention or to other physical or mental problems. The final rule text is unchanged from the proposal.

Comment: We received two comments on the proposed requirement in § 1351.21(c) of the proposed rule for referral services that meet client needs and that encourage the involvement of parents or legal guardians when in the best interests of the child, particularly taking into account safety. One commenter endorsed the proposal and pointed out that a youth may change his mind on parental contact, recommended use of best practices, and suggested that child welfare be contacted before parents to be sure no safety or other issues existed. The other commenter also endorsed the proposal and requested clarification that safety address not only physical but also mental health, arguing that parental involvement may create a hostile environment detrimental to LGBTQ youth.

Response: This requirement deals with both physical and mental safety, for both LGBTQ clients and all other clients where safety threats may exist. As to contacting child welfare before the parents, that will sometimes be appropriate but will depend on the judgment of the staff according to individual cases (indeed, in some cases law enforcement systems will need to be contacted first). Normally, parental involvement will be first. We agree that the situation can be fluid and that the views of the youth can change. Again, staff will have to make case-by-case judgments over time. The final rule text is unchanged.

Comment: We received one comment on § 1351.21(c) of the proposed rule asking that the term ''trauma-informed'' be added as a specific reference to counseling under the Basic Center grantee requirements. This same comment was made on the corresponding provisions for Street Outreach, Transitional Living, and Maternity Group Homes (MGH) Program grantees.

Response: Counseling is understood to deal with any serious issues facing each youth, including trauma, among others, and we agree with the comment that programs should use a trauma informed and evidenced-based approach when such evidence is reliably available. Additionally, we require training and technical assistance materials be very clear on this point and that they provide guidance on trauma issues. We also note that our definition of screening and assessment refers specifically to trauma and the potential need for in-depth diagnostic assessments and services. We have revised paragraph (c) to include an emphasis on trauma-informed care and evidenced-based approaches that must be part of the core services provided. In addition to this requirement, we added a corresponding performance standard designed to measure each grantee's ability to ensure that youth receive counseling services that are trauma informed and match their individual needs.

We received no comments on § 1351.21(d) of the proposed rule and have left it unchanged in this final rule.

Comment: We received two comments on § 1351.21(e) of the proposed rule. One commenter argued against creating the 72-hour standard and recommended that we defer to state law in deciding whether or when to contact parents.

This commenter also argued that missing children's databases, including the National Center for Missing and Exploited Children, should be checked within 72 hours of the youth entering the program. This commenter pointed out that fear of contact with child welfare, law enforcement, or parents is a major barrier to youth seeking services, and that one research study found it to be the most important barrier. The other commenter raised three concerns. First, the proposed language does not deal with cases where the parent cannot be located or will not respond. Second, the comment argues, we should defer to state law both as to timing of parental notification and also as to the ''best interest'' decision. Third, the commenter disagreed with preamble language stating, ''best interest of the youth would be defined by the state child welfare legal requirements with respect to child protective services and law enforcement mandated reporting.'' This commenter gave examples where ''best interest'' cases might arise even when mandatory reporting to state agencies is not required, such as threats of harm to the youth.

Response: As these comments demonstrate, this issue area is complex as well as important. Section 312(b)(3) of the Act says that Basic Center grantees ''shall develop adequate plans for contacting the parents or other relatives of the youth and ensuring the safe return of the youth according to the best interests of the youth.'' To align better with the statute and to address the comments raised in the proposed rule, we are amending the proposed rule language to say that grantees ''shall, as soon as feasible and no later than 72 hours of the youth entering the program, contact the parents, legal guardians or other relatives of each youth according to the best interests of the youth. If a grantee determines that it is not in the best interest of the client to contact the parents, legal guardian or other relatives of the client, they must (i) inform another adult identified by the child, (ii) document why it is not in the client's best interest to contact the parent, legal guardian or other relative and (iii) send a copy of the documentation to the regional program specialist for review.''

Additionally, if the grantee is unable to locate, or the youth refuses to disclose the contact information of, the parent(s), legal guardian or other relative of the client within 72 hours of entering the program the grantee will follow the protocols set forth in paragraph (e).

Examples of when it would not be in the best interest of the child to contact the parents include instances of severe physical or emotional abuse, or fear of harm to the child.

Regarding the 72-hour timeframe, based on the past practice of our grantees, it has been determined that making a notification within 72 hours allows grantees time to assess whether contacting parents will be in the best interest of a child. However, we encourage grantees to contact parents or guardians sooner if appropriate and possible.

Comment: We received one comment on § 1351.21(f) regarding our intention to use FOAs to impose any additional requirements. The commenter expressed concern over possible misinterpretations of intent by grant application reviewers.

Response: The proposed rule language is retained in the final rule without changes because FOAs are routinely updated and grant application reviewers are fully trained on new provisions in a systematic way. Additionally, contact information for RHY program staff is provided on each FOA and grantees are always encouraged to ask questions about the announcement. While ACF/FYSB may not necessarily provide individual responses to every inquiry, responses, when provided, will be posted and made available to all applicants. Responses may be given if information is included the FOA. However, if questions do not pertain to information found in the FOA, ACF has a policy of not providing direct guidance or instruction in the development and writing of an application.

We also proposed a new § 1351.22 ''What are the additional requirements that the Transitional Living Program and Maternity Group Home grantees must meet?'' to include specific requirements for core services to be provided by the programs. Under paragraph (a), we proposed requiring that grantees provide transitional living arrangements and additional core services including case planning/management, counseling, skill building, consumer education, referral to needed social and health care services, and education, recreation and leisure activities, aftercare, and, as appropriate to grantees providing maternity-related services, parenting skills, child care, and child nutrition. Additionally, under paragraph (b), we proposed requiring that Transitional Living Program and Maternity Group Home grantees be subject to any additional requirements included in the FOA. We received no comments on this section and make no changes in the final rule.

We proposed to create a new § 1351.23 ''What are the additional requirements that the Street Outreach Program grantees must meet?'' The proposed requirements were specific to the purposes of the Street Outreach Program. We proposed under paragraph (a) to require that SOP grantees provide services designed to assist clients in leaving the streets, in making healthy choices, and in building trusting relationships in areas where targeted youth congregate. Under paragraph (b), we proposed to require SOP grantees provide directly or by referral other core services to their clients. Finally, under paragraph (c), we proposed to require that SOP grantees be subject to any additional requirements included in the FOA. We received no comments on this section other than those previously addressed, and make no changes in the final rule.

Subpart D. What are the Runaway and Homeless Youth Program-specific standards?

Section 386A of the Act requires performance standards be established for Basic Center, Transitional Living and Street Outreach Programs. In addition to requirements that apply to all Runaway and Homeless Youth Programs, we proposed to establish a new Subpart that creates specific standards for each major type of local services grant, with a focus on performance-based standards. Performance standards focus directly on program outcomes. More specifically, we explained that performance standards are focused on four core outcomes: (1) Social and emotional well-being; (2) permanent connections; (3) education or employment; and (4) stable housing. Research indicates that improvements on risk and protective factors can serve as pathways to get to better outcomes in these four core areas.[12] [13] [14] These four core outcomes are expected to lead to healthy and productive transitions to adulthood for homeless youth. In the proposed rule, some of the performance standards included specific quantifiable metrics.

Comment: We received several comments regarding difficulties with requiring grantees to contact the parent(s), legal guardian, or other relatives of clients within 72 hours of

[12] Kidd, S., & Shahar, G. (2008). Resilience in homeless youth: The key role of self-esteem. *American Journal of Orthopsychiatry, 78* (2), 163.

[13] Milburn, N.G., Jane Rotheram-Borus, M., Batterham, P., Brumback, B., Rosenthal, D., & Mallett, S. (2005). Predictors of close family relationships over one year among homeless young people. *Journal of Adolescence, 28*(2), 263–275.

[14] Milburn, N., Liang, L., Lee, S., Roteram-Borus, M., Rosenthal, D., Mallett, S., et al. (2009). Who is doing well? A typology of newly homeless adolescents. *Journal of Community Psychology, 37* (2), 135–147.

entering the program to inform them that the youth is safe, with a determination to be made on a case-by-case basis of whether it is in the best interests of the youth to notify the parent(s), legal guardian or other relatives of the location of the youth until further information has been gathered to assure safety.

Response: After reviewing these comments and the entire final rule, we decided to remove the 72-hour requirement from the performance standards since it is already included in § 1351.24(e). It was clear that this was duplicative and unnecessary since the same language was already included in the Basic Center Program requirements.

Comment: We received two comments related to health care services. One commenter asked that we add health insurance to this section. The other commenter asked that we revise the proposed language to clarify that the referral plan is for the program as a whole, not for each individual client.

Response: We have revised the language to make clear that a referral plan shall, as appropriate, cover referral for insurance services as well as for health care services. Individualized plans are required. We have, however, modified the language to make clear that the grantee responsibility is to make referrals, not to arrange or monitor the actual provision of specific medical care services, insurance, or insurance coverage. Those functions are the responsibility of the health care providers themselves, and the youth who are their patients, not of our grantees.

The regulatory provisions concerning pre-natal care, well-baby exams, and immunizations for Maternity Group Home grantees are fully adopted without changes in this final rule.

Comment: Almost all commenters addressing performance standards for the Basic Center Program welcomed the idea of performance standards but criticized the proposed 90 percent standard in § 1351.30(b) for youth transitioning to safe and appropriate settings when exiting Basic Center Program settings. Many commenters said that 90 percent was an unrealistically high goal, and proposed lower standards, such as 75 percent. One commenter mentioned the option of a corrective action plan at the lower percent level. Another suggested imposing the standard only for youth who stay enrolled for more than seven days. Another pointed out that some youth would leave as soon as they are informed of mandatory reporting to state agencies. One commenter said it was not within the grantee's control if youth simply run from the center to an unknown destination. One commenter questioned whether the preamble was accurately describing past achievement rates near 90 percent. Several commenters were concerned that the proposed standard would reduce the willingness of grantees to enroll the hardest to serve clients, and suggested adjusting performance measures based on participant characteristics to create incentives to target services to the most vulnerable youth. Several commenters said that without more flexible standards for safe exits, the proposed standard would be impossible to achieve. Several commenters said that without better exit criteria the performance standard should be lowered to 60 percent. Several commenters pointed out that for very small centers the 90 percent standard could be missed by a change of just one or two youth making a different decision.

We received almost twenty unique comments on the proposed performance standards for the Transitional Living Program. Essentially the same group of commenters as commented on the quantitative performance criteria for the Basic Center Program commented on these criteria for the Transitional Living Program.

These commenters made similar or identical arguments, especially against the 90 percent standard for exit to safe and appropriate settings. Some also addressed the 45 percent standard for community service, and one of these criticized that standard as somewhat inconsistent with the program's goals of securing education, employment, and safe housing. This comment suggested conceptually different measures, such as providing youth the opportunity to perform community service once a month.

Several comments to the proposed performance criteria for the Street Outreach Program criticized our proposal to count total contacts as ambiguous. For example, would contacting the same youth multiple times count the same as contacting multiple youth once each? One comment suggested that it might be possible to develop a good performance measure from the percentage of youth contacted that accepted shelter, case management, or other services. Another comment asked about the dividing line between a youth who was a contact and a youth who was a client. Another comment suggested that any such measure would be skewed downward in cases where the same youth was contacted multiple times but only accepted housing after the final encounter. Several comments criticized the total contacts measure as meaningless given the different sizes of Street Outreach Program service areas and the different sizes of individual programs. Two of these comments recommended that we adjust the measure by the population of the service area or by population density; the latter reflecting the presumably greater difficulty of reaching youth in rural areas.

A third said the total contacts measure should be used as a reporting requirement, but dropped as a performance measure. One commenter praised the proposed numeric standard in § 1351.32 and suggested no specific change. One commenter proposed broader measures such as comparing the number contacted to the estimated universe of runaway and homeless youth in the service area. One commenter suggested comparing the number contacted to the total population in the service area. This commenter also recommended that HHS convene SOP grantees to collaboratively determine what standards should be used. One commenter suggested collecting data on the immediate outcomes of outreach contacts, but not setting specific performance standards. One commenter mentioned the option of comparing the total number of youth contacted to the number accepting services and criticized it because contacting a single youth many times, such as 20 times, followed by that youth finally accepting shelter, would lead to a misleading 5 percent effectiveness figure.

Response: Based on the feedback received, we have revised the performance standards for the Basic Center, the Transitional Living, and Street Outreach Programs. For the Basic Center and Transitional Living Programs, the performance standards are focused on outcomes: (1) Social and Emotional Well-being; (2) Permanent Connections; (3) Education or Employment; and (4) Stable Housing. We also included definitions of these terms in Subpart A of this rule. These definitions were derived directly from the U.S. Interagency Council on Homelessness (USICH) Federal Framework to End Youth Homelessness. The Street Outreach Program performance standards maintain a focus on the number of youth contacts completed.

We have decided to remove the numerical metrics from the regulatory language for Basic Center, Transitional Living, and Street Outreach Programs. Specific numeric metrics based on the performance standards will be outlined

in future Funding Opportunity Announcements. These numeric metrics will be developed using RHYMIS and HMIS data collected under existing data collection systems such as RHYMIS and HMIS (OMB Control Number 0970–0123) and its successors, as well as performance progress reports (OMB control number 0970–0406) and its successors. This will give FYSB flexibility to analyze data reported by grantees and set realistic benchmarks over time through existing data collection and grant reporting methods.

For the Street Outreach Program performance standards, we interpret the standard as allowing each contact with the same youth on later occasions to count as a new contact, but see no need to amend the language. Youth receiving services should be counted as clients rather than contacts. We will make these points clear in training and technical assistance materials and in the HMIS system's reporting directions. Finally, we appreciate the conceptual improvement of a percentage measure related to acceptance of services, but think that it would be very difficult to measure accurately in practice. We will explore that idea further in consultations with grantees and stakeholders, as a possible future improvement.

After careful consideration of the various criticisms of and suggestions for improving the performance standard, we have added language to the end of this Street Outreach Program performance standards section that will determine appropriate proportions of contacts based on grantee staff size through existing data collection and grant reports. Specific numeric metrics will be outlined in future Funding Opportunity Announcements. FYSB will provide more specific guidance and training and technical assistance to grantees on collection and reporting data.

In the final rule, we also added language that reinforces that grantees need to report data about each of the performance standards. This language was inconsistently incorporated into the proposed rule. To ensure clarity, the final rule explicitly includes language related to reporting within each performance standard subparagraph.

We did not propose performance standards for technical assistance and other grants that do not provide direct services. We do not believe that support grants such as these lend themselves to across-the-board, outcome-oriented performance standards such as those proposed here.

Revising Performance Standards

We proposed to create a new § 1351.33 ''How and when will performance standards for the Runaway and Homeless Youth Program be revised?'' We stated that for those performance standards for which benchmarks would not be set in the codified rule, benchmarks might be set in the coming years as data are collected. Additionally, we said that as grantees improve performance, it might be necessary to adjust the benchmark on a given performance standard in the coming years. Furthermore, we stated that as more is learned about how to improve outcomes, performance standards themselves might need to be modified or added. The rulemaking process is not conducive to making quick or on-going adjustments.

We did not receive comments on this section but have determined since publishing the proposed rule that this section is not needed because it does not directly relate to the responsibilities of the grantees. Therefore, we have deleted this section in the final rule text.

Effective Dates

We proposed to create a new § 1351.34 ''When Are Program-Specific Requirements Effective?'' We proposed that grantees shall meet program specific requirements, as applicable, upon the effective date of this final rule, or starting at the beginning of the next budget period for the grant, whichever comes later. Since most budget periods begin on October 1 of each year, this means that grantees would have however many days there are between the issuance of final regulations and that date, but never less than 30 days.

While we received no comments on this newly created section, we acknowledge the effective date is included as part of the regulations publication in the **Federal Register**, so there is no reason to add a specific section for this purpose. The section has been deleted from the final rule.

VII. Impact Analysis

Paperwork Reduction Act

This final rule contains no new information collection requirements because all information required in the performance standards has been collected by RHYMIS. The OMB Control Number for RHYMIS is 0970–0123, which has a current expiration date of February 28, 2018. We are looking to revise data standards to reduce the burden associated with filling out the data for the RHY program by the Spring of 2017, with the effective date of October 1, 2017.

Regulatory Flexibility Act

The Secretary certifies that this final rule will not result in a significant economic impact on a substantial number of small entities. We have not imposed any new requirements that will have such an effect. This final rule conforms to the existing statutory requirements and existing practices in the program. In particular, we have imposed only a few new processes, procedural, or documentation requirements that are not encompassed within the existing rule, existing FOAs, or existing information collection requirements. None of these will impose a consequential burden on grantees. Accordingly, a Regulatory Flexibility Analysis is not required.

Regulatory Impact Analysis

Executive Order 12866 requires that regulations be reviewed to ensure that they are consistent with the priorities and principles set forth in the Executive Order. HHS has determined that this final rule is consistent with these priorities and principles. The Executive Order requires a Regulatory Impact Analysis for proposed or final rules with an annual economic impact of $100 million or more. Nothing in this final rule approaches effects of this magnitude. This rule has been reviewed by the Office of Management and Budget.

Congressional Review

This rule is not a major rule (economic effects of $100 million or more) as defined in the Congressional Review Act.

Federalism Review

Executive Order 13132, Federalism, requires that federal agencies consult with state and local government officials in the development of regulatory policies with federalism implications. This rule will not have substantial direct impact on the states, on the relationship between the National Government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with the Executive Order we have determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Family Impact Review

Section 654 of the Treasury and General Government Appropriations Act of 1999 (Pub L. 105–277) requires federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This

rule would not have any new or adverse impact on the autonomy or integrity of the family as an institution. Like the existing rule and existing program practices, it directly supports family well-being, for example supporting reunification and ongoing family counseling to prevent homelessness wherever safe and feasible. Since we made no changes that would affect this policy priority, we have concluded that it is not necessary to prepare a Family Policymaking Assessment.

List of Subjects in 45 CFR Part 1351

Administrative practice and procedure, Grant programs—social programs, Homeless, Reporting and recordkeeping requirements, Technical assistance, Youth.

(Catalog of Federal Domestic Assistance Program Numbers 93.550, Transitional Living for Homeless Youth; 93.557, Education and Prevention Grants to Reduce Sexual Abuse of Runaway, Homeless and Street Youth; and 93.623, Basic Center Grants for Runaway Youth)

Mark H. Greenberg,

Acting Assistant Secretary for Children and Families.

Approved: March 16, 2016.

Sylvia M. Burwell,

Secretary.

Editorial note: This document was received at the Office of the Federal Register on December 12, 2016.

■ For the reasons set out in the preamble, title 45 CFR part 1351 is revised as follows:

PART 1351—RUNAWAY AND HOMELESS YOUTH PROGRAM

■ 1. The authority citation for part 1351 continues to read as follows:

Authority: 42 U.S.C. 5701.

Subpart A—Definition of Terms

■ 2. Revise § 1351.1 to read as follows:

§ 1351.1 Significant Terms.

For the purposes of this part:

Act means the Runaway and Homeless Youth Act as amended, 42 U.S.C. 5701 *et seq.*

Aftercare means additional services provided beyond the period of residential stay that offer continuity and supportive follow-up to youth served by the program.

Background check means the review of an individual employee's or employment applicant's personal information, which shall include State or Tribal criminal history records (including fingerprint checks); Federal Bureau of Investigation criminal history records, including fingerprint checks, to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award; a child abuse and neglect registry check, to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award; and a sex offender registry check for all employees, consultants, contractors, and volunteers who have regular, unsupervised contact with individual youth, and for all adult occupants of host homes. As appropriate to job functions, it shall also include verification of educational credentials and employment experience, and an examination of the individual's driving records (for those who will transport youth), and professional licensing records.

Case management means identifying and assessing the needs of the client, including consulting with the client, and, as appropriate, arranging, coordinating, monitoring, evaluating, and advocating for a package of services to meet the specific needs of the client.

Client means a runaway, homeless, or street youth, or a youth at risk of running away or becoming homeless, who is served by a program grantee.

Congregate care means a shelter type that combines living quarters and restroom facilities with centralized dining services, shared living spaces, and access to social and recreational activities, and which is not a family home.

Contact means the engagement between Street Outreach Program staff and youth who are at risk of homelessness or runaway status or homeless youth in need of services that could reasonably lead to shelter or significant harm reduction. Contact may occur on the streets, at a drop-in center, or at other locations known to be frequented by homeless, runaway, or street youth.

Core competencies of youth worker means the ability to demonstrate skills in six domain areas:

(1) Professionalism (including, but not limited to, consistent and reliable job performance, awareness and use of professional ethics to guide practice);

(2) Applied positive youth development approach (including, but not limited to, skills to develop a positive youth development plan and identifying the client's strengths in order to best apply a positive youth development framework);

(3) Cultural and human diversity (including, but not limited to, gaining knowledge and skills to meet the needs of clients of a different race, ethnicity, nationality, religion/spirituality, gender identity/expression, sexual orientation);

(4) Applied human development (including, but not limited to, understanding the developmental needs of those at risk and with special needs);

(5) Relationship and communication (including, but not limited to, working with clients in a collaborative manner); and

(6) Developmental practice methods (including, but not limited to, utilizing methods focused on genuine relationships, health and safety, intervention planning).

Counseling services means the provision of guidance, support, referrals for services including, but not limited to, health services, and advice to runaway or otherwise homeless youth and their families, as well as to youth and families when a young person is at risk of running away, as appropriate. These services are provided in consultation with clients and are designed to alleviate the problems that have put the youth at risk of running away or contributed to his or her running away or being homeless. Any treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression is prohibited.

Drop-in center means a place operated and staffed for runaway or homeless youth that clients can visit without an appointment to get advice or information, to receive services or service referrals, or to meet other runaway or homeless youth.

Drug abuse education and prevention services means services to prevent or reduce drug and/or alcohol abuse by runaway and homeless youth, and may include: (1) Individual, family, group, and peer counseling; (2) drop-in services; (3) assistance to runaway and homeless youth in rural areas (including the development of community support groups); (4) information and training relating to drug and/or alcohol abuse by runaway and homeless youth for individuals involved in providing services to such youth; and (5) activities to improve the availability of local drug and/or alcohol abuse prevention services to runaway and homeless youth.

Education or employment means performance in and completion of educational and training activities, especially for younger youth, and starting and maintaining adequate and stable employment, particularly for older youth.

Health care services means physical, mental, behavioral, and dental health

services. It includes services provided to runaway and homeless youth and in the case of Maternity Group Homes also includes services provided to a pregnant youth and the child(ren) of the youth. Where applicable and allowable within a program, it includes information on appropriate health related services provided to family or household members of the youth. Any treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression is prohibited.

Home-based services means services provided to youth and their families for the purpose of preventing such youth from running away or otherwise becoming separated from their families and assisting runaway youth to return to their families. It includes services that are provided in the residences of families (to the extent practicable), including intensive individual and family counseling and training relating to life skills and parenting.

Homeless youth means an individual who cannot live safely with a parent, legal guardian, or relative, and who has no other safe alternative living arrangement. For purposes of Basic Center Program eligibility, a homeless youth must be less than 18 years of age (or higher if allowed by a state or local law or regulation that applies to licensure requirements for child- or youth-serving facilities). For purposes of Transitional Living Program eligibility, a homeless youth cannot be less than 16 years of age and must be less than 22 years of age (unless the individual commenced his or her stay before age 22, and the maximum service period has not ended).

Host family home means a family or single adult home or domicile, other than that of a parent or permanent legal guardian, that provides shelter to homeless youth.

Intake means a process for gathering information to assess eligibility and the services required to meet the immediate needs of the client. The intake process may be operated independently but grantees should, at minimum, ensure they are working with their local Continuum of Care Program to ensure that referrals are coordinated and youth have access to all of the community's resources.

Juvenile justice system means agencies that include, but are not limited to, juvenile courts, correctional institutions, detention facilities, law enforcement, training schools, or agencies that use probation, parole, and/or court ordered confinement.

Maternity group home means a community-based, adult-supervised transitional living arrangement where client oversight is provided on site or on-call 24 hours a day and that provides pregnant or parenting youth and their children with a supportive environment in which to learn parenting skills, including child development, family budgeting, health and nutrition, and other skills to promote their long-term economic independence and ensure the well-being of their children.

Outreach means finding runaway, homeless, and street youth, or youth at risk of becoming runaway or homeless, who might not use services due to lack of awareness or active avoidance, providing information to them about services and benefits, and encouraging the use of appropriate services.

Permanent connections means ongoing attachments to families or adult role models, communities, schools, and other positive social networks which support young people's ability to access new ideas and opportunities that support thriving, and they provide a social safety net when young people are at-risk of re-entering homelessness

Risk and protective factors mean those factors that are measureable characteristics of a youth that can occur at multiple levels, including biological, psychological, family, community, and cultural levels, that precede and are associated with an outcome. Risk factors are associated with higher likelihood of problematic outcomes, and protective factors are associated with higher likelihood of positive outcomes.

Runaway youth means an individual under 18 years of age who absents himself or herself from home or place of legal residence without the permission of a parent or legal guardian.

Runaway and Homeless Youth project means a community-based program outside the juvenile justice or child welfare systems that provides runaway prevention, outreach, shelter, or transition services to runaway, homeless, or street youth or youth at risk of running away or becoming homeless.

Safe and appropriate exits means settings that reflect achievement of the intended purposes of the Basic Center and Transitional Living Programs as outlined in section 382(a) of the Act. Examples of Safe and Appropriate Exits are exits:

(1) To the private residence of a parent, guardian, another adult relative, or another adult that has the youth's best interest in mind and can provide a stable arrangement;

(2) To another residential program if the youth's transition to the other residential program is consistent with the youth's needs; or

(3) To independent living if consistent with the youth's needs and abilities.

Safe and appropriate exits are not exits:

(1) To the street;

(2) To a locked correctional institute or detention center if the youth became involved in activities that lead to this exit after entering the program;

(3) To another residential program if the youth's transition to the other residential program is inconsistent with the youth's needs; or

(4) To an unknown or unspecified other living situation.

Screening and assessment means valid and reliable standardized instruments and practices used to identify each youth's individual strengths and needs across multiple aspects of health, wellbeing and behavior in order to inform appropriate service decisions and provide a baseline for monitoring outcomes over time. Screening involves abbreviated instruments, for example with trauma and health problems, which can indicate certain youth for more thorough diagnostic assessments and service needs. Assessment, which is used here to mean assessment more broadly than for the purposes of diagnosis, involves evaluating multiple aspects of social, emotional, and behavioral competencies and functioning in order to inform service decisions and monitor outcomes.

Service plan or *treatment plan* means a written plan of action based on the assessment of client needs and strengths and engaging in joint problem solving with the client that identifies problems, sets goals, and describes a strategy for achieving those goals. To the extent possible, the plan should incorporate the use of trauma informed, evidence-based, or evidence-informed interventions. As appropriate, the service and treatment plans should address both physical and mental safety issues.

Short-term training means the provision of local, state, or regionally-based instruction to runaway or otherwise homeless youth service providers in skill areas that will directly strengthen service delivery.

Social and emotional well-being means the development of key competencies, attitudes, and behaviors that equip a young person experiencing homelessness to avoid unhealthy risks and to succeed across multiple domains of daily life, including school, work, relationships, and community.

Stable housing means a safe and reliable place to call home. Stable housing fulfills a critical and basic need for homeless youth. It is essential to

enabling enable functioning across a range of life activities.

State means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and any territory or possession of the United States.

Street youth means an individual who is a runaway youth or an indefinitely or intermittently homeless youth who spends a significant amount of time on the street or in other areas that increase the risk to such youth for sexual abuse, sexual exploitation, prostitution, or drug and/or alcohol abuse. For purposes of this definition, youth means an individual who is age 21 or less.

Supervised apartments mean a type of shelter setting using building(s) with separate residential units where client supervision is provided on site or on call 24 hours a day.

Technical assistance means the provision of expertise or support for the purpose of strengthening the capabilities of grantee organizations to deliver services.

Temporary shelter means all Basic Center Program shelter settings in which runaway and homeless youth are provided room and board, crisis intervention, and other services on a 24-hour basis for up to 21 days. The 21 day restriction is on the use of RHY funds through the Basic Center Program, not a restriction on the length of stay permitted by the facility.

■ 3. Revise the Subpart B heading to read as follows:

Subpart B—Runaway and Homeless Youth Program Grants

■ 4. Revise § 1351.10 to read as follows:

§ 1351.10 What is the purpose of Runaway and Homeless Youth Program grants?

(a) The purpose of Runaway and Homeless Youth Program grants is to establish or strengthen community-based projects to provide runaway prevention, outreach, shelter, and transition services to runaway, homeless, or street youth or youth at risk of running away or becoming homeless.

(b) Youth who have become homeless or who leave and remain away from home without parental permission are disproportionately subject to serious health, behavioral, and emotional problems. They lack sufficient resources to obtain care and may live on the street for extended periods, unable to achieve stable, safe living arrangements that at times put them in danger. Many are urgently in need of shelter, which, depending on the type of Runaway and Homeless Youth project, can include host family homes, drop-in centers, congregate care, or supervised apartments, and services, including services that are linguistically appropriate, responsive to their complex social identities (*i.e.,* race, ethnicity, nationality, religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, physical ability, language, beliefs, values, behavior patterns, or customs), and acknowledge the environment they come from. Runaway and Homeless Youth grant services should have a positive youth development approach that ensures a young person has a sense of safety and structure; belonging and membership; self-worth and social contribution; independence and control over one's life; skills to develop plans for the future and set goals; and closeness in interpersonal relationships. To make a successful transition to adulthood, runaway youth, homeless youth, and street youth also need opportunities to complete high school or earn a general equivalency degree, learn job skills, and obtain employment. HHS operates three programs to carry out these purposes through direct local services: The Basic Center Program; the Transitional Living Program (including Maternity Group Homes); and the Street Outreach Program. HHS operates three additional activities to support achievement of these purposes: Research, evaluation, and service projects; a national communications system to assist runaway and homeless youth in communicating with service providers; and technical assistance and training.

■ 5. Revise § 1351.11 to read as follows:

§ 1351.11 Who is eligible to apply for a Runaway and Homeless Youth Program grant?

Public (state and local) and private non-profit entities, and coordinated networks of such entities, are eligible to apply for a Runaway and Homeless Youth Program grant unless they are part of the juvenile justice system.

■ 6. Revise § 1351.12 to read as follows:

§ 1351.12 Who gets priority for the award of a Runaway and Homeless Youth Program grant?

(a) In selecting applications for grants under the Basic Center Program the Secretary shall give priority to—

(1) Eligible applicants who have demonstrated experience in providing services to runaway and homeless youth; and

(2) Eligible applicants that request grants of less than $200,000 or such figure as Congress may specify.

(b) In selecting applications for grants under the Transitional Living Program, the Secretary shall give priority to entities that have experience in providing to homeless youth shelter (such as group homes, including maternity group homes, host family homes, and supervised apartments) and services (including information and counseling services in basic life skills which shall include money management, budgeting, consumer education, and use of credit, parenting skills (as appropriate), interpersonal skill building, educational advancement, job attainment skills, and mental and physical health care) to homeless youth.

(c) In selecting applicants to receive grants under the Street Outreach Program, the Secretary shall give priority to public and nonprofit private agencies that have experience in providing services to runaway and homeless, and street youth.

(d) In selecting grants for the national communication system to assist runaway and homeless youth in communicating with their families and with service providers, the Secretary shall give priority to grant applicants that have experience in providing electronic communications services to runaway and homeless youth, including telephone, Internet, mobile applications, and other technology-driven services.

(e) In selecting grants for research, evaluation, demonstration and service projects, the Secretary shall give priority to proposed projects outlined in section 343(b) and (c) of the Act.

(f) The Secretary shall integrate the performance standards outlined in §§ 1351.30, 1351.31, or 1351.32 into the grantmaking, monitoring, and evaluation processes of the Basic Center Program, Transitional Living Program, and Street Outreach Program. Specific details about how performance standards will be considered, along with examples of performance documentation, will be provided in the annual funding opportunity announcements.

■ 7. Revise § 1351.13 to read as follows:

§ 1351.13 What are the Federal and non-Federal match requirements under a Runaway and Homeless Youth Program grant?

The federal share of the project represents 90 percent of the total project cost supported by the federal government. The remaining 10 percent represents the required project match cost by the grantee. This may be a cash or in-kind contribution.

■ 8. Revise § 1351.15 to read as follows:

§ 1351.15 What costs are supportable under a Runaway and Homeless Youth Program grant?

(a) For all grant programs, costs that can be supported include, but are not limited to, staff training and core services such as outreach, intake, case management, data collection, temporary shelter, transitional living arrangements, referral services, counseling services, and aftercare services. Costs for acquisition and renovation of existing structures may not normally exceed 15 percent of the grant award. HHS may waive this limitation upon written request under special circumstances based on demonstrated need.

(b) For grants that support research, evaluation, and service projects; a national communications system to assist runaway and homeless youth in communicating with service providers; and for technical assistance and training grants; costs that can be supported include those enumerated above as well as services such as data collection and analysis, telecommunications services, and preparation and publication of materials in support of the purposes of such grants.

■ 9. Revise § 1351.16 to read as follows:

§ 1351.16 What costs are not allowable under a Runaway and Homeless Youth Program grant?

(a) A Runaway and Homeless Youth Program grant does not cover the capital costs of constructing new facilities, or operating costs of existing community centers or other facilities that are used partially or incidentally for services to runaway or homeless youth clients, except to the extent justified by application of cost allocation methods accepted by HHS as reasonable and appropriate.

(b) A Runaway and Homeless Youth Program grant does not cover any treatment or referral to treatment that aims to change someone's sexual orientation, gender identity or gender expression.

■ 10. Revise § 1351.17 to read as follows:

§ 1351.17 How is application made for a Runaway and Homeless Youth Program grant?

An applicant should follow instructions included in funding opportunity announcements, which describe procedures for receipt and review of applications.

■ 11. Revise § 1351.18 to read as follows:

§ 1351.18 What criteria has HHS established for deciding which Runaway and Homeless Youth Program grant applications to fund?

In reviewing applications for a Runaway and Homeless Youth Program grant, HHS takes into consideration a number of factors, including, but not limited to:

(a) Whether the grant application meets the particular priorities, requirements, standards, or evaluation criteria established in funding opportunity announcements;

(b) A need for Federal support based on the likely number of estimated runaway or otherwise homeless youth in the area in which the Runaway and Homeless Youth project is or will be located exceeding the availability of existing services for such youth in that area;

(c) For runaway and homeless youth centers, whether there is a minimum residential capacity of four (4) and a maximum residential capacity of twenty (20) youth in a single structure (except where the applicant assures that the state where the center or locally controlled facility is located has a state or local law or regulation that requires a higher maximum to comply with licensure requirements for child and youth serving facilities), or within a single floor of a structure in the case of apartment buildings, with a number of staff sufficient to assure adequate supervision and treatment for the number of clients to be served and the guidelines followed for determining the appropriate staff ratio;

(d) Plans for meeting the best interests of the youth involving, when reasonably possible, both the youth and the family. For Basic Center grantee applicants, the grantee shall develop adequate plans for contacting the parents or other relatives of the youth and ensuring the safe return of the youth according to the best interests of the youth, for contacting local government officials pursuant to informal arrangements established with such officials by the runaway and homeless youth center, and for providing for other appropriate alternative living arrangements;

(e) Plans for the delivery of aftercare or counseling services to runaway or otherwise homeless youth and their families;

(f) Whether the estimated cost to HHS for the Runaway and Homeless Youth project is reasonable considering the anticipated results;

(g) Whether the proposed personnel are well qualified and the applicant agency has adequate facilities and resources;

(h) Past performance on a RHY grant, including but not limited to program performance standards;

(i) Whether the proposed project design, if well executed, is capable of attaining program objectives;

(j) The consistency of the grant application with the provisions of the Act and these regulations; and

(k) Other factors as outlined in funding opportunity announcements.

§ 1351.19 [Removed]

■ 12. Remove § 1351.19.

■ 13. Revise Subpart C to read as follows:

Subpart C—Additional Requirements

Sec.

Subpart C—Additional Requirements

§ 1351.20 What Government-wide and HHS-wide regulations apply to these programs?

A number of other rules and regulations apply or potentially apply to applicants and grantees. These include:

(a) 2 CFR part 182—Government-wide Requirements for Drug Free Workplace;

(b) 2 CFR part 376—Nonprocurement Debarment and Suspension

(c) 45 CFR part 16—Procedures of the Departmental Grant Appeals Board;

(d) 45 CFR part 30—Claims Collection;

(e) 45 CFR part 46—Protection of Human Subjects;

(f) 45 CFR part 75—Uniform Administrative Requirements, Cost principles, and Audit Requirements for HHS Awards, including nondiscrimination requirements.

(g) 45 CFR part 80—Nondiscrimination Under Programs Receiving Federal Assistance Through the Department of Health and Human

Services Effectuation of Title VI of the Civil Rights Act of 1964;

(h) 45 CFR part 81—Practice and Procedure for Hearings Under part 80;

(i) 45 CFR part 84—Nondiscrimination on the Basis of Handicap in Programs or Activities Receiving Federal Financial Assistance;

(j) 45 CFR part 86—Nondiscrimination on the Basis of Sex in Education Programs or Activities receiving Federal Financial Assistance;

(k) 45 CFR part 87—Equal Treatment for Faith Based Organizations;

(l) 45 CFR part 91—Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance;

(m) 45 CFR part 92—Nondiscrimination in Health Programs and Activities; and

(n) 45 CFR part 93—New Restrictions on Lobbying.

§ 1351.21 What confidentiality requirements apply to these programs?

Several program policies regarding confidentiality of information, treatment, conflict of interest and state protection apply to recipients of Runaway and Homeless Youth Program grants. These include:

(a) Confidential information. Pursuant to the Act, no records containing the identity of individual youth, including but not limited to lists of names, addresses, photographs, or records of evaluation of individuals served by a Runaway and Homeless Youth project, may be disclosed or transferred to any individual or to any public or private agency except:

(1) For Basic Center Program grants, records maintained on individual runaway and homeless youth shall not be disclosed without the informed consent of the individual youth and parent or legal guardian to anyone other than another agency compiling statistical records or a government agency involved in the disposition of criminal charges against an individual runaway and homeless youth;

(2) For Transitional Living Programs, records maintained on individual homeless youth shall not be disclosed without the informed consent of the individual youth to anyone other than an agency compiling statistical records;

(3) Research, evaluation, and statistical reports funded by grants provided under section 343 of the Act are allowed to be based on individual data, but only if such data are de-identified in ways that preclude disclosing information on identifiable individuals; and

(4) Youth served by a Runaway and Homeless Youth project shall have the right to review their records; to correct a record or file a statement of disagreement; and to be apprised of the individuals who have reviewed their records.

(b) State law protection. HHS policies regarding confidential information and experimentation and treatment shall not apply if HHS finds that state law is more protective of the rights of runaway or otherwise homeless youth.

(c) Procedures shall be established for the training of project staff in the protection of these rights and for the secure storage of records.

§ 1351.22 What additional requirements apply to these programs?

(a) *Non-discriminatory and culturally and linguistically sensitive services and training.* Service delivery and staff training must comprehensively address the individual strengths and needs of youth as well as be language appropriate, gender appropriate (interventions that are sensitive to the diverse experiences of male, female, and transgender youth and consistent with the gender identity of participating youth), and culturally sensitive and respectful of the complex social identities of youth (*i.e.,* race, ethnicity, nationality, age, religion/spirituality, gender identity/expression, sexual orientation, socioeconomic status, physical or cognitive ability, language, beliefs, values, behavior patterns, or customs). No runaway youth or homeless youth shall, on any of the foregoing bases, be excluded from participation in, be denied the benefits of, or be subject to discrimination under, any program or activity funded in whole or in part under the Runaway and Homeless Youth Act.

(1) The criteria that grantees adopt to determine eligibility for the program, or any activity or service, may include an assessment of the needs of each applicant, and the health and safety of other beneficiaries, among other factors.

(2) [Reserved]

(b) *Medical, psychiatric or psychological treatment.* No youth shall be subject to medical, psychiatric, or psychological treatment without the consent of the youth and, for youth under the age of emancipation in their state of residence, consent of a parent or guardian, if required by state law.

(c) *Conflict of interest.* Employees or individuals participating in a program or project under the Act shall not use their positions for a purpose that is, or gives the appearance of being, motivated by a desire for private gain for themselves or others, particularly those with whom they have family, business or other ties.

§ 1351.23 What are the additional requirements that apply to the Basic Center, Transitional Living and Street Outreach Program grants?

To improve the administration of these Runaway and Homeless Youth Programs by increasing the capacity of Runaway and Homeless Youth projects to deliver services, by improving their performance in delivering services, and by providing for the evaluation of performance:

(a) Grantees shall participate in technical assistance, monitoring, and short-term training as a condition of funding, as determined necessary by HHS, in such areas as: Aftercare services and counseling; background checks; core competencies of youth workers; core support services; crisis intervention techniques; culturally and linguistically sensitive services; participation in or development of coordinated networks of private nonprofit agencies and/or public agencies to provide services; ethics and staff safety; fiscal management; low cost community alternatives for runaway or otherwise homeless youth; positive youth development; program management; risk and protective factors related to youth homelessness; screening and assessment practices; shelter facility staff development; special populations (tribal youth; lesbian, gay, bisexual, transgender, questioning (LGBTQ), and intersex youth; youth with disabilities; youth victims of trafficking, sexual exploitation or sexual abuse); trauma and the effects of trauma on youth; use of evidence-based and evidence-informed interventions; and youth and family counseling. It is not a requirement that every staff person receives training in every subject but all staff members who work directly with youth should receive training sufficient to meet the stated core-competencies of youth workers.

(b) Grantees shall coordinate their activities with the 24-hour National toll-free and Internet communication system, which links Runaway and Homeless Youth projects and other service providers with runaway or otherwise homeless youth, as appropriate to the specific activities provided by the grantee.

(c) Grantees shall submit statistical reports profiling the clients served and providing management and performance information in accordance with guidance provided by HHS.

(d) Grantees shall perform outreach to locate runaway and homeless youth and to coordinate activities with other organizations serving the same or similar client populations, such as child welfare agencies, juvenile justice

systems, schools, and Continuums of Care, as defined by HUD.

(e) Grantees shall develop and implement a plan for addressing youth who have run away from foster care placement or correctional institutions, in accordance with federal, state, or local laws or regulations that apply to these situations. In accordance with section 312(b)(4) of the Act, Basic Center grantees must also develop a plan that ensures the return of runaway and homeless youth who have run away from the correctional institution back to the correctional institution.

(f) Grantees shall take steps to ensure that youth who are or should be under the legal jurisdiction of the juvenile justice or child welfare systems obtain and receive services from those systems until such time as they are released from the jurisdiction of those systems.

(g) Grantees shall develop and document plans that address steps to be taken in case of a local or national situation that poses risk to the health and safety of staff and youth. Emergency preparedness plans should, at a minimum, include routine preventative maintenance of facilities as well as preparedness, response, and recovery efforts. The plan should contain strategies for addressing evacuation, security, food, medical supplies, and notification of youths' families, as appropriate. In the event of an evacuation due to specific facility issues, such as a fire, loss of utilities, or mandatory evacuation by the local authorities, an alternative location needs to be designated and included in the plan. Grantees must immediately provide notification to their project officer and grants officer when evacuation plans are executed.

(h) Grantees shall ensure that all shelters that they operate are licensed and determine that any shelters to which they regularly refer clients have evidence of current licensure, in states or localities with licensure requirements. Grantees shall promptly report to HHS instances in which shelters are cited for failure to meet licensure or related requirements, or lose licensure. For grantee-operated facilities, failure to meet any applicable state or local legal requirements as a condition of operation may be grounds for grant termination.

(i) Grantees shall utilize and integrate into the operation of their projects the principles of positive youth development, including healthy messages, safe and structured places, adult role models, skill development, and opportunities to serve others.

(j) No later than October 1, 2017, grantees shall have a plan, procedures, and standards for ensuring background checks on all employees, contractors, volunteers, and consultants who have regular and unsupervised private contact with youth served by the grantee, and on all adults who reside in or operate host homes. The plans, procedures, and standards must identify the background check findings that would disqualify an applicant from consideration for employment to provide services for which assistance is made available in accordance with this part.

(1) Required background checks include:

(i) State or tribal criminal history records, including fingerprint checks;

(ii) Federal Bureau of Investigation criminal history records, including fingerprint checks, to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award;

(iii) Child abuse and neglect state registry check, to the extent FSYB determines this to be practicable and specifies the requirement in a Funding Opportunity Announcement that is applicable to a grantee's award;

(iv) Sex offender registry check; and,

(v) Any other checks required under state or tribal law.

(2) Programs must document the justification for any hire where an arrest, pending criminal charge or conviction, is present.

(k) Grantees shall provide such other services and meet such additional requirements as HHS determines are necessary to carry out the purposes of the statute, as appropriate to the services and activities for which they are funded. These services and requirements are articulated in the funding opportunity announcements and other instructions issued by the Secretary or secretarial designees. This includes operational instructions and standards of execution determined by the Secretary or secretarial designees to be necessary to properly perform or document meeting the requirements applicable to particular programs or projects.

§ 1351.24 What are the additional requirements that the Basic Center Program grantees must meet?

(a) Grantees shall have an intake procedure that is available 24 hours a day and 7 days a week to all youth seeking services and temporary shelter that addresses and responds to immediate needs for crisis counseling, food, clothing, shelter, and health care services.

(b) Grantees shall provide, either directly or through arrangements, access to temporary shelter 24 hours a day and 7 days a week.

(c) Grantees shall provide trauma-informed case management, counseling and referral services that meet client needs and that encourage, when in the best interests of the youth particularly with regard to safety, the involvement of parents or legal guardians.

(d) Grantees shall provide additional core support services to clients both residentially and non-residentially as appropriate. The core services must include case planning, skill building, recreation and leisure activities.

(e) Grantees shall, as soon as feasible and no later than 72 hours of the youth entering the program, contact the parents, legal guardians or other relatives of each youth according to the best interests of the youth. If a grantee determines that it is not in the best interest of the client to contact the parents, legal guardian or other relatives of the client, or if the grantee is unable to locate, or the youth refuses to disclose the contact information of, the parent, legal guardian or other relative of the client, they must:

(1) Inform another adult identified by the child;

(2) Document why it is not in the client's best interest to contact the parent, legal guardian or other relative, or why they are not able to contact the parent, legal guardian or other relative; and

(3) Send a copy of the documentation to the regional program specialist for review.

(f) Additional requirements included in the funding opportunity announcement.

§ 1351.25 What are the additional requirements that the Transitional Living Program and Maternity Group Home grantees must meet?

(a) Grantees shall provide transitional living arrangements and additional core services including case planning/management, counseling, skill building, consumer education, referral to needed social and health care services, and education, recreation and leisure activities, aftercare and, as appropriate to grantees providing maternity-related services, parenting skills, child care, and child nutrition.

(b) Additional requirements included in the funding opportunity announcement.

§ 1351.26 What are the additional requirements that both the Basic Center and Transitional Living Program grantees must meet?

(a) Basic Center and Transitional Living grantees shall develop and implement an aftercare plan, covering at least 3 months, to stay in contact with youth who leave the program in order to ensure their ongoing safety and access to services. A youth's individual aftercare plan shall outline what services were and will be provided as well as the youth's housing status during and after the program. The plan shall be provided to the youth in exit counseling or before. Follow-up efforts shall be made for all youth. For those contacted after 3 months, the plan shall be updated to record the rate of participation and completion of the services in the plan at 3 months after exiting the program. In accordance with section 312(b)(5) of the Act, as possible, Basic Center grantees shall also provide a plan for providing counseling and aftercare services to youth who are returned beyond the state in which the runaway and homeless youth service is located.

(b) Basic Center and Transitional Living grantees shall develop and implement a plan for health care services referrals for youth during the service and aftercare periods. Such referral plans shall include health care services and referrals and counseling on insurance coverage through family health insurance plans, or to agencies that assist in enrolling persons in Medicaid or in insurance plans offered under Affordable Care Act exchanges.

(c) Basic Center and Transitional Living grantees shall develop and implement a plan to assist youth to stay connected with their schools or to obtain appropriate educational services, training, or employment services. This includes coordination with McKinney-Vento school district liaisons, designated under the McKinney-Vento Homeless Assistance Act, to assure that runaway and homeless youth are provided information about the services available under that Act. This also includes coordination with local employment and employment training coordinating agencies or programs, coordination with local college placement services, and providing access to the Free Application for Federal Student Aid (FAFSA) application.

§ 1351.27 What are the additional requirements that the Street Outreach Program grantees must meet?

(a) Grantees shall provide services that are designed to assist clients in leaving the streets, making healthy choices, and building trusting relationships in areas where targeted youth congregate.

(b) Grantees shall directly or by referral provide treatment, counseling, prevention, and education services to clients as well as referral for emergency shelter.

(c) Additional requirements included in the funding opportunity announcement.

■ 14. Add Subpart D to read as follows:

Subpart D—What are the Runaway and Homeless Youth Program-specific performance standards?

Sec.

Subpart D—What are the Runaway and Homeless Youth Program-specific performance standards?

§ 1351.30 What performance standards must Basic Center Program grantees meet?

(a)(1) Grantees shall consistently enhance outcomes for youth in the following four core areas:

(i) Social and Emotional Well-being;

(ii) Permanent Connections;

(iii) Education or Employment; and

(iv) Stable Housing.

(2) Each grantee shall report data related to these outcomes, using existing data collection processes found under PRA OMB Control Numbers 0970–0406 and 0970–0123, and their successors.

(b) Grantees shall ensure that youth receive counseling services that are trauma informed and match the individual needs of each client. Data shall be reported by each grantee on the type of counseling each youth received (individual, family and/or group counseling), the participation rate based on a youth's service plan or treatment plan, and the completion rate based on a youth's service plan or treatment plan, where applicable.

(c) Grantees that choose to provide street-based services, home-based services, drug and/or alcohol abuse education and prevention services, and/or testing for sexually transmitted diseases (at the request of the youth) shall ensure youth receive the appropriate services. Data shall be reported on the completion rate for each service provided based on the youth's service or treatment plan.

(d) Grantees shall ensure that youth have safe and appropriate exits when leaving the program. Each grantee shall report data on the type of exit experienced by each young person departing a Basic Center Program.

§ 1351.31 What performance standards must Transitional Living Program grantees, including Maternity Group Homes, meet?

(a)(1) Grantees shall consistently enhance outcomes for youth in the following four core areas:

(i) Social and Emotional Well-being;

(ii) Permanent Connections;

(iii) Education or Employment; and

(iv) Stable Housing.

(2) Each grantee shall report data related to these outcomes, using existing data collection and reporting processes, in accordance with the Paperwork Reduction Act and the Office of Management and Budget Control Numbers 0970–0406 and 0970–0123, and their successors.

(b) Grantees shall ensure youth are engaged in educational advancement, job attainment skills or work activities while in the program. Each grantee shall report data on the type of education or job-related activities that each youth is engaged in.

(c) Grantees shall ensure and report that youth receive health care referrals, including both services and insurance, as determined within their health care referral plan.

(d) Maternity Group Home Grantees shall ensure and report that youth receive consistent pre-natal care, well-baby exams, and immunizations for the infant while in the program.

(e) Grantees shall ensure that youth have safe and appropriate exits when leaving the program. Each grantee shall report data on the type of exit experienced by each young person departing a Transitional Living Program.

§ 1351.32 What performance standards must Street Outreach Program grantees meet?

Grantees shall contact youth who are or who are at risk of homeless or runaway status on the streets in numbers that are reasonably attainable for the staff size of the project. Grantees with larger staff will be expected to contact larger numbers of youth in approximate proportion, as determined by HHS, to the larger number of staff available to provide this service. Each grantee shall report data related to this outcome, using existing data collection and reporting processes, in accordance with the Paperwork Reduction Act and the Office of Management and Budget Control Numbers 0970–0406 and 0970–0123, and their successors.

RIN 1029–AC63

Stream Protection Rule

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: We, the Office of Surface Mining Reclamation and Enforcement (OSMRE or OSM), are revising our regulations, based on, among other things, advances in science, to improve the balance between environmental protection and the Nation's need for coal as a source of energy. This final rule will better protect water supplies, surface water and groundwater quality, streams, fish, wildlife, and related environmental values from the adverse impacts of surface coal mining operations and provide mine operators with a regulatory framework to avoid water pollution and the long-term costs associated with water treatment. We have revised our regulations to define ''material damage to the hydrologic balance outside the permit area'' and require that each permit specify the point at which adverse mining-related impacts on groundwater and surface water would reach that level of damage; collect adequate premining data about the site of the proposed mining operation and adjacent areas to establish an adequate baseline for evaluation of the impacts of mining and the effectiveness of reclamation; adjust monitoring requirements to enable timely detection and correction of any adverse trends in the quality or quantity of surface water and groundwater or the biological condition of streams; ensure protection or restoration of perennial and intermittent streams and related resources; ensure that permittees and regulatory authorities make use of advances in science and technology; ensure that land disturbed by mining operations is restored to a condition capable of supporting the uses that it was capable of supporting before mining; and update and codify the requirements and procedures for protection of threatened or endangered species and designated critical habitat. Approximately thirty percent of the final rule consists of editorial revisions and organizational changes intended to improve consistency, clarity, accuracy, and ease of use.

DATES: This rule is effective January 19, 2017.

FOR FURTHER INFORMATION CONTACT: *For the final rule:* Dennis G. Rice, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240. Telephone: 202–208–2829. Kathleen G. Sheehan, Esq., Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 3 Parkway Center, 2nd Floor, Pittsburgh, Pennsylvania 15220. Telephone: 412–937–2829.

For the final environmental impact statement: Robin T. Ferguson, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240. Telephone: 202–208–2802.

For the final regulatory impact analysis: Mark Gehlhar, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240. Telephone: 202–208–2716.

For information collection matters: John A. Trelease, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240. Telephone: 202–208–2716.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

Significant advances in scientific knowledge and in mining and reclamation techniques have occurred in the more than 30 years that have elapsed since the enactment of the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) [1] and the adoption of federal regulations implementing that law. This rule acknowledges the advancements in science, technology, policy, and the law that impact coal communities and natural resources, based on our experience and engagement with state regulatory authorities, industry, non-governmental organizations, academia, citizens, and other stakeholders.

The rule has the following seven major elements:

- First, the rule defines the term ''material damage to the hydrologic balance outside the permit area'' and requires that each permit establish the point at which adverse mining-related impacts on groundwater and surface water reach an unacceptable level; *i.e.,* the point at which adverse impacts from mining would cause material damage to the hydrologic balance outside the permit area.
- Second, the rule sets forth how to collect adequate premining data about the site of the proposed mining operation and adjacent areas to establish a comprehensive baseline that will facilitate evaluation of the effects of mining operations.
- Third, the rule outlines how to conduct effective, comprehensive monitoring of groundwater and surface water during and after both mining and reclamation and during the revegetation responsibility period to provide timely information documenting mining-related changes in water quality and quantity. Similarly, the rule addresses the need to require monitoring of the biological condition of perennial and certain intermittent streams during and after mining and reclamation to evaluate changes in aquatic life. Proper monitoring will enable timely detection of any adverse trends and allow timely implementation of any necessary corrective measures.

[1] 30 U.S.C. 1201 *et seq.*

• Fourth, the rule promotes the protection or restoration of perennial and intermittent streams and related resources, especially the headwater streams that are critical to maintaining the ecological health and productivity of downstream waters.

• Fifth, the rule ensures that permittees and regulatory authorities make use of advances in information, technology, science, and methodologies related to surface and groundwater hydrology, surface-runoff management, stream restoration, soils, and revegetation, all of which relate directly or indirectly to protection of water resources.

• Sixth, the rule ensures that land disturbed by surface coal mining operations is restored to a condition capable of supporting the uses that it was capable of supporting before mining or to higher or better uses of which there is reasonable likelihood. Soil characteristics and the degree and type of revegetation have a significant impact on surface-water runoff quantity and quality as well as on aquatic life and the terrestrial ecosystems dependent upon perennial and intermittent streams. The rule also requires use of native species to revegetate reclaimed mine sites unless and until a conflicting postmining land use, such as intensive agriculture, is implemented.

• Seventh, the rule updates measures to protect threatened and endangered species and designated critical habitat under the Endangered Species Act of 1973.[2] It also better explains how the fish and wildlife protection and enhancement provisions of SMCRA should be implemented.

This rule more completely implements SMCRA's permitting requirements and performance standards and provides regulatory clarity to operators and stakeholders while better achieving the purposes of SMCRA as set forth in section 102 of the Act.[3] In particular, the rule more completely realizes the purposes in paragraphs (a), (c), (d), and (f) of that section, which include establishing a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations and assuring that surface coal mining operations are conducted in an environmentally protective manner and are not conducted where reclamation is not feasible. Furthermore, the rule addresses court decisions and strikes the appropriate balance between environmental protection, agricultural productivity and the Nation's need for coal as an essential source of energy, while providing greater regulatory certainty to the mining industry.

Summary of Benefits and Costs

The final regulatory impact analysis (RIA) for this rule contains a detailed discussion of the rule's benefits and costs. We estimate that, among other things, the rule's benefits to streams and forests between 2020 and 2040 will include—

• Restoration of 22 miles of intermittent and perennial streams per year.

• Improved water quality in 263 miles of intermittent and perennial streams per year downstream of minesites.

• Four miles of intermittent and perennial streams per year not being covered by excess spoil fills or coal mine waste facilities.

• Improved reforestation of 2,486 acres of mined land per year.

• Avoidance by mining operations of eight acres of forest per year.

In terms of economic impacts, we estimate that the rule will result in an average annual employment gain of 156 fulltime equivalents between 2020 and 2040. This estimate includes an average annual reduction of 124 fulltime equivalents in employment related to coal production and an average annual gain of 280 fulltime equivalents in industry employment related to implementation of the rule.

We estimate that the rule will result in an average annual 0.08% reduction in coal production between 2020 and 2040, which equates to 0.7 million tons of coal. That amount includes 0.2 million tons produced by surface mining methods (0.04% of the total amount produced by surface mining methods) and 0.5 million tons produced by underground mining methods (0.14% of the total amount produced by underground mining methods). The final RIA projects that this reduction in production will be accompanied by an increase in average annual coal prices ranging from 0.2% in the Powder River Basin to 1.3% in Central Appalachia and the Illinois Basin.

We estimate that total industry compliance costs per year during 2020–2040 would average $81 million, which is 0.1% or less of aggregate annual industry revenues, ranging from an additional one cent per ton of longwall-mined coal on the Colorado Plateau to an additional $1.40 per ton for surface-mined coal in the Illinois Basin. Of the $81 million in increased annual costs to industry, surface mining operations will bear an estimated $71 million, while underground mining operations will absorb $10 million. In the aggregate, state regulatory authorities will incur estimated additional costs of $0.5 million per year between 2020 and 2040.

Implementation of this rule will result in reductions in greenhouse gas emissions from coal production. Expressed in terms of carbon dioxide equivalents, we project that those reductions will total 2.6 million short tons in 2020. ''Carbon dioxide equivalent'' is a unit used to describe the impact of different greenhouse gases on a comparative basis by expressing the impact in terms of the amount of carbon dioxide that would have the same global warming impact as the type and amount of greenhouse gases at issue. We also project that implementation of the final rule will result in the annualized benefit of $57 million due to the reduced carbon dioxide emissions from fossil fuel consumption across the timeframe of the analysis (2020—2040).

II. Why are we revising our regulations?

Our primary purpose in adopting this rule is to strike a better balance between ''protection of the environment and agricultural productivity and the Nation's needs for coal as an essential source of energy.'' [4] Specifically, the rule is designed to minimize the adverse impacts of surface coal mining operations on surface water, groundwater, and site productivity, with particular emphasis on protecting or restoring streams, aquatic ecosystems, riparian habitats and corridors, native vegetation, and the ability of mined land to support the uses that it was capable of supporting before mining. The final rule reflects our experience during the more than three decades since adoption of the existing regulations, as well as advances in scientific knowledge and mining and reclamation techniques during that time and consideration of the comments that we received on the proposed rule. The final rule more completely implements sections 515(b)(24) and 516(b)(11) of SMCRA, which provide that, to the extent possible using the best technology currently available, surface coal mining and reclamation operations must be conducted to minimize disturbances and adverse impacts on fish, wildlife, and related environmental values and to achieve enhancement of those resources where practicable.[5] It also updates our regulations concerning compliance with

[2] 16 U.S.C. 1531 *et seq.*

[3] 30 U.S.C. 1202.

[4] 30 U.S.C. 1202(f).

[5] *See* 30 U.S.C. 1265(b)(24) and 1266(b)(11).

the Endangered Species Act of 1973.[6] In addition, as proposed, we have revised and reorganized our regulations for clarity, to make them more user-friendly, to remove obsolete and redundant provisions, and to implement plain language principles.

The preamble to the proposed rule sets forth the detailed rationale for adoption of this rule and the history of prior rulemaking and litigation concerning stream buffer zones and stream protection. *See* 80 FR 44436–44585 (Jul. 27, 2015).

Final Environmental Impact Statement (EIS)

The final EIS for this rule contains an expanded discussion of the impacts of mining on the environment. Almost all the literature surveys and studies reviewed for this rulemaking process have been published since the adoption in 1983 of our principal regulations concerning protection of the hydrologic balance [7] and protection of fish, wildlife, and related environmental values,[8] which underscores the need to update our regulations to reflect new scientific understanding of impacts associated with coal mining.

III. What opportunity did we provide for public comment on the proposed rule and supporting documents?

On July 16, 2015, we announced that the proposed rule, draft environmental impact statement (DEIS), and draft regulatory impact analysis (DRIA) were available for review at *www.regulations.gov*, on our Web site (*www.osmre.gov*), and at selected OSMRE offices. On July 17, 2015, we published a notice in the **Federal Register** announcing the availability of the DEIS for the proposed rule. *See* 80 FR 42535–42536. The notice reiterated that the DEIS was available for review at *www.regulations.gov*, *www.osmre.gov*, and the OSMRE offices listed in the notice. The comment period for the DEIS was originally scheduled to close on September 15, 2015. On July 27, 2015, we published the proposed stream protection rule in the **Federal Register**. *See* 80 FR 44436–44698. That document reiterated that the proposed rule, DEIS, and DRIA were available for review at *www.regulations.gov*, *www.osmre.gov*, and the OSMRE offices listed in the notice. The comment period for the proposed rule and DRIA was originally scheduled to close on September 25, 2015. In response to requests for additional time to review and prepare comments on all three documents, we extended the comment period for the proposed rule, DEIS, and DRIA through October 26, 2015. *See* 80 FR 54590–54591 (Sept. 10, 2015).

During the public comment period, we held six public hearings on the proposed rule in Golden, Colorado (September 1, 2015); Lexington, Kentucky (September 3, 2015); St. Charles, Missouri (September 10, 2015); Pittsburgh, Pennsylvania (September 10, 2015); Big Stone Gap, Virginia (September 15, 2015); and Charleston, West Virginia (September 17, 2015). In addition to the testimony offered at the hearings and meetings, we received approximately 94,000 written or electronic comments on the proposed rule. In developing the final rule, we considered all comments that were germane to the proposed rule. In the remainder of this preamble, we summarize the comments received and discuss our disposition of those comments and how and why the final rule differs from the proposed rule.

IV. What general comments did we receive on the proposed rule?

A. We Should Reopen the Comment Period To Allow Adequate Time for Public Review and Comment

Many commenters contended that we should have extended the time for public review and comment on the proposed rule and supporting documents. These commenters generally raised objections about the amount of material, primarily the proposed rule and its preamble, the DEIS, and the DRIA, all of which were lengthy. The commenters noted that we cited many studies, reports and supporting documents, which would take time to locate and review. Some commenters claimed that they lacked staff to review the material and provide meaningful comments within the time provided. These commenters stated that the 102 days we provided for review was too short, particularly in contrast to the time it took us to prepare and propose a rule.

As described in Part III of this preamble, the stream protection rule has been the subject of robust public involvement, starting in 2009. During that year, we published an advance notice of proposed rulemaking,[9] conducted 15 stakeholder outreach meetings, held nine public scoping meetings, and provided two public comment periods totaling 76 days on scoping for the DEIS. The scoping process generated over 20,500 comments, including input from state regulatory authorities.

On July 16, 2015, we announced that the proposed rule, DEIS, and DRIA were available for review at *www.regulations.gov*, on our Web site (*www.osmre.gov*), and at selected OSMRE offices. On July 17, 2015, we published a notice in the **Federal Register** announcing the availability of the DEIS for the proposed rule. *See* 80 FR 42535–42536. The notice reiterated that the DEIS was available for review at *www.regulations.gov*, *www.osmre.gov*, and the OSMRE offices listed in the notice. The comment period for the DEIS was originally scheduled to close on September 15, 2015. On July 27, 2015, we also published the proposed stream protection rule in the **Federal Register**. *See* 80 FR 44436–44698. That document reiterated that the proposed rule, DEIS, and DRIA were available for review at *www.regulations.gov*, *www.osmre.gov*, and the OSMRE offices listed in the notice. The comment period for the proposed rule and DRIA was originally scheduled to close on September 25, 2015. In response to requests for additional time to review and prepare comments on all three documents, we extended the comment period for the proposed rule, DEIS, and DRIA through October 26, 2015. *See* 80 FR 54590–54591 (Sept. 10, 2015).

Interested parties, therefore, received a total of 102 days to review the proposed rule and supporting documents. During that time, we also held six public hearings in Colorado, Kentucky, Missouri, Pennsylvania, Virginia, and West Virginia. We received approximately 95,000 comments from all sources on the proposed rule, DEIS, and DRIA.

The proposed rule, DEIS, and DRIA included citations to references that we relied upon in developing the documents. These reference citations were available from the time of publication of the proposed rule, DEIS, and the DRIA in the **Federal Register**. We used these references in discussing both specific components of the rule and our analysis, as well as for support of our discussion on more general concepts. We did not receive any requests for copies of these references during the comment period. However, in response to language that Congress included in a report accompanying the Consolidated Appropriations Act of 2016, Public Law 114–113, we placed all publicly-available references on *www.regulations.gov*. Copyright-protected materials are easily obtainable through state or university libraries or the publisher. We were not able to provide copyright-protected items to

[6] 16 U.S.C. 1531 *et seq.*

[7] 48 FR 43956 (Sept. 26, 1983).

[8] 48 FR 30312 (Jun. 30, 1983).

[9] 74 FR 62664–64668 (Nov. 30, 2009).

requesters directly because doing so might violate copyright laws. We also scheduled meetings between us and state technical personnel to discuss the scientific studies and other reference documents on two dates (April 14 and 21, 2016). The meetings were held simultaneously in Denver, Colorado; Alton, Illinois; and Pittsburgh, Pennsylvania. Staff from six state regulatory authorities participated in the meeting on April 14, 2016, and staff from five state regulatory authorities participated in the meeting on April 21, 2016.

The comment period we provided fully complies with the Administrative Procedure Act, 5 U.S.C. 553, which does not set a minimum public comment period for a proposed rule. We also exceeded the 60-day minimum comment period recommended by Section 6(a)(1) of Executive Order 12866 for meaningful public participation. This time is comparable to the comment periods for similar regulations that we have issued in the past. For example, the now-vacated 2008 stream buffer zone rule was subject to a 90-day comment period,[10] while the comment period for the 1978 proposed rule containing most of the original permanent regulatory program regulations was 71 days.[11]

It is also noteworthy that many commenters, primarily environmental groups, opposed our 30-day extension of the comment period. They maintained that 60 days was sufficient to review the materials and provide meaningful comment. These and other commenters, including state regulatory authorities, were able to provide extensive, detailed, meaningful comments on the proposed rule in the comment period provided.

B. We Should Further Engage the State Regulatory Authorities Before Finalizing the Rule

Most state and industry commenters urged us to refrain from finalizing the proposed rule at this time. Instead, these commenters requested that we engage in additional meaningful collaboration with the state regulatory authorities. Many of these commenters stated that we could benefit further from the insight, experience, and practices of the state regulatory authorities when developing the regulatory text, final EIS, and final RIA. According to the commenters, we did not provide the regulatory authorities and other state agencies that had agreed to be cooperating agencies in the National Environmental Policy Act of 1969 (NEPA) process with the opportunity for meaningful engagement. The commenters expressed their belief that we had not acted in accordance with the terms of the memoranda of understanding describing the roles and responsibilities for the effort. The commenters noted that, as a consequence, all but one of those regulatory authorities had terminated their cooperating agency status.

We have substantially engaged with stakeholders, including the regulatory authorities. The rulemaking process began with an advance notice of proposed rulemaking, 15 stakeholder outreach meetings, nine public scoping meetings, and two public comment periods on the scoping for the DEIS. The scoping process generated over 20,500 comments, including input from the states. A number of state agencies, including state SMCRA regulatory authorities, participated as cooperating agencies in the early development of the DEIS for the stream protection rule. As of November, 2010, we had sent Chapters 1, 2, 3 and 4 of the DEIS to all cooperating agencies. Chapters 1–4 are the heart of an EIS. Those chapters include the statement of purpose and need, a description of the alternatives considered, a description of the affected environment, and an analysis of the environmental consequences of the alternatives. The cooperating agencies provided meaningful input and comments. We used this information to prepare the DEIS. In response to this and other feedback, we revised the DEIS over the next several years. Shortly before we announced the availability of the DEIS for public comment, all but one of the state regulatory authorities voluntarily terminated their role as cooperating agencies.

We made the DEIS available on July 16, 2015, to all cooperating agencies and the public to review and provide input on during the public comment period. We subsequently extended the public comment period to provide interested parties, including the states, more time to review and comment on the DEIS. We conducted six public hearings in Colorado, Kentucky, Missouri, Pennsylvania, Virginia and West Virginia during the public comment period. Although not required to do so, in a letter dated October 7, 2015, prior to the close of the public comment period on October 26, 2015, we invited the former cooperating state agencies to re-engage as cooperating agencies under NEPA. None accepted this invitation. Ultimately, OSMRE received approximately 95,000 comments, including hundreds of pages of comments from state SMCRA regulatory authorities, on the DEIS, DRIA, and the proposed stream protection rule. We considered these comments in developing this final rule, the final EIS, and the final RIA.

The Department's Assistant Secretary for Land and Minerals Management, the Director of OSMRE, and other OSMRE officials continued to meet with representatives of states after the close of the comment period, consistent with congressional direction in a report accompanying the Consolidated Appropriations Act of 2016, Public Law 114–113. In addition to meetings with state SMCRA regulatory authorities in conjunction with Interstate Mining Compact Commission meetings, Department of the Interior and OSMRE representatives have either met with or held telephone or video conferences with 14 different state regulatory authorities since the proposed rule was published. We also scheduled meetings of OSMRE and state technical personnel to discuss the scientific studies and other reference documents on two dates (April 14 and 21, 2016). The meetings were held simultaneously in Denver, Colorado; Alton, Illinois; and Pittsburgh, Pennsylvania. Staff from six state regulatory authorities participated in the meeting on April 14, 2016, and staff from five state regulatory authorities participated in the meeting on April 21, 2016. Notice of the Final Environmental Impact Statement was published in the **Federal Register** on November 16, 2016 (81 FR 80592 and 81 FR 80664), by OSMRE and the U.S. Environmental Protection Agency, respectively.

We understand the state regulatory authorities wanted more input, not only in the EIS, but also in the rule and the RIA. However, through this extensive outreach we have met our obligations as set forth in the Administrative Procedure Act, NEPA, and the pertinent executive orders and have sought the input from state regulatory authorities at crucial junctures in the development of the rule—early in the rulemaking process and after publication of the proposed rule. These are the points where their insights could best shape the proposal and refine the final rule without impinging on our deliberative process and our ability to craft a rule to meet our purpose and need. The final regulations that we are publishing today have been shaped by this direct input as well as by the information we have gleaned through our oversight of the state programs.

C. We Have Not Accorded Sufficient Deference to Principles of Cooperative Federalism and the Primacy of States With Approved Regulatory Programs

According to numerous commenters, the proposed rule impinges on the concepts of cooperative federalism and state primacy in SMCRA. Because of this alleged impingement on states' rights under SMCRA, many of these commenters asserted that the proposed rule exceeds our statutory authority and contravenes the Tenth Amendment to the U.S. Constitution. They also charged that it ''flips the central SMCRA mandate of state primacy on its heads.''

We disagree with these commenters. While it is true that primacy states play a key role in enforcing SMCRA, it is also true that we maintain a role in the implementation and oversight of SMCRA. *See, e.g., Hodel* v. *Virginia Surface Mining and Reclamation Ass'n Inc.,* 452 U.S. 264, 289 (1981) (''The most that can be said is that the Surface Mining Act establishes a program of cooperative federalism that allows the States, *within limits established by federal minimum standards,* to enact and administer their own regulatory programs, structured to meet their own particular needs.'' (Emphasis added.) These federal standards ''provide [a] blueprint against which to evaluate [a] state's program.'' [12] The U.S. Supreme Court has held this statutory scheme to be a proper exercise of Congressional power under the U.S. Constitution. *Hodel,* 452 U.S. at 290–291.

We have clear authority to issue regulations such as this rule to establish federal minimum standards. Section 102 of SMCRA sets forth thirteen purposes of the Act.[13] The first of these purposes is to ''establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.'' [14] Several other purposes are related to assuring that surface coal mining operations are conducted in a manner that protects the environment.[15] This authority also contains a purpose unique to SMCRA: ''whenever necessary, exercise the full reach of Federal constitutional powers to ensure the protection of the public interest through effective control of surface coal mining operations.'' [16] SMCRA then vests the authority to carry out these purposes with us; specifically, under section 201(c)(2), we have clear authority to ''publish and promulgate such rules and regulations as may be necessary to carry out the purposes of the Act.'' [17] Our strong federal role, which includes updating the federal minimum standards, ensures that regulation of surface coal mining and reclamation operations remains environmentally protective and is not plagued by many of the problems that led to the enactment of SMCRA in the first place. *See, e.g.,* H.R. Rep. No. 95–218, at 90 (''For a number of predictable reasons—including insufficient funding and the tendency for State agencies to be protective of local industry—State enforcement has in the past [*i.e.,* prior to the passage of SMCRA in 1977] often fallen short of the vigor necessary to assure adequate protection of the environment.''). This rule, therefore, is a valid exercise of our authority to update the federal minimum standards to reflect 30 years of scientific development and 30 years of experience in implementing SMCRA.

Contrary to the contention of some commenters, we are not abrogating primacy. Nor are we creating a rigid one-size-fits-all rule. Primacy states can and should tailor their state laws and regulations implementing this rule to local conditions as long as they meet minimum federal standards and are no less effective than the federal rules in meeting the requirements of SMCRA. In addition, the final rule provides discretion to the regulatory authority in certain areas, including, but not limited to, the following examples:

- Final § 773.15(j): Compliance with the Endangered Species Act. Provides the permit applicant and the regulatory authority with several options for demonstrating compliance with the Endangered Species Act of 1973.
- Final § 780.16(d): Potential Enhancement Measures. The regulatory authority has the discretion to determine the type, scope, and location of fish and wildlife enhancement measures.
- Final § 780.19(a): Information on Hydrology, Geology, and Aquatic Biology, Baseline Information. The regulatory authority has the discretion to determine what constitutes ''sufficient detail'' with respect to the information required in this section, including the location and number of monitoring locations.
- Final § 780.19(b)(6)(ii): Groundwater Information. The regulatory authority has the discretion to determine the baseline groundwater quality and quantity sampling protocol and subsequent analyses of these data.
- Final § 780.19(c)(5): Precipitation Measurements. The regulatory authority has the flexibility to determine whether the permit applicant must prepare a hydrologic model of the proposed mine site.
- Final § 780.19(c)(6)(vii): Assessing the biological condition of intermittent and perennial streams. The regulatory authority has the flexibility to choose from available scientifically defensible protocols, including indices of biological integrity, to determine the biological condition of streams.
- Final § 780.21(b)(7): Evaluation Thresholds. The regulatory authority has the flexibility to determine the parameters it will use as evaluation thresholds.
- Final § 780.27(b)(2): What Permitting Requirements Apply to Proposed Activities in or Through Ephemeral Streams? The regulatory authority has the flexibility to approve a drainage pattern that differs from the premining pattern based upon a variety of site specific conditions.
- Final § 780.28(c)(2): Proposed Activities In, Through, or Adjacent to Perennial and Intermittent Streams. The regulatory authority has the flexibility to approve a drainage pattern or stream-channel configuration that differs from the premining pattern based upon a variety of site-specific conditions.
- Final § 780.28(e)(2): Conversion of Streams. The regulatory authority has the flexibility to approve limited stream flow regime conversions on a case-by-case basis as long as certain criteria are satisfied.
- Final § 780.28(g)(1): Standards for the Restoration of Ecological Function to Perennial or Intermittent Streams. The regulatory authority has discretion to establish objective criteria for determining the standards for restoring the ecological function of a reconstructed perennial or intermittent stream.

The underground mining counterparts to these surface mining provisions offer the same flexibilities to the regulatory authority.

D. We Did Not Adequately Demonstrate a Need for This Rulemaking

Many commenters stated that we have neither provided sufficient rationale for the development of this rule nor any evidence to support what many commenters consider a complete rewrite of the federal regulations implementing SMCRA. A number of commenters also raised concerns about whether the proposed rule articulated a legally

[12] *Bragg* v. *W. Va. Coal Ass'n,* 248 F.3d 275, 289 (4th Cir. 2001).

[13] 30 U.S.C. 1202.

[14] 30 U.S.C. 1202(a)

[15] *See, e.g.,* 30 U.S.C. 1202(d) and (f).

[16] 30 U.S.C. 1202(m).

[17] 30 U.S.C. 1211(c)(2); *See also, id* at 1251(b) (''[T]he Secretary shall promulgate and publish . . . regulations covering a permanent regulatory procedure for surface coal mining and reclamation operations performance standards based on and conforming to the provisions of Title V . . . .'').

adequate justification for a nationwide rulemaking on issues related to stream protection. In particular, some commenters noted that the June 11, 2009, Memorandum of Understanding (MOU) among the U.S. Department of the Army, the U.S. Department of the Interior, and EPA implementing the interagency action plan on Appalachian surface coal mining was limited to six states in Appalachia and primarily focused on issues related to steep-slope mining. The commenters questioned our decision to propose a nationwide rule in response to the MOU, which, by its own terms, was designed to significantly reduce the harmful environmental consequences of surface coal mining operations in Kentucky, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia and ensure that future mining is conducted consistent with federal law. The 2009 MOU provided impetus and support for this rulemaking, but it is not the sole reason for the rulemaking. After extensive outreach, we determined that development of a comprehensive, nationally applicable, stream protection rule would be the most appropriate and effective method of achieving the purposes and requirements of SMCRA, as well as meeting the goals set forth in the MOU. Streams are important components of the hydrologic regime everywhere that streams are found, so there is no scientific reason to limit stream protection efforts to one region of the country or to steep-slope mining. In addition, it is not clear that we have authority under SMCRA to conduct rulemaking on a regional basis. Section 101(g) of SMCRA [18] provides that ''surface coal mining and reclamation standards are essential in order to insure that competition in interstate commerce among sellers of coal produced in different States will not be used to undermine the ability of the several States to improve and maintain adequate standards on coal mining operations within their borders.'' The implication is that the surface coal mining and reclamation standards to which it refers must be national in scope. In addition, section 102(a) of SMCRA [19] provides that one of the purposes of SMCRA is to ''establish a *nationwide* program to protect society and the environment from the adverse effects of surface coal mining operations.'' (Emphasis added.)

Our primary purpose in adopting this final rule is to strike a better balance between ''protection of the environment and agricultural productivity and the Nation's need for coal as an essential source of energy,'' which section 102(f) of SMCRA [20] lists as one of the purposes of SMCRA. Specifically, this final rule will better protect the water resources needed by current and future generations for drinking, recreation, and wildlife from the adverse effects of coal mining, while balancing protection of those resources with the Nation's energy needs.

The final rule published today reflects advances in science and technology, updates 30-year-old regulations, and addresses important stream protection and related issues in a manner consistent with SMCRA, while providing regulatory certainty to operators. State and industry practices helped shape this rule. Many commenters supported the proposed rule and encouraged us to proceed with a final rule.

SMCRA recognizes the importance of nationwide minimum standards for the hydrologic balance by not limiting the provisions related to the hydrologic balance to any particular types of mining or areas of the country as it did with other provisions. *Compare, e.g.,* Section 510(b)(3) [21] (no permit may be issued unless the operation has been ''designed to prevent material damage to the hydrologic balance outside the permit area'') *with* Section 510(b)(5) [22] (alluvial valley floor protections apply only west of the one hundredth meridian west longitude). We have never issued regulations that expressly apply only to a portion of the country without specific statutory language authorizing or mandating adoption of regulations with a geographically-restricted scope. SMCRA provisions with a geographically-restricted scope include sections 510(b)(5) (alluvial valley floors west of the one hundredth meridian west longitude), 527 [23] (special bituminous coal mines west of the one hundredth meridian west longitude), 529 [24] (anthracite coal mines regulated by a state), and 708 [25] (coal mines in Alaska, for a limited time only).

As stated in our analysis in the final EIS, the need for this final rule is to improve implementation of SMCRA, ensure protection of the hydrologic balance, and reduce impacts of surface coal mining operations on streams, fish, wildlife, and related environmental values. The final rule will provide major benefits to water resources, not just in the Appalachian Basin, but also in the Illinois Basin. In addition, this rule will provide moderate benefits to water resources in three other regions—the Colorado Plateau, the Gulf Coast, and the Northern Rocky Mountains and Great Plains.[26] Even if these were the only benefits of the rule, and they are not, the benefits to water resources alone are sufficient to support and justify a nationwide rulemaking.

As we set forth in the proposed rule and in documents in support of the proposed rule, SMCRA provides us with the authority to protect the hydrologic balance from coal mining operations nationwide. Despite that fact and the benefits that could be realized nationwide, some commenters cite data contained in our annual evaluation reports of state regulatory programs in an attempt to show that there is no nationwide problem. According to these commenters, our annual evaluation reports ''show that 90 percent of operations were free of any offsite impacts'' and ''routinely include highly positive narrative reviews of each state's SMCRA program.''

While it is true that our annual evaluation reports routinely do not indicate problems with the states' implementation of their programs, we disagree with the conclusion the commenters attempt to draw from this information, *i.e.,* that our experience does not show that there is a problem that this rule is designed to address. OSMRE inspections and other oversight activities in primacy states, including the annual evaluation reports, focus on the success of state regulatory authorities in achieving compliance with the approved regulatory program for the state. Directive REG–8,[27] which establishes policy and procedures for the evaluation of state regulatory programs, specifies that the offsite impacts identified in annual evaluation reports do not include impacts from mining and reclamation that are not regulated or controlled by the state program. In other words, the annual evaluation reports generally do not identify or discuss situations in which the existing regulations provide inadequate protection. While Directive REG–8 provides discretionary authority for evaluations of impacts that are not prohibited by the regulatory program, that authority may be exercised only if both OSMRE and the state agree to do so, and if they are not characterized as

[26] FEIS at Chapter 1—Sections 1.1 and 1.2, Table 4.2–15.

[27] Directive REG–8. ''Oversight of State and Tribal Regulatory Programs,'' Transmittal No. 967, January 31, 2011.

offsite impacts. Historically, that discretionary authority has not been exercised. Thus, annual reports are of little assistance in assessing how the existing minimum federal standards that are incorporated into the approved state programs could be improved to better implement SMCRA. Part II of the preamble summarizes the water quality and land reclamation problems that developed under the previous rules. In addition, speakers at the public hearings described their experiences with dewatering of streams as a result of subsidence from underground mining operations.

E. We Should Limit the Final Rule to the Effects of Surface Mining Operations and Not Underground Mining Operations

Several commenters requested that we limit the rule to the effects of surface mining operations and not the effects of underground operations. These commenters often questioned the adequacy of our support for extending stream protections to the areas overlying underground mine workings. According to the commenters, the rule would make some methods of underground mining operations impractical and would effectively prohibit underground mining using longwall technology.

Part IV.K. of this preamble summarizes the principal provisions of this rule that directly impact underground mining. The final rule does not preclude any specific method of underground mining either directly (*e.g.,* a prohibition of underground mining) or indirectly (*e.g.,* make underground mining uneconomical or impossible). Our primary focus in the proposed rule was to clarify our position that the obligation to prevent material damage to the hydrologic balance outside the permit area applied to areas overlying the underground workings of an underground mine, which is part of the adjacent area as that term is defined in § 701.5 of our regulations. As explained in more detail in the portion of this preamble that discusses the definition of ''material damage to the hydrologic balance outside the permit area'' in § 701.5 of our regulations, we have always considered the area overlying the underground workings of an underground mine to be part of the evaluation for prevention of material damage to the hydrologic balance outside the permit area. Although this has been our longstanding position and is clearly mandated by SMCRA, the definition of material damage to the hydrologic balance outside the permit area that we are finalizing today removes any of the ambiguity that may have resulted in this comment. In addition, to address concerns that requiring underground operations to prevent material damage to the hydrologic balance outside the permit area would effectively preclude any underground mining likely to result is subsidence, we have clarified that temporary impacts resulting from subsidence are allowed provided they do not rise to the level of material damage to the hydrologic balance outside the permit area. This issue is discussed in more detail in Part IV, section K of this preamble.

F. We Underestimated the Costs and Regulatory Burden of the Proposed Rule to State Regulatory Authorities and Industry

Numerous commenters expressed concern that the proposed rule would impose significant additional costs on the industry and state regulatory authorities. Many of these commenters alleged that the costs of the proposed rule were grossly understated in the DRIA. Appendix I of the final RIA provides responses to all specific comments on the DRIA.

In response to comments received on the DRIA, as well as in response to recent changes in the coal market, we revised the DRIA to ensure that the final RIA better reflects current circumstances. These changes include:

- *Updated coal market baseline:* Since the DRIA was developed conditions in the coal market have changed considerably. As a result, we updated the baseline coal production forecast for the final RIA, which resulted in an almost 20 percent decrease in the level of coal demand and production forecasted under the baseline.
- *Updated regulatory baselines.* Since the DRIA was developed, changes to the regulatory environment have occurred, including but not limited to the finalization of the Clean Power Plan and ratification of the Paris Agreement made at the 21st Conference of the Parties of the United Nations Framework Convention on Climate Change. Additional climate policy proposals have been advanced that are anticipated to have an effect on coal production nationwide. As a result, we updated the final RIA.
- *Clarified potential impacts of the rule on longwall mining:* A number of commenters misinterpreted the proposed rule's impacts on longwall mining. The commenters thought longwall mining would be impossible under the proposed rule, which would result in devastating economic impacts to the underground mining industry. The final rule clarifies that the rule does not prohibit temporary impacts to streams and other water resources as a result of longwall mining as long as those impacts do not rise to the level of material damage to the hydrologic balance outside the permit area. The final RIA continues to reflect the fact that the final rule will not prohibit longwall mining.
- *Incorporated economic impact of bonding requirements:* The DRIA did not include costs associated with bonding requirements for restoration of the ecological function of perennial and intermittent streams that are mined through. While the bonding requirements for stream restoration have been revised, the final rule is nonetheless anticipated to result in some additional costs to operators associated with this requirement that were not captured in the DRIA. These additional costs are reflected in the final RIA.
- *Revised administrative costs:* A number of commenters remarked that the administrative costs of the proposed rule to industry and state regulatory authorities appeared to be underestimated in the DRIA. Upon further review, we determined that the industry and state regulatory authority administrative costs estimated in the DRIA were not consistent with OSMRE's Paperwork Reduction Act analysis. As a result of updating the RIA to be consistent with the Paperwork Reduction Act calculations, administrative costs for industry and the state regulatory authorities have increased in the final RIA. As discussed below, we also made some changes to the final rule that reduced administrative costs to the state regulatory authorities as well as to industry.
- *Corrected width of streamside vegetative corridor:* Some commenters questioned whether the engineering analysis had correctly interpreted the width of the riparian corridor, known as the streamside vegetative corridor in the final rule, which is required to be established adjacent to perennial, intermittent, and ephemeral streams that are mined through under certain circumstances. Upon further review, we determined that the engineering analysis incorrectly assumed that a 100-foot riparian corridor was interpreted as being 50 feet on either side of a restored stream rather than 100 feet on each side. Correction of this incorrect assumption resulted in a modest increase in model mine costs.
- *Revised impacts to small businesses analysis:* The Regulatory Flexibility Act

analysis has been revised in the final RIA to reflect the recent changes to the small business size thresholds identified by the Small Business Administration for coal mining companies.

• *Incorporated the social cost of carbon:* In response to comments, the final RIA includes an estimate of the benefits related to the social costs of carbon of the final rule.

In summary, compared with the DRIA, the final RIA forecasts lower baseline coal production and increased industry compliance costs. Lower baseline coal production means that the final rule will have fewer adverse impacts to production-related employment and fewer benefits to streams and forests.

The final rule also differs from the proposed rule in several ways that should reduce costs and the regulatory burden on state regulatory authorities and on the industry. The following list provides examples of cost-saving or potentially cost-saving provisions:

• *Applicability to existing operations:* We added a new section, 30 CFR 701.16, specifying when the stream protection rule would take effect and to which operations and permit applications it would apply. Existing permits will not be subject to the rule unless they either add acreage or revise the permit to add a new excess spoil fill, coal mine waste refuse pile, or coal mine waste slurry impoundment or move or expand the location of an approved excess spoil fill or coal mine waste facility.

• *Permit application format:* We deleted the proposed requirement in 30 CFR 777.11 that permit applicants submit their applications in electronic form. Regulatory authorities and mining companies expressed concern about the expense. Furthermore, we cannot guarantee the availability of grant funds to cover installation of electronic permitting systems by states. However, transition to electronic permitting systems ultimately will result in cost savings and greater efficiencies.

• *Baseline data and monitoring:* First, we are not adopting the proposed requirement in 30 CFR 780.19(b) and (c) that the regulatory authority extend the baseline data collection period if the Palmer Drought Severity Index for that period exceeded certain values. The regulatory authority has the discretion to determine whether and how long to extend the baseline data collection period under conditions of extreme drought or abnormally high precipitation. Second, under 30 CFR 780.19(b) and (c), the regulatory authority may modify the interval or the 12-consecutive-month sampling requirement for groundwater and surface water if adverse weather conditions make travel to the sampling location hazardous or if the water at that location is completely frozen. Third, in 30 CFR 780.19, we deleted six baseline data parameters (ammonia, arsenic, cadmium, copper, nitrogen, and zinc) upon which coal mining typically has little impact. Fourth, we added 30 CFR 783.26 and 784.40, which provide that the regulatory authority may allow permittees to submit baseline data and development of water monitoring plans for areas overlying proposed underground mine workings in increments. This will ensure more up-to-date information and avoid unnecessarily high data collection and analysis costs at the time of the initial permit application. It also will reduce monitoring costs.

• *Mining in or near Streams and Excess Spoil:* First, we revised the definitions of ephemeral, intermittent, and perennial streams in 30 CFR 701.5 to clarify that only conveyances with channels that have both a bed-and-bank configuration and an ordinary high water mark will be classified as streams. Second, final 30 CFR 780.19(c)(3) and 780.20(a)(5)(iv) do not include the proposed requirements for baseline data and analysis of peak flow magnitude and frequency, actual and anticipated usage, and seasonal flow variations for ephemeral streams. Third, final 30 CFR 780.19(c)(6) does not include the proposed requirement to assess the biological condition of ephemeral streams within the proposed permit and adjacent areas. It also modifies the proposed requirement to assess the biological condition of intermittent streams within the proposed permit and adjacent areas. In the final rule, assessment of the biological condition of intermittent streams within the proposed area and the adjacent area is required if a scientifically defensible protocol has been established for assessment of intermittent streams in the state or region in which the stream is located. But, if a scientifically defensible bioassessment protocol has not been developed in the relevant state or region, a description of the biology of each intermittent stream would be required to determine the biological condition of the intermittent stream. Fourth, final 30 CFR 780.28(g) specifies the best technology currently available for assessment of the restoration of the ecological function of intermittent streams for which no scientifically defensible protocol exists consists of the establishment of standards that rely upon restoration of the form, hydrologic function, and water quality of the stream and reestablishment of streamside vegetation as a surrogate for the biological condition of the stream. Finally, the excess spoil fill construction requirements in final 30 CFR 816.71(k) require only one certified report per calendar quarter and to provide an alternative to daily examinations by an engineer or other specialist.

• *Soils and Revegetation:* First, the final rule does not include a provision in proposed 30 CFR 779.19(a) that would have required descriptions of vegetative communities in the adjacent area. In addition, the final rule does not include the requirement in proposed 30 CFR 816.116(b) that revegetation success standards demonstrate restoration of the capability of the land to support all uses that it was capable of supporting before mining.

G. Whether We Should We Revise the Rule To Provide for Direct Enforcement of Water Quality Standards

Section 816.42 in our previous regulations required that discharges of water from areas disturbed by surface mining activities be made in compliance with all applicable state and federal water quality laws and regulations and with the effluent limitations for coal mining operations set forth in 40 CFR part 434. Proposed § 816.42 contained five paragraphs. Proposed paragraph (a) incorporated previous § 816.42 and clarified that permittees must comply with all water quality laws, including effluent limitations in the applicable NPDES permit. Proposed paragraph (b) explicitly incorporated the longstanding requirement for permittees to comply with section 404 of the Clean Water Act[28] if they sought to discharge overburden (including excess spoil), coal mine waste, and other materials into waters of the United States. Proposed paragraphs (c) through (e) established enforceable performance standards requiring proper operation and maintenance of water treatment facilities and environmentally appropriate disposition of precipitates from those facilities.

In the preamble to the proposed rule, we requested comment on whether proposed § 816.42(b) should be informational or directly enforceable under SMCRA.[29] As mentioned, this paragraph required that discharges of overburden (including excess spoil), coal mine waste, and other materials into waters of the United States be made in compliance with section 404 of the Clean Water Act and its implementing

[28] 33 U.S.C. 1344.

[29] 80 FR 44549 (Jul. 27, 2015).

regulations. Commenters were divided on the merits of this issue. Several environmental groups and citizens asked us to make standards under both sections 402 and 404 of the Clean Water Act directly enforceable under SMCRA. These commenters typically suggested changes to proposed § 816.42 to clarify that water quality standards established under the Clean Water Act are directly enforceable under SMCRA. According to these commenters, section 702(a) of SMCRA [30] and prior preamble statements concerning § 816.42 provide authority for direct enforcement of water quality standards under SMCRA. Similarly, these commenters asked us to clarify whether proposed § 816.71(a)(7) (excess spoil) and 816.57(b) (mining in, through, or adjacent to perennial and intermittent streams) require operators to comply with water quality standards and, if so, whether the SMCRA regulatory authorities will directly enforce these water quality standards. Some commenters asked us to provide for direct enforcement of Clean Water Act water quality standards through citizen suits under section 520 of SMCRA.

In contrast, other commenters considered § 816.42 to be unnecessary and duplicative of the Clean Water Act. Some commenters detailed the Clean Water Act's own ''robust, but carefully tailored, enforcement scheme[,]'' which includes both direct enforcement by the state Clean Water Act authority of any aspect of the Clean Water Act that it has been delegated, enforcement by the U.S. Environmental Protection Agency, enforcement by the U.S. Army Corps of Engineers, and enforcement by citizen suits under the Clean Water Act. These commenters noted that the Clean Water Act does not confer authority on other agencies, such as us or state SMCRA regulatory authorities, to enforce the Clean Water Act, and the SMCRA regulatory authorities are not equipped to do so. Moreover, some commenters claimed that making the provisions of the Clean Water Act directly enforceable under SMCRA would directly conflict with the Clean Water Act because it would give a state with SMCRA primacy the direct authority to enforce violations of the Clean Water Act—even where that state does not have full delegation to administer Clean Water Act programs. These commenters generally urged us to consider this paragraph as informational or to remove it altogether.

In developing the approach we adopted in the final rule about the direct enforcement of Clean Water Act provisions under SMCRA, we considered the applicable requirements of SMCRA in light of an overarching purpose of SMCRA: To protect society and the environment from the adverse effects of coal mining operations.[31] Section 510(b)(3) of SMCRA specifically provides that coal mining operations must be designed to prevent material damage to the hydrologic balance outside the permit area.[32] Likewise, section 508(a)(9) of SMCRA provides that a permit application must include ''the steps to be taken to comply with applicable air and water quality laws and regulations[,]'' [33] and section 702(a) of SMCRA provides that nothing in SMCRA ''shall be construed as superseding, amending, modifying, or repealing'' the Clean Water Act or any rule or regulation promulgated under the Clean Water Act.[34] Thus, while we cannot supersede the Clean Water Act, under SMCRA, regulatory authorities do have a duty to ensure that surface coal mining operations are permitted, operated, maintained, and reclaimed in a manner that complies with the Clean Water Act, which includes, but is not limited to, compliance with NPDES permits and water quality standards.

Section 816.42 of the final rule is the primary regulation that sets forth the duty under SMCRA for coal mining operations to comply with the Clean Water Act. This regulation is tailored to accomplish this objective while avoiding conflicts between SMCRA regulatory authorities and Clean Water Act authorities about what constitutes a Clean Water Act violation. In particular, final § 816.42(a) clarifies that neither this section of the final rule, nor any action taken pursuant to it, supersedes or modifies the authority or jurisdiction of federal, state, or tribal agencies responsible for administration, implementation, and enforcement of the Clean Water Act including decisions that those agencies make pursuant to the authority of the Clean Water Act. This includes decisions on whether a particular set of facts constitutes a violation of the Clean Water Act.

With regard to enforcement under SMCRA, final rule § 816.42(b)(1) retains our longstanding regulatory requirement that coal mining operations must comply with all applicable water quality laws and regulations, including the effluent limitations set by Clean Water Act authorities in NPDES permits under section 402 of the Clean Water Act.[35] Since our final rulemaking in 1982 was promulgated to be consistent with effluent limits established by the U.S. Environmental Protection Agency, our regulations have required that discharges from coal mining operations be in accordance with a valid NDPES permit and that this is a performance standard directly enforceable under SMCRA.[36] This approach has been upheld by the Interior Board of Land Appeals and has been expressly incorporated by several regulatory authorities.[37] Direct enforcement of the NPDES effluent limitations typically begins with an inspector for the SMCRA regulatory authority conducting a routine inspection.[38] During these inspections, water samples are taken from sediment pond discharges to verify compliance with the SMCRA permits, which incorporates the NDPES effluent limitations by reference. When violations of those standards are found, a SMCRA notice of violation is issued requiring the violation to be corrected.

With the final rule, we are changing this process slightly. In response to Federal agency comments, we have revised final § 816.42(b)(1) to require the SMCRA regulatory authority to add an additional step to the end of the process: Notification of the appropriate Clean Water Act authority of any notice of violation issued under SMCRA for a violation of an effluent limit. We also added a provision requiring the SMCRA regulatory authority to coordinate with the Clean Water Act authority whenever necessary to determine if a violation exists. This provision is intended to address those situations where there may be some uncertainty as to whether in fact a violation exists. In addition to ensuring that there is no ambiguity about the requirement for a permittee to comply with NPDES effluent limits under SMCRA, we have added paragraph (i) to final rule § 773.17, which requires the regulatory authority to condition every permit on compliance with all effluent limitations and conditions in any NDPES permit issued by the Clean Water Act authority.

With regard to enforcement of water quality standards, § 816.42(b)(2) was also added to make it clear that coal mining operations cannot cause or contribute to a violation of any applicable water quality standards. In addition, in response to comments, we

[38] Active mining operations require complete inspections quarterly and partial inspections monthly.

have added language similar to that contained in § 816.42(b)(2) to final § 816.57(a)(2) to clarify that activities in, near, or through streams may not cause or contribute to a violation of applicable water quality standards. Similarly, in response to comments, we adopted a provision in final § 816.71(a)(7) which provides that the permittee or operator must place excess spoil in a manner that will ensure that the fill will not cause or contribute to a violation of applicable water quality standards adopted under the authority of section 303(c) of the Clean Water Act, 33 U.S.C. 1313(c), for surface water downstream of the toe of the fill.

In addition § 816.42(c) of the final rule mirrors proposed paragraph (b) and provides that discharges of overburden, coal mine waste, and other materials into waters subject to the jurisdiction of the Clean Water Act, must be made in compliance with section 404 of the Clean Water Act.[39]

In order to better ensure compliance with sections 508(a)(9), 510(b)(3), and 702(a)(3) of SMCRA and address concerns about the role of the regulatory authority in assessing violations related to water quality standards and section of the Clean Water Act, we added final rule § 816.42(d). This provision requires that the regulatory authority investigate any situation in which it has information indicating that mining activities may be causing or contributing to a violation of the water quality standards to which paragraph (b)(2) of this section refers, or to a violation of section 404 of the Clean Water Act to which paragraph (c) refers. When conducting an investigation the SMCRA regulatory authority will coordinate with the appropriate Clean Water Act authority. The purpose of the coordination is to ensure that both agencies assess the most appropriate course of corrective action to remedy any confirmed violation. However, nothing in this section precludes the SMCRA regulatory authority from initiating enforcement action independently of the Clean Water Act authority. In fact, because the SMCRA regulatory authority is statutorily obligated to take immediate enforcement action when any ''permittee is in violation of any requirement of this Act, which condition, practice, or violation also creates an imminent danger to the health or safety of the public, or is causing, or can reasonably be expected to cause significant, imminent environmental harm to land, air or water resources'' [40] it may be necessary for the SMCRA regulatory authority to act, at least initially, independently of the Clean Water Act authority. In such a situation, after coordination with the Clean Water Act authority additional enforcement action may be necessary by the SMCRA regulatory authority, the Clean Water Act authority, or both. This process of coordination more fully satisfies the mandates of section 702(a) of SMCRA.[41]

Some commenters also requested that we explicitly allow citizens to enforce water quality standards through citizen suits. In our proposed rule, we did not propose any changes or ask for comment on the enforcement of water quality standards through SMCRA citizen suits. Nothing in the proposed or final rule was intended to alter or inhibit the ability to initiate citizen suits under SMCRA,[42] the Clean Water Act,[43] or the Endangered Species Act.[44] Moreover, we consider any questions about the extent of enforcement under the citizen suit provision of SMCRA to be beyond the scope of this rule.

H. We Should Define ''Existing Uses'' To Be Consistent With Clean Water Act Terminology

The proposed rule contained numerous regulations that refer to ''existing uses'' in the context of uses of groundwater and surface water. With respect to surface water, the regulations at 40 CFR 131.3(e) implementing the Clean Water Act defines ''existing uses'' as ''those uses actually attained in a waterbody on or after November 28, 1975, whether or not they are included in the water quality standards.'' We did not propose to define ''existing uses'' in the proposed rule, but we stated in the preamble that we interpret the term ''existing uses'' as meaning those uses in existence at the time of preparation of the permit application, regardless of whether those uses are designated uses under section 303(c) of the Clean Water Act.[45] *See* 80 FR 44475 (Jul. 27, 2015). We also stated in the preamble that, alternatively, we might replace the term ''existing uses'' with ''premining uses'' for purposes of clarity. *Id.* We invited comment on which course of action we should take.

One commenter stated that the term ''existing uses'' is acceptable as long as we distinguish between existing uses and designated uses. Another commenter found our de facto definition (''those uses in existence at the time of the preparation of the permit application'') to be potentially less protective than, and therefore inconsistent with, the Clean Water Act definition of ''existing uses'' at 40 CFR 131.3(e). The commenter asserted that, in the context of a permit application prepared in 2016 for a watershed that had no mining activity before November 28, 1975, the existing uses in 2016 likely would be more impaired than the existing uses before November 28, 1975. Preserving the ''existing uses'' at the time of the new 2016 mining application might simply perpetuate the existing level of impairment caused by prior mining in the same watershed. The commenter argued that our rules must provide at least the same level of protection as the Clean Water Act definition. The commenter recommended that our rules use the term ''premining uses'' and that we interpret that term as meaning all uses in existence at the time of the enactment of SMCRA. According to the commenter, the statutory mandate to prevent material damage to the hydrologic balance outside the permit area means that the rule must extend protection to all water sources impaired by mining since SMCRA was enacted in 1977.

Our rule implements SMCRA, not the Clean Water Act, so we are under no obligation to adopt the same definition of ''existing uses'' that has been adopted under the Clean Water Act, especially when our definition pertains to a term (material damage to the hydrologic balance outside the permit area) that does not appear in the Clean Water Act. We also have not discovered any support for the commenter's assertion that Congress intended that we look back to the baseline conditions on the date of enactment of SMCRA (August 3, 1977) to determine whether an operation is preventing material damage to the hydrologic balance outside the permit area. In addition to the practical difficulty of determining the baseline condition of water bodies on a date almost four decades ago, there is no statutory support for viewing the date that SMCRA was enacted as the baseline for determining whether an operation will prevent material damage to the hydrologic balance outside the permit area. To the contrary, SMCRA indicates that such a finding should be made at the time of permit application. For instance, section 510(b)(3) of SMCRA [46] provides that the regulatory authority *may not approve any application for a*

[39] 33 U.S.C. 1344.

[40] 30 U.S.C. 1271(a)(2).

[41] 30 U.S.C. 1292(a).

[42] 30 U.S.C. 1271.

[43] 33 U.S.C.1365.

[44] 16 U.S.C.1531.

[45] 33 U.S.C. 1313(c).

[46] 30 U.S.C. 1260(b)(3).

permit or permit revision unless the regulatory authority finds that *the proposed operation* has been designed to prevent material damage to the hydrologic balance outside the permit area. Thus, this section implies that the finding on material damage to the hydrologic balance outside the permit area should be based upon the assessment of the cumulative hydrologic impact of all anticipated mining in the watershed. That assessment looks forward to future impacts, not backward to impacts that have occurred since 1977.

To avoid confusion with the term ''existing uses'' as employed under the Clean Water Act, however, we have decided to replace the term ''existing uses'' with ''premining uses.'' We intend no change in practical effect by this change in terminology because ''premining uses'' are the uses in existence at the time of preparation of the permit application or, in other words, the conditions in existence before the proposed or current operation. There are some places in the regulations, primarily related to approximate original contour, where we address conditions in existence before any mining activities. In those instances, we do not use the term premining. Instead, we refer to conditions ''prior to any mining'' or ''before any mining''. For consistency in terminology, we are making these changes with respect to both groundwater and surface water.

I. We Should Remove Provisions That Are Duplicative of or Inconsistent With the Clean Water Act

Several commenters asserted that the proposed rule was inconsistent with SMCRA and would conflict with or duplicate the requirements of other federal laws—primarily the Clean Water Act. As support, many of these commenters cited Section 702 of SMCRA, which provides that ''[n]othing in this Act shall be construed as superseding, amending, modifying, or repealing . . . any of the following Acts or with any rule or regulation promulgated thereunder, including, but not limited to . . . [t]he Federal Water Pollution Control Act, as amended, the State laws enacted pursuant thereto, or other Federal laws relating to the preservation of water quality.'' [47] They also cited *In re Surface Mining Regulation Litigation,* 627 F.2d 1346 (D.C. Cir. 1980) where the court held that we exceeded our authority by issuing effluent limitations more stringent than those issued by EPA under the Clean Water Act. *Id.* at 1366–1367.

These commenters typically failed to appreciate the significance of the court's further holding in that case: ''where the [Clean Water Act] and its underlying regulatory scheme are silent so as to constitute an 'absence of regulation' or a 'regulatory gap', *the Secretary may issue effluent regulations without regard to EPA practice so long as he is authorized to do so under the Surface Mining Act.*'' *Id.* at 1367 (emphasis added). Thus, the court expressly held that we, under the authority of SMCRA, could issue regulations to address the hydrologic impacts of coal mining operations that are not adequately addressed under the Clean Water Act. In this final rule, consistent with this ruling, we are using our SMCRA authority to fill many of the very regulatory gaps that the Court mentioned in *In re Surface Mining Regulation Litigation. See, e.g., id.* (gaps in the Clean Water Act include, but are not limited to, ''discharges from abandoned and underground mines or from nonpoint sources'' and the ability ''to establish standards ''requiring comprehensive preplanning and designing for appropriate mine operating and reclamation procedures 'to ensure protection of public health and safety and to prevent the variety of other damages to the land, the soil, the wildlife, and the aesthetic and recreational values that can result from coal mining.' '').

Several commenters argued that this rule was not, in fact, filling regulatory gaps, but instead was creating a regime that would be inconsistent with the Clean Water Act and associated water quality laws and would improperly require SMCRA regulatory authorities to set water quality standards and enforce the Clean Water Act. We disagree. The Clean Water Act is designed to cover many industries and activities. SMCRA, by contrast, is designed to regulate the environmental impacts of one specific industry. This distinction is significant because the later-enacted statute, SMCRA, unlike the Clean Water Act, provides for the regulation of the environmental impacts, including the hydrologic impacts, of all phases of mining operations—design, operation, and reclamation. Absent SMCRA, coal mining operations that impact waters outside the permit area would be subject only to the limited regulation authorized by the Clean Water Act. By including requirements in SMCRA to regulate the effects of coal mining on water and hydrologic balance,[48] Congress clearly indicated that it intended to go beyond the protections it had afforded in the Clean Water Act. In SMCRA, Congress required the development of focused design requirements and performance standards for surface coal mining operations, including numerous standards related to water and the hydrologic balance. Thus, as long as these SMCRA standards do not conflict with the Clean Water Act, regulation under SMCRA will complement the Clean Water Act standards and requirements, which means that the final rule legitimately fits within the confines of what Congress intended.

Although nothing in the proposed rule conflicts with the Clean Water Act, because of commenters' concerns and to better effectuate our intent to improve coordination with Clean Water Act authorities, we modified the proposed rule in several key respects. We discuss these changes in more detail in the section-by-section analysis of the final rule.[49]

Some commenters alleged that our proposed rule would conflict with the Clean Water Act because it does not afford the same degree of flexibility that the statute does. However, our rule does not reduce the flexibilities afforded to operators under the Clean Water Act. Under our final rule, mining operations may not preclude attainment of any designated uses under the Clean Water Act, if such uses have been established. Precluding such designated uses would constitute material damage to the hydrologic balance outside the permit area under SMCRA. However, if no designated use exists, the standard becomes whether the operation is precluding any premining use of surface water outside the permit area.

One commenter asserted that designated uses under the Clean Water Act are ''aspirational and cannot be met due to ambient values or nonpoint sources'' and requested that we better explain what should occur in such situations. Another commenter raised similar concerns about how this proposed rule would account for the ''flexible and adaptive implementation'' of Clean Water Act standards. This commenter cited use attainability analysis, variances, and compliance

[47] 30 U.S.C. 1292(a)(3).

[48] *See, e.g.,* 30 U.S.C. 1201(c), 1260(b)(3), 1265(b)(2), 1265(b)(10), 1265(b)(24), 1266(b)(4), 1266(b)(9), 1266(b)(11), 1266(b)(12), 1266(c).

[49] *See, e.g.,* § 780.21(b)(6)(i) (removing the requirement that parameters of concern used to assess the potential for material damage to the hydrologic balance be expressed in numerical terms in the CHIA); 773.15(e)(3); and § 701.5 (definition of parameters of concern).

schedules and deadlines as examples of the flexible implementation inherent in Clean Water Act implementation. To the extent that the Clean Water Act provides flexibility, this final rule does not supersede, amend, modify, repeal, or otherwise conflict with the Clean Water Act. In addition, contrary to comments made by other commenters, SMCRA allows for some environmental impacts caused by mining; however, these are not without limitation. For example, section 515(b)(10) of SMCRA [50] requires that surface coal mining and reclamation operations minimize disturbances to the prevailing hydrologic balance at the mine site and in associated offsite areas and to the quality and quantity of water in surface and groundwater systems, which means that some damage is permissible. However, section 510(b)(3) of SMCRA [51] effectively prohibits approval of a permit application unless the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area.

J. We Should Remove the Provisions That Grant ''Veto Power'' Over SMCRA Permits to the U.S. Fish and Wildlife Service

Multiple commenters alleged that the proposed rule gave the U.S. Fish and Wildlife Service (FWS) ''veto power'' over issuance of SMCRA permits. Specifically, the commenters expressed concern that proposed §§ 779.20(d)(2)(iv) and 780.16(e)(2)(iv), would subordinate state permitting authority to the FWS because those provisions specified that the regulatory authority may not approve a permit application until all issues related to the Endangered Species Act of 1973 [52] are resolved and the regulatory authority has received written documentation from the FWS that all such issues have been resolved.

In the final rule, we replaced proposed §§ 779.20(d)(2)(iv) and 780.16(e)(2)(iv) with a single consolidated provision in § 780.16(b)(2). That provision specifies that the regulatory authority may not approve a permit application before it finds that there is a demonstration of compliance with the Endangered Species Act through one of the mechanisms listed in § 773.15(j) of the final rule.

Nothing in SMCRA supersedes the Endangered Species Act or exempts surface coal mining operations from compliance with applicable provisions of that law and the implementing regulations. Sections 7(a)(1), (2) and (4) of the Endangered Species Act of 1973 provide authority for adoption of the regulations referenced above, which are intended to ensure that surface coal mining and reclamation operations conducted under approved state and federal SMCRA regulatory programs avoid violations of the Endangered Species Act. Section 7(a)(1) of the Endangered Species Act [53] directs federal agencies to use their authorities to further the purposes of the Endangered Species Act. Section 7(a)(2) of the Endangered Species Act [54] requires all federal agencies, in consultation with FWS or the National Marine and Fisheries Service,[55] to ensure that their actions are not likely to jeopardize the continued existence of listed species or destroy or adversely modify designated critical habitat. Section 7(a)(4) of the Endangered Species Act [56] requires federal agencies to confer with the FWS on any agency action that is likely to jeopardize the continued existence of any species proposed to be listed. Other sources of authority for this rule are sections 515(b)(24), 515(b)(10), 515(b)(17), and 201(c)(2) of SMCRA.[57]

Section 4 of the Endangered Species Act directs the Secretary of the Interior, through the FWS, to list threatened or endangered species of fish and wildlife or plants and to designate critical habitat for those species.[58] The Endangered Species Act prohibits the unauthorized ''take'' of listed species,[59] a prohibition that applies to all persons and entities, including coal mine permittees and state regulatory authorities.[60]

The Endangered Species Act provides several routes by which applicants may demonstrate compliance. An applicant may demonstrate that the proposed actions would have no effect on listed species. If the proposed action may affect a listed species or destroy or cause adverse modifications to designated critical habitat, the applicant must consult with the FWS under section 7 [61] of the Endangered Species Act for federal permits or for mining plan approvals involving leased federal coal. Alternatively, the applicant may utilize the procedures of section 10 [62] of the Endangered Species Act for state permits on non-federal lands. Some applicants have obtained incidental take coverage by complying with the terms of a biological opinion that establishes a process for obtaining incidental take coverage that is significantly less time-consuming and less resource-intensive than the individual section 7 or section 10 processes. An applicant seeking to obtain incidental take coverage under a biological opinion, must comply with all the procedures, terms, and conditions of the biological opinion. We do not, however, require an applicant to use a biological opinion to obtain coverage. A biological opinion merely provides one avenue by which an applicant may obtain the coverage it needs against civil or criminal liability [63] for unauthorized take of threatened or endangered species in violation of the Endangered Species Act.

Paragraphs (j)(1) through (4) of final § 773.15 list four pathways by which the applicant and the regulatory authority may document compliance with the Endangered Species Act for surface coal mining and reclamation operations conducted under a SMCRA regulatory program. Paragraph (j)(1) applies when the applicant can document that the proposed surface coal mining and reclamation operations would have no effect on species listed or proposed for listing as threatened or endangered or on designated or proposed critical habitat. The joint U.S. Fish and Wildlife Service and National Marine Fisheries Service ''Final Endangered Species Act Section 7 Consultation Handbook'' (March 1998) states that the term ''effect'' means any impact, regardless of the severity or whether the impact is positive or negative.[64] Further, the implementing Endangered Species Act regulations found at 50 CFR 402.02, define ''effects of the action'' in relevant part as ''the direct and indirect effects of an action on the species or critical

[64] Final ESA Section 7 Consultation Handbook, March 1998 (pg. xii–xiii).

habitat, together with the effects of other activities that are interrelated or interdependent with that action.''

Paragraphs (j)(2) through (4) apply when the proposed surface coal mining and reclamation operations may have an effect on species listed or proposed for listing as threatened or endangered or on designated or proposed critical habitat for those species. Paragraph (j)(2) allows an applicant to obtain protection against liability for incidental take of a threatened or endangered species by documenting compliance with a valid biological opinion that covers issuance of permits for surface coal mining operations and the conduct of those operations under the applicable regulatory program. Through the process of completing a section 7 consultation on the continuation of existing permits and the approval and conduct of future surface coal mining and reclamation operations under both state and federal regulatory programs adopted pursuant to SMCRA, as modified by this rule, OSMRE and the U.S. Fish and Wildlife Service entered into a Memorandum of Understanding to improve interagency coordination and cooperation to ensure that proposed, threatened, and endangered species and proposed and designated critical habitat are adequately protected for all surface coal mining and reclamation permitting actions, including exploration operations, initial permit issuance, renewals, and significant revisions. The MOU complements the U.S. Fish and Wildlife Service's 2016 programmatic Biological Opinion. Thus, compliance with the terms of that biological opinion and the MOU would satisfy final paragraph (j)(2).

Final paragraph (j)(3) applies where we are the regulatory authority or where a mining plan is required under part 746 of our regulations to mine leased federal coal. This provision specifies that the applicant may provide documentation that interagency consultation under section 7 of the Endangered Species Act has been completed for the proposed operation. The provision may also apply in the case where other federal permits are required for the proposed operation, depending upon the scope of the formal consultation. Paragraph (j)(4) provides an alternative that applies where a state regulatory authority is responsible for permitting actions and the proposed operation does not involve leased federal coal, and the operator does not utilize paragraph (j)(2) or (j)(3), where applicable. It specifies that the applicant may provide documentation that the proposed operation is covered under a permit issued pursuant to section 10 of the Endangered Species Act of 1973.

K. We Should Better Explain How the Definitions of ''Material Damage'' and ''Material Damage to the Hydrologic Balance Outside the Permit Area'' Apply to Underground Mining Operations

Section 701.5 contains definitions of both ''material damage'' and ''material damage to the hydrologic balance outside the permit area.'' Many commenters asked that we make revisions to better distinguish between the definitions and clarify how they apply to underground mining operations. These commenters correctly note that section 510(b)(3) of SMCRA requires mine operators to prevent ''material damage to the hydrologic balance outside the permit area'' but section 516(b)(1) of SMCRA requires prevention of ''material damage'' caused by subsidence from underground operations to the extent technologically and economically feasible.[65] As specified in its definition, the term ''material damage'' applies only to our subsidence control provisions at §§ 784.30 and 817.121, which are applicable to underground mining operations.

As finalized, the definition of the term ''material damage to the hydrologic balance outside the permit area'' applies generally to ''an adverse impact . . . resulting from surface coal mining and reclamation operations, underground mining activities, or subsidence associated with underground mining activities.'' These two definitions are intended to ensure that all provisions of SMCRA are given effect—material damage to the hydrologic balance outside the permit area is prevented while material damage caused by subsidence is minimized to the extent technologically and economically feasible.

Numerous commenters expressed concern about the potential implications of applying the term ''material damage to the hydrologic balance outside the permit area'' to underground mining activities and subsidence. These commenters objected to application of the definition of ''material damage to the hydrologic balance outside the permit area'' to areas overlying the underground workings, which are part of the ''adjacent area'' as defined in § 701.5. They indicated that subsidence can cause a range of different impacts on water quantity and quality, including loss of flow through surface fracturing of the stream bed, loss of recharge due to a drop in the groundwater table below the stream bed elevation, loss of water supply sources like springs and seeps, and increased pollutant loadings; *e.g.,* iron, aluminum, and sulfate, caused by fracturing of the overburden. They noted that these types of hydrologic impacts are often temporary. According to the commenters, if the rule categorically required the prevention of temporary and permanent hydrologic impacts, some types of underground mining, such as longwall mining or other methods using planned subsidence, could not occur because those hydrologic impacts cannot be completely prevented.

We find that many of the concerns raised in the comments are overstated.

As noted previously, section 510(b)(3) of SMCRA[66] requires mine operators to prevent ''material damage to the hydrologic balance outside the permit area'' but section 516(b)(1) of SMCRA[67] requires prevention of ''material damage'' caused by subsidence from underground operations to the extent technologically and economically feasible. In keeping with these different and distinct provisions of SMCRA we clarified that not all of the impacts that the commenters described would necessarily rise to the level of material damage to the hydrologic balance outside the permit area. The regulatory authority is required to make a determination whether a permittee's proposed operation is designed to prevent material damage to the hydrologic balance outside the permit area. If the regulatory authority determines that it does cause material damage to the hydrologic balance outside the permit area, a permit will not be issued. Such a situation would occur whenever an adverse impact from subsidence permanently diminishes flow (*i.e.,* dewaters) of an intermittent or perennial stream to the extent that applicable water quality standards would not be met, or if no water quality standard has been established, the premining use would not be attained. However, a regulatory authority may determine that proposed subsidence-related material damage to surface water or groundwater can and will be repaired so that it still meets applicable water quality standards, or, if no water quality standard exists or is applicable, it still attains its premining use. Diminished flow within a short section of a stream segment over a longwall panel that recovers within a brief period of time or is repairable may have no discernible impact on attainment of water quality

[65] 30 U.S.C. 1266(b)(1).

[66] 30 U.S.C. 1260(b)(3).

[67] 30 U.S.C. 1266(b)(1).

standards or premining uses and therefore may not constitute material damage to the hydrologic balance outside the permit area. The regulatory authority will make a determination on whether subsidence damage to wetlands, streams, or other water bodies that can be corrected, or that will recover naturally, constitutes material damage to the hydrologic balance outside the permit area; if it does not rise to the level of material damage to the hydrologic balance outside the permit area, it may be allowed.

We have clarified and revised language in the final rule to ensure that longwall mining and other underground mining methods that use planned subsidence would not be prohibited, and that temporary impacts are allowed so long as they do not rise to the level of material damage to the hydrologic impacts outside of the permit area. SMCRA is clear that the regulatory authority may not approve any permit application for a surface coal mining operation, including one that involves underground mining activities, unless the application affirmatively demonstrates, consistent with final rule § 773.15, and the regulatory authority finds, in writing, that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area.[68] Any material damage to the hydrologic balance outside the permit area is unacceptable, including damage from subsidence, even if it is temporary. As mentioned above, such a situation could occur, for example, when subsidence causes a stream to dewater to the point that the stream can no longer support its water quality standard, or if no water quality standard exists, its premining use. If it is determined that a proposed operation would have this result, the operational plan would need to be modified to prevent subsidence of the stream. That modification could include the use of underground mining technology that prevents subsidence, such as room-and-pillar mining, for that portion of the operation. In order to clarify the obligation of the permittee to prevent material damage to the hydrologic balance outside the permit area, while recognizing that temporary subsidence-related material damage is almost certain to occur at planned subsidence operations, we have added new language to § 817.34(a)(2). This new language makes it clear that while underground operations must prevent material damage to the hydrologic balance outside the permit area, temporary subsidence related material damage that can be repaired or recover naturally may be allowed under § 817.121(c). As noted previously, however, given the different requirements of section 510(b)(3) and section 516(b)(1) of SMCRA,[69] the obligation to prevent material damage to the hydrologic balance outside the permit area, as required at section 510(b)(3) of SMCRA is not subject to the provision at section 516(b)(1) of SMCRA which requires prevention of material damage from subsidence to the extent technologically and economically feasible. An operator will not be granted an exemption from complying with material damage to the hydrologic balance outside the permit area based upon technological and economic feasibility where subsidence damage will result in material damage to the hydrologic balance outside the permit.

We have also addressed comments about the effects of subsidence on land and waters overlying underground mine workings by revising our proposed definition of ''material damage'' and our subsidence control provisions at § 784.30 (previously located at § 784.20), and § 817.121. In addition to addressing concerns raised by commenters about the magnitude and longevity of subsidence-related impacts to streams, these changes will help reduce the confusion identified by one commenter regarding the application of material damage to certain features in the subsidence context.

The definition of ''material damage'' in § 701.5 of the final rule applies only in the context of the subsidence control provisions of §§ 784.30 and 817.121. Among other things, the definition as adopted in this final rule specifies that material damage includes ''[a]ny functional impairment of surface lands, features (including wetlands, streams, and bodies of water), structures, or facilities.'' Under § 784.30(c), mining may still occur when those features exist or may be materially damaged, provided that the applicant submits a subsidence control plan and the regulatory authority approves that plan. Among other requirements, the subsidence control plan must describe the anticipated effects of planned subsidence on wetlands, streams, and water bodies and the measures to be taken to mitigate or remedy any subsidence-related material damage to those features.[70] In addition, pursuant to § 817.121(c) and (g), the underground mine operator must repair damage to surface land and waters, including wetlands, streams, and water bodies, to a condition capable of maintaining the value and reasonably foreseeable uses that the land was capable of supporting before subsidence damage occurred unless the regulatory authority determines that restoration is not technologically or economically feasible. If those repairs will not be implemented within 90 days, the permittee must bond the area as discussed in the preamble to final § 817.121(g)(3)(i).

These revisions are consistent with our longstanding position about subsidence-related material damage. For instance, in our final rule addressing the subsidence provisions of the Energy Policy Act of 1992,[71] we stated:

> The term material damage, in the context of §§ 784.20 and 817.121 of this chapter, means any functional impairment of surface lands, features, structures or facilities. The material damage threshold includes any physical change that has a significant adverse impact on the affected land's capability to support any current or reasonably foreseeable uses, or that causes significant loss in production or income, or any significant change in the condition, appearance or utility of any structure or facility from its pre-subsidence condition. It would also include any situation in which an imminent danger to a person would be created.[72]

Nothing in this final rule alters the meaning of the term ''functional impairment'' in the context of subsidence-related material damage. In addition, the preamble to the 1995 rules states that ''[t]he definition of 'material damage' covers damage to the surface and to surface features, such as wetlands, streams, and bodies of water, and to structures or facilities.'' [73] Consistent with that preamble description, the addition of the phrase ''wetlands, streams, and water bodies'' to our material damage definition should help clarify the applicability of the definition to hydrologic features in the subsidence context and ensure those damages are corrected in accordance with § 817.121.

The final rule includes language that requires the regulatory authority, when reviewing the determination of the probable hydrologic consequences of the operation in accordance with § 784.20 and the hydrologic reclamation plan in accordance with § 784.22, to (i) make a reasonable effort to assess the potential effects of subsidence from the proposed underground mining activities on streams and (ii) include remedial measures for any predicted diminution of streamflow as a result of subsidence. In summary, the final rule allows

material damage to wetlands, streams, and water bodies to occur so long as the permittee follows the subsidence control provisions in §§ 784.30 (subsidence control plan), 817.40 (water supply replacement), and 817.121 (subsidence prevention and control and correction of damage resulting from subsidence). Following these regulations means that water supplies will be replaced and that, to the extent technologically and economically feasible, wetlands, streams, and water bodies will be restored. In addition, we added § 817.121(c)(2), which requires that the permittee implement fish and wildlife enhancement measures, as approved by the regulatory authority in a permit revision, to offset subsidence-related material damage to wetlands or a perennial or intermittent stream when correction of that damage is technologically and economically infeasible. As long as these regulations are followed, subsidence damage from an underground mining operation that does not rise to the level of material damage to the hydrologic balance outside the permit area is allowed.

L. We Should Specify the Location Where an Operation Must Prevent Material Damage to the Hydrologic Balance Outside the Permit Area

A commenter suggested that we provide guidance on the location of the point of compliance for determining material damage to the hydrologic balance. Section 510(b)(3) of SMCRA [74] prohibits the approval of a permit application unless the application demonstrates and the regulatory authority finds in writing that the proposed operation has been designed to prevent material damage to hydrologic balance outside the permit area. Our existing definition of ''permit area'' in § 701.5 of our regulations provides that the permit area means ''the area of land, indicated on the approved map submitted by the operator with his or her application, required to be covered by the operator's performance bond under subchapter J of this chapter and which shall include the area of land upon which the operator proposes to conduct surface coal mining and reclamation operations under the permit, including all disturbed areas; provided that areas adequately bonded under another valid permit may be excluded from the permit area.'' [75] Our existing regulations in § 701.5 define ''disturbed area'' to mean ''an area where vegetation, topsoil, or overburden is removed or upon which topsoil, spoil, coal processing waste, underground development waste, or noncoal waste is placed by surface coal mining operations.'' [76] When the definition of ''material damage to the hydrologic balance outside the permit area'' that we are finalizing today is read in conjunction with the existing definitions of ''permit area'' and ''disturbed area,'' it is clear that the point of compliance for preventing material damage to the hydrologic balance outside the permit area is any point outside those areas of the permit boundary as indicated on the approved permit application map. The area inside the permit boundary where overburden is removed or where other mining activities occur that are required to be bonded for reclamation comprise the limits of the disturbed area. Any discharge, including those inside the permit area, must be in compliance with applicable Clean Water Act provisions as provided in § 816.42 of our final regulations; in addition, such discharges must not be comprised of toxic mine drainage and cannot result in material damage to the hydrologic balance outside the permit area.

The areas outside the permit area that may be impacted by mining activities are within the ''adjacent area'' as that term is defined in § 701.5. Generally, paragraph (1) of the definition of ''adjacent area'' includes the area outside the proposed or actual permit area within which there is a reasonable probability of adverse impacts from surface coal mining operations or underground mining activities. Moreover, the area comprised within this term will vary with the context in which a regulation uses this term. For example, the nature of the resource or resources addressed by a regulation in which the term ''adjacent area'' appears will determine the size and other dimensions of the adjacent area for purposes of that regulation.

For underground mines, paragraph (2) of the definition specifies that the adjacent area includes, ''at a minimum, the area overlying the underground workings plus the area within a reasonable angle of dewatering from the perimeter of the underground workings.'' Thus, surface water and groundwater outside the permit area, but within the adjacent area, must be protected from material damage to the hydrologic balance outside the permit area. We discuss other issues pertaining to the term ''material damage to the hydrologic balance outside the permit area'' in the preamble to the definition of that term.

M. What is the relationship among material damage thresholds, evaluation thresholds, and water monitoring requirements?

Material Damage Thresholds

Section 510(b)(3) of SMCRA [77] provides that the regulatory authority may not approve a permit application unless the application affirmatively demonstrates and the regulatory authority finds in writing that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area. The regulatory authority must base this finding on an ''assessment of the probable cumulative impact of all anticipated mining in the area on the hydrologic balance.'' Our rules refer to that assessment as the cumulative hydrologic impact assessment (CHIA). *See, e.g.,* 30 CFR 780.21. Our rules also designate the area for which the CHIA is prepared as the ''cumulative impact area,'' which section 701.5 of this final rule defines generally as any area within which impacts resulting from a surface or underground coal mining operation may interact with the impacts of all existing and anticipated surface and underground coal mining on surface-water and groundwater systems, including the impacts that existing and anticipated mining will have during mining and reclamation until final bond release.

The regulatory authority prepares the CHIA after technical review of the permit application is complete, using both the information in the application and other available data about the cumulative impact area. The application components most critical to preparation of the CHIA are the baseline data on surface water and groundwater; the ''determination of the probable hydrologic consequences of the mining and reclamation operations, both on and off the mine site,'' required by section 507(b)(11) of SMCRA; [78] which we generally refer to as the PHC determination, and the hydrologic reclamation plan required by section 508(a)(13) of SMCRA.[79] Section 780.20 of this final rule includes requirements for the PHC determination, while § 780.22 contains requirements for the hydrologic reclamation plan.

Section 780.21(b)(6) of this final rule provides that the regulatory authority must identify site-specific numeric or narrative material damage thresholds for each permit as part of the CHIA and include those thresholds as a condition

[74] 30 U.S.C. 1260(b)(3).

[75] 30 CFR 701.5.

[76] *Id.*

[77] 30 U.S.C. 1260(b)(3).

[78] 30 U.S.C. 1257(b)(11).

[79] 30 U.S.C. 1258(a)(13).

of the permit. These material damage thresholds will become the basis for the regulatory authority to objectively determine if a mining operation has prevented material damage to the hydrologic balance outside the permit area.

In developing thresholds to define when material damage to the hydrologic balance outside the permit area would occur in connection with a particular permit, final § 780.21(b)(6)(i) specifies that the regulatory authority will, in consultation with the Clean Water Act authority, as appropriate, undertake a comprehensive evaluation that considers the baseline data collected under § 780.19 of the final rule, the probable hydrologic consequences determination prepared under § 780.20 of the final rule, applicable water quality standards adopted under the authority of section 303(c) of the Clean Water Act,[80] applicable state or tribal standards for surface water or groundwater, ambient water quality criteria developed under section 304(a) of the Clean Water Act,[81] the biological requirements of any species listed as threatened or endangered under the Endangered Species Act of 1973,[82] and other pertinent information and considerations to identify the parameters for which thresholds are necessary and what numeric or narrative thresholds to use. Final § 780.21(b)(6)(ii) specifies that the regulatory authority must, after consulting with the Clean Water Act authority, use numeric material damage thresholds when possible for contaminants that have water quality criteria set by the Clean Water Act.[83] For contaminants, that do not have water quality criteria set, the material damage thresholds can be either numeric or narrative.

Final § 780.21(b)(6)(iii) requires that the regulatory authority identify the portion of the cumulative impact area to which each material damage threshold applies. This provision recognizes that the parameters selected and material damage threshold levels may vary within the cumulative impact area when appropriate, based upon differences in watershed characteristics and variations in the geology, hydrology, and biology of the cumulative impact area. For instance, if the operation would create point-source or nonpoint-source discharges to more than one receiving stream, material damage thresholds for surface water may vary from one watershed within the cumulative impact area to another, taking into consideration differences in watershed characteristics. Similarly, material damage thresholds for groundwater may vary from one part of the cumulative impact area to another to reflect variations in the geology or subsurface hydrology of the cumulative impact area. Regulatory authorities should closely coordinate with the relevant state agencies in identifying appropriate material damage thresholds for groundwater.

Material damage thresholds apply at all points outside the permit area. Final § 780.21(b)(6)(iv), therefore, provides that in the CHIA, the regulatory authority, must identify the points within the cumulative impact area at which the permittee will monitor the impacts of the operation on surface water and groundwater outside the permit area and explain how those locations will facilitate timely detection of the impacts of the operation on surface water and groundwater outside the permit area.

Evaluation Thresholds

In the preamble to the proposed rule,[84] we invited comment on whether the final rule should require that the regulatory authority establish corrective action thresholds. We explained that corrective action thresholds would consist of values for water quality or quantity that, while not constituting material damage to the hydrologic balance outside the permit area, provide reason for concern that such damage may occur in the future if no corrective action is taken. We received comments both supporting and opposing the development of corrective action thresholds. After considering the comments received, we decided to include a requirement in this final rule for thresholds of this nature, for the reasons discussed in the preamble to § 780.21(b)(7).

However, the final rule uses the term ''evaluation thresholds'' rather than ''corrective action thresholds'' because exceedance of this type of threshold does not necessarily require initiation of corrective action. Instead, an evaluation threshold identifies the point at which the regulatory authority must investigate the cause of an adverse trend in water quality or quantity outside the permit area. If the investigation finds that the mining operation is responsible for the adverse trend and that the adverse trend is likely to continue in the absence of corrective action, § 780.21(b)(7)(ii) of the final rule requires that the regulatory authority issue a permit revision order under § 774.10. That order must require that the permittee reassess the adequacy of the PHC determination prepared under § 780.20 and the hydrologic reclamation plan approved under § 780.20 and develop appropriate measures to minimize the possibility that the operation could cause material damage to the hydrologic balance outside the permit area in the future. The purpose of setting evaluation thresholds and establishing monitoring points is to detect impacts and provide an early warning system to alert both the permittee and the regulatory authority of adverse trends that, left uncorrected, would result in material damage to the hydrologic balance outside the permit area if the trajectory of the trend remains unaltered. Early detection of adverse trends and timely implementation of corrective measures benefits both the environment and the permittee by preventing the development of water quality or quantity problems that may be difficult, expensive, or impossible to correct. Use of evaluation thresholds also may assist in avoiding SMCRA permit violations.

Section 780.21(b)(7) of the final rule requires that the regulatory authority identify evaluation thresholds for critical water quality and quantity parameters. These critical parameters are characterized as those that could rise to the level of material damage. We expect that the regulatory authority will use best professional judgment in determining which parameters are critical. The final rule does not dictate how the regulatory authority must identify appropriate evaluation thresholds for critical parameters, which means that the regulatory authority has considerable flexibility. For example, the regulatory authority may decide to apply an across-the-board percentage reduction from the corresponding material damage thresholds or it may decide to determine evaluation thresholds on a case-by-case basis.

An exceedance of an evaluation threshold is not itself a violation under SMCRA or the SMCRA permit because evaluation thresholds are not incorporated as a condition of the permit and do not constitute enforceable standards. Moreover, exceedances of evaluation thresholds may not necessarily be the result of the mining operation. For that reason, an exceedance of an evaluation threshold only triggers a requirement under final § 780.21(b)(7) that the regulatory authority determine the cause of the exceedance in consultation with the Clean Water Act authority, as appropriate. If the mining operation is

[80] 33 U.S.C. 1313(c).

[81] 33 U.S.C. 1314(a).

[82] 16 U.S.C. 1531 *et seq.*

[83] 33 U.S.C. 1251 *et seq.*

[84] 80 FR 44436, 44502 (Jul. 27, 2015).

responsible for the exceedance and if the adverse trend is likely to continue in the absence of corrective action, final § 780.21(b)(7) provides that the regulatory authority must issue a permit revision order under § 774.10. The order must require that the permittee reassess the adequacy of the PHC determination prepared under § 780.20 and the hydrologic reclamation plan approved under § 780.22 and develop measures to prevent material damage to the hydrologic balance outside the permit area. Section 780.21(c)(1) of the final rule provides that, upon receipt of an application for a significant permit revision, the regulatory authority must determine whether there is a need for a new or updated CHIA.

We encourage the permittee to identify any exceedance of an evaluation threshold as part of its review of water monitoring records and notify the regulatory authority, which will then determine how to proceed with determining the cause of the exceedance. Additionally, the SMCRA inspector will, as part of each complete inspection conducted on a quarterly basis, review water monitoring records to determine if an evaluation threshold has been exceeded. If the inspector identifies an exceedance, the regulatory authority, in consultation with the Clean Water Act authority, as appropriate, will then determine the cause of the exceedance and, if necessary, issue an order requiring that the permittee submit a permit revision application, as discussed above. In addition, § 780.21(c)(2) of the final rule provides that the regulatory authority must reevaluate the CHIA at intervals not to exceed three years to determine whether the CHIA remains accurate and whether the material damage and evaluation thresholds in the CHIA and the permit are adequate to ensure that material damage to the hydrologic balance outside the permit area will not occur. This review must consider all biological and water monitoring data from all surface coal mining and reclamation operations within the cumulative impact area.

We are the regulatory authority in Tennessee. We have used evaluation thresholds successfully in our Knoxville Field Office (KFO) for many years, resulting in cost-effective and practical improvements to water quality. For example, KFO routinely uses an evaluation threshold of 1.0 mg/l for iron in a receiving stream. Water monitoring data for a site subsequently documented an exceedance of that threshold after the surface mining operation disturbed flooded abandoned underground mine workings. The permittee had attempted to divert the flow from those workings to a pond for treatment. However, the diversion was not fully successful, and some of the water entered the receiving stream without treatment. KFO required the permittee to construct a three-cell wetland treatment system and divert all water from the underground workings to that system, which is successfully treating the water. This corrective action prevented material damage to the hydrologic balance from occurring. KFO conducted the investigation jointly with the Tennessee Clean Water Act permitting authority.

Monitoring

Final rule § 780.23(a) and (b) require that each permit application include plans to monitor both surface water and groundwater. Those paragraphs also provide that the plans must be adequate to evaluate the impacts of the mining operation on surface water and groundwater in the proposed permit and adjacent areas and to determine in a timely manner whether corrective action is needed to prevent the operation from causing material damage to the hydrologic balance outside the permit area. Among other things, the final rule requires that the plans include monitoring points at the locations specified in the CHIA prepared by the regulatory authority under § 780.21(b)(6)(iv) of the final rule.

Paragraphs (a)(1)(iii) and (b)(1)(iv) of final § 780.23 require that the permittee establish a sufficient number of appropriate monitoring locations to evaluate the accuracy of the findings in the PHC determination, to identify adverse trends, and to determine, in a timely fashion, whether corrective action is needed to prevent material damage to the hydrologic balance outside the permit area. Under final § 780.23(b)(1)(iv)(B), the surface water monitoring plan must include upgradient and downgradient monitoring locations in each perennial and intermittent stream within the proposed permit and adjacent areas, with the exception that no upgradient monitoring location is needed for a stream when the operation will mine through the headwaters of that stream. Similarly, under final § 780.23(a)(1)(iii)(A), the groundwater monitoring plan must include monitoring wells or equivalent monitoring points located upgradient and downgradient of the proposed operation. That requirement applies to each aquifer above or immediately below the lowest coal seam to be mined.

Paragraphs (a)(2)(i) and (b)(2)(i) of final § 780.23 specify that, at a minimum, the surface water and groundwater monitoring plans must provide for the monitoring of those parameters for which evaluation thresholds exist under § 780.21(b)(7). In addition, paragraphs (a)(2)(ii) and (b)(2)(ii) of final § 780.23 require analysis of each sample for the baseline parameters listed in § 780.19(a)(2) and for all parameters for which evaluation thresholds exist under § 780.21(b)(7).

Final § 816.35(a)(2) requires that the permittee conduct groundwater monitoring through mining, reclamation, and the applicable revegetation responsibility period under § 816.115 of the final rule for the monitored area. The permittee must continue to monitor groundwater beyond that date for any additional time needed for monitoring results to demonstrate that the criteria of § 816.35(d)(1) and (2) have been met, as determined by the regulatory authority. Paragraphs (d)(1) and (2) of § 816.35 establish the conditions under which the regulatory authority may approve modification of the groundwater monitoring requirements, including the parameters monitored and the sampling frequency. For example, the regulatory authority may reduce the frequency of groundwater monitoring from quarterly to annual if it determines that the reduced frequency will be adequate to detect adverse trends in a timely manner, based on the rate of groundwater movement.

Specifically, paragraphs (d)(1) and (2) of final § 816.35 provide that the permittee may request, and the regulatory authority may approve, modification of the groundwater monitoring plan based on a demonstration that, with respect to the parameter or parameters affected by the proposed modification, future adverse changes in groundwater quantity or quality are unlikely to occur and the operation has—

- Minimized disturbance to the hydrologic balance in the permit and adjacent areas;
- Prevented material damage to the hydrologic balance outside the permit area;
- Preserved or restored the biological condition of perennial and intermittent streams within the permit and adjacent areas for which baseline biological condition data was collected under § 780.19(c)(6)(vi) when groundwater from the permit area provides all or part of the base flow of those streams;
- Maintained or restored the availability and quality of groundwater to the extent necessary to support the approved postmining land uses within the permit area; and

• Protected or replaced the water rights of other users.

Nothing in § 816.35(d)(1) and (2) authorize complete discontinuance of monitoring at any monitoring location (except as approved under § 784.40 for certain underground mines) or discontinuance of monitoring of all parameters for the entire operation before expiration of the applicable revegetation responsibility period under § 816.115 for the monitored area. Given the typically slow rate of groundwater movement and the length of time needed to reestablish the water table in the backfilled area, discontinuance of monitoring before expiration of the applicable revegetation responsibility period under § 816.115 likely would result in discontinuance of groundwater monitoring before groundwater within the reclaimed permit area has reached equilibrium with groundwater in the adjacent area. That result would negate the purposes of the monitoring program, one of which is to evaluate whether the operation has caused material damage to the hydrologic balance outside the permit area.

Final § 816.36 contains identical requirements for surface water monitoring, with the exception that paragraph (a)(2) requires that surface water monitoring continue through mining and during reclamation until the regulatory authority releases the entire bond amount for the monitored area under §§ 800.40 through 800.43. This difference reflects the fact that surface water monitoring, unlike groundwater monitoring, does not involve wells that the permittee must seal or transfer under § 816.13 of the final rule before applying for final bond release. In addition, final § 816.36(d)(2) contains one additional requirement for modification of the surface water monitoring plan for a permit: The permittee must demonstrate that the operation has not precluded attainment of any designated use of surface water under section 303(c) of the Clean Water Act, 33 U.S.C. 1313(c).

Paragraph (c) of final section 780.23 further requires that the permit application include a plan for monitoring the biological condition of each perennial and intermittent stream within the proposed permit and adjacent areas for which baseline biological condition data was collected under § 780.19(c)(6)(vi). The plan must be adequate to evaluate the impacts of the mining operation on the biological condition of those streams and to determine in a timely manner whether corrective action is needed to prevent the operation from causing material damage to the hydrologic balance outside the permit area.

N. What effect will the final rule have on proposed operations in impaired watersheds?

Each Clean Water Act authority is required to conduct an assessment of each stream within state borders to determine if the water is meeting all state and federal water quality criteria. If a stream is not meeting all state and federal water quality criteria, it is considered to be impaired. Under section 303(d) of the Clean Water Act, each state is required to submit a list of these impaired waters to the Environmental Protection Agency ''from time to time'' (but at least every three years). Section 303(d) of the Clean Water Act also requires each state to prioritize the waters on the impaired waters list and develop a plan to rehabilitate the stream so that it is able to meet all state and federal water quality criteria. This plan involves estimating the total maximum daily load (TMDL) of various water quality parameters from all known and reasonably foreseeable sources (point and non-point sources) that an impaired stream is expected to contain while moving along its flow path. The plan's objective is to decrease the pollutant load and enable the stream to meet all state and federal water quality standards. These TMDLs serve as a blueprint to ensure that an impaired stream meets all state and federal water quality criteria and achieves its highest designated use.

TMDLs can be calculated to implement a narrative stream condition or to focus on a specific parameter.[85] Once the TMDL is calculated, each new individual point-source discharge is assigned a waste load allocation based on its estimated discharge flow rate and parameter concentration. The Clean Water Act authority may adjust effluent limitations in existing NPDES permits to reflect the waste load allocation for each parameter under consideration in the TMDL. When the waste load allocations are implemented as concentration-based limits in NPDES permits, the limits are derived from the calculated waste load allocation for the outfall and an assumed flow rate. This concentration limit is expressed in concentration units applicable to each specific parameter and is normally given as a mass/volume (*e.g.,* mg/L). Waste load allocations are often implemented in NPDES permits as mass-based limits and expressed as pounds per day.

Both the applicant and the regulatory authority need to carefully consider the impact of a proposed operation on the impaired hydrologic conditions in a watershed with a 303(d)-listed water. Under section 510(b)(3) of SMCRA and § 773.15(e) of this final rule, the SMCRA regulatory authority may not approve a permit application unless the applicant demonstrates, and the regulatory authority finds, that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area. Before making this finding, the SMCRA regulatory authority must prepare a cumulative hydrologic impact analysis (CHIA) that identifies and analyzes the cumulative impacts of all anticipated mining, including the proposed operation, on the hydrologic balance in the cumulative impact area, including impacts on the water quality and biology of the receiving stream. *See* final paragraphs (a) and (b) of § 780.21. Both the definition of ''material damage to the hydrologic balance outside the permit area'' in § 701.5 of this final rule and the CHIA regulations that we are adopting in § 780.21(b)(6) of this final rule provide that the regulatory authority must consult with the Clean Water Act authority, as appropriate, in determining whether the proposed operation would cause material damage to the hydrologic balance outside the permit area.

O. Should ephemeral streams receive the same protections as intermittent and perennial streams?

Scientific studies completed since the enactment of SMCRA and the adoption of our existing rules have documented the importance of headwater streams in maintaining the ecological health and function of streams down gradient of headwater streams. Headwater streams include all first-order and second-order streams without regard to whether those streams are perennial, intermittent, or ephemeral. In 2015, U.S. Environmental Protection Agency published a report summarizing the findings of peer-reviewed studies of headwater streams and wetlands and the impact they have on the physical, chemical, and biological integrity of downstream

[85] For example, if the Clean Water Act authority determined that a stream was impaired because of excess sediment, it would calculate the sediment load the stream could assimilate from all point and non-point sources while maintaining its designated use. That TMDL for sediment would be expressed numerically (*e.g.,* 1000 pounds of suspended sediment per day). The Clean Water Act authority would then allocate a portion of that TMDL amount among all known and reasonably foreseeable NPDES permits and non-point sources that do not have an NPDES permit.

waters.[86] The studies and the report generally do not differentiate among perennial, intermittent, and ephemeral streams, but the report emphasizes that ephemeral streams are an important component of headwater streams and that they have an effect on the form and function of downstream channels and aquatic life. The report states that the evidence unequivocally demonstrates that the stream channels, riparian wetlands, floodplain wetlands, and open waters that together form river networks are clearly connected to downstream waters in ways that profoundly influence downstream water integrity.[87] According to the report, the body of literature documenting connectivity and downstream effects is most abundant for perennial and intermittent streams and for riparian and floodplain wetlands.[88] The report further states that, although less abundant, the evidence for connectivity and downstream effects of ephemeral streams is strong and compelling, particularly in context with the large body of evidence supporting the physical connectivity and cumulative effects of channelized flows that form and maintain stream networks.[89]

The report identifies five principal contributions of ephemeral streams: (1) Providing streamflow to larger streams; (2) conveying water into local storage compartments such as ponds, shallow aquifers, or streambanks that are important sources of water for maintenance of the baseflow in larger streams; (3) transporting sediment, woody debris, and nutrients; (4) providing the biological connectivity that is necessary either to support the life cycle of some invertebrates or to facilitate the transport of terrestrial invertebrates that serve as food resources in downstream communities; and (5) influencing fundamental biogeochemical processes such as the assimilation and transformation of nitrogen that may otherwise have detrimental impacts on downstream communities. In addition, headwater streams, including ephemeral and intermittent streams, shape downstream channels by accumulating and gradually or episodically releasing stored materials such as sediment and large woody debris.[90] These materials help structure stream and river channels by slowing the flow of water through channels and providing substrate and habitat for aquatic organisms.[91]

Our previous rules included no protections for ephemeral streams. Consistent with the findings of the U.S. Environmental Protection Agency report and other studies, our proposed rule included some protections for ephemeral streams, tailored to their hydrologic and ecological functions. We also invited comment on whether we should extend equal protection to all streams, without regard to whether the stream is perennial, intermittent, or ephemeral. *See* 80 FR 44451 (Jul. 27, 2015).

We received numerous comments from environmental groups advocating that ephemeral streams be protected in the same manner as perennial and intermittent streams. One commenter stated: ''OSMRE's analysis should start from a presumptive rule of equal protection for all streams, and any assertion of countervailing business impacts should be considered only if it is backed by evidence included in the administrative record.'' Many environmental commenters asserted that a strong stream protection rule must include protection of ephemeral streams because they are an essential element of the hydrologic balance.

In contrast, industry commenters opposed affording ephemeral streams the same protections as intermittent and perennial streams. This paragraph summarizes some of those arguments:

- The U.S. Army Corps of Engineers, an agency with considerable expertise on the subject of streams, rarely requires returning all ephemeral features to the postmining landscape.
- Some ephemeral streams are the result of anthropogenic activities and may be undesirable.
- Many ephemeral streams will find their own way back onto the landscape, depending on many factors including the final configuration of the reclamation. Restoring these lesser drainages is a waste of effort when nature will do it better.
- Disallowing the placement of sediment ponds in ephemeral drainages would result in logistically difficult or impossible situations or at least a greatly increased disturbance from additional ditching and a larger number of ponds.
- It makes no sense and is counterproductive to reconstruct erosional features when reclamation provides the opportunity to reshape the landscape to reduce erosion.
- Ephemeral streams have minimal if any biological components.
- In Wyoming's Powder River Basin, extending protection to ephemeral streams could result in 2,800 tons of coal per foot of channel being left unmined. This equates to 15 million tons of coal sterilized for every mile of channel that could not be mined. Surface coal mines in Wyoming can have upwards of 100 miles of ephemeral channels within the permit boundary. If all of the channels were to become unmineable, approximately 1.5 billion tons of coal for each mine would be sterilized.
- Typical mining techniques in the Powder River Basin utilize draglines and truck shovels. Efficient dragline operations require long linear pits. If ephemeral streams become unmineable, these types of operations will no longer be economic or efficient because of the number of ephemeral channels that bisect these pits.
- The Bureau of Land Management requires that a bonus bid be paid at the time a federal coal lease is awarded. To date, coal underlying ephemeral stream channels has been considered recoverable, which means that companies have paid bonus bids ranging from $0.85 to $1.35 per ton for coal underlying ephemeral streams in leases awarded during the past 5 years. If ephemeral channels are considered unmineable, this will create a significant economic hardship for the mining companies. Federal and state governments also will experience a loss of revenue.

Many commenters thought that the term ''ephemeral stream'' included all conveyances that were not either perennial or intermittent streams. However, the definition of ''ephemeral stream'' that we are adopting in § 701.5 as part of this final rule addresses this issue by providing that ephemeral streams include only those conveyances with channels that display both a bed-and-bank configuration and an ordinary high water mark.

After evaluating the comments, reviewing the scientific literature, and weighing potential costs and benefits, we decided not to extend the same protections to ephemeral streams that we do to intermittent and perennial streams.

However, as part of this final rule, we adopted most of the added protections for ephemeral streams that we included in our proposed rule. The final rule will protect the important role that ephemeral streams perform within watersheds including providing

protection and maintenance of downstream uses, ecological services, and the hydrologic balance of larger streams because of the impact ephemeral streams have on the form and function of downstream channels and aquatic life. Adopting these protections should ensure that ephemeral streams on reclaimed mine sites continue to provide the ecological services identified in the U.S. Environmental Protection Agency report while not unduly restricting mining through those streams. This approach is consistent with the purposes of SMCRA, as enumerated in section 102 of the Act.[92] In particular, it will protect society and the environment from the adverse effects of surface coal mining operations, as provided in paragraph (a); assure that surface coal mining operations are conducted so as to protect the environment, as provided in paragraph (d); and strike a balance between environmental protection and the Nation's energy needs, as provided in paragraph (f). Although only certain requirements apply to ephemeral streams, as discussed in final rule § 780.27, these requirements minimize impacts to ephemeral streams.

Proposed §§ 780.19(c)(6) and 784.19(c)(6) required that the permit applicant identify and map all ephemeral streams within the proposed permit and adjacent areas. Those proposed rules also required that the applicant describe the physical and hydrologic characteristics of those streams in detail, as well as any associated vegetation in the riparian zone if one exists. In addition, they required that the applicant assess the biological condition of a representative sample of those ephemeral streams. The final rule applies these proposed requirements only to ephemeral streams within the proposed permit area because those are the only ephemeral streams that the proposed operation would disturb and for which the operation would incur reclamation requirements. Requiring this information for ephemeral streams within the adjacent area would be costly and time-consuming and would not assist the regulatory authority in reviewing the permit application because no performance standards apply to ephemeral streams in the adjacent area. In addition, the final rule does not include the proposed requirement for baseline information on the biological condition of ephemeral streams because no scientifically defensible protocol currently exists for use in ephemeral streams for that purpose.

Proposed §§ 780.20, 780.21, 784.20, and 784.21 required that the determination of the probable hydrologic consequences of mining (PHC determination) and the cumulative hydrologic impact assessment (CHIA) include consideration of impacts on the biological condition of ephemeral streams. Those sections of the final rule do not include this proposed requirement because established and scientifically defensible protocols do not currently exist for use in determining the biological condition of ephemeral streams.

Proposed §§ 780.19(c)(3), 780.20(a)(5)(iv), 784.19(c)(3), and 784.20(a)(5)(iv) included peak flow baseline data collection and analysis requirements for ephemeral streams within the proposed permit and adjacent areas. The final rule does not include these requirements because this information is unnecessary for the analysis of the proposed operation's impacts on flooding that the PHC determination must contain. The baseline precipitation data required by final §§ 780.19(c)(5) and 784.19(c)(5) in combination with the description of the general stream-channel configuration of ephemeral streams within the proposed permit area required by final §§ 780.19(c)(6) and 784.19(c)(6) will provide all necessary information needed for that analysis, given that ephemeral streams flow only in direct response to precipitation events.

Proposed §§ 780.12(d)(1) and 784.12(d)(1) required that the backfilling and grading plan in the reclamation plan include contour maps, cross-sections, or models that show in detail the anticipated final surface configuration, including drainage patterns, of the proposed permit area. The final rule adopts those provisions as proposed. Final §§ 780.12(b)(3) and 784.12(b)(3) also provide that the reclamation timetable must include establishment of the surface drainage pattern and stream-channel configuration approved in the permit, including construction of appropriately-designed perennial, intermittent, and ephemeral stream channels to replace those removed by mining. Proposed §§ 780.28(c)(1) and 784.28(c)(1) required that the postmining drainage pattern, including ephemeral streams, be similar to the premining drainage pattern, with limited exceptions. Sections 780.27(b) and 784.27(b) of the final rule adopt these provisions in revised form for ephemeral streams. They allow variances from the premining drainage pattern when the regulatory authority finds that a different pattern or configuration is necessary or appropriate to ensure stability; prevent or minimize downcutting or widening of reconstructed stream channels and control meander migration; promote enhancement of fish and wildlife habitat; accommodate any anticipated temporary or permanent increase in surface runoff as a result of mining and reclamation; accommodate the construction of excess spoil fills, coal mine waste refuse piles, or coal mine waste impounding structures; replace a stream that was channelized or otherwise severely altered prior to submittal of the permit application with a more natural, relatively stable, and ecologically sound drainage pattern or stream-channel configuration; or reclaim a previously mined area.

Proposed §§ 780.28(b)(3) and 784.28(b)(3) provided that, after mining through an ephemeral stream, the permittee must plant native species within a 100-foot corridor on both sides of the reconstructed stream. Sections 780.27(c), 784.27(c), 816.57(d), and 817.57(d) of the final rule adopt this requirement with some revisions. The streamside vegetative corridor must be consistent with natural vegetation patterns. The streamside vegetative corridor requirement would not apply to prime farmland or when establishment of a corridor comprised of native species would be incompatible with an approved postmining land use that is implemented before final bond release. Establishment of a streamside vegetative corridor is critical to ensuring restoration of the nutrient and organic matter transport functions of ephemeral streams.

P. The Rule Should Not Require the Use of Multimetric Bioassessment Protocols To Establish Baseline Ecological Stream Function and Stream Restoration Criteria

Proposed §§ 780.19(e)(2) and 784.19(e)(2) would have required the use of multimetric bioassessment protocols to assess the baseline ecological function of perennial, intermittent, and ephemeral streams and to establish stream restoration criteria (*i.e.,* the point at which ecological function will be considered restored) for perennial and intermittent streams. Proposed §§ 780.23(c) and 784.23(c) also would have required use of these protocols to monitor the biological condition of intermittent and perennial streams during mining and reclamation.

We received comments both in support of and in opposition to the use of macroinvertebrate sampling and associated indexes for those purposes.

[92] 30 U.S.C.1202.

Some comments were general, while others singled out the use of an index of biological integrity (IBI) for baseline stream assessment and monitoring during mining and reclamation when discussing support or opposition to this requirement. The proposed rule required IBIs to include macroinvertebrate sampling. The IBIs would be used to develop a value that would provide an objective measure to describe various ecological characteristics found during the field surveys. This value would then be compared to an index that is established for designated uses under the Clean Water Act to assess the quality of the stream before, during, and after mining. This IBI system is a well-tested and robust tool to identify impacts on the health of perennial streams. IBIs and other scientifically defensible protocols are becoming more widely established for intermittent streams, but are not yet widely used across the nation. IBIs and other scientifically defensible protocols for assessing ephemeral streams have not been widely used to date, and when they have been, they have been most often used to characterize biological differences among ephemeral, intermittent, and perennial streams or biological changes with varying hydrological conditions. The proposed rule would have required the establishment of separate IBI protocols for all three types of streams: Perennial, intermittent, and ephemeral.

As discussed in Part IV, section O of this preamble, several commenters criticized our proposal to treat ephemeral streams in the same manner as intermittent and perennial streams. These commenters strongly encouraged us to remove requirements to assess the baseline condition of ephemeral streams using bioassessment protocols that sample macroinvertebrate populations within ephemeral streams. They claimed it would yield no valid data for assessing the baseline condition of SMCRA-related activities and would be unduly costly. We agree. The final rule does not include assessment of biological condition requirements related to ephemeral streams.

In addition, commenters suggested that there are other scientifically valid protocols that should be included as options for baseline stream assessment and monitoring. According to these commenters, these other protocols are also robust, scientifically defensible methods developed and applied by states, territories, and tribes. They include predictive and discriminant modeling approaches. We agree and have added these as acceptable methods in the final rule.

In light of the comments received, we identified and analyzed other options that commenters suggested for assessing the baseline condition of and monitoring streams: The Rapid Bioassessment Protocol III (RBPIII), which is set out in the 1989 EPA Publication, ''Rapid Bioassessment Protocols for Use in Streams and Rivers;'' the Before-After-Control-Impact design (BACI); and hydrogeomorphic sampling protocols. We also considered using IBIs that were designed for perennial streams to assess the baseline condition of and monitor intermittent and ephemeral streams (as is occasionally done by Clean Water Act authorities).

Our analysis identified some positive attributes of the RBPIII protocol. It would provide a more thorough baseline assessment of the ecological function and biological condition of the premining site than some other methods. It would demonstrate with greater certainty whether or not the permittee had minimized the adverse effects of coal mining on upstream and downstream waters. It is based on sound scientific principles (quantitative or semi-quantitative designs that can be analyzed statistically). Finally the RBPIII is relatively easy to use and can be rapidly deployed. However, the RBPIII also has significant drawbacks. It would require the regulatory authority or the permittee to establish, assess, and monitor a set of reference streams on a permit-by-permit basis. This in turn would pose an issue of statistical validity: The variability between the relatively small number of reference streams and the streams potentially affected by the permitted operation could be great enough to mask significant impacts that mining might have on the affected streams. Differences in methodology (*e.g.,* sample collection protocols, data analysis, etc.) mean that the RPBIII may not be comparable with the scientifically defensible protocols such as the IBI that we proposed to evaluate perennial streams. Using two different protocols, moreover, would significantly increase time and costs associated with assessing the baseline condition of and monitoring the effects of mining on streams. Finally, the RBPIII protocol is over 20 years old. This in and of itself is not a reason to eliminate this protocol; however, since its first publication, it has been updated twice to reflect a focus on national standardization, not to small-scale projects as originally designed and its suggested use by the commenters.

Our analysis also showed positive and negative aspects to using the BACI protocols. On the positive side, BACI analysis would be specific to each permit area or even each particular stream and would allow the regulatory authority to tailor monitoring and baseline assessment to each permit. This could allow for variances from the kind of state or regional standard that an IBI or other larger-scale protocols might impose. BACI analysis could be less costly than some other approaches because the regulatory authority can perform one analysis that evaluates multiple streams, including every stream in the permit area. Under this kind of analysis one premining sampling event and additional postmining samplings would result in a statistically valid analysis. On the negative side, the BACI analysis requires use of control sites. This could create a number of problems in the context of SMCRA permits. First, if the control site is not selected correctly, it could result in a skewed analysis or a situation in which an analysis may not be possible after mining is complete. Second, under this kind of analysis, the control sites must remain in their original condition for the duration of the mining operation. This may not be practicable because those sites might be beyond the permittee's control. They also could be affected by activities other than mining, such as industrialization, logging, or urbanization within the watershed. Third, while the BACI protocol may be cheaper than some alternatives, permittees still would incur additional costs for sampling not only baseline and impacted streams but the control streams. Fourth, additional control streams might have to be incorporated into the permit area if enough suitable control streams are not present in the initially designed permit area. This could lead to additional costs and permitting delays. Fifth, control sites would have to be identified and monitored for each individual permit. This would increase costs and might lead to permitting delays. Finally, one of the greatest drawbacks of the BACI analysis is that, although it can assess large changes to biological condition and ecological function, it may miss smaller changes. Indeed, this kind of analysis might not be any more protective than the previous regulations.

We found no benefit to using hydrogeomorphic protocols. Although they are easy to implement, they do not require macroinvertebrate sampling. In general, they provide no greater benefit than the types of analysis that have been used in connection with our previous regulations.

Finally we determined that it is not currently appropriate to use protocols

developed for perennial streams to assess the baseline condition of and to monitor intermittent streams. As commenters pointed out, some Clean Water Act authorities, in the exercise of their professional judgment, have occasionally done this. We have concluded, however, that this approach has not been used enough to justify requiring it in our rule.

In sum, after consideration of these other methods, as provided in final §§ 780.19(c)(6)(vii) and 784.19(c)(6)(vii), we determined that the best technology currently available for baseline assessment and monitoring purposes for perennial streams is the use of IBIs or other equally scientifically defensible stream assessment protocols developed and applied by states, territories, and tribes. These other scientifically defensible stream assessment protocols would include predictive and discriminant modeling approaches, such as those in place in many western states. The final rule requires use of these methods and protocols for all perennial streams within and adjacent to the proposed permit area. Some states and regions have developed indices of biotic integrity or bioassessment protocols for intermittent streams. In those instances, final §§ 780.28(g)(3)(iii) and 780.19(c)(6)(vii) and their counterparts in §§ 784.28 and 784.19 require use of those protocols to assess the baseline condition of and to monitor intermittent streams. Requiring these types of baseline assessments and monitoring protocols instead of the RBPIII, BACI, hydrogeomorphic protocols, and instead of using perennial stream indices for intermittent and ephemeral streams will encourage the further development of scientifically defensible methods and protocols.

We realize, however, that at present few scientifically defensible protocols have been established for bioassessments of intermittent streams. In the final rule, we do not require that SMCRA regulatory authorities develop new protocols for this purpose, but we do require them to reevaluate the best technology currently available for intermittent streams every 5 years and make any appropriate adjustments to account for new protocols that may have been developed. *See* § 780.28(g)(3)(iv)(B). Until scientifically defensible protocols are developed for intermittent streams, we are requiring baseline assessment and monitoring of these streams using a description of the water quality, water quantity, stream channel configuration, a quantitative assessment of the streamside vegetation, and an initial cataloging of the stream biota. For further detail, please see our discussions of §§ 780.19, 780.27, 780.28, 816.56, and 816.57 in this preamble.

Q. Restoration of the Ecological Function of Perennial and Intermittent Streams Is Not Possible or Feasible

Many commenters argued that there is no scientific support, in the form of published peer-reviewed studies, for the proposition that reconstructed streams can effectively replace streams that existed before mining, especially in regard to ecological function and premining biology. In a similar vein, some commenters urged us to prohibit mining activities within areas in which streams occur because stream restoration is unattainable. For example, one commenter stated: ''[T]he unproven ability to fully restore the functions and uses of streams damaged by subsidence necessitates that the rule require avoidance of such damage as a primary consideration.'' According to commenters, we did not provide sufficient evidence that the ecological condition of streams could be restored with the available technology and science. They alleged that our rule created an impossible standard of reclamation, a standard that had not been demonstrated to be achievable by operators or enforceable by regulatory authorities.

Some industry commenters agreed that full restoration of perennial and intermittent streams is not attainable. According to those commenters, we should not adopt a rule that establishes an unattainable standard.

We agree that full restoration of the biology and ecological function of mined-through streams is not always possible and that restoration of those streams has often fallen short of goals. However, our experience indicates that restoration of impaired streams is possible after mining. Streams that were not attaining their designated aquatic life use have been shown to improve enough, through restoration techniques, to be removed from the section 303(d) [93] list of impaired waters.[94]

In addition, standards to assess and monitor ecological function are both established and currently in use to regulate activities within streams and reclamation projects across the United States. When consistent with SMCRA, we incorporated those standards into the final rule. In addition, we analyzed the shortcomings of past efforts to restore streams to determine how this rule could improve the results. Recent literature advocates a watershed approach to determining the restoration capacity of degraded, or potentially degraded, streams.[95] This includes assessing the various resources that have been identified as determining success or failure of previous restoration projects. These include the condition of upstream habitats and water resources, the potential change in the quality and quantity of water present in the stream or the watershed, the amount and type of vegetation along the banks and buffer zones of streams, the reestablishment potential of appropriate stream channel habitat within the reconstructed stream to recolonize the stream via emigration, the potential for the adjacent streams and upstream habitats to serve as a source for emigration into the reconstructed stream (*i.e.,* the species pool for successful recolonization), and the return of naturally occurring leaf litter and other organic matter to the area.

This final rule improves our stream assessment and restoration requirements and analyzes these resources listed in the above paragraph, beginning at the application process. Upstream habitat and water quantity and quality will be assessed as part of the baseline data required in a permit application. Under the final rule, streambank and buffer zone vegetation will receive greater protection or restoration, including using native species (*i.e.*, naturally occurring leaf litter and other organic matter). The implementation of the final

rule will also increase the amount of reforested habitat, which should improve watershed quality. Baseline data will contain information on streams potentially affected by the proposed operation, including bioassessments of perennial and some intermittent streams that regulatory authorities can use to determine the potential of these streams to provide biological emigrants (plants, animals, fungi, etc.) to reconstructed segments of connected streams. This is not to say that the reclamation of all streams is now possible or will now become a timely and precise exercise; careful consideration will need to be taken to understand the potential for restoration of each stream, and the economic and biological cost associated with these determinations.

This final rule is intended to increase protection or restoration of perennial and intermittent streams and related environmental resources, as well as to ensure that permittees and regulatory authorities make use of advances in science and technology. The final rule provides that restoration of ecological function does not mean that the restored stream must precisely mirror the premining condition. For example, as section 780.28(g)(3)(ii)(A) of our final rule states, a demonstration of ecological function does not require that the reconstructed stream have precisely the same biological condition or biota as the stream segment did before mining. This is consistent with current, scientifically defensible bioassessment protocols used throughout a wide range of regulatory arenas, which allow for a natural range in variation of reference sites to which the assessments are compared.[96] These bioassessment protocols use genus-level identification counts of macroinvertebrates to determine biological condition, where available, and to calculate values derived from measures such as species richness, composition, tolerance, feeding, and habitat measures that determine stream quality. Assessment of the biological condition of these streams is based on these values, not directly on the species that were first sampled. This change allows for some variation from the initial stream compared to the reconstructed stream as long as the reconstructed stream is within a suitable range according to the results of the bioassessment protocol used.

[96] For example: Michael T. Barbour et al. *Rapid bioassessment protocols for use in wadeable streams and rivers. Periphyton, Benthic Macroinvertebrates, and Fish* (2nd edn.). U.S. Environmental Protection Agency, Office of Water, Washington, DC EPA (1999).

We recognize that stream restoration and creation is an emerging area of scientific study and that in some cases the reconstruction of functional stream channels on mined land can be difficult. It may be impossible in some cases to precisely mirror the ecological function that was there before mining. However, as we have just discussed, that is not what our rule requires. We also note, however, that one of the purposes of SMCRA is to ensure that ''surface mining operations are not conducted where reclamation as required by this Act is not feasible'' and that SMCRA therefore requires a permit applicant to demonstrate that ''reclamation as required [by SMCRA] and the State or Federal program can be accomplished under the reclamation plan contained in the permit application[.]'' If analysis of the baseline data and other information in the application indicates restoration of a stream cannot be accomplished through use of conventional mining and reclamation technology, the applicant will need to adjust the proposed operation and reclamation plan to either avoid that stream or take other measures (*e.g.*, the construction of aquitards in the backfill) to ensure restoration of a stream's water quality and quantity and aquatic life after the completion of mining.

R. We Should Apply the 1983 Stream Buffer Zone Rule To Effectively Prohibit Mining Activities Within 100 Feet of Streams

Numerous commenters urged us to promulgate a rule consistent with their interpretation of the 1983 stream buffer zone rule as prohibiting all mining activities in or within 100 feet of a perennial or intermittent stream. They argued that the proposed rule weakens this interpretation of the 1983 rule by ''placing more emphases on mitigation of impacts on streams than on protection and prevention.'' They claim that the lack of science on successful restoration of stream form and function renders the proposed rule less protective than their interpretation of the 1983 rule and allows for the continued destruction of streams. Other commenters maintain that the proposed rule is inconsistent with section 515(b)(24) of SMCRA,[97] which requires, in relevant part, that, to the extent possible, surface coal mining and reclamation operations use the best technology currently available to minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values. According to the commenters, the best technology currently available to protect fish, wildlife, and related environmental values from the adverse impacts of coal mining is a prohibition on mining in or within 100 feet of a perennial or intermittent stream. The commenters recognize that such a prohibition would reduce minable acres, but they contend it is reasonable and practicable, given the decline in the demand for coal resources.

[97] 30 U.S.C. 1265(b)(24).

The preamble to our proposed rule discusses the history of the 1983 stream buffer zone rule in significant detail (*see* 80 FR 44447–44451, Jul. 27, 2015). It includes the following statement: ''Historically, we and some state regulatory authorities applied the 1983 stream buffer zone rule in a manner that allowed the placement of excess spoil fills, refuse piles, slurry impoundments, and sedimentation ponds in intermittent and perennial streams within the permit area.'' The specific language of the 1983 rule allowed the regulatory authority to authorize mining activities within the stream buffer zone upon finding that ''[s]urface mining activities will not cause or contribute to the violation of applicable State or Federal water quality standards, and will not adversely affect the water quantity and quality or other environmental resources of the stream.'' As discussed in the preamble, that provision has been subject to numerous court challenges and was substantially revised by the now-vacated 2008 stream buffer zone rule. The 1983 rule will remain the standard applied by state regulatory authorities until the provisions of our final rule have been adopted by those individual regulatory programs.

While we have not adopted a strict prohibition standard for mining activities within the stream buffer zone, we have in our final rule required that certain conditions be met in order for the regulatory authority to authorize such activities. The final rule allows mining activities in or within 100 feet of an intermittent or perennial stream only if the permit applicant makes certain demonstrations and the regulatory authority makes certain findings. When the applicant proposes to mine through a perennial or an intermittent stream, these required findings include the ability of the permittee to actually restore the form, hydrologic function, and ecological function of the stream as part of the reclamation process. We intend these requirements to ensure that the reconstructed stream will actually have sufficient base flow, water quality, and an aquatic community similar to that which existed prior to mining. As discussed more comprehensively in

final rule § 780.28, in general, mining activities in, through, or adjacent to perennial or intermittent streams must not: cause or contribute to a violation of water quality standards; cause material damage to the hydrologic balance outside the permit area; result in conversion of a stream segment from perennial to intermittent, perennial to ephemeral, or intermittent to ephemeral; and must be designed to minimize adverse impacts on fish, wildlife and related environmental values to the extent possible using the best technology currently available.

The final rule allows burial of intermittent or perennial streams with excess spoil or coal mine waste only if the permit applicant demonstrates and the regulatory authority finds that the loss of resources associated with the burial of a stream will be offset through fish and wildlife enhancement measures commensurate with the magnitude of the adverse impacts from burial of the stream. In addition, the area where proposed enhancement activities are to occur must be incorporated into the permit and bonded for reclamation. In approving a plan that provides for the appropriate level of enhancement, the regulatory authority also must establish standards for determining when reclamation bonds can be released for such areas. This regulatory approach ensures that the desired results are actually achieved, and, if they are not, the regulatory authority will be in a position to use the proceeds from forfeiture of the reclamation bonds to accomplish the desired objective of the approved reclamation plan.

V. Explanation of Organizational Changes and Plain Language Principles

The final rule includes organizational changes for clarity. Those changes serve several purposes, including—

- Breaking up overly long sections and paragraphs into multiple shorter sections and paragraphs for ease of reference and improved comprehension.
- Renumbering sections in the underground mining rules to align their numbering with the corresponding sections in the surface mining rules. This change improves ease of reference and the user-friendliness of our rules.
- Moving permitting requirements from subchapter K (performance standards) to subchapter G to consolidate permitting requirements in subchapter G.
- Restructuring subchapter G to better distinguish between baseline information requirements and reclamation plan requirements.
- Removing redundant, suspended, and obsolete provisions.

In general, we drafted the final rule using plain language principles, consistent with section 501(b) of SMCRA, 30 U.S.C. 1251(a), which provides that regulations must be ''concise and written in plain, understandable language,'' and Executive Order 13563, which provides that our regulatory system ''must ensure that regulations are accessible, consistent, written in plain language, and easy to understand.'' [98] In addition, a June 1, 1998, Executive Memorandum on Plain Language in Government Writing [99] requires the use of plain language in all proposed and final rulemaking documents published after January 1, 1999. The Office of the Federal Register also encourages the use of plain language in writing regulations, as set forth in detail at *www.plainlanguage.gov* and associated links.

Plain language requirements vary from one document to another, depending on the intended audience. Plain language documents have logical organization and easy-to-read design features like short sections, short sentences, tables, and lots of white space. They use common everyday words (except for necessary technical terms), pronouns, the active voice, and a question-and-answer format when feasible.

The final rule text and preamble use the pronouns ''we,'' ''us,'' and ''our'' to refer to OSMRE, and the pronouns ''I,'' ''you,'' and ''your'' to refer to a permit applicant or permittee. We avoid use of the word ''shall'' in the rule text and preamble, except in quoted material. Instead, we use ''must'' to indicate an obligation, ''will'' to identify a future event, and ''may not'' to convey a prohibition.

VI. How do our final regulations differ from our proposed regulations?

Except as otherwise discussed in the preamble to this final rule, we are adopting the regulations as proposed on July 27, 2015, for the reasons set forth in the preamble to the proposed rule. In this portion of the preamble to the final rule, we explain our responses to the comments that we received on the text of the proposed regulations. We also discuss how we revised the proposed regulations in response to those comments and other considerations. However, in general, we do not discuss syntax improvements, plain language changes, and other revisions of a minor nature.

[98] 76 FR 3821 (Jan. 21, 2011).

[99] 63 FR 31883–31886 (Jun. 10, 1998).

This discussion refers to previous, existing, proposed, and final rules and regulations. In general, we use ''previous'' when we refer to regulations that will no longer exist once this final rule is effective. We use ''existing'' to describe regulations that are unaffected by this rulemaking. ''Proposed'' regulations are the regulations set forth in our July 27, 2015, proposed rule. The term ''final'' refers to the regulations that we are adopting today, including existing regulations that are redesignated in this rulemaking.

A. Part 700—General

Section 700.11: What coal exploration and coal mining operations are subject to our rules?

Final Paragraph (d): Termination and Reassertion of Jurisdiction

We proposed to revise § 700.11(d) to add clarity to the regulations, to conform them with proposed revisions to 30 CFR part 800 concerning financial assurances for treatment of long-term discharges, and to add provisions consistent with a court decision that resulted from a previous rulemaking. The rationale for the proposed revisions is set forth at 80 FR 44436, 44466–44467 (Jul. 27, 2015). We received no comments specific to proposed paragraphs (d)(1) and (4), so they are not discussed below.

Final Paragraph (d)(2): Termination of Jurisdiction for Permanent Regulatory Program Sites

One commenter expressed concern that replacement of the term ''increment'' with ''portion'' in the introductory language of paragraph (d)(2) implies that a permittee may apply for bond release on a portion of a permit that has not been separately bonded as an increment. According to the commenter, bonds and jurisdiction apply to the entire permit or to the permit increment for which bond is posted. The commenter stated that our permitting, bonding, and termination of jurisdiction regulations need to use the same terminology so that regulators and the public can easily discern which sections of a mine are active or in reclamation and which sections are eligible for release and eventual termination of jurisdiction.

Our regulations restrict termination of jurisdiction to those areas for which bond has been fully released, but otherwise, we do not agree that our permitting, bonding, and termination of jurisdiction regulations must use the same terminology or that the boundaries of each original permit increment must remain inviolate. Under § 800.13(b),

with the approval of the regulatory authority, we have always allowed clearly defined portions of the permit area requiring extended liability to be separated from the original area and bonded separately. The change in terminology from ''increment'' to ''portion'' in our termination of jurisdiction regulations as part of this final rule is consistent with both the language and approach outlined in § 800.13(b). The public should have no difficulty identifying the portions of the permit area for which bond has been released and jurisdiction has been terminated because § 800.13(b) requires that the boundaries of each portion be clearly defined.

One commenter opposed the proposed revisions to this paragraph because, in the commenter's opinion, they would require that, even in primacy states, bond release and termination of jurisdiction be based upon 30 CFR part 800 rather than the provisions of the applicable regulatory program. That was not the intent of our proposed revisions. To avoid this misinterpretation, final paragraph (d)(2)(ii) provides for termination of jurisdiction whenever the regulatory authority has made a final decision to fully release the performance bond or financial assurance in accordance with the applicable regulatory program. The revised language is similar to the language of paragraph (d)(2)(i) in this respect.

The commenter also alleged that proposed paragraph (d)(2)(ii)(B), which concerns sites with postmining discharges requiring long-term treatment, provided confirmation that we intend to retain jurisdiction in perpetuity. That was not the intent of the proposed provision, but we understand how it could be misinterpreted. We have determined that proposed paragraph (d)(2)(ii)(B) is unnecessary because it essentially duplicates § 800.18(i) and because proposed paragraph (d)(2)(ii)(A) refers to financial assurances as well as performance bonds. Therefore, we are not adopting proposed paragraph (d)(2)(ii)(B). Final paragraph (d)(2)(ii) includes only proposed paragraph (d)(2)(ii)(A) and is renumbered to accommodate the removal of proposed paragraph (d)(2)(ii)(A).

Final Paragraph (d)(3): Reassertion of Jurisdiction

Several commenters opposed this paragraph as unreasonable. Others alleged that it was illegal because it would apply retroactively. Others alleged that it would be inconsistent with SMCRA because it would result in the permittee having an eternal possibility of reassertion of jurisdiction. Several commenters asserted that SMCRA provides no authority for the assertion of jurisdiction over mining operations that have obtained bond release.

These comments reflect a perspective on the principle of reassertion of jurisdiction under SMCRA, which is now a matter of settled law. In 1991, the U.S. Court of Appeals for the District of Columbia Circuit upheld the 1988 termination of jurisdiction rules at 30 CFR 700.11(d), which include a similar provision requiring reassertion of jurisdiction under specified circumstances. *See Nat'l Wildlife Fed'n v Lujan,* 950 F.2d 765, 770 (D.C. Cir. 1991). Specifically, with respect to the reassertion of jurisdiction under SMCRA, the court held that:

> The question is whether the effect of the regulation comports with the statutory scheme. We believe that it does in light of the language of the regulation and the interpretation provided in both the preamble and the Secretary's brief here.
>
> The preamble adopts an objective standard, stating that jurisdiction must be re-asserted whenever ''any reasonable person could determine'' that fraud, collusion or misrepresentation had occurred. [53 FR 44359] (1988). The Secretary's brief not only adopts this standard but also clarifies its scope:
>
> It is important to note in this connection that the filing of an application for bond release is in itself a representation that the operator has satisfied his reclamation obligations since an operator is not entitled to release from the bond unless he has met those obligations. . . . If an operator applies for release but has not fulfilled his obligations, he is guilty of misrepresentation by the very fact of making an application.
>
> Brief for the Secretary at 27 n.11. This is a reasonable way of implementing the Act's condition ''[t]hat no bond shall be fully released until all reclamation requirements of this chapter are fully met.'' 30 U.S.C.[] 1269(c)(3). The condition implies that after reclamation requirements are met, the bond may be ''fully released.'' *Id.* When it turns out that the operator had in fact not fulfilled its reclamation obligations at the time of release, the Secretary's interpretation of ''misrepresentation'' ensures that jurisdiction ''shall'' be reasserted. 30 [CFR] 700.11(d)(2).[100]

Therefore, we made no changes in response to these comments.

However, final paragraph (d)(3) differs somewhat from the proposed rule in that we added paragraphs (d)(3)(i) and (ii) and placed most of proposed paragraph (d)(3) in paragraph (d)(3)(iii). Under the final rule, reassertion of jurisdiction is required only if all three factual situations identified in paragraphs (d)(3)(i) through (iii) exist. Paragraph (d)(3)(i) specifies that the conditions that develop after termination of jurisdiction must constitute a violation of the reclamation requirements of the applicable regulatory program. Paragraph (d)(3)(ii) specifies that the conditions that develop after termination of jurisdiction must be the result of surface coal mining operations for which jurisdiction was terminated. The addition of paragraphs (d)(3)(i) and (ii) is consistent with the preamble to the 1988 rules, which provides that ''it would not be appropriate for the regulatory authority to reassert jurisdiction under the approved program'' if ''the problem was not caused by the permittee's violation of the regulatory program.'' [101]

Several commenters asserted that paragraph (d)(3) would require reassertion of jurisdiction on sites where third-party disturbances created the conditions resulting in the need for reassertion of jurisdiction. The rule does not require reassertion of jurisdiction when the impact is a result of a third-party disturbance. Instead, the rule applies only to impacts resulting from the mining operation. We have added language at paragraph (d)(3)(ii) that clarifies this point.

One commenter opposed the rule because it provides no discretion to the regulatory authority in deciding whether to reassert jurisdiction and does not provide an endpoint for reassertion of jurisdiction. The final rule that we are adopting today, like the proposed rule and the 1988 rule, does not provide discretion to the regulatory authority or an endpoint (equivalent to a statute of limitations) because neither is appropriate if bond release and termination of jurisdiction were based upon fraud, collusion, or misrepresentation of a material fact.

One commenter alleged that adding ''intentional or unintentional'' as an adjective modifying ''material misrepresentation of a material fact'' would increase long-term liability and result in additional litigation by nongovernmental organizations, as would the provision requiring reassertion of jurisdiction for postmining discharges requiring treatment. Neither of the added provisions represents a substantive change in policy or regulation. Therefore, we find no basis for the commenter's allegation. Another commenter opposed adding ''intentional or unintentional'' as a modifier for

[100] *Nat'l Wildlife Fed'n* v. *Lujan,* 950 F.2d 765, 770 (D.C. Cir. 1991).

[101] 53 FR 44356, 44359 (Nov. 2, 1988).

''misrepresentation of a material fact,'' alleging that it was unnecessary. This phrase is helpful to clarify circumstances to which it can be applied and better informs the reader of how the rule is to be interpreted and applied. No changes have been made as in response to these comments.

Several commenters alleged that adoption of the provisions discussed in the preceding paragraph would mean that a permittee would never have the certainty that it has fulfilled all obligations for a permitted site. According to the commenters, this result would infringe upon the permittee's ability to conduct business and could adversely impact the availability of surety bonds. As discussed in the preceding paragraph, neither of the added provisions represents a substantive change in policy or regulation. Therefore, we have no reason to anticipate that the outcome feared by the commenter will develop. Even if it did, that outcome would not justify allowing a termination of jurisdiction based on fraud, collusion, or misrepresentation of a material fact to stand if the mining operation has resulted in a situation that constitutes a violation of SMCRA or the applicable regulatory program.

One commenter opined that the rule would penalize successful operators because operators exiting the coal business would not be subject to this rule. Both the 1988 rule and this final rule apply to the permittee in existence at the time of termination of jurisdiction. If reassertion of jurisdiction is necessary, the regulatory authority must require that the permittee implement corrective measures regardless of whether the permittee has exited the coal business.

Similarly, another commenter expressed concern that the regulatory authority might be held responsible if the permittee could not be located or was no longer a viable business entity. Nothing in the proposed or final rules would support this outcome.

One commenter asserted that the proposed rule is unworkable because it is not clear how it will be enforced. The final rule will be implemented in the same manner as the 1988 rules. The preamble to the 1988 rules provides the following explanation of how the regulatory authority may become aware of a situation involving fraud, collusion, or the intentional or unintentional misrepresentation of a material fact:

> Liability under the approved program for a failure of reclamation, however, may be the subject of a Secretarial or regulatory authority inquiry or a civil suit in the courts pursuant to section 520 of the Act. Such liability would depend upon whether the reclamation failure was caused by a violation by the operator of the regulatory program.[102]

The regulatory authority inquiry to which this paragraph refers may be the result of information supplied by the public, information gleaned from the news media, or observations by regulatory authority personnel in the course of inspecting nearby mine sites.

One commenter asked whether the permittee or the regulatory authority would be required to conduct water sampling on sites for which bond has been fully released. The answer is no. There is no authority under SMCRA to impose such a requirement. In addition, it would defeat one of the purposes of termination of jurisdiction; *i.e.,* to determine when monitoring and inspection under SMCRA are no longer necessary.

One commenter implied that the rule should specify that the need for reassertion of jurisdiction will be determined using only the bond release standards in effect at the time of termination of jurisdiction. We find that no such provision is necessary because the rule already provides that reassertion of jurisdiction is required only if the regulatory authority becomes aware that the bond release was based upon fraud, collusion, or the intentional or unintentional misrepresentation of a material fact. This sentence refers to decisions in which the regulatory authority released bond fully but would not have done so if the information provided by the permittee had not been tainted by the fraud, collusion, or misrepresentation of a material fact at that time. Paragraph (d)(3) neither mentions nor provides a basis for reasserting jurisdiction whenever the regulatory authority adopts revised bond release criteria. Unless otherwise specified in the rulemaking adopting those criteria, the revised criteria would apply only prospectively. In any event, they could not be used to reassert jurisdiction over permits with bond released before the effective date of the revised criteria because the adoption of revised bond release criteria would not be considered fraud, collusion, or misrepresentation of a material fact.

Several commenters opposed paragraph (d)(3) because, in their view, it would require reassertion of jurisdiction for any error or mistake in a document submitted as part of the bond release process, no matter how minor the error or mistake. We disagree. Both the 1988 rule and final paragraph (d)(3) require reassertion of jurisdiction only for fraud, collusion, or misrepresentation of a material fact. Clerical errors and other minor mistakes would not meet this threshold because they would not be considered misrepresentation of a material fact. The adjective ''material'' means the fact must be critical to the decision to release bond. In other words, misrepresentation of a material fact refers to a situation in which, in the absence of the misrepresentation, the regulatory authority would not have released the bond. However, in response to these and other comments, we have added paragraphs (d)(3)(i) and (ii) to specify that reassertion of jurisdiction is required only when conditions exist that would constitute a violation of the reclamation requirements of the applicable regulatory program and those conditions are the result of surface coal mining operations for which jurisdiction was terminated. This limitation is consistent with the preamble to the 1988 rules, which provides that ''it would not be appropriate for the regulatory authority to reassert jurisdiction under the approved program'' if ''the problem was not caused by the permittee's violation of the regulatory program.'' [103]

Two commenters asserted that the rule is unnecessary because some states have a fund to address post-bond release problems. We find that this comment is not germane because, in 1988, we determined that there was a need for a rule providing for both termination of jurisdiction and reassertion of jurisdiction. The proposed rule did not propose to alter that determination nor did we request comment on that possibility.

One commenter suggested that, in lieu of adopting this rule, we establish a fund similar to the Abandoned Mine Reclamation Fund that would cover problems that arise after termination of jurisdiction. We have no authority to establish such a fund or assess the fees that would be required to operate it.

One commenter took issue with the statement in the preamble to the proposed rule at 80 FR 44436, 44467 that the intentional or unintentional misrepresentation of a material fact includes the ''subsequent discovery of a discharge requiring treatment.'' The commenter noted that this language differs slightly from the proposed text of the regulation, which did not use the term ''subsequent''. According to the commenter, reassertion of jurisdiction for a discharge that was undiscoverable at the time of the application for bond release would be inconsistent with

[102] 53 FR 44356, 44358 (Nov. 2, 1988).

[103] *Id.* at 44359.

language and reasoning in *NWF* v. *Lujan.*

We do not agree. Nothing in the court decision says that the discharge must be discoverable at the time of bond release to be considered a misrepresentation of a material fact. Instead, the court decision focuses on section 519(c)(3) of SMCRA,[104] which, in relevant part, provides that ''no bond shall be fully released until all reclamation requirements of the Act are fully met.'' We anticipate that there would be very few cases in which a discharge was not discoverable at the time of bond release. However, should an unanticipated mining-related discharge requiring treatment develop after bond release, the final rule would require reassertion of jurisdiction because the conditions resulting in formation of the discharge were present at the time of bond release. Therefore, development of a discharge requiring treatment after bond release means that the permittee's certification that all reclamation requirements were met ultimately proved to be a misrepresentation of a material fact.

One commenter opposed our proposed addition of the sentence establishing discovery of a discharge requiring treatment of parameters of concern after termination of jurisdiction as a misrepresentation of material fact. According to the commenter, addition of this sentence would be inconsistent with the preamble to the 1988 rule, which states that the discovery of an acid seep subsequent to bond release would not automatically require reassertion of jurisdiction:

> [T]he occurrence of an acid seep subsequent to bond release does not, by itself, establish the cause of the seep, whether reclamation had been completed, whether intervening events occurred, or the circumstances surrounding bond release.[105]

There is a distinct difference between the situation described in the 1988 preamble and the sentence that we proposed to add to our rules and that we are adopting in revised form as part of this final rule. The sentence in our proposed and final rules applies to a discharge for which a treatment need has already been established, while the seep cited in the 1988 preamble is a newly discovered seep for which there has been no determination whether the seep is a discharge that will require treatment or whether it is the result of the surface coal mining operations for which jurisdiction was terminated. As noted in the preamble, these factual questions need to be answered before a determination can be made on reassertion of jurisdiction. Although not expressly stated in the preamble, we would anticipate that reassertion of jurisdiction would be required under the 1988 rule if the questions are answered in the affirmative. Therefore, we find no inconsistency between the 1988 preamble and our final rule. For added clarity, as discussed below, we have revised the pertinent sentence in the proposed rule by adding a proviso that reassertion of jurisdiction is required only if the conditions creating the need for treatment of the discharge are the result of the mining operation.

In final paragraph (d)(3)(iii), we removed the phrase ''if it is demonstrated that'' found in (d)(3) in the proposed rule. The language in the proposed rule is somewhat confusing because it did not address what a demonstration must include or who must make the demonstration. The preamble to the proposed rule describes proposed paragraph (d)(3) as meaning that ''the regulatory authority must reassert jurisdiction if the termination was based upon fraud, collusion, or misrepresentation of a material fact.'' [106] The language of the final paragraph (d)(3)(iii) more effectively conveys this meaning. In addition, it is consistent with the preamble to the 1988 rule, which states that the regulatory authority would have to reassert jurisdiction ''[i]f following final bond release, any reasonable person could determine that the bond release was based upon fraud, collusion, or a misrepresentation of a material fact at the time of release. . . .'' [107]

In paragraph (d)(3)(iii), we also revised the language in proposed paragraph (d)(3) pertaining to the discovery of discharges requiring treatment by deleting the reference to mining-related parameters of concern and by adding a proviso that the conditions creating the need for treatment must be the result of the mining operation. The revised language focuses simply on whether the discharge requires treatment and whether the need for treatment is a result of the mining operation. There is no need for use of the new term ''parameters of concern'' in this context.

Coal Exploration

We received a few comments in response to our statement in the preamble to the proposed rule that we intended to correct an oversight in the 1988 final rule text by applying the termination of jurisdiction provisions to coal exploration and surface coal mining and reclamation operations, not just surface coal mining and reclamation operations. The comments that we did receive generally opposed this extension. One commenter alleged that including coal exploration in the termination of jurisdiction rules would impose an undue burden on operators and regulatory authorities and would discourage future exploration. Another commenter noted that SMCRA provides only minimal requirements for coal exploration and that it neither mandates inspections nor notification of citizens or opportunity for citizens to comment upon or appeal critical regulatory decisions on coal exploration. According to the commenter, the issue of when SMCRA jurisdiction terminates in the context of coal exploration rarely arises. The commenter suggested that it might be appropriate to leave this issue to the discretion of individual regulatory programs.

After evaluating the comments, we have decided not to proceed with our proposal to revise § 700.11(d) to apply to coal exploration. Our regulations at Part 772 do not require a permit or regulatory authority approval for coal exploration unless the exploration involves the removal of more than 250 tons of coal or will take place on lands designated as unsuitable for surface coal mining operations. Therefore, there are no permit boundaries or defined endpoints. In the absence of a permit, there is no bond, so bond release cannot be used as a determinant for termination of jurisdiction. As one commenter suggested, we will rely upon the discretion of each regulatory authority to determine when termination of jurisdiction is appropriate for coal exploration.

B. Part 701—Permanent Regulatory Program

Section 701.5: Definitions

Acid Drainage or Acid Mine Drainage

A commenter asserted that normal rainfall can have a pH of less than 6.0 as a result of the presence of carbon dioxide in the atmosphere. In addition, the commenter claimed that, historically, some of the lowest pH in rainfall occurs over the Appalachian Region, where, in 2012, pH reported in proximity to the intersection of West Virginia, Pennsylvania, and Ohio, was approximately 4.5 based on National Trends Network trend maps between 1986 and 2012. The commenter also opined that assigning a pH level of less than 6.0 was arbitrary and could result in a situation where acid rainfall in some regions could cause an operator to be in violation of the rule. We reject the

[104] 30 U.S.C. 1269(c)(3).

[105] 53 FR 44356, 44361 (Nov. 2, 1988).

[106] 80 FR 44436, 44467 (Jul. 27, 2015).

[107] 53 FR 44356, 44359 (Nov. 2, 1988).

commenter's arguments for a number of reasons. First, we did not arbitrarily select the pH value used in our definition of acid drainage or acid mine drainage, and it is not a new specification in this rule. The definition for acid drainage was codified in our regulation in March, 1979. In the preamble to that regulation, we explained that we selected a pH of less than 6.0 for the definition because the U.S. Environmental Protection Agency set that level as the minimum for its effluent limitations and because pH values outside the range of 6.0–8.5 in natural waters are indicative of stress.[108] Second, our definition contains another condition that must be met before we consider water draining from a mining area with a pH of less than 6.0 to be acid drainage or acid mine drainage: total acidity must exceed total alkalinity. Sometimes a stream under natural conditions can have pH values of less than 6.0, but its acidity will not exceed its alkalinity. In addition, an applicant reports baseline data, including pH level, for both groundwater and surface water as part of the permit application required by final rule § 780.19. This baseline data provides site specific information to the regulatory authority so that rainfall impacts or other existing conditions affecting the pH of water at the site are known prior to mining. Thus, we decline to make changes to the definition based on this comment and are adopting the proposed rule definition without modification.

Adjacent Area

As discussed in the preamble to the proposed rule, we proposed to modify our existing definition of ''adjacent area''.[109] *See* 80 FR 44467–44468 (Jul. 27, 2015). After evaluating the comments we received, we are adopting the definition as proposed, with exceptions.

First, we proposed to revise the basic definition of ''adjacent area'' to encompass the area outside the proposed or actual permit area when there is a reasonable ''possibility'' of adverse impacts from surface coal mining operations or underground mining activities, as determined by the regulatory authority. This portion of the proposed definition was substantively identical to the existing definition except that the existing definition included only the area in which impacts are reasonably ''probable'' rather than the area in which impacts are reasonably possible. Several commenters objected to the proposed change as overly expansive. After evaluating those comments, we have decided not to make the proposed change. We agree that collection of baseline data from the area in which impacts are reasonably probable will provide sufficient basis for evaluation of the permit application and design of the proposed operation. Similarly, we agree with the commenters that limiting monitoring outside the permit area to the area in which impacts are reasonably probable will provide sufficient data to detect and evaluate the impacts of mining and reclamation in a timely manner. Expanding baseline data collection and monitoring to areas in which impacts are reasonably possible, but not reasonably probable, would increase cost with little benefit.

As we explained in the preamble to the proposed rule, the definition of ''adjacent area'' depends on the nature of the resource and the context in which the regulations use the term.[110] In response to a comment from another federal agency, we modified final paragraph (1) to clarify that, in the context of the Endangered Species Act, ''adjacent area'' includes areas outside of the proposed or actual permit area where surface coal mining operations or underground mining activities may affect a species listed or proposed for listing as endangered or threatened, or having designated or proposed critical habitat under the Endangered Species Act. This modification, found at final rule paragraph (1)(ii), is to ensure protection is extended to proposed or listed species under the Endangered Species Act, as well as proposed or designated critical habitats listed under the Endangered Species Act that may be impacted by the proposed mining activity. Any impact to a proposed or listed species or proposed or designated critical habitat, whether adverse or beneficial, should be included within the definition of adjacent area.

We have also made a change to paragraph (b) of the proposed definition of ''adjacent area,'' now final paragraph (2). This paragraph clarifies the previous definition by specifying that the adjacent area includes the area of probable impacts from underground workings. We proposed to revise the definition to state that the adjacent area includes the area overlying the underground workings plus the area encompassed by a reasonable angle of draw from the perimeter of the underground workings. Several commenters questioned the application of the phrase ''reasonable angle of draw'' in paragraph (b) of the proposed rule, and noted that it should instead be based on the hydrologic regime. As pointed out by several commenters, the angle of draw is a term more appropriate for defining the limits of surface subsidence impacts that could occur adjacent to an area of high extraction mining. Commenters pointed out that hydrologic impacts to surface water and groundwater related to dewatering caused by high extraction mining may extend significantly beyond the limits of direct subsidence impacts as measured by the angle of draw. Therefore, these commenters suggested we adopt a term that more accurately addresses the potential limits of dewatering. We acknowledge that dewatering impacts may extend beyond the limits defined by the angle of draw; therefore, we are replacing the term ''angle of draw'' with the term ''angle of dewatering''. As the commenters recognized, the actual zone of hydrologic impacts to surface water and groundwater caused by subsidence induced dewatering will be highly site specific depending of lithology, depth of coal seam, aquifer characteristics and the extent to which groundwater contributes to surface flow of streams. Due to the variability of these impacts and the site specific nature of the data needed to accurately determine the angle of dewatering we are not placing a specific limits on this area; instead, we are defining the term ''angle of dewatering'' to mean, ''the angle created from a vertical line drawn from the outer edge or boundary of high-extraction underground mining workings and an oblique line drawn from terminus of the vertical line at the mine floor to the farthest expected extent that the mining will cause dewatering of groundwater or surface water.'' This definition,[111] or similar variations, has been in use for many years, and is commonly used in defining the potential impact area for stream dewatering and other adverse impacts to surface water and groundwater.

We also received several comments on this proposed definition that we are not adopting. A couple of commenters expressed concern regarding the potential inability to access the ''adjacent area'' because of a lack of landowner consent. We acknowledge that lack of landowner consent may restrict data collection. However, the regulatory authority needs sufficient data about the adjacent area to properly evaluate the permit application and

[111] D.Y. Dixon and H.W. Rauch, *The Impact of Three Longwall Coal Mines on Streamflow in the Appalachian Coalfield,* In the Proceedings of the 9th International Conference on Ground Control in Mining, Morgantown, W.V.,169–182 (1990).

prepare the cumulative hydrologic impact assessment. If one landowner refuses access, one solution could be to expand the initial ''adjacent area'' to include land further away for which access can be obtained. We encourage permit applicants to work with the regulatory authority to determine an appropriately-sized ''adjacent area'' with sufficient sampling points to satisfy all planning and regulatory needs.

Additionally, several commenters opined that the proposed definition of ''adjacent area'' would result in an expanded permit area to secure access and result in increased costs. In some cases the permit area may coincide with the extent of probable impacts; however, that is the exception. Most of the time the permit area is smaller than the ''adjacent area''; therefore, we do not believe this definition will impact the size of the permit area.

One commenter proposed adoption of the adjacent area definition used by the Wyoming Department of Land Quality. That definition provides that ''[a]djacent area means land located outside the permit area upon which air, surface water, groundwater, fish, wildlife, or other resources protected by the Act may reasonably be expected to be adversely impacted by mining or reclamation operations. Unless otherwise specified by the Administrator, this area shall be presumptively limited to lands within (one-half mile) of the proposed permit area.'' This suggestion was not accepted because of the one-size-fits-all minimum application of ''one-half mile.'' We have no indication that this size limitation would ensure the inclusion of all areas where there is the reasonable probability of adverse impacts.

One commenter alleged that the proposed rule inappropriately assumes that adjacent waters are inextricably linked to, what the commenter referred to as, ''the core/jurisdictional waters.'' This commenter explains that adjacent waters may have little, if any, biological connection to ''the core/jurisdictional waters;'' they may contain two distinct, functionally independent communities that may only interact slightly. We disagree that the rule assumes a biological connection between two adjacent water bodies. The rule at section 780.19 requires the operator to collect geologic, hydrologic, and biologic data in the permit area and adjacent area. To the extent that distinct, functionally independent communities exist in adjacent areas, the baseline data collection will document that fact. This information will then assist the operator and the regulatory authority to better understand the potential cumulative impact on the hydrologic and biologic environment in the permit and adjacent areas from the proposed operation.

Paragraph (c) [112] of the proposed definition established what the term ''adjacent area'' means with respect to underground mine pools. Two commenters questioned the need for including paragraph (c) within the definition of adjacent area. One of the two commenters asserted that the requirements in the existing paragraph (c) are adequately addressed and there is no need for revision and the other commenter asserted that the requirements are sufficiently discussed in paragraph (a), now final paragraph (1). Final paragraph (c), now final paragraph (3), is retained because it highlights the importance of ensuring that areas that might be affected physically or hydrologically by the dewatering of a mine pool or areas that may develop mine pools will be included in the adjacent area because of the long-term cost associated with remediation and treatment of discharges that could continue in perpetuity. Inclusion of these areas ensures that sufficient groundwater data will be collected to assist the regulatory authority to determine what, if any, impacts the mine operation will have on areas that mine pools could adversely impact.

In conjunction with the comments listed above, both commenters recommended, that if proposed paragraph (c), now final paragraph (3), is retained, that we replace the words ''might be affected'' in the final rule language. One commenter suggested replacing the words ''might be affected'' with ''may realize physical or hydrological adverse impacts.'' This phrase does not afford the regulatory authority sufficient flexibility in making determinations about areas that may be affected by dewatering. The other commenter suggested we replace ''might be affected'' with ''could reasonably be significantly affected, based on the professional judgment of a professional hydrologist within the regulatory authority.'' This phrase is too vague and subjective, particularly since the commenter does not explain what the term ''reasonably be significantly affected'' means. Therefore, we are retaining the words ''might be affected'' in the final rule text within final paragraph (3) and adopting paragraph (c), as proposed, with the exception of renumbering it as final paragraph (3).

In the preamble to the proposed rule, we invited comment on whether the definition of ''adjacent area'' should prescribe the Hydrologic Unit Code (HUC) 12 watershed or a more appropriate minimum watershed size for the adjacent area for surface water resources. Several commenters supported inclusion of at least the next higher order drainage area for baseline surface water characterization where dewatering of streams by longwall or other high-extraction mining may occur as a mechanism to define adjacent area. In contrast, another commenter strongly opposed an approach of using the next higher order drainage area to determine ''adjacent area''. That commenter stated that using the definition of ''adjacent area'' as the drainage area of the operation and at least the next higher order drainage area could result in several thousand acres and associated stream lengths being added to the stream mapping and monitoring requirements. We agree with this commenter and have not changed the definition for two reasons. Changing the definition to include a specific watershed would create fixed boundaries for the ''adjacent area'' and may not be adequate to capture all areas with probable impacts on resources. In addition, the fixed area may be larger than necessary, which may result in collection of data with little or no value for evaluation of the impacts of mining and reclamation.

Angle of Dewatering

In response to numerous comments, we are adding the definition of ''angle of dewatering'' to the final rule. As we discussed in the definition of ''adjacent area'' we are defining the term ''angle of dewatering'' to mean, ''the angle created from a vertical line drawn from the outer edge or boundary of high-extraction underground mining workings and an oblique line drawn from the terminus of the vertical line at the mine floor to the farthest expected extent that the mining will cause dewatering of groundwater or surface water.'' This definition,[113] or similar variations, has been in use for many years, and is commonly used in defining the potential impact area for stream dewatering and other adverse impacts to surface water and groundwater as a result of underground mining. As the commenters recognized, the actual zone of hydrologic impacts to surface water and groundwater caused by subsidence induced dewatering will be highly site specific; depending of lithology, depth of coal seam, aquifer characteristics, and

[112] 80 FR 44436, 44467–68 (Jul. 27, 2015).

[113] Dixon, supra at 169–182.

the extent to which groundwater contributes to surface flow of streams. Due to the variability of these impacts and the site specific nature of the data needed to accurately determine the angle of dewatering it is not possible to define one all-inclusive ''angle'' of dewatering. Therefore, we are identifying impacts to be expected within the ''angle of dewatering''. The permittee will be responsible for performing the necessary onsite investigation to estimate the ''angle of dewatering'', and to define the potentially affected surface area and groundwater resources.

Approximate Original Contour

We proposed to revise the definition of ''approximate original contour'' to clarify that the term refers to the general land configuration within the permit area as it existed before any mining and not to a configuration immediately prior to the current mining. As the preamble explained,[114] this approach is consistent with section 515(b)(2) of SMCRA,[115] which requires that surface coal mining and reclamation operations be conducted so as to ''restore the land affected to a condition capable of supporting the uses which it was capable of supporting prior to any mining . . . .''. As the preamble also explained,[116] the U.S. District Court for the District of Columbia held that the word ''any'' used in this SMCRA section ''indicates that Congress intended the operator to restore the land to the condition that existed before it was ever mined.'' [117]

Numerous commenters took exception to the addition of the word ''any'' in front of the word ''mining'' in the definition of approximate original contour. One commenter contended that the current definition is clear and should not be changed and that the proposed change would conflict with the statutory definition at section 701(2) of SMCRA.[118] As stated above, and in the preamble to the proposed rule, the changes to this definition only clarify our longstanding policy that ''approximate original contour'' refers to the general land configuration within the permit area as it existed before any mining and not to a configuration immediately prior to the current mining. The use of the term ''original'' within the definition of approximate original contour supports the contention that restoration is based on the land's original or natural configuration, before any mining, and not on its altered contour as impacted by pre-SMCRA mining. The addition of the word ''any'' simply clarifies this point. Clearly, SMCRA did not intend previously mined landscapes with dangerous highwalls and ungraded spoil piles and ridges as an acceptable postmining topography when they are remined under SMCRA. The added language is intended to assure these lands will be reclaimed to eliminate as many of these adverse features and contours to the extent possible. During a nationwide evaluation of approximate original contour in 2010, we learned that certain state regulatory authorities were allowing pre-SMCRA abandoned mine land features, such as dangerous highwalls and ungraded spoil piles and ridges, to form the basis of postmining topography when they are remined under SMCRA. This practice is not allowed under SMCRA and the changes to this definition provide clarification but do not depart from, nor conflict with, the statutory definition, as suggested by the commenter.

Other commenters stated that it was not appropriate to require current mining operations to repair the damage caused by pre-law mine operations. Another commenter asked us to clarify when the new definition might be applied on previously mined areas permitted before or after the effective date of the new rule, as it could have major impact on staff resources to re-review previously approved plans. As mentioned above, the clarification that pre-SMCRA abandoned mine land features may not provide the basis for approximate original contour is not a new requirement. Therefore, all SMCRA permits should already contain reclamation plans that ensure that the land will be reclaimed to the general surface configuration of the land prior to mining, regardless of this rulemaking. Furthermore, as discussed below, it is common practice for remining operations to repair the damage caused by pre-law mine operations. While SMCRA does not limit operations to only remining operations, and does not require operators to reclaim abandoned mine land features outside of a permit disturbance boundary, any previously mined areas that are re-disturbed during the course of remining must be reclaimed according to all of the requirements of SMCRA. No changes were made as a result of these comments.

Other commenters not only objected to the addition of the word ''any'' before the word ''mining'' in the definition of approximate original contour at § 701.5, the commenters questioned our legal authority to make this modification to our regulations. These commenters contend that requiring operations to ensure that the reclaimed area closely resembles the general surface configuration prior to any mining, instead of the general surface configuration just prior to permit issuance, would impose an unachievable standard. However, the requirement that operations ensure that the reclaimed area closely resemble the general surface configuration prior to any mining is not a new requirement. In fact, SMCRA's legislative history shows that, except in limited circumstances, it was commonly understood that previously mined areas could and should be remined and reclaimed to achieve original contours. When testifying about Pennsylvania's surface coal mining law, the basis for SMCRA, Pennsylvania's Governor Milton J. Shapp testified that:

> Since our strip mining laws have been in effect, many coal operators have come back in the same area and are now digging the second seam; and, of course, as they do that, they are restoring the original contour, so that a large percentage of the scars of western Pennsylvania, where we has [sic] this double seam, have already been corrected . . . .

H.R. 2 Hearing Part II at 46. The addition of the word ''any'' is merely a clarification. Furthermore, commenters did not provide an explanation or an example to illustrate why this requirement is unachievable.

In support of their contention that we lack the legal authority to insert the word ''any'' into the definition of approximate original contour, commenters made three main arguments. First, commenters rely on two recent decisions from the Departmental Cases Hearings Division in the Department's Office of Hearings and Appeals, in which an administrative law judge allowed a mining company to model postmining surface configurations on pre-SMCRA abandoned mine land features. However, decisions of administrative law judges are not Departmental precedents and are not binding on the Interior Board of Land Appeals, other administrative law judges, the Office of Surface Mining, or Article III Courts. *West Cow Creek Permittees* v. *BLM,* 142 IBLA 224, 235 n.16 (1998). In fact, administrative decisions of this type are only binding on the parties if the decision is not appealed or if the decision is upheld upon appeal to the Interior Board of Land Appeal. In this case, both decisions have been appealed to the Interior Board of Land Appeals

[118] 30 U.S.C. 1291(2).

and are awaiting a decision. Finally, these decisions did not address our authority under SMCRA but were based on a state regulatory authority's interpretation of its regulations.

Second, commenters stated that it was incorrect for us to reference the postmining land use and backfilling and grading performance standards at Sections 515(b)(2) and (b)(3) of SMCRA in support of its clarification that postmining surface configuration should be based on contours prior to any mining. These commenters instead insist that we should only consider the statutory definition of approximate original contour at section 701(2) [119] in its analysis of whether approximate original contour should be based on the contours prior to any mining or whether it is appropriate to base postmining contours on pre-SMCRA abandoned mine land features present at the proposed mining site at permit issuance. We do not agree. Postmining land use and approximate original contour are closely linked and should not be artificially separated. The requirements at sections 515(b)(2) and (b)(3) [120] that land be backfilled and graded to ''restore the approximate original contour'' with all highwalls, spoil piles, and depressions eliminated and ''restore'' the land to the uses that ''it was capable of supporting *prior to any mining*'' complement each other, ensuring that the standard for reclamation is the condition of the land in its natural, or ''original'' condition, prior to any mining activities. Our longstanding understanding of this connectedness is evidenced in the fact that approximate original contour and postmining land use are listed together at 816.102(a) as requirements for backfilling and grading.

Third, a few commenters questioned whether requiring that approximate original contour be based on the condition of the land prior to any mining would preclude the beneficial practice of remining. We agree that section 102(h) of SMCRA [121] promotes the reclamation of pre-law sites that have been left in an environmentally degraded condition. However, these commenters may not be aware that our regulations already provide an approximate original contour exemption for previously mined areas ''where the volume of all reasonably available spoil is demonstrated in writing to the regulatory authority to be insufficient to completely backfill the reaffected or enlarged highwall.'' 30 CFR 816.106(b). In promulgating our regulation at § 816.106, we determined that no approximate original contour exception was necessary where a previously mined area has sufficient spoil to completely backfill the reaffected area or enlarged highwall. In those instances, there is no reason to treat the site any differently and the operator must follow the general backfilling and grading requirements at § 816.102. If approximate original contour were based on the surface configuration at permit issuance, instead of our longstanding policy of using the surface configuration prior to any mining, the exemption for previously mined areas would not be necessary because an applicant would always be able to base reclamation on any pre-SMCRA abandoned mine land features within a permit, such as orphan spoil piles, pits, and highwalls. This outcome would not result in the reclamation of previously mined areas. While encouraging remining is important, we have already provided an exemption for certain remining activities and do not believe that a greater exemption is necessary to encourage reclamation of pre-SMCRA abandoned coal mine sites through remining. For the preceding reasons, we find the arguments challenging our legal authority to make these changes unsupported and have not revised our definition.

One commenter expressed concern that the proposed changes could be interpreted to alter the core elements of approximate original contour. While this comment did not request a change to the definition, we can confirm that the changes do not alter the requirement that the reclaimed area must closely resemble the general surface configuration prior to any mining, must blend into and complement the drainage pattern of the surrounding terrains, and must contain no highwalls or spoil piles. These requirements apply, regardless of the presence or absence of abandoned mine land features, unless a separate exception applies.

Another commenter expressed concern that returning land to its approximate original contour would limit certain types of postmining land uses. Commenters did not provide any examples of situations where removal of pre-SMCRA abandoned mine land features would preclude any postmining land uses. We do not share the concern expressed by this commenter. In our experience, ensuring the elimination of pre-SMCRA abandoned mine land features only enhances the land's capability to support a wider variety of postmining land uses. Therefore, we do not believe that there is any need to make changes to the definition of approximate original contour based on these comments.

Several commenters stated that approximate original contour conditions before any mining might be difficult to determine because some sites may have been mined before the publication of United States Geological Survey quadrangle maps or were mined centuries ago. We do not believe that the lack of detailed USGS topographic maps or other information for very old pre-SMCRA mined areas should inhibit the ability to comply with this requirement. Considering the remining of previously mined sites requires an approximate restoration and not an exact restoration of contours, before any mining, general knowledge of the natural topography typical of the local area should be sufficient. We made no changes as a result of this comment.

Similarly, one commenter expressed concern that the changes in the language of the definition somehow altered the standard for requiring the restoration of land configuration from ''approximate'' to ''exact'' original contours. It is not our intent to require reclamation to achieve the ''exact'' original contour. The final rule reflects that changes in the surface configuration after mining compared to the land's configuration before any mining are allowed as long as the premining configuration closely resembles the post-mine configuration. Another commenter requested that we explain the meaning of the term ''approximate'' or ''closely resembles'' as it relates to the definition of approximate original contour. Such a discussion is not necessary as the use of these terms within the definition have not been proposed for change and maintain the same meaning as they had before this revised definition.

Some commenters expressed concern that the revised definition implies that soil resources from previously mined areas must be restored, and argued that soil resources at many pre-law sites were not protected and it would be unreasonable to impose such a requirement to fully reclaim them. We disagree that the revised definition of approximate original contour implies, or could reasonably require, permittees and mine operators to recreate soil resources that have been permanently lost. We fully recognize that previously mined areas commonly have significant limitations. At the same time, these limitations should not be used as an excuse to not make improvements, such as elimination of highwalls and spoil piles, and remediation of hazardous and environmentally degraded conditions. We also reject the comment that grading

[119] 30 U.S.C. 1291(a)(2).

[120] 30 U.S.C. 1265(b)(2) and (b)(3).

[121] 30 U.S.C. 1202(f).

of remined spoil piles to meet approximate original contour is technically and economically impossible. Most on-going remining operations currently comply with the requirement of § 816.102 and are already achieving approximate original contour. Where they have insufficient spoil to fully reclaim the highwall, § 816.106 provides an alternative option for reclamation. We therefore decline to make changes in this definition based on these comments.

Others commented that the changes to the approximate original contour definition appear to focus mainly on problems in Appalachia, where remining, thick overburden, and mountaintop removal are prevalent. While we agree that these conditions may be prevalent in Appalachia, sites with previously mined areas exist throughout the coal regions. For example, we noted problems with achieving approximate original contour in Oklahoma in a 2010 National Priority Review of approximate original contour. The clarifications provided in this final rule are applicable nationwide and will ensure that, unless an operation qualifies for an exemption from the requirement to achieve approximate original contour, such as the exemption for previously mined areas with insufficient spoil to completely reclaim the highwall under § 816.106, the reclamation will be based on contours present prior to any mining.

Several commenters advocated expanding the definition of approximate original contour to include the restoration of topography damaged by surface subsidence from underground mining, specifically longwall mining. Other commenters expressed opposition to the inclusion of such language and instead urged that subsidence from underground mining be specifically excluded from the definition of approximate original contour. After consideration of both positions, we have determined that these changes are not necessary because approximate original contour is not applicable to surface subsidence for underground mining. Pursuant to section 701(2) of SMCRA, the requirement to achieve approximate original contour is applicable to ''reclaimed areas, including any terracing or access roads,'' that are subject to ''backfilling and grading of the mined area.'' [122] As the area above underground mine works are not part of the mined area that are backfilled and graded, they are not subject to requirements of approximate original contour. Therefore, expanding the definition of approximate original contour to include the restoration of topography caused by settlement due to underground mine subsidence would be inappropriate. Furthermore, following the same logic, explicitly excluding underground mining subsidence impacts is unnecessary because approximate original contour already does not apply to these impacts.

One commenter alleged that the post mining configuration should only have to resemble the areas surrounding the permits and that the proposed addition of the phrase ''within the permit area'' to the definition of approximate original contour is unlawful and contrary to SMCRA. The commenter based this contention on one portion of the statutory definition of approximate original contour that references ''the surrounding terrain''. We did not adopt this comment as it does not fully reflect the definition as it appears in SMCRA. The full statutory definition reads '' 'approximate original contour' means that surface configuration achieved by backfilling and grading of the mined area so that the reclaimed area . . . closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain. . . .'' [123] The interpretation urged by the commenter fails to give force to the beginning of the definition, which requires that the reclaimed area closely resemble the general surface configuration of the land prior to mining and misses the distinction between resembling the surface configuration and blending into the surrounding area. The purpose of blending the reclaimed mined area with surrounding terrain is to ensure that there is a topographic connection that avoids dangerous and abrupt topographic changes, often due to swell and bulking factors. Complementing the drainage patterns of the surrounding area is also necessary to ensure that surface water flows similarly to how it did before mining and that it does not cause pooling above the mine site or downstream off-site damage. Approximate original contour has never been based on restoring the configuration of the mined area to resemble the surrounding terrain, especially because, in some situations, the topographic differences can be significant. As an example, if the mined area were flat to gently rolling topographically before any mining and the surrounding area were naturally a much steeper topography, it would be inappropriate to reclaim the mined area with the intention of using the surrounding terrain as the approximate original contour model. In this example, to achieve the requirements of approximate original contour, the mined area that was topographically flat to gently rolling before any mining should be reclaimed to a flat to gently rolling topography.

Commenters alleged that our proposed change does not adequately consider the effects of swell or bulking factors on grading and that an unintended consequence of our proposed change might be the construction of more excess spoil fills. While the commenters did not clearly explain why they believed that changes to the approximate original contour definition would have this result, other commenters mistakenly believed that our changes were intended to require the sites to be returned to the ''exact'' premining contours, which would limit the amount of spoil that could be returned to the mined out area and increase the need for excess spoil fills. However, as we explained above, our rule change does not require a return to the exact premining contours and therefore we do not anticipate an increased demand for excess spoil fills. Therefore, we have not made any change to this definition in response to these commenters.

One commenter asserted that the proposed definition deletes the reference in the statutory definition to permanent water impoundments. That is not the case. The final definition, like the proposed definition, provides that the requirement to eliminate all highwalls and spoil piles does not prohibit ''the approval of permanent water impoundments that comply with §§ 816.49, 816.55, and 780.24(b) or §§ 817.49, 817.55, and 784.24(b) of this chapter.'' That provision is substantively identical to the previous definition in § 701.5.

Other commenters stated they were unclear as to whether the rule would allow the creation and approval of the type of impoundments frequently referred to as final-cut impoundments or final-cut lakes. Some of these commenters pointed out that impoundments can serve as an aquatic resource for fish and wildlife habitat and are often requested by landowners. We agree that permanent water impoundments, including properly constructed final-cut lakes, can provide valuable fish and wildlife habitat, recreational facilities, or water resource features. For that reason, our definition of ''land use'' in section 701.5 includes ''developed water resources'' as a specific land use category. As previously noted, the final definition of

[122] 30 U.S.C. 1291(2).

[123] 30 U.S.C. 1291(2).

''approximate original contour'' specifically allows permanent water impoundments that comply with §§ 816.49, 816.55, and 780.24(b) or § 817.49, 817.55, and 784.24(b). Sections 816.49(b) and 817.49(b) of our rules establish criteria for the approval of permanent impoundments, including final-cut impoundments. Paragraphs (b)(7) and (8) of those rules are particularly pertinent to final-cut impoundments. They require a demonstration that approval of the impoundment would not result in retention of spoil piles or ridges that are inconsistent with the definition of approximate original contour or the creation of an excess spoil fill elsewhere within the permit area.

A commenter approved of the clarification in the proposed rule [124] that coal refuse piles should be evaluated separately from the analysis of approximate original contour. As the commenter noted, requirements for the construction of permanent coal mine refuse piles are addressed separately from approximate original contour at 515(b)(11) and 516(b)(4) of SMCRA.[125] The regulations for coal waste are available at §§ 816.81, 816.83, 816.84, 816.87, 817.81, 817.83, 817.84, and 817.87. However, if coal refuse material is placed in the mined out area, the mined out area must still be returned to approximate original contour unless the regulatory authority has approved a coal refuse disposal area in that location. We have not made any changes to the proposed rule in response to this comment.

Backfill

We received no comments on this proposed definition, which we are adopting as proposed.

Bankfull Stage

We proposed to define ''Bankfull'' as the ''water level, or stage, at which a stream, river, or lake is at the top of its banks and any further rise would result in water moving into the flood plain.'' [126] We explained in the preamble to the proposed rule that the proposed definition paralleled the definition in the National Weather Service glossary and clarified the technical and scientific term that we use ''to more precisely fix the boundaries of stream buffer zones and riparian corridors in our proposed stream restoration requirements.'' [127] As explained below, we modified this definition in response to comments.

One commenter argued that the definition of ''bankfull'' should include a storm frequency interval to make the definition applicable to altered watersheds or systems that have experienced downcutting and are disconnected from floodplains. It was never our intent to except altered watersheds or systems that are disconnected from floodplains from this definition. We agree that streams, such as those with steep-sloped areas, that may be entrenched and lack a floodplain should be addressed by the definition because entrenched streams are commonly found within all of the coal regions of the United States. In consideration of this comment, we are adding the term ''stage'' to the term ''bankfull'' and revising the definition to include entrenched streams, rivers and lakes. The term ''bankfull stage'' is appropriate because experts generally use the term ''bankfull stage'' when describing high water events in streams, rivers, or lakes that have active flood plains or are entrenched. For entrenched streams, rivers, or lakes, experts define ''bankfull stage'' as the highest scour line, bench, or top of the point bar.[128]

Another commenter alleged that the proposed definition of ''bankfull'' is inconsistent with the definitions of leading experts such as Rosgen, the United States Geological Survey, and North Carolina University. The commenter argued that multiple other factors in the proposed rule—such as bankfull width, depth, and flood prone area—rely on a properly assessed ''bankfull stage'' and that an incorrect definition would lead to inaccurate data, which in turn would lead to improperly designed projects. In place of the ''bankfull'' definition, the commenter argued for consistent and clear terminology, such as the definition relied on by leading experts, to ensure that appropriate and accurate data are collected. Additionally, the commenter argued that the definition and proposed rule increased confusion because the agency did not provide guidance for the calculation of flood prone areas or include references to methods such as hydrologic modeling, Federal Emergency Management Agency flood maps, a standard distance from top of banks, or Rosgen's 2X maximum bankfull depth method. Calculation of flood prone areas is not germane to the definition of ''bankfull stage''; however we would expect that standard engineering practices would be used to calculate the flood prone areas. Our rule uses ''bankfull stage'' only for the purpose of determining the point from which the stream buffer zone must be measured and describing stream channel profiles. As we discuss above, we have revised the term from ''bankfull'' to ''bankfull stage'' and have more consistently aligned our proposed definition to the definition relied on by leading experts.

One commenter argued that a definition of ''bankfull'' is not necessary because most ephemeral streams do not have banks. We disagree. For the reasons explained later in this preamble, we modified the definition of ''ephemeral stream'' in the final rule to ''include[ ] only those conveyances with channels that display both a bed-and-bank configuration and an ordinary high water mark, and that have streambeds located above the water table year-round.'' Thus, if a conveyance lacks a bank, we would not classify the conveyance as a stream. As such, a definition of ''bankfull stage'' remains necessary to establish the boundaries of the streamside vegetative corridor for all stream types.

In the final rule, ''bankfull stage'' means the water level at which a stream, river, or lake begins to overflow its natural banks and enter the active floodplain or if the stream, river, or lake is entrenched, bankfull stage is identified as the highest scour line, bench, or top of the point bar. This term and definition applies to all streams, rivers, and lakes.

Biological Condition

We proposed to define ''biological condition'' as a measure of the ecological health of a stream or segment of a stream as determined by the type, diversity, distribution, abundance, and physiological state of aquatic organisms and communities found in the stream or stream segment. Some commenters expressed support for the proposed definition. Some commenters questioned how this term differed from another new term that we proposed to define, ''ecological function''. In response, we revised the definition of ''biological condition'' by deleting the statement that biological condition is a measure of the ecological health of a stream or segment of a stream. The final

definition clarifies that biological condition refers to the characteristics of the biota found in surface water bodies, including streams.

Several commenters requested we remove the term ''physiological state'' from the definition of biological condition because it refers to a condition that is difficult to measure and also implies that any change in this condition would prevent mining. We agree with this assessment. ''Physiological state'' may be unmeasurable and our concerns are effectively addressed by the rest of the definition of ''biological condition'' when it refers to the type, diversity, distribution, and abundance of aquatic organisms and communities found in a stream, stream segment, or other waters. Therefore, we have deleted ''physiological state'' in the definition of ''biological condition'' within the final draft rule.

One commenter expressed concern that the definition of ''biological condition'' coupled with the definition of ''parameters of concern'' would impose new and burdensome requirements. We disagree. We define ''parameters of concern'' as those chemical or physical characteristics and properties of surface water or groundwater that could be altered by surface or underground coal mining activities, including discharges associated with those activities, in a manner that would adversely impact the quality of groundwater or surface water, including adverse impacts on aquatic life. The definition of ''parameters of concern'' clarifies that these parameters may be of import because of potential impacts on biological conditions. Neither the definition of ''parameters of concern'' nor ''biological condition'' prescribe additional biological data collection beyond the requirements expressly defined elsewhere in the final rule.

Some commenters noted that gathering data on ''biological condition'' of streams would increase permitting and monitoring costs on the part of the operator and the burden of the regulatory authority to review the resulting data. We agree with the commenters and have made several changes to these requirements in relationship to ephemeral and intermittent streams. These changes can be found within final rule §§ 780.19(c)(6) and 784.19(c)(6), related to underground mining, formerly §§ 780.19(e) and 784.19(e) of the proposed rule. These changes will reduce the cost and time commitment of the operator and regulatory authority. However, as further described in the preamble discussion of final rule §§ 780.19(c)(6) and 784.19(c)(6), below, some of this information is necessary to adequately determine the condition of the stream premining, during mining, and after mining because these inventories and assessments provide crucial information on the function of these streams.

One commenter requested that we exclude ephemeral streams from the definition of ''biological condition'' because assessment of the biological condition of ephemeral streams is impractical and unreasonable due to inconsistent flows. We agree with the commenter's statement about the impracticality of assessing the biological condition of ephemeral streams. However, instead of revising the definition of biological condition, as explained above, we have revised our baseline data requirements. This revision to final § 780.19(c)(6)(vi), includes the elimination of the requirement that permit applications include baseline data on the biological condition of ephemeral streams.

We also revised the definition of ''biological condition'' by adding the phrase ''found in surface water bodies, including streams'' because biological condition assessments are not inherently limited to streams. This change was made to better tailor the definition to the manner in which the term is explained and used in a final report from the U.S. Environmental Protection Agency Practitioners Guide [129] stating, ''[a]s a practical matter, our rules use this term only in connection with perennial and intermittent streams, but there is no scientific basis for limiting the definition itself in that manner.''

Cumulative Impact Area

We are adopting the definition of ''cumulative impact area'' as proposed with the following exceptions. We have altered the nomenclature of this definition by modifying the paragraphs to conform to the rest of the rule. Instead of using (a) through (c) to designate paragraphs, as we did in the proposed rule, we use (1) through (3) to designate paragraphs in the final rule.

One commenter requested that, at a minimum, the eight or six digit hydrologic unit code be used to delineate the cumulative impact area to ensure the inclusion of all impacts from active, closed, and expired mines on downstream water quality. We are not modifying the final rule to accommodate this request. Regulatory authorities are required to assess the probable cumulative impacts of all anticipated mining in a given area, regardless of a specified hydrologic unit code (HUC), to assure the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area. Therefore, the region that needs to be included in an area may be larger or smaller than a HUC 6 or 8.

Numerous commenters asked us to consider deleting the requirement within the proposed rule of using a HUC–12 watershed size in delineating the ''cumulative impact area''. The commenters stressed that a HUC–12 watershed may be appropriate in some cases but would result in areas that are too broad or too restrictive in others. The commenters requested the proposed rule be revised to allow the regulatory authority flexibility in requiring a more suitably-sized watershed approach based on the permit area under consideration, existing and anticipated coal mining operations, and site and regional characteristics. We agree with the commenters and have revised the proposed definition to allow the use of a HUC–12 or a different-sized watershed deemed appropriate for purposes of preparation of the cumulative hydrologic impact assessment. This change will allow the regulatory authority to use a watershed size that is more appropriate to the area under evaluation.

In addition to this change we altered the definition of ''cumulative impact area'' within the final rule by renumbering the paragraphs and removing proposed paragraph (c)(6). Proposed paragraph (c)(6) specified that anticipated underground mining includes all areas of contiguous coal reserves adjacent to an existing or proposed underground mine that are owned or controlled by the applicant. This proposal was included because, barring significant changes in economic or regulatory conditions, the mine would reasonably be expected to extend into those reserves in the future. We received numerous comments requesting that we not adopt the proposed requirement that the cumulative impact area include all areas of contiguous coal reserves adjacent to an existing or proposed underground mine when the applicant owns or controls those reserves. Commenters stated that the requirement was too broad and unworkable and could result in an increased burden on industry and the regulatory authority. Commenters also stated that the information related

[129] U.S. Envtl. Prot. Agency, *A Practitioner's Guide to the Biological Condition Gradient: A Framework to Describe Incremental Change in Aquatic Ecosystems.* EPA–842–R–16–001. U.S. Envtl. Prot. Agency, Washington, DC (2016).

to coal reserves may be proprietary, and that the cumulative impact area should be defined based on potential impacts from approved operations and operations that are in some stage of the permit application process instead of resource control or ownership. For the reasons presented by the commenters, we agree that the inclusion of all continuous coal reserves adjacent to an existing or proposed underground mine in proposed paragraph (c)(6) is too speculative. Therefore, we have removed it from the final definition.

When neither baseline data nor analyses have been supplied by the applicant or permittee, a commenter claimed that it may not be technically feasible to assess the impacts of anticipated mining upon water resources during mining and reclamation and after final bond release. We agree that evaluation of potential impacts from areas of existing or anticipated mining on surface water and groundwater resources are not technically feasible in the absence of baseline or other data. This rule sets forth requirements for the collection and analysis of premining data about the site of the proposed mining operation and adjacent areas adequate to establish a comprehensive baseline that will facilitate evaluation of the effects of the proposed operation. If sufficient data is not available on areas of anticipated mining to allow for a meaningful analysis of potential impacts, the regulatory authority cannot approve the permit application in accordance with § 780.21 of this rule. In addition, the commenter continued that we should provide guidance on incorporating anticipated mining areas into the cumulative hydrologic impact assessment. We disagree. The concept of including anticipated mining as part of the cumulative impact area is not new and has been an integral component of the cumulative impact area since the early 1980s. Sections 507(b)(11) and 510(b)(3) of SMCRA [130] require that the regulatory authority prepare an assessment of the probable cumulative impact of all anticipated mining in the area upon the hydrology of the general area. In 1983, we adopted a definition of cumulative impact area to identify both the extent of the area that must be included in this evaluation and the scope of the term ''anticipated mining.'' Paragraphs (c)(1) through (3) of the proposed definition, now paragraphs (3)(i) through (iii) are substantively identical to paragraphs (a) through (c) of the previous definition. In addition, over the years, we have published several technical reference documents for the development of cumulative hydrologic impact assessments, including information on anticipated mining activities that provides guidance as requested by the commenter. Those documents are available on our home page on the internet (*www.osmre.gov*) or upon request.

Several commenters stated there was no justification for a requirement to analyze the anticipated impacts after final bond release and that any requirement to do so was beyond SMCRA authority. In response, we have decided that it is neither feasible nor practical to attempt to predict anticipated cumulative impacts following final bond release. The final definition that we are adopting does not require this analysis of potential impacts after final bond release.

One commenter disagreed with the inclusion of any proposed surface or underground coal mining operation for which a request for an authorization, certification, or permit has been submitted under the Clean Water Act as anticipated mining. We disagree with this comment. Inclusion of proposed operations in situations where the Clean Water Act authorization process has begun will result in preparation of a more comprehensive analysis by the permit applicant or permittee and the regulatory authority. Those operations are within the realm of anticipated mining because the permitting process for those mines has begun, albeit under the Clean Water Act rather than SMCRA. Nothing in section 507(b)(11) of SMCRA [131] limits ''anticipated mining'' to operations that have begun the SMCRA permitting process. Further, § 780.27(a), about permitting requirements that apply to proposed activities in or through ephemeral streams and § 780.28(a), about additional permitting requirements that apply to proposed activities in, through, or adjacent to a perennial or intermittent stream specifies that if the proposed permit area includes waters subject to the Clean Water Act, the regulatory authority must condition the permit to prohibit initiation of surface mining activities in or affecting those waters before the permittee obtains all necessary authorizations, certifications, and permits under the Clean Water Act.

Ecological Function

We proposed to define the ''ecological function'' of a stream as the role that the stream plays in dissipating energy and transporting water, sediment, organic matter, and nutrients downstream. The proposed definition included the ability of the stream ecosystem to retain and transform inorganic materials needed for biological processes into organic forms and to oxidize organic molecules back into elemental forms through respiration and decomposition. It further stated that the term includes the role that the stream plays in the life cycles of plants, insects, amphibians, reptiles, fish, birds, and mammals that either reside in the stream or depend upon it for habitat, reproduction, food, water, or protection from predators. Finally, the proposed definition stated that the biological condition of a stream can be used as one measure to infer the status of the stream's ecological function.

Various commenters found the definition to be overly broad, too vague, unclear, or lacking the specificity needed to establish standards for the restoration of ecological function. Other commenters opposed the definition based on the opinion that the definition relied too heavily on research in Appalachia and upon the U.S. Army Corps of Engineers guidance [132] referenced in the preamble to the proposed rule. Other commenters expressed concern that we are mandating specific metrics that may not be applicable to all regions of the country or that may be unreasonably expensive. In response to these comments, and others which voiced concern that compliance with this definition is critical to the determination of bond release, we conducted further analyses to determine how to make this definition more applicable to scientifically defensible standards and to be more clearly measurable, and thus capable of implementation in the context of bond release. Therefore, and for the reasons explained further below, we modified the final rule to define ecological function as ''the species richness, diversity, and extent of plants, insects, amphibians, reptiles, fish, birds, mammals and other organisms for which the stream provides habitat, food, water, or shelter. The biological condition of a stream is one way to describe its ecological function.'' This definition includes some characteristics of what is often referred to in scientific literature as ecological structure, which often encompasses the abundance and composition of species as a result of

[130] 30 U.S.C. 1257(b)(11) and 1261(b)(3).

[131] 30 U.S.C. 1257(b)(11).

[132] U.S. Army Corps of Engineers, *Operational Draft Regional Guidebook for the Functional Assessment of High-Gradient Ephemeral and Intermittent Headwater Streams in Western West Virginia and Eastern Kentucky*. ERDC/ELTR–10–11, July 2010, U.S. Army Engineer Research and Development Center, Vicksburg, MS., (Jul. 2010).

physical, chemical, and biological forces.[133] Our definition of ecological function includes this abundance and composition of species when it refers to the species richness, diversity, and extent of plants, insects, amphibians, reptiles, fish, birds, mammals and other organisms. We are including this characteristic of ecological structure in the final rule definition of ecological function because this rule at § 800.42(d)(2) requires restoration of ecological function in connection with Phase III bond release, and it is therefore necessary to have a definition that indicates the ways ecological function can be measured. The traditional bioassessment tools we require to assess and monitor perennial streams (and intermittent streams where scientifically defensible protocols exist) are appropriate to measure ecological function according to our definition. The last sentence of the definition of ''ecological function'' specifies that the biological condition of a stream is one way of describing its ecological function. Therefore, unless the regulatory authority determines additional criteria are necessary or appropriate, establishment of a standard based on biological condition (and scientifically defensible bioassessment protocols as described within the final rule within § 780.19(c)(6)) would suffice.

We designed the final definition to better support the various ways in which regulatory authorities throughout the United States will actually have to assess and monitor ecological function in the context of sampling organisms. Some commenters objected to including factors within the definition of ''ecological function'' that have no direct role in demonstrating the success of reclamation under SMCRA. For example, the commenters noted that the ecological role that a stream plays in transporting nutrients downstream, known as nutrient cycling, is included within the definition, but is not a criterion used in determining eligibility for bond release. Another commenter noted that there is no agreement on objective standards for many facets of the definition. In response to these comments, the final definition eliminates references to physical and chemical processes such as dissipating energy; transporting water, sediment, organic matter, and nutrients downstream; transforming inorganic materials needed for biological processes into organic forms; and oxidizing organic molecules back into elemental forms. We also removed the specific reference to salamanders because that reference could be considered regionally biased and is unnecessary, as salamanders are not part of the ecology of all streams.

Because we are requiring the reestablishment of ecological function as a condition for bond release, we have an obligation to both the permittees and the SMCRA regulatory authorities to provide enough information within the definition to allow for the creation of clear standards for purposes of bond release. This necessitates a definition that gives clear guidance to regulatory authorities on the meaning of ecological function but is still broad enough to allow them to assess and monitor organisms that these regulations do not specifically address. The final rule provides the regulatory authority with a practical definition of ''ecological function'' that will enable them to create specific standards for assessing ecological function in their various regions. The final definition does not mandate specific metrics, although it does specify that the biological condition of a stream is one way to describe its ecological function. Under this definition, regulatory authorities are free to develop specific standards related to various types of organisms or populations including the use of indirect ways to measure those organisms or populations, such as through leaf litter breakdown.[134] It also recognizes that the presence of various types of populations, such as periphyton, fish, soil microbes, and mammals, could provide support to a finding that ecological function has been restored. The final definition also is designed to allow for future innovations in measuring ecological function as they become available.

Some commenters opposed the proposed definition because of a fear that we (or a third party, pursuant to the citizen suit provisions of section 520 of SMCRA) [135] could initiate action against a state regulatory authority for failure to analyze each facet of the definition during review of the permit application. While the final rule cannot prevent citizen suit litigation, the final rule, when followed, provides sufficient flexibility to defend against this type of challenge.

Finally, some commenters found our proposed definition to be overreaching and academic in nature and noted that methodology for measuring ecological function is still a matter of scientific debate. While we agree that science will continue to evolve on this topic, we disagree that this continued evolution precludes us from defining ecological function as we have done in the final rule. The final definition of ''ecological function'' merely clarifies our intended meaning of the term. It is not a metric in and of itself and standards for implementing this definition can be adapted, updated, and adjusted as the methodology evolves.

Ephemeral Stream

As discussed in the preamble to the proposed rule, we proposed to redefine ''ephemeral stream'' in a manner that is substantively identical to the manner in which the U.S. Army Corps of Engineers defines that term in Part F of the 2012 reissuance of the nationwide permits under section 404 of the Clean Water Act. *See* 80 FR 44436, 44470 (Jul. 27, 2015). Our existing definition classifies streamflow in response to the melting of snow and ice as an ephemeral stream, whereas the Corps' definition is silent on this point. The preamble to the Corps' definition states that the definition appropriately focuses on the duration of flow and provides that melting snow should not be considered a precipitation event because the development of snowpack over the winter season is not a particular event. *See* 77 FR 10184, 10262 (Feb. 21, 2012). An industry commenter supported the Corps' treatment of snowmelt as appropriate because in areas where there is an ephemeral channel, snow depth can cause extended runoff which should not be considered in the determination of the channel classification. In a similar vein, a regulatory authority noted that small rills created by rainfall events and snowmelt in the arid and semi-arid landscape should not be considered ephemeral streams; other regulatory authority commenters, however, recognized snowmelt is an important source of streamflow in ephemeral streams and asserted that it should be considered as part of the definition. After reviewing the comments, we are revising the definition of ephemeral streams to include those conveyances receiving runoff from snowmelt events and that have both a bed-and-bank configuration and an ordinary high water mark. Including snowmelt events, in addition to rainfall events, as a primary source of flow is appropriate, as long as groundwater is not a source of surface water flow. The additional requirements that only those conveyances with channels that display

[134] 30 U.S.C. 1270.

[135] 30 U.S.C. 1270.

both a bed-and-bank configuration and an ordinary high water mark will ensure that rills created by rainfall or snowmelt events would not be classified as an ephemeral stream.

One commenter strongly advised us to make no reference to the term ''swale'' as a stream. The commenter stated that in the western United States the term ''swale'' is commonly used to describe topographic features that are often not waters of the United States under the Clean Water Act because these features lack an ordinary high water mark. The term ''swale'' was not used in the proposed rule or the final rule. To minimize any confusion concerning what is or what is not a stream, we have revised the stream definitions for ''ephemeral stream'', intermittent stream'', and ''perennial stream'' to include a requirement that any topographic feature to be considered a stream must have both a bed-and-bank and an ordinary high water mark, in addition to the other requirements outlined in the specific definitions.

Excess Spoil

One commenter stated that the proposed definition of ''excess spoil'' was awkwardly worded. The commenter explained that the concept of ''excess spoil'' is complicated by the goal of minimizing ''excess spoil'' to reduce burial of streams. To address this and related comments expressing confusion regarding the term, we added to the definition of ''excess spoil'' a list of the types of spoil that do not constitute ''excess spoil''. This list excludes from the definition of ''excess spoil'': Spoil required to restore the approximate original contour of the mined-out area; spoil used to blend the final configuration of the mined-out area with the surrounding terrain in non-steep slope areas; spoil placed outside the mined-out area as part of a remining operation; spoil placed within the mined-out area in accordance with the thick overburden provisions of § 816.105(b)(1) of the final rule, except spoil material placed on the mined-out area as part of an excess spoil fill with a toe located outside the mined-out area; and any temporary stockpile of material that will be subsequently transported to another location.

Other commenters stated that the proposed definition might be misinterpreted to apply to topsoil or to temporary spoil piles. We agree and have revised the final rule to specify that ''excess spoil'' means spoil material *permanently* disposed of within the permit area. We further specified that temporary stockpiles of material that will be subsequently transported to another location are not included in the definition. The addition of the word ''permanent'' and the list explaining what is not considered ''excess spoil'' should preclude any misinterpretation that excess soil includes spoil or topsoil piles that are recognized as temporary in nature.

Another commenter noted that the proposed definition of ''excess spoil'' could, perhaps, inadvertently, designate material placed in an existing bench to be classified as ''excess spoil''. This commenter explained that spoil material placed on an existing bench above the approximate original contour would be subject to the more stringent proposed requirements for excess spoil disposal. According to the commenter, this would result in an increased burden to both industry and regulatory authorities while not providing additional stability or stream protection. Interpretation of the commenter's term ''existing bench'' could be viewed in two ways. One interpretation is that the ''existing bench'' is actually a previously mined bench. The other interpretation is that the ''existing bench'' is new construction as part of an active operation. If the first interpretation of the commenter's term is accepted—considering a bench on a previously mined area—we note that spoil placement on previously mined benches is preferable to construction of ''excess spoil'' on unmined land because it is more environmentally sound. In response, we revised the definition to exclude spoil material placed outside the mined-out area as part of a remining operation as explained within § 816.106 or § 817.106 of the final rule. Next, we considered the second potential interpretation—that the commenter's term ''existing bench'' pertains to construction as part of a current operation. The commenter is concerned that the classification of ''excess spoil'' includes spoil material placed in a manner that the lower portion of that spoil extends onto an open bench, most likely a bench developed along a lower coal seam mined, and the spoil material is placed at an elevation that is above the original elevation line. For the purposes of responding to this comment, we consider the commenter's reference to ''original elevation line'' to mean the approved approximate original contour surface. In the scenario that the commenter describes, the spoil material is placed on a newly created bench that is within the mined area and is therefore not considered ''excess spoil''. To further address the commenter's concern, we direct the commenter to § 780.35(b)(3) of the final rule that discusses the minimization and disposal of excess spoil. This section of the rule allows the placement of what would otherwise be ''excess spoil'' on the mined-out area to heights in excess of the approved approximate original contour surface. The purpose of § 780.35(b)(3) is to avoid or minimize construction of excess spoil fills on undisturbed lands. When considering the definition of excess spoil and the provisions of § 780.35(b)(3), spoil placed above the approved approximate original contour as described in the commenter's scenario is not considered ''excess spoil.''

One commenter stated that the proposed changes to the ''excess spoil'' definition are primarily focused on mountaintop removal and thick overburden mines and have little relevance outside Appalachia, and that they should therefore be limited to Appalachia. We acknowledge that ''excess spoil'' is primarily generated in central and southern Appalachia where both thick overburden and steep slopes are prevalent. However, mines in other regions also generate ''excess spoil''. For example, Alaska has a permit that generates excess spoil. Further, by definition, excess spoil is only applicable to those areas where it is generated, so, by default, if an area does not generate excess spoil then the rule provisions that pertain to excess spoil would not apply on that location.

One commenter indicated that the proposed preamble discussion implies that box cut spoil placed outside of the pit is not excess spoil for non-steep slope mining. We agree, noting that, by definition, the creation of box cut spoil on non-steep sloped areas does not automatically qualify this material as excess spoil, as this spoil is available for placement within the mined area and outside of the mined area when used to blend with the surrounding terrain.

Fill

We received no comments on this proposed definition, which we are adopting as proposed.

Form

Within §§ 780.28, 784.28, 800.42, 816.57, and 817.57 of the proposed rule, relating to activities in through, or adjacent to perennial and intermittent streams, we made reference to the restoration of the ''form'' of a stream. Specifically, the proposed rule required applicants desiring to mine through or divert a perennial or intermittent stream to ''demonstrate that [they could] restore the form . . . of the affected stream.

. . .'' [136] Additionally, in §§ 816.57 and 817.57 [137] we proposed that ''form'' of a stream segment must be restored. We explained in the preamble to the proposed rule that:

> a restored stream channel or a stream-channel diversion need not exactly replicate the channel morphology that existed before mining . . . it must have a channel morphology comparable to the premining form of the affected stream segment in terms of baseline stream pattern, profile, and dimensions, including channel slope, sinuosity, water depth, bankfull depth, bankfull width, width of the flood-prone area, and dominant in-stream substrate particle size.[138]

Despite this explanation in the preamble, several commenters questioned the meaning of the term ''form'' and how this term related to the term ''function'' that was also discussed in the proposed rule. Similarly, many commenters questioned the application of and relationship to the term ''form'' to the bond release provisions of § 800.42(b)(1) of the proposed rule and references to bond release within proposed §§ 780.28, 784.28, 800.42, 816.57, and 817.57. After consideration of these comments, we agree that the use of the term ''form'' and the similar term ''hydrological form'' within the proposed rule could be confusing. Therefore, we have eliminated any reference to ''hydrological form'' and included in § 701.5 a definition of the term ''form''. The term ''form'' as used in the proposed rule in § 816.57(b)(2)(i) and in the final rule definition was drafted based on the criteria established in ''Applied River Morphology'' by Rosgen.[139]

The addition of the definition of ''form'' will also provide clarity regarding the requirements for achieving Phase I bond release when mining through or permanently diverting a perennial or intermittent stream as discussed and explained more thoroughly throughout the applicable sections of the final rule preamble discussion.

The term ''form,'' as used in §§ 780.28(e)(1)(viii), 784.28(e)(1)(viii), 800.42(b)(1), 816.57(e), and 817.57(e), means the physical characteristics, pattern, profile, and dimensions of a stream channel. It is necessary to define the ''form'' of a stream because it greatly influences a stream's ''hydrologic function,'' which is also a term we are incorporating into the final rule for clarity. As contained in the final rule, the term ''form'' includes, but is not limited to, the flood-prone area to bankfull width ratio (entrenchment), channel width to depth ratio, channel slope, sinuosity, bankfull depth, dominant in-stream substrate particle size, and capacity for riffles and pools.

Specific to the definition of ''form,'' entrenchment defines the extent of flood prone area relative to channel size and, therefore, the areas in which hydrophilic and hydrophytic plant species are most adaptable. Channel width-to-depth ratio, in conjunction with channel slope, determines the discharge that, over time, transports most sediment downstream. Sinuosity directly influences channel slope. The dominant in-stream substrate particle size is dependent on discharge at bankfull stage and channel slope, and determines the nature of in-stream habitat and the types of biota that will dominate given appropriate water quality and nutrient availability. Additionally, in a natural or properly restored stream these components of ''form'' reach equilibrium such that they all remain relatively constant, even as the dynamic stream exists in a constant state of flux, with meanders migrating downstream, and the stream channel at any given location moving back and forth across the flood prone area. All of these features are integral to restoring ''form'' and ultimately to achieving successful stream restoration. Establishment of ''form'' is a prerequisite to achieving ''hydrologic function.''

Fugitive Dust

We proposed to remove this definition because it defines a term that we no longer use in our regulations. *See* 80 FR 44436, 44471 (Jul. 27, 2015).[140] We received no comments on the deletion of this term, so we are adopting our proposed action of deletion.

Groundwater

We proposed to revise the definition of groundwater to provide clarity and to replace the words ''ground water'' with the single word ''groundwater'' throughout our regulations for internal consistency. Specifically, our proposed definition was adapted from a publication entitled ''The ABCs of Aquifers'' [141] and Freeze and Cherry's ''Groundwater.'' [142] Under the proposed rule, we defined ''groundwater'' to mean subsurface water located in those portions of soils and geologic formations that are fully saturated with water; that is, those zones where all the pore spaces and rock fractures are completely filled with water. In conformity with plain language principles it is important to avoid redundancy. Therefore, in the final rule we have removed the phrase, ''*i.e.,* those zones where all the pore spaces and rack fractures are completely filled with rock'' as this is inherent in the meaning of the phrase ''saturated with water'', rendering the former phrase redundant.

We received comments from a regulatory authority that suggested that we define groundwater as ''any water that is beneath the ground surface.'' We do not concur. It would not be appropriate to define groundwater in those terms because the definition proposed by the commenter is not used by the scientific community. Another commenter said that the term ''fully'' was not necessary in our definition. Although we agree with the commenter that the term ''fully'' may be superfluous in some instances, we retained the definition based upon our review of scientific literature including Freeze and Cherry.[143]

Another commenter concerned about restoring perched aquifers within the permit area opined that perched aquifers are often difficult to differentiate from temporary saturation of the soil horizon as a result of precipitation events. We disagree. A perched aquifer has distinct properties, such as saturated permeable sediments overlying discontinuous impermeable sediments that are not found in soil horizons. The geologic information the permittee is required to collect as part of the permit application process under final rule § 780.19(f) will provide the information needed to differentiate a perched aquifer from a temporarily saturated soil horizon within the permit area.

Another commenter asserted that the proposed definition for ''groundwater'' included water in regional and perched aquifers. The same commenter was also concerned with the inclusion of ''perched aquifers'' in the definition of groundwater. The commenter was concerned that mining through a perched aquifer within the permit area would no longer be allowed because it would be considered impacts to groundwater, constituting material

[143] *Id.* at 2.

damage of the hydrologic balance outside the permit area. We disagree with both of the commenter's assertions. First, under our previous definition of groundwater,[144] perched aquifers, local aquifers, and regional aquifers are all included in the definition. Therefore, there is no change in this respect to the definition of groundwater in the final rule; we merely listed specific aquifer types for the sake of clarity. In the proposed rule, we inadvertently excluded ''local aquifer'' from the list of types of aquifers. This was an oversight; therefore, we added ''local aquifer'' to the final rule definition of ''groundwater''. Secondly, the commenter's assertion that mining through a perched aquifer within the permit area would no longer be permissible is not accurate. As stated in the preamble,[145] perched aquifers could be mined through within the permit area and need not be restored unless restoration is needed to prevent material to the hydrologic balance outside the permit area.

Another commenter suggested that we mention in the definition of groundwater that the terms ''aquifer'' and ''water table'' are sometimes used to mean the same thing in our regulations. The terms do not mean the same thing and we have used the terms consistently and correctly throughout the preamble and final rule. Aquifer means a zone, stratum, or group of strata that can store and transmit water in specific quantities for a specific use.[146] Water table is the level (elevation) in the saturated zone at which the hydraulic pressure is equal to atmospheric pressure.[147] We use both of these terms, consistently in the final rule and not as implied by the commenter. The same commenter also asserted that we should include in the final definition the fact that groundwater water levels may vary seasonally. Although we agree with the commenter that groundwater levels may vary seasonally, it is not necessary to include this fact in the definition of groundwater. However, a requirement exists in final rule § 780.19(b) that the permit application must include information sufficient to document seasonal variations in the quality, quantity, and usage of groundwater, including all surface discharges within the proposed permit area and adjacent area.

We received another comment stating that the definition of groundwater did not need to be changed from the existing regulations. However, as stated in the preamble to the proposed rule,[148] these revisions are necessary to provide clarity and consistency.

Highwall Remnant

We received no comments on our proposed removal of this definition, which we are removing as proposed.

Hydrologic Balance

We proposed to revise our definition of ''hydrologic balance'' in § 701.5 to include more emphasis on water quality by specifying that the definition encompasses ''interactions that result in changes in the chemical composition or physical characteristics of groundwater and surface water, which may in turn affect the biological condition of streams and other water bodies.'' Several commenters either questioned the rationale for inclusion of the latter phrase or erroneously interpreted it as incorporating biological condition into the definition. The commenters opposed the proposed addition, asserting that the definition of ''hydrologic balance'' should focus on water quality and quantity and not the aquatic community.

We never intended for biological condition to be part of the definition of ''hydrologic balance'' which we agree should be limited to water quality, quantity, movement, and storage. Therefore, the definition that we are adopting as part of this final rule does not include the phrase ''which may in turn affect the biological condition of streams and other water bodies.'' However, that phrase is an accurate statement in that interactions that result in changes in the chemical composition or physical characteristics of groundwater and surface water may indeed affect the biological condition of streams and other water bodies, which is one of the reasons that the impact of mining and reclamation on the hydrologic balance is a primary focus of SMCRA and the permitting process.

One commenter stated that the definition should be limited to the flow, quantity, and physical form of water. According to the commenter, the definition should not include any mention of water quality. We disagree. SMCRA quite clearly includes water quality as a component of the hydrologic balance. For example, section 515(b)(10) [149] requires that surface coal mining operations minimize disturbances to the prevailing hydrologic balance at the mine site and in associated offsite areas by various methods, including avoiding acid or other toxic mine drainage and preventing, to the extent possible using the best technology currently available, additional contributions of suspended solids to streamflow. Both of these methods address water quality issues.

Hydrologic Function

Within §§ 780.28, 784.28, 800.42, 816.57, and 817.57 of the proposed rule, relating to activities in through, or adjacent to perennial or intermittent streams, we made reference to the restoration of the ''form'' of a stream. Specifically, the proposed rule required applicants desiring to mine through or divert a perennial or intermittent stream to ''demonstrate that [they could] restore the form . . . of the affected stream . . . .'' [150] Additionally, in §§ 816.57 and 817.57,[151] we proposed that ''form'' of a stream segment must be restored. We explained in the preamble to the proposed rule that:

> a restored stream channel or a stream-channel diversion need not exactly replicate the channel morphology that existed before mining. . . it must have a channel morphology comparable to the premining form of the affected stream segment in terms of baseline stream pattern, profile, and dimensions, including channel slope, sinuosity, water depth, bankfull depth, bankfull width of the flood-prone area, and dominant in-stream substrate.[152]

Despite this explanation in the preamble, several commenters questioned the meaning of the term ''form'' and how this term related to the term ''function'' that was also discussed in the proposed rule. Similarly, many commenters questioned the application of and relationship to the term ''form'' to the bond release provisions of § 800.42(b)(1) of the proposed rule and references to bond release within §§ 780.28, 784.28, 800.42, 816.57, and 817.57. After consideration of these comments, we agree that the use of the term ''form'' and the similar term ''hydrological form'' within the proposed rule could be confusing. Therefore, we have eliminated any reference to ''hydrological form'' and have included a definition of the term ''hydrologic function'' in § 701.5. The term ''hydrologic function,'' is a term we are incorporating into the final rule for clarity.

The addition of the definition of ''hydrologic function'' will also provide clarity regarding the requirements for achieving Phase II bond release when mining through or permanently

[152] *Id.*

diverting a segment of a perennial or intermittent stream as discussed and explained more thoroughly throughout the applicable sections of the final rule preamble discussion.

The term ''hydrologic function'', as used in §§ 780.28(e), 784.28(e), 800.42(b)(2), 816.57(f), and 817.57(f), refers to the role that streams play in transport of water and flow of water within the stream channel and floodplain. As contained in the final rule, the term ''hydrologic function'' includes total flow volume, seasonal variations in streamflow and base flow, and provisions of the water needed to maintain floodplains and wetlands associated with the stream. Establishment of ''hydrologic function'' occurs after achieving ''form.'' The ''form'' of the stream has a significant impact on hydrologic function.

Intermittent Stream

As discussed in the preamble to the proposed rule,[153] we proposed to redefine ''intermittent stream'' in a manner that is substantively identical to the manner in which the U.S. Army Corps of Engineers defines that term in Part F of the 2012 reissuance of the nationwide permits [154] under section 404 of the Clean Water Act.[155] Additionally, we proposed to remove paragraph (a) of our former definition of ''intermittent stream.'' *See* 80 FR 44436, 44472 (Jul. 27, 2015). We received differing opinions on this invitation for comment. One regulatory authority and other commenters supported the proposed deletion while others urged the retention of paragraph (a), which provided that an intermittent stream means ''a stream or reach of a stream that drains a watershed of at least one square mile. . . .'' This former definition functioned to automatically designate any stream or reach of stream that drains a watershed of at least one square mile as an intermittent stream. We agree with the commenters supporting the deletion of paragraph (a) because the former definition is inconsistent with generally accepted stream classification systems because it is based on watershed size rather than streambed characteristics, duration, and source of streamflow. Therefore, we are not including paragraph (a) as it existed in the former regulation within the definition of ''intermittent stream'' in the final rule.

We received comments requesting that we add runoff from snowmelt events to the definition. For the same reasons explained in the preamble to the ''ephemeral stream'' definition, we are adding reference to ''snowmelt'' within the definition of ''intermittent stream.''

One commenter suggested the definition should be tied to the number of months in each year that snowmelt normally contributes to the baseflow in the stream. This comment was not accepted because the ''intermittent stream'' definition recognizes that snowmelt provides supplemental flow and that supplemental flow may only occur during certain times of the year.

Another commenter pointed out that the proposed definition of ''intermittent stream'' did not explicitly mention the relationship the stream has to the water table. The commenter thought this was problematic because we included the relationship in the proposed definition of ''perennial stream''. For the purposes of consistency and clarity we added a statement in the final rule definition that describes the relationship between the water table and an intermittent stream.

One commenter opined that the definition of ''intermittent stream'' should address whether a stream's function is impaired by change in flow and potential change in frequency, duration, magnitude, rate of change, and timing of flows. We did not accept this comment because functional impairment from water quantity changes is more appropriately addressed by the definition of ''material damage to the hydrologic balance outside the permit area'' found at § 701.5, and explained in this preamble.

Although we specified within the proposed definition that an ''intermittent stream'' means ''a stream or part of a stream that has flowing water during certain times of the year when groundwater provides water for streamflow'' several commenters questioned the extent to which groundwater should be considered in the definition of ''intermittent stream.'' Some commenters requested that the definition of ''intermittent stream'' specify that the groundwater contribution is from an aquifer and not a result of man-made features such as upstream reservoirs, groundwater pumped to the surface, or irrigation return flows. In addition, several commenters recommended the definition require that there be a contribution from groundwater and not strictly surface water runoff. Another commenter requested clarification that the mere occurrence of snowmelt in spring would not automatically make a stream ''intermittent'' rather than ''ephemeral.'' In consideration of these comments, we clarified the definition of ''intermittent stream.'' Within the final rule the definition of ''intermittent stream'' now includes the clarifying statement: ''[t]he water table is located above the streambed for only part of the year, which means that intermittent streams may not have flowing water during dry periods.'' Additionally, we agree with commenters that snowmelt should be considered a supplemental source of water for streamflow. Therefore, we have incorporated ''snowmelt'' into the final rule definition.

A commenter asserted that based on the proposed definition of ''intermittent stream'' and the prohibition of the placement of sedimentation control structures in a perennial or intermittent stream, coal mining would be severely and negatively impacted in the western region. The commenter implies that because intermittent streams with nominally, low-yield base flow from spring discharges are common in the western region, the proposed definition would change the stream classification. We disagree. Neither the proposed definition nor the definition within the final rule has any effect on the steam designation because both definitions require contribution of groundwater flow to the stream during parts of the year. In addition, the commenter opined that there should be an allowance for sediment control systems for other mining areas in relationship to intermittent streams similar to the exceptions allowed for excess spoil fills and steep-slope areas as provided in proposed paragraph (c) of § 816.57 and discussed within the preamble to the proposed rule.[156] The exceptions outlined in the proposed rule are incorporated into the final rule because in some steep-slope areas the only place to install a sedimentation control structure is in the stream. This is discussed in more detail in the preamble discussion of paragraph (h) of § 816.57.

Similar to the explanations within the definitions of ''ephemeral'' and ''perennial'' streams and to address commenters' confusion concerning what is or what is not a stream, we have revised the definition of ''intermittent stream'' to clarify that an ''intermittent stream'' only includes those conveyances with channels that display both a bed-and-bank configuration and an ordinary high water mark. The addition is consistent with the preamble discussions of the ''ephemeral stream'' and ''perennial stream'' definitions.

One commenter opined that linking the SMCRA definitions of ephemeral

and intermittent streams to the definitions of those terms in the U.S. Army Corps of Engineers 2012 Nationwide Permit may result in our definitions becoming obsolete when the nationwide permits are re-evaluated. After considering the comments, we are not adopting the U.S. Army Corps of Engineers' definition verbatim.

Invasive Species

Some commenters requested the final rule include definitions of ''invasive species,'' ''non-invasive species,'' and ''native species.'' Other commenters requested that we allow the regulatory authority to have latitude to define these terms. In response, we are adding two definitions to the final rule. We are defining ''invasive species'' and ''native species'' in the final rule. In the preamble to the proposed rule at § 780.12(g) [157] we referenced Executive Order 13112,[158] which focused on ''invasive species.'' This 1999 Executive Order included definitions of both ''invasive species'' and ''native species.'' On December 5, 2016, the 1999 Executive Order was amended by Executive Order 13751.[159] Executive Order 13751, entitled ''Safeguarding the Nation from the Impacts of Invasive Species,'' includes a slightly modified definition of invasive species as compared to the 1999 Executive Order. Because the 1999 Executive Order language more closely tracks the language of SMCRA related to protection of the human health and the environment, with one minor change for grammatical improvements, we are incorporating the definitions from the 1999 Executive Order into the final rule:

In response to the commenters that suggested that we allow the regulatory authority latitude to define these terms, we do not agree. It is important to have uniform definitions of these terms, and these definitions, adapted from the 1999 and 2016 Executive Orders, accomplish that objective. These final definitions of ''invasive species'' and ''native species'' satisfy the purposes of SMCRA, are appropriate, will provide sufficient guidance to regulatory authorities, and are generally consistent with the applicable Executive Orders. For example, although our definition of ''invasive species'' contains the term ''alien species'' and the definition in Executive Order 13751 does not, our use of that term is consistent with that Executive Order's new definition of ''alien species.'' In response to the request to define ''non-invasive species,'' we decline because those species that are not defined as invasive species will be classified as non-invasive species.

Land Use

One commenter stated that we should use or recognize international definitions of ''land use'' such as the definitions from the Organisation for Economic Co-operation and Development because these definitions are more practical when recognizing economic and cultural activities associated with human use of the land. The commenter further stated that we should explain the meaning of ''support facilities'' and ''integral part of the use'' included within the definition of ''land use.'' The existing definition of ''land use'' is sufficient. Moreover, as these terms were included in the previous version of the definition of ''land use'' and not otherwise proposed for change, we see no need to further explain their meaning or to use other definitions as suggested by the commenter. Our reason for changing this definition to include the sentence, ''[e]ach land use category includes land used for facilities that support the land use'' is to ensure the definition is aligned with our corresponding changes to §§ 780.24 and 784.24. The alterations of this section allow for modification of postmining land uses from premining without requiring approval of higher and better use if the land that existed before mining was already capable of supporting that use in its existing condition. We did not receive any comments on this aspect of definition change.

Material Damage

This definition discusses ''material damage'' in the context of the subsidence control provisions of §§ 784.30 and 817.121, which we have clarified in this final rule. Several commenters raised concerns about the effects of subsidence on the land and waters overlying the underground mining activities. Commenters also raised concerns about the applicability of the definition of ''material damage'' (in the context of underground mine subsidence) to hydrologic features and recommended that subsidence damage to surface waters be more specifically regulated. Many of these concerns are discussed in Part IV.K. of the preamble which discusses material damage from subsidence and in the preamble discussion to our definition of material damage to the hydrologic balance outside the permit areas in § 701.5 of this preamble. Other comments are discussed in the sections of the preamble that address the changes we have made to our subsidence control plan provisions at § 784.30 (previously § 784.20), or that explain the measures to prevent, control, or correct damage resulting from subsidence at § 817.121. Notably, as explained more fully in our preamble discussion at Part IV.K., we are revising the definition of ''material damage'' in the context of the subsidence control provisions of §§ 784.30 and 817.121 to specifically include wetlands, streams, and bodies of water. Adding these features to the definition clarifies that not only subsidence damage to surface lands but also subsidence damage resulting in functional impairment of wetlands, streams, and bodies of water, must be repaired pursuant to the subsidence repair provisions of § 817.121(c). As previously explained, we have required operators to address impacts and correct subsidence damages to land and water features since 1995 when we published the final rule addressing the subsidence provisions of the Energy Policy Act of 1992. Thus, by adding ''wetlands, streams, and bodies of water'' to the definition of ''material damage'' in the subsidence context, we are merely reinforcing our longstanding position.

Some commenters requested that the final rule specifically address material damage to the hydrologic balance outside the permit area from longwall mining that adversely impacts the productivity of prime farmland. Longwall mining is a method of underground mining that results in planned subsidence. The commenters suggested revisions to several provisions of our regulations, including the definition of ''material damage'' in the context of subsidence in § 701.5, our subsidence control regulations in § 784.30 (previously § 784.20), and our prime farmland restoration regulations in § 785.17.

We decline to adopt the recommended revisions. We do not interpret SMCRA as authorizing protection of prime farmland from the impacts of subsidence from longwall mining operations beyond the degree of protection afforded by § 817.121(c) of our final rule. Section 516(b)(1) of SMCRA [160] does not require that operations using mining technology that requires planned subsidence in a predictable and controlled manner (primarily longwall mining) adopt measures to prevent subsidence from causing material damage to the extent technologically and economically

[157] 80 FR 44436, 44491 (Jul. 27, 2015).

[158] Exec. Order No. 13112 of February 3, 1999, 64 FR 6184 (Feb. 8, 1999).

[159] Executive Order 13751 was published in the **Federal Register** on December 8, 2016, and can be found at 81 FR 88609.

[160] 30 U.S.C. 1266(b)(1).

feasible. However, our regulations at § 817.121(c) provide that, to the extent technologically and economically feasible, the permittee of any type of underground mine, including longwall mines, must correct any material damage resulting from subsidence caused to surface lands, wetlands, streams, or water bodies by restoring the land and water features to a condition capable of maintaining the value and reasonably foreseeable uses that the land was capable of supporting before subsidence damage occurred. Our definition of ''material damage'' in final § 701.5 in the context of subsidence includes any functional impairment of surface lands, features, including wetlands, streams, and bodies of water, structures or facilities, and any physical change that has a significant adverse impact on the affected land's capability to support any current or reasonably foreseeable uses or that causes a significant loss in production or income. Therefore, under final § 817.121(c), to the extent technologically and economically feasible, the permittee must repair any surface lands, including prime farmland, whenever subsidence resulting from underground mining causes significant loss in production or income or has a significant adverse impact on the capability of the land to support the uses that it supported before subsidence damage occurred. In addition, we added § 817.121(c)(2), which requires that the permittee implement fish and wildlife enhancement measures, as approved by the regulatory authority in a permit revision, to offset subsidence-related material damage to wetlands or a perennial or intermittent stream when correction of that damage is technologically and economically infeasible.

Material Damage to the Hydrologic Balance Outside the Permit Area

We received numerous general and specific comments on various aspects of our proposed definition for ''material damage to the hydrologic balance outside the permit area.'' Several commenters requested that we refrain from finalizing a definition and continue to allow regulatory authorities the flexibility to define the term for their jurisdictions in order to best reflect local conditions. These commenters often focused on the diversity of the country and objected to the perceived ''one-size-fits-all'' approach of the proposed definition. Some commenters noted that some states, such as West Virginia and Montana, already have definitions of the term. Other states define ''material damage to the hydrologic balance outside the permit area'' on a case-by-case basis. Similarly, some commenters suggested that, instead of a uniform federal definition of ''material damage to the hydrologic balance outside the permit area'', we could better address the concerns that we raised in the preamble to the proposed rule by providing technical support to the regulatory authorities so that they could be equipped to define ''material damage to the hydrologic balance outside the permit area'' in their own states.

We agree with these commenters in part—states do need the flexibility to define ''material damage to the hydrologic balance outside the permit area'' to account for local and regional differences in geology, hydrology, mining, and reclamation. However, a federal definition is necessary to provide guidance and clarity to the regulatory authorities as they define the term for their own jurisdictions. As discussed in more detail in the preamble to the proposed rule, our previous rules did not contain a definition of ''material damage to the hydrologic balance outside the permit area,'' and, in the more than 30 years since SMCRA's enactment, very few states have adopted a definition.[161] As a result of the lack of a definition, what constitutes ''material damage to the hydrologic balance outside the permit area'' varies greatly. This has led to differences in enforcement across the country. These differences have also resulted in coal field water quality data that shows significant coal mining impacts in many streams across the country.[162] For these reasons, we are adopting a definition of ''material damage to the hydrologic balance outside the permit area'' that provides minimum nationwide standards while also providing each regulatory authority with the flexibility to tailor the definition to meet the needs of its jurisdiction while ensuring minimal standards are met.

To help clarify the regulation and to comply with the requirements of the Office of the Federal Register, we have revised and re-designated proposed paragraphs (a) and (b) of the definition into three paragraphs (1), (2), and (3).

The basic definition now provides that ''material damage to the hydrologic balance outside the permit area'' is an adverse impact, from surface coal mining and reclamation operations, underground mining activities, or subsidence associated with underground mining activities, on the quality or quantity of surface water or groundwater, or on the biological condition of a perennial or intermittent stream.'' What constitutes an adverse impact for determining material damage to the hydrologic balance outside the permit area is now based on consideration of certain types of reasonably anticipated or actual effects of the operation, such as effects that (1) cause or contribute to a violation of applicable state or tribal water quality standards or a state or federal water quality standard established for a surface water outside the permit area under section 303(c) of the Clean Water Act, 33 U.S.C. 1313(c), or, for a surface water for which no water quality standard has been established, effects that cause or contribute to non-attainment of any premining use of surface water outside the permit area; (2) preclude a premining use of groundwater outside the permit area; or (3) result in a violation of the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.*

The combination of the basic definition and procedures for considering the types of effects that constitute material damage to the hydrologic balance outside the permit area in paragraphs (1) through (3) is substantively similar to the proposed definition, with several exceptions. First, we deleted the references in the proposed definition to reasonably foreseeable uses based on comments from the public, state regulatory authorities, and other federal agencies. Among other things, the term ''reasonably foreseeable uses'' is too speculative for purposes of this definition. Second, we also deleted references to ''existing use,'' because, as some commenters noted, it could create confusion because the regulations implementing the Clean Water Act define that term in the context of that law. To avoid any possible confusion, as some commenters suggested, we replaced ''existing'' with ''premining'' in paragraph (2) and added a definition of that term in § 701.5. That definition provides that ''premining'' refers to the conditions and features that exist on a site at the time of application for a permit to conduct surface coal mining operations.

This revised definition also removes the proposed definition's direct reference to designated uses. We made this change for two reasons. First, the concept of water quality standards under the Clean Water Act, includes, but is ultimately broader than using just designated use. Designated uses are part of the water quality standards, along with water quality criteria, antidegradation provisions, and other

[161] 80 FR 44436, 44473–44476 (Jul. 27, 2015).

[162] *See, e.g.,* 80 FR at 44440–44441 (Jul. 27, 2015).

policies each respective state develops to help implement the Clean Water Act. Consideration of all of these components of water quality standards provides a more complete evaluation of what constitutes material damage to the hydrologic balance outside the permit area.

Second, we wanted to emphasize the relationship between the requirements of SMCRA and Clean Water Act as it relates to surface water affected by coal mining operations. Thus, the final definition of material damage to the hydrologic balance outside the permit area better reconciles the requirement of SMCRA to perform a cumulative hydrologic impact assessment with the jurisdiction given to the Clean Water Act authority for the Nation's waters. It also highlights the need for coordination between the regulatory authority and the appropriate Clean Water Act authorities to develop the CHIA and to make the appropriate findings that the operation has been designed to prevent material damage to the hydrologic balance outside the permit area.

In order to effectively implement this definition, the regulatory authority and appropriate Clean Water Act authorities should coordinate during the permit application process consistent with the requirements of the final rule. After permit issuance, they should also jointly investigate potential water quality violations related to coal mining operations, as appropriate. At both of these stages, this coordination focuses on exchanging project specific information to provide the regulatory authority with information to better assess the effects of the operation on the cumulative impact area. This process should focus on the pertinent water quality standards in force for the specific site and any applicable state or tribal polices governing low flow, mixing zones, and/or any variances in play to ensure an appropriate evaluation of what constitutes material damage to the hydrologic balance outside the permit area, where it should be measured, and what material damage and evaluation thresholds are applicable for each situation. This process should enhance regulatory certainty for permit applicants and operators because it will minimize or eliminate conflicts between the agencies concerning impacts to receiving water bodies and identify measures that should be adopted to comply with the requirements of both statutes.

A commenter expressed concern that the proposed definition was impossible to interpret and evaluate in regard to compliance with SMCRA. We disagree; interpretation and compliance with this definition is possible for several reasons. For the first time since SMCRA was enacted, a federal definition of material damage to the hydrologic balance outside the permit area describes levels of unacceptable changes to the hydrologic balance that result from a SMCRA operation. These unacceptable impacts include precluding the attainment of Clean Water Act water quality standards, not maintaining premining use for groundwater, and effects that result in a violation of the Endangered Species Act. As previously stated, post-SMCRA mining has impaired receiving streams, which is an unacceptable effect of current mining practices under the Act. If the concept of material damage to the hydrologic balance outside the permit area had been more clearly understood or defined, these impacts should have been prevented.

Commenters have generally cited two situations in which it will be impossible for regulatory authorities to apply the proposed definition. First, they claim that a one-time or temporary occurrence should not constitute material damage to the hydrologic balance outside the permit area. As discussed in more detail below, we generally agree, as long as the temporary occurrence does not affect the stream to the extent that, for example, the stream fails to satisfy applicable water quality standards or violate the SMCRA material damage thresholds set for the site. However, over the years, regulatory authorities, including us, have witnessed single or temporary events of large magnitude that have risen to the level of ''material damage to the hydrologic balance outside the permit area''. These events clearly violated the Clean Water Act water quality standards of the streams affected. Second, these commenters contend that the definition does not allow natural and non-mining conditions to be factored into whether a stream maintains its applicable water quality standards. As discussed below, we disagree. The definition allows natural, non-mining, and mining-caused stream variations as long as the stream maintains its applicable water quality standards. The definition simply provides a common framework from which to assess impacts to receiving bodies of water. Latitude exists within this definition for regulatory authorities to tailor the specific meaning of ''material damage to the hydrologic balance outside the permit area'' to suit their particular state and situations encountered at specific mines. In addition, if the designated use is inaccurate or unattainable for natural or other reasons, the Clean Water Act authority has the flexibility under the Clean Water Act and the implementing regulations at 40 CFR part 131 to revise the designated use to more accurately reflect the highest attainable designated use.

A commenter also asserted that the definition, as proposed would result in denial of all future permit applications. We disagree. As previously stated, material damage to the hydrologic balance outside the permit area only occurs when a mining operation causes a stream not to satisfy its applicable Clean Water Act water quality standards or an aquifer to not meet its premining use. Variations in water quality, quantity, biological condition, and/or aquatic habitat can occur as long as the stream satisfies is applicable Clean Water Act water quality standards or an aquifer meets its premining use. A mining operation can have an adverse effect on a receiving stream as long as the stream still satisfies its applicable water quality standards, an aquifer meets its premining use as determined by the SMCRA regulatory authority, and no violations of the Endangered Species Act are occurring. For example, a reduction in a stream's index of biotic integrity score would not constitute ''material damage to the hydrologic balance outside the permit area'' if the stream is satisfying its applicable Clean Water Act water quality standards and not in violation of the Endangered Species Act. Similarly, a reduction in an aquifer's water quality parameter concentrations is not ''material damage to the hydrologic balance outside the permit area'' as long as the aquifer is meeting its premining use and it is not preventing an adjacent receiving stream from satisfying its applicable Clean Water Act water quality standards or if no designated use is defined, its premining use outside the permit area. The concept of Clean Water Act water quality standards has always existed in both the Clean Water Act and has been relevant in SMCRA analyses since the inception of both statutes, *see, e.g.,* section 508(a)(13) of SMCRA. This approach taken in our definition, consequently, is not a new one; the definition simply codifies a system that has existed for more than thirty years and under which many permits have been issued.

A commenter objected to our statement in the proposed rule that because the Clean Water Act does not apply to groundwater, the regulatory authority would need to use ''best judgment'' to establish ''material damage to the hydrologic balance'' criteria to protect existing and

foreseeable uses of groundwater. The commenter asserted that the use of term ''best judgment'' was not sufficiently clear and would negatively impact the operator and, thus, it should be eliminated. First, ''best judgment'' does not appear in the regulation. Instead, it is in recognition of the many decisions the regulatory authority must make about a specific coal mining operation. The regulatory authority makes these decisions using their ''best judgment'' based on the information and data gleaned during the decision making process. This is wholly appropriate, and we are not making any changes to the final rule in response to this comment.

Several commenters implied that material damage to the hydrologic balance outside the permit area should arise any time a partial degradation to surface water or groundwater occurred. Specifically, they suggested that as part of the definition, we should require that material damage to the hydrologic balance outside the permit area include impacts that ''partially or significantly degrade'' or ''partially, completely eliminate, or significantly degrade'' any designated use under sections 101(a) or 303(c) of the Clean Water Act or any existing or reasonably foreseeable use of surface water or groundwater outside the permit area. We disagree that material damage to the hydrologic balance outside the permit area occurs every time a stream or groundwater is partially degraded, or in some circumstances significantly degraded, because the terms ''partially'' and ''significantly'' are subjective, do not convey a sense of magnitude, and are open to interpretation and abuse. Both the Clean Water Act and SMCRA allow some variation in water quality. For instance, the Clean Water Act recognizes that in some situations water quality may vary while still being protective of the designated use. However, if the ambient quality is on the verge of the ambient water quality criterion level, then any amount of degradation could impair the designated use. In addition, section 515(b)(10) of SMCRA [163] requires operations to minimize material damage to the hydrologic balance inside the permit boundary and section 510(b)(3) of SMCRA requires that the proposed operation be ''designed to prevent material damage to hydrologic balance outside [the] permit area.'' [164] SMCRA, therefore, allows damage to the hydrologic balance as long as that damage does not rise to the level of material damage outside the permit area. Therefore, adoption of a standard that does not allow any variation in water quality or quantity within a designated use category is not consistent with SMCRA.

Some commenters expressed concern that the definition as proposed would prohibit any adverse impacts at all and would, for example, consider temporary or minor impacts to be ''material damage to the hydrologic balance outside the permit area.'' As explained above, we disagree that the definition prohibits ''any impact'' outside the permit area. The concept of water quality standards has inherent flexibility within the standards that allow temporary and minor impacts outside the permit area as long as the magnitude of those impacts does not violate applicable Clean Water Act water quality standards for the surface water under review. This change, when read in context of the entire definition, supports the intent of SMCRA, which allows some change in baseline conditions provided that those changes are not of such magnitude that a stream is incapable of attaining its applicable Clean Water Act water quality standards.[165] For example, if the impact from a mining operation causes a measurable decrease in a stream's index of biotic integrity value, but the stream is still attaining its water quality standards under the Clean Water Act, this would not be considered material damage to the hydrologic balance outside the permit area under the definition we are finalizing today. Similarly, temporary impacts would be allowed unless those impacts violate applicable Clean Water Act water quality standards or results in a violation of the Endangered Species Act. Some temporary impacts—such as dewatering a stream for all but a de minimis amount of time or discharges containing parameters of concern in sufficient quantities—may, however, rise to the level of material damage to the hydrologic balance outside the permit area if those impacts violate applicable Clean Water Act water quality standards. Therefore, incorporating the concept of the Clean Water Act water quality standards into this definition as a benchmark to determine material damage to the hydrologic balance outside the permit area accommodates the seasonal and natural fluctuation inherent in natural systems and allows some level of impact to the hydrologic balance consistent with SMCRA while also providing a point of reference for determining when the level of impact becomes detrimental to the hydrologic balance outside the permit area.

In the underground mining context, one commenter opined that the rule should specifically mention that a regulatory authority cannot approve a permit application unless it determines that the proposed operation is not predicted to cause subsidence that would result in the dewatering of any perennial or intermittent stream. Our final rule defines material damage to the hydrologic balance outside the permit area to encompass an adverse impact from subsidence that would dewater or impair an intermittent or perennial stream to the extent that applicable Clean Water Act water quality standards are or would not be met or, if no designated use is assigned, the actual premining use would be precluded, or the Endangered Species Act violated. However, as discussed above, material damage to the hydrologic balance outside the permit area will not occur if the surface water or groundwater can be repaired so that it still attains applicable Clean Water Act water quality standards, or, if no designated use exists, its actual premining use. As discussed in more depth above, in Part IV.K., as long as these regulations are followed, subsidence damage from an underground mining operation that does not rise to the level of material damage to the hydrologic balance outside the permit area may be allowed.

Similarly, several commenters suggested a single exceedance of a water quality standard should not be considered material damage to the hydrologic balance outside the permit area as it may not impact the stream hydrology to the degree that the designated uses are impaired. We agree with this comment. Similar to what we said in our discussion of temporary impacts, under our definition, a simple exceedance of a water quality standard would not necessarily constitute material damage to the hydrologic balance outside the permit area. If stream metrics indicate the stream is maintaining its applicable Clean Water Act water quality standards after exceedance events, then material damage to the hydrologic balance outside the permit area has not occurred. However, there could be situations where the SMCRA regulatory authority determines a single exceedance does constitute material damage to the hydrologic balance outside the permit area: if the stream metrics indicate that the exceedance would violate applicable Clean Water Act water quality standards or one of the other criteria listed in paragraphs (2) through (3). As we explained above, the

[163] 30 U.S.C. 1265(b)(10).

[164] 30 U.S.C. 1260(b)(3).

[165] 30 U.S.C. 1265(b)(10).

SMCRA regulatory authority should consult with the Clean Water Act authority to make this determination.

It is also possible to cause material damage to the hydrologic balance outside the permit area while satisfying all effluent limitations established in the NPDES permit. SMCRA permits require in-stream monitoring for parameters that are not limited or required to be monitored by the corresponding NPDES permits. Therefore, required monitoring under the SMCRA permit may indicate that a parameter that was not expected to have the potential to exceed a numeric or narrative water quality criteria in the receiving stream but does in fact exceed the established criteria. This situation could also occur if numerous individually compliant discharges cumulatively create a situation that violates a stream's applicable Clean Water Act water quality standards or would cause a violation of the Endangered Species Act.

One commenter asserted that the definition of material damage to the hydrologic balance outside the permit area should apply to all streams and stream segments, and that the assessment of material damage to the hydrologic balance outside the permit area must not be restricted to only those streams for which the U.S. Army Corps of Engineers, during the Clean Water Act section 404 process, makes jurisdictional determinations. We agree that material damage to the hydrologic balance outside the permit area is not restricted to only those streams for which there is a Clean Water Act jurisdictional determination issued by the U.S. Army Corps of Engineers.

In addition, final rule § 780.19(c)(6)(i)(C) simplifies the process of delineating stream transitions by requiring that the SMCRA regulatory authority default to any jurisdictional stream determinations made by the U.S. Army Corps of Engineers to delineate stream transitions. If the U.S. Army Corps of Engineers has not determined the location of a transition point, the regulatory authority must set one. There are a number of available resources that may be helpful including the state Clean Water Act authority. The regulatory authority is encouraged to coordinate with the U.S. Army Corps of Engineers and other partners in identification of stream transition points.

Several commenters suggested that linking the definition of material damage to the hydrologic balance outside the permit area with designated use could be problematic in situations where designated uses have not been identified or are not instructive, not accurate, and/or not attainable. The Clean Water Act provides a variety of policies to allow sufficient time to attain the designated uses, such as water quality standards variances, permit compliance schedules, or designated use changes. Several commenters noted that a use attainability analysis may be required to establish or change a designated use and that the use attainability analysis may be time-consuming and expensive. In such cases, the regional U.S. Environmental Protection Agency offices and relevant state Clean Water Act agencies can provide support and may suggest other approaches appropriate for the situation. As noted above, we are retaining the link to attainment of designated uses in the broader water quality standards approach; however, we are also making a clarifying change to address some of these concerns. As proposed, the definition accounts for situations where no designated use has been identified for a particular stream. In those situations, the proposed rule would have required that the ''existing use'' be maintained in a receiving stream. In the final rule, to prevent confusion with the Clean Water Act definition of existing uses and prevent abuses related to impaired streams, we have made revisions to further clarify this concept. Our intent is to maintain the actual use of surface water prior to the proposed mining operation. We are also concerned that the baseline standard for material damage to the hydrologic balance outside the permit area and/or stream restoration standards for an impaired stream, with or without a designated use, may be mistakenly considered as an existing, impaired condition rather than its actual or potential designated use. To remove any confusion and add clarity, we removed the phrase ''existing use'' from the definition and added ''actual use'' to signify uses that existed prior to submission of a coal mine permit application. Thus, paragraph (1) now specifically states that if no designated use has been established under the Clean Water Act, a mining operation cannot preclude attainment of any actual premining use of surface water outside the permit area.

One commenter suggested we only consider ''existing uses'' and that we define ''existing uses'' as any uses in existence as of August 3, 1977, which is the date SMCRA was enacted. We have not adopted this suggestion because we removed the phrase ''existing uses'' from the definition as it relates to surface waters and replaced it with ''any premining use.'' We did not replace it with ''any actual use as of the enactment of SMCRA'' because that change could raise potential conflicts with the Clean Water Act if the stream's designated uses have changed since the enactment of SMCRA.

Another commenter suggested we revise the regulation to provide a hierarchy of stream use categories that would provide consistency in determining material damage to the hydrologic balance outside the permit area (*i.e.,* first designated uses, then existing uses, and finally reasonably foreseeable uses). We agree that the regulation needs to specify the priority of stream use categories and have made changes as a result. As discussed above, we added clarifying language to paragraph (1) that specifies that adverse impacts that violate applicable Clean Water Act water quality standards and, if no water quality standards have been established, then the adverse impacts may not preclude any actual premining use. The proposed rule would have also required operators to ensure that ''reasonably foreseeable uses'' of surface water were maintained. However, many commenters raised concerns about the difficulty in interpreting or assigning reasonably foreseeable use to streams. We agree and have removed the language concerning reasonably foreseeable uses. The final rule no longer includes the term ''reasonably foreseeable uses'' in contexts other than protection of reasonably foreseeable surface land uses from the adverse impacts of subsidence. As explained in other areas of the preamble, we removed the term from the definition of material damage to the hydrologic balance outside the permit area for two reasons. First, the term appears in SMCRA only in section 516(b)(1), which requires that operators of underground mines adopt subsidence control measures to, among other things, maintain the value and reasonably foreseeable use of surface lands. Sections 717(b) and 720(a)(2) of SMCRA separately protect certain water uses. Second, numerous commenters opposed inclusion of the term ''reasonably foreseeable uses'' on the basis that it is too subjective, difficult to determine, and open to widely varying interpretations, which could result in inconsistent application throughout the coalfields.

Proposed paragraph (a) defined material damage to the hydrologic balance outside the permit area as any adverse impact that would preclude any reasonably foreseeable use of surface water or groundwater outside the permit area. Several commenters objected to the use of the term ''reasonably foreseeable uses''. Several commenters suggested using alternate terms such as

''protected use,'' ''existing uses'', and ''future probable use''. As explained above, we deleted references to ''reasonably foreseeable uses'' in paragraph (1) of the final definition and elsewhere in our rules. The term was confusing and could have led to possibly conflicting interpretations.

Another commenter suggested that linking material damage to the hydrologic balance outside the permit area with the concept of reasonably foreseeable uses will create conflicts between the Clean Water Act and SMCRA agencies about what is a foreseeable use. For the reasons explained above, we did not accept this comment.

A commenter expressed concern about how the Clean Water Act concept of anti-degradation would relate to variability in a stream designated use caused by SMCRA mining impacts. We clarified the definition by directly linking to the concept of Clean Water Act water quality standards, which includes provisions for impaired streams and antidegradation. To establish material damage in situations involving impaired streams, the SMCRA regulatory authority should consult with the Clean Water Act authority to ensure a thorough understanding of the water quality standards applicable to the stream and specific situation under review.

In the proposed rule, groundwater was included with paragraph (a). One commenter specifically suggested we define material damage to the hydrologic balance outside the permit area so that it applies to groundwater. Although groundwater was included in the proposed definition, we have decided to include paragraph (2) in the final rule to specifically state that operators must maintain premining uses associated with groundwater. This change clarifies that material damage to the hydrologic balance outside the permit area protects groundwater resources that may not have uses assigned to them. In particular, this paragraph states that ''material damage to the hydrologic balance outside the permit area'' would include those adverse impacts that preclude attainment of any premining use of groundwater outside the permit area. In addition, paragraphs (1) and (2) of the definition would preclude the discharge of contaminated groundwater into a receiving stream if that discharge caused the stream to not satisfy its applicable Clean Water Act water quality standards. Thus, groundwater protections are included in this final definition.

A commenter suggested we revise the definition to ensure it adequately protects listed species or designated critical habitats. The commenter further elaborated that the definition should not be linked to the Endangered Species Act's jeopardy analysis. We agree that the definition of material damage to the hydrologic balance outside the permit area should adequately protect listed species and designated critical habitat, whether aquatic or terrestrial. Paragraph (b) of the proposed rule was included to prevent impacts to threatened or endangered species or adverse effects on designated critical habitat outside the permit area in violation of the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.* As proposed, it did not specifically link this definition with a jeopardy analysis under the Endangered Species Act, and we are not doing so in the final rule. In the final rule, this paragraph has been redesignated as (3) and simplified to bring attention to the prohibitions found in the Endangered Species Act of 1973, which also includes the unauthorized ''taking'' of listed species (a criminal prohibition). This provision, in conjunction with the other provisions of this final rule related to fish and wildlife resources discussed in the preamble at §§ 780.16(b) and 783.20, should provide adequate protections for threatened and endangered species, aquatic and/or terrestrial, in accordance with the Endangered Species Act.

One commenter, citing section 702,[166] of SMCRA, requested that the definition of material damage to the hydrologic balance outside the permit area be expanded to encompass any violations of other applicable statutes or regulations in addition to those stated in the proposed rule text. The term ''material damage to the hydrologic balance outside the permit area'' is a term unique to SMCRA and there is no need to refer to other statutes or regulations within this definition. Section 702 of SMCRA [167] will continue to fully apply independent of this definition. We singled out the Endangered Species Act in paragraph (3) because the statutory language is unique in its prohibitions against jeopardizing the continued existence of species and adverse changes to their designated critical habitat (if in the context of Section 7 of the Endangered Species Act), and its prohibition against unauthorized ''taking'' of listed species generally. In summary, we agree that SMCRA operations cannot materially damage streams outside the permit area under any circumstance; other statutes notwithstanding.

Many commenters raised concerns with a statement in the preamble to the proposed rule that stated: A ''SMCRA regulatory authority may need to establish numerical material damage criteria for parameters of concern for which there are no numerical water quality standards or water quality criteria under the Clean Water Act.'' [168] For support, these commenters also cited section 702 of SMCRA [169] because, to their understanding of the regulation, the development of numeric standards to determine material damage to the hydrologic balance outside the permit area would create a conflict with the Clean Water Act. In response, we note that nothing in the definition requires the creation of numeric standards. In the proposed rule, the requirement for numeric standards was included in § 773.15(e)(3), which stated that a regulatory authority needed to include a permit condition specifying criteria for material damage to the hydrologic balance outside the permit area on a site-specific basis, expressed in numerical terms for each parameter of concern. As discussed in the preamble to final § 773.15(e)(3), we are not adopting the proposed requirement for numeric criteria unless numeric water quality criteria exist.

One commenter also suggested that inclusion of the term biological condition and ecological function into this definition is a duplication of the Clean Water Act sections 401 and 404 processes. We disagree. First, the term ''ecological function'' is not found in the definition of material damage to the hydrologic balance outside the permit area nor is it a required element to be assessed when setting criteria to asses if material damage to the hydrologic balance outside the permit has occurred (section 780.21). Second, to the extent that any Clean Water Act section 401 or 404 processes also apply, the final rule allows any information obtained in these processes to be used to inform and support analyses conducted under SMCRA. It is vital to link water quality changes with aquatic impacts that may result from SMCRA sites in order to determine whether material damage to the hydrologic balance outside the permit area has been prevented. This linkage is necessary to evaluate the overall impact of the mining operation on the receiving stream and its aquatic community and to assess unacceptable changes in either designated use, actual, or premining use when a designated use

[166] *Id.*

[167] *Id.*

[168] 80 FR 44436, 44475 (Jul. 27, 2015).

[169] 30 U.S.C. 1292.

is not assigned. For these reasons we are retaining the term biological condition within the definition of material damage to the hydrologic balance.

Many commenters speculated as to how coal mining impacts to receiving streams would be assessed in light of the proposed definition. Several commenters questioned the use of the phrase ''adverse impacts'' and were concerned that the phrase could be interpreted to mean any impact to a receiving stream. We disagree with this interpretation. The definition of ''material damage to the hydrologic balance outside the permit area'' needs to be read, understood, and applied in its entirety. As discussed above, an adverse impact does not necessarily constitute material damage to the hydrologic balance outside the permit area. The definition includes only those adverse impacts that, either individually or cumulatively, would preclude a receiving stream from attaining its applicable Clean Water Act water quality standards, or if no designated use exists, the premining use.

Several commenters proposed their own definitions of material damage to the hydrologic balance outside the permit area. Most of these suggested definitions tied material damage to the hydrologic balance outside the permit area to permanent impacts after mitigation attempts have failed. We decline to adopt the term ''permanent'' because impacts can materially damage the hydrologic balance outside the permit area yet not be considered permanent. There are many examples over the last 30 years of impacts that were not permanent but that clearly rose to the level of material damage to the hydrologic balance outside the permit area. Some examples include the Martin County, Kentucky slurry breach, impacts to Tug Fork River that killed all aquatic life in Coldwater Fork and Wolf Creeks, and a mine release of very high conductivity water released from the Blacksville No. 2 Mine into Dunkard Fork in Greene County, Pennsylvania that created a golden algae bloom that caused a massive fish kill in 40 miles of stream. These events have all been mitigated and would not be considered permanent even though they clearly constituted material damage to the hydrologic balance outside the permit area which should have been prevented. Thus, singular, nonpermanent events can rise to the magnitude of material damage to the hydrologic balance outside the permit area.

A commenter recommended that the rule specify that a SMCRA regulatory authority should not consider noncompliant discharges other than those that rise to the level of precluding designated or existing uses because those noncompliant discharges, according to the commenter, remain solely within the purview of the Clean Water Act authority. We disagree. SMCRA gives jurisdictional authority to its regulatory authorities over aspects of water quality resulting from coal mining [170] and requires the evaluation of water quality from SMCRA sites and modification of the SMCRA permit any time a SMCRA site is causing, or leading to, material damage to the hydrologic balance outside the permit area.

Several commenters expressed concern that extraneous, non-mining related impacts, including natural conditions, would be included in assessment of material damage to the hydrologic balance outside the permit area and urged us to limit the scope of assessment to only those impacts directly attributable to the surface coal mining and reclamation operation. We agree with the commenters that many surface coal mining and reclamation operations are located in areas with multiple land uses and that water quality can be impacted from these other non-coal mining sources and natural conditions. The regulations require permit applicants to acquire water samples to help assess the baseline water quality in all streams overlying and adjacent to the proposed operation and for groundwater. Impacts to the water from other existing upstream land uses, including non-coal mining sources, will be reflected in the baseline data. The baseline data will form the basis of the cumulative hydrologic impact assessment developed by the regulatory authority. That assessment evaluates the capacity of the receiving stream to assimilate the expected water quality emanating from the proposed mining operation, and from all other mining-related activities, known and anticipated, within an area known as the cumulative impact area. The cumulative hydrologic impact assessment, therefore, provides the regulatory authority with sufficient information to assess whether the proposed mining operation, in combination with other existing and reasonably anticipated mining activities, will materially damage the hydrologic balance outside the permit area. For example, if a stream's assimilative capacity for a certain parameter is already consumed by other activities or if the proposed operation would exacerbate natural conditions to the point where the stream might fail to attain its applicable Clean Water Act water quality standards, the regulatory authority would either need to modify the permit so that material damage to the hydrologic balance outside the permit area does not occur or disapprove the permit.

Several commenters suggested mining operations should not be required to improve a stream's biological condition beyond the premining condition. We do not agree with this assertion for previously impaired streams. We agree that if a stream is attaining its applicable Clean Water Act water quality standards, there is no requirement under SMCRA for the operation to implement measures, for example, to attain higher designated use categories. That is not the case for mining operations affecting previously degraded streams. Section 515(b)(24) of SMCRA specifically requires the enhancement of fish, wildlife, and related environmental values where practicable and section 508(a)(9) of SMCRA [171] requires steps be taken to comply with all air and water quality laws. Returning a degraded stream to a degraded state neither enhances fish, wildlife, and related environmental values nor takes steps to comply with the Clean Water Act's goal of maintaining a stream's designated use or instituting measures to help it attain its water quality standards.[172] Thus, the Clean Water Act regulatory authorities must develop water quality standards that help streams achieve their designated uses. Allowing a mining operation to return a stream to a degraded state without some form of enhancement would, thus, conflict with the Clean Water Act section 303(d). As a result, in instances where a stream is not meeting its designated use, it is vital that the regulatory authority work closely with the Clean Water Act authority to determine the level of impairment, evaluate the potential impacts from the proposed operation, and thoroughly assess the anticipated effects of the proposed operation over the anticipated life-of-the-mine. This coordination is critical because the state Clean Water Act authorities must implement measures to ensure that all streams achieve their assigned designated use(s) in conformity with section 303(d) of the Clean Water Act.[173]

One commenter also suggested the rule should grant discretion to the regulatory authority when applying bioassessment standards for material damage to the hydrologic balance

[170] *See, e.g.,* 30 U.S.C. 1260(b)(3) and 1265(b)(10).

[171] 30 U.S.C. 1258(a)(9).

[172] 33 U.S.C. 1251 *et seq.*

[173] 33 U.S.C. 1313(d).

evaluation. We agree, and as discussed in more detail in the preamble discussion of material damage to the hydrologic balance outside the permit area in the proposed rule, we stated that the regulatory authorities would have discretion to set criteria, including bioassessment criteria, to determine, on a case-by-case basis, whether there has been material damage to the hydrologic balance outside the permit area.[174] We are adopting that approach today. Thus, the definition contained in this section provides regulatory authorities with the framework to set their own criteria. This framework consists of factors that the regulatory authority must consider in developing and applying their unique bioassessment criteria for material damage to the hydrologic balance outside the permit area.

One commenter indicated that the definition of material damage to the hydrologic balance outside the permit area has been expanded to include quality and quantity impacts to surface water and ground water but also includes adverse impacts to the biological condition of a stream. They further stated that the definition expanded the hydrologic impact review to the adjacent area and/or shadow area of underground mines. In addition, the commenter suggested that inclusion of subsidence damage within the definition of material damage to the hydrologic balance outside the permit area contradicted the Energy Policy Act.[175] We disagree with the commenter's classification of an expanded area of review. In accordance with sections 508(a)(13)(A) and (C) and 515(b)(10) of SMCRA, we have always considered adjacent areas and shadow areas to be part of the evaluation of material damage to the hydrologic balance outside the permit area. Specifically, these areas are clearly contemplated by section 508(a)(13)(A) and (C) of SMCRA, which requires measures to be taken to ensure protection of quality and quantity of surface and ground waters *both on- and off-site* from adverse effects of mining and reclamation.[176] Similarly, section 515(b)(10) requires the operation to ''minimize the disturbances to the prevailing hydrologic balance at the mine-site and in *associated offsite areas* and to the quality and quantity of water in surface and ground water systems both during and after surface coal mining operations . . . .'' [177] These statutory provisions that specifically concern impacts to waters outside of the permitted area are applicable to both surface and underground mining operations. Although this has been our longstanding position and is clearly mandated by SMCRA, the definition of material damage to the hydrologic balance outside the permit area that we are finalizing today removes any of the ambiguity that may have resulted in this comment.

Moreover, our definition does not conflict with the Energy Policy Act. Section 2504 of Energy Policy Act requires operators to repair or compensate for subsidence impacts they cause to surface structures and requires replacement of water supplies adversely impacted by coal mine subsidence. The water replacement provisions of the Energy Policy Act are incorporated into our regulations at section 817.40 and are still in effect. These regulations provide additional protections for individual well owners. A change to an individual well that would trigger the replacement provision of section 817.40 would not necessarily constitute material damage to the hydrologic balance outside the permit area unless that damage was the result of wholesale adverse changes to an aquifer that the regulatory authority determines rose to the level of material damage to the hydrologic balance outside the permit area.

The commenter further suggested that inclusion of the term biological condition in the introductory text of the definition would result in a ''massive'' amount of new information for the regulatory agency to review. We agree that new information will be received on biological condition, but this information is not anticipated to be ''massive'' or otherwise overburden the regulatory authority. Experience in the Tennessee federal program indicates collection and submission of permit specific biological condition information does not substantially increase the volume of information submitted for a coal mine permit application. Biological condition is a critical component of determining the impact from the mining operation not only on water quality and quantity of the receiving stream but on impact to the aquatic environment. This information needs to be evaluated to ensure mining and reclamation operations do not cause material damage to the hydrologic balance outside the permit area.

Mountaintop Removal Mining

Some commenters expressed concern that the proposed definition of ''mountaintop removal mining'' conflicts with section 515(c)(2) of SMCRA [178] and is a significant change from the existing regulations that could cause confusion for regulatory authorities and the regulated community. Specifically, one commenter alleged that the change from ''removing substantially all overburden off the bench'' to ''removing substantially all overburden above the coal seam'' and the clarification that the overburden be used to create the postmining contours would be a source of misunderstanding. For the reasons discussed below, we disagree and are adopting the definition as proposed.

As we explained in the preamble to the proposed rule, we added a definition of ''mountaintop removal mining'' to § 701.5 by consolidating the descriptions of mountaintop removal mining operations in previous §§ 785.14(b) and 824.11(a)(2) and (3).[179] Previous § 824.11(a)(2) is nearly identical to section 515(c)(2) [180] of SMCRA, which explains that approximate original contour does not need to be achieved where an operation will mine ''an entire coal seam or seams running through the upper fraction of a mountain, ridge, or hill (except as provided in subsection (c)(4)(A) hereof) by removing all of the overburden and creating a level plateau or a gently rolling contour with no highwalls remaining.'' *Id.* Previous § 785.14(b) uses the same language except that it qualifies the amount of overburden with the word ''substantially'' and clarifies that the overburden is removed ''off the bench.'' In our definition of ''mountaintop removal mining,'' we have retained the word ''substantially'' and clarified that ''substantially all of the overburden above the coal seam'' must be removed and used to create approved postmining contours. Overburden is commonly understood to be the strata overlying the coal seam. If one ''removes all of the overburden'' then they are removing the material ''above the coal seam'' to uncover and then extract the entire coal seam. Therefore, we view this change as merely a clarification. Furthermore, the addition of the phrase ''and using that overburden'' actually makes the definition more consistent with SMCRA as it fully implements section 515(c)(4)(E),[181] which requires that ''spoil [] be placed on the mountaintop bench as is necessary to achieve the planned postmining land use.'' Therefore, contrary to the assertions of

[174] 80 FR 44436, 44475 (Jul. 27, 2015).

[175] 42 U.S.C. 6201 *et seq.*

[176] 30 U.S.C. 1258(a)(13)(A) and (C) (emphasis added).

[177] 30 U.S.C. 1265(b)(10) (emphasis added).

[178] 30 U.S.C. 1265(c)(2).

[179] 80 FR 44436, 44476 (Jul. 27, 2015).

[180] 30 U.S.C. 1265(c)(2).

[181] 30 U.S.C. 1265(c)(4)(E).

the commenters, adding ''above the coal seam'' and ''using that material to create'' to the definition of mountaintop removal mining does not create a conflict with the language of SMCRA and does not create confusion. No change has been made to the proposed definition in our final rule.

Native Species

As discussed within the explanation of the definition of ''invasive species'', some commenters requested that the final rule include definitions of ''invasive species,'' ''non-invasive species,'' and ''native species.'' Other commenters requested that we allow the regulatory authority to have latitude to define these terms. In response, we are adding two definitions to the final rule. We are defining ''invasive species'' and ''native species'' in the final rule. In the preamble to the proposed rule at section 780.12(g) [182] we referenced Executive Order 13112 [183] that focused on ''invasive species.'' As discussed above with respect to ''invasive species,'' the 1999 Executive Order includes definitions of both ''invasive species'' and ''native species.'' We are incorporating a definition of ''native species'' into the final rule that does not conflict with either the 1999 or 2016 Executive Orders.

In response to the commenters that suggested that we allow the regulatory authority latitude to define the terms ''invasive species'' and ''native species'', we do not agree because it is important to have uniform definitions of these terms and the definitions, adapted from the 1999 and 2016 Executive Orders in a manner that focuses on the specific goals of SMCRA, are appropriate.

Occupied Residential Dwelling and Structures Related Thereto

We received no comments on our proposed revisions to this definition, which we are adopting as proposed.

Ordinary High Water Mark

One commenter stated that we should use the ordinary high water mark (OHWM) instead of the bankfull elevation when measuring distances from streambanks because the OHWM is both more common for that purpose and more easily determined. We adopted the commenter's suggestion, which meant that we needed a definition of OHWM. To promote consistency between SMCRA and the Clean Water Act, we settled on the definition in regulation 33 CFR 328.3(e).

We made only one change—replacing ''shore'' with ''bank'' in our definition because ''bank'' is more commonly understood and used in the context of the streams affected by coal mining.

Measuring from the OHWM as opposed to the bankfull elevation, which is the point at which the streambanks can hold no more water before spilling flow onto the floodplain, could result in a slightly narrower buffer zone or streamside vegetated corridor, but, in most cases, the difference would be minimal.

Parameters of Concern

We proposed to add the definition of ''parameters of concern'' because we used the term extensively in the proposed rule. Under the proposed definition, ''parameters of concern'' consists of those chemical or physical characteristics or properties of surface water or groundwater that could be altered by mining activities in a manner that would adversely impact the quality of surface water or groundwater or the biological condition of a stream. We continue to use the definition of ''parameters of concern'' within the final rule and adopt it as proposed, with one exception. Within the definition, we have replaced ''biological condition of a stream'' with ''including adverse impacts on aquatic life.''

One commenter expressed concern that the definition of ''biological condition'' coupled with the definition of ''parameters of concern'' would impose new and burdensome requirements. The definition of ''parameters of concern'' was used to clarify that these parameters may be of concern because of potential impacts on aquatic life. Including ''biological condition'' in the context of this definition does not, in and of itself, require additional biological data beyond the requirements expressly defined elsewhere in the regulation; however, we agree that the use of term did not provide sufficient clarity and have replaced ''biological condition of a stream'' with ''including adverse impacts on aquatic life''.

We also received a variety of comments on the definition of ''parameters of concern.'' A few commenters asked us to delete this proposed definition altogether. These commenters alleged that the definition conflicts with the Clean Water Act and exceeds our authority. We disagree. The Clean Water Act established a national goal to restore or maintain the chemical, physical, and biological integrity of the Nation's water.[184] The final rule definition, like the proposed rule definition, complements these Clean Water Act requirements. None of the elements of this final rule affect a mine operator's responsibility to comply with effluent limitations or other requirements of the Clean Water Act. The requirements of the Clean Water Act have independent force and effect regardless of the terms of the SMCRA permit. The independent effect of the Clean Water Act is recognized in section 702(a) of SMCRA, which provides that—

> Nothing in this Act shall be construed as superseding, amending, modifying, or repealing the * * * [t]he Federal Water Pollution Control Act [Clean Water Act] [*citations omitted*], the State laws enacted pursuant thereto, or other Federal laws relating to the preservation of water quality.[185]

Another commenter requested the definition be revised to state that the ''parameters of concern'' will be determined by the approved regulatory authority. While we agree that the regulatory authority should identify local ''parameters of concern,'' if applicable, and include them in the required baseline monitoring data, we are not modifying the definition. Instead, we have clarified §§ 780.19, 784.19, and 780.23 of the rule to state that groundwater and surface water quality descriptions include all ''parameters of concern'' as identified by the regulatory authority. With these clarifications, any ''parameters of concern'' identified by the regulatory authority will more accurately reflect those constituents that could potentially impact water resources during coal mining and reclamation activities in their specific region of the country.

One commenter requested we adopt the term ''pollutants'' instead of ''parameters of concern.'' We disagree because the term ''pollutant'' is narrower than ''parameters of concern.'' We intend the term ''parameters of concern'' to cover all of the chemical or physical characteristics that are currently present in surface water or groundwater, or that could be released as a result of coal mining and reclamation activities or from the natural environment during such activities, and that could be present in sufficient concentrations to result in material damage to the hydrologic balance outside the permit area. In addition, using ''parameters of concern'' instead of ''pollutant'' in our regulations avoids confusion with the term ''pollutant'' as defined in section 502(6) of the Clean Water Act.

In consideration of these comments, we are not making any additional modifications to the final rule. As

[182] 80 FR 44436, 44491 (Jul. 27, 2015).

[183] Exec. Order No. 13112 of February 3, 1999, 64 FR 6184 (Feb. 8, 1999).

[184] 33 U.S.C. 1251(a).

[185] 30 U.S.C. 1292(a).

discussed above, the final rule will be adopted as proposed with the exception of the removal of the reference to ''biological condition of a stream.''

Perennial Stream

As discussed in the preamble to the proposed rule,[186] we proposed to redefine ''perennial stream'' in a manner that is substantively identical to the manner in which the U.S. Army Corps of Engineers defines that term in Part F of the 2012 nationwide permits [187] under section 404 of the Clean Water Act.[188] We are adopting the proposed definition with a few changes. First, in response to commenters requesting that we include runoff from snowmelt to our definition, ''runoff from rainfall events and snowmelt'' is now included within the definition of ''perennial stream.'' This is consistent with the ephemeral and intermittent stream definitions and discussed in more detail within those sections of this preamble. Second, we are adding the statement that ''perennial streams include only those conveyances with channels that display both a bed-and-bank configuration and an ordinary high water mark.'' This addition is also consistent with the ephemeral and intermittent stream definitions discussed herein.

In our revised definition, ''perennial stream'' means a stream or part of a stream that has flowing water year-round during a typical year. One commenter stated that the term ''typical year'' is too vague. Another commenter requested clarification on the length of time meant by ''most of the year.'' Our final definition of ''perennial stream'' is substantively identical to the corresponding U.S. Army Corps of Engineers' definition. Both definitions recognize that perennial streams or segments of those streams may cease flowing during periods of sustained, below-normal precipitation. Thus, a cessation in flow during those periods would not result in the reclassification of the stream as intermittent. To the extent a SMCRA regulatory authority needs additional clarification of the terms ''typical year'' and ''most of the year,'' we recommend that they coordinate with the Clean Water Act authority.

One commenter asserted that the regulations pertaining to a ''perennial stream'' should allow regulatory authorities to adopt and apply regulations that could better protect perennial streams. Similarly, another commenter requested the addition of language recognizing that state protections for all stream types may exceed the U.S. Army Corps of Engineers' requirements and compel regulatory authorities to adopt more stringent protections within the permit conditions. States have the ability to adopt more stringent rules when they are revising their regulations governing surface coal mines and underground mines to satisfy the requirements set forth in the final rule. States can adopt more stringent rules that afford greater protections to ephemeral, intermittent, and perennial streams. Because states already have the authority under section 505(b) of SMCRA [189] to provide for more stringent land use and environmental controls and regulations of surface coal mining and reclamation operations than the provisions of SMCRA, it is not necessary to add additional language to the final rule.

Premining

In response to requests from several commenters, we are adding a definition of ''premining'' to § 701.5 of the final rule. The definition provides that ''premining'' refers to the conditions and features that exist on a site at the time of application for a permit to conduct surface coal mining operations. Some of our regulations refer to conditions or features in existence before any mining occurred on the site, not the conditions or features in existence at the time of preparation of the permit application. In those instances, we typically use the terms ''prior to any mining'' or ''before any mining'' instead of ''premining.''

Reclamation

As we explained in the preamble, we proposed to revise the definition of ''reclamation'' to fully implement SMCRA by expanding the definition to include the entire disturbed area, to encompass all actions taken to restore land and water to the conditions required by SMCRA, and to clarify that the reclaimed land must be capable of supporting the uses it was capable of supporting prior to any mining or, subject to certain restrictions, higher or better uses.[190]

Several commenters requested explanation of the terms ''capable of'' and ''higher or better'' as referenced in the proposed definition. We did not propose to revise the definition of ''higher or better uses'' in this rulemaking. Section 701.5 defines this term as meaning the ''postmining land uses that have a higher economic value or nonmonetary benefit to the landowner to the community than the premining land uses.'' The phrase ''capable of'' was added to the definition of ''reclamation'' because the previous definition could have been misconstrued to require the implementation of the postmining land use, exceeding section 515(b)(2)'s requirement that the disturbed land be restored ''to a condition capable of supporting the uses which it was capable of supporting prior to any mining, or higher or better uses. . . .'' [191] Requiring reclamation of disturbed areas to a condition in which the site is ''capable of'' supporting the uses it was ''capable of'' supporting before any mining is the functional equivalent of requiring that disturbed areas be ''able to'' support the same land uses the land was ''able to'' support prior to mining. This is consistent with the common meaning of the word and nothing in SMCRA indicates that ''capable of'' should be given anything other than the ordinary meaning of the word. For example, the Merriam-Webster Dictionary defines ''capable'' as meaning ''able to achieve efficiently whatever one has to do; competent'' and ''having the ability, fitness, or quality necessary to do or achieve a specified thing.'' [192] Although previous § 816.133 may have been misconstrued to only require that a site be reclaimed for one postmining land use, the revised definition of ''reclamation'' clarifies that the land itself must be reclaimed to support the same variety of land uses it was able to support prior to any mining. Where the land was capable of supporting a wide variety of uses, the reclaimed land must also be able to support those land uses. For example, even if the proposed postmining land use for a formerly forested area is grassland, and grassland is established after mining, the soil must be restored to a condition that could also support forests. In this regard, the ability to successfully support a type of vegetation indicative of a single land use may not alone prove the land's capability has been restored to the requirements of section 515(b)(2) of SMCRA.[193] Finally, previous § 780.23(a)(2)(i), which we adopted in the final rule as § 779.22(b)(1), specifies that capability must be determined on the basis of soil and foundation characteristics,

topography, vegetative cover, and the hydrology of the proposed permit area.

One commenter urged us to include within the definition of ''reclamation'' a reference to the restoration of streams damaged by subsidence. We are not incorporating this recommendation into the final rule because we have specifically addressed this issue within § 784.30, relating to preparation of a ''subsidence control plan and what information must that plan include'' and § 817.121, relating to what measures must be taken to ''prevent, control, or correct damage resulting from subsidence'' within the final rule and discussed more thoroughly within those sections.

Reclamation Plan

Several commenters combined their comments on this definition within their discussion of the definition of ''reclamation.'' Therefore, we addressed the comments regarding ''reclamation plan'' in the same manner as explained in the definition of ''reclamation.'' We received no additional comments on our proposed revisions to this definition; therefore, we are adopting the definition as proposed.

Renewable Resource Lands

We proposed to define ''renewable resource lands'' as ''aquifers, aquifer recharge areas, recharge areas for other subsurface and surface water, areas of agricultural or silvicultural production of food and fiber, and grazing lands.'' The only substantive difference from the previous definition, which we adopted on March 13, 1979, was the addition of recharge areas for surface water.

One commenter expressed concern that the inclusion of recharge areas for surface water could have the effect of classifying all lands within watersheds that drain to a stream or reservoir used for a public drinking water supply as renewable resource lands and thus open the door to challenges seeking to ban all coal mining in those watersheds. According to the commenter, this outcome would be inconsistent with the statement in the DRIA that the proposed rule would not strand or sterilize any reserves; *i.e.,* that the proposed rule would not make any coal reserves that are technically and economically feasible to mine under baseline conditions unavailable for extraction. The commenter further opined that, if we decide to proceed with adoption of the revised definition, we should conduct a detailed socioeconomic impact analysis to fully assess the repercussions of expanding the scope of the definition.

We do not agree with the commenter that the outcome described above represents a change from the status quo. The outcome described by the commenter is consistent with the baseline conditions upon which the DRIA was based. Section 522(a)(3)(C) of SMCRA [194] provides that a regulatory authority may, pursuant to a petition, designate a surface area as unsuitable for certain types of surface coal mining operations if those operations will ''affect renewable resource lands in which such operations could result in a substantial loss or reduction of long-range productivity of water supply or of food or fiber products, and such lands to include aquifers and aquifer recharge areas.'' This language clearly includes watersheds of reservoirs and natural water bodies that function as water supplies. We have always interpreted the definition of ''renewable resource lands'' as including those watersheds.[195] Therefore, there is no need for a socioeconomic analysis of the proposed definition because the revisions are intended to reconcile the definition to both the underlying statutory provision and historical practice.

However, we agree that the scope of the proposed definition is too broad in that it would include the watersheds of all surface waters, not just surface water bodies that serve as water supplies. Therefore, we decided not to adopt the proposed revision to the definition to the extent that it would include ''recharge areas for other subsurface and surface water.'' Instead, we revised the definition to include ''recharge areas for other subsurface water,'' which is consistent with the previous definition's inclusion of areas for the recharge of other underground waters. We also revised the definition to include ''surface water bodies that function as a water supply.'' The latter revision more closely tracks the language of section 522(a)(3)(C) of SMCRA.

One commenter supported the proposed modification of the definition to include recharge areas for surface waters. The commenter recommended that we revise the proposed definition to explicitly identify examples of surface waters by adding ''(such as lakes, ponds, and wetlands)'' after ''surface water.'' We decline to adopt this recommendation because our revision of the definition to include ''watersheds for surface water bodies that function as a water supply'' provides sufficient specificity without being under inclusive or over inclusive.

A commenter noted that the preamble to the proposed definition stated that the definition would include recharge areas for wetlands. *See* 80 FR 44436, 44588 (Jul. 27, 2015). The commenter further noted that the definition itself does not mention wetlands, which means that, in practice, recharge areas for wetlands are unlikely to be protected as renewable resource lands. The commenter recommended that we revise the definition to explicitly include recharge areas for wetlands. We acknowledge the inconsistency cited by the commenter. However, nothing in section 522(a)(3)(C) of SMCRA mentions wetlands as being renewable resource lands. Therefore, we decline to revise the definition as recommended. Wetlands will be considered renewable resource lands only to the extent they are integral features of watersheds of surface water bodies that function as water supplies.

Replacement of Water Supply

We received no comments on our proposed revisions to this definition, which we are adopting as proposed.

Temporary Diversion

One commenter expressed concern that the proposed definition of ''temporary diversion'' includes no specific time for ''temporary.'' The commenter noted that, under the proposed definition, a temporary diversion could remain in place until the end of mining and reclamation activities, which may be measured in decades, and therefore is not consistent with the common usage of the word ''temporary.'' The commenter recommended that, with respect to stream diversions, the word ''temporary'' be subdivided into a ''short-term temporary'' period no more than two years in duration and a ''long-term temporary'' period two years or longer in duration that can extend until the end of mining and reclamation activities.

The commenter correctly points out that proposed §§ 780.28 and 784.28 would establish different standards for a temporary stream channel diversion in place for more than two years as compared to one in place for less than two years. However, we do not agree that the revision suggested by the commenter is necessary or would improve clarity. We define a ''temporary diversion'' as a ''channel constructed to convey streamflow or overland flow'' and specify that the term ''includes only those channels not approved by the

[194] 30 U.S.C. 1272(a)(3)(C).

[195] *See* 48 FR 41327 (Sept. 14, 1983) (''these types of lands [watershed lands] may, on a case-by-case basis, be determined to be renewable resource lands'').

regulatory authority to remain after reclamation as part of the approved postmining land use.'' Thus, a temporary diversion is in place only until its intended purpose has been fulfilled, after which time it is removed. A temporary diversion may be in place through the reclamation phase and bond release, which, as the commenter notes, could be decades. While the term ''permanent diversion'' is not specifically defined, it includes anything that is not a ''temporary diversion.'' We do not define the term ''temporary'' relative to the time a diversion is in place, but rather according to whether it will be removed at some point in the reclamation process.

Relative to the commenter's assertion that the definition should be clarified, we did make changes to § 816.43 in the final rule to establish three categories of diversions (diversion ditches, stream diversions, and conveyances or channels within the disturbed area) and we specify the requirements that apply to each category.

Another commenter stated that the word ''conveyance'' in the definition of a temporary diversion should be removed or, at a minimum, modified so that if the conveyances fail, they will be limited to discharges ''out of the pit.'' The commenter further asserted that ''in pit'' conveyance structures that fail do not pose a risk to the public or the environment. Therefore, according to the commenter, they should not be regulated under SMCRA or the Clean Water Act. We did not alter the final rule in response to this comment because many of these conveyances may be quite lengthy, often thousands of feet in length, and a failure along such a conveyance may result in water flowing away for the pit, not always into the pit as suggested by the commenter, which may potentially result in discharges off site. We did however add language to the final definition to include channels that convey flows to a siltation structure or other treatment facility. Thus, diversions can be constructed within the permit area to convey water to a siltation structure or, as the commenter suggested, to the mine pit.

Waters of the United States

We proposed to define the term ''waters of the United States'' in the same manner it is defined within 40 CFR 230.3(s), which is part of the section 404(b)(1) guidelines under the Clean Water Act.[196] We received comments both supporting and opposing our proposed addition of a definition of this term. After evaluating the comments, we agree that adoption of the definition is unnecessary for implementation of the final rule. In response to comments, we have revised the final rule by replacing the term ''waters of the United States'' with ''waters subject to the jurisdiction of the Clean Water Act, 33 U.S.C. 1251 *et seq.*''

Wetlands

We did not propose to add a definition of ''wetlands.'' However, a few commenters requested that we define ''wetlands'' or, preferably, clarify that the term ''wetlands'' as used in our final rule corresponds to the existing definition within the regulations promulgated pursuant to the Clean Water Act. We find that a unique definition in the final rule is unnecessary. Instead, we will defer to the definition of ''wetlands'' as promulgated by the U.S. Army Corps of Engineers and U.S. Environmental Protection Agency. Additionally, these commenters stated that we should specify in the final rule that wetlands must be delineated using field techniques according to the most recent requirements from the Clean Water Act regulatory authority. One commenter suggested that the U.S. Army Corps of Engineers should delineate, document, map, and field confirm wetlands. This commenter also suggested that we adopt a definition of ''wetlands'' that includes an explanation that ''wetlands are one subset of the Waters of the United States and are subject to the requirements of the Clean Water Act, just as are streams and other regulated bodies.''

We decline to adopt the commenters' recommendations. We are not aware of any instances in which the lack of a definition of ''wetlands'' under SMCRA has created a problem. For regulatory purposes, the term ''wetlands'' is commonly understood to mean wetlands as determined using the diagnostic techniques in the U.S. Army Corps of Engineers Wetlands Delineation Manual, Technical Report Y–87–1, as published in January 1987 and subsequently modified. Paragraph 26 in Part II of that manual summarizes the fundamental characteristics of wetlands. Section 702(a) of SMCRA [197] provides that ''[n]othing in this Act shall be construed as superseding, amending, modifying, or repealing'' the Clean Water Act or ''any rule or regulation promulgated thereunder.'' Therefore, SMCRA regulatory authorities must define and identify wetlands in a manner that is no less inclusive than any definition used under the Clean Water Act. However, section 505(b) of SMCRA [198] specifies that any state law or regulation that provides for ''more stringent land use and environmental controls of surface coal mining and reclamation operations than do the provisions of this Act or any regulation issued pursuant thereto shall not be construed to be inconsistent with this Act.'' Therefore, SMCRA regulatory authorities may use wetlands definitions and delineation techniques that differ from those in the U.S. Army Corps of Engineers' Manual so long as those definitions and techniques do not exclude any areas that qualify as wetlands under the Wetlands Delineation Manual. With respect to the comment that the rule should require that the U.S. Army Corps of Engineers delineate, document, map, and field confirm wetlands, we do not have the authority under SMCRA to impose obligations on the U.S. Army Corps of Engineers. We encourage the SMCRA regulatory authority to coordinate review of permit applications with the U.S. Army Corps of Engineers, but we find no reason to expressly restrict wetland delineation to the U.S. Army Corps of Engineers as part of this final rule.

Section 701.16: How will the stream protection rule apply to existing and future permits and permit applications?

Our proposed rule did not include regulatory text clarifying how the rule would affect existing permits and permit applications. A number of commenters emphasized that the final rule needed to include such a provision, both for clarity and to ensure preservation of the rights of existing permit holders. Some commenters noted that many of the requirements of the stream protection rule, such as expanded baseline data collection and permit application requirements and related performance standards and bond release requirements, would be impossible for existing operations to meet because the site has already been disturbed. According to the commenters, the final rule should apply only to new operations or to additions to existing operations, not to existing permitted lands and reclaimed areas. Others emphasized the general legal principle that regulations should be prospective in nature, not retroactive.

One commenter observed that it is not clear which parts of the proposed rule would apply to existing permits. The commenter noted that the DRIA stated that, for purposes of that analysis, §§ 774.15, 800.18, 800.40, 816.35,

[196] 80 FR 44436, 44478 (Jul. 27, 2015).

[197] 30 U.S.C. 1292(a).

[198] 30 U.S.C. 1255(b).

816.36, 816.41, 817.35, 817.36, and 817.41 would be considered as applying to existing permits. The commenter further stated that the final rule should include interim requirements or a schedule for existing permits and permit applications under review to comply with the final rule.

We agree that, in general, the final rule that we are publishing today should be prospective, not retroactive. Therefore, we have added § 701.16 to clarify the applicability of the rule. Section 701.16 applies only to the revisions to Parts 701 through 827, which paragraph (a) characterizes as the ''stream protection rule.'' Section 701.16 does not affect the revisions to our termination of jurisdiction rules in § 700.11(d) because those revisions merely codify longstanding court decisions and legal representations concerning the applicability of the rules governing the termination and reassertion of jurisdiction. Paragraphs (a)(1) through (5) of § 701.16 establish minimum applicability standards for those stream protection rule provisions that do not contain their own specific applicability provisions.

Section 701.16 supersedes the statement in the DRIA that identifies §§ 774.15, 800.18, 800.40, 816.35, 816.36, 816.41, 817.35, 817.36, and 817.41 as applying to existing permits. Under § 701.16, the stream protection rule would not apply to existing permits unless the permittee applies for certain types of permit revisions. Therefore, there is no need for this rule to establish interim requirements or a compliance schedule for existing permits. Of course, it would not be inconsistent with SMCRA for a regulatory authority to, in its discretion, apply some or all provisions of the stream protection rule to part or all of a permit or application not listed in paragraph (a) of this section.

Paragraph (a)(1) of § 701.16 provides that the stream protection rule applies to any application for a new permit submitted to the regulatory authority after the effective date of the stream protection rule under the applicable regulatory program. One commenter argued that the final rule should apply only to new leases or lands acquired after the effective date of the rule because adoption of the proposed rule would significantly increase the cost of mining large tracts of lands and coal reserves in which companies have already made significant investments. We do not agree. Persons who acquire leases, lands, or interests in land do so subject to future regulatory restrictions on use of those leases, lands, or interests in land. To the extent a property right exists to mine coal in a particular location using a particular method that right does not vest until issuance of a SMCRA permit. Even then, the regulatory authority has the right to require reasonable revision of the permit to ensure compliance with the Act and applicable regulatory program. *See* section 511(c) of SMCRA [199] and the implementing regulations at 30 CFR 774.10(b).

Paragraph (a)(2) of § 701.16 provides that the stream protection rule applies to any application for a new permit pending a decision by the regulatory authority as of the effective date of the stream protection rule under the applicable regulatory program, unless the regulatory authority has determined the application to be administratively complete under § 777.15 or its state program counterpart before the effective date of the stream protection rule under the applicable regulatory program. Exempting administratively complete applications would protect permit applicants who invested time and money in developing a good-faith application under the existing rules.

Paragraph (a)(3) of § 701.16 provides that the stream protection rule applies to any application for the addition of acreage to an existing permit submitted to the regulatory authority after the effective date of the stream protection rule under the applicable regulatory program, with the exception of applications for incidental boundary revisions that do not propose to add acreage for coal removal. Under section 511(a)(3) of SMCRA [200] and 30 CFR 774.13(d), any extensions to the area covered by a permit, except incidental boundary revisions, must be made by application for a new permit. However, some state regulatory programs authorize addition of acreage to an existing permit via the permit revision process, provided that the revision meets the application information requirements for a new permit and the regulatory authority processes the application like an application for a new permit. Paragraph (a)(3) would apply to these situations. We added the provision excluding incidental boundary revisions that add acreage for coal removal as a safeguard against abuse of the exception for incidental boundary revisions.

Paragraph (a)(4) of § 701.16 provides that the stream protection rule applies to any application for the addition of acreage to an existing permit pending a decision by the regulatory authority as of the effective date of the stream protection rule under the applicable regulatory program, with two exceptions. First, the stream protection rule would not apply to applications for incidental boundary revisions that do not propose to add acreage for coal removal. Second, the stream protection rule would not apply to applications that the regulatory authority has determined to be administratively complete before the effective date of the stream protection rule under the applicable regulatory program. The rationale for this paragraph is consistent with the rationale contained in paragraphs (a)(2) and (3).

Paragraph (a)(5) of section 701.16 provides that the stream protection rule applies to any application for a permit revision submitted on or after the effective date of the stream protection rule under the applicable regulatory program, or pending a decision by the regulatory authority as of that date, that proposes a new excess spoil fill, coal mine waste refuse pile, or coal mine waste slurry impoundment or that proposes to move or expand the location of an approved excess spoil fill or coal mine waste facility. Many of the studies cited in Part II of the preamble mention that excess spoil fills are especially detrimental to streams, both because they often cover stream segments and because of the adverse impacts of drainage from and through the fill on aquatic life in streams downstream of the fill. Coal mine waste refuse piles and slurry impoundments have similar characteristics in that they sometimes cover stream segments and because drainage from and through the refuse pile or slurry impoundment could adversely impact aquatic life in receiving streams.

Paragraph (a)(5) protects the rights and investment of existing permittees and persons with administratively complete applications, while limiting that protection to the locations and dimensions approved in the permit or contained in an administratively complete permit revision. Allowing a permittee to revise the permit to add new excess spoil fills or coal mine waste facilities, or to alter the location or size of those fills or coal mine waste facilities, without complying with the provisions of this final rule would be inconsistent with the principal purpose of the stream protection rule; *i.e.,* preventing the loss or degradation of streams.

[199] 30 U.S.C. 1261(c).

[200] 30 U.S.C. 1261(a)(3).

C. Part 773—Requirements for Permits and Permit Processing

Section 773.5: How must the regulatory authority coordinate the permitting process with requirements under other laws?

We are finalizing § 773.5 as proposed. We received no comments on this section.

Section 773.7: How and when will the regulatory authority review and make a decision on a permit application?

We are finalizing § 773.7 as proposed. We received no comments on this section.

Section 773.15: What findings must the regulatory authority make before approving a permit application?

We are adopting § 773.15 as proposed with the exception of paragraphs (e), (j), and (n). One commenter urged us to revise paragraph (e)(2) to provide that a regulatory authority may not approve a permit application unless it determines that the proposed operation is not predicted to cause subsidence that would result in the dewatering of any perennial or intermittent stream. Proposed paragraph (e)(2), like section 510(b)(3) of SMCRA,[201] provides that the regulatory authority may not approve a permit application unless the regulatory authority finds in writing that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area. Therefore, we decline to make the change that the commenter recommends. Instead, the definition of ''material damage to the hydrologic balance outside the permit area'' in § 701.5 of the final rule will govern when dewatering of a perennial or intermittent stream will constitute material damage to the hydrologic balance outside the permit area and thus prevent approval of the permit application.

Proposed paragraph (e)(3) would have required that the regulatory authority include in the permit site-specific criteria for material damage to the hydrologic balance outside the permit area. Proposed paragraph (e)(3) would have required that the criteria be expressed in numerical terms for each parameter of concern. Several commenters opposed this proposed provision, alleging that requiring the regulatory authority to set numerical criteria would supersede the Clean Water Act, which would violate section 702 of SMCRA.[202] Some commenters also cited *In re Surface Mining Regulation Litigation,* 627 F.2d 1346 (D.C. Cir. 1980) as support for their assertions. As discussed further in Part IV.I. of this preamble, neither the proposed rule nor this final rule exceed our authority but instead fills a regulatory gap. This final rule better accomplishes statutory directives in SMCRA, including those that require the prevention of material damage to the hydrologic balance outside the permit area and those that require a minimization of disturbances to the prevailing hydrologic balance at the mine site and in associated offsite areas. *See, e.g.,* 30 U.S.C. 1260(b)(3), 1260(b)(10). However, we did not adopt proposed paragraph (e)(3) as part of the final rule because we determined that we did not need this paragraph to in order to implement the statutory directives. Furthermore, we modified proposed §§ 780.21(b) and 784.21(b) to allow regulatory authorities to select narrative as well as numeric thresholds for material damage to the hydrologic balance outside the permit area for the reasons discussed in the preamble to those sections. In determining the appropriate numeric or narrative thresholds, the regulatory authority will consult with the Clean Water Act authority, as appropriate, and undertake a comprehensive evaluation of the factors set forth in § 780.21(b)(6).

Proposed § 773.15(j) would have required that the regulatory authority find that the operation is not likely to jeopardize the continued existence of species listed or proposed for listing as threatened or endangered under the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.,* or result in destruction or adverse modification of designated critical habitat under that law. We revised proposed § 773.15(j) in response to comments from the public and other federal agencies and as a result of our consultation with the U.S. Fish and Wildlife Service under sections 7(a)(1) and (a)(2) of the Endangered Species Act of 1973.[203] Referring to species listed as threatened or endangered, the Endangered Species Act provides that ''it is unlawful for any person subject to the jurisdiction of the United States to . . . (C) take any such species within the United States.'' [204] ''Take'' is defined in the statute to mean ''to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.'' [205] The U.S. Fish and Wildlife Services' regulations implementing these provisions further define ''harm'' to ''include significant habitat modification or degradation which actually kills or injures fish or wildlife by significantly impairing essential behavioral patterns, including, breeding, spawning, rearing, migrating, feeding or sheltering.'' [206] Take that is incidental to lawful activity is allowed, but only if the person obtains an authorization for that ''incidental take'' from the U.S. Fish and Wildlife Service or the National Marine Fisheries Service, as appropriate, before engaging in the activity.[207] If a person ''takes'' a threatened or endangered species without obtaining authorization from the appropriate agency, that person could be subject to civil or criminal penalties.[208]

Our final § 773.15(j) provides applicants and regulatory authorities with four pathways to demonstrate that the operation will be conducted in compliance with the Endangered Species Act.[209] Paragraphs (j)(1) through (4) set forth those pathways.

Section 773.15(j)(1) applies when the applicant provides documentation that the proposed surface coal mining and reclamation operations would have no effect on species listed or proposed for listing as threatened or endangered under the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.,* or on designated or proposed critical habitat under that law. This finding requires a demonstration that no impact on a proposed or listed species, or on designated or proposed critical habitat, will occur, regardless of the severity of the impact or whether the impact is positive or negative. An applicant might demonstrate this by showing that surveys have not revealed the presence of any listed or proposed species or designated or proposed critical habitat within the proposed permit or adjacent areas or that the operation has been designed to avoid areas where a species is known to occur. However, the permit applicant and the regulatory authority should communicate early in the process with the relevant office of the U.S. Fish and Wildlife Service or National Marine Fisheries Service to ensure that any necessary surveys have been completed and any avoidance measures are sufficient to ensure that there will be no effect on relevant species or habitat.

Paragraph (j)(2) applies when the applicant and the regulatory authority document compliance with a valid

[209] 16 U.S.C. 1531, *et seq.*

biological opinion that covers the issuance of permits for surface coal mining operations and the conduct of those operations under the applicable regulatory program. Paragraph (j)(2) would apply to the biological opinion associated with this rulemaking, or to a biological opinion covering the issuance of permits for surface coal mining operations and the conduct of those operations. Compliance with the pertinent biological opinion is an ongoing obligation that extends for the duration of the surface coal mining and reclamation operations.

Paragraph (j)(3) is an option when we are the regulatory authority or there is another federal nexus to the proposed operation. Under this option, the applicant must provide documentation that interagency consultation under section 7 of the Endangered Species Act of 1973, 16 U.S.C. 1536, has been completed for the proposed operation. Paragraph (j)(4) is an option when a state regulatory authority is responsible for permitting actions, and another option under this paragraph is either unavailable or is not utilized. Under this option, the applicant must provide documentation that the proposed operation is covered under a permit issued pursuant to section 10 of the Endangered Species Act of 1973, 16 U.S.C. 1539.

Some commenters requested that we revise proposed § 773.15(j) because, as initially proposed, they believed this section required the regulatory authority to make a finding that the operation was ''not likely to jeopardize the continued existence of species listed or proposed for listing'' under the Endangered Species Act. The commenters alleged that it was the responsibility of the Service(s) to make a ''jeopardy'' determination and that the regulatory authorities do not have the expertise to make this type of finding. We agree and have clarified the final regulation. As explained above, we revised this section to require the that the regulatory authority make a finding that the permit will comply with the Endangered Species Act, either because the proposed operation will have no effect upon any species listed or proposed for listing as threatened or endangered under the Endangered Species Act of 1973, or on designated or proposed critical habitat under that law or because the applicant and the regulatory authority have documented compliance with one of the mechanisms described in paragraphs (j)(2) through (4).

Many commenters also alleged that imposing a requirement that an operation must not jeopardize the continued existence of species proposed for listing as threatened or endangered under the Endangered Species Act is beyond our authority under SMCRA. Some commenters alleged that we do not have authority to enforce the requirements of the Endangered Species Act. We do not agree with either comment. As we noted in the preamble to the proposed rule, both SMCRA and the Endangered Species Act provide authority to protect species that have been proposed for listing.[210] SMCRA sections 515(b)(24) and 516(b)(11)[211] require that, at a minimum, mining operations must ''to the extent possible using the best technology currently available, minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values, and achieve enhancement of such resources where practicable.'' The requirement to minimize impacts to ''fish, wildlife, and related environmental values'' is not in any way limited to species that have already been listed under the Endangered Species Act.

Moreover, three different provisions of the Endangered Species Act apply to the Department of the Interior in connection with the implementation of SMCRA. First, section 7(a)(1) of the Endangered Species Act[212] provides that ''[t]he Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act.'' That would necessarily include utilizing SMCRA to protect ecosystems and conserve endangered and threatened species as provided for in the Endangered Species Act.[213] Second, section 7(a)(2) of the Endangered Species Act[214] requires us to consult with the U.S. Fish and Wildlife Service or the National Marine Fisheries Service to ''insure that any action authorized, funded, or carried out'' by us will not jeopardize the continued existence of any species listed as threatened or endangered under the Endangered Species Act or result in the destruction or adverse modification of designated critical habitat. Third, section 7(a)(4) of the Endangered Species Act[215] requires that we ''confer with the Secretary on any action which is likely to jeopardize the continued existence of any species *proposed to be listed* under section 4 [of the Endangered Species Act] . . .'' (Emphasis added). Thus, section 7(a)(2) requires us to consult with the appropriate Service(s) on any actions that may impact species listed under the Endangered Species Act or designated critical habitat for those species, while section 7(a)(4) requires us to confer with the appropriate Service(s) on any actions that may jeopardize the continued existence of any species proposed to be listed under the Endangered Species Act (and any critical habitat proposed to be designated for such species). Seizing on this difference, commenters criticize our inclusion of species proposed for listing in certain provisions of this rulemaking, claiming that we have incorrectly conflated the two different requirements. The commenters are wrong. The existence of a consultation requirement under section 7(a)(2) for listed species does not diminish our separate obligation under section 7(a)(4) to address the impact of coal mining operations on species proposed for listing. Section 7(a)(4) (in addition to our SMCRA authorities) provides us with the authority to protect both species proposed for listing and proposed critical habitat.

Regarding paragraph (k), a commenter requested that we include language within paragraph (k) and in other provisions of the rule that relate to the National Historic Preservation Act[216] to explicitly state that those provisions only apply to ''undertakings'' and that our requirements only apply to federal regulatory programs. Similarly, another commenter asked that we clarify that the National Historic Preservation Act is not applicable to state programs and suggested that reference to the National Historic Preservation Act be removed. We did not propose any substantive changes to paragraph (k) and we are not making any changes in that paragraph in response to these comments. The suggestions made by the commenters are contrary to our longstanding position related to this topic as reflected in our 1987 rulemaking, ''Protecting Historic Properties from Surface Coal Mining Operations.'' This final rule amended our regulations with respect to how historic properties are considered during surface coal mining operations. Within that rulemaking, we stated:

> Under section 522(e) of SMCRA, the regulatory authority (and OSMRE for permits it issues) must protect publicly and privately owned properties listed on the National Register of Historic Places. There is no obligation under section 522(e)(3) to protect properties that are eligible for, but not listed on, the National Register. However, this finding requires the regulatory authority to consider such resources when making

permitting decisions in order to assure that the regulatory authority can assist the Secretary in implementing his responsibilities under section 106 of the National Historic Preservation Act.[217]

We continue to adhere to this position. Moreover, our proposed rule did not include any substantive changes to paragraph (k). If we determine it is appropriate to change our position on protecting historic places from surface coal mining operations, this determination would be better addressed in a future rulemaking.

Proposed paragraph (n)(1) would have required that the applicant demonstrate that the proposed operation has been designed to prevent the formation of discharges with levels of parameters of concern that would require long-term treatment after mining has been completed. Proposed paragraph (n)(2) would have required that the applicant demonstrate that there is no credible evidence that the design of the proposed operation will not work as intended to prevent the formation of discharges with levels of parameters of concern that would require long-term treatment after mining has been completed.

A commenter supported proposed paragraph (n), noting that it ensures advances in predicting the formation of mine drainage will be employed to prevent water pollution. However, other commenters expressed concern that the ''no credible evidence'' standard would create uncertainty and result in unjustified permit denials by regulators fearful of approving any permit application in areas where acid-forming or toxic-forming materials are present. In response, we modified paragraph (n)(2) to delete the ''no credible evidence'' standard and replace it with a requirement that the demonstration and finding be based on a thorough analysis of all available evidence. Final paragraph (n)(2) also requires that the applicant explain why a study or other evidence that supports a contrary conclusion is not credible or applicable to the proposed operation.

Final paragraph (n) requires not only a demonstration by the applicant, but also concurrence by the regulatory authority. The requirement for concurrence by the regulatory authority provides an additional safeguard against the approval of applications that ultimately create long-term discharges in need of treatment.

Unlike the proposed rule, final paragraphs (n)(1) and (2) do not refer to ''parameters of concern'' because the purpose of this finding is to prevent the formation of any long-term discharges that require treatment, regardless of whether the parameter that creates the need for treatment is a parameter of concern. In final paragraph (n)(1), we replaced ''parameters of concern'' with the term ''toxic mine drainage,'' which is both more appropriate and more encompassing. There is no need for a replacement term in final paragraph (n)(2).

Several commenters suggested that proposed paragraph (n) should be revised to explain what the term ''long-term treatment'' means, how a determination of a need for long-term treatment is made, and the ramifications if the findings incorrectly determine the need for long-term treatment. We do not agree that there is a need for additional specificity in the text of the rule. ''Long-term'' refers to a discharge that continues to require treatment for more than a short time after the completion of land reclamation. The ramifications of making a demonstration and finding that ultimately prove inaccurate will vary with the circumstances resulting in the discharge, the nature of the discharge, and the timing of the discovery. Possible outcomes include issuance of a permit revision order, enforcement action, or initiation of action to rescind the permit under section 773.20 of this rule. In all cases, the permittee will need to treat the discharge and post appropriate final assurance or bond to cover treatment costs.

A commenter expressed concern that proposed paragraph (n) would shift the burden of monitoring and accountability for everything that happens to water quality in the watershed to the coal industry. We disagree with the commenter. Final paragraph (n)(1) requires that the applicant demonstrate, and the regulatory authority concur, that the proposed operation has been designed to prevent toxic mine drainage that would require long-term treatment after mining has been completed. Final paragraph (n)(2) requires that the applicant demonstrate, and the regulatory authority concur, that a thorough analysis of all available evidence supports a conclusion that the design of the proposed operation will work as intended to prevent the formation of discharges that would require long-term treatment after mining has been completed. Final paragraph (n)(2) also provides that, if a study or other evidence supports a contrary conclusion, the applicant must explain why that study or other evidence is not credible or applicable to the proposed operation. Nothing in final paragraph (n) assigns accountability for all water quality issues in the watershed to the permittee and the monitoring requirements of this final rule are directed toward identifying mining-related impacts on water quality and quantity so that those impacts can be distinguished from nonmining-related impacts.

One commenter asserted that by incorporating paragraph (n) we were improperly attempting to adopt and incorporate by reference a flawed policy document entitled, ''Hydrologic Balance Protection: Policy Goals and Objectives on Correcting, Preventing, and Controlling Acid/Toxic Mine Drainage'' that we issued on March 31, 1997. In that policy and accompanying documents, we explain that approval of a permit that would result in the creation of a discharge requiring long-term treatment would be inconsistent with SMCRA. We do not agree that the policy is flawed because it is fully justified by SMCRA.[218] Therefore, we made no changes to paragraph (n) based on this comment.

We received many comments supporting proposed section (o), which required that the regulatory authority find that, to the extent possible using the best technology currently available, the proposed operation has been designed to minimize disturbances and adverse impacts on fish, wildlife, and related environmental values, as identified in §§ 779.20 or 783.20, and to enhance those resources where practicable, as required under § 780.16 or § 784.16. This language is similar to sections 515(b)(24) and 516(b)(11) of SMCRA [219] and is intended to reinforce compliance with those statutory provisions. We are adopting § 773.15(o) as proposed, with the exception that the final rule does not include the phrase ''as identified in § 779.20 or 783.20'' because those sections do not require identification of all related environmental values.

Section 773.17: What conditions must the regulatory authority place on each permit issued?

We proposed to revise paragraph (e) of this section by adding paragraph (e)(4) to require that the permittee notify the regulatory authority and other appropriate state and federal regulatory agencies of any noncompliance with a term or condition of the permit. Notification would allow those agencies to take any necessary action to minimize the impacts of the noncompliance on the environment or public health or safety, consistent with the purpose

[217] 52 FR 4244 (Feb. 10, 1987).

[218] *See, e.g.,* 30 U.S.C. 1258(a)(13), 1260(b)(3), 1265(b)(10), 1266(b)(9).

[219] 30 U.S.C. 1265(b)(24) and 1266(b)(11).

stated in section 102(a) of SMCRA.[220] We have also added final paragraph (i) that requires compliance with all effluent limitations and conditions in any National Pollutant Discharge Elimination System permit for consistency with §§ 816.41, 816.42, and 817.42.

One commenter generally supported proposed § 773.17(e) but expressed concern that the provision would unnecessarily limit the notification requirement to situations caused by the operator's noncompliance with terms and conditions of the permit. The commenter recommended broadening the requirement in proposed paragraph (e)(4) to include notification to the appropriate regulatory authorities anytime the operator's monitoring reveals the potential for environmental harm, regardless of whether it is caused by the operator's noncompliance. We decline to revise this section as the commenter suggests. As required in final rule § 780.23, an operator must monitor water resources located both within the proposed permit area, as well as adjacent areas. This monitoring must include locations that are situated upgradient and downgradient for groundwater and upstream and downstream for surface water of the mining operations. Samples obtained from the upgradient and upstream monitoring sites are representative of conditions existing in the waters prior to any potential influence of the mining and reclamation activities. Those samples collected from the downgradient and downstream sites are used to evaluate the effect of the operations on water resources once compared to the upgradient/upstream samples. Therefore, any condition detected in the samples, even in those collected in waters prior to entering the mine site indicating an off-site source, that could result in an imminent danger to the health or safety of the public or that could cause or reasonably be expected to cause significant, imminent, environmental harm will be reported as part of the ongoing monitoring requirements regardless of whether or not a noncompliance exists.

Another commenter alleged that the proposed rule language lacked clarity on when the notification was required, what information needed to be included in the notice, and the timing required for the notification. In response to these comments, the language of the final rule has been modified. We have added language in paragraph (e)(4) specifying that the operator must notify the regulatory authority and other appropriate state and federal regulatory agencies whenever conditions within the permit area result in an imminent danger to the health or safety of the public or cause or could be reasonable expected to cause significant, imminent environmental harm to land, air, or water resources, regardless of whether a noncompliance exists. We note, however, that this requirement for immediate notification is only applicable to situations that could result in an imminent danger to public health or safety or significant, imminent environmental harm. For all other situations, as required by § 840.11(a) and (b), the regulatory authority will be at the site for inspections at least monthly and, as required by §§ 816.35(b)(1) and 816.36(b)(1), will review all monitoring data quarterly. Thus, the regulatory authority will have the tools to detect changes that do not rise to the level of imminent harm.

Another commenter objected to the provision in paragraph (e)(4) that would require notice be provided to ''other appropriate state and federal regulatory agencies.'' According to the commenter, the SMCRA regulatory authority is the only agency with jurisdiction over compliance with SMCRA permits. We agree with commenter that the SMCRA regulatory authority has jurisdiction concerning SMCRA permit issues; however, coal mine operations are subject to other state and federal permitting actions. We have, however, limited the scope of paragraph (e)(4) only to those situations that would require the issuance of a cessation order for imminent danger or environmental harm under § 843.11(a). That approach should minimize the reporting burden on the permittee, while ensuring that the regulatory authority and other appropriate agencies receive notice of situations that require immediate attention to protect the public or prevent significant environmental harm from occurring.

We also proposed to add a new permit condition in paragraph (h) of this section, which would require the permittee obtain all necessary authorizations, certifications, and permits in accordance with Clean Water Act requirements before conducting any activities that require approval or authorization under the Clean Water Act. Several commenters objected to this proposed addition. A couple of commenters stated that requiring Clean Water Act permits before mining contradicted section 702 of SMCRA.[221] Others interpreted proposed paragraph (h) as allowing SMCRA to supersede the authority of Clean Water Act agencies in determining when permits are required. We do not agree with those commenters who stated that it violated section 702(a) of SMCRA or otherwise superseded the authority of Clean Water Act agencies. Nothing in the language of this condition authorizes the SMCRA regulatory authority to determine when a Clean Water Act permit is needed—that is exclusively the jurisdiction of the agencies responsible for implementing and administering the Clean Water Act. Instead, the condition merely underscores that the permittee must obtain any required permits, authorizations, or certifications before initiating mining activities for which those permits, authorizations, and certifications are needed. The condition will allow the SMCRA regulatory authority to take enforcement action if another agency determines that a non-SMCRA permit is needed, but the SMCRA permittee does not obtain the necessary permit before beginning the pertinent mining operations.

These same commenters also questioned why we would single out the Clean Water Act as opposed to other state and federal permits for inclusion as permit conditions. After evaluating these comments, we have decided to expand the scope of paragraph (h) to require that the permittee obtain all necessary authorizations, certifications, and permits in accordance with ''other applicable federal, state, and tribal laws before conducting any activities that require authorization, certification, or a permit under those laws.'' Within the proposed rule, we limited the scope of this provision to the Clean Water Act because that is the primary federal statute applicable to water quality and given the focus of this rule it satisfied our purpose to highlight the need for compliance with the Clean Water Act and to enhance coordination with the Clean Water Act authorities. *See* 80 FR 44436, 44480 (Jul. 27, 2015). Upon further review, we find no reason to limit the scope of this provision to the Clean Water Act as it is equally important that the permittee comply with all applicable laws.

As discussed in Part IV, above, in response to general comments about direct enforcement of water quality standards we have added paragraph (i) to final rule *§* 773.17. This paragraph adds a condition whereby the permittee must comply with all effluent limitations and conditions in any National Pollutant Discharge Elimination System permit issued for their operation by the appropriate authority under the Clean Water Act. As we explained in Part IV of the preamble,

[220] 30 U.S.C. 1202(a).

[221] 30 U.S.C. 1292.

the addition of this required permit condition and the revised rule text at 30 CFR 816.42 supports our longstanding regulatory requirement that coal mining operations must comply with the effluent limitations prescribed by Clean Water Act authorities in NPDES permits under section 402 of the Clean Water Act.[222] In combination, these revisions are intended to ensure that violations of effluent limitations are violations of the SMCRA permit, and therefore are enforceable by the SMCRA regulatory authority.

Section 773.20: What actions must the regulatory authority take when a permit is issued on the basis of inaccurate information?

Under proposed § 780.19(k), a permit issued on the basis of what the regulatory authority later determines to be substantially inaccurate baseline information would be void from the date of issuance and have no legal effect. Proposed paragraph (k) also would have required that the permittee cease mining-related activities and immediately begin to reclaim the disturbed area upon notification by the regulatory authority that the permit is void.

Some commenters opposed proposed § 780.19(k) on the basis that it deprived permittees of their rights without due process and that the phrase ''substantially inaccurate'' was too subjective, vague, poorly defined, essentially unlimited in scope, and difficult to enforce. One commenter alleged that proposed paragraph (k) was unreasonable because it did not consider whether the inaccuracy was intentional or had any material impact. Another commenter characterized the proposed paragraph as an unauthorized punitive provision that lacks any statutory support. According to that commenter, section 521(a)(4) of SMCRA [223] provides the sole circumstances under which a SMCRA permit may be revoked—and then only for a pattern of violations.

The commenter further alleged that the explanation in the preamble that proposed § 780.19(k) is necessary to avoid or minimize the environmental harm that could result from initiation or continuation of an operation approved on the basis of inaccurate baseline information constitutes flawed reasoning because proposed paragraph (k) does not require any connection between the inaccurate baseline information and environmental harm—it merely presumes harm without a sufficient foundation. According to the commenter, the sanction (permit nullification) is disproportionately harsh compared to the lesser sanctions and penalties that section 521 of SMCRA [224] authorizes for violations that are causing actual harm on the ground. The commenter noted that, unlike proposed paragraph (k), section 521 affords the permittee due process with respect to the sanctions and penalties that it authorizes. Finally, the commenter urged that we rely upon the regulatory authority's power to order revision of a permit under section 511 of SMCRA [225] to address legitimate concerns with permits that have been issued.

Several commenters expressed concern that adoption of proposed § 780.19(k) would create uncertainty as to the validity of the bond posted for the permit. One commenter suggested that the rule should be revised to specify that the permit would be revoked rather than voided, a change that the commenter indicated would resolve uncertainty about the status of the bond. Several commenters also expressed concern that because the permit would be considered null and void from the date of issuance, the former permittee theoretically could be subject to enforcement action for mining without a permit during the time between permit issuance and permit nullification.

One commenter thought that we had already addressed this issue in the regulations at §§ 773.21 through 773.23 governing improvidently issued permits. That is not the case, however, because those regulations apply only to the permit eligibility criteria of the applicable regulations implementing section 510(c) of SMCRA; [226] *i.e.,* an improvidently issued permit is a permit that should not have been issued because, at the time of permit issuance, the permittee or operator owned or controlled a surface coal mining and reclamation operation with an unabated or uncorrected violation. *See* 30 CFR 773.21(a). Another commenter suggested that we replace proposed paragraph (k) with regulations analogous to those that apply to improvidently issued permits. However, this commenter, like several other commenters urged us to limit their applicability to situations in which information has been falsified or the applicant intentionally submits inaccurate or incomplete data.

After evaluating the comments received, we have decided not to adopt proposed § 780.19(k). Instead, as suggested by one commenter, we are replacing the permit nullification provisions of that paragraph with procedures and requirements analogous to those that apply to improvidently issued permits under §§ 773.21 through 773.23. This approach will afford the permittee ample due process, as urged by numerous commenters. Consistent with the new approach, we are codifying the replacement provisions in section 773.20 rather than section 780.19 because Part 773 contains the requirements for permit processing. However, we do not agree with those commenters who suggested that these regulations should apply only when information has been falsified or when the applicant intentionally submits inaccurate or incomplete data. The purpose of final § 773.20 is to minimize both the possibility that mining conducted under permits approved on the basis of inaccurate information could result in environmental harm and the extent of that harm. The reason for the inaccuracy of the information is not relevant to attainment of this purpose. Thus, limiting § 773.20 to situations in which permit application information was intentionally falsified would be counterproductive and inconsistent with the purpose of this section.

We also disagree with the comment that section 521(a)(4) of SMCRA provides the sole circumstances under which a SMCRA permit may be revoked. As discussed in the preamble to the rule concerning improvidently issued permits,[227] the U.S. Court of Appeals for the D.C. Circuit has held that SMCRA provides both express and implied authority for the suspension or rescission of improvidently issued permits:

> While it is true that section 510(c) does not expressly provide for suspension or rescission of existing permits, the IFR [interim final rule] rescission and suspension provisions reflect a permissible exercise of OSM's statutory duty, pursuant to section 201(c)(1) of SMCRA, to ''order the suspension, revocation, or withholding of any permit for failure to comply with any of the provisions of this chapter or any rules and regulations adopted pursuant thereto.'' 30 U.S.C.[ ] 1211(c). The IIP [improvidently issued permit] provisions simply implement the Congress's general directive to authorize suspension and rescission of a permit ''for failure to comply with'' a specific provision of SMCRA—namely, section 510(c)'s permit eligibility condition. In addition, apart from the express authorization in section 1211(c), OSM retains ''implied'' authority to suspend or rescind improvidently provided permits

[222] 33 U.S.C. 1342.

[223] 30 U.S.C. 1271(a)(4).

[224] 30 U.S.C. 1271.

[225] 30 U.S.C. 1261.

[226] 30 U.S.C. 1260(c).

[227] 65 FR 79583–79584 and 79628 (Dec. 19, 2000).

because of its express authority to deny permits in the first instance.[228]

The same rationale applies to final § 773.20 because it authorizes suspension or rescission of a permit for failure to comply with a specific provision of SMCRA; *i.e.,* the prohibition in section 510(b)(1) [229] against approval of a permit application unless the regulatory authority finds in writing that ''the permit application is accurate and complete and that all the requirements of this Act and the State or Federal program have been complied with.'' Similarly, under the rationale set forth by the court, the regulatory authority has implied authority under SMCRA to suspend or rescind permits issued on the basis of inaccurate information because the regulatory authority has the authority to deny the permit in the first instance.

We further disagree with the comment that described the proposed paragraph as duplicative and unnecessary because states already have effective administrative processes in place to scrutinize data and address issues. We applaud the administrative processes that states have put in place as safeguards against the approval of permit applications with inaccurate baseline information. However, no process is perfect. Final § 773.20 provides a mechanism to address defective permits that slip through those safeguards.

Paragraph (a) of § 773.20 provides that the regulatory authority must initiate action that could lead to suspension or rescission of the permit whenever the regulatory authority discovers that the permit was issued on the basis of what later turns out to be inaccurate baseline information. In response to commenters' concerns that the ''substantially inaccurate'' threshold in proposed § 780.19(k) was too subjective and too broad in scope, we added a proviso that § 773.20(a) applies only if the information is inaccurate to the extent that it would invalidate one or more of the findings required for permit application approval under § 773.15 or other provisions of the regulatory program.

Paragraphs (b) through (d) of § 773.20 are a streamlined version of the requirements and procedures in 30 CFR 773.21 through 773.23 pertaining to improvidently issued permits. We have adapted those requirements and procedures as appropriate, discarding provisions that are unique to improvidently issued permits. We have replaced the references to the administrative review procedures of 43 CFR 4.1370 through 4.1377, which apply only to improvidently issued permits, with references to 30 CFR part 775, which contains administrative and judicial review provisions pertinent to decisions on permits. In addition, we established a uniform 60-day notice period for proposed suspensions and rescissions, rather than adopting the 60-day notice period for proposed suspensions and 120-day notice period for proposed rescissions set forth in § 773.22(b) and (c). We find that there is no purpose or need for the longer notice period for proposed rescissions, particularly when the purpose of § 773.20 is to minimize any environmental harm that may result from the issuance of permits on the basis of inaccurate information. Finally, in 30 CFR 773.20 (c) and (d), we provide a mechanism through which the permittee can avoid permit suspension or rescission by providing updated information and submitting an application to revise the permit as needed to correct the deficiency. We are adopting this mechanism in part because of comments urging us to allow the permittee to take corrective action instead of requiring nullification of the permit. As the commenters noted, permit nullification would be disproportionately harsh compared to the sanctions and penalties that SMCRA and the regulations impose for performance standard violations. Providing an alternative to permit suspension or rescission also is responsive to a comment that we should allow use of the permit revision procedures of section 511 of SMCRA to remedy the deficiency.

Paragraph (e) of § 773.20 sets forth the actions that the permittee must take if a permit is suspended or rescinded. Paragraph (e) is similar to, and based upon 30 CFR 843.13(c), which specifies the actions that the permittee must take if a permit is suspended or revoked for a pattern of violations. Paragraph (e)(1) provides that, if the permit is suspended, the permittee must cease all surface coal mining operations under the permit and complete all affirmative obligations specified in the suspension order within the time established in that order. It also specifies that the regulatory authority must rescind the permit if the permittee does not complete those obligations within the time specified. Paragraph (e)(2) provides that, if the permit is rescinded, the permittee must cease all surface coal mining operations under the permit and complete reclamation within the time specified in the rescission order.

Paragraph (f) of § 773.20 addresses commenter concerns about the impact on bond coverage. Paragraph (f)(1) provides that, if the regulatory authority suspends or rescinds a permit, the bond posted for the permit will remain in effect until the permittee completes all reclamation obligations under the reclamation plan approved in the permit and obtains bond release under §§ 800.40 through 800.44. Paragraph (f)(2) provides that the regulatory authority must initiate bond forfeiture proceedings under § 800.50 if the permittee does not complete all reclamation obligations within the time specified in the permit rescission order.

D. Part 774—Revision; Renewal; Transfer; Assignment, or Sale of Permit Rights; Post-Permit Issuance Requirements

Section 774.9: Information Collection

Section 774.9 pertains to compliance with the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.* We are adding contact information for persons who wish to comment on these aspects of part 774.

Section 774.10: When must the regulatory authority review a permit after issuance?

We are adopting § 774.10 as proposed, with the exception that we are reorganizing paragraph (a) and adding a new paragraph (a)(2), which replaces proposed § 780.16(c)(5). In the final rule, we are re-designating the introductory text of proposed § 774.10(a) as paragraph (a)(1). In concert with this change, we are re-designating proposed paragraphs (a)(1) through (4) as paragraphs (a)(3) through (6).

Proposed § 780.16(c)(5) required that the permittee periodically evaluate the impacts of the operation on fish, wildlife, and related environmental values in the permit and adjacent areas and then use that information to modify the operations to avoid or minimize adverse effects. Several commenters requested that we provide guidance or specify the frequency and rigor of the mandated periodic evaluation of an operation's impact on fish and wildlife. Additionally, commenters requested clarification as to whose responsibility it would be to complete this evaluation. Some commenters opposed this paragraph because it could be interpreted as requiring that the permittee modify operations even when the adverse effects on wildlife are beyond the control of the permittee.

[228] *Nat'l Mining Ass'n* v. *Dep't of the Interior,* 177 F.3d 1,9 (D.C. Cir. 1999) (''*NMA* v. *DOI II*'').

[229] 30 U.S.C. 1260(b)(1).

Other commenters found this paragraph to be unnecessarily disruptive in that it would undermine the certainty provided by approval of the permit application. In response to these comments, we are not adopting proposed § 780.16(c)(5). Instead, we are including a modified version of that paragraph within the final rule as § 774.10(a)(2). Under the final rule, evaluation of the impacts of the operation on fish, wildlife, and related environmental values will be part of the midterm permit review conducted by the regulatory authority and thus will be the responsibility of the regulatory authority. This timing and the shift in responsibility from the permittee to the regulatory authority is appropriate because the purpose of the midterm permit review is to determine whether the assumptions and predictions upon which permit application approval was based have proven reasonably accurate. If the assumptions and predictions are not accurate, the regulatory authority will issue an order to the permittee to revise the permit to ensure compliance with the regulatory program. In this case, if the regulatory authority determines, as a result of the midterm permit review, that the fish and wildlife protection and enhancement plan approved in the permit is not effectively minimizing disturbances and adverse impacts on fish, wildlife, and related environmental values to the extent possible using the best technology currently available, as required by section 515(b)(24) of SMCRA,[230] the regulatory authority will issue an order to the permittee to revise the permit to update the technology required or make other changes necessary to comply with this provision of the Act. The regulatory authority has the discretion to determine the extent of the evaluation conducted as part of the midterm permit review.

Section 774.15: How may I renew a permit?

We proposed within paragraph (b)(2)(vii), relative to application requirements and procedures, to require an analysis of the monitoring results under §§ 816.35 through 816.37 or §§ 817.35 through 817.37, relating to groundwater, surface water, and biological condition of streams and an evaluation of the accuracy and adequacy of the determination of the probable hydrologic consequences of mining prepared under § 780.20 or § 784.20 of this chapter. We also proposed at paragraph (b)(2)(viii) to require an update of the determination of the probable hydrologic consequences of mining prepared under § 780.20 or § 784.20, if needed, or documentation that the findings in the existing determination are still valid.

In addition, proposed paragraph (c)(1), relating to the approval process, provided that a complete and accurate renewal application will be approved unless certain findings are made. We proposed one such finding at (c)(1)(viii), which would allow a regulatory authority to disapprove an application for renewal if the regulatory authority determined, based on an analysis of the monitoring results or the updated determination of the probable hydrologic consequences of mining, that the finding it originally made under § 773.15(e)—the operation is designed to prevent material damage to the hydrologic balance outside the permit area—is no longer accurate.

Several commenters objected to proposed requirements at (b)(2)(vii), (b)(2)(viii), and (c)(1)(viii). These commenters expressed concern that the proposed requirements would compromise the right of successive renewal and recommended the deletion of these regulations. The commenters also stated that there are existing opportunities to review data as it relates to the probable hydrologic consequences, and it is unnecessary to couple a data review requirement with permit renewal. After reviewing the comments, we agree with the commenters and have deleted the proposed requirements at (b)(2)(vii), (b)(2)(viii), and (c)(1)(viii) from the final rule.

E. Part 777—General Content Requirements for Permit Applications

Section 777.1: What does this part cover?

We are finalizing § 777.1 as proposed. We received no comments on this section.

Section 777.11: What are the format and content requirements for permit applications?

Proposed paragraph (a)(3) of this section would have required that all permit applications be filed in an electronic format prescribed by the regulatory authority unless the regulatory authority grants an exception for good cause. One commenter supported this proposal because it would facilitate the acquisition and transfer of permit files by coalfield residents via the internet and avoid the need for those residents to make a lengthy trip to the office of the regulatory authority and copy sometimes unwieldy documents. However, other commenters alleged that adoption of this provision would require major changes in state regulatory programs at great expense for both the regulatory authority and the applicant. Several commenters characterized the proposed requirement as an unfunded mandate on the states unless we are prepared to award grants to states to fully fund the infrastructure needed for electronic permitting. One commenter acknowledged that a fully implemented electronic permitting system may facilitate transfer of application documents, thus avoiding copying and mailing costs. However, the commenter noted, these savings may be illusory as the regulatory authority likely also would request multiple hard copies. Some commenters argued that decisions on electronic permitting should be left to the state regulatory authorities. Another commenter alleged that SMCRA provides no authority for us to prescribe the format of permit applications.

For the reasons set forth in the preamble to the proposed rule,[231] we continue to support and encourage the use of electronic permitting. However, we recognize that state regulatory authorities differ in their capability to implement electronic permitting and that implementation may not be cost-effective or practicable in all cases. In addition, we cannot guarantee availability of the funding needed to implement electronic permitting. Therefore, we have not adopted § 777.11(a)(3) as proposed and have removed reference to any requirement that permit applications be filed in an electronic format. Therefore, the final rule text is substantially similar to previous regulation § 777.11. As finalized, paragraph (a)(3) is substantively identical to section 507(b) of SMCRA,[232] which provides that ''[t]he permit application shall be submitted in a manner satisfactory to the regulatory authority.''

Several commenters provided suggestions on how large map files, professional certifications, and verification of submittals could be submitted electronically. One commenter recommended that all systems include a common system component, which could allow a company to use a central system that can easily be transferred to a common file type for delivery across multiple states. Another commenter urged that digital permit files be available for download on a document-by-document

[230] 30 U.S.C. 1265(b)(24).

[231] *See* 80 FR 44436, 44481 (Jul. 27, 2015).

[232] 30 U.S.C. 1257(b).

basis because persons with computers that have slow processor speeds may not be able to open permits in large file format without having their computers crash repeatedly. The commenter also recommended that digital permit files be available on both compact disc and flash drive and that digitally submitted maps, plans, and cross-sections be made available in both high-definition and low-definition versions. We recognize the merit of these suggestions and recommendations. However, we are not including them in the final rule because final paragraph (a)(3) does not require use of electronic permitting. Regulatory authorities electing to require the submission of permit applications electronically may wish to consider these recommendations.

Section 777.13: What requirements apply to the collection, analysis, and reporting of technical data and to the use of models?

Final Paragraph (a): Technical Data and Analyses

In paragraph (a)(1), we proposed to add requirements for the submission of certain data, such as metadata and field sampling sheets associated with the technical data submitted in the permit application. Several commenters asserted that requiring materials submitted to the regulatory authority (including technical data, maps, plans and cross sections) to be accompanied by metadata, where appropriate, was a good idea and provided valuable information to the regulatory authority. However, several regulatory authorities opined that the requirements under § 777.13, including providing metadata would create an undue hardship for the regulatory authority by requiring additional funds and personnel to log, track, and review the data. We are aware that we will be requiring the operator to collect additional data and submit that data to the regulatory authority, but the data is necessary to establish quality, comprehensive baseline data, along with mining and post-mining data that will help ensure there are no adverse impacts from coal mining operation that would cause material damage to the hydrologic balance outside the permit area. As explained further in the proposed rule, metadata, which consists of data describing the contents and context of data files, greatly increases the usefulness of the original data by providing information about how, where, when, and by whom the data were collected and analyzed.[233]

Several commenters opined that the requirement within proposed paragraph (a) about submitting the results of the laboratory quality assurance and quality control procedures to the regulatory authority was vague and did not include the relevant information necessary to determine the level of quality assurance and quality control (level I, II, III, or IV). In addition, the commenters claimed the requirement for electronically submitted data including the identification of any data transformations would require significant effort by the laboratories that perform this work. The commenters opined the transformed data are typically identified by the laboratory through the use of flags within the final laboratory report and because these flags are generated by the laboratory the flags are likely to differ from lab to lab. Our intent with this requirement is to ensure the quality assurance and quality control data, regardless of the level, is submitted to the regulatory authority so that they can review the data. Furthermore, transformed data should be noted by the laboratory. However, we are not requiring the codes used to denote the transformed data to be the same for all laboratories. Therefore, based on these comments, we did not make any changes to proposed paragraph (a), pertaining to the submission of laboratory quality assurance and quality control data, in the final rule.

However, for the purpose of clarification, we added additional language to the final rule about water quality field sampling sheets that are required to be submitted to the regulatory authority. In the proposed rule, we required field sheets for water quality samples from wells.[234] It was our intent that a permittee submit to the regulatory authority sample field sheets for all water quality samples collected from surface water and groundwater monitoring. Our intent is supported by proposed paragraph (b) where we reference sampling and analysis of surface water and groundwater. To clarify this we added language to final paragraph (a) expressly requiring submission of the field sampling sheets for each surface-water sample collected and for each groundwater sample collected from wells, seeps, and springs. We added ''seeps and springs'' to the list of sample field sheets we require a permittee to submit to the regulatory authority because seeps and springs are commonly monitored to assess water quality of groundwater,

Final Paragraph (b): Sampling and Analyses of Groundwater and Surface Water

In paragraph (b) we proposed to add a requirement that sampling and analyses of surface water and groundwater be conducted according to the methodology in 40 CFR parts 136 and 434. Several commenters asserted that some of the methodology in 40 CFR parts 136 and 434 is not applicable to the type of sampling and analysis conducted at coal mines and the operator should be allowed to use a scientifically-valid methodology acceptable to the regulatory authority. We agree. To address this comment, we revised paragraph (b) to clarify that all sampling and analyses of groundwater and surface water be performed to satisfy all the requirements of this subchapter and that they are conducted according to the methodology in 40 CFR parts 136 and 434; or scientifically-defensible methodology acceptable to the regulatory authority, in coordination with any agency responsible for administering or implementing a program under the Clean Water Act that requires water sampling and analysis. The addition of (b)(2) takes a reasonable approach to sampling and analyses of surface water and groundwater requirements of this subchapter.

Additionally, we received several comments from industry and regulatory authorities recommending that we remove the requirements to provide surface water and groundwater sampling field sheets to the regulatory authority. Instead, these commenters suggested that the regulatory authorities should be able to use their discretion to request them as needed. We disagree. Surface water and groundwater sampling field sheets contain the metadata regarding field parameter measurements and methods used in the collection of water quality samples of both surface water and groundwater. Meta data contained on sampling field sheets, such as, calibration information for instruments used to measure field parameters and information concerning the sampling methods used to collect water quality samples are necessary to accurately assess the water quality data. Further, several commenters suggested that sending groundwater sampling field sheets to the regulatory authority does not enhance the review process because applicants already provide boring logs and well construction diagrams which include information concerning the depth of the well screens for all monitoring wells included as a part of the permit application. In addition, the commenters asserted that descriptions

[233] 80 FR 44436, 44481 (Jul. 27, 2015).

[234] 80 FR 44436, 44592 (Jul. 27, 2015).

of the sampling methodology for all groundwater samples are included in detail within the hydrogeology sections of the SMCRA permit application and that the static water level collected prior to any purging should be considered sufficient for understanding whether the well screen was or was not fully saturated on the sample date. We disagree with the commenters' assertions about the lack of importance of groundwater field sheets when reviewing hydrologic data from the well. We are requiring groundwater sampling sheets be submitted to the regulatory authority because the groundwater sampling sheets contain information about instrument calibration, well purging, and sample collection that are necessary to thoroughly review water-quality data and are not included in the information referenced in the comment. Therefore, no changes were made to the final rule in response to this comment.

Final Paragraph (c): Geological Sampling and Analysis

We received one comment about proposed paragraph (c). The commenter opined that by requiring all geologic sampling and analysis to be conducted using a scientifically valid mythology, it would result in increases in costs and time for permit preparation and approval. We agree that increases in costs and time for permit preparation and approval may occur; however any cost increase is outweighed by the added benefit of better permitting decisions using comprehensive and high quality geologic data. Therefore, we made no changes to paragraph (c) in response to this comment. However, in response to a federal agency comment, in the final rule we use the term ''scientifically-defensible methodology,'' instead of the term ''scientifically-valid methodology,'' as proposed.

Final Paragraph (d): Use of Models

A few commenters requested an explanation for our alleged aversion to the use of models to characterize baseline hydrologic condition within § 777.13(d) when elsewhere in the rule we allow models to evaluate ecological function of streams through the use of bioassessment protocols. These commenters assert that this alleged disparity creates regulatory inconsistency and should be addressed for clarity. These commenters mischaracterize our position. In final paragraph (d), we allow for the use of models as long as they incorporate site specific data to calibrate each model. Contrary to commenters' assertions, we also require site specific data for our evaluation of ecological function; therefore our regulations are consistent.

We also proposed to modify the existing provisions by adding paragraph (d)(2), which would require that all models be calibrated using actual, site-specific data and that they be validated for the region and ecosystem in which they will be used. By adding these additional requirements we intend to improve the accuracy and validity of models and promote better data collection and analysis procedures to ensure more informed permitting decisions. Several commenters from industry and regulatory authorities recommended that we provide regulatory authorities sufficient discretion to allow for professional judgment concerning the necessity for site-specific data and the data requirements to process models. Also, several commenters opined that using site-specific data for calibration may not be possible because it may be costly and the regulatory authority does not have control of activities outside of coal mining permit, thus making it difficult to include that site specific data. We disagree because it is important to use actual site-specific data to calibrate the models. A model that is calibrated using site-specific data is more likely to provide better modeling results.

Therefore, the final rule adopts § 777.13 as proposed, with minor changes as explained herein to paragraphs (a), (b), and (d).

Section 777.14: What general requirements apply to maps and plans?

We revised § 777.14 from the proposed section by making editorial revisions to clearly distinguish between requirements that apply to maps and plans for all operations and those that apply only to maps and plans for operations in existence before the effective date of a permanent regulatory program for the state in which the operation is located. Specifically, paragraph (a) applies to maps and plans for all operations, while paragraph (b) applies only to maps and plans for operations in existence before the effective date of a permanent regulatory program for the state in which the operation is located. This distinction is consistent with the preamble to this rule as originally promulgated, which states that ''[t]he concept of delineation of phases of mining on application maps relates to key dates in the interim [initial] and permanent regulatory programs establishing different periods and levels of regulation under the Act.'' *See* 44 FR 15017 (Mar. 13, 1979).[235]

In the final rule, we removed the first sentence of previous paragraph (b) because it is poorly worded, unnecessary, duplicative of the remainder of paragraph (b), and could erroneously be interpreted as applying to maps and plans for all operations, not just maps and plans for operations in existence before the effective date of a permanent regulatory program for the state in which the operation is located. We also revised paragraph (b) to clarify that its provisions apply only when applicable; *i.e.,* that there is no need to provide maps and plans showing each period listed in paragraphs (b)(1) through (3) if the operations was not in existence during one or more of those periods.

Previous paragraph (b)(4) required that maps and plans show those portions of the operation where surface coal mining operations occurred after the estimated date of issuance of a permit under the approved regulatory program. This paragraph is unnecessary because the map of the proposed permit area identifies the lands upon which surface coal mining and reclamation operations will take place after issuance of the permit. Furthermore, previous paragraph (b)(4) inappropriately refers to surface coal mining operations that occurred after the estimated date of permit issuance. This language is inconsistent with section 506(a) of SMCRA,[236] which specifies that ''no person shall engage in or carry out on lands within a State any surface coal mining operations unless such person has first obtained a permit. . . .'' Therefore, final section 777.14 does not include a counterpart to previous paragraph (b)(4).

Section 777.15: What information must my application include to be administratively complete?

We are finalizing § 777.15 as proposed. We received no comments on this section.

F. Part 779—Surface Mining Permit Applications—Minimum Requirements for Information on Environmental Resources and Conditions

Section 779.1: What does this part do?

With the exception of altering the title of this section for clarity, we are

[235] The contents of 30 CFR 777.14 were originally published on March 13, 1979 as 30 CFR 771.23(e) before their redesignation as 30 CFR 777.14 on Sept. 28, 1983. The 1979 preamble incorrectly refers to 30 CFR 771.23(e) as 30 CFR 771.21(e).

[236] 30 U.S.C. 1256(a).

finalizing section 779.1 as proposed. We received no comments on this section.

Section 779.2: What is the objective of this part?

We are finalizing § 779.2 as proposed. We received no comments on this section.

Section 779.4: What responsibilities do I and government agencies have under this part?

We are finalizing § 779.4 as proposed. We received no comments on this section.

Section 779.10: Information Collection

Section 779.10 pertains to compliance with the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.* We are adding contact information for persons who wish to comment on these aspects of part 779.

Previous § 779.11: General Requirements

We have removed and reserved previous § 779.11 for the reasons discussed in the preamble to the proposed rule.[237]

Previous § 779.12: General Environmental Resources Information

We have removed and reserved previous § 779.11 for the reasons discussed in the preamble to the proposed rule.[238]

Section 779.17: What information on cultural, historic, and archeological resources must I include in my permit application?

We are finalizing § 779.4 as proposed. We received no comments on this section.

Section 779.18: What information on climate must I include in my permit application?

One commenter requested that we add language requiring climate data and analysis to this section. We did not add this requirement because a requirement to include a statement of the climatic factors, including average seasonal precipitation, direction and velocity of winds, and temperature ranges, is already required under final rule §§ 779.18 and 783.18 and additional information under this section would not add meaningful information.

Section 779.19: What information on vegetation must I include in my permit application?

Several commenters, including the U.S. Forest Service and other federal agencies, expressed support for the proposed changes to this section. In particular, these commenters voiced strong support for the use of native species rather than introduced species because the use of native species would minimize adverse effects on fish and wildlife.

Other commenters opposed the proposed revisions to § 779.19 as unnecessary and excessively burdensome. These commenters urged us not to adopt the proposed revisions and instead simply reaffirm the regulatory authority's discretion to require vegetation information as needed. We disagree that the previous regulations were adequate. The previous regulations provided the regulatory authority with complete discretion in deciding whether to require submission of vegetation information as part of the permit application. In view of other changes to our regulations to generally require revegetation with native species and reestablishment of native plant communities (with certain exceptions), discretionary submission of premining vegetation information is no longer appropriate. The vegetation information required by final section 779.19 is essential to fully implement the revegetation requirements of section 515(b)(19) of SMCRA,[239] which provides that surface coal mining operations must establish ''a diverse, effective, and permanent vegetative cover of the same seasonal variety native to the area of land to be affected and capable of self-regeneration and plant succession at least equal in extent of cover to the natural vegetation of the area.'' To comply with this requirement, both the applicant and the regulatory authority need to know the vegetative cover native to the area of land to be affected and the extent of cover of the natural vegetation of the area. The information must be in sufficient detail to assist in preparation of the revegetation plan under § 780.12(g) and to provide a baseline for comparison with postmining vegetation, as final paragraph (b)(1) requires. In addition, the information required by § 779.19 will assist in implementation of section 508(a)(2) of SMCRA,[240] which requires that the reclamation plan in each permit application identify both the premining land uses and the capability of the land prior to any mining to support a variety of uses.

In response to comments that the proposed rule was unnecessary and excessively burdensome, we reevaluated each element of the proposed rule and narrowed the requirements down to those that we determined to be necessary to ensure revegetation and reclamation of mine sites in accordance with SMCRA. We also reorganized and restructured the rule to improve clarity.

Proposed paragraph (a)(1) would have required that the applicant identify, describe, and map existing vegetation types and plant communities on the proposed permit and adjacent areas and within any proposed reference areas. Several commenters asserted that we lack the authority under SMCRA to require vegetation information for the adjacent area. While we do not agree with that assertion, we determined that vegetation information for the adjacent area typically would not be useful either to the applicant in preparing the reclamation and revegetation plans for the permit or to the regulatory authority in reviewing and processing the permit application. Therefore, final paragraph (a) does not require vegetation information for the adjacent area. The regulatory authority, however, may use its discretion to require vegetation information for the adjacent area.

Several commenters questioned the value of the vegetation information requirements in situations where reestablishment of native plant communities would be inconsistent with the postmining land use. We did not provide a waiver under these circumstances for several reasons. First, this rule is intended to more fully implement section 508(a)(2) of SMCRA,[241] which requires that the permit application include a statement of ''the capability of the land prior to any mining to support a variety of uses giving consideration to soil and foundation characteristics, topography, and vegetative cover.'' Descriptions of the vegetative communities that exist on the site, as required by final paragraph (a), and of the native vegetation and plant communities typical of that area in the absence of human alterations, as required by final paragraph (c), are an important part of the determination of the capability of the land. Second, there is no guarantee that the approved postmining land use will be implemented before expiration of the revegetation responsibility period or even that it will be implemented at all. Therefore, our final revegetation rules at §§ 780.12(g) and 816.111 through 816.116 require planting and reestablishment of native plant communities on mined lands unless the approved postmining land use is implemented before the entire bond amount for the area has been fully

[237] 80 FR 44436, 44482 (Jul. 27, 2015).

[238] *Id.*

[239] 30 U.S.C. 1265(b)(19).

[240] 30 U.S.C. 1258(a)(2).

[241] 30 U.S.C. 1258(a)(2).

released under §§ 800.40 through 800.43. Third, sites with agricultural, industrial, commercial, residential, or recreational postmining land uses that may be incompatible with restoration of native plant communities overall often contain small areas that can (and, under this final rule, must) be planted with native species to provide some wildlife habitat.

A commenter on proposed paragraph (a) asked that we specify how an applicant should select appropriate reference areas. Other commenters interpreted the proposed rule as always requiring use of reference areas and objected to this alleged requirement. We did not intend to require use of a reference area. We worded final paragraph (a) in a manner that clarifies that an applicant may use a reference area for purposes of determining revegetation success under § 816.116, but that use of a reference area is not required. We find it unnecessary to provide further regulatory instruction on selecting reference areas because selecting reference areas is a common scientific practice. Furthermore, selection of a reference area depends upon site-specific factors and the regulatory authority is the best resource for further guidance on that matter.

Paragraph (b)(2) of the final rule, which we proposed as paragraph (a)(1), requires that the description and map of vegetation types and plant communities be adequate to evaluate whether the vegetation provides important habitat for fish and wildlife and whether the proposed permit area contains native plant communities of local or regional significance. Some commenters requested additional clarification about what would constitute a native plant community of ''local or regional significance,'' while another commenter asked us to define ''plant community.'' We did not revise the rule in the manner that the commenters requested because ''plant community'' is a commonly understood scientific term and because the regulatory authority should have the latitude to determine what constitutes a plant community of local or regional significance. We encourage the regulatory authority to confer with state and federal agencies with responsibilities for fish and wildlife in making this determination. One potential resource for identifying native plant communities of local or regional significance is the Natural Heritage Network, a network of state programs that gather and disseminate biological information on species of conservation concern and natural plant communities.

Several commenters expressed concern that the dominance of non-native species of grasses and forbs and the presence of invasive or noxious species would make reestablishment of native plant communities challenging, if not impossible. As an example, one commenter provided results from the latest Natural Resources Conservation Service's National Resource Inventory survey showing that over 50 percent of the non-federal native grassland in North Dakota is impacted by non-native species and that non-native species cover at least 25 percent of the soil surface. The Natural Resources Conservation Service concluded that it is impossible to return a site to its historic plant community if Kentucky bluegrass comprises more than 30 percent of the vegetation at the site.[242] The Natural Resources Conservation Service's finding supports our requirement to avoid non-native, invasive species in reclamation and illustrates the value of reestablishing the native plant communities unless introduced species are necessary for the postmining land use. The Natural Resource Inventory also concluded that ''[n]on-native invasive plants negatively impact rangeland throughout the western United States by displacing desirable species, altering ecological and hydrological processes, reducing wildlife habitat, degrading systems, altering fire regimes, and decreasing productivity.'' [243]

Commenters requested that we clarify the permissible amount of invasive species after the completion of reclamation, especially when invasive species are present prior to mining. In response, we added paragraph (b)(3) to the final rule. That paragraph requires the applicant to identify areas with significant populations of invasive or noxious species. Final paragraph (b)(3) provides the regulatory authority with the information necessary to determine whether there is a potential problem with non-native or noxious species and to decide on the appropriate steps to take, such as authorizing unique handling of the soil materials as described in § 816.22(f)(1)(ii) of the final rule. Section 780.12(g)(1)(xi) of the final rule requires that the proposed revegetation plan describe measures that will be taken to avoid the establishment of invasive species on reclaimed areas and to control invasive species if they are established. The allowable amount of invasive species at the time of bond release will depend on multiple factors, which we discuss in the performance standards related to revegetation success in §§ 816.111 through 816.116 of the final rule.

In response to a comment from the U.S. Army Corps of Engineers to revise the rule to provide better protection for wetlands, we added paragraph (b)(4) to the final rule. That paragraph requires that the applicant delineate all wetlands and areas bordering streams that support, or are capable of supporting, hydrophytic or hydrophilic vegetation or vegetation typical of floodplains. Hydrophytic vegetation consists of plants that grow either partly or totally submerged in water, while hydrophilic vegetation consists of water-loving plants that grow along the margins and banks of rivers and streams. This vegetation is indicative of wetlands, which means that vegetation information of this nature will proved baseline data to assist in the identification and protection of wetlands. This provision also will facilitate implementation of § 816.97(e) of the final rule, which requires use of the best technology currently available to avoid, restore, or replace wetlands and to enhance wetlands where practicable. Protection or restoration of wetlands is difficult in the absence of information about where those wetlands were originally located and what type of vegetation they supported. The requirement for information about vegetation bordering streams also will facilitate implementation of our stream assessment requirements in § 780.19(c)(6) and our streamside vegetative corridor requirements of § 816.57(d)(2)(iii).

Commenters requested that we specify a timeframe for the requirement in proposed § 779.19(a)(2) that the permit applicant identify the plant communities that would exist on the proposed permit area under conditions of natural succession. Some commenters requested that we specify whether the permit applicant must do this for each of the particular stages of succession or whether the requirement applies only to the climax community. One commenter noted that, given the various intensive land uses over the last 200 years and the presence of many non-native species, it could be very difficult to know what qualifies as ''natural succession'' and urged us to remove this requirement. As an example, the commenter questioned whether tallgrass prairie would be the

Briske, ed.).* U.S. Dep't of Agric., Natural Res. Conservation Serv. (2011).

natural succession community in the Midwest. After evaluating these and other comments, we decided not to adopt proposed paragraph (a)(2). We replaced proposed paragraph (a)(2) with final paragraph (c), which provides that, if the vegetation on the proposed permit area has been altered by human activity, the applicant must describe the native vegetation and plant communities typical of the area in the absence of human alterations. This information should be readily available from historical references and may be inferred from surviving remnants of natural vegetation in the surrounding area, if those remnants are similar to the proposed permit area. The applicant and regulatory authority need this information to prepare and review the revegetation plan, which must be designed to restore native plant communities, as appropriate and consistent with the final rule.

Proposed § 779.19(b) would have required that the vegetation descriptions in the permit application adhere to the National Vegetation Classification Standard, while proposed paragraph (c) would have allowed use of other generally-accepted vegetation classification systems in lieu of the National Vegetation Classification Standard. In the preamble to the proposed rule, we invited comment on what other classification systems may exist. *See* 80 FR 44436, 44483 (Jul. 27, 2015). We received a large number of comments in response to this request. Many commenters proposed to keep the systems already in use. Other commenters expressed support for the National Vegetation Classification Standard and stated that any alternatives should be evaluated based in part, on consistency with the National Vegetation Classification Standard approach.

Some commenters opined that the National Vegetation Classification Standard is not the best method for classifying vegetation and that the decision as to what method to use should be left to the discretion of the regulatory authority. Another commenter opined that the regulation or preamble should provide direction as to what level of hierarchy in the National Vegetation Classification Standard is appropriate for applications for coal mining operations. Other commenters questioned why proposed paragraph (b) required use of the National Vegetation Classification Standard when proposed paragraph (c) allowed the regulatory authority to approve other classification systems. One commenter suggested revising proposed paragraph (c) by adding ''provided that the alternative classification is accepted in the scientific community suitable for that state or region in which the proposed operation is located'' to reduce the potential for abuse of the discretion given here to the regulatory authority. Another commenter noted that some long-term mining operations may have existing, longstanding vegetation data systems and that it would be impractical to substitute a new system when the final rule comes into effect.

After evaluating the comments received, we decided not to adopt proposed paragraphs (b) and (c). Instead, final paragraph (b)(1) provides that the description and map of vegetation types and plant communities required under paragraph (a) must be in sufficient detail to assist in preparation of the revegetation plan under § 780.12(g) and to provide a baseline for comparison with postmining vegetation. The regulatory authority will determine which classification system best meets the requirements of paragraph (b)(1), other provisions of final § 779.19, and the revegetation requirements of §§ 780.12(g) and 816.111 through 816.116. Furthermore, it is not clear that the National Vegetation Classification Standard is readily adaptable to preparation of descriptions of vegetation types and plant communities for purposes of SMCRA. In addition, we agree with those commenters who questioned the value of proposed paragraph (b) when proposed paragraph (c) would have allowed use of other classification systems.

Proposed paragraph (d) would have required that the permit application include a discussion of the potential for reestablishing both the premining plant communities and the plant communities that would exist on the proposed permit area under conditions of natural succession. Some commenters alleged that proposed paragraph (d) would serve no purpose, at least in the Midwest where agricultural postmining land uses predominate. Because this final rule contains numerous requirements for use of native species in revegetation and for reestablishment of native plant communities, we do not agree that proposed paragraph (d) would serve no purpose. However, proposed paragraph (d) is not appropriate for § 779.19, which merely requires baseline information on premining vegetation and historical plant communities. Nor is it necessary because determination of the potential for reestablishment of native plant communities currently or formerly found in the area is an implicit element of the revegetation plan required under § 780.12(g) of this rule. Therefore, we are not adopting proposed paragraph (d) as part of this final rule.

Section 779.20: What information on fish and wildlife resources must I include in my permit application?

Section 779.20 is intended to ensure that the permit applicant has the information needed to design the proposed mining operation in a manner that meets the fish and wildlife protection and enhancement requirements of the regulatory program. The regulatory authority also needs this information to evaluate the probable impacts of the proposed mining operation on fish, wildlife, and related environmental values for the proposed permit and adjacent areas and to determine whether the scope of the proposed fish and wildlife protection and enhancement plan is sufficient. Except as discussed below, we have adopted § 779.20 as proposed, with minor editorial revisions for clarity and consistency.

Several commenters expressed concern that changes to the fish and wildlife resource information requirements might increase the amount of time it takes to review and process permits, resulting in a need for regulatory authorities to hire additional staff. The proposed and final rules are similar to the fish and wildlife resource information requirements in previous § 780.16(a). They require very little additional information. Therefore, we do not anticipate that final § 779.20 will have a significant impact on regulatory authority resource needs.

Final Paragraph (a): General Requirements

Proposed paragraph (a), like previous § 780.16(a), provided that the permit application must include information on fish and wildlife resources for the proposed permit and adjacent areas. The Department of Justice requested that we revise this provision to clarify that the term ''fish and wildlife resources'' includes all species of fish, wildlife, plants and other life forms listed or proposed for listing under the Endangered Species Act of 1973, 30 U.S.C. 1531, *et seq.* Final § 779.20(a) includes the requested revision, which is not substantive.

Final Paragraph (b): Scope and Level of Detail

As proposed, § 779.20(b) provided that the regulatory authority would determine the scope and level of detail for this information in coordination with state and federal agencies that have responsibilities for fish and wildlife. It also specified that the scope and level

of detail of the information must be sufficient to design the fish and wildlife protection and enhancement plan required under § 780.16. We received no comments specific to this provision. Final paragraph (b) adopts the proposed rule without change.

Final Paragraph (c): Site-Specific Resource Information Requirements

Proposed paragraph (c) sets forth requirements for site-specific fish and wildlife resource information. At the request of a federal agency, we revised proposed paragraph (c)(1), which pertains to species listed or proposed for listing under the Endangered Species Act of 1973, by replacing the phrase ''fish and wildlife or plants'' with ''species'' and the phrase ''state or private'' with ''non-federal'' to be consistent with terminology used in connection with the Endangered Species Act. The phrase ''state or private'' might inadvertently exclude activities of local and tribal governments and quasi-governmental agencies.

Some commenters suggested that we revise paragraph (c)(1) to require that the applicant identify cumulative impacts on federally-listed species. Final paragraph (c)(1) provides that ''the site-specific resource information must include a description of the effects of future non-federal activities that are reasonably certain to occur within the proposed permit and adjacent areas.'' That provision is the functional equivalent of an analysis of cumulative impacts. Therefore, no rule change is necessary. Other commenters asserted that we lack authority to require that applicants submit this information to a state regulatory authority or to require that a state regulatory authority conduct a cumulative effects analysis. According to the commenters, the Endangered Species Act only requires such an analysis for federal actions. We disagree. As discussed in the preamble for final § 773.15(j), section 7(a)(1) of the Endangered Species Act provides that ''[t]he Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act.'' [244] That would necessarily include using SMCRA to protect species listed or proposed for listing as threatened or endangered under the Endangered Species Act.[245] Furthermore, the description of the effects of future non-federal activities that final paragraph (c)(1) requires is necessary for the regulatory authority to ascertain compliance with final § 773.15(j).

Another commenter recommended that we delete all of proposed paragraph (c)(1), as the proposed language would place a significant burden on permit applicants, requiring them to know the affairs and plans of all private surface landowners in a given area and convey those plans as part of a permit application. We disagree and decline to delete this paragraph. This requirement to analyze the possible effects of action by private surface landowners is similar in terminology to a portion of the definition of ''Cumulative Impacts'' used in the U.S. Fish and Wildlife Service and the National Marine Fisheries Service regulations implementing the Endangered Species Act [246] and therefore is a warranted and necessary element in this review. Also, because our previous regulations at 30 CFR 780.16(a)(2) included the requirement to provide site-specific resource information in each permit application, there is no additional burden on permit applicants.

Another commenter suggested that we define ''reasonably certain to occur.'' We do not agree. That term, which mirrors the terminology used in the U.S. Fish and Wildlife Service and the National Marine Fisheries Service regulations implementing the Endangered Species Act.[247] The U.S. Fish and Wildlife Service and the National Marine Fisheries Service have published an Endangered Species Consultation Handbook that explains the meaning of this phrase.[248] No additional definition is needed in this rule.

One commenter urged us to require that the application include information on habitat for species listed as threatened or endangered. Another commenter requested that the rule specifically require information about biological communities that do not contain species of special concern. According to the commenter, those communities are still of interest because they may provide habitat to species that are valuable in other ways. Final § 779.19(a)(1) requires that the permit application identify, describe, and map existing vegetation types and plant communities within the proposed permit area in a manner that is adequate to evaluate whether the vegetation provides important habitat for fish and wildlife. In addition, final § 779.20(b) provides that the regulatory authority must determine the scope and level of detail for the fish and wildlife resource information required in coordination with state and agencies with responsibilities for fish and wildlife. Also, final section 780.16 requires additional action if the information required by final § 779.20(b) indicates that the proposed permit area or the adjacent area contains species listed or proposed for listing as threatened or endangered species under the Endangered Species Act or that are designated as critical habitat. As one commenter noted, one potential resource for identifying this information is the Natural Heritage Program, a network of state programs that gather and disseminate biological information on species of conservation concern and on natural plant communities. Each state Natural Heritage Program would also be an appropriate entity to assist the regulatory authority to identify native plant communities of local or regional significance. The combination of these requirements should ensure that the site-specific resource information includes information on habitat under the circumstances described by the first commenter and in all other situations in which information on habitat is important.

A commenter requested that we include specific reference to the Natural Heritage Program throughout the final rule, and specifically within final §§ 779.20 and 783.20, when providing information about threatened, endangered, and rare species of plants and animals at the state and federal level. The commenter also suggested that evidence of any coordination with the Natural Heritage Program or other resource agencies be attached to the permit application. While we agree that coordination with each states' National Heritage Program can be an important step in obtaining information about threatened, endangered, and rare species of plants and animals, we decline to require this and any evidence of coordination with any National Heritage Program be included within the permit application. These requirements are more appropriately

[244] 16 U.S.C. 1536(a)(1).

[245] 16 U.S.C. 1531(b).

[246] 50 CFR 402.02 defines ''cumulative effects'' as ''those effects of future State or private activities, not involving Federal activities, that are reasonably certain to occur within the action area of the Federal action subject to consultation.''

[247] 50 CFR 402.02 defines indirect effects are ''those that are caused by the proposed action and are later in time, but still are reasonably certain to occur'', and ''cumulative effects'' as ''those effects of future State or private activities, not involving Federal activities, that are reasonably certain to occur within the action area of the Federal action subject to consultation.''

[248] U.S. Fish and Wildlife Serv. and National Marine Fisheries Serv., *Endangered Species Consultation Handbook: Procedures for Conducting Consultation and Conference Activities Under Section 7 of the Endangered Species Act,* 4–32 (March 1998).

addressed on a case-by-case basis at the discretion of the regulatory authority, because each regulatory authority has the appropriate local expertise and network of resources to make these decisions. However, we do agree that the Natural Heritage Program is an excellent resource for information about threatened, endangered, and rare species of plants and animals.

A commenter requested that we define the term ''endemic species'' in proposed paragraph (c)(3). Another commenter recommended that we clarify that habitat for endemic species should be based on actual habitat boundaries rather than state or other jurisdictional boundaries that are less relevant from a biological perspective. Final paragraph (c)(3) does not include a definition of ''endemic species'' both because that term has a commonly understood meaning and because the U.S. Fish and Wildlife Service's published glossary of terms related to endangered species already defines ''endemic species'' as ''[a] species native and confined to a certain region; generally used for species with comparatively restricted distribution.'' [249] The commenter is correct that jurisdictional boundaries should not determine whether a species is endemic to the area. For example, a species with a small distribution within one state but that is widespread throughout the rest of the country would not typically be considered endemic, despite its low numbers within the state boundaries.

Proposed § 779.20(d) contained provisions regarding U.S. Fish and Wildlife Service review of the fish and wildlife resource information in the permit application. Proposed § 780.16(e) contained substantively identical provisions for U.S. Fish and Wildlife Service review of the fish and wildlife protection and enhancement plan in the permit application. This final rule consolidates proposed §§ 779.20(d) and 780.16(e) into final § 780.16(e), both to streamline the regulations and in response to a comment noting that the Service reviews baseline fish and wildlife resource information together with the fish and wildlife protection and enhancement plan, not separately. The preamble to final § 780.16(e) discusses the comments that we received on the provisions of proposed §§ 779.20(d) and 780.16(e) and how we revised the rule in response to those comments and discussions with the U.S. Fish and Wildlife Service.

Proposed § 779.20(d)(2)(iv) provided that the regulatory authority may not approve the permit application until all issues pertaining to threatened and endangered species are resolved and the regulatory authority receives written documentation from the Service that all issues have been resolved. Proposed § 780.16(e)(2)(iv) contained a substantively identical provision. The final rule consolidates both of those proposed rules into final § 780.16(b)(2) in revised form. Many commenters characterized this provision of the proposed rules as a U.S. Fish and Wildlife Service veto over the SMCRA permit. We discuss that comment in Part IV.J., above. The preamble to final § 780.16(b)(2) discusses other comments that we received on proposed §§ 779.20(d)(2)(iv) and 780.16(e)(2)(iv) and the revisions that we made in response to those comments and discussions with the U.S. Fish and Wildlife Service.

Proposed § 779.20(e) would have provided that the regulatory authority, in its discretion, may use the resource information collected under § 779.20 and information gathered from other agencies to determine whether, based on scientific principles and analyses, any stream segments, wildlife habitats, or watersheds in the proposed permit area or the adjacent area are of such exceptional environmental value that any adverse mining-related impacts must be prohibited.

We received comments both opposing and supporting proposed paragraph (e). Many commenters who supported this provision urged us to revise it to categorically prohibit mining in those areas rather than to afford discretion to the regulatory authority to do so. However, section 522 of SMCRA [250] establishes the process and criteria for categorically designating areas unsuitable for all or certain types of mining. Commenters seeking a categorical prohibition should avail themselves of the petition process provided under that section of SMCRA.

Commenters opposing proposed paragraph (e) challenged our authority under SMCRA to adopt such a provision. They also alleged that it could result in a compensable taking of mineral interests, that it provides too much power to state and federal fish and wildlife agencies, and that it could be enormously disruptive and economically costly because potential permit applicants would not have reasonable certainty as to which portions of the proposed permit area they would be allowed to mine. Other commenters noted that section 515(b)(24) of SMCRA,[251] which contains the performance standard for protection of fish and wildlife, does not include an express prohibition on mining. Instead, it provides that ''to the extent possible using the best technology currently available,'' surface coal mining and reclamation operations must ''minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values.''

The counterargument is that section 515(b)(23) of SMCRA provides that surface coal mining and reclamation operations must ''meet such other criteria as are necessary to achieve reclamation in accordance with the purposes of this Act, taking into consideration the physical, climatological, and other characteristics of the site.'' [252] One of the purposes of the Act is to ''assure that surface mining operations are not conducted where reclamation as required by this Act is not feasible.'' [253]

Other commenters wanted us to define or otherwise clarify the terms, ''exceptional environmental value,'' ''coordination between agencies, ''scientific principles and analysis'', and ''consultation'' in proposed paragraph (e). They requested clarification on how this provision would be applied to regulatory decisions made prior to the final rule. They also sought an opportunity for further public comment on the meaning of ''exceptional environmental value'' and on how this provision would be applied. We also received comments criticizing the lack of a definition of ''adverse impacts,'' and inquiring whether this term extended to impacts that were short-term or temporary or that imposed no permanent change on biota or the ecosystem.

After evaluating the comments that we received, we decided not to adopt proposed § 779.20(e) because avoiding disturbances to habitats of unusually high value for fish and wildlife, as described in final § 779.20(c)(3), is one of the options provided in final § 816.97(f). Therefore, there is no need to further discuss or address the comments that we received on proposed § 779.20(e). While we are not adopting proposed paragraph (e), we encourage states to consider doing so under section 505 of SMCRA,[254] which specifies that any state law or regulation that ''provides for more stringent land use and environmental controls and

regulations of surface coal mining and reclamation operations than do the provisions of this Act or any regulation issued pursuant thereto shall not be construed to be inconsistent with this Act.''

Section 779.21: What information on soils must I include in my permit application?

In the proposed rule,[255] we explained the August 4, 1980 suspension of the rules in relationship to lands other than prime farmlands, why we proposed to lift the suspension of previous § 779.21, and why we replaced those provisions with language consistent with the holding in *In Re Permanent Surface Mining Regulation Litigation I, Round I.*[256] One commenter questioned our logic in lifting the suspension and the consistency of the proposed rule with the court's holding. As explained in the preamble to our proposed rule, this is consistent with the court's decision that section 507(b)(16) of SMCRA is a clear expression of congressional intent to require soil surveys only for prime farmlands identified by a reconnaissance inspection.[257] Consistent with that decision the final rule clarifies that soil surveys are only required when a reconnaissance inspection suggests that the land may be prime farmland. In those circumstances the permit application must include the results of the reconnaissance inspection and, when prime farmland is found to be present, the soil survey information required by § 785.17(b)(3). If prime farmlands are not identified, the court held that § 508(a)(3) did not constitute authority for our regulations to require an applicant to provide soil survey information for lands not qualifying as prime farmland. Our final rule is consistent with the decision. To begin, we rely on section 508(a)(2) of SMCRA.[258] This section of SMCRA requires that each reclamation plan submitted as part of a permit application pursuant to any approved State program or a Federal program under the provisions of SMCRA shall include necessary details to demonstrate that reclamation required by the State or Federal program can be accomplished, a statement of the capability of the land prior to any mining to support a variety of uses giving consideration to soil and foundation characteristics, topography, and vegetative cover, and, if applicable, a soil survey. This statutory provision requires the applicant to include information about soil and foundation characteristics in each permit application, not just in those applications that contain prime farmland.[259] This information, detailed in final paragraphs (b) through (d), does not need to take the form of a requirement to conduct a soil survey unless prime farmland may be present. While it is true that the regulations do not require that soil surveys be conducted for lands that may not be prime farmland, it is also true that some soil surveys for these lands may already exist and these already-existing soil surveys would be useful to the regulatory authority in fulfilling its responsibilities under section 508(a)(2) of SMCRA. Therefore, for lands that may not be prime farmland, our final rule does not require a soil survey to be conducted, but it does require the submittal of soil survey information if it already exists.

Regarding paragraph (a), other commenters indicated that, given the predominant land use in some areas of prime farmland and the Natural Resources Conservation Service's extensive mapping, a ''reconnaissance inspection'' is not necessary to make a determination regarding whether prime farmland exists in the permit area. Similarly, other commenters expressed concern about the requirement for ''a soils reconnaissance inspection'' to determine the presence of prime farmland without further guidance regarding what the reconnaissance inspection would entail. However, paragraph (a) does not contain any new requirements regarding these issues; it merely includes and cross-references existing prime farmland regulations within § 785.17 and reiterated at § 779.21(e) of the final rule.
