RIN: 0580–AB27

USDA—GIPSA

Final Rule Stage

7. Clarification of Scope

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: Pub. L. 110–246; 7 U.S.C. 181 to 229c

CFR Citation: 9 CFR 201.

Legal Deadline: None.

Abstract: In June of 2010, GIPSA published a proposal to amend section 201.3 of the regulations issued under the Packers and Stockyards Act (P&S Act), 1921, as amended. This proposed change responds to guidance from the courts. The courts, in addressing litigation brought by poultry growers alleging harm, have said that GIPSA's statements regarding the appropriate application of subsections 202(a) and 202(b) are not entitled to deference in the absence of regulation addressing whether the P&S Act prohibits all unfair practices, or only those causing harm or a likelihood of harm to competition. The amendment to 201.3 will establish GIPSA's interpretation of the statute which will then be entitled to judicial deference.

Statement of Need: This rulemaking will clarify the long held position of the Department of Agriculture that it is not necessary in all cases to demonstrate harm or likely harm to competition in order to establish a violation of either Section 202(a) or (b) of the P&S Act. Several U.S. Courts of Appeals have held that it was necessary for plaintiffs to prove harm or likely harm to competition in cases alleging unfair practices in violation of the P&S Act. The 2008 Farm Bill directed the Secretary of Agriculture to establish criteria that the Secretary will consider in determining whether a live poultry dealer has provided reasonable notice to poultry growers of any suspension of the delivery of birds under a poultry growing arrangement; when a requirement of additional capital investments over the life of a poultry growing arrangement or swine production contract constitutes a violation of the P&S Act; and if a live poultry dealer or swine contractor has provided a reasonable period of time for a poultry grower or a swine production contract grower to remedy a breach of contract that could lead to termination of the poultry growing arrangement or swine production contract. GIPSA published final rules establishing the required criteria in December 2011. However, to link the regulatory criteria and a violation of the P&S Act, requires the interpretation that it is not necessary to show harm to competition in order to prove that a packer, swine contractor, or live poultry dealer has committed an unfair practice in violation of the P&S Act.

Summary of Legal Basis: Section 407 of the P&S Act provides that [t]he Secretary may make such rules, regulations, and orders as may be necessary to carry out the provisions of this Act. This rule is necessary to carry out the provisions of section 202(a) and (b) of the P&S Act.

Alternatives: GIPSA considered three regulatory alternatives: Maintain the status quo and not issue the regulation; issuing regulation as an interim final regulation; and issuing the regulation as an interim final regulation but exempting small businesses.

Anticipated Cost and Benefits: GIPSA estimates the costs to be greater than $100 million annually. GIPSA was unable to quantify the benefits of the regulation. However, the primary benefit of regulation 201.3 is the increased ability to protect producers and growers through enforcement of the P&S Act for violations of section 202(a) and/or (b) that do not result in harm or the likelihood of harm to competition.

Risks: The risk addressed by this rulemaking is the present uncertainty that limits enforcement of section 202(a) or (b) of the P&S Act. The clarification provided by this rulemaking will allow the linkage of the regulatory criteria to a violation of the P&S Act, which is a substantial portion of the GIPSA Packers and Stockyards Program's mission.

RIN: 0580–AB25

USDA—FOOD AND NUTRITION SERVICE (FNS)

Final Rule Stage

8. Eligibility, Certification, and Employment and Training Provisions

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: Pub. L. 110–246; Pub. L. 104–121

CFR Citation: 7 CFR 273.

Legal Deadline: None.

Abstract: This final rule amends the regulations governing the Supplemental Nutrition Assistance Program (SNAP) to codify provisions from the Food, Conservation, and Energy Act of 2008 (Pub. L. 110–246) (FCEA) concerning the eligibility and certification of SNAP applicants and participants and SNAP employment and training.

Statement of Need: This rule amends the regulations governing SNAP to implement provisions from the FCEA concerning the eligibility and certification of SNAP applicants and participants and SNAP employment and training. In addition, this rule revises the SNAP regulations throughout 7 CFR part 273 to change the program name from the Food Stamp Program to SNAP and to make other nomenclature changes as mandated by the FCEA. The statutory effective date of these provisions was October 1, 2008. The Food and Nutrition Service (FNS) is also implementing two discretionary revisions to SNAP regulations to provide State agencies options that are available currently only through waivers. These provisions allow State agencies to average student work hours and to provide telephone interviews in lieu of face-to-face interviews. FNS anticipates that this rule will impact the associated paperwork burdens.

Summary of Legal Basis: Food, Conservation, and Energy Act of 2008 (Pub. L. 110–246).

Alternatives: Most aspects of the rule are non-discretionary and tied to specific requirements for SNAP in the FCEA, and others were new program options the FCEA created that State agencies may include in their administration of the program. FNS did consider alternatives within these mandatory and optional FCEA provisions addressed in the rule. For example, under the new optional provision implementing section 4119 of the FCEA, Telephonic Signature Systems, FNS considered what specific conditions must be satisfied for a signature to be considered a spoken signature.

Anticipated Cost and Benefits: The proposed rule estimated total SNAP costs to the Government of the FCEA provisions proposed in the rule to be $831 million in fiscal 2010 and $5.619 billion over the five years of fiscal year 2010 through fiscal year 2014. The final rule will present a revised cost analysis. There are many potential societal benefits of this rule, including that certain provisions in the rule will reduce the administrative burden for households and State agencies.

Risks: The statutory and discretionary changes under consideration would streamline program operations. The changes are expected to reduce the risk of inefficient operations.

RIN: 0584–AD87

USDA—FNS

9. National School Lunch and School Breakfast Programs: Nutrition Standards for All Foods Sold in School, as Required by the Healthy, Hunger-Free Kids Act of 2010

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect State, local or tribal governments.

Legal Authority: Pub. L. 111–296

CFR Citation: 7 CFR 210; 7 CFR 220.

Legal Deadline: None.

Abstract: This rule codifies a provision of the Healthy, Hunger-Free Kids Act (Pub. L. 111–296; the Act) under 7 CFR parts 210 and 220. Section 208 requires the Secretary to promulgate regulations to establish science-based nutrition standards for all foods sold in schools. The nutrition standards apply to all food sold outside the school meal programs, on the school campus, and at any time during the school day.

Statement of Need: This rule codifies the two provisions of the Healthy, Hunger-Free Kids Act (Pub. L. 111–296; the Act) under 7 CFR parts 210 and 220. Section 203 requires schools participating in the National School Lunch Program to make available to children free of charge, as nutritionally appropriate, potable water for consumption in the place where meals are served during meal service. Section 208 requires the Secretary to promulgate regulations to establish science-based nutrition standards for all foods sold in schools not later than December 13, 2011. The nutrition standards apply to all food sold outside the school meal programs, on the school campus, and at any time during the school day.

Summary of Legal Basis: There is no existing regulatory requirement to make water available where meals are served. Regulations at 7 CFR parts 210.11 direct State agencies and school food authorities to establish regulations necessary to control the sale of foods in competition with lunches served under the NSLP, and prohibit the sale of foods of minimal nutritional value in the food service areas during the lunch periods. The sale of other competitive foods may, at the discretion of the State agency and school food authority, be allowed in the food service area during the lunch period only if all income from the sale of such foods accrues to the benefit of the nonprofit school food service or the school or student organizations approved by the school. State agencies and school food authorities may impose additional restrictions on the sale of and income from all foods sold at any time throughout schools participating in the Program.

Alternatives: Several alternatives were considered in the proposed rule that were not incorporated into the final rule. Alternatives included different options for the treatment of entrees and side dishes that are served as part of a reimburseable meal, options for establishing limits on the frequency of exempt fundraisers, options for public comment on lower-calorie beverages for high school students, and an option that considered prohibiting the sale of beverages with added caffeine to high school students.

Anticipated Cost and Benefits: Expected Costs Analysis and Budgetary Effects Statement: We expect that these provisions would incur no Federal costs.

Although the complexity of factors that influence overall food consumption and obesity prevent us from defining a level of dietary change or disease or cost reduction that is attributable to the rule, there is evidence that standards like those in the rule will positively influence and perhaps directly improve food choices and consumption patterns that contribute to students' long-term health and well-being, and reduce their risk for obesity.

Any rule-induced benefit of healthier eating by school children would be accompanied by costs, at least in the short term. Healthier food may be more expensive than unhealthy food either in raw materials, preparation, or both and this greater expense would be distributed among students, schools, and the food industry.

Risks: None known.

RIN: 0584–AE09

USDA—FNS

10. Enhancing Retailer Eligibility Standards in SNAP

Priority: Other Significant.

Legal Authority: 3 U.S.C. 2012; 9 U.S.C. 2018

CFR Citation: 7 CFR 271.2; 7 CFR 278.1.

Legal Deadline: None.

Abstract: The final rule will address the criteria used to authorize retail food stores for redemption of SNAP benefits.

Statement of Need: The Agricultural Act 2014 (2014 Farm Bill) amended the Food and Nutrition Act of 2008 to increase the required amount of food that certain SNAP authorized retail food stores have available on a continual basis from at least three varieties of items in each of four staple food categories to a mandatory minimum of seven varieties. The 2014 Farm Bill also amended the Act to increase the minimum number of categories in which perishable foods are required from two to three. This rule codifies these mandatory requirements. Further, the rulemaking addresses depth of stock, redefines staple and accessory foods, and amends the definition of retail food store to clarify when a retailer is a restaurant rather than a retail food store.

Summary of Legal Basis: Section 3(k) of the Food and Nutrition Act of 2008 (the Act) generally (with limited exception) (1) requires that food purchased with SNAP benefits be meant for home consumption and (2) prohibits the purchase of hot foods with SNAP benefits. The intent of those statutory requirements can be circumvented by selling cold foods, which may be purchased with SNAP benefits, and offering onsite heating or cooking of those same foods, either for free or at an additional cost. In addition, section 9 of the Act provides for approval of retail food stores and wholesale food concerns based on their ability to effectuate the purposes of the Program.

Alternatives: Alternative approaches to several discretionary provisions are being considered based on commenter feedback on the proposed rule.

Anticipated Cost and Benefits: The changes will allow FNS to improve access to healthy food choices for SNAP participants and to ensure that participating retailers effectuate the purposes of the Program. FNS anticipates that these provisions will have no significant costs to States.

Risks: None identified.

RIN: 0584–AE27

USDA—FNS

11. Supplemental Nutrition Assistance Program (SNAP) Photo Electronic Benefit Transfer (EBT) Card Implementation Requirements

Priority: Other Significant.

Legal Authority: Pub. L. 104–193

CFR Citation: 7 CFR 273; 7 CFR 274; 7 CFR 278.

Legal Deadline: None.

Abstract: Under section 7(h)(9) of the Food and Nutrition Act of 2008 (the Act), as amended [7 U.S.C. 2016(h)(9)], States have the option to require the SNAP Electronic Benefit Transfer (EBT) card contain a photo of one or more household members. The final rule would incorporate into regulation and provide additional clarity on the Food and Nutrition Service (FNS) guidance developed for State agencies wishing to implement the photo EBT card option.

Statement of Need: The regulation would create a clearer structure for those States wishing to exercise the option of placing a photo on EBT cards and ensure uniform accessibility for participants in all States.

Summary of Legal Basis: The Food and Nutrition Act of 2008, 7 U.S.C. 2011 *et seq.,* requires that any States choosing to issue a photo on the EBT card establish procedures to ensure that all other household members or any authorized representative of the household may utilize the card. Furthermore, applying this option must also preserve client rights and responsibilities afforded by the Act to ensure that all household members are able to maintain uninterrupted access to benefits, that non-applicants applying on behalf of eligible household members are not negatively impacted, and that SNAP recipients using photo EBT cards are treated equitably in accordance with Federal law when purchasing food at authorized retailers.

Alternatives: The final rule would mostly codify guidance issued in December 2014. The Department considered not issuing any regulation on photo EBT cards.

Anticipated Cost and Benefits: The changes are not expected to create serious inconsistencies or otherwise interfere with actions taken or planned by another agency or materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof. The requirements will not raise novel or legal policy issues.

As a result of this rule, States that exercise the option to implement photos on EBT cards would incur costs associated with development of an implementation plan, State staff training, client training, and retailer training. It is expected that providing guidance or oversight of these requirements would fall under the standard purview of these agencies and could be absorbed by existing staff. State Agencies are responsible for approximately 50% of SNAP administration costs, which would include the costs associated with implementing and maintaining photo EBT cards.

Risks: This rule will promulgate and expand on current program guidance to provide clarification and more detailed guidance to States implementing the photo EBT option and ensure program access is protected.

RIN: 0584–AE45

USDA—FOOD SAFETY AND INSPECTION SERVICE (FSIS)

Proposed Rule Stage

12. Revision of the Nutrition Facts Panels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed

Priority: Other Significant.

Legal Authority: Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*); Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*)

CFR Citation: 9 CFR 317; 9 CFR 381; 9 CFR 413.

Legal Deadline: None.

Abstract: Consistent with the recent changes that the Food and Drug Administration (FDA) finalized, the Food Safety and Inspection Service (FSIS) is proposing to amend the Federal meat and poultry products inspection regulations to update and revise the nutrition labeling requirements for meat and poultry products to reflect recent scientific research and dietary recommendations and to improve the presentation of nutrition information to assist consumers in maintaining healthy dietary practices. FSIS is proposing to (1) update the list of nutrients that are required or permitted to be declared; (2) provide updated Daily Reference Values (DRV) and Reference Daily Intake (RDI) values that are based on current dietary recommendations from consensus reports; and (3) amend the requirements for foods represented or purported to be specifically for children under the age of four years and pregnant and lactating women and establish nutrient reference values specifically for these population subgroups. FSIS is also proposing to revise the format and appearance of the Nutrition Facts Panel; amend the definition of a single-serving container; require dual-column labeling for certain containers; and update and modify several reference amounts customarily consumed (RACCs or reference amounts). FSIS also is proposing to consolidate the nutrition labeling regulations for meat and poultry products into a new Code of Federal Regulations (CFR) part.

Statement of Need: On May 27, 2016, the Food and Drug Administration (FDA) published two final rules: (1) ''Food Labeling: Revision of the Nutrition and Supplement Facts Labels'' (81 FR 33742); and (2) ''Food Labeling: Serving Sizes of Foods that Can Reasonably be Consumed at One Eating Occasion; Dual-Column Labeling; Updating, Modifying, and Establishing Certain Reference Amounts Customarily Consumed; Serving Size for Breath Mints; and Technical Amendments'' (81 FR 34000). FDA finalized these rules to update the Nutrition Facts label to reflect new nutrition and public health research, to reflect recent dietary recommendations from expert groups, and to improve the presentation of nutrition information to help consumers make more informed choices and maintain healthy dietary practices. FSIS has reviewed FDA's analysis and, to ensure that nutrition information is presented consistently across the food supply, FSIS will propose to amend the nutrition labeling regulations for meat and poultry products to parallel, to the extent possible, FDA's regulations. This approach will help increase clarity of information to consumers and will improve efficiency in the marketplace.

Summary of Legal Basis: The Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*).

Alternatives: FSIS is considering different alternatives for presentation of nutrition information on the Nutrition Facts Panel.

Anticipated Cost and Benefits: These proposed regulations are expected to benefit consumers by increasing and improving dietary information available in the market. An estimate of the monetary benefits from these market improvements can be obtained by calculating the medical cost savings generated by linking information use to improved consumer diets. In addition, FSIS believes that the public would be better served by having the regulations governing nutrition labeling consolidated in one part of title 9. Rather than searching through two separate parts of title 9, CFR parts 317 and 381, to find the nutrition labeling regulations, interested parties would only have to survey one, part 413, to be able to apply nutrition panels to their meat and poultry products. The proposed actions would necessitate the majority of products to be relabeled. Firms would incur a one-time cost for relabeling, recordkeeping costs, and costs associated with voluntary reformulation.

Risks: None.

USDA—FSIS

13. • Modernization of Swine Slaughter Inspection

Priority: Other Significant.
Legal Authority: 21 U.S.C. 601 *et seq.*
CFR Citation: 9 CFR 301, 309, 310, and 314.
Legal Deadline: None.
Abstract: The Food Safety and Inspection Service (FSIS) is proposing to amend the Federal meat inspection regulations to establish a new inspection system for swine slaughter establishments demonstrated to provide greater public health protection than the existing inspection system. The Agency is also proposing several changes to the regulations that would affect all establishments that slaughter swine, regardless of the inspection system under which they operate.
Statement of Need: The proposed action is necessary to improve food safety; improve compliance with the Humane Methods of Slaughter Act; improve the effectiveness of market hog slaughter inspection; make better use of the Agency's resources; and remove unnecessary regulatory obstacles to innovation.
Summary of Legal Basis: 21 U.S.C. 601 *et seq.*
Alternatives: The Agency is considering alternatives such as: (1) A mandatory New Swine Slaughter Inspection System (NSIS) for market hog slaughter establishments and (2) a voluntary NSIS for market hog establishments, under which FSIS would conduct the same offline inspection activities as traditional inspection.
Anticipated Cost and Benefits: The estimated total annualized value of all mandatory costs to industry is approximately $0.74 million, while total annualized value of all voluntary costs to industry is approximately $11.66 million, assuming a 10 year annualization and a 3 percent discount rate. Estimated combined the total annualized costs to industry is approximately $12.40 million ($0.77 + $11.66), assuming a 10 year annualization and a 3 percent discount rate. FSIS estimates industry-wide adoption of the NSIS would reduce the number of human illness attributed to products derived from market hog by an average of about 2,621 Salmonella illnesses, which represents potential savings of approximately $9.56 million annually. The Agency's budget is expected to be impacted by changes to personnel and training requirements. The estimated annualized value of the combined changes to the Agency's budget is a net reduction of roughly $8.77 million, over 10 years assuming a 3 percent discount rate. With the expected impact on the Agency's budget included, and assuming all large and small exclusively market hog establishments convert to NSIS, the rule is anticipated to have a net benefit of approximately $4.97 million a year, annualized over 10 years assuming a 3 percent discount rate.
Risks: None.

BILLING CODE 3410–90–P

DEPARTMENT OF COMMERCE (DOC)

Statement of Regulatory and Deregulatory Priorities

Established in 1903, the Department of Commerce (Commerce) is one of the oldest Cabinet-level agencies in the Federal Government. Commerce's mission is to create the conditions for economic growth and opportunity by promoting innovation, entrepreneurship, competitiveness, and environmental stewardship. Commerce has 12 operating units, which are responsible for managing a diverse portfolio of programs and services, ranging from trade promotion and economic development assistance to broadband and the National Weather Service.

Commerce touches Americans daily, in many ways—making possible the daily weather reports and survey research; facilitating technology that all of us use in the workplace and in the home each day; supporting the development, gathering, and transmission of information essential to competitive business; enabling the diversity of companies and goods found in America's and the world's marketplace; and supporting environmental and economic health for the communities in which Americans live.

Commerce has a clear and compelling vision for itself, for its role in the Federal Government, and for its roles supporting the American people, now and in the future. To achieve this vision, Commerce works in partnership with businesses, universities, communities, and workers to:

- Innovate by creating new ideas through cutting-edge science and technology from advances in nanotechnology, to ocean exploration, to broadband deployment, and by protecting American innovations through the patent and trademark system;
- Support entrepreneurship and commercialization by enabling community development and strengthening minority businesses and small manufacturers;
- Maintain U.S. economic competitiveness in the global marketplace by promoting exports, ensuring a level playing field for U.S. businesses, and ensuring that technology transfer is consistent with our nation's economic and security interests;
- Provide effective management and stewardship of our nation's resources and assets to ensure sustainable economic opportunities; and
- Make informed policy decisions and enable better understanding of the economy by providing accurate economic and demographic data.

Commerce is a vital resource base, a tireless advocate, and Cabinet-level voice for job creation.

The Regulatory Plan tracks the most important regulations that implement these policy and program priorities,

several of which involve regulation of the private sector by Commerce.

Responding to the Administration's Regulatory Philosophy and Principles

The vast majority of the Commerce's programs and activities do not involve regulation. Of Commerce's 12 primary operating units, only the National Oceanic and Atmospheric Administration (NOAA) will be planning actions that are considered the ''most important'' significant pre-regulatory or regulatory actions for FY 2017. During the next year, NOAA plans to publish five rulemaking actions that are designated as Regulatory Plan actions. The Bureau of Industry and Security (BIS) may also publish rulemaking actions designated as Regulatory Plan actions. Further information on these actions is provided below.

Commerce has a long-standing policy to prohibit the issuance of any regulation that discriminates on the basis of race, religion, gender, or any other suspect category and requires that all regulations be written so as to be understandable to those affected by them. The Secretary also requires that Commerce afford the public the maximum possible opportunity to participate in Departmental rulemakings, even where public participation is not required by law.

National Oceanic and Atmospheric Administration

NOAA establishes and administers Federal policy for the conservation and management of the Nation's oceanic, coastal, and atmospheric resources. It provides a variety of essential environmental and climate services vital to public safety and to the Nation's economy, such as weather forecasts, drought forecasts, and storm warnings. It is a source of objective information on the state of the environment. NOAA plays the lead role in achieving Commerce's goal of promoting stewardship by providing assessments of the global environment.

Recognizing that economic growth must go hand-in-hand with environmental stewardship, Commerce, through NOAA, conducts programs designed to provide a better understanding of the connections between environmental health, economics, and national security. Commerce's emphasis on ''sustainable fisheries'' is designed to boost long-term economic growth in a vital sector of the U.S. economy while conserving the resources in the public trust and minimizing any economic dislocation necessary to ensure long-term economic growth. Commerce is where business and environmental interests intersect, and the classic debate on the use of natural resources is transformed into a ''win-win'' situation for the environment and the economy.

Three of NOAA's major components, the National Marine Fisheries Services (NMFS), the National Ocean Service (NOS), and the National Environmental Satellite, Data, and Information Service (NESDIS), exercise regulatory authority.

NMFS oversees the management and conservation of the Nation's marine fisheries, protects threatened and endangered marine and anadromous species and marine mammals, and promotes economic development of the U.S. fishing industry. NOS assists the coastal States in their management of land and ocean resources in their coastal zones, including estuarine research reserves; manages the national marine sanctuaries; monitors marine pollution; and directs the national program for deep-seabed minerals and ocean thermal energy. NESDIS administers the civilian weather satellite program and licenses private organizations to operate commercial land-remote sensing satellite systems.

Commerce, through NOAA, has a unique role in promoting stewardship of the global environment through effective management of the Nation's marine and coastal resources and in monitoring and predicting changes in the Earth's environment, thus linking trade, development, and technology with environmental issues. NOAA has the primary Federal responsibility for providing sound scientific observations, assessments, and forecasts of environmental phenomena on which resource management, adaptation, and other societal decisions can be made.

In the environmental stewardship area, NOAA's goals include: Rebuilding and maintaining strong U.S. fisheries by using market-based tools and ecosystem approaches to management; increasing the populations of depleted, threatened, or endangered species and marine mammals by implementing recovery plans that provide for their recovery while still allowing for economic and recreational opportunities; promoting healthy coastal ecosystems by ensuring that economic development is managed in ways that maintain biodiversity and long-term productivity for sustained use; and modernizing navigation and positioning services. In the environmental assessment and prediction area, goals include: Understanding climate change science and impacts, and communicating that understanding to government and private sector stakeholders enabling them to adapt; continually improving the National Weather Service; implementing reliable seasonal and interannual climate forecasts to guide economic planning; providing science-based policy advice on options to deal with very long-term (decadal to centennial) changes in the environment; and advancing and improving short-term warning and forecast services for the entire environment.

Magnuson-Stevens Fishery Conservation and Management Act

Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) rulemakings concern the conservation and management of fishery resources in the U.S. Exclusive Economic Zone (generally 3–200 nautical miles). Among the several hundred rulemakings that NOAA plans to issue in FY 2017, a number of the preregulatory and regulatory actions will be significant. The exact number of such rulemakings is unknown, since they are usually initiated by the actions of eight regional Fishery Management Councils (FMCs) that are responsible for preparing fishery management plans (FMPs) and FMP amendments, and for drafting implementing regulations for each managed fishery. NOAA issues regulations to implement FMPs and FMP amendments. Once a rulemaking is triggered by an FMC, the Magnuson-Stevens Act places stringent deadlines upon NOAA by which it must exercise its rulemaking responsibilities. FMPs and FMP amendments for Atlantic highly migratory species, such as bluefin tuna, swordfish, and sharks, are developed directly by NOAA, not by FMCs.

FMPs address a variety of issues including maximizing fishing opportunities on healthy stocks, rebuilding overfished stocks, and addressing gear conflicts. One of the problems that FMPs may address is preventing overcapitalization (preventing excess fishing capacity) of fisheries. This may be resolved by market-based systems such as catch shares, which permit shareholders to harvest a quantity of fish and which can be traded on the open market. Harvest limits based on the best available scientific information, whether as a total fishing limit for a species in a fishery or as a share assigned to each vessel participant, enable stressed stocks to rebuild. Other measures include staggering fishing seasons or limiting gear types to avoid gear conflicts on the fishing grounds and establishing seasonal and area closures to protect fishery stocks.

The FMCs provide a forum for public debate and, using the best scientific information available, make the judgments needed to determine optimum yield on a fishery-by-fishery basis. Optional management measures are examined and selected in accordance with the national standards set forth in the Magnuson-Stevens Act. This process, including the selection of the preferred management measures, constitutes the development, in simplified form, of an FMP. The FMP, together with draft implementing regulations and supporting documentation, is submitted to NMFS for review against the national standards set forth in the Magnuson-Stevens Act, in other provisions of the Act, and other applicable laws. The same process applies to amending an existing approved FMP.

Marine Mammal Protection Act

The Marine Mammal Protection Act of 1972 (MMPA) provides the authority for the conservation and management of marine mammals under U.S. jurisdiction. It expressly prohibits, with certain exceptions, the take of marine mammals. The MMPA allows NMFS to permit the collection of wild animals for scientific research or public display or to enhance the survival of a species or stock. NMFS initiates rulemakings under the MMPA to establish a management regime to reduce marine mammal mortalities and injuries as a result of interactions with fisheries. The MMPA also established the Marine Mammal Commission, which makes recommendations to the Secretaries of the Departments of Commerce and the Interior and other Federal officials on protecting and conserving marine mammals. The Act underwent significant changes in 1994 to allow for takings incidental to commercial fishing operations, to provide certain exemptions for subsistence and scientific uses, and to require the preparation of stock assessments for all marine mammal stocks in waters under U.S. jurisdiction.

Endangered Species Act

The Endangered Species Act of 1973 (ESA) provides for the conservation of species that are determined to be ''endangered'' or ''threatened,'' and the conservation of the ecosystems on which these species depend. The ESA authorizes both NMFS and the Fish and Wildlife Service (FWS) to jointly administer the provisions of the ESA. NMFS manages marine and ''anadromous'' species, and FWS manages land and freshwater species. Together, NMFS and FWS work to protect critically imperiled species from extinction. Of the approximately 1,300 listed species found in part or entirely in the United States and its waters, NMFS has jurisdiction over approximately 60 species. NMFS' rulemaking actions are focused on determining whether any species under its responsibility is an endangered or threatened species and whether those species must be added to the list of protected species. NMFS is also responsible for designating, reviewing, and revising critical habitat for any listed species. In addition, under the ESA's procedural framework, Federal agencies consult with NMFS on any proposed action authorized, funded, or carried out by that agency that may affect one of the listed species or designated critical habitat, or is likely to jeopardize proposed species or adversely modify proposed critical habitat that is under NMFS' jurisdiction.

NOAA's Regulatory Plan Actions

While most of the rulemakings undertaken by NOAA do not rise to the level necessary to be included in Commerce's regulatory plan, NMFS is undertaking five actions that rise to the level of ''most important'' of Commerce's significant regulatory actions and thus are included in this year's regulatory plan. A description of the five regulatory plan actions is provided below.

1. Magnuson-Stevens Fishery Conservation and Management Act; Seafood Import Monitoring Program (0648–BF09): The Magnuson-Stevens Fishery Conservation and Management Act prohibits the importation and trade in interstate commerce of fishery products from fish caught in in violation of any foreign law or regulation.

2. Final Rule to Designate Critical Habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic Sturgeon (0648–BF28): The National Marine Fisheries Service listed four distinct population segments of Atlantic sturgeon as endangered—and one distinct population of Atlantic sturgeon as threatened—under the Endangered Species Act on February 6, 2012. This rule would designate critical habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic sturgeon.

3. Final Rule to Designate Critical Habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic Sturgeon (0648–BF32): The National Marine Fisheries Service listed four distinct population segments of Atlantic sturgeon as endangered—and one distinct population of Atlantic sturgeon as threatened—under the Endangered Species Act on February 6, 2012. This action would designate critical habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic sturgeon, both listed as endangered.

4. Proposed Rule to Designate Critical Habitat for Threatened Caribbean Corals (0648–BG20): On September 10, 2014, the National Marine Fisheries Service listed 5 corals in the Caribbean as threatened under the Endangered Species Act. With this action, the National Marine Fisheries Service proposes to designate critical habitat for the 5 Caribbean corals (*Dendrogyra cylindrus, Orbicella annularis, Orbicella faveolata, Orbicella franksi,* and *Mycetophyllia ferox*) and revises critical habitat for the previously-listed corals *Acropora palmata* and *Acropora cervicornis.* The proposed designation would cover coral reef habitat containing essential features that support reproduction, growth, and survival of the listed coral species.

5. Proposed Rule to Designate Critical Habitat for Threatened Indo-Pacific Corals (0648–BG26): On September 10, 2014, the National Marine Fisheries Service listed 15 species of reef-building corals in the Indo-Pacific as threatened under the Endangered Species Act. Of the 15 Indo-Pacific species listed, seven occur in U.S. waters of the Pacific Islands Region, including in American Samoa, Guam, the Commonwealth of the Mariana Islands, and the Pacific Remote Island Areas. With this action, the National Marine Fisheries Service proposes to designate critical habitat for the seven species in U.S. waters (*Acropora globiceps, Acropora jacquelineae, Acropora retusa, Acropora speciosa, Euphyllia paradivisa, Isopora crateriformis,* and *Seriatopora aculeata*). The proposed designation would cover coral reef habitat containing essential features that support reproduction, growth, and survival of the listed coral species.

Bureau of Industry and Security

The Bureau of Industry and Security (BIS) advances U.S. national security, foreign policy, and economic objectives by maintaining and strengthening adaptable, efficient, and effective export control and treaty compliance systems as well as by administering programs to prioritize certain contracts to promote the national defense and to protect and enhance the defense industrial base.

Major Programs and Activities

BIS administers four sets of regulations. The Export Administration Regulations (EAR) regulate exports and

reexports to protect national security, foreign policy, and short supply interests. The EAR also regulates U.S. persons' participation in certain boycotts administered by foreign governments. The National Security Industrial Base Regulations provide for prioritization of certain contracts and allocations of resources to promote the national defense, require reporting of foreign Government-imposed offsets in defense sales, provide for surveys to assess the capabilities of the industrial base to support the national defense and address the effect of imports on the defense industrial base. The Chemical Weapons Convention Regulations implement declaration, reporting, and on-site inspection requirements in the private sector necessary to meet United States treaty obligations under the Chemical Weapons Convention treaty. The Additional Protocol Regulations implement similar requirements with respect to an agreement between the United States and the International Atomic Energy Agency.

BIS also has an enforcement component with nine offices covering the United States. BIS export control officers are also stationed at several U.S. embassies and consulates abroad. BIS works with other U.S. Government agencies to promote coordinated U.S. Government efforts in export controls and other programs. BIS participates in U.S. Government efforts to strengthen multilateral export control regimes and to promote effective export controls through cooperation with other Governments.

BIS' Regulatory Plan Actions

In August 2009, the President directed a broad-based interagency review of the U.S. export control system with the goal of strengthening national security and the competitiveness of key U.S. manufacturing and technology sectors by focusing on the current threats and adapting to the changing economic and technological landscape. In August 2010, the President outlined an approach, known as the Export Control Reform Initiative (ECRI), under which agencies that administer export controls will apply new criteria for determining what items need to be controlled and a common set of policies for determining when an export license is required. The control list criteria are to be based on transparent rules, which will reduce the uncertainty faced by our Allies, U.S. industry and its foreign customers, and will allow the Government to erect higher walls around the most sensitive export items in order to enhance national security.

Under the President's approach, agencies are to apply the criteria and revise the lists of munitions and dual-use items that are controlled for export so that they:

- Distinguish the transactions that should be subject to stricter levels of control from those where more permissive levels of control are appropriate;
- Create a ''bright line'' between the two current control lists to clarify jurisdictional determinations and reduce Government and industry uncertainty about whether particular items are subject to the control of the State Department or the Commerce Department; and
- Are structurally aligned so that they potentially can be combined into a single list of controlled items.

BIS' current regulatory plan action is designed to implement the initial phase of the President's directive, which will add to BIS' export control purview, military related items that the President determines no longer warrant control under rules administered by the State Department.

As the agency responsible for leading the administration and enforcement of U.S. export controls on dual-use and other items warranting controls but not under the provisions of export control regulations administered by other departments, BIS plays a central role in the Administration's efforts to reform the export control system. Changing what we control, how we control it and how we enforce and manage our controls will help strengthen our national security by focusing our efforts on controlling the most critical products and technologies, and by enhancing the competitiveness of key U.S. manufacturing and technology sectors.

In FY 2011, BIS began implementing the ECRI with a final rule (76 FR 35275, June 16, 2011) implementing a license exception that authorizes exports, reexports and transfers to destinations that do not pose a national security concern, provided certain safeguards against diversion to other destinations are taken. Additionally, BIS began publishing proposed rules to add to its Commerce Control List (CCL), military items the President determined no longer warranted control by the Department of State. BIS continued to publish such proposed rules in FY 2012.

In FY 2013, BIS crossed an important milestone with publication of two final rules that began to put ECRI policies into place. An Initial Implementation rule (78 FR 22660, April 16, 2013) set in place the structure under which items the President determines no longer warrant control on the United States Munitions List are controlled on the Commerce Control List. It also revised license exceptions and regulatory definitions, including the definition of ''specially designed'' to make those exceptions and definitions clearer and to more closely align them with the International Traffic in Arms Regulations, and added to the CCL certain military aircraft, gas turbine engines and related items. A second final rule (78 FR 40892, July 8, 2012) followed on by adding to the CCL military vehicles, vessels of war, submersible vessels, and auxiliary military equipment that President determined no longer warrant control on the USML.

BIS continued its ECRI efforts and by the end of fiscal year 2016 had published final rules adding to the CCL additional items that the President determined no longer warrant control under rules administered by the State Department in the following categories: Military training equipment; Explosives and energetic materials; Personal protective equipment; Launch vehicles and rockets; Spacecraft; Military Electronics; Toxicological agents; and Directed energy weapons. During fiscal year 2015, BIS published a proposed rule that would add to the CCL items related to: Fire control, range finder, optical and guidance and control equipment, followed by a second proposed rule in fiscal year 2016.

During fiscal year 2015, BIS initiated a process of evaluating the effectiveness of its ECRI efforts by seeking public input on whether the regulations are clear; do not inadvertently control, as military items, items in normal commercial use; account for technological developments; and properly implement the national security and foreign policy objectives of the reform effort. The first review addressed the first two categories of items added to the CCL by ECRI: Military aircraft and gas turbine engines. After reviewing public comments, BIS completed this review by publishing a final rule in fiscal year 2016. In fiscal year 2016, BIS continued this review process with a notice seeking public comment on implementation of ECRI with respect to military vehicles, vessels of war, submersible vessels, oceanographic equipment, and auxiliary and miscellaneous military equipment. BIS anticipates continuing this series of notices after the public has had time to develop experience with each regulation that added categories of items to the CCL.

Promoting International Regulatory Cooperation

As the President noted in Executive Order 13609, ''international regulatory cooperation, consistent with domestic law and prerogatives and U.S. trade policy, can be an important means of promoting'' public health, welfare, safety, and our environment as well as economic growth, innovation, competitiveness, and job creation. Accordingly, in E.O. 13609, the President requires each executive agency to include in its Regulatory Plan a summary of its international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations.

The Department of Commerce engages with numerous international bodies in various forums to promote the Department's priorities and foster regulations that do not ''impair the ability of American business to export and compete internationally.'' E.O. 13609(a). For example, the United States Patent and Trademark Office is working with the European Patent Office to develop a new classification system for both offices' use. The Bureau of Industry and Security, along with the Department of State and Department of Defense, engages with other countries in the Wassenaar Arrangement, through which the international community develops a common list of items that should be subject to export controls because they are conventional arms or items that have both military and civil uses. Other multilateral export control regimes include the Missile Technology Control Regime, the Nuclear Suppliers Group, and the Australia Group, which lists items controlled for chemical and biological weapon nonproliferation purposes. In addition, the National Oceanic and Atmospheric Administration works with other countries' regulatory bodies through regional fishery management organizations to develop fair and internationally-agreed-to fishery standards for the High Seas.

BIS is also engaged, in partnership with the Departments of State and Defense, in revising the regulatory framework for export control, through the President's Export Control Reform Initiative (ECRI). Through this effort, the United States Government has moved certain items currently controlled by the United States Military List (USML) to the Commerce Control List (CCL) in BIS' Export Administration Regulations. The objective of ECRI is to improve interoperability of U.S. military forces with those of allied countries, strengthen the U.S. industrial base by, among other things, reducing incentives for foreign manufacturers to design out and avoid U.S.-origin content and services, and allow export control officials to focus Government resources on transactions that pose greater concern. The new export control framework also will benefit companies in the United States seeking to export items through more flexible and less burdensome export controls. The system, however, requires ongoing review and maintenance for it to accomplish these objectives. Some technologies are modified and become more sensitive or are applied to more sensitive uses; others become more commercially available and warrant fewer controls. The approach is novel and will require regular refinement to further the objective of increasing interoperability with allies and reducing unnecessary regulatory burdens.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), the Department has identified several rulemakings as being associated with retrospective review and analysis in the Department's final retrospective review of regulations plan. Accordingly, the Agency is reviewing these rules to determine whether action under E.O. 13563 is appropriate. Some of these entries on this list may be completed actions, which do not appear in the Regulatory Plan. However, more information can be found about these completed rulemakings in past publications of the Unified Agenda on Reginfo.gov in the Completed Actions section for the Agency. These rulemakings can also be found on *Regulations.gov*.

Two rulemakings that are the product of the Agency's retrospective review are from BIS and NOAA. BIS published a rule effective in September 2015 that removed the Special Comprehensive License provisions from the EAR. These provisions had been rendered obsolete by liberalizations to the individual licensing process, and their removal not only streamlined the EAR but also achieved paperwork burden reductions. More significantly, BIS, working with its colleagues in the State Department, substantially updated and revised the key structural definitions within the export control regulations. The effort is not yet completed and substantial additional work is needed to harmonize, update, and simplify the regulatory structure of the existing export control system, which has been in place for decades without material modification.

NOAA continues to demonstrate great success in fishery sustainability managed under the Magnuson-Stevens Act, with near-record landings and revenue accomplished while rebuilding stocks across the country and preventing overfishing. Since the Magnuson-Stevens Act reauthorization in 2007, NMFS and the Regional Fishery Management Councils have implemented annual catch limits and accountability measures in every fishery management plan under National Standard One of the act. Informed by a robust public process that gained input through a public summit (Managing our Nation's Fisheries), visits to each region and Council and multiple public hearings, NMFS took the experience gained from 8 years of implementation of National Standard One and has proposed multiple substantive, technical changes to the National Standard One rule that will improve implementation and continue to support healthy fisheries.

For more information, the most recent E.O. 13563 progress report for the Department can be found here: *http://open.commerce.gov/news/2016/04/05/commerce-plan-retrospective-analysis-existing-rules*.

DOC—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION (NOAA)

Proposed Rule Stage

14. • Endangered and Threatened Species; Critical Habitat for the Threatened Caribbean Corals

Priority: Other Significant.
Legal Authority: 16 U.S.C. 1531 *et seq.*
CFR Citation: 50 CFR 226.
Legal Deadline: None.
Abstract: The National Marine Fisheries Service listed five Caribbean corals in the Southeast Region as threatened under the Endangered Species Act on October 10, 2014. Critical habitat shall be specified to the maximum extent prudent and determinable at the time a species is proposed for listing. We concluded that critical habitat was not determinable for the five corals at the time of listing. However, we anticipated that critical habitat would be determinable in the future given on-going research. We, therefore, announced in the final listing rules that we would propose critical habitat in separate rulemakings. This rule proposes to designate critical habitat for the 5 newly-listed corals and revises critical habitat for the previously-listed corals Acropora palmata and Acropora cervicornis. A

separate rule is being prepared that would propose to designate critical habitat for the 15 Indo-Pacific corals listed as threatened in the same rule as the five Caribbean corals.

Statement of Need: This action would designate new critical habitat for five corals (Dendrogyra cylindrus, Orbicella annularis, O. faveolata, O. franksi, and Mycetophyllia ferox) and revise the 2008 critical habitat designation for two corals (Acropora palmata and A. cervicornis) in accordance with section 4 of the Endangered Species Act. This action follows from the listing of the five new species.

Summary of Legal Basis: Endangered Species Act.

Alternatives: NMFS evaluated alternatives including the impacts of designating all and any parts of 38 (one for each species in each US jurisdiction in which it occurs) units as critical habitat. Units 1 for each species are the waters offshore Florida (generally Martin, Palm Beach, Broward, Miami-Dade, and Monroe counties). Units 2 are the waters surrounding the islands of Puerto Rico. Units 3 are the waters surround the islands of St. Thomas and St. John, US Virgin Islands. Units 4 are the waters surrounding the island of St. Croix, US Virgin Islands. Units 5 are the waters surrounding the island of Navassa. Units 6 are the waters within the Flower Garden Banks National Marine Sanctuary, approximately 100 miles offshore of Texas in the Gulf of Mexico. NMFS analyzed the economic, national security, and other relevant impacts of designating critical habitat. NMFS will further consider these impacts based on any relevant public and peer reviewer comments regarding this proposed designation.

Anticipated Cost and Benefits: The primary benefit of designation is the protection afforded under section 7 of the Endangered Species Act, requiring all Federal agencies to insure their actions are not likely to destroy or adversely modify designated critical habitat. In addition to these protections, the designation may also result in other forms of benefits including, but not limited to: Educational awareness and outreach benefits, benefits to tourism and recreation, and improved or sustained habitat quality. Costs specifically associated with the designation of critical habitat stem mainly from Federal agencies requirement to consult with NMFS, under section 7 of the Endangered Species Act, to insure that any action they carry out, permit (authorize), or fund will not result in the destruction or adverse modification of critical habitat of a listed species.

Risks: If critical habitat is not designated, listed corals will not be protected to the extent provided for in the ESA, posing a legal risk to the agency and a risk to the species continued existence and recovery.

DOC—NOAA

15. • Designation of Critical Habitat for Threatened Indo-Pacific Reef-Building Corals

Priority: Other Significant.

Legal Authority: 16 U.S.C. 1531 *et seq.*

CFR Citation: 50 CFR 226.

Legal Deadline: Final, Statutory, September 10, 2016, Statutory deadline for final critical habitat designation of listed Indo–Pacific corals.

Abstract: On September 10, 2014, the National Marine Fisheries Service listed 20 species of reef-building corals as threatened under the Endangered Species Act, 15 in the Indo-Pacific and five in the Caribbean. Of the 15 Indo-Pacific species, seven occur in U.S. waters of the Pacific Islands Region, including in American Samoa, Guam, the Commonwealth of the Mariana Islands, and the Pacific Remote Island Areas. This proposed rule would designate critical habitat for the seven species in U.S. waters (Acropora globiceps, Acropora jacquelineae, Acropora retusa, Acropora speciosa, Euphyllia paradivisa, Isopora crateriformis, and Seriatopora aculeata). A separate proposed rule is being prepared to designate critical habitat for the listed Caribbean coral species. The proposed designation would cover coral reef habitat around 13 island or atoll units in the Pacific Islands Region, including three in American Samoa, one in Guam, seven in the Commonwealth of the Mariana Islands, and two in Pacific Remote Island Areas, containing essential features that support reproduction, growth, and survival of the listed coral species.

Statement of Need: This action would designate new critical habitat for seven corals (Acropora globiceps, Acropora jacquelineae, Acropora retusa, Acropora speciosa, Euphyllia paradivisa, Isopora crateriformis, and Seriatopora aculeata) in accordance with section 4 of the Endangered Species Act. This action follows from the listing of the seven new species.

Summary of Legal Basis: Endangered Species Act.

Alternatives: NMFS evaluated alternatives including the impacts of designating all and any parts of 19 islands within the U.S. jurisdictions of American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Pacific Remote Island Areas as units of proposed critical habitat for the seven listed corals, including: (1) Tutuila & Offshore Banks; (2) Ofu & Olosega; (3) Ta'u; (4) Rose Atoll; (5) Guam & Offshore Banks; (6) Rota; (7) Aguijan; (8) Tinian and Tatsumi Reef; (9) Saipan and Garapan Bank; (10) Farallon de Medinilla; (11) Anatahan; (12) Pagan; (13) Maug Islands & Supply Reef; (14) Howland Island; (15) Palmyra Atoll; (16) Kingman Reef; (17) Johnston Atoll; (18) Wake Atoll; and (19) Jarvis Island. NMFS analyzed the economic, national security, and other relevant impacts of designating critical habitat. NMFS will further consider these impacts based on any relevant public and peer reviewer comments regarding this proposed designation.

Anticipated Cost and Benefits: The primary benefit of designation is the protection afforded under section 7 of the Endangered Species Act, requiring all Federal agencies to insure their actions are not likely to destroy or adversely modify designated critical habitat. In addition to these protections, the designation may also result in other forms of benefits including, but not limited to: Educational awareness and outreach benefits, benefits to tourism and recreation, and improved or sustained habitat quality. Costs specifically associated with the designation of critical habitat stem mainly from Federal agencies requirement to consult with NMFS, under section 7 of the Endangered Species Act, to insure that any action they carry out, permit (authorize), or fund will not result in the destruction or adverse modification of critical habitat of a listed species.

Risks: If critical habitat is not designated, listed corals will not be protected to the extent provided for in the ESA, posing a legal risk to the

agency and a risk to the species continued existence and recovery.

RIN: 0648–BG26

DOC—NOAA

Final Rule Stage

16. Magnuson-Stevens Fisheries Conservation and Management Act; Seafood Import Monitoring Program

Priority: Other Significant.

Legal Authority: 16 U.S.C. 1857

CFR Citation: 50 CFR 300; 50 CFR 600.

Legal Deadline: None.

Abstract: On March 15, 2015, the Presidential Task Force on Combating Illegal, Unreported, and Unregulated Fishing and Seafood Fraud (Task Force), co-chaired by the Departments of Commerce and State, published its action plan to implement Task Force recommendations for a comprehensive framework of integrated programs to combat illegal, unreported, and unregulated fishing and seafood fraud. The plan identifies actions that will strengthen enforcement, create and expand partnerships with state and local governments, industry, and non-governmental organizations, and create a traceability program to track seafood from harvest to entry into U.S. commerce, including the use of existing traceability mechanisms. As part of that plan, the National Marine Fisheries Service proposes regulatory changes to improve the administration of the Magnuson-Stevens Fisheries Conservation and Management Act prohibition on the entry into interstate or foreign commerce of any fish taken in violation of any foreign law or regulation. The rule includes adjustments to permitting and reporting requirements to provide for traceability of seafood products offered for entry into the U.S. supply chain, and to ensure that these products were lawfully acquired and are properly labeled. Requirements for an international trade permit and reporting on the origin of certain imported or exported fishery products were previously established by regulations applicable to a number of specified fishery products. This rulemaking would extend those existing permitting and reporting requirements to additional fish species and seafood products.

Statement of Need: The Magnuson-Stevens Fishery Conservation and Management Act prohibits the importation and trade in interstate commerce of fishery products from fish caught in violation of any foreign law or regulation.

Summary of Legal Basis: Magnuson-Stevens Fishery Conservation and Management Act.

Alternatives: An alternative to this rulemaking that would diminish the incentives for illegal, unreported and unregulated fishing would be through cooperation and assistance programs. While the U.S. has developed effective fisheries management and enforcement techniques and applied these in many fisheries, there is no guarantee that these methods will be widely adopted in foreign fisheries. Technical and financial assistance for the development and implementation of monitoring, control and surveillance measures would not be precluded by this rulemaking, but market access incentives will increase the likelihood of action by harvesting nations exporting to the U.S.

Anticipated Cost and Benefits: Potential benefits of this rulemaking include: An incentive for exporting nations to adopt and implement fisheries regulatory and enforcement standards, including monitoring, control and surveillance measures that are comparable to the U.S. as a condition for access to the U.S. seafood market, enhanced fisheries conservation for shared and transboundary stocks, especially high seas stocks, and a safe and sustainable seafood supply for the U.S. market. Anticipated costs include: Increased administrative costs to the U.S. government for monitoring U.S. imports and making determinations about lawful acquisition of fisheries products; increased requests for international cooperation and assistance to implement fisheries monitoring, control and surveillance measures. Additionally, U.S. importers and fish processors may incur incremental costs for recordkeeping and reporting.

Risks: Prohibiting imports from seafood exporting nations for which lawful acquisition cannot be established will diminish the risk of further declines in global fisheries stocks that are affected by illegal, unreported and unregulated fishing activities.

DOC—NOAA

17. Designation of Critical Habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic Sturgeon

Priority: Other Significant.

Legal Authority: 16 U.S.C. 1531 *et seq.*

CFR Citation: 50 CFR 226.

Legal Deadline: NPRM, Judicial, May 30, 2016, per consent decree entered December 3, 2014, and modified by a November 9, 2015, order.

Following a complaint from the Natural Resources Defense Council and Delaware Riverkeeper Network, we agreed to submit this proposed rule to the **Federal Register** by November 30, 2015 for publication.

Abstract: The National Marine Fisheries Service listed four distinct population segments of Atlantic sturgeon as endangered and one distinct population of Atlantic sturgeon as threatened under the Endangered Species Act on February 6, 2012. This rule would designate critical habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic sturgeon. A separate rule would designate critical habitat for the Carolina and South Atlantic distinct population segments of Atlantic sturgeon.

Statement of Need: The Gulf of Maine, New York Bight, and

Chesapeake Bay distinct population segments (DPSs) of Atlantic sturgeon were listed under the Endangered Species Act (ESA) in February 2012. Section 4 of the ESA requires that critical habitat be specified to the maximum extent prudent and determinable at the time a species is listed (16 U.S.C. 1533(b)(6)(C)). The ESA also requires that we publish final critical habitat rules within one year of proposed rules. At the time the Atlantic sturgeon DPSs were listed, we were unable to determine what areas met the statutory definition of critical habitat. We subsequently published a proposed rule to designate critical habitat for these DPSs on June 3, 2016. Under an existing court-ordered settlement agreement, we are required to publish final critical habitat designations by June 3, 2017—one year from the date of publication of the proposed rules.

Summary of Legal Basis: Endangered Species Act and court-ordered settlement agreement.

Alternatives: During the formulation of the final rule, pursuant to section 4(b)(2) of the ESA, we will evaluate the impacts of designating all and any parts of the proposed critical habitat. We are required to analyze the economic, national security, and other relevant impacts of designating critical habitat. Through this process, we have discretion to exclude areas from the final designation as long as such exclusions do not result in the extinction of Atlantic sturgeon DPSs. Based on our draft impacts analysis supporting the proposed rule, we did not exclude any portions of the proposed critical habitat. We also completed an Initial Regulatory Flexibility Analysis and analyzed a no action alternative, an alternative in which some of the identified critical habitat areas are designated, and an alternative in which all critical habitat areas identified for the Gulf of Maine, New York Bight, and Chesapeake Bay DPSs of Atlantic sturgeon are designated.

Anticipated Cost and Benefits: The primary benefit of critical habitat designation is the protection afforded under section 7 of the ESA, which requires all Federal agencies to insure their actions are not likely to destroy or adversely modify designated critical habitat. In addition to these protections, the designation may also result in other forms of benefits including, but not limited to: educational awareness and outreach benefits, benefits to tourism and recreation, and improved or sustained habitat quality. Costs specifically associated with the designation of critical habitat stem mainly from the requirement that Federal agencies consult with NMFS, under section 7 of the ESA, to insure that any action they carry out, permit (authorize), or fund will not result in the destruction or adverse modification of critical habitat of a listed species.

Risks: If critical habitat is not designated, listed Atlantic sturgeon will not be protected to the extent provided for in the ESA, posing a legal risk to the agency and a risk to the species continued existence and recovery.

DOC—NOAA

18. Designation of Critical Habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic Sturgeon

Priority: Other Significant.

Legal Authority: 16 U.S.C. 1531 *et seq.*

CFR Citation: 50 CFR 226.

Legal Deadline: NPRM, Judicial, May 30, 2016, Per consent decree entered December 3, 2014, and modified by a November 9, 2015, order.

Abstract: The National Marine Fisheries Service listed four distinct population segments of Atlantic sturgeon as endangered—and one distinct population of Atlantic sturgeon as threatened—under the Endangered Species Act on February 6, 2012. This action proposes to designate critical habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic sturgeon, both listed as endangered.

Statement of Need: The Carolina and south Atlantic distinct population segments (DPSs) of Atlantic sturgeon were listed under the Endangered Species Act (ESA) in February 2012. Section 4 of the ESA requires that critical habitat be specified to the maximum extent prudent and determinable at the time a species is listed (16 U.S.C. 1533(b)(6)(C)). The ESA also requires that we publish final critical habitat rules within one year of proposed rules. At the time the Atlantic sturgeon DPSs were listed, we were unable to determine what areas met the statutory definition of critical habitat. We subsequently published a proposed rule to designate critical habitat for these DPSs on June 3, 2016. Under an existing court-ordered settlement agreement, we are required to publish final critical habitat designations by June 3, 2017—one year from the date of publication of the proposed rules.

Summary of Legal Basis: Endangered Species Act and court-ordered settlement agreement.

Alternatives: During the formulation of the final rule, pursuant to section 4(b)(2) of the ESA, we will evaluate the impacts of designating all and any parts of the proposed critical habitat. We are required to analyze the economic, national security, and other relevant impacts of designating critical habitat. Through this process, we have discretion to exclude areas from the final designation as long as such exclusions do not result in the extinction of Atlantic sturgeon DPSs. Based on our draft impacts analysis supporting the proposed rule, we did not exclude any portions of the proposed critical habitat. We also completed an Initial Regulatory Flexibility Analysis and analyzed a no action alternative, an alternative in which some of the identified critical habitat areas are designated, and an alternative in which all critical habitat areas identified for the Carolina and south Atlantic DPSs of Atlantic sturgeon are designated.

Anticipated Cost and Benefits: The primary benefit of critical habitat designation is the protection afforded under section 7 of the ESA, which requires all Federal agencies to insure their actions are not likely to destroy or adversely modify designated critical habitat. In addition to these protections, the designation may also result in other forms of benefits including, but not limited to: Educational awareness and outreach benefits, benefits to tourism and recreation, and improved or sustained habitat quality. Costs specifically associated with the designation of critical habitat stem mainly from the requirement that Federal agencies consult with NMFS,

under section 7 of the ESA, to insure that any action they carry out, permit (authorize), or fund will not result in the destruction or adverse modification of critical habitat of a listed species.

Risks: If critical habitat is not designated, listed Atlantic sturgeon will not be protected to the extent provided for in the ESA, posing a legal risk to the agency and a risk to the species continued existence and recovery.

DEPARTMENT OF DEFENSE

Statement of Regulatory Priorities

Background

The Department of Defense (DoD) is the largest Federal department consisting of three Military departments (Army, Navy, and Air Force), nine Unified Combatant Commands, 17 Defense Agencies, and ten DoD Field Activities. It has 1,329,949 military personnel and 878,527 civilians assigned as of June 30, 2016, and over 200 large and medium installations in the continental United States, U.S. territories, and foreign countries. The overall size, composition, and dispersion of DoD, coupled with an innovative regulatory program, present a challenge to the management of the Defense regulatory efforts under Executive Order (E.O.) 12866 ''Regulatory Planning and Review'' of September 30, 1993.

Because of its diversified nature, DoD is affected by the regulations issued by regulatory agencies such as the Departments of Commerce, Energy, Health and Human Services, Housing and Urban Development, Labor, State, Transportation, and the Environmental Protection Agency. In order to develop the best possible regulations that embody the principles and objectives embedded in Executive Order 12866, there must be coordination of proposed regulations among the regulatory agencies and the affected DoD components. Coordinating the proposed regulations in advance throughout an organization as large as DoD is a straightforward, yet formidable, undertaking.

DoD issues regulations that have an effect on the public and that can be significant as defined in Executive Order 12866. In addition, some of DoD's regulations may affect other agencies. DoD, as an integral part of its program, not only receives coordinating actions from other agencies, but coordinates with the agencies that are affected by its regulations as well.

Overall Priorities

The Department needs to function at a reasonable cost, while ensuring that it does not impose ineffective and unnecessarily burdensome regulations on the public. The rulemaking process should be responsive, efficient, cost-effective, and both fair and perceived as fair. This is being done in DoD while reacting to the contradictory pressures of providing more services in a constrained fiscal environment. DoD, as a matter of overall priority for its regulatory program, fully incorporates the provisions of the President's priorities and objectives under Executive Order 12866.

International Regulatory Cooperation

As the President noted in Executive Order 13609, ''Promoting International Regulatory Cooperation'' of May 1, 2012, ''international regulatory cooperation, consistent with domestic law and prerogatives and U.S. trade policy, can be an important means of promoting'' public health, welfare, safety, and our environment as well as economic growth, innovation, competitiveness, and job creation. Accordingly, in Executive Order 13609, the President requires each executive agency to include in its Regulatory Plan a summary of its international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations.

The Department of Defense, along with the Departments of State and Commerce, engages with other countries in the Wassenaar Arrangement, Nuclear Suppliers Group, Australia Group, and Missile Technology Control Regime through which the international community develops a common list of items that should be subject to export controls. DoD has been a key participant in the Administration's Export Control Reform effort that resulted in a complete overhaul of the U.S. Munitions List and fundamental changes to the Commerce Control List. New controls have facilitated transfers of goods and technologies to allies and partners while helping prevent transfers to countries of national security and proliferation concern. DoD will continue to assess new and emerging technologies to ensure items that provide critical military and intelligence capabilities are properly controlled on international export control regime lists.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (January 18, 2011), the following Regulatory Identification Numbers (RINs) have been identified as associated with retrospective review and analysis in the Department's final retrospective review of regulations plan. Several are of particular interest to small businesses. The entries on this list are completed actions, which do not appear in The Regulatory Plan. However, more information can be found about these completed rulemakings in past publications of the Unified Agenda on *reginfo.gov* in the Completed Actions section for DoD. These rulemakings can also be found on *regulations.gov*. We will continue to identify retrospective review regulations as they are published and report on the progress of the overall plan biannually. DoD's final agency plan and all updates to the plan can be found at: *http://www.regulations.gov/#!docketDetail;D=DOD-2011-OS-0036*.

RIN	Rule title (*expected to significantly reduce burdens on small businesses)
0702–AA71	Army Privacy Program

RIN	Rule title (*expected to significantly reduce burdens on small businesses)
0703–AA90	Guidelines for Archaeological Investigation Permits and Other Research on Sunken Military Craft and Terrestrial Military Craft Under the Jurisdiction of the Department of the Navy
0703–AA92	Professional Conduct of Attorneys Practicing Under the Cognizance and Supervision of the Judge Advocate General
0710–AA66	Civil Monetary Penalty Inflation Adjustment Rule
0710–AA60	Nationwide Permit Program Regulations*
0750–AG47	Safeguarding Unclassified Controlled Technical Information (DFARS Case 2011–D039)
0750–AG62	Patents, Data, and Copyrights (DFARS Case 2010–D001)
0750–AH11	Only One Offer (DFARS Case 2011–D013)
0750–AH19	Accelerated Payments to Small Business (DFARS Case 2011–D008)
0750–AH54	Performance-Based Payments (DFARS Case 2011–D045)
0750–AH70	Defense Trade Cooperation Treaty With Australia and the United Kingdom (DFARS Case 2012–D034)
0750–AH86	Forward Pricing Rate Proposal Adequacy Checklist (DFARS Case 2012–D035)
0750–AH87	System for Award Management Name Changes, Phase 1 Implementation (DFARS Case 2012–D053)
0750–AH90	Clauses With Alternates—Transportation (DFARS Case 2012–D057)
0750–AH94	Clauses with Alternates—Foreign Acquisition (DFARS Case 2013–D005)
0750–AH95	Clauses with Alternates—Quality Assurance (DFARS Case 2013–D004)
0750–AI02	Clauses with Alternates—Contract Financing (DFARS Case 2013–D014)
0750–AI10	Clauses with Alternates—Research and Development Contracting (DFARS Case 2013–D026)
0750–AI19	Clauses with Alternates—Taxes (DFARS Case 2013–D025)
0750–AI27	Clauses with Alternates—Special Contracting Methods, Major System Acquisition, and Service Contracting (DFARS Case 2014–D004)
0750–AI03	Approval of Rental Waiver Requests (DFARS Case 2013–D006)
0750–AI07	Storage, Treatment, and Disposal of Toxic or Hazardous Materials—Statutory Update (DFARS Case 2013–D013)
0750–AI18	Photovoltaic Devices (DFARS Case 2014–D006)
0750–AI34	State Sponsors of Terrorism (DFARS Case 2014–D014)
0750–AI43	Inflation Adjustment of Acquisition-Related Thresholds (DFARS Case 2014–D025)
0750–AI58	Detection and Avoidance of Counterfeit Electronic Parts—Further Implementation (DFARS Case 2014–D005)
0750–AI76	Duty-Free Entry Threshold (DFARS Case 2015–D036)
0750–AI85	Prohibition on Requiring the Use of Fire-Resistant Rayon Fiber (DFARS Case 2016–D012)
0790–AI19	Service Academies
0790–AI42	Personnel Security Program
0790–AI54	Defense Support of Civilian Law Enforcement Agencies
0790–AI63	Alternative Dispute Resolution
0790–AI77	Provision of Early Intervention and Special Education Services to Eligible DoD Dependents
0790–AI86	Defense Logistics Agency Privacy Program
0790–AI87	Defense Logistics Agency Freedom of Information Act Program
0790–AI88	Shelter for the Homeless
0790–AI90	DoD Assistance to Non-Government, Entertainment-Oriented Media Productions
0790–AI94	Public Affairs Liaison with Industry
0790–AI98	Professional U.S. Scouting Organizations Operating at U.S. Military Installations Overseas
0790–AJ00	Civilian Employment and Reemployment Rights of Applicants for, and Service Members and Former Service Members of, the Uniformed Services
0790–AJ03	DoD Privacy Program
0790–AJ06	Voluntary Education Programs
0790–AJ07	Historical Research in the Files of the Office of the Secretary of Defense (OSD)
0790–AJ10	Enhancement of Protections on Consumer Credit for Members of the Armed Forces and Their Dependents
0790–AJ11	Defense Materiel Disposition
0790–AJ19	Background Checks on Individuals in DoD Child Care Services Programs
0790–AJ28	National Language Service Corps (NLSC)
	Pursuant to Executive Order 13563, DoD also removed 32 CFR part 513, ''Indebtedness of Military Personnel,'' because the part is obsolete and the governing policy is now codified at 32 CFR part 112.

Administration Priorities

1. Rulemakings that are expected to have high net benefits well in excess of costs.

The Department plans to finalize the following Defense Federal Acquisition Regulation Supplement (DFARS) rule:

• Network Penetration Reporting and Contracting for Cloud Services (DFARS case 2013–D018). This final rule implements section 941 of the National Defense Authorization Act (NDAA) for FY 2013 and section 1632 of the NDAA for FY 2015. Section 941 requires cleared defense contractors to report penetrations of networks and information systems and allows DoD personnel access to equipment and information to assess the impact of reported penetrations. Section 1632 requires that a contractor designated as operationally critical must report each time a cyber-incident occurs on that contractor's network or information systems. Ultimately, DoD anticipates significant savings to taxpayers as a result of this rule, by improving information security for DoD information that resides in or transits through contractor systems and a cloud environment. Recent high-profile breaches of Federal information show the need to ensure that information security protections are clearly, effectively, and consistently addressed in contracts. This rule will help protect covered defense information or other Government data from compromise and protect against the loss of operationally critical support capabilities, which could directly impact national security.

The Department plans to propose the following DFARS rule:

• Use of the Government Property Clause (DFARS Case 2015–D035). This rule amends the DFARS to expand the prescription for use of Federal Acquisition Regulation (FAR) clause 52.245–1, Government Property. This clause requires contractors to comply with basic property receipt and record

keeping requirements in order for the Government to track, report, and manage Government-furnished property. Currently, this clause is not required for use in purchase orders for repair when the unit acquisition cost of Government property to be repaired does not exceed the simplified acquisition threshold (SAT). However, acquisition value alone is not an indicator of the criticality or sensitivity of Government property items. For example, firearms, body armor, night vision equipment, computers or cryptological devices may individually all be below the SAT, but accountability of these items is of vital importance. Lack of the use of the Government property clause in these instances significantly increases the risk of misuse or loss of Government property. In order to strengthen the management and accountability of Government-furnished property (GFP), this rule proposes to amend the DFARS to require use of the Government property clause in these instances, regardless of the acquisition value.

2. Rulemakings that promote open Government and use disclosure as a regulatory tool.

The Department plans to finalize the following DFARS rule:

• Promoting Voluntary Post-Award Disclosure of Defective Pricing (DFARS Case 2015–D030). In response to the Better Buying Power 2.0 initiative on ''Eliminating Requirements Imposed on Industry where Costs Outweigh Benefits,'' contractors recommended that DoD clarify policy guidance to reduce repeated submissions of certified cost or pricing data. Frequent submissions of such data are used as a defense against defective pricing claims by DoD after contract award, since data that are frequently updated are less likely to be considered outdated or inaccurate and, therefore, defective. Better Buying Power 3.0 called for a revision of regulatory guidance regarding the requirement for contracting officers to request an audit, even if a contractor voluntarily discloses defective pricing after contract award. This rule amends the DFARS to stipulate that DoD contracting officers shall request a limited-scope audit when a contractor voluntarily discloses defective pricing after contract award, unless a full-scope audit is appropriate for the circumstances.

3. Rulemakings of particular interest to small businesses.

The Department plans to propose the following DFARS rules—

• Temporary Extension of Test Program for Comprehensive Small Business Subcontracting Plans (DFARS Case 2015–D013). This rule amends the DFARS to implement section 821 of the NDAA for FY 2015 regarding the Test Program for Comprehensive Small Business Subcontracting Plans. The Test Program was established under section 834 of the NDAAs for FYs 1990 and 1991 to determine whether the negotiation and administration of comprehensive small business subcontracting plans would result in an increase of opportunities provided for small business concerns under DoD contracts. A comprehensive subcontracting plan (CSP) can be negotiated on a corporate, division, or sector level, rather than contract by contract. This rule will amend the DFARS to: (1) Extend the Test Program through December 31, 2017; (2) implement new reporting requirements for program participants; (3) require contracting officers to consider an offerors failure to make a good faith effort to comply with its CSP in past performance evaluations; and (4) establish procedures for the assessment of liquidated damages. This rule is of particular interest to small businesses because it holds prime contractors that are participating in the program accountable for the small business goals established in their CSP, resulting in increased business opportunities for small business subcontractors.

• Amendment to Mentor-Protégé Program (DFARS Case 2016–D011). This rule amends the DFARS to implement section 861 of the NDAA for FY 2016 (Pub. L. 114–92), which provides amendments to the Pilot Mentor-Protégé Program (''the Program''). Specifically, section 861 requires mentor firms participating in the Program to report additional information on the assistance they have provided to their protégé firms, the success this assistance has had in addressing the protégé firm's developmental needs, the impact on DoD contracts, and any problems encountered. The new reporting requirements apply retroactively to mentor-protégé agreements entered into before, on, or after the date of enactment of the NDAA for FY 2016 (enacted November 25, 2015). DoD's OSBP will use the information reported by mentors to support decisions regarding continuation of particular mentor-protégé agreements. In addition, section 861 adds new eligibility criteria for mentor and protégé firms; limits the period of time a protégé firm can participate in the Program; limits the number of mentor-protégé agreements to which a protégé can be a party; and extends the Program for three years. This rule amends DFARS to implement the new reporting requirements and other Program amendments.

The Department plans to reissue the Nationwide Permits—

• Department of the Army (DA) permits are required for discharges of dredged or fill material into waters of the United States and any structures or other work that affect the course, location, or condition of navigable waters of the United States. Small businesses proposing to discharge dredged or fill material into waters of the United States and/or install structures or do work in navigable waters of the United States must obtain DA permits to conduct those activities, unless a particular activity is exempt from those permit requirements. Individual permits and general permits can be issued by the Corps to satisfy the permit requirements of these two statutes. Nationwide permits (NWPs) are a form of general permit issued by the U.S. Army Corps of Engineers (Corps) that authorize activities that have no more than minimal individual and cumulative adverse environmental effects. The NWPs provide a streamline authorization process for small businesses to fulfill DA permit requirements. Nationwide permits can only be issued for a period of no more than five years. The issuance and reissuance of NWPs must be done every five years to continue the NWP program. Currently, there are 50 NWPs, and those NWPs expire on March 18, 2017. In addition to proposing to reissue all of the 50 existing NWPs, the Corps is also proposing to issue two new NWPs. The Corps plans on issuing the final NWP rule before the current NWPs expire so that NWPs will continue to be available to small businesses and other regulated entities.

4. Rulemakings that streamline regulations, reduce unjustified burdens, and minimize burdens on small businesses.

The Department plans to propose the following DFARS rule—

• Pilot Program for Streamlining Awards for Innovative Technology Projects (DFARS Case 2016–D016). This rule proposes to amend the DFARS to implement section 873 of the NDAA for FY 2016 (Pub. L. 114–92). Section 873 provides the following exception from certified cost and pricing data requirements for contracts, subcontracts, or modifications of contracts or subcontracts valued at less than $7.5 million awarded to a small business or nontraditional defense contractor pursuant to a technical, merit-based selection procedure (*e.g.,* broad agency announcement) or the Small Business Innovation Research (SBIR) Program. In

addition, section 873 provides an exception from the records examination requirement at 10 U.S.C. 2313 for contracts valued at less than $7.5 million awarded to a small business or nontraditional defense contractor pursuant to a technical, merit-based selection procedure (*e.g.,* broad agency announcement) or the SBIR Program. However, section 873 also provides authority in certain circumstances to determine that submission of cost and pricing data or auditing of records should be required based on past performance of the specific small business or nontraditional defense contractor or analysis of other information specific to the award. These exceptions end on October 1, 2020.

The Department plans to reissue the Nationwide Permits—

• As discussed above, nationwide permits (NWPs) are a form of general permit issued by the Corps that authorizes activities that require DA authorization and have no more than minimal individual and cumulative adverse environmental effects. The Corps plans to reissue the 50 existing NWPs and issue two new NWPs. Unlike individual permits, NWPs authorize activities without the requirement for public notice and comment on each proposed activity, which reduces burdens on small businesses and streamlines the authorization process. In FY 2015, the Corps issued approximately 31,700 NWP verifications, with an average processing time of 41 days. In FY 2015, the Corps issued approximately 1,700 standard individual permits, with an average processing time of 211 days. The proposed NWPs were published in the **Federal Register** on June 1, 2016, for a 60-day comment period. The Corps plans on finalizing the NWPs before the current NWPs expire on March 18, 2017. The costs for obtaining authorization under an NWP are low compared to the standard individual permit process, both in terms of financial costs and the time it takes to obtain the required authorization.

5. Rules to be modified, streamlined, expanded, or repealed to make the agency's regulatory program more effective or less burdensome in achieving the regulatory objectives.

The Department plans to finalize the following DFARS rule—

• Enhancing Independent Research and Development Efforts (DFARS Case 2016–D002). This rule will amend the DFARS to improve the effectiveness of independent research and development (IR&D) investments by the defense industrial base that are reimbursed as allowable costs. Specifically, DoD is revising DFARS 231.205–18, Independent Research and Development and Bid and Proposal Costs, to require that proposed new independent research and development (IR&D) efforts be communicated to appropriate DoD personnel prior to the initiation of these investments, and that results from these investments should also be shared with appropriate DoD personnel. IR&D investments need to meet the complementary goals of providing defense companies an opportunity to exercise independent judgement on investments in promising technologies that will provide a competitive advantage, including the creation of intellectual property, while at the same time pursuing technologies that may improve the military capability of the United States. These efforts can have the best payoff, both for DoD and for individual performing companies, when the Government is well informed of the investments that companies are making, and when companies are well informed about related investments being made elsewhere in the Government's research and development portfolios and about Government plans for potential future acquisitions where this IR&D may be relevant.

Specific DoD Priorities: For this regulatory plan, there are six specific DoD priorities, all of which reflect the established regulatory principles. DoD has focused its regulatory resources on the most serious health and safety risks. Perhaps most significant is that each of the priorities described below promulgates regulations to offset the resource impacts of Federal decisions on the public or to improve the quality of public life, such as those regulations concerning acquisition, health affairs, personnel benefits, and cyber security.

1. Acquisition, Technology, and Logistics/Defense Procurement and Acquisition Policy (DPAP), Department of Defense

DPAP continuously reviews the DFARS and continues to lead Government efforts to—

• Improve the presentation, clarity, and streamlining of the regulation by, for example: (1) Implementing the new convention to construct clauses with alternates in a manner whereby the alternate clauses are included in full-text; and (2) removing obsolete reporting or other requirements imposed on contractors. Such improvements ensure that contracting officers, contractors, and offerors have a clear understanding of the rules for doing business with the Department.

• Obtain early engagement with industry on procurement topics of high public interest by, for example: (1) Utilizing the DPAP Defense Acquisition Regulation System Web site to obtain early public feedback on newly enacted legislation that impacts the Department's acquisition regulations, prior to initiating rulemaking to draft the implementing rules; and (2) holding public meetings to solicit industry feedback on proposed rulemakings.

• Employ methods to facilitate and improve efficiency of the contracting process, such as (1) updating certain evaluation thresholds based on the consumer price index; (2) allowing contractors to display one DoD Inspector General hotline poster instead of three; and (3) revising the DD Form 1547, Record of Weighted Guidelines, to provide a more transparent means of documenting costs incurred during the undefinitized period of an undefinitized contract action.

2. Health Affairs, Department of Defense

The Department of Defense is able to meet its dual mission of wartime readiness and peacetime health care for those entitled to DoD medical care and benefits by operating an extensive network of military medical treatment facilities supplemented by services furnished by civilian health care providers and facilities through the TRICARE program as administered under DoD contracts. TRICARE is a major health care program designed to improve the management and integration of DoD's health care delivery system.

The Department of Defense's Military Health System (MHS) continues to meet the challenge of providing the world's finest combat medicine and aeromedical evacuation, while supporting peacetime health care for those entitled to DoD medical care and benefits at home and abroad. The MHS brings together the worldwide health care resources of the Uniformed Services (often referred to as ''direct care,'' usually within military treatment facilities) and supplements this capability with services furnished by network and non-network civilian health care professionals, institutions, pharmacies, and suppliers, through the TRICARE program as administered under DoD contracts, to provide access to high quality health care services while maintaining the capability to support military operations. The TRICARE program serves 9.5 million Active Duty Service Members, National Guard and Reserve members, retirees, their families, survivors, and certain former spouses worldwide. TRICARE continues to offer an increasingly integrated and comprehensive health

care plan, refining and enhancing both benefits and programs in a manner consistent with the law, industry standard of care, and best practices, to meet the changing needs of its beneficiaries. The program's goal is to increase access to health care services, improve health care quality, and control health care costs.

The Defense Health Agency plans to publish the following rules—

• Final Rule: Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)/TRICARE: Refills of Maintenance Medications Through Military Treatment Facility Pharmacies or National Mail Order Pharmacy Program. This final rule implements Section 702(c) of the Carl Levin and Howard P. ''Buck'' McKeon National Defense Authorization Act for Fiscal Year 2015 which states that beginning October 1, 2015; the pharmacy benefits program shall require eligible covered beneficiaries generally to refill non-generic prescription maintenance medications through military treatment facility pharmacies or the national mail-order pharmacy program. Section 702(c) of the National Defense Authorization Act for Fiscal Year 2015 also terminates the TRICARE For Life Pilot Program on September 30, 2015. The TRICARE For Life Pilot Program described in Section 716(f) of the National Defense Authorization Act for Fiscal Year 2013, was a pilot program which began in March 2014 requiring TRICARE For Life beneficiaries to refill non-generic prescription maintenance medications through military treatment facility pharmacies or the national mail-order pharmacy program. TRICARE for Life beneficiaries are those enrolled in the Medicare wraparound coverage option of the TRICARE program. This rule includes procedures to assist beneficiaries in transferring covered prescriptions to the mail order pharmacy program. This rule has been identified as an economically significant rule. DoD anticipates publishing the final rule in the first quarter of FY 2017.

• Final Rule: TRICARE; Reimbursement of Long Term Care Hospitals and Inpatient Rehabilitation Facilities. The Department of Defense, Defense Health Agency, is revising its reimbursement of Long Term Care Hospitals (LTCHs) and Inpatient Rehabilitation Facilities (IRFs). Revisions are in accordance with the statutory provision at title 10, United States Code (U.S.C.), section 1079(i)(2) that requires TRICARE payment methods for institutional care be determined, to the extent practicable, in accordance with the same reimbursement rules as apply to payments to providers of services of the same type under Medicare. 32 CFR 199.2 includes a definition for ''Hospital, long-term (tuberculosis, chronic care, or rehabilitation).'' This rule deletes this definition and creates separate definitions for ''Long Term Care Hospital'' and ''Inpatient Rehabilitation Facility'' in accordance with Centers for Medicare and Medicaid Services (CMS) classification criteria. Under TRICARE, LTCHs and IRFs (both freestanding rehabilitation hospitals and rehabilitation hospital units) are currently paid the lower of a negotiated rate (if they are a network provider) or billed charges (if they are a non-network provider). Although Medicare's reimbursement methods for LTCHs and IRFs are different, it is prudent to adopt both the Medicare LTCH and IRF Prospective Payment System (PPS) methods simultaneously to align with our statutory requirement to reimburse like Medicare. This rule sets forth the proposed regulation modifications necessary for TRICARE to adopt Medicare's LTCH and IRF Prospective Payment Systems and rates applicable for inpatient services provided by LTCHs and IRFs to TRICARE beneficiaries. This rule has been identified as an economically significant rule. DoD anticipates publishing the final rule in the third quarter of FY 2017.

3. Personnel and Readiness, Department of Defense

The Department of Defense plans to publish the following rules—

• Final Rule; Amendment: Sexual Assault Prevention and Response (SAPR) Program. The purpose of this rule is to implement DoD policy and assign responsibilities for the SAPR Program on prevention, response, and oversight of sexual assault. The goal is for DoD to establish a culture free of sexual assault through an environment of prevention, education and training, response capability, victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons. DoD anticipates publishing the final rule in the third quarter of FY 2017.

• Final Rule: Sexual Assault Prevention and Response (SAPR) Program Procedures. This rule establishes policy, assigns responsibilities, and provides guidance and procedures for the SAPR Program. It establishes processes and procedures for the Sexual Assault Forensic Examination Kit, the multidisciplinary Case Management Group, and guidance on how to handle sexual assault reports, SAPR minimum program standards, SAPR training requirements, and SAPR requirements for the DoD Annual Report on Sexual Assault in the Military. The DoD goal is a culture free of sexual assault through an environment of prevention, education and training, response capability, victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons. DoD anticipates publishing the final rule in the third quarter of FY 2017.

• Final Rule: Identification (ID) Cards for Members of the Uniformed Services, Their Dependents, and Other Eligible Individuals. Among the Obama Administration regulatory priorities are rules which extend fairness and tolerance to all Americans. The Department of Defense (DoD) previously published an interim final rule that extended benefits to all eligible dependents of uniformed Service members and eligible DoD civilians. It was necessary to publish an amended interim final rule to ensure the issuance of ID cards and extension of benefits aligns with current Federal and DoD policy, and to include an additional implementing manual addressing eligibility documentation requirements. The final rule incorporates all comments received during the public comment process that were adjudicated by the Department as necessary changes to the rule. DoD anticipates publishing the final rule in the third quarter of FY 2017.

4. Chief Information Officer, Department of Defense

The Department of Defense plans to publish the final rule for the Defense Industrial Base (DIB) Cybersecurity (CS) Activities that implements statutory requirements for mandatory cyber incident reporting while maintaining the voluntary cyber threat information sharing program.

• Interim Final Rule: Defense Industrial Base (DIB) Cyber Security (CS) Activities. The DoD–DIB CS Activities regulation mandates reporting of cyber incidents that result in an actual or potentially adverse effect on a covered contractor information system or covered defense information residing therein, or on a contractor's ability to provide operationally critical support. This interim final rule will modify eligibility criteria to permit greater participation in the voluntary DoD–DIB CS information sharing program. Expanding participation in the DoD–DIB CS information sharing program is part of DoD's comprehensive approach to counter cyber threats through information sharing between the Government and DIB participants. The

DoD–DIB CS information sharing program allows eligible DIB participants to receive Government furnished information (GFI) and cyber threat information from other DIB participants, thereby providing greater insights into adversarial activity targeting the DIB. DoD anticipates publishing the interim final rule in the third quarter of FY 2017.

DOD—OFFICE OF THE SECRETARY (OS)

Final Rule Stage

19. Sexual Assault Prevention and Response Program Procedures

Priority: Other Significant.

Legal Authority: Pub. L. 112–239; Pub. L. 113–66; Pub. L. 113–291; Pub. L. 114–92

CFR Citation: 32 CFR 105.

Legal Deadline: None.

Abstract: This rule will provide sexual assault victims the ability to get a fresh start through an Expedited Transfer policy aimed at removing the stigma associated with victimization. It will also allow sexual assault victims to be notified of the protections and support that come with individual legal representation as they navigate the criminal justice process. With this rule Reserve Component and National Guard members who are victims of sexual assault would receive the same SAPR advocacy regardless of when the sexual assault incident occurred, similar to the advocate support afforded their active duty counterparts. The goal of this rule is to ensure victims of sexual assault receive improved victim advocacy support, quality health care service, appropriate and sensitive command involvement, individualized legal support, and a military culture better informed on the issue of sexual assault. This rule establishes the SAFE Helpline as the sole DoD hotline for crisis intervention; establishes requirements for a sexual assault victim safety assessment and the execution of a high-risk team to monitor cases where the sexual assault victim's life and safety may be in jeopardy; and incorporates several requirements of the National Defense Authorization Act (NDAA) relating to sexual assault in the military.

Statement of Need: Issue this part to:

(1) Implement 32 Code of Federal Regulations (CFR) 103 and assign responsibilities and provide guidance and procedures for the SAPR Program;

(2) Establish SAPR minimum program standards, SAPR training requirements, and SAPR requirements for the Department of Defense (DoD) Annual Report on Sexual Assault in the Military; and consistent with title 10, United States Code (Reference (d)) the DoD Task Force Report on Care for Victims of Sexual Assault (Reference (e)) and pursuant to References (b) and (c), and Public Law 106–65, 108–375, 109–163, 109–364, 110–417, 111–84, 111–383, 112–81, 112–239, 113–66, 113–291, and 114–92;

(3) Provide of the preemption of state and local laws mandating reporting of an adult sexual assault incident;

(4) Protect from retaliation, coercion, and reprisal due to reporting a sexual assault;

(5) Provide for individualized legal representation from a Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC);

(6) Provide for the opportunity to request an Expedited Transfer as a means to getting a fresh start to support victim recovery;

(7) Establish the multidisciplinary Case Management Group as the oversight body of an Unrestricted sexual assault report.

Summary of Legal Basis: This regulation is pursued under the authorities of all applicable congressional mandates from section 113 of title 10, United States Code (U.S.C.), and Public Law 106–65, 108–375, 109–163, 109–364, 110–417, 111–84, 112–81, 113–66; 113–291, 114–92.

Alternatives: The DoD will not have current guidance relating to the provisions of law enacted by Congress critical to the implementation of sexual assault prevention and response (SAPR), SAPR training standards, victim support, and reporting procedures.

Anticipated Cost and Benefits: Fiscal year 2016 estimate of the anticipated cost associated with this rule is approximately $15 million. Additionally, each of the Military Services establishes its own SAPR budget for the programmatic costs arising from the implementation of the training, prevention, reporting, response, and oversight requirements established by this rule. These costs are less than those of other alternative benefits and include:

(1) A complete SAPR Policy consisting of this part and 32 CFR 103, to include comprehensive SAPR procedures to implement the DoD Directive 6495.01, Sexual Assault Prevention and Response (SAPR) Program, which is the DoD policy on prevention and response to sexual assaults involving members of the U.S. Armed Forces.

(2) Guidance and procedures with which the DoD may establish a culture free of sexual assault, through an environment of prevention, education and training, response capability, victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons covered by this part and 32 CFR 103.

(3) Requirement that medical care and SAPR services are gender-responsive, culturally competent, and recovery-oriented. A 24 hour, 7 day per week sexual assault response capability for all locations, including deployed areas for persons covered in this part.

(4) Creating Command sexual assault awareness and prevention programs and DoD law enforcement procedures that enable persons to be held appropriately accountable for their actions.

(5) Standardized SAPR requirements, terminology, guidelines, protocols, and guidelines for training materials focus on awareness, prevention, and response at all levels, as appropriate.

(6) Requiring Sexual Assault Response Coordinators (SARC), SAPR Victim Advocates (VA), and other responders to assist sexual assault victims regardless of Service affiliation.

(7) Procedures for informing victims at the time of making the report, or as soon as practicable, of the option to request a temporary or permanent expedited transfer from their assigned command or installation, or to a different location within their assigned command or installation, in accordance with the procedures for commanders in 105.9 of this part.

(8) Protections from reprisal, or threat of reprisal, for filing a report of sexual assault.

(9) Reporting options for Service members and military dependents 18 years and older who have been sexually assaulted.

(10) Providing support to an active duty Military Service member regardless of when or where the sexual assault took place.

(11) Establishing a DoD-wide certification program with a national accreditor to ensure all sexual assault victims are offered the assistance of a SARC or SAPR VA who has obtained this certification.

(12) Implementing training standards that cover general SAPR training for Service members, and contain specific standards for: Accessions, annual, professional military education and leadership development training, pre- and post-deployment, pre-command, General and Field Officers and SES, military recruiters, civilians who supervise military, and responders trainings.

(13) Requiring Military Departments to establish procedures for supporting

the DoD Safe Helpline in accordance with Guidelines for the DoD Safe Helpline for the referral database, provide timely response to victim feedback, publicize the DoD Safe Helpline to SARCs and Service members and at military confinement facilities.

(14) Directing additional responsibilities for the DoD SAPRO Director (develop metrics for measuring effectiveness, act as liaison between DoD and other agencies with regard to SAPR, oversee development of strategic program guidance and joint planning objectives, quarterly include Military Service Academies as a SAPR IPT standard agenda item, semi-annually meet with the Superintendents of the Military Service Academies, and develop and administer standardized and voluntary surveys for survivors of sexual assault to comply with 1726 of NDAA FY 14.

(15) Providing for the Preemption of state and local laws requiring disclosure of personally identifiable information of the service member (or adult military dependent) victim or alleged perpetrator to state or local law enforcement agencies, unless such reporting is necessary to prevent or mitigate a serious and imminent threat to the health and safety of an individual, as determined by an authorized Department of Defense official.

Risks: The degree of risk to Service member is that sexual assault victims will not be able to access support services or understand the availability of resources to assist them, such as: the opportunity to receive an Expedited Transfer as a means to getting a fresh start to support recovery; inability to request a Restricted Report in mandatory reporting jurisdiction; and failure to capture and preserve forensic evidence associated with sexual assault cases.

20. Identification (ID) Cards for Members of the Uniformed Services, Their Dependents, and Other Eligible Individuals (Adding Subpart D)

Priority: Other Significant.

Legal Authority: 10 U.S.C. 1061; 10 U.S.C. 1062; 10 U.S.C. 1063; 10 U.S.C. 1064; 10 U.S.C. 1072; 10 U.S.C. 1073; 10 U.S.C. 1074; 10 U.S.C. 1074(a); 10 U.S.C. 1074(b); 10 U.S.C. 1074(c); 10 U.S.C. 1076; 10 U.S.C. 1076(a); 10 U.S.C. 1077; 10 U.S.C. 1095(k)(2); 18 U.S.C. 499; 18 U.S.C. 506; 18 U.S.C. 509; 18 U.S.C. 701; 18 U.S.C. 1001

CFR Citation: 32 CFR 161.

Legal Deadline: None.

Abstract: Among the Obama Administration regulatory priorities are rules which extend fairness and tolerance to all Americans. The Department of Defense (DoD) previously published an interim final rule that establishes policy, assigns responsibilities, and provides procedures for the issuing of distinct DoD ID cards. The ID cards are issued to uniformed service members, their dependents, and other eligible individuals and are used as proof of identity and DoD affiliation, and facilitate the extension of DoD benefits. The interim final rule extended benefits to all eligible dependents of Uniformed Service members and eligible DoD civilians. It was necessary to amend the interim final rule to ensure the issuance of ID cards and extension of benefits aligns with current Federal and DoD policy, and to include an additional implementing manual addressing eligibility documentation requirements. The revisions to this rule will be reported in future status updates as part of DoD's retrospective plan under Executive Order 13563, completed in August 2011. DoD's full plan can be accessed at: *http://www.regulations.gov/#!docketDetail;D=DOD-2011-OS-0036.*

Statement of Need: Many changes have occurred since DoD previously issued ID card policy in 1997 that require regulation and policy to be updated, which include but are not limited to Obama administration priorities of extending fairness and tolerance to all Americans. Supreme Court decisions within the last five years, required DoD to ensure that ID card policy was inclusive of same-sex spouse and transgender retiree and dependent populations. Additionally, the length of the previous document combined with additional information necessary to make the document current, required separation into an overarching instruction with supporting subject matter specific manuals.

Summary of Legal Basis: This regulation is pursued under the authorities of title 5, title 10 and title 18 U.S.C.

Alternatives: DoD does not have any alternatives to address the issuing of distinct DoD ID cards.

Anticipated Cost and Benefits: There are no costs to the public. There are no capital or start-up costs associated with the issuance of this rule. ID cards cost the Department approximately $28.3 million annually.

Risks: There is no risk to the public.

21. Sexual Assault Prevention and Response (SAPR) Program

Priority: Other Significant.

Legal Authority: 10 U.S.C. 113; Pub. L. 112–81; Pub. L. 113–66; Pub. L. 114–92

CFR Citation: 32 CFR 103.

Legal Deadline: None.

Abstract: This interim final rule establishes that victims of sexual assault perpetrated by a spouse or intimate partner, or military dependent under the age of 18 is a Family Advocate Program (FAP) matter and does not fall within the SAPR program. However to ensure FAP involvement, this interim final rule requires the installation SARC and installation FAP to coordinate together when a sexual assault occurs as a result of domestic violence or involves child abuse. The rule requires sexual assault victims be informed of the availability of legal assistance and the right to consult with a Special Victims' Counsel and Victims' Legal Counsel and gives military members who are sexually assaulted the ability to request an Expedited Transfer as a means to getting a fresh start'' while escaping the stigma associated with sexual assault. Finally, the rule mandates the establishment and implementation of a SAPR program within National Guard Bureau. The Department of Defense is publishing this rule as interim to maintain and enhance the current SAPR program which elucidates the prevention, response, and oversight of sexual assaults involving members of the U.S. Armed Forces and Reserve Component, to include the National Guard.

Statement of Need: The purpose of this rule is to:

(1) Establish and implement a complete SAPR program which focuses on prevention, training, and response to sexual assaults involving members of the U.S. Armed Forces.

(2) Establish a culture free of sexual assault, through an environment of prevention, education and training, response capability, victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons covered.

(3) Focus on the victim and on doing what is necessary and appropriate to support victim recovery.

(4) Establish SAPR minimum program standards to include training requirements, oversight responsibilities, data collection, and reports.

Summary of Legal Basis: This regulation is established pursuant to all applicable congressional mandates from section 113 of title 10, United States Code (U.S.C.), and Public Laws 106–65, 108–375, 109–163, 109–364, 110–417, 111–84, 112–81, 113–66.

Alternatives: The DoD will not have current guidance relating to the implementation of the provisions of law enacted by Congress critical to sexual assault prevention and response (SAPR), SAPR training standards, victim support, and reporting procedures.

Anticipated Cost and Benefits: Fiscal Year 2015 Operation and Maintenance funding for DoD SAPRO was $24.3 million with an additional Congressional allocation of $25.0 million designated for the Special Victims' Counsel program and the Special Victims' Investigation and Prosecution capability that was reprogrammed to the Military Services and the National Guard Bureau. Additionally, each of the Military Services establishes its own SAPR budget for the programmatic costs arising from the implementation of the training, prevention, reporting, response, and oversight requirements established by this rule. These costs are less than those of other alternative benefits and include:

(1) A complete and up-to-date SAPR Policy consisting of this part and 32 CFR 105, to include comprehensive SAPR policy guidance on the prevention and response to sexual assaults involving members of the U.S. Armed Forces.

(2) Guidance and policy with which the DoD may establish a culture free of sexual assault, through an environment of prevention, education and training, response capability, victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons covered by this part and 32 CFR 105.

(3) Requirement to provide care that is gender-responsive, culturally competent, and recovery-oriented.

(4) Standardized SAPR requirements, terminology, guidelines, protocols, and guidelines for training materials shall focus on awareness, prevention, and response at all levels, as appropriate.

(5) An immediate, trained sexual assault response capability for each report of sexual assault in all locations, including in deployed locations.

(6) Victims of sexual assault shall be protected from coercion, retaliation, and reprisal.

Risks: The rule does not intend physical or mental harm to individuals of the public. The rule intends to enable military readiness by establishing a culture free of sexual assault. Sexual assault poses a serious threat to military readiness because the potential costs and consequences are extremely high: chronic psychological consequences may include depression, post-traumatic stress disorder, and substance abuse. In the U.S. Armed Forces, sexual assault not only degrades individual resilience but also may erode unit integrity. An effective fighting force cannot tolerate sexual assault within its ranks. Sexual assault is incompatible with military culture and mission readiness, and the risks to mission accomplishments are unbearable. This rule aims to mitigate this risk to mission readiness.

DOD—OFFICE OF ASSISTANT SECRETARY FOR HEALTH AFFAIRS (DODOASHA)

Final Rule Stage

22. TRICARE; Reimbursement of Long Term Care Hospitals and Inpatient Rehabilitation Facilities

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 5 U.S.C. 301; 10 U.S.C. ch 55

CFR Citation: 32 CFR 199.

Legal Deadline: None.

Abstract: The Department of Defense, Defense Health Agency, is proposing to revise its reimbursement of Long Term Care Hospitals (LTCHs) and Inpatient Rehabilitation Facilities (IRFs). Proposed revisions are in accordance with the statutory provision at title 10, United States Code (U.S.C.), section 1079(i)(2) that requires TRICARE payment methods for institutional care be determined, to the extent practicable, in accordance with the same reimbursement rules as apply to payments to providers of services of the same type under Medicare. 32 CFR 199.2 includes a definition for ''Hospital, long-term (tuberculosis, chronic care, or rehabilitation).'' This rule proposes to delete this definition and create separate definitions for ''Long Term Care Hospital'' and ''Inpatient Rehabilitation Facility'' in accordance with Centers for Medicare and Medicaid Services (CMS) classification criteria. Under TRICARE, LTCHs and IRFs (both freestanding

rehabilitation hospitals and rehabilitation hospital units) are currently paid the lower of a negotiated rate (if they are a network provider) or billed charges (if they are a non-network provider). Although Medicare's reimbursement methods for LTCHs and IRFs are different, it is prudent to propose adopting both the Medicare LTCH and IRF Prospective Payment System (PPS) methods simultaneously to align with our statutory requirement to reimburse like Medicare.This proposed rule sets forth the proposed regulation modifications necessary for TRICARE to adopt Medicare's LTCH and IRF Prospective Payment Systems and rates applicable for inpatient services provided by LTCHs and IRFs to TRICARE beneficiaries. The revisions to this rule will be reported in future status updates as part of DoD's retrospective plan under Executive Order 13563, completed in August 2011. DoD's full plan can be accessed at: *http://www.regulations.gov/#!docketDetail;D=DOD-2011-OS-0036*.

Statement of Need: The rule is necessary to meet the statutory provision to use Medicare reimbursement rules to the extent practicable.

Summary of Legal Basis: Congress established enabling legislation under section 707 of the National Defense Authorization Act of Fiscal Year 2002 (NDAA–02), Public Law 107–107 (Dec. 28, 2001) changing the statutory authorization in 10 U.S.C. 1079 (j)(2) that TRICARE payment methods for institutional care shall be determined to the extent practicable, in accordance with the same reimbursement rules used by Medicare.

Alternatives: This rule implements statutorily required provisions for adoption and implementation of Medicare institutional reimbursement rules which are consistent with well established congressional objectives. No other alternative is applicable.

Anticipated Cost and Benefits: It is projected that implementation of this rule in Fiscal Year (FY) 17 will result in a health care savings of $77 million for LTCHs and $53 million for IRFs.

Risks: The rule implements statutorily required provisions for adoption and implementation of Medicare institutional reimbursement systems which are consistent with well established Congressional objectives. No risk to the public is applicable.

DOD—DODOASHA

23. TRICARE: Refills of Maintenance Medications Through Military Treatment Facility Pharmacies or National Mail Order Pharmacy Program

Priority: Other Significant.

Legal Authority: 10 U.S.C. ch 55; 5 U.S.C. 301

CFR Citation: 32 CFR 199.

Legal Deadline: Other, Statutory, October 1, 2015, section 702(c) of the NDAA 2015. Section 702(c) of the Carl Levin and Howard P. Buck McKeon National Defense Authorization Act for Fiscal Year 2015 states that beginning October 1, 2015, the pharmacy benefits program shall require eligible covered beneficiaries generally to refill non-generic prescription maintenance medications through military treatment facility pharmacies or the national mail-order pharmacy program. Section 702(c) also terminates the TRICARE For Life Pilot Program on September 30, 2015.

Abstract: This final rule implements section 702(c) of the Carl Levin and Howard P. Buck'' McKeon National Defense Authorization Act for Fiscal Year 2015 which states that beginning October 1, 2015, the pharmacy benefits program shall require eligible covered beneficiaries generally to refill non-generic prescription maintenance medications through military treatment facility pharmacies or the national mail-order pharmacy program. Section 702(c) of the National Defense Authorization Act for Fiscal Year 2015 also terminates the TRICARE For Life Pilot Program on September 30, 2015. The TRICARE For Life Pilot Program described in section 716(f) of the National Defense Authorization Act for Fiscal Year 2013, was a pilot program which began in March 2014 requiring TRICARE For Life beneficiaries to refill non-generic prescription maintenance medications through military treatment facility pharmacies or the national mail-order pharmacy program. TRICARE for Life beneficiaries are those enrolled in the Medicare wraparound coverage option of the TRICARE program. This rule includes procedures to assist beneficiaries in transferring covered prescriptions to the mail order pharmacy program.

Statement of Need: The DoD interim rule established processes for the new program of refills of maintenance medications for all non-active duty TRICARE beneficiaries through military treatment facility pharmacies and the mail order pharmacy program.

Summary of Legal Basis: This regulation is established under the authorities of 5 U.S.C. 301; 10 U.S.C. ch 55; 32 CFR 199.21.

Alternatives: The rule fulfills a statutory requirement, therefore there are no alternatives.

Anticipated Cost and Benefits: The effect of the statutory requirement, implemented by this rule, is to shift a volume of prescriptions from retail pharmacies to the most cost-effective point-of-service venues of military treatment facility pharmacies and the mail order pharmacy program. This will produce savings to the Department of approximately $88 million per year, and savings to beneficiaries of approximately $16.5 million per year in reduced copayments. Updated and more in-depth economic data will be provided with the final rule.

Risks: Not finalizing this rule would risk a loss of savings to both the Department and beneficiaries. There is no risk to the public.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

Statement of Regulatory Priorities

I. Introduction

The U.S. Department of Education (Department) supports States, local communities, institutions of higher education, and others in improving education and other services nationwide in order to ensure that all Americans, including those with disabilities, receive a high-quality education and are prepared for high-quality employment. We provide leadership and financial assistance pertaining to education and related services at all levels to a wide range of stakeholders and individuals, including State educational and other agencies, local school districts, providers of early learning programs, elementary and secondary schools, institutions of higher education, career and technical schools, nonprofit organizations, postsecondary students, members of the public, families, and many others. These efforts are helping to ensure that all children and students from pre-kindergarten through grade 12 will be ready for, and succeed in, postsecondary education or employment, and that students attending postsecondary institutions are prepared for a profession or career.

We also vigorously monitor and enforce the implementation of Federal civil rights laws in educational programs and activities that receive Federal financial assistance, and support innovative programs, research and evaluation activities, technical assistance, and the dissemination of research and evaluation findings to improve the quality of education.

Overall, the laws, regulations, and programs that the Department administers will affect nearly every American during his or her life. Indeed, in the 2016–2017 school year, about 56 million students will attend an estimated 132,000 elementary and secondary schools in approximately 13,500 districts, and about 21 million students will enroll in degree-granting postsecondary schools. All of these students may benefit from some degree of financial assistance or support from the Department.

In developing and implementing regulations, guidance, technical assistance, and monitoring related to our programs, we are committed to working closely with affected persons and groups. Specifically, we work with a broad range of interested parties and the general public, including families, students, and educators; State, local, and tribal governments; other Federal agencies; and neighborhood groups, community-based early learning programs, elementary and secondary schools, colleges, rehabilitation service providers, adult education providers, professional associations, advocacy organizations, businesses, and labor organizations.

If we determine that it is necessary to develop regulations, we seek public participation at the key stages in the rulemaking process. We invite the public to submit comments on all proposed regulations through the Internet or by regular mail. We also continue to seek greater public participation in our rulemaking activities through the use of transparent and interactive rulemaking procedures and new technologies.

To facilitate the public's involvement, we participate in the Federal Docketing Management System (FDMS), an electronic single Government-wide access point (*www.regulations.gov*) that enables the public to submit comments on different types of Federal regulatory documents and read and respond to comments submitted by other members of the public during the public comment period. This system provides the public with the opportunity to submit comments electronically on any notice of proposed rulemaking or interim final regulations open for comment, as well as read and print any supporting regulatory documents.

We are continuing to streamline information collections, reduce the burden on information providers involved in our programs, and make information easily accessible to the public.

II. Regulatory Priorities

A. Every Student Succeeds Act

President Obama signed the Every Student Succeeds Act (ESSA) into law on December 10, 2015. ESSA reauthorized the Elementary and Secondary Education Act of 1965 with provisions aimed at helping to ensure success for students and schools. The law:

- Advances equity by upholding critical protections for America's disadvantaged and high-need students.
- Requires—for the first time—that all students in America be taught to high academic standards that will prepare them to succeed in college and careers.
- Ensures that vital information is provided to educators, families, students, and communities through annual statewide assessments that measure students' progress toward those high standards.
- Helps to support and grow local innovations—including evidence-based and place-based interventions developed by local leaders and educators—consistent with our Investing in Innovation and Promise Neighborhoods grant programs.
- Sustains and expands this administration's historic investments in increasing access to high-quality preschool.
- Maintains an expectation that there will be accountability and action to effect positive change in our lowest-performing schools, where groups of students are not making progress, and where graduation rates are low over extended periods of time.

The Department issued two notices of proposed rulemaking (NPRMs) that would amend existing regulations pertaining to accountability and State plans, and the innovative assessment demonstration authority. We also, following the completion of negotiated rulemaking, issued an NPRM proposing to amend regulations on academic assessments, and plan to publish an NPRM on the supplement not supplant provision in September 2016. We intend to issue final rules in all of these areas by January 2017.

B. Higher Education Act of 1965, as Amended

Congress is currently considering reauthorization of the Higher Education Act of 1965, as amended (HEA). When enacted, the HEA's reauthorization will likely require the Department to promulgate conforming regulations. In the meantime, we have identified several regulatory activities for Fiscal Year 2017 under the Title IV Federal Student Aid programs to improve protections for students and safeguard Federal dollars invested in postsecondary education.

C. Perkins Act

Congress is currently considering reauthorization of the Carl D. Perkins Career and Technical Education Act of 2006 (Perkins Act), which focuses on increasing the quality of technical education. The priorities for reauthorization include:

- Effective alignment with today's labor market, including clear expectations for high-quality programs;
- Stronger collaboration among secondary and postsecondary institutions, employers, and industry partners;
- Meaningful accountability to improve academic and employment outcomes for students; and
- Local and State innovation in CTE, particularly the development and replication of innovative CTE models.

We anticipate regulatory activity in response to the reauthorization of the Perkins Act.

IV. Principles for Regulating

Over the next year, we may need to issue other regulations because of new legislation or programmatic changes. In doing so, we will follow the Principles for Regulating, which determine when and how we will regulate. Through consistent application of those principles, we have eliminated unnecessary regulations and identified situations in which major programs could be implemented without regulations or with limited regulatory action.

In deciding when to regulate, we consider the following:

- Whether regulations are essential to promote quality and equality of opportunity in education.
- Whether a demonstrated problem cannot be resolved without regulation.
- Whether regulations are necessary to provide a legally binding interpretation to resolve ambiguity.
- Whether entities or situations subject to regulation are similar enough that a uniform approach through regulation would be meaningful and do more good than harm.
- Whether regulations are needed to protect the Federal interest, that is, to ensure that Federal funds are used for their intended purpose and to eliminate fraud, waste, and abuse.

In deciding how to regulate, we are mindful of the following principles:

- Regulate no more than necessary.
- Minimize burden to the extent possible, and promote multiple approaches to meeting statutory requirements if possible.
- Encourage coordination of federally funded activities with State and local reform activities.
- Ensure that the benefits justify the costs of regulating.
- To the extent possible, establish performance objectives rather than specify compliance behavior.
- Encourage flexibility, to the extent possible and as needed to enable institutional forces to achieve desired results.

ED—OFFICE OF ELEMENTARY AND SECONDARY EDUCATION (OESE)

Final Rule Stage

24. Title I of the Elementary and Secondary Education Act of 1965—Accountability and State Plans

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 20 U.S.C. 1001, 1111, 1221e–3, 6303, 6311, 6394, 6601, 6611(d), 6823, 7113(c), 7801, 7842, 7844, 7845, and 8302; 42 U.S.C. 11432(g)

CFR Citation: 34 CFR 200.

Legal Deadline: None.

Abstract: The Secretary will amend the regulations implementing programs under title I of the Elementary and Secondary Education Act of 1965 (ESEA) to implement changes to the ESEA by the Every Student Succeeds Act (ESSA) enacted on December 10, 2015. The Secretary also will update the current ESEA general regulations to include the requirements for the submission of State plans under ESEA programs, including optional consolidated State plans.

Statement of Need: These regulations are necessary to implement changes to the ESEA by the ESSA.

Summary of Legal Basis: These regulations are necessary to implement changes to the ESEA by the ESSA.

Alternatives: These will be discussed in the final regulations.

Anticipated Cost and Benefits: These will be discussed in the final regulations.

Risks: These will be discussed in the final regulations.

ED—OESE

25. • Elementary and Secondary Education Act of 1965, as Amended by the Every Student Succeeds Act—Supplement Not Supplant Under Title I, Part A

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 20 U.S.C. 6321(b)

CFR Citation: 34 CFR 200.

Legal Deadline: None.

Abstract: The Secretary proposes to establish regulations governing programs administered under title I, part A of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA). These proposed regulations are needed to implement recent changes to the supplement not supplant requirement of title I of the ESEA made by the ESSA.

Statement of Need: These proposed regulations are needed to implement recent changes to the supplement not supplant requirement of title I of the ESEA made by the ESSA.

Summary of Legal Basis: These proposed regulations are needed to implement recent changes to the supplement not supplant requirement of title I of the ESEA made by the ESSA.

Alternatives: These will be discussed in the final regulations.

Anticipated Cost and Benefits: These will be discussed in the final regulations.

Risks: These will be discussed in the final regulations.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Statement of Regulatory and Deregulatory Priorities

The Department of Energy (Department or DOE) makes vital contributions to the Nation's welfare through its activities focused on improving national security, energy supply, energy efficiency, environmental remediation, and energy research. The Department's mission is to:

- Promote dependable, affordable and environmentally sound production and distribution of energy;
- Advance energy efficiency and conservation;

• Provide responsible stewardship of the Nation's nuclear weapons;

• Provide a responsible resolution to the environmental legacy of nuclear weapons production; and

• Strengthen U.S. scientific discovery, economic competitiveness, and improve quality of life through innovations in science and technology.

The Department's regulatory activities are essential to achieving its critical mission and to implementing major initiatives of the President's National Energy Policy. Among other things, the Regulatory Plan and the Unified Agenda contain the rulemakings the Department will be engaged in during the coming year to fulfill the Department's commitment to meeting deadlines for issuance of energy conservation standards and related test procedures. The Regulatory Plan and Unified Agenda also reflect the Department's continuing commitment to cut costs, reduce regulatory burden, and increase responsiveness to the public.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), several regulations have been identified as associated with retrospective review and analysis in the Department's retrospective review of regulations plan. Some of the entries on this list may be completed actions, which do not appear in the Regulatory Plan. However, more information can be found about these completed rulemakings in past publications of the Unified Agenda on *www.reginfo.gov* in the Completed Actions section. These rulemakings can also be found on *www.regulations.gov*. The final agency plan can be found at *https://www.whitehouse.gov/sites/default/files/other/2011-regulatory-action-plans/departmentofenergyregulatoryreformplanaugust2011.pdf*. DOE has published a number of retrospective review update reports that are available at *http://www.energy.gov/gc/services/open-government/restrospective-regulatory-review*.

Energy Efficiency Program for Consumer Products and Commercial Equipment

The Energy Policy and Conservation Act (EPCA) requires DOE to set appliance efficiency standards at levels that achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified. The Department continues to follow its schedule for setting new appliance efficiency standards. These rulemakings are expected to save American consumers billions of dollars in energy costs.

Estimate of Combined Aggregate Costs and Benefits

In 2015, the Department published final rules that adopted new or amended energy conservation standards for 13 different products, including, commercial air-cooled air conditioners and heat pumps, ceiling fan light kits, commercial pre-rinse spray valves, and beverage vending machines. The 13 standards finalized in 2015 are estimated to reduce carbon dioxide emissions by over 429 million metric tons and save American families and businesses $84 billion in electricity bills through 2030.

Since 2009, the Energy Department has finalized new efficiency standards for more than 45 household and commercial products, including dishwashers, refrigerators and water heaters, which are estimated to save consumers $540 billion through 2030. To build on this momentum, the Department is committed to continuing to establish new efficiency standards that—when combined with the progress already made through previously finalized standards—will reduce carbon pollution by approximately 3 billion metric tons in total by 2030, equal to more than a year's carbon pollution from the entire U.S. electricity system.

As part of the President's Climate Action Plan, the Energy Department has committed to an ambitious goal of finalizing at least 14 additional energy efficiency standards by the end of 2016. The overall plan for implementing the schedule is contained in the Report to Congress pursuant to section 141 of EPACT 2005, which was released on January 31, 2006. This plan was last updated in the August 2016 report to Congress and now includes the requirements of the Energy Independence and Security Act of 2007 (EISA 2007), the American Energy Manufacturing Technical Corrections Act (AEMTCA), and the Energy Efficiency Improvement Act of 2015. The reports to Congress are posted at: *http://energy.gov/eere/buildings/reports-and-publications*. While each of these high priority rules will build on the progress made to date, and will continue to move the U.S. closer to a low carbon future, DOE believes that seven rulemakings are the most important of its significant regulatory actions and, therefore, comprise the Department's Regulatory Plan.

• Walk-In Coolers and Walk-In Freezers (1904–AD59)

• Residential Non-Weatherized Gas Furnaces and Mobile Home Gas Furnaces (1904–AD20)

• Commercial Water Heaters (1904–AD34)

• Commercial Packaged Boilers (1904–AD01)

• General Service Fluorescent Lamps (1904–AD09)

• Dedicated Purpose Pool Pumps (1904–AD52)

• Manufactured Housing (1904–AC11)

For walk-in coolers and freezers, DOE estimates that energy savings from electricity will be 0.90 quads over 30 years and the net benefit to the Nation will be between $1.8 billion and $4.3 billion. For non-weatherized gas furnaces and mobile home gas furnaces, DOE estimates that energy savings will be 2.78 quads over 30 years and the net benefit to the Nation will be between $3.1 billion and $16.1 billion. For commercial water heaters, DOE estimates that energy savings for combined natural gas and electricity will be 1.8 quads over 30 years and the net benefit to the Nation will be between $2.26 billion and $6.75 billion. For commercial packaged boilers, DOE estimates that energy savings will be 0.349 quads over 30 years and the net benefits to the Nation will be between $0,414 billion and $1,687 billion. For general service fluorescent lamps, DOE estimates that energy savings will be 0.85 quads over 30 years and the net benefit to the nation will be between $4.4 billion and $9.1 billion. For manufactured housing, DOE estimates that energy savings will be 0.884 quads (Single-section) and 1.428 quads (Multi-section) over 30 years and the net benefit to the Nation will be between $1.26 billion (Single-section) and $2.18 billion (Multi-section) and $4.03 billion (Single-section) and $6.75 billion (Multi-section). For dedicated purpose pool pumps, DOE has not yet proposed candidate standard levels and therefore, cannot provide an estimate of combined aggregate costs and benefits for this action. DOE will, however, in compliance with all applicable law, issue standards that provide the maximum improvement in energy efficiency that is technologically feasible and economically justified. Estimates of energy savings will be provided when DOE issues the notice of proposed rulemaking for dedicated purpose pool pumps.

DOE—ENERGY EFFICIENCY AND RENEWABLE ENERGY (EE)

Proposed Rule Stage

26. Energy Conservation Standards for General Service Lamps

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 6295(i)(6)(A) and (B)

CFR Citation: 10 CFR 429; 10 CFR 430.

Legal Deadline: Final, Statutory, January 1, 2017.

Abstract: Amendments to Energy Policy and Conservation Act (EPCA) in the Energy Independence and Security Act of 2007 direct DOE to conduct two rulemaking cycles to evaluate energy conservation standards for GSLs, the first of which must be initiated no later than January 1, 2014 (42 U.S.C. 6295(i)(6)(A)–(B)). EPCA specifically states that the scope of the rulemaking is not limited to incandescent lamp technologies. EPCA also states that DOE must consider in the first rulemaking cycle the minimum backstop requirement of 45 lumens per watt for general service lamps (GSLs) effective January 1, 2020. This rulemaking constitutes DOE's first rulemaking cycle.

Statement of Need: DOE is directed under EPCA to establish standards for GSL's, and that DOE complete the rulemaking by January 1, 2017.

Summary of Legal Basis: Amendments to EPCA in the Energy Independence and Security Act of 2007 (EISA) directed DOE to conduct two rulemaking cycles to evaluate energy conservation standards got GSL's (42 U.S.C. 6295(i)(6)(A)–(B)). Furthermore, pursuant to EPCA, any new or amended energy conservation standard that the Department of Energy (DOE) prescribes for certain products, such as general service lamps, shall be designed to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified (42 U.S.C. 6295(o)(2)(A)) and result in a significant conservation of energy (42 U.S.C. 6295(o)(3)(B)).

Alternatives: The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, DOE conducts a thorough analysis of the alternative standard levels, including the existing standard, based on the criteria specified in the statute.

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy standards for General Service Lamps outweigh the burdens. DOE estimates that energy savings will be .85 quads over 30 years and the net benefit to the Nation will be between $4.4 billion and $9.1 billion.

RIN: 1904–AD09

DOE—EE

27. Energy Conservation Standards for Residential Non-Weatherized Gas Furnaces and Mobile Home Gas Furnaces

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 6295(f)(4)(C); 42 U.S.C. 6295(m)(1); 42 U.S.C. 6295(gg)(3)

CFR Citation: 10 CFR 430.

Legal Deadline: NPRM, Judicial, April 24, 2015, The later of 4/24/2016 or one year after the issuance of the proposed rule. Final, Judicial, April 24, 2016.

Abstract: The Energy Policy and Conservation Act of 1975 (EPCA), as amended, prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including residential furnaces. EPCA also requires the DOE to periodically determine every six years whether more-stringent amended standards would be technologically feasible and economically justified and would save a significant amount of energy. DOE is considering amendments to its energy conservation standards for residential non-weatherized gas furnaces and mobile home gas furnaces in partial fulfillment of a court-ordered remand of DOE's 2011 rulemaking for these products.

Statement of Need: EPCA requires minimum energy efficiency standards for certain appliances and commercial equipment, including residential furnaces

Summary of Legal Basis: Title III of the Energy Policy and Conservation Act of 1975 (EPCA), Public Law 94–163 (42 U.S.C. 6291–6300, as codified), established the Energy Conservation Program for Consumer Products Other Than Automobiles. Pursuant to EPCA, any new or amended energy conservation standard that the U.S. Department of Energy (DOE) prescribes

for certain products, such as residential furnaces, shall be designed to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified (42 U.S.C. 6295(o)(2)(A)) and result in a significant conservation of energy (42 U.S.C. 6295(o)(3)(B)).

Alternatives: The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, DOE conducts a thorough analysis of the alternative standard levels, including the existing standard, based on the criteria specified in the statute.

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy standards for Residential Non-Weatherized Gas Furnaces and Mobile Home Gas Furnaces (such as energy savings, consumer average lifecycle cost savings, an increase in national net present value, and emission reductions) outweigh the burdens (such as loss of industry net present value). For non-weatherized gas furnaces and mobile home gas furnaces, DOE estimates that energy savings will be 2.78 quads over 30 years and the net benefit to the Nation will be between $3.1 billion and $16.1 billion.

RIN: 1904–AD20

DOE—EE

28. Energy Conservation Standards for Walk-In Coolers and Walk-In Freezers

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 6311; 42 U.S.C. 6313(f)

CFR Citation: 10 CFR 431.306.

Legal Deadline: Final, Judicial, Best efforts to complete the rulemaking by 12/01/2016.

Abstract: In 2014, the Department of Energy (DOE) issued a rule setting performance-based energy conservation standards for a variety of walk-in cooler and freezer (walk-in) components. See 79 FR 32050 (June 3, 2014). That rule was challenged by a group of walk-in refrigeration system manufacturers and walk-in installers, which led to a settlement agreement regarding certain refrigeration equipment classes addressed in that 2014 rule and certain aspects related to that rule's analysis. See *Lennox Int'l* v. *DOE,* Case No. 14–60535 (5th Cir. 2014). Consistent with the settlement agreement, and in accordance with the Federal Advisory Committee Act, a working group was established under the Appliance Standards and Rulemaking Advisory Committee (ASRAC) to engage in a negotiated rulemaking to develop energy conservation standards to replace those that had been vacated by the U.S. Court of Appeals for the Fifth Circuit. As a result of those negotiations, a Term Sheet was produced containing a series of recommendations to ASRAC for its approval and submission to DOE for the agency's further consideration. Using the Term Sheet's recommendations, DOE is proposing to establish energy conservation standards for the six equipment classes of walk-in coolers and walk-in freezers that were vacated by the Fifth Circuit and remanded to DOE for further action. Those standards at issue involve: (1) The two standards applicable to multiplex condensing refrigeration systems operating at medium and low temperatures; and (2) the four standards applicable to dedicated condensing refrigeration systems operating at low temperatures. Also consistent with the settlement agreement, DOE will consider any comments (including any accompanying data) regarding any potential impacts of these six standards on installers. DOE will also consider and substantively address any potential impacts of these six standards on installers in its Manufacturer Impact Analysis, consistent with its regulatory definition of ''manufacturer,'' and, as appropriate, in its analysis of impacts on small entities under the Regulatory Flexibility Act. As part of this rulemaking (and consistent with its obligations under the settlement agreement), DOE will provide an opportunity for all interested parties to submit comments concerning any proposed standards. DOE will use its best efforts to issue a final rule establishing the remanded standards by December 1, 2016.

Statement of Need: DOE is required under 42 U.S.C. 6313(f) to establish performance-based energy conservation standards for walk-in coolers and freezers. This rulemaking is being conducted to satisfy that requirement by setting standards related to certain classes of refrigeration systems used in walk-in applications.

Summary of Legal Basis: This rulemaking is being conducted under DOE's authority pursuant to 42 U.S.C. 6311, which establishes the agency's legal authority over walk-in coolers and freezers as one type of covered equipment that DOE may regulate, and 42 U.S.C. 6313(f), which requires DOE to conduct a rulemaking to establish performance-based energy conservation standards for this equipment.

Alternatives: The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible

and economically justified. In making this determination, DOE conducts a thorough analysis of the alternative standard levels, including the existing standard, based on the criteria specified by statute.

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy standards for walk-in coolers and freezers (such as energy savings, consumer average lifecycle cost savings, an increase in national net present value, and emission reductions) outweigh the burdens (such as loss of industry net present value). DOE estimates that energy savings from electricity will be 0.90 quads over 30 years and the net benefit to the Nation will be between $1.8 billion to $4.3 billion.

RIN: 1904–AD59

DOE—EE

Final Rule Stage

29. Energy Conservation Standards for Manufactured Housing

Priority: Other Significant.

Legal Authority: 42 U.S.C. 17071

CFR Citation: 10 CFR 460.

Legal Deadline: Final, Statutory, December 19, 2011.

Abstract: Section 413 of EISA requires that DOE establish energy conservation standards for manufactured housing. See 42 U.S.C. 17071(a)(1). DOE is directed to base the energy efficiency standards on the most recent version of the International Energy Conservation Code (IECC), except where DOE finds that the IECC is not cost effective, or a more stringent standard would be more cost effective, based on the impact of the IECC on the purchase price of manufactured housing and on total life-cycle construction and operating costs. DOE undertook a successful negotiated rulemaking under the Appliance Standards and Rulemaking Federal Advisory Committee in accordance with the Federal Advisory Committee Act and the Negotiated Rulemaking Act to negotiate proposed Federal standards for the energy efficiency of manufactured homes. As part of the consensus reached, the negotiating group recommended that DOE conduct additional analysis to inform the selection of solar heat gain coefficient requirements in certain climate zones and seek information regarding window fenestration pertaining to manufactured housing. A request for information was issued on these topics.

Statement of Need: Section 413 of EISA requires that DOE establish energy conservation standards for manufactured housing.

Summary of Legal Basis: Section 413 of EISA requires that DOE establish energy conservation standards for manufactured housing. See 42 U.S.C. 17071(a)(1).

Alternatives: DOE is directed to base the energy conservation standards on the most recent version of the International Energy Conservation Code (IECC), except where DOE finds that the IECC is not cost effective, or a more stringent standard would be more cost effective, based on the impact of the IECC on the purchase price of manufactured housing and on total life-cycle construction and operating costs.

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy conservation standards for manufactured housing outweigh the burdens. For manufactured housing, DOE estimates that energy savings will be 0.884 quads (Single-section) and 1.428 quads (Multi-section) over 30 years and the net benefit to the Nation will be between $1.26 billion (Single-section) and $2.18 billion (Multi-section) and $4.03 billion (Single-section) and $6.75 billion (Multi-section).

RIN: 1904–AC11

DOE—EE

30. Energy Conservation Standards for Commercial Packaged Boilers

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 6313(a)(6)(C); 42 U.S.C. 6311(11)(B)

CFR Citation: 10 CFR 431.87(B).

Legal Deadline: NPRM, Statutory, July 22, 2015, Either propose rule or determination.

Abstract: EPCA, as amended by AEMTCA, requires the Secretary to determine whether updating the statutory energy conservation standards for commercial packaged boilers is technically feasible and economically justified and would save a significant amount of energy. If justified, the Secretary will issue amended energy conservation standards for such equipment.

Statement of Need: DOE is required to conduct an evaluation of its standards for commercial packaged boilers every 6 years and to publish either a notice of determination that such standards do not need to be amended or a NOPR including proposed amended standards,

42 U.S.C. 6313(a)(6)(C)(i). This rulemaking fulfills that requirement. Accordingly, DOE is proposing amended energy conservation standards for commercial packaged boilers.

Summary of Legal Basis: This rulemaking is being conducted pursuant to DOE's authority under 42 U.S.C. 6313(a)(6)(C)(i).

Alternatives: The statute requires DOE to conduct rulemakings to review standards and to amend standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, DOE conducts a thorough analysis of the alternative standard levels, including the existing standard, based on the criteria specified by statute.

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy conservation standards for commercial packaged boilers (such as energy savings, consumer average lifecycle cost savings, an increase in national net present value, and emission reductions) outweigh the burdens (such as loss of industry net present value). DOE estimates that energy savings will be 0.39 quads over 30 years and the net benefits to the Nation will be between $0.414 billion and $1.687 billion.

RIN: 1904–AD01

DOE—EE

31. Energy Conservation Standards for Commercial Water Heating Equipment

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 6313(a)(6)(C)(i) and (vi)

CFR Citation: 10 CFR 431.

Legal Deadline: NPRM, Statutory, December 31, 2013, Either proposed rule or determination not to amend standards.

Abstract: Once completed, this rulemaking will fulfill DOE's statutory obligation under EPCA to either propose amended energy conservation standards for commercial water heaters, hot water supply boilers, and unfired hot water storage tanks or determine that the existing standards do not need to be amended. DOE must determine whether national standards more stringent than those that are currently in place would result in a significant additional amount of energy savings and whether such amended national standards would be technologically feasible and economically justified.

Statement of Need: DOE is required under 42 U.S.C. 6313(a)(6)(C) to establish performance-based energy conservation standards for commercial water heaters. This rulemaking is being conducted to satisfy that requirement by setting standards related to certain classes of commercial water heating equipment.

Summary of Legal Basis: This rulemaking is being conducted under DOE's authority pursuant to 42 U.S.C. 6311, which establishes the agency's legal authority over water heaters as one type of covered equipment that DOE may regulate, and 42 U.S.C. 6313(a)(6)(C), which requires DOE to conduct a rulemaking to establish performance-based energy conservation Standards for this equipment.

Alternatives: Under EPCA, DOE shall either establish an amended uniform national standard for this equipment at the minimum level specified in the amended ASHRAE/IES Standard 90.1, unless the Secretary determines, by rule published in the **Federal Register**, and supported by clear and convincing evidence, that adoption of a uniform national standard more stringent than the amended ASHRAE/IES Standard 90.1 for this equipment would result in significant additional conservation of energy and is technologically feasible and economically justified (42 U.S.C. 6313(a)(6)(A)–(C)).

Anticipated Cost and Benefits: DOE finds that the benefits to the Nation of the proposed energy conservation standards for commercial water heating equipment outweighs the burdens. DOE estimates that energy savings for combined natural gas and electricity will be 1.8 quads over 30 years and the net benefit to the Nation will be between $2.26 billion and $6.75 billion.

RIN: 1904–AD34

DOE—EE

32. Energy Conservation Standards for Dedicated-Purpose Pool Pumps

Priority: Economically Significant. Major status under 5 U.S.C. 801 is undetermined.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 6311(1)(A)

CFR Citation: 10 CFR 431.

Legal Deadline: None.

Abstract: Under the Energy Policy and Conservation Act, DOE may set energy conservation standards for types of pumps, including dedicated-purpose pool pumps (42 U.S.C. 3211(1)(A)). On August 8, 2015, DOE announced its intention to establish a negotiated rulemaking working group to negotiate proposed federal standards for dedicated-purpose pool pumps. The working group presented a final term sheet to the Appliance Standards and Rulemaking Advisory Committee (ASRAC) on December 8, 2015.

Statement of Need: Under 42 U.S.C. 6311(a), DOE has established performance-based energy conservation standards for general-purpose pumps and created a separate category for dedicated-purpose pool pumps. DOE is now conducting this rulemaking to set energy conservation standards for dedicated-purpose pool pumps.

Summary of Legal Basis: This rulemaking is being conducted under DOE's authority pursuant to 42 U.S.C. 6311, which establishes the agency's legal authority over pumps as one type of covered equipment that DOE may regulate, and 42 U.S.C. 6311(a), which allows DOE to conduct a rulemaking to establish performance-based energy conservation standards for this equipment.

Alternatives: The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, DOE is conducting a full analysis by evaluating a range of standard levels to determine whether potential standards for dedicated-purpose pool pumps would save energy and whether such standards would be technologically feasible and economically justified.

Anticipated Cost and Benefits: DOE has not yet proposed candidate standard levels for dedicated purpose pool pumps and therefore, cannot provide an estimate of combined aggregated costs and benefits for this action. DOE will, however, in compliance with all applicable law, issue standards that provide the maximum improvement in energy efficiency that is technologically feasible and economically justified.

BILLING CODE 6450–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Statement of Regulatory Priorities for Fiscal Year 2017

As the Federal agency with principal responsibility for protecting the health of all Americans and for providing essential human services, especially to those least able to help themselves, the Department of Health and Human Services (HHS) implements programs that strengthen the health care system; advance scientific knowledge and innovation; and improve the health, safety, and well-being of the American people.

The Department's regulatory priorities for Fiscal Year 2017 reflect this complex mission through planned rulemakings structured to implement the Department's six arcs for implementation of its strategic plan: Leaving the Department Stronger; Keeping People Healthy and Safe; Reducing the Number of Uninsured and Providing Access to Affordable Quality Care; Leading in Science and Innovation; Delivering High Quality Care and Spending Our Health Care Dollars More Wisely; and, Ensuring the Building Blocks for Success at Every Stage of Life. This overview highlights forthcoming rulemakings exemplifying these priorities.

I. Leaving the Department Stronger

The Department's work to improve its efficiency and accountability includes its innovation agenda, program integrity and key human resources initiatives. In particular, the Department plans to issue a final regulation revising administrative appeal procedures for Medicare claims appeals to increase efficiency in the Medicare claims review and appeals process. Additionally, consistent with the President's Executive Order 13563, ''Improving Regulation and Regulatory Review,'' the Department remains committed to reducing regulatory burden on States, health care providers and suppliers, and other regulated entities by updating current rules to align them with emerging health and safety standards, and by eliminating outdated procedural provisions. A full listing of HHS's retrospective review initiatives can be found at *http://www.hhs.gov/retrospectivereview*.

II. Keeping People Healthy and Safe

This HHS strategic priority encompasses the Department's work to enhance health, wellness and prevention; detect and respond to a potential disease outbreak or public health emergency; and prevent the spread of disease across borders.

Preventing and Reducing Tobacco-Related Death and Disease

In 2009, Congress enacted the Family Smoking Prevention and Tobacco Control Act, authorizing the U.S. Food & Drug Administration (FDA) to regulate the manufacture, marketing, and distribution of tobacco products, to protect the public health and to reduce tobacco use by minors. Over the past

year, FDA finalized the regulation deeming other tobacco products that meet the statutory definition of ''tobacco product'' to also be subject to the Food, Drug and Cosmetic Act (FD&C Act). This final regulation, known as the ''deeming rule,'' affords FDA the authority to regulate additional products which include hookah, electronic cigarettes, cigars, pipe tobacco, other novel tobacco products, and future tobacco products. Over the next year, FDA plans to issue further procedural and substantive augmentation of that landmark regulation, designed to both clarify the regulatory landscape for tobacco products and enhance information available to consumers on the health risks of tobacco use.

Preventing the Spread of Disease Across Borders

Over the next year, the Centers for Disease Control and Prevention (CDC) plans to finalize amendments to the foreign and interstate quarantine regulations to more efficiently and effectively respond to communicable disease threats to the public's health. The regulation adds requirements for the collection of passenger and crew information, allows for the public health screening of travelers, and revises and adds relevant definitions.

Drugs and Medical Devices

FDA plans to issue a proposed rule addressing medication guide regulations to require a new form of patient labeling, Patient Medication Information, for submission to and review by FDA for human prescription drug products used, dispensed, or administered on an outpatient basis. The proposed rule would include requirements for Patient Medication Information development, consumer testing, and distribution. The proposed rule would require clear and concise written prescription drug product information presented in a consistent and easily understood format to help patients use their prescription drug products safely and effectively. FDA is also proposing to amend its regulations governing mammography. The amendments would update the Mammography Quality Standards Act of 1992. FDA is taking this action to address changes in mammography technology and mammography processes that have occurred since the regulations were published in 1997 and to address breast density reporting to patient and health care providers.

Improving Substance Use Treatment and Research Opportunities

The Substance Abuse and Mental Health Services Administration (SAMHSA) is working to finalize changes to 42 CFR 2, the Confidentiality of Substance Use Disorder Patient Records. The part 2 regulation protects the confidentiality of records that are maintained in connection with any federally assisted program or activity related to substance abuse education, prevention, training, treatment, rehabilitation, or research. Under the part 2 statute and current regulations, a federally assisted substance abuse program may only release patient identifying information related to substance abuse treatment services with the individual's written consent; pursuant to a court order; or under a few other limited exceptions. These protections are more stringent than most other privacy laws, including HIPAA. SAMHSA is updating the part 2 rule in order to make it more compatible with new models of integrated care, which are based on information sharing, participation of multiple healthcare providers, and the development of an electronic infrastructure for managing and exchanging patient data. Part 2 has restricted the exchange of some of this data, to the detriment of patient care and research.

III. Reducing the Number of Uninsured and Providing Access to Affordable Quality Care

The Affordable Care Act (ACA) expands access to health insurance through improvements in Medicaid, the establishment of Affordable Insurance Exchanges, and coordination between Medicaid, the Children's Health Insurance Program, and the Exchanges. In implementing the ACA over the next fiscal year, HHS will pursue regulations transforming the way our nation delivers care. This includes creating better ways to pay providers, incentivize quality of care and distribute information to build a health care system that is better, smarter and healthier with an engaged, educated, and empowered consumer at the center.

Streamlining Medicaid Eligibility Determinations

Forthcoming proposed and final rules will bring to completion regulatory provisions that support our efforts to assist states in implementing Medicaid eligibility and enrollment provisions stemming from the Affordable Care Act. These changes provide states more flexibility to coordinate Medicaid and CHIP eligibility notices, appeals, and other related administrative procedures with similar procedures used by the Exchanges.

Updating Organ Donation Authorities

The Health Resources and Services Administration (HRSA) is undertaking a regulation to improve and streamline the process for human organ donation. HRSA is proposing a final rule that clarifies that peripheral blood stem cells are included in the definition of bone marrow under section 30 of the National Organ Transplantation Act of 1984.

IV. Leading in Science and Innovation

HHS continues to expand on early successes of a number of initiatives, including the Precision Medicine Initiative, BRAIN Initiative, and the Vice President's Cancer Moonshot, specifically by updating the rules that govern research with human participants. In particular, HHS plans to finalize revisions to existing rules governing research with human subjects, often referred to as the Common Rule. This rule would apply to institutions and researchers supported by HHS as well as researchers throughout much of the Federal government who are conducting research involving human subjects. The final rule will aim to better protect human subjects while facilitating research, and also reducing burden, delay, and ambiguity for investigators.

Patient-Centered Improvements to Health Technology

HHS plans to undertake regulations designed to enhance both security and interoperability of electronic and other health records to improve access to care. These initiatives include an update to the regulations regarding confidentiality of substance abuse treatment records to align with advances in health information technology (health IT) while maintaining appropriate patient privacy protections.

V. Delivering High Quality Care and Spending Our Health Care Dollars More Wisely

HHS continues work to build a health care delivery system that results in better care, smarter spending, and healthier people by finding better ways to pay providers, deliver care, and distribute information all while keeping the individual patient at the center. In the coming fiscal year, the department will complete a number of regulations to accomplish this strategic objective:

Medicare Payment Rules

Nine Medicare payment rules will be updated to better reflect the current

state of medical practice and to respond to feedback from providers seeking financial predictability and flexibility to better serve patients. In particular, the annual Hospital Inpatient Prospective Payment System for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and FY 2018 Rates proposed rule revises the Medicare hospital inpatient and long-term care hospital prospective payment systems for operating and capital-related costs. This proposed rule would implement changes arising from our continuing experience with these systems.

Improving the 340B Program

HRSA plans to issue two regulations intended to improve transparency and operation of its 340B Drug Pricing Program. These regulations include:

- 340B Drug Pricing Program Ceiling Price and Manufacturer Civil Monetary Penalties Regulation: HRSA plans to finalize this rule, which defines standards and methodology for the calculation of ceiling process for purposes of the 340B Program and imposes monetary sanctions on drug manufacturers who intentionally charge a covered entity a price above the ceiling price established for the 340B Program; and

- 340B Drug Pricing Program Omnibus Guidance: This guidance, when finalized, sets forth the responsibilities of 340B covered entities and drug manufacturers to ensure compliance with the statute establishing the 340B Program.

VI. Ensuring the Building Blocks for Success at Every Stage of Life

Over the coming year, the Department will continue its support at critical stages of people's lives, from infancy to old age, and its support of topics including early learning, Alzheimer's and dementia. ACF plans to finalize a regulation making child support program operations and enforcement procedures more efficient by recognizing advancements in technology and the move toward electronic communications and document management. An additional Administration for Children and Families rule, when finalized, amends the Adoption and Foster Care Analysis and Reporting Systems by modifying requirements for foster care agencies to collect and report data on children in out-of-home care and children under adoption or guardianship agreements with child welfare agencies.

HHS—SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION (SAMHSA)

Final Rule Stage

33. Confidentiality of Substance Use Disorder Patient Records

Priority: Other Significant.
Legal Authority: 42 U.S.C. 290dd–2
CFR Citation: 42 CFR 2.
Legal Deadline: None.
Abstract: The final rule will amend 42 CFR part 2 to update the regulations for the modern health care context with respect to health information technology and new health care models. The goal of this rule is to balance the need for information exchange in new health care models and applications with appropriate privacy protections for those undergoing treatment for substance use disorders. The revisions to the regulations would remain consistent with 42 U.S.C. 290dd–2 (confidentiality of records).

Statement of Need: The last substantive update to these regulations was in 1987. Over the last 29 years, significant changes have occurred within the U.S. health care system that were not envisioned by the current regulations, including new models of integrated care that are built on a foundation of information sharing to support coordination of patient care, the development of an electronic infrastructure for managing and exchanging patient information, and a new focus on performance measurement within the health care system. SAMHSA wants to ensure that patients with substance use disorders have the ability to participate in, and benefit from new integrated health care models without fear of putting themselves at risk of adverse consequences. These new integrated models are foundational to HHS's triple aim of improving health care quality, improving population health, and reducing unnecessary health care costs.

Summary of Legal Basis: The statutory authority for the part 2 regulation is based on 42 U.S.C. 290dd–2, which protects the confidentiality of records with respect to the identity, diagnosis, prognosis, or treatment of any patient records that are maintained in connection with the performance of any federally assisted program or activity relating to substance abuse education, prevention, training, treatment, rehabilitation, or research.[1] Under the part 2 statute and current regulations, a federally assisted substance abuse program may only release patient identifying information related to substance abuse treatment services with the individual's written consent; pursuant to a court order; or under a few other limited exceptions.

Alternatives: Failure to finalize the rule would result in the existing regulations staying in place, with none of the changes proposed being adopted.

Anticipated Cost and Benefits: Over the 10-year period of 2016–2025, the total undiscounted cost of the part 2 changes will be about $241 million in 2016 dollars. When future costs are discounted at 3 percent or 7 percent per year, the total costs become approximately $217,586,000 or $193,098,000, respectively. The benefits would be improvements in the integration and coordination of substance use disorder treatment with the broader health system and improved use of data to inform the development improvement of the substance use disorder treatment system.

Risks: If this rule is not finalized, it will result in significant scrutiny from a variety of stakeholders, who have been pushing for an update to the rule. It would also inhibit integrated care for substance use disorders and prevent the use of some data in research related to substance use disorder treatment at a time when the issue is a key priority to the Department as a result of the opioid crisis.

HHS—CENTERS FOR DISEASE CONTROL AND PREVENTION (CDC)

Final Rule Stage

34. Control of Communicable Diseases

Priority: Other Significant. Major under 5 U.S.C. 801.
Legal Authority: Sec. 361 of the Public Health Service Act (42 U.S.C. 264 to 265)
CFR Citation: 42 CFR 70; 42 CFR 71.

Legal Deadline: None.

Abstract: This rule clarifies data collection requirements for airline passengers and crew, codifies current practice, clarifies HHS/CDC's authority to implement non-invasive public health screenings at U.S. ports of entry and other U.S. locations; and adds appeal provisions for persons served with a Federal public health order (*e.g.,* quarantine) with due process, including clarification of reasons, processes, and reassessments.

Statement of Need: The need for this proposed rulemaking was reinforced during HHS/CDC's response to the largest outbreak of Ebola virus disease (Ebola) on record, followed by the recent outbreak of Middle East Respiratory Syndrome (MERS) in South Korea, both quarantinable communicable diseases, and repeated outbreaks and responses to measles, a non-quarantinable communicable disease of public health concern, in the United States. The provisions contained within this proposal will enhance HHS/CDC's ability to prevent the further importation and spread of communicable diseases into the United States and interstate by clarifying and providing greater transparency regarding its response capabilities and practices.

Summary of Legal Basis: The primary legal authority supporting this rulemaking is sections 361 and 362 of the Public Health Service Act (42 U.S.C. 264, 265).

Alternatives: None. The main impact of the proposals within this rule is to strengthen our regulations by codifying statutory language to describe HHS/CDC's authority to prevent the introduction, transmission, and spread of communicable diseases. The intent of these proposed updates is to best protect U.S. public health and to inform the regulated community of these updates.

Anticipated Cost and Benefits: The analysis of estimated costs and benefits of this rule has 4 components: (1) Costs and benefits for submitting passenger and crew information to CDC; (2) costs and benefits associated with improved transparency of how HHS/CDC uses its regulatory authorities to protect public health; (3) transfer payments by HHS/CDC for treatment and care; and (4) the impact of the proposed provision suspending the entry of animals, articles, or things from designated foreign countries and places into the United States.

Risks: If this regulation is not published, HHS/CDC's ability to prevent the further importation and spread of communicable diseases into the United States and interstate will be limited; current regulatory language will not be clarified; and there will be less transparency to the public regarding HHS/CDC's response capabilities and practices.

RIN: 0920–AA63

HHS—FOOD AND DRUG ADMINISTRATION (FDA)

Proposed Rule Stage

35. Mammography Quality Standards Act; Regulatory Amendments

Priority: Other Significant.

Legal Authority: 21 U.S.C. 360i; 21 U.S.C. 360nn; 21 U.S.C. 374(e); 42 U.S.C. 263b

CFR Citation: 21 CFR 900.

Legal Deadline: None.

Abstract: FDA is proposing to amend its regulations governing mammography. The amendments would update the regulations issued under the Mammography Quality Standards Act of 1992 (MQSA). FDA is taking this action to address changes in mammography technology and mammography processes that have occurred since the regulations were published in 1997 and to address breast density reporting to patient and health care providers.

Statement of Need: FDA is proposing to update the mammography regulations that were issued under the Mammography Quality Standards Act of 1992 (MQSA) and the Federal Food, Drug, and Cosmetic Act (FD&C Act). FDA is taking this action to address changes in mammography technology and mammography processes, such as breast density reporting, that have occurred since the regulations were published in 1997.

FDA is also proposing updates to modernize the regulations by incorporating current science and mammography best practices. These updates are intended to improve the delivery of mammography services.

Summary of Legal Basis: Mammography is an X-ray imaging examination device that is regulated under the authority of the FD&C Act. FDA is proposing these amendments to the mammography regulations (set forth in 21 CFR part 900) under section 354 of the Public Health Service Act (42 U.S.C. 263b), and sections 519, 537, and 704(e) of the FD&C Act (21 U.S.C. 360i, 360nn, and 374(e)).

Alternatives: The Agency will consider different options so that the health benefits to patients are maximized and the economic burdens to mammography facilities are minimized.

Anticipated Cost and Benefits: The primary public health benefits of the rule will come from the potential for earlier breast cancer detection, improved morbidity and mortality, resulting in reductions in cancer treatment costs. The primary costs of the rule will come from industry labor costs and costs associated with supplemental testing and biopsies.

Risks: If a final regulation does not publish, the potential reduction in fatalities and earlier breast cancer detection, resulting in reduction in cancer treatment costs, will not materialize to the detriment of public health

36. Patient Medication Information

Priority: Economically Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 21 U.S.C. 321 *et seq.;* 42 U.S.C. 262; 42 U.S.C. 264

CFR Citation: 21 CFR 208; 21 CFR 310.501 and 310.515; 21 CFR 201.57(a)(18); 21 CFR 201.80(f)(2); 21 CFR 314.70(b)(2)(v)(B); 21 CFR 610.60(a)(7); 21 CFR 201.100; . . .

Legal Deadline: None.

Abstract: The proposed rule would amend FDA medication guide regulations to require a new form of patient labeling, Patient Medication Information, for submission to and review by the FDA for human prescription drug products used, dispensed, or administered on an outpatient basis. The proposed rule would include requirements for Patient Medication Information development, consumer testing, and distribution. The proposed rule would require clear and concise written prescription drug product information presented in a consistent and easily understood format to help patients use their prescription drug products safely and effectively.

Statement of Need: Patients may currently receive one or more types of written patient information regarding prescription drug products. That information is frequently duplicative, incomplete, conflicting, or difficult to read and understand and is not sufficient to meet the needs of patients. Patient Medication Information is a new type of one-page Medication Guide that FDA is proposing to require for certain prescription drug products. Patient Medication Information is intended to improve public health by providing clear, concise, accessible, and useful written prescription drug product information, delivered in a consistent and easily understood format, to help patients use prescription drug products safely and effectively and potentially reduce preventable adverse drug reactions and improve health outcomes.

Summary of Legal Basis: FDA's proposed revisions to the regulations regarding format and content requirements for prescription drug labeling are authorized by the FD&C Act (21 U.S.C. 321 *et seq.*) and by the Public Health Service Act (42 U.S.C. 262 and 264).

Risks: The current system does not consistently provide patients with useful written information to help them use their prescription drug products safely and effectively. The proposed rule would require consumer-tested and FDA-approved Patient Medication Information for certain prescription drug products used, dispensed, or administered on an outpatient basis.

Alternatives: FDA evaluated various formats for patient medication information.

Anticipated Cost and Benefits: The monetary benefit of the proposed rule stems from an increase in medication adherence due to patients having more complete information about their prescription drug products. The proposed rule would impose costs that stem from developing, testing, and approving Patient Medication Information.

Risks: The current system does not consistently provide patients with useful written information to help them use their prescription drug products safely and effectively. The proposed rule would require consumer-tested and FDA-approved Patient Medication Information for certain prescription drug products used, dispensed, or administered on an outpatient basis.

HHS—HEALTH RESOURCES AND SERVICES ADMINISTRATION (HRSA)

Final Rule Stage

37. 340(B) Civil Monetary Penalties for Manufacturers and Ceiling Price Regulations

Priority: Other Significant.

Legal Authority: Sec. 7102 of the Affordable Care Act; Pub. L. 111–148, amending subsec(d); sec. 340(B) of the PHS Act

CFR Citation: None.

Legal Deadline: Other, Statutory, September 20, 2010, ANPRM met deadline for Civil Monetary Penalties for Manufacturers.

Abstract: This final rule is required under the Affordable Care Act. It amends section 340(B) of the Public Health Service Act to impose monetary sanctions (not to exceed $5,000 per instance) on drug manufacturers who intentionally charge a covered entity a price above the ceiling price established under the procedures of the 340(B) Program and also define standards and methodology for the calculation of ceiling prices for purposes of the 340(B) Program.

Statement of Need: The final rule provides a critical enforcement mechanism for the Department when drug manufacturers intentionally charge a covered entity a price above the ceiling price established under the procedures of the 340B Program. The rule also defines the standards and methodology for the calculation of ceiling prices for purposes of the 340B Program.

Summary of Legal Basis: Sections 340B(d)(1)(B)(vi) and 340B(d)(1)(B)(i)(I) of the Public Health Service Act.

Alternatives: None. This rule implements a statutory requirement.

Anticipated Cost and Benefits: None.

Risks: This final rule enables the Department to meet its statutory obligation under the Affordable Care Act to finalize regulations in these areas, which is expected to enhance the integrity of the 340B Program.

38. Definition of Human Organ Under Section 301 of the National Organ Transplant Act of 1984

Priority: Other Significant.

Legal Authority: Pub. L. 109–129; Stem Cell Therapeutic and Research Act of 2005, as amended in 2010 by Pub. L. 111–264

CFR Citation: Not Yet Determined.

Legal Deadline: Final, Statutory, December 18, 2016, Congressional deadline.

On December 18, 2015, Public Law 114–104 was enacted and required the Secretary to issue a determination no later than December 18, 2016, as to whether peripheral blood stem cells and umbilical cord blood are ''human organs'' subject to NOTA section 301.

Abstract: This final rule clarifies that peripheral blood stem cells are included in the definition of bone marrow under section 301 of the National Organ Transplantation Act of 1984, as amended and codified in 42 U.S.C. 274e.

Statement of Need:

• There are currently two methods to collect hematopoietic stem cells (HSCs) from a donor: bone marrow aspiration, and apheresis following a drug regimen. In the second category, granulocyte-colony-stimulating factors are administered over 4–5 days to stimulate the donor to produce and release HSCs from the bone marrow into the peripheral (circulating) blood, where they are collected by apheresis in one or two sessions for a total of 8 hours.

• A panel of the Ninth Circuit Court of Appeals has held that HSCs collected from peripheral blood are not human organs subject to the prohibition against transfer for valuable consideration established in section 301 of the National Organ Transplant Act of 1984 (NOTA).

Should donors begin to be compensated, that decision creates the potential for disparate compensation practices for HSCs collected by bone marrow aspiration and HSCs collected from peripheral blood. The disparity could lead to fewer donations of HSCs by bone marrow aspiration, despite clear clinical preferences for such HSCs for certain patients and conditions. It could also lead to a foreclosure of access to international donor registries, which continue to provide matched donors for patients in the United States.

Summary of Legal Basis: In 2011, a panel of the Ninth Circuit Court of Appeals held that HSCs from peripheral blood are not bone marrow under the prohibition in NOTA section 301. Under this ruling, the transfer of HSCs in bone marrow would be subject to the prohibition in NOTA section 301, while HSCs obtained by mobilizing the donor to release HSCs from the bone marrow into the blood stream so that they may be recovered within days from the donor's peripheral blood would not be subject to the prohibition. The court further observed that, although NOTA section 301 authorized the Secretary to issue a regulation identifying additional human organs subject to that provision, HHS had not yet exercised its authority to identify peripheral blood stem cells as section 301 authorizes. *Flynn* v. *Holder,* 684 F.3d 852 (9th Cir. 2012). On December 18, 2015, Public Law 114–104 was enacted, which required the Secretary to issue a determination as to whether peripheral blood stem cells and umbilical cord blood are human organs subject to NOTA section 301 no later than December 18, 2016.

Alternatives:

Anticipated Cost and Benefits: This proposed rule is not expected to have significant cost implications.

Risks: Although the registry for HSC donors administered under statute as the C.W. Bill Young Cell Transplantation Program has continued to advise registrants that they will not be compensated for registering or donating their HSCs, compensation may become more common if we do not complete this rulemaking. The implementation of payment for donors of peripheral blood stem cells could adversely affect the safety of donors who may proceed with donation even when they have concerns about the risks, as well as the safety of patients, if the lure of compensation leads donors to hide information about their communicable disease risks. In addition, it may make donors less willing to donate HSCs by bone marrow aspiration, if by doing so they would forego compensation for donating of peripheral blood stem cells. It could also foreclose access to international donors. Such access is currently provided by reciprocal agreements with foreign registries, which require that donors of HSCs be uncompensated volunteers.

In addition, disapproval of this action would mean that HHS would not meet the December 18, 2016, deadline Congress set for completion. As drafted, the proposed rule elicited a few comments about the inclusion of umbilical cord blood within the scope of the proposed rule. On December 18, 2015, Public Law 114–104 was enacted, which required the Secretary to issue a determination as to whether peripheral blood stem cells and umbilical cord blood are human organs subject to NOTA section 301 no later than December 18, 2016.

39. 340B Program Omnibus Guidelines

Priority: Other Significant.

Legal Authority: Not Yet Determined

CFR Citation: None.

Legal Deadline: None.

Abstract: This guidance addresses key policy issues raised by stakeholders for which HHS does not have statutory rulemaking authority.

Statement of Need: The Omnibus Guidance addresses key policy issues raised by various stakeholders committed to ensuring the integrity of the 340B Program and assisted covered entities and manufacturers in their ability to satisfy 340B Program requirements and expectations.

Summary of Legal Basis: HHS is interpreting section 340B of the Public Health Service Act and issuing final guidance in critical areas.

Alternatives: None.

Anticipated Cost and Benefits: Some covered entities and manufacturers may increase spending on 340B Program compliance efforts, including assessments of patients eligible for 340B drugs. HRSA does not expect any such costs to be significant.

Risks: Not issuing the final guidance will result in a lack of clarity in some 340B areas.

HHS—OFFICE OF ASSISTANT SECRETARY FOR HEALTH (OASH)

Final Rule Stage

40. Federal Policy for the Protection of Human Subjects; Final Rules

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under PL 104–4.

Legal Authority: 21 U.S.C. 289

CFR Citation: 45 CFR 46.

Legal Deadline: None.

Abstract: The final rules would revise current human subjects regulations in order to strengthen protections for research subjects while facilitating valuable research and reducing burden, delay, and ambiguity for investigators.

Statement of Need: Since the Federal Policy for the Protection of Human Subjects (often referred to as the Common Rule) was promulgated by 15 U.S. Federal departments and agencies in 1991, the volume and landscape of research involving human subjects have changed considerably. Research with human subjects has grown in scale and become more diverse. Examples of developments include: An expansion in the number and type of clinical trials, as well as observational studies and cohort studies; a diversification of the types of social and behavioral research being used in human subjects research; increased use of sophisticated analytic techniques for use with human biospecimens; and the growing use of electronic health data and other digital records to enable very large data sets to be analyzed and combined in novel ways. Yet these developments have not been accompanied by major change in the human subjects research oversight system, which has remained largely unchanged over the last two decades. The proposed revisions are needed to modernize, strengthen, and make more effective the Federal Policy for the Protection of Human Subjects.

Summary of Legal Basis: None.

Alternatives: None.

Anticipated Cost and Benefits: The quantified and non-quantified benefits and costs of all proposed changes to the Common Rule are the following: (1) Over the 2016–2025 period, present value benefits of $2,629 million and annualized benefits of $308 million are estimated using a 3 percent discount rate; and, present value benefits of $2,047 million and annualized benefits of $291 million are estimated using a 7 percent discount rate; (2) present value costs of $13,342 million and annualized costs of $1,564 million are estimated using a 3 percent discount rate; and, present value costs of $9,605 million and annualized costs of $1,367 million are estimated using a 7 percent discount rate.

Risks: If this regulation is not published, the rules overseeing federally funded or conducted human subjects research will not be modernized, strengthened or made more effective.

HHS—CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

Proposed Rule Stage

41. Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid, and Other Provisions Related to Eligibility and Enrollment for Medicaid and CHIP (CMS–2334–P2)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 1302; Pub. L. 111–148

CFR Citation: 42 CFR 430; 42 CFR 431; 42 CFR 433; 42 CFR 435; 42 CFR 457.

Legal Deadline: None.

Abstract: This proposed rule proposes to implement provisions of the Medicaid statute pertaining to Medicaid eligibility and appeals. This proposed rule continues our efforts to provide guidance to assist States in implementing Medicaid and CHIP eligibility, appeals, and enrollment changes required by the Affordable Care Act.

Statement of Need: On January 22, 2013, we published a proposed rule entitled ''Essential Health Benefits in Alternative Benefit Plans, Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid and Exchange Eligibility Appeals and Other Provisions Related to Eligibility and Enrollment for Exchanges, Medicaid and CHIP, and Medicaid Premiums and Cost Sharing'' that proposed changes to provide states more flexibility to coordinate Medicaid and CHIP procedures related to eligibility notices, appeals, and other related administrative actions with similar procedures used by other health coverage programs authorized under the Affordable Care Act. We received a number of public comments on the proposed rule suggesting alternatives that we had not originally considered and did not propose. To give the public the opportunity to comment on those options, we are now proposing revisions related to those comments. In addition, we propose to make other corrections and modifications related to delegations of eligibility determinations and appeals, and appeals procedures. We have developed these proposals through our experiences working with states and Exchanges, and Exchange appeals entities operationalizing fair hearings.

Summary of Legal Basis: The Affordable Care Act extends and simplifies Medicaid eligibility. The rule proposes alternatives not included in the previously published January 22, 2013 proposed rule, based on public comments received.

Alternatives: The majority of Medicaid and CHIP eligibility provisions proposed in this rule serve to implement the Affordable Care Act. Therefore, alternatives considered for this rule were constrained due to the statutory provisions.

Anticipated Cost and Benefits: While states will likely incur short-term increases in administrative costs, we do not anticipate that this proposed rule would have significant financial effects on state Medicaid programs. The extent of these initial costs will depend on current state policy and practices, as many states have already adopted the administrative simplifications addressed in the rule. In addition, the administrative simplifications proposed in this rule may lead to savings as states streamline their fair hearing processes, consistent with the processes used by the Marketplace, and implement timeliness and performance standards.

Risks: None. Delaying publication of this rule delays states from moving forward with implementing changes to Medicaid and CHIP, and aligning operations between Medicaid, CHIP and the Exchanges.

42. • FY 2018 Prospective Payment System and Consolidated Billing For Skilled Nursing Facilities (SNFS) (CMS–1679–P)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

CFR Citation: 42 CFR 483.

Legal Deadline: Final, Statutory, July 31, 2017.

Abstract: This annual proposed rule would update the payment rates used under the prospective payment system for SNFs for fiscal year 2018.

Statement of Need: This proposed rule would update the SNF prospective payment rates as required under the Social Security Act (the Act). The Act requires the Secretary to provide, before the August 1 that precedes the start of each FY, the unadjusted federal per diem rates, the case-mix classification system, and the factors to be applied in making the area wage adjustment.

Summary of Legal Basis: In accordance with sections 1888(e)(4)(E)(ii)(IV) and 1888(e)(5) of the Act, the federal rates in this proposed rule would reflect an update to the rates that we published in the SNF PPS final rule for FY 2017, which reflects the SNF market basket index, as adjusted by the multifactor productivity (MFP) adjustment for FY 2018. These changes would be applicable to services furnished on or after October 1, 2017.

Alternatives: None. This is a statutory requirement.

Anticipated Cost and Benefits: Total expenditures will be adjusted for FY 2018.

Risks: If this regulation is not published timely, SNF services will not be paid appropriately beginning October 1, 2017.

Priority: Economically Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

CFR Citation: 42 CFR 412.

Legal Deadline: Final, Statutory, August 1, 2017.

Abstract: This annual proposed rule would update the prospective payment rates for inpatient psychiatric facilities with discharges beginning on October 1, 2017.

Statement of Need: This rule is required to update the prospective payment rates and wage index values for Medicare inpatient hospital services provided by inpatient psychiatric facilities (IPFs), which include freestanding IPFs and psychiatric units of an acute care hospital or critical access hospital.

Summary of Legal Basis: Under section 1886 of the Act, rates are adjusted based on the market basket update. These changes would be applicable to services furnished on or after October 1, 2017.

Alternatives: None. This is a statutory requirement.

Anticipated Cost and Benefits: Total expenditures will be adjusted for FY 2018.

Risks: If this regulation is not published timely, IPFs will not receive accurate Medicare payments for furnishing inpatient psychiatric services to beneficiaries in IPFs in FY 2018.

44. • FY 2018 Inpatient Rehabilitation Facility (IRF) Prospective Payment System (CMS–1671–P)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

CFR Citation: 42 CFR 412.

Legal Deadline: Final, Statutory, August 1, 2017.

Abstract: This annual proposed rule would update the prospective payment rates for inpatient rehabilitation facilities (IRFs) for fiscal year 2018.

Statement of Need: This proposed rule would update the prospective payment rates for IRFs for as required under the Social Security Act (the Act). As required by the Act, this rule includes the classification and weighting factors for the IRF PPS's case-mix groups and a description of the methodologies and data used in computing the prospective payment rates for FY 2018. This rule also proposes revisions and updates to the quality measures and reporting requirements under the IRF QRP.

Summary of Legal Basis: The IRF prospective payment rates are updated as required under section 1886(j)(3)(C) of the Act. It responds to section 1886(j)(5) of the Act, which requires the Secretary to, on or before the August 1 that precedes the start of each fiscal year, publish the classification and weighting factors for the IRF PPS's case-mix groups and a description of the methodology and data used in computing the prospective payment rates for that fiscal year.

Alternatives: None. This is a statutory requirement.

Anticipated Cost and Benefits: Total expenditures will be adjusted for FY 2018.

Risks: If this regulation is not published timely, IRF services will not be paid appropriately beginning October 1, 2017.

HHS—CMS

46. • CY 2018 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates (CMS–1678–P) (Section 610 Review)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

CFR Citation: 42 CFR 416; 42 CFR 419.

Legal Deadline: Final, Statutory, November 1, 2017.

Abstract: This annual proposed rule would revise the Medicare hospital outpatient prospective payment system to implement statutory requirements and changes arising from our continuing experience with this system. The proposed rule describes changes to the amounts and factors used to determine payment rates for services. In addition, the rule proposes changes to the ambulatory surgical center payment system list of services and rates.

Statement of Need: Medicare pays over 4,000 hospitals for outpatient department services under the hospital outpatient prospective payment system (OPPS). The OPPS is based on groups of clinically similar services called ambulatory payment classification groups (APCs). CMS annually revises the APC payment amounts based on the most recent claims data, proposes new payment policies, and updates the payments for inflation using the hospital operating market basket. Medicare pays roughly 5,000 Ambulatory Surgical Centers (ASCs) under the ASC payment system. CMS annually revises the payment under the ASC payment system, proposes new policies, and updates payments for inflation. CMS will issue a final rule containing the payment rates for the 2018 OPPS and ASC payment system at least 60 days before January 1, 2018.

Summary of Legal Basis: Section 1833 of the Social Security Act establishes Medicare payment for hospital outpatient services and ASC services. The rule revises the Medicare hospital OPPS and ASC payment system to implement applicable statutory requirements. In addition, the rule describes changes to the outpatient APC system, relative payment weights, outlier adjustments, and other amounts and factors used to determine the payment rates for Medicare hospital outpatient services paid under the prospective payment system as well as changes to the rates and services paid under the ASC payment system. These changes would be applicable to services furnished on or after January 1, 2018.

Alternatives: None. This is a statutory requirement.

Anticipated Cost and Benefits: Total expenditures will be adjusted for CY 2018.

Risks: If this regulation is not published timely, outpatient hospital and ASC services will not be paid appropriately beginning January 1, 2018.

47. • CY 2018 Changes to the End-Stage Renal Disease (ESRD) Prospective Payment System, Quality Incentive Program, and Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) (CMS–1674–P)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395d(d); 42 U.S.C. 1395f(b); 42 U.S.C. 1395g; . . .

CFR Citation: 42 CFR 413.
Legal Deadline: Final, Statutory, November 1, 2017.
Abstract: This annual proposed rule would update the bundled payment system for ESRD facilities by January 1, 2018. The rule would also update the quality incentives in the ESRD program and implement changes to the DMEPOS competitive bidding program.
Statement of Need: On January 1, 2011, CMS implemented the ESRD prospective payment system (PPS), a case-mix adjusted, bundled prospective payment system for renal dialysis services furnished by ESRD facilities. Annually, we update and make revisions to the ESRD PPS and requirements for the ESRD Quality Incentive Program (QIP). The ESRD QIP is the most recent step in fostering improved patient outcomes by establishing incentives for dialysis facilities to meet or exceed performance standards established by CMS. Additionally, we annually adjust the methodology for adjusting DMEPOS fee schedule amounts.
Summary of Legal Basis: Section 1881(b)(14) of the Social Security Act (the Act), as added by section 153(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Public Law 110–275), and section 1881(b)(14)(F) of the Act, as added by section 153(b) of MIPPA and amended by section 3401(h) of the Affordable Care Act Public Law 111–148), established that beginning CY 2012, and each subsequent year, the Secretary will annually increase payment amounts by an ESRD market basket increase factor, reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Additionally, the QIP program is authorized under section 1881(h) of the Social Security Act (the Act).
Alternatives: None. This is a statutory requirement.
Anticipated Cost and Benefits: Total expenditures will be adjusted for CY 2018.
Risks: If this regulation is not published timely, ESRD facilities will not receive accurate Medicare payment amounts for furnishing outpatient maintenance dialysis treatments beginning January 1, 2018.

HHS—CMS

Final Rule Stage

48. Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid, and Other Provisions Related to Eligibility and Enrollment for Medicaid and CHIP (CMS–2334–F2)

Priority: Economically Significant. Major under 5 U.S.C. 801.
Legal Authority: Pub. L. 111–148, secs 1411, 1413, 1557, 1943, 2102, 2201, 2004, 2303, et al.
CFR Citation: 42 CFR 430; 42 CFR 431; 42 CFR 433; 42 CFR 435; 42 CFR 457.
Legal Deadline: None.
Abstract: This final rule implements provisions of the Affordable Care Act that expand access to health coverage through improvements in Medicaid and coordination between Medicaid, Children's Health Insurance Program (CHIP), and Exchanges. This rule finalizes the remaining provisions from the Medicaid, Children's Health Insurance Programs, and Exchanges: Essential Health Benefits in Alternative Benefit Plans, Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid and Exchange Eligibility Appeals and Other Provisions Related to Eligibility and Enrollment for Exchanges, Medicaid and CHIP, and Medicaid Premiums and Cost Sharing; Proposed Rule that we published in the January 22, 2013, **Federal Register**. This final rule continues our efforts to provide guidance to assist States in implementing Medicaid and CHIP eligibility, appeals, and enrollment changes required by the Affordable Care Act.
Statement of Need: This final rule will implement provisions of the Affordable Care Act and the Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA). This rule reflects new statutory eligibility provisions; changes to provide States more flexibility to coordinate Medicaid and CHIP eligibility notices, appeals, and other related administrative procedures with similar procedures used by other health coverage programs authorized under the Affordable Care Act; modernizes and streamlines existing rules, eliminates obsolete rules, and updates provisions to reflect Medicaid eligibility pathways; implements other CHIPRA eligibility-related provisions, including eligibility for newborns whose mothers were eligible for and receiving Medicaid or CHIP coverage at the time of birth. With publication of this final rule, we desire to make our implementing regulations available to States and the public as soon as possible to facilitate continued efficient operation of the State flexibility authorized under section 1937 of the Act.
Summary of Legal Basis: The Affordable Care Act extends and simplifies Medicaid eligibility. In the July 15, 2013, **Federal Register**, we issued the ''Medicaid and Children's Health Insurance Programs: Essential Health Benefits in Alternative Benefit Plans, Eligibility Notices, Fair Hearing and Appeal Processes, and Premiums and Cost Sharing; Exchanges: Eligibility and Enrollment'' final rule that finalized certain key Medicaid and CHIP eligibility provisions included in the January 22, 2013, proposed rule. In this final rule, we are addressing the remaining provisions of the January 22, 2013, proposed rule.
Alternatives: The majority of Medicaid and CHIP eligibility provisions proposed in this rule serve to implement the Affordable Care Act. All of the provisions in this final rule are a result of the passage of the Affordable Care Act and are largely self-implementing. Therefore, alternatives considered for this final rule were constrained due to the statutory provisions.
Anticipated Cost and Benefits: The March 23, 2012, Medicaid eligibility final rule detailed the impact of the Medicaid eligibility changes related to implementation of the Affordable Care Act. The majority of provisions included in this final rule were described in detail in that rule, but in summary, we estimate a total savings of $465 million over 5 years, including $280 million in cost savings to the Federal Government and $185 million in savings to States.
Risks: None. Delaying publication of this final rule delays States from moving forward with implementing changes to Medicaid and CHIP, and aligning operations between Medicaid, CHIP, and the Exchanges.

49. CY 2017 Inpatient Hospital Deductible and Hospital and Extended Care Services Coinsurance Amounts (CMS–8062–N)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 42 U.S.C. 1395e–2(b)(2); Social Security Act, sec. 1813(b)(2)

CFR Citation: None.

Legal Deadline: Final, Statutory, September 15, 2016.

Abstract: This annual notice announces the inpatient hospital deductible and the hospital and extended care services coinsurance amounts for services furnished in calendar year 2017 under Medicare's Hospital Insurance program (Medicare Part A). The Medicare statute specifies the formula used to determine these amounts.

Statement of Need: The Social Security Act (the Act) requires the Secretary to publish annually the amounts of the inpatient hospital deductible and hospital and extended care services coinsurance applicable for services furnished in the following CY.

Summary of Legal Basis: Section 1813 of the Act provides for an inpatient hospital deductible to be subtracted from the amount payable by Medicare for inpatient hospital services furnished to a beneficiary. It also provides for certain coinsurance amounts to be subtracted from the amounts payable by Medicare for inpatient hospital and extended care services. Section 1813(b)(2) of the Act requires us to determine and publish each year the amount of the inpatient hospital deductible and the hospital and extended care services coinsurance amounts applicable for services furnished in the following calendar year (CY).

Alternatives: None. This notice implements a statutory requirement.

Anticipated Cost and Benefits: Total costs will be adjusted for CY 2017.

Risks: None. Notice informs the public of the 2017 premium.

RIN: 0938–AT05

HHS—ADMINISTRATION FOR CHILDREN AND FAMILIES (ACF)

Final Rule Stage

51. Adoption and Foster Care Analysis and Reporting System (AFCARS)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 620 *et seq.;* 42 U.S.C. 670 *et seq.;* 42 U.S.C. 1302

CFR Citation: 45 CFR 1355.

Legal Deadline: None.

Abstract: This rule will amend the Adoption and Foster Care Analysis and Reporting Systems (AFCARS). It will modify requirements for title IV–E foster care agencies to collect and report data on children in out-of-home care and children under title IV–E adoption or guardianship agreements with the title IV–E agency.

Statement of Need: This rule will amend the Adoption and Foster Care Analysis and Reporting Systems (AFCARS). It will modify requirements for title IV–E foster care agencies to collect and report data on children in out-of-home care and children under title IV–E adoption or guardianship agreements with the title IV–E agency.

Summary of Legal Basis: Section 479 of the Social Security Act (the Act) mandates HHS regulate a data collection

system for national adoption and foster care data. Section 474(f) of the Act requires HHS to impose penalties for non-compliant AFCARS data. Section 1102 of the Act instructs the Secretary to promulgate regulations necessary for the effective administration of the functions for which HHS is responsible under the Act.

Alternatives:

1. ACF considered whether other existing data sets could yield similar information. ACF determined that AFCARS is the only comprehensive case-level data set on the incidence and experiences of children who are in out-of-home care under the placement and care of the title IV–E agency or who are adopted under a title IV–E adoption assistance agreement.

2. We also received state comments to the 2016 SNPRM citing they have few Indian children in foster care, if any. ACF considered alternatives to collecting ICWA-related data through AFCARS, such as providing an exemption from reporting but alternative approaches are not feasible due to:

- AFCARS data must be comprehensive per section 479(c)(3) of the Act and exempting some states from reporting the ICWA-related data elements is not consistent with this statutory mandate, and would render it difficult to use this data for development of national policies.
- Section 474(f) of the Act provides for mandatory penalties on the title IVE agency for non-compliance on AFCARS data that is based on the total amount expended by the title IV–E agency for administration of foster care activities. Therefore, we are not authorized to permit some states to be subject to a penalty and not others. In addition, allowing states an alternate submission process would complicate and/or prevent the assessment of penalties per 1355.47, including penalties for failure to submit data files free of cross-file errors, missing, invalid, or internally inconsistent data, or tardy transactions for each data element of applicable records.

Anticipated Cost and Benefits: We estimate that costs for the final rule will be approximately $36 million. Benefits are that we will have an updated AFCARS regulation for the first time since 1993 and we will have national data on Indian children as defined in ICWA.

Risks: If we do not implement this final rule, agencies will continue to report information to AFCARS that is not up to date with revisions to the statute over the years. Further, without regulations, we are unable to implement the statutory penalty provisions. In addition, we will not collect comprehensive national data on the status of American Indian/Alaska Native children to whom the Indian Child Welfare Act (ICWA) applies and historical data on children in foster care. We can expect criticisms from federally recognized Indian tribes and other stakeholders that the absence of ICWA data prevents understanding both how ICWA is implemented and how to address and reduce the disproportionate number of American Indian/Alaska Native children in foster care nationally.

RIN: 0970–AC47

HHS—ACF

52. Flexibility, Efficiency, and Modernization of Child Support Enforcement Programs

Priority: Other Significant.

Legal Authority: Sec. 1102 of the Social Security Act

CFR Citation: 45 CFR 301 to 305; 45 CFR 307.

Legal Deadline: None.

Abstract: This regulation will make child support program operations and enforcement procedures more flexible and more efficient by recognizing advancements in technology and the move toward electronic communications and document management. The regulation will improve and simplify program operations, remove outmoded limitations to program innovation to better serve families, and clarify and correct technical provisions in existing regulations.

Statement of Need: This regulation will make child support program operations and enforcement procedures more flexible and more efficient by recognizing advancements in technology and the move toward electronic communications and document management. The regulation will improve and simplify program operations, remove outmoded limitations to program innovation to better serve families, and clarify and correct technical provisions in existing regulations.

Summary of Legal Basis: This final rule is published under the authority granted to the Secretary of the Department of Health and Human Services by section 1102 of the Social Security Act (Act), 42 U.S.C. 1302. Section 1102 of the Act authorizes the Secretary to publish regulations, not inconsistent with the Act, which may be necessary for the efficient administration of the functions for which the Secretary is responsible under the Act.

Additionally, the Secretary has authority under section 452(a)(1) of the Act to establish such standards for State programs for locating noncustodial parents, establishing paternity, and obtaining child support as he[she] determines to be necessary to assure that such programs will be effective. Rules promulgated under section 452(a)(1) must meet two conditions. First, the Secretary's designee must find that the rule meets one of the statutory objectives of locating noncustodial parents, establishing paternity, and obtaining child support. Second, the Secretary's designee must determine that the rule is necessary to assure that such programs will be effective.

Section 454(13) requires a State plan to provide that the State will comply with such other requirements and standards as the Secretary determines to be necessary to the establishment of an effective program for locating noncustodial parents, establishing paternity, obtaining support orders, and collecting support payments and provide that information requests by parents who are residents of other States be treated with the same priority as requests by parents who are residents of the State submitting the plan.

Alternatives: None.

Anticipated Cost and Benefits: While there are some costs associated with these regulations, they are not economically significant as defined under E.O. 12866. However, the regulation is significant and has been reviewed by OMB.

An area with associated Federal costs is modifying the child support statewide automated system for onetime system enhancements to accommodate new requirements such as notices, applications, and identifying noncustodial parents receiving SSI. This

has a cost of approximate $26,484,000. There is a cost of $26,460,000 to modify statewide IVD systems for the 54 States or Territories at a cost of $100 an hour (with an assumption that 27 States will implement the optional requirements). A cost of $35,044 is designated to CMS' costs for State plan amendments and cooperative agreements. Another area associated with Federal costs is that of job services. We allow FFP for certain job services for noncustodial parents responsible for paying child support. The estimated total average annual net cost (over the first five years) of the job services proposal is $26,096,596 with $18,592,939 as the Federal cost. Thus, the total net cost of the final rule is $52,591,640, and the total Federal costs is $36,074,061. These regulations will improve the delivery of child support services, support the efforts of noncustodial parents to provide for their children, and improve the efficiency of operations.

BILLING CODE 4150–03–P

DEPARTMENT OF HOMELAND SECURITY (DHS)

Fall 2016 Statement of Regulatory Priorities

The Department of Homeland Security (DHS or Department) was created in 2003 pursuant to the Homeland Security Act of 2002, Public Law 107–296. The DHS mission statement provides the following: ''With honor and integrity, we will safeguard the American people, our homeland, and our values.'' Fulfilling this mission requires the dedication of more than 225,000 employees in jobs that range from aviation and border security to emergency response, from cybersecurity analyst to chemical facility inspector. Our duties are wide-ranging, but our goal is clear—keeping America safe.

Leading a unified national effort, DHS has five core missions: (1) Prevent terrorism and enhance security, (2) secure and manage our borders, (3) enforce *and administer our immigration laws,* (4) safeguard and secure cyberspace, and (5) ensure resilience to disasters. In addition, we must specifically focus on maturing and strengthening the homeland security enterprise itself.

In achieving these goals, we are continually strengthening our partnerships with communities, first responders, law enforcement, and Government agencies—at the State, local, tribal, Federal, and international levels. We are accelerating the deployment of science, technology, and innovation in order to make America more secure, and we are becoming leaner, smarter, and more efficient, ensuring that every security resource is used as effectively as possible. For a further discussion of our mission, see the DHS Web site at *http://www.dhs.gov/our-mission.*

The regulations we have summarized below in the Department's fall 2016 regulatory plan and agenda support the Department's responsibility areas. These regulations will improve the Department's ability to accomplish its mission. Also, the regulations we have identified in this year's regulatory plan continue to address legislative initiatives such as the Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), Public Law 110–53 (Aug. 3, 2007).

DHS strives for organizational excellence and uses a centralized and unified approach in managing its regulatory resources. The Office of the General Counsel manages the Department's regulatory program, including the agenda and regulatory plan. In addition, DHS senior leadership reviews each significant regulatory project to ensure that the project fosters and supports the Department's mission.

The Department is committed to ensuring that all of its regulatory initiatives are aligned with its guiding principles to protect civil rights and civil liberties, integrate our actions, build coalitions and partnerships, develop human resources, innovate, and be accountable to the American public.

DHS is also committed to the principles described in Executive Orders 13563 and 12866 (as amended). Both Executive orders direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

Finally, the Department values public involvement in the development of its regulatory plan, agenda, and regulations, and takes particular concern with the impact its regulations have on small businesses. DHS and its components continue to emphasize the use of plain language in our regulatory documents to promote a better understanding of regulations and to promote increased public participation in the Department's regulations.

Retrospective Review of Existing Regulations

Pursuant to Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), DHS identified the following regulatory actions as associated with retrospective review and analysis. Some of the regulatory actions on the below list may be completed actions, which do not appear in the regulatory plan. You can find more information about these completed rulemakings in past publications of the agenda (search the Completed Actions sections) on *www.reginfo.gov.* Some of the entries on this list, however, are active rulemakings. You can find entries for these rulemakings on *www.regulations.gov.*

RIN	Rule
1615–AB95	Immigration Benefits Business Transformation, Increment II; Nonimmigrants Classes.
1615–AC00	Enhancing Opportunities for H–1B1, CW–1, and E–3 Nonimmigrants and EB–1 Immigrants.
1615–AC03	Expansion of Provisional Unlawful Presence Waivers of Inadmissibility.
1625–AB80	Revision to Transportation Worker Identification Credential (TWIC) Requirements for Mariners.
1625–AC15	Seafarers' Access to Maritime Facilities.
1651–AA96	Definition of Form I–94 to Include Electronic Format.

RIN	Rule
1651–AB05	Freedom of Information Act (FOIA) Procedures.

Promoting International Regulatory Cooperation

Pursuant to sections 3 and 4(b) of Executive Order 13609 ''Promoting International Regulatory Cooperation'' (May 1, 2012), DHS identified the following regulatory actions that have significant international impacts. Some of the regulatory actions on the below list may be completed actions. You can find more information about these completed rulemakings in past publications of the agenda (search the Completed Actions sections) on *www.reginfo.gov*. Some of the entries on this list, however, are active rulemakings. You can find entries for these rulemakings on *www.regulations.gov*.

RIN	Rule
1625–AB38	Updates to Maritime Security.
1651–AA70	Importer Security Filing and Additional Carrier Requirements.
1651–AA98	Amendments to Importer Security Filing and Additional Carrier Requirements.
1651–AA96	Definition of Form I–94 to Include Electronic Format.

DHS participates in some international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations. For example, the U.S. Coast Guard is the primary U.S. representative to the International Maritime Organization (IMO) and plays a major leadership role in establishing international standards in the global maritime community. IMO's work to establish international standards for maritime safety, security, and environmental protection closely aligns with the U.S. Coast Guard regulations. As an IMO member nation, the U.S. is obliged to incorporate IMO treaty provisions not already part of U.S. domestic policy into regulations for those vessels affected by the international standards. Consequently, the U.S. Coast Guard initiates rulemakings to harmonize with IMO international standards such as treaty provisions and the codes, conventions, resolutions, and circulars that supplement them.

Also, President Obama and Prime Minister Harper created the Canada-U.S. Regulatory Cooperation Council (RCC) in February 2011. The RCC is an initiative between both Federal Governments aimed at pursuing greater alignment in regulation, increasing mutual recognition of regulatory practices and establishing smarter, more effective, and less burdensome regulations in specific sectors. The Canada-U.S. RCC initiative arose out of the recognition that high level, focused, and sustained effort would be required to reach a more substantive level of regulatory cooperation. Since its creation in early 2011, the U.S. Coast Guard has participated in stakeholder consultations with their Transport Canada counterparts and the public, drafted items for inclusion in the RCC Action Plan, and detailed work plans for each included Action Plan item.

The fall 2016 regulatory plan for DHS includes regulations from several DHS components, including U.S. Citizenship and Immigration Services (USCIS), the U.S. Coast Guard (Coast Guard), U.S. Customs and Border Protection (CBP), the U.S. Immigration and Customs Enforcement (ICE), the Federal Emergency Management Agency, the National Protection and Programs Directorate (NPPD), and the Transportation Security Administration (TSA). Below is a discussion of the regulations that comprise the DHS fall 2016 regulatory plan.

United States Citizenship and Immigration Services

U.S. Citizenship and Immigration Services (USCIS) administers immigration benefits and services while protecting and securing our homeland. USCIS has a strong commitment to welcoming individuals who seek entry through the U.S. immigration system, providing clear and useful information regarding the immigration process, promoting the values of citizenship, and assisting those in need of humanitarian protection. In the coming year, USCIS will promulgate several regulations that directly support these commitments and goals.

Regulations To Facilitate Innovation and Employment Creation

International Entrepreneurs. USCIS has proposed to establish a program that would allow for consideration of parole into the United States, on case-by-case basis, of certain inventors, researchers, and entrepreneurs who will establish a U.S. start-up entity, and who have been awarded substantial U.S. investor financing or otherwise hold the promise of innovation and job creation through the development of new technologies or the pursuit of cutting edge research. Based on investment, job-creation, and other factors, the entrepreneur may be eligible for temporary parole. Upon reviewing the public comments received in response to the notice of proposed rulemaking (NPRM), USCIS will develop a final rule.

Employment Creation (EB–5) Immigrant Regulations DHS will propose to amend its regulations governing the employment-based, fifth preference (EB–5) immigrant investor category and EB–5 regional centers to modernize the EB–5 program based on current economic realities and to reflect statutory changes made to the program. DHS will propose to update the regulations to include the following areas: Priority date retention, increases to the required investment amounts, revision of the Targeted Employment Area requirements, clarification of the regional center designation and continued program participation requirements, and further definition of grounds for terminating regional centers.

Improvements to the Immigration System

Requirements for Filing Motions and Administrative Appeals. USCIS will propose to revise the procedural regulations governing appeals and motions to reopen or reconsider before its Administrative Appeals Office. The rule will also propose to require that applicants and petitioners exhaust administrative remedies before seeking judicial review of an unfavorable decision. This rule will streamline the procedures before the Administrative Appeals Office and improve the efficiency of the adjudication process.

Regulatory Changes Involving Humanitarian Benefits

''T'' and ''U'' Nonimmigrants. USCIS is working on regulatory initiatives related to T nonimmigrants (victims of trafficking) and U nonimmigrants (victims of criminal activity). Through these initiatives, USCIS hopes to provide greater consistency in eligibility, application, and procedural requirements for these vulnerable groups, their advocates, and the community. These regulations will contain provisions to adjust documentary requirements for this vulnerable population and provide greater clarity to the law enforcement community.

Special Immigrant Juvenile Petitions. This final rule makes procedural changes and resolves interpretive issues following the amendments mandated by Congress. It will enable child aliens who have been abused, neglected, or abandoned and placed under the jurisdiction of a juvenile court or placed with an individual or entity, to obtain classification as Special Immigrant Juvenile. Such classification can regularize immigration status for these aliens and allow for adjustment of status to lawful permanent resident.

United States Coast Guard

The U.S. Coast Guard (Coast Guard) is a military, multi-mission, maritime service of the United States and the only military organization within DHS. It is the principal Federal agency responsible for maritime safety, security, and stewardship and delivers daily value to the nation through multi-mission resources, authorities, and capabilities.

Effective governance in the maritime domain hinges upon an integrated approach to safety, security, and stewardship. The Coast Guard's policies and capabilities are integrated and interdependent, delivering results through a network of enduring partnerships. The Coast Guard's ability to field versatile capabilities and highly-trained personnel is one of the U.S. Government's most significant and important strengths in the maritime environment.

America is a maritime nation, and our security, resilience, and economic prosperity are intrinsically linked to the oceans. Safety, efficient waterways, and freedom of transit on the high seas are essential to our well-being. The Coast Guard is leaning forward, poised to meet the demands of the modern maritime environment. The Coast Guard creates value for the public through solid prevention and response efforts. Activities involving oversight and regulation, enforcement, maritime presence, and public and private partnership foster increased maritime safety, security, and stewardship.

The statutory responsibilities of the Coast Guard include ensuring marine safety and security, preserving maritime mobility, protecting the marine environment, enforcing U.S. laws and international treaties, and performing search and rescue. The Coast Guard supports the Department's overarching goals of mobilizing and organizing our Nation to secure the homeland from terrorist attacks, natural disasters, and other emergencies. The regulatory projects in this fall 2016 regulatory plan and in the agenda contribute to the fulfillment of those responsibilities.

Seafarers' Access to Maritime Facilities. This regulatory action is necessary to implement section 811 of the Coast Guard Authorization Act of 2010, which requires facility owners and operators to ensure shore access for seafarers and other individuals. This regulation applies to owners and operators of facilities regulated by the Coast Guard under the Maritime Transportation Safety Act of 2002. This regulation helps ensure that owners and operators provide seafarers assigned to vessels moored at the facility, pilots, and representatives of seamen's welfare and labor organizations with the ability to board and depart vessels to access the shore through the facility in a timely manner and at no cost to the seafarer.

Commercial Fishing Vessels—Implementation of 2010 and 2012 Legislation. The Coast Guard is working to improve safety in the commercial fishing industry, which remains one of the most hazardous occupations in the United States. In 2016, the Coast Guard withdrew a rulemaking effort that had been superseded by statute, and instead proposed a rule to implement relevant mandatory provisions of the Coast Guard Authorization Act of 2010 and Coast Guard and Maritime Transportation Act of 2012. The proposed rule would add new requirements for safety equipment, vessel examinations, vessel safety standards, the documentation of maintenance, and the termination of unsafe operations. These requirements would affect an estimated 36,115 existing commercial fishing vessels. This rule is intended to reduce the risk of future fishing vessel casualties and, if a casualty does occur, to minimize the adverse impacts to crew and enable them to have the maximum opportunity to survive and to be rescued. he Coast Guard provided a public comment period of 180 days, ending in December 2016, and will consider all comments when developing the final rule.

United States Customs and Border Protection

U.S. Customs and Border Protection (CBP) is the Federal agency principally responsible for the security of our Nation's borders, both at and between the ports of entry and at official crossings into the United States. CBP must accomplish its border security and enforcement mission without stifling the flow of legitimate trade and travel. The primary mission of CBP is its homeland security mission, that is, to prevent terrorists and terrorist weapons from entering the United States. An important aspect of this priority mission involves improving security at our borders and ports of entry, but it also means extending our zone of security beyond our physical borders.

CBP is also responsible for administering laws concerning the importation into the United States of goods, and enforcing the laws concerning the entry of persons into the United States. This includes regulating and facilitating international trade; collecting import duties; enforcing U.S. trade, immigration and other laws of the United States at our borders; inspecting imports, overseeing the activities of persons and businesses engaged in importing; enforcing the laws concerning smuggling and trafficking in contraband; apprehending individuals attempting to enter the United States illegally; protecting our agriculture and economic interests from harmful pests and diseases; servicing all people, vehicles, and cargo entering the United States; maintaining export controls; and protecting U.S. businesses from theft of their intellectual property.

In carrying out its priority mission, CBP's goal is to facilitate the processing of legitimate trade and people efficiently without compromising security. Consistent with its primary mission of homeland security, CBP intends to issue several regulations during the next fiscal year that are intended to improve security at our borders and ports of entry. CBP is also automating some procedures that increase efficiencies and reduce the costs and burdens to travelers. We have highlighted two of these regulations below.

Air Cargo Advance Screening (ACAS). The Trade Act of 2002, as amended, authorizes the Secretary of Homeland Security to promulgate regulations providing for the transmission, through an electronic data interchange system, of information to CBP pertaining to cargo to be brought into the United States or to be sent from the United

States prior to the arrival or departure of the cargo. The cargo information required is that which the Secretary determines to be reasonably necessary to ensure cargo safety and security. CBP's current Trade Act regulations pertaining to air cargo require the electronic submission of various advance data to CBP no later than either the time of departure of the aircraft for the United States (from specified locations) or four hours prior to arrival in the United States for all other locations. CBP intends to propose amendments to these regulations to implement the Air Cargo Advance Screening (ACAS) program. To improve CBP's risk assessment and targeting capabilities and to enable CBP to target, and identify, risky cargo prior to departure of the aircraft to the United States, ACAS would require the submission of certain of the advance electronic information for air cargo earlier in the process. In most cases, the information would have to be submitted as early as practicable but no later than prior to the loading of cargo onto an aircraft at the last foreign port of departure to the United States. CBP, in conjunction with TSA, has been operating ACAS as a voluntary pilot program since 2010 and intends to publish a notice of proposed rulemaking in the next fiscal year to implement ACAS as a regulatory program.

Definition of Form I–94 to Include Electronic Format. DHS issues the Form I–94 to certain aliens and uses the Form I–94 for various purposes such as documenting status in the United States, the approved length of stay, and departure. DHS generally issues the Form I–94 to aliens at the time they lawfully enter the United States. On March 27, 2013, CBP published an interim final rule amending existing regulations to add a new definition of the term ''Form I–94.'' The new definition includes the collection of arrival/departure and admission or parole information by DHS, whether in paper or electronic format. The definition also clarified various terms that are associated with the use of the Form I–94 to accommodate an electronic version of the Form I–94. The rule also added a valid, unexpired nonimmigrant DHS admission or parole stamp in a foreign passport to the list of documents designated as evidence of alien registration. These revisions enabled DHS to transition to an automated process whereby DHS creates a Form I–94 in an electronic format based on passenger, passport and visa information that DHS obtains electronically from air and sea carriers and the Department of State as well as through the inspection process. CBP intends to publish a final rule during the next fiscal year.

In addition to the regulations that CBP issues to promote DHS's mission, CBP also issues regulations related to the mission of the Department of the Treasury. Under section 403(1) of the Homeland Security Act of 2002, the former-U.S. Customs Service, including functions of the Secretary of the Treasury relating thereto, transferred to the Secretary of Homeland Security. As part of the initial organization of DHS, the Customs Service inspection and trade functions were combined with the immigration and agricultural inspection functions and the Border Patrol and transferred into CBP. The Department of the Treasury retained certain regulatory authority of the U.S. Customs Service relating to customs revenue function (see the Department of the Treasury Regulatory Plan). In addition to its plans to continue issuing regulations to enhance border security, CBP, in the coming year, expects to continue to issue regulatory documents that will facilitate legitimate trade and implement trade benefit programs. For a discussion of CBP regulations regarding the customs revenue function, see the regulatory plan of the Department of the Treasury.

Federal Emergency Management Agency

The Federal Emergency Management Agency's (FEMA's) mission is to support our citizens and first responders to ensure that as a Nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from and mitigate all hazards. FEMA's ethos is to serve the Nation by helping its people and first responders, especially when they are most in need. FEMA will promulgate several rulemakings to support its mission, one of which we highlight below.

Updates to Floodplain Management and Protection of Wetlands Regulations to Implement Executive Order 13690 and the Federal Flood Risk Management Standard (FFRMS). The rule proposes to amend existing FEMA regulations to implement Executive Order 13690, ''Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input.'' FEMA is also proposing a supplementary policy that would further clarify how FEMA applies the FFRMS. FEMA published a notice of proposed rulemaking on August 22, 2016 and will work on finalizing that rule in the coming fiscal year.

Federal Law Enforcement Training Center

The Federal Law Enforcement Training Center (FLETC) does not have any significant regulatory actions planned for fiscal year 2017.

United States Immigration and Customs Enforcement

U.S. Immigration and Customs Enforcement (ICE) is the principal criminal investigative arm of DHS and one of the three Department components charged with the civil enforcement of the Nation's immigration laws. Its primary mission is to protect national security, public safety, and the integrity of our borders through the criminal and civil enforcement of Federal law governing border control, customs, trade, and immigration. During the coming year, ICE will focus its rulemaking efforts on increasing security in the area of student and exchange visitor programs.

Eligibility Checks of Nominated and Current Designated School Officials of Schools That Enroll F and M Nonimmigrant Students and of Exchange Visitor Program-Designated Sponsors of J Nonimmigrants

DHS will issue a rule proposing to strengthen the mechanism for approving user access to one of its data-management systems, the Student and Exchange Visitor Information System (SEVIS). DHS and the Department of State, rely on principal designated school officials, designated school officials, responsible officers, and alternate responsible officers (collectively, P/DSOs, DSOs and ROs/AROs) as key links in the process to mitigate potential threats to national security and to ensure compliance with immigration law by aliens admitted into the United States in F, J, or M nonimmigrant status. Through this rule, DHS would require that anyone nominated to serve as a P/DSO, DSO, or RO/ARO receive a favorable SEVIS Access Approval Process assessment prior to their appointment and subsequent approval for access to SEVIS. The primary benefit of this rule would be to reduce the potential for fraud.

National Protection and Programs Directorate

The National Protection and Programs Directorate's (NPPD) vision is a safe, secure, and resilient infrastructure where the American way of life can thrive. NPPD leads the national effort to

protect and enhance the resilience of the Nation's physical and cyber infrastructure.

Chemical Facility Anti-Terrorism Standards. Recognizing both the importance of the Nation's chemical facilities to the American way of life and the need to secure high-risk chemical facilities against terrorist attacks, in December 2014 Congress passed, and the President signed into law, the Protecting and Securing Chemical Facilities from Terrorist Attacks Act of 2014, Pub. L. 113–254. This legislation provides the Department continuing authority to implement the Chemical Facility Anti-Terrorism Standards (CFATS) regulatory program, a program mandating that high-risk chemical facilities in the United States develop and implement security plans satisfying risk-based performance standards established by DHS.

The CFATS regulations have been in effect since 2007. On August 18, 2014, the Department published an advance notice of proposed rulemaking (ANPRM) seeking public comment on ways to make the program more effective. The Department will continue this rulemaking effort and intends to publish a notice of proposed rulemaking (NPRM). The NPRM will propose modifications to CFATS based on the public comments received in response to the ANPRM and on program implementation experience. The NPRM will also propose modifications to CFATS in order to align the existing regulation with the requirements of the 2014 legislation. Through the rule, NPPD seeks to harmonize the regulation with its statutory authority and to make the CFATS program more efficient and effective.

Transportation Security Administration

The Transportation Security Administration (TSA) protects the Nation's transportation systems to ensure freedom of movement for people and commerce. TSA is committed to continuously setting the standard for excellence in transportation security through its people, processes, and technology as we work to meet the immediate and long-term needs of the transportation sector.

For the coming fiscal year, TSA is prioritizing regulations related to requirements for surface transportation included in the 9/11 Act. These rulemakings will include the following ones:

Security Training for Surface Transportation Employees. TSA will propose regulations requiring higher-risk public transportation agencies (including rail mass transit and bus systems), railroad carriers (freight and passenger), and over-the-road bus (OTRB) owner/operators to conduct security training for frontline employees. This regulation will implement sections 1408 (public transportation), 1517 (railroads), and 1531(e) and 1534 (OTRBs) of the 9/11 Act. In compliance with the definitions of frontline employees in the pertinent provisions of the 9/11 Act, the notice of proposed rulemaking (NPRM) will include identification of which employees are required to receive security training and the content of that training. The NPRM will also propose definitions for transportation security-sensitive materials, as required by section 1501 of the 9/11 Act.

Surface Transportation Vulnerability Assessments and Security Plans. TSA will publish an advance notice of proposed rulemaking (ANPRM) regarding a future rulemaking that will propose requiring higher-risk public transportation agencies (including rail mass transit and bus systems), railroads (freight and passenger), and OTRB owner/operators to conduct vulnerability assessments and develop/implement security plans. This regulation will propose to implement sections 1405 (public transportation), 1512 (railroads), and 1531 (OTRBs) of the 9/11 Act.

Vetting of Certain Surface Transportation Employees. TSA will propose regulations requiring security threat assessments for security coordinators and other frontline employees of certain public transportation agencies (including rail mass transit and bus systems), railroads (freight and passenger), and OTRB owner/operators. The NPRM will also include proposed provisions to implement TSA's statutory requirement to recover its cost of vetting through user fees. This regulation will implement sections 1414 (public transportation), 1522 (railroads), and 1531(e)(2) (over-the-road buses) of the 9/11 Act.

United States Secret Service

The United States Secret Service does not have any significant regulatory actions planned for fiscal year 2017.

DHS Regulatory Plan for Fiscal Year 2017

A more detailed description of the priority regulations that comprise the DHS fall regulatory plan follows.

DHS—OFFICE OF THE SECRETARY (OS)

Proposed Rule Stage

53. Chemical Facility Anti-Terrorism Standards (CFATS)

Priority: Other Significant.

Legal Authority: Sec. 550 of the Department of Homeland Security Appropriations Act of 2007 Pub. L. 109–295, as amended

CFR Citation: 6 CFR 27.

Legal Deadline: None.

Abstract: The Department of Homeland Security (DHS) previously invited public comment on an advance notice of proposed rulemaking (ANPRM) for potential revisions to the Chemical Facility Anti-Terrorism Standards (CFATS) regulations. The ANPRM provided an opportunity for the public to provide recommendations for possible program changes. DHS is reviewing the public comments received in response to the ANPRM, after which DHS intends to publish a Notice of Proposed Rulemaking.

Statement of Need: DHS intends to propose several potential program changes to the CFATS regulation. These changes have been identified in the nine years since program implementation. In addition, in December 2014, a new law (the Protecting and Securing Chemical Facilities From Terrorist Attacks Act of 2014) was enacted which provides DHS continuing authority to implement CFATS. DHS must make several modifications and additions to conform the CFATS regulation with the new law.

Summary of Legal Basis: The Protecting and Securing Chemical Facilities from Terrorist Attacks Act of 2014 (Pub. L. 113–254) added Title XXI to the Homeland Security Act of 2002 (HSA) to authorize in permanent law a Chemical Facility Anti-terrorism Standards (CFATS) program. *See* 6 U.S.C. 621 *et seq.* Title XXI supersedes section 550 of the Department of Homeland Security Appropriations Act of 2007, Pub. L. 109–295, under which the CFATS program was originally established in April 2007. Section 2107(a) of the HSA specifically authorizes DHS to ''promulgate regulations or amend existing CFATS regulations to implement the provisions under [Title XXI]. 6 U.S.C. 627(a). In addition, section 2107(b)(2) of the HSA requires DHS to repeal any existing CFATS regulation that [DHS] determines is duplicative of, or conflicts with, [Title XXI]. 6 U.S.C. 627(b)(2).

Alternatives:

Anticipated Cost and Benefits: The ANPRM provided an opportunity for the public to provide recommendations for

possible program changes. DHS is reviewing the public comments received in response to the ANPRM, after which DHS intends to publish a Notice of Proposed Rulemaking (NPRM).

RIN: 1601–AA69

DHS—U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Proposed Rule Stage

54. New Classification for Victims of Criminal Activity; Eligibility for the U Nonimmigrant Status

Priority: Other Significant.

Legal Authority: 5 U.S.C. 552; 5 U.S.C. 552a; 8 U.S.C. 1101; 8 U.S.C. 1101 (note); 8 U.S.C. 1102; Pub. L. 113–4

CFR Citation: 8 CFR 103; 8 CFR 204; 8 CFR 212; 8 CFR 214; 8 CFR 299.

Legal Deadline: None.

Abstract: This rule proposes new application and eligibility requirements for U nonimmigrant status. The U classification is for non-U.S. citizen/lawful permanent resident victims of certain crimes who cooperate with an investigation or prosecution of those crimes. There is a limit of 10,000 principals per fiscal year. This rule would propose to establish new procedures to be followed to petition for the U nonimmigrant classifications. Specifically, the rule would address the essential elements that must be demonstrated to receive the nonimmigrant classification, procedures that must be followed to file a petition and evidentiary guidance to assist in the petitioning process. Eligible victims would be allowed to remain in the United States if granted U nonimmigrant status. The Trafficking Victims Protection Reauthorization Act of 2008, Public Law 110–457, and the Violence Against Women Reauthorization Act (VAWA) of 2013, Public Law 113–4, made amendments to the U nonimmigrant status provisions of the Immigration and Nationality Act. The Department of Homeland Security had issued an interim final rule in 2007.

Statement of Need: This regulation is necessary to allow alien victims of certain crimes to petition for U nonimmigrant status. U nonimmigrant status is available to eligible victims of certain qualifying criminal activity who: (1) Have suffered substantial physical or mental abuse as a result of the qualifying criminal activity; (2) the alien possesses information about the crime; (3) the alien has been, is being, or is likely to be helpful in the investigation or prosecution of the crime; and (4) the criminal activity took place in the United States, including military installations and Indian country, or the territories or possessions of the United States. This rule addresses the eligibility requirements that must be met for classification as a U nonimmigrant alien and implements statutory amendments to these requirements, streamlines the procedures to petition for U nonimmigrant status, and provides evidentiary guidance to assist in the petition process.

Summary of Legal Basis: Congress created the U nonimmigrant classification in the Battered Immigrant Women Protection Act of 2000 (BIWPA) to provide immigration relief for alien victims of certain qualifying criminal activity and who are helpful to law enforcement in the investigation or prosecution of these crimes.

Alternatives: To provide victims with immigration benefits and services and keeping in mind the purpose of the U visa as a law enforcement tool, DHS is considering and using suggestions from stakeholders in developing this regulation. These suggestions came in the form of public comment from the 2007 interim final rule as well as USCIS' six years of experience with the U nonimmigrant status program, including regular meetings and outreach events with stakeholders and law enforcement.

Anticipated Cost and Benefits: DHS estimated the total annual cost of the interim rule to petitioners to be $6.2 million in the interim final rule published in 2007. This cost included the biometric services fee, the opportunity cost of time needed to submit the required forms, the opportunity cost of time required and cost of traveling to visit a USCIS Application Support Center. DHS is currently in the process of updating our cost estimates since U nonimmigrant visa petitioners are no longer required to pay the biometric services fee. The anticipated benefits of these expenditures include assistance to victims of qualifying criminal activity and their families and increases in arrests and prosecutions of criminals nationwide. Additional benefits include heightened awareness by law enforcement of victimization of aliens in their community, and streamlining the petitioning process so that victims may benefit from this immigration relief.

Risks: There is a statutory cap of 10,000 principal U nonimmigrant visas that may be granted per fiscal year at 8 U.S.C. 1184(p)(2). Eligible petitioners who are not granted principal U–1 nonimmigrant status due solely to the numerical limit will be placed on a waiting list maintained by U.S. Citizenship and Immigration Services (USCIS). To protect U–1 petitioners and their families, USCIS will use various means to prevent the removal of U–1 petitioners and their eligible family members on the waiting list, including exercising its authority to allow deferred action, parole, and stays of removal, in cooperation with other DHS components.

DHS—USCIS

55. Requirements for Filing Motions and Administrative Appeals

Priority: Other Significant.

Legal Authority: 5 U.S.C. 552; 5 U.S.C. 552a; 8 U.S.C. 1101; 8 U.S.C. 1103; 8 U.S.C. 1304; 6 U.S.C. 112

CFR Citation: 8 CFR 103; 8 CFR 204; 8 CFR 205; 8 CFR 210; 8 CFR 214; 8 CFR 245a; 8 CFR 320; 8 CFR 105 (new); . . .

Legal Deadline: None.

Abstract: This proposed rule proposes to revise the requirements and procedures for the filing of motions and appeals before the Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS), and its Administrative Appeals Office (AAO). The proposed changes are intended to streamline the existing processes for filing motions and appeals and will reduce delays in the review and appellate process. This rule also proposes additional changes necessitated by the establishment of DHS and its components. The proposed changes are intended to promote simplicity, accessibility, and efficiency in the administration of USCIS appeals. The Department also solicits public comment on proposed changes to the AAO's appellate jurisdiction.

Statement of Need: This rule proposes to make numerous changes to streamline the current appeal and motion processes which: (1) Will result in cost savings to the Government, applicants, and petitioners; and (2) will provide for a more efficient use of USCIS officer and clerical staff time, as well as more uniformity with Board of Immigration Appeals appeal and motion processes.

Summary of Legal Basis: 5 U.S.C. 301; 5 U.S.C. 552; 5 U.S.C. 552a; 8 U.S.C. 1101 and notes 1102, 1103, 1151, 1153, 1154, 1182, 1184, 1185 note (sec. 7209 of Pub. L. 108–458; title VII of Pub. L. 110–229), 1186a, 1187, 1221, 1223, 1225 to 1227, 1255a, and 1255a note, 1281, 1282, 1301 to 1305, 1324a, 1356, 1372, 1379, 1409(c), 1443 to 1444, 1448, 1452, 1455, 1641, 1731 to 1732; 31 U.S.C. 9701; 48 U.S.C. 1901, 1931 note; section 643, Public Law 104–208, 110, Stat. 3009–708; section 141 of the Compacts of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands, and with the Government of Palau; title VII of Public Law 110–229; Public Law 107–296, 116 Stat. 2135 (6 U.S.C. 1 *et seq.*); Public Law 82–414, 66 Stat. 173, 238, 254, 264; title VII of Public Law 110–229; Executive Order 12356.

Alternatives: The alternative to this rule would be to continue under the current process without change.

Anticipated Cost and Benefits: As a result of streamlining the appeal and motion process, DHS anticipates quantitative and qualitative benefits to DHS and the public. We also anticipate cost savings to DHS and applicants as a result of the proposed changes.

DHS—USCIS

56. Improvement of the Employment Creation Immigrant Regulations

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 8 U.S.C. 1153(b)(5)

CFR Citation: 8 CFR 204.6.

Legal Deadline: None.

Abstract: DHS proposes to amend its regulations governing the employment-based, fifth preference (EB–5) immigrant entrepreneur category and EB–5 regional centers to modernize the EB–5 program based on current economic realities and to reflect statutory changes made to the program. DHS is proposing to update the regulations to include the following areas: Priority date retention, increases to the required investment amounts, revision of the Targeted Employment Area requirements, clarification of the regional center designation and continued program participation requirements, and further definition of grounds for terminating regional centers.

Statement of Need: The proposed regulatory changes are necessary to reflect statutory changes and codify existing policies, more accurately reflect existing and future economic realities, improve operational efficiencies to provide stakeholders with a higher level of predictability and transparency in the adjudication process, and enhance program integrity by clarifying key eligibility requirements for program participation and further detailing the processes required. Given the complexities involved in adjudicating benefit requests in the EB–5 program, along with continued program integrity concerns and increasing adjudication processing times, DHS has decided to revise the existing regulations to modernize key areas of the program.

Summary of Legal Basis: The Immigration Act (INA) authorizes the Secretary of Homeland Security (Secretary) to administer and enforce the immigration and nationality laws including establishing regulations deemed necessary to carry out his authority, and section 102 of the Homeland Security Act, 6 U.S.C. 112, authorizes the Secretary to issue regulations. 8 U.S.C. 1103(a), INA section 103(a). INA section 203(b)(5), 8 U.S.C. 1153(b)(5), also provides the Secretary with authority to make visas available to immigrants seeking to engage in a new commercial enterprise in which the immigrant has invested and which will benefit the United States economy and create full-time employment for not fewer than 10 U.S. workers. Further, section 610 of Public Law 102–395 (8 U.S.C. 1153 note) created the Immigrant Investor Pilot Program and authorized the Secretary to set aside visas for individuals who invest in regional centers created for the purpose of concentrating pooled investment in defined economic zones, and was last amended by Public Law 107–273.

Alternatives:

Anticipated Cost and Benefits: As a result of these amendments and resulting modernized program, DHS believes that regional centers, entrepreneurs, and the Federal each benefit. This rule would benefit regional centers by clarifying the requirements for designation and continued participation in the EB–5 program, making the application process more transparent for regional centers and streamlined to improve DHS operational efficiencies. The rule would benefit entrepreneurs seeking to participate in the program by providing the opportunity to mitigate the harsh consequences of unexpected changes to business conditions through priority date retention in limited circumstances. This rule would also provide a more transparent process for entrepreneurs

seeking to participate in the regional center program by providing increased consistency and predictability of adjudications through the clarified regional center continued program participation requirements. These changes will also streamline the adjudication process and improve DHS operational efficiencies, resulting in improved adjudication times. Finally, the Federal Government will benefit from clarifications and enhancements to the EB–5 program to strengthen program integrity, reducing the risk of fraud and national security concerns in the program, as well as improving operational efficiencies to reduce overall program costs.

Final Rule Stage

57. Classification for Victims of Severe Forms of Trafficking in Persons; Eligibility for T Nonimmigrant Status

Priority: Other Significant.

Legal Authority: 5 U.S.C. 552; 5 U.S.C. 552a; 8 U.S.C. 1101 to 1104; 8 U.S.C. 1182; 8 U.S.C. 1184; 8 U.S.C. 1187; 8 U.S.C. 1201; 8 U.S.C. 1224 to 1227; 8 U.S.C. 1252 to 1252a; 22 U.S.C. 7101; 22 U.S.C. 7105; Pub. L. 113–4

CFR Citation: 8 CFR 103; 8 CFR 212; 8 CFR 214; 8 CFR 274a; 8 CFR 299.

Legal Deadline: None.

Abstract: The T nonimmigrant classification was created by the Victims of Trafficking and Violence Protection Act of 2000, Public Law 106–386. The classification was designed for eligible victims of severe forms of trafficking in persons who aid law enforcement with their investigation or prosecution of the traffickers, and who can establish that they would suffer extreme hardship involving unusual and severe harm if they were removed from the United States. The rule streamlines application procedures and responsibilities for the Department of Homeland Security (DHS) and provides guidance to the public on how to meet certain requirements to obtain T nonimmigrant status. Several reauthorizations, including the Violence Against Women Reauthorization Act of 2013, Public Law 113–4, have made amendments to the T nonimmigrant status provisions in the Immigration and Nationality Act. This rule implements those amendments.

Statement of Need: This rule addresses the essential elements that must be demonstrated for classification as a T nonimmigrant alien and implements statutory amendments to these elements, streamlines the procedures to be followed by applicants to apply for T nonimmigrant status, and provides evidentiary guidance to assist in the application process.

Summary of Legal Basis: Section 107(e) of the Victims of Trafficking and Violence Protection Act of 2000 Public Law 106–386, as amended, established the T classification to provide immigration relief for certain eligible victims of severe forms of trafficking in persons who assist law enforcement authorities in investigating and prosecuting the perpetrators of these crimes.

Alternatives: To provide victims with immigration benefits and services, keeping in mind the purpose of the T visa to also serve as a law enforcement tool, DHS is considering and using suggestions from stakeholders in developing this regulation. These suggestions came in the form of public comment to the 2002 interim final rule, as well as from over 10 years of experience with the T nonimmigrant status program, including regular meetings with stakeholders and regular outreach events.

Anticipated Cost and Benefits: Applicants for T nonimmigrant status do not pay application or biometric fees. The anticipated benefits of this rule include: Assistance to trafficked victims and their families; an increase in the number of cases brought forward for investigation and/or prosecution of traffickers in persons; heightened awareness by the law enforcement community of trafficking in persons; and streamlining the application process for victims.

Risks: There is a 5,000-person limit to the number of individuals who can be granted T–1 status per fiscal year. Eligible applicants who are not granted T–1 status due solely to the numerical limit will be placed on a waiting list maintained by U.S. Citizenship and Immigration Services (USCIS). To protect T–1 applicants and their families, USCIS will use various means to prevent the removal of T–1 applicants on the waiting list, and their family members who are eligible for derivative T status, including its existing authority to grant deferred action, parole, and stays of removal, in cooperation with other DHS components.

58. Special Immigrant Juvenile Petitions

Priority: Other Significant.

Legal Authority: 8 U.S.C. 1101; 8 U.S.C. 1103; 8 U.S.C. 1151; 8 U.S.C. 1153; 8 U.S.C. 1154

CFR Citation: 8 CFR 204; 8 CFR 205; 8 CFR 245.

Legal Deadline: None.

Abstract: The Department of Homeland Security (DHS) is amending its regulations governing the Special Immigrant Juvenile (SIJ) classification and related applications for adjustment of status to permanent resident. Special Immigrant Juvenile classification is a humanitarian-based immigration protection for children who cannot be reunified with one or both parents because of abuse, neglect, abandonment,

or a similar basis found under State law. This final rule implements updates to eligibility requirements and other changes made by the Trafficking Victims Protection Reauthorization Act of 2008, Pub. L. 110–457. DHS received comments on the proposed rule in 2011 and intends to issue a final rule in the coming year.

Statement of Need: This rule would address the eligibility requirements that must be met for SIJ classification and related adjustment of status, implement statutory amendments to these requirements, and provide procedural and evidentiary guidance to assist in the petition process.

Summary of Legal Basis: Congress established the SIJ classification in the Immigration Act of 1990 (IMMACT). The 1998 Appropriations Act amended the SIJ classification by limiting eligibility to children declared dependent on a juvenile court because of abuse, abandonment, or neglect and creating consent functions. The Trafficking Victims Protection Reauthorization Act of 2008 made many changes to the SIJ classification including: (1) Creating a requirement that the petitioner's reunification with one or both parents not be viable due to abuse, abandonment, neglect, or a similar basis under State law; (2) expanding the population of children who may be eligible to include those placed by a juvenile court with an individual or entity; (3) modifying the consent functions; (4) providing age-out protection; and (5) creating a timeframe for adjudications.

Alternatives: DHS is considering and using suggestions from stakeholders to keep in mind the vulnerable nature of abused, abandoned and neglected children in developing this regulation. These suggestions came in the form of public comment from the 2011 proposed rule.

Anticipated Cost and Benefits: In the 2011 proposed rule, DHS estimated there would be no additional regulatory compliance costs for petitioning individuals or any program costs for the Government as a result of the proposed amendments. Qualitatively, DHS estimated that the proposed rule would codify the practices and procedures currently implemented via internal policy directives issued by USCIS, thereby establishing clear guidance for petitioners. DHS is currently in the process of updating our final cost and benefit estimates.

Risks: The failure to promulgate a final rule in this area presents significant risk of further inconsistency and confusion in the law. The Government's interests in fair, efficient, and consistent adjudications would be compromised.

DHS—USCIS

59. International Entrepreneur

Priority: Other Significant.

Legal Authority: 8 U.S.C. 1182(d)(5)(A)

CFR Citation: 8 CFR 212.5.

Legal Deadline: None.

Abstract: The Department of Homeland Security (DHS) proposed to amend its regulations implementing the Secretary of Homeland Security's discretionary parole authority to increase and enhance entrepreneurship, innovation, and job creation in the United States. The rule would add new regulatory provisions guiding the use of parole on a case-by-case basis with respect to entrepreneurs of start-up entities whose entry into the United States would provide a significant public benefit through the substantial and demonstrated potential for rapid business growth and job creation. Such potential would be indicated by, among other things, the receipt of significant capital investment from U.S. investors with established records of successful investments, or obtaining significant awards or grants from certain Federal, State or local government entities.

Statement of Need: The Immigration and Nationality Act (INA) authorizes the Secretary, in the exercise of discretion, to parole arriving aliens into the United States on a case-by-case basis for urgent humanitarian reasons or significant public benefit. INA section 212(d)(5), 8 U.S.C. 1182(d)(5). This regulation explains and clarifies how DHS determines what provides, per the INA, a significant public benefit to the U.S. economy with respect to entrepreneur parolees.

This regulation focuses specifically on the significant economic public benefit provided by foreign entrepreneurs because of the particular benefit they bring to the U.S. economy. However, the full potential of foreign entrepreneurs to benefit the U.S. economy is limited by the fact that many foreign entrepreneurs do not qualify under existing nonimmigrant and immigrant classifications. Given the technical nature of entrepreneurship, and the limited guidance to date on what constitutes a significant public benefit, DHS believes that it is necessary to establish the conditions of such an economically-based significant public benefit parole by regulation. Combined with a unique application process, the goal is to ensure that the high standard set by the statute authorizing significant public benefit parole is uniformly met across adjudications.

In this rule, DHS is proposing to establish the conditions for significant public benefit parole with respect to certain entrepreneurs and start-up founders backed by U.S. investors or grants. DHS believes that this proposal, once implemented, would encourage entrepreneurs to create and develop start-up entities in the United States with high growth potential to create jobs for U.S. workers and benefit the U.S. economy. U.S. competitiveness would increase by attracting more entrepreneurs to the United States. This proposal provides a fair, transparent, and predictable framework by which DHS will exercise its discretion to adjudicate, on a case-by-case basis, such parole requests under the existing statutory authority at INA section 212(d)(5), 8 U.S.C. 1182(d)(5).

Lastly, this proposed rule provides a pathway, based on authority currently provided to the Secretary, for entrepreneurs to develop businesses in the United States, create jobs for U.S. workers, and, at the same time, establish a track record of experience and/or accomplishments. Such a track record may lead to meeting eligibility requirements for existing nonimmigrant or immigrant classifications.

Summary of Legal Basis: The Secretary's authority for this proposed regulatory amendment can be found in the Homeland Security Act of 2002, Public Law 107–296, section 102, 116 Stat. 2135, 6 U.S.C. 112, and INA

section 103, 8 U.S.C. 1103, which give the Secretary the authority to administer and enforce the immigration and nationality laws, as well as INA section 212(d)(5), 8 U.S.C. 1182(d)(5), which refers to the Secretary's discretionary authority to grant parole and provides DHS with regulatory authority to establish terms and conditions for parole once authorized.

Alternatives:

Anticipated Cost and Benefits: DHS estimates the costs of the rule are directly linked to the application fee and opportunity costs associated with requesting significant public benefit parole. DHS does not estimate there will be any negative impacts to the U.S. economy as a result of this rule. Economic benefits can be expected from this rule, because some number of new ventures and research endeavors will be conducted in the United States that otherwise would not. It is reasonable to assume that investment and research spending on new firms associated with this proposed rule will directly and indirectly benefit the U.S. economy and job creation. In addition, innovation and research and development spending are likely to generate new patents and new technologies, further enhancing innovation. Some portion of the immigrant entrepreneurs likely to be attracted to this parole program may develop high impact firms that can be expected to contribute disproportionately to job creation.

DHS—USCIS

60. Retention of EB–1, EB–2, and EB–3 Immigrant Workers and Program Improvements Affecting Highly-Skilled H–1B Nonimmigrant Workers

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 6 U.S.C. 112; 8 U.S.C. 1154 and 1155; 8 U.S.C. 1184; 8 U.S.C. 1255; 8 U.S.C. 1324a

CFR Citation: 8 CFR 204 to 205; 8 U.S.C. 214; 8 CFR 245; 8 CFR 274a.

Legal Deadline: None.

Abstract: In December 2015, the Department of Homeland Security (DHS) proposed to amend its regulations affecting certain employment-based immigrant and nonimmigrant classifications. This rule proposes to amend current regulations to provide stability and job flexibility for the beneficiaries of approved employment-based immigrant visa petitions while they wait to become lawful permanent residents. DHS is also proposing to conform its regulations with the American Competitiveness in the Twenty-First Century Act of 2000 (AC21) as amended by the Twenty-First Century Department of Justice Appropriations Authorization Act (the 21st Century DOJ Appropriations Act), as well as the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA). The rule also seeks to clarify several interpretive questions raised by ACWIA and AC21 regarding H–1B petitions, and incorporate relevant AC21 policy memoranda and an Administrative Appeals Office precedent decision, and would ensure that DHS practice is consistent with them.

Statement of Need: This rule provides needed stability and flexibility to certain employment-based immigrants while they wait to become lawful permanent residents. These amendments would support U.S. employers by better enabling them to hire and retain highly skilled and other foreign workers. DHS proposes to accomplish this, in part, by implementing certain provisions of ACWIA and AC21, as amended by the 21st Century DOJ Appropriations Act. The 21st Century DOJ Appropriations Authorization Act, which will impact certain foreign nationals seeking permanent residency in the United States, as well as H–1B workers. Further, by clarifying interpretive questions related to these provisions, this rulemaking would ensure that DHS practice is consistent with statute.

Summary of Legal Basis: The authority of the Secretary of Homeland Security (Secretary) for these regulatory amendments can be found in section 102 of the Homeland Security Act of 2002, Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 112, and section 103(a) of the Immigration and Nationality Act (INA), 8 U.S.C. 1103(a), which authorize the Secretary to administer and enforce the immigration and nationality laws. In pertinent part, ACWIA authorized the Secretary to impose a fee on certain H–1B petitioners which would be used to train American workers, and AC21 provides authority to increase access to foreign workers as well as to train U.S. workers. In addition, section 274A(h)(3)(B) of the INA, 8 U.S.C. 1324a(h)(3)(B), recognizes the Secretary's authority to extend employment to noncitizens in the United States, and section 205 of the INA, 8 U.S.C. 1155, recognizes the Secretary's authority to exercise discretion in determining the revocability of any petition approved by him under section 204 of the INA.

Alternatives: The alternative would be to continue under current procedures without change.

Anticipated Cost and Benefits: The proposed amendments would increase the incentive of highly-skilled and other foreign workers who have begun the immigration process to remain in and contribute to the U.S. economy as they complete the process to adjust status to or otherwise acquire lawful permanent resident status, thereby minimizing disruptions to petitioning U.S. employers. Attracting and retaining highly-skilled persons is important when considering the contributions of these individuals to the U.S. economy, including advances in entrepreneurial and research and development endeavors, which are highly correlated with overall economic growth and job creation.

DHS—U.S. COAST GUARD (USCG)

Proposed Rule Stage

61. Commercial Fishing Vessels—Implementation of 2010 and 2012 Legislation

Priority: Other Significant.

Legal Authority: Pub. L. 111–281

CFR Citation: 46 CFR 28; 46 CFR 42.

Legal Deadline: Other, Statutory, CGAA 2010 Requirements in effect since 10/15/2010.

Abstract: The Coast Guard proposes to implement those requirements of 2010 and 2012 legislation that pertain to uninspected commercial fishing industry vessels and that took effect upon enactment of the legislation but that, to be implemented, require amendments to Coast Guard regulations affecting those vessels. The applicability of the regulations is being changed, and new requirements are being added to safety training, equipment, vessel examinations, vessel safety standards, the documentation of maintenance, and the termination of unsafe operations. This rulemaking promotes the Coast Guard's maritime safety mission.

Statement of Need: The Coast Guard proposes to align its commercial fishing industry vessel regulations with the mandatory provisions of 2010 and 2012 legislation passed by Congress that took effect upon enactment. The alignments would change the applicability of current regulations, and add new requirements for safety equipment, vessel examinations, vessel safety standards, the documentation of maintenance, and the termination of unsafe operations. This rule only proposes to implement these legislative mandates, would exercise no Coast Guard regulatory discretion, and would promote the Coast Guard's maritime safety mission.

Summary of Legal Basis:

Alternatives:

Anticipated Cost and Benefits: We estimate that, as a result of this rulemaking, owners and operators of certain commercial fishing vessels would incur additional annualized costs, discounted at 7 percent, of $34.2 million. We estimate the annualized cost, discounted at 7 percent, to government of $5.4 million, for a total annualized cost of $39.7 million. For commercial fishing vessels that operate beyond 3 nautical miles, the cost of this rulemaking would involve provisions for carriage of survival craft, recordkeeping of lifesaving and fire equipment maintenance, and dockside safety examinations once every 5 years. Also, certain newly built commercial fishing vessels would have to undergo survey and classification. We believe that the rule based on Congressional mandates will address a wide range of causes of commercial fishing vessel accidents and supports the main goal of improving safety and survivability in the commercial fishing industry. The primary benefit of the proposed rule is an increase in safety and a resulting decrease in the risk of accidents and their consequences, primarily fatalities. We estimate an annualized benefit of $7.1 to $9.4 million from this rule, discounted at 7 percent.

DHS—USCG

Final Rule Stage

62. Seafarers' Access to Maritime Facilities

Priority: Other Significant.

Legal Authority: 33 U.S.C. 1226; 33 U.S.C. 1231; Pub. L. 111–281, sec. 811

CFR Citation: 33 CFR 101.112(b); 33 CFR 105.200; 33 CFR 105.237; 33 CFR 105.405.

Legal Deadline: None.

Abstract: This regulatory action will implement section 811 of the Coast Guard Authorization Act of 2010 (Pub. L. 111–281), which requires the owner/operator of a facility regulated by the Coast Guard under the Maritime Transportation Security Act of 2002 (Pub. L. 107–295) (MTSA) to provide a system that enables seafarers and certain other individuals to transit between vessels moored at the facility and the facility gate in a timely manner at no cost to the seafarer or other individual. Ensuring that such access through a facility is consistent with the security requirements in MTSA is part of the Coast Guard's Ports, Waterways, and Coastal Security (PWCS) mission.

Statement of Need: The Coast Guard's final rule would require each owner or operator of a facility regulated by the Coast Guard to implement a system that provides seafarers and other individuals with access between vessels moored at the facility and the facility gate, in a timely manner and at no cost to the seafarer or other individual. Generally, transiting through a facility is the only way that a seafarer or other individual can egress to shore beyond the facility to access basic shoreside businesses and services, and meet with family members and other personnel that do not hold a Transportation Worker Identification Credential. This proposed rule would help to ensure that no facility owner or operator denies or makes it impractical for seafarers or other individuals to transit through the facility, and would require them to document their access procedures in their Facility Security Plans. This final rule would implement section 811 of the Coast Guard Authorization Act of 2010.

Summary of Legal Basis:

Alternatives:

Anticipated Cost and Benefits: We estimate that, as a result of this rulemaking, owners or operators of a facility regulated by the Coast Guard would incur additional annualized costs, discounted at 7 percent, of $2.82 million. We estimate the annualized cost, discounted at 7 percent, to government of $8,000 for a total annualized cost of $2.83 million.

Owners and operators of a facility regulated by the Coast Guard will incur costs to implement a system that provides seafarers and other individuals with access between the shore and vessels moored at the facility. We believe that the rule based on Congressional mandates will provide access through facilities for an average of 907 seafarers and other covered individuals that were otherwise denied access annually, thus ensuring the safety, health and welfare of seafarers. The rule will also reduce regulatory uncertainty by harmonizing regulations with Sec. 811 of Pub. L. 111281 and conforms to the intent of the ISPS Code.

RIN: 1625–AC15

DHS—U.S. CUSTOMS AND BORDER PROTECTION (USCBP)

Proposed Rule Stage

63. Air Cargo Advance Screening (ACAS)

Priority: Other Significant.

Legal Authority: 19 U.S.C. 2071 note

CFR Citation: 19 CFR 122.

Legal Deadline: None.

Abstract: U.S. Customs and Border Protection (CBP) is proposing to amend the implementing regulations of the Trade Act of 2002 regarding the submission of advance electronic information for air cargo and other provisions to provide for the Air Cargo Advance Screening (ACAS) program. ACAS would require the submission of certain advance electronic information for air cargo. This will allow CBP to better target and identify dangerous cargo and ensure that any risk associated with such cargo is mitigated before the aircraft departs for the United States. CBP, in conjunction with Transportation Security Administration, has been operating ACAS as a voluntary pilot program since 2010 and would like to implement ACAS as a regulatory program.

Statement of Need: DHS has identified an elevated risk associated with cargo being transported to the United States by air. This rule will help address this risk by giving DHS the data it needs to improve targeting of the cargo prior to takeoff.

Summary of Legal Basis: The Trade Act of 2002 authorizes CBP to promulgate regulations providing for the mandatory transmission of electronic cargo information by way of a CBP-approved electronic data interchange (EDI) system before the cargo is brought into or departs the United States by any mode of commercial transportation. Under the Trade Act, the required cargo information is that which is reasonably necessary to ensure cargo safety and security pursuant to the laws enforced and administered by CBP.

Alternatives: In addition to the proposed rule, CBP analyzed two alternatives—Requiring the data elements to be transmitted to CBP further in advance than the proposed rule requires; and requiring fewer data elements. CBP concluded that the proposal rule provides the most favorable balance between security outcomes and impacts to air transportation.

Anticipated Cost and Benefits: To improve CBP's risk assessment and targeting capabilities and to enable CBP to target and identify risk cargo prior to departure of the aircraft to the United States, ACAS would require the submission of certain of the advance electronic information for air cargo earlier in the process. In most cases, the information would have to be submitted as early as practicable, but no later than prior to the loading of cargo onto an aircraft at the last foreign port of departure to the United States. CBP, in conjunction with TSA, has been operating ACAS as a voluntary pilot program since 2010. CBP believes this pilot program has proven successful by not only mitigating risks to the United States, but also minimizing costs to the private sector. As such, CBP is proposing to transition the ACAS pilot program into a permanent program. Costs of this program to carriers include one-time costs to upgrade systems to facilitate transmission of these data to CBP and recurring per transmission costs. Benefits of the program include improved security that will result from having these data further in advance.

RIN: 1651–AB04

DHS—USCBP

Final Rule Stage

64. Definition of Form I–94 To Include Electronic Format

Priority: Other Significant.

Legal Authority: 8 U.S.C. 1101; 8 U.S.C. 1103; 8 U.S.C. 1201; 8 U.S.C. 1301; 8 U.S.C. 1303 to 1305; 5 U.S.C. 301; Pub. L. 107–296, 116 stat 2135; 6 U.S.C. 1 *et seq.*

CFR Citation: 8 CFR 1.4; 8 CFR 264.1(b).

Legal Deadline: None.

Abstract: The Form I–94 is issued to certain aliens upon arrival in the United States or when changing status in the United States. The Form I–94 is used to document arrival and departure and provides evidence of the terms of admission or parole. Customs and Border Protection (CBP) is transitioning to an automated process whereby it will create a Form I–94 in an electronic format based on passenger, passport, and visa information currently obtained electronically from air and sea carriers and the Department of State as well as through the inspection process. Prior to this rule, the Form I–94 was solely a paper form that was completed by the alien upon arrival. After the implementation of the Advance

Passenger Information System (APIS) following 9/11, CBP began collecting information on aliens traveling by air or sea to the United States electronically from carriers in advance of arrival. For aliens arriving in the United States by air or sea, CBP obtains almost all of the information contained on the paper Form I–94 electronically and in advance via APIS. The few fields on the Form I–94 that are not collected via APIS are either already collected by the Department of State and transmitted to CBP or can be collected by the CBP officer from the individual at the time of inspection. This means that CBP no longer needs to collect Form I–94 information as a matter of course directly from aliens traveling to the United States by air or sea. At this time, the automated process will apply only to aliens arriving at air and sea ports of entry.

Statement of Need: This rule makes the necessary changes to the regulations to enable CBP to transition to an automated process whereby CBP will create an electronic Form I–94 based on the information in its databases.

Summary of Legal Basis: Section 103(a) of the Immigration and Nationality Act (INA) generally authorizes the Secretary of Homeland Security to establish such regulations and prescribe such forms of reports, entries, and other papers necessary to carry out his or her authority to administer and enforce the immigration and nationality laws and to guard the borders of the United States against illegal entry of aliens.

Alternatives: CBP considered two alternatives to this rule: Eliminating the paper Form I–94 in the air and sea environments entirely and providing the paper Form I–94 to all travelers who are not B–1/B–2 travelers. Eliminating the paper Form I–94 option for refugees, applicants for asylum, parolees, and those travelers who request one would not result in a significant cost savings to CBP and would harm travelers who have an immediate need for an electronic Form I–94 or who face obstacles to accessing their electronic Form I–94. A second alternative to the rule is to provide a paper Form I–94 to any travelers who are not B–1/B–2 travelers. Under this alternative, travelers would receive and complete the paper Form I–94 during their inspection when they arrive in the United States. The electronic Form I–94 would still be automatically created during the inspection, but the CBP officer would need to verify that the information appearing on the form matches the information in CBP's systems. In addition, CBP would need to write the Form I–94 number on each paper Form I–94 so that their paper form matches the electronic record. As noted in the analysis, 25.1 percent of aliens are non-B–1/B–2 travelers. Filling out and processing this many paper Forms I–94 at airports and seaports would increase processing times considerably. At the same time, it would only provide a small savings to the individual traveler.

Anticipated Cost and Benefits: With the implementation of this rule, CBP will no longer collect Form I–94 information as a matter of course directly from aliens traveling to the United States by air or sea. Instead, CBP will create an electronic Form I–94 for foreign travelers based on the information in its databases. This rule makes the necessary changes to the regulations to enable CBP to transition to an automated process. Both CBP and aliens would bear costs as a result of this rule. CBP would bear costs to link its data systems and to build a Web site so aliens can access their electronic Forms I–94. CBP estimates that the total cost for CBP to link data systems, develop a secure Web site, and fully automate the Form I–94 fully will equal about $1.3 million in calendar year 2012. CBP will incur costs of $0.09 million in subsequent years to operate and maintain these systems. Aliens arriving as diplomats and students would bear costs when logging into the Web site and printing electronic I–94s. The temporary workers and aliens in the ''Other/Unknown'' category bear costs when logging into the Web site, traveling to a location with public Internet access, and printing a paper copy of their electronic Form I–94. Using the primary estimate for a traveler's value of time, aliens would bear costs between $36.6 million and $46.4 million from 2013 to 2016. Total costs for this rule for 2013 would range from $34.2 million to $40.1 million, with a primary estimate of costs equal to $36.7 million. CBP, carriers, and foreign travelers would accrue benefits as a result of this rule. CBP would save contract and printing costs of $15.6 million per year of our analysis. Carriers would save a total of $1.3 million in printing costs per year. All aliens would save the eight-minute time burden for filling out the paper Form I–94 and certain aliens who lose the Form I–94 would save the $330 fee and 25-minute time burden for filling out the Form I–102. Using the primary estimate for a traveler's value of time, aliens would obtain benefits between $112.6 million and $141.6 million from 2013 to 2016. Total benefits for this rule for 2013 would range from $110.7 million to $155.6 million, with a primary estimate of benefits equal to $129.5 million. Overall, this rule results in substantial cost savings (benefits) for foreign travelers, carriers, and CBP. CBP anticipates a net benefit in 2013 of between $59.7 million and $98.7 million for foreign travelers, $1.3 million for carriers, and $15.5 million for CBP. Net benefits to U.S. entities (carriers and CBP) in 2013 total $16.8 million. CBP anticipates the total net benefits to both domestic and foreign entities in 2013 range from $76.5 million to $115.5 million. In our primary analysis, the total net benefits are $92.8 million in 2013. For the primary estimate, annualized net benefits range from $78.1 million to $80.0 million, depending on the discount rate used. More information on costs and benefits can be found in the interim final rule.

DHS—TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Prerule Stage

65. Surface Transportation Vulnerability Assessments and Security Plans

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 49 U.S.C. 114; Pub. L. 110–53, secs. 1405, 1512, and 1531

CFR Citation: 49 CFR 1520; 49 CFR 1570; 49 CFR 1580; 49 CFR 1582 (new); 49 CFR 1584 (new); . . .

Legal Deadline: Final, Statutory, August 3, 2008, Rule for freight railroads and passenger railroads is due no later than 12 months after date of enactment.

Final, Statutory, February 3, 2009, Rule for over-the-road buses is due no later than 18 months after the date of enactment of the 9/11 Act.

According to sec. 1512 of Pub. L. 110–53, Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), (121 Stat. 266, Aug. 3, 2007), a final regulation for freight railroads and passenger railroads is due no later than 12 months after the date of enactment. According to sec. 1531 of the 9/11 Act, a final regulation for over-the-road buses is due no later than 18 months after the date of enactment.

Abstract: The Transportation Security Administration (TSA) will propose a new regulation to address the security of higher-risk freight railroads, public transportation agencies, passenger railroads, and over-the-road buses in accordance with requirements of the Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act). The regulation will take into consideration any current security assessment and planning requirements or best practices.

Statement of Need: Vulnerability assessments and security planning are important and effective tools for averting or mitigating potential attacks by those with malicious intent that may target surface transportation and plan or perpetrate actions that may cause significant injuries, loss of life, or economic disruption.

Summary of Legal Basis: 49 U.S.C. 114; sections 1405, 1512, and 1531 of Pub. L. 110–53, Implementing Recommendations of the 9/11 Commission Act of 2007 (121 Stat. 266, Aug. 3, 2007).

Alternatives:

Anticipated Cost and Benefits: TSA is in the process of determining the costs and benefits of this rulemaking.

Risks: The Department of Homeland Security aims to prevent terrorist attacks within the United States and to reduce the vulnerability of the United States to terrorism. By providing for vulnerability assessments and security planning of higher-risk surface transportation operations, TSA intends in this rulemaking to reduce the risk of a terrorist attack on this transportation sector.

DHS—TSA

Proposed Rule Stage

66. Security Training for Surface Transportation Employees

Priority: Other Significant.

Legal Authority: 49 U.S.C. 114; Pub. L. 110–53, secs. 1402, 1408, 1501, 1517, 1531, and 1534

CFR Citation: 49 CFR 1500; 49 CFR 1520; 49 CFR 1570; 49 CFR 1580; 49 CFR 1582 (new); 49 CFR 1584 (new).

Legal Deadline: Final, Statutory, November 1, 2007, Interim Rule for public transportation agencies is due 90 days after date of enactment.

Final, Statutory, August 3, 2008, Rule for public transportation agencies is due one year after date of enactment.

Final, Statutory, February 3, 2008, Rule for railroads and over-the-road buses is due six months after date of enactment.

According to sec. 1408 of Pub. L. 110–53, Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), (121 Stat. 266, Aug. 3, 2007), interim final regulations for public transportation agencies are due 90 days after the date of enactment (Nov. 1, 2007), and final regulations are due 1 year after the date of enactment. According to sec. 1517 of the 9/11 Act, final regulations for railroads and over-the-road buses are due no later than 6 months after the date of enactment.

Abstract: This rule would require security awareness training for front-line employees for potential terrorism-related security threats and conditions pursuant to the 9/11 Act. This rule would apply to higher-risk public transportation, freight rail, and over-the-road bus owner/operators and take into consideration the many actions higher-risk owner/operators have already taken since 9/11 to enhance the baseline of security through training of their employees. The rulemaking will also propose extending security coordinator and reporting security incident requirements applicable to rail operators under current 49 CFR part 1580 to the non-rail transportation components of covered public transportation agencies and over-the-road buses.

Statement of Need: Employee training is an important and effective tool for averting or mitigating potential attacks by those with malicious intent who may target surface transportation and plan or perpetrate actions that may cause significant injuries, loss of life, or economic disruption.

Summary of Legal Basis: 49 U.S.C. 114; sections 1402, 1408, 1501, 1517, 1531, and 1534 of Pub. L. 110–53, Implementing Recommendations of the 9/11 Commission Act of 2007 (Aug. 3, 2007; 121 Stat. 266).

Alternatives: TSA is required by statute to publish regulations requiring security training programs for these owner/operators. As part of its notice of proposed rulemaking, TSA will seek public comment on the alternative ways in which the final rule could carry out the requirements of the statute.

Anticipated Cost and Benefits: Owner/operators would incur costs training their employees, developing a

training plan, maintaining training records, and participating in inspections for compliance. Some owner/operators would also incur additional costs associated with assigning security coordinators and reporting significant security incidents to TSA. TSA would incur costs associated with reviewing owner/operators' training plans, registering owner/operators' security coordinators, responding to owner/operators' reported significant security incidents, and conducting inspection for compliance with this rule. As part of TSA's risk-based security, benefits include mitigating potential attacks by heightening awareness of employees on the frontline. In addition, by designating security coordinators and reporting significant security concerns to TSA, TSA has a direct line for communicating threats and receiving information necessary to analyze trends and potential threats across all modes of transportation.

Risks: The Department of Homeland Security aims to prevent terrorist attacks within the United States and to reduce the vulnerability of the United States to terrorism. By providing for security training for personnel, TSA intends in this rulemaking to reduce the risk of a terrorist attack on this transportation sector.

67. • Vetting of Certain Surface Transportation Employees

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Unfunded Mandates: Undetermined.

Legal Authority: Pub. L. 110–53, secs 1411, 1414, 1512, 1520, 1522, and 1531

CFR Citation: Not Yet Determined.

Legal Deadline: Other, Statutory, August 3, 2008, Background and immigration status check for all public transportation frontline employees is due no later than 12 months after date of enactment.

Other, Statutory, August 3, 2008, Background and immigration status check for all railroad frontline employees is due no later than 12 months after date of enactment.

Sections 1411 and 1520 of Pub. L. 110–53, Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), (121 Stat. 266, Aug. 3, 2007), require background checks of frontline public transportation and railroad employees not later than 1 year from the date of enactment. Requirement will be met through regulatory action.

Abstract: The Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act) requires vetting of certain railroad, public transportation, and over-the-road bus employees. Through this rulemaking, the Transportation Security Administration (TSA) intends to propose the mechanisms and procedures to conduct this required vetting. TSA previously intended to include vetting requirements for these populations in a related rulemaking called Standardized Vetting, Adjudication, and Redress Services (SVAR). However, TSA now plans to proceed with a separate rulemaking in order to provide vetting more expediently for these populations. This regulation is related to 1652–AA55, Security Training for Surface Transportation Employees.

Statement of Need: Employee vetting is an important and effective tool for averting or mitigating potential attacks by those with malicious intent who may target surface transportation and plan or perpetrate actions that may cause significant injuries, loss of life, or economic disruption.

Summary of Legal Basis:

RIN: 1652–AA69

DHS—U.S. IMMIGRATION AND CUSTOMS ENFORCEMENT (USICE)

Proposed Rule Stage

68. Eligibility Checks of Nominated and Current Designated School Officials of Schools That Enroll F and M Nonimmigrant Students and of Exchange Visitor Program-Designated Sponsors of J Nonimmigrants

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 8 U.S.C. 1101; 8 U.S.C. 1102; 8 U.S.C. 1003

CFR Citation: 8 CFR 214.3.

Legal Deadline: None.

Abstract: The rule would improve the capability of the Student and Exchange Visitor Program (SEVP) to oversee access to the Student and Exchange Visitor Information System (SEVIS) for designated school officials (DSOs) at schools certified to enroll F and M nonimmigrant students and for responsible officers (ROs) and alternate responsible officers (AROs) that oversee designated sponsors' J nonimmigrant participants in exchange programs. Establishment of an eligibility check process for certain officials would improve oversight prior to permitting access to SEVIS and prior to appointment or continued eligibility as such an official. This rule would better position DHS to identify, intervene and prevent possible criminal activities or threats to national security that could result from non-compliance.

Statement of Need: The rule would strengthen the mechanism for approving user access to SEVIS. DHS, as well as the Department of State (DOS), rely on principal designated school officials, designated school officials, responsible officers, and alternate responsible officers (collectively, P/DSOs P/DSOs and ROs/AROs) as key links in the process to mitigate potential threats to national security and ensure compliance with immigration law from aliens admitted into the United States in F, J, or M nonimmigrant status. Through this rule, DHS would require that anyone nominated to serve as a P/DSO or RO/ARO receive a favorable SEVIS Access Approval Process (SAAP) assessment prior to their appointment and subsequent approval for access to SEVIS.

Summary of Legal Basis:

- Sections 101(a)(15)(F), (J) and (M), of the Immigration and Nationality Act of 1952, as amended (INA) 8 U.S.C. 1101(a)(15)(F), (J) and (M), which establish the F–1, J–1, and M–1 classifications (and associated derivative classifications).
- Section 641 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1372, which authorized the following:
- Creation of a program to collect current and ongoing information provided by schools and EVP sponsors regarding F, J, or M nonimmigrants during their stays in the United States;
- Use of electronic reporting technology where practicable; and
- DHS certification of schools to participate in F–1 or M–1 student enrollment.
- Homeland Security Presidential Directive No. 2 (HSPD–2), Combating Terrorism Through Immigration Policies, which, following the USA PATRIOT Act, requires DHS to conduct periodic reviews of all institutions certified to receive nonimmigrant students and exchange visitor program students that include checks for compliance with recordkeeping and reporting requirements, and authorizes termination of certification for institutions that fail to comply. See 37 Weekly Comp. Pres. Docs. 1570, 1571–72 (October 29, 2001).
- Section 502 of the Enhanced Border Security and Visa Entry Reform Act of 2002, 8 U.S.C. 1762, which directs DHS to review compliance with recordkeeping and reporting requirements under 8 U.S.C. 1372 and INA section 101(a)(15)(F), (J) and (M), 8 U.S.C. 1101(a)(15)(F), (J) and (M), of all schools approved to receive F, J or M nonimmigrants within two years of enactment and every two years thereafter.

Alternatives:

Anticipated Cost and Benefits: DHS is in the process of determining the costs and benefits which would be incurred by regulated individuals with access to SEVIS, as well as the costs and benefits to DHS and DOS, to comply with the requirements of this rule. The rule would impose new vetting requirements for individuals prior to permitting access to SEVIS or continued eligibility for such access, which include an application process for the individuals and an approval process for DHS and DOS. The primary benefit of this rule would be to reduce the potential for fraud.

Risks:

RIN: 1653–AA71

DHS—FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Final Rule Stage

69. Updates to Floodplain Management and Protection of Wetlands Regulations To Implement Executive Order 13690 and the Federal Flood Risk Management Standard

Priority: Other Significant.

Legal Authority: E.O. 11988, as amended; E.O. 13690

CFR Citation: 44 CFR 9.

Legal Deadline: None.

Abstract: The Federal Emergency Management Agency (FEMA) proposes to amend its regulations at 44 CFR part 9 ''Floodplain Management and Protection of Wetlands'' to implement Executive Order 13690, which establishes the Federal Flood Risk Management Standard (FFRMS). 44 CFR part 9 describes FEMA's process for determining whether the proposed location for an action falls within a floodplain. In addition, for those projects that would fall within a floodplain, part 9 describes FEMA's framework for deciding whether and how to complete the action in the floodplain, in light of the risk of flooding. Consistent with Executive Order 13690 and the FFRMS, the proposed rule would change how FEMA defines a ''floodplain'' with respect to certain actions. Additionally, under the proposed rule, FEMA would use natural systems, ecosystem process, and nature-based approaches, where practicable, when developing alternatives to locating a proposed action in the floodplain.

Statement of Need: It is the policy of the United States to improve the resilience of communities and Federal assets against the impacts of flooding. These impacts are anticipated to increase over time due to the effects of climate change and other threats. Losses caused by flooding affect the environment, our economic prosperity, and public health and safety, each of which affects our national security.

The Federal Government must take action, informed by the best-available and actionable science, to improve the Nation's preparedness and resilience against flooding. Executive Order 11988 of May 24, 1977, Floodplain Management; requires executive departments and agencies (agencies) to avoid, to the extent possible, the long- and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative. FEMA has implemented Executive Order 11988 through its regulations in 44 CFR part 9.

On January 30, 2015, the President issued Executive Order 13690, Establishing a Federal Flood Risk Management Standard (FFRMS) and a Process for Further Soliciting and Considering Stakeholder Input. Executive Order 13690 amended Executive Order 11988 and established the FFRMS. The FFRMS is a flexible framework to increase resilience against flooding and help preserve the natural values of floodplains. Under the FFRMS, an agency may establish the floodplain for Federally Funded Projects using any of the following approaches: (1) Climate-Informed Science Approach (CISA): Utilizing the best-available, actionable hydrologic and hydraulic data and methods that integrate current and future changes in flooding based on climate science; (2) Freeboard Value Approach (FVA): Freeboard (base flood elevation + X, where X is 3 feet for critical actions and 2 feet for other actions); (3) 0.2 percent annual chance Flood Approach (0.2 PFA): 0.2 percent annual chance flood (also known as the 500-year flood); or (4) the elevation and flood hazard area that result from using any other method identified in an update to the FFRMS.

When Executive Order 13690 was issued, FEMA evaluated the application of Executive Order 13690 and the FFRMS with respect to its existing authorities and programs. The FFRMS establishes a flexible standard to improve resilience against the impact of flooding to design for the intended life of the Federal investment. FEMA supports this principle. With more than $260 billion in flood damages across the Nation since 1980, it is necessary to take action to responsibly use Federal funds, and FEMA must ensure it does not needlessly make repeated Federal investments in the same structures after flooding events. In addition, the FFRMS will help support the thousands of communities across the Country that have strengthened their State and local floodplain management codes and standards to ensure that infrastructure and other community assets are resilient to flood risk. FEMA recognizes that the need to make structures resilient also requires a flexible approach to adapt for the needs of the Federal agency, local community, and the circumstances surrounding each project or action.

Summary of Legal Basis:

Alternatives: FEMA proposes to use the FFRMS–FVA to establish the floodplain for non-critical actions. For critical actions, FEMA would allow the use of the FFRMS–FVA floodplain or the FFRMS–CISA, but only if the elevation established under the FFRMS–CISA is higher than the elevation established under the FFRMS–FVA.

FEMA considered proposing the use of the FFRMS–CISA instead of FFRMS–FVA to reflect the FFRMS's designation of the FFRMS–CISA as the preferred approach and to reflect that the FFRMS–FVA sets a general level of protection, whereas FFRMS–CISA uses a more site-specific approach to predict flood risk based on future conditions.

FEMA also considered whether it should alter its proposal for use of the FFRMS–CISA in relation to the FFRMS–FVA (or FFRMS–0.2PFA). FEMA could choose a more protective approach in which it would determine the elevations established under FFRMS–CISA, FFRMS–FVA and the FFRMS–0.2PFA for critical actions and only allow the applicant to use the highest of the three elevations. This approach would ensure that applicants were building to the most protective level, would avoid potential inconsistencies with FEMA's policy to encourage adoption of freeboard standards by local communities, and would prevent a scenario where an applicant was allowed to build to a lower elevation than previously required for critical actions under FEMA's implementation of Executive Order 11988.

Also alternatively, FEMA could choose to allow use of the FFRMS–CISA, even if the resulting elevation is lower than the application of the FFRMS–FVA. This approach would give FEMA and its grantees more flexibility in implementing the standard, would enable FEMA and its grantees to build to an elevation based on the best available science taking criticality into account, and would provide a pathway to relief for those areas that experience declining flood risks.

Anticipated Cost and Benefits: The anticipated costs of the proposed rule would be from FEMA's Individual Assistance, Public Assistance, and Hazard Mitigation Assistance grant programs, as well as administrative costs. FEMA expects minimal costs associated with its Grants Program Directorate and Integrated Public Alert Warning System programs because these programs do not fund new construction or substantial improvement projects as defined in 44 CFR part 9. These projects are also by nature, typically resilient from flooding. FEMA facilities may also be subject to additional requirements due to the implementation of the proposed rule.

FEMA estimates that the total additional grants costs as a result of the proposed rule would be between $906,696 and $7.8 million per year for FEMA and between $301,906 and $2.6 million per year for grant recipients due to the increased elevation or floodproofing requirements of FEMA Federally Funded Projects.

In addition, FEMA expects to incur some administrative costs as a result of this proposed rule. FEMA estimates initial training costs of around $100,000 the first two years after the rule is implemented, and administrative and training costs of around $16,000 per year thereafter.

FEMA estimates that the total annual cost of this rule after year two would be between $6.1 million and $39.5 million.

FEMA estimates the quantified cost of this proposed rule over the next 10 years would range between $60.1 million and $394.7 million. The present value (PV) of these estimated costs using a 7 percent discount rate would range between $42.9 million and $277.3 million. The PV using a 3 percent discount rate would range between $52.0 million and $336.7 million. These costs would be split between FEMA (75 percent) and recipients (25 percent) of FEMA grants in the floodplain.

FEMA anticipates that the benefits of the proposed rule would justify the costs. FEMA is has provided qualitative benefits, including the reduction in damage to properties and contents from future floods, potential lives saved, public health and safety benefits, reduced recovery time from floods, and increased community resilience to flooding.

FEMA believes this proposed rule would result in savings in time and money from a reduced recovery period after a flood and increased safety of

individuals. Generally, if properties are protected, there would be less damage, resulting in less cleanup time. In addition, higher elevations help to protect people, leading to increased safety. FEMA is unable to quantify these benefits, but improving the resiliency of bridges has significant qualitative benefits, including: Protecting evacuation and escape routes; limiting blockages of floodwaters passing under the bridge that may lead to more severe flooding upstream; and, avoiding the cost of replacing the bridge again if it is damaged during a subsequent flood. Any estimates of these savings would be dependent on the specific circumstances and FEMA is not able to provide a numeric value on these savings.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Fall 2016 Statement of Regulatory Priorities for Fiscal Year 2017

Introduction

As the nation's housing agency, HUD is committed to promoting decent affordable housing and addressing housing conditions that threaten the health of residents. There are still too many homes in the U.S. with hazards that endanger the health and safety of occupants—hazards within a home and hazards outside of a home.[1] HUD's Regulatory Plan for Fiscal Year (FY 2017) focuses on two regulatory actions; one to address lead-based paint hazards within homes subsidized by HUD and a second to require that building or substantially rehabilitating HUD subsidized homes be at new Federal Flood Risk Management Standards.

In 2012, the Centers for Disease Control and Prevention (CDC) revised its guidance on childhood lead poisoning in response to recommendations by CDC's Advisory Committee on Childhood Lead Poisoning Prevention (ACCLPP), which concluded that a growing number of scientific studies show that even low blood lead levels can cause lifelong health effects. CDC accepted this recommendation. The elevated blood lead level, established in 2012 as part of CDC's response to ACCLPP, is lower than CDC's former blood lead level of concern. HUD's lead-based paint hazard control regulations, which address lead-based paint hazards in pre-1978 homes subsidized by HUD are based on the CDC's former blood lead level of concern. With CDC's issuance of new guidelines, HUD recognized that it was necessary to update HUD's lead-based paint regulations. HUD commenced working to update its regulations, but in the meantime, HUD revised its own guidelines for evaluation and control of lead-based paint hazards in housing. HUD also implemented CDC's recommended revised elevated blood lead level in its lead hazard control programs—the Lead-Based Paint Hazard Control grant program and the Lead Hazard Reduction Demonstration grant program—in the annual notices of funding availability (NOFAs) issued for these programs commencing in fiscal year 2013.

On September 1, 2016, (81 FR 60304), HUD issued its proposed rule that would formally adopt the approach used by CDC in its definition of elevated blood lead level, and provides for more comprehensive testing and evaluation where for housing where children under the age of 6 with an elevated blood lead level reside.

On January 30, 2015, President Obama issued an Executive Order (Executive Order 12690) establishing a flood management standard (the Federal Flood Risk-Management Standard) that will reduce the risk and cost of future flood disasters by requiring all Federal investments in and affecting floodplains to meet higher flood risk standards. In the United States, floods caused 4,586 deaths from 1959 to 2005. With climate change and associated sea-level rise, flooding risks have increased over time, and are anticipated to continue increasing. The National Climate Assessment (May 2014), for example, projects that extreme weather events, such as severe flooding, will persist throughout the 21st century. Severe flooding can cause significant damage to infrastructure, including buildings, roads, ports, industrial facilities, and even coastal military installations. With more than $260 billion in flood damage across the Nation since 1980, it is necessary to take action to responsibly use Federal funds, and HUD must ensure it does not wastefully make Federal investments in the same structures after repeated flooding events.

In response to the President's Executive Order, HUD commenced work on a proposed rule to revise its regulations governing floodplain management to require, as part of the decision making process established to ensure compliance with applicable Executive Orders 11988 and 13690, that HUD assisted or financed (including mortgage insurance) project involving new construction or substantial improvement that is situated in an area subject to floods be elevated or floodproofed between 2 and 3 feet above the base flood elevation (BFE), as determined by best available information. The proposed rule would also revise HUD's Minimum Property Standards for one-to-four unit housing under HUD mortgage insurance and low-rent public housing programs to require that the lowest floor in both newly constructed and substantially improved structures be built at least 2 feet above the BFE base flood elevation as determined by best available information. Building to these standards will, consistent with the executive orders, increase resiliency to flooding, reduce the risk of flood loss, minimize the impact of floods on human safety, health, and welfare, and promote sound, sustainable, long-term planning informed by a more accurate evaluation of flood risk that takes into account possible sea level rise and increased development associated with population growth.

On October 28, 2016 (81 FR 74967), HUD issued its proposed rule that would revises its regulations governing floodplain management to implement the Federal Flood Risk Management Standard.

This Statement of Regulatory Priorities highlights these two rules,

[1] Language modeled on language from page 4 of HUD's 2009 Healthy Homes Strategic Plan. *http://www.hud.gov/offices/lead/library/hhi/hh_strategic_plan.pdf.*

which are HUD priority actions to complete during FY 2017.

Regulatory Priority: Responding To Elevated Blood Lead Levels in Children Under the Age of 6

Childhood lead poisoning has long been recognized as causing reduced intelligence, low attention span, reading and learning disabilities, and has been linked to juvenile delinquency, behavioral problems, and many other adverse health effects. Current reviews by the U.S. Department of Health and Human Services (HHS), including by its Agency for Toxic Substances and Disease Registry (ATSDR) and National Institute of Environmental Health Sciences (NIEHS) and by the U.S. Environmental Protection Agency (EPA) Office of Research and Development have described these effects in detail. The removal of lead-based gasoline and paint from commerce has drastically reduced the number of children exposed to levels of lead associated with the most significant among these problems. Data from the CDC's National Center for Health Statistics show that mean blood lead levels among children ages 1 to 5 have dropped over the years. However, national statistics mask the fact that blood lead monitoring continues to find some children exposed to elevated blood lead levels due to their specific housing environment

Continued progress in lead paint abatement and interim control over the last decade, such as through HUD's Lead Hazard Control Grant programs, and HUD's enforcement of the Lead Disclosure statute has meant further significant decreases in lead exposure among children. Even so, there are a considerable number of assisted housing units that have lead-based paint in which children under age 6 reside. In 2012, the CDC issued guidance revising its definition of elevated blood lead level in children under age 6 to be a blood lead level based on the distribution of blood lead levels in the national population. Since CDC's revision of its definition, HUD has applied the revised definition to funds awarded under its Lead-Based Paint Hazard Control grant program and its Lead Hazard Reduction Demonstration grant program, and has updated its Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing to reflect this definition.

To further address this issue, as noted above, HUD issued a proposed rule on September 1, 2016 that would amend HUD's lead-based paint regulations on reducing blood lead levels in children under age 6 who reside in federally-owned or -assisted pre-1978 housing and formally adopt the revised definition of ''elevated blood lead levels'' in children under the age of 6 in accordance with guidance of CDC, and establish more comprehensive testing and evaluation procedures for the housing where such children with an elevated blood lead level reside.

HUD intends to complete this rulemaking in Fiscal Year 2017.

Aggregate Costs and Benefits

Executive Order 12866, as amended, requires the agency to provide its best estimate of the combined aggregate costs and benefits of all regulations included in the agency's Regulatory Plan that will be made pursued in FY 2016. HUD expects that the neither the total economic costs nor the total efficiency gains will exceed $100 million.

Requirements for Notification, Evaluation and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance; Response to Elevated Blood Lead Levels

HUD Office: Office of Lead Hazard Control and Healthy Homes.

Rulemaking Stage: Final Rule.

Priority: Significant.

Legal Authority: 42 U.S.C. 3535(d), 4821, and 4851

CFR Citation: 24 CFR 35.

Legal Deadline: None.

Abstract: This rule will amend HUD's lead-based paint regulations on reducing blood lead levels in children under age 6 who reside in federally-owned or -assisted pre-1978 housing and formally adopt the revised definition of ''elevated blood lead levels'' in children under the age of 6 in accordance with 2012 CDC guidance, and establish more comprehensive testing and evaluation procedures for the housing where such children with an elevated blood lead level reside. Since CDC's 2012 revision of its definition of elevated blood lead level in children under the age of 6, and pending HUD's commencement and completion of rulemaking to formally adopt CDC's revised definition, HUD applied the revised definition to funds awarded under its Lead-Based Paint Hazard Control grant program and its Lead Hazard Reduction Demonstration grant program, and HUD updated its own Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing to reflect this definition. CDC is continuing to consider, with respect to evolution of scientific and medical understanding, how best to identify childhood blood lead levels for which environmental interventions are recommended.

Through this rulemaking, HUD intends to formally adopt, through regulation, the CDC's approach to the definition of ''elevated blood lead levels'' in children under the age of 6 and addresses the additional elements of the CDC guidance pertaining to assisted housing. The final rule takes into consideration public comments received on HUD's September 2016 proposed rule.

Statement of Need: Although HUD is already applying the CDC's 2012 revised definition of elevated blood level in its lead hazard control notices of funding availability and in HUD guidelines, HUD's Lead Safe Housing rule has not yet been updated to reflect the CDC's revised definition of elevated blood lead levels, and to mandate adherence to this definition by owners and managers of federally-owned or -assisted pre-1978 housing requires rulemaking.

Alternatives: Title X of the Housing and Community Development Act of 1992, also known as the Residential Lead-Based Paint Hazard Reduction Act of 1992 (the Act), prescribes specific lead-based paint hazard evaluation and reduction activities for federally-supported housing. To mandate compliance with revised elevated blood lead levels procedures requires rulemaking. While HUD issued updated guidelines in 2012 to encourage compliance with CDC's revised guidelines on elevated blood lead levels, it takes rulemaking to require compliance with CDC's revised definition of elevated blood lead levels in federally-supported housing.

Anticipated Costs and Benefits: The costs and benefits associated with the units affected during the first year of hazard evaluation and reduction activities under the final rule include the present value of future benefits associated with first year hazard reduction activities. For example, the benefits from costs expended for first year activities include the present value of lifetime earnings benefits for children living in the affected unit during the first year, whether that child continues living in that unit during the second and subsequent years after hazard reduction activities does not affect the benefit calculation, because the lowered lead exposure benefits all children under age 6 who reside there during the effective period of the hazard control measures (as noted above, typically 6 or 12 or more years). The costs of ongoing lead-based paint maintenance in units covered by this rulemaking are not considered in this analysis, because it is already required by the original Lead Safe Housing Rule for housing covered by this rulemaking.

Although many benefits of lead-based pain hazard reduction cannot be quantified or monetized, such as quality of life considerations such as adolescents' and adults' dissatisfaction with lower intelligence, fewer skills, reduced education and job potential, criminal behavior, unwed pregnancies, etc., HUD does not address monetized estimates of the cognitive benefits of preventing children under age 6 from developing elevated blood lead levels. Such benefits include avoiding the costs of medical treatment for children with elevated blood lead levels as well as increasing lifetime earnings associated with higher IQs for children with lower blood lead levels. In addition, blood lead levels of older children and adults living in the affected housing units would be expected to fall as a result of this rulemaking, although quantifying their blood lead changes is outside the scope of analysis for this rulemaking. Thus, the estimates of benefits represent a lower bound on the economic benefits of LBP hazard reduction because there are many other health impacts for both adults and children from lead exposure that are not quantified or monetized here. The analysis of net benefits reflects benefits over time associated with the costs incurred in the first year of hazard evaluation and reduction activities under the final rule. For example, the benefits of costs incurred in first year activities include the present value of lifetime earnings benefits for children living in the affected unit during that first year, and for children living in that unit during the second and subsequent years after hazard reduction activities.

HUD's regulatory impact analysis published with its September 2016 proposed rule more fully addresses the costs and benefits of this rulemaking, as of the proposed rulemaking stage.

Risks: While this rule addresses a public health issue, but poses no risk to public health, safety, or the environment.

Floodplain Management and Protection of Wetlands; Minimum Property Standards for Flood Hazard Exposure; Building to the Federal Flood Risk Management Standard

HUD Office: Office of the Secretary.

Rulemaking Stage: Final Rule.

Priority: Significant.

Legal Authority: 42 U.S.C. 3535(d) and 4332; and Executive Order 11991, 3 CFR, 1977 Comp., p.123

CFR Citation: 24 CFR 50, 58, and 200.

Legal Deadline: None.

Abstract: This rule will revise HUD's regulations governing floodplain management to require, as part of the decision making process established to ensure compliance with Executive Order 11988 (Floodplain Management) as amended by Executive Order 13690 (Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input), that a HUD assisted or financed (including mortgage insurance) project involving new construction or substantial improvement that is situated in an area subject to floods be elevated or floodproofed between 2 and 3 feet above the base flood elevation (BFE), as determined by best available information. The revision to 24 CFR part 55 uses the framework of E.O. 11988 which HUD has implemented for almost 40 years and does not change the requirements and guidance specifying which actions require elevation and floodproofing of structures. Specifically, the rule would require that non-critical actions be elevated 2 feet above the BFE. In addition, the rule would require that critical actions be elevated above the greater of the 500-year floodplain or 3 feet above the BFE. This rule also would enlarge the horizontal area of interest commensurate with the vertical increase, but the rule does not change the scope of actions to which the floodplain review process or elevation requirements in 24 CFR part 55 apply. The rule would also revise HUD's Minimum Property Standards for one-to-four unit housing under HUD mortgage insurance and low-rent public housing programs to require that the lowest floor in both newly constructed and substantially improved structures be built at least 2 feet above the BFE as determined by best available information. Building to these standards will, consistent with the executive orders, increase resiliency to flooding, reduce the risk of flood loss, minimize the impact of floods on human safety, health, and welfare, and promote sound, sustainable, long-term planning informed by a more accurate evaluation of flood risk that takes into account possible sea level rise and increased development associated with population growth. This rule also would revise a categorical exclusion available when HUD performs the environmental review under the National Environmental Policy Act and related Federal laws by making it consistent with changes to a similar categorical exclusion that is available to HUD grantees or other responsible entities when they perform these environmental reviews. This change will make the review standard identical regardless of whether HUD or a grantee is performing the review. Elevation standards for manufactured housing receiving mortgage insurance are not covered in this rule.

Statement of Need: This rule revises HUD's floodplain management regulations in response to Executive Order 13690 and recommendations of the Mitigation Framework Leadership Group (MitFLG). Executive Order 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input, called for a new floodplain standard established with stakeholder input. In addition to addressing risks identified by MitFLG associated with the predicted sea level rise, the standards presented in this rule also address a market failure of information regarding flood risk and moral hazard associated with flood insurance and federal disaster assistance. HUD is promulgating these new standards, which it must do through rulemaking, in order to protect HUD's investments and ensure uninterrupted provision of affordable housing.

Executive Order 13690 directed Federal agencies to avoid, to the extent possible, adverse impacts associated with floodplain development. Based on evidence from the National Climate Assessment and the Intergovernmental Panel on Climate Change, MitFLG, consisting of representatives from various federal agencies, proposed the establishment of the Federal Flood Risk Management Standard (FFRMS). These standards, at least two feet of freeboard above base flood elevation for non-critical actions and three feet of freeboard for critical actions, address the Executive Order's directive of reducing adverse impact development in floodplains which, as many studies indicate, are expanding fairly rapidly.

The explicit standards provided in this rule are needed because developers, homeowners and renters do not fully internalize the risk and costs of potential flooding. There is evidence that many homeowners are either not fully aware of the risk of a flood occurring or that they discount the cost of a flood if it occurs. In some cases, owners simply underestimate the risk of flooding.

Alternatives: In developing new floodplain management standards, HUD considered several alternative approaches to establishing the standard: Climate-informed science approach (CISA); freeboard value approach (FVA); and the 0.2 percent annual chance flood approach (0.2PFA). HUD chose the FVA over the CISA and 0.2PFA for a variety of reasons. First, the FVA can be applied consistently to any area participating in the NFIP. The FVA can be calculated using existing flood maps. This is not true for the CISA standard unless HUD were to establish criteria for every community regarding the application of particular climate and greenhouse gas scenarios and associated impacts. Rather than requiring this level of review and analysis, HUD chose the more direct FVA. Second, the two alternative approaches to FVA require expertise that may not be available to all communities. The 0.2 Percent Flood is not mapped in all communities and requires a significant degree of expertise to map over an area or for an individual site. The same is also true for the CISA standard, which requires not just historical analysis but a greater anticipation of trends and future conditions. Third, HUD determined that it is not practicable to establish the CISA or the 0.2 Percent Flood for all projects. HUD funds or assists tens of thousands of small projects each year. For example, repaving a road or rehabilitating a single family home may not necessitate the extra amounts of cost required by the CISA and 0.2 Percent Flood approaches. Fourth, many states and communities already have success applying a freeboard approach to floodplains. Due to the familiarity that many communities have with freeboard, the FVA was seen as a very practical approach with documented history of application.

In addition, HUD, as part of MitFLG working group, considered varying levels of elevation above base flood elevation, specifically 1, 2 and 3 feet above BFE. Based on expected sea level rise and the cost of elevation, HUD is providing the standard recommended by MitFLG, which requires at least 2 feet above freeboard, or for critical actions, at least 3 feet above freeboard.

Anticipated Costs and Benefits: The standards provided under this rule, requiring at least two feet of freeboard above base flood elevation, will increase the construction cost HUD's assisted and insured new construction and substantially improved properties located in the 1 percent annual chance floodplain. This rule amends HUD's current standard which requires elevation to at least the base flood elevation. Thus, the elevation standards are not new, but rather revised to an increased height. In addition, 20 states, plus the District of Columbia and Puerto Rico, already require elevation exceeding HUD's current standard of elevation to the base flood level (BFE+1). Further, four states—Indiana, Montana, New York and Wisconsin—already require residential structures elevated with a minimum of at least two of freeboard (BFE+2). Thus, the cost of compliance in these states would be less than those that have no minimum elevation requirements in the floodplain.

Developers receiving HUD assistance who are not currently building to the proposed standard of 2 feet above base flood elevation (BFE+2) can meet the proposed standards by either elevating the lowest floor of the structure or by floodproofing to the new standard and limiting the first floor to non-residential uses. Alternatively, developers could choose to locate outside of the floodplain and the affected horizontal expansion, or reduce substantial improvement projects to less than 50 percent of the market or pre-disaster value of the structure, which would no longer classify the project as ''substantial''.

The standards to be provide in this rule are intended to protect HUD-assisted and insured structures and the owners and tenants in these units. Thus, the benefits of the rule include reduced building damage and decreased costs to tenants temporarily displaced due to flooding, including avoided search costs for temporary replacement housing and lost wages. The annual reduction in insurance premiums provides an adequate measure of the reduction in expected damages, assuming that the NFIP rates are calculated in order to maintain a non-negative balance. In this case, the premiums for catastrophic insurance would be slightly higher than, but similar to, the expected value of the claim to pay for administrative costs.

HUD's regulatory impact analysis published with its September 2016 proposed rule more fully addresses the costs and benefits of this rulemaking, as of the proposed rulemaking stage.

Risks: While the rule addresses a rule, the rule poses no risk to public health, safety, or the environment.

HUD—OFFICE OF THE SECRETARY (HUDSEC)

Proposed Rule Stage

70. Floodplain Management and Protection of Wetlands; Minimum Property Standards for Flood Hazard Exposure; Building to the Federal Flood Risk Management Standard (FR–5717)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 3535(d); 42 U.S.C. 3001, *et seq.,* E.O. 11990; E.O. 11988

CFR Citation: 24 CFR 50; 24 CFR 55.

Legal Deadline: None.

Abstract: As communities begin to recover from the devastating effects of Hurricane Sandy, HUD has determined that it is important to recognize lessons learned to employ mitigation actions that ensure that structures located in floodplains are built or rebuilt stronger, safer, and less vulnerable to future flooding events. This commitment to resiliency is now required of all agencies that use federal funds for construction under Executive Order 13690 (Establishing a Federal Flood Risk Management Standard) and the associated ''Guidelines for Implementing Executive Order 11988 (Floodplain Management) and Executive Order 13690.''

Based on Executive Order 13690 and the Guidelines, this proposed rule would require, as part of the decisionmaking process established to ensure compliance with Executive

Order 11988 (Floodplain Management) that new construction or substantial improvement in a floodplain be elevated or floodproofed 2 feet above the base flood elevation for non-critical actions and 3 feet above the base flood elevation for critical actions based on the Federal Emergency Management Agency's best available data. This rule also proposes to revise a categorical exclusion available when HUD performs the environmental review by making it consistent with changes to a similar categorical exclusion that is available to HUD grantees or other responsible entities when they perform the environmental review. The rule is also part of HUD's commitment under the President's Climate Action plan.

Statement of Need: This rule revises HUD's floodplain management regulations in response to Executive Order 13690 and recommendations of the Mitigation Framework Leadership Group (MitFLG). Executive Order 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input, called for a new floodplain standard established with stakeholder input. In addition to addressing risks identified by MitFLG associated with the predicted sea level rise, the standards presented in this rule also address a market failure of information regarding flood risk and moral hazard associated with flood insurance and federal disaster assistance. HUD is promulgating these new standards, which it must do through rulemaking, in order to protect HUD's investments and ensure uninterrupted provision of affordable housing.

Summary of Legal Basis: Executive Order 13690 directed Federal agencies to avoid, to the extent possible, adverse impacts associated with floodplain development. Based on evidence from the National Climate Assessment and the Intergovernmental Panel on Climate Change, MitFLG, consisting of representatives from various federal agencies, proposed the establishment of the Federal Flood Risk Management Standard (FFRMS). These standards, at least two feet of freeboard above base flood elevation for non-critical actions and three feet of freeboard for critical actions, address the Executive Order's directive of reducing adverse impact development in floodplains which, as many studies indicate, are expanding fairly rapidly. The explicit standards provided in this rule are needed because developers, homeowners and renters do not fully internalize the risk and costs of potential flooding. There is evidence that many homeowners are either not fully aware of the risk of a flood occurring or that they discount the cost of a flood if it occurs. In some cases, owners simply underestimate the risk of flooding.

Alternatives: In developing new floodplain management standards, HUD considered several alternative approaches to establishing the standard: Climate-informed science approach (CISA); freeboard value approach (FVA); and the 0.2 percent annual chance flood approach (0.2PFA). HUD chose the FVA over the CISA and 0.2PFA for a variety of reasons. First, the FVA can be applied consistently to any area participating in the NFIP. The FVA can be calculated using existing flood maps. This is not true for the CISA standard unless HUD were to establish criteria for every community regarding the application of particular climate and greenhouse gas scenarios and associated impacts. Rather than requiring this level of review and analysis, HUD chose the more direct FVA. Second, the two alternative approaches to FVA require expertise that may not be available to all communities. The 0.2 Percent Flood is not mapped in all communities and requires a significant degree of expertise to map over an area or for an individual site. The same is also true for the CISA standard, which requires not just historical analysis but a greater anticipation of trends and future conditions. Third, HUD determined that it is not practicable to establish the CISA or the 0.2 Percent Flood for all projects. HUD funds or assists tens of thousands of small projects each year. For example, repaving a road or rehabilitating a single family home may not necessitate the extra amounts of cost required by the CISA and 0.2 Percent Flood approaches. Fourth, many states and communities already have success applying a freeboard approach to floodplains. Due to the familiarity that many communities have with freeboard, the FVA was seen as a very practical approach with documented history of application.

In addition, HUD, as part of MitFLG working group, considered varying levels of elevation above base flood elevation, specifically 1, 2 and 3 feet above BFE. Based on expected sea level rise and the cost of elevation, HUD is providing the standard recommended by MitFLG, which requires at least 2 feet above freeboard, or for critical actions, at least 3 feet above freeboard.

Anticipated Cost and Benefits: The standards provided under this rule, requiring at least two feet of freeboard above base flood elevation, will increase the construction cost HUD's assisted and insured new construction and substantially improved properties located in the 1 percent annual chance floodplain. This rule amends HUD's current standard which requires elevation to at least the base flood elevation. Thus, the elevation standards are not new, but rather revised to an increased height. In addition, 20 states, plus the District of Columbia and Puerto Rico, already require elevation exceeding HUD's current standard of elevation to the base flood level (BFE+0). Further, four states—Indiana, Montana, New York and Wisconsin—already require residential structures elevated with a minimum of at least two of freeboard (BFE+2). Thus, the cost of compliance in these states would be less than those that have no minimum elevation requirements in the floodplain.

Developers receiving HUD assistance who are not currently building to the proposed standard of 2 feet above base flood elevation (BFE+2) can meet the proposed standards by either elevating the lowest floor of the structure or by floodproofing to the new standard and limiting the first floor to non-residential uses. Alternatively, developers could choose to locate outside of the floodplain and the affected horizontal expansion, or reduce substantial improvement projects to less than 50 percent of the market or pre-disaster value of the structure, which would no longer classify the project as substantial.

The standards to be provide in this rule are intended to protect HUD-assisted and insured structures and the owners and tenants in these units. Thus, the benefits of the rule include reduced building damage and decreased costs to tenants temporarily displaced due to flooding, including avoided search costs for temporary replacement housing and lost wages. The annual reduction in insurance premiums provides an adequate measure of the reduction in expected damages, assuming that the NFIP rates are calculated in order to maintain a non-negative balance. In this case, the premiums for catastrophic insurance would be slightly higher than, but similar to, the expected value of the claim to pay for administrative costs.

HUD's regulatory impact analysis published with its September 2016 proposed rule more fully addresses the costs and benefits of this rulemaking, as of the proposed rulemaking stage.

Risks: While the rule addresses a rule, the rule poses no risk to public health, safety, or the environment.

RIN: 2501–AD62

HUD—HUDSEC

Final Rule Stage

71. Notification, Evaluation and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance; Response To Elevated Blood Lead Level (FR–5816)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 3535(d); 42 U.S.C. 4821; 42 U.S.C. 4851

CFR Citation: 24 CFR 35.

Legal Deadline: None.

Abstract: This proposed rule would amend HUD's lead-based paint regulations on reducing blood-lead levels in children under age 6 who reside in federally-owned or assisted housing constructed prior to 1978. Specifically, the rule would formally adopt the revised definition of elevated blood lead levels in children under the age of 6 based on the definition issued by the Centers for Disease Control and Prevention (CDC). The rule would also establish more comprehensive testing and evaluation procedures for the housing where such children reside. In 2012, the CDC issued guidance revising its definition of elevated blood lead level in children under age 6 to be a blood lead level based on the distribution of blood lead levels in the national population. Since CDC revised its definition, HUD has applied it to funds awarded under its Lead-Based Paint Hazard Control grant program and its Lead Hazard Reduction Demonstration grant program, and has updated its Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing to reflect this definition. Through this rule, HUD formally adopts in regulation the CDC's definition on elevated blood lead levels in children under the age of 6 and addresses the additional elements of the CDC guidance pertaining to assisted housing.

Statement of Need: Although HUD is already applying the CDC's 2012 revised definition of elevated blood level in its lead hazard control notices of funding availability and in HUD guidelines, HUD's Lead Safe Housing rule has not yet been updated to reflect the CDC's revised definition of elevated blood lead levels, and to mandate adherence to this definition by owners and managers of federally-owned or -assisted pre-1978 housing requires rulemaking.

Summary of Legal Basis: Codified in Title 24 of the Code of Federal Regulations (CFR) part 35, HUD's Lead-Based Paint regulation, commonly referred to as the Lead Safe Housing Rule (LSHR), is designed to reduce lead exposure in federally-owned and federally-assisted housing (or assisted housing). The LSHR implements sections 1012 and 1013 of the Residential Lead-Based Paint Hazard Reduction Act of 1992, which is Title X of the Housing and Community Development Act of 1992 (Public Law 102–550, approved October 28, 1992), codified at 42 U.S.C. 4822. Under Title X, HUD has specific authority to control lead-based paint and lead-based paint hazards in HUD-assisted target housing. The LSHR aims in part to ensure that federally-owned or federally-assisted housing that may have lead-based paint—most housing constructed prior to 1978, called target housing does not have lead-based paint hazards. Lead-based paint hazards are lead-based paint and all residential lead-containing dusts and soils, regardless of the source of the lead, which, due to their condition and location, would result in adverse human health effects. As reflected in the LSHR, and consistent with Title X, HUD's primary focus is on minimizing childhood lead exposures, rather than on waiting until children have elevated blood lead levels to undertake actions to eliminate the lead-based paint hazards. This rule continues HUD's efforts to spearhead major efforts in lead poisoning prevention by taking all actions feasible and authorized by law to reduce lead exposure in children.

Alternatives: Title X of the Housing and Community Development Act of 1992, also known as the Residential Lead-Based Paint Hazard Reduction Act of 1992 (the Act), prescribes specific lead-based paint hazard evaluation and reduction activities for federally-supported housing. To mandate compliance with revised elevated blood lead levels procedures requires rulemaking. While HUD issued updated guidelines in 2012 to encourage compliance with CDC's revised guidelines on elevated blood lead levels, it takes rulemaking to require compliance with CDC's revised definition of elevated blood lead levels in federally-supported housing.

Anticipated Cost and Benefits: The costs and benefits associated with the units affected during the first year of hazard evaluation and reduction activities under the final rule include the present value of future benefits associated with first year hazard reduction activities. For example, the benefits from costs expended for first year activities include the present value of lifetime earnings benefits for children living in the affected unit during the first year, whether that child continues living in that unit during the second and subsequent years after hazard reduction activities does not affect the benefit calculation, because the lowered lead exposure benefits all children under age 6 who reside there during the effective period of the hazard control measures (as noted above, typically 6 or 12 or more years). The costs of ongoing lead-based paint maintenance in units covered by this rulemaking are not considered in this analysis, because it is already required by the original Lead Safe Housing Rule for housing covered by this rulemaking.

Although many benefits of lead-based pain hazard reduction cannot be quantified or monetized, such as quality of life considerations such as adolescents' and adults' dissatisfaction with lower intelligence, fewer skills, reduced education and job potential, criminal behavior, unwed pregnancies, etc., HUD does not address monetized estimates of the cognitive benefits of preventing children under age 6 from developing elevated blood lead levels. Such benefits include avoiding the costs of medical treatment for children with elevated blood lead levels as well as increasing lifetime earnings associated with higher IQs for children with lower blood lead levels. In addition, blood lead levels of older children and adults living in the affected housing units would be expected to fall as a result of this rulemaking, although quantifying their blood lead changes is outside the scope of analysis for this rulemaking. Thus, the estimates of benefits represent a lower bound on the economic benefits of LBP hazard reduction because there are many other health impacts for both adults and children from lead exposure that are not quantified or monetized here. The analysis of net benefits reflects benefits over time associated with the costs incurred in the first year of hazard evaluation and reduction activities under the final rule. For example, the benefits of costs incurred in first year activities include the present value of lifetime earnings benefits for children living in the affected unit during that first year, and

for children living in that unit during the second and subsequent years after hazard reduction activities.

HUD's regulatory impact analysis published with its September 2016 proposed rule more fully addresses the costs and benefits of this rulemaking, as of the proposed rulemaking stage.

Risks: While this rule addresses a public health issue, but poses no risk to public health, safety, or the environment.

DEPARTMENT OF THE INTERIOR

Statement of Regulatory Priorities

The Department of the Interior (Interior) is the principal Federal steward of our Nation's public lands and resources, including many of our cultural treasures. Interior serves as trustee to American Indians' and Alaska Natives' trust assets and is responsible for relations with the island territories under United States jurisdiction. The Department of the Interior manages more than 500 million acres of Federal lands, including 412 park units and 563 wildlife refuges, and more than a billion submerged offshore acres. On public lands and the Outer Continental Shelf (OCS), Interior provides access for renewable and conventional energy development and manages the protection and restoration of surface-mined lands.

Interior protects and recovers endangered species; protects natural, historic, and cultural resources; manages water projects that are a lifeline and economic engine for many communities in the West; manages forests and fights wildfires; manages Federal energy resources; regulates surface coal mining operations; reclaims abandoned coal mines; educates children in Indian schools; and provides recreational opportunities for over 400 million visitors annually in the Nation's national parks, public lands, national wildlife refuges, and recreation areas.

Interior will continue to review and update its regulations and policies to ensure that they are effective and efficient, and that they promote accountability and sustainability. Interior will emphasize regulations and policies that:

- Promote environmentally responsible, safe, and balanced development of renewable and conventional energy on our public lands and the OCS;
- Use the best available science to ensure that public resources are protected, conserved, and used wisely;
- Preserve America's natural treasures for future generations;
- Improve the nation-to-nation relationship with American Indian tribes and promote tribal self-determination and self-governance;
- Promote partnerships with states, tribes, local governments, other groups, and individuals to achieve common goals; and
- Promote transparency, fairness, accountability, and the highest ethical standards while maintaining performance goals.

Major Regulatory Areas

Interior's bureaus implement congressionally mandated programs through their regulations. Some of these regulatory programs include:

- Overseeing the development of onshore and offshore energy, including renewable, mineral, oil and gas, and other energy resources;
- Regulating surface coal mining and reclamation operations on public and private lands;
- Managing migratory birds and preserving marine mammals and endangered species;
- Managing dedicated lands such as national parks, wildlife refuges, National Conservation Lands, and American Indian trust lands;
- Managing public lands open to multiple use;
- Managing revenues from American Indian and Federal minerals;
- Fulfilling trust and other responsibilities pertaining to American Indians and Alaska Natives; and
- Managing natural resource damage assessments.

Regulatory Policy

Interior's regulatory programs seek to operate programs transparently, efficiently, and cooperatively while maximizing protection of our land, resources, and environment in a fiscally responsible way by:

(1) Protecting Natural, Cultural, and Heritage Resources.

Interior's mission includes protecting and providing access to our Nation's natural and cultural heritage and honoring our trust responsibilities to Indian tribes. We are committed to this mission, and to applying laws and regulations fairly and effectively. Our priorities include protecting public health and safety, restoring and maintaining public lands, protecting threatened and endangered species, ameliorating land- and resource-management problems on public lands, and ensuring accountability and compliance with Federal laws and regulations.

(2) Sustainably Using Energy, Water, and Natural Resources.

Since the beginning of the Obama Administration, Interior has focused on renewable energy issues and has established priorities for environmentally responsible development of renewable energy on public lands and the OCS. Industry has responded by investing in the development of wind farms off the Atlantic seacoast and solar, wind, and geothermal energy facilities throughout the West. Power generation from these new energy sources produces virtually no greenhouse gases and, when done in an environmentally responsible manner, harnesses with minimum impact abundant renewable energy. Interior will continue its intra- and inter-departmental efforts to move forward with the environmentally responsible review and permitting of renewable energy projects on public lands and the Outer Continental Shelf, and will identify how its regulatory processes can be improved to facilitate the responsible development of these resources.

In implementing these priorities through its regulations, Interior will create jobs and contribute to a healthy economy while protecting our signature landscapes, natural resources, wildlife, and cultural resources.

(3) Empowering People and Communities.

Interior strongly encourages public participation in the regulatory process and will continue to actively engage the public in the implementation of priority initiatives. Throughout Interior, individual bureaus and offices are ensuring that the American people have an active role in managing our Nation's public lands and resources.

For example, every year the U.S. Fish and Wildlife Service (FWS) establishes migratory bird hunting seasons in partnership with Flyway Councils composed of state fish and wildlife agencies. The FWS also holds a series of public meetings to provide interested parties, including hunters and other groups, opportunities to participate in establishing the upcoming season's regulations. Similarly, the Bureau of Land Management (BLM) uses Resource Advisory Councils to provide advice on the management of public lands and resources. These citizen-based groups allow individuals from all backgrounds and interests to have a voice in management of public lands.

Retrospective Review of Regulations

President Obama's Executive Order 13563 directs agencies to make the regulatory system work better for the American public. Regulations should ''. . . protect public health, welfare, safety, and our environment while promoting economic growth, innovation, competitiveness, and job creation.'' Interior's plan for retrospective regulatory review identifies specific efforts to relieve regulatory burdens, add jobs to the economy, and make regulations work better for the American public while protecting our environment and resources.

Interior routinely meets with stakeholders to solicit feedback and input on ways to modernize our regulatory programs, through efforts such as incorporating performance based standards and removing outdated and unnecessary requirements. Interior bureaus continue efforts to make our regulations easier to comply with and understand. Our regulatory process ensures that bureaus share ideas to reduce regulatory burdens while meeting the requirements of the laws they enforce and improving their stewardship of the environment and resources. Results include:

- Effective stewardship of our Nation's resources that is responsive to the needs of small businesses;
- Increased benefits per dollar spent by careful evaluation of the economic effects of planned rules; and
- Improved compliance and transparency by use of plain language in our regulations and guidance documents.

The Department of the Interior's Final Plan for Retrospective Review and biannual status reports can be viewed at *http://www.doi.gov/open/regsreview*.

Bureaus and Offices Within the Department of the Interior

The following sections give an overview of some of the major regulatory priorities of DOI bureaus and offices.

Indian Affairs

Indian Affairs, including the Bureau of Indian Affairs (BIA) and the Bureau of Indian Education (BIE), provides services to approximately 1.9 million American Indians and Alaska Natives, and maintains a government-to-government relationship with the 567 federally recognized tribes. Indian Affairs also administers and manages 55 million acres of surface land and 57 million acres of subsurface minerals held in trust by the United States for American Indians and tribes. Indian Affair's mission is to enhance the quality of life, promote economic opportunity, and protect and improve the trust assets of Indian tribes, American Indians, and Alaska Natives, as well as to provide quality education opportunities to students in Indian schools.

In the coming year, BIA will continue its focus on improved management of trust responsibilities with each regulatory review and revision. The Bureau will also continue to promote economic development in Indian communities by ensuring the regulations support, rather than hinder, productive land management and businesses. In addition, Indian Affairs will focus on updating Indian education regulations and on other regulatory changes to increase transparency in support of the President's Open Government Initiative.

In the coming year, Indian Affairs regulatory priorities are to:

- Develop regulatory changes necessary for improved Indian education.

Indian Affairs is reviewing regulations that require the Bureau of Indian Education to follow adequate yearly progress standards for 23 different states. The review will determine whether a uniform standard would better meet the needs of students at BIE-funded schools. With regard to undergraduate education, the BIE plans to finalize regulations that address grants to tribally controlled community colleges and other Indian education regulations. These reviews identify provisions that need to be updated to comply with applicable statutes and ensure that the proper regulatory framework is in place to support students in BIE-funded schools.

- Revise regulations to reflect updated statutory provisions and increase transparency.

BIA is making a concentrated effort to improve the readability and precision of its regulations. Because trust beneficiaries often turn to the regulations for guidance on how a given BIA process works, BIA is ensuring that each revised regulation is written as clearly as possible and accurately reflects the current organization of the Bureau. The BIA is also simplifying language and eliminating obsolete provisions. In the past year, the BIA has finalized revisions to regulations regarding rights-of-way (25 CFR 169); Secretarial elections (25 CFR 81); the Housing Improvement Program (25 CFR 256); Indian Reservation Roads (25 CFR 170); and Indian Child Welfare Act proceedings (25 CFR 23). In the coming year, the BIA also plans to finalize revisions to regulations regarding the Tribal Transportation Program (formerly known as Indian Reservation Roads) (25 CFR 170).

- Solicit comment on potential regulatory changes to Indian trader regulations.

BIA is considering whether to propose an administrative rule that would comprehensively update 25 CFR part 140 (Licensed Indian Traders) in an effort to modernize the implementation of the Indian Trader statutes consistent with the Federal policies of tribal self-determination and self-governance. The current regulations were promulgated in 1957 and have not been comprehensively updated since 1965. BIA will solicit comments on its Indian Trader regulations including how the regulations could be improved, who should be permitted to trade on Indian land, and what may be traded on Indian land, in a manner more consistent with tribal self-governance and self-determination.

Bureau of Land Management

The Bureau of Land Management manages the 245-million-acre National System of Public Lands, located primarily in the Western States, including Alaska, and the 700 million acre subsurface mineral estate located throughout the Nation. In doing so, BLM manages such varied uses as energy and mineral development, outdoor recreation, livestock grazing, and forestry and woodlands products. BLM's complex multiple-use mission affects the lives of millions of Americans, including those who live near or visit the public lands, as well as those who benefit from the commodities, such as minerals, energy, or timber, produced from the lands' rich resources. In

undertaking its management responsibilities, BLM seeks to conserve our public lands' natural and cultural resources, and sustain the health and productivity of the public lands for the use and enjoyment of present and future generations.

The BLM is updating and improving the current versions of Onshore Oil and Gas Orders (Orders) for Site Security (Order 3), Oil Measurement (Order 4), and Gas Measurement (Order 5). These Orders were last updated in 1989. The primary purpose for these updates is to keep pace with changing industry practices, emerging and new technologies, respond to recommendations from the Government Accountability Office (GAO), the Department of the Interior Office of the Inspector General, and the Department of the Interior's Subcommittee on Royalty Management. The proposed changes address findings and recommendations that in part formed the basis for the GAO's inclusion of Interior's oil and gas program on the GAO's High Risk List in 2011 (GAO–11–278) and for its continuing to keep the program on the list in the 2013 and 2015 updates. The Orders will be published as proposed rules in 43 Code of Federal Regulations (CFR) 3173, 3174, and 3175, respectively.

• Preventing waste of produced natural gas and ensuring fair return to the taxpayer.

BLM's current requirements regarding venting and flaring of natural gas from oil and gas operations are over 3 decades old. The agency intends to finalize a rule to address emissions reductions and minimize waste through improved standards for venting, flaring, and fugitive losses of methane from oil and gas production facilities on Federal and Indian lands.

• Ensuring that taxpayers receive a fair return from energy resources developed on the public lands, those resources are diligently and responsibly developed, and that adequate financial measures exist to address the risks.

The GAO recommended that BLM take necessary steps to revise its regulations regarding onshore royalty rates to provide flexibility to change those rates. On April 21, 2015, the BLM issued an Advance Notice of Proposed Rulemaking (ANPRM) seeking public comment on potential updates to BLM rules governing oil and gas royalty rates, rental payments, lease sale minimum bids, civil penalty caps, and financial assurances. Over 82,000 comments were received during the comment period ending on June 19, 2015. Most of the comments focused on fiscal lease terms—royalty rates, rentals, and minimum bids. There were a few comments on bonding and very few on civil penalties.

With respect to royalties rates generally, based on comments received on the ANPRM, the BLM proposed an amendment to its regulations governing royalty rates as part of its ''Waste Prevention, Production Subject to Royalties, and Resource Conservation'' rulemaking, 81 FR 6616 (Feb. 8, 2016). The proposed regulatory amendment, if adopted, would give the Secretary flexibility to adjust onshore oil and gas royalty rates in response to market conditions.

Regarding financial measures to address risks, on June 28, 2016, the BLM published a rule to adjust civil monetary penalties contained in the Bureau of Land Management's regulations governing onshore oil and gas operations. This rule responded to the requirements of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. The adjustments made by this interim final rule constitute the initial catch-up adjustments contemplated by the Act, and are consistent with applicable Office of Management and Budget (OMB) guidance. The initial adjustments will be followed by annual adjustments for inflation thereafter. The purpose of these adjustments is to maintain the deterrent effect of civil penalties found in existing regulations.

• Creating a competitive process for offering lands for solar and wind energy development.

The BLM will finalize a rule to establish an efficient competitive process for leasing public lands for solar and wind energy development. The regulations will establish competitive bidding procedures for lands within designated solar and wind energy development leasing areas, define qualifications for potential bidders, and structure the financial arrangements necessary for the process. The rule will enhance BLM's ability to capture fair market value for the use of public lands, ensure fair access to leasing opportunities for renewable energy development, and foster the growth and development of the renewable energy sector of the economy.

Bureau of Ocean Energy Management

The Bureau of Ocean Energy Management (BOEM) promotes energy independence, environmental protection, and economic development through responsible, science-based management of offshore conventional and renewable energy resources. It is dedicated to offering opportunities to develop the conventional and renewable energy and the underlying mineral resources of the OCS in an efficient and effective manner, balancing the need for economic growth with the protection of the environment. BOEM oversees the expansion of domestic energy production, enhancing the potential for domestic energy independence and the generation of revenue to support the economic development of the country. BOEM thoughtfully considers and balances the potential environmental impacts associated with exploring and extracting OCS resources with the critical need for domestic energy production. BOEM's near-term regulatory agenda will focus on a number of issues, including:

• Enhancing the regulatory efficiency of the offshore renewables program.

BOEM is finalizing two rules to address this goal. In consultation with stakeholders, a proposed rule would update, simplify, and clarify BOEM's current regulations for awarding renewable energy leases and grants. It would reorganize, simplify, and clarify BOEM's pre- and post-auction procedures and better describe the use of bidding credits. It also would deter bidder collusion and provide incentives to encourage a provisional winner to fulfill its obligations. The second is a final rule that reassigns current safety and environmental oversight and enforcement responsibilities for off-shore renewable energy projects from BOEM to the Bureau of Safety and Environmental Enforcement. The Secretary of the Interior and the Assistant Secretary for Land and Mineral Management mandated this administrative reassignment to ensure that safety and environmental oversight of offshore renewable energy activities is independent of program management and leasing functions. BOEM is proposing to amend the scope of an existing proposed rulemaking that remains in early development. The amended scope will incorporate changes to the offshore renewable regulatory framework suggested by the public and the regulated community and may include provisions addressing regulatory gaps and inconsistencies arising from the Title 30 reorganization.

• Updating BOEM's Air Quality Program.

BOEM's original air quality rules date largely from 1980 and have not been updated substantially since that time. From 1990 to 2011, Interior exercised jurisdiction only for OCS sources operating in the Gulf of Mexico. In Fiscal Year 2011, Congress expanded Interior's authority by transferring to it responsibility for monitoring OCS air quality off the North Slope Borough of

the State of Alaska, including the Beaufort Sea, and the Chukchi Sea. BOEM intends to finalize updated regulations to reflect changes that have occurred over the past 34 years and the new regulatory jurisdiction.

• Promoting Effective Financial Assurance and Risk Management.

BOEM has the responsibility to ensure that lessees and operators on the OCS do not engage in activities that could generate an undue risk of financial loss to the Government. BOEM formally established a program office to review these issues, and is working with industry and others to determine how to improve the regulatory regime to better align with the realities of aging offshore infrastructure, hazard risks, and increasing costs of decommissioning. In order to minimize the potential adverse impact of any proposed regulations, and in an effort to take all issues and views into proper account, BOEM published an Advance Notice of Proposed Rulemaking (ANPRM) in 2014, and has engaged with industry on the subject. BOEM has since issued a Notice to Lessees to its stakeholders, effective September 12, 2016, to address the concerns.

Bureau of Safety and Environmental Enforcement

The Bureau of Safety and Environmental Enforcement (BSEE) mission is to regulate safety, emergency preparedness, environmental responsibility and appropriate development and conservation of offshore oil and natural gas resources. BSEE's priorities in fulfillment of its mission are to: (1) Regulate, enforce, and respond to OCS development using the full range of authorities, policies, and tools to compel safety and environmental responsibility and appropriate development of offshore oil and natural gas resources; and (2) build and sustain the organizational, technical, and intellectual capacity within and across BSEE's key functions—capacity that keeps pace with OCS industry technology improvements, innovates in regulation and enforcement, and reduces risk through systemic assessment and regulatory and enforcement actions.

BSEE has identified the following areas of regulatory priorities:

• Improving Crane and Helicopter Safety on Offshore Facilities

BSEE will finalize a rule regarding crane safety on fixed offshore platforms and will propose a rule for helicopter/helideck safety.

• Improving Oil Spill Response Plans and Procedures

BSEE will update regulations for offshore oil spill response plans by incorporating requirements for improved procedures. The procedures that will be required are based on lessons learned from the Deepwater Horizon spill, as well as nearly two decades of agency oversight and applicable BSEE research.

• Updating Cost Reporting and Cost Recovery Rules

BSEE expects to finalize its proposal for expanding the existing requirements for reporting of actual decommissioning costs to include the costs of decommissioning pipelines subject to BSEE's authority. The Bureau will use that information to estimate future decommissioning costs. BSEE will also propose, and expects to finalize, updates to the existing regulations for recovery of the costs of services provided by BSEE (such as reviewing permit applications) to reflect increases in those costs.

Office of Natural Resources Revenue

The Office of Natural Resources Revenue (ONRR) will continue to collect, account for, and disburse revenues from Federal offshore energy and mineral leases and from onshore mineral leases on Federal and Indian lands. The program operates nationwide and is primarily responsible for timely and accurate collection, distribution, and accounting for revenues associated with mineral and energy production.

ONRR's regulatory plan for October 2016 through March 2017 includes proposing new regulations to implement the provisions of the Energy Policy Act of 2005 (EPAct) governing the payment of advance royalty on coal resources produced from Federal leases. ONRR is also adding information collection requirements that are applicable to all solid minerals leases and also are necessary to implement the EPAct Federal coal advance royalty provisions. Additionally, ONRR expects to issue a proposed rulemaking to amend ONRR's service of official correspondence regulations, providing necessary clarifications and a simpler process for the service of official correspondence.

Office of Surface Mining Reclamation and Enforcement

The Office of Surface Mining Reclamation and Enforcement (OSMRE) was created by the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Under SMCRA, OSMRE has two principal functions—the regulation of surface coal mining and reclamation operations, and the reclamation and restoration of abandoned coal mine lands. In enacting SMCRA, Congress directed OSMRE to ''strike a balance between protection of the environment and agricultural productivity and the Nation's need for coal as an essential source of energy.'' In response to its statutory mandate, OSMRE has sought to develop and maintain a stable regulatory program that is safe, cost-effective, and environmentally sound. A stable regulatory program ensures that the coal mining industry has clear guidelines for operation and reclamation, and that citizens know how the program is being implemented.

OSMRE's Federal regulatory program sets minimum requirements for obtaining a permit for surface and underground coal mining operations, sets performance standards for those operations, requires reclamation of lands and waters disturbed by mining, and requires enforcement to ensure that the standards are met OSMRE is the primary regulatory authority for SMCRA enforcement until a State or Indian tribe develops its own regulatory program, which is no less effective than the Federal program. When a State or Indian tribe achieves ''primacy,'' it assumes direct responsibility for permitting, inspection, and enforcement activities under its federally approved regulatory program. The regulatory standards in Federal program States and in primacy States are essentially the same with only minor, non-substantive differences. Today, 24 States have primacy, including 23 of the 24 coal producing States. OSMRE's regulatory priorities for the coming year will focus on:

• Stream Protection.

Protect streams and related environmental resources from the adverse effects of surface coal mining operations. OSMRE plans to finalize regulations to improve the balance between environmental protection and the Nation's need for coal by better protecting streams from the adverse impacts of surface coal mining operations.

• Coal Combustion Residues.

Establish Federal standards for the beneficial use of coal combustion residues on active and abandoned coal mines.

• Cost Recovery.

Revise OSMRE existing permit fees and impose new fees to recover OSMRE's costs for permit administration and enforcement services provided to the coal industry. The proposed fees would be applicable to permits for mining on lands where regulatory jurisdiction has not been delegated to the States and would include OSMRE's Federal program, States, and Indian lands.

• Bond Requirements.

Update OSMRE bonding regulations to ensure there are sufficient funds to complete all of the required reclamation in the reclamation plan if the regulatory authority has to perform the work in the event of forfeiture.

U.S. Fish and Wildlife Service

The mission of the U.S. Fish and Wildlife Service (FWS) is to work with others to conserve, protect, and enhance fish, wildlife, and plants and their habitats for the continuing benefit of the American people. FWS also provides opportunities for Americans to enjoy the outdoors and our shared natural heritage.

FWS fulfills its responsibilities through a diverse array of programs that:

- Protect and recover endangered and threatened species;
- Monitor and manage migratory birds;
- Restore native aquatic populations and nationally significant fisheries;
- Enforce Federal wildlife laws and regulate international trade;
- Conserve and restore wildlife habitat such as wetlands;
- Help foreign governments conserve wildlife through international conservation efforts;
- Distribute Federal funds to States, territories, and tribes for fish and wildlife conservation projects; and
- Manage the more than 150 million acre National Wildlife Refuge System, which protects and conserves fish and wildlife and their habitats, and allows the public to engage in outdoor recreational activities.

During the next year, FWS regulatory priorities will include:

- Regulations under the Endangered Species Act (ESA).

We will issue multiple rules under the ESA to conserve both domestic and foreign animal and plant species. Accordingly, we will add species to, remove species from, and reclassify species on the Lists of Endangered and Threatened Wildlife and Plants and designate critical habitat for certain listed species. We will issue a comprehensive compensatory mitigation policy that sets standards for compensatory mitigation and minimum criteria that should provide better ecological outcomes for listed and at-risk species through effective management of the risks associated with compensatory mitigation. The policy will encourage a proactive approach that will take advantage of economies of scale and provide greater regulatory certainty and predictability for the regulated community.

- Regulations under the Migratory Bird Treaty Act (MBTA).

In carrying out our responsibility to manage migratory bird populations, we issue annual migratory bird hunting regulations, which establish the frameworks (outside limits) for States to establish season lengths, bag limits, and areas for migratory game bird hunting. Additionally, FWS is considering whether to issue a proposed rulemaking to address various approaches to regulating incidental take of migratory birds, including issuing individual permits, general permits, and Federal agency authorizations. The rulemaking would establish appropriate standards for any such regulatory approach to ensure that incidental take of migratory birds is appropriately mitigated, which may include requiring measures to avoid or minimize take or securing compensation.

The FWS is also refining its management objectives for bald eagles and golden eagles and revising the regulations pertaining to issuing permits for nonpurposeful take of eagles and eagle nest take. The revisions will add clarity to the eagle permit regulations, improve their implementation, and increase compliance, while providing strong protection for eagles.

- Regulations to administer the National Wildlife Refuge System (NWRS).

In carrying out our statutory responsibility to provide wildlife-dependent recreational opportunities on NWRS lands, we issue an annual rule to update the hunting and fishing regulations on specific refuges. To protect NWRS resources, we will issue a rule to ensure that businesses conducting oil or gas operations on NWRS lands do so in a manner that prevents or minimizes damage to the lands, visitor values, and management objectives.

- Regulations to carry out the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts (Acts).

Under the Acts, the FWS distributes annual apportionments to States from trust funds derived from excise tax revenues and fuel taxes. We continue to direct state fish and wildlife agencies on how to use these funds to implement conservation projects. To strengthen our partnership with State conservation organizations, we are working on several rules to update and clarify our regulations. Planned regulatory revisions will help to reflect several new decisions agreed upon by state conservation organizations, we are working on several rules to update and clarify our regulations. Planned regulatory revision will help to reflect several new decisions agreed upon by State and Federal partners. We will also expand on existing regulations that prescribe processes that applicants and grantees must follow when applying for and managing grants from FWS.

- Regulations to carry out the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and the Lacey Act.

In accordance with section 3(a) of Executive Order 13609 (Promoting International Regulatory Cooperation), we will update our CITES regulations to incorporate provisions resulting from the 16th Conference of the Parties to CITES. The revisions will help us more effectively promote species conservation and help U.S. importers and exporters of wildlife products understand how to conduct lawful international trade.

National Park Service

The National Park Service (NPS) preserves unimpaired the natural and cultural resources and values within more than 400 units of the National Park System encompassing nearly 84 million acres of lands and waters for the enjoyment, education, and inspiration of this and future generations. The NPS also cooperates with partners to extend the benefits of natural and resource conservation and outdoor recreation throughout the United States and the world.

To achieve this mission NPS adheres to the following guiding principles:

- *Excellent Service:* Providing the best possible service to park visitors and partners.
- *Productive Partnerships:* Collaborating with Federal, State, tribal, and local governments, private organizations, and businesses to work toward common goals.
- *Citizen Involvement:* Providing opportunities for citizens to participate in the decisions and actions of the National Park Service.
- *Heritage Education:* Educating park visitors and the general public about their history and common heritage.
- *Outstanding Employees:* Empowering a diverse workforce committed to excellence, integrity, and quality work.
- *Employee Development:* Providing developmental opportunities and training so employees have the ''tools to do the job'' safely and efficiently.
- *Wise Decisions:* Integrating social, economic, environmental, and ethical considerations into the decisionmaking process.
- *Effective Management:* Instilling a performance management philosophy that fosters creativity, focuses on results, and requires accountability at all levels.

• *Research and Technology:* Incorporating research findings and new technologies to improve work practices, products, and services.

The NPS regulatory priorities for the coming year include:

• Managing Off-Road Vehicle Use.

Rules for Fire Island National Seashore, Glen Canyon National Recreation Area, and Cape Lookout National Seashore would allow for management of off-road vehicle (ORV) use, to protect and preserve natural and cultural resources, and provide a variety of visitor use experiences while minimizing conflicts among user groups. Further, the rules would designate ORV routes and establish operational requirements and restrictions.

• Managing Disposition of Archeological Materials.

The rule will establish definitions, standards, procedures, and guidelines to be followed by Federal agencies to dispose of particular archeological material remains that are in collections recovered during Federal projects and programs under certain Federal statutes. This rule is necessary because, at present, there is no procedure to dispose of material remains that are determined to be of insufficient archeological interest.

• Implementing the Native American Graves Protection and Repatriation Act (NAGPRA).

A rule revising the existing regulations would describe the NAGPRA process in plain language, eliminate ambiguity, clarify terms, and include Native Hawaiians in the process. The rule would eliminate unnecessary requirements for museums and would not add processes or collect additional information.

• Regulating Non-Federal Oil and Gas Activity on NPS Lands.

NPS will revise its existing regulations to account for new technology and industry practices, eliminate regulatory exemptions, update new legal requirements, remove caps on bond amounts, and allow the NPS to recover compliance costs associated with administering the regulations.

• Managing Service Animals.

The rule will define and differentiate service animals from pets, and will describe the circumstances under which service animals would be allowed in a park area. The rule will ensure NPS compliance with section 504 of the Rehabilitation Act of 1973 (28 U.S.C. 794) and better align NPS regulations with the Americans with Disabilities Act of 1990 (42 U.S.C. 1211 *et seq.*) and the Department of Justice Service Animal regulations of 2011 (28 CFR 36.104).

• Managing Subsistence Collection—NPS Units—Alaska Region.

The rule will allow qualified subsistence users to collect and use non-edible fish and wildlife parts and plant materials for the creation and subsequent disposition (use, barter, or sale) of handicrafts. The rule will also (1) clarify that collecting or possessing living wildlife is generally prohibited, and (2) limit the types of bait that may be used to take bears for subsistence uses.

• Managing Sale and Distribution of Printed Matter and Other Message Bearing Items—NPS Units Nationwide.

The rule would allow the free distribution of message-bearing items that do not meet the definition of ''printed matter'' in existing regulations. These items include readable electronic media, clothing and accessories, buttons, pins, and bumper stickers. The rule would implement current NPS policy.

Bureau of Reclamation

The Bureau of Reclamation's mission is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public. To accomplish this mission, we employ management, engineering, and science to achieve effective and environmentally sensitive solutions.

Reclamation projects provide: Irrigation water service, municipal and industrial water supply, hydroelectric power generation, water quality improvement, groundwater management, fish and wildlife enhancement, outdoor recreation, flood control, navigation, river regulation and control, system optimization, and related uses. We have continued to focus on increased security at our facilities.

Our regulatory program focus in Fiscal Year 2017 is to publish a proposed minor amendment to 43 CFR part 429 to bring it into compliance with the requirements of 43 CFR part 5, Commercial Filming and Similar Projects and Still Photography on Certain Areas under Department Jurisdiction. Publishing this rule will implement the provisions of Public Law 106–206, which directs the establishment of permits and reasonable fees for commercial filming and certain still photography activities on public lands.

BILLING CODE 4334–63–P

DEPARTMENT OF JUSTICE (DOJ)—FALL 2016

Statement of Regulatory Priorities

The mission of the Department of Justice is to enforce the law and defend the interests of the United States according to the law, to ensure public safety against foreign and domestic threats, to provide Federal leadership in preventing and controlling crime, to seek just punishment for those guilty of unlawful behavior, and to ensure the fair and impartial administration of justice for all Americans. In carrying out its mission, the Department is guided by four core values: (1) Equal justice under the law; (2) honesty and integrity; (3) commitment to excellence; and (4) respect for the worth and dignity of each human being. The Department of Justice is primarily a law enforcement agency, not a regulatory agency; it carries out its principal investigative, prosecutorial, and other enforcement activities through means other than the regulatory process.

The regulatory priorities of the Department include initiatives in the areas of civil rights, criminal law enforcement and immigration. These initiatives are summarized below. In addition, several other components of the Department carry out important responsibilities through the regulatory process. Although their regulatory efforts are not separately discussed in this overview of the regulatory priorities, those components have key roles in implementing the Department's anti-terrorism and law enforcement priorities.

Civil Rights

The Department is planning to publish a rule amending the Department's section 504 regulations for federally assisted programs and activities to incorporate changes adopted by the ADA Amendments Act of 2008 and other legal developments (RIN 1105–AB50). In addition, the Civil Rights Division is including the following disability nondiscrimination rulemaking initiatives in the Department's Regulatory Plan: (1) Nondiscrimination on the Basis of Disability by Public Accommodations: Movie Captioning and Audio Description (RIN 1190–AA63); (2) Accessibility of Web Information and Services of State and Local Governments (RIN 1190–AA65); and (3) Implementation of the ADA Amendments Act of 2008 in the Department's section 504 Federal Coordination regulation (RIN 1190–AA72).

The Civil Rights Division will also be revising its regulations for Coordination of Enforcement of Non-Discrimination in Federally Assisted Programs under title VI of the Civil Rights Act (RIN 1190–AA70), as well as revising regulations implementing section 274B of the Immigration and Nationality Act with respect to unfair immigration-related employment practices (RIN 1190–AA71).

Other disability nondiscrimination rulemaking initiatives, while important priorities for the Department's rulemaking agenda, will be included in the Department's long-term actions for fiscal years 2017 and 2018. As will be discussed more fully below, these initiatives include: (1) Next Generation 9–1–1 Services (RIN 1190–AA62); (2) Accessibility of Web Information and Services of Public Accommodations (RIN 1190–AA61); (3) Accessibility of Equipment and Furniture (RIN 1190–AA64), including Accessibility of Medical Equipment and Furniture (RIN 1190–AA66), and Accessibility of Beds in Guestrooms with Mobility Features in Places of Lodging (RIN 1190–AA67); and (4) Implementation of the ADA Amendments Act of 2008 in the Department's section 504 regulation with respect to federally conducted programs and activities (RIN 1190–AA73).

Regulatory Plan Initiatives

Captioning and Audio Description in Movie Theaters (RIN 1190–AA63). Title III of the ADA requires public accommodations to take ''such steps as may be necessary to ensure that no individual with a disability is treated differently because of the absence of auxiliary aids and services, unless the covered entity can demonstrate that taking such steps would cause a fundamental alteration or would result in an undue burden.'' 42 U.S.C. 12182(b)(2)(A)(iii). Both open and closed captioning and audio recordings are examples of auxiliary aids and services that should be provided by places of public accommodations, 28 CFR 36.303(b)(1)–(2). The Department stated in the preamble to its 1991 rule that ''[m]ovie theaters are not required . . . to present open-captioned films,'' 28 CFR part 36, app. C (2011), but did not address closed captioning and audio description in movie theaters. In the movie theater context, ''closed captioning'' refers to captions that only the patron requesting the closed captions can see because the captions are delivered to the patron at or near the patron's seat. Audio description is a technology that enables individuals who are blind or have low vision to enjoy movies by providing a spoken narration of key visual elements of a visually delivered medium, such as actions, settings, facial expressions, costumes, and scene changes.

Since 1991, there have been many technological advances in the area of closed captioning and audio description for first-run movies. In June 2008, the Department issued an NPRM to revise the ADA title III regulation, 73 FR 34466, in which the Department stated that it was considering options for requiring that movie theater owners or operators exhibit movies that are captioned or that provide video (narrative) description. The Department issued an ANPRM on July 26, 2010, to obtain more information regarding issues raised by commenters; to seek comment on technical questions that arose from the Department's research; and to learn more about the status of digital conversion. In addition, the Department sought information regarding whether other technologies or areas of interest (*e.g.,* 3D) have developed or are in the process of development that would either replace or augment digital cinema or make any regulatory requirements for captioning and audio description more difficult or expensive to implement. The Department received approximately 1,171 public comments in response to its movie captioning and video description ANPRM. On August 1, 2014, the Department published its NPRM proposing to revise the ADA title III regulation to require movie theaters to have the capability to exhibit movies with closed movie captioning and audio description (which was described in the ANPRM as video description) for all showings of movies that are available with closed captioning or audio description, to require theaters to provide notice to the public about the availability of these services, and to ensure that theaters have staff available who can provide information to patrons about the use of these services. In response to a request for an extension of the public comment period, the Department issued a notice extending the comment period for 60 days until December 1, 2014. The Department received approximately 435 public comments in response to the movie captioning and audio description NPRM and expects to publish a final rule during fiscal year 2016.

Web site Accessibility: State and Local Governments (RIN 1190–AA65). The Internet as it is known today did not exist when Congress enacted the ADA, yet today the Internet plays a critical role in the daily personal, professional, civic, and business lives of Americans. The ADA's expansive nondiscrimination mandate reaches public entities' programs, services, or activities offered on or through their Web sites. Being unable to access Web sites puts individuals at a great disadvantage in today's society, which is driven by a dynamic electronic marketplace and unprecedented access to information. For individuals with disabilities who experience barriers to their ability to travel or to leave their homes, the Internet may be their only way to access certain government programs and services. In this regard, the Internet is dramatically changing the way that governmental entities serve the public. Public entities are increasingly providing their constituents access to government services and programs through their Web sites. Information available on the Internet has become a gateway to education and participation in many other public programs and activities. Through Government Web sites, the public can obtain information or correspond with local officials without having to wait in line or be placed on hold. They can also pay fines, apply for benefits, renew State-issued identification, register to vote, file taxes, request copies of vital records, and complete numerous other everyday tasks. The availability of these services and information online not only makes life easier for the public but also often enables governmental entities to operate more efficiently and at a lower cost.

The ADA's promise to provide an equal opportunity for individuals with disabilities to participate in and benefit from all aspects of American civic and economic life will be achieved in today's technologically advanced society only if it is clear to State and Local governments that their Web sites must be accessible. Consequently, the Department is planning to amend its regulation implementing title II of the ADA to require public entities that provide services, programs or activities to the public through Internet Web sites to make their sites accessible to and usable by individuals with disabilities.

The Department, in its 2010 ANPRM on Web site accessibility, indicated that it was considering amending its regulations implementing titles II and III of the ADA to require Web site accessibility and it sought public comment regarding what standards, if any, it should adopt for Web site accessibility, whether the Department should adopt coverage limitations for certain entities, and what resources and services are available to make existing Web sites accessible to individuals with disabilities. The Department also solicited comments on the costs of

making Web sites accessible and on the existence of any other effective and reasonably feasible alternatives to making Web sites accessible. The Department received approximately 440 public comments and is in the process of reviewing these comments. The Department will be publishing separate NPRMs addressing Web site accessibility pursuant to titles II and III of the ADA.

On May 9, 2016 the Department published a Supplemental Advance Notice of Proposed Rulemaking (SANPRM) titled *Nondiscrimination on the Basis of Disability; Accessibility of Web Information and Services of State and Local Government Entities* addressing the potential application of technical accessibility requirements to the Web sites of title II entities. 81 FR 28657. Through the SANPRM, the Department intends to solicit additional public comment on various issues to help the Department shape and further its rulemaking efforts. The SANPRM asks 123 multipart questions, seeking public comment on a wide range of complex issues related to the potential technical accessibility requirements as well as any proposed title II web rule's costs and benefits.

Implementation of the ADA Amendments Act of 2008: Federally Assisted Programs (Section 504 of the Rehabilitation Act of 1973) (RIN 1105–AB50). Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), prohibits discrimination on the basis of disability in programs and activities receiving Federal financial assistance or in programs and activities conducted by an Executive agency. This rule would propose to revise the Department's regulation implementing section 504 of the Rehabilitation Act with respect to recipients of Federal financial assistance from the Department, 28 CFR part 42, subpart G, to reflect statutory amendments made by the ADA Amendments Act of 2008, Public Law 110–325, 122 Stat. 3553 (Sep. 25, 2008), and other legal developments since the current regulations were adopted.

The ADA Amendments Act, which took effect on January 1, 2009, revised 29 U.S.C. 705 to make the definition of disability used in the nondiscrimination provisions in title V of the Rehabilitation Act consistent with the amended ADA requirements. Specifically, these amended ADA requirements: (1) Clarify that the term ''disability'' shall be interpreted broadly and without extensive analysis; (2) add rules of construction to be applied when determining whether an impairment substantially limits a major life activity; (3) expand the definition of ''major life activities'' by providing a non-exhaustive list of ''major life activities'' that includes the operation of ''major bodily functions;'' and (4) modify the ''regarded as'' prong of the definition of disability by stating that an individual may be ''regarded as'' having an impairment even if that impairment does not limit or is not perceived to limit a major life activity, and clarifying that individuals covered only under the ''regarded as'' prong are not entitled to reasonable modifications. An update to 28 CFR part 42, subpart G, would, therefore, incorporate these changes and harmonize the regulation with the ADA Amendments Act and the revisions to title V of the Rehabilitation Act.

Implementation of the ADA Amendments Act of 2008: Federal Coordination (Section 504 of the Rehabilitation Act of 1973) (RIN 1190–AA72). Executive Order 12250 delegated the authority to coordinate the enforcement and implementation of section 504 of the Rehabilitation Act by Executive agencies to the Attorney General. Pursuant to this authority, the Department proposes to revise its regulation implementing Executive Order 12250, 28 CFR part 41, to reflect statutory amendments to section 504 of the Rehabilitation Act made by the ADA Amendments Act of 2008. The proposed revisions to the Department's Federal Coordination regulation would be consistent with the proposed revisions to the Department's Federally Assisted regulation discussed above.

Coordination of Enforcement of Non-Discrimination in Federally Assisted Programs (RIN 1190–AA70). In addition, the Department is planning to revise the coordination regulations implementing title VI of the Civil Rights Act, which have not been updated in over 30 years. Among other things, the updates will revise outdated provisions, streamline procedural steps, streamline and clarify provisions regarding information and data collection, promote opportunities to encourage public engagement, and incorporate current law regarding meaningful access for individuals who are limited English proficient.

Implementation of Section 274B of the Immigration and Nationality Act (RIN 1190–AA71). The Department also proposes to revise regulations implementing section 274B of the Immigration and Nationality Act, and to reflect the new name of the office within the Department charged with enforcing this statute. The proposed revisions are appropriate to conform the regulations to the statutory text as amended, simplify and add definitions of statutory terms, update and clarify the procedures for filing and processing charges of discrimination, ensure effective investigations of unfair immigration-related employment practices, and update outdated references.

Long-Term Actions

The remaining disability nondiscrimination rulemaking initiatives from the 2010 ANPRMs are included in the Department's long-term priorities projected for fiscal years 2017 and 2018:

Next Generation 9–1–1 (RIN 1190–AA62). This ANPRM sought information on possible revisions to the Department's regulation to ensure direct access to Next Generation 9–1–1 (NG 9–1–1) services for individuals with disabilities. In 1991, the Department of Justice published a regulation to implement title II of the Americans with Disabilities Act of 1990 (ADA). That regulation requires public safety answering points (PSAPs) to provide direct access to persons with disabilities who use analog telecommunication devices for the deaf (TTYs), 28 CFR 35.162. Since that rule was published, there have been major changes in the types of communications technology used by the general public and by people who have disabilities that affect their hearing or speech. Many individuals with disabilities now use the Internet and wireless text devices as their primary modes of telecommunications. At the same time, PSAPs are planning to shift from analog telecommunications technology to new Internet-Protocol (IP)-enabled NG 9–1–1 services that will provide voice and data (such as text, pictures, and video) capabilities. As PSAPs transition from the analog systems to the new technologies, it is essential that people with communication disabilities be able to use the new systems. Therefore, the Department published this ANPRM to begin to develop appropriate regulatory guidance for PSAPs that are making this transition. The Department is in the process of completing its review of the approximately 146 public comments it received in response to its NG 9–1–1 ANPRM.

Web Site Accessibility: Public Accommodations (RIN 1190–AA61). The ADA's expansive nondiscrimination mandate reaches the goods and services provided by public accommodations using Internet Web sites. The inability to access Web sites puts individuals at a great disadvantage in today's society, which is driven by a dynamic electronic marketplace and unprecedented access to information. On the economic front, electronic commerce, or ''e-commerce,'' often

offers consumers a wider selection and lower prices than traditional, ''brick-and-mortar'' storefronts, with the added convenience of not having to leave one's home to obtain goods and services. And, for individuals with disabilities who experience barriers to their ability to travel or to leave their homes, the Internet may be their only way to access certain goods and services. Beyond goods and services, information available on the Internet has become a gateway to education, socializing, and entertainment.

The Department's 2010 ANPRM on Web site accessibility sought public comment regarding what standards, if any, it should adopt for Web site accessibility, whether the Department should adopt coverage limitations for certain entities, including small businesses, and what resources and services are available to make existing Web sites accessible to individuals with disabilities. The Department also solicited comments on the costs of making Web sites accessible and on the existence of any other effective and reasonably feasible alternatives to making Web sites accessible. The Department is reviewing the public comments received in response to the ANPRM and, as noted above, plans to publish the title II NPRM on Web site accessibility in fiscal year 2017. The Department believes that the title II Web site accessibility rule will facilitate the creation of an important infrastructure for web accessibility that will be very important in the Department's preparation of the title III Web site accessibility NPRM. Consequently, the Department has decided to extend the time period for development of the proposed title III Web site accessibility rule and include it among its long-term rulemaking priorities.

Equipment and Furniture. Both title II and title III of the ADA require covered entities to make reasonable modifications in their programs or services to facilitate participation by persons with disabilities. In addition, covered entities are required to ensure that people are not excluded from participation because facilities are inaccessible or because the entity has failed to provide auxiliary aids. The use of accessible equipment and furniture is often critical to an entity's ability to provide a person with a disability equal access to its services. Changes in technology have resulted in the development and improved availability of accessible equipment and furniture that benefit individuals with disabilities. The 2010 ADA Standards include accessibility requirements for some types of fixed equipment (*e.g.,* ATMs, washing machines, dryers, tables, benches and vending machines) and the Department plans to look to these standards for guidance, where applicable, when it proposes accessibility standards for equipment and furniture that is not fixed. The ANPRM sought information about other categories of equipment, including beds in accessible guest rooms, and medical equipment and furniture. The Department received approximately 420 comments in response to its ANPRM and is in the process of reviewing these comments. The Department plans to publish an NPRM pursuant to title III of the ADA on beds in accessible guest rooms (RIN 1190–AA67), and also a separate NPRM pursuant to titles II and III of the ADA that focuses solely on accessible medical equipment and furniture (RIN 1190–AA66). The remaining items of equipment and furniture addressed in the 2010 ANPRM will be the subject of a subsequent NPRM.

Implementation of the ADA Amendments Act of 2008: Federally Conducted Programs (Section 504 of the Rehabilitation Act of 1973) (RIN 1190–AA73). As noted above, section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), prohibits discrimination on the basis of disability in programs and activities conducted by an Executive agency. The Department plans to revise its 504 federally conducted regulation at 28 CFR part 39 to update outdated terminology and reflect statutory amendments to the definition of disability applicable to section 504 of the Rehabilitation Act, as made by the ADA Amendments Act of 2008, Public Law 110–325, 122 Stat. 3553 (Sep. 25, 2008).

Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF)

ATF issues regulations to enforce the Federal laws relating to the manufacture and commerce of firearms and explosives. ATF's mission and regulations are designed to, among other objectives, curb illegal traffic in, and criminal use of, firearms and explosives, and to assist State, local, and other Federal law enforcement agencies in reducing crime and violence. ATF will continue, as a priority during fiscal year 2017, to seek modifications to its regulations governing commerce in firearms and explosives.

ATF plans to issue regulations to finalize the current interim rules implementing the provisions of the Safe Explosives Act, title XI, subtitle C, of Public Law 107–296, the Homeland Security Act of 2002 (enacted Nov. 25, 2002) (RIN 1140–AA00). The Department is also planning to finalize a proposed rule to codify regulations (27 CFR part 771) governing the procedure and practice for proposed denial of applications for explosives licenses or permits and proposed revocation of such licenses and permits (RIN 1140–AA38). As proposed, this rule would clarify the administrative hearing processes for explosives licenses and permits.

ATF also has begun a rulemaking process that amends 27 CFR part 447 to update the terminology in the ATF regulations based on similar terminology amendments made by the Department of State on the U.S. Munitions List in the International Traffic in Arms Regulations, and the Department of Commerce on the Commerce Control List in the Export Administration Regulations (RIN 1140–AA49).

Drug Enforcement Administration (DEA)

DEA is the primary agency responsible for coordinating the drug law enforcement activities of the United States and also assists in the implementation of the President's National Drug Control Strategy. DEA implements and enforces titles II and III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and the Controlled Substances Import and Export Act (21 U.S.C. 801–971), as amended, and collectively referred to as the Controlled Substances Act (CSA). DEA's mission is to enforce the CSA and its regulations and bring to the criminal and civil justice system those organizations and individuals involved in the growing, manufacture, or distribution of controlled substances and listed chemicals appearing in or destined for illicit traffic in the United States. DEA promulgates the CSA implementing regulations in title 21 of the Code of Federal Regulations (CFR), parts 1300 to 1321. The CSA and its implementing regulations are designed to prevent, detect, and eliminate the diversion of controlled substances and listed chemicals into the illicit market while providing for the legitimate medical, scientific, research, and industrial needs of the United States.

Pursuant to its statutory authority, DEA continuously evaluates new and emerging substances to determine whether such substances should be controlled under the CSA. During fiscal year 2016, in addition to initiating temporary scheduling actions to prevent imminent hazard to the public safety, DEA will also consider petitions to control or reschedule various substances. Among other regulatory

reviews and initiatives, DEA plans to update its regulations for the import and export of tableting and encapsulating machines, controlled substances, and listed chemicals, and its regulations relating to reports required for domestic transactions in listed chemicals, gammy-hydroxybutyric acid, and tableting and encapsulating machines. In accordance with Executive Order 13563, the DEA has published an NPRM proposing to amend these regulations and plans to finalize these proposals promptly (RIN 1117–AB41).

Bureau of Prisons

The Federal Bureau of Prisons issues regulations to enforce the Federal laws relating to its mission: To protect society by confining offenders in the controlled environments of prisons and community-based facilities that are safe, humane, cost-efficient, and appropriately secure, and that provide work and other self-improvement opportunities to assist offenders in becoming law-abiding citizens. During the next 12 months, in addition to other regulatory objectives aimed at accomplishing its mission, the Bureau will continue its ongoing efforts to: Streamline regulations, eliminating unnecessary language and improving readability; improve disciplinary procedures through a revision of the subpart relating to the disciplinary process (RIN 1120–AB71); improve safety in facilities through the use of less-than-lethal force instead of traditional weapons (RIN 1120–AB67); and provide effective literacy programming which serves both general and specialized inmate needs (RIN 1120–AB64).

Executive Office for Immigration Review (EOIR)

On March 1, 2003, pursuant to the Homeland Security Act of 2002 (HSA), the responsibility for immigration enforcement and border security and for providing immigration-related services and benefits, such as naturalization, immigrant petitions, and work authorization, was transferred from the Justice Department's former Immigration and Naturalization Service (INS) to the Department of Homeland Security (DHS). However, the immigration judges and the Board of Immigration Appeals (Board) in EOIR remain part of the Department of Justice. The immigration judges adjudicate approximately 300,000 cases each year to determine whether aliens should be ordered removed from the United States or should be granted some form of relief from removal. The Board has jurisdiction over appeals from the decisions of immigration judges, as well as other matters. Accordingly, the Attorney General has a continued role in the conducting of immigration proceedings, including removal proceedings and custody determinations regarding the detention of aliens pending completion of removal proceedings. The Attorney General also is responsible for civil litigation and criminal prosecutions relating to the immigration laws.

In several pending rulemaking actions, the Department is working to revise and update the regulations relating to immigration proceedings in order to further EOIR's primary mission to adjudicate immigration cases by fairly, expeditiously, and uniformly interpreting and administering the Nation's immigration laws. These pending regulations include but are not limited to: A final regulation to establish procedures for the filing and adjudication of motions to reopen removal, deportation, and exclusion proceedings based upon a claim of ineffective assistance of counsel (1125–AA68); a final regulation to improve the recognition and accreditation process for organizations and representatives that appear in immigration proceedings before EOIR (RIN 1125–AA72); and a proposed regulation to implement procedures that address the specialized needs of unaccompanied alien children in removal proceedings pursuant to the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (RIN 1125–AA70). In response to Executive Order 13653, the Department is retrospectively reviewing EOIR's regulations to eliminate regulations that unnecessarily duplicate DHS's regulations and update outdated references to the pre-2003 immigration system (RIN 1125–AA71).

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), the following Regulatory Identifier Numbers (RINs) have been identified as associated with retrospective review and analysis in the Department's final retrospective review of regulations plan. Some of these entries on this list may be completed actions, which do not appear in *The Regulatory Plan.* However, more information can be found about these completed rulemakings in past publications of the Unified Agenda on *Reginfo.gov* in the Completed Actions section for that agency. These rulemakings can also be found on *Regulations.gov*. The final Justice Department plan can be found at: *http://www.justice.gov/open/doj-rr-final-plan.pdf.*

RIN	Title	Description
1125–AA62	List of Pro Bono Legal Service Providers for Aliens in Immigration Proceedings.	The Department has published a Final rule amending the EOIR regulations to enhance the eligibility requirements for organizations, private attorneys, and referral services to be included on the List of Pro Bono Legal Service Providers.
1125–AA71	Retrospective Regulatory Review Under E.O. 13563 of 8 CFR parts 1003, 1103, 1211, 1212, 1215, 1216, 1235.	Advance notice of future rulemaking concerning appeals of DHS decisions (8 CFR part 1103), documentary requirements for aliens (8 CFR parts 1211 and 1212), control of aliens departing from the United States (8 CFR part 1215), procedures governing conditional permanent resident status (8 CFR part 1216), and inspection of individuals applying for admission to the United States (8 CFR part 1235). A number of attorneys, firms, and organizations in immigration practice are small entities. EOIR believes this rule will improve the efficiency and fairness of adjudications before EOIR by, for example, eliminating duplication, ensuring consistency with the Department of Homeland Security's regulations in chapter I of title 8 of the CFR, and delineating more clearly the authority and jurisdiction of each agency. The ANPRM was published on 9/28/2012. The comment period closed on 11/27/2012. EOIR is currently in the process of reviewing the comments received and drafting two follow-up NPRMs.

RIN	Title	Description
1125–AA72	Recognition of Organizations and Accreditations of Non- Attorney Representatives.	This rule amends the regulations governing the requirements and procedures for authorizing representatives of non-profit religious, charitable, social service, or similar organizations to represent persons in proceedings before the Executive Office for Immigration Review (EOIR) and the Department of Homeland Security (DHS).
1125–AA78	Separate Representation for Custody and Bond Proceedings.	The Department has published a Final rule amending the Executive Office for Immigration Review (EOIR) regulations relating to the representation of aliens in custody and bond proceedings by allowing a representative to enter an appearance in custody and bond proceedings before EOIR without committing to appear on behalf of the alien for all proceedings before the Immigration Court.
1117–AB37	Transporting to Dispense Controlled Substances on an As-Needed and Random Basis.	DEA proposes to amend its regulations to clearly delineate how to transport, dispense, and store controlled substances away from registered locations when such activities are for the purpose of dispensing controlled substances on an as-needed and random basis. These proposed amendments include changes necessary to implement the Veterinary Medicine Mobility Act of 2014 and to clarify controlled substance handling requirements for emergency response operations.
1117–AB41	Implementation of the International Trade Data System.	DEA plans to update its regulations for the import and export of tableting and encapsulating machines, controlled substances, and listed chemicals, and its regulations relating to reports required for domestic transactions in listed chemicals, gammy-hydroxybutyric acid, and tableting and encapsulating machines. In accordance with Executive Order 13563, the DEA has plans to review its import and export regulations and reporting requirements for domestic transactions in listed chemicals (and gammy-hydroxybutyric acid) and tableting and encapsulating machines, and evaluate them for clarity, consistency, continued accuracy, and effectiveness. The proposed amendments would clarify certain policies and reflect current procedures and technological advancements. The amendments would also allow for the implementation, as applicable to tableting and encapsulating machines, controlled substances, and listed chemicals, of the President's Executive Order 13659 on streamlining the export/import process and requiring the government-wide utilization of the International Trade Data System.
1121–AA85; 1121–AA86	Public Safety Officers' Benefits (PSOB) Program.	These two related rules are a priority because certain key provisions of the PSOB rule have been superseded by statutory change, a need exists to improve the overall efficiency of the program, and the last significant update to the rules was in 2008. The first rule proposes to update the existing regulation to address issues related to injuries and deaths of public safety officers asserted to have been caused by 9/11 services, and offset issues with the 9/11 Victim Compensation Fund. The second rule proposes a more comprehensive update of the PSOB regulation. These revisions are necessary as a result of significant changes to the Program following the enactment of the Dale Long Public Safety Officers' Benefits Improvements Act of 2012 (signed into law in January 2013), as well as recommendations from an OIG Audit finalized in July 2015, and other internal reviews that identified the need to streamline the claims review process to reduce delays and increase transparency.

Executive Order 13609—Promoting International Regulatory Cooperation

The Department is not currently engaged in international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations.

Executive Order 13659

Executive Order 13659, ''Streamlining the Export/Import Process for America's Businesses,'' provided new directives for agencies to improve the technologies, policies, and other controls governing the movement of goods across our national borders. This includes additional steps to implement the International Trade Data System as an electronic information exchange capability, or ''single window,'' through which businesses will transmit data required by participating agencies for the importation or exportation of cargo.

At the Department of Justice, stakeholders must obtain pre-import and pre-export authorizations from the Drug Enforcement Administration (DEA) (relating to controlled substances and listed chemicals), or from the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) (relating to firearms, ammunition, and explosives). The ITDS ''single window'' will work in conjunction with these pre-import and pre-export authorizations. Because the ITDS excludes applications for permits, licenses, or certifications, the ITDS single window will not be used by DEA registrants, regulated persons, or brokers or traders applying for permits or filing import/export declarations, notifications or reports. The DEA import/export application and filing processes will continue to remain separate from (and in advance of) the ITDS single window. Entities will continue to use the DEA application and filing processes; however, the processes will be electronic rather than paper. After DEA's approval or notification of receipt as appropriate, the DEA will transmit the necessary information electronically to the ITDS and the registrant or regulated person.

Pursuant to section 6 of E.O. 13659, DEA and ATF have consulted with U.S. Customs and Border Protection (CBP) and are continuing to study what modifications and technical changes to their existing regulations and operational systems are needed to achieve the goals of E.O. 13659.

DOJ—CIVIL RIGHTS DIVISION (CRT)

Proposed Rule Stage

72. Nondiscrimination on the Basis of Disability: Accessibility of Web Information and Services of State and Local Governments

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 42 U.S.C. 12101 *et seq.*

CFR Citation: 28 CFR 35.

Legal Deadline: None.

Abstract: The Department published an ANPRM on July 26, 2010, RIN 1190–AA61, that addressed issues relating to proposed revisions of both the title II and title III ADA regulations in order to provide guidance on the obligations of covered entities to make programs, services and activities offered over the Web accessible to individuals with disabilities. The Department has now divided the rulemakings in the next step of the rulemaking process so as to proceed with separate notices of proposed rulemakings for title II and title III. The title III rulemaking on Web accessibility will continue under RIN 1190–AA61 and the title II rulemaking will continue under the new RIN 1190–AA65. This rulemaking will provide specific guidance to State and local governments in order to make services, programs, or activities offered to the public via the Web accessible to individuals with disabilities. The ADA requires that State and local governments provide qualified individuals with disabilities equal access to their programs, services, or activities unless doing so would fundamentally alter the nature of their programs, services, or activities or would impose an undue burden. 42. U.S.C. 12132. The Internet as it is known today did not exist when Congress enacted the ADA; yet today the Internet is dramatically changing the way that governmental entities serve the public. Taking advantage of new technology, citizens can now use State and local government Web sites to correspond online with local officials; obtain information about government services; renew library books or driver's licenses; pay fines; register to vote; obtain tax information and file tax returns; apply for jobs or benefits; and complete numerous other civic tasks. These Government Web sites are important because they allow programs and services to be offered in a more dynamic, interactive way in order to increase citizen participation; increase convenience and speed in obtaining information or services; reduce costs in providing information about Government services and administering programs; reduce the amount of paperwork; and expand the possibilities of reaching new sectors of the community or offering new programs or services. Many States and localities have begun to improve the accessibility of portions of their Web sites. However, full compliance with the ADA's promise to provide an equal opportunity for individuals with disabilities to participate in and benefit from all aspects of the programs, services, and activities provided by State and local governments in today's technologically advanced society will only occur if it is clear to public entities that their Web sites must be accessible. Consequently, the Department intends to publish a Notice of Proposed Rulemaking (NPRM) to amend its title II regulations to expressly address the obligations of public entities to make the Web sites they use to provide programs, activities, or services or information to the public accessible to and usable by individuals with disabilities under the legal framework established by the ADA. The proposed regulation will propose the scope of the obligation to provide accessibility when persons with disabilities access public Web sites, as well as propose the technical standards necessary to comply with the ADA.

Statement of Need: Many people with disabilities use ''assistive technology'' to enable them to use computers and access the Internet. Individuals who are blind or have low vision who cannot see computer monitors may use screen readers-devices that speak the text that would normally appear on a monitor. People who have difficulty using a computer mouse can use voice recognition software to control their computers with verbal commands. People with other types of disabilities may use still other kinds of assistive technology. New and innovative assistive technologies are being introduced every day. Web sites that do not accommodate assistive technology, for example, can create unnecessary barriers for people with disabilities, just as buildings not designed to accommodate people with disabilities prevent some individuals from entering and accessing services. Web designers may not realize how simple features built into a Web site will assist someone who, for instance, cannot see a computer monitor or use a mouse. In addition, in many cases, these Web sites do not provide captioning for videos or live events streamed over the web, leaving persons who are deaf or hard of hearing unable to access the information that is being provided. Although an increasing number of State and local Governments are making efforts to provide accessible Web sites, because there are no specific ADA standards for Web site accessibility, these Web sites vary in actual usability.

Summary of Legal Basis: The ADA requires that State and local Governments provide qualified individuals with disabilities equal access to their programs, services, or activities unless doing so would fundamentally alter the nature of their programs, services, or activities or would impose an undue burden. 42 U.S.C. 12132.

Alternatives: The Department intends to consider various alternatives for ensuring full access to Web sites of State and local Governments and will solicit public comment addressing these alternatives.

Anticipated Cost and Benefits: The Department anticipates that this rule will be ''economically significant,'' that is, that the rule will have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal Governments or communities. However, the Department believes that revising its title II rule to clarify the obligations of State and local Governments to provide accessible Web sites will significantly increase the opportunities for citizens with disabilities to participate in, and benefit from, State and local Government programs, activities, and services. It will also ensure that individuals have access to important information that is provided over the Internet, including emergency information. The Department also believes that providing accessible Web sites will benefit State and local Governments as it will increase the numbers of citizens who can use these Web sites, and thus improve the efficiency of delivery of services to the public. In drafting this NPRM, the Department will attempt to minimize the compliance costs to State and local Governments while ensuring the benefits of compliance to persons with disabilities.

Risks: If the Department does not revise its ADA title II regulations to address Web site accessibility, persons with disabilities in many communities will continue to be unable to access their State and local governmental services in the same manner available to citizens without disabilities, and in some cases will not be able to access those services at all.

Final Rule Stage

73. Nondiscrimination on the Basis of Disability; Movie Captioning and Audio Description

Priority: Other Significant.

Legal Authority: 42 U.S.C. 12101, *et seq.*

CFR Citation: 28 CFR 36.

Legal Deadline: None.

Abstract: Following its advance notice of proposed rulemaking published on July 26, 2010, the Department plans to publish a proposed rule addressing the requirements for captioning and video description of movies exhibited in movie theatres under title III of the Americans with Disabilities Act of 1990 (ADA). Title III prohibits discrimination on the basis of disability in the activities of places of public accommodation (private entities whose operations affect commerce and that fall into one of twelve categories listed in the ADA). 42 U.S.C. 12181–12189. Title III makes it unlawful for places of public accommodation, such as movie theaters, to discriminate against individuals with disabilities in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of a place of public accommodation (42 U.S.C. 12182[a]). Moreover, title III prohibits places of public accommodation from affording an unequal or lesser service to individuals or classes of individuals with disabilities than is offered to other individuals (42 U.S.C. 12182(b)(1)(A)(ii)). Title III requires places of public accommodation to take ''such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently because of the absence of auxiliary aids and services, such as captioning and video description, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in an undue burden,'' (42 U.S.C. 12182(b)(2)(A)(iii)).

Statement of Need: A significant-and increasing-proportion of Americans have hearing or vision disabilities that prevent them from fully and effectively understanding movies without captioning or audio description. For persons with hearing and vision disabilities, the unavailability of captioned or audio-described movies inhibits their ability to socialize and fully take part in family outings and deprives them of the opportunity to meaningfully participate in an important aspect of American culture. Many individuals with hearing or vision disabilities who commented on the Department's 2010 ANPRM remarked that they have not been able to enjoy a commercial movie unless they watched it on TV, or that when they took their children to the movies they could not understand what they were seeing or discuss what was happening with their children. Today, more and more movies are produced with captions and audio description. However, despite the underlying ADA obligation, the advancement of digital technology and the availability of captioned and audio-described films, many movie theaters are still not exhibiting captioned or audio-described movies, and when they do exhibit them, they are only for a few showings of a movie, and usually at off-times. Recently, a number of theater companies have committed to provide greater availability of captioning and audio description. In some cases, these have been nationwide commitments; in other cases it has only been in a particular State or locality. A uniform Federal ADA requirement for captioning and audio description is necessary to ensure that access to movies for persons with hearing and vision disabilities is not dictated by the individual's residence or the presence of litigation in their locality. In addition, the movie theater industry is in the process of converting its movie screens to use digital technology, and the Department believes that it will be extremely helpful to provide timely guidance on the ADA requirements for captioning and audio description so that the industry may factor this into its conversion efforts and minimize costs.

Summary of Legal Basis: The summary of the legal basis of authority for this regulation is set forth above in the abstract.

Alternatives: The Department will consider any public comments that propose achievable alternatives that will still accomplish the goal of providing access to movies for persons with hearing and vision disabilities. However, the Department believes that the baseline alternative of not providing such access would be inconsistent with the provisions of title III of the ADA.

Anticipated Cost and Benefits: The Department's preliminary analysis indicates that the proposed rule would not be ''economically significant,'' that is, that the rule will not have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal governments or communities. In the NPRM, the Department solicited public comment in response to its preliminary analysis regarding the costs imposed by the rule.

Risks: Without the proposed changes to the Department's title III regulation, persons with hearing and vision disabilities will continue to be denied access to movies shown in movie theaters and movie theater owners and operators will not understand what they are required to do in order to provide auxiliary aids and services to patrons with hearing and vision disabilities.

RIN: 1190–AA63

DOJ—CRT

74. Revision of Standards and Procedures for the Enforcement of Section 274B of the Immigration and Nationality Act

Priority: Other Significant.

Legal Authority: 5 U.S.C. 301; 8 U.S.C. 1103(a)(1); 8 U.S.C. 1103(g); 8 U.S.C. 1324b; 28 U.S.C. 509; 28 U.S.C. 510; 28 U.S.C. 515–519

CFR Citation: 28 CFR 0; 28 CFR 44

Legal Deadline: None.

Abstract: The Department of Justice proposes to revise regulations implementing section 274B of the Immigration and Nationality Act and to reflect the new name of the office within the Department charged with enforcing this statute. The proposed revisions are appropriate to conform the regulations to the statutory text as amended, simplify and add definitions of statutory terms, update and clarify the procedures for filing and processing charges of discrimination, ensure effective investigations of unfair immigration-related employment practices, and update outdated references.

Statement of Need: The regulatory revisions are necessary to conform the regulations to section 274B of the Immigration and Nationality Act (INA), as amended. The regulatory revisions also simplify and add definitions of statutory terms, update and clarify the procedures for filing and processing charges of discrimination, ensure effective investigations of unfair immigration-related employment practices, replace outdated references, and reflect the new name of the office within the Department charged with enforcing this statute.

Summary of Legal Basis: Statutory Authority: 8 U.S.C. 1324b; 8 U.S.C. 1103(a)(1), (g).

Alternatives: The Department believes that an NPRM is the most appropriate, and for some revisions a necessary, method for achieving the goals of the revisions. Issuing this NPRM is necessary to correct outdated regulatory provisions and incorporate statutory changes to section 274B of the INA. Likewise, revising the regulations to be consistent with longstanding agency guidance and relevant case law is appropriate and will reduce potential confusion about the law. Further, because the regulations already include procedures for filing and processing charges, it is appropriate to revise the regulations to reflect updates to these processes and procedures. Finally, it is appropriate to update the regulations to reflect the new name of the office charged with enforcing the statute.

Anticipated Cost and Benefits: The Department has determined that this rule is not economically significant, that is, that the rule will not have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal governments or communities. Any estimated costs to the public relate to costs employers may incur familiarizing themselves with the rule, updating their relevant policies if needed, and participating in a voluntary training webinar. In the NPRM, the Department will be soliciting public comment in response to its preliminary analysis regarding the costs imposed by the rule. While not easily quantifiable due to data limitations, the Department identified several benefits of the rule, including: (1) Helping employers understand the law more efficiently, (2) increasing public access to government services, and (3) eliminating public confusion regarding two offices in the Federal government with the same name.

Risks: Failure to update the regulations to conform to the statutory amendments will interfere with the Department's enforcement efforts. Further, failure to revise the regulations to reflect changes to the filing and processing of charges and the new name of the office charged with enforcing the law will lead to confusion among the public, most specifically employers subject to the law's requirements and workers whose rights are guaranteed by the law.

RIN: 1190–AA71

DOJ—EXECUTIVE OFFICE FOR IMMIGRATION REVIEW (EOIR)

Final Rule Stage

75. Motions To Reopen Removal, Deportation, or Exclusion Proceedings Based Upon a Claim of Ineffective Assistance of Counsel

Priority: Other Significant.

Legal Authority: 5 U.S.C. 301; 6 U.S.C. 521; 8 U.S.C. 1101, 1103, 1154, 1155, 1158, 1182, 1226, 1229, 1229a, 1229b, 1229c, 1231, 1252, 1254a, 1255, 1282, 1324d, 1330, 1361, 1362; 28 U.S.C. 509, 510, 1746; sec. 2 Reorg Plan No 2 of 1950; 3 CFR, 1949–1953, Comp, p 1002; sec. 203 of Pub. L. 105–100, 111 Stat 2196–200; sec. 1506 and 1510 of Pub. L. 106–386, 114 Stat 1527–29, 1531–32; sec. 1505 of Pub. L. 106–554, 114 Stat 2763A–326–328; title VII of Pub. L. 110–229

CFR Citation: 8 CFR 1003; 8 CFR 1208.

Legal Deadline: None.

Abstract: The Department of Justice (Department) is planning to amend the regulations of the Executive Office for Immigration Review (EOIR) by establishing procedures for the filing and adjudication of motions to reopen removal, deportation, and exclusion proceedings based upon a claim of ineffective assistance of counsel. This proposed rule is in response to Matter of Compean, Bangaly & J–E–C–, 25 I&N Dec. 1 (A.G. 2009), in which the Attorney General directed EOIR to develop such regulations. The Department is also planning to propose to amend the EOIR regulations to provide that ineffective assistance of counsel may constitute extraordinary circumstances that may excuse the failure to file an asylum application within one year after the date of arrival in the United States.

Statement of Need: This regulation is necessary to comply with *Matter of Compean, Bangaly & J–E–C–,* 25 I&N Dec. 1 (A.G. 2009), in which the Attorney General directed EOIR to develop regulations governing claims of ineffective assistance of counsel in proceedings before the immigration judges and the Board of Immigration Appeals. The purpose of this proposed

rule is to establish uniform procedural and substantive requirements for the filing of motions to reopen based upon a claim of ineffective assistance of counsel and to provide a uniform standard for adjudicating such motions.

Summary of Legal Basis: The summary of the legal basis for the authority for this regulation is set forth in the above abstract.

Alternatives: The Department will consider any public comments it may receive regarding achievable alternatives that will still accomplish the goal of setting forth a framework for claims of ineffective assistance of counsel that supports the integrity of immigration proceedings.

Anticipated Cost and Benefits: The Department's preliminary analysis indicates that the proposed rule would not be economically significant, that is, that the rule will not have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal governments or communities.

Risks: Without the proposed changes to the Department's regulations, the Department will not have complied with the Attorney General's directive in Matter of Compean, Bangaly & J–E–C–, 25 I&N Dec. 1 (A.G. 2009) and the procedural and substantive requirements for filing—and the standards for adjudicating—motions to reopen based upon a claim of ineffective assistance of counsel will lack uniformity.

CFR Citation: 8 CFR 1001; 8 CFR 1003; 8 CFR 1292.

Legal Deadline: None.

Abstract: This rule would amend the regulations governing the requirements and procedures for authorizing the representatives of nonprofit religious, charitable, social service, or similar organizations to represent aliens in proceedings before the Executive Office for Immigration Review and the Department of Homeland Security.

Statement of Need: The Recognition and Accreditation (R&A) program addresses the critical and ongoing shortage of qualified legal representation for underserved populations in immigration cases before federal administrative agencies. Through the R&A program, EOIR permits qualified non-attorneys to represent persons before the DHS, the immigration courts, and the Board of Immigration Appeals (Board). For over 30 years, the R&A regulations have remained largely unchanged, despite structural changes in the government, the changing realities of the immigration system, the inability of non-profit organizations to meet the increased need for legal representation under the current regulations, and the surge in fraud and abuse by unscrupulous organizations and individuals preying on indigent and vulnerable populations.

The proposed rule seeks to address the critical and ongoing shortage of qualified legal representation for underserved populations in immigration cases before federal administrative agencies by revising the eligibility requirements and procedures for recognizing organizations and accrediting their representatives to provide immigration legal services to underserved populations. The proposed rule also imposes greater oversight over recognized organizations and their representatives in order to protect against potential abuse of vulnerable immigrant populations by unscrupulous organizations and individuals.

Summary of Legal Basis: The proposed rule is a revision of current regulations that are authorized under 8 U.S.C. 292, regarding authorization to practice before the immigration courts and the Board.

Alternatives: The R&A regulations have been comprehensively examined in light of various issues that have arisen and input has been solicited from the public on how to address in amended regulations various developments over the past 30 years. The proposed rule is the product of both internal and external deliberations, and the proposed rule directly addresses alternatives approaches to the current regulations that the Department has either decided to adopt or reject in the proposed rule. The Department will consider any public comments that propose achievable alternatives that will still accomplish the goals of this proposed rule.

Anticipated Cost and Benefits: The Department's preliminary analysis indicates that the proposed rule would not be economically significant, that is, that the rule will not have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal governments or communities. The proposed rule, like the current regulations, does not assess any fees on an organization to apply for initial recognition or accreditation, to renew recognition or accreditation, or to extend recognition.

Risks: The purpose of this proposed rule is to promote effective and efficient administration of justice before DHS and EOIR by increasing the availability of competent non-lawyer representation for underserved immigrant populations. The proposed rule seeks to accomplish this goal by amending the requirements for recognition and accreditation to increase the availability of qualified representation for primarily low-income and indigent persons while protecting the public from fraud and abuse by unscrupulous organizations and individuals. Without the proposed changes, the Department will be limited in its ability to expand the availability of non-lawyer representation and to provide increased oversight over recognized organizations and their representatives.

RIN: 1125–AA72

DOJ—LEGAL ACTIVITIES (LA)

Proposed Rule Stage

77. • Implementation of the ADA Amendments Act of 2008 Federally Assisted Programs (Section 504 of the Rehabilitation Act of 1973)

Priority: Other Significant.

Legal Authority: Pub. L. 110–325; 29 U.S.C. 794 (sec. 504 of the Rehabilitation Act of 1973, as amended); E.O. 12250 (45 FR 72855); 11/04/1980

CFR Citation: 28 CFR 42, subpart G.

Legal Deadline: None.

Abstract: The Department of Justice is issuing this notice of proposed rulemaking to revise its regulation implementing section 504 of the Rehabilitation Act of 1973, as applicable to programs and activities receiving financial assistance from the Department, in order to: (1) Incorporate amendments to the statute, including the changes in the meaning and interpretation of the applicable definition of disability required by the ADA Amendments Act of 2008; (2) incorporate requirements stemming from judicial decisions; (3) update accessibility standards applicable to new construction and alteration of buildings and facilities; (4) update certain provisions to promote consistency with comparable provisions implementing title II of the Americans with Disabilities Act; and (5) make other nonsubstantive clarifying edits, including updating outdated terminology and references that currently exist in 28 CFR part 42, such as changing the word handicapped and similar variations of that word to language referencing individuals with disabilities, modifying the order of the regulatory provisions to group like provisions together, and adding some headings to make the regulation more user-friendly.

Statement of Need: This rule is necessary to bring the Department's prior section 504 regulations into compliance with the ADA Amendments Act of 2008, which became effective on January 1, 2009.

Summary of Legal Basis: The summary of the legal basis of authority for this regulation is set forth above in the abstract.

Alternatives: Because this NPRM implements statutory changes to the section 504 definition of disability, there are no appropriate alternatives to issuing this NPRM.

Anticipated Cost and Benefits: The Department's preliminary assessment in this early stage of the rulemaking process is that this rule will not be ''economically significant,'' that is, that the rule will not have an annual effect on the economy of $100 million, or adversely affect in a material way the economy, a sector of the economy, the environment, public health or safety or State, local or tribal Governments or communities. The Department's section 504 rule for federally assisted programs will incorporate the same changes made by the ADA Amendments Act to the definition of disability as are included in the proposed changes to the ADA title II and title III rules (1190–AA59), was published in the **Federal Register** on August 11, 2016. 81 FR 53203.

Because most public and private entities that receive federal financial assistance from the Department are also likely to be subject to titles II or III of the ADA we do not believe that the revisions to the Department's existing section 504 federally assisted regulations will have a significant economic impact.

Risks: Failure to update the Department's section 504 regulations to conform to statutory changes will interfere with the Department's enforcement efforts and lead to confusion about the law's requirements among entities that receive Federal financial assistance from the Department.

U.S. DEPARTMENT OF LABOR

Fall 2016 Statement of Regulatory Priorities

Introduction

The Department's Fall 2016 Regulatory Agenda continues to advance the Department's mission to foster, promote, and develop the welfare of wage earners, job seekers, and retirees; improve working conditions; advance opportunities for profitable employment; and assure work-related benefits and rights. These rules will provide greater opportunity for workers to acquire the skills they need to succeed, to earn a fair day's pay for a fair day's work, for veterans to thrive in the civilian economy, for workers to retire with dignity, for workers and employers to compete on a level playing field, and for people to work in a safe environment with the full protection of our anti-discrimination laws.

Since the beginning of the Obama Administration, the Department of Labor has completed historic rulemakings on issues that are central to America's workers and their families: Worker safety, wages, and retirement security.

We finalized regulations to limit worker exposure to deadly silica dust that can lead to lung cancer, silicosis, chronic obstructive pulmonary disease and kidney disease, providing important new protections to 2.3 million workers

and preventing hundreds of deaths each year.

We finalized updates to our overtime regulations to ensure that middle class jobs pay middle class wages, extending important overtime pay protections to over 4.2 million workers and raising their pay by an estimated $12 billion in the next 10 years.

We issued final regulations that will enable employees of Federal contractors to earn seven days of paid sick and safe leave per year, for the first time guaranteeing these workers have paid leave to care for themselves, family members, or loved ones, without fear of losing their paychecks or their jobs.

We finalized our Conflict of Interest Rule, establishing a fundamental principle of consumer protection in the American retirement marketplace—that retirement advisors must put their clients' interests before their own profits.

Along with the Department of Education, we finalized regulations to implement the Workforce Innovation and Opportunity Act—the most significant legislative reform to the public workforce system in nearly 20 years—that will expand workers' opportunities to develop the skills they need and provide employers with the skilled workforce they need to succeed in the 21st century economy.

We finalized new regulations that establish equity and transparency in employer/consultant reporting requirements when employers engage consultants to persuade employees on their rights to organize and bargain collectively.

Working with the Federal Acquisition Regulatory Council, we finalized regulations and guidance implementing the President's Fair Pay and Safe Workplaces Executive Order, holding Federal contractors accountable when they put workers' safety, hard-earned wages and basic workplace rights at risk. The rule ensures that taxpayer dollars do not reward companies that break the law and that contractors who meet their legal responsibilities do not have to compete with those who do not.

We updated sex discrimination regulations for Federal contractors for the first time in 40 years, to reflect the current state of the law and the reality of a modern and diverse workforce. Updated rules on workplace sex discrimination will mean clarity for Federal contractors and subcontractors and equal opportunities for both men and women applying for jobs with, or already working for, these employers.

We will update and simplify the equal opportunity regulations implementing the National Apprenticeship Act to help employers and other apprenticeship sponsors attract a larger and more diverse applicant pool and provide greater opportunities to women, people of color, and other individuals regardless of disability, age, sexual orientation, or gender identity, to take part in Registered Apprenticeship programs. And, we finalized regulations clarifying how states can establish retirement savings arrangements to automatically enroll employees, and offer coverage that is consistent with Federal laws governing employee benefit plans.

The 2016 Regulatory Plan highlights the Labor Department's most noteworthy and significant rulemaking efforts, with each addressing the top priorities of its regulatory agencies: Employee Benefits Security Administration (EBSA), Employment and Training Administration (ETA), Mine Safety and Health Administration (MSHA), Office of Federal Contract Compliance Programs (OFCCP), Occupational Safety and Health Administration (OSHA), Office of Workers' Compensation Programs (OWCP), and Wage and Hour Division (WHD). These regulatory priorities exemplify the five components of the Secretary's opportunity agenda:

- Training more people, including veterans and people with disabilities, to have the skills they need for the in-demand jobs of the 21st century;
- ensuring that individuals have the peace of mind that comes with access to health care, retirement, and Federal workers' compensation benefits when they need them;
- safeguarding a fair day's pay for a fair day's work for all hardworking Americans, regardless of race, gender, religion, disability, national origin, veteran's status, sexual orientation, or gender identity;
- giving workers a voice in their workplaces; and
- protecting the safety and health of workers so they do not have to risk their lives for a paycheck.

Under Secretary Perez's leadership, the Department continues its commitment to ensuring that collaboration, consensus-building, strong foundation of evidence, and extensive stakeholder outreach, are integral to all of our regulatory efforts. Successful rulemaking requires that we build a big table and keep an open mind.

Training More Workers and Job-Seekers for 21st Century Jobs

The Department continues to implement the Workforce Innovation and Opportunity Act (WIOA), the first major reform to Federal job training programs in almost 20 years, building new partnerships, engaging employers, emphasizing proven strategies like apprenticeship and preparing people for the demands of the 21st century economy. The Department's regulatory priorities reflect the Secretary's vision for a modern job-driven workforce system that helps businesses stay on the competitive cutting edge and helps workers punch their ticket to the middle class.

- The Department's Civil Rights Center (CRC) will issue a final rule to implement the nondiscrimination provisions in section 188 of WIOA. The rule will update nondiscrimination and equal opportunity provisions to be consistent with current law and address its application to current workforce development and workplace practices and issues. To ensure no gap in coverage between the effective date of WIOA and this rulemaking, CRC issued a final rule that makes only technical revisions to the WIA section 188 rule, changing references from ''WIA'' to ''WIOA.'' [2] The current final rule ultimately will be superseded by the final rule arising from the earlier NPRM.

To further meet the demands of the 21st century workforce, the Department will also explore options to modernize and provide flexibilities to employers and workers, without sacrificing important worker protections in the permanent labor certification program.

- The permanent labor certification requirements and process have not been comprehensively examined or modified since 2004. ETA proposes to consider options to modernize the PERM program to be more responsive to changes in the national workforce in order to further align the program design with the objectives of the U.S. Immigration system, and needs of workers and employers, and to enhance the integrity of the labor certification process.[3]
- ETA also proposes to engage the public on whether the Schedule A of the permanent labor certification process serves as an effective tool for addressing current labor shortages, and how the Department may create a timely, coherent, and transparent methodology for identifying occupations that are experiencing labor shortages.[4]

[2] Implementation of the Nondiscrimination and Equal Opportunity Provisions of the Workforce Innovation Act of 2014 (RIN: 1291–A37).

[3] Modernizing the Permanent Labor Certification Program (PERM) (RIN: 1205–AB76).

[4] Labor Certification for Permanent Employment of Foreign Workers in the United States; Revising Schedule A (RIN: 1205–AB77).

Ensuring Access to Health Care, Retirement, and Workers' Compensation Benefits

Workplace benefits ensure that workers have the opportunity to remain in the middle class if they face a health and welfare challenge, retire from their jobs, or experience a workplace accident or illness. In addition, a financially secure retirement is a fundamental pillar of the middle class. The Department has a regulatory program designed to improve health benefits and retirement security for all workers.

• EBSA plans to finalize regulations that describe how political subdivisions (*e.g.* cities and counties) may design and operate payroll deduction savings programs, using automatic enrollment, for private-sector employees without causing the political subdivisions or private-sector employers to establish employee pension benefit plans under the Employee Retirement Income Security Act of 1974.[5]

• EBSA plans to finalize regulations that strengthen, improve and update the current disability benefit claims and appeals process under section 503 of ERISA.[6]

EBSA will also continue to issue guidance implementing the health coverage provisions of Parts 6 and 7 of ERISA, including the provisions of COBRA, HIPAA, GINA, mental health parity, the Newborns' and Mothers' Health Protection Act, the Women's Health and Cancer Rights Act, and the Affordable Care Act group market protections. Much of this guidance involves joint work with the Departments of Health and Human Services and Treasury.

The Department also promulgates regulations to ensure that Federal workers' compensation benefits programs are fairly administered:

• OWCP will issue an NPRM under the Black Lung Benefits Act to address how medical providers are reimbursed for covered services rendered to coal miners totally disabled by pneumoconiosis, including the possibility of modernizing and standardizing payment methodologies and fee schedules.[7]

Safeguarding Fair Pay for All Americans

The Department's regulatory agenda prioritizes ensuring that all Americans receive a fair day's pay for a fair day's work, and are not discriminated against with respect to hiring, employment, or benefits on the basis of race, gender, religion, disability, national origin, veteran's status, sexual orientation, or gender identity. The Department continues to take a robust approach to implementing its wage-and-hour and nondiscrimination regulations through education, outreach and strategic enforcement across industries. The regulations in this area are grounded in a commitment to an inclusive and diverse workforce and rewarding hard work with a fair wage to provide workers with a real pathway to middle class jobs.

• WHD will propose revisions to its regulations implementing section 14(c) of the Fair Labor Standards Act to reflect the changes in employment laws affecting workers with disabilities.[8]

Protecting the Safety and Health of Workers

The Department's safety and health regulatory proposals are based on the responsibility of employers to provide workers with workplaces that do not threaten their safety or health. We reject the false choice between worker safety and economic growth. Through our rulemakings, we are committed to protecting workers in all kinds of workplaces, including above- and below-ground coal and metal/nonmetal mines. So many workplace injuries, illnesses and fatalities are preventable. They not only put workers in harm's way, they jeopardize their economic security, often forcing families out of the middle class and into poverty. Our efforts are to prevent workers from having to choose between their lives and their livelihood.

• MSHA will build on the knowledge gained through the OSHA silica rulemaking process to develop regulations that would provide essential protections to miners from silica exposure in mines.[9]

• OSHA is developing an NPRM that will look at how to provide stronger protections for workers exposed to infectious diseases in healthcare and other related high risk environments.[10]

• OSHA will finalize regulations that address occupational exposure to beryllium in the workplace.[11]

• Building upon its history of addressing workplace violence in health care facilities, OSHA will solicit information from health care employers, workers and other experts on preventing workplace violence in the workplace. The request for information will seek public input on the impacts of violence, prevention strategies, and other information that will be useful to OSHA.[12]

• After more than 25 years, OSHA will update and finalize regulations that address slip, trip and fall hazards and establish requirements for personal fall protection systems. Slips, trips and falls are among the leading causes or work-related injuries and fatalities.[13]

Regulatory Review and Burden Reduction

On January 18, 2011, the President issued Executive Order (E.O.) 13563, entitled ''Improving Regulation and Regulatory Review.'' The Department is committed to smart regulations that ensure the health, welfare and safety of all working Americans and foster economic growth, job creation, and competitiveness of American business. The Department's Fall 2016 Regulatory Agenda also aims to achieve more efficient and less burdensome regulations through a retrospective review of the Labor Department regulations.

In August 2011, as part of a government-wide response to the E.O., the Department published its ''Plan for Retrospective Analysis of Existing Rules.'' (This plan, and each subsequent update, can be found at *www.dol.gov/regulations/*.) The current regulatory agenda includes 14 retrospective review projects, which are listed below pursuant to section 6 of E.O. 13563. More information about completed rulemakings no longer included in the plan can be found on *www.reginfo.gov*.

[5] Savings Arrangements Established by Political Subdivisions for Non-Governmental Employees (RIN: 1210–AB76).

[6] Amendment to Claims Procedure Regulation (RIN: 1210–AB39).

[7] Black Lung Benefits Act: Benefit Payments (RIN: 1240–AA11).

[8] Employment of Workers with Disabilities under Special Certificates (RIN: 1235–AA14).

[9] Respirable Crystalline Silica (RIN: 1219–AB36).

[10] Infectious Diseases (RIN: 1218–AC46).

[11] Occupational Exposure to Beryllium (RIN: 1218–AB76).

[12] Preventing Violence in Healthcare (RIN: 1218–AD08).

[13] Walking Working Surfaces and Personal Fall Protection Systems (Slips, Trips, and Fall Prevention) (RIN: 1218–AA11).

Agency	Regulatory Identifier No. (RIN)	Title of rulemaking	Whether it is expected to significantly reduce burdens on small businesses
EBSA	1210–AB47	Amendment of Abandoned Plan Program	Yes.
EBSA	1210–AB63	21st Century Initiative to Modernize the Form 5500 Series and Implementing and Related Regulations.	To Be Determined.

WHD	1235–AA18	Technical Updates to Regulations Issued Under Various Wage and Hour Division Statutes.	To Be Determined.

DOL—WAGE AND HOUR DIVISION (WHD)

Proposed Rule Stage

78. Employment of Workers With Disabilities Under Special Certificates

Priority: Other Significant.

Unfunded Mandates: Undetermined.

Legal Authority: 29 U.S.C. 201 *et seq.;* 29 U.S.C. 214; Pub. L. 113–128

CFR Citation: 29 CFR 525.

Legal Deadline: None.

Abstract: Section 14(c) of the FLSA, 29 U.S.C. 214(c), provides that the Secretary of Labor may, to the extent necessary to prevent the curtailment of opportunities for employment, issue certificates to permit the payment of subminimum wages to individuals with disabilities whose earring or productive capacities are affected by their disability. The Department is proposing to revise the regulations implementing section 14(c) to reflect changes in employment laws affecting workers with disabilities enacted since the Department's last update to the regulations.

Statement of Need: For some time, WHD has been conducting a comprehensive review of the section 14(c) program. This review was designed to develop strategies to better protect workers in the program, to promote WHD's vision of supporting competitive and integrated employment of individuals with disabilities, and to assist with efforts to make section 14(c) employment an option of last resort for workers where feasible. The Workforce Innovation and Opportunity Act (WIOA) created a new section 511 of the Rehabilitation Act, which imposes certain new conditions on the payment of subminimum wages by section 14(c) certificate holders. The current section 14(c) regulations are in need of improvement. The regulations have not been updated since 1989 and lack comprehensive, detailed information regarding the issuance, renewal, and revocation of 14(c) certificates as well as WHD's enforcement of the program. The regulations will be updated as the Department considers the new requirements of WIOA, and suggestions from workers with disabilities and their advocates.

Summary of Legal Basis: These regulations are authorized by section 14(c) of the Fair Labor Standards Act, 29 U.S.C. 214.

Alternatives: Alternatives will be developed in considering proposed revisions to the current regulations. The public will be invited to provide comments on the proposed revisions and possible alternatives.

Anticipated Cost and Benefits: The Department will prepare estimates of the anticipated costs and benefits associated with the proposed rule.

Risks: This action does not affect public health, safety, or the environment.

RIN: 1235–AA14

DOL—EMPLOYMENT AND TRAINING ADMINISTRATION (ETA)

Final Rule Stage

79. Equal Employment Opportunity in Apprenticeship Amendment of Regulations

Priority: Other Significant.

Legal Authority: Sec. 1, 50 stat 664, as amended (29 U.S.C. 50; 40 U.S.C. 276c; 5 U.S.C. 301); Reorganization Plan No 14 of 1950, 64 stat 1267 (5 U.S.C. app p 534)

CFR Citation: 29 CFR 30 (revision).

Legal Deadline: None.

Abstract: Revisions to the equal opportunity regulatory framework for the National Apprenticeship Act are a critical element in the Department's vision to promote and expand Registered Apprenticeship opportunities in the 21st century while continuing to safeguard the welfare and safety of apprentices. In October 2008, the Agency issued a Final Rule updating regulations for Apprenticeship Programs and Labor Standards for Registration. These regulations, codified at title 29 CFR 29, have not been updated since 1977. The companion regulations, 29 CFR 30, Equal Employment Opportunity (EEO) in Apprenticeship and Training,

have not been amended since 1978. The Agency proposes to update 29 CFR 30 to ensure that the National Registered Apprenticeship System is consistent and in alignment with EEO law, as it has developed since 1978, and recent revisions to 29 CFR 29. This second phase of regulatory updates ensures that Registered Apprenticeship is positioned to continue to provide economic opportunity for millions of Americans while keeping pace with these new requirements.

Statement of Need: Federal regulations for Equal Employment Opportunity (EEO) in Apprenticeship have not been updated since 1978. Updates to these regulations are necessary to ensure that DOL regulatory requirements governing the National Registered Apprenticeship System are consistent with the current state of EEO law and recent revisions to 29 CFR 29.

Summary of Legal Basis: These regulations are authorized by the National Apprenticeship Act of 1937 (29 U.S.C. 50) and the Copeland Act (40 U.S.C. 276(c). These regulations will set forth policies and procedures to promote equality of opportunity in apprenticeship programs registered with the U.S. Department of Labor or in State Apprenticeship Agencies recognized by the U.S. Department of Labor.

Alternatives: The public was afforded an opportunity to provide comments on the proposed amendment to Apprenticeship EEO regulations when the Department published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register**. A Final Rule was issued after analysis and incorporation of public comments to the NRPM.

Anticipated Cost and Benefits: The proposed changes are thought to raise ''novel legal or policy issues'' but are not economically significant within the context of Executive Order 12866 and are not a ''major rule'' under section 804 of the Small Business Regulatory Enforcement Fairness Act.

Risks: This action does not affect the public health, safety, or the environment.

RIN: 1205–AB59

DOL—EMPLOYEE BENEFITS SECURITY ADMINISTRATION (EBSA)

Final Rule Stage

80. Amendment to Claims Procedure Regulation

Priority: Other Significant.

Legal Authority: 29 U.S.C. 1135; ERISA sec. 505; 29 U.S.C. 1133

CFR Citation: 29 CFR 2550.503–1.

Legal Deadline: None.

Abstract: Section 503 of the Employee Retirement Income Security Act (ERISA), 29 U.S.C. 1133, provides that, in accordance with regulations promulgated by the Secretary of Labor, each employee benefit plan must provide ''adequate notice in writing to any participant or beneficiary whose claim for benefits under the plan has been denied.'' The notice must set forth the specific reasons for the denial and must be written in a manner calculated to be understood by the claimant. Each plan must also afford ''a reasonable opportunity'' for any participant or beneficiary whose claim has been denied to obtain ''full and fair review'' of the denial by the ''appropriate named fiduciary of the plan.'' The Department has issued a regulation pursuant to the above authority that establishes the minimum requirements for benefit claims procedures of employee benefit plans covered by title 1 of ERISA. See 29 CFR 2560.503–1. This rulemaking is intended to strengthen, improve, and update the current disability benefit claims and appeals process under the section 503 regulations.

Statement of Need: Because of the volume and constancy of disability benefits litigation, the Department recognizes a need to revisit, reexamine, and revise the current regulations to ensure that disability claimants receive a fair review of denied claims as provided by section 503 of ERISA. The rulemaking would revise and strengthen the current claims procedure rules primarily by adopting certain procedural protections and safeguards for disability benefit claims that are currently applicable to claims for group health benefits pursuant to the Affordable Care Act (ACA).

Summary of Legal Basis: Section 503 of ERISA, 29 U.S.C. 1133, requires every employee benefit plan to provide adequate notice in writing to any participant or beneficiary whose claim for benefits under the plan has been denied, setting forth the specific reasons for such denial, written in a manner calculated to be understood by the participant and to afford a reasonable opportunity to any participant whose claim for benefits has been denied for a full and fair review by the appropriate named fiduciary of the decision denying the claim. Section 503 also provides the Secretary of Labor with broad authority to prescribe regulations governing a plan's claims procedure.

Alternatives: On November 18, 2015, the Department published in the **Federal Register** a proposed rule revising the claims procedure regulations for plans providing disability benefits under ERISA. The Department received 145 public comments in response to the proposed rule from plan participants, consumer groups representing disability benefit claimants, employer groups, individual insurers and trade groups representing disability insurance providers. In addition to the approach set forth in the proposal, the Department will consider all meaningful alternative rules and standards presented in these comment letters.

Anticipated Cost and Benefits: The Department expects that these final regulations will improve the procedural protections for workers who become disabled and make claims for disability benefits from ERISA-covered employee benefit plans. This would result in some participants receiving benefits they might otherwise have been denied absent the fuller protections provided by the final regulations. In other circumstances, expenditures by plans may be reduced as a fuller and fairer disability claims processing helps facilitate participant acceptance of cost management efforts. Greater certainty and consistency in the handling of disability benefit claims and appeals and improved access to information about the manner in which claims and appeals are adjudicated may lead to efficiency gains in the system, both in terms of the allocation of spending at a macro-economic level as well as operational efficiencies among individual plans.

The Department believes that these requirements have modest costs associated with them, since many chiefly clarify provisions of the current claims procedure regulations or require provision of notices to plan participants.

Risks: Undetermined.

RIN: 1210–AB39

DOL—EBSA

81. • Savings Arrangements Established by Political Subdivisions for Non-Governmental Employees

Priority: Other Significant.

Legal Authority: 29 U.S.C. 1135 (ERISA sec. 505); 29 U.S.C. 1002 (ERISA sec. 3(2))

CFR Citation: 29 CFR 2510.3–2.

Legal Deadline: None.

Abstract: The Department proposes to amend a regulation (29 CFR 2510.3–2(h)) that describes how states may design and operate payroll deduction savings programs, using automatic enrollment, for private-sector employees without causing the states or private-sector employers to establish employee pension benefit plans under the Employee Retirement Income Security Act of 1974. The proposed amendments would expand the current regulation to cover programs of political subdivisions of states that otherwise comply with the current regulation.

Statement of Need: On November 18, 2015, the Department published in the **Federal Register** a proposed safe harbor regulation describing specific circumstances in which state (but not state political subdivisions, such as cities and counties) payroll deduction savings programs with automatic enrollment would not give rise to the establishment of employee pension benefit plans under the Employee Retirement Income Security Act of 1974, as amended (ERISA). Several commenters on that proposal asserted that the scope of the safe harbor regulation was too narrow and requested that the Department broaden it beyond states to cover payroll deduction savings programs of state political subdivisions, such as counties and cities. These commenters asserted that such an expansion would promote broader access to workplace retirement savings opportunities for employees, especially in states that do not themselves establish state-level programs but do have political subdivisions that would be willing to do so. The Department agrees with commenters that there may be good reasons for expanding the safe harbor to cover political subdivisions. Accordingly, on August 30, 2016, the Department published a notice of proposed rulemaking soliciting further comments on whether and how the safe harbor should be expanded to state political subdivisions.

Summary of Legal Basis: Section 505 of ERISA, 29 U.S.C. 1135, provides the Secretary of Labor with broad authority to prescribe such regulations as he finds necessary and appropriate to carry out the provisions of Title I of the Act. Section 3(2) of ERISA, 29 U.S.C. 1002, defines the term employee pension benefit plan. The Department's regulations at 29 CFR 2510.3–2 clarify the term employee pension benefit plan by identifying certain specific plans, funds and programs that do not constitute employee pension benefit plans.

Alternatives: The notice of proposed rulemaking would expand the safe harbor to cover payroll deduction savings programs of a limited number of large (in terms of population) cities and other political subdivisions. The Department considered three alternative criteria suggested by commenters that it could use to narrow the universe of eligible political subdivisions. The first suggested alternative criterion is that a political subdivision would have a population equal to or greater than the population of the least populous state. The second suggested alternative criterion is that the state in which the political subdivision exists does not have a state-wide retirement savings program for private-sector employees. The third suggested alternative criterion is that a political subdivision would have demonstrated capacity to design and operate a payroll deduction savings program, such as by maintaining a pension plan with substantial assets for employees of the political subdivision. All of these alternatives are under consideration. In addition, the Department will consider other alternatives presented by commenters.

Anticipated Cost and Benefits: In analyzing benefits and costs associated with this proposed rule, the Department focuses on the direct effects, which include both benefits and costs directly attributable to the rule. These benefits and costs are limited, because as stated above, the proposed rule would merely establish a safe harbor describing the circumstances under which a qualified political subdivision with authority under state law could establish payroll deduction savings programs that would not give rise to ERISA-covered employee pension benefit plans. It does not require qualified political subdivisions to take any actions nor employers to provide any retirement savings programs to their employees. The Department also addresses indirect effects associated with the proposed rule, which include: (1) Potential benefits and costs directly associated with the requirements of qualified political subdivision payroll deduction savings programs; and (2) the potential increase in retirement savings and potential cost burden imposed on covered employers to comply with the requirements of such programs. Indirect effects vary by qualified political subdivisions depending on their program requirements and the degree to which the proposed rule might influence political subdivisions to design their payroll deduction savings programs.

Risks: Undetermined.

RIN: 1210–AB76

DOL—MINE SAFETY AND HEALTH ADMINISTRATION (MSHA)

Proposed Rule Stage

82. Respirable Crystalline Silica

Priority: Other Significant.
Legal Authority: 30 U.S.C. 811
CFR Citation: 30 CFR 58.
Legal Deadline: None.
Abstract: Current MSHA standards limit exposures to quartz (crystalline silica) in respirable dust. Overexposure to crystalline silica can result in some miners developing silicosis, an irreversible but preventable lung disease, which ultimately may be fatal. The metal and nonmetal mining industry standard is based on the 1973 American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Values formula: 10 mg/m3 divided by the percentage of quartz plus 2. The formula is designed to limit exposures to 0.1 mg/m3 (100 ug/m3) of silica. The National Institute for Occupational Safety and Health (NIOSH) recommends a 50 ug/m3 exposure limit for respirable crystalline silica. MSHA will publish a proposed rule to address miners' exposure to respirable crystalline silica.

Statement of Need: MSHA standards have not been updated since 1985; current regulations may not protect workers from developing silicosis. Evidence indicates that miners continue to develop silicosis. MSHA's proposed regulatory action exemplifies the Agency's commitment to protecting the most vulnerable populations while assuring broad-based compliance. MSHA will regulate based on sound science to eliminate or reduce the hazards with the broadest and most serious consequences. MSHA intends to use OSHA's work on the health effects and risk assessment of silica, adapting it as necessary for the mining industry.

Summary of Legal Basis: Promulgation of this standard is authorized by section 101 of the Federal Mine Safety and Health Act of 1977.

Alternatives: This rulemaking would improve health protection from that afforded by the existing standards. MSHA will consider alternative methods of addressing miners' exposures based on the capabilities of the sampling and analytical methods.

Anticipated Cost and Benefits: MSHA will prepare estimates of the anticipated costs and benefits associated with the proposed rule.

Risks: For over 70 years, toxicology information and epidemiological studies have shown that exposure to respirable crystalline silica presents potential health risks to miners. These potential adverse health effects include simple silicosis and progressive massive fibrosis (lung scarring). Evidence indicates that exposure to silica may cause cancer. MSHA believes that the health evidence forms a reasonable basis for reducing miners' exposures to respirable crystalline silica.

DOL—MSHA

83. Proximity Detection Systems for Mobile Machines in Underground Mines

Priority: Other Significant.
Legal Authority: 30 U.S.C. 811
CFR Citation: 30 CFR 75.
Legal Deadline: None.
Abstract: This final rule addresses hazards miners face when working near mobile equipment in underground mines. MSHA has concluded, from investigations of accidents involving mobile equipment and other reports, that action is needed to protect miner safety. Mobile equipment can pin, crush, or strike a miner working near the equipment. Proximity detection technology can prevent these types of accidents. The proposed rule would strengthen the protection for underground miners by reducing the potential of pinning, crushing, or striking hazards associated with working close to mobile equipment.

Statement of Need: Mining is one of the most hazardous industries in this country. Miners continue to be injured or killed from pinning, crushing, or striking accidents involving mobile equipment. Equipment is available to help prevent accidents that cause debilitating injuries and accidental death.

Summary of Legal Basis: Promulgation of this standard is authorized by section 101(a) of the Federal Mine Safety and Health Act of 1977, as amended by the Mine Improvement and New Emergency Response Act of 2006.

Alternatives: No reasonable alternatives to this regulation would be as comprehensive or as effective in eliminating hazards and preventing injuries.

Anticipated Cost and Benefits: MSHA's proposed rule included an estimate of the anticipated cost and benefits.

Risks: The lack of proximity detection systems on mobile equipment in underground mines contributes to a higher incidence of debilitating injuries and accidental deaths.

DOL—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA)

Prerule Stage

84. Preventing Workplace Violence in Healthcare

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Unfunded Mandates: Undetermined.
Legal Authority: Not Yet Determined
CFR Citation: Not Yet Determined.
Legal Deadline: None.

Abstract: The RFI will provide OSHA's history with the issue of workplace violence in healthcare, including a discussion of the Guidelines that were initially published in 1996, a 2014 update to the Guidelines, and the recently published tools and strategies that were shared with OSHA by healthcare facilities with effective violence prevention programs. It will also discuss the Agency's use of 5(a)(1) in enforcement cases in healthcare. The RFI solicits information primarily from health care employers, workers and other subject matter experts on impacts of violence, prevention strategies, and other information that will be useful to the Agency if it decides to move forward in rulemaking. OSHA will also solicit information from stakeholders, including state officials, employers and workers, in the nine states that require certain health healthcare facilities to have some type of workplace violence prevention program.

Statement of Need: Workplace violence is a widespread problem, and there is growing recognition that workers in healthcare occupations face unique risks and challenges. In 2013, the rate of serious workplace violence incidents (those requiring days off for an injured worker to recuperate) was more than four times greater in healthcare than in private industry on average. Healthcare accounts for nearly as many serious violent injuries as all other industries combined. Workplace violence comes at a high cost. It harms workers often both physically and emotionally and makes it more difficult for them to do their jobs.

In 2013, 80 percent of serious violent incidents reported in healthcare settings were caused by interactions with patients. Other incidents were caused by visitors, coworkers, or other people. Some medical professions and settings are more at risk than others. According to the Bureau of Labor Statistics, in 2013 psychiatric aides experienced the highest rate of violent injuries that resulted in days away from work, at approximately 590 injuries per 10,000 full-time employees (FTEs). This rate is more than 10 times higher than the next group, nursing assistants (about 55 violent injuries per 10,000 FTEs, and registered nurses (about 14 violent injuries per 10,000 FTEs), compared with a rate of 4.2 violent injuries per 10,000 FTEs in U.S. private industry as a whole. High-risk areas include emergency departments, geriatrics, and behavioral health, among others.

RIN: 1218–AD08

DOL—OSHA

Proposed Rule Stage

85. Infectious Diseases

Priority: Economically Significant. Major status under 5 U.S.C. 801 is undetermined.

Legal Authority: 5 U.S.C. 533; 29 U.S.C. 657 and 658; 29 U.S.C. 660; 29 U.S.C. 666; 29 U.S.C. 669; 29 U.S.C. 673

CFR Citation: 29 CFR 1910.

Legal Deadline: None.

Abstract: Employees in health care and other high-risk environments face long-standing infectious disease hazards such as tuberculosis (TB), varicella disease (chickenpox, shingles), and measles (rubeola), as well as new and emerging infectious disease threats, such as Severe Acute Respiratory Syndrome (SARS) and pandemic influenza. Health care workers and workers in related occupations, or who are exposed in other high-risk environments, are at increased risk of contracting TB, SARS, Methicillin-resistant Staphylococcus aureus (MRSA), and other infectious diseases that can be transmitted through a variety of exposure routes. OSHA is concerned about the ability of employees to continue to provide health care and other critical services without unreasonably jeopardizing their health. OSHA is developing a standard to ensure that employers establish a comprehensive infection control program and control measures to protect employees from infectious disease exposures to pathogens that can cause significant disease. Workplaces where such control measures might be necessary include: Health care, emergency response, correctional facilities, homeless shelters, drug treatment programs, and other occupational settings where employees can be at increased risk of exposure to potentially infectious people. A standard could also apply to laboratories, which handle materials that may be a source of pathogens, and to pathologists, coroners' offices, medical examiners, and mortuaries.

Statement of Need: OSHA is considering the need for regulatory action to address the risk to workers exposed to infectious diseases in healthcare and other related high-risk environments. Especially given recent events necessitating the careful treatment of individuals with life-threatening infectious diseases, OSHA is concerned about the risk posed to healthcare workers with the movement of healthcare delivery from the traditional hospital setting into more diverse and smaller workplace settings. The Agency initiated the Small Business Regulatory Enforcement Fairness Act (SBREFA) Panel process in the spring of 2014.

Summary of Legal Basis: 5 U.S.C. 533; 29 U.S.C. 657 and 658; 29 U.S.C. 666; 29 U.S.C. 669; 29 U.S.C. 673.

Alternatives: OSHA offered several alternatives to the SBREFA panel when presenting the proposed Infectious Disease (ID) rule. OSHA considered a specification oriented rule rather than a performance oriented rule, but this type of rule would provide less flexibility and would likely fail to anticipate all of the potential hazards and necessary controls for every type and every size of facility and would under-protect workers. Exempting small entities from the rule was considered, but approximately 1.5 million of the estimated 9 million workers affected by the rule as outlined in the regulatory

framework work in very small entities, leaving these workers under-protected. OSHA also considered changing the scope of the rule restricting the ID rule to workers who have occupational exposure during the provision of direct patient care in institutional settings but based on the evidence thus far analyzed, those workers performing other covered tasks in both institutional and non-institutional settings face a risk of infection because of their occupational exposure. Per the proposed rule, employers would be required to provide medical removal protection (MRP) benefits. If OSHA eliminated the requirement for MRP benefits, workers might be deterred from reporting signs and symptoms that could be indicative of infection and might work while sick (due to concerns about loss of pay or other such punitive consequences), potentially resulting in further infections to co-workers and/or patients. OSHA also considered the option of not requiring employers to make vaccinations available to workers. Vaccination is generally considered an important component of an effective infection control program, as it protects inoculated workers from infections, lessens chances of outbreaks by minimizing transmission of infections from workers to other workers and patients, and may also lessen the duration and severity of infections, depending on the efficacy of the vaccine.

Anticipated Cost and Benefits: Undetermined.

Risks: During provision of direct patient care and the performance of other covered tasks as outlined in the scope of the proposed rule, workers are at risk for exposure to infections agents. The peer-reviewed literature suggests that HCWs are especially susceptible to exposures during the early stages of the emergence of novel infectious agents or novel strains of known infectious agents. While the patients who are the most ill with infectious diseases are most likely being treated in hospitals, many patients with infectious diseases are treated in ambulatory care settings during the early stages of the disease while they are asymptomatic or have mild symptoms. An increasing number of patients who are ill and symptomatic with an infectious disease are getting initial treatment at clinics that have urgent care or immediate care services, rather than being treated at hospital emergency rooms. Many patients with childhood illnesses such as measles, mumps and pertussis are being treated at clinics, not hospitals, unless they have severe cases. Currently, outbreaks of measles, mumps and pertussis are occurring in various countries, including the U.S. Workers in laboratories are tasked with the identification of infectious agents causing outbreaks and are similarly susceptible to exposures. OSHA believes that the 1998 and 2007 CDC/HICPAC guidelines, along with other authoritative guidance documents (*e.g.,* CDC/NIH, 2009), and hundreds of peer-reviewed publications, demonstrate a well-recognized risk of occupational exposure to infectious agents for workers providing direct patient care and/or performing other covered tasks.

DOL—OSHA

86. Standards Improvement Project IV

Priority: Other Significant.

Legal Authority: 29 U.S.C. 655(b)

CFR Citation: 29 CFR 1926.

Legal Deadline: None.

Abstract: OSHA's Standards Improvement Projects (SIPs) are intended to remove or revise duplicative, unnecessary, and inconsistent safety and health standards. The Agency has published three earlier final standards to remove unnecessary provisions (63 FR 33450, 70 FR 1111, 76 FR 33590), thus reducing costs or paperwork burden on affected employers. The Agency is initiating a fourth rulemaking effort to identify unnecessary or duplicative provisions or paperwork requirements that are focused primarily on its construction standards in 29 CFR 1926, as long as they do not diminish employee protections.

Statement of Need: OSHA's Standard Improvement Projects (SIPs) are intended to remove or revise duplicative, unnecessary, and inconsistent safety and health standards. The Agency has published three earlier final standards to remove unnecessary provisions, thus reducing costs or paperwork burden on affected employers. The Agency is initiating a fourth rulemaking effort to identify unnecessary or duplicative provisions or paperwork requirements that are focused primarily on its construction standards in 29 CFR 1926, as long as they do not diminish employee protections.

Summary of Legal Basis: OSHA is conducting Phase IV of the Standards Improvement Project (SIP–IV) in response to the President's Executive Order 13563, Improving Regulations and Regulatory Review (76 FR 38210). SIP–IV will update three standards to align with current medical practice, including a reduction to the number of necessary employee x-rays, updates to requirements for pulmonary function testing, and updates to the table used for decompression of employees during underground construction. Additionally, the proposed revisions include an update to the consensus standard incorporated by reference for signs and devices used to protect workers near automobile traffic, a revision to the requirements for roll-over protective structures to comply with current consensus standards, updates for storage of digital x-rays and the method of calling emergency services to allow for use of current technology, and a revision to lockout/tagout requirements in response to a court decision, among others. OSHA is also proposing to remove from its standards the requirements that employers include an employee's social security number (SSN) on exposure monitoring, medical surveillance, and other records in order to protect employee privacy and prevent identity fraud.

Alternatives: The main alternative OSHA considered for all of the proposed changes contained in the SIP–IV rulemaking was retaining the existing regulatory language, *i.e.,* retaining the status quo. In each instance, OSHA has concluded that the benefits of the proposed regulatory change outweigh the costs of those changes. In a few of the items, such as the proposed changes

to the decompression requirements applicable to employees working in compressed air environments, OSHA has requested public comment on feasible alternatives to the Agency's proposal.

Anticipated Cost and Benefits: The Agency has estimated that one revision (updating the method of identifying and calling emergency medical services) may increase construction employers costs by about $28,000 per year while two provisions (reduction in the number of necessary employee x-rays and elimination of posting requirements for residential construction employers) provide estimated costs savings of $3.2 million annually. The Agency has not estimated or quantified benefits to employees from reduced exposure to x-ray radiation or to employers for the reduced cost of storing digital x-rays rather than x-ray films, among others. The Agency has preliminarily concluded that the proposed revisions are economically feasible and do not have any significant economic impact on small businesses. The Preliminary Economic Analysis in this preamble provides an explanation of the economic effects of the proposed revisions.

Risks: SIP rulemakings do not address new significant risks or estimate benefits and economic impacts of reducing such risks. Overall, SIP rulemakings are reasonably necessary under the OSH Act because they provide cost savings, or eliminate unnecessary requirements.

RIN: 1218–AC67

DOL—OSHA

Final Rule Stage

87. Occupational Exposure to Beryllium

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under PL 104–4.

Legal Authority: 29 U.S.C. 655(b); 29 U.S.C. 657

CFR Citation: 29 CFR 1910.

Legal Deadline: None.

Abstract: In 1999 and 2001, OSHA was petitioned to issue an emergency temporary standard for permissible exposure limit (PEL) to beryllium by the United Steel Workers (formerly the Paper Allied-Industrial, Chemical, and Energy Workers Union), Public Citizen Health Research Group, and others. The Agency denied the petitions but stated its intent to begin data gathering to collect needed information on beryllium's toxicity, risks, and patterns of usage. On November 26, 2002, OSHA published a Request for Information (RFI) (67 FR 70707) to solicit information pertinent to occupational exposure to beryllium, including: Current exposures to beryllium; the relationship between exposure to beryllium and the development of adverse health effects; exposure assessment and monitoring methods; exposure control methods; and medical surveillance. In addition, the Agency conducted field surveys of selected worksites to assess current exposures and control methods being used to reduce employee exposures to beryllium. OSHA convened a Small Business Advocacy Review Panel under the Small Business Regulatory Enforcement Fairness Act (SBREFA) and completed the SBREFA Report in January 2008. OSHA also completed a scientific peer review of its draft risk assessment.

Statement of Need: Exposure to beryllium causes a disabling and potentially fatal chronic lung disease called Chronic Beryllium Disease (CBD). Exposure to beryllium has also been linked to lung cancer. OSHA proposed to reduce the permissible exposure limit (PEL) by 10 times to 0.2 micrograms of beryllium per cubic meter of air ($\mu g/m^3$) over an 8-hour time weighted average (TWA) and a short term exposure limit (STEL) of 2.0 $\mu g/m^3$ over 15 minutes. The proposal also included important requirements such as medical surveillance, medical removal protection, regulated areas, training, and engineering controls.

Summary of Legal Basis: 29 U.S.C. 655(b); 29 U.S.C. 657.

Alternatives: OSHA also proposed regulatory alternatives to its proposed beryllium rule. These include: Scope alternatives to address exposures in the construction and maritime industries; changes to the proposed PEL and STEL; and changes to the proposed ancillary provisions for exposure assessment, personal protective clothing and equipment, medical surveillance, and medical removal.

Anticipated Cost and Benefits: The proposed rule for beryllium covers approximately 35,000 workers in General Industry, and OSHA estimated that the proposed rule when fully implemented would produce $575.8 million in annualized benefits over 60 years, far outweighing the expected cost of $37.6 million annually for workplaces in General Industry.

Risks: Prevent 92 deaths from chronic beryllium disease, 4 deaths from lung cancer, and 50 non-fatal cases of chronic beryllium disease each year.

RIN: 1218–AB76

BILLING CODE 4510–HL–P

DEPARTMENT OF TRANSPORTATION (DOT)

Introduction: Department Overview and Summary of Regulatory Priorities

The Department of Transportation (DOT) consists of nine operating administrations and the Office of the Secretary, each of which has statutory responsibility for a wide range of regulations. DOT regulates safety in the aviation, motor carrier, railroad, motor vehicle, commercial space, public transportation, and pipeline transportation areas. DOT also regulates aviation consumer and economic issues and provides financial assistance for programs involving highways, airports, public transportation, the maritime industry, railroads, and motor vehicle safety. In addition, the Department writes regulations to carry out a variety of statutes ranging from the Americans With Disabilities Act to the Uniform Time Act. Finally, DOT develops and implements a wide range of regulations that govern internal DOT programs such as acquisitions and grants, access for the disabled, environmental protection, energy conservation, information technology, occupational safety and health, property asset management, seismic safety, and the use of aircraft and vehicles.

The Department's Regulatory Priorities

The Department's regulatory priorities respond to the challenges and opportunities we face. Our mission generally is as follows:

The national objectives of general welfare, economic growth and stability, and the security of the United States require the development of transportation policies and programs that contribute to providing fast, safe, efficient, and convenient transportation at the lowest cost consistent with those and other national objectives, including the efficient use and conservation of the resources of the United States.

To help us achieve our mission, we have five goals in the Department's Strategic Plan for Fiscal Years 2014–2018:

- *Safety:* Improve public health and safety by ''reducing transportation-related fatalities, injuries, and crashes.''
- *State of Good Repair:* Ensure the U.S. ''proactively maintains critical transportation infrastructure in a state of good repair.''
- *Economic Competitiveness:* Promote ''transportation policies and investments that bring lasting and equitable economic benefits to the Nation and its citizens.''
- *Quality of Life:* Foster quality of life in communities by ''integrating transportation policies, plans, with coordinated housing and economic development policies to increase transportation choices and access to transportation services for all.''
- *Environmental Sustainability:* Advance ''environmental sustainable policies and investments that reduce carbon and other harmful emissions from transportation sources.''

In identifying our regulatory priorities for the next year, the Department considered its mission and goals and focused on a number of factors, including the following:

- The relative risk being addressed
- Requirements imposed by law
- Actions on the National Transportation Safety Board ''Most Wanted List''
- The costs and benefits of the regulations
- The advantages of nonregulatory alternatives
- Opportunities for deregulatory action
- The enforceability of any rule, including the effect on agency resources

This regulatory plan identifies the Department's regulatory priorities—the 19 pending rulemakings chosen, from among the dozens of significant rulemakings listed in the Department's broader regulatory agenda, that the Department believes will merit special attention in the upcoming year. The rules included in the regulatory plan embody the Department's focus on our strategic goals.

The regulatory plan reflects the Department's primary focus on safety—a focus that extends across several modes of transportation. For example:

- The Federal Aviation Administration (FAA) will continue its efforts to implement safety management systems.
- The Federal Motor Carrier Safety Administration (FMCSA) continues its work to strengthen the requirements for Electronic Logging Devices and revise motor carrier safety fitness determination procedures.
- The National Highway Traffic Safety Administration (NHTSA) will continue its rulemaking efforts to reduce death and injury resulting from motor vehicle crashes.

Each of the rulemakings in the regulatory plan is described below in detail. In order to place them in context, we first review the Department's regulatory philosophy and our initiatives to educate and inform the public about transportation safety issues. We then describe the role of the Department's retrospective reviews and its regulatory process and other important regulatory initiatives of OST and of each of the Department's components. Since each transportation ''mode'' within the Department has its own area of focus, we summarize the regulatory priorities of each mode and of OST, which supervises and coordinates modal initiatives and has its own regulatory responsibilities, such as consumer protection in the aviation industry.

The Department's Regulatory Philosophy and Initiatives

The Department has adopted a regulatory philosophy that applies to all its rulemaking activities. This philosophy is articulated as follows: DOT regulations must be clear, simple, timely, fair, reasonable, and necessary. They will be issued only after an appropriate opportunity for public comment, which must provide an equal chance for all affected interests to participate, and after appropriate consultation with other governmental entities. The Department will fully consider the comments received. It will assess the risks addressed by the rules and their costs and benefits, including the cumulative effects. The Department will consider appropriate alternatives, including nonregulatory approaches. It will also make every effort to ensure that regulation does not impose unreasonable mandates.

The Department stresses the importance of conducting high-quality rulemakings in a timely manner and reducing the number of old rulemakings. To implement this, the Department has required the following actions: (1) Regular meetings of senior DOT officials to ensure effective policy leadership and timely decisions, (2) effective tracking and coordination of rulemakings, (3) regular reporting, (4) early briefings of interested officials, (5) regular training of staff, and (6) adequate allocations of resources. The Department has achieved significant success because of this effort. It allows the Department to use its resources more effectively and efficiently.

The Department's regulatory policies and procedures provide a comprehensive internal management and review process for new and existing regulations and ensure that the Secretary and other appropriate appointed officials review and concur in all significant DOT rules. DOT continually seeks to improve its regulatory process. A few examples include: The Department's development of regulatory process and related training courses for its employees; creation of an electronic rulemaking tracking and coordination system; the

use of direct final rulemaking; the use of regulatory negotiation; a continually expanding and improved Internet page that provides important regulatory information, including ''effects'' reports and status reports (*http://www.dot.gov/regulations*); and the continued exploration and use of Internet blogs and other Web 2.0 technology to increase and enhance public participation in its rulemaking process.

In addition, the Department continues to engage in a wide variety of activities to help cement the partnerships between its agencies and its customers that will produce good results for transportation programs and safety. The Department's agencies also have established a number of continuing partnership mechanisms in the form of rulemaking advisory committees.

The Department's Retrospective Review of Existing Regulations

In accordance with Executive Order (E.O.) 13563 (Improving Regulation and Regulatory Review), the Department actively engaged in a special retrospective review of our existing rules to determine whether they need to be revised or revoked. This review was in addition to those reviews in accordance with section 610 of the Regulatory Flexibility Act, E.O. 12866, and the Department's Regulatory Policies and Procedures. As part of this effort, we also reviewed our processes for determining what rules to review and ensuring that the rules are effectively reviewed. As a result of the review, we identified many rules for expedited review and changes to our retrospective review process. Pursuant to section 6 of E.O. 13563, the following Regulatory Identifier Numbers (RINs) have been identified as associated with retrospective review and analysis in the Department's final retrospective review of regulations plan. Some of these entries on this list may be completed actions, which do not appear in The Regulatory Plan. If a retrospective review action has been completed it will no longer appear on the list below. However, more information can be found about these completed rulemakings on the Unified Agenda publications at *Reginfo.gov* in the Completed Actions section for that agency. These rulemakings can also be found on *Regulations.gov*. The final agency retrospective review plan can be found at *http://www.dot.gov/regulations*.

23. 2137–AE80	Hazardous Materials: Miscellaneous Pressure Vessel Requirements (DOT Spec Cylinders) (RRR).	Y.
24. 2137–AE81	Hazardous Materials: Reverse Logistics (RRR)	Y.
25. 2137–AE86	Hazardous Materials: Requirements for the Safe Transportation of Bulk Explosives (RRR)	
26. 2137–AE94	Pipeline Safety: Operator Qualification, Cost Recovery, Accident and Incident Notification, and Other Changes (RRR).	
27. 2137–AF00	Hazardous Materials: Adoption of Special Permits (MAP–21) (RRR)	Y.
28. 2137–AF04	Hazardous Materials: Miscellaneous Amendments (RRR)	
29. 2137–AF09	Hazardous Materials: Miscellaneous Petitions for Rulemaking (RRR)	
30. 2137–AF10	Hazardous Materials: Revision of the Requirements for Carriage by Aircraft (RRR)	
31. 2137–AF18	Hazardous Materials: Harmonization with International Standards (RRR)	
32. 2137–AF19	Hazardous Materials: Revisions to Hazardous Materials Emergency Preparedness Grants Requirements (RRR).	

International Regulatory Cooperation

Executive Order 13609 (Promoting International Regulatory Cooperation) stresses that ''[i]n an increasingly global economy, international regulatory cooperation, consistent with domestic law and prerogatives and U.S. trade policy, can be an important means of promoting the goals of'' Executive Order 13563 to ''protect public health, welfare, safety, and our environment while

promoting economic growth, innovation, competitiveness, and job creation.'' DOT has long recognized the value of international regulatory cooperation and has engaged in a variety of activities with both foreign governments and international bodies. These activities have ranged from cooperation in the development of particular standards to discussions of necessary steps for rulemakings in general, such as risk assessments and cost-benefit analyses of possible standards. Since the issuance of Executive Order 13609, we have increased our efforts in this area. For example, many of DOT's Operating Administrations are active in groundbreaking government-wide Regulatory Cooperation Councils (RCC) with Canada, Mexico, and the European Union. These RCC working groups are setting a precedent in developing and testing approaches to international coordination of rulemaking to reduce barriers to international trade. We also have been exploring innovative approaches to ease the development process.

Examples of the many cooperative efforts we are engaged in include the following:

The FAA maintains ongoing efforts with foreign civil aviation authorities, including in particular the European Aviation Safety Agency and Transport Canada, to harmonize standards and practices where doing so will improve the safety of aviation and aviation-related activities. The FAA also plays an active role in the standard-setting work of the International Civil Aviation Organization (ICAO), particularly on the Air Navigation Commission and the Legal Committee. In doing so, the FAA works with other Nations to shape the standards and recommended practices adopted by ICAO. The FAA's rulemaking actions related to safety management systems are examples of the FAA's harmonization efforts.

NHTSA is actively engaged in international regulatory cooperative efforts on both a multilateral and a bilateral basis, exchanging information on best practices and otherwise seeking to leverage its resources for addressing vehicle issues in the U.S. As noted in Executive Order 13609: ''(i)n meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation'' and ''can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.''

As the representative, for vehicle safety matters, of the United States, one of 33 contracting parties to the 1998 Agreement on the Harmonization of Vehicle Regulations, NHTSA is an active participant in the World Forum for Vehicle Regulations (WP.29) at the UN. Under that umbrella, NHTSA is currently working on the development of harmonized regulations for the safety of electric vehicles; hydrogen and fuel cell vehicles; advanced head restraints; pole side impact test procedures; pedestrian protection; the safety risks associated with quieter vehicles, such as electric and hybrid electric vehicles; and advancements in tires.

In recognition of the large cross-border market in motor vehicles and motor vehicle equipment, NHTSA is working bilaterally with Transport Canada under the Motor Vehicles Working Group of the U.S.-Canada Regulatory Cooperation Council (RCC) to facilitate implementation of the initial RCC Joint Action Plan. Under this Plan, NHTSA and Transport Canada are working on the development of international standards on quieter vehicles, electric vehicle safety, and hydrogen and fuel cell vehicles.

Building on the initial Joint Action Plan, the U.S. and Canada issued a Joint Forward Plan on August 29, 2014. The Forward Plan provided that regulators would develop Regulatory Partnership Statements (RPSs) outlining the framework for how cooperative activities will be managed between agencies. Since that time, regulators have been developing and completing detailed work plans to address the commitments in the Forward Plan. To facilitate future cooperation, the RCC will continue to work on cross-cutting issues in areas such as: ''sharing information with foreign governments, joint funding of new initiatives and our respective rulemaking processes.''

To broaden and deepen its cooperative efforts with the European Union, NHTSA is participating in ongoing negotiations regarding the Transatlantic Trade and Investment Partnership which is ''aimed at providing greater compatibility and transparency in trade and investment regulation, while maintaining high levels of health, safety, and environmental protection.'' NHTSA is seeking to build on existing levels of safety and lay the groundwork for future cooperation in addressing emerging safety issues and technologies.

PHMSA's hazardous material group works with ICAO, the UN Subcommittee of Experts on Dangerous Goods, and the International Maritime Organization. Through participation in these international bodies, PHMSA is able to advocate on behalf of U.S. safety and commercial interests to guide the development of international standards with which U.S. businesses have to comply when shipping in international commerce. PHMSA additionally participates in the RCC with Canada and has a Memorandum of Cooperation in place to ensure that cross-border shipments are not hampered by conflicting regulations. The pipeline group at PHMSA incorporates many standards by reference into the Pipeline Safety Regulations, and the development of these standards benefit from the participation of experts from around the world.

In the areas of airline consumer protection and civil rights regulation, OST is particularly conscientious in seeking international regulatory cooperation. For example, the Department participates in the standard-setting activities of ICAO and meets and works with other governments and international airline associations on the implementation of U.S. and foreign aviation rules.

For a number of years the Department has also provided information on which of its rulemaking actions have international effects. This information, updated monthly, is available at the Department's regulatory information Web site, *http://www.dot.gov/regulations*, under the heading ''Reports on Rulemakings and Enforcement.'' (The reports can be found under headings for ''EU,'' ''NAFTA'' (Canada and Mexico) and ''Foreign.'') A list of our significant rulemakings that are expected to have international effects follows; the identifying RIN provided below can be used to find summary and other information about the rulemakings in the Department's Regulatory Agenda published along with this Plan:

RIN	Rulemaking title
2105–AD91	Accessibility of Airports.
2105–AE06	E-Cigarette.
2120–AJ38	Airport Safety Management System.

RIN	Rulemaking title
2120–AJ60	Small Unmanned Aircraft.
2120–AJ69	Prohibition Against Certain Flights Within the Territory and Airspace of Afghanistan.
2120–AK09	Drug & Alcohol Testing for Repair Stations.
2120–AK65	Revision of Airworthiness Standards for Normal, Utility, Acrobatic, and Commuter Category Airplanes.
2126–AA34	Mexico-Domiciled Motor Carriers.
2126–AA35	Safety Monitoring System and Compliance Initiative for Mexico-Domiciled Motor Carriers Operating in the United States.
2124–AA70	Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement.
2126–AB56	MAP–21 Enhancements and Other Updates to the Unified Registration System.
2127–AK76	Tire Fuel Efficiency Part 2.
2127–AK93	Quieter Vehicles Sound Alert.
2133–AB74	Cargo Preference.
2137–AF18	Hazardous Materials: Harmonization with International Standards (RRR).

As we identify rulemakings arising out of our ongoing regulatory cooperation activities that we reasonably anticipate will lead to significant regulations, we will add them to our Web site report and subsequent Agendas and Plans.

The Department's Regulatory Process

The Department will also continue its efforts to use advances in technology to improve its rulemaking management process. For example, the Department created an effective tracking system for significant rulemakings to ensure that either rules are completed in a timely manner or delays are identified and fixed. Through this tracking system, a monthly status report is generated. To make its efforts more transparent, the Department has made this report Internet accessible at *http://www.dot.gov/regulations*. By doing this, the Department is providing valuable information concerning our rulemaking activity and is providing information necessary for the public to evaluate the Department's progress in meeting its commitment to completing quality rulemakings in a timely manner.

The Department continues to place great emphasis on the need to complete high-quality rulemakings by involving senior departmental officials in regular meetings to resolve issues expeditiously.

Office of the Secretary of Transportation (OST)

The Office of the Secretary (OST) oversees the regulatory process for the Department. OST implements the Department's regulatory policies and procedures and is responsible for ensuring the involvement of top management in regulatory decisionmaking. Through the General Counsel's office, OST is also responsible for ensuring that the Department complies with the Administrative Procedure Act, Executive Order 12866 (Regulatory Planning and Review), Executive Order 13563, DOT's Regulatory Policies and Procedures, and other legal and policy requirements affecting rulemaking. Although OST's principal role concerns the review of the Department's significant rulemakings, this office has the lead role in the substance of such projects as those concerning aviation economic rules, the Americans with Disabilities Act, and rules that affect multiple elements of the Department.

OST provides guidance and training regarding compliance with regulatory requirements and process for personnel throughout the Department. OST also plays an instrumental role in the Department's efforts to improve our economic analyses; risk assessments; regulatory flexibility analyses; other related analyses; retrospective reviews of rules; and data quality, including peer reviews.

OST also leads and coordinates the Department's response to the Office of Management and Budget's (OMB) intergovernmental review of other agencies' significant rulemaking documents and to Administration and congressional proposals that concern the regulatory process. The General Counsel's office works closely with representatives of other agencies, OMB, the White House, and congressional staff to provide information on how various proposals would affect the ability of the Department to perform its safety, infrastructure, and other missions.

During Fiscal Year 2017, OST will focus its efforts on voice communications on passengers´ mobile wireless devices on scheduled flights within, to and from the United States (2105–AE30).

OST will also continue its efforts on the following rulemaking initiatives:

- Airline Passenger Protections III (2105–AE11)
- In-Flight Medical Oxygen and other ACAA issues (2105–AE12)
- In-Flight Entertainment (2105–AE32)
- Reporting of Statistics for Mishandled Baggage and Wheelchairs (2105–AE41)

OST will also continue its efforts to help coordinate the activities of several operating administrations that advance various departmental efforts that support the Administration's initiatives on promoting safety, stimulating the economy and creating jobs, sustaining and building America's transportation infrastructure, and improving quality of life for the people and communities who use transportation systems subject to the Department's policies. It will also continue to oversee the Department's rulemaking actions to implement the ''Moving Ahead for Progress in the 21st Century Act'' (MAP–21).

Federal Aviation Administration (FAA)

The Federal Aviation Administration is charged with safely and efficiently operating and maintaining the most complex aviation system in the world. Destination 2025, an FAA initiative that captures the agency's vision of transforming the Nation's aviation system by 2025, has proven to be an effective tool for pushing the agency to think about longer-term aspirations; FAA has established a vision that defines the agency's priorities for the next five years. The changing technological and industry environment compels us to transform the agency. And the challenging fiscal environment we face only increases the need to prioritize our goals.

We have identified four major strategic initiatives where we will focus our efforts (1) Risk-based Decision Making—Build on safety management principles to proactively address emerging safety risk by using consistent, data-informed approaches to make smarter, system-level, risk-based decisions; (2) NAS Initiative—Lay the foundation for the National Airspace System of the future by achieving prioritized NextGen benefits, enabling the safe and efficient integration of new user entrants including Unmanned Aircraft Systems (UAS) and Commercial Space flights, and deliver more efficient, streamlined air traffic management

services; (3) Global Leadership—Improve safety, air traffic efficiency, and environmental sustainability across the globe through an integrated, data-driven approach that shapes global standards, enhances collaboration and harmonization, and better targets FAA resources and efforts; and (4) Workforce of the Future—Prepare FAA's human capital for the future, by identifying, recruiting, and training a workforce with the leadership, technical, and functional skills to ensure the U.S. has the world's safest and most productive aviation sector.

FAA activities that may lead to rulemaking in Fiscal Year 2017 include continuing to:

- Promote and expand safety information-sharing efforts, such as FAA-industry partnerships and data-driven safety programs that prioritize and address risks before they lead to accidents. Specifically, FAA will continue implementing Commercial Aviation Safety Team projects related to controlled flight into terrain, loss of control of an aircraft, uncontained engine failures, runway incursions, weather, pilot decision making, and cabin safety. Some of these projects may result in rulemaking and guidance materials.
- Respond to the FAA Modernization and Reform Act of 2012 (the Act), which directed the FAA to initiate a rulemaking proceeding to issue guidelines and regulations relating to ADS–B In technology and recommendations from an Aviation Rulemaking Committee on ADS–B In capabilities in consideration of the FAA's evolving thinking on how to provide an integrated suite of communication, navigation, and surveillance (CNS) capabilities to achieve full NextGen performance.
- Respond to the Act, which also recommended we complete the rulemaking for small Unmanned Aircraft Systems, and consider how to fully integrate UAS operations in the NAS, which will require future rulemaking.
- Respond to the Airline Safety and Federal Aviation Administration Extension Act of 2010 (H.R. 5900), which requires the FAA to develop and implement Safety Management Systems (SMS) where these systems will improve safety of aviation and aviation-related activities. An SMS proactively identifies potential hazards in the operating environment, analyzes the risks of those hazards, and encourages mitigation prior to an accident or incident. In its most general form, an SMS is a set of decision-making tools that can be used to plan, organize, direct, and control activities in a manner that enhances safety.
- Respond to the Small Airplane Revitalization Act of 2013 (H.R. 1848), which requires the FAA adopt the recommendations from part 23 Reorganization Aviation Rulemaking Aviation Rulemaking Committee (ARC) for improving safety and reducing certification costs for general aviation. The ARC recommendations include a broad range of policy and regulatory changes that it believes could significantly improve the safety of general aviation aircraft while simultaneously reducing certification and modification costs for these aircraft. Among the ARC's recommendations is a suggestion that compliance with part 23 requirements be performance-based, focusing on the complexity and performance of an aircraft instead of the current regulations based on weight and type of propulsion. In announcing the ARC's recommendations, the Secretary of Transportation said ''Streamlining the design and certification process could provide a cost-efficient way to build simple airplanes that still incorporate the latest in safety initiatives. These changes have the potential to save money and maintain our safety standing—a win-win situation for manufacturers, pilots and the general aviation community as a whole.'' Further, these changes are consistent with directions to agencies in Executive Order 13610 ''*Identifying and Reducing Regulatory Burdens,*'' we continue to find ways to make our regulatory program more effective or less burdensome; provide quantifiable monetary savings or quantifiable reductions in paperwork burdens, and modify and streamline regulations in light of changed circumstances.
- Work cooperatively to harmonize the U.S. aviation regulations with those of other countries, without compromising rigorous safety standards, or our requirements to develop cost benefit analysis. The differences worldwide in certification standards, practice and procedures, and operating rules must be identified and minimized to reduce the regulatory burden on the international aviation system. The differences between the FAA regulations and the requirements of other nations impose a heavy burden on U.S. aircraft manufacturers and operators, some of which are small businesses. Standardization should help the U.S. aerospace industry remain internationally competitive. The FAA continues to publish regulations based on internal analysis, public comment, and recommendations of Aviation Rulemaking Committees that are the result of cooperative rulemaking between the U.S. and other countries.

FAA top regulatory priorities for Fiscal Year 2017 include:

- Revision of Airworthiness Standards for Normal, Utility, Acrobatic, and Commuter Category Airplanes (2120–AK65)
- Airport Safety Management System (2120–AJ38)
- Flight Crewmember Mentoring, Leadership and Professional Development (2120–AJ87)

The Revision of Airworthiness Standards for Normal, Utility, Acrobatic, and Commuter Category Airplanes rulemaking would:

- Reorganize part 23 into performance-based requirements by removing the detailed design requirements from part 23;
- Promote the adoption of the newly created performance-based airworthiness design standard as an internationally accepted standard by the majority of other civil aviation authorities;
- Re-align the part 23 requirements to promote the development of entry-level airplanes similar to those certified under Certification Specification for Very Light Aircraft (CS–VLA);
- Enhance the FAA's ability to address new technology;
- Increase the general aviation (GA) level of safety provided by new and modified airplanes;
- Amend the stall, stall warning, and spin requirements to reduce fatal accidents and increase crashworthiness by allowing new methods for occupant protection; and
- Address icing conditions that are currently not included in part 23 regulations.

The Airport Safety Management System rulemaking would:

- Require certain airport certificate holders to develop, implement, maintain, and adhere to a safety management system (SMS) for its aviation related activities.

The Flight Crewmember Mentoring, Leadership and Professional Development rulemaking would:

- Ensure air carriers establish or modify training programs to address mentoring, leadership and professional development of flight crewmembers in part 121 operations.

Federal Highway Administration (FHWA)

The Federal Highway Administration (FHWA) carries out the Federal highway program in partnership with State and local agencies to meet the Nation's transportation needs. The FHWA's

mission is to improve continually the quality and performance of our Nation's highway system and its intermodal connectors.

Consistent with this mission, the FHWA will continue:

- With ongoing regulatory initiatives in support of its surface transportation programs;
- To implement legislation in the most cost-effective way possible; and
- To pursue regulatory reform in areas where project development can be streamlined or accelerated, duplicative requirements can be consolidated, recordkeeping requirements can be reduced or simplified, and the decisionmaking authority of our State and local partners can be increased.

MAP–21 authorizes the Federal surface transportation programs for highways, highway safety, and transit for the two-year period from 2012–2014. The FHWA has analyzed MAP–21 to identify Congressionally directed rulemakings. These rulemakings will be the FHWA's top regulatory priorities for the coming year.

Additionally, the FHWA is in the process of reviewing all FHWA regulations to ensure that they are consistent with MAP–21 and will update those regulations that are not consistent with the recently enacted legislation.

The Fixing America's Surface Transportation (FAST) Act authorizes the Federal surface transportation programs for highways, highway safety, and transit for the five-year period from 2016–2020. The FHWA has analyzed the FAST Act to identify Congressionally directed rulemakings. These rulemakings will be the FHWA's top regulatory priorities for the coming year.

Additionally, the FHWA is in the process of reviewing all FHWA regulations to ensure that they are consistent with the FAST Act and will update those regulations that are not consistent with the recently enacted legislation.

During Fiscal Year 2017, FHWA will continue its focus on improving the quality and performance of our Nation's highway systems by creating national performance management measures and standards to be used by the States to meet the national transportation goals identified in section 1203 of MAP–21 under the following rulemaking initiatives:

- National Goals and Performance Management Measures (Bridges and Pavement) (RIN: 2125–AF53)
- National Goals and Performance Management Measures (Congestion Reduction, CMAQ, Freight, and Performance of Interstate/Non-Interstate NHS) (RIN: 2125–AF54).

Federal Motor Carrier Safety Administration (FMCSA)

The mission of the Federal Motor Carrier Safety Administration (FMCSA) is to reduce crashes, injuries, and fatalities involving commercial trucks and buses. A strong regulatory program is a cornerstone of FMCSA's compliance and enforcement efforts to advance this safety mission. FMCSA develops new and more effective safety regulations based on three core priorities: Raising the safety bar for entry, maintaining high standards, and removing high-risk behavior. In addition to Agency-directed regulations, FMCSA develops regulations mandated by Congress, through legislation such as MAP–21. FMCSA regulations establish standards for motor carriers, commercial drivers, commercial motor vehicles, and State agencies receiving certain motor carrier safety grants and issuing commercial drivers' licenses.

FMCSA's regulatory plan for FY 2017 includes completion of a number of rulemakings that are high priorities for the Agency because they would have a positive impact on safety. Among the rulemakings included in the plan are: (1) Carrier Safety Fitness Determination (RIN 2126–AB11), (2) Entry Level Driver Training (RIN 2126–AB66), and (3) Commercial Driver's License Drug and Alcohol Clearinghouse (RIN 2126–AB18).

Together, these priority rules could improve substantially commercial motor vehicle (CMV) safety on our Nation's highways by increasing FMCSA's ability to provide safety oversight of motor carriers and commercial drivers.

In FY 2017, FMCSA plans to issue a final rule on Carrier Safety Fitness Determination (RIN 2126–AB11) to establish a new safety fitness determination standard that will enable the Agency to prohibit ''unfit'' carriers from operating on the Nation's highways and contribute to the Agency's overall goal of decreasing CMV-related fatalities and injuries.

In FY 2017, FMCSA plans to issue a final rule on Entry Level Driver Training (RIN 2126–AB66). This rule would establish training requirements for individuals before they can obtain their CDL or certain endorsements. It will define curricula for training providers and establish requirements and procedures for the schools.

Also in FY 2017, FMCSA plans to issue a final rule on the Commercial Driver's License Drug and Alcohol Clearinghouse (RIN 2126–AB18). The rule would establish a clearinghouse requiring employers and service agents to report information about current and prospective employees' drug and alcohol test results. It would require employers and certain service agents to search the Clearinghouse for current and prospective employees' positive drug and alcohol test results as a condition of permitting those employees to perform safety-sensitive functions. This would provide FMCSA and employers the necessary tools to identify drivers who are prohibited from operating a CMV based on DOT drug and alcohol program violations and ensure that such drivers receive the required evaluation and treatment before resuming safety-sensitive functions.

National Highway Traffic Safety Administration

The statutory responsibilities of the National Highway Traffic Safety Administration (NHTSA) relating to motor vehicles include reducing the number, and mitigating the effects, of motor vehicle crashes and related fatalities and injuries; providing safety performance information to aid prospective purchasers of vehicles, child restraints, and tires; and improving automotive fuel efficiency. NHTSA pursues policies that encourage the development of nonregulatory approaches when feasible in meeting its statutory mandates. It issues new standards and regulations or amendments to existing standards and regulations when appropriate. It ensures that regulatory alternatives reflect a careful assessment of the problem and a comprehensive analysis of the benefits, costs, and other impacts associated with the proposed regulatory action. Finally, it considers alternatives consistent with the Administration's regulatory principles.

NHTSA plans to issue a final rule on vehicle-to-vehicle (V2V) communications in Fiscal Year 2017. V2V communications are currently perceived to become a foundational aspect of vehicle automation. NHTSA will publish a final rule on heavy vehicle speed limiters in response to petitions for rulemaking and recommendations from the National Transportation Safety Board. In Fiscal Year 2017 NHTSA will also finalize rulemaking for Tire Fuel Efficiency in response to requirements of the Energy Independence & Security Act of 2007. In response to requirements in MAP–21, NHTSA plans to continue work toward a final rule that would require automobile manufacturers to install a seat belt reminder system for the front passenger and rear designated seating positions in passenger vehicles. The seat

belt reminder system is intended to increase belt usage and thereby improve the crash protection of vehicle occupants who would otherwise have been unbelted.

In addition to numerous programs that focus on the safe performance of motor vehicles, the Agency is engaged in a variety of programs to improve driver and occupant behavior. These programs emphasize the human aspects of motor vehicle safety and recognize the important role of the States in this common pursuit. NHTSA has identified two high-priority areas: Safety belt use and impaired driving. To address these issue areas, the Agency is focusing especially on three strategies—conducting highly visible, well-publicized enforcement; supporting prosecutors who handle impaired driving cases and expanding the use of DWI/Drug Courts, which hold offenders accountable for receiving and completing treatment for alcohol abuse and dependency; and adopting alcohol screening and brief intervention by medical and health care professionals. Other behavioral efforts encourage child safety-seat use; combat excessive speed, driver distraction, and aggressive driving; improve motorcycle, bicycle, and pedestrian safety; and provide consumer information to the public.

Federal Railroad Administration (FRA)

FRA's current regulatory program reflects a number of pending proceedings to satisfy mandates resulting from the Rail Safety Improvement Act of 2008 (RSIA08), the Passenger Rail Investment and Improvement Act of 2008 (PRIIA), and the Fixing America's Surface Transportation Act of 2015 (FAST Act), as well as actions under its general safety rulemaking authority and actions supporting a high-performing passenger rail network and to address the safe and effective movement of energy products, particularly crude oil. RSIA08 alone has required 21 rulemaking actions, 19 of which have been completed. The FAST Act requires an additional 13 rulemaking actions, 4 of which are complete and 6 others are in the developmental or proposal stage. FRA continues to prioritize its rulemakings according to the greatest effect on safety while promoting economic growth, innovation, competitiveness, and job creation, as well as expressed congressional interest, while working to complete as many mandated rulemakings as quickly as possible.

FRA is working to complete its on-going development of requirements related to the creation and implementation of railroad risk reduction programs (RIN 2130–AC11). FRA is finalizing initial rulemaking documents based on the recommendations of a Railroad Safety Advisory Committee (RSAC) working group containing the fatigue management provisions related to risk reduction and system safety programs. FRA is also in the process of producing a final regulatory action related to the transportation of crude oil and ethanol by rail, focusing on the appropriate crew size requirements when transporting such commodities. FRA's crew size activity will also address other freight and passenger operations to ensure FRA will have appropriate oversight if a railroad chooses to alter its standard method of operation. FRA continues its work to produce a rulemaking containing RSAC-supported actions that advance high-performing passenger rail to propose standards for alternative compliance with FRA's Passenger Equipment Safety Standards for the operation of Tier III passenger equipment (RIN 2130–AC51). Through RSAC, FRA is developing recommendations for proposed rules regarding track inspections aimed at improving rail integrity to allow continuous rail integrity testing and to address rail head wear. Finally, FRA is developing proposed rules related to the use of inward and outward facing locomotive-mounted cameras and other recording devices in response to a FAST Act mandate for such devices on passenger locomotives.

Federal Transit Administration (FTA)

FTA helps communities support public transportation by making grants of Federal funding for transit vehicles, construction of transit facilities, and planning and operation of transit and other transit-related purposes. FTA regulatory activity implements the laws that apply to recipients' uses of Federal funding and the terms and conditions of FTA grant awards. FTA policy regarding regulations is to:

- Ensure the safety of public transportation systems.
- Provide maximum benefit to the Nation's mobility through the connectivity of transportation infrastructure;
- Provide maximum local discretion;
- Ensure the most productive use of limited Federal resources;
- Protect taxpayer investments in public transportation;
- Incorporate principles of sound management into the grant management process.

As the needs for public transportation have changed over the years, the Federal transit programs have grown in number and complexity often requiring implementation through the rulemaking process. FTA is currently implementing many of its public transportation programs authorized under MAP–21 through the regulatory process. To that end, FTA's regulatory priorities include implementing the newly authorized Public Transportation Safety Program (49 U.S.C. 5329), such as the Public Transportation Safety Plan and updating the State Safety Oversight rule, as well as, implementing requirements for Transit Asset Management Systems (49 U.S.C. 5326). The joint FTA/FHWA planning rule which will be merged with FTA/FHWA's Additional Authorities for Planning and Environmental Linkages rule and FTA's Bus Testing rule round out its regulatory priorities.

Maritime Administration (MARAD)

The Maritime Administration (MARAD) administers Federal laws and programs to improve and strengthen the maritime transportation system to meet the economic, environmental, and security needs of the Nation. To that end, MARAD's efforts are focused upon ensuring a strong American presence in the domestic and international trades and to expanding maritime opportunities for American businesses and workers.

MARAD's regulatory objectives and priorities reflect the agency's responsibility for ensuring the availability of water transportation services for American shippers and consumers and, in times of war or national emergency, for the U.S. armed forces. Major program areas include the following: Maritime Security, Voluntary Intermodal Sealift Agreement, National Defense Reserve Fleet and the Ready Reserve Force, Cargo Preference, Maritime Guaranteed Loan Financing, United States Merchant Marine Academy, Mariner Education and Training Support, Deepwater Port Licensing, and Port and Intermodal Development. Additionally, MARAD administers the Small Shipyard Grants Program through which equipment and technical skills training are provided to America's maritime workforce, with the aim of helping businesses to compete in the global marketplace while creating well-paying jobs at home.

MARAD's primary regulatory activities in Fiscal Year 2017 will be to continue the update of existing regulations as part of the Department's Retrospective Regulatory Review effort, and to propose new regulations where appropriate.

Pipeline and Hazardous Materials Safety Administration (PHMSA)

The Pipeline and Hazardous Materials Safety Administration (PHMSA) has responsibility for rulemaking under two programs. Through the Associate Administrator for the Office of Hazardous Materials Safety (OHMS), PHMSA administers regulatory programs under Federal hazardous materials transportation law and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. Through the Associate Administrator for the Office of Pipeline Safety (OPS), PHMSA administers regulatory programs under the Federal pipeline safety laws and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. The Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 included a number of rulemaking studies and mandates and additional enforcement authorities that continue to impact PHMSA's regulatory activities in Fiscal Year 2016.[14]

PHMSA will continue to work toward improving safety related to transportation of hazardous materials by all transportation modes, including pipeline, while promoting economic growth, innovation, competitiveness, and job creation. We will concentrate on the prevention of high-risk incidents identified through the findings of the National Transportation Safety Board (NTSB) and PHMSA's evaluation of transportation incident data. PHMSA will use all available Agency tools to assess data; evaluate alternative safety strategies, including regulatory strategies as necessary and appropriate; target enforcement efforts; and enhance outreach, public education, and training to promote safety outcomes.

OHMS

On December 4, 2015, President Barack Obama signed legislation entitled, ''Fixing America's Surface Transportation Act of 2015,'' or the ''FAST Act.'' *See* Public Law 114–94. The FAST Act includes the ''Hazardous Materials Transportation Safety Improvement Act of 2015'' (Sections 7001 through 7311) which instructs the Secretary of Transportation (''Secretary'') to make specific regulatory amendments to the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). PHMSA has been very effective in implementing the FAST Act provisions. For example, PHMSA recently issued a final rule to expand requirements for the use of the DOT Specification 117 tank car to all flammable liquids, regardless of train make-up. This change will promote consistency for all flammable liquid tank cars and simplify compliance for shippers and carriers. As a result of these actions, all retrofitted and newly constructed DOT Specification 117 tank cars will be equipped with top fittings protection, jackets, thermal protection systems, full height head shields, and better outlet valves. The expanded use of the enhanced tank car will reduce the likelihood of a flammable liquid release in the event of a derailment.

PHMSA will continue to focus on the streamlining of its regulatory system and reducing regulatory burdens. PHMSA will evaluate existing rules to examine whether they remain justified; should be modified to account for changing circumstances and technologies; or should be streamlined or even repealed. PHMSA will continue to evaluate, analyze, and be responsive to petitions for rulemaking. PHMSA will review regulations, letters of interpretation, petitions for rulemaking, special permits, enforcement actions, approvals, and international standards to identify inconsistencies, outdated provisions, and barriers to regulatory compliance.

PHMSA aims to reduce the risks related to the transportation of hazardous materials by rail. Preventing tank car incidents and minimizing the consequences when an incident does occur are not only DOT priorities, but are also shared by our Federal and international partners, the NTSB, industry, and the general public. Expansion in United States energy production has led to significant challenges in the transportation system. Expansion in oil production has led to increasing volumes of energy products transported to refineries. With a growing domestic supply, rail transportation, in particular, has emerged as an alternative to transportation by pipeline or vessel. The growing reliance on trains to transport large volumes of flammable liquids raises risks that have been highlighted by the recent instances of trains carrying crude oil that have derailed. PHMSA issued a Notice of Proposed Rulemaking on July 29, 2016 (81 FR 50067), seeking comment on potential revisions to its regulations that would expand the applicability of comprehensive oil spill response plans (OSRPs) for crude oil trains and require railroads to share information about high-hazard flammable train operations with state and tribal emergency response commissions to improve community preparedness. PHMSA will continue to take regulatory actions to enhance the safe transportation of energy products.

PHMSA is also looking to reduce the risk of transporting lithium batteries by air. The safe transport of lithium batteries by air has been an ongoing concern due to the unique challenges they pose to safety in a transportation environment. Unlike other hazardous materials, lithium batteries contain both a chemical and an electrical hazard. This combination of hazards, when involved in a fire encompassing significant quantities of lithium batteries, may exceed the fire suppression capability of the aircraft and lead to a catastrophic lithium battery event. PHMSA is developing regulatory actions that will: (1) Prohibit the transport of lithium ion cells and batteries as cargo on passenger aircraft; (2) require all lithium ion cells and batteries to be shipped at not more than a 30 percent state of charge on cargo-only aircraft; and (3) limits the use of alternative provisions for small lithium cell or battery shipments under 49 CFR 173.185(c). These amendments will predominately affect air carriers (both passenger and cargo-only) and shippers offering lithium ion cells and batteries for transport as cargo by aircraft. The amendments will not restrict passengers or crew members from bringing personal items or electronic devices containing lithium batteries aboard aircraft in carry-on or checked baggage.

OPS

President Obama signed the Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2016 (or the ''PIPES Act of 2016'') on June 22, 2016. The 2016 Act reauthorizes the pipeline safety program and requires a number of reports and mandates. Under the 2016 Act, PHMSA is required to take regulatory actions to establish minimum safety standards for underground natural gas storage facilities, and to update the minimum safety standards for liquefied natural gas pipeline facilities for permanent, small scale liquefied natural gas pipeline facilities. The Act also contains regulatory mandates regarding emergency order authority, unusually sensitive areas, and hazardous materials identification numbers. PHMSA is in the process of taking the necessary steps to address these mandates.

On October 13, 2015 [80 FR 61609], PHMSA issued an NPRM proposing changes to the regulations covering hazardous liquid onshore pipelines. Specifically, the agency proposed regulatory changes relative to High

[14] *http://www.phmsa.dot.gov/pv_obj_cache/pv_obj_id_7FD46010F0497123865B976479CFF3952E990200/filename/Pipeline%20Reauthorization%20Bill%202011.pdf.*

Consequence Areas (HCAs) for integrity management (IM) protections, repair timeframes, and reporting for all hazardous liquid gathering lines. The agency also addressed public safety and environmental aspects of any new requirements, as well as the cost implications and regulatory burden.

Also, on April 8, 2016 [81 FR 20722], PHMSA proposed to revise the requirements in the Pipeline Safety Regulations to address integrity management principles for Gas Transmission pipelines. In particular, PHMSA proposed requirements to address repair criteria for both HCA and non-HCA areas, assessment methods, validating and integrating pipeline data, risk assessments, knowledge gained through the IM program, corrosion control, management of change, gathering lines, and safety features on launchers and receivers.

QUANTIFIABLE COSTS AND BENEFITS OF RULEMAKINGS ON THE 2016 TO 2017 DOT REGULATORY PLAN

[This chart does not account for benefits and costs that could not be monetized, which may be substantial]

QUANTIFIABLE COSTS AND BENEFITS OF RULEMAKINGS ON THE 2016 TO 2017 DOT REGULATORY PLAN—Continued

[This chart does not account for benefits and costs that could not be monetized, which may be substantial]

Agency/RIN No.	Title	Stage	Quantifiable costs discounted 2013 $ (millions)	Quantifiable benefits discounted 2013 $ (millions)
2137–AF08	Hazardous Materials: Oil Spill Response Plans and Information Sharing for High-Hazard Flammable Trains.	FR 07/17	2.9m per year	Breakeven Analysis. Cost-effective if this requirement reduces risk by 3.7%.

Notes: Costs and benefits of rulemakings may be forecast over varying periods. Although the forecast periods will be the same for any given rulemaking, comparisons between proceedings should be made cautiously.

Costs and benefits are generally discounted at a 7 percent discount rate over the period analyzed.

The Department of Transportation generally assumes that there are economic benefits to avoiding a fatality of $9.4 million. That economic value is included as part of the benefits estimates shown in the chart. As noted above, we have not included the non-quantifiable benefits.

DOT—FEDERAL AVIATION ADMINISTRATION (FAA)

Proposed Rule Stage

88. +Airport Safety Management System

Priority: Other Significant.

Legal Authority: 49 U.S.C. 44706; 49 U.S.C. 106(g); 49 U.S.C. 40113; 49 U.S.C. 44701 to 44706; 49 U.S.C. 44709; 49 U.S.C. 44719

CFR Citation: 14 CFR 139.

Legal Deadline: Final, Statutory, November 5, 2012, Final rule.

Abstract: This rulemaking would require certain airport certificate holders to develop, implement, maintain, and adhere to a safety management system (SMS) for its aviation-related activities. An SMS is a formalized approach to managing safety by developing an organization-wide safety policy, developing formal methods of identifying hazards, analyzing and mitigating risk, developing methods for ensuring continuous safety improvement, and creating organization-wide safety promotion strategies.

Statement of Need: In the NPRM published on October 7, 2010, the FAA proposed to require all part 139 certificate holders to develop and implement an SMS to improve the safety of their aviation-related activities. The FAA received 65 comment documents from a variety of commenters. Because of the complexity of the issues and concerns raised by the commenters, the FAA began to reevaluate whether deployment of SMS at all certificated airports was the most effective approach. The FAA continues to believe that an SMS can address potential safety gaps that are not completely eliminated through effective FAA regulations and technical operating standards. While the comments generated some changes to the proposal in this document, most of the proposed core elements of the SMS program remain in the SNPRM. The FAA now proposes to require an SMS be developed, implemented, maintained, and adhered to at any certificated airport that is: (i) Classified as a Small, Medium, or Large hub airport in the National Plan of Integrated Airport Systems; (ii) identified by the U.S. Customs and Border Protection as a port-of-entry, designated international airport, landing rights airport, or user fee airport; or (iii) identified as having more than 100,000 total annual operations (according to best available data).

Summary of Legal Basis: The FAA's authority to issue rules regarding aviation safety is found in title 49 of the United States Code. Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. The FAA is proposing this rulemaking under the authority described in subtitle VII, part A, subpart III, section 44706, ''Airport operating certificates.'' Under that section, Congress charges the FAA with issuing airport operating certificates (AOC) that contain terms that the Administrator finds necessary to ensure safety in air transportation. This proposed rule is within the scope of that authority because it requires certain certificated airports to develop and maintain an SMS. The development and implementation of an SMS ensures safety in air transportation by assisting these airports in proactively identifying and mitigating safety hazards.

Alternatives: The FAA explored various alternatives to determine how to apply an SMS requirement to a group of airports that gains the most benefit in a cost-effective manner. The FAA focused on airports with the highest passenger enplanements and largest total operations so that safety benefits would flow to the overwhelming majority of aircraft operations in the United States. The FAA also focused on incorporating airports with international passenger operations to ensure conformity with international standards and recommended practices. To that end, the FAA developed the following alternatives for additional analysis: (i) All part 139 airports (as originally proposed); (ii) airport operators holding a Class I airport operating certificate; (iii) certificated international airports regardless of certificate class; (iv) Large, Medium, and Small hub airports (as identified in the National Plan of Integrated Airport Systems) and certificated airports with more than 100,000 total annual operations; and (v) Large, Medium, and Small hub airports, certificated airports with more than 100,000 total annual operations, and certificated international airports.

Anticipated Cost and Benefits: Benefits are estimated at $370,788,457 ($225,850,869 present value) and total costs are estimated at $238,865,692 ($157,496,312 present value), with benefits exceeding costs. These are preliminary estimates subject to change based on further review and analysis.

Risks: An SMS is a formalized approach to managing safety by developing an organization-wide safety policy, developing formal methods of identifying hazards, analyzing and mitigating risk, developing methods for ensuring continuous safety improvement, and creating organization-wide safety promotion strategies. An SMS provides an organization's management with a set of decisionmaking tools that can be used to plan, organize, direct, and control its business activities in a manner that enhances safety and ensures compliance with regulatory standards. Adherence to standard operating procedures, proactive identification and mitigation of hazards and risks, and effective communications are crucial to continued operational safety. The FAA envisions an SMS would provide an airport with an added layer of safety to help reduce the number of near-misses, incidents, and accidents. An SMS also would ensure that all levels of airport

management understand safety implications of airfield operations.

Regulatory Flexibility Analysis Required: Yes.

Small Entities Affected: Businesses.

Government Levels Affected: State.

Additional Information: The estimated costs of this rule do not include the costs of mitigations that operators could incur as a result of conducting the risk analysis proposed in this rule. Given the range of mitigation actions possible, it is difficult to provide a quantitative estimate of both the costs and benefits of such mitigations. However, we anticipate that operators will only implement mitigations where benefits exceeded costs. As such, the FAA believes that the costs of this rule would be justified by the anticipated benefits of the rule, if adopted as proposed.

RIN: 2120–AJ38

DOT—FAA

89. +Pilot Professional Development

Priority: Other Significant.

Legal Authority: 49 U.S.C. 44701(a)(5); P.L. 111–216, sec. 206.

CFR Citation: 14 CFR 121.

Legal Deadline: NPRM, Statutory, April 20, 2015, NPRM.

Abstract: This rulemaking would amend the regulations for air carrier training programs under part 121. The action is necessary to ensure that air carriers establish or modify training programs to address mentoring, leadership and professional development of flight crewmembers in part 121 operations. This rulemaking is required by the Airline Safety and Federal Aviation Administration Act of 2010.

Statement of Need: On August 1, 2010, the President signed the Airline Safety and Federal Aviation Administration Extension Act of 2010 (Public Law 111–216). Section 206 of Public Law 111–216 directed the FAA to convene an aviation rulemaking committee (ARC) to develop procedures for each part 121 air carrier pertaining to mentoring, professional development, and leadership and command training for pilots serving in part 121 operations and to issue a Notice of Proposed Rulemaking (NPRM) based on the ARC recommendations. This NPRM is necessary to satisfy a requirement of section 206 of Public Law 111–216.

Summary of Legal Basis: The FAA authority to issue rules on aviation safety is found in title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the general authority described in 49 U.S.C. 106(f) and 44701(a) and the specific authority found in section 206 of Public Law 111–216, the Airline Safety and Federal Aviation Administration Extension Act of 2010 (49 U.S.C. 44701 note), which directed the FAA to convene an aviation rulemaking committee (ARC) and conduct a rulemaking proceeding based on this ARC's recommendations pertaining to mentoring, professional development, and leadership and command training for pilots serving in part 121 operations. Section 206 further required that the FAA include in leadership and command training, instruction on compliance with flightcrew member duties under 14 CFR 121.542.

Alternatives: The Flight Crewmember Mentoring, Leadership, and Professional Development ARC presented recommendations to the FAA in its report dated November 2, 2010.

Anticipated Cost and Benefits: For the timeframe 2015 to 2024 (Millions of 2013 Dollars), the total cost saving benefits is $72.017 ($46.263 present value) and the total compliance costs is $67.632 ($46.774 present value).

Risks: As recognized by the National Transportation Safety Board (NTSB), the overall safety and reliability of the National Airspace System demonstrates that most pilots conduct operations with a high degree of professionalism. Nevertheless, a problem still exists in the aviation industry with some pilots acting unprofessionally and not adhering to standard operating procedures, including sterile cockpit. The NTSB has continued to cite inadequate leadership in the flight deck, pilots' unprofessional behavior, and pilots' failure to comply with the sterile cockpit rule as factors in multiple accidents and incidents including Pinnacle Airlines flight 3701 and Colgan Air, Inc. flight 3407. The FAA intends for this proposal to mitigate unprofessional pilot behavior which would reduce pilot errors that can lead to a catastrophic event.

RIN: 2120–AJ87

DOT—FAA

Final Rule Stage

90. +Revision of Airworthiness Standards for Normal, Utility, Acrobatic, and Commuter Category Airplanes (RRR)

Priority: Other Significant.

Legal Authority: 49 U.S.C. 106(g); 49 U.S.C. 40113; 49 U.S.C. 44701; 49 U.S.C. 44702; 49 U.S.C. 44704

CFR Citation: 14 CFR 23.

Legal Deadline: Final, Statutory, December 15, 2015, NPRM (Pub. L. 113–53).

Abstract: This rulemaking would revise Title 14, Code of Federal Regulations (14 CFR) part 23 as a set of performance based regulations for the

design and certification of small transport category aircraft. This rulemaking would: (1) Reorganize part 23 into performance-based requirements by removing the detailed design requirements from part 23. The detailed design provisions that would assist applicants in complying with the new performance-based requirements would be identified in means of compliance (MOC) documents to support this effort; (2) promote the adoption of the newly created performance-based airworthiness design standard as an internationally accepted standard by the majority of other civil aviation authorities; (3) re-align the part 23 requirements to promote the development of entry-level airplanes similar to those certified under Certification Specification for Very Light Aircraft (CS–VLA); (4) enhance the FAA's ability to address new technology; (5) increase the general aviation (GA) level of safety provided by new and modified airplanes; (6) amend the stall, stall warning, and spin requirements to reduce fatal accidents and increase crashworthiness by allowing new methods for occupant protection; and (7) address icing conditions that are currently not included in part 23 regulations.

Statement of Need: The FAA's strategic vision—Destination 2025, communicates FAA goals to increase safety throughout general aviation by enabling and facilitating innovation and development of safety enhancing products. This project intends to provide an appropriate and globally competitive regulatory structure that allows small transport category airplanes to achieve FAA safety goals through innovation and compliance with performance-based safety standards. One focus area is Loss of Control (LOC) accidents, which continues to be the largest source of fatal GA accidents. To address LOC accidents, the Small Airplane Directorate is focused on establishing standards based on a safety continuum that balances the level of certitude, appropriate level of safety, and acceptable risk for each segment of GA. This risk-based approach to certification has already served the FAA and public well, with the application of section 23.1309 to avionics equipment in part 23 airplanes, leading to the successful introduction of glass cockpits in small GA airplanes. To improve the GA fleet's safety level over that of today's aging fleet, the FAA needs to allow industry to build new part 23 certificated airplanes with today's safety enhancing technologies. Although a number of new small airplanes are being built, many are certified to the Civil Air Regulations (CAR 3) part 3, or very early amendment levels of part 23, and reflect the level of safety technology available when they were designed decades ago. Without new airplanes and improved existing airplanes, we will not see the safety improvements in GA that are possible with the technology developed since the 1970's. This rulemaking effort targets: Increasing the safety level in new airplanes; reducing the cost of certification to encourage newer and safer airplane development; and create new opportunities to address safety related issues, not just in new airplanes, but eventually with the existing fleet.

Summary of Legal Basis: Authority: 49 U.S.C. 106(g), 40113, 44701–44702, 44704. Additionally, Public Law 113–53, Small Airplane Revitalization Act of 2013 (Nov. 27, 2013), requires that the FAA issue a final rule revising these standards by December 15, 2015.

Alternatives: Several alternatives are considering. 1. Retaining part 23 in its current form without adopting the recommendations of the ARC and the CPS. 2. Revising part 23 using a tiered approach and adopting a performance and complexity tiering structure instead of the propulsion and weight-based approach used today, but retaining the detailed design requirements in the rule. 3. Allowing an industry standard for part 23 entry-level airplanes as an alternative to part 23. Airplanes other than entry-level would still be regulated within the confines of the existing part 23.

Anticipated Cost and Benefits: For the timeframe 2017 to 2036 (2014 $ Millions), the total costs are $3.9 ($3.9 present value) and the total benefits are $30.8 ($11.6 present value).

Risks: To be determined.

RIN: 2120–AK65.

DOT—FEDERAL HIGHWAY ADMINISTRATION (FHWA)

Final Rule Stage

91. +National Goals and Performance Management Measures 2 (MAP–21)

Priority: Other Significant.

Legal Authority: Sec. 1203 P.L. 112–141; 49 CFR 1.85

CFR Citation: Not Yet Determined.

Legal Deadline: NPRM, Statutory, April 1, 2014, NPRM.

Section 1203 of MAP–21 requires the Secretary to promulgate a rulemaking within 18 months after the date of enactment.

Abstract: This rulemaking would create national performance management measures and standards to be used by the States to meet the national transportation goals identified in section 1203 of MAP–21. This rulemaking would also establish the process to be used by States to set performance targets that reflect their performance measures. The FHWA anticipates issuing up to three rulemakings in this area. This rulemaking, number two, will cover the bridges and pavement.

Statement of Need: The Moving Ahead for Progress in the 21st Century Act (MAP–21) transforms the Federal-aid highway program by establishing new requirements for performance management to ensure the most efficient investment of Federal transportation funds. Performance management refocuses attention on national transportation goals, increases the accountability and transparency of the Federal-aid highway program, and improves project decisionmaking through performance-based planning and programming. This rulemaking is the second of three that would propose the establishment of performance measures for State DOTs and MPOs to use to carry out Federal-aid highway programs and to assess performance in

each of the 12 areas mandated by MAP–21. This rulemaking would establish performance measures for State DOTs to use to carry out the National Highway Performance Program (NHPP) and to assess: Condition of pavements on the National Highways System (NHS) (excluding the Interstate System), condition of pavements on the Interstate System, and condition of bridges on the NHS. This rulemaking would also propose: The definitions that will be applicable to the new 23 CFR 490; the process to be used by State DOTs and MPOs to establish performance targets that reflect the measures proposed in this rulemaking; a methodology to be used to assess State DOTs compliance with the target achievement provision specified under 23 U.S.C. 119(e)(7); and the process to be followed by State DOTs to report on progress towards the achievement of pavement and bridge condition-related performance targets.

Summary of Legal Basis: Section 1203 of MAP–21 requires the Secretary of Transportation to establish performance measures and standards through a rulemaking to assess performance in 12 areas.

Alternatives: N/A.

Anticipated Cost and Benefits: The FHWA estimated the incremental costs associated with the new requirements proposed in this regulatory action that represent a change to current practices for State DOTs and MPOs. Following this approach, the estimated 10-year undiscounted incremental costs to comply with this rule are $196.4 million. The FHWA could not directly quantify the expected benefits due to data limitations and the amorphous nature of the benefits from the proposed rule. Therefore, in order to evaluate the benefits, FHWA used a break-even analysis as the primary approach to quantify benefits. For both pavements and bridges, FHWA focused its break-even analysis on Vehicle Operating Costs (VOC) savings. The FHWA estimated the number of road miles of deficient pavement that would have to be improved and the number of posted bridges that would have to be avoided in order for the benefits of the rule to justify the costs. The results of the break-even analysis quantified the dollar value of the benefits that the proposed rule must generate to outweigh the threshold value, the estimated cost of the proposed rule, which is $196.4 million in undiscounted dollars. The FHWA believes that the proposed rule would surpass this threshold and, as a result, the benefits of the rule would outweigh the costs.

Risks: N/A.

92. +National Goals and Performance Management Measures 3 (MAP–21)

Priority: Other Significant.

Legal Authority: Sec. 1203, P.L. 112–141; 49 FR 1.85

CFR Citation: 23 CFR 490.

Legal Deadline: NPRM, Statutory, April 1, 2014, NPRM.

Section 1203 of MAP–21 requires the Secretary to promulgate a rulemaking within 18 months after the date of enactment.

Abstract: This rulemaking would create national performance management measures and standards to be used by the States to meet the national transportation goals identified in section 1203 of MAP–21. This rulemaking would also establish the process to be used by States to set performance targets that reflect their performance measures. The FHWA anticipates issuing up to three rulemakings in this area. This rulemaking covers Congestion Mitigation and Air Quality (CMAQ) and Freight issues.

Statement of Need: The Moving Ahead for Progress in the 21st Century Act (MAP–21) transforms the Federal-aid highway program by establishing new requirements for performance management to ensure the most efficient investment of Federal transportation funds. Performance management refocuses attention on national transportation goals, increases the accountability and transparency of the Federal-aid highway program, and improves project decisionmaking through performance-based planning and programming. This rulemaking is the third of three that would propose the establishment of performance measures for State DOTs and MPOs to use to carry out Federal-aid highway programs and to assess performance in each of the 12 areas mandated by MAP–21. This rulemaking would establish performance measures for State DOTs to use in the areas of Congestion Reduction, Congestion mitigation and air quality improvement program (CMAQ), Freight, and Performance of Interstate/Non-Interstate National Highway System.

Summary of Legal Basis: Section 1203 of MAP–21 requires the Secretary of Transportation to establish performance measures and standards through a rulemaking to assess performance in 12 areas.

RIN: 2125–AF54

DOT—FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION (FMCSA)

Final Rule Stage

93. +Entry-Level Driver Training (Section 610 Review)

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 49 U.S.C. 31136

CFR Citation: 49 CFR 380; 49 CFR 383; 49 CFR 384.

Legal Deadline: None.

Abstract: FMCSA establishes new minimum training standards for certain individuals applying for their commercial driver's license (CDL) for the first time; an upgrade of their CDL (*e.g.,* a Class B CDL holder seeking a Class A CDL); or a hazardous materials (H), passenger (P), or school bus (S) endorsement for the first time. These individuals are subject to the entry-level driver training (ELDT) requirements and must complete a prescribed program of instruction provided by an entity that is listed on FMCSA's Training Provider Registry (TPR). FMCSA will submit training certification information to State driver licensing agencies (SDLAs), who may only administer CDL skills tests to applicants for the Class A and B CDL, and/or the P or S endorsements, or knowledge test for the H endorsement, after verifying the information is present in the driver's record. This final rule responds to a Congressional mandate imposed under the Moving Ahead for Progress in the 21st Century Act (MAP–21). The rule is based on consensus recommendations from the Agency's Entry-Level Driver Training Advisory Committee (ELDTAC), a negotiated rulemaking committee that held a series of meetings between February and May 2015.

Statement of Need: This final rule enhances the safety of commercial motor vehicle (CMV) operations on our Nation's highways by establishing a minimum standard for entry-level driver training (ELDT) and increasing the number of drivers who receive ELDT. It replaces existing mandatory training requirements for entry-level operators of CMVs in interstate and intrastate operations required to possess a CDL. The minimum training standards established in today's rule are for certain individuals applying for a CDL for the first time, an upgrade of their CDL (*e.g.,* a Class B CDL holder seeking a Class A CDL), or a hazardous materials, passenger, or school bus endorsement for the first time. These individuals are subject to the ELDT requirements and must complete a prescribed program of instruction provided by an entity listed on FMCSA's Training Provider Registry (TPR).

Summary of Legal Basis: FMCSA's legal authority to propose this rulemaking is derived from the Motor Carrier Act of 1935, the Motor Carrier Safety Act of 1984, the Commercial Motor Vehicle Safety Act of 1986, and the Moving Ahead for Progress in the 21st Century Act.

Alternatives: The Agency considered several alternatives ini developing the NPRM, but fully evaluated the alternative adopted by the negotiated rulemaking committee in the NPRM analysis.

Anticipated Cost and Benefits: While FMCSA believes that this final rule would at minimum achieve cost-neutrality, the net of quantified costs and benefits results in an annualized net cost of $142 million at a 7% discount rate. A 3.91% improvement in safety performance (that is, a 3.91% reduction in the frequency of crashes involving those new entry-level drivers who would receive additional pre-CDL training as a result of this final rule during the period for which the benefits of training are estimated to remain intact) is necessary to offset the $142 million (annualized at 7%) net cost of this final rule.

Risks: A risk of a driver not receiving adequate training before applying for a CDL.

DOT—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION (NHTSA)

Proposed Rule Stage

94. +Tire Fuel Efficiency Consumer Information—Part 2

Priority: Other Significant.

Legal Authority: 49 U.S.C. 32304

CFR Citation: 49 CFR 575.

Legal Deadline: None.

Abstract: This rulemaking would respond to requirements of the Energy Independence & Security Act of 2007 to establish a national tire fuel efficiency consumer information program for replacement tires designed for use on motor vehicles. On March 30, 2010, NHTSA published a final rule specifying the test procedures to be used to rate the performance of replacement passenger car tires for this new program (75 FR 15893). This rulemaking would address how this information would be made available to consumers.

Statement of Need: The EISA mandated the TFECIP to be finalized by December 2009. In 2010, NHTSA finalized a regulation to require the testing of replacement tires for rolling resistance (fuel efficiency), wet traction (safety) and treadwear (durability). In December 2014, the White House announced that the agency would publish the final rule by 2017.

Summary of Legal Basis: This rulemaking is mandated by Public Law 110140, 121 Stat. 1492.

Alternatives: This rule is statutorily mandated.

Anticipated Cost and Benefits: The agency estimates that annual net benefits, in millions of 2013 dollars, will range between $1.2 and $12.7 at a 3% discount rate, and between $0.2 and $10.9 at a 7% discount rate.

Risks: The agency believes there are no significant risks related to this rulemaking.

DOT—NHTSA

95. +Heavy Vehicle Speed Limiters

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 49 U.S.C. 30111; 49 U.S.C. 30115; 49 U.S.C. 30116; 49 U.S.C. 30117; 49 U.S.C. 322; delegation of authority at 49 CFR 1.95

CFR Citation: 49 CFR 571.

Legal Deadline: None.

Abstract: This rulemaking would respond to petitions from ATA and Roadsafe America to require the installation of speed limiting devices on heavy trucks. In response to the petitions, NHTSA requested public comment on the subject and received thousands of comments supporting the petitioner´s request. Based on the available safety data and the ancillary benefit of reduced fuel consumption, this rulemaking would consider a new Federal Motor Vehicle Safety Standard that would require the installation of speed limiting devices on heavy trucks. We believe this rule would have minimal cost, as all heavy trucks already have these devices installed, although some vehicles do not have the limit set. This rule would decrease the estimated 1,115 fatal crashes annually involving vehicles with a GVWR of over 11,793.4 kg (26,000 lbs) on roads with posted speed limits of 55 mph or above.

Statement of Need: Based on the agencies' review of the available data, limiting the speed of heavy vehicles would reduce the severity of crashes involving these vehicles and reduce the resulting fatalities and injuries. We expect that, as a result of the joint rulemaking, virtually all of these vehicles would be limited to that speed.

Summary of Legal Basis: NHTSA's authority is the National Traffic and Motor Vehicle Safety Act. Motor Vehicle Safety Standards must be practicable and meet the need for motor vehicle safety while stated in objective terms. FMCSA's authority is based on the Motor Carrier Act. They are authorized to prescribe requirements for 1 qualifications and maximum hours of service of employees of, and safety of operation and equipment of, motor carrier; and 2 qualifications and maximum hours of service of employees of, and standards of equipment of, a motor private carrier, when needed to promote safety operations.

Alternatives: Other technologies limiting speed such as GPS, visions systems, vehicle infrastructure communications, or some other autonomous vehicle technology.

Anticipated Cost and Benefits: Annual net benefit estimates vary with changing assumptions of the speed limit that is set. At a 7% discount rate in millions of 2013 dollars, net benefits range between $1,136 and $4,964 at a speed of 60 mph. At a speed of 65 mph, that range is between $1,039 and $2,757. At 68 mph, that range is between $475 and $1,260.

Risks: The agency believes there are no significant risks related to this rulemaking.

96. +Federal Motor Vehicle Safety Standard (FMVSS) 150—Vehicle to Vehicle (V2V) Communication

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 49 U.S.C. 30101.

CFR Citation: 49 CFR 571.150.

Legal Deadline: None.

Abstract: V2V communications uses on-board dedicated short-range radio communication (DSRC) devices to broadcast messages about a vehicle's speed, heading, brake status, and other information to other vehicles and receive the same information from the messages, with extended range and 'line-of-sight' capabilities. V2V's enhanced detection distance and ability to 'see' around corners or ''through'' other vehicles helps V2V-equipped vehicles uniquely perceive some threats and warn their drivers accordingly. V2V technology can also be fused with vehicle-resident technologies to potentially provide greater benefits than either approach alone. V2V can augment vehicle-resident systems by acting as a complete system, extending the ability of the overall safety system to address other crash scenarios not covered by V2V communications, such as lane and road departure. Additionally, V2V communication is currently perceived to become a foundational aspect of vehicle automation.

Statement of Need: V2V communications uses on-board dedicated short-range radio communication (DSRC) devices to broadcast messages about a vehicle's speed, heading, brake status, and other information to other vehicles and receive the same information from the messages, with extended range and line-of-sight capabilities. V2V's enhanced detection distance and ability to see around corners or ''through'' other vehicles helps V2V-equipped vehicles uniquely perceive some threats and warn their drivers accordingly. RIN: 2127–AL55

DOT—FEDERAL RAILROAD ADMINISTRATION (FRA)

Proposed Rule Stage

97. +Locomotive Recording Devices

Priority: Other Significant.

Legal Authority: 49 CFR 1.89; 49 U.S.C. 20103; 49 U.S.C. 20107; 49 U.S.C. 20168

CFR Citation: 49 CFR 217; 49 CFR 218; 49 CFR 229.

Legal Deadline: NPRM, Statutory, December 4, 2017, FAST Act.

Abstract: This rulemaking would require the installation of inward- and outward-facing locomotive video cameras on controlling locomotives of trains traveling over 30 mph. The recordings would be used to help determine the cause of railroad accidents in order to prevent the occurrence of similar accidents. They would also be used to ensure railroad employee compliance with applicable Federal railroad safety regulations and railroad rules, particularly regulations prohibiting the use of personal electronic devices. This rulemaking attempts to fulfill NTSB recommendations urging FRA to adopt regulations requiring locomotive-mounted audio and video recording devices. FRA is requesting comments regarding whether audio recording devices should be required. This rulemaking would amend 49 CFR parts 217, 218, and 229.

Statement of Need: FRA is proposing to require the installation and use of inward- and outward-facing recording devices in train locomotives under section 11411 of the Fixing America's Surface Transportation Act (FAST Act) (Pub. L. 114–94, 129 Stat. 1686 (Dec. 4, 2015)) (codified at 48 U.S.C. 20168) and the Federal Railroad Safety Act of 1970, 49 U.S.C. 20103. Section 11411 of the FAST Act requires FRA (as the Secretary of Transportation's delegate) to promulgate regulations requiring each railroad carrier that provides regularly scheduled intercity rail passenger or commuter rail passenger transportation to the public to install inward- and outward-facing image recording devices in all controlling locomotives of passenger trains. Section 20103 contains FRA's general rulemaking authority ''for every area of railroad safety.''

Summary of Legal Basis: As stated above, FRA is publishing this proposed rule as mandated by the FAST Act and under its general railroad safety rulemaking authority at 49 U.S.C. 20103.

Alternatives: TBD.

Anticipated Cost and Benefits: FRA will determine the estimated costs and benefits associated with this proposed rule before publication.

Risks: TBD.

RIN: 2130–AC11

DOT—PIPELINE AND HAZARDOUS MATERIALS SAFETY ADMINISTRATION (PHMSA)

Final Rule Stage

99. +Pipeline Safety: Safety of Hazardous Liquid Pipelines

Priority: Other Significant.

Legal Authority: 49 U.S.C. 60101 *et seq.*

CFR Citation: 49 CFR 195.

Legal Deadline: None.

Abstract: In recent years, there have been significant hazardous liquid pipeline accidents, most notably the 2010 crude oil spill near Marshall, Michigan, during which almost one million gallons of crude oil were spilled into the Kalamazoo River. In response to accident investigation findings, incident report data and trends, and stakeholder input, PHMSA published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on October 13, 2015. Previously, Congress had enacted the Pipeline Safety, Regulatory Certainty, and Job Creation Act that included several provisions that are relevant to the regulation of hazardous liquid pipelines. Shortly after the Pipeline Safety, Regulatory Certainty, and Job Creation Act was passed, the National Transportation Safety Board (NTSB) issued its accident investigation report on the Marshall, Michigan accident. In this rulemaking action, PHMSA is amending the Pipeline Safety Regulations to improve protection of the public, property, and the environment by closing regulatory gaps where appropriate, and ensuring that operators are increasing the detection and remediation of unsafe conditions, and mitigating the adverse effects of hazardous liquid pipeline failures.

Statement of Need: PHMSA is proposing to make the following

changes to the hazardous liquid pipeline safety regulations: (1) Repeal the exception for gravity lines; (2) Extend certain reporting requirements to all hazardous liquid gathering lines; (3) Require inspections of pipelines in areas affected by extreme weather, natural disasters, and other similar events; (4) Require periodic assessments of pipelines that are not already covered under the integrity management (IM) program requirements; (5) Expand the use of leak detection systems on hazardous liquid pipelines to mitigate the effects of failures that occur outside of high consequence areas; (6) Modify the IM repair criteria, both by expanding the list of conditions that require immediate remediation and consolidating the time frames for remediating all other conditions, and apply those same criteria to pipelines that are not subject to the IM requirements, with an adjusted schedule for performing non-immediate repairs; (7) Increase the use of inline inspection tools by requiring that any pipeline that could affect a high consequence area be capable of accommodating these devices within 20 years, unless its basic construction will not permit that accommodation; and (8) Other regulations will also be clarified to improve compliance and enforcement. These changes will protect the public, property, and the environment by ensuring that additional pipelines are subject to regulation, increasing the detection and remediation of unsafe conditions, and mitigating the adverse effects of pipeline failures. This rule responds to a Congressional mandate in the 2011 Pipeline Reauthorization Act (sections 5, 8, 21, 29, 14); NTSB recommendation P–12–03 and P–12–04; and GAO recommendation 12–388.

Summary of Legal Basis: Congress established the current framework for regulating the safety of hazardous liquid pipelines in the Hazardous Liquid Pipeline Safety Act (HLPSA) of 1979 (Pub. L. 96–129). Like its predecessor, the Natural Gas Pipeline Safety Act of 1968 (Pub. L. 90–481), the HLPSA provided the Secretary of Transportation (Secretary) with the authority to prescribe minimum Federal safety standards for hazardous liquid pipeline facilities. That authority, as amended in subsequent reauthorizations, is currently codified in the Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*).

Alternatives: The various alternatives analyzed included no action ''status quo'' and individualized alternatives based on the proposed amendments.

Anticipated Cost and Benefits: PHMSA cannot estimate costs or benefits precisely, but based on the information, the present value of costs and benefits over a 20-year period is approximately $56 million and $98 million, respectively at 7 percent. Thus, net benefits are approximately $46 million ($102 million − $56 million) over 20 years.

Risks: The proposed rule will provide increased safety for the regulated entities and reduce pipeline safety risks.

RIN: 2137–AE66

DOT—PHMSA

100. +Hazardous Materials: Oil Spill Response Plans and Information Sharing for High-Hazard Flammable Trains

Priority: Other Significant.

Legal Authority: 33 U.S.C. 1321; 49 U.S.C. 5101 *et seq.*

CFR Citation: 49 CFR 130; 49 CFR 174; 49 CFR 171; 49 CFR 172; 49 CFR 173.

Legal Deadline: None.

Abstract: This rulemaking, developed in consultation with the Federal Railroad Administration, would revise PHMSA's regulations to expand the applicability of comprehensive oil spill response plans (OSRPs) based on thresholds of liquid petroleum oil that apply to an entire train. We are also proposing to revise the format and clarify requirements of a comprehensive OSRP and to require railroads to share information about high-hazard flammable train operations with state and tribal emergency response organizations (*i.e.,* State Emergency Response Commissions and Tribal Emergency Response Commissions) to improve community preparedness. Lastly, PHMSA is proposing an update to boiling point testing procedures to provide regulatory flexibility and promotes enhanced safety in transport through accurate packing group assignment.

Statement of Need: This rulemaking is important to mitigate the effects of potential train accidents involving the release of flammable liquid energy products by increasing planning and preparedness. The proposals in this rulemaking are shaped by public comments, National Transportation Safety Board (NTSB) Safety Recommendations, analysis of recent accidents, and input from stakeholder outreach efforts (including first responders). To this end, PHMSA will consider expanding the applicability of comprehensive oil spill response plans; clarifying the requirements for comprehensive oil spill response plans; requiring railroads to share additional information; and providing an alternative test method for determining the initial boiling point of a flammable liquid.

Summary of Legal Basis: The authority of 49 U.S.C. 5103(b), which authorizes the Secretary of Transportation to ''prescribe regulations for the safe transportation, including security, of hazardous materials in intrastate, interstate, and foreign commerce.'' The authority of 33 U.S.C. 1321, the Federal Water Pollution Control Act (FWPCA), which directs the President to issue regulations requiring owners and operators of certain vessels and onshore and offshore oil facilities to develop, submit, update and in some cases obtain approval of oil spill response plans. Executive Order 12777 delegated responsibility to the Secretary of Transportation for certain transportation-related facilities. The Secretary of Transportation delegated the authority to promulgate regulations to PHMSA and provides FRA the approval authority for railroad ORSPs.

Alternatives: PHMSA and FRA are committed to a comprehensive approach to addressing the risk and consequences of derailments involving flammable liquids by addressing not only oil spill response plans, but communication requirements between railroads and communities. Obtaining information and comments in a NPRM will provide the greatest opportunity for

public participation in the development of regulatory amendments, and promote greater exchange of information and perspectives among the various stakeholders to promote future regulatory action on these issues.

Anticipated Cost and Benefits: The ANPRM requested comments on both the path forward and the economic impacts. We have evaluated and accounted for comments in development of the NPRM, and once the NPRM is published the costs and benefits will be detailed.

Risks: DOT analyzed recent incidents, National Transportation Safety Board (NTSB) Safety Recommendations, received input from stakeholder outreach efforts (including first responders) to determine amending the applicability and requirements of comprehensive oil spill response plans and codifying requirements for information sharing is important. DOT will continue to research these topics and evaluate comment feedback prior to the final rule. DOT expects the highest ranked options will be low cost and most effective at providing better preparedness and planning to mitigate the effects of a derailment.

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

Statement of Regulatory Priorities

The primary missions of the Department of the Treasury are:

- To promote prosperous and stable American and world economies, including promoting domestic economic growth and maintaining our Nation's leadership in global economic issues, supervising national banks and thrift institutions, and helping to bring residents of distressed communities into the economic mainstream.
- To manage the Government's finances by protecting the revenue and collecting the correct amount of revenue under the Internal Revenue Code, overseeing customs revenue policies, financing the Federal Government and managing its fiscal operations, and producing our Nation's coins and currency.
- To safeguard the U.S. and international financial systems from those who would use these systems for illegal purposes or to compromise U.S. national security interests, while keeping them free and open to legitimate users.

Consistent with these missions, most regulations of the Department and its constituent bureaus are promulgated to interpret and implement the laws as enacted by the Congress and signed by the President. It is the policy of the Department to comply with applicable requirements to issue a notice of proposed rulemaking and carefully consider public comments before adopting a final rule. Also, the Department invites interested parties to submit views on rulemaking projects while a proposed rule is being developed.

To the extent permitted by law, it is the policy of the Department to adhere to the regulatory philosophy and principles set forth in Executive Orders 12866, 13563, and 13609 and to develop regulations that maximize aggregate net benefits to society while minimizing the economic and paperwork burdens imposed on persons and businesses subject to those regulations.

Alcohol and Tobacco Tax and Trade Bureau

The Alcohol and Tobacco Tax and Trade Bureau (TTB) issues regulations to implement and enforce the Federal laws relating to alcohol, tobacco, firearms, and ammunition excise taxes and certain non-tax laws relating to alcohol. TTB's mission and regulations are designed to:

(1) Collect the taxes on alcohol, tobacco, firearms, and ammunition;

(2) Protect the consumer by ensuring the integrity of alcohol products; and

(3) Prevent unfair and unlawful market activity for alcohol and tobacco products.

As part of TTB's ongoing efforts to modernize its regulations, TTB continuously identifies changes in the industries it regulates, as well as new technologies available in compliance enforcement. TTB's modernization efforts focus on removing outdated requirements and revising the regulations to facilitate industry growth and reduce burdens where possible, while at the same time ensuring that TTB collects revenue due and protects consumers from deceptive labeling and advertising of alcohol beverages.

On June 21, 2016, TTB published a notice of proposed rulemaking (81 FR 40404) to clarify and streamline import procedures, and support the implementation of the International Trade Data System (ITDS) and the filing of import information electronically in conjunction with an electronic import filing with U.S. Customs and Border Protection (CBP). The proposed amendments include providing the option for importers to file TTB-specific import-related data electronically when filing entry or entry summary data electronically with CBP, as an alternative to current TTB requirements that importers submit paper documents to CBP upon importation.

On August 30, 2016, TTB published a final rule to amend its regulations governing specially denatured alcohol (SDA) and completely denatured alcohol (CDA) to, among other things, eliminate the need for industry members to submit certain formulas to TTB for approval. Under the authority of the Internal Revenue Code of 1986 (IRC), TTB regulates denatured alcohol that is unfit for beverage use, which may be removed from a regulated distilled spirits plant free of tax. SDA and CDA are widely used in the American fuel, medical, and manufacturing sectors. The industrial alcohol industry far exceeds the beverage alcohol industry in size and scope, and it is a rapidly growing industry in the United States. Some concerns had been raised that the existing regulations may create significant roadblocks for industry members in getting products to the marketplace quickly and efficiently. TTB determined that it could amend its regulations to address these concerns and reduce regulatory burdens, while posing no added risk to the revenue. The final rule eliminates outdated formulas, reclassifies certain SDA formulas as CDA, and provides new general-use formulas for articles made

with SDA. TTB estimates that these changes will result in an 80 percent reduction in the formula approval submissions currently required from industry members.

On July 1, 2016, TTB published an interim final rule (81 FR 43062) to implement the provisions of the Federal Civil Penalties Inflation Adjustment Act of 1990 (Inflation Adjustment Act), as amended by the Debt Collection Improvement Act of 1996 and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. This rulemaking increases the maximum civil monetary penalty for violations of the Alcoholic Beverage Labeling Act of 1988 from $10,000 to $19,787, in accordance with Federal law. The increased maximum penalty will help maintain the deterrent effect of the penalty, which is a stated goal of the Inflation Adjustment Act. As authorized under the law, TTB will announce future cost-of-living adjustments to the penalty by publishing a notice in the **Federal Register** and updating its Web site.

On June 21, 2016, TTB published a final rule (81 FR 40183) to adopt temporary regulations it had issued on June 27, 2013 (78 FR 38555) concerning permit and other requirements related to importers and manufacturers of tobacco products and processed tobacco. The regulatory amendments adopted in the final rule include an extension in the duration of new permits for importers of tobacco products and processed tobacco from three years to five years. Importers who wish to continue to engage in the business beyond the duration of the permit must renew their permits before expiration. Less frequent renewal reduces the regulatory burden on the importers. Temporary regulations issued under the IRC expire three years after the date of issuance, and publication of the final rule made permanent this extension of the duration of new importer permits.

In FY 2017, TTB will continue its multi-year Regulations Modernization effort by prioritizing projects that will update its Import and Export regulations, Labeling Requirements regulations, Nonbeverage Products regulations, and Distilled Spirits Plant Reporting requirements. Priority projects also include implementing new statutory provisions that go into effect in FY 2017 as a result of the Protecting Americans from Tax Hikes Act of 2015 (PATH Act).

This fiscal year TTB plans to give priority to the following regulatory matters:

Revisions to Import and Export Regulations Related to ITDS. TTB is currently preparing for the implementation of ITDS and, specifically, the transition to an all-electronic import and export environment. ITDS, as described in section 405 of the Security and Accountability for Every Port Act of 2006 (the ''SAFE Port Act'') (Pub. L. 109–347), is an electronic information exchange capability, or ''single window,'' through which businesses will transmit data required by participating Federal agencies for the importation or exportation of cargo. To enhance Federal coordination associated with the development of ITDS and put in place specific deadlines for implementation, President Obama, on February 19, 2014, signed an Executive Order on Streamlining the Export/Import Process for America's Businesses. In line with section 3(e) of the Executive Order, TTB was required to develop a timeline for ITDS implementation. Updating the regulations for transition to the all-electronic environment is part of the implementation process.

TTB completed its review of the relevant regulatory requirements and identified those that it intends to update. With regard to imports, as noted above, TTB published a notice of proposed rulemaking in June 2016 to amend its import regulations to support the implementation of ITDS and incorporate needed updates. TTB also continues to operate a pilot program (originally announced in August 2015) for importers who want to gain experience with the ITDS ''single window'' functionality for providing data on the TTB-regulated commodities. This pilot program helps familiarize both TTB and the public with the new environment and assists TTB and the public to refine the implementation of ITDS. The pilot program also provides valuable information for TTB's ongoing efforts to amend its regulations. In FY 2017, TTB intends to publish a final rule on the proposed changes to its import regulations.

In addition, in recent years, TTB has identified selected sections of its export regulations (27 CFR parts 28 and 44) that it intends to amend to clarify and update the requirements. Under the IRC, the products taxed by TTB may be removed for exportation without payment of tax or with drawback of any excise tax previously paid, subject to the submission of proof of export. However, the current export regulations require industry members to follow procedures that do not adequately reflect current technology or take into account current industry business practices. In FY 2017, TTB intends to publish a notice of proposed rulemaking that will address electronic submission of information through ITDS for exports and will include proposals to amend the regulations to provide industry members with clear and updated procedures for removal of alcohol and tobacco products for exportation, thus facilitating exportation of those products. Increasing U.S. exports benefits the U.S. economy and is consistent with Treasury and Administration priorities.

Revisions to the Regulations to Implement the PATH Act. On December 18, 2015, the President signed into law the PATH Act, which is Division Q of the Consolidated Appropriations Act, 2016. The PATH Act contains changes to certain statutory provisions that TTB administers in the IRC regarding excise tax due dates, bond requirements, and the definition of wine eligible for the hard cider tax rate. These amendments take effect beginning in January 2017, and TTB is currently working on two separate rulemaking projects to be published in FY 2017 that will implement these changes. First, TTB is implementing provisions that allow certain small alcohol beverage excise taxpayers to file tax returns less frequently and to qualify for an exemption from certain bond requirements. These provisions will reduce regulatory burdens on small businesses. Second, TTB is implementing changes to the definition of wine that is eligible for the hard cider tax rate. These changes will increase the allowable alcohol content and carbonation level of such wines and authorize the use of pears, pear juice concentrate, and pear products and flavorings.

Revisions to the Labeling Requirements (Parts 4 (Wine), 5 (Distilled Spirits), and 7 (Malt Beverages)). The Federal Alcohol Administration Act requires that alcohol beverages introduced in interstate commerce have a label issued and approved under regulations prescribed by the Secretary of the Treasury. In accordance with the mandate of Executive Order 13563 of January 18, 2011, regarding improving regulation and regulatory review, TTB conducted an analysis of its labeling regulations to identify any that might be outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with that analysis. These regulations were also reviewed to assess their applicability to the modern alcohol beverage marketplace. As a result of this review, TTB plans to propose in FY 2017 revisions to modernize the

regulations concerning the labeling requirements for wine, distilled spirits, and malt beverages. TTB anticipates that these regulatory changes will assist industry in voluntary compliance, decrease industry burden, and result in the regulated industries being able to bring products to market without undue delay. TTB projects that it will receive over 160,000 label applications in FY 2016.

Revision of the Part 17 Regulations, Drawback on Taxpaid Distilled Spirits Used in Manufacturing Nonbeverage Products, to Allow Self-Certification of Nonbeverage Product Formulas. TTB is considering revisions to the regulations in 27 CFR part 17 governing nonbeverage products made with taxpaid distilled spirits. These nonbeverage products include foods, medicines, and flavors. This proposal, which TTB intends to publish in FY 2017, offers a new method of formula certification by incorporating quantitative standards into the regulations and establishing new voluntary procedures that would further streamline the formula review process for products that meet the standards. This proposal would provide adequate protection to the revenue because TTB would continue to receive submissions of certified formulas; however, TTB would not take action on certified formula submissions unless TTB discovered that the formulas require correction. By allowing for self-certification of certain nonbeverage product formulas, this proposal would eliminate the requirement for TTB to formally approve such formulas. These changes would result in significant cost savings for the nonbeverage alcohol industry, which currently must obtain formula approval from TTB, and reduce the number of formulas that TTB must review.

Revisions to Distilled Spirits Plant Reporting Requirements. In FY 2012, TTB published a notice of proposed rulemaking (NPRM) proposing to revise regulations in 27 CFR part 19 to replace the current four report forms used by distilled spirits plants to report their operations on a monthly basis with two new report forms that would be submitted on a monthly basis. (Plants that file taxes on a quarterly basis would submit the new reports on a quarterly basis.) This project will address concerns the distilled spirits industry has raised about reporting, and result in cost savings to industry and TTB by significantly reducing the number of monthly plant operations reports that must be completed and filed by industry members and processed by TTB. TTB preliminarily estimates that this project will result in a reduction of paperwork burden hours for industry members, as well as savings in processing hours and contractor time for TTB. In addition, TTB estimates that this project will result in additional savings in staff time because of the more efficient and effective processing of reports and the use of report data to reconcile industry member tax accounts. In FY 2017, TTB intends to publish a supplemental notice of proposed rulemaking that will include new proposals to address comments received in response to the initial notice of proposed rulemaking and incorporate additional improvements identified by TTB in the interim.

Community Development Financial Institutions Fund

The Community Development Financial Institutions Fund (CDFI Fund) was established by the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4701 *et seq.*). The mission of the CDFI Fund is to expand economic opportunity for underserved people and communities by supporting the growth and capacity of a national network of community development lenders, investors, and financial service providers. The CDFI Fund currently administers the following programs: The Community Development Financial Institutions (CDFI) Program, the Bank Enterprise Award (BEA) Program, the Native American CDFI Assistance (NACA) Program, the New Markets Tax Credit (NMTC) Program, the Capital Magnet Fund (CMF), and the CDFI Bond Guarantee Program (BGP).

In FY 2017, the CDFI Fund will publish updated regulations for the Capital Magnet Fund and the CDFI Program to incorporate a variety of technical and policy changes.

Office of the Comptroller of the Currency

The Office of the Comptroller of the Currency (OCC) charters, regulates, and supervises all national banks and Federal savings associations (FSAs). The agency also supervises the Federal branches and agencies of foreign banks. The OCC's mission is to ensure that national banks and FSAs operate in a safe and sound manner, provide fair access to financial services, treat customers fairly, and comply with applicable laws and regulations.

Significant rules issued during fiscal year 2016 include:

Margin and Capital Requirements for Covered Swap Entities (12 CFR part 45). The banking agencies, Farm Credit Administration (FCA), and Federal Housing Finance Agency (FHFA) issued a final rule to establish minimum margin and capital requirements for registered swap dealers, major swap participants, security-based swap dealers, and major security-based swap participants for which one of the Agencies is the prudential regulator. The rule implements sections 731 and 764 of the Dodd-Frank Act, which require the Agencies to adopt rules jointly to establish capital requirements and initial and variation margin requirements for such entities on all non-cleared swaps and non-cleared security-based swaps in order to offset the greater risk to such entities and the financial system arising from the use of swaps and security-based swaps that are not cleared. The Agencies also issued an interim final rule that exempts certain non-cleared swaps and non-cleared security-based swaps with certain counterparties that qualify for an exception or exemption from clearing from the initial and variation margin requirements promulgated under sections 731 and 764 of the Dodd-Frank Act. The rule implements Title III of the Terrorism Risk Insurance Program Reauthorization Act of 2015, which exempts from the Agencies' swap margin rules non-cleared swaps and non-cleared security-based swaps in which a counterparty qualifies for an exemption or exception from clearing under the Dodd-Frank Act. The final and interim final rules were issued on November 30, 2015, 81 FR 74839 and 74915 and the interim final rule was finalized on August 2, 2016, 81 FR 50605.

Guidelines Establishing Standards for Recovery Planning by Certain Large Insured National Banks, Insured FSAs, and Insured Federal Branches (12 CFR part 30). The OCC issued a proposed rule setting forth enforceable guidelines establishing standards for recovery planning by insured national banks, insured FSAs, and insured Federal branches of foreign banks with average total consolidated assets of $50 billion or more (Guidelines). The Guidelines would be issued as an appendix to the OCC's 12 CFR part 30 safety and soundness standards regulations and would be enforceable by the terms of the Federal statute that authorizes the OCC to prescribe operational and managerial standards for national banks and FSAs. The proposed rule was issued on December 17, 2015, 80 FR 78681 and the final rule was issued on October 29, 2016, 81 FR 66791.

Incentive-Based Compensation Arrangements (12 CFR part 42). Section 956 of the Dodd-Frank Act requires the banking agencies, National Credit Union

Administration (NCUA), Securities and Exchange Commission (SEC), and FHFA to jointly prescribe regulations or guidance prohibiting any type of incentive-based payment arrangement, or any feature of any such arrangement, that the regulators determine encourages inappropriate risks by covered financial institutions by providing an executive officer, employee, director, or principal shareholder with excessive compensation, fees or benefits, or that could lead to material financial loss to the covered financial institution. The Dodd-Frank Act also requires such agencies to jointly prescribe regulations or guidelines requiring each covered financial institution to disclose to its regulator the structure of all incentive-based compensation arrangements offered by such institution sufficient to determine whether the compensation structure provides any executive officer, employee, director, or principal shareholder with excessive compensation or could lead to material financial loss to the institution. The proposed rule was issued on June 10, 2016, 81 FR 37669.

Net Stable Funding Ratio (12 CFR part 50). The banking agencies issued a proposed rule to implement the Basel net stable funding ratio standards. These standards would require large, internationally active banking organizations to maintain sufficient stable funding to support their assets, generally over a one-year time horizon. The proposed rule was issued on June 1, 2016, 81 FR 35123.

Economic Growth and Regulatory Paperwork Reduction Act of 1996 Amendments (12 CFR parts 4 to 5, 7, 9 to 12, 16, 18, 31, 150 to 151, 155, 162 to 163, 194, and 197). The OCC issued a proposed rule with the goal of removing provisions that are outdated, unnecessary, or unduly burdensome. The proposal would revise certain licensing rules related to chartering applications, business combinations involving Federal mutual savings associations, and notices for changes in permanent capital; clarify national bank director oath requirements; revise certain fiduciary activity requirements for national banks and FSAs; remove certain financial disclosure regulations for national banks; remove certain unnecessary regulatory reporting, accounting, and management policy regulations for FSAs; update the electronic activities regulation for FSAs; integrate and update OCC regulations for national banks and FSAs relating to municipal securities dealers, Securities Exchange Act disclosure rules, and securities offering disclosure rules; update and revise recordkeeping and confirmation requirements for national banks' and FSAs' securities transactions; integrate and update regulations relating to insider and affiliate transactions; and make other technical and clarifying changes. The proposed rule was issued on March 14, 2016, 81 FR 13608.

Expanded Examination Cycle for Certain Small Insured Depository Institutions and U.S. Branches and Agencies of Foreign Banks (12 CFR part 4). The banking agencies issued an interim final rule to implement section 83001 of the Fixing America's Surface Transportation Act (the FAST Act). Section 83001 of the FAST Act permits a qualifying insured depository institution (institution) with up to $1 billion in total assets to be examined by its appropriate Federal banking agency no less than once during each 18-month period. The OCC's interim final rule expands eligibility for the 18-month examination cycle to qualifying national banks, Federal savings associations, and Federal branches and agencies with less than $500 million in total assets to those with less than $1 billion in total assets. The interim final rule was issued on February 29, 2016, 81 FR 10063.

Civil Money Penalty Inflation Adjustments (12 CFR parts 19 and 109). The OCC issued an interim final rule implementing the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act) (Pub. L. 114–74, title VII, section 701(b), November 2, 2015) and Office of Management and Budget guidance issued on February 24, 2016. The 2015 Act amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (codified at 28 U.S.C. 2461 note). The 2015 Act changed the formula for calculating inflation adjustments and required agencies to adjust penalties for inflation on an annual basis. The interim final rule was issued on July 1, 2016, 81 FR 43021.

Appraisals for Higher-Priced Mortgage Loans Exemption Threshold (12 CFR part 34). The OCC, the FRB, and the CFPB issued a proposed rule amending the official interpretations for their regulations that implement section 129H of the Truth in Lending Act, which establishes special appraisal requirements for ''higher-risk mortgages.'' The banking agencies, the CFPB, the NCUA and the FHFA issued joint final rules implementing these requirements, which exempted, among other loan types, transactions of $25,000 or less, and required that this loan amount be adjusted annually based on any annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI–W). If there is no annual percentage increase in the CPI–W, the OCC, the FRB and the CFPB will not adjust this exemption threshold from the prior year. The proposal would memorialize this as well as the calculation method for determining the adjustment in years following a year in which there is no annual percentage increase in the CPI–W. The proposed rule was issued on August 4, 2016, 81 FR 51394.

Mandatory Contractual Stay Requirements for Qualified Financial Contracts (12 CFR parts 3, 47, and 50). The OCC issued a proposed rule to promote U.S. financial stability by enhancing the safety and soundness of the national banking system by mitigating potential negative impacts that could result from the disorderly resolution of certain systemically important national banks, FSAs, Federal branches and agencies, and the subsidiaries of these entities. A covered bank would be required to ensure that a covered qualified financial contract contains a contractual stay-and-transfer provision analogous to the statutory stay-and-transfer provision imposed under Title II of the Dodd-Frank Act and in the Federal Deposit Insurance Act and limits the exercise of default rights based on the insolvency of an affiliate of the covered bank. The proposed rule was issued on August 19, 2016, 81 FR 55381.

Regulatory priorities for fiscal year 2017 include finalizing any proposals listed above as well as the following rulemakings:

Automated Valuation Models (parts 34 and 164). The banking agencies, NCUA, FHFA and Consumer Financial Protection Bureau (CFPB), in consultation with the Appraisal Subcommittee (ASC) and the Appraisal Standards Board of the Appraisal Foundation, are required to promulgate regulations to implement quality-control standards required under the statute. Section 1473(q) of the Dodd-Frank Act requires that automated valuation models used to estimate collateral value in connection with mortgage origination and securitization activity, comply with quality-control standards designed to ensure a high level of confidence in the estimates produced by automated valuation models; protect against manipulation of data; seek to avoid conflicts of interest; require random sample testing and reviews; and account for other factors the agencies deem appropriate. The agencies plan to issue a proposed rule to implement the requirement to adopt quality-control standards.

Source of Strength (12 CFR part 47). The banking agencies plan to issue a

proposed rule to implement section 616(d) of the Dodd-Frank Act. Section 616(d) requires that bank holding companies, savings and loan holding companies and other companies that directly or indirectly control an insured depository institution serve as a source of strength for the insured depository institution. The appropriate Federal banking agency for the insured depository institution may require that the company submit a report that would assess the company's ability to comply with the provisions of the statute and its compliance.

Reporting and Recordkeeping Requirements for Covered Trading Activities (12 CFR part 44). The banking agencies, the Commodity Futures Trading Commission (CFTC), and the SEC are planning to issue a proposed rule that would modify the reporting and recordkeeping requirements for covered trading activities under Appendix A of the final rule implementing section 13 of the Bank Holding Company Act of 1956, which was added by section 619 of the Dodd-Frank Act.

Loans in Areas Having Special Flood Hazards-Private Flood Insurance (12 CFR part 22). The banking agencies, the FCA, and the NCUA are planning to issue a proposed rule to amend their regulations regarding loans in areas having special flood hazards to implement the private flood insurance provisions of the Biggert-Waters Flood Insurance Reform Act of 2012 (the Biggert-Waters Act). The proposed rule was issued on November 7, 2016, 81 FR 78063.

Receiverships for Uninsured National Banks (12 CFR part 51). The OCC is planning to issue a proposed rule addressing the conduct of receiverships of national banks that are not insured by the FDIC and for which the FDIC would not be appointed as receiver.

Enhanced Cyber Risk Management Standards (12 CFR part 30). The banking agencies are considering issuing an advance notice of proposed rulemaking setting forth enhanced cyber risk management standards for the largest and most interconnected financial organizations in the United States.

The banking agencies and the NCUA plan to issue interim final rules to clarify the applicability of recent amendments to the Financial Crimes Enforcement Network (FinCEN) customer due diligence rules to the depository institutions under their supervision. FinCEN clarified and strengthened its customer due diligence requirements for covered financial institutions, including banks, brokers or dealers in securities, mutual funds, and futures commission merchants and introducing brokers in commodities (FinCEN Rule). As part of that rulemaking, FinCEN amended the elements of the anti-money laundering program financial institutions must implement and maintain in order to satisfy program requirements under 31 U.S.C. 5318(h)(1). The banking agencies and the NCUA are amending their anti-money laundering program rules to maintain consistency with the FinCEN Rule.

Customs Revenue Functions

The Homeland Security Act of 2002 (the Act) provides that, although many functions of the former United States Customs Service were transferred to the Department of Homeland Security, the Secretary of the Treasury retains sole legal authority over customs revenue functions. The Act also authorizes the Secretary of the Treasury to delegate any of the retained authority over customs revenue functions to the Secretary of Homeland Security. By Treasury Department Order No. 100–16, the Secretary of the Treasury delegated to the Secretary of Homeland Security authority to prescribe regulations pertaining to the customs revenue functions subject to certain exceptions. This Order further provided that the Secretary of the Treasury retained the sole authority to approve such regulations.

During the past fiscal year, among the customs-revenue function regulations issued were the Customs and Border Protection's Bond Program final rule, the United States-Australia Free Trade Agreement final rule, Investigation of Claims of Evasion of Antidumping and Countervailing Duties interim final rule, and the North American Free Trade Agreement Preference Override notice of proposed rulemaking. On November 13, 2015, U.S. Customs and Border Protection (CBP) published the final rule (80 FR 70154) to the CBP regulations which amended CBP regulations to reflect the centralization of the continuous bond program at CBP's Revenue Division. The changes support CBP's bond program by ensuring an efficient and uniform approach to the approval, maintenance, and periodic review of continuous bonds, as well as accommodating the use of information technology and modern business practices. On January 15, 2016, CBP published the United States-Australia Free Trade Agreement final rule (81 FR 2086) to the CBP regulations, which finalized the implementation of the preferential tariff treatment and other customs-related provisions of the United States-Australia Free Trade Agreement Implementation Act. In addition, on August 22, 2016, CBP and Treasury issued an interim final rule titled ''Investigation of Claims of Evasion of Antidumping and Countervailing Duties'' which amended CBP regulations implementing section 421 of the Trade Facilitation and Trade Enforcement Act of 2015. CBP and Treasury also issued on July 8, 2016, a proposed rule (81 FR 44555) titled ''North American Free Trade Agreement Preference Override'' which proposed amending CBP regulations to liberalize provisions of the North American Free Trade Agreement (NAFTA) preference rules of origin that relate to certain goods, including certain spices.

This past fiscal year, Treasury and CBP worked towards the implementation of the International Trade Data System (ITDS). The ITDS, as described in section 405 of the Security and Accountability for Every Port Act of 2006 (the ''SAFE Port Act'') (Pub. L. 109–347), is an electronic information exchange capability, or ''Single Window,'' through which businesses will transmit data required by participating agencies for the importation or exportation of cargo. To enhance Federal coordination associated with the development of the ITDS, Treasury and CBP issued an interim regulation (80 FR 61278) in connection with the establishment of the Automated Commercial Environment (ACE) as a CBP-authorized Electronic Data Interchange (EDI) System. This regulatory document informed the public that the Automated Commercial System (ACS) is being phased out as a CBP-authorized EDI System for the processing electronic entry and entry summary filings (also known as entry filings). CBP issued subsequent **Federal Register** notices announcing the dates when ACE replaced the Automated Commercial System (ACS) as the CBP-authorized EDI system for processing commercial trade data.

During fiscal year 2017, CBP and Treasury also plan to give priority to the following regulatory matters involving the customs revenue functions:

Disclosure of Information for Certain Intellectual Property Rights Enforced at the Border. Treasury and CBP plan to finalize interim amendments to the CBP regulations which provides a pre-seizure notice procedure for disclosing information appearing on the imported merchandise and/or its retail packing suspected of bearing a counterfeit mark to an intellectual property right holder for the limited purpose of obtaining the right holder's assistance in determining whether the mark is counterfeit or not.

Free Trade Agreements. Treasury and CBP also plan to issue final regulations this fiscal year to implement the preferential trade benefit provisions of the United States-Singapore Free Trade Agreement Implementation Act. Treasury and CBP also expect to issue final regulations implementing the liberalization of the NAFTA preference rules of origin that relate to certain goods, including certain spices.

In-Bond Process. Consistent with the practice of continuing to move forward with Customs Modernization provisions of the North American Free Trade Implementation Act to improve its regulatory procedures, Treasury and CBP plan to finalize this fiscal year the proposal to change the in-bond process by issuing final regulations to amend the in-bond regulations that were proposed on February 22, 2012 (77 FR 10622). The proposed changes, including the automation of the in-bond process, would modernize, simplify, and facilitate the in-bond process while enhancing CBP's ability to regulate and track in-bond merchandise to ensure that in-bond merchandise is properly entered or exported.

Inter-Partes Proceedings Concerning Exclusion Orders Based on Unfair Practices in Import Trade. Treasury and CBP plans to publish a proposal to amend its regulations with respect to administrative rulings related to the importation of articles in light of exclusion orders issued by the United States International Trade Commission (''Commission'') under section 337 of the Tariff Act of 1930, as amended. The proposed amendments seek to promote the speed, accuracy, and transparency of such rulings through the creation of an *inter partes* proceeding to replace the current *ex parte* process.

Financial Crimes Enforcement Network

As chief administrator of the Bank Secrecy Act (BSA), the Financial Crimes Enforcement Network (FinCEN) is responsible for developing and implementing regulations that are the core of the Department's anti-money laundering and counter-terrorism financing efforts. FinCEN's responsibilities and objectives are linked to, and flow from, that role. In fulfilling this role, FinCEN seeks to enhance U.S. national security by making the financial system increasingly resistant to abuse by money launderers, terrorists and their financial supporters, and other perpetrators of crime.

The Secretary of the Treasury, through FinCEN, is authorized by the BSA to issue regulations requiring financial institutions to file reports and keep records that are determined to have a high degree of usefulness in criminal, tax, or regulatory matters or in the conduct of intelligence or counter-intelligence activities to protect against international terrorism. The BSA also authorizes requiring designated financial institutions to establish anti-money laundering programs and compliance procedures. To implement and realize its mission, FinCEN has established regulatory objectives and priorities to safeguard the financial system from the abuses of financial crime, including terrorist financing, money laundering, and other illicit activity. These objectives and priorities include: (1) Issuing, interpreting, and enforcing compliance with regulations implementing the BSA; (2) supporting, working with, and as appropriate, overseeing compliance examination functions delegated to other Federal regulators; (3) managing the collection, processing, storage, and dissemination of data related to the BSA; (4) maintaining a government-wide access service to that same data and for network users with overlapping interests; (5) conducting analysis in support of policymakers, law enforcement, regulatory and intelligence agencies, and the financial sector; and (6) coordinating with and collaborating on anti-terrorism and anti-money laundering initiatives with domestic law enforcement and intelligence agencies, as well as foreign financial intelligence units.

During fiscal year 2016, FinCEN issued the following regulatory actions:

Civil Monetary Penalty Adjustment and Table. On June 30, 2016, FinCEN issued an Interim Final Rule amending the BSA regulations to adjust the maximum amount or range, as set by statute, of certain civil monetary penalties within its jurisdiction to account for inflation. The action was taken to implement the requirements of the Federal Civil Penalties Inflation Adjustment Act of 1990, as further amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.

Customer Due Diligence Requirements. On May 11, 2016, FinCEN issued Final Rules under the BSA to clarify and strengthen customer due diligence requirements for banks, brokers or dealers in securities, mutual funds, and futures commission merchants and introducing brokers in commodities. The rules contain explicit customer due diligence requirements and include a new regulatory requirement to identify beneficial owners of legal entity customers, subject to certain exemptions.

Report of Foreign Bank and Financial Accounts. On March 10, 2016, FinCEN issued a Notice of Proposed Rulemaking to address requests from filers for clarification of certain requirements regarding the Report of Foreign Bank and Financial Accounts, including requirements with respect to employees, who have signature authority over, but no financial interest in, the foreign financial accounts of their employers.

Amendments to the Definitions of Broker or Dealer in Securities. On April 4, 2016, FinCEN issued an NPRM proposing amendments to the regulatory definitions of broker or dealer in securities under the BSA regulations. The proposed changes would expand the current scope of the definitions to include funding portals and would require them to implement policies and procedures reasonably designed to achieve compliance with all of the BSA requirements that are currently applicable to brokers or dealers in securities.

Anti-Money Laundering Program Requirements for Banks Lacking a Federal Functional Regulator. On August 25, 2016, FinCEN issued an NPRM to remove the anti-money laundering (AML) program exemption for banks that lack a Federal functional regulator, including, but not limited to, private banks, non-federally insured credit unions, and certain trust companies. The proposed rule would prescribe minimum standards for AML programs and would ensure that all banks, regardless of whether they are subject to Federal regulation and oversight, are required to establish and implement AML programs.

Imposition of Special Measure against FBME Bank Ltd., formerly known as Federal Bank of the Middle East, Ltd., as a Financial Institution of Primary Money Laundering Concern. On July 29, 2015, FinCEN issued a final rule imposing the fifth special measure under section 311 of the USA PATRIOT Act against FBME. This action followed a notice of finding issued on July 22, 2014 that FBME is a financial institution of primary money laundering concern and an NPRM proposing the imposition of the fifth special measure. FBME filed suit on August 7, 2015 in the U.S. District Court for the District of Columbia; FBME also moved for a preliminary injunction. On August 27, 2015, the Court granted the preliminary injunction and enjoined the rule from taking effect before the rule's effective date of August 28, 2015. On March 31, 2016, FinCEN issued a Final Rule imposing a prohibition on U.S. financial institutions from opening or maintaining a correspondent account for, or on behalf of, FBME in place of the rule published in 2015. On July 22, 2016, the U.S. District Court for the District of Columbia ordered that the implementation of the Final Rule be stayed until further notice from the Court.

Administrative Rulings and Written Guidance. FinCEN published 4 written guidance pieces, and provided 17 responses to requests for administrative rulings and written inquiries/correspondence interpreting the BSA and providing clarity to regulated industries.

FinCEN's regulatory priorities for fiscal year 2017 include finalizing any initiatives mentioned above that are not finalized by fiscal year end, as well as the following in-process and potential projects:

Cross-Border Electronic Transmittal of Funds. On September 27, 2010, FinCEN issued an NPRM in conjunction with the feasibility study prepared pursuant to the Intelligence Reform and Terrorism Prevention Act of 2004 concerning the issue of obtaining information about certain cross-border funds transfers and transmittals of funds. As FinCEN has continued to work on developing the system to receive, store, and use this data, FinCEN is considering various regulatory actions to update the previously published proposed rule and provide additional information to those banks and money transmitters that will become subject to the rule.

Anti-Money Laundering Program and SAR Requirements for Investment Advisers. On August 25, 2015, FinCEN published in the **Federal Register** an NPRM to solicit public comment on proposed rules under the BSA that would prescribe minimum standards for anti-money laundering programs to be established by certain investment advisers and to require such investment advisers to report suspicious activity to FinCEN.

Registration Requirements of Money Services Businesses. FinCEN is considering issuing an NPRM to amend the requirements for money services businesses with respect to registering with FinCEN.

Changes to the Travel and Recordkeeping Requirements for Funds Transfers and Transmittals of Funds. FinCEN is considering changes to require that more information be collected and maintained by financial institutions on funds transfers and transmittals of funds and to lower the threshold.

Changes to the Currency and Monetary Instrument Report (CMIR) Reporting Requirements. FinCEN will research, obtain, and analyze relevant data to validate the need for changes aimed at updating and improving the CMIR and ancillary reporting requirements. Possible areas of study to be examined could include current trends in cash transportation across international borders, transparency levels of physical transportation of currency, the feasibility of harmonizing data fields with bordering countries, and information derived from FinCEN's experience with Geographic Targeting Orders.

Other Requirements. FinCEN also will continue to issue proposed and final rules pursuant to section 311 of the USA PATRIOT Act, as appropriate. Finally, FinCEN expects that it may propose various technical and other regulatory amendments in conjunction with its ongoing, comprehensive review of existing regulations to enhance regulatory efficiency, and as a result of the efforts of an interagency task force currently focusing on improvements to the U.S. regulatory framework for anti-money laundering.

Bureau of the Fiscal Service

The Bureau of the Fiscal Service (Fiscal Service) administers regulations pertaining to the Government's financial activities, including: (1) Implementing Treasury's borrowing authority, including regulating the sale and issue of Treasury securities; (2) administering Government revenue and debt collection; (3) administering Governmentwide accounting programs; (4) managing certain Federal investments; (5) disbursing the majority of Government electronic and check payments; (6) assisting Federal agencies in reducing the number of improper payments; and (7) providing administrative and operational support to Federal agencies through franchise shared services.

During fiscal year 2017, the Fiscal Service will accord priority to the following regulatory projects:

Notice of Proposed Rulemaking for Publishing Delinquent Debtor Information. The Debt Collection Improvement Act of 1996, Public Law 104–134, 110 Stat. 1321 (DCIA) authorizes Federal agencies to publish or otherwise publicly disseminate information regarding the identity of persons owing delinquent nontax debts to the United States for the purpose of collecting the debts, provided certain criteria are met. Treasury proposes to issue a notice of proposed rulemaking seeking comments on a proposed rule that would establish the procedures Federal agencies must follow before promulgating their own rules to publish information about delinquent debtors and the standards for determining when use of this debt collection remedy is appropriate.

Offset of Tax Refund Payments to Collect Past-Due Support. On December 30, 2015, the Fiscal Service published an Interim Final Rule, with request for comments, limiting the time period during which Treasury may recover certain tax refund offset collections from States to six months from the date of such collection. Previously, there was no time limit to recoup offset amounts that were collected from tax refunds to which the debtor taxpayer was not entitled. The Fiscal Service proposes to publish a Final Rule for this time limit for such recoupments in fiscal year 2017.

Management of Federal Agency Receipts, Disbursements and Operation of the Cash Management Improvements Fund. The Fiscal Service plans to publish a notice of proposed rulemaking to amend 31 CFR 206 governing the collection of public money, along with a request for public comments. This notice will propose implementing statutory authority which mandates that some or all nontax payments made to the Government, and accompanying remittance information, be submitted electronically. Receipt of such items electronically offers significant efficiencies and cost-savings to the government, compared to the receipt of cash, check or money order payments.

Internal Revenue Service

The Internal Revenue Service (IRS), working with the Office of Tax Policy, promulgates regulations that interpret and implement the Internal Revenue Code (Code) and related tax statutes. The purpose of these regulations is to carry out the tax policy determined by Congress in a fair, impartial, and reasonable manner, taking into account the intent of Congress, the realities of relevant transactions, the need for the Government to administer the rules and monitor compliance, and the overall integrity of the Federal tax system. The goal is to make the regulations practical and as clear and simple as possible.

During fiscal year 2017, the IRS will accord priority to the following regulatory projects:

Tax-Related Affordable Care Act Provisions. On March 23, 2010, the President signed the Patient Protection and Affordable Care Act of 2010 (Pub. L. 111–148) and on March 30, 2010, the President signed the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) (referred to collectively as the Affordable Care Act (ACA)). The ACA's reform of the health insurance system affects individuals, families, employers, health care providers, and health insurance providers. The ACA provides authority for Treasury and the IRS to issue regulations and other guidance to implement tax provisions in the ACA,

some of which are already effective and some of which will become effective over the next several years. Since enactment of the ACA, Treasury and the IRS have issued a series of temporary, proposed, and final regulations implementing over a dozen provisions of the ACA, including the premium tax credit under section 36B of the Code, the small-business health coverage tax credit under section 45R of the Code, new requirements for charitable hospitals under section 501(r) of the Code, limits on tax preferences for remuneration provided by certain health insurance providers under section 162(m)(6) of the Code, the employer shared responsibility provisions under section 4980H of the Code, the individual shared responsibility provisions under section 5000A of the Code, insurer and employer reporting under sections 6055 and 6056 of the Code, and several revenue-raising provisions, including fees on branded prescription drugs under section 9008 of the ACA, fees on health insurance providers under section 9010 of the ACA, the tax on indoor tanning services under 5000B of the Code, the net investment income tax under section 1411 of the Code, and the additional Medicare tax under sections 3101 and 3102 of the Code.

In fiscal year 2017, Treasury and the IRS will continue to provide guidance to implement tax provisions of the ACA, including:

- Proposed and final regulations related to numerous aspects of the premium tax credit under section 36B, including the determination of minimum value of eligible-employer-sponsored plans;
- Regulations related to the employer shared responsibility provisions under section 4980H;
- Regulations under section 4980I of the Code relating to the excise tax on high cost employer-provided coverage;
- Final regulations on expatriate health plans under the Expatriate Health Coverage Clarification Act of 2014 for purposes of sections 36B, 162(m)(6), 4377, 5000A, 6055, and 6056 of the Code, and section 9010 of the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act;
- Final regulations regarding issues related to the net investment income tax under section 1411 of the Code.

Interest on Deferred Tax Liability for Contingent Payment Installment Sales. Section 453 of the Code generally allows taxpayers to report the gain from a sale of property in the taxable year or years in which payments are received, rather than in the year of sale. Section 453A of the Code imposes an interest charge on the tax liability that is deferred as a result of reporting the gain when payments are received. The interest charge generally applies to installment obligations that arise from a sale of property using the installment method if the sales price of the property exceeds $150,000, and the face amount of all such installment obligations held by a taxpayer that arose during, and are outstanding as of the close of, a taxable year exceeds $5,000,000. The interest charge provided in section 453A cannot be determined under the terms of the statute if an installment obligation provides for contingent payments. Accordingly, in section 453A(c)(6), Congress authorized the Secretary of the Treasury to issue regulations providing for the application of section 453A in the case of installment sales with contingent payments. Treasury and the IRS intend to issue proposed regulations that, when finalized, will provide guidance and reduce uncertainty regarding the application of section 453A to contingent payments.

Rules for Home Construction Contracts. In general, section 460(a) of the Code requires taxpayers to use the percentage-of-completion method (PCM) to account for taxable income from any long-term contract. Under the PCM, income is generally reported in installments as work is performed, and expenses are generally deducted in the taxable year incurred. However, taxpayers with contracts that meet the definition of a ''home construction contract,'' under section 460(e)(4), are not required to use the PCM for those contracts and may, instead, use an exempt method. Exempt methods include the completed contract method (CCM) and the accrual method. Under the CCM, for example, a taxpayer generally takes into account the entire gross contract price and all incurred allocable contract costs in the taxable year the taxpayer completes the contract. Treasury and the IRS believe that amended rules are needed to reduce uncertainty and controversy, including litigation, regarding when a contract qualifies as a ''home construction contract'' and when the income and allocable deductions are taken into account under the CCM. On August 4, 2008, Treasury and the IRS published proposed regulations on the types of contracts that are eligible for the home construction contract exemption. The preamble to those regulations stated that Treasury and the IRS expected to propose additional rules specific to home construction contracts accounted for using the CCM. After considering comments received and the need for additional and clearer rules to reduce ongoing uncertainty and controversy, Treasury and the IRS have determined that it would be beneficial to taxpayers to present all of the proposed changes to the current regulations in a single document. Treasury and the IRS plan to withdraw the 2008 proposed regulations and replace them with new, more comprehensive proposed regulations.

Research Expenditures. Section 41 of the Code provides a credit against taxable income for certain expenses paid or incurred in conducting research activities. To assist in resolving areas of controversy and uncertainty with respect to research expenses, Treasury and the IRS plan to issue final regulations with respect to the definition and credit eligibility of expenditures for internal use software. In addition, on December 18, 2015, the President signed the Protecting Americans from Tax Hikes of 2015 (the PATH Act), which added new section 41(h). That section allows qualified small businesses to elect to claim a portion of the section 41 credit against the employer's portion of certain payroll taxes. Treasury and the IRS plan to provide guidance on eligibility for the election, how and where to claim the election, and how the credit will be recaptured in certain situations.

Domestic Production Activities Income. Section 199 of the Code provides a deduction for certain income attributable to domestic production activities. To assist in resolving areas of controversy and uncertainty with respect to the eligibility of income from online computer software, Treasury and the IRS plan to issue regulations regarding the application of section 199 to online computer software.

Consistent Basis Reporting between Estate and Person Acquiring Property from Decedent. On July 31, 2015, the President signed H.R. 3236, Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 (Act) (Pub. L. 114–41), into law. Section 2004 of the Act added new Code sections 1014(f), 6035, and 6662(k). Section 1014(f) provides rules requiring that the basis of certain property acquired from a decedent be consistent with the estate tax value of the property. Section 6035 requires executors who are required to file a return under section 6018(a) of the Code (and other persons required to file a return under section 6018(b)) after July 31, 2015, to file statements with the IRS and furnish statements to certain estate beneficiaries providing information regarding the value of certain property acquired from a decedent. Section 6662(k) provides a

penalty for certain recipients of property acquired from an estate required to file a return after July 31, 2015, who report a basis that is inconsistent with the value determined under section 1014(f) when the property is sold (or deemed sold). Treasury and the IRS published three notices and proposed and temporary regulations under sections 1014, 6035, and 6662(k) providing, respectively, guidance on the compliance date under section 6035 and guidance regarding: (1) The requirement that a recipient's basis in certain property acquired from a decedent be consistent with the value of the property as finally determined for Federal estate tax purposes; and (2) the accompanying filing requirements for certain executors and other persons. On August 21, 2015, Notice 2015–57 (2015–36 IRB 294) was issued delaying the due date for any statements required by section 6035 to February 29, 2016. On February 11, 2016, Treasury and IRS issued Notice 2016–19 (2016–9 IRB 362), providing that statements required under section 6035 need not be filed until March 31, 2016, and on March 23, 2016, issued Notice 2016–27 (2016–15 IRB 576), providing that statements under section 6035 need not be filed until June 30, 2016. For statements required under sections 6035(a)(1) and (a)(2) that are required to be filed after June 30, 2016, those statements are to be filed in no case at a time later than the earlier of (i) the date which is 30 days after the date on which the return under section 6018 was required to be filed (including extensions, if any) or (ii) the date which is 30 days after the date such return is filed. The IRS is in the process of finalizing the regulations, the applicable form, schedule, and instructions to facilitate compliance with sections 1014(f), 6035, and 6662(k). It is expected that Treasury and IRS will issue final regulations within 18 months of July 31, 2015.

Definition of Issue Price for Tax-Exempt Bonds. On September 16, 2013, Treasury and the IRS published proposed regulations (78 FR 56842) to address certain issues involving the arbitrage investment restrictions under section 148 of the Code, including guidance on the issue price definition used in the computation of bond yield. On June 24, 2015, Treasury and the IRS published proposed regulations (80 FR 36301) that revised the 2013 guidance on the issue price definition. Treasury and the IRS plan to finalize the 2015 proposed regulations.

Guidance on the Definition of Political Subdivision for Tax-Exempt, Tax-Credit, and Direct-Pay Bonds. A political subdivision may be a valid issuer of tax-exempt, tax-credit, and direct-pay bonds. Concerns have been raised about what is required for an entity to be a political subdivision for purposes of section 103 of the Code. Proposed regulations (REG–129067–15) were published in the **Federal Register** on February 23, 2016 (81 FR 8870). Treasury and the IRS are considering comments on the proposed regulations and expect to issue regulations on this issue in fiscal year 2017.

Contingent Notional Principal Contract Regulations. Notice 2001–44 (2001–2 CB 77) outlined four possible approaches for recognizing nonperiodic payments made or received on a notional principal contract (NPC) when the contract includes a nonperiodic payment that is contingent in fact or in amount. The Notice solicited further comments and information on the treatment of such payments. After considering the comments received in response to Notice 2001–44, Treasury and the IRS published proposed regulations (69 FR 8886) (the 2004 proposed regulations) that would amend section 1.446–3 and provide additional rules regarding the timing and character of income, deduction, gain, or loss with respect to such nonperiodic payments, including termination payments. On December 7, 2007, Treasury and the IRS released Notice 2008–2 (2008–1 CB 252) requesting comments and information with respect to transactions frequently referred to as prepaid forward contracts. On May 8, 2015, Treasury and the IRS published temporary and proposed regulations (80 FR 26437) relating to the treatment of nonperiodic payments. Treasury and the IRS plan to finalize the temporary regulations and to re-propose regulations to address issues relating to the timing and character of nonperiodic contingent payments on NPCs, including termination payments and payments on prepaid forward contracts.

Tax Treatment of Distressed Debt. A number of tax issues relating to the amount, character, and timing of income, expense, gain, or loss on distressed debt remain unresolved. During the fiscal year, Treasury and the IRS plan to address certain of these issues in published guidance.

Definition of Real Property and Qualifying Income for REIT Purposes. A taxpayer must satisfy certain asset and income requirements to qualify as a real estate investment trust (REIT) under section 856 of the Code. REITs have sought to invest in various types of assets that are not directly addressed by the current regulations or other published guidance. On May 14, 2014, Treasury and the IRS published proposed regulations (79 FR 27508) to update and clarify the definition of real property for REIT qualification purposes, including guidance addressing whether a component of a larger item is tested on its own or only as part of the larger item, the scope of the asset to be tested, and whether certain intangible assets qualify as real property. Treasury and the IRS plan to finalize the proposed regulations in the fiscal year. Treasury and the IRS also plan to provide guidance clarifying the definition of income for purposes of section 856.

Treatment of Certain Interests in Corporations as Stock or Indebtedness. Section 385 of the Code grants the Secretary of the Treasury the authority to prescribe regulations as necessary or appropriate to determine whether an interest in a corporation is to be treated as stock or indebtedness or as part stock and part indebtedness for Federal income tax purposes. On April 4, 2016, Treasury and the IRS issued proposed regulations under section 385 that would establish threshold documentation requirements for determining whether certain related party interests in a corporation are characterized as stock or indebtedness for Federal tax purposes. The proposed regulations also would treat certain related party interests that otherwise would be treated as indebtedness for Federal income tax purposes as stock. Treasury and the IRS issued final and temporary regulations on these issues on October 21, 2016 (81 FR 72858).

Corporate Spin-offs and Split-offs. Section 355 and related provisions of the Code allow for the tax-free distribution of stock or securities of a controlled corporation if certain requirements are met. For example, both the distributing and controlled corporations must be engaged in the active conduct of a trade or business immediately after the distribution, and the transaction must not be used as a device for the distribution of earnings and profits or to circumvent Congress' intent in repealing the *General Utilities* doctrine. Treasury and the IRS have published proposed regulations that address (a) whether the active trade or business requirement is met when a distribution involves small active businesses relative to other assets and (b) whether a distribution raises device concerns because either the distributing or controlled corporation has a substantial percentage of nonbusiness assets. Treasury and the IRS intend to issue final regulations on these issues. Treasury and the IRS also intend to issue additional guidance addressing: (a) When a distribution, otherwise qualifying under section 355, circumvents Congress' intent in repealing the *General Utilities* doctrine; and (b) the tax treatment under sections 355 and 361 when debt of the distributing corporation is issued and

such debt is retired using stock or securities of the controlled corporation, and (c) the tax treatment when cash or property is transferred between a distributing or controlled corporation and its shareholder(s) in connection with the distribution. Treasury and the IRS also intend to finalize proposed regulations that would define predecessor and successor corporations for purposes of the exception to tax-free treatment under section 355(e).

Assistance to Troubled Financial Institutions. Section 597 grants the Secretary of the Treasury wide latitude to prescribe regulations determining the treatment of any transaction in which Federal financial assistance is provided to a bank or domestic building and loan association. Treasury and the IRS have issued final regulations under section 597. In the wake of the most recent financial crisis and changes in the form of government assistance that have developed since the final regulations were issued, Treasury and the IRS published proposed regulations that would reflect those changes. Treasury and the IRS intend to issue final regulations on these issues.

Redetermination of the Consolidated Net Unrealized Built-in Gain and Net Unrealized Built-in Loss. Section 382 limits the amount of taxable income that can be offset by net operating loss carryovers. Treasury and the IRS published proposed regulations modifying the application of section 382 to consolidated groups, specifically regarding the time that recognized built-in loss is treated as reducing consolidated net unrealized built-in loss. Treasury and the IRS intend to issue final regulations on these issues.

Disguised Payments for Services. Section 707(a)(2)(A) of the Code provides that if a partner performs services for a partnership and receives a related direct or indirect allocation and distribution, and the performance of services and the allocation and distribution, when viewed together, are properly characterized as a transaction occurring between the partnership and a partner acting other than in its capacity as a partner, the transfer will be treated as occurring between the partnership and one who is not a partner. Treasury and the IRS published proposed regulations on July 23, 2015, to provide guidance on when an arrangement that is purported to be a distributive share under section 704(b) of the Code will be recharacterized as a disguised payment for services under section 707(a)(2)(A). The proposed regulations also provide for modifications to the regulations governing guaranteed payments under section 707(c) to make those regulations consistent with the proposed regulations under section 707(a)(2)(A). Treasury and the IRS expect to issue final regulations during Fiscal Year 2017.

Transfers of Property to Partnerships with Related Foreign Partners. Section 721(c) of the Code provides authority to issue regulations that prevent the use of a partnership to shift gain to a foreign person. On August 6, 2015, Treasury and the IRS issued Notice 2015–54 (2015–34 IRB 210) describing regulations to be issued under that authority. By the end of 2016, Treasury and the IRS plan to issue temporary and proposed regulations implementing the guidance described in Notice 2015–52. Treasury and the IRS intend to finalize the temporary and proposed regulations in this fiscal year.

Reporting requirements applicable to certain foreign-owned entities. On May 5, 2016, Treasury and the IRS issued proposed regulations that would require foreign-owned entities that are disregarded entities for tax purposes, including foreign-owned single-member limited liability companies (LLCs), to obtain an employer identification number (EIN) with the IRS. These changes are intended to provide the IRS with improved access to information that will allow the United States to comply with international standards on tax and transparency, as well as strengthen the enforcement of U.S. tax laws. Treasury and the IRS intend to finalize the proposed regulations in this fiscal year.

Currency. On September 6, 2006, Treasury and the IRS published a notice of proposed rulemaking under section 987 of the Code that proposes rules for translating a section 987 qualified business unit's income or loss into the taxpayer's functional currency for each taxable year, as well as for determining the amount of section 987 currency gain or loss that must be recognized when a section 987 qualified business unit makes a remittance. Treasury and the IRS expect to finalize the proposed regulations in this fiscal year. In addition, Treasury and the IRS intend to issue proposed regulations in Fiscal Year 2017 to provide guidance on the treatment of foreign currency gain or loss of a controlled foreign corporation (CFC) under the exclusion from foreign personal holding company income for income from transactions directly related to the business needs of the CFC, as well as related timing and other issues.

Disguised Sale and Allocation of Liabilities. A contribution of property by a partner to a partnership may be recharacterized as a sale under section 707(a)(2)(B) of the Code if the partnership distributes to the contributing partner cash or other property that is, in substance, consideration for the contribution. The allocation of partnership liabilities to the partners under section 752 of the Code may impact the determination of whether a disguised sale has occurred and whether gain is otherwise recognized upon a distribution. Treasury and the IRS published proposed regulations on January 30, 2014, to address certain issues that arise in the disguised sale context and other issues regarding the partners' shares of partnership liabilities. Treasury and the IRS are considering comments on the proposed regulations and expect to issue regulations on this issue in fiscal year 2017.

Certain Partnership Distributions Treated as Sales or Exchanges. In 1954, Congress enacted section 751 to prevent the use of a partnership to convert potential ordinary income into capital gain. In 1956, Treasury and the IRS issued regulations implementing section 751 of the Code. The current regulations, however, do not always achieve the purpose of the statute. In 2006, Treasury and the IRS published Notice 2006–14 (2006–1 CB 498) to propose and solicit alternative approaches to section 751 that better achieve the purpose of the statute while providing greater simplicity. Treasury and the IRS published proposed regulations following up on Notice 2006–14 on November 3, 2014. These regulations were intended to provide guidance on determining a partner's interest in a partnership's section 751 property and how a partnership recognizes income required by section 751. Treasury and the IRS expect to issue final regulations during fiscal year 2017.

Penalties and Limitation Periods. Congress amended several penalty provisions in the Internal Revenue Code in the past several years. Treasury and the IRS intend to publish a number of guidance projects in this fiscal year addressing these penalty provisions. Specifically, Treasury and the IRS intend to publish final regulations under section 6708 of the Code regarding the penalty for failure to make available upon request a list of advisees that is required to be maintained under section 6112 of the Code. The proposed regulations were published on March 8, 2013. Treasury and the IRS also intend to publish proposed regulations under sections 6662, 6662A, and 6664 of the Code to provide further guidance on the circumstances under which a taxpayer

could be subject to the accuracy-related penalty on underpayments or reportable transaction understatements and the reasonable cause exception.

Inversion Transactions. On January 17, 2014, Treasury and the IRS issued temporary and proposed regulations providing guidance on the application of the ownership test under section 7874(a)(2)(B)(ii). On April 4, 2016, Treasury and the IRS issued temporary and proposed regulations providing further guidance on the application of sections 7874 and 367 of the Code to inversion transactions, as well as on certain tax avoidance transactions that are commonly undertaken after an inversion transaction. In this fiscal year, Treasury and the IRS expect to issue additional guidance to further limit inversion transactions that are contrary to the purposes of section 7874 and the benefits of post-inversion tax avoidance transactions.

Information Reporting for Foreign Accounts of U.S. Persons. In March 2010, chapter 4 (sections 1471 to 1474) was added to subtitle A of the Code as part of the Hiring Incentives to Restore Employment Act (HIRE Act) (Pub. L. 111–147). Chapter 4 was enacted to address concerns with offshore tax evasion by U.S. citizens and residents and generally requires foreign financial institutions (FFIs) to enter into an agreement (FFI Agreement) with the IRS to report information regarding financial accounts of U.S. persons and certain foreign entities with significant U.S. ownership. An FFI that does not enter into an FFI Agreement, or that is not otherwise deemed compliant with FATCA, generally will be subject to a withholding tax on the gross amount of certain payments from U.S. sources. Treasury and the IRS have issued proposed, temporary, and final regulations under chapter 4, followed by proposed and temporary regulations modifying certain provisions of the final regulations; proposed and temporary regulations under chapters 3 and 61, and section 3406, to coordinate with those chapter 4 regulations; and implementing revenue procedures and other guidance. Treasury and the IRS expect to issue further guidance with respect to FATCA and related provisions in this fiscal year, including finalizing the aforementioned chapter 3, 4 and 61 regulations; issuing proposed regulations covering the compliance requirements of entities acting as sponsoring entities on behalf of certain foreign entities; issuing updated agreements for foreign financial institutions, qualified intermediaries (including qualified derivatives dealers), and withholding foreign partnerships and withholding foreign trusts; and issuing regulations on refunds and credits.

Foreign Tax Credits and Covered Asset Acquisitions. Section 901(m) of the Code limits the availability of foreign tax credits in certain cases in which U.S. tax law and foreign tax law provide different rules for recognizing income and gain. In 2014, Treasury and the IRS issued two notices providing guidance under section 901(m) regarding the treatment of gains and losses from dispositions. By the end of 2016, Treasury and the IRS expect to issue temporary and proposed regulations setting forth the rules described in those notices. Treasury and the IRS also plan to issue proposed regulations setting forth substantial additional guidance under section 901(m). Treasury and the IRS expect to finalize the proposed regulations during this fiscal year.

Transfers of Property to Foreign Corporations. Section 367 of the Code provides special rules to address the transfer of property, including intangible property, by U.S. persons to foreign corporations in certain nonrecognition transactions. Under existing temporary regulations issued in 1986, favorable treatment is afforded to the outbound transfer of ''foreign goodwill and going concern value,'' which has created incentives for taxpayers to categorize transfers of high-value intangible property as such. On September 14, 2015, Treasury and the IRS released proposed regulations that would eliminate that favorable treatment. Treasury and the IRS intend to finalize the proposed section 367 regulations in this fiscal year.

ABLE Account guidance. On December 19, 2014, Congress passed The Stephen Beck, Jr., Achieving a Better Life Experience (ABLE) Act of 2014, adding section 529A to the Code to enable states to create qualified ABLE programs under which disabled individuals may establish a tax-advantaged account to pay for disability-related expenses. To be eligible to establish an ABLE account, the individual must have become disabled prior to age 26. As required by the statute, Treasury and the IRS on June 19, 2015, published proposed regulations implementing the provision. States may rely on the proposed regulations for establishing a qualified ABLE program. Treasury and the IRS intend to finalize the regulations during the 2017 fiscal year, taking into account all comments received.

Certified Professional Employer Organization guidance. On May 6, 2016, Treasury and the IRS published final, temporary, and proposed regulations which set forth the Federal employment tax liabilities and other obligations of persons certified by the IRS as certified professional employer organizations (CPEOs) in accordance with provisions enacted as part of the ABLE Act. The temporary regulations address the requirements relating to applying for and maintaining certification as a CPEO and some related definitions. In July 2016, the IRS opened the application process for being certified as a CPEO. Treasury and the IRS intend to finalize the temporary and proposed regulations during the 2017 fiscal year, taking into account all comments received.

Guidance Relating to Publicly Traded Partnerships. Section 7704 of the Code provides that a partnership whose interests are traded on either an established securities market or on a secondary market (a ''publicly traded partnership'') is generally treated as a corporation for Federal tax purposes. However, section 7704(c) permits publicly traded partnerships to be treated as partnerships for Federal tax purposes if 90 percent or more of partnership income consists of ''qualifying income.'' Section 7704(d) provides that income is generally qualifying income if it is passive income or is derived from exploration, development, mining or production, processing, refining, transportation, or marketing of a mineral or natural resource. Treasury and the IRS issued proposed regulations in 2015 to provide guidance and reduce uncertainty regarding the scope of the natural resource exception. After considering comments on the proposed regulations, Treasury and the IRS expect to issue final regulations in fiscal year 2017.

Guidance implementing the Bipartisan Budget Act of 2015. The Bipartisan Budget Act of 2015 repealed the current procedures governing audits of partnerships and replaced them with new procedures. Treasury and the IRS intend to publish regulations implementing these new procedures. Proposed regulations will provide guidance on electing out of the new procedures, partner reporting and adjustments, designation of a partnership representative, imputed underpayments, and requests for administrative adjustments.

Guidance on User Fees. Treasury and the IRS intend to publish regulations charging (or updating) user fees for certain applications made by individuals to the IRS, including for an installment agreement, an offer in compromise, and a preparer tax identification number, as well as to take

the special enrollment examination to become an enrolled agent.

Guidance under the Protecting Americans from Tax Hikes Act of 2015. On December 25, 2015, Congress passed the Protecting Americans from Tax Hikes Act (PATH Act). The Path Act made changes to numerous provisions of the Code. Treasury and the IRS intend to publish guidance implementing these changes, including guidance on the issuance of individual taxpayer identifying numbers, an update to the revenue procedure on acceptance agents, proposed regulations on the use of truncated taxpayer identification numbers on the Form W–2, and regulations under sections 6721 and 6722 regarding de minimis errors on information returns.

BILLING CODE 4810–25–P

DEPARTMENT OF VETERANS AFFAIRS (VA)

Statement of Regulatory Priorities

The Department of Veterans Affairs (VA) administers benefit programs that recognize the important public obligations to those who served this Nation. VA's regulatory responsibility is almost solely confined to carrying out mandates of the laws enacted by Congress relating to programs for veterans and their families. VA's major regulatory objective is to implement these laws with fairness, justice, and efficiency.

Most of the regulations issued by VA involve at least one of three VA components: The Veterans Benefits Administration, the Veterans Health Administration, and the National Cemetery Administration. The primary mission of the Veterans Benefits Administration is to provide high-quality and timely nonmedical benefits to eligible veterans and their dependents. The primary mission of the Veterans Health Administration is to provide high-quality health care on a timely basis to eligible veterans through its system of medical centers, nursing homes, domiciliaries, and outpatient medical and dental facilities. The primary mission of the National Cemetery Administration is to bury eligible veterans, members of the Reserve components, and their dependents in VA National Cemeteries and to maintain those cemeteries as national shrines in perpetuity as a final tribute of a grateful Nation to commemorate their service and sacrifice to our Nation.

VA Regulatory Priorities

VA's most important significant regulatory actions are identified and discussed in the following chart. These actions are identified as helping to implement VA's policies and priorities, and embody the core of VA's regulatory priorities.

RIN	Title	Summary of rulemaking
2900–AP66	Diseases Associated With Exposure to Contaminated Water at Camp Lejeune.	The Department of Veterans Affairs (VA) proposed to amend its adjudication regulations relating to presumptive service connection to add certain diseases associated with contaminants present in the base water supply at U.S. Marine Corps Base Camp Lejeune (Camp Lejeune), North Carolina, from August 1, 1953 to December 31, 1987. The chemical compounds involved have been associated by various scientific organizations with the development of certain diseases. The effect of this rule would be to establish that veterans, former reservists, and former National Guard members, who served at Camp Lejeune during this period, and who have been diagnosed with any of nine associated diseases, are presumed to have a service-connected disability for purposes of entitlement to VA benefits. In addition, VA proposed establishing a presumption that these individuals were disabled during the relevant period of service, thus establishing active military service for benefit purposes. Under this presumption, affected former reservists and National Guard members would have veteran status for purposes of entitlement to some VA benefits. The proposal would implement a decision by the Secretary of Veterans Affairs that service connection on a presumptive basis is warranted for claimants who served at Camp Lejeune and later develop certain diseases. VA plans to finalize this proposal after considering public comments.
2900–AP54	VA Homeless Providers Grant and Per Diem Program.	The Department of Veterans Affairs (VA) is proposing to amend its regulations concerning the VA Homeless Providers Grant and Per Diem Program (GPD). These amendments would provide GPD with increased flexibility to (1) respond to the changing needs of homeless veterans; (2) repurpose existing and future funds more efficiently; and (3) allow grant providers the ability to add, modify, or eliminate components of funded programs. We are proposing these amendments to better serve our homeless veteran population and the grantees who serve them.
2900–AO53	Fiduciary Activities	VA proposed to amend its fiduciary program regulations, which govern the oversight of beneficiaries who, because of injury, disease, the infirmities of advanced age, or minority, are unable to manage their VA benefits and the appointment and oversight of fiduciaries for these vulnerable beneficiaries. The proposed amendments would update and reorganize regulations consistent with current law, VA policies and procedures, and VA's reorganization of its fiduciary activities. They would also clarify the rights of beneficiaries in the program and the roles of VA and fiduciaries in ensuring that VA benefits are managed in the best interest of beneficiaries and their dependents.

RIN	Title	Summary of rulemaking
2900–AP72	Veterans Employment Pay for Success Program.	The Department of Veterans Affairs (VA) established a grant program (Veterans Employment Pay for Success (VEPFS)) under the authority of 38 U.S.C. 3119 to award grants to eligible entities to fund projects that are successful in accomplishing employment rehabilitation for Veterans with service-connected disabilities. VA will award grants on the basis of an eligible entity's proposed use of a Pay for Success (PFS) strategy to achieve goals. This interim final rule established regulations for awarding a VEPFS grant, including the general process for awarding the grant, criteria and parameters for evaluating grant applications, priorities related to the award of a grant, and general requirements and guidance for administering a VEPFS grant program.
2900–AP35	Tiered Pharmacy Copayments for Medications.	The Department of Veterans Affairs (VA) proposes to amend its regulations concerning copayments charged to certain veterans for medication required on an outpatient basis to treat nonservice-connected conditions. This rulemaking would establish three classes of medications for copayment purposes, identified as Tier 1, Tier 2, and Tier 3. These tiers would distinguish in part based on whether the medications are available from multiple sources or a single source, with some exceptions. Copayment amounts would be fixed, and would be dependent upon the class of medication. For most veterans these copayment amounts would result in lower out-of-pocket costs, thereby encouraging greater adherence to prescribed medications and reducing the risk of fragmented care that results when veterans use multiple pharmacies to fill their prescriptions.
2900–AP57	Repayment by VA of Educational Loans for Certain Psychiatrists (Clay Hunt Act).	The Department of Veterans Affairs (VA) has added to its medical regulations a program for the repayment of educational loans for certain psychiatrists who agree to a period of obligated service with VA. This program is intended to increase the pool of qualified VA psychiatrists and increase veterans' access to mental health care.
2900–AO88	Per Diem Paid to States for Care of Eligible Veterans in State Homes.	The Department of Veterans Affairs (VA) proposed to reorganize, update (based on revisions to statutory authority), and clarify its regulations that govern paying per diem to State homes providing nursing home and adult day health care to eligible veterans. The reorganization will improve consistency and clarity throughout these State home programs. We believe that these proposed regulations will clarify current law and policy, which should improve and simplify the payment of per diem to State homes, and encourage participation in these programs. VA plans to finalize this proposal after considering public comments.
2900–AP60	Expanded Access to Non-VA Care Through the Veterans Choice Program (VCP).	The Department of Veterans Affairs (VA) revised its medical regulations that implement section 101 of the Veterans Access, Choice, and Accountability Act of 2014 (hereafter referred to as ''the Choice Act''), which requires VA to establish a program to furnish hospital care and medical services through eligible non-VA health care providers to eligible veterans who either cannot be seen within the wait-time goals of the Veterans Health Administration (VHA) or who qualify based on their place of residence (hereafter referred to as ''the Veterans Choice Program'' or ''the Program''). These regulatory revisions are required by the most recent amendments to the Choice Act made by the Construction Authorization and Choice Improvement Act of 2014, and by the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015. The Construction Authorization and Choice Improvement Act of 2014 amended the Choice Act to define additional criteria that VA may use to determine that a veteran's travel to a VA medical facility is an ''unusual or excessive burden,'' and the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 amended the Choice Act to cover all veterans enrolled in the VA health care system, remove the 60-day limit on an episode of care, modify the wait-time and 40-mile distance eligibility criteria, and expand provider eligibility based on criteria as determined by VA.
2900–AP44	Advanced Practice Registered Nurses ...	The Department of Veterans Affairs (VA) proposed to amend its medical regulations to permit full practice authority of all VA advanced practice registered nurses (APRNs) when they are acting within the scope of their VA employment. This rulemaking would increase veterans' access to VA health care by expanding the pool of qualified health care professionals who are authorized to provide primary health care and other related health care services to the full extent of their education, training, and certification, without the clinical supervision of physicians. This rule would permit VA to use its health care resources more effectively and in a manner that is consistent with the role of APRNs in the non-VA health care sector, while maintaining the patient-centered, safe, high-quality health care that veterans receive from VA. VA will finalize its proposal after considering public comments.

Retrospective Review of Existing Regulations

Consistent with guidance from section 6 of Executive Order 13563, VA identifies rules that are to be ''modified, streamlined, expanded, or repealed so as to make the agency's regulatory program more effective or less burdensome in achieving the regulatory objectives.'' In addition, consistent with Executive Order 13610, initiatives that are discussed in those plans are identified below.

RIN	Title	Significantly reduce burdens on small businesses	Summary of rulemaking
Multiple RINs	Revise and Streamline VA Acquisition Regulation to Adhere to Federal Acquisition.	No	VA is proposing to amend VA Acquisition Regulation (VAAR) as part of a project to update the VAAR. Under this initiative all parts of the regulation are being reviewed and updated in phased increments to incorporate any new regulations or policies and to remove any procedural guidance that is internal to VA. This project aims to streamline the VAAR to implement and supplement the Federal Acquisition Regulation (FAR) only when required, and to eliminate internal agency guidance in keeping with the FAR principles concerning agency acquisition regulations.
2900–AO53	Fiduciary Activities	No	VA proposes to amend its fiduciary program regulations, which govern the oversight of beneficiaries who, because of injury, disease, the infirmities of advanced age, or minority, are unable to manage their VA benefits, and the appointment and oversight of fiduciaries for these vulnerable beneficiaries. The proposed amendments would update and reorganize regulations consistent with current law, VA policies and procedures, and VA's reorganization of its fiduciary activities. They would also clarify the rights of beneficiaries in the program and the roles of VA and fiduciaries in ensuring that VA benefits are managed in the best interest of beneficiaries and their dependents.
Multiple RINs	VA Schedule for Rating Disabilities (With Specific Body System).	No	VA is updating its Schedule for Rating Disabilities (VASRD, or Rating Schedule) to better reflect modern medicine. The VASRD, which is part 4 of title 38, Code of Federal Regulations, governs how claims processors evaluate the severity of disabilities. While VA has routinely updated parts of the VASRD, this proposal is the first time VA is working to update the entire VASRD since 1945. In 2009, a formal project management plan was created to outline how to update the VASRD. A working group of specialized physicians (VA and non-VA), stakeholders, and claims processors reviews each of the 15 body systems and provides analysis to assist VA in developing updates. The public has 60 days to provide VA with comments. VA will introduce the proposed updates to the VASRD incrementally and is committed to an update of the entire VASRD.

VA

Proposed Rule Stage

101. Schedule for Rating Disabilities: the Genitourinary Diseases and Conditions

Priority: Other Significant.

Legal Authority: 38 U.S.C. 1155

CFR Citation: 38 CFR 4.115; 38 CFR 4.115(a); 38 CFR 4.115(b).

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) proposes to amend the portion of the Schedule for Rating Disabilities (VASRD) that addresses the genitourinary system. The purpose of this change is to update current medical terminology, incorporate medical advances that have occurred since the last review, and provide well-defined criteria in accordance with actual, standard medical clinical practice. The proposed rule reflects the most up-to-date medical knowledge and clinical practice of nephrology and urology specialties, as well as comments from subject matter experts and the public garnered during a public forum held January 27–28, 2011.

Statement of Need: VA is updating its Schedule for Rating Disabilities (VASRD, or Rating Schedule) to better reflect modern medicine. The VASRD, which is part 4 of title 38, Code of Federal Regulations, governs how claims processors evaluate the severity of disabilities. While VA has routinely updated parts of the VASRD, this proposal is the first time VA is working to update the entire VASRD since 1945. In 2009, a formal project management plan was created to outline how to update the VASRD. A working group of specialized physicians (VA and non-VA), stakeholders, and claims processors reviews each of the 15 body systems and provides analysis to assist VA in developing updates. The public has 60 days to provide VA with comments. VA will introduce the proposed updates to the VASRD incrementally and is committed to an update of the entire VASRD.

Summary of Legal Basis: 38 U.S.C. 1155.

RIN: 2900–AP16

VA

102. Revise and Streamline VA Acquisition Regulation To Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V001, Parts 803, 814, 822)

Priority: Other Significant.

Legal Authority: 40 U.S.C. 121(c); 38 U.S.C. 501; 41 U.S.C. 1121(c)(3); . . .

CFR Citation: 48 CFR 801; 48 CFR 802; 48 CFR 803; 48 CFR 812; 48 CFR 814; 48 CFR 822; 48 CFR 852; 48 CFR 1.301 to 1.304; . . .

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) is proposing to amend its VA Acquisition Regulation (VAAR) to update the VAAR to current FAR requirements, thresholds, definitions, and titles; it provides new definitions, updated VA titles and offices; it corrects inconsistencies, removes redundancies and duplicate material already covered by the FAR; it deletes outdated material or information and appropriately renumbers VAAR text and clauses and provisions where required to comport with FAR format, numbering and arrangement; and, it provides VA acquisition regulations necessary to implement FAR policies and procedures within VA, as well as additional policies, procedures, solicitation provisions, or contract clauses that supplement the FAR to satisfy VA mission needs. This proposed rule revises VAAR parts 803, 814, and 822. Other revisions to the entirety of the affected parts are planned in later proposed rules when those parts are revised in full.

Statement of Need: The needed changes include proposing to remove an information collection burden from the VAAR because it is based on an outdated practice in providing bid envelopes. We propose to add additional definitions to ensure a common understanding and meaning of terms related to debarment and suspensions in the department. We are proposing to update the policy governing improper business practices and personal conflicts of interests and to clarify the language regarding the prohibition of contractors from making reference in its commercial advertising regarding VA contracts to avoid implying that the Government approves or endorses products or services.

RIN: 2900–AP50

VA

103. VA Homeless Providers Grant and Per Diem Program

Priority: Other Significant.

Legal Authority: 38 U.S.C. 501; 38 U.S.C. 2001; 38 U.S.C. 2011; 38 U.S.C. 2012; 38 U.S.C. 2061; 38 U.S.C. 2064

CFR Citation: 38 CFR 61.1; 38 CFR 61.5; 38 CFR 61.33; 38 CFR 61.61.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) is proposing to amend its regulations concerning the VA Homeless Providers Grant and Per Diem Program (GPD). These amendments would provide GPD with increased flexibility to: (1) Respond to the changing needs of homeless veterans; (2) repurpose existing and future funds more efficiently; and (3) allow grant providers the ability to add, modify, or eliminate components of funded programs. We are proposing these amendments to better serve our homeless veteran population and the grantees who serve them.

Statement of Need: The Department of Veterans Affairs (VA) proposes to amend its regulations concerning the VA Homeless Providers Grant and Per Diem Program (GPD) to better serve our homeless veteran population and the grantees who serve them. For example, VA is proposing to increase flexibility for transitioning homeless veterans into permanent housing, such as by recognizing ''bridge housing'', a short-term housing option for veterans who have accepted a permanent housing placement that is not immediately available.

Summary of Legal Basis: 38 U.S.C. 501, 2001, 2011, 2012, 2061 and 2064.

RIN: 2900–AP54

VA

104. Revise and Streamline VA Acquisition Regulation To Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V005, Parts 812, 813)

Priority: Other Significant.

Legal Authority: 40 U.S.C. 121(c)

CFR Citation: 48 CFR 1.3; 48 CFR 812; 48 CFR 813; 48 CFR 852.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) is proposing to amend its VA Acquisition Regulation (VAAR) as part of a project to update the VAAR. Under this initiative, all parts of the regulation are being reviewed and updated in phased increments to incorporate any new regulations or policies and to remove any procedural guidance that is internal to the VA. This project aims to streamline the VAAR to implement and supplement the Federal Acquisition Regulation (FAR) only when required, and to eliminate internal agency guidance in keeping with the FAR principles concerning agency acquisition regulations.

Statement of Need: The Department of Veterans Affairs (VA) is proposing to revise the VAAR to add new policy or regulatory requirements and to remove any guidance that is applicable only to VA's internal operating processes or procedures. FAR 1.302, Limitations, requires that agency acquisition regulations shall be limited only to those necessary to implement the FAR policies and procedures within the agency and to any additional information needed to supplement the FAR to satisfy the specific needs of the agency. The needed changes include proposing to delete paragraphs when adequately addressed in the FAR, add new subsections to clarify that FAR applies to specific parts, and to remove sections such as the section that deals with internal procedures for obtaining a waiver to tailor solicitations, to be inconsistent with customary commercial practice.

Summary of Legal Basis: 40 U.S.C. 121(c).

RIN: 2900–AP58

VA

105. Diseases Associated With Exposure to Contaminants in the Water Supply at Camp Lejeune

Priority: Economically Significant. Major under 5 U.S.C. 801.
Legal Authority: 38 U.S.C. 501(a)
CFR Citation: 38 CFR 3.307; 38 CFR 3.309.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) has proposed to amend its adjudication regulations relating to presumptive service connection to add certain diseases associated with contaminants present in the base water supply at U.S. Marine Corps Base Camp Lejeune (Camp Lejeune), North Carolina, from August 1, 1953 to December 31, 1987. The chemical compounds involved have been associated by various scientific organizations with the development of certain diseases. The proposed rule would establish that veterans, former reservists, and former National Guard members, who served at Camp Lejeune during this period, and who have been diagnosed with any of nine associated diseases, are presumed to have a service-connected disability for purposes of entitlement to VA benefits. In addition, VA would establish a presumption that these individuals were disabled during the relevant period of service, thus establishing active military service for benefit purposes. Under this presumption, affected former reservists and National Guard members have veteran status for purposes of entitlement to some VA benefits. This amendment implements a decision by the Secretary of Veterans Affairs that service connection on a presumptive basis is warranted for claimants who served at Camp Lejeune and later develop certain diseases. VA plans to finalize this proposal after considering public comments.
Statement of Need: VA is responding to health concerns based on potentially service-connected exposure to contaminants in the drinking water at Camp Lejeune. Environmental Protection Agency standards came out in the early 1980s. In 1982, the Marine Corps discovered elevated levels of the VOCs in two of the eight on-base water supply systems at Camp Lejeune. These water systems served housing, administrative, and recreational facilities, as well as the base hospital.

VA

106. • Revise and Streamline VA Acquisition Regulation To Adhere to Federal Acquisition Regulation Principles VAAR Case 2014–V004 (Parts 811, 832)

Priority: Other Significant.
Legal Authority: 40 U.S.C. 121(c); 48 CFR 1.3
CFR Citation: 48 CFR 801; 48 CFR 811; 48 CFR 832; 48 CFR 852.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) is proposing to amend its VA Acquisition Regulation (VAAR) to update the VAAR to current FAR requirements, thresholds, definitions, and titles; it provides new definitions, updated VA titles and offices; it corrects inconsistencies, removes redundancies and duplicate material already covered by the FAR; it deletes outdated material or information and appropriately renumbers VAAR text and clauses and provisions where required to comport with FAR format, numbering and arrangement; and, it provides VA acquisition regulations necessary to implement FAR policies and procedures within VA, as well as additional policies, procedures, solicitation provisions, or contract clauses that supplement the FAR to satisfy VA mission needs.
Statement of Need: Included in the proposed changes that are needed are removing a significant portion of subpart 811.1, Selecting and Developing Requirements Documents, as it includes information that is redundant to the FAR. In addition, we propose to add a new section to implement the Office of Management and Budget's (OMB) Memorandum M–11–32, dated September 14, 2011, and to encourage making payments to small business contractors within 15 days of receipt of invoice.

VA

107. • Revise and Streamline VA Acquisition Regulation To Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V002, Parts 816, 828)

Priority: Other Significant.
Legal Authority: 40 U.S.C. 121(c); 48 CFR 1.3
CFR Citation: 48 CFR 816; 48 CFR 828; 48 CFR 852.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) is proposing to amend its VA Acquisition Regulation (VAAR) to update the VAAR to current FAR requirements, thresholds, definitions, and titles; it provides new definitions, updated VA titles and offices; it corrects

inconsistencies, removes redundancies and duplicate material already covered by the FAR; it deletes outdated material or information and appropriately renumbers VAAR text and clauses and provisions where required to comport with FAR format, numbering and arrangement; and, it provides VAARs necessary to implement FAR policies and procedures within VA, as well as additional policies, procedures, solicitation provisions, or contract clauses that supplement the FAR to satisfy VA mission needs. This proposed rule revises VAAR parts 816 and 828, and as a result of these changes revises small portions of VAAR part 852 (Solicitation provisions and contract clauses), as appropriate.

Statement of Need: The proposed needed changes include adding a section on consignment agreements which defines and describes the consignment agreement acquisition method used for satisfying the need for immediate and on-going requirements. We propose to remove the section, Letters of Availability, as that procurement method is no longer in use in VA. Also, we propose to revise the section, Insurance Under Fixed-Price Contracts, to clarify the provision prescription for when insurance is required for solicitations when utilizing term or continuing fixed priced contracts for ambulance, automobile and aircraft service.

VA

Final Rule Stage

108. Schedule for Rating Disabilities: The Hematologic and Lymphatic Systems

Priority: Other Significant.

Legal Authority: 38 U.S.C. 1155

CFR Citation: 38 CFR 4.117.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) proposes to amend the portion of the VA Schedule for Rating Disabilities (Rating Schedule) that addresses the hematologic and lymphatic systems. The intended effect of this change is to incorporate medical advances that have occurred since the last review, update medical terminology, add medical conditions not currently in the Rating Schedule, and refine criteria for further clarity and ease of rater application.

Statement of Need: VA is updating its Schedule for Rating Disabilities (VASRD, or Rating Schedule) to better reflect modern medicine. The VASRD, which is part 4 of title 38, Code of Federal Regulations, governs how claims processors evaluate the severity of disabilities. While VA has routinely updated parts of the VASRD, this proposal is the first time VA is working to update the entire VASRD since 1945. In 2009, a formal project management plan was created to outline how to update the VASRD. A working group of specialized physicians (VA and non-VA), stakeholders, and claims processors reviews each of the 15 body systems and provides analysis to assist VA in developing updates. The public has 60 days to provide VA with comments. VA will introduce the proposed updates to the VASRD incrementally and is committed to an update of the entire VASRD.

110. Fiduciary Activities

Priority: Other Significant.
Legal Authority: 38 U.S.C. 501; 38 U.S.C. 55; 38 U.S.C. 61; 38 U.S.C. 5502; 38 U.S.C. 5506–5510; 38 U.S.C. 6101; 38 U.S.C. 6106–6108; 38 U.S.C. 512; 38 U.S.C. 5301; 38 U.S.C. 5711; 38 U.S.C. 5504
CFR Citation: 38 CFR 13.10 to 13.600; 38 CFR 3.850 to 3.857; 38 CFR 3.353; 38 CFR 3.401, 3.403; 38 CFR 3.452 ; 38 CFR 3.500, 3.501.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) proposed to amend its fiduciary program regulations, which govern the oversight of beneficiaries who, because of injury, disease, the infirmities of advanced age, or minority, are unable to manage their VA benefits and the appointment and oversight of fiduciaries for these vulnerable beneficiaries. The proposed amendments would update and reorganize regulations consistent with current law, VA policies and procedures, and VA's reorganization of its fiduciary activities. They would also clarify the rights of beneficiaries in the program and the roles of VA and fiduciaries in ensuring that VA benefits are managed in the best interest of beneficiaries and their dependents.
Statement of Need: This final rule would amend VA fiduciary regulations, 38 CFR part 13, and removes 3.850 through 3.857 pertaining to fiduciary matters, from part 3. This amendment would implement the statutory provisions of 38 U.S.C. 55 and 61, reflect current VA policies, and prescribe the rights of beneficiaries and the roles of VA and fiduciaries in the fiduciary program.

111. Per Diem Paid to States for Care of Eligible Veterans in State Homes

Priority: Other Significant
Legal Authority: 38 U.S.C. 101, 501 and 1710; 38 U.S.C. 1741 to 1743; 38 U.S.C. 1745; 38 U.S.C. 7104 and 7105; 42 U.S.C. 1395(cc)
CFR Citation: 38 CFR 51.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) proposed to reorganize, update (based on revisions to statutory authority), and clarify its regulations that govern paying per diem to State homes providing nursing home and adult day health care to eligible veterans. The reorganization will improve consistency and clarity throughout these State home programs. We believe that these proposed regulations will clarify current law and policy, which should improve and simplify the payment of per diem to State homes, and encourage participation in these programs. VA plans to finalize this proposal after considering public comments.
Statement of Need: The proposed reorganization would improve consistency and clarity throughout these State home programs. Currently, we require States to operate these programs exclusively using a medical supervision model. We expect that these liberalizing changes will result in an increase in the number of States that have adult day health care programs. Moreover, we proposed to eliminate the regulations governing per diem for State home hospitals because there are no longer any State home hospitals.
Summary of Legal Basis: 38 U.S.C. 101, 501, 1710, 1741 to 1743, 1745, 7104, 7105, and 42 U.S.C. 1395(cc).

VA

112. Schedule for Rating Disabilities; Dental and Oral Conditions

Priority: Other Significant.
Legal Authority: 38 U.S.C. 1155
CFR Citation: 38 CFR 4.150.
Legal Deadline: None.
Abstract: The Department of Veterans Affairs (VA) proposes to amend the portion of the VA Schedule for Rating Disabilities (VASRD or rating schedule) that addresses dental and oral conditions. The purpose of these changes is to incorporate medical advances that have occurred since the last review, update current medical terminology, and provide clear evaluation criteria for application of this portion of the rating schedule. The proposed rule reflects advances in medical knowledge, recommendations from the Dental and Oral Conditions Work Group (''Work Group''), which is comprised of subject matter experts from both the Veterans Benefits Administration (VBA) and the Veterans Health Administration (VHA), and comments from experts and the public gathered as part of a public forum. The public forum, focusing on revisions to the dental and oral conditions section of the VASRD, was held on January 25–26, 2011.
Statement of Need: VA is updating its Schedule for Rating Disabilities (VASRD, or Rating Schedule) to better reflect modern medicine. The VASRD, which is part 4 of title 38, Code of Federal Regulations, governs how claims processors evaluate the severity of disabilities. While VA has routinely updated parts of the VASRD, this proposal is the first time VA is working to update the entire VASRD since 1945. In 2009, a formal project management plan was created to outline how to update the VASRD. A working group of specialized physicians (VA and non-VA), stakeholders, and claims processors reviews each of the 15 body systems and provides analysis to assist VA in developing updates. The public

has 60 days to provide VA with comments. VA will introduce the proposed updates to the VASRD incrementally and is committed to an update of the entire VASRD.

Legal Authority: 38 U.S.C. 1155

CFR Citation: 38 CFR 4.77; 38 CFR 4.78; 38 CFR 4.79.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) proposes to amend the portion of the VA Schedule for Rating Disabilities (VASRD or rating schedule) that addresses the organs of special sense and schedule of ratings—eye. The purpose of these changes is to incorporate medical advances that have occurred since the last review, update current medical terminology, and provide clear evaluation criteria. The proposed rule reflects advances in medical knowledge, recommendations from the National Academy of Sciences (NAS), and comments from subject matter experts and the public garnered as part of a public forum. The public forum, focusing on revisions to the organs of special sense and schedule of ratings for eye disabilities, was held on January 19–20, 2012.

Statement of Need: VA is updating its Schedule for Rating Disabilities (VASRD, or Rating Schedule) to better reflect modern medicine. The VASRD, which is part 4 of title 38, Code of Federal Regulations, governs how claims processors evaluate the severity of disabilities. RIN: 2900–AP27

VA

116. Tiered Pharmacy Copayments for Medications

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 38 U.S.C. 501

CFR Citation: 38 CFR 17.110.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) adopts as a final rule, with changes, a proposal to amend its regulations concerning copayments charged to certain veterans for medication required on an outpatient basis to treat nonservice-connected conditions. This rulemaking establishes three classes of medications for copayment purposes, identified as Tier 1, Tier 2, and Tier 3. These tiers are distinguished in part based on whether the medications are available from multiple sources or a single source, with some exceptions. Copayment amounts are fixed and would vary depending upon the class of medication. The following medication copayment amounts are applicable on the effective date of this final rule: $5 for a 30-day or less supply of a Tier 1 medication, $8 for a 30-day or less supply of a Tier 2 medication, and $11 for a 30-day or less supply of a Tier 3 medication.

Statement of Need: This rulemaking will result in lower out-of-pocket costs for most veterans, thereby encouraging greater adherence to prescribed medications and reducing the risk of fragmented care that results when veterans use multiple pharmacies to fill their prescriptions.

VA

117. Advanced Practice Registered Nurses

Priority: Other Significant.

Legal Authority: 38 U.S.C. 7301; 38 U.S.C. 7304; 38 U.S.C. 7402; 38 U.S.C. 7403; 38 U.S.C. 501; . . .

CFR Citation: 38 CFR 17.415.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) proposed to amend its medical regulations to permit full practice authority of all VA advanced practice registered nurses (APRNs) when they are acting within the scope of their VA employment. This rulemaking would increase veterans' access to VA health care by expanding the pool of qualified health care professionals who are authorized to provide primary health care and other related health care services to the full extent of their education, training, and certification, without the clinical supervision of physicians. This rule would permit VA to use its health care resources more effectively and in a manner that is consistent with the role of APRNs in the non-VA health care sector, while maintaining the patient-centered, safe, high-quality health care that veterans receive from VA.

Statement of Need: The Department of Veterans Affairs (VA) is proposing to amend its medical regulations to remove barriers to the full practice authority of all VA advanced practice registered nurses (APRNs) when they are acting within the scope of their VA employment. This rulemaking would increase veterans' access to VA health care by expanding the pool of qualified health care professionals who are fully authorized to provide comprehensive primary health care and other related

health care services to veterans. This rule would permit VA to use its health care resources more effectively and in a manner that is consistent with the non-VA health care sector, while maintaining the patient-centered, safe, high quality health care that veterans receive from VA.

VA

118. Expanded Access to Non-VA Care Through The Veterans Choice Program

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: Sec. 101 Pub. L. 113–146, 128 stat. 1754; sec. 4005 Pub. L. 114–41, 129 stat. 443; 38 U.S.C. 501

CFR Citation: 38 CFR 17.1505; 38 CFR 17.1510; 38 CFR 17.1525; 38 CFR 17.1530.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) revised its medical regulations that implement section 101 of the Veterans Access, Choice, and Accountability Act of 2014 (hereafter referred to as ''the Choice Act''), which requires VA to establish a program to furnish hospital care and medical services through eligible non-VA health care providers to eligible veterans who either cannot be seen within the wait-time goals of the Veterans Health Administration (VHA) or who qualify based on their place of residence (hereafter referred to as the ''Veterans Choice Program'' or ''the Program''). These regulatory revisions are required by the most recent amendments to the Choice Act made by the Construction Authorization and Choice Improvement Act of 2014, and by the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015.

Statement of Need: The Department of Veterans Affairs (VA) amends its medical regulations concerning its authority for eligible veterans to receive care from non-VA entities and providers as required by certain new laws. The Veterans Access, Choice, and Accountability Act of 2014 (the Choice Act) directs VA to establish a program to furnish hospital care and medical services through non-VA care health care providers. The Construction Authorization and Choice Improvement Act defined additional criteria to determine that a veteran's travel to a VA medical facility is an unusual or excessive burden, and the Surface Transportation and Veterans Health Care Choice Improvement Act added further requirements.

Summary of Legal Basis: Pub. L. 113–146, section 101 (38 U.S.C. 1701 note); Pub. L. 114–19, section 3(a)(2); Pub. L. 114–41, section 4005.

119. Veterans Employment Pay For Success Grant Program

Priority: Other Significant.

Legal Authority: 38 U.S.C. 501; 38 U.S.C. 3119; 38 U.S.C. 501(a), ch 31; 38 U.S.C. 501(a), ch 18

CFR Citation: 38 CFR 21.440 to 21.449.

Legal Deadline: None.

Abstract: The Department of Veterans Affairs (VA) established a grant program (Veterans Employment Pay for Success (VEPFS)) under the authority of 38 U.S.C. 3119 to award grants to eligible entities to fund projects that are successful in accomplishing employment rehabilitation for Veterans with service-connected disabilities. VA will award grants on the basis of an eligible entity's proposed use of a Pay for Success (PFS) strategy to achieve goals. This interim final rule established regulations for awarding a VEPFS grant, including the general process for awarding the grant, criteria and parameters for evaluating grant applications, priorities related to the award of a grant, and general requirements and guidance for administering a VEPFS grant program.

Statement of Need: There is a need to find new, innovative methods for rehabilitating Veterans with compensable service-connected disabilities who qualify for benefits under VA's Vocational Rehabilitation & Employment (VR&E) program so that they become employable and are ultimately able to obtain and maintain suitable employment. Through Pay For Success (PFS) grant programs, which may serve various Veteran populations including those Veterans with noncompensable service-connected disabilities who do not qualify for VR&E benefits, we hope to obtain information to establish new, innovative methods for rehabilitating Veterans who qualify for VR&E benefits. PFS offers an economical mechanism, which can save taxpayers' money, for exploring the resources and techniques that are available for rehabilitating Veterans with service-connected disabilities with regard to employment.

BILLING CODE 8320–01–P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

FY 2017 Regulatory Plan

Statement of Regulatory and Deregulatory Priorities

The Architectural and Transportation Barriers Compliance Board (Access Board) is an independent federal agency established by section 502 of the Rehabilitation Act (29 U.S.C. 792). The Access Board is responsible for developing accessibility guidelines and standards under various laws to ensure that individuals with disabilities have access to and use of buildings and facilities, transportation vehicles, information and communication technology, and medical diagnostic equipment. Other federal agencies adopt the accessibility guidelines and standards issued by the Access Board as mandatory requirements for entities under their jurisdiction.

This plan highlights five rulemaking priorities for the Access Board in FY 2017: (A) Information and Communication Technology Accessibility Standards and Guidelines; (B) Americans with Disabilities Act (ADA) Accessibility Guidelines for Transportation Vehicles; (C) Medical Diagnostic Equipment Accessibility Standards; (D) Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way; and (E) Passenger Vessel Accessibility Guidelines. The guidelines and standards would enable individuals with disabilities to achieve greater participation in our society, independent living, and economic self-sufficiency, and would promote our national values of equity, human dignity, and fairness, the benefits of which are difficult to quantify.

The rulemakings are summarized below.

A. Information and Communication Technology Accessibility Standards and Guidelines (RIN: 3014–AA37)

This rulemaking would update in a single document the accessibility standards for electronic and information technology covered by section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794d) (Section 508), and the accessibility guidelines for telecommunications equipment and customer premises equipment covered by section 255 of the Communications Act of 1934 (47 U.S.C. 255) (Section 255). Section 508 requires the Federal Acquisition Regulatory Council (FAR Council) and each appropriate federal department or agency to revise their procurement policies and directives no later than 6 months after the Access Board's publication of standards. The FAR Council has incorporated the accessibility standards for electronic and information technology in the Federal Acquisition Regulation (48 CFR Chapter 1). Under section 255, the Federal Communications Commission (FCC) is responsible for issuing implementing regulations and enforcing section 255. The FCC has promulgated enforceable standards (47 CFR parts 6 and 7) implementing section 255 that are consistent with the Access Board's accessibility guidelines for telecommunications equipment and customer premises equipment.

The Access Board's 2010 ANPRM included a proposal to amend section 220 of the Americans with Disabilities Act Accessibility Guidelines (ADAAG), but, based on public comments, the ADAAG proposal is no longer included in this rulemaking and will be pursued separately at a later date.

A.1. *Statement of Need:* The Access Board issued the Electronic and Information Technology Accessibility Standards in 2000 (65 FR 80500, December 21, 2000), and the Telecommunications Act Accessibility Guidelines for telecommunications equipment and customer premises equipment in 1998 (63 FR 5608, February 3, 1998). Since the standards and the guidelines were issued, technology has evolved and changed. Telecommunications products and electronic and information technology products have converged. For example, smartphones can perform many of the same functions as computers. Real time text technologies and video relay services are replacing TTY's (text telephones). The Access Board is updating the standards and guidelines together to address changes in technology and to make them consistent.

A.2. *Summary of the Legal Basis:* Section 508 and Section 255 require the Access Board to develop accessibility standards for electronic and information technology and accessibility guidelines for telecommunications equipment and customer premises equipment, and to periodically review and update the standards and guidelines to reflect technological advances and changes.

Section 508 requires that when developing, procuring, maintaining, or using electronic and information technology, each federal department or agency must ensure, unless an undue burden would be imposed on the department or agency, that electronic and information technology (regardless of the type of medium) allows individuals with disabilities to have access to and use of information and data that is comparable to the access and use of the information and data by others without disabilities. Section 255 requires telecommunications manufacturers to ensure that telecommunications equipment and customer premises equipment are designed, developed, and fabricated to be accessible to and usable by individuals with disabilities when it is readily achievable to do so.

A.3. *Alternatives:* The Access Board established a Telecommunications and Electronic and Information Technology Advisory Committee to recommend changes to the existing standards and guidelines. The advisory committee was comprised of a broad cross-section of stakeholders, including representatives from industry, disability groups, and government agencies from the U.S., the European Commission, Canada, Australia, and Japan. Recognizing the importance of standardization across markets worldwide, the advisory committee coordinated its work with standard-setting bodies in the U.S. and abroad, such as the World Wide Web Consortium (W3C). The Access Board expects that the Information and Communication Technology Standards and Guidelines will have international influences. The Access Board first published Advance Notices of Proposed Rulemaking (ANPRMs) in the **Federal Register** in 2010 and 2011 requesting public comments on draft updates to the standards and guidelines (75 FR 13457, March 22, 2010; and 76 FR 76640, December 8, 2011). The NPRM was published in the **Federal Register** on February 27, 2015 (80 FR 10880). The comment period closed on May 28, 2015. The proposed rule, comments on the proposed rule, records and transcripts from three public hearings, and the preliminary regulatory impact analysis are available in the rulemaking docket at *http://www.regulations.gov/#!docketDetail;D=ATBCB-2015-0002*. The final rule will address and incorporate comments submitted in response to the NPRM.

A.4. *Anticipated Costs and Benefits:* The Access Board worked with a contractor to assess costs and benefits and prepare a preliminary regulatory impact assessment to accompany the NPRM. Baseline cost estimates of complying with Section 508 and Section 255 are made, and incremental costs

due to the revised or new requirements are estimated for federal agencies and telecommunications equipment manufacturers. Anticipated benefits are also numerous, including hard-to quantify benefits such as increased ability for people with disabilities to obtain information and conduct transactions electronically. The Access Board will prepare a final regulatory impact assessment to accompany the final rule, which will incorporate information received from commenters to the NPRM.

B. Americans with Disabilities Act (ADA) Accessibility Guidelines for Transportation Vehicles (RIN: 3014–AA38)

This rulemaking would update the accessibility guidelines for buses, over-the-road buses, and vans covered by the Americans with Disabilities Act (ADA). The accessibility guidelines for other transportation vehicles covered by the ADA, including vehicles operated in fixed guideway systems (*e.g.,* rapid rail, light rail, commuter rail, high speed rail and intercity rail) would be updated in a future rulemaking. The guidelines ensure that transportation vehicles covered by the ADA are readily accessible to and usable by individuals with disabilities. The U.S. Department of Transportation (DOT) has issued enforceable standards (49 CFR part 37) that apply to the acquisition of new, used, and remanufactured transportation vehicles, and the remanufacture of existing transportation vehicles covered by the ADA. DOT is expected to update its standards in a separate rulemaking to be consistent with the updated guidelines.

B.1. *Statement of Need:* The Access Board issued the ADA Accessibility Guidelines for Transportation Vehicles in 1991, and amended the guidelines in 1998 to include additional requirements for over-the-road buses. Level boarding bus systems were introduced in the U.S. after the 1991 guidelines were issued. We are revising the 1991 guidelines to include new requirements for level boarding bus systems, automated stop and route announcements, and other changes.

B.2. *Summary of the Legal Basis:* Title II of the ADA applies to state and local governments and title III of the ADA applies to places of public accommodation operated by private entities. The ADA covers designated public transportation services provided by state and local governments and specified public transportation services provided by private entities that are primarily engaged in the business of transporting people and whose operations affect commerce. (See 42 U.S.C. 12141 to 12147 and 12184.) Bus rapid transit systems, including level boarding bus systems, that provide public transportation services, are covered by the ADA.

The Access Board is required by the ADA and the Rehabilitation Act to establish and maintain guidelines for the accessibility standards adopted by DOT for transportation vehicles acquired or manufactured by entities covered by the ADA. Compliance with the new guidelines is not required until DOT revises its accessibility standards for transportation vehicles acquired or remanufactured by entities covered by the ADA to be consistent with the new guidelines.

B.3. *Alternatives:* The Access Board issued a Notice of Proposed Rulemaking to revise the 1991 guidelines for buses, over-the-road buses, and vans in 2010 (75 FR 43748, July 26, 2010). The proposed rule, comments on the proposed rule, transcripts from public hearings and an information meeting, and other related documents are available in the rulemaking docket at *http://www.regulations.gov/#!docketDetail;D=ATBCB-2010-0004*. The final rule will address and incorporate comments submitted in response to the NPRM.

B.4. *Anticipated Costs and Benefits:* In conjunction with the NPRM, the Access Board published a report entitled ''Cost Estimates for Automated Stop and Route Announcements'' (July 2010), which is available on the agency Web site (*www.access-board.gov*) and the rulemaking docket. A final regulatory assessment will be prepared to accompany the final rule. The final regulatory assessment will evaluate estimated incremental costs for new or revised requirements for buses, over-the-road buses, and vans in the final rule, as well as provide a description of qualitative benefits. It is anticipated that this rule will improve access to wheeled transportation vehicles for persons who have mobility disabilities, persons who have difficulty hearing or are deaf, and persons who have difficulty seeing or are blind to make better use of transportation services.

C. Medical Diagnostic Equipment Accessibility Standards (RIN: 3014–AA40)

The Access Board plans to issue a final rule establishing accessibility standards for medical diagnostic equipment used in or in conjunction with medical settings such as physicians' offices, clinics, emergency rooms, and hospitals. The standards will contain minimum technical criteria to ensure that medical diagnostic equipment, including examination tables, examination chairs, weight scales, mammography equipment, and other imaging equipment used by health care providers for diagnostic purposes are accessible to and usable by individuals with disabilities. The Access Board published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** in 2012 (77 FR 6916, February 9, 2012).

C.1. *Statement of Need:* A national survey of a diverse sample of individuals with a wide range of disabilities, including mobility and sensory disabilities, showed that the respondents had difficulty getting on and off examination tables and chairs, radiology equipment and weight scales, and experienced problems with physical comfort, safety and communication. Focus group studies of individuals with disabilities also provided information on barriers that affect the accessibility and usability of various types of medical diagnostic equipment. The national survey and focus group studies are discussed in the NPRM.

C.2. *Summary of the Legal Basis:* Section 4203 of the Patient Protection and Affordable Care Act (Pub. L. 111–148, 124 Stat. 570) amended title V of the Rehabilitation Act, which establishes rights and protections for individuals with disabilities, by adding section 510 to the Rehabilitation Act (29 U.S.C. 794f) (Section 510). Section 510 requires the Access Board, in consultation with the Commissioner of the Food and Drug Administration (FDA), to develop standards that contain minimum technical criteria to ensure that medical diagnostic equipment used in or in conjunction with medical settings such as physicians' offices, clinics, emergency rooms, and hospitals are accessible to and usable by individuals with disabilities.

Section 510 does not address who is required to comply with the standards. However, the Americans with Disabilities Act requires health care providers to provide individuals with disabilities full and equal access to their health care services and facilities. The U.S. Department of Justice (DOJ) is responsible for issuing regulations to implement the Americans with Disabilities Act and enforcing the law. The NPRM discusses DOJ activities related to health care providers and medical diagnostic equipment.

C.3. *Alternatives:* The Access Board worked with the FDA and DOJ in developing the standards. The Access Board considered the Association for the Advancement of Medical

Instrumentation's ANSI/AAMI HE 75:2009, ''Human factors engineering-Design of medical devices,'' which includes recommended practices to provide accessibility for individuals with disabilities. The Access Board also established a Medical Diagnostic Equipment Accessibility Standards Advisory Committee that included representatives from the disability community and manufacturers of medical diagnostic equipment to make recommendations on issues raised in public comments and responses to questions in the NPRM. The Advisory Committee report, completed in December 2013, is available at *http://www.access-board.gov/guidelines-and-standards/health-care/about-this-rulemaking/advisory-committee-final-report*. The final rule will be based recommendations of the advisory committee, and will also address and incorporate comments submitted in response to the NPRM.

C.4. *Anticipated Costs and Benefits:* In conjunction with the NPRM, the Access Board published a preliminary regulatory assessment of the proposed MDE standards. The Access Board is working on a final regulatory assessment, which will evaluate the incremental costs and benefits of the final rule from quantitative and qualitative perspectives as information permits. It is anticipated that the final MDE standards will address many of the barriers that have been identified as affecting the accessibility and usability of diagnostic equipment by individuals with disabilities. The standards aim to facilitate independent transfers by individuals with disabilities onto and off of diagnostic equipment, and enable them to maintain their independence, confidence, and dignity, lessening the need for health care personnel to assist individuals with disabilities when transferring on and off of diagnostic equipment. The standards also are expected to improve the quality of health care for individuals with disabilities and ensure that they receive examinations, diagnostic procedures, and other health care services equivalent to those received by individuals without disabilities.

D. Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (RIN: 3014–AA26)

The rulemaking would establish accessibility guidelines to ensure that sidewalks and pedestrian facilities in the public right-of-way are accessible to and usable by individuals with disabilities. A Supplemental Notice of Proposed Rulemaking consolidated this rulemaking with RIN 3014–AA41; accessibility guidelines for shared use paths (which are multi-use paths designed primarily for use by bicyclists and pedestrians—including persons with disabilities—for transportation and recreation purposes). The U.S. Department of Justice, U.S. Department of Transportation, and other federal agencies are expected to adopt the accessibility guidelines for pedestrian facilities in the public right-of way and for shared use paths, as enforceable standards in separate rulemakings for the construction and alteration of facilities covered by the Americans with Disabilities Act, section 504 of the Rehabilitation Act, and the Architectural Barriers Act.

D.1. *Statement of Need:* While the Access Board has issued accessibility guidelines for the design, construction, and alteration of buildings and facilities covered by the Americans with Disabilities Act (ADA) and the Architectural Barriers Act (ABA) (36 CFR part 1191), these guidelines were developed primarily for buildings and facilities on sites. Some of the provisions in these guidelines can be readily applied to pedestrian facilities in the public right-of-way such as curb ramps. However, other provisions need to be adapted or new provisions developed for pedestrian facilities that are built in the public right-of-way as well as shared use paths.

D.2. *Summary of the Legal Basis:* Section 502(b)(3) of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 792(b)(3), requires the Access Board to establish and maintain minimum guidelines for the standards issued by other agencies pursuant to the ADA and ABA. In addition, section 504 of the ADA, 42 U.S.C. 12204, required the Access Board to issue accessibility guidelines for buildings and facilities covered by that law.

D.3. *Alternatives:* The Access Board established a Public Rights-of-Way Access Advisory Committee to make recommendations for the guidelines. The advisory committee was comprised of a broad cross-section of stakeholders, including representatives of state and local government agencies responsible for constructing facilities in the public right-of-way, transportation engineers, disability groups, and bicycling and pedestrian organizations. The Access Board released two drafts of the guidelines for public comment, an NPRM (76 FR 44664, July 11, 2011) based on the advisory committee report and public comments on the draft guidelines, and a supplemental notice of proposed rulemaking (SNPRM) regarding shared use paths (78 FR 10110, February 13, 2013). The final rule will address and incorporate comments submitted in response to the NPRM and SNPRM.

D.4. *Anticipated Costs and Benefits:* In conjunction with the NPRM, the Access Board published a preliminary regulatory assessment of the proposed accessibility guidelines for pedestrian facilities in the public right-of-way, which is available in the rulemaking docket at *http://www.regulations.gov/#!docketDetail;D=ATBCB-2011-0004*. The Access Board identified four provisions in the NPRM that were expected to have more than minimal monetary impacts on state and local governments. Three of these four requirements are related to: (1) Detectable warning surfaces on newly constructed and altered curb ramps and blended transitions at pedestrian street crossings; (2) accessible pedestrian signals and pushbuttons when pedestrian signals are newly installed or replaced at signalized intersections; and (3) pedestrian activated signals at roundabouts with multi-lane pedestrian crossings. In addition, the fourth requirement for provision of a 2 percent maximum cross slope on pedestrian access routes within pedestrian street crossings with yield or stop control was estimated to have more than minimal monetary impacts on state and local governments when constructing roadways with pedestrian crossings in hilly areas. The NPRM included questions requesting information to assess the costs and benefits of these provisions, as well as other provisions that may have cost impacts. The Access Board will prepare a final regulatory impact assessment to accompany the final rule based on information provided in response to questions in the NPRM and other sources.

E. Americans with Disabilities Act (ADA) Accessibility Guidelines for Passenger Vessels (RIN: 3014–AA11)

The rulemaking would establish accessibility guidelines to ensure that newly constructed and altered passenger vessels covered by the Americans with Disabilities Act (ADA) are accessible to and usable by individuals with disabilities. The U.S. Department of Transportation and U.S. Department of Justice are expected to adopt the guidelines as enforceable standards in separate rulemakings for the construction and alteration of passenger vessels covered by the ADA.

E.1. *Statement of Need:* Section 504 of the ADA requires the Access Board to issue accessibility guidelines for the construction and alteration of passenger vessels covered by the law to ensure that the vessels are readily accessible to

and usable by individuals with disabilities (42 U.S.C. 12204).

E.2. *Summary of the Legal Basis:* Title II of the ADA applies to state and local governments and title III of the ADA applies to places of public accommodation operated by private entities. The ADA covers designated public transportation services provided by state and local governments and specified public transportation services provided by private entities that are primarily engaged in the business of transporting people and whose operations affect commerce. (See 42 U.S.C. 12141 to 12147 and 12184.)

Titles II and III of the ADA require the DOT and DOJ to issue accessibility standards for the construction and alteration of passenger vessels covered by the law that are consistent with the guidelines issued by the Access Board. (See 42 U.S.C. 12134(c), 12149(b), 12186(c).) The DOT has reserved a subpart in its ADA regulations for accessibility standards for passenger vessels in anticipation of the Access Board issuing these guidelines. (See 49 CFR part 39, subpart E.) Once DOT and DOJ issue accessibility standards for the construction and alteration of passenger vessels covered by the ADA, vessel owners and operators are then required to comply with the standards.

E.3. *Alternatives:* In developing the proposed accessibility guidelines, the Access Board has received and considered extensive input from passenger vessel owners and operators, individuals with disabilities, and other interested parties for more than a decade. The Access Board convened an advisory committee comprised of passenger vessel industry trade groups, passenger vessel owners and operators, disability advocacy groups, and state and local government agencies to advise how to develop the accessibility guidelines. The committee submitted its report to the Access Board in 2000. In addition, over the years, the Access Board issued an ANPRM and three versions of draft accessibility guidelines and conducted in-depth case studies on various passenger vessels. The Access Board solicited and analyzed public comments on these documents in developing the proposed guidelines and regulatory impact analysis. All the published documents together with public comments are available at: *http://www.access-board.gov*.

E.4. *Anticipated Costs and Benefits:* The proposed guidelines would address the discriminatory effects of architectural, transportation, and communication barriers encountered by individuals with disabilities on passenger vessels. The estimated compliance costs for certain types of vessels include: (1) The incremental impact of constructing a vessel in compliance with the guidelines; and (2) any additional costs attributable to the operation and maintenance of accessible features. For certain large cruise ships, the compliance costs would include loss of guest rooms and gross revenues attributed to a proposed requirement for a minimum number of guest rooms that provide mobility features. The proposed guidelines would significantly benefit individuals with disabilities by affording them equal opportunity to travel on passenger vessels for employment, transportation, public accommodation, and leisure. Other benefits, which are difficult to quantify, include equity, human dignity, and fairness values.

BILLING CODE 8150–01–P

ENVIRONMENTAL PROTECTION AGENCY (EPA)

Statement of Priorities

Overview

For more than 40 years, the U.S. Environmental Protection Agency (EPA) has worked to protect people's health and the environment. By taking advantage of the best thinking, the newest technologies and the most cost-effective, sustainable solutions, EPA and its Federal, tribal, State, local, and community partners have made important progress to address pollution where people live, work, play, and learn. From cleaning up contaminated waste sites to reducing greenhouse gases, mercury and other air emissions, to investing in water and wastewater treatment, the American people have seen and felt tangible benefits to their health and surroundings. Efforts to reduce air pollution alone have produced hundreds of billions of dollars in benefits in the United States.

To keep up this momentum in the coming year, EPA will use regulatory authorities, along with grant- and incentive-based programs, technical and compliance assistance and tools, research and educational initiatives to address the priorities set forth in EPA' Strategic Plan:

- Addressing Climate Change and Improving Air Quality
- Protecting America's Waters
- Cleaning up Communities and Advancing Sustainable Development
- Ensuring the Safety of Chemicals and Preventing Pollution
- Protecting Human Health and the Environment by Enforcing Laws and Assuring Compliance

All of this work will be undertaken with a strong commitment to science, law and transparency.

Highlights of EPA'S Regulatory Plan

EPA's more than 40 years of protecting public health and the environment demonstrates our nation's commitment to reducing pollution that can threaten the air we breathe, the water we use and the communities we live in. This Regulatory Plan contains information on some of our most important upcoming regulatory actions. As always, our Semiannual Regulatory Agenda contains information on a broader spectrum of EPA's upcoming regulatory actions.

Guiding Priorities

The EPA's success depends on supporting innovation and creativity in both what we do and how we do it. To guide the agency's efforts, the Agency has established several guiding priorities. These priorities are enumerated in the list that follows, along with recent progress and future objectives for each.

Goal 1: Addressing Climate Change and Improving Air Quality

The Agency will continue to deploy existing regulatory tools where appropriate and warranted. Using the Clean Air Act, EPA will continue to develop standards, as appropriate, for both mobile and stationary sources, to reduce emissions of greenhouse gases and other pollutants, including sulfur dioxide, particulate matter, nitrogen oxides, and toxics.

Greenhouse Gas Emissions from Power Plants. As part of the President's Climate Action Plan, in July 2015, the EPA promulgated the Clean Power Plan final rules setting guidelines for states to follow in reducing carbon emissions from existing power plants, as well as finalizing emission standards for new plants. On February 9, 2016, the Supreme Court stayed implementation of these standards and guidelines pending judicial review. The Court's decision was not on the merits of the rules.

For the states that choose to continue to work to cut carbon pollution from power plants and seek the Agency's guidance and assistance, EPA will continue to provide tools and support, including issuing Model Trading Rules as a tool for states to use in developing plans that achieve carbon reductions. These Model Trading Rules were proposed in July 2015, and will be finalized in late 2016. The Clean Energy Incentive Program (CEIP), which was

proposed in 2016, will be finalized in 2017.

Renewable Fuels. The Clean Air Act requires EPA to promulgate regulations that specify the annual volume requirements for renewable fuels under the Renewable Fuel Standard (RFS) program. Standards are to be set for four different categories of renewable fuels: Cellulosic biofuel, biomass based diesel (BBD), advanced biofuel, and total renewable fuel. In May of 2016, EPA issued a proposal to set the applicable volumes for all renewable fuel categories for 2017 and the BBD standard for 2018. EPA will finalize that rule in late 2016. EPA also intends to propose RFS volume requirements for 2018 and the 2019 BBD standard in May of 2017. Also in 2016, EPA proposed to make numerous changes to promote the production of renewable fuels and clarify certain requirements under the RFS program. When finalized in early 2017, that action will provide substantial additional flexibility for ethanol flex fuel producers that accommodate current market realities while continuing to ensure that flex fuel quality is consistent with controlling pollution when used in flexible fuel vehicles.

Implementing Air Quality Standards. The National Ambient Air Quality Standards (NAAQS) for ozone were strengthened in 2015, and EPA is developing an implementation rule to help states implement those standards. This rule, which will also cover ozone classifications, will be proposed late in 2016 and finalized in 2017.

Emissions from Aircraft. In 2017, EPA plans to issue a proposed finding, under Clean Air Act section 231, to determine whether lead emissions from aircraft operating on leaded fuel cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare.

Radiation Protection. In the fall of 2016, EPA will issue final rules to protect public health, safety and the environment from radiological hazards associated with uranium processing. The first of these rules, under Clean Air Act section 112, establishes standards or management practices to limit air emissions of radon from uranium byproduct material or tailings. The second rule, under the Uranium Mill Tailings Radiation Control Act, establishes groundwater restoration and monitoring requirements for uranium in-situ recovery, which is now the dominant form of uranium recovery in the United States.

Goal 2: Protecting America's Waters

Despite considerable progress, America's waters remain at risk. Water quality protection programs face complex challenges: An aging national water infrastructure, widespread nutrient pollution, stormwater runoff and threats to drinking water safety. These challenges require both traditional and innovative strategies.

Lead and Copper NPDWR Revisions (LCR). The Lead and Copper Rule, promulgated in 1991, has resulted in substantial reductions in lead in drinking water. This critically important rule, however, is now 25 years old and is in need of substantive revisions to strengthen the rule's protections for public health. EPA has conducted extensive engagement with state, tribal and local government representatives, stakeholder groups and the public to obtain input to inform revisions to the LCR. Most recently, EPA received comprehensive recommendations from the National Drinking Water Advisory Council (NDWAC) and other concerned stakeholders on potential steps to strengthen the LCR.

Credit Assistance for Water Infrastructure Projects. EPA plans to issue an interim final rule that establishes the guidelines for a new credit assistance program for water infrastructure projects and the process by which EPA will administer such credit assistance. The rule will implement a new program authorized under the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA). WIFIA authorizes EPA to provide secured (direct) loans and loan guarantees to eligible water infrastructure projects. The interim final rule primarily clarifies statutory language and establishes approaches to specific procedural issues left to EPA's discretion. Once projects are selected by the EPA Administrator, individual credit agreements will be developed through negotiations between the project sponsors and EPA.

Federal Baseline Water Quality Standards for Indian Reservations. EPA published an advanced notice of proposed rulemaking (ANPRM) requesting public comment on the establishment of baseline water quality standards under the Clean Water Act for waters on Indian reservations that currently do not have EPA-approved WQS in place to protect water quality. The ANPRM provides information on EPA's current thinking and is a way to get specific and clear guidance from the full range of tribal governments and stakeholders. EPA will consider comments received on this ANPRM prior to determining whether to develop a proposed rule on this topic. This ANPRM effort is one of several initiatives the EPA is undertaking to improve how we work with tribes to ensure that they have access to clean and safe waters.

Goal 3: Cleaning Up Communities and Advancing Sustainable Development

EPA's regulatory program recognizes the progress in environmental protection and incorporates new technologies and approaches that allow us to provide for an environmentally sustainable future more efficiently and effectively.

CERCLA Section 108(b)—Hardrock Mining. Section 108(b) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, establishes certain authorities concerning financial responsibility requirements. The Agency has identified classes of facilities within the hardrock mining industry as those for which financial responsibility requirements will be first developed. (EPA's 108(b) rules will address the degree and duration of risks associated with aspects of hazardous substance management at hardrock mining and mineral processing facilities.) EPA intends for these regulations to help ensure that businesses make financial arrangements to address risks from hazardous substances at their sites, and to encourage businesses to improve their management of hazardous substances.

Modernization of the Accidental Release Prevention Regulations under Clean Air Act. On August 1, 2013, President Obama signed Executive Order 13650, entitled *Improving Chemical Facility Safety and Security* (EO 13650 or the EO). This Executive Order 13650 directs the federal government to carry out a number of tasks whose overall aim is to prevent chemical accidents. Among the tasks discussed, the Executive order directs agencies to consider possible changes to existing chemical safety regulations, such as the EPA's Risk Management Plan (RMP) regulation (40 CFR part 68).

Both EPA and the Occupational Safety & Health Administration (OSHA) had previously issued regulations, as required by the Clean Air Act Amendments of 1990, in response to a number of catastrophic chemical accidents occurring worldwide that had resulted in public and worker fatalities and injuries, environmental damage, and other community impacts. OSHA published the Process Safety Management (PSM) standard (29 CFR

part 1910.119) in 1992. EPA modeled the RMP regulation after OSHA's PSM standard and published the RMP rule in two stages: A list of regulated substances and threshold quantities in 1994; and the RMP final regulation, containing risk management requirements, in 1996. Both the OSHA PSM standard and the EPA RMP regulation aim to prevent, or minimize the consequences of, accidental chemical releases to workers and the community.

The EPA is considering modifications to the current RMP regulations in order to (1) reduce the likelihood and severity of accidental releases, (2) improve emergency response when those releases occur, and (3) enhance state and local emergency preparedness and response in an effort to mitigate the effects of accidents.

Goal 4: Ensuring the Safety of Chemicals and Preventing Pollution

One of EPA's highest priorities is to make significant progress in assuring the safety of chemicals. Using sound science as a compass, EPA protects individuals, families, and the environment from potential risks of pesticides and other chemicals. In its implementation of these programs, EPA uses several different statutory authorities, including the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), the Federal Food, Drug and Cosmetic Act (FFDCA), the Toxic Substances Control Act (TSCA) and the Pollution Prevention Act (PPA), as well as collaborative and voluntary activities. In FY 2017, the Agency will continue to satisfy its overall directives under these authorities and highlights the following actions in this Regulatory Plan:

Frank R. Lautenberg Chemical Safety for the 21st Century Act Implementation. Enacted on June 22, 2016, the Frank R. Lautenberg Chemical Safety for the 21st Century Act amended TSCA with immediate effect. The Agency is working aggressively to carry out the requirements of the new law. Among other things, EPA is now required to evaluate existing chemicals purely on the basis of the health risks they pose—including risks to vulnerable groups like children and the elderly, and to workers who use chemicals daily as part of their jobs—and then take steps to eliminate any unreasonable risks that are found. Based on efforts initiated prior to the enactment of the new law, EPA plans to propose risk management actions under TSCA section 6 related to several specific uses of trichloroethylene (TCE), methylene chloride, and n-methylpyrrolidone (NMP) to protect the human health and the environment from the risks presented by those chemicals.

In addition, EPA is now required to systematically prioritize and evaluate chemicals on a specific and enforceable schedule. Within a few years, EPA's chemicals program will have to assess at least 20 chemicals at a time, beginning another chemical review as soon as one is completed. The new law provides a consistent source of funding for EPA to carry out its new responsibilities. EPA will now be able to collect up to $25 million a year in user fees from chemical manufacturers and processers, supplemented by Congressional budgeting, to pay for these improvements. The Agency initiated stakeholder discussions in August 2016 and is developing regulations that will identify how EPA will carry out the various provisions of the new law.

Lead-Based Paint Program. EPA is developing a final rule that would implement several amendments to the EPA lead-based paint program that would improve efficiencies and save resources for those involved. EPA proposed changes in 2014 to the EPA lead-based paint program that would, among other things, amend the renovation, repair and painting rule by removing the requirement for hands-on refresher training for renovators so that they can take the refresher course online and without the need to travel to a training facility for the hands-on portion. EPA also proposed to amend the lead-based paint abatement program by removing the requirement for firms, training providers and individuals to apply for and be certified or accredited in each EPA-administered jurisdiction where they work (*i.e.,* state, tribe or territory where EPA runs the abatement program). In addition, as directed by TSCA section 402(c)(3), EPA is developing a proposed rule to address renovation or remodeling activities that create lead-based paint hazards in pre-1978 public buildings and commercial buildings. EPA previously issued a final rule to address lead-based paint hazards created by these activities in target housing and child-occupied facilities.

Reassessment of PCB Use Authorizations. When enacted in 1978, TSCA banned the manufacture, processing, distribution in commerce, and use of polychlorinated biphenyls (PCBs), except when uses would pose no unreasonable risk of injury to health or the environment. EPA is reassessing certain ongoing, authorized uses of PCBs that were established by regulation in 1979, including the use, distribution in commerce, marking and storage for reuse of liquid PCBs in electric equipment, to determine whether those authorized uses still meet TSCA's ''no unreasonable risk'' standard. EPA plans to propose the revocation or revision of any PCBs use authorizations included in this reassessment that no longer meet the TSCA standard, with an initial emphasis on PCB-containing fluorescent ballasts in schools and daycares.

Strengthening Pesticide Applicator Safety. As part of EPA's effort to enhance the pesticide worker safety program, the Agency is also developing final revisions to the existing regulation concerning the certification of applicators of restricted-use pesticides. This rulemaking is intended to ensure that the federal certification standards adequately protect applicators, the public and the environment from potential risks associated with use of restricted use pesticides. The rule changes are intended to improve the competency of certified applicators of restricted use pesticides, increase protection for noncertified applicators of restricted use pesticides operating under the direct supervision of a certified applicator through enhanced pesticide safety training and standards for supervision of noncertified applicators, and establish a minimum age requirement for such noncertified applicators. Also, in keeping with EPA's commitment to work more closely with tribal governments to strengthen environmental protection in Indian Country, certain rule changes are intended to provide more practical options for establishing certification programs in Indian Country.

Evaluating Pesticide Risks to Bees and Other Pollinators. As part of the efforts outlined in the ''National Strategy to Promote the Health of Honey Bees and Other Pollinators,'' EPA is working to update its pesticide data requirements to provide the Agency with data needed to determine the potential exposure and effects of pesticides on bees and other important non-target insect pollinators. Pollinator insects are ecologically and economically important. Recognizing heightened concerns for honey bees due to pollinator declines and that the science has now evolved to where additional toxicity and exposure protocols are available, EPA issued interim study guidance for bees in 2011. EPA developed finalized guidance in 2014 on the conduct of exposure and effect studies used to characterize the potential risk of pesticides to bees. The development and implementation of updates data requirements is intended to provide the information the Agency needs to evaluate whether a proposed or existing use of a pesticide may have an unreasonable adverse effect on these

important insects and support pesticide registration decisions under FIFRA.

Goal 5: Protecting Human Health and the Environment by Enforcing Laws and Assuring Compliance

Today's pollution challenges require a modern approach to compliance, taking advantage of new tools and approaches while strengthening vigorous enforcement of environmental laws. Next Generation Compliance is EPA's integrated strategy to do that, designed to bring together the best thinking from inside and outside EPA.

EPA's Next Generation Compliance consists of five interconnected components, each designed to improve the effectiveness of our compliance program:

- Design regulations and permits that are easier to implement, with a goal of improved compliance and environmental outcomes.
- Use and promote advanced emissions/pollutant detection technology so that regulated entities, the government, and the public can more easily see pollutant discharges, environmental conditions, and noncompliance.
- Shift toward electronic reporting to help make environmental reporting more accurate, complete, and efficient while helping EPA and co-regulators better manage information, improve effectiveness and transparency.
- Expand transparency by making information more accessible to the public.
- Develop and use innovative enforcement approaches (*e.g.,* data analytics and targeting) to achieve more widespread compliance.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), the following EPA actions have been identified as associated with retrospective review and analysis in the Agency's final plan for retrospective review of regulations, or one of its subsequent updates. Some of the entries on this list may not appear in *The Regulatory Plan* but appear in EPA's semiannual regulatory agenda. These rulemakings can also be found on *Regulations.gov*. EPA's final agency plan can be found at: *http://www.epa.gov/regdarrt/retrospective/*.

Rulemaking title	Regulatory Identifier No. (RIN)
New Source Performance Standards for Grain Elevators—Amendments	2060–AP06
Treatment of Data Influenced by Exceptional Events—Rule Revisions	2060–AS02
Public Notice Provisions in CAA Permitting Programs	2060–AS59

Pesticides; Certification of Pesticide Applicators	2070–AJ20

2016—Aggregation of Benefits and Costs From Monetized Rules Reported in the Regulatory Plan

Rule	Base year	Benefits (millions $/year)		Costs (millions $/year)		Net benefits (millions $/year)	
		Low	High	Low	High	Low	High
Discount Rate = 3%							
Modernization of the Accidental Release Prevention Regulations Under Clean Air Act	2014	$274.7	$274.7	$158.3	$158.3	$116.4	$116.4
Health and Environmental Standards for Uranium and Thorium Mill Tailings (40 CFR 192): Revisions [1]	2014	Not Monetized	Not Monetized	6.6	13.4	Not Computed	Not Computed
Technical and Regulatory Support to Develop the NESHAP Subpart W Standard for Radon Emissions for Radon Emissions From Operating Uranium Mills (40 CFR 61.250) [2]	2014	Not Monetized	Not Monetized	15.8	17.9	Not Computed	Not Computed
Pesticides; Certification of Pesticide Applicators	2014	20.8	21.2	48.8	48.8	(28.0)	(27.6)
Aggregate Estimates [4]	2014	295.5	295.9	229.6	238.4	88.4	88.8
Discount Rate = 7%							
Modernization of the Accidental Release Prevention Regulations Under Clean Air Act	2014	274.7	274.7	161.0	161.0	113.7	113.7

2016—AGGREGATION OF BENEFITS AND COSTS FROM MONETIZED RULES REPORTED IN THE REGULATORY PLAN—Continued

Rule	Base year	Benefits (millions $/year)		Costs (millions $/year)		Net benefits (millions $/year)	
		Low	High	Low	High	Low	High
Health and Environmental Standards for Uranium and Thorium Mill Tailings (40 CFR 192): Revisions [1]	2014	Not Monetized	Not Monetized	4.1	8.3	Not Computed	Not Computed
Technical and Regulatory Support to develop the NESHAP Subpart W Standard for Radon Emissions for Radon Emissions From Operating Uranium Mills (40 CFR 61.250) [2]	2014	Not Monetized	Not Monetized	15.8	17.9	Not Computed	Not Computed
Pesticides; Certification of Pesticide Applicators [3]	2014	Not Reported	Not Reported	Not Reported	Not Reported	Not Reported	Not Reported
Aggregate Estimates [4]	2014	274.7	274.7	180.9	187.2	113.7	113.7

[1] National net benefits for Health and Environmental Standards for Uranium and Thorium Mill Tailings (40 CFR 192) Revisions were not computed because most categories of benefits, including health and ecosystem benefits, were not monetized.
[2] The Economic Impact Analysis for the NESHAP Subpart W Standard does not monetize benefits such as the value of reduced cancer risk, so net benefits were not computed.
[3] The Economic Analysis for the Certification of Pesticide Applicators did not estimate annual costs using a 7% discount rate. Using a 7% discount rate is expected to have little effect on annualized costs as most of the costs recur annually.
[4] Aggregate Net Benefits are estimated by summing the column of net benefits reported for each discount rate.

Burden Reduction

As described above, EPA continues to review its existing regulations in an effort to achieve its mission in the most efficient means possible. To this end, the Agency is committed to identifying areas in its regulatory program where significant savings or quantifiable reductions in paperwork burdens might be achieved, as outlined in Executive Orders 13563 and 13610, while protecting public health and our environment.

Rules Expected To Affect Small Entities

By better coordinating small business activities, EPA aims to improve its technical assistance and outreach efforts, minimize burdens to small businesses in its regulations, and simplify small businesses' participation in its voluntary programs. Actions that may affect small entities can be tracked on EPA's Regulatory Development and Retrospective Review Tracker (*http://www.epa.gov/regdarrt/*) at any time. This Plan includes the following rules that may be of particular interest to small entities:

Rulemaking title	Regulatory Identifier No. (RIN)
Financial Responsibility Requirements Under CERCLA Section 108(b) for Classes of Facilities in the Hard Rock Mining Industry.	2050–AG61
Modernization of the Accidental Release Prevention Regulations Under Clean Air Act.	2050–AG82
Trichloroethylene (TCE); Rulemaking Under TSCA Section 6(a); Vapor Degreasing.	2070–AK11
N-Methylpyrrolidone (NMP) and Methylene Chloride; Rulemaking Under TSCA Section 6(a).	2070–AK07
Polychlorinated Biphenyls (PCBs); Reassessment of Use Authorizations for PCBs in Small Capacitors in Fluorescent Light Ballasts in Schools and Daycares.	2070–AK12
National Primary Drinking Water Regulations for Lead and Copper: Regulatory Revisions.	2040–AF15
N-Methylpyrrolidone (NMP) and Methylene Chloride; Rulemaking Under TSCA Section 6(a).	2070–AK07

International Regulatory Cooperation Activities

EPA has considered international regulatory cooperation activities as described in Executive Order 13609 and has identified the following international activity that is anticipated to lead to a significant regulation in the following year:

EPA—OFFICE OF WATER (OW)

Prerule Stage

120. Federal Baseline Water Quality Standards for Indian Reservations

Priority: Other Significant.
Unfunded Mandates: Undetermined.
Legal Authority: 33 U.S.C. 1313(c)(4)(B)
CFR Citation: 40 CFR 131.
Legal Deadline: None.
Abstract: EPA published an advance notice of proposed rulemaking (ANPRM) requesting public comment on the establishment of baseline water quality standards (WQS) under the Clean Water Act (CWA) for waters on Indian reservations that currently do not have EPA-approved WQS in place to protect water quality. EPA will consider comments received on this ANPRM prior to determining whether to develop a proposed rule on this topic. This ANPRM effort is one of several initiatives the EPA is undertaking that recognize the importance of protecting waters on which tribes rely.
Statement of Need: Currently, fewer than 50 of over 300 tribes with

reservations have WQS effective under the CWA. Virtually all of the reservations with existing coverage have WQS established by tribes that have obtained treatment in a manner similar to a state (TAS) under CWA section 518, however, many tribes face obstacles on this pathway to WQS. The resulting gap in EPA-approved WQS in Indian reservation waters is not insignificant. Tribal reservations without CWA-effective WQS account for as much land area and population as the state of North Dakota. Federal baseline WQS would define water quality goals for unprotected reservation waters and serve as the foundation for CWA actions to protect human health and the environment.

Summary of Legal Basis: The CWA establishes the basis for the water quality standards (WQS) regulation and program. CWA section 303 addresses the development of state and authorized tribal WQS that serve the CWA objective for waters of the United States. The core components of WQS are designated uses, water quality criteria that support the uses, and antidegradation requirements. Designated uses establish the environmental objectives for a water body and water quality criteria define the conditions sufficient to achieve those environmental objectives. The antidegradation requirements provide a framework for maintaining and protecting water quality that has already been achieved. The CWA creates a partnership between states and authorized tribes, and EPA, by assigning states and authorized tribes the primary role of adopting WQS (CWA sections 101(b) and 303), and EPA the oversight role of reviewing and approving or disapproving state and authorized tribal WQS (CWA section 303(c)). Absent state or authorized tribal adoption or submission of new or revised WQS, section 303(c)(4)(B) of the CWA gives EPA the authority to determine that new or revised WQS are necessary to meet the requirements of the Act. Once the Administrator makes such a determination, EPA must promptly propose regulations setting forth new or revised WQS for the waters of the United States involved, and must then promulgate such WQS, unless a state or authorized tribe adopts and EPA approves such WQS first.

Alternatives: To Be Determined.

Anticipated Cost and Benefits: To Be Determined.

Risks: To Be Determined.

RIN: 2040–AF62

EPA—OFFICE OF AIR AND RADIATION (OAR)

Proposed Rule Stage

121. Renewables Enhancement and Growth Support Rule

Priority: Other Significant.

Legal Authority: 42 U.S.C. 7429 Clean Air Act

CFR Citation: 40 CFR 80.

Legal Deadline: None.

Abstract: This action proposes to make numerous changes to promote the production of renewable fuels and clarify certain requirements under the RFS program. This action would propose to allow for feedstocks partially converted at a facility other than a renewable fuel production facility to be fully converted at a renewable fuel production facility into finished renewable fuel. These partially converted feedstocks are referred to as biointermediate feedstocks. Further, this action would also propose to add new registration, recordkeeping, and reporting requirements for certain renewable fuel production facilities using carbon capture and storage (CCS) if the EPA were to allow CCS as a lifecycle GHG emissions reduction technology in the context of the RFS program. Additionally, this action also proposes to require obligated parties to report a breakdown of their gasoline, diesel, and heating oil production; provide an additional RIN-generating pathway that is an extension of an existing pathway; and make numerous technical corrections. Finally, this action would implement fuel quality specifications for blends containing 16 to 83 volume percent ethanol. This action would provide substantial additional flexibility for ethanol flex fuel (EFF) producers that accommodate current market realities while continuing to ensure EFF quality is consistent with controlling pollution when used in flexible fuel vehicles.

Statement of Need: This action proposes various changes to our fuel and renewable fuel regulations to remove barriers to the production and use of renewable fuels. First, this action would resolve several outstanding issues and provide clarification on certain Renewable Fuel Standard (RFS) requirements. Second, this action would propose to allow for a feedstock partially converted at one facility (referred to as a biointermediate) to be fully converted into finished renewable fuel at another facility. Finally, this action would provide production flexibilities and carry over gasoline fuel quality standards to gasoline-ethanol blends containing 16 to 83 volume percent ethanol (referred to as ethanol flex fuel (EFF)). The increased flexibility provided by this rule for biointermediates and EFF could result in the increased production and use of renewable fuels in support of the RFS program.

Summary of Legal Basis: Statutory authority for this action comes from Clean Air Act sections 203 to 205, 208, 211, and 301.

Alternatives: This action to proposes to establish fuel quality standards for EFF that are equivalent to those already in place for gasoline. Producers would demonstrate compliance based on their ability to affect fuel quality and certain types of producers would be able to use natural gasoline as a blendstock to produce EFF. Alternatively, EPA also considered a simplified approach that would restrict EFF blendstocks to gasoline, blendstocks for oxygenate blending (BOBs), and denatured fuel ethanol. EPA is seeking comment on this alternative approach.

Anticipated Cost and Benefits: The two main areas where this proposal would have economic impacts are the proposed provisions for EFF and gasoline produced at blender pumps, and the proposed provisions for biointermediates. The proposal would provide significant additional regulatory flexibility, streamlined compliance provisions, and the opportunity for increased biofuel production at reduced cost. The cost savings are anticipated to far outweigh the minor costs imposed for demonstrating compliance. In most cases, the associated costs would only apply to those parties that elect to take advantage of the proposed flexibilities because the potential economic benefits

outweigh the costs. This proposal contains minor additional registration, reporting, and recordkeeping requirements that would apply to some parties in the biofuel production and distribution system that do not take advantage of the proposed flexibilities as well as those that do.

Risks: This proposed rule does not affect the level of protection provided to human health or the environment by applicable air quality standards. This action does not relax the control measures on sources regulated by the fuel programs and RFS regulations and therefore will not cause emissions increases from these sources.

RIN: 2060–AS66

EPA—OAR

122. Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements

Priority: Other Significant.

Legal Authority: 23 U.S.C. 101 42 U.S.C. 7401–7671q

CFR Citation: 40 CFR 50 to 51.

Legal Deadline: None.

Abstract: This proposed rule will address a range of implementation requirements for the 2015 National Ambient Air Quality Standards (NAAQS) for ozone, including the nonattainment area classification system, and the timing of State Implementation Plan (SIP) submissions. It will also discuss and outline relevant guidance on meeting the Clean Air Act's requirements pertaining to attainment demonstrations, reasonable further progress, reasonably available control measures, nonattainment new source review, and emission inventories. Other issues addressed in this proposed rule are the potential revocation of the 2008 ozone NAAQS and anti-backsliding requirements that would apply if the 2008 NAAQS are revoked. The items covered in this rulemaking have been covered in similar rulemakings for two prior 8-hour ozone NAAQS (1997 and 2008).

Statement of Need: This rule is needed to clarify and establish implementation requirements for the 2015 ozone NAAQS, including the nonattainment area classification system, and those elements that states must include in their state implementation plans (SIPs) to bring nonattainment areas into compliance with the 2015 ozone NAAQS. There is no court-ordered deadline for this final rule. However, the CAA requires that EPA promulgate area designations no later than 2 years from the date of promulgation of the revised ozone NAAQS, and this rule is needed to establish the air quality thresholds to classify areas designated nonattainment, in this case by October 1, 2017.

Summary of Legal Basis: The CAA requires states to plan for the attainment and maintenance the NAAQS. EPA establishes implementing regulations that states follow to fulfill these CAA requirements.

Alternatives: The EPA plans to solicit comments on a number of proposals, including nonattainment area classification thresholds, SIP submission requirements for states with nonattainment areas and states in the Ozone Transport Region, milestone compliance demonstrations, plan submission and implementation deadlines for attainment planning and emissions control requirements, flexible new source emissions offsets for preconstruction permitting, clarification of emissions inventory and emissions statement requirements, and state demonstration requirements under CAA section 179B. The rule also includes alternatives for treatment of outstanding state planning requirements for the previous ozone NAAQS.

Anticipated Cost and Benefits: The annual information collection burden for ozone-related state planning averaged over the first 3 years is estimated to be a total of 41,800 labor hours per year at an annual labor cost of $2.5 million (present value) over the 3-year period, or approximately $107,000 per state for the 23 anticipated state respondents. There are no capital or operating and maintenance costs associated with the proposed rule requirements.

Risks: Ozone concentrations that exceed the National Ambient Air Quality Standards (NAAQS) to can cause adverse public health and welfare effects, as discussed in the October 26, 2015 Final Rule for NAAQS for Ozone (80 FR 65292).

EPA—OAR

123. • Renewable Fuel Volume Standards for 2018 and Biomass Based Diesel Volume (BBD) for 2019

Priority: Other Significant.

Legal Authority: Clean Air Act

CFR Citation: 40 CFR 80.

Legal Deadline: None.

Abstract: The Clean Air Act requires EPA to promulgate regulations that specify the annual standards requirements for renewable fuels under the Renewable Fuel Standard (RFS) program. Standards are to be set for four different categories of renewable fuels: Cellulosic biofuel, biomass based diesel (BBD), advanced biofuel, and total renewable fuel. The statute requires the standards be finalized by November 30

of the year prior to the year in which the standards would apply. In the case of biomass based diesel, the statute requires applicable volumes be set no later than 14 months before the year for which the requirements would apply.

Statement of Need: The Clean Air Act Section 211(o) requires the Agency set annual renewable fuel standards.

Summary of Legal Basis: Clean Air Act section 211(o).

Alternatives: Alternatives will be assessed as the proposal is developed.

Anticipated Cost and Benefits: Costs and benefits will be analyzed as the proposal is developed.

Risks: Risk information will be developed as the proposal is developed.

RIN: 2060–AT04

EPA—OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION (OCSPP)

Proposed Rule Stage

124. Trichloroethylene (TCE); Rulemaking Under TSCA Section 6(A)

Priority: Other Significant. Major status under 5 U.S.C. 801 is undetermined.

Unfunded Mandates: Undetermined.

Legal Authority: 15 U.S.C. 2605 Toxic Substances Control Act

CFR Citation: NYD.

Legal Deadline: None.

Abstract: Section 6(a) of the Toxic Substances Control Act (TSCA) provides authority for the EPA to ban or restrict the manufacture (including import), processing, distribution in commerce, and use of chemical substances, as well as any manner or method of disposal. The EPA identified trichloroethylene (TCE) for risk evaluation as part of its Work Plan for Chemical Assessment under TSCA. TCE is used in industrial and commercial processes, and also has some limited uses in consumer products. In the June 2014 TSCA Work Plan Chemical Risk Assessment for TCE, the EPA identified risks associated with commercial degreasing and some consumer uses. EPA proposes that the use of TCE in vapor degreasing presents unreasonable risks to human health, and is initiating rulemaking under TSCA section 6 to address the risks of TCE when used as a spotting agent in dry cleaning and in commercial and consumer aerosol spray degreasers. A separate Regulatory Agenda entry (RIN 2070–AK11) addresses the EPA's consideration of a rulemaking to address the risks associated with TCE when used in vapor degreasing operations.

Statement of Need: In the June 2014 TSCA Work Plan Chemical Risk Assessment for TCE, the EPA identified risks associated with commercial degreasing and some consumer uses. The EPA is initiating a rulemaking under TSCA section 6 to address these risks. Specifically, the EPA will determine whether the continued use of TCE in some commercial degreasing uses, as a spotting agent in dry cleaning, and in certain consumer products would pose an unreasonable risk to human health and the environment.

Summary of Legal Basis: Section 6 of the Toxic Substances Control Act provides authority for the EPA to ban or restrict the manufacture (including import), processing, distribution in commerce, and use of chemical substances, as well as any manner or method of disposal.

Alternatives: Alternatives will be developed as part of the development of a proposed rule.

Anticipated Cost and Benefits: The EPA will prepare a regulatory impact analysis as part of the development of a proposed rule.

Risks: In the published TCE Risk Assessment, the EPA identified significant risks to human health in occupational, consumer and residential settings. The risk assessment identified health risks from TCE exposures to consumers using aerosol degreasers and spray fixatives, and health risks to workers when TCE is used in commercial shops and as a stain removing agent in dry cleaning.

RIN: 2070–AK03

EPA—OCSPP

125. N-Methylpyrrolidone (NMP) and Methylene Chloride; Rulemaking Under TSCA Section 6(A)

Priority: Other Significant.

Legal Authority: 15 U.S.C. 2605 Toxic Substances Control Act

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: Section 6 of the Toxic Substances Control Act provides authority of EPA to ban or restrict the manufacture (including import), processing, distribution in commerce, and use of chemical, as well as any manner or method of disposal of chemicals. EPA identified N-methylpyrrolidone (NMP) and methylene chloride for risk evaluation as part of its TSCA Work Plan for

Chemical Assessments. NMP and methylene chloride are uses in commercial processes and in consumer products in residential settings. In the August 2014 TSCA Work Plan Chemical Risk Assessment for methylene chloride and the March 2015 TSCA Work Plan Chemical Risk Assessment for NMP, EPA identified risks of concern from paint and coating removal. EPA proposes that the use of NMP and methylene chloride in paint and coating presents unreasonable risks to human health, and is initiating rulemaking under TSCA section 6 to address these risks.

Statement of Need: The EPA identified n-methylpyrrolidone and methylene chloride for risk evaluation as part of its Work Plan for Chemical Assessments under TSCA. In the August 2014 Risk Assessment for methylene chloride and March 2015 Risk Assessment for NMP, the EPA identified risks associated with commercial and consumer paint removal uses. The EPA is initiating rulemaking under TSCA section 6 to address these risks. Specifically, the EPA will determine whether the use of NMP or methylene chloride in commercial and consumer paint removal poses an unreasonable risk to human health and the environment.

Summary of Legal Basis: Section 6 of the Toxic Substances Control Act provides authority for the EPA to ban or restrict the manufacture (including import), processing, distribution in commerce, and use of chemicals, as well as any manner or method of disposal.

Alternatives: Alternatives will be developed as part of the development of a proposed rule.

Anticipated Cost and Benefits: The EPA will prepare a regulatory impact analysis as part of the development of a proposed rule.

Risks: As indicated in the published Risk Assessments and supplemental analyses for these chemicals, the EPA determined that there is risk of adverse human health effects (acute and chronic) for methylene chloride and NMP in occupational, consumer and residential settings.

EPA—OCSPP

127. Polychlorinated Biphenyls (PCBS); Reassessment of Use Authorizations for PCBS in Small Capacitors in Fluorescent Light Ballasts in Schools and Daycares

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect State, local or tribal governments.

Legal Authority: 15 U.S.C. 2605 Toxic Substances Control Act

CFR Citation: 40 CFR 761.

Legal Deadline: None.

Abstract: The EPA's regulations governing the use of Polychlorinated Biphenyls (PCBs) in electrical equipment and other applications were first issued in the late 1970s and have not been updated since 1998. The EPA has initiated rulemaking to reassess the ongoing authorized use of PCBs in small capacitors. In particular, the reassessment of the use authorization will focus on the use of liquid PCBs in small capacitors in fluorescent light ballasts. A separate Regulatory Agenda entry (RIN 2070–AJ38) addresses the proposed reassessment of other PCB use authorizations.

Statement of Need: Since the commercial manufacture of PCBs in the United States ceased in the 1970s, PCB-containing equipment is at least 30 years old and may be nearing the end of its expected useful life. Several international treaties have recognized the hazards of PCBs and the risks they pose to human health and the environment. EPA has recently learned that there was widespread use of PCBs at levels at or above 50 ppm, prior to the 1979 TSCA ban, in the formulation of caulk used in schools and other commercial buildings. In the current regulations PCBs are excluded from the TSCA ban only if found below 50 ppm. Thus, many schools and other building owners are now facing an unauthorized use of PCBs that has been present in their buildings for many years. This ANPR will solicit comment as to whether the current threshold of 50 ppm should be revised so that PCBs in caulk found at other levels could be authorized for use and, if so, under what conditions. EPA is required to make a finding that the authorized use will not present an unreasonable risk to human health and the environment. Needless to say, many changes have taken place in the industry sectors that use such equipment, and EPA believes that the balance of risks and benefits from the continued use of remaining equipment containing PCBs may have changed enough to consider amending the current regulations.

Summary of Legal Basis: TSCA section 6(e)(2)(A) provides that ''no person may manufacture, process, or distribute in commerce or use any polychlorinated biphenyl in a manner other than in a totally enclosed manner'' after January 1, 1978. However, TSCA section 6(e)(2)(B) provides EPA with the authority to issue regulations allowing the use and distribution in commerce of PCBs in a manner other than a totally enclosed manner if the EPA Administrator finds that the use and distribution in commerce ''will not present an unreasonable risk of injury to health or the environment.'' EPA published the first regulations addressing the use of equipment containing PCBs on May 31, 1979.

Alternatives: Alternatives will be developed as part of the development of a proposed rule.

Anticipated Cost and Benefits: The EPA will prepare a regulatory impact analysis as part of the development of a proposed rule.

Risks: PCB exposures can cause significant human health and ecological effects. The EPA and the International Agency for Research on Cancer (IARC) have characterized some commercial PCB mixtures as probably carcinogenic to humans. In addition to

carcinogenicity, potential effects of PCB exposure include neurotoxicity, reproductive and developmental toxicity, immune system suppression, liver damage, skin irritation, and endocrine disruption. PCBs persist in the environment for long periods of time and bioaccumulate, especially in fish and marine animals. PCBs are also readily transported across long distances in the environment, and can easily cycle between air, water, and soil.

EPA—OCSPP

128. • Procedures for Evaluating Existing Chemical Risks Under the Toxic Substances Control Act

Priority: Other Significant.

Legal Authority: 15 U.S.C. 2601 *et seq.* Toxic Substances Control Act

CFR Citation: Not Yet Determined.

Legal Deadline: Final, Statutory, June 22, 2017.

Abstract: On June 22, 2016, President Obama signed into law the Frank R. Lautenberg Chemical Safety for the 21st Century Act which amends the Toxic Substance Control Act (TSCA), the Nation's primary chemicals management law. A summary of the new law, which includes much needed improvements to TSCA, is available at *https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-lautenberg-chemical-safety-21st-century-act.* This particular rulemaking effort involves the revised TSCA section 6(b)(4), which requires EPA to promulgate a final rule within 1 year of enactment to establish EPA's process for evaluating the risk of existing chemical substances and determining whether they present an unreasonable risk of injury to health or the environment, without consideration of costs or other non-risk factors, including an unreasonable risk to a potentially exposed or susceptible subpopulation identified as relevant to the risk evaluation by the Administrator, under the conditions of use.

Statement of Need: As required by statute, the EPA must establish EPA's process for evaluating the risk of existing chemical substances and determining whether they present an unreasonable risk of injury to health or the environment, without consideration of costs or other non-risk factors, including an unreasonable risk to a potentially exposed or susceptible subpopulation identified as relevant to the risk evaluation by the Administrator, under the conditions of use.

Summary of Legal Basis: This particular rulemaking effort involves the revised TSCA section 6(b)(4), which requires EPA to promulgate a final rule within 1 year of enactment to establish EPA's process for evaluating the risk of existing chemical substances and determining whether they present an unreasonable risk of injury to health or the environment, without consideration of costs or other non-risk factors, including an unreasonable risk to a potentially exposed or susceptible subpopulation identified as relevant to the risk evaluation by the Administrator, under the conditions of use.

Alternatives: Alternatives will be developed as part of the development of a proposed rule.

Anticipated Cost and Benefits: The EPA will prepare a regulatory impact analysis as part of the development of a proposed rule.

Risks: This will be a procedural rule related to risk evaluations. It is not intended to address any particular risk.

EPA—OCSPP

129. • Procedures for Prioritization of Chemicals for Risk Evaluation Under the Toxic Substances Control Act

Priority: Other Significant.

Legal Authority: 15 U.S.C. 2605 Toxic Substances Control Act

CFR Citation: 40 CFR NYD.

Legal Deadline: None.

Abstract: On June 22, 2016, President Obama signed into law the Frank R. Lautenberg Chemical Safety for the 21st Century Act which amends the Toxic Substance Control Act (TSCA), the Nation's primary chemicals management law. A summary of the new law, which includes much needed improvements to TSCA, is available at *https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-lautenberg-chemical-safety-21st-century-act.* This particular rulemaking effort involves the revised TSCA section 6(b)(1), which requires that EPA promulgate a final rule within 1 year of enactment to establish a risk-based screening process, including criteria for designating chemical substances as high-priority substances for risk evaluations or low-priority substances for which risk evaluations are not warranted at the time. As required by statute, the process to designate the priority of chemical substances must include a consideration of the hazard and exposure potential of a chemical substance or a category of chemical substances (including consideration of persistence and bioaccumulation, potentially exposed or susceptible subpopulations and storage near significant sources of drinking water), the conditions of use or significant changes in the conditions of use of the chemical substance, and the volume or significant changes in the volume of the chemical substance manufactured or processed.

Statement of Need: As required by statute, the process to designate the priority of chemical substances must include a consideration of the hazard

and exposure potential of a chemical substance or a category of chemical substances (including consideration of persistence and bioaccumulation, potentially exposed or susceptible subpopulations and storage near significant sources of drinking water), the conditions of use or significant changes in the conditions of use of the chemical substance, and the volume or significant changes in the volume of the chemical substance manufactured or processed.

Summary of Legal Basis: This action is mandated by the Frank R. Lautenberg Chemical Safety for the 21st Century Act which amended the Toxic Substance Control Act (TSCA), on June 22, 2016. This particular rulemaking effort involves the revised TSCA section 6(b)(1), which requires that EPA promulgate a final rule within 1 year of enactment to establish a risk-based screening process, including criteria for designating chemical substances as high-priority substances for risk evaluations or low-priority substances for which risk evaluations are not warranted at the time.

Alternatives: Alternatives will not be developed as part of the development of a proposed rule.

Anticipated Cost and Benefits: The EPA will prepare a regulatory impact analysis as part of the development of a proposed rule.

Risks: This action will not address any particular risk. It will establish a risk-based screening process, including criteria for designating chemical substances as high-priority substances for risk evaluations or low-priority substances for which risk evaluations are not warranted at the time.

RIN: 2070–AK23

EPA—OFFICE OF LAND AND EMERGENCY MANAGEMENT (OLEM)

Proposed Rule Stage

130. Financial Responsibility Requirements Under Cercla Section 108(B) for Classes of Facilities in the Hardrock Mining Industry

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under PL 104–4.

Legal Authority: 42 U.S.C. 9601 *et seq.;* 42 U.S.C. 9608(b)

CFR Citation: 40 CFR 320.

Legal Deadline: NPRM, Judicial, December 1, 2016, Notice of proposed rulemaking.

Abstract: Section 108(b) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, establishes certain authorities concerning financial responsibility requirements. The agency has identified classes of facilities within the hardrock mining industry as those for which financial responsibility requirements will be first developed. The EPA intends to include requirements for financial responsibility, as well as notification and implementation.

Statement of Need: EPA's 108(b) rules will address the degree and duration of risks associated with aspects of hazardous substance management at hardrock mining and mineral processing facilities. These regulations will help ensure that businesses make financial arrangements to address risks from hazardous substances at their sites, and encourage businesses to improve their management of hazardous substances.

Summary of Legal Basis: Section 108(b) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, establishes certain regulatory authorities concerning financial responsibility requirements. Specifically, the statutory language addresses the promulgation of regulations that require classes of facilities to establish and maintain evidence of financial responsibility consistent with the degree and duration of risk associated with the production, transportation, treatment, storage, or disposal of hazardous substances.

Alternatives: The EPA is considering proposing for comment alternatives for allowable types of financial instruments.

Anticipated Cost and Benefits: The EPA expects that the primary costs of the rule will be the costs to facilities for procuring required financial instruments. The EPA also expects to incur administrative and oversight costs. These regulations will help ensure that businesses make financial arrangements to address risks from hazardous substances at their sites, and encourage businesses to improve their management of hazardous substances.

Risks: EPA's 108(b) rules are intended to address the risks associated with the production, transportation, treatment, storage or disposal of hazardous substances at hardrock mining and mineral processing facilities.

RIN: 2050–AG61

EPA—OFFICE OF WATER (OW)

Proposed Rule Stage

131. National Primary Drinking Water Regulations for Lead and Copper: Regulatory Revisions

Priority: Economically Significant. Major status under 5 U.S.C. 801 is undetermined.

Unfunded Mandates: Undetermined.

Legal Authority: 42 U.S.C. 300f *et seq.* Safe Drinking Water Act

CFR Citation: 40 CFR 141; 40 CFR 142.

Legal Deadline: None.

Abstract: Beginning in 2004, EPA conducted a wide-ranging review of implementation of the Lead and Copper Rule (LCR) to determine if there is a national problem related to elevated lead levels. EPA's comprehensive review consisted of several elements, including a series of workshops designed to solicit issues, comments, and suggestions from stakeholders on particular issues; a review of monitoring data to evaluate the effectiveness of the LCR; and a review of the LCR implementation by States and water utilities. As a result of this multi-part review, EPA identified seven targeted rules changes and EPA promulgated a set of short-term regulatory revisions and clarifications on October 10, 2007, to strengthen implementation of the existing Lead and Copper Rule. In developing the short-term revisions, EPA identified several regulatory changes to be considered as part of identifying more comprehensive changes to the rule. These considerations are longer-term in nature as they require additional data collection, research, analysis, and stakeholder involvement to support decisions. This action addresses the remaining regulatory revisions. EPA's goal for the LCR revisions is to improve the effectiveness of public health protections while maintaining a rule that can be effectively implemented by the 68,000 drinking water systems that are covered by the rule.

Statement of Need: Beginning in 2004, EPA conducted a wide-ranging review of implementation of the Lead and Copper Rule (LCR) to determine if there is a national problem related to elevated lead levels. EPA's comprehensive review consisted of several elements, including a series of workshops designed to solicit issues, comments, and suggestions from stakeholders on particular issues; a review of monitoring data to evaluate the effectiveness of the LCR; and a review of the LCR implementation by States and water utilities. As a result of this multi-part review, EPA identified seven targeted rules changes and EPA promulgated a set of short-term regulatory revisions and clarifications on October 10, 2007, to strengthen implementation of the existing Lead and Copper Rule. In developing the short-term revisions, EPA identified several regulatory changes to be considered as part of identifying more comprehensive changes to the rule. These considerations are longer-term in nature as they require additional data collection, research, analysis, and stakeholder involvement to support decisions. EPA's goal for the LCR revisions is to improve the effectiveness of public health protections while maintaining a rule that can be effectively implemented by the 68,000 drinking water systems that are covered by the rule.

Summary of Legal Basis: The Safe Drinking Water Act (SDWA) (42 U.S.C. 300f *et seq.*) requires EPA to establish maximum contaminant level goals (MCLGs) and National Primary Drinking Water Regulations (NPDWRs) for contaminants that may have an adverse effect on the health of persons, may occur in public water systems at a frequency and level of public concern, and in the sole judgment of the Administrator, regulation of the contaminant would present a meaningful opportunity for health risk reduction for persons served by public water systems (section 1412(b)(1)(A)). The 1986 amendments to SDWA established a list of 83 contaminants for which EPA is to develop MCLGs and NPDWRs, which included lead and copper. The 1991 NPDWR for Lead and Copper (56 FR 26460, U.S. EPA, 1991a) fulfilled the requirements of the 1986 SDWA amendments with respect to lead and copper. EPA promulgated a set of short-term regulatory revisions and clarifications on October 10, 2007, to strengthen implementation of the existing Lead and Copper Rule. In developing the short-term revisions, EPA identified several regulatory changes to be considered as part of identifying more comprehensive changes to the rule. These considerations are longer-term in nature as they require additional data collection, research, analysis, and stakeholder involvement to support decisions. Changes will be made to improve the effectiveness of public health protections while maintaining a rule that can be effectively implemented.

132. • Fees for Water Infrastructure Project Applications Under the Water Infrastructure Finance and Innovation Act

Priority: Other Significant.

Legal Authority: 33 U.S.C. 3901 *et seq.* WRDDA

CFR Citation: TBD.

Legal Deadline: None.

Abstract: EPA is proposing this rule to establish fees for applying for federal credit assistance under the Water Infrastructure Finance and Innovation Act (WIFIA) program. As specified under 33 U.S.C. 3908(b)(7), 3909(b), and 3909(c)(3), EPA is authorized to charge fees to recover all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including counsel, in the field of municipal and project finance to assist in the underwriting and servicing of Federal credit instruments. EPA is proposing an initial application fee, credit processing fee, and servicing fee and is seeking comment on these.

Statement of Need: EPA is proposing to establish fees for applying for federal credit assistance under the Water Infrastructure Finance and Innovation Act (WIFIA) program. As specified under 33 U.S.C. 3908(b)(7), 3909(b), and 3909(c)(3), EPA is authorized to charge fees to recover all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including counsel, in the field of municipal and project finance to assist in the underwriting and servicing of Federal credit instruments. EPA is proposing an initial application fee, credit processing fee, and servicing fee and is seeking comment on these.

Summary of Legal Basis: The Water Infrastructure Finance and Innovation Act (WIFIA) program authorizes EPA to

provide secured (direct) loans and loan guarantees to eligible water infrastructure projects. WIFIA was passed as part of the Water Resources Reform and Development Act of 2014, Pub. L. 113–121. The fees are specified under 33 U.S.C. 3908(b)(7), 3909(b), and 3909(c)(3).

EPA—OFFICE OF AIR AND RADIATION (OAR)

Final Rule Stage

133. National Emission Standards for Hazardous Air Pollutants (NESHAP) Subpart W: Standards for Radon Emissions From Operating Uranium Mill Tailings: Review

Priority: Other Significant.

Legal Authority: 42 U.S.C. 7401 *et seq.* Clean Air Act.

CFR Citation: 40 CFR 61.

Legal Deadline: None.

Abstract: National Emission Standards for Hazardous Air Pollutants (NESHAP) subpart W protects human health and the environment by setting radon emission standards and work practices for operating uranium mill tailings impoundments. The EPA is in the process of reviewing this standard. If necessary, the Agency will revise the NESHAP requirements for radon emissions from operating uranium mill tailings.

Statement of Need: This radionuclide NESHAP promulgated in 1989 limits radon emissions from operating impoundments that manage uranium byproduct material. This review of the rule is prompted by a settlement agreement based on EPA's failure to review the rule within 10 years of the 1990 Clean Air Act Amendments.

Summary of Legal Basis: The authority for this action comes from Clean Air Act section 112(q)(1).

Alternatives: The rule proposed to establish Generally Available Control Technologies (GACT) or management practices for conventional impoundments, non-conventional impoundments, and heap leach piles. EPA proposed to: Eliminate the radon flux standard and monitoring at older conventional impoundments; to require non-conventional impoundments to retain one meter of liquid; to regulate heap leach piles from the initial application of leaching solution; and to require heap leach piles to maintain 30% moisture content. A specific alternative was discussed only in relation to regulating heap leach piles. The alternative was to not regulate the piles under subpart W until the leaching (extraction) process was completed and the heap leach pile contained only uranium byproduct material.

Anticipated Cost and Benefits: Costs attributable to the proposed rule include the cost to maintain one meter of liquid in non-conventional impoundments and the cost to maintain 30% moisture content in heap leach piles. These costs represent less than 0.1% of baseline facility costs. The primary benefit is maintaining air quality in the vicinity of uranium recovery facilities to levels consistent with the 1989 rule.

Risks: The proposed rule maintains the estimated individual lifetime risk of fatal cancer at approximately $1 \times 10–4$ or below, consistent with the 1989 rule. Population risk is estimated at between 0.0015 and 0.0026 fatal cancers per year, or approximately 1 case every 385 to 667 years for the 4 million persons living within 80 km of uranium recovery facilities.

EPA—OAR

134. Revision of 40 CFR 192—Health and Environmental Protection Standards for Uranium and Thorium Mill Tailings and Uranium In Situ Leaching Processing Facilities

Priority: Other Significant.

Legal Authority: 42 U.S.C. 2011 *et seq.* Atomic Energy Act

CFR Citation: 40 CFR 192.

Legal Deadline: None.

Abstract: The EPA's regulations in 40 CFR 192 establish standards for the protection of public health, safety, and the environment from radiological and nonradiological hazards associated with uranium ore processing and disposal of resulting waste materials. These cross-media standards, which apply to pollutant emissions and site restoration, must be adopted by the Nuclear Regulatory Commission, their Agreement States, and the Department of Energy. The EPA reviewed the standards in the existing rule and proposed to revise the regulations in January 2016 (80 FR 4155), taking into particular account the significant changes in uranium industry extraction technologies and their potential impacts to groundwater. In addition, new facilities being proposed in states from Virginia to Alaska add to the importance of this effort. The final rule will incorporate comments from industry and public stakeholders received during the proposal, as well as the intra-agency workgroup.

Statement of Need: In-situ uranium recovery (ISR) is now the dominant form of uranium recovery. ISR involves injection of chemical solutions to alter groundwater chemistry and mobilize uranium, which is then extracted. Monitoring and groundwater restoration must be conducted to limit the potential for contamination during operations and after facility closure. Rules specific to ISR do not exist at the federal level. The current rulemaking will provide national consistency in protecting groundwater at ISR facilities.

Summary of Legal Basis: EPA's authority to establish standards of

general application to protect public health, safety, and the environment is provided by section 275 of the Atomic Energy Act of 1954, as amended by section 206 of the Uranium Mill Tailings Radiation Control Act of 1978. EPA's standards of general application are implemented and enforced by the Nuclear Regulatory Commission (NRC).

Alternatives: The proposed rule would establish a framework for monitoring at ISR facilities. The primary alternatives proposed related to the length of the long-term stability monitoring period. EPA proposed a 30-year monitoring period, with provision to shorten using geochemical modeling. Alternative presented were a 30-year period, with no provision for shortening, and a narrative standard identifying performance goals with no specified time period, in which the NRC would determine whether monitoring is sufficient based on site-specific conditions.

Anticipated Cost and Benefits: The proposed rule was estimated to increase the average cost of uranium production at ISR facilities by approximately $1.50 per pound of uranium (~2.9%), and that average costs per facility would range from $304,000 to $9.5 million, depending on the scale of the facility. Total annual costs attributable to the rule were estimated at approximately $13.5 million. Benefits are primarily the avoidance of remediation of contamination resulting from insufficient restoration and monitoring. Because current practice is to monitor for only a short period after restoration, it was not possible to determine how many sites could require remediation in the absence of the rule or quantify benefits, although it is estimated that the cost of remediation at any particular site would likely exceed the cost of compliance with the rule.

Risks: Risk to public health would be from exposure to groundwater contamination resulting from insufficient restoration and monitoring. Because current practice is to monitor for only a short period after restoration, there is insufficient information to determine public exposures after monitoring is terminated. Therefore, it is not possible to quantify the health benefits of the rule, such as cancers averted.

135. Model Trading Rules for Greenhouse Gas Emissions From Electric Utility Generating Units Constructed on or Before January 8, 2014

Priority: Other Significant.

Legal Authority: 42 U.S.C. 7401 *et seq.*

CFR Citation: 40 CFR 62.

Legal Deadline: None.

Abstract: In the final Clean Power Plan (CPP) promulgated in August 2015, the EPA set Emission Guidelines for the best system of emission reductions for carbon dioxide from existing power plants. States were tasked in the CPP with developing plans to achieve reductions in carbon dioxide emissions from the existing power plants in each state. In these model trading rules, the EPA will finalize models that provide two optional approaches (rate-based and mass-based emission trading programs) that states may use in developing a plan.

Statement of Need: These model trading rules provide states with examples of a mass-based trading program and a rate-based trading program that can be used as part of a state plan submission for the Clean Power Plan. These model trading rules achieve the level of carbon dioxide emission reductions achieved through the Clean Power Plan.

Summary of Legal Basis: The Model Trading rules are example trading programs the states may use to achieve emission reductions for carbon dioxide from existing power plants. They can be used by states as part of their submissions for the Clean Power Plan. The Clean Power Plan was developed under the authority of the Clean Air Act Section 111.

Alternatives: In the proposal, the EPA solicited comments on many topics. For the rate-based Model Trading Rule, the EPA solicited comment on different methods for calculating Gas Shift Emission Rate Credits. Also in the rate-based Model Trading Rule, there were alternatives sought for the overall structure of a rate-base trading rule that aligns with the Clean Power Plan and facilitates interstate trading. For the mass-based Model Trading Rule, the EPA solicited comment on allocation approaches and methods for addressing leakage.

Anticipated Cost and Benefits: There are no anticipated costs for these Model Trading Rules that differ from the anticipated costs described in the Clean Power Plan. The Model Trading Rules have the anticipated benefits described there as well. Actions taken to comply with the Clean Power Plan will also reduce the emissions of directly-emitted $PM_{2.5}$, SO_2, and NO_X. The benefits associated with these $PM_{2.5}$, SO_2, and NO_X reductions are referred to as co-benefits, as these reductions are not the primary objective of this rule. The RIA for the Clean Power Plan spells out, in detail, the numerical benefits associated with the model trading rules.

Risks: Because these Model Trading Rules are example trading programs for states, there is no risk associated with them outside of what is described in the Clean Power Plan.

EPA—OAR

136. Renewable Fuel Volume Standards for 2017 and Biomass Based Diesel Volume (BBD) for 2018

Priority: Other Significant.

Legal Authority: 42 U.S.C. 7619 Clean Air Act

CFR Citation: 40 CFR 80.

Legal Deadline: Final, Statutory, November 30, 2016, The statute requires the standards be finalized by November 30 of the year prior to the year in which the standards would apply.

Final Statutory November 30,2016, cellulosic biofuel, biomass based diesel (BBD), advanced biofuel, and total renewable fuel. The statute requires the standards be finalized by November 30 of the year prior to the year in which the standards would apply.

Abstract: The Clean Air Act requires the EPA to promulgate regulations that specify the annual standards requirements for renewable fuels under the Renewable Fuel Standard (RFS) program. Standards are to be set for four different categories of renewable fuels: cellulosic biofuel, biomass based diesel (BBD), advanced biofuel, and total renewable fuel. The statute requires that the standards be finalized by November 30 of the year prior to the year in which the standards would apply. In the case of biomass based diesel, the statute that requires applicable volumes be set no later than 14 months before the year for which the requirements would apply. This action would propose the applicable volumes for all renewable fuel categories for 2017, and would also propose the BBD standard for 2018.

Statement of Need: Section 211(o) of the Clean Air Act requires the EPA to promulgate regulations that specify the annual volume requirements for renewable fuels under the Renewable Fuel Standard (RFS) program. Standards are to be set for four different categories of renewable fuels: Cellulosic biofuel, biomass based diesel (BBD), advanced biofuel, and total renewable fuel. The statute requires the standards be finalized by November 30 of the year prior to the year in which the standards would apply. In the case of biomass based diesel, the statute requires applicable volumes be set no later than 14 months before the year for which the requirements would apply.

Summary of Legal Basis: The Clean Air Act Section 211(o) requires the standards be finalized by November 30 of the year prior to the year in which the standards would apply. In the case of biomass based diesel, the statute requires applicable volumes be set no later than 14 months before the year for which the requirements would apply.

Alternatives: The action will establish renewable fuel standards for the years identified above. Comments submitted during the public process will be reviewed and considered in the final standards.

Anticipated Cost and Benefits: In the proposal, EPA estimated that the cost to produce renewable fuels compared to the costs of producing petroleum fuels would range from $535 to $971 million in 2017. These illustrative cost estimate are not meant to be precise measures, nor do they attempt to capture the full impacts of the rule. These estimates are provided solely for the purpose of showing how the cost to produce a gallon of a ''representative'' renewable fuel compares to the cost of producing a petroleum fuel. The short timeframe provided for the annual renewable fuel rule process does not allow sufficient time for EPA to conduct a comprehensive analysis of the benefits of the annual standards. Since the benefits are unquantified, the net benefits are incalculable.

Risks: A risk analysis was not conducted.

RIN: 2060–AS72

EPA—OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION (OCSPP)

Final Rule Stage

137. Pesticides; Certification of Pesticide Applicators

Priority: Other Significant.

Legal Authority: 7 U.S.C. 136 *et seq.* Federal Insecticide Fungicide and Rodenticide Act

CFR Citation: 40 CFR 156; 40 CFR 171.

Legal Deadline: None.

Abstract: The EPA is developing a final rule to revise the federal regulations governing the certified pesticide applicator program (40 CFR part 171). In August 2015, the EPA proposed revisions based on years of extensive stakeholder engagement and public meetings, to ensure that they adequately protect applicators, the public, and the environment from potential harm due to exposure to restricted use pesticides (RUPs). This action is intended to improve the competence of certified applicators of RUPs and to increase protection for noncertified applicators of RUPs operating under the direct supervision of a certified applicator through enhanced pesticide safety training and standards for supervision of noncertified applicators.

Statement of Need: Change is needed to strengthen the protections for pesticide applicators, the public, and the environment from harm due to pesticide exposure.

Summary of Legal Basis: This action is issued under the authority of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 to 136y, particularly sections 136a(d), 136i, and 136w.

Alternatives: The Agency has developed mechanisms to improve applicator trainers and make training materials more accessible. The Agency has also developed nationally relevant training and certification materials to preserve State resources while improving competency. However, these mechanisms and materials do not address other requisite needs for improving protections, such as requirements for determining competency and recertification. The EPA worked with key stakeholders to identify and evaluate various alternatives and regulatory options during the development of the proposed rule. These are discussed in detail in the proposed rule, and Economic Analysis that was prepared for the proposed rule.

Anticipated Cost and Benefits: The EPA prepared an Economic Analysis (EA) of the potential costs and impacts associated with the proposed rule, a copy or which is available in the docket, discussed in more detail in unit III of the proposed rule; and briefly summarized here. The EPA monetized benefits based on avoided acute pesticide incidents are estimated at $80.5 million/year after adjustment for underreporting of pesticide incidents (EA chapter 6.5). Qualitative benefits include the following:

- Willingness to pay to avoid acute effects of pesticide exposure beyond

cost of treatment and loss of productivity.

• Reduced latent effect of avoided acute pesticide exposure.

• Reduced chronic effects from lower chronic pesticide exposure to workers, handlers, and farmworker families, including a range of illnesses such as non-Hodgkins lymphoma, prostate cancer, Parkinson's disease, lung cancer, chronic bronchitis, and asthma. (EA chapter 6.4 & 6.6) EPA estimated total incremental costs of $47.2 million/year (EA chapter 5), which included the following:

• $19.5 million/year for costs to Private Applicators, with an estimated 490,000 impacted and an average cost of $40 per applicator (EA chapter 5 & 5.6).

• $27.4 million/year for costs to Commercial Applicators, with an estimated 414,000 impacted and an average cost of $66 per applicator (EA chapter 5 & 5.6).

• $359,000 for costs to States and other jurisdictions, with an estimated 63 impacted (EA chapter 5). The EPA estimated that there is no significant impact on a substantial number of small entities. EPA estimated that the proposed rule may affect over 800,000 small farms that use pesticides, although about half are unlikely to apply restricted use pesticides. The estimated impact for small entities is less than 0.1% of the annual revenues for the average small entity (EA chapter 5.7). The EPA also estimated that the proposed rule will have a negligible effect on jobs and employment because most private and commercial applicators are self-employed; and the estimated incremental cost per applicator represents from 0.3 to 0.5 percent of the cost of a part-time employee (EA chapter 5.6).

Risks: Applicators are at risk from exposure to pesticides they handle for their work. The public and the environment may also be at risk from misapplication by applicators. Revisions to the regulations are expected to minimize these risks by ensuring the competency of certified applicators.

RIN: 2070–AJ20

EPA—OFFICE OF LAND AND EMERGENCY MANAGEMENT (OLEM)

Final Rule Stage

138. Modernization of the Accidental Release Prevention Regulations Under Clean Air Act

Priority: Economically Significant. Major under 5 U.S.C. 801.

Unfunded Mandates: This action may affect the private sector under Public Law 104–4.

Legal Authority: 42 U.S.C. 7412(r)

CFR Citation: 40 CFR 68.

Legal Deadline: None.

Abstract: The EPA, in response to Executive Order 13650, is amending its Risk Management Program regulations. Such revisions may include several changes to the accident prevention program requirements including an additional analysis of safer technology and alternatives for the process hazard analysis for some Program 3 processes, third-party audits and incident investigation root cause analysis for Program 2 and Program 3 processes, enhancements to the emergency preparedness requirements, increased public availability of chemical hazard information, and several other changes to certain regulatory definitions and data elements submitted in risk management plans. Such amendments are intended to improve chemical process safety, assist local emergency authorities in planning for and responding to accidents, and improve public awareness of chemical hazards at regulated sources.

Statement of Need: In response to Executive Order 13650, the EPA is considering potential revisions to its Risk Management Program regulations. The Executive Order establishes the Chemical Facility Safety and Security Working Group (''Working Group''), co-chaired by the Secretary of Homeland Security, the Administrator of the EPA, and the Secretary of Labor or their designated representatives at the Assistant Secretary level or higher, and composed of senior representatives of other federal departments, agencies, and offices. The Executive Order requires the Working Group to carry out a number of tasks whose overall goal is to prevent chemical accidents. Section 6(a)(i) of the Executive Order requires the Working Group to develop options for improved chemical facility safety and security that identify ''improvements to existing risk management practices through agency programs, private sector initiatives, Government guidance, outreach, standards, and regulations.'' Section 6(c) of Executive Order 13650 requires the Administrator of the EPA to review the RMP Program (RMP).

Summary of Legal Basis: Clean Air Act Section 112(r)(7) authorizes the EPA Administrator to promulgate regulations to prevent accidental releases. Section 112(r)(7)(A) authorizes release prevention, detection, and correction requirements that may include a broad range of methods, make distinctions among classes and types of facilities, and may take into consideration other factors, including, but not limited to, size, location, process and substance factors, and response capabilities. Section 112(r)(7)(B) authorizes reasonable regulations and appropriate guidance to provide, to the greatest extent practicable, for the prevention and detection of accidental releases of regulated substances and for response to such releases by the owners or operators of the sources of such releases.

Alternatives: The EPA is considering revisions to the accident prevention, emergency response, recordkeeping, and other provisions in 40 CFR part 68 to address chemical accident risks. The proposed action will contain the EPA's preferred option, as well as alternative regulatory options. The EPA also is

considering publishing non-regulatory guidance to address some issues that will be raised in the proposed action.

Anticipated Cost and Benefits: Costs will include the burden on regulated entities associated with implementing new or revised requirements, including program implementation, training, equipment purchases, and recordkeeping, as applicable. Some costs will also accrue to implementing agencies and local governments, due to enhanced local coordination and recordkeeping requirements. Benefits will result from avoiding the harmful accident consequences to communities and the environment, such as deaths, injuries, and property damage, environmental damage, and from mitigating the effects of releases that may occur.

Risks: The proposed action will address the risks associated with accidental releases of listed regulated toxic and flammable substances to the air from stationary sources. Substances regulated under the RMP program include highly toxic and flammable substances that can cause deaths, injuries, property and environmental damage, and other on- and off-site consequences if accidentally released. The proposed action will reduce these risks by making accidental releases less likely, and by mitigating the severity of releases that may occur. The proposed action would not address the risks of non-accidental chemical releases, accidental releases of non-regulated substances, chemicals released to other media, and air releases from mobile sources.

RIN: 2050–AG82

EPA—OFFICE OF WATER (OW)

Final Rule Stage

139. Credit Assistance for Water Infrastructure Projects

Priority: Other Significant.

Legal Authority: 33 U.S.C. 3901 *et seq.* WRDDA

CFR Citation: Undetermined.

Legal Deadline: None.

Abstract: The EPA is taking this action to implement the Water Infrastructure Finance and Innovation Act (WIFIA) program. WIFIA was passed as part of the Water Resources Reform and Development Act of 2014, Pub. L. 113–121. This action will establish guidelines for the application process, selection criteria, and project selection, as well as define threshold requirements for credit assistance, limits on credit assistance, reporting requirements, collection of fees and the application of other Federal statutes.

Statement of Need: EPA plans to issue an interim final rule that establishes the guidelines for a new credit assistance program for water infrastructure projects and the process by which EPA will administer such credit assistance. The rule will implement a new program authorized under the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA). WIFIA authorizes EPA to provide secured (direct) loans and loan guarantees to eligible water infrastructure projects. Following project selection by the EPA Administrator, individual credit agreements will be developed through negotiations between the project sponsors and EPA. The interim final rule primarily restates and clarifies statutory language while establishing approaches to specific procedural issues left to EPA's discretion.

Summary of Legal Basis: The Water Infrastructure Finance and Innovation Act (WIFIA) program authorizes EPA to provide secured (direct) loans and loan guarantees to eligble water infrastructure projects. WIFIA was passed as part of the Water Resources Reform and Development Act of 2014, Pub. L. 113–121.

Alternatives: To Be Determined.

BILLING CODE 6560–50–P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION (EEOC)

Statement of Regulatory and Deregulatory Priorities

The mission of the Equal Employment Opportunity Commission (EEOC, Commission, or Agency) is to ensure equality of opportunity in employment by vigorously enforcing and educating the public about the following Federal statutes: Title VII of the Civil Rights Act of 1964, as amended (prohibits employment discrimination on the basis of race, color, sex (including pregnancy), religion, or national origin); the Equal Pay Act of 1963, as amended (makes it illegal to pay unequal wages to men and women performing substantially equal work under similar

working conditions at the same establishment); the Age Discrimination in Employment Act of 1967, as amended (prohibits employment discrimination based on age of 40 or older); titles I and V of the Americans with Disabilities Act, as amended, and sections 501 and 505 of the Rehabilitation Act, as amended (prohibit employment discrimination based on disability); title II of the Genetic Information Nondiscrimination Act (prohibits employment discrimination based on genetic information and limits acquisition and disclosure of genetic information); and section 304 of the Government Employee Rights Act of 1991 (protects certain previously exempt State & local government employees from employment discrimination on the basis of race, color, religion, sex, national origin, age, or disability).

The Regulatory Plan has one item entitled ''Affirmative Action for Individuals With Disabilities in the Federal Government.'' The EEOC's regulations implementing section 501, as set forth in 29 CFR 1614, require Federal agencies and departments to be ''model employers'' of individuals with disabilities. The Commission issued an Advanced Notice of Proposed Rulemaking (ANPRM) on May 15, 2014 (79 FR 27824), and it issued a proposed rule on February 24, 2016 (81 FR 9123), to include a more detailed explanation of how Federal agencies and departments should ''give full consideration to the hiring, placement, and advancement of qualified individuals with disabilities.'' Any revisions would be informed by Management Directive 715, and may include goals consistent with Executive Order 13548. Furthermore, any revisions would result in costs only to the Federal Government; would contribute to increasing the employment of individuals with disabilities; and would not affect risks to public health, safety, or the environment.

Consistent with section 4(c) of Executive Order 12866, this statement was reviewed and approved by the Chair of the Agency. The statement has not been reviewed or approved by the other members of the Commission.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563, ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), the following Regulatory Identifier Numbers (RINs) have been identified as associated with retrospective review and analysis in the EEOC's final retrospective review of regulations plan. Some of the entries on this list may be completed actions, which do not appear in The Regulatory Plan. However, more information can be found about these completed rulemakings in past publications of the Unified Agenda on Reginfo.gov (*http://reginfo.gov/*) in the Completed Actions section. These rulemakings can also be found on *Regulations.gov* (*http://regulations.gov*). The EEOC's final Plan for Retrospective Analysis of Existing Rules can be found at: *http://www.eeoc.gov/laws/regulations/retro_review_plan_final.cfm.*

RIN	Title	Effect on small business
3046–AA91	Revisions to procedures for complaints or charges of employment discrimination based on disability subject to the americans with disabilities act and section 504 of the rehabilitation act of 1973.	This rulemaking may decrease burdens on small businesses by making the charge/complaint process more efficient.
3046–AA92	Revisions to procedures for complaints/charges of employment discrimination based on disability filed against employers holding government contracts or subcontracts.	This rulemaking may decrease burdens on small businesses by making the charge/complaint process more efficient.
3046–AA93	Revisions to procedures for complaints of employment discrimination filed against recipients of federal financial assistance.	This rulemaking may decrease burdens on small businesses by making the charge/complaint process more efficient.
3046–AB00	Federal sector equal employment opportunity	This rulemaking pertains to the Federal sector equal employment opportunity process and thus is not expected to affect small businesses.

EEOC

Final Rule Stage

140. Affirmative Action for Individuals With Disabilities in the Federal Government

Priority: Other Significant.

Legal Authority: 29 U.S.C. 791(b)

CFR Citation: 29 CFR 1614.203(a).

Legal Deadline: None.

Abstract: Section 501 of the Rehabilitation Act, as amended (Section 501), prohibits discrimination against individuals with disabilities in the Federal Government. The EEOC's regulations implementing section 501, as set forth in 29 CFR part 1614, require Federal agencies and departments to be ''model employers'' of individuals with disabilities 1 On May 15, 2014, the Commission issued an Advance Notice of Proposed Rulemaking (79 FR 27824) that sought public comments on whether and how the existing regulations could be improved to provide more detail on what being a ''model employer'' means and how Federal agencies and departments should ''give full consideration to the hiring, placement and advancement of qualified individuals with disabilities.'' 2 The NPRM was published on February 24, 2016 (81 FR 9123). The EEOC's review of the comments and potential revisions was informed by the discussion in Management Directive 715 of the tools Federal agencies should use to establish goals for the employment and advancement of individuals with disabilities. The EEOC's review of the comments and potential revisions was also informed by, and consistent with, the goals of Executive Order 13548 to increase the employment of individuals with disabilities and the employment of individuals with targeted disabilities.—— 1 29 CFR 1614.203(a). 2 Id.

Statement of Need: Pursuant to section 501 of the Rehabilitation Act, the Commission is authorized to issue such regulations as it deems necessary to carry out its responsibilities under this Act. Executive Order 13548 called for increased efforts by Federal agencies and departments to recruit, hire, retain, and return individuals with disabilities to the Federal workforce.

Summary of Legal Basis: Section 501 of the Rehabilitation Act of 1973, as amended (section 501), 29 U.S.C. 791, in addition to requiring nondiscrimination with respect to Federal employees and applicants for Federal employment who are individuals with disabilities, also requires Federal agencies to maintain,

update annually, and submit to the Commission an affirmative action program plan for the hiring, placement, and advancement of individuals with disabilities. As part of its responsibility for the administration and enforcement of equal opportunity in Federal employment, the Commission is authorized under 29 U.S.C. 794a(a)(1) to issue rules, regulations, orders, and instructions pursuant to section 501.

Alternatives: The EEOC considered all alternatives offered by ANPRM public commenters. The EEOC will consider all alternatives offered by future public commenters.

Anticipated Cost and Benefits: Any costs that might result would only be borne by the Federal Government. The revisions would contribute to increased employment of individuals with disabilities.

Risks: The proposed changes do not affect risks to public health, safety, or the environment.

GENERAL SERVICES ADMINISTRATION (GSA)

Regulatory Plan—October 2016

I. Mission and Overview

GSA oversees the business of the Federal Government. GSA's acquisition solutions supply Federal purchasers with cost-effective, high-quality products and services from commercial vendors. GSA provides workplaces for Federal employees and oversees the preservation of historic Federal properties. GSA helps keep the Nation safe by providing tools, equipment, and non-tactical vehicles to the U.S. military, and providing State and local governments with law enforcement equipment, firefighting and rescue equipment, and disaster recovery products and services.

GSA serves the public by delivering services directly to its Federal customers through the Federal Acquisition Service (FAS), the Public Buildings Service (PBS), and the Office of Government-wide Policy (OGP). GSA has a continuing commitment to its Federal customers and the U.S. taxpayers by providing those services in the most cost-effective manner possible.

Federal Acquisition Service (FAS)

FAS is the lead organization for procurement of products and services (other than real property) for the Federal Government. The FAS organization leverages the buying power of the Government by consolidating Federal agencies' requirements for common goods and services. FAS provides a range of high-quality and flexible acquisition services that increase overall Government effectiveness and efficiency. FAS business operations are organized into four business portfolios based on the product or service provided to customer agencies: Integrated Technology Services (ITS); Assisted Acquisition Services (AAS); General Supplies and Services (GSS); and Travel, Motor Vehicles, and Card Services (TMVCS). The FAS portfolio structure enables GSA and FAS to provide best value services, products, and solutions to its customers by aligning resources around key functions.

Public Buildings Service (PBS)

PBS is the largest public real estate organization in the United States, providing facilities and workspace solutions to more than 60 Federal agencies. PBS aims to provide a superior workplace for the Federal worker and superior value for the U.S. taxpayer. Balancing these two objectives is PBS' greatest management challenge. PBS' activities fall into two broad areas. The first is space acquisition through both leases and construction. PBS translates general needs into specific requirements, marshals the necessary resources, and delivers the space necessary to meet the respective missions of its Federal clients. The second area is management of space. This involves making decisions on maintenance, servicing tenants, and ultimately, deciding when and how to dispose of a property at the end of its useful life.

Office of Government-Wide Policy (OGP)

OGP sets Government-wide policy in the areas of personal and real property, travel and transportation, information technology, regulatory information, and use of Federal advisory committees. OGP also helps direct how all Federal supplies and services are acquired as well as GSA's own acquisition programs. OGP's regulatory function fully incorporates the provisions of the President's priorities and objectives under Executive Orders 12866 and 13563 with policies covering acquisition, travel, and property and management practices to promote efficient Government operations. OGP's strategic direction is to ensure that Government-wide policies encourage agencies to develop and utilize the best, most cost effective management practices for the conduct of their specific programs. To reach the goal of improving Government-wide management of property, technology, and administrative services, OGP builds and maintains a policy framework by: (1) Incorporating the requirements of Federal laws, Executive orders, and other regulatory material into policies and guidelines; (2) facilitating Government-wide reform to provide Federal managers with business-like incentives and tools and flexibility to prudently manage their assets; (3) identifying, evaluating, and promoting best practices to improve efficiency of management processes; and (4) performing ongoing analysis of existing rules that may be obsolete, unnecessary, unjustified, excessively burdensome, or counterproductive.

OGP's policy regulations are described in the following subsections:

Office of Asset and Transportation Management (Federal Travel Regulation)

The Federal Travel Regulation (FTR) enumerates the travel and relocation policy for all title 5 Executive agency employees and others, as specified therein. The Code of Federal Regulations (CFR) is available at *www.gpoaccess.gov/cfr.* Each version is updated as official changes are published in the **Federal Register**. **Federal Register** publications and complete versions of the FTR are available at *www.gsa.gov/ftr.*

The FTR is the regulation contained in 41 Code of Federal Regulations (CFR),

chapters 300 through 304, that implements statutory requirements and executive branch policies for official travel by Federal civilian employees and others authorized to travel at Government expense.

The Administrator of General Services promulgates the FTR to: (a) Interpret statutory and other policy requirements in a manner that balances the need to ensure that official travel is conducted in a responsible manner with the need to minimize administrative costs; and (b) communicate the resulting policies in a clear manner to Federal agencies and employees.

Office of Asset and Transportation Management (Federal Management Regulation)

The Federal Management Regulation (FMR) establishes policy for aircraft, transportation, personal property, real property, and mail management. The FMR is the successor regulation to the Federal Property Management Regulation (FPMR), and it contains updated regulatory policies originally found in the FPMR. However, it does not contain FPMR material that describes how to do business with GSA.

Office of Acquisition Policy (General Services Administration Acquisition Manual (GSAM) and the General Services Administration Acquisition Regulation (GSAR))

GSA's internal rules and practices on how it buys goods and services from its business partners are covered by the General Services Administration Acquisition Manual (GSAM), which implements and supplements the Federal Acquisition Regulation at GSA. The GSAM comprises both a non-regulatory portion (GSAM), which reflects policies with no external impact, and a regulatory portion, the General Services Administration Acquisition Regulation (GSAR). The GSAR establishes agency acquisition regulations that affect GSA's business partners (*e.g.* prospective offerors and contractors) and acquisition of leasehold interests in real property. The latter are primarily established under the authority of 40 U.S.C. 585. The GSAR implements contract clauses, solicitation provisions, and forms that control the relationship between GSA and contractors and prospective contractors.

II. Statement of Regulatory and Deregulatory Priorities

FTR Regulatory Priorities

In fiscal year 2017, GSA plans to amend the FTR by:

- Revising chapter 301, Temporary Duty Travel, ensuring accountability and transparency. This revision will ensure agencies' travel for missions is efficient and effective, reduces costs, promotes sustainability, or incorporates industry best practices at the lowest logical travel cost.
- Revising chapters 301; Temporary Duty (TDY) Travel Allowances and 304, Payment of Travel Expenses from a Non-Federal Source to clarify the full or partial waiver of conference registration fees from a non-Federal conference organizer.

FMR Regulatory Priorities

In fiscal year 2017, GSA plans to amend the FMR by:

- Revising rules regarding management of Federal real property;
- Revising rules regarding management of Federal personal property.
- Revising rules under management of transportation.

FPMR Regulatory Priorities

- Migrating regulations regarding the supply and procurement of Government personal property management from the FPMR to the FMR.
- Incorporating the penalty inflation adjustments for the civil monetary penalties.

GSAR Regulatory Priorities

GSA plans, to update the GSAR to maintain consistency with the Federal Acquisition Regulation (FAR) and to implement streamlined and innovative acquisition procedures that contractors, offerors, and GSA contracting personnel can utilize when entering into and administering contractual relationships. Current GSAR initiatives are focused on—

- Providing consistency with the FAR;
- Eliminating coverage that duplicates the FAR or creates inconsistencies within the GSAR;
- Rewriting sections that have become irrelevant because of changes in technology or business processes or that place unnecessary administrative burdens on contractors and the Government;
- Streamlining or simplifying the regulation;
- Rolling up coverage from the services and regions/zones that should be in the GSAR, specifically targeting PBS's construction contracting policies and the GSA Schedules Program; and
- Streamlining the evaluation process for contracts containing commercial supplier agreements.

General Services Property Management Regulation

- Updating and streamlining the Freedom of Information Act regulations.

Regulations of Concern to Small Businesses

GSAR rules are relevant to small businesses that do or wish to do business with the Federal Government. GSAR Case 2015–G512, Unenforceable Commercial Supplier Agreement Terms is of interest to small businesses as it proposes a way to streamline the evaluation process to award contracts containing commercial supplier agreements. By streamlining this process, GSA anticipates reducing barriers to entry for small businesses.

Regulations Which Promote Open Government and Disclosure

There are currently no regulations which promote open Government and disclosure.

III. Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (2011), the GSA retrospective review and analysis final and updated regulations plan can be found at *www.gsa.gov/improvingregulations.* The following RINS are included in the Retrospective Review.

Regulation Identifier No.	Title
	Proposed Rule Stage
3090–AJ63	General Services Administration Regulation (GSAR); GSAR Case 2015–G503; Construction Contract Administration.
3090–AJ64	General Services Administration Regulation (GSAR); GSAR Case 2015–G506; Construction Manager as Constructor Contracting.
3090–AJ65	General Services Administration Regulation (GSAR); GSAR Case 2015–G505; Architect-Engineer Selection Procedures.

Regulation Identifier No.	Title
3090–AJ66	General Services Administration Regulation (GSAR); GSAR Case 2015–G504; Design-Build Selection Procedures.
3090–AJ71	Federal Management Regulation (FMR); FMR Case 2016–102–2, Designation of Authority and Location of Space.
3090–AJ74	General Services Property Management Regulation (GSPMR) GSPMR Case 2016–105–1; Public Availability of Agency Records and Informational Materials Inbox.
3090–AJ75	General Services Administration Regulation (GSAR); GSAR Case 2016–G506;Federal Supply Schedule, Order-Level Materials.
	Final Rule Stage
3090–AJ50	Federal Property Management Regulations (FPMR)/Federal Management Regulation (FMR) FPMR Case 2014–101–1; FMR Case 2014–102–2, Supply and Procurement.
3090–AJ56	Federal Travel Regulation (FTR); FTR Case 2015–304, Clarifying Agency Responsibilities Concerning Reimbursement for Automatic Teller Machine (ATM) Fees and Laundry, Cleaning and Pressing of Clothing Expenses.
3090–AJ59	Federal Management Regulation (FMR); FMR Case 2015–102–2, Transportation Payment and Audit.
3090–AJ60	Federal Management Regulation (FMR); FMR Case 2015–102–3, Art-in-Architecture.
3090–AJ67	General Services Administration Regulation (GSAR); GSAR Case 2015–G512, Unenforceable Commercial Supplier Agreement Terms.
3090–AJ68	Federal Travel Regulation (FTR); FTR 2015–303, Optimal Use of the Government Contractor-Issued Travel Charge Card.
3090–AJ69	Federal Travel Regulation (FTR); FTR Case 2016–301, Clarification of Payment In Kind for Speakers at Meetings and Conferences.
3090–AJ70	Federal Property Management Regulation; FPMR Case 2016–101–1; Program Fraud Civil Remedies Act of 1986, Civil Monetary Penalties Inflation Adjustment.
3090–AJ72	Federal Management Regulation (FMR); FMR Case 2016–102–1; Federal Real Property Profile.
3090–AJ73	Federal Management Regulation (FMR); FMR Case 2010–102–3, Sale of Personal Property.
3090–AJ76	Federal Management Regulation (FMR); FMR Case 2016–102–3, Utility Services.
3090–AJ77	Federal Management Regulation (FMR); FMR Case 2016–102–4, Historic Preservation.
	Completed Actions
3090–AI51	General Service Administration Acquisition Regulation (GSAR); GSAR Case 2007–G500, Rewrite of GSAR Part 517, Special Contracting Methods.
3090–AI76	General Services Administration Acquisition Regulation (GSAR); GSAR Case 2008–G506, Rewrite of GSAR Part 515, Contracting by Negotiation.
3090–AJ43	General Services Administration Acquisition Regulation (GSAR); GSAR Case 2010–G511, Purchasing by Non-Federal Entities.
3090–AJ51	General Services Administration Acquisition Regulation (GSAR); GSAR Case 2013–G504, Transactional Data Reporting.

Dated: September 1, 2016.

Troy Cribb,

Associate Administrator, Office of Government-wide Policy.

BILLING CODE 6820–34–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

Statement of Regulatory Priorities

The National Aeronautics and Space Administration (NASA) aim is to increase human understanding of the solar system and the universe that contains it and to improve American aeronautics ability. NASA's basic organization consists of the Headquarters, nine field Centers, the Jet Propulsion Laboratory (a Federally Funded Research and Development Center), and several component installations which report to Center Directors. Responsibility for overall planning, coordination, and control of NASA programs is vested in NASA Headquarters located in Washington, DC.

NASA continues to implement programs according to its 2014 Strategic Plan. The Agency's mission is to ''Drive advances in science, technology, aeronautics, and space exploration to enhance knowledge, education, innovation, economic vitality, and stewardship of the Earth.'' The FY 2014 Strategic Plan, (available at *http://www.nasa.gov/sites/default/files/files/2014 NASA Strategic Plan.pdf*), guides NASA's program activities through a framework of the following three strategic goals:

- *Strategic Goal 1:* Expand the frontiers of knowledge, capability, and opportunity in space.
- *Strategic Goal 2:* Advance understanding of Earth and develop technologies to improve the quality of life on our home planet.
- *Strategic Goal 3:* Serve the American public and accomplish our mission by effectively managing our people, technical capabilities, and infrastructure.

In the decades since Congress enacted the National Aeronautics and Space Act of 1958, NASA has challenged its scientific and engineering capabilities in pursuing its mission, generating tremendous results and benefits for humankind. NASA will continue to push scientific and technical boundaries in pursuit of these goals.

International Regulatory Cooperation

As the President noted in Executive Order 13609, ''international regulatory cooperation, consistent with domestic law and prerogatives and U.S. trade policy, can be an important means of promoting'' public health, welfare, safety, and our environment as well as economic growth, innovation, competitiveness, and job creation. Accordingly, in Executive Order 13609, the President requires each executive agency to include in its Regulatory Plan a summary of its international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations.

In August 2009, the President directed a broad-based interagency review of the U.S. export control system, with the goal of strengthening national security by focusing efforts on controlling the most critical products and technologies and by enhancing the competitiveness of US manufacturing and technology sectors. While NASA does not have any

regulations implementing this initiative, the Agency does serve on the interagency review team in a consultative and supportive role for this process, along with the Department of Defense, the Department of State, and the Department of Commerce.

In addition, NASA serves as one of the signatories to the Federal Acquisition Regulation (FAR). The FAR at 48 CFR chapter 1, contains procurement regulations that apply to NASA and other Federal agencies. Pursuant to 41 U.S.C. 1302 and FAR 1.103(b), the FAR is jointly prepared, issued, and maintained by the Secretary of Defense, the Administrator of General Services, and the Administrator, National Aeronautics and Space Administration, under their several statutory authorities. NASA implements and supplements FAR requirements through the NASA FAR Supplement (NFS), 48 CFR chapter 18. NASA finalized the entire NFS rewrite initiative this year to eliminate unnecessary and burdensome regulations, clarify regulatory language, and simplify processes. More than 1.9 million hours of information collection requirements (ICRs) were identified as no longer required and duplicative of active FAR-level ICRs. Specifically, OMB control numbers 2700–0085, 2700–0086, and 2700–0087 were discontinued as part of the NFS rewrite initiative. The Agency will continue to analyze the NFS to implement procurement-related statutes, Executive orders, NASA initiatives, and Federal procurement policy that streamline current processes and procedures.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13579 ''Regulation and Independent Regulatory Agencies'' (Jul. 11, 2011), NASA regulations associated with its retrospective review and analysis are described in the Agency's final retrospective plan of existing regulations. NASA's final plan and updates can be found at *http://www.nasa.gov/open*, under the Open Government News. Below describes the rulemakings that were recently completed or are near completion.

Rulemakings That Were Streamlined and Reduced Unjustified Burdens

1. Discrimination on Basis of Handicap [14 CFR 1251]—NASA has finalized its section 504 regulations to incorporate changes to the definition of disability required by the Americans with Disabilities Act (ADA) Amendments Act of 2008; include an affirmative statement of the longstanding requirement for reasonable accommodations in programs, services, and activities; include a definition of direct threat and a provision describing the parameters of the existing direct threat defense to a claim of discrimination; clarify the existing obligation to provide auxiliary aids and services to qualified individuals with disabilities; update the methods of communication that recipients may use to inform program beneficiaries of their obligation to comply with section 504 to reflect changes in technology, adopt updated accessibility standards applicable to the design, construction, and alteration of buildings and facilities; establish time periods for compliance with these updated accessibility standards; provide NASA with access to recipient data and records to determine compliance with section 504; and make administrative updates to correct titles. These amendments will reduce administrative burdens imposed on the public [81 FR 3703].

2. NASA FAR Supplement: Safety and Health Measures and Mishap Reporting [48 CFR 1852.233]—NASA finalized its regulations to revise a current clause related to safety and health measures and mishaps reporting by narrowing the application of the clause, resulting in a decrease in the reporting burden on contractors while reinforcing the measures contractors at NASA facilities must take to protect the safety of their workers, NASA employees, the public, and high-value assets. These amendments streamlined and reduced reporting requirements imposed on the public [80 FR 73675].

3. Clarification of Award Fee Evaluations and Payments—[48 CFR 1816 and 1852] NASA issued a final rule amending the NASA Federal Acquisition Regulation Supplement (NFS) to clarify NASA's award fee process by incorporating terms used in award-fee contracting; guidance relative to final award-fee evaluations; release of source selection information; and the calculation of the provisional award fee payment percentage in NASA end-item award-fee contracts [81 FR 50365].

4. Cooperative Agreements with Commercial Firms—[14 CFR 1274] NASA issued a final rule amending its regulation on Cooperative Agreements with Commercial Firms to implement the requirements of section 872 of the National Defense Authorization Act for Fiscal Year 2009 for recipients and NASA staff to report information that will appear in the Federal Awardee Performance and Integrity Information System (FAPIIS) [81 FR 35583].

Rulemakings That Were Modified, Streamlined, Expanded, or Repealed

5. Space Flight [14 CFR 1214]—NASA amended its regulations to remove language that refers to the retired Space Shuttle Program and to clarify language for other ongoing programs that require some of this rule to remain in place [81 FR 8545].

6. NASA Protective Services [14 CFR 1204]—NASA amended its traffic enforcement regulation to correct citations and to clarify the regulation's scope, policy, responsibilities, procedures, and violation descriptions [81 FR 70151].

7. Processing of Monetary Claims [14 CFR 1261]—NASA is amending its regulations to change the amount to collect installment payments from $20,000 to $100,000 to align with Title II, Claims of the United States Government, section 3711(a)(2) Collection and Compromise. This regulation will also be amended to include the rules for the use of contractors for debt collection and new provisions allowing for debts to be transferred to the Treasury Department for direct collection, as prescribed by Federal Debt Collection Procedures Act of 1990.

8. Duty Free Entry of Space Articles [14 CFR 1217]—NASA amended its regulations to remove language that refers to the Space Shuttle Program and to clarify language for other ongoing programs that require some of this rule to remain in place [80 FR 45864].

9. Removal of Obsolete Regulations [14 CFR 1216]—NASA amended its regulations to remove regulatory text that is covered in internal NASA policies and requirements [80 FR 30352].

10. Administrative Updates [14 CFR 1207, 1245, 1262, 1263, 1264, & 1266] NASA amended its regulations to make administrative updates to correct spelling citations [80 FR 42028].

11. Removal of Outdated and Duplicative Guidance [48 CFR 1817 and 1852]—NASA amended the NASA FAR Supplement (NFS) to remove duplicative language of the FAR and superseded NFS guidance. The revision is part of NASA's retrospective plan under Executive Order (EO) 13563 completed in August 2011 [81 FR 39871].

Rulemaking That Is of Particular Concerns to Small Business

Abstracts for other regulations that will be amended or repealed between October 2016 and October 2017 are reported in the fall 2016 edition of Unified Agenda of Federal Regulatory and Deregulation actions.

Regulations That Office of Procurement Intends To Publish Between Now and October 2017

1. Contractor Financial Reporting of Property [48 CFR 1845, 1852)—NASA is proposing to amend the NASA Federal Acquisition Regulation Supplement (NFS) to add a monthly reporting requirement for contractors having custody of $10 million or more in NASA-owned property, plant, and equipment (PP&E) [81 FR 48726].

2. Revised Voucher Submission & Payment Process [48 CFR 1816, 1832, 1842, 1852]—NASA is proposing to issue an interim rule amending the NASA Federal Acquisition Regulation Supplement (NFS) to implement revisions to the voucher submittal and payment process. These revisions are necessary due to section 893 of the National Defense Authorization Act for Fiscal Year 2016 prohibiting the Defense Contract Audit Agency (DCAA) from performing audit work for non-Defense Agencies. NASA had delegated to DCAA the task of reviewing contractor requests for payment under NASA cost-type contracts.

3. Removal of NFS clause 1852.243–70, Engineering Change Proposals [48 CFR 1852]—NASA is proposing to amend the NASA FAR Supplement (NFS) to remove NFS clause 1852.243–70, Engineering Change Proposals (ECPs) basic clause with its Alternate I & II and associated information collection from the NFS.

4. Award Term [48 CFR 1816 and 1852]—NASA is proposing to revise the NFS to implement policy addressing the use of ''award terms'' or additional contract periods of performance for which a contractor may earn if the contractor's performance is superior, the Government has an ongoing need for the requirement, and funds are available for the additional period of performance. The purpose of the policy is to provide a non-monetary incentive for contractors whose performance is better than the ''average'' or ''acceptable'' level.

5. Revisions to Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards [2 CFR 1800]—NASA is proposing to amend the NASA regulation, titled Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards to modify the requirements related to information contained in a Federal award for commercial firms with no cost sharing requirement and to add new or modify existing terms and conditions related to indirect cost charges and access to research results.

BILLING CODE 7510–13–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

Statement of Regulatory Priorities

Overview

The National Archives and Records Administration (NARA) primarily issues regulations directed to other Federal agencies and to the public. These regulations include records management, information services, access to and use of NARA holdings, and grant programs. For example, records management regulations directed to Federal agencies concern the proper management and disposition of Federal records. Through the Information Security Oversight Office (ISOO), NARA also issues Government-wide regulations concerning information security classification and declassification programs. NARA regulations directed to the public address access to and use of our historically valuable holdings, including archives, donated historical materials, Nixon Presidential materials, and Presidential records. NARA also issues regulations relating to the National Historical Publications and Records Commission (NHPRC) grant programs.

NARA has two regulatory priorities for fiscal year 2017, which are included in The Regulatory Plan. The first priority is a substantial revision to NARA's National Industrial Security Program (NISP) regulations at 32 CFR 2004. The NISP regulations govern release of classified information to contractors and other entities that enter agreements with the Federal Government involving access to classified information. Although we are proposing to substantially revise the regulation, the proposed revisions would effect only minor changes to the program's requirements for contractors and other entities. The proposed changes primarily include new sections setting out agency obligations in the course of implementing the program that reflect already-existing requirements for industry contained in the National Industrial Security Program Operating Manual (NISPOM), and streamline or clarify other sections of the regulation. In addition, a small portion of the proposed revisions add requirements from Executive Order 13587 to implement the insider threat program.

And the second priority this fiscal year are revisions to the Federal records management regulations found at 36 CFR Chapter XII, Subchapter B (phases I, II, and III). The proposed changes include changes resulting from the 2011 Presidential Memorandum on Managing Government Records, the 2012 Managing Government Records Directive (M–12–18), and Public Law 113–187, The Presidential and Federal Records Acts Amendments of 2014. The proposed rules will affect Federal agencies' records management programs relating to proper records creation and maintenance, adequate documentation, electronic recordkeeping requirements, use of the Electronic Records Archive (ERA) for records transfer, and records disposition.

Phase I (RIN 3095–AB74) includes changes to provisions in 36 CFR parts 1223 (Managing Essential Records), 1224 (Records Disposition Programs), 1227 (General Records Schedules), 1229 (Emergency Authorization to Destroy Records), 1232 (Transfer of Records to Records Storage Facilities), 1233 (Transfer Use and Disposition of Records in a NARA Federal Records Center), and 1239 (Program Assistance and Inspections). These regulations were published in a proposed rulemaking in March 2016 and were open for public comment through May. During the course of addressing the comments we received, we determined we need to undertake a more substantial revision, which we are focusing on this fiscal year. We anticipate publishing a new proposed rule around the end of FY 2017.

Phase II (RIN 3095–AB89) includes changes to provisions in 36 CFR parts 1235 (Transfer of Records to the National Archives of the United States), 1236 (Electronic records management), and 1237 (Audiovisual Cartographic and Related Records Management). These regulations were published in a proposed rulemaking in July 2016 and were open for public comment through September. We are currently addressing the comments we received and, similarly to Phase I, we have determined that we should do a more significant revision. As a result, we anticipate publishing a new proposed rule on these regulations in FY 2018.

Phase III (RIN 3095–AB85) includes changes to provisions in 36 CFR parts 1220 (Federal Records General), 1222 (Creation and Maintenance of Federal Records), 1225 (Scheduling records), 1226 (Implementing disposition), 1228 (Loan of Permanent and Unscheduled Records), 1230 (Unlawful or Accidental Removal, Defacing, Alteration, or Destruction of Records), 1231 (Transfer of Records from the Custody of one Executive Agency to Another), 1234

(Facility standards for records storage facilities), 1236 (Electronic Records Management), and 1238 (Microforms records management). We are currently drafting the proposed revisions to these regulations and project publication of a proposed rulemaking on these regulations after we have published new proposed rules for phases I and II.

BILLING CODE 7515–01–P

U.S. OFFICE OF PERSONNEL MANAGEMENT

Statement of Regulatory and Deregulatory Priorities

Fall 2016 Unified Agenda

I. Mission and Overview

OPM works in several broad categories to recruit, retain and honor a world-class workforce for the American people.

- We manage Federal job announcement postings at USAJOBS.gov, and set policy on governmentwide hiring procedures.
- We conduct background investigations for prospective employees and security clearances across government, with hundreds of thousands of cases each year.
- We uphold and defend the merit systems in Federal civil service, making sure that the Federal workforce uses fair practices in all aspects of personnel management.
- We manage pension benefits for retired Federal employees and their families. We also administer health and other insurance programs for Federal employees and retirees.
- We provide training and development programs and other management tools for Federal employees and agencies.
- In many cases, we take the lead in developing, testing and implementing new governmentwide policies that relate to personnel issues.

Altogether, we work to make the Federal government America's model employer for the 21st century.

II. Statement of Regulatory and Deregulatory Priorities

Management Priorities

- Appointment of Current and Former Land Management Employees

3206–AN28

The U.S. Office of Personnel Management (OPM) proposes regulations that will allow current and former land management employees to compete for permanent positions in the competitive service at a land management agency or any agency for any position under internal merit promotion procedures. This appointment into the competitive service is authorized in Public Law 114–47.

- Senior Employee Performance Management System Certification

3206–AL20

The U.S. Office of Personnel Management (OPM) is proposing changes to the senior employee performance management system certification regulations which will ultimately replace interim regulations published in 2004. Proposed changes reflect lessons learned from several years of certifying agency Senior Executive Service (SES) and Senior-Level (SL) and Scientific and Professional (ST) performance management systems and recommendations from a cross-agency workgroup.

- Veterans' Preference

3206–AM79

The U.S. Office of Personnel Management (OPM) issued interim regulations to implement statutory changes pertaining to veterans' preference. These changes were in response to the Hubbard Act, which broadened the category of individuals eligible for veterans' preference; and to implement the VOW (Veterans Opportunity to Work) to Hire Heroes Act of 2011, which requires Federal agencies to treat certain active duty service members as preference eligibles for purposes of competing for a position in the competitive service, even though the service members have not been discharged or released from active duty and do not have a Department of Defense (DoD) form 214, Certificate of Release or Discharge from Active Duty. In addition, OPM updated its regulations to reference existing requirements for the alternative ranking and selection procedure called ''category rating;'' and to add a reference to the end date of Operation Iraqi Freedom, which affected veteran status and preference eligibility. This action will align OPM's regulations with the existing statute.

- Recruitment, Selection, and Placement (General) and Suitability (aka Ban the Box)

3206–AN25

The U.S. Office of Personnel Management (OPM) is proposing to revise its regulations pertaining to when, during the hiring process, a hiring agency can make a suitability determination on an applicant for Federal employment. OPM is proposing this change in response to a Presidential directive. On November 2, 2015, the President directed OPM, ''. . .to take action where it can by modifying its rules to delay inquiries into criminal history until later in the hiring process.'' The intended effect of this proposal is to better ensure that applicants from all segments of society, including those with prior criminal histories, receive a fair opportunity to compete for Federal employment.

- Federal Employees Health Benefits Program: Removal of Ineligible Individuals From Existing Enrollments

3206–AN09

The U.S. Office of Personnel Management (OPM) is issuing a proposed rule to clarify the process for removing ineligible individuals from Federal Employees Health Benefits (FEHB) Program Self and Family enrollments.

- Employment in the Excepted Service

3206–AN30

The U.S. Office of Personnel Management (OPM) is proposing to revise its regulations governing employment in the excepted service. The proposed rules will clarify the existing policy on exemptions from excepted service selection procedures, and provide additional procedures for passing over a preference eligible veteran with a compensable disability of 30 percent or more.

- Noncompetitive Appointment of Certain Military Spouses

3206–AM76

The U.S. Office of Personnel Management (OPM) will limit to one the number of permanent appointments spouses of 100 percent disabled and spouses of deceased members of the Armed Forces may receive under this noncompetitive hiring authority. OPM is making this change based on the provisions of the FY 2013 National Defense Authorization Act (NDAA).

- Personnel Management in Agencies

3206–AL98

The U.S. Office of Personnel Management (OPM) will issue a final rule that will provide regulatory definitions for various

documents related to the strategic management of human resources, clarify requirements regarding the systems and metrics for managing human resources in the Federal Government, streamline/clarify procedures agencies are required to follow, eliminate the Human Capital Management Report, and reflect the planning and reporting requirements of the Government Performance and Results Modernization Act.

• Medical Qualification Determinations

3206–AL14

The U.S. Office of Personnel Management (OPM) will revise its regulations for medical qualification determinations. The revised regulations would update references and language; add and modify definitions; clarify coverage and applicability; address the need for medical documentation and medical examination and/or testing for an applicant or employee whose position may or may not have medical standards, physical requirements and/or physical fitness standards or testing; and may recommend the establishment of agency medical review boards. The final rule would provide agencies with more comprehensive guidance regarding medical evaluation and clearance procedures and implementation of a comprehensive physical fitness and medical standards program for applicants and employees.

• Prevailing Rate Systems; Redefinition of the New York, NY, and Philadelphia, PA, Appropriated Fund Federal Wage System Wage Areas

3206–AN29

The U.S. Office of Personnel Management (OPM) is issuing a proposed rule that would redefine the geographic boundaries of the New York, NY, and Philadelphia, PA, appropriated fund Federal Wage System (FWS) wage areas. The proposed rule would redefine the Joint Base McGuire-Dix-Lakehurst portions of Burlington County, NJ, and Ocean County, NJ, that are currently defined to the Philadelphia wage area to the New York wage area so that the entire Joint Base is covered by a single wage schedule. This change is based on a majority recommendation of the Federal Prevailing Rate Advisory Committee (FPRAC), the national labor-management committee responsible for advising OPM on the administration of the FWS.

• Pay Administration Under the FLSA

3206–AN41

The U.S. Office of Personnel Management (OPM) is issuing interim final regulations for part 551 subpart B to make OPM's regulations consistent with updates to Department of Labor regulations that define which white collar workers are protected by the FLSA's minimum wage and overtime standards. 79 FR 18737 (Apr. 3, 2014). While OPM's regulations are not required to conform with DOL's regulations, OPM believes that updates to part 551 are appropriate and consistent with the President's goal of ensuring workers are paid a fair day's pay for a fair day's work.

• Competitive Service; Shared Certificates

3206–AN46

The U.S. Office of Personnel Management (OPM) will issue interim regulations to implement the Competitive Service Act of 2015 which authorizes agencies to share certificates when filling competitive service positions.

• Compensatory Time Off for Religious Observances

3206–AL55

The U.S. Office of Personnel Management (OPM) will issue a final rule regarding compensatory time off for religious observances. The final regulation will address comments to the proposed rule (78 FR 53695), and will clarify employee and agency responsibilities, provide timeframes for earning and using religious compensatory time off, and define key terms.

• Federal Employees Health Benefits Program: Employee Prepayment of FEHB Contributions During Leave Without Pay (LWOP)

3206–AN33

The U.S. Office of Personnel Management (OPM) proposes to amend the Federal Employees Health Benefits (FEHB) regulations at 5 CFR part 890 to provide agencies with the option to require payment of FEHB premium contributions from employees in Leave Without Pay (LWOP) status for the time period they are in LWOP status.

• Federal Employees Health Benefits Program; Tribes and Tribal Organizations

3206–AM40

The U.S. Office of Personnel Management (OPM) proposes to amend the Federal Employees Health Benefits (FEHB) regulations at 5 CFR part 890 to include enrollments for eligible employees of Tribes and Tribal organizations under the provisions of the Affordable Care Act of 2010.

• Privacy Procedures for Personnel Records

3206–AN27

The Office of Personnel Management (OPM) proposes to amend part 297 of title 5, Code of Federal Regulations, to implement a timeframe to submit a request for administrative review on internal or central system of records. This proposed change will allow greater efficiency in processing appeals and requests for administrative review and will also improve the office's records maintenance and disposal policies.

• Federal Employees' Retirement System; Government Costs

3206–AN22

The Office of Personnel Management (OPM) proposes to amend 5 CFR part 841 to clarify the process by which the U.S. Postal Service and the U.S. Department of the Treasury may request reconsideration of OPM's computation of the supplemental liability. This proposed rule will also clarify the employee categories it will use for computing the FERS normal cost percentages covered under FERS (Federal Employees Retirement System), FERS–RAE (FERS Revised Annuity Employees), and FERS FRAE (FERS Further Revised Annuity Employees). Finally, it will also clarify the definition of present value factors as provided in 5 CFR part 831; 5 CFR part 839; 5 CFR part 841; 5 CFR part 842; and 5 CFR part 847.

BILLING CODE 6325–44–P

PENSION BENEFIT GUARANTY CORPORATION (PBGC)

Statement of Regulatory and Deregulatory Priorities

The Pension Benefit Guaranty Corporation (PBGC) protects the pensions of more than 40 million people in nearly 24,000 private-sector defined benefit plans. PBGC receives no tax revenues. Operations are financed by insurance premiums, investment income, assets from pension plans trusteed by PBGC, and recoveries from

the companies formerly responsible for the trusteed plans.

To carry out these functions, PBGC issues regulations on such matters as termination, payment of premiums, reporting and disclosure, and assessment and collection of employer liability. The Corporation is committed to issuing simple, understandable, flexible, and timely regulations to help affected parties.

PBGC continues to follow a regulatory approach that seeks to encourage the maintenance of existing defined benefit plans or the establishment of new plans. Thus, in developing new regulations and reviewing existing regulations, the focus, to the extent possible, is to reduce burdens on plans, employers, and participants, and to ease and simplify employer compliance. PBGC particularly strives to meet the needs of small businesses that sponsor defined benefit plans.

PBGC develops its regulations in accordance with the principles set forth in Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), and PBGC's Plan for Regulatory Review (Regulatory Review Plan).[15] This Statement of Regulatory and Deregulatory Priorities reflects PBGC's ongoing implementation of its Regulatory Review Plan.

PBGC Insurance Programs

PBGC administers two insurance programs for privately maintained defined benefit plans under title IV of the Employee Retirement Income Security Act of 1974 (ERISA):

- *Single-Employer Program.* Under the single-employer program, when a plan terminates with insufficient assets to cover all plan benefits (distress and involuntary terminations), PBGC pays plan benefits that are guaranteed under title IV. PBGC also pays nonguaranteed plan benefits to the extent funded by plan assets or recoveries from employers.
- *Multiemployer Program.* The smaller multiemployer program covers collectively bargained plans involving more than one unrelated employer. PBGC provides financial assistance (in the form of a loan) to the plan if the plan is unable to pay benefits at the guaranteed level. The guarantee is structured differently from, and generally significantly smaller than, the single-employer guarantee.

At the end of FY 2015, PBGC had a deficit of $24 billion in its single-employer insurance program and $52 billion in its multiemployer insurance program. While the financial position of the single-employer program is likely (but not certain) to improve, the multiemployer program is likely to run out of funds by 2025. Substantial increases in premium revenue will be needed to avoid cuts in multiemployer insurance program guarantees.

Regulatory Objectives and Priorities

PBGC's regulatory objectives and priorities are developed in the context of the Corporation's statutory purposes:

- To encourage voluntary private pension plans;
- To provide for the timely and uninterrupted payment of pension benefits; and
- To keep premiums at the lowest possible levels.

Pension plans and the statutory framework in which they are maintained and terminated are complex. Despite this complexity, PBGC is committed to issuing simple, understandable, flexible, and timely regulations and other guidance that do not impose undue burdens that could impede maintenance or establishment of defined benefit plans.

Through its regulations and other guidance, PBGC strives to minimize burdens on plans, plan sponsors, and plan participants; simplify filing; provide relief for small businesses and plans; and assist plans in complying with applicable requirements. To enhance policy-making through collaboration, PBGC also plans to continue to expand opportunities for public participation in rulemaking (see Open Government and Public Participation below).

PBGC's current regulatory objectives and priorities are to simplify its regulations and reduce burden, to enhance retirement security, and to implement statutory changes, particularly the Multiemployer Pension Reform Act of 2014 (MPRA) and the Pension Protection Act of 2006 (PPA 2006).

Enhancing Retirement Security

Missing participants. A major focus of PBGC's current regulatory efforts is to finalize rules to improve and expand the existing missing participants program to help connect more participants with their lost retirement savings. As authorized by PPA 2006, the expanded program will cover terminating defined contribution plans, non-covered defined benefit plans, and multiemployer plans, in addition to single-employer defined benefit plans. PBGC will continue to work with Internal Revenue Service and Department of Labor to coordinate government requirements for dealing with missing participant issues. PBGC published a proposal in September 2016. PBGC expects to publish a final regulation in FY 2017.

Rethinking Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), the following Regulatory Identifier Numbers (RINs) have been identified as associated with retrospective review and analysis consistent with the Corporation's final retrospective review plan. The regulatory actions associated with these RINs are described below.

Title	RIN	Effect on small business
Payment of Premiums; Late Payment Penalty Relief.	1212–AB32	Expected to reduce burden on small business.
Valuation Assumptions and Methods; Interest and Mortality.	1212–AA55	To Be Determined.
Benefit Payments.	1212–AB27	To Be Determined.
Administrative Review.	1212–AB35	To Be Determined.
Miscellaneous Corrections, Clarifications, and Improvements.	1212–AB34	To Be Determined.

Penalty relief for late payment of premiums. PBGC is lowering the rates of penalty charged for late payment of premiums by all plans, and providing a waiver of most of the penalty for plans with a history of premium compliance. In recent years, Congress has significantly increased PBGC premium rates. Since late payment charges are a percentage of unpaid premium, the penalties have gone up in proportion to the increases. PBGC is sensitive to the fact that a penalty assessed today may be several times what would have been assessed years ago for the same acts or omissions involving a plan with the same number of participants and the same unfunded vested benefits. Penalties under the new rule generally would be reduced by half and could be reduced by 80 percent for sponsors with good payment histories.

Valuation assumptions and methods; interest and mortality. PBGC plans to conduct a routine, periodic review of PBGC's regulations and policies to ensure that the actuarial and economic

[15] *http://www.pbgc.gov/documents/plan-for-regulatory-review.pdf.* Progress reports on the plan can be found at *http://www.pbgc.gov/res/laws-and-regulations/reducing-regulatory-burden.html.*

content remains current. PBGC plans to publish a proposed rule in FY 2017 that would amend its benefit valuation and asset allocation regulations by improving its valuation assumptions and methods. Chief among the modifications PBGC is considering are modifications to mortality rates and the format of its interest factors.

Benefit payments. PBGC plans to publish a proposed rule in FY 2017 to make clarifications and codify policies in PBGC's benefit payments and valuation regulations involving payment of lump sums, entitlement to a benefit, changes to benefit form, partial benefit distributions, and valuation of plan assets.

Administrative review. PBGC is proposing to update and improve its rules for administrative review of agency decisions.

Miscellaneous corrections, clarifications, and improvements. PBGC is proposing to make miscellaneous corrections, clarifications, and improvements to its regulations. PBGC intends to initiate future projects of this type to deal with minor issues that don't call for full-scale rulemaking projects.

Statutory Implementation

MPRA. MPRA established new options for trustees of multiemployer plans that will potentially run out of money to apply to PBGC for financial assistance. PBGC published a proposed rule on June 6, 2016, that would prescribe rules for facilitated mergers of multiemployer plans and conform the existing regulation to changes in the law. PBGC received 10 comments on the proposal and expects to publish a final rule early in FY 2017. This is the second PBGC rulemaking project based on MPRA requirements. The first, prescribing the application process and notice requirements for partitions of eligible multiemployer plans under MPRA, was finalized on December 23, 2015.

Cash balance plans. PPA 2006 changed the rules for determining benefits in cash balance plans and other statutory hybrid plans. In October 2011, PBGC published a proposed rule implementing the changes both in PBGC-trusteed plans and in plans that close out in the private sector.[16] Now that the Treasury Department has issued final regulations on statutory hybrid plans, PBGC is developing a final rule, which it expects to publish in FY 2017.

Owner-participant benefits. PPA 2006 changed the guarantee of owner-participant benefits in PBGC-trusteed plans. PBGC is developing a proposed rule implementing these changes, which it expects to publish in FY 2017.

Small Businesses

PBGC takes into account the special needs and concerns of small businesses in making policy. A large percentage of the plans insured by PBGC are small or maintained by small employers. PBGC has issued or is considering proposed rules that will focus on small businesses:

Missing participants. The missing participants rule discussed above would benefit small businesses by simplifying and streamlining current requirements, better coordinating with requirements of other agencies, and providing more options for sponsors of terminating non-covered plans.

Penalty relief for late payment of premiums. The late payment penalty relief rule discussed above benefits small businesses by reducing penalties for late premium payments by at least half.

Open Government and Increased Public Participation

PBGC is doing more to encourage public participation in the regulatory process. For example, PBGC's current efforts to reduce regulatory burden are in substantial part a response to public comments. The regulatory projects discussed above highlight PBGC's customer-focused efforts to reduce regulatory burden.

PBGC's Regulatory Review Plan sets forth ways to expand opportunities for public participation in the regulatory process. For example, in June 2013, PBGC held its first-ever regulatory hearing on the reportable events proposed rule, so that the agency would have a better understanding of the needs and concerns of plan administrators and plan sponsors. Discussion at that hearing informed PBGC's final rule. PBGC's 2013 Request for Information [17] on Missing Participants in Individual Account Plans and 2015 Request for Information [18] on Partitions and Facilitated Mergers Under MPRA are examples of PBGC's efforts to solicit public participation in the regulatory process.

PBGC plans to provide additional means for public involvement, including social media and continuing opportunity for public comment on PBGC's Web site.

PBGC also invites comments on the Regulatory Review Plan on an on-going basis as we engage in the review process. Comments should be sent to *murphy.deborah@pbgc.gov*.

PBGC will continue to look for ways to further improve its regulations.

U.S. SMALL BUSINESS ADMINISTRATION

Statement of Regulatory Priorities

Overview

The mission of the U.S. Small Business Administration (SBA) is to maintain and strengthen the Nation's economy by enabling the establishment and viability of small businesses and by assisting in economic recovery of communities after disasters. In carrying out this mission, SBA strives to improve the economic environment for small businesses, including those in areas that have significantly higher unemployment and lower income levels than the Nation's averages and those in traditionally underserved markets. The Agency serves as a guarantor of small business loans, and also provides management and technical assistance to existing or potential small business owners through various grants, cooperative agreements or contracts. This access to capital and other assistance provides a crucial foundation for those starting a new business, or growing an existing business and ultimately helps to create new jobs. SBA also provides direct financial assistance to homeowners, renters, and small business to help in the rebuilding of communities in the aftermath of a disaster.

Reducing Burden on Small Businesses

SBA's regulatory policy reflects a commitment to developing regulations that reduce or eliminate the burden on the public, in particular the Agency's core constituents—small businesses. SBA's regulatory process generally includes an assessment of the costs and benefits of the regulations as required by Executive Order 12866, ''Regulatory Planning and Review;'' Executive Order 13563, ''Improving Regulation and Regulatory Review;'' and the Regulatory Flexibility Act. SBA's program offices are particularly invested in finding ways to reduce the burden imposed by the Agency's core activities in its loan, innovation, and procurement programs.

Openness and Transparency

SBA promotes transparency, collaboration, and public participation in its rulemaking process. To that end, SBA routinely solicits comments on its

regulations, even those that are not subject to the public notice and comment requirement under the Administrative Procedures Act. Where appropriate, SBA also conducts hearings, webinars, and other public events as part of its regulatory process.

Regulatory Framework

The SBA's FY 2014 to FY 2018 strategic plan serves as the foundation for the regulations that the Agency will develop during the next twelve months. This Strategic Plan provides a framework for strengthening, streamlining, and simplifying SBA's programs while leveraging collaborative relationships with other agencies and the private sector to maximize the tools small business owners and entrepreneurs need to drive American innovation and strengthen the economy. The plan sets out three strategic goals: (1) Growing businesses and creating jobs; (2) serving as the voice for small business; and (3) building an SBA that meets the needs of today's and tomorrow's small businesses. In order to achieve these goals SBA will, among other objectives, focus on:

- Expanding access to capital through SBA's extensive lending network;
- Ensuring Federal contracting goals are met or exceeded by collaborating across the Federal Government to expand opportunities for small businesses and strengthen the integrity of the Federal contracting data and certification process;
- Strengthening SBA's relevance to high growth entrepreneurs and small businesses to more effectively drive innovation and job creation; and
- Mitigating risk and improving program oversight.

The regulations reported in SBA's semi-annual regulatory agenda and plan are intended to facilitate achievement of these goals and objectives. Over the next twelve months, SBA's highest regulatory priorities will be to implement the following regulations and program guidance: (1) Small Business Investment Company (SBIC) Program; Impact SBICs (RIN: 3245–AG66); and (2) Small Business Innovation Research Program and Small Business Technology Transfer Program Policy Directive (RIN: 3245–AG64).

(1) Small Business Investment Company (SBIC) Program; Impact SBICs (RIN: 3245–AG66)

This rule proposes to establish a regulatory structure for the SBIC program's Impact Investment Fund initiative, which is currently implemented via policy memorandum. The goal of the Impact Investment Fund is to support small business investment strategies that maximize financial returns while also yielding enhanced social, environmental, or economic impacts as part of the SBIC program's overall effort to supplement the flow of private equity and long-term loan funds to small businesses in underserved communities and the innovative sectors whose capital needs are not being met. The proposed rule supports the development of America's growing impact investing industry by making available a new type of SBIC license called an Impact SBIC to investment funds meeting the SBIC program's licensing qualifications, provides application and examination fee considerations to incentivize impact investing participation, establishes leverage eligibility requirements, and establishes reporting and performance measures for licensed funds to maintain Impact SBIC designation. The proposed rule would require an Impact SBIC to invest at least 50% of its total invested capital in one or both categories of impact investment: (a) SBA-identified impact investments, which are investments in small businesses located in geographic areas and sectors of national priority designated by SBA, such as Low- and Moderate- Income Zones (LMI); and/or (b) fund-identified impact investments, which are investments that meet an SBIC's own definition, subject to SBA's approval, of an ''Impact Investment,'' such as small businesses operating in the clean energy, education or healthcare sectors.

(2) Small Business Innovation Research Program and Small Business Technology Transfer Program Policy Directive (RIN: 3245–AG64)

This proposed Directive seeks to revise the Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Policy Directives. Specifically, SBA proposes to combine the two directives into one integrated Directive, clarify the Phase III preference afforded to SBIR and STTR small business awardees, add definitions relating to data rights, clarify the benchmarks for progress towards commercialization, and update language regarding the calculations of extramural Research/Research & Development budgets used to fund the SBIR/STTR programs.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), SBA developed a plan for the retrospective review of its regulations. Since that date SBA has issued several updates to this plan to reflect the Agency's ongoing efforts in carrying out this executive order. The final agency plan and review updates, which can be found at *http://www.sba.gov/about-sba/sba_performance/open_government/retrospective_review_of_regulations,* currently identify the rule and the policy directive discussed above.

SBA

Final Rule Stage

141. Small Business Innovation Research Program and Small Business Technology Transfer Program Policy Directive

Priority: Other Significant.
Legal Authority: 15 U.S.C. 638(p); Pub. L. 112–81, sec. 5001, *et seq.*
CFR Citation: 13 CFR ch 1.
Legal Deadline: None.
Abstract: SBA reviews its Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) program policy directives regularly to determine areas that need updating and further clarification. On November 7, 2014, SBA issued an advance notice of policy directive amendments and request for comments at 77 FR 66342. SBA explained that it intended to update the directives on a regular basis and to restructure and reorganize the directives, as well as address certain policy issues relating to SBIR and STTR data rights and Phase III work. In this ANPRM, SBA outlined what it believed were the issues concerning data rights and Phase III awards and requested feedback on several questions posed. The comments SBA received were generally in agreement that the sections of the directives relating to data rights and Phase III awards need further clarification.

On April 7, 2016, SBA issued a notice of policy directive amendments with a request for comments at 81 FR 20484. In this NPRM, SBA proposed clarification of the issues relating to both programs concerning data rights, Phase III awards, and miscellaneous issues such as benchmarks to commercialization achievement and the calculation of extramural budget. SBA also proposed combining both the SBIR and STTR policy directives into one because the general structure of both programs is the same.

Statement of Need: It is necessary to update the data rights, Phase III preference, benchmark sections, and clarify how agencies calculate extramural budget due to numerous

inquiries and requests for clarification received from SBIR and STTR Program Managers and small businesses regarding these issues. Requests for clarification indicate that there is confusion among participating agencies and small business concerns regarding these policy issues. It is necessary to combine the Policy Directives to increase ease of use and to reduce duplicity, as much of the language in the current Directives is identical for both programs. The clarifications and consolidation will provide clearer guidance and uniformity of these sections of the Policy Directive, and are necessary to enhance the efficient implementation of the programs.

Summary of Legal Basis: Section 9(j) and (p) of the Small Business Act, codified at 15 U.S.C. 638(j) & (p) requires SBA to issue directives to the SBIR/STTR participating agencies to simplify and standardize program proposals, selections, contracting, compliance, and audit procedures, while allowing the participating agencies flexibility in the operation of their individual programs.

Alternatives: If SBA does not amend the Policy Directives, the participating agencies and small business concerns will continue to need additional guidance and clarification regarding the implementation of data rights, Phase III awards, and the commercialization benchmarks.

Anticipated Cost and Benefits: The consolidation and revision of the SBIR/STTR Policy Directive is essential to the efficient implementation of the respective programs. There may be some costs associated with the consolidation and revision of the Policy Directives, such as updating current resource materials to reflect the clarifications and consolidation to one document; however, SBA anticipates such costs are not burdensome.

Risks: None identified.

SBA

142. Small Business Investment Company (SBIC) Program—Impact SBICS

Priority: Other Significant.

Legal Authority: 15 U.S.C. 681

CFR Citation: 13 CFR 107.

Legal Deadline: None.

Abstract: This rule will establish a regulatory structure for the SBIC Programs Impact Investment Fund, which is currently being implemented through a policy memorandum to interested applicants. The rule would establish in the regulations a new type of SBIC license called the Impact SBIC license and will include application and examination fee considerations to incentivize Impact Investment Fund participation. Impact SBICs may also be able to access Early Stage leverage on the same terms as Early Stage SBICs without applying through the Early Stage call process defined in 107.310. This will allow Impact SBICs with early stage strategies to apply for the program. The new license will be available to investment funds that meet the SBIC Programs licensing qualifications and commit to invest at least 50 percent of their invested capital in impact investments as defined in the rule. The rule would also outline reporting and performance measures for licensed funds to maintain Impact Investment Fund designation. The goal of the Impact Investment Fund is to support small business investment strategies that maximize financial returns while also yielding enhanced social environmental or economic impacts as part of the SBIC Programs overall effort to supplement the flow of private equity and long-term loan funds to small businesses whose capital needs are not being met.

Statement of Need: SBA originally announced the launch of the SBIC program's Impact Investing Initiative (Initiative) on April 7, 2011, with a commitment of $1 billion in debenture leverage over a 5-year period to SBICs that committed to deploy at least 50% of their total invested capital in small businesses located in low-to-moderate income areas, economically-distressed areas and rural areas, as well as small businesses active in the education and clean energy sectors. Subsequently, SBA made several changes to the Initiative in 2014, including renaming the Initiative the Impact Investment Fund, and expanding its scope to reflect SBA's commitment beyond the initial 5-year term. This rule follows that commitment by providing a permanent framework within the SBIC program's regulations, highlighting the important role of impact investing by supporting the development of America's growing impact investing industry, and seeking to expand the pool of investment capital available to underserved communities and innovative sectors. The rule requires an Impact SBIC to invest at least 50% of its total invested capital in one or both categories of impact investment: (1) SBA-identified impact investments, which are investments in small businesses located in geographic areas and sectors of national priority designated by SBA, such as Low and Moderate Income Zones; and (2) fund-identified impact investments, which are investments that meet an SBIC's own definition, subject to SBA's approval, of an Impact Investment, such as small businesses operating in the clean energy, education and/or healthcare sectors. The rule will encourage the creation of Impact SBICs by providing certain application and examination fee discounts to these funds.

Summary of Legal Basis: The policy goal of the Small Business Investment Act of 1958, 15 U.S.C. 661 *et seq.,* is to stimulate and supplement the flow of private equity capital and long-term loan funds to the nation's small businesses for the sound financing of their growth, expansion, and modernization. The Small Business Investment Act contains several provisions aimed at promoting the flow of capital to several special categories of small business, including those located in low income geographic areas, those engaged in energy-saving activities and smaller businesses, 15 U.S.C. 683(b)(2)(C), 683(b)(2)(D), 683(d). The rule was crafted to enhance the SBIC program's effectiveness in channeling much-needed capital to small businesses operating in these and other underserved areas and sectors of the U.S. economy.

Alternatives: SBA considered several alternatives to the regulation, including continuing its impact investment objectives solely through existing policy initiatives. However, those policy initiatives did not provide sufficient

incentives to attract Impact SBIC fund managers to the program. Moreover, SBA determined that it must demonstrate a lasting commitment to the Initiative by promulgating regulations. In addition, SBA considered restricting the definition of an Impact Investment to financings that meet requirements already outlined in federal regulations, such as Energy-Savings Investments, LMI Investments or investments in rural areas. These investments are aligned with federal policy priorities and are easy to define and monitor, but SBA determined a more accommodative approach would be more effective. The rule has been drafted to allow Impact SBIC applicants to make SBA-identified impact investments, which target federal priority areas, or make fund-identified impact investments that align with their own definitions of impact. This approach expands the reach of SBA's impact investing efforts beyond the limited subset of investments that meet existing regulatory criteria and promotes freedom of choice for impact fund managers to pursue an impact investing strategy based on their own definition of Impact Investment.

Anticipated Cost and Benefits: The rule will result in an approximate 6.1 basis point increase in the annual charge paid by all SBICs with outstanding leverage and will include *de minimis* additional oversight costs to SBA in monitoring the additional reporting requirements that Impact SBICs must comply with. The rule benefits SBA by encouraging SBICs to deploy capital to small businesses operating in geographic areas and sectors of national priority designated by SBA, and SBA expects that it will result in increased financings to small businesses taking innovative approaches in, among others, the educational, clean energy and healthcare sectors. As a corollary benefit, the rule will support the development of the impact investing industry more broadly by incorporating impact investing best practices, especially with regard to the measurement and assessment of impact.

Risks: None identified.

BILLING CODE 8025–01–P

FEDERAL ACQUISITION REGULATION (FAR)

I. Mission and Overview

The Federal Acquisition Regulation (FAR) was established to codify uniform policies for acquisition of supplies and services by executive agencies. It is issued and maintained jointly, pursuant to the Office of Federal Procurement Policy (OFPP) Reauthorization Act, under the statutory authorities granted to the Secretary of Defense, Administrator of General Services, and the Administrator, National Aeronautics and Space Administration. Statutory authorities to issue and revise the FAR have been delegated to the procurement executives in Department of Defense (DoD), GSA, and National Aeronautics and Space Administration (NASA).

II. Statement of Regulatory and Deregulatory Priorities

Federal Acquisition Regulation Priorities

Specific FAR cases that the FAR Council plans to address in fiscal year 2017 include:

SB—Regulations To Improve Small Businesses Opportunities in Government Contracting

Implementation of the Small Business Administration's final rule for section 1651 of the National Defense Authorization Act for Fiscal Year 2013. SBA's rule revised the limitations on subcontracting and the nonmanufacturer rule. Also implements SBA's regulatory clarifications concerning application of the limitations on subcontracting, nonmanufacturer rule, and size determination of joint ventures. (FAR Case 2016–011, Small Business Government Contracting and National Defense Authorization Act of 2013 Amendments)

Clarification on the participation of Federal Prison Industries in small business set-asides. Provides clarity under FAR subparts 19.8, 19.13, 19.14, and 19.15. (FAR Case 2016–010, FPI Participation in Small Business Set-Asides)

Clarification on 8(a) joint ventures. Clarifies that 8(a) joint ventures are not ''certified'' into the 8(a) program and that 8(a) joint venture agreements need not be ''approved'' by the SBA until contract award rather than at the time of proposal submission. (FAR Case 2015–031, Policy on 8(a) Joint Ventures)

Considers applicability of small business regulations to contracts performed outside the United States. FAR Case 2016–002, Applicability of Small Business Regulations Outside the United States)

Contracts under the Small Business Administration 8(a) Program—This case clarifies FAR subpart 19.8, ''Contracting with the Small Business Administration (The 8(a) Program).'' (FAR Case 2012–022)

Clarification of Requirement for Justifications for 8(a) Sole-Source Contracts—This case clarifies the requirement for a justification for 8(a) sole-source contracts, in response to GAO Report to the Chairman, Subcommittee on Contracting Oversight, Committee on Homeland Security and Governmental Affairs, U.S. Senate, entitled Federal Contracting: Slow Start to Implementation of Justifications for 8(a) Sole-Source Contracts (GAO–13–118 dated December 2012). (FAR Case 2013–018)

Set-Asides under Multiple Award Contracts—This case implements statutory requirements from the Small Business Jobs Act of 2010 and is aimed at providing agencies with clarifying guidance on how to use multiple-award contracts as a tool to increase Federal contracting opportunities for small businesses. (FAR Case 2014–002)

Payment of Subcontractors—This case implements section 1334 of the Small Business Jobs Act of 2010 and the Small Business Administration's (SBA) Final Rule 78 FR 42391, Small Business Subcontracting. The rule requires prime contractors of contracts requiring a subcontracting plan to notify the contracting officer in writing if the prime contractor pays a reduced price to a subcontractor or if payment is more than 90 days past due. A contracting officer will then use his or her best judgment in determining whether the late or reduced payment was justified and if not the contracting officer will record the identity of a prime contractor with a history of unjustified untimely payments to subcontractors in the Federal Awardee Performance and Integrity Information System (FAPIIS) or any successor system. (FAR Case 2014–004)

Labor—Regulations Which Promote the Welfare of Wage Earners

Equal Pay for Equal Work Among Employees Working for Covered Federal Contractors. The rule implements E.O. 13665, Non-Retaliation for Disclosure of Compensation Information. FAR Case 2016–007, Non-Retaliation for Disclosure of Compensation Information.

Combating Trafficking in Persons—Definition of ''Recruitment Fees''—This case considers a new definition for the term ''recruitment fees'' at the request of the Senior Policy Operating Group (SPOG) for Combating Trafficking in Persons. (FAR Case 2015–017)

Environmental Rules—Regulations That Promote Environmental Goals

Public Disclosure of Greenhouse Gas Emissions and Reduction Goals—Representation—This case creates an annual representation within the System for Award Management (SAM) for contractors to indicate if and where they publicly disclose GHG emissions and GHG reduction goals or targets. This information will help the Government assess supplier GHG management practices and assist agencies in developing strategies to engage with contractors to reduce supply chain emissions as directed in section 15 of Executive Order 13693, Planning for Federal Sustainability in the Next Decade, dated March 19, 2015. (FAR Case 2015–024)

Sustainable Acquisition—This case implements Executive Order 13693, Planning for Federal Sustainability in the Next Decade, which supersedes Executive orders 13423 and 13514. (FAR Case 2015–033)

Regulations That Promote Protection of Government Information and Systems

Privacy Training—This case creates a FAR clause to require contractors that (1) need access to a system of records, (2) handle personally identifiable information, or (3) design, develop, maintain, or operate a system of records on behalf of the Government, have their personnel complete privacy training. This addition complies with subsections (e) (agency requirements) and (m) (Government contractors) of the Privacy Act (5 U.S.C. 552a) (FAR Case 2010–013)

Organizational Conflicts of Interest and Unequal Access to Information—This case implements section 841 of the NDAA for FY 2009 (Pub. L. 110–147). Section 841 requires consideration of how to address the current needs of the acquisition community with regard to Organizational Conflicts of Interest. Separately addresses issues regarding unequal access to information. (FAR Case 2011–001)

Contractor Use of Information—This case addresses contractor access to controlled unclassified information. (FAR Case 2014–021)

Regulations Which Promote Ethics and Integrity in Contractor Performance

Prohibition on Contracting with Corporations with Delinquent Taxes or a Felony Conviction.—This case implements multiple sections of the Consolidated and Further Continuing Appropriations Act, 2015. (Pub. L. 113–235) to prohibit using any of the funds appropriated by the Act to enter into a contract with any corporation with a delinquent Federal tax liability or a felony conviction. (FAR Case 2015–011)

Prohibition on Providing Funds to the Enemy—This case implements sections 841–843, subtitle E (Never Contract with the Enemy), title VIII, of the National Defense Authorization Act for FY 2015 (Pub. L. 113–291), enacted 12/19/2014. Section 841 prohibits providing funds to the enemy. Section 842 provides additional access to records. Section 843 provides definitions. (FAR Case 2015–014)

Regulations That Streamline and Reduce Unjustified Burdens

Effective Communication. Implements section 887 of the NDAA for FY 2016, which provides that agency acquisition personnel are permitted and encouraged to engage in responsible and constructive exchanges with industry. (FAR Case 2016–005, Effective Communication between Government and Industry)

Provide clarification within service contracts that contractors are required to purchase the mandatory source products from approved sources. (FAR Case 2015–026, Contractor Use of Mandatory Sources of Supply in Service Contracts)

Incremental Funding of Fixed-Price Contracting Actions. While the FAR provides for incremental funding of cost-reimbursement contracts, it is silent on incremental funding of fixed-price contracts. Given the federal government's implicit preference for fixed-price contracting, as well as the quagmire posed by Continuing Resolutions and other budgeting problems, acquisition professionals need additional tools to overcome less-than-full-funding challenges while abiding by the preference for fixed-price contracting. The proposed rule aims to amend the FAR to cover fixed-price contracting actions under circumstances in which full funding is not available at the outset of the contracting endeavor.

Provisions and Clauses for Acquisitions of Commercial Items and Acquisitions That Do Not Exceed the Simplified Acquisition Threshold—This case implements a new approach to the prescription and flow down for provisions and clauses applicable to the acquisition of commercial items or acquisitions that do not exceed the simplified acquisition threshold. Each clause prescription and each clause flow down for commercial items is specified within the prescription/clause itself, without having to cross-check another clause or list. The rule supports the use of automated contract writing systems and reduced necessary FAR maintenance when clauses are updated. (FAR Case 2015–004)

Reverse Auction Guidance—This case Implements OFPP memorandum, ''Effective Use of Reverse Auctions.'' The memorandum provides guidance on the usage of reverse auctions, and was issued in response to recommendations within GAO report (Reverse Auctions: Guidance is Needed to Maximize Competition and Achieve Cost Savings, GAO–14–108). (FAR Case 2015–038)

Regulations Which Promote Fiscal Responsibility (Accountability and Transparency)

Revise the definition of ''information technology'' in the FAR. This conforms to the Office of Management and Budget Memo, M–15–14 titled Management Oversight of Federal Information Technology. (FAR Case 2015–037, Definition of ''Information Technology'')

Strategic Sourcing Documentation—This case implements section 836 of the FY15 NDAA. Section 836 requires that when purchasing services and supplies that are offered under the Federal Strategic Sourcing Initiative but the Initiative in not used, the contract file shall include an analysis of comparative value, including price and nonprice factors, between the services and supplies offered under such Initiative and services and supplies offered under the source or sources used for the purchase. (FAR Case 2015–015)

Prohibition on Reimbursement for Congressional Investigations and Inquiries—This case implements section 857 of the NDAA for FY15, which amends 10 U.S.C.2324(e)(1). Section 857 disallows costs incurred by a contractor in connection with a congressional investigation or inquiry into an issue that is the subject 10 U.S.C. 2324(k)(2). (FAR Case 2015–016)

Determination of Fair and Reasonable Prices on Orders under Multiple-Award Contracts—This case clarifies the

responsibilities for ordering activity contracting officers to determine fair and reasonable prices when using Federal Supply Schedules. (FAR Case 2015–021)

Regulations Which Promote Accountability and Transparency

Uniform Use of Line Items—This case establishes a requirement for use of a standardized uniform line item numbering structure in Federal procurement. (FAR Case 2013–014)

Past Performance Evaluation Requirements—This case updates FAR subpart 42.15 to identify ''regulatory compliance'' as a separate evaluation factor in the Contractor Past Performance Assessment System (CPARS) and require agencies use past performance information in the Past Performance Information three years for construction and architect-engineer contracts. (FAR Case 2015–027)

Dated: August 29, 2016.

William Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

BILLING CODE 6820–EP–P

SOCIAL SECURITY ADMINISTRATION (SSA)

Statement of Regulatory Priorities

We administer the Retirement, Survivors, and Disability Insurance programs under title II of the Social Security Act (Act), the Supplemental Security Income (SSI) program under title XVI of the Act, and the Special Veterans Benefits program under title VIII of the Act. As directed by Congress, we also assist in administering portions of the Medicare program under title XVIII of the Act. Our regulations codify the requirements for eligibility and entitlement to benefits, and our procedures for administering these programs. Generally, our regulations do not impose burdens on the private sector or on State or local governments, except for the States' Disability Determination Services. We fully fund the Disability Determination Services in advance or via reimbursement for necessary costs in making disability determinations.

The 18 entries in our regulatory plan (plan) represent issues of major importance to the Agency. We describe the individual initiatives more fully in the attached plan.

Improving the Disability Process

The continued improvement of the disability program and the protection of our beneficiaries is of paramount importance to SSA. The regulatory plan actions under this category will aid in these goals. These initiatives include two final and three proposed rules that will:

- Save time during the disability application process by authorizing the Commissioner of SSA to directly seek necessary medical evidence for disability claims;
- Update the education category in our medical-vocational guidelines to accurately differentiate between literacy and education level;
- Establish beneficiaries' legal guardians as the preferred choice during our representative payee selection process;
- Update our rules on withdrawal of old-age benefits applications and suspension of benefits; and
- Improve the efficiency of our processes by requiring representatives to use electronic methods with the Agency.

Priority Hearings and Appeals Process Improvement Rules

These rules are the core of a continuing SSA initiative to improve the adjudication process, reduce average processing times for disability hearings, and reduce the hearings backlog. These regulatory actions include three final rules that will:

- Revise existing rules to achieve national consistency of our procedures at the administrative law judge (ALJ) and Appeals Council levels;
- Revise our rules of conduct and standards of responsibility for claimant representatives to better protect the integrity of our administrative process and further clarify representatives' existing responsibilities, thus protecting our beneficiaries; and
- Update rules relating to acceptable medical sources and medical evidence, to make these rules easier to understand and apply and support the goal of faster, more accurate disability decisions.

Revised Listing of Medical Impairments

SSA uses the Listing of Impairments in disability determinations. Each major body system has its own unique listing describing impairments that we consider severe enough to prevent an individual from performing substantial gainful activity, regardless of age, education, or work experience. As part of our commitment to improving and modernizing the disability programs, we update the listings to keep pace with medicine, science, technology, and the world of work. In 2017, we plan to begin the process of updating six of our body system listings by publishing proposed rules.

Bipartisan Budget Act (BBA)

The rules in this section are required in connection with the Bipartisan Budget Act of 2015 (BBA), Public Law 114–74, enacted on November 2, 2015. SSA is prioritizing these rules to meet our regulatory obligations under the BBA. Our BBA Regulatory Plan initiatives include a proposed and final rule to regulate the use of electronic payroll data to improve program administration, and a proposed rule to close unintended loopholes related to presumed filing and voluntary suspension.

Privacy and Disclosure

The interim final rule in this category will implement the time-sensitive, statutory requirements of the FOIA Improvement Act of 2016, Public Law 114–185.

Retrospective Review of Existing Regulations

Pursuant to section 6 of Executive Order 13563, ''Improving Regulation and Regulatory Review'' (January 18, 2011), SSA regularly engages in retrospective review and analysis for multiple existing regulatory initiatives. These initiatives may be proposed or completed actions, and they do not necessarily appear in The Regulatory Plan. You can find more information on these completed rulemakings in past publications of the Unified Agenda at *www.reginfo.gov* in the ''Completed Actions'' section for the Social Security Administration. The Agency's most recently published Retrospective Review Progress Report can be found at: *https://www.whitehouse.gov/sites/default/files/omb/inforeg/regreform/retroplans/Jan-2016/SSA-Retrospective-Plan-Progress-Report.pdf*.

SSA

Proposed Rule Stage

143. Revised Medical Criteria for Evaluating Musculoskeletal Disorders (3318P)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 402; 42 U.S.C. 405(a); 42 U.S.C. 405(b); 42 U.S.C. 405(d) to 405(h); 42 U.S.C. 416(i); 42 U.S.C. 421(a); 42 U.S.C. 421(i); 42 U.S.C. 423; 42 U.S.C. 902(a)(5); 42 U.S.C. 1381a; 42 U.S.C. 1382c; 42 U.S.C. 1383; 42 U.S.C. 1383b

CFR Citation: 20 CFR 404.1500, app 1.

Legal Deadline: None.

Abstract: Sections 1.00 and 101.00, Musculoskeletal System, of appendix 1 to subpart P of part 404 of our regulations describe those musculoskeletal system disorders that we consider severe enough to prevent a person from doing any gainful activity, or that cause marked and severe functional limitations for a child claiming Supplemental Security Income payments under title XVI. We are proposing to revise the criteria in these sections to ensure that the medical evaluation criteria are up-to-date and consistent with the latest advances in medical knowledge and treatment.

Statement of Need: We propose to revise the criteria in the Listing of Impairments (listings) that we use to evaluate claims involving musculoskeletal disorders in adults and children under titles II and XVI of the Social Security Act (Act). These proposed revisions reflect our adjudicative experience, advances in medical knowledge and treatment of musculoskeletal disorders, recommendations from medical experts, and comments we received in response to a final rule with request for public comments that we published in November 2001.

Summary of Legal Basis: Administrative—not required by statute or court order.

Alternatives: We considered continuing to use our current criteria. However, we believe these proposed revisions are necessary because of medical advances, technology, and treatment since we last revised these rules.

Anticipated Cost and Benefits: Currently being determined.

Risks: We expect the public and adjudicators to support the removal and clarification of ambiguous terms and phrases, and the addition of specific, demonstrable functional criteria for determining listing-level severity of all musculoskeletal disorders.

We expect adjudicators to support the change in the framework of the text because it makes the guidance in the introductory text and listings easier to access and understand.

144. Revised Medical Criteria for Evaluating Digestive Disorders (3441P)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 402; 42 U.S.C. 405(a); 42 U.S.C. 405(b); 42 U.S.C. 405(d) to 405(h); 42 U.S.C. 416(i); 42 U.S.C. 421(a); 42 U.S.C. 421(i); 42 U.S.C. 423; 42 U.S.C. 902(a)(5); 42 U.S.C. 1381a; 42 U.S.C. 1382c; 42 U.S.C. 1383; 42 U.S.C. 1383b

CFR Citation: 20 CFR 404.1500, app 1.

Legal Deadline: None.

Abstract: Sections 5.00 and 105.00, Digestive Systems, of appendix 1 to subpart P of part 404 of our regulations describe those digestive disorders that we consider severe enough to prevent a person from doing any gainful activity, or that cause marked and severe functional limitations for a child claiming Supplemental Security Income payments under title XVI. We are proposing to revise the criteria in these sections to ensure that the medical evaluation criteria are up-to-date and consistent with the latest advances in medical knowledge and treatment.

Statement of Need: These rules are required to facilitate disability claims adjudication.

Summary of Legal Basis: Sections 5.00 and 105.00, Digestive Systems, of appendix 1 to subpart P of part 404 of our regulations.

This proposed rule is not required by statute or court order.

Alternatives: We considered continuing to use our current criteria. However, we believe these proposed revisions are necessary because of medical advances, technology, and treatment since we last revised these rules.

Anticipated Cost and Benefits: Ensuring that the medical evaluation criteria are up-to-date and consistent with the latest advances in medical knowledge, technology, and treatment will provide for accurate disability evaluations.

Costs: While no cost is expected, documentation is not yet available.

Risks: None.

RIN: 0960–AG74

SSA

146. Revising the Ticket to Work Program Rules (3780A)

Priority: Other Significant.

Legal Authority: Not Yet Determined.

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: This notice of proposed rulemaking will pose several questions to the public regarding the best means by which to encourage employment networks to assist beneficiaries in seeking employment at a level that could lead to eventual financial independence. We want to hear from program beneficiaries and others about what combination of incentives would best help beneficiaries to go to work and reach and sustain middle-class earnings.

Statement of Need: We would like to clarify the purpose of and the rules for our Ticket to Work (TTW) program, as part of our ongoing effort to help our beneficiaries find and maintain employment that leads to increased independence and enhanced productivity.

Summary of Legal Basis: Ticket to Work and Work Incentives Improvement Act of 1999 (Ticket Act).

Alternatives: We may postpone updating our TTW regulations.

Anticipated Cost and Benefits: Updating the Ticket to Work program rules to provide increased choices for our beneficiaries and service providers. Improving flexibility in the program rules should also increase the number of employment service providers participating in the Ticket to Work program, as well as encourage additional beneficiaries to attempt work and reach their employment goals. When beneficiaries with disabilities return work at a significant level of earnings, they are able to take advantage of all of the work supports in SSA's program rules and start on the road to financial independence and a better future.

Risks: None.

147. Revisions to Rules Regarding the Evaluation of Medical Evidence

Priority: Other Significant.

Legal Authority: 42 U.S.C. 405(a); 42 U.S.C. 423(d)(5)(A); 42 U.S.C. 902(a)(5); 42 U.S.C. 1010(a); 42 U.S.C. 1382c(a)(3)(H)(i); 42 U.S.C. 1382c(a)(3)(H)(i); Bipartisan Budget Act of 2015, section 832

CFR Citation: 20 CFR 404.1502; 20 CFR 404.1512; 20 CFR 404.1520b; 20 CFR 404.1521 to 404.1523; 20 CFR 404.1526 and 404.1527; 20 CFR 404.1530; 20 CFR 404.1546; 20 CFR 416.902; 20 CFR 416.912; 20 CFR 416.920b; 20 CFR 416.921 to 416.923; 20 CFR 416.926 and 416.927; 20 CFR 416.930; 20 CFR 416.946.

Legal Deadline: None.

Abstract: We are proposing several revisions to our medical evidence rules. The proposals include redefining several key terms related to evidence, revising our list of acceptable medical sources (AMS), revising how we consider and articulate our consideration of medical opinions and prior administrative medical findings, revising who can be a medical consultant (MC) and psychological consultant (PC), revising our rules about treating sources, and reorganizing our evidence regulations for ease of use. These proposed revisions would conform our rules with the requirements of the Bipartisan Budget Act of 2015 (BBA), reflect changes in the national healthcare workforce and in the manner that individuals receive primary medical care, simplify and reorganize our rules to make them easier to understand and apply, allow us to continue to make accurate and consistent decisions, and emphasize the need for objective medical evidence in disability and blindness claims.

Statement of Need: These revisions would simplify and reorganize our rules to make them easier to understand and apply, allow us to make more accurate and consistent decisions, and emphasize the need for objective medical evidence in disability and blindness claims under titles II and XVI of the Social Security Act.

Summary of Legal Basis: Administrative—not required by statute or court order.

Alternatives: Undetermined at this time.

Anticipated Cost and Benefits: Undetermined at this time.

148. Revised Medical Criteria for Evaluating Hearing Loss and Disturbances of Labyrinthine-Vestibular Function (3806P)

Priority: Other Significant.

Legal Authority: Not Yet Determined.

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: Sections 2.00B and 102.00B, Hearing Loss and Disturbances of Labyrinthine-Vestibular Function, of appendix 1 to subpart P of part 404 of our regulations describe hearing loss that we consider severe enough to prevent a person from doing any gainful activity, or that cause marked and severe functional limitations for a child claiming Supplemental Security Income payments under title XVI. We are proposing to revise these sections to ensure that the medical evaluation criteria are up-to-date and consistent with the latest advances in medical knowledge and treatment.

Statement of Need: These rules are required to facilitate disability claims adjudication.

Summary of Legal Basis: Sections 5.00 and 105.00, Digestive Systems, of appendix 1 to subpart P of part 404 of our regulations.

This proposed rule is not required by statute or court order.

Alternatives: We considered continuing to use our current criteria. However, we believe these proposed revisions are necessary because of medical advances, technology, and treatment since we last revised these rules.

Anticipated Cost and Benefits: Ensuring that the medical evaluation criteria are up-to-date and consistent with the latest advances in medical knowledge, technology, and treatment will provide for accurate disability evaluations.

Costs: While no cost is expected, documentation is not yet available.

Risks:

149. Use of Electronic Payroll Data To Improve Program Administration

Priority: Other Significant.

Legal Authority: Bipartisan Budget Act of 2015 sec. 824

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: This NPRM will propose to implement the Commissioner's access to and use of the information held by payroll providers. The Agency will use this data to help administer the disability and SSI programs and prevent improper payments.

Statement of Need: In accordance with the Bipartisan Budget Act of 2015, section 824; the Commissioner of Social Security has the authority to enter into an information exchange with a payroll or data provider, allowing us to efficiently administer monthly insurance and supplemental security income benefits, while preventing improper payments.

Summary of Legal Basis: Bipartisan Budget Act of 2015, section 824.

Alternatives: None.

SSA

150. Treatment of Earnings Derived From Services

Priority: Other Significant.

Legal Authority: Bipartisan Budget Act of 2015 sec. 825

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: Prior to the Bipartisan Budget Act when a Social Security

disability beneficiary worked, we were required to determine which month the beneficiary's income was earned in determining the beneficiary's continued entitlement to benefits (or the amount of his or her benefits). Section 825 of the Bipartisan Budget Act of 2015, requires SSA to presume that wages and salaries are earned when paid, unless information is available to SSA that shows when the income is earned. Regulatory changes are needed to set forth the procedures and rules that beneficiaries and SSA must follow in implementing this provision.

Statement of Need: The purpose of section 825 is to simplify work CDR processing by allowing adjudicators to use readily available evidence of earnings like IRS data, SSI verified wages, quarterly earnings data, and earnings maintained by third party payroll providers.

Summary of Legal Basis: Section 825 of the Bipartisan Budget Act of 2015.

Alternatives: There is no alternative, this rule complies with statutory mandate.

Anticipated Cost and Benefits: Prior to this legislation, when we made an SGA determination we had to determine when the services were performed. Under provision 825, we can presume that monthly earnings are earned in the month paid, unless there is readily available evidence to indicate when earned.

Risks: None.

151. Closure of Unintended Loopholes (Conforming Changes to Regulations on Presumed Filing and Voluntary Suspension)

Priority: Other Significant.

Legal Authority: Bipartisan Budget Act of 2015 sec. 831

CFR Citation: 20 CFR 404.623; 20 CFR 404.313.

Legal Deadline: None.

Abstract: Section 831 of the Bipartisan Budget Act of 2015, closes several loopholes in our program rules regarding deemed filing, dual entitlement, and benefit suspension in order to prevent individuals from obtaining larger benefits than Congress intended. Regulatory changes are needed to conform our regulations on presumed filing and voluntary suspension.

Statement of Need: Section 831 of the Bipartisan Budget Act of 2015, closes several loopholes in our program rules regarding deemed filing, dual entitlement, and benefit suspension in order to prevent individuals from obtaining larger benefits than Congress intended. Regulatory changes are needed to conform our regulations on presumed filing and voluntary suspension.

Summary of Legal Basis: Section 831(a) of the Bipartisan Budget Act of 2015 amends the Social security Act at sec. 202(r). Section 831(b) of the Bipartisan Budget Act of 2015 amends the Social Security Act to add sec. 202(z).

Final Rule Stage

152. Revisions to Rules on Representation of Parties (3396F)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 405(a); 42 U.S.C. 406(a)(1); 42 U.S.C. 810(a); 42 U.S.C. 902(a)(5); 42 U.S.C. 1010; 42 U.S.C. 1383(d)

CFR Citation: 20 CFR 404.612; 20 CFR 404.901; 20 CFR 404.903; 20 CFR 404.909; 20 CFR 404.910; 20 CFR 404.933; 20 CFR 404.934; 20 CFR 404.1700 to 404.1799; 20 CFR 408.1101; 20 CFR 416.315; 20 CFR 416.1401; 20 CFR 416.1403; 20 CFR 416.1409; 20 CFR 416.1410; 20 CFR 416.1433; 20 CFR 416.1434; 20 CFR 416.1500 to 416.1599; 20 CFR 422.203; 20 CFR 422.515.

Legal Deadline: None.

Abstract: We will revise our rules on representation of parties in parts 404, 408, 416, and 422 to reflect changes in the way claimants obtain representation and in representatives' business practices. These new rules will improve our efficiency by increasing the use of electronic services.

Statement of Need: These revisions will reflect changes in representatives' business practices and improve our efficiency by enhancing use of the Internet.

Summary of Legal Basis: Allows SSA to recognize firms as representatives.

Alternatives: Determining if SSA has legal authority to permit appointed representatives to assign fees awarded under section 206 of the Social Security Act (42 U.S.C. 406) this would be an interim step.

Anticipated Cost and Benefits: Costs include Systems changes, modifications, and/or updates. There will also be costs associated with training staff on the new policy. Benefits include a more streamlined process for paying fees under section 206 of the Social Security Act, 42 U.S.C. 406, that will make it more efficient and effective saving significant work years for SSA as well as providing better customer service.

Risks: SSA anticipates that its recognition of firms as representatives will streamline the process for paying fees under section 206 of the Social Security Act, 42 U.S.C. 406, which will likely make the process more efficient and effective, and potentially reduce the number of incorrect payments.

153. Revised Medical Criteria for Evaluating Human Immunodeficiency Virus (HIV) Infection and for Evaluating Functional Limitations in Immune System Disorders (3466F)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 402; 42 U.S.C. 405(a); 42 U.S.C. 405(b); 42 U.S.C. 405(d) to 405(h); 42 U.S.C. 416(i); 42 U.S.C. 421(a); 42 U.S.C. 421(i); 42 U.S.C. 423; 42 U.S.C. 902(a)(5); 42 U.S.C. 1381a; 42 U.S.C. 1382c; 42 U.S.C. 1383; 42 U.S.C. 1383b

CFR Citation: 20 CFR 404.1500, app 1.

Legal Deadline: None.

Abstract: We are revising the criteria in the Listing of Impairments (listings) that we use to evaluate claims involving human immunodeficiency virus (HIV) infection in adults and children under titles II and XVI of the Social Security Act (Act). We also are revising the introductory text of the listings that we use to evaluate functional limitations resulting from immune system disorders. The revisions reflect our program experience, advances in medical knowledge, our adjudicative experience, recommendations from a commissioned report, and comments from medical experts and the public.

Statement of Need: These final rules are necessary in order to update the HIV evaluation listings to reflect advances in medical knowledge, treatment, and evaluation methods. The changes will ensure that determinations of disability have a sound medical basis, that claimants receive equal treatment through the use of specific criteria, and that individuals who are disabled can be readily identified and awarded benefits if all other factors of entitlement or eligibility are met.

Summary of Legal Basis: Administrative—not required by statute or court order.

Alternatives: Undetermined at this time.

Anticipated Cost and Benefits: Cost/savings estimate—negligible.

Risks: Undetermined at this time.

154. Amendments to Regulations Regarding Withdrawals of Applications and Voluntary Suspension of Benefits (3573F)

Priority: Other Significant.

Legal Authority: 42 U.S.C. 402; 42 U.S.C. 402(i); 42 U.S.C. 402(j); 42 U.S.C. 402(o); 42 U.S.C. 402(p); 42 U.S.C. 402(r); 42 U.S.C. 403(a); 42 U.S.C. 403(b); 42 U.S.C. 405(a); 42 U.S.C. 416; 42 U.S.C. 416(i)(2); 42 U.S.C. 423; 42 U.S.C. 423(b); 42 U.S.C. 425; 42 U.S.C. 428(a) to 428(e); 42 U.S.C. 902(a)(5).

CFR Citation: 20 CFR 404.313; 20 CFR 404.640.

Legal Deadline: None.

Abstract: We modified our regulations to establish a 12-month time limit for the withdrawal of an old-age benefits application. We will also permit only one withdrawal per lifetime. These changes limit the voluntary suspension of benefits only to those benefits disbursed in future months.

Statement of Need: We are under a clear congressional mandate to protect the Trust Funds. It was crucial that we change our current policies that have the effect of allowing beneficiaries to withdraw applications or suspend benefits and use benefits from the Trust Funds as something akin to an interest-free loan.

Summary of Legal Basis: Discretionary.

Alternatives: Based on our current evidence, there are no alternatives at this time.

Anticipated Cost and Benefits: The administrative effect of this final rule is negligible.

Risks: None.

155. Revisions to Rules of Conduct and Standards of Responsibility for Appointed Representatives

Priority: Other Significant.

Legal Authority: Not Yet Determined

CFR Citation: Not Yet Determined.

Legal Deadline: None.

Abstract: We propose to revise our rules of conduct and standards of responsibility for representatives. We also propose to update and clarify procedures we use when we bring charges against a representative for violating our rules of conduct and standards of responsibilities for representatives. These changes are necessary to better protect the integrity of our administrative process and further clarify representatives' currently existing responsibilities in their conduct with us. The changes to our rules are not meant to suggest that any specific conduct is permissible under our existing rules; instead, we seek to ensure that our rules of conduct and standards of responsibility are clearer as a whole and directly address a broader range of inappropriate conduct.

Statement of Need: These changes are necessary because or current regulations do not specifically address some representative conduct that we find inappropriate.

Summary of Legal Basis: Administrative—not required by statute or court order.

Alternatives: Based on our program experience, there are no alternatives at this time. These rules will be based on recommendations.

Anticipated Cost and Benefits: The administrative effect of this regulation is negligible.

Risks: Undetermined.

CFR Citation: 20 CFR 404.935; 20 CFR 404.938; 20 CFR 404.939; 20 CFR 944; 20 CFR 404.949; 20 CFR 404.950; 20 CFR 404.951; 20 CFR 404.970; 20 CFR 976; 20 CFR 405 RECINDED & RESERVED; 20 CFR 416.1435; 20 CFR 416.1438; 20 CFR 416.1439; 20 CFR 416.1444; 20 CFR 416.1449; 20 CFR 416.1450; 20 CFR 416.1451; 20 CFR 416.1470; 20 CFR 416.1476; 20 CFR 404.900; 20 CFR 404.929; 20 CFR 404.968; 20 CFR 416.1400; 20 CFR 416.1429; 20 CFR 416.1468.

Legal Deadline: None.

Abstract: We propose to revise our rules so that more of our procedures at the administrative law judge (ALJ) and Appeals Council levels of our administrative review process are consistent nationwide. We propose revisions to:

(1) The time-frame for notifying claimants of a hearing date;

(2) the information in our hearing notices;

(3) the period when we require claimants to inform us about or submit written evidence, written statements, objections to the issues, and subpoena requests;

(4) what constitutes the official record; and

(5) the manner in which the Appeals Council considers additional evidence.

We anticipate that these nationally consistent procedures will enable us to administer our disability programs more efficiently and better serve the public.

Statement of Need: We propose to revise parts 404 and 416 to make more of our procedures at the hearings and Appeals Council levels consistent nationwide. These changes would bring the vast majority of the part 405 procedures in line with the procedures in parts 404 and 416, so we propose to remove part 405 in its entirety. We anticipate that under nationally consistent procedures, we will be able to administer our disability programs more efficiently and better serve the public.

Summary of Legal Basis: Administrative—not required by statute or court order.

Alternatives: Based on our program experience, there are no alternatives at this time.

Anticipated Cost and Benefits: Undetermined.

Risks: Undetermined.

157. Implementation of the NICS Improvement Amendments Act of 2007

Priority: Other Significant.

Legal Authority: 42 U.S.C. 902(a)(5); 18 U.S.C. 922 note

CFR Citation: 20 CFR 421.

Legal Deadline: None.

Abstract: We propose to implement provisions of the NICS Improvement Amendments Act of 2007 (NIAA) that require Federal agencies to provide relevant records to the Attorney General for inclusion in the National Instant Criminal Background Check System (NICS). Under the proposed rule, we would identify, on a prospective basis, individuals who receive Disability

Insurance benefits under title II of the Social Security Act (Act) or Supplemental Security Income (SSI) payments under title XVI of the Act and also meet certain other criteria, including an award of benefits based on a finding that the individual's mental impairment meets or medically equals the requirements of section 12.00 of the Listing of Impairments (Listings) and receipt of benefits through a representative payee. We propose to provide pertinent information about these individuals to the Attorney General on not less than a quarterly basis. As required by the NIAA, at the commencement of the adjudication process we would also notify individuals, both orally and in writing, of their possible Federal prohibition on possessing or receiving firearms, the consequences of such inclusion, the criminal penalties for violating the Gun Control Act, and the availability of relief from the prohibitions imposed by Federal law. Finally, we also propose to establish a program that permits individuals to request relief from the Federal firearms prohibitions based on our adjudication. The proposed rule would allow us to fulfill responsibilities that we have under the NIAA.

Statement of Need: We propose to implement provisions of the NICS Improvement Amendments Act of 2007 (NIAA) that require Federal agencies to provide relevant records to the Attorney General for inclusion in the National Instant Criminal Background Check System (NICS).

Summary of Legal Basis: The NICS Improvement Amendments Act of 2007 (NIAA).

BILLING CODE 4191–02–P

FALL 2016 STATEMENT OF REGULATORY PRIORITIES

CFPB Purposes and Functions

The Bureau of Consumer Financial Protection (CFPB or Bureau) was established in 2010 as an independent bureau of the Federal Reserve System by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Public Law 111–203, 124 Stat. 1376) (Dodd-Frank Act). Pursuant to the Dodd-Frank Act, the CFPB has rulemaking, supervisory, enforcement, and other authorities relating to consumer financial products and services. Among these are the consumer financial protection authorities that transferred to the CFPB from seven Federal agencies on the designated transfer date, July 21, 2011. These authorities include the ability to issue regulations under more than a dozen Federal consumer financial laws.

As provided in section 1021 of the Dodd-Frank Act, the purpose of the CFPB is to implement and enforce Federal consumer financial laws consistently for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that such markets are fair, transparent, and competitive. The CFPB is authorized to exercise its authorities for the purpose of ensuring that, with respect to consumer financial products and services:

(1) Consumers are provided with timely and understandable information to make responsible decisions about financial transactions;

(2) Consumers are protected from unfair, deceptive, or abusive acts and practices and from discrimination;

(3) Outdated, unnecessary, or unduly burdensome regulations are regularly identified and addressed in order to reduce unwarranted regulatory burdens;

(4) Federal consumer financial law is enforced consistently, without regard to status of a person as a depository institution, in order to promote fair competition; and

(5) Markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation.

CFPB Regulatory Priorities

The CFPB's regulatory priorities for the period from November 1, 2016, to October 31, 2017, include continuing rulemaking activities to address critical issues in various markets for consumer financial products and services and implementing Dodd-Frank Act mortgage protections. The Bureau also maintains a long-term agenda listing areas of potential rulemaking interest, as discussed below.

Bureau Regulatory Efforts in Various Consumer Markets

The Bureau is working on a number of rulemakings to address important consumer protection issues in a wide variety of markets for consumer financial products and services. Many of these projects build on prior research efforts by the Bureau.

For example, the Bureau has begun a rulemaking process to follow up on a report it issued to Congress in March 2015 concerning the use of agreements providing for arbitration of any future disputes between covered persons and consumers in connection with the offering or providing of consumer financial products or services. The report, which was required by the Dodd-Frank Act, expanded on preliminary

results of arbitration research that had been released by the Bureau in December 2013. The Bureau has issued a proposed rule that would prohibit covered providers of certain consumer financial products and services from using an arbitration agreement to bar the consumer from filing or participating in a class action. Under the proposal, companies would still be able to include arbitration clauses in their contracts. However, for contracts subject to the proposal, the clauses would have to say explicitly that they cannot be used to stop consumers from being part of a class action in court. The proposal would also require a covered provider that has an arbitration agreement and that is involved in arbitration pursuant to a pre-dispute arbitration agreement to submit specified arbitral records to the Bureau. The Bureau has received several thousand comments on the proposal and is considering development of a final rule for spring 2017.

The Bureau is also engaged in a rulemaking concerning underwriting and certain other practices in connection with payday, vehicle title, and similar credit products. The rulemaking follows on multiple reports that the Bureau has issued on its research into these markets, including a white paper in April 2013, a data point in March 2014, and several publications earlier this year. The Bureau has issued a proposed rule that, among other things, would require lenders to make a reasonable determination that the consumer has the ability to repay a covered loan before extending credit. It would also require lenders to make certain disclosures before attempting to collect payments from consumers' accounts and restrict lenders from making additional payment collection attempts after two consecutive attempts have failed. The Bureau has already received more than 100,000 comments in response to the proposal; the comment period closed on October 7, 2016.

In addition, the Bureau also engaged in policy analysis and research initiatives in preparation for a proposed rulemaking on debt collection activities, which are the single largest source of complaints to the Federal Government of any industry. Building on the Bureau's November 2013 Advance Notice of Proposed Rulemaking, the Bureau released materials in July 2016 in advance of convening a panel under the Small Business Regulatory Enforcement Fairness Act (SBREFA) in conjunction with the Office of Management and Budget and the Small Business Administration's Chief Counsel for Advocacy to consult with small businesses that may be affected by the policy proposals under consideration. This SBREFA process focuses on companies that are considered ''debt collectors'' under the Fair Debt Collection Practices Act; the Bureau expects to convene a separate SBREFA proceeding focusing on companies that collect their own debts in 2017. The CFPB is also in the process of analyzing the results of a survey to obtain information from consumers about their experiences with debt collection and undertaking consumer testing initiatives to determine what information would be useful for consumers to have about debt collection and their debts and how that information should be provided to them.

Building on Bureau research and other sources, the Bureau is also engaged in policy analysis and further research initiatives in preparation for a proposed rulemaking on overdraft programs on checking accounts. The CFPB issued a white paper in June 2013, and a report in July 2014, based on supervisory data from several large banks that highlighted a number of possible consumer protection concerns, including how consumers opt in to overdraft coverage for ATM and one-time debit card transactions, overdraft coverage limits, transaction posting order practices, overdraft and insufficient funds fee structures, and involuntary account closures. The CFPB is continuing to engage in additional research and has begun qualitative consumer testing initiatives relating to the opt-in process.

The Bureau is also working on a final rule to create a comprehensive set of protections for prepaid financial products, such as general purpose reloadable cards and other similar products, which are increasingly being used by consumers in place of traditional checking accounts or credit cards. The final rule will build off a proposal that the Bureau issued in November 2014 to bring prepaid products within the ambit of Regulation E (which implements the Electronic Fund Transfer Act) as prepaid accounts and to create new provisions specific to such accounts. The proposal also included provisions to amend Regulation E and Regulation Z (which implements the Truth in Lending Act) to regulate prepaid accounts with overdraft services or certain other credit features.

The Bureau is also continuing rulemaking activities that will further establish the Bureau's nonbank supervisory authority by defining larger participants of certain markets for consumer financial products and services. Larger participants of such markets, as the Bureau defines by rule, are subject to the Bureau's supervisory authority. The Bureau expects that its next larger participant rulemaking will focus on the markets for consumer installment loans and vehicle title loans for purposes of supervision. The Bureau is also considering whether rules to require registration of these or other non-depository lenders would facilitate supervision, as has been suggested to the Bureau by both consumer advocates and industry groups.

The Bureau is also continuing to develop research on other critical markets to help implement statutory directives and to assess whether regulation of other consumer financial products and services may be warranted. For example, section 1071 of the Dodd-Frank Act amends the Equal Credit Opportunity Act to require financial institutions to report information concerning credit applications made by women-owned, minority-owned, and small businesses. The Bureau is in its early stages with respect to implementing section 1071 and is currently focused on outreach and research to develop its understanding of the players, products, and practices in the business lending markets and of the potential ways to implement section 1071. The Bureau then expects to begin developing proposed regulations concerning the data to be collected and determining appropriate procedures and privacy protections needed for information-gathering and public disclosure under this section.

Implementing Dodd-Frank Act Mortgage Protections

The Bureau is also continuing its efforts to implement critical consumer protections under the Dodd-Frank Act to guard against mortgage market practices that contributed to the Nation's most significant financial crisis in several decades. The Bureau has already issued regulations implementing Dodd-Frank Act protections for mortgage originations and servicing and integrating various Federal mortgage disclosures as discussed further below.

In October 2015, the Bureau issued a final rule implementing Dodd-Frank amendments to the Home Mortgage Disclosure Act (HMDA), which augment existing data reporting requirements regarding housing-related loans and applications for such loans. In addition to obtaining data that is critical to the purposes of HMDA—which include providing the public and public officials

with information that can be used to help determine whether financial institutions are serving the housing needs of their communities, assisting public officials in the distribution of public sector investments, and assisting in identifying possible discriminatory lending patterns and enforcing antidiscrimination statutes—the Bureau views this rulemaking as an opportunity to streamline and modernize HMDA data collection and reporting, in furtherance of its mission under the Dodd-Frank Act to reduce unwarranted regulatory burden. Certain elements of the rule take effect in January 2017, and most new data collection requirements begin in January 2018. The Bureau is conducting outreach with industry and coordinating with other agencies to monitor and facilitate implementation of the rule. The Bureau has already released a small entity compliance guide. In addition, the Bureau is planning a rulemaking to make technical corrections and to clarify certain requirements under the new provisions of Regulation C. The Bureau expects the follow up HMDA rulemaking to occur in 2017.

Another major effort of the Bureau is the implementation of its final rule combining several federal mortgage disclosures that consumers receive in connection with applying for and closing on a mortgage loan under the Truth in Lending Act and the Real Estate Settlement Procedures Act. The integrated forms are the cornerstone of the Bureau's broader ''Know Before You Owe'' mortgage initiative. The rule, in most cases, requires that two forms, the Loan Estimate and the Closing Disclosure, replace four different Federal disclosures. These new forms help consumers better understand their options, choose the deal that is best for them, and avoid costly surprises at the closing table. The Bureau has worked intensively to support implementation efforts, including consumer education initiatives, both before and after the rule's October 2015 effective date. To facilitate implementation, the Bureau has released and provided applicable updates for a small entity compliance guide, a guide to forms, a readiness guide, sample forms, and additional materials. In July 2016, the Bureau proposed revisions to address a number of questions about the final rule that have been identified by interested parties in the course of these implementation efforts. The comment period on the proposal closed October 18, 2016. The Bureau anticipates finalizing the proposal in 2017.

The Bureau also continues to work in support of the full implementation of, and to facilitate compliance with, various mortgage-related final rules issued by the Bureau in January 2013 (including several amendments issued since that time) to strengthen consumer protections involving the origination and servicing of mortgages. In general, these rules, implementing requirements under the Dodd-Frank Act, were all effective by January 2014. The Bureau is working diligently to monitor the market and continues to make clarifications and adjustments to the rules where warranted. For example, the Bureau issued a final rule in August 2016 that amends various provisions of its mortgage servicing rules in both Regulation X, which implements RESPA, and Regulation Z, which implements TILA. The final rule clarifies the applicability of certain provisions when a borrower is in bankruptcy or has invoked cease communication rights under the Fair Debt Collection Practices Act, enhances loss mitigation requirements, and extends the protections of the mortgage servicing rules to confirmed successors in interest, among other amendments. Most of the final rule will be effective in 2017, one year from publication in the **Federal Register**, while certain provisions regarding borrowers in bankruptcy and successors in interest will be effective in 2018, 18 months from publication. In developing the final rule, the Bureau reviewed and considered public comments on the proposed rule, consulted with other agencies, and conducted consumer testing of certain disclosures. The Bureau will continue supporting implementation and consumer education efforts in connection with the mortgage-related final rules issued by the Bureau in January 2014, including the amendments issued since that time.

Further, the Bureau continues to participate in a series of interagency rulemakings to implement various Dodd-Frank Act amendments to TILA and the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) relating to mortgage appraisals. In April 2015, in conjunction with the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the National Credit Union Administration Board, and the Federal Housing Finance Agency, the Bureau issued a final rule adopting certain minimum requirements for appraisal management companies. These joint agency efforts are continuing with further efforts to implement amendments to FIRREA concerning required quality control standards relating to the use of automated valuation models.

Bureau Long-Term Planning Efforts

The Bureau also maintains a long-term agenda to reflect its expectations beyond the current fiscal year. As noted in these items, the Bureau intends to explore potential rulemakings to address important issues related to consumer reporting and student loan servicing.

With regard to consumer reporting, the Bureau continues to oversee the credit reporting market through its supervisory and enforcement efforts, monitor the market through research and to consider prior research, including a white paper the Bureau published on the largest consumer reporting agencies in December 2012 and reports on credit report accuracy produced by the Federal Trade Commission pursuant to the Fair and Accurate Credit Transactions Act. As this work continues, the Bureau will evaluate possible policy responses to issues identified, including potential additional rules or amendments to existing rules governing consumer reporting. Potential topics for consideration might include the accuracy of credit reports, including the processes for resolving consumer disputes, or other issues.

Further, in May 2015, the CFPB issued a request for information seeking comment from the public regarding student loan servicing practices, including those related to payment processing, servicing transfers, complaint resolution, co-signer release, and procedures regarding alternative repayment and refinancing options. In September 2015, the CFPB released a report regarding student loan servicing practices, based, in part, on comments submitted in response to the request for information. The CFPB, the Department of Education, and the Department of Treasury also published a Joint Statement of Principles on student loan servicing. In May 2016, the CFPB issued a request for information, seeking comment from the public about potential borrower communications regarding alternative repayment options. In July 2016, the CFPB and Department of Treasury joined the Department of Education as it announced new policy guidance regarding servicing standards for Federal student loans, which it developed in consultation with the Bureau and the Department of Treasury. The CFPB will also continue to monitor the student loan servicing market for trends and developments. As this work continues, the Bureau will evaluate possible policy responses, including

potential rulemaking. Possible topics for consideration might include specific acts or practices and consumer disclosures.

The Bureau also has begun planning to conduct assessments of significant rules it has adopted, pursuant to section 1022(d) of the Dodd-Frank Act. That section requires the Bureau to conduct such assessments to address, among other relevant factors, the effectiveness of the rules in meeting the purposes and objectives of title X of the Dodd-Frank Act and the specific goals of the rules assessed, to publish a report of each assessment not later than five years after the effective date of the subject rule, and to invite public comment on recommendations for modifying, expanding, or eliminating the subject rule before publishing each report. The Bureau will provide further information about its expectations for the lookback process as its planning continues.

BILLING CODE 4810–AM–P

CONSUMER PRODUCT SAFETY COMMISSION

Statement of Regulatory Priorities

The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of death and injury associated with consumer products. To achieve this goal, among other things, the CPSC:

- Develops mandatory product safety standards or bans when other efforts are inadequate to address a safety hazard, or where required by statute;
- obtains repair, replacement, or refunds for defective products that present a substantial product hazard;
- develops information and education campaigns about the safety of consumer products;
- participates in the development or revision of voluntary product safety standards; and
- follows statutory mandates.

Unless directed otherwise by Congressional mandate, when deciding which of these approaches to take in any specific case, the CPSC gathers and analyzes data about the nature and extent of the risk presented by the product. The Commission's rules at 16 CFR 1009.8 require the Commission to consider, among other factors, the following criteria, when deciding the level of priority for any particular project:

- Frequency and severity of injury;
- causality of injury;
- chronic illness and future injuries;
- costs and benefits of Commission action;
- unforeseen nature of the risk;
- vulnerability of the population at risk;
- probability of exposure to the hazard; and
- additional criteria that warrant Commission attention.

Significant Regulatory Actions:

Currently, the Commission is considering one rule that would constitute a ''significant regulatory action'' under the definition of that term in Executive Order 12866:

1. Flammability Standard for Upholstered Furniture

Under Section 4 of the Flammable Fabrics Act (''FFA''), the Commission may issue a flammability standard or other regulation for a product of interior furnishing if the Commission determines that such a standard is needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage. The Commission's regulatory proceeding could result in several actions, one of which could be the development of a mandatory standard requiring that upholstered furniture meet mandatory requirements specified in the standard.

CPSC

Proposed Rule Stage

159. Flammability Standard for Upholstered Furniture

Priority: Economically Significant. Major under 5 U.S.C. 801.

Legal Authority: 15 U.S.C. 1193; 5 U.S.C. 801

CFR Citation: 16 CFR 1634.

Legal Deadline: None.

Abstract: In October 2003, the Commission issued an advance notice of proposed rulemaking (ANPRM) to address the risk of fire associated with cigarette and small open-flame ignitions of upholstered furniture. The Commission published a notice of proposed rulemaking (NPRM) in March 2008, and received public comments. The Commission's proposed rule would require that upholstered furniture have cigarette-resistant fabrics or cigarette- and open flame-resistant barriers. The proposed rule would not require flame-resistant chemicals in fabrics or fillings. CPSC staff is conducting technical work to support a Final Rule. Since the Commission published the NPRM, CPSC staff has conducted testing of upholstered furniture, using both full-scale furniture and bench-scale models, as proposed in the NPRM. Currently, staff is reviewing fire barriers and fire-resistant fill materials that do not contain organohalogen chemicals as an approach for reducing deaths and injuries associated with furniture fires from upholstered furniture ignitions. Staff will develop a briefing package with options for consideration by the Commission in FY 2017, as well as a briefing package reviewing the pros and cons of adopting California's standard TB–117–2013 in FY 2016. Staff is also actively working with both ASTM and NFPA to evaluate new provisions and improve the existing consensus standards related to upholstered furniture flammability.

Statement of Need: From 2009 to 2011, an annual average of approximately 5,000 residential fires in which upholstered furniture was the first item to ignite resulted in an estimated 410 deaths, 730 civilian injuries, and about $280 million in property damage that could be addressed by a flammability standard. The total annual societal cost attributable to these upholstered furniture fire losses was more than $3.8 billion for 2008–2011. This total includes fires ignited by small open-flame sources and cigarettes.

Summary of Legal Basis: Section 4 of the Flammable Fabrics Act (FFA) (15 U.S.C. 1193) authorizes the Commission to issue a flammability standard or other regulation for a product of interior furnishing if the Commission determines that such a standard is ''needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage.'' The Commission's regulatory proceeding could result in several actions, one of which could be the development of a mandatory standard requiring that upholstered furniture sold in the United States meet mandatory requirements specified in the standard.

Alternatives: (1) The Commission could issue a mandatory flammability standard if the Commission finds that such a standard is needed to address an unreasonable risk of the occurrence of fire from ignition of upholstered furniture. (2) The Commission could issue mandatory requirements for labeling of upholstered furniture, in addition to, or as an alternative to, the requirements of a mandatory flammability standard. (3) The Commission could terminate the proceeding for development of a flammability standard and rely on a voluntary standard if a voluntary standard would adequately address the risk of fire, and substantial compliance with such a standard is likely to result.

Anticipated Cost and Benefits: The estimated annual cost of imposing a mandatory standard to address ignition of upholstered furniture will depend upon the test requirements in the Final Rule and the steps manufacturers take to meet those requirements. Depending upon the test requirements, a standard may reduce upholstered furniture-related fire losses, the annual societal cost of which was more than $3.8 billion for 2008 to 2011. Thus, the potential benefits of a mandatory standard to address the risk of ignition of upholstered furniture could be significant, even if the standard did not prevent all such fires.

Risks: The estimated average annual cost to society from residential fires associated with upholstered furniture was $3.8 billion for 2008 to 2011. Societal costs associated with upholstered furniture fires are among the highest associated with any product subject to the Commission's authority. A standard has the potential to reduce these societal costs.

RIN: 3041–AB35

BILLING CODE 6355–01–P

FEDERAL TRADE COMMISSION (FTC)

Statement of Regulatory and Deregulatory Priorities

I. Regulatory and Deregulatory Priorities

Background

The Federal Trade Commission (FTC or Commission) is an independent agency charged by its enabling statute, the Federal Trade Commission Act (FTC Act), with protecting American consumers from ''unfair methods of competition'' and ''unfair or deceptive acts or practices'' in the marketplace. The Commission strives to ensure that consumers benefit from a vigorously competitive marketplace. The Commission's work is rooted in a belief that competition, based on truthful and non-misleading information about products and services, provides consumers the best choice of products and services at the lowest prices.

The Commission pursues its goal of promoting competition in the marketplace through two different but complementary approaches. Unfair or deceptive acts or practices injure both consumers and honest competitors alike and undermine competitive markets. Through its consumer protection activities, the Commission seeks to ensure that consumers receive accurate, truthful, and non-misleading information in the marketplace. One recent example is the FTC's enforcement action along with its law enforcement partners, the U.S. Department of Justice and the Environmental Protection Agency, to compensate consumers who were harmed by Volkswagen both because the company allegedly unfairly sold cars with illegal defeat devices and deceptively advertised these cars with claims that they were ''clean.'' On June 28, 2016, Volkswagen entered into a settlement to create a $10 billion compensation fund for Volkswagen diesel owners.[19] This is the largest consumer refund program in the FTC's history.

At the same time, to ensure that consumers have a choice of products and services at competitive prices and quality, the marketplace must be policed for anticompetitive business practices. Thus, the second part of the Commission's basic mission—antitrust enforcement—is to prohibit anticompetitive mergers or other anticompetitive business practices without unduly interfering with the legitimate activities of businesses. These two complementary missions make the Commission unique insofar as it is the nation's only Federal agency with this combination of statutory authority to protect consumers.

The Commission is, first and foremost, a law enforcement agency. It pursues its mandate primarily through case-by-case enforcement of the FTC Act and other statutes. In addition, the

[19] Proposed Partial Stipulated Order for Permanent Injunction and Monetary Judgment, FTC v. Volkswagen Group of America, Inc., No. 3:15–md–2672 (N.D. Cal. June 28, 2016), *available at https://www.ftc.gov/system/files/documents/cases/proposed_partial_stipulated_order_filed_copy_0.pdf*; *see also* related proposed consent decree between the United States Department of Justice and the State of California and Volkswagen at *https://www.justice.gov/opa/file/871306/download.*

Commission is also charged with the responsibility of issuing and enforcing regulations under a number of statutes, including 16 trade regulation rules promulgated pursuant to the FTC Act and numerous regulations issued pursuant to certain credit, financial and marketing practice statutes [20] and energy laws.[21] The Commission also has adopted a number of voluntary industry guides. Most of the regulations and guides pertain to consumer protection matters and are intended to ensure that consumers receive the information necessary to evaluate competing products and make informed purchasing decisions.

Commission Initiatives

The Commission protects consumers through a variety of tools, including both regulatory and non-regulatory approaches. It has encouraged industry self-regulation, developed a corporate leniency policy for certain rule violations, and established compliance partnerships where appropriate.

As detailed below, protecting consumer privacy, preventing and mitigating identity theft, containing the rising costs of health care and prescription drugs, fostering competition and innovation in markets for products that consumers buy every day, challenging deceptive advertising and marketing, and safeguarding the interests of potentially vulnerable consumers, such as children and the financially distressed, continue to be at the forefront of the Commission's consumer protection and competition programs.

By subject area, the FTC discusses some of the major workshops, reports,[22] and initiatives it has pursued since the 2015 Regulatory Plan was published.

(a) Protecting Consumer Privacy. As the nation's top enforcer on the consumer privacy beat, the FTC works to ensure that consumers can take advantage of the benefits of a dynamic and ever-changing digital marketplace without compromising their privacy. The FTC achieves that goal through civil law enforcement, policy initiatives, and consumer and business education. For example, the FTC's unparalleled experience in consumer privacy enforcement has addressed practices offline, online, and in the mobile environment by large, well-known companies and lesser-known players alike. The Commission's recent efforts have addressed a wide range of issues, including the privacy of health information, the Internet of Things, Big Data, and data security.

New health-related apps, devices, and services are increasingly available to consumers. These products and services often involve the collection of sensitive health data, which consumers generally expect to be private. While much of this activity is not covered by HIPAA (Health Insurance Portability and Accountability Act of 1996), it is covered by the FTC Act. An example of a recent enforcement action in this area is a case against Practice Fusion, a company that provides management services to physicians, based on allegations that it deceived consumers by soliciting reviews about their doctors without adequately disclosing that the reviews would be posted publicly on the internet.[23] As detailed in the complaint, many of the posted reviews included consumers' full names, medications, health conditions, and treatments received. The FTC also took action against Henry Schein Practice Solutions, a provider of office management software for dental practices, based on allegations that it misrepresented the extent to which it protected sensitive patient information.[24] Further, because many of the entities collecting health data in today's marketplace are health apps and other small companies, the FTC is placing emphasis on business education. The FTC has thus worked with the U.S. Department of Health and Human Services to develop an interactive tool showing app developers which laws apply to them.[25] In conjunction with that project, the FTC also released guidance to help mobile health app developers build privacy and security into their apps.[26]

The Internet of Things is also an expanding part of the Commission's work. It comes in the form of products such as fitness devices, wearables, smart cars, and connected smoke detectors, light bulbs, and refrigerators. While these products are innovative and exciting, they are also collecting, storing, and often sharing vast amounts of consumer data, some of it very personal, raising familiar and new concerns relating to privacy and security. Device security is a serious concern. If hackers can hack a smart car, a pacemaker, or an insulin pump, the consequences could be grave. The FTC's case against computer hardware company ASUS illustrates the problems created by poor device security.[27] The complaint charged that critical security flaws in ASUS' routers put the home networks of hundreds of thousands of consumers at risk. An earlier case against TRENDnet involved allegations of compromised security of home security monitoring cameras.[28] Last year, the FTC issued a report addressing how fundamental privacy principles can be adapted to Internet of Things devices and recommending best practices for companies to follow.[29]

Another area of interest is Big Data, specifically the vast collection of data about consumers and enhanced capabilities to analyze data to make inferences and predictions about consumers. Such data uses can and are creating many benefits, including in areas such as public health and safety. But the increase in data collection and storage also increases the risk of data breach, identity theft, and the likelihood that data will be used in ways consumers do not expect or want. The FTC recently issued a report entitled *Big Data: A Tool for Inclusion or Exclusion?* addressing how the categorization of consumers may be both creating and limiting opportunities for them, with a focus on low-income and underserved consumers.[30] A key message in the report is that there are laws currently on the books—including the Fair Credit Reporting Act, the Equal Credit

[20] For example, the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003 (CAN–SPAM Act) (15 U.S.C. 7701–7713) and the Telemarketing and Consumer Fraud and Abuse Prevention Act (15 U.S.C. 6101–6108).

[21] For example, the Energy Policy Act of 1992 (106 Stat. 2776, codified in scattered sections of the U.S. Code, particularly 42 U.S.C. 6201 *et seq.*) and the Energy Independence and Security Act of 2007 (EISA) (codified in relevant part at 42 U.S.C. 17021, 17301–17305).

[22] The FTC also prepares a number of annual and periodic reports on the statutes it administers. These are not discussed in this plan.

Opportunity Act, and the FTC Act—that already address some of the concerns raised by Big Data, and with which companies must already comply. The report also identifies issues that companies should consider when using Big Data analytics to minimize discriminatory or other harmful outcomes.

One aspect of the increase in data collection is the ease with which anyone can buy detailed data about consumers. The FTC continues to focus on data brokers and, in particular, the role they play in facilitating fraud. For example, the FTC brought a case against data broker Sequoia One, alleging that it purchased the payday loan applications of financially strapped consumers—including names, addresses, phone numbers, Social Security Numbers, and bank account numbers—and then sold them to scam artists who used the data to withdraw millions of dollars from consumers' accounts.[31] The FTC also hosted a public workshop that examined the growing use of online lead generation in various industries [32] leading to a 2016 staff report that addressed lead generation's potential benefits and the consumer protection issues it might raise.[33] Further, in November 2015, the FTC hosted a workshop on cross-device tracking to examine the various ways that companies now track consumers across multiple devices, and not just on one device.[34]

Data security remains an important focus of the Commission's privacy work. Since 2002, approximately 60 companies have settled FTC cases alleging that they engaged in deceptive or unfair practices that unreasonably put consumers' personal data at risk. In July 2016, the Commission issued an Opinion and Final Order against medical testing laboratory LabMD, Inc., concluding that its data security practices were unreasonable and constituted an unfair act or practice that violated the FTC Act.[35] The case concerns the company's failure to protect the sensitive health information of many thousands of consumers. The final order requires LabMD to establish a comprehensive information security program, obtain periodic assessments regarding its implementation, and notify those consumers whose personal information was exposed. The agency also announced recent data security settlements against Lifelock and Wyndham. In Lifelock, the company agreed to pay $100 million—the largest monetary award obtained by the Commission in a contempt action to settle charges that it violated the terms of a 2010 federal court order that required the company to secure consumers' personal information and prohibited deceptive advertising.[36] In the Wyndham case, the company agreed to settle FTC charges that the company's security practices unreasonably exposed the payment card information of hundreds of thousands of consumers to hackers in three separate data breaches.[37] While the Wyndham case was pending, the Third Circuit affirmed the FTC's authority to challenge unfair data security practices using its Section 5 authority.

The FTC also engages in policy initiatives to better understand emerging technologies, research, and business models, including by hosting many workshops and events on privacy issues. On January 14, 2016, the FTC hosted it's first-ever PrivacyCon event to showcase original research in the area of privacy and security. Participants presented and discussed original research on important and timely topics such as data security, online tracking, and consumer perceptions of privacy, privacy disclosures, Big Data, and the economics of privacy. PrivacyCon is helping the Commission stay up-to-date with changing technologies, learn about new tools and programs, identify potential areas for investigation and enforcement, fashion remedies, and identify areas for further study. The Commission has scheduled a second PrivacyCon for January 12, 2017, in Washington, DC

As another example of its work on policy issues, the FTC is hosting a Fall Technology Series of three half-day events during Fall of 2016 that to explore consumer protection and privacy implications of ransomware, drones, and smart TVs. This series gathers input from academics, business and industry representatives, government experts, and consumer advocates for three-hour discussion sessions, which take place in Washington, DC and are open to the public. The FTC invites comment from the public on the events.

Finally, the FTC educates consumers and businesses on privacy and security issues. For example, the ''Start with Security'' business outreach campaign, launched in 2015, has included one-day conferences in Austin, San Francisco, Seattle, and Chicago to bring business owners and developers together with industry experts to discuss practical tips and strategies for implementing effective data security. Additionally, the Start with Security Guide [38] for businesses provides an easy way for companies to understand and apply lessons from the FTC's previous data security cases. It includes brief descriptions and references to the cases, as well as plain-language explanations of the security principles at issue. The FTC has also introduced a one-stop Web site at *www.ftc.gov/datasecurity* that consolidates the Commission's data security information for businesses.

(b) Protecting Children. Children increasingly use the Internet for entertainment, information and schoolwork. The FTC enforces the Children's Online Privacy Protection Act (COPPA) and the COPPA Rule to protect children's privacy when they are online by putting their parents in charge of who gets to collect personal information about their children under the age of thirteen. For example, in cases against app developers LAI Systems and Retro Dreamer,[39] the FTC alleged that the companies created a number of apps directed to children that allowed third-party advertisers to collect personal information from children in the form of persistent identifiers, for purposes of conducting behavioral advertising, without obtaining parental consent.

The Commission actively litigates to protect children and their parents when children use mobile apps that appeal to children and offer virtual goods for sale.

On April 26, 2016, a federal district court granted the Commission's request for summary judgment in the agency's lawsuit alleging that Amazon, Inc. billed consumers for unauthorized in-app charges incurred by children. The judge's order in the case found that Amazon received many complaints from consumers about surprise in-app charges incurred by children, citing the fact that the company's disclosures about the possibility of in-app charges within otherwise ''free'' apps were not sufficient to inform consumers about the charges.[40] This is the FTC's third case relating to children's in-app purchases; Apple and Google both settled FTC complaints concerning the issue in 2014.[41]

(c) Protecting Every Community. The FTC has brought a very large number of cases to stop scam artists, shut down their operations, and put money back in consumers' pockets. Fraud precludes economic opportunities and deprives individuals of money, time, and resources. While fraud touches people of all ages, backgrounds, incomes, and locations, certain groups are targeted more frequently. Sometimes fraudsters target older people, and sometimes they target people of different racial, ethnic, or national origins, or people for whom English is not their first language. Sometimes scam artists target members of the military. The FTC is thus making a concerted effort to ensure that our fraud prevention efforts—both law enforcement and education—are reaching every community, including groups that may have been underserved in the past.

The agency has aggressively enforced the law against scam artists and sought to educate older consumers about scams and to promote technological solutions that will make it more difficult for scammers to operate and hide from law enforcement. Though all of the FTC's fraud cases involve elderly consumers as part of the general population, since 2005, the Commission has brought 38 cases alleging that defendants' conduct has specifically targeted or disproportionately harmed older adults. Although scams targeting older Americans are diverse and have ranged from sweepstakes to business opportunities, the FTC has in recent years concentrated its law enforcement efforts on online threats and various types of impostor scams. Some examples are technical support scams, health care-related scams, and sweepstakes and prize scams. The FTC also has pursued actions related to the money transfer services that are commonly used in scams affecting older adults, and has coordinated efforts with criminal and foreign law enforcement agencies to achieve a broader impact.

FTC education and outreach programs reach tens of millions of people every year. Among them are a series of fotonovelas (graphic novels) to raise awareness about scams targeting the Latino community and the ''Pass It On'' program that provides seniors with information, in English and Spanish, on a variety of scams targeting the elderly.[42] The agency works with the Elder Justice Coordinating Council to help protect seniors. And the FTC also works with the AARP Foundation, whose peer counselors provided fraud-avoidance advice last year to more than a thousand seniors who had filed complaints about certain frauds, including lottery, prize promotion, and grandparent scams. The Commission also promotes initiatives to make it harder for scammers to fake or ''spoof'' their caller identification information and supports more widespread availability of technology that will block calls from fraudsters, essentially operating as a spam filter for the telephone.

(d) Protecting Financially Distressed Consumers. Even as the economy recovers, some consumers continue to face financial challenges. The FTC acts to protect consumers from deceptive and unfair credit practices and ensure that consumers can get the information they need to make informed financial choices. The Commission has continued its enforcement efforts by bringing law enforcement actions to curb deceptive and unfair practices in mortgage rescue, debt relief, auto financing, and debt collection.

For example, if educational institutions make promises to their prospective students about future employment and income, the institutions must be able to substantiate those claims. On January 27, 2016, the Commission filed suit against DeVry University for allegedly deceiving students about the likelihood that they would find jobs after graduation in their field of study.[43] In its complaint against DeVry, the FTC alleged that the defendants' claim that 90 percent of DeVry graduates actively seeking employment landed jobs in their field within six months of graduation was deceptive. The complaint also charged that DeVry deceptively claimed that its graduates had 15 percent higher incomes one year after graduation on average than the graduates of all other colleges or universities.

(e) Fighting Identity Theft. The issue of identity theft has been one of the top consumer complaint subject areas reported to the FTC over the past 15 years, and in 2015, the Commission received 490,220 complaints from consumers who were victims of identity theft. On May 14, 2015, the FTC launched the Web site IdentityTheft.gov (robodeidentidad.gov in Spanish), a free, one-stop resource people can use to report and recover from identity theft. The site implements the President's Executive Order[44] by consolidating federal resources and reducing the burden on identity theft victims as they repair damage caused by identity theft. The online site is accessible from mobile devices and is integrated with the FTC's consumer complaint system. Identity theft victims can use the site to create a personal recovery plan based on the type of identity theft they face and prepare pre-filled letters and forms to send to credit bureaus, businesses and debt collectors. During 2015, the IdentityTheft.gov Web site had more than 1.3 million page views and the public ordered more than 3.7 million related publications in English, Spanish and four other languages.

Tax identity theft is a growing share of identity theft-related complaints. In January 2016, the FTC sponsored a Tax Identity Theft Awareness Week to raise awareness about tax identity theft and provide tips about how to respond to it. The FTC's Tax Identity Theft Awareness Week Web site[45] provided material for regional events held in the states with the highest reported rates of identity theft. The FTC conducted multiple webinars with Veterans Affairs staff and military financial counselors, including three webinars about tax identity theft

and imposter scams that reached more than 1,100 Veterans Affairs staff and veterans.

(f) Sharing Economy. In light of the recent rapid expansion of business activity on online and mobile peer-to-peer business platforms, the Commission hosted a workshop in 2015 on the emerging ''Sharing Economy.'' [46] Peer-to-peer platforms provide marketplaces in which numerous suppliers (frequently individuals and small entities) and consumers may locate partners and engage in commercial transactions.[47] These platforms, and suppliers using them, are providing innovative alternatives to consumers in a number of sectors, particularly in local transportation (*e.g.,* Uber and Lyft) and lodging (*e.g.,* Airbnb). The workshop examined the economics underlying sharing economy activity, the reputational systems and other mechanisms that sharing economy platforms use to promote trust among parties, how entry by sharing economy platforms and suppliers enhances competition, and the debate over how such economic activity should be regulated.

(g) Promoting Competition in Health Care Markets. The Commission prioritizes preventing mergers that would reduce competition among healthcare providers and likely enable the merged entities to raise rates charged to commercial healthcare plans for vital services and reduce incentives to improve service quality and innovation. The latest empirical research consistently finds that provider competition results in the greatest price and quality benefits for consumers, driving the FTC's continued vigilance in health care provider markets.[48] In late 2015, the Commission sued to stop three proposed hospital mergers that the agency alleged would lead to increased market power for the merging firms in their local communities.[49] Two of these cases are still pending, but on July 6, 2016, the FTC dismissed without prejudice its administrative complaint challenging the proposed merger between Cabell Huntington Hospital and St. Mary's Medical Center—two hospitals located three miles apart in Huntington, West Virginia. The Commission voted to dismiss the complaint in light of the passage in March 2016 of a new West Virginia law relating to certain ''cooperative agreements'' between hospitals in that state, and the West Virginia Health Care Authority's decision to approve a cooperative agreement between Cabell and St. Mary's. Cooperative agreement laws seek to replace antitrust enforcement with state regulation and supervision of healthcare provider combinations. In the Commission's view, this case presents another example of healthcare providers using state legislation to shield potentially anticompetitive combinations from antitrust enforcement. Such state cooperative agreement laws are likely to harm local communities through higher health care costs and lower quality care.[50]

The FTC also continues to work to eliminate anticompetitive ''pay-for-delay'' settlements in which a branded drug firm pays a generic competitor to keep generic drugs off the market. In a significant victory, the U.S. Supreme Court held that pay-for-delay agreements between brand and generic drug companies are subject to antitrust scrutiny under an antitrust ''rule of reason'' analysis. *FTC* v. *Actavis, Inc.,* 570 U.S. 756 (2013). This decision cleared the way for antitrust review of potentially anticompetitive pay-for-delay patent settlement agreements. The FTC currently has three active pay-for-delay litigations underway in federal courts. Two involve the blockbuster male testosterone replacement drug Androgel (the *Actavis* case on remand to the U.S. District Court for the Northern District of Georgia and *FTC* v. *AbbVie, Inc.,* in the U.S. District Court for the Eastern District of Pennsylvania).[51] The third case involves an agreement not to market an authorized generic—often called a ''no-AG'' commitment—as a form of reverse payment.[52]

The FTC also remains vigilant to stop other anticompetitive conduct by pharmaceutical firms to delay generic competition, including ''product hopping,'' where a brand introduces new products with minor or no substantive improvements in the hopes of preventing substitution to lower-priced generics. The Commission has noted that the potential for anticompetitive product design is particularly acute in the pharmaceutical industry, in part because it may be a profitable strategy even if consumers do not prefer the reformulated version of the product or if it lacks any real medical benefit.[53]

(h) Promoting Competition for Retail Goods. On May 19, 2016, Staples, Inc. abandoned its proposed $6.3 billion acquisition of Office Depot, Inc. after the Commission obtained a preliminary injunction in federal court. This deal would have eliminated head-to-head competition between the two companies and likely led to higher prices and lower quality for the many large businesses that purchase office supplies for their own use. This action, like other merger challenges involving supermarkets and dollar stores, helps preserve competition in prices, distribution, and combination of services and features for products that businesses and consumers buy every day.

The Commission also recently filed an administrative complaint against 1–800

Sept. 30, 2015), *https://www.ftc.gov/system/files/documents/amicus_briefs/mylan-pharmaceuticals-inc.v.warner-chilcott-plc-et-al./151001mylanamicusbrief.pdf.* Commissioner Ohlhausen voted against the filing of this brief.

Contacts, the country's largest online seller of contact lenses.[54] The complaint alleges that the company entered into a series of agreements with its online rivals that suppress competition in certain online search advertising auctions and restrict truthful internet advertising to consumers, resulting in some consumers paying more for contact lenses than they would have absent the agreements. The complaint contends that the agreements, which settled trademark lawsuits that 1–800 Contacts brought or threatened, bar both 1–800 Contacts and each of its affected rivals from bidding for each other's trademarked terms. The agreements also allegedly require each party to use negative keywords designed to keep search engines from displaying one party's advertisements in response to a search query that includes terms specified by the other party. The complaint charges that the bidding agreements are overly broad and unnecessary to safeguard any legitimate trademark interest. The case is pending.

(i) Fostering Innovation & Competition. For more than two decades, the Commission has examined difficult issues at the intersection of antitrust and intellectual property law—including those related to innovation, standard-setting, and patents. The Commission's work in this area is grounded in the recognition that intellectual property and competition laws share the fundamental goals of promoting innovation and consumer welfare. The Commission has authored several seminal reports on competition and patent law and conducted workshops to learn more about emerging practices and trends.

For instance, the FTC has used its authority under Section 6(b) of the Federal Trade Commission Act to explore the impact of patent assertion entities (PAE), firms that acquire patents from third parties and then try to make money by licensing or suing accused infringers. In 2014, the FTC received clearance under the Paperwork Reduction Act from the Office of Management and Budget to issue compulsory process orders to PAEs and other industry participants to develop a better understanding of PAE business models. During October 2016, the FTC published a staff report that spotlighted the business practices of PAEs and recommended patent litigation reforms.[55]

In 2014, the FTC received clearance under the Paperwork Reduction Act from the Office of Management and Budget to issue compulsory process orders to PAEs and other industry participants to develop a better understanding of PAE business models. The FTC expects to publish a report in Fall 2016 describing its findings and providing recommendations for future reform.

In conjunction with the Department of Justice, the Commission is also seeking to update the Antitrust Guidelines for the Licensing of Intellectual Property, also known as the IP Licensing Guidelines. To reflect changes in law and accumulated antitrust enforcement experience over the past 20 years, the agencies have proposed modifications to the IP Licensing Guidelines. The Commission is seeking comments from the public on the proposed update.[56]

(j) Deceptive Endorsements and Native Advertising. The Commission also focuses on many other advertising issues, such as deceptive endorsements and native advertising. Deceptive endorsements continue to be a priority, especially given the rapid growth of newer forms of promotion, such as social media, videos, and online reviews. Last year the FTC updated its Endorsement Guides to address these newer forms of promotion.[57] The key principle is straightforward: Consumers have a right to know when a supposedly objective opinion is actually a marketing pitch. The FTC has brought many past cases and several recent cases involving deceptive endorsements, including a recent settlement with Machinima, an entertainment network that allegedly paid a large group of ''influencers'' to post videos online touting Microsoft's Xbox One.[58] According to the complaint, the videos appeared to be the objective views of the influencers and allegedly did not disclose they were actually paid endorsements. In July 2016, the FTC announced a proposed settlement that would resolve allegations of similar practices against Warner Brothers.[59]

The Commission focuses on similar concerns with respect to native advertising, which involves the use of formats that make advertising or promotional messages look like objective content. The Commission recently issued an Enforcement Policy Statement about this practice.[60] It affirms that ads and marketing that promote the benefits and attributes of goods and services should be identifiable as advertising to consumers. The FTC also recently brought its first native advertising case, alleging that retailer Lord & Taylor deceived consumers by paying for native ads, including a seemingly objective article in an online fashion publication, without disclosing that such ads were actually paid promotions for a 2015 clothing launch.[61] The FTC also challenged the company's endorsement practices. The complaint alleged that the company paid 50 online fashion ''influencers'' to post Instagram pictures of themselves wearing a dress from the new collection without disclosing that it had paid the influencers to do so.

(k) Energy Prices. Few issues are more important to consumers and businesses than the prices they pay for gasoline to run their vehicles and energy to heat and light their homes and businesses. Given the impact of energy prices on consumer budgets, the energy sector continues to be a major focus of FTC law enforcement and study. Accordingly, the FTC works to maintain competition in energy industries, invoking all the powers at its disposal—including monitoring industry activities, investigating possible antitrust violations, prosecuting cases, and conducting studies—to protect consumers from anticompetitive conduct in the industry.[62] For example, in 2016, the Commission required divestitures in connection with

ArcLight Energy's acquisition of Gulf Oil to preserve competition among petroleum product terminals located in Altoona, Scranton, and Harrisburg, Pennsylvania.[63] The Commission also hosted a one-day public workshop to explore competition and consumer protection issues that may arise when consumers generate their own electric power by installing solar panels on their homes.[64] In view of the fundamental importance of oil, natural gas, and other energy resources to the overall vitality of the United States and world economy, we expect that FTC review and oversight of the energy industries will remain a focus of our work for years to come.

(l) Remedy Study. The Commission is conducting another study to evaluate the effectiveness of the Commission's orders in past merger cases where it has required a divestiture or other remedy.[65] This effort will expand on a similar remedy study conducted in the 1990s that led to important improvements in the Commission's orders.[66] The new study is broader, covering 90 orders entered between 2006 and 2012, and will benefit from information collected from customers and significant competitors. We expect the study to provide insight into whether the Commission's orders maintained competition in markets that otherwise would have been affected by the merger at issue.

(m) Protecting Consumers from Cross-Border Harm. The FTC cooperates with competition and consumer protection agencies in other countries to halt deceptive and anticompetitive business practices that affect U.S. consumers, and promotes sound approaches to issues of mutual international interest by building relationships with counterpart agencies around the world on competition and consumer protection issues.

The FTC cooperated on enforcement-related matters with foreign agencies or multilateral organizations in 58 consumer protection and privacy matters, using its authority under the U.S. SAFE WEB Act in 19 of these matters to share information or provide investigative assistance to foreign authorities. One highlight was the FTC's successful effort, working with the Royal Canadian Mounted Police and the U.S. Department of Justice, to obtain a court order from a Montreal court repatriating nearly $2 million to the U.S. victims of a phony mortgage assistance and debt relief scheme. The FTC also continues to advance enforcement cooperation through networks such as the International Consumer Protection and Enforcement Network (ICPEN), the Global Privacy Enforcement Network (GPEN), the anti-spam London Action Plan and the International Mass Marketing Fraud Working Group. It relaunched the *econsumer.gov* complaint portal, together with 33 other countries that are members of ICPEN, to enhance their ability to gather and share cross-border consumer complaints that can be used to investigate and take action against international scams. In addition, the FTC with enforcement agencies from seven other GPEN member countries launched a new information-sharing system—GPEN Alert—which enables the FTC and its counterparts to better coordinate international efforts to protect consumer privacy by sharing information about investigations while maintaining confidentiality.

In the policy arena, the FTC played a leading role in revising the OECD's Guidelines on Consumer Protection in Electronic Commerce, which were adopted by the OECD Council in early 2016 to address new developments in e-commerce including mobile applications, digital content, and peer platform marketplaces. The agency also played an important role in negotiating new provisions of the United Nations Guidelines on Consumer Protection relating to e-commerce, consumer financial services, dispute resolution and redress, and international cooperation.

The FTC also continues to advocate for global interoperability among different international privacy frameworks. For example, the FTC worked closely with the U.S. Department of Commerce and European Commission to develop the E.U.-U.S. Privacy Shield Framework which the European Commission adopted on July 12, 2016. The new framework replaces the U.S.-E.U. Safe Harbor Framework and allows companies of all sizes and across most industries to transfer data between the European Union and United States. The new framework enhances protections for EU citizens' data, improves cooperation procedures among U.S. and EU authorities, and adds new redress and complaint resolution mechanisms for EU citizens. The FTC has a strong track record of protecting consumer privacy in many contexts, and it is committed to vigorously enforcing the new framework.

Throughout 2016, the FTC's international competition program promoted cooperation with competition agencies in other jurisdictions and advocated convergence of international antitrust policies toward best practice. As a new co-chair of the Mergers Working Group of the International Competition Network (ICN), the FTC is already taking a lead role to strengthen implementation of, and possibly update, the ICN's signature recommended practices for merger notification and review procedures.

In addition to promoting convergence toward sound competition policy and enforcement, the FTC advocates fair and transparent enforcement procedures. The FTC initiated and co-led the ICN's project on procedural fairness that culminated in the consensus Guidance on Investigative Process, which is the most comprehensive agency-led effort to articulate best practices in providing due process in antitrust investigations. The FTC actively promotes implementation of these standards of transparency, engagement, and other key procedural aspects of antitrust enforcement. The FTC also participated in the interagency teams that negotiated outcomes with China in the Joint Commission on Commerce and Trade and the Strategic and Economic Dialogue, including with regard to procedural fairness in anti-monopoly law proceedings and the coherence of antitrust monopoly and intellectual property rules. We also played an active role in developing the competition chapters of Trans-Pacific and Transatlantic Trade and Investment Partnerships.

Finally, the FTC has continued its robust technical assistance program to share its experience with competition agencies around the world. In 2016, the FTC conducted programs in jurisdictions around the globe, including Argentina, Brazil, India, Mexico, the Philippines, South Africa, and Ukraine. Through its International Fellows Program, the FTC brought ten international competition colleagues from five competition agencies to work alongside FTC staff on antitrust enforcement matters for fiscal year 2016. Under the same program, the FTC brought four international consumer protection colleagues from four agencies to work alongside FTC staff on consumer protection matters and research this fiscal year.

(n) Self-Regulatory and Compliance Initiatives with Industry. The Commission continues to engage

industry in compliance partnerships in the funeral and franchise industries. Specifically, the Commission's Funeral Rule Offender Program, conducted in partnership with the National Funeral Directors Association, is designed to educate funeral home operators found in violation of the requirements of the Funeral Rule, 16 CFR 453, so that they can meet the rule's disclosure requirements. Four hundred and ninety-nine funeral homes have participated in the program since its inception in 1996. In addition, the Commission established the Franchise Rule Alternative Law Enforcement Program in partnership with the International Franchise Association (IFA), a nonprofit organization that represents both franchisors and franchisees. This program assists franchisors found to have a minor or technical violation of the Franchise Rule, 16 CFR 436, in complying with the rule. Violations involving fraud or other FTC Act violations are not candidates for referral to the program. The IFA teaches the franchisor how to comply with the rule and monitors its business for a period of years. Where appropriate, the program offers franchisees the opportunity to mediate claims arising from the law violations. Since December 1998, 21 companies have agreed to participate in the program.

Retrospective Review of Existing Regulations

In 1992, the Commission implemented a program to review its rules and guides regularly. The Commission's review program is patterned after provisions in the Regulatory Flexibility Act, 5 U.S.C. 601–612. Under the Commission's program, rules are reviewed on a 10-year schedule. For many rules, this has resulted in more frequent reviews than are generally required by Section 610 of the Regulatory Flexibility Act. This program is also broader than the review contemplated under the Regulatory Flexibility Act, in that it provides the Commission with an ongoing systematic approach for seeking information about the costs and benefits of its rules and guides and whether there are changes that could minimize any adverse economic effects, not just a ''significant economic impact upon a substantial number of small entities.'' 5 U.S.C. 610. In each rule review, the Commission requests public comments on, among other things, the economic impact and benefits of the rule; possible conflict between the rule and state, local, or other federal laws or regulations; and the effect on the rule of any technological, economic, or other industry changes.

As part of its continuing 10-year review plan, the Commission examines the effect of rules and guides on small businesses and on the marketplace in general. These reviews may lead to the revision or rescission of rules and guides to ensure that the Commission's consumer protection and competition goals are achieved efficiently and at the least cost to business. In a number of instances, the Commission has determined that existing rules and guides were no longer necessary or in the public interest. Most of the matters currently under review pertain to consumer protection and are intended to ensure that consumers receive the information necessary to evaluate competing products and make informed purchasing decisions. Pursuant to this program, the Commission has rescinded 37 rules and guides promulgated under the FTC's general authority and updated dozens of others since the early 1990s.

In light of Executive Orders 13563 and 13579, the FTC continues to take a fresh look at its long-standing regulatory review process. The Commission is taking a number of steps to ease burdens on business and promote transparency in its regulatory review program:

- The Commission issued in February 2016 a revised 10-year review schedule (see next paragraph below). The Commission is currently reviewing 11 of the 65 rules and guides within its jurisdiction.
- The Commission continues to request and review public comments on the effectiveness of its regulatory review program and suggestions for its improvement.
- The FTC maintains a Web page at *http://www.ftc.gov/regreview* that serves as a one-stop shop for the public to obtain information and provide comments on individual rules and guides under review as well as the Commission's regulatory review program generally.

In addition, the Commission's 10-year periodic review schedule includes initiating reviews for the following rules and guides (81 FR 7716, Feb. 16, 2016) during 2016:

(1) Standards for Safeguarding Customer Information, 16 CFR 314,

(2) CAN–SPAM Rule, 16 CFR 316,

(3) Labeling and Advertising of Home Insulation, 16 CFR 460,

(4) Disposal of Consumer Report Information and Records, 16 CFR 682, and in 2017 for:

(5) Deceptive Advertising as to Sizes of Viewable Pictures Shown by Television Receiving Sets, 16 CFR 410.

Ongoing Rule and Guide Reviews

The Commission is continuing review of a number of rules and guides, which are discussed below.

(a) Rules

Energy Labeling Rule, 16 CFR 305. The Energy Labeling Rule is officially known as the Rule concerning Energy and Water Use Labeling for Consumer Products Under the Energy Policy and Conservation Act. On September 12, 2016, the Commission proposed amendments to the Energy Labeling Rule to require labels for portable air conditioners, large-diameter and high-speed small diameter ceiling fans, and instantaneous electric water heaters. 81 FR 62681. Additionally, it proposed eliminating certain marking requirements for plumbing products. The comment period closes on November 14, 2016.[67]

R-value Rule, 16 CFR 460. On April 6, 2016, the Commission initiated a periodic review of the R-value Rule, officially the Trade Regulation Rule Concerning the Labeling and Advertising of Home Insulation, as part of its ongoing systematic review of all rules and guides. 81 FR 19936. The comment period was later extended to September 6, 2016. 81 FR 35661 (June 3, 2016). Staff anticipates sending a recommendation to the Commission by the end of 2016. The R-value Rule is designed to assist consumers in evaluating and comparing the thermal performance characteristics of competing home insulation products by specifically requiring manufacturers of home insulation products to provide information about the product's degree of resistance to the flow of heat (R-value). The Rule also establishes uniform standards for testing, information disclosure, and substantiation of product performance claims.

Telemarketing Sales Rule (TSR), 16 CFR 308. On August 11, 2014, the Commission initiated a periodic review of the TSR as set out on the 10-year review schedule.[68] 79 FR 46732. The comment period as extended closed on November 13, 2014. 79 FR 61267 (Oct. 10, 2014). Staff anticipates making a recommendation to the Commission by the end of July 2017.

Privacy Rule, 16 CFR 313. The Privacy Rule or Privacy of Consumer Financial Information Rule requires, among other things, that certain motor vehicle

[67] See *Final Actions* below for information about a separate completed rulemaking proceeding for the Energy Labeling Rule.

[68] See *Final Actions* below for information about a separate completed rulemaking proceeding for the Telemarketing Sales Rule.

dealers provide an annual disclosure of their privacy policies to their customers by hand delivery, mail, electronic delivery, or through a Web site, but only with the consent of the consumer. On June 24, 2015, the Commission proposed amending the Rule to allow motor vehicle dealers instead to notify their customers that a privacy policy is available on their Web site, under certain circumstances. 80 FR 36267. The proposed amendment would also revise the scope and definitions in the Rule in light of the transfer of part of the Commission's rulemaking authority to the Consumer Financial Protection Bureau in the Dodd-Frank Wall Street Reform and Consumer Protection Act. The comment period closed on August 31, 2015. Staff anticipates that the Commission will take its next action by April 2017.

Care Labeling Rule, 16 CFR 423. Promulgated in 1971, the Rule on Care Labeling of Textile Apparel and Certain Piece Goods as Amended (the Care Labeling Rule) makes it an unfair or deceptive act or practice for manufacturers and importers of textile wearing apparel and certain piece goods to sell these items without attaching care labels stating ''what regular care is needed for the ordinary use of the product.'' The Rule also requires that the manufacturer or importer possess, prior to sale, a reasonable basis for the care instructions and allows the use of approved care symbols in lieu of words to disclose care instructions. After reviewing the comments from a periodic rule review (76 FR 41148, July 13, 2011), the Commission concluded on September 20, 2012, that the Rule continued to benefit consumers and would be retained, and sought comments on potential updates to the Rule, including changes that would allow garment manufacturers and marketers to include instructions for professional wetcleaning on labels; permit the use of ASTM Standard D5489–07, ''Standard Guide for Care Symbols for Care Instructions on Textile Products,'' or ISO 3758:2005(E), ''Textiles—Care labeling code using symbols,'' in lieu of terms; clarify what can constitute a reasonable basis for care instructions; and update the definition of ''dryclean.'' 77 FR 58338. On March 28, 2014, the Commission hosted a public roundtable in Washington, DC, that analyzed proposed changes to the Rule. Staff anticipates Commission action by 2017.

Used Car Rule, 16 CFR 455. The Used Motor Vehicle Trade Regulation Rule (Used Car Rule), 16 CFR 455, sets out the general duties of a used vehicle dealer; requires that a completed Buyers Guide be posted at all times on the side window of each used car a dealer offers for sale; and mandates disclosure of whether the vehicle is covered by a dealer warranty and, if so, the type and duration of the warranty coverage, or whether the vehicle is being sold ''as is—no warranty.'' The Commission published a notice seeking public comments on the effectiveness and impact of the rule. *See* 73 FR 42285 (July 21, 2008). The comment period, as extended and then reopened, ended on June 15, 2009. In response to comments, the Commission published a Notice of Proposed Rulemaking on December 17, 2012 (*See* 77 FR 74746) and a final rule revising the Spanish translation of the window form on December 12, 2012. *See* 77 FR 73912. The extended comment period on the NPRM ended on March 13, 2012. The Commission issued a Supplemental NPRM on November 28, 2014. 79 FR 70804. Staff anticipates Commission action by November 2016.

Contact Lens Rule, 16 CFR 315, and Eyeglass Rule, 16 CFR 456. As part of the systematic rule review process, on September 3, 2015, the Commission issued **Federal Register** notices seeking public comments about the Contact Lens Rule and the Eyeglass Rule (or Trade Regulation Rule on Ophthalmic Practice Rules). 80 FR 53272 (Contact Lens Rule) and 80 FR 53274 (Eyeglass Rule). The comment period extended until October 26, 2015. Commission staff has completed the review of 660 comments on the Contact Lens Rule and 831 comments on the Eyeglass Rule and is formulating next steps. The Contact Lens Rule requires contact lens prescribers to provide prescriptions to their patients upon the completion of a contact lens fitting, and to verify contact lens prescriptions to contact lens sellers authorized by consumers to seek such verification. Sellers may provide contact lenses only in accordance with a valid prescription that is directly presented to the seller or verified with the prescriber. The Eyeglass Rule requires that an optometrist or ophthalmologist must give the patient, at no extra cost, a copy of the eyeglass prescription immediately after the examination is completed. The Rule also prohibits optometrists and ophthalmologists from conditioning the availability of an eye examination, as defined by the Rule, on a requirement that the patient agree to purchase ophthalmic goods from the optometrist or ophthalmologist.

Holder in Due Course Rule, 16 CFR 433. On December 1, 2015, the Commission initiated a periodic review of this Rule, officially the Preservation of Consumers' Claims and Defenses Rule. 80 FR 75018. The comment period closed on February 12, 2016. Staff is reviewing the comments and anticipates sending a recommendation to the Commission by early 2017. The Holder in Due Course Rule requires sellers to include language in consumer credit contracts that preserves consumers' claims and defenses against the seller. This rule eliminated the holder in due course doctrine as a legal defense for separating a consumer's obligation to pay from the seller's duty to perform by requiring that consumer credit and loan contracts contain one of two clauses to preserve the buyer's right to assert sales-related claims and defenses against any ''holder'' of the contracts.

Disposal Rule, 16 CFR 682. On September 15, 2016, the Commission initiated a periodic review of the Disposal Rule (formally the Disposal of Consumer Report Information and Records) as part of its ongoing systematic review of all rules and guides. 81 FR 63435. The comment period will close on November 21, 2016. The Disposal Rule requires any person or entity that maintains or otherwise possesses consumer information for a business purpose to properly dispose of the information to protect against unauthorized access to or use of the information. Consumer information means any record about an individual that is a consumer report or is derived from a consumer report, or a compilation of such records. This rule implements Section 216 of the Fair and Accurate Credit Transactions Act of 2003, which is designed to reduce the risk of consumer fraud and related harms, including identity theft, created by improper disposal of consumer information.

Safeguards Rule (or Standards for Safeguarding Customer Information), 16 CFR 314. On September 7, 2016, the Commission initiated a periodic review of the Safeguards Rule as part of its ongoing systematic review of all rules and guides. 81 FR 61632. The comment period will close on November 7, 2016. The FTC's Safeguards Rule, as directed by the Gramm-Leach-Bliley Act (GLB), requires each financial institution subject to the FTC's jurisdiction to develop a written information security program that is appropriate to its size and complexity, the nature and scope of its activities, and the sensitivity of the customer information at issue.

CAN–SPAM Rule, 16 CFR 316. The Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003 sets rules for commercial email, establishes requirements for commercial messages, gives recipients the right to have senders of commercial email stop emailing them, and provides for

penalties for violations. The FTC issued the CAN–SPAM Rule (Rule) to implement the Act, as authorized by the statute. As part of its ongoing systematic review of all Federal Trade Commission rules and guides, in late 2016 the Commission plans to initiate a periodic review of the Rule.

Picture Tube Rule, 16 CFR 410. The Picture Tube Rule, officially the Rule on Deceptive Advertising as to Sizes of Viewable Pictures Shown by Television Receiving Sets, became effective in 1967 and sets forth appropriate methods for measuring television screens when that measure is included in any advertisement or promotional material for the television set. If the measurement of the screen size is based on a measurement other than the horizontal dimension of the actual viewable picture area, the method of measurement must be clearly and conspicuously disclosed in close proximity to the size designation. As part of the systematic review of its rules and guides, the Commission plans to initiate a periodic review of this rule in 2017.

(b) Guides

Jewelry Guides, 16 CFR 23. On July 2, 2012, the Commission sought public comments on its Guides for the Jewelry, Precious Metals, and Pewter Industries, which are commonly known as the Jewelry Guides. 77 FR 39202. The Guides explain to businesses how to avoid making deceptive claims about precious metal, pewter, diamond, gemstone, and pearl products and when they should make disclosures to avoid unfair or deceptive trade practices. Based on comments received, and on information obtained during a public roundtable in June 2013, the FTC proposed revisions to the Guides on January 12, 2016, regarding below-threshold alloys, precious metal content of products containing more than one precious metal, surface application of precious metals, lead-glass filled stones, ''cultured'' diamonds, pearl treatments, varietals, and misuse of the word ''gem.'' 81 FR 1349. The extended comment period closed on June 3, 2016, and Commission staff anticipates forwarding a recommendation to the Commission before the end of 2016.

Fuel Economy Guide, 16 CFR 259. On June 6, 2016, the Commission sought comments on proposed amendments to the Guide Concerning Fuel Economy Advertising for New Automobiles (Fuel Economy Guide) to reflect current Environmental Protection Agency and National Highway Traffic Safety Administration fuel economy labeling rules and to consider advertising claims prevalent in the market. 81 FR 36216. The extended comment period closed on September 8, 2016. Staff is reviewing the comments and is considering next steps. The Fuel Economy Guide was adopted in 1975 to prevent deceptive fuel economy advertising and to facilitate the use of fuel economy information in advertising.

Green Guides, 16 CFR 260. On August 10, 2016, the FTC released a staff report analyzing an internet-based study that explored consumer perceptions of ''organic'' and ''recycled content'' claims related to the Commission's Green Guides (officially Guides for the Use of Environmental Marketing Claims).[69] The study, which was co-funded by the United States Department of Agriculture (USDA), also addressed consumer perception of pre-consumer recycled content claims. The Commission and the USDA also held a public roundtable on October 20, 2016, that explored organic claims for non-food products and ways to reduce deceptive organic claims, including through consumer education.

Final Actions

Since the publication of the 2015 Regulatory Plan, the Commission has issued the following final rules or taken other actions to close other rulemaking proceedings.

Hobby Rules, 16 CFR 304. On October 11, 2016, the Commission announced a final rule amending the Hobby Rules to conform with the 2014 Collectible Coin Protection Act that amended the Hobby Protection Act, 15 U.S.C. 2101–2106. The Hobby Protection Act prohibits manufacturing or importing imitation numismatic and collectible political items unless they are marked in accordance with regulations prescribed by the Federal Trade Commission. The implementing Rules prescribe that imitation political items—such as buttons, posters or coffee mugs—must be marked with the calendar year in which they were manufactured, and imitation numismatic items—including coins, tokens and paper money—must be marked with the word ''copy.''

The final rule amendments extend the scope of the Rules to cover persons or entities that sell imitation numismatic items (coins, paper currency and commemorative medals), or provide substantial assistance or support to any manufacturer, importer, or seller of imitation numismatic items, or any manufacturer or importer of imitation political items, who they know, or should have known, is violating the marking requirements of the Hobby Act and the Rules. The amendments will be effective on November 16, 2016.

Fuel Rating Rule, 16 CFR 306. First issued in 1979, the Fuel Rating Rule (or Automotive Fuel Ratings, Certification and Posting Rule) enables consumers to buy gasoline with an appropriate octane rating for their vehicle and establishes standard procedures for determining, certifying, and posting octane ratings. On January 14, 2016, the Commission published final rule amendments that require entities to rate and certify all ethanol fuels with ethanol content ranging from above 10 percent to 83 percent so as to provide useful information to consumers about ethanol concentration and suitability for their cars and engines (81 FR 2054). The final rule amendments respond to the comments by providing greater flexibility for businesses to comply with the ethanol labeling requirements, and by not adopting the alternative octane rating method proposed in the 2014 Notice of Proposed Rulemaking (79 FR 18850 April 4, 2014). The amendments took effect on July 14, 2016.

Telemarketing Sales Rule (TSR), 16 CFR 308. Anti-Fraud Provisions— Following a public comment period, the Commission amended the TSR on December 14, 2015, to define and prohibit the use of certain payment methods in all telemarketing transactions; expand the scope of the advance fee ban for recovery services; and clarify certain provisions of the Rule (80 FR 77520).[70] For inbound or outbound telemarketing transactions by telemarketers and sellers, the amendments prohibit novel payment methods that are difficult to trace and hard for people to reverse. The prohibited payment methods include remotely created checks, remotely created payment orders, cash-to-cash money transfers, and cash reload mechanisms. While addressing changes in the financial marketplace to ensure consumers remain protected by the TSR's antifraud provisions, the amendments are narrowly tailored to allow for innovations with respect to other payment methods that are used by legitimate companies. Portions of the changes took effect on February 12, 2016, while the remainder took effect on June 13, 2016.

Energy Labeling Rule, 16 CFR 305. On September 15, 2016, the Commission

[69] *See* FTC Staff Report, Consumer Perception of ''Recycled Content'' and ''Organic'' Claims (Aug. 10, 2016), *https://www.ftc.gov/system/files/documents/reports/consumer-perception-recycled-content-organic-claims-joint-staff-report-federal-trade-commission/consumer_perception_of_recycled_content_and_organic_2016-08-10.pdf.*

[70] See *Ongoing Rule and Guide Reviews* for information about a separate ongoing rulemaking proceeding for the Telemarketing Sales Rule.

amended the Rule to improve access to energy labels online and improve labels for refrigerators, ceiling fans, central air conditioners, and water heaters. 81 FR 63634. The amendments to 16 CFR 305.3(x), 305.13, and Sample Label 17 of Appendix L are effective on September 17, 2018. All other amendments are effective on June 12, 2017.[71]

Rule Governing Disclosure of Written Consumer Product Warranty Terms and Conditions and the Pre-Sale Availability Rule, 16 CFR 701–702. These rules establish (1) requirements for warrantors for disclosing the terms and conditions of written warranties on consumer products actually costing the consumer more than $15.00, and (2) requirements for sellers and warrantors to make the terms of any written warranty available to the consumer prior to the sale of the product. The E-Warranty Act of 2015, which was signed into law on September 24, 2015, directed the FTC to revise the Pre-Sale Availability Rule to permit the option of using Internet Web sites to post warranty terms, in addition to the other methods that the Pre-Sale Availability Rule already allows. On September 15, 2016, the FTC issued final rule amendments, which were effective on October 17, 2016. 81 FR 63664.

Premerger Notification Rules and Report Form (or HSR Rules), 16 CFR 801–803. On September -1, 2016, the Commission amended the HSR Rules to allow for submission of the Premerger Notification and Report Form (Form) and accompanying documents on digital video/versatile disc (DVD), and clarify the Instructions to the Form. The final rule was effective on September 1, 2016 (81 FR 60257).

Summary

In both content and process, the FTC's ongoing and proposed regulatory actions are consistent with the President's priorities. The actions under consideration inform and protect consumers, while minimizing the regulatory burdens on businesses. The Commission will continue working toward these goals. The Commission's 10-year review program described above is patterned after provisions in the Regulatory Flexibility Act and complies with the Small Business Regulatory Enforcement Fairness Act of 1996. The Commission's 10-year program also is consistent with section 5(a) of Executive Order 12866, which directs executive branch agencies to develop a plan to reevaluate periodically all of their significant existing regulations. 58 FR 51735 (Sept. 30, 1993). In addition, the final rules issued by the Commission continue to be consistent with the President's Statement of Regulatory Philosophy and Principles, Executive Order 12866, section 1(a), which directs agencies to promulgate only such regulations as are, *inter alia,* required by law or are made necessary by compelling public need, such as material failures of private markets to protect or improve the health and safety of the public.

The Commission continues to identify and weigh the costs and benefits of proposed regulatory actions and possible alternative actions and to seek and consider the broadest practicable array of comment from affected consumers, businesses, and the public at large. In sum, the Commission's regulatory actions are aimed at efficiently and fairly promoting the ability of ''private markets to protect or improve the health and safety of the public, the environment, or the well-being of the American people.'' Executive Order 12866, section 1.

II. Regulatory and Deregulatory Actions

The Commission has no proposed rules that would be a ''significant regulatory action'' under the definition in Executive Order 12866.[72] The Commission has no proposed rules that would have significant international impacts under the definition in Executive Order 13609. Also, there are no international regulatory cooperation activities that are reasonably anticipated to lead to significant regulations under Executive Order 13609.

BILLING CODE 6750–01–P

NATIONAL INDIAN GAMING COMMISSION

Statement of Regulatory Priorities

In 1988, Congress adopted the Indian Gaming Regulatory Act (IGRA) (Pub. L. 100–497, 102 Stat. 2475) with a primary purpose of providing ''a statutory basis for the operation of gaming by Indian tribes as a means of promoting tribal economic development, self-sufficiency, and strong tribal governments.'' IGRA established the National Indian Gaming Commission (NIGC) to protect such gaming, amongst other things, as a means of generating tribal revenue.

At its core, Indian gaming is a function of sovereignty exercised by tribal governments. In addition, the Federal Government maintains a government-to-government relationship with the tribes—a responsibility of the NIGC. Thus, while the NIGC is committed to strong regulation of Indian gaming, the NIGC is equally committed to strengthening government-to-government relations by engaging in meaningful consultation with tribes to fulfill IGRA's intent. The NIGC's vision is to adhere to principles of good government, including transparency to promote agency accountability and fiscal responsibility, to operate consistently to ensure fairness and clarity in the administration of IGRA, and to respect the responsibilities of each sovereign in order to fully promote tribal economic development, self-sufficiency, and strong tribal governments. The NIGC is fully committed to working with tribes to ensure the integrity of the industry by exercising its regulatory responsibilities through technical assistance, compliance, and enforcement activities.

Retrospective Review of Existing Regulations

As an independent regulatory agency, the NIGC has been performing a retrospective review of its existing regulations well before Executive Order 13579 was issued on July 11, 2011. The NIGC, however, recognizes the importance of Executive Order 13579, and its regulatory review is being conducted in the spirit of Executive Order 13579, to identify those regulations that may be outmoded, ineffective, insufficient, or excessively burdensome and to modify, streamline, expand, or repeal them in accordance with input from the public. In addition, as required by Executive Order 13175, the NIGC has been conducting government-to-government consultations with tribes regarding each regulation's relevancy, consistency in application, and limitations or barriers to implementation, based on the tribes' experiences. The consultation process is also intended to result in the identification of areas for improvement and needed amendments, if any, new

[71] See *Ongoing Rule and Guide Reviews* for information about a separate ongoing rulemaking proceeding for the Energy Labeling Rule.

[72] Section 3(f) of Executive Order 12866 defines a regulatory action to be ''significant'' if it is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy; a sector of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

regulations, and the possible repeal of outdated regulations.

The following Regulatory Identifier Numbers (RINs) are associated with the review:

RIN	Title
3141–AA32	Definitions.
3141–AA55	Minimum Internal Control Standards.
3141–AA58	Management Contracts.
3141–AA60	Class II Minimum Internal Control Standards.
3141–AA62	Buy Indian Goods and Services (BIGS).
3141–AA64	Class II Minimum Technical Standards.
3141–AA65	Privacy Act Procedures.

More specifically, the NIGC is currently considering promulgating new regulations in the following areas: (i) Amendments to its regulatory definitions to conform to the newly promulgated rules; (ii) the removal, revision, or suspension of the existing minimum internal control standards (MICS) in part 542; (iii) updates or revisions to its management contract regulations to address the current state of the industry; (iv) the review and revision of the minimum internal control standards for Class II gaming; (v) regulation that would provide a preference to qualified Indian-owned businesses when purchasing goods or services for the Commission at a fair market price; (vi) revisions to the minimum technical standards for gaming equipment used with the play of Class II games; and, (vii) revisions to the existing Privacy Act Procedures in part 515 as a means to streamline internal processes.

The NIGC anticipates that the ongoing consultations with tribes will continue to play an important role in the development of the NIGC's rulemaking efforts.

NIGC

Proposed Rule Stage

160. Class II Minimum Internal Control Standards

Priority: Other Significant.

Legal Authority: 25 U.S.C. 2706(b)(1) to (4); 25 U.S.C. 2706(b)(10); 25 U.S.C. 2710(d)(7)(B)(vii)

CFR Citation: 25 CFR 543.

Legal Deadline: None.

Abstract: The NIGC continues to review and revise the minimum internal control standards (MICS) for Class II gaming. The NIGC anticipates proposing minor but substantive corrections to the Class II MICS, including adding clarifying language and reinserting critical key controls that were inadvertently removed by the last revisions.

Statement of Need: Periodic review and revision of existing standards based on input by a wide array of tribal entities ensures that the MICS remain relevant and appropriate. Recent review has uncovered a need for correction and clarification to specific provisions of the MICS, as well as a need to re-insert standards that were accidentally overwritten when kiosk standards were added.

Summary of Legal Basis: The NIGC is charged with monitoring class II gaming conducted on Indian lands 25 U.S.C. 2706(b)(1). With regard to Class II gaming, NIGC's responsibility includes inspecting and examining the premises located on Indian lands on which Class II gaming is conducted and auditing all papers, books, and records respecting gross revenues of Class II gaming conducted on Indian lands, and any other matters necessary to carry out the duties of the NIGC pursuant to the Indian Gaming Regulatory Act of 1988 (IGRA). 25 U.S.C. 2706(b)(2), (4).

Alternatives: Maintain the current regulations.

Anticipated Cost and Benefits: There are no anticipated cost increases to the Federal Government or to tribal governments as a result of this regulatory action.

Risks: There are no known risks to this regulatory action.

Timetable:

RIN: 3141–AA60

NIGC

Final Rule Stage

161. Minimum Internal Control Standards

Priority: Other Significant.

Legal Authority: 25 U.S.C. 2706(b)(1) to (4); 25 U.S.C. 2706(b)(10); 25 U.S.C. 2710(d)(7)(B)(vii)

CFR Citation: 25 CFR 542.

Legal Deadline: None.

Abstract: The NIGC is considering removing, revising, or suspending the existing Class III minimum internal control standards (MICS) in part 542.

Statement of Need: The NIGC cannot promulgate, implement, or enforce Class III MICS.

Summary of Legal Basis: The D.C. Circuit Court's decision in Colorado River Indian Tribes v. National Indian Gaming Commission 383 F.Supp.2d 123 (D.D.C. 2005), affd., 466 F.3d 134 (D.C. Cir. 2006), held that the NIGC cannot promulgate, implement, or enforce Class III control standards.

Alternatives: The NIGC has a number of options: (1) Retain the status quo; (2) remove the standards; or (3) remove the standards and publish updated standards as guidance documents. At this time, the NIGC continues to research and identify all other available options.

Anticipated Cost and Benefits: There are no anticipated cost increases to the Federal Government or to tribal governments as a result of this regulatory action.

Risks: There are no known risks to this regulatory action.

BILLING CODE 7565–01–P

U.S. NUCLEAR REGULATORY COMMISSION STATEMENT OF REGULATORY PRIORITIES FOR FISCAL YEAR 2017

I. Introduction

Under the authority of the Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974, as amended, the U.S. Nuclear Regulatory Commission (NRC) regulates the possession and use of source, byproduct, and special nuclear material. Our regulatory mission is to license and regulate the Nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of public health and safety, promote the common defense and security, and protect the environment. As part of our mission, we regulate the operation of nuclear power plants and fuel-cycle plants; the safeguarding of nuclear materials from theft and sabotage; the safe transport, storage, and disposal of radioactive materials and wastes; the decommissioning and safe release for other uses of licensed facilities that are no longer in operation; and the medical, industrial, and research applications of nuclear material. In addition, we license the import and export of radioactive materials.

As part of our regulatory process, we routinely conduct comprehensive regulatory analyses that examine the costs and benefits of contemplated regulations. We have developed internal procedures and programs to ensure that we impose only necessary requirements on our licensees and to review existing regulations to determine whether the requirements imposed are still necessary.

Our regulatory priorities for Fiscal Year (FY) 2017 reflect our complex mission and will enable us to achieve our two strategic goals described in NUREG–1614, Volume 6, ''Strategic Plan: Fiscal Years 2014–2018 (*http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1614/v6/*): (1) To ensure the safe use of radioactive materials and (2) to ensure the secure use of radioactive materials.

II. Regulatory Priorities

This section contains information on some of our most important regulatory actions that we are considering issuing in proposed or final form during FY 2017. For additional information on these regulatory actions and on a broader spectrum of the NRC's upcoming regulatory actions, see the NRC's portion of the Unified Agenda of Regulatory and Deregulatory Actions.

A. Proposed Rules

2015 Edition of the American Society of Mechanical Engineers Code (RIN 3150–AJ74; NRC–2016–0082): This proposed rule would amend the NRC's regulations to incorporate, by reference, the 2015 American Society of Mechanical Engineers Boiler and Pressure Vessel Code and Code for Operation and Maintenance of nuclear power plants.

Cyber Security for Fuel Facilities (RIN 3150–AJ64): This proposed rule would assure that NRC-licensed fuel cycle facilities provide reasonable assurance that digital assets associated with safety, security, emergency preparedness, and material control and accountability are adequately protected from cyber-attacks.

B. Final Rules

Modified Small Quantities Protocol (SQP) (RIN 3150–AJ70): The final rule would amend the NRC's regulations to ensure that the U.S. Government can meet its international obligations under INFCIRC/366 and the modified SQP. The NRC is responsible for ensuring compliance by the licensees in the U.S. Caribbean Territories.

Performance-Based Emergency Core Cooling System Acceptance Criteria (RIN 3150–AH42; NRC–2008–0332): This final rule would amend the NRC's regulations that specify the fuel cladding acceptance criteria for emergency core cooling system (ECCS) loss-of-coolant accidents (LOCA) evaluations. The ECCS acceptance criteria would be performance-based, and reflect recent research findings that identified new embrittlement mechanisms for fuel rods with zirconium alloy cladding under LOCA conditions.

Enhanced Weapons, Firearms Background Checks, and Security Event Notifications (RIN 3150–AI49; NRC–2008–0465, NRC–2011–0018): This final rule would amend the NRC's regulations by implementing the authority in Section 161A of the Atomic Energy Act of 1954, as amended. The rule would enable access to enhanced weapons with associated firearms background checks at power reactor facilities, at-reactor Independent Spent Fuel Storage Installations, and Category I strategic special nuclear materials facilities. This final rule would also modify physical security event notification provisions for most classes of NRC licensees with physical security programs.

Mitigation of Beyond Design Basis Events (RIN 3150–AJ49; NRC–2011–0189, NRC–2014–0240): This final rule would enhance mitigation strategies for nuclear power reactors for beyond-design-basis external events.

Revision of Fee Schedules: Fee Recovery for FY 2017 (RIN 3150–AJ73; NRC–2016–0081): This final rule would amend the NRC's fee schedules for licensing, inspection, and annual fees charged to its applicants and licensees.

NRC

Final Rule Stage

162. Modified Small Quantities Protocol [NRC–2015–0263]

Priority: Other Significant.

Legal Authority: 42 U.S.C. 2201; 42 U.S.C. 5841

CFR Citation: 10 CFR 40; 10 CFR 70; 10 CFR 75

Legal Deadline: None.

Abstract: This rule amends the Nuclear Regulatory Commission's regulations in 10 CFR parts 40, 70, and 75, as needed, to ensure that the U.S. Government can meet its international obligations under INFCIRC/366. The Nuclear Regulatory Commission is responsible for ensuring compliance by the licensees in the U.S. Caribbean Territories. Changes would go into effect as a final rule, issued without notice and comment under 5 U.S.C. 553(a)(1), which allows agencies to issue rules involving the foreign affairs functions of the United States without notice and comment. These rule changes must be in effect before the U.S. Government can bring the modified Small Quantities Protocol to INFCIRC/366 into force.

Statement of Need: This rule would respond to Commission direction to proceed with rulemaking.

Summary of Legal Basis: The legal basis of this rule is to ensure that the U.S. Government meets its obligations under the Treaty for the Prohibition of Nuclear Weapons in Latin America and the Caribbean (Treaty of Tlatelolco).

Alternatives: None.

Anticipated Cost and Benefits: Undefined.

Risks: Undefined.

Timetable:

Action	Date	FR Cite
Final Rule	05/00/17	

Regulatory Flexibility Analysis Required: No.

Small Entities Affected: No.

Government Levels Affected: None.

International Impacts: This regulatory action will be likely to have international trade and investment effects, or otherwise be of international interest.

Additional Information: In SECY–15–0080 staff requested Commission approval to initiate rulemaking: On June 5, 2015, the staff requested Commission approval to initiate the rulemaking. On July 21, 2015, the Commission approved initiation of the rulemaking. Specifically, the Commission provided its clearance for the Circular 175 memorandum authorizing the Department of State to negotiate and conclude a modified Small Quantities Protocol between the US and IAEA with the treaty for the prohibition of Nuclear Weapons in Latin America. This rulemaking will go directly to a final rule as it has a foreign policy exclusion.

Semiannual Regulatory Agenda, Fall 2016

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not significant regulations being developed in agencies of the U.S. Department of Agriculture (USDA) in conformance with Executive Orders (E.O.) 12866 ''Regulatory Planning and Review,'' and 13563 ''Improving Regulation and Regulatory Review.'' The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96–354. This agenda also identifies regulatory actions that are being reviewed in compliance with section 610(c) of the Regulatory Flexibility Act. We invite public comment on those actions as well as any regulation consistent with E.O. 13563.

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

USDA's complete regulatory agenda is available online at *www.reginfo.gov.* Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), USDA's printed agenda entries include only:

(1) Rules that are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules identified for periodic review under section 610 of the Regulatory Flexibility Act.

For this edition of the USDA regulatory agenda, the most important significant regulatory actions and a Statement of Regulatory Priorities are included in the Regulatory Plan, which appears in both the online regulatory agenda and in part II of the **Federal Register** that includes the abbreviated regulatory agenda.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. For general comments or inquiries about the agenda, please contact Michael Poe, Office of Budget and Program Analysis, U.S. Department of Agriculture, Washington, DC 20250, (202) 720–3257.

Dated: September 22, 2016.

Michael Poe,

Chief, Legislative and Regulatory Staff.

Proposed Rule Stage

164. National Organic Program, Organic Pet Food Standards

Legal Authority: 7 U.S.C. 6501

Abstract: The National Organic Program (NOP) establishes national standards governing the marketing of organically produced agricultural products. In 2004, the National Organic Standards Board (NOSB) initiated the development of organic pet food standards, which had not been incorporated into the NOP regulations, by forming a task force which included pet food manufacturers, organic consultants, etc. Collectively, these experts drafted organic pet food standards consistent with the Organic Foods Production Act of 1990, Food and Drug Administration requirements, and the Association of American Feed Control Officials (AAFCO) Model Regulations for Pet and Specialty Pet Food. The AAFCO regulations are scientifically based regulations for voluntary adoption by State jurisdictions to ensure the safety, quality, and effectiveness of feed. In November 2008, the NOSB approved a final recommendation for organic pet food standards incorporating the provisions drafted by the pet food task force.

RIN: 0581–AD34

167. • Sunset 2017 Amendments to the National List

Legal Authority: 7 U.S.C. 6501 to 6522

Abstract: This proposed rule would address 11 2017 sunset review recommendations submitted to the Secretary by the National Organic Standards Board (NOSB) following their October, 2015 meeting. This rule proposes the removal of three synthetic substances and eight non organic, agricultural substances from the National List of Allowed and Prohibited Substances (National List). These substances are currently allowed for various uses in organic crop and livestock production and organic handling. Upon removal from the National List, use of these substances in organic production or handling would be prohibited. The prohibitions would take effect on the sunset date of June 27, 2017, following publication of a final rule.

DEPARTMENT OF AGRICULTURE (USDA)

Agricultural Marketing Service (AMS)

Final Rule Stage

170. National Organic Program, Origin of Livestock

Legal Authority: 7 U.S.C. 6501

Abstract: The current regulations provide two tracks for replacing dairy animals which are tied to how dairy farmers transition to organic production. Farmers who transition an entire distinct herd must thereafter replace dairy animals with livestock that has been under organic management from the last third of gestation. Farmers who do not transition an entire distinct herd may perpetually obtain replacement animals that have been managed organically for 12 months prior to marketing milk or milk products as organic. The proposed action would eliminate the two-track system and require that upon transition, all existing and replacement dairy animals from which milk or milk products are intended to be sold, labeled, or represented as organic must be managed organically from the last third of gestation.

173. Livestock Mandatory Reporting: Reauthorization of Livestock Mandatory Reporting and Revision of Swine and Lamb Reporting Requirements

Legal Authority: 7 U.S.C. 1635

Abstract: This action would reauthorize and amend the mandatory price reporting provisions under the Livestock Mandatory Reporting (LMR) program authorized by the Agricultural Marketing Act of 1946. This proposed rule action would reauthorize mandatory livestock reporting for 5 years and amend the swine and lamb reporting requirements. This action is authorized by the Agriculture Reauthorizations Act of 2015 (2015 Act) and requests from the lamb industry.

Proposed Rule Stage

175. Plant Pest Regulations; Update of General Provisions

Legal Authority: 7 U.S.C. 450; 7 U.S.C. 2260; 7 U.S.C. 7701 to 7772; 7 U.S.C. 7781 to 7786; 7 U.S.C. 8301 to 8817; 19 U.S.C. 136; 21 U.S.C. 111; 21 U.S.C. 114a; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331 and 4332

Abstract: We are proposing to revise our regulations regarding the movement of plant pests. We are proposing criteria regarding the movement and environmental release of biological control organisms, and are proposing to establish regulations to allow the importation and movement in interstate commerce of certain types of plant pests without restriction by granting exceptions from permitting requirements for those pests. We are also proposing to revise our regulations regarding the movement of soil. This proposed rule replaces a previously published proposed rule, which we are withdrawing as part of this document. This proposal would clarify the factors that would be considered when assessing the risks associated with the movement of certain organisms and facilitate the movement of regulated organisms and articles in a manner that also protects U.S. agriculture.

Final Rule Stage

176. Scrapie in Sheep and Goats

Legal Authority: 7 U.S.C. 8301 to 8317

Abstract: This rulemaking will amend the scrapie regulations by changing the risk groups and categories established for individual animals and for flocks, increasing the use of genetic testing as a means of assigning risk levels to animals, reducing movement restrictions for animals found to be genetically less susceptible or resistant to scrapie, and simplifying, reducing, or removing certain recordkeeping requirements. It also provides designated scrapie epidemiologists with more alternatives and flexibility when testing animals in order to determine flock designations under the regulations. The rule changes the definition of high-risk animal, which will change the types of animals eligible for indemnity, and to pay higher indemnity for certain pregnant ewes and does and early maturing ewes and does. The changes will also make the identification and recordkeeping requirements for goat owners consistent with those for sheep owners. These changes affect sheep and goat producers, persons who handle sheep and goats in interstate commerce, and State governments.

Abstract: This rulemaking amends the bovine spongiform encephalopathy (BSE) and scrapie regulations regarding the importation of live sheep, goats, and wild ruminants and their embryos, semen, products, and byproducts. The scrapie revisions regarding the importation of sheep, goats, and susceptible wild ruminants for other than immediate slaughter are similar to those recommended by the World Organization for Animal Health in restricting the importation of such animals to those from scrapie-free regions or certified scrapie-free flocks.

RIN: 0579–AD28

179. Establishing a Performance Standard for Authorizing the Importation and Interstate Movement of Fruits and Vegetables

Legal Authority: 7 U.S.C. 450; 7 U.S.C. 7701 to 7772; 7 U.S.C. 7781 to 7786; 21 U.S.C. 136 and 136(a)

Abstract: This rulemaking will amend our regulations governing the importations of fruits and vegetables by broadening our existing performance standard to provide for consideration of all new fruits and vegetables for importation into the United States using a notice-based process. Rather than authorizing new imports through proposed and final rules and specifying import conditions in the regulations, the notice-based process uses **Federal Register** notices to make risk analyses available to the public for review and comment, with authorized commodities and their conditions of entry subsequently being listed on the Internet. It also will remove the region- or commodity-specific phytosanitary requirements currently found in these regulations. Likewise, we are proposing an equivalent revision of the performance standard in our regulations governing the interstate movements of fruits and vegetables from Hawaii and the U.S. territories (Guam, Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands) and the removal of commodity-specific phytosanitary requirements from those regulations. This action will allow for the consideration of requests to authorize the importation or interstate movement of new fruits and vegetables in a manner that enables a more flexible and responsive regulatory approach to evolving pest situations in both the United States and exporting countries. It will not, however, alter the science-based process in which the risk associated with importation or interstate movement of a given fruit or vegetable is evaluated or the manner in which risks associated with the importation or interstate movement of a fruit or vegetable are mitigated.

180. Agricultural Bioterrorism Protection Act of 2002; Biennial Review and Republication of the Select Agent and Toxin List

Legal Authority: 7 U.S.C. 8401

Abstract: The Agricultural Bioterrorism Protection Act of 2002 requires the biennial review and republication of the list of select agents and toxins and the revision of the list as necessary. Accordingly, we solicited public comment on the current list of select agents and toxins in our regulations and suggestions regarding any addition or reduction of the animal or plant pathogens currently on the list of select agents. In accordance with the Act, this rulemaking will provide a revised republication of the list of select agents and toxins.

181. Brucellosis and Bovine Tuberculosis; Update of General Provisions

Legal Authority: 7 U.S.C. 1622; 7 U.S.C. 8301 to 8317; 15 U.S.C. 1828; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701

Abstract: This rulemaking would consolidate the regulations governing bovine tuberculosis (TB), currently found in 9 CFR part 77, and those governing brucellosis, currently found in 9 CFR part 78. As part of this consolidation, we are proposing to transition the TB and brucellosis programs away from a State status system based on disease prevalence. Instead, States and tribes would implement an animal health plan that identifies sources of the diseases within the State or tribe and specifies mitigations to address the risk posed by these sources. The consolidated regulations also would set forth standards for surveillance, epidemiological investigations, and affected herd management that must be incorporated into each animal health plan, with certain limited exceptions; conditions for the interstate movement of cattle, bison, and captive cervids; and conditions for APHIS approval of tests for bovine TB or brucellosis. Finally, the rulemaking would revise the import requirements for cattle and bison to make these requirements clearer and ensure that they more effectively mitigate the risk of introduction of the diseases into the United States.

182. • Mexican Hass Avocado Import Program

Legal Authority: 7 U.S.C. 450; 7 U.S.C. 7701 to 7772; 7 U.S.C. 7781 to 7786; 21 U.S.C. 136 and 136(a)

Abstract: Commercial consignments of Hass avocado fruit are currently authorized entry into the continental United States, Hawaii, and Puerto Rico from the Mexican State of Michoacán under a systems approach to mitigate against quarantine pests of concern. We are amending the regulations to allow the importation of fresh Hass avocado fruit into the continental United States, Hawaii, and Puerto Rico from all of Mexico, provided individual Mexican States meet the requirements set out in the regulations and the operational work plan. Initially, this action would only apply to the Mexican State of Jalisco. With the exception of a clarification of the language concerning when sealed, insect-proof containers would be required to be used in shipping and the removal of mandatory fruit cutting at land and maritime borders, the current systems approach will not change. The current systems approach, which includes requirements for orchard certification, traceback labeling, pre-harvest orchard surveys, orchard sanitation, post-harvest safeguards, fruit cutting and inspection at the packinghouse, port-of-arrival inspection, and clearance activities, will be required for importation of fresh Hass avocado fruit from all approved areas of Mexico. The fruit will also be required to be imported in commercial consignments and accompanied by a phytosanitary certificate issued by the national plant protection organization of Mexico with an additional declaration stating that the consignment was produced in accordance with the systems approach described in the operational work plan. This final rule will allow for the importation of fresh Hass avocado fruit from Mexico while continuing to provide protection against the introduction of plant pests into the continental United States, Hawaii, and Puerto Rico.

188. Elimination of Trichina Control Regulations and Consolidation of Thermally Processed, Commercially Sterile Regulations

Legal Authority: Federal Meat Inspection Act (FMIA); Poultry Products Inspection Act (PPIA)

Abstract: The Food Safety and Inspection Service (FSIS) proposed to amend the Federal meat inspection regulations to eliminate the requirements for both ready-to-eat (RTE) and not-ready-to-eat (NRTE) pork and pork products to be treated to destroy trichina (Trichinella spiralis) because the regulations are inconsistent with the Hazard Analysis and Critical Control Point (HACCP) regulations, and these prescriptive regulations are no longer necessary. If this supplemental proposed rule is finalized, FSIS will end its Trichinella Approved Laboratory Program (TALP program) for the evaluation and approval of non-Federal laboratories that use the pooled sample digestion technique to analyze samples for the presence of trichina. FSIS also proposed to consolidate the regulations on thermally processed, commercially sterile meat and poultry products (*i.e.,* canned food products containing meat or poultry).

DEPARTMENT OF AGRICULTURE (USDA)

Forest Service (FS)

Long-Term Actions

189. Management of Surface Activities Associated With Outstanding Mineral Rights on National Forest System Lands (Directive)

Legal Authority: EPA 1992

Abstract: Close to 11,000,000 acres (approximately 6 percent) of National Forest System (NFS) lands overlie severed (split) mineral estates owned by a party other than the Federal Government. More than 75 percent of these lands are in the Eastern Region (Forest Service Regions 8 and 9). There are two kinds of severed mineral estates, generally known as ''private rights'': Reserved and outstanding. Reserved mineral rights are those retained by a grantor in a deed conveying land to the United States. Outstanding mineral rights are those owned by a party other than the surface owner at the time the surface was conveyed to the United States. Because these are non-Federal mineral interests, the U.S. Department of the Interior's Bureau of Land Management has no authority for or role in managing development activities associated with such interests. States

have the authority and responsibility for regulating development of the private mineral estate.

Various Secretary's Rules and Regulations (years of 1911, 1937, 1938, 1939, 1947, 1950, and 1963) and Forest Service regulations at 36 CFR 251.15 provide direction for the use of NFS lands for mineral development activities associated with the exercise of reserved mineral rights. These existing rules for reserved minerals development activities also include requirements for protection of NFS resources.

Currently, there are no formal regulations governing the use of NFS lands for activities associated with the exercise of outstanding mineral rights underlying those lands. The Energy Policy Act of 1992, section 2508, directed the Secretary of Agriculture to apply specified terms and conditions to surface-disturbing activities related to development of oil and gas on certain lands with outstanding mineral rights on the Allegheny National Forest, and promulgate regulations implementing that section.

The Forest Service initiated rulemaking for the use of NFS lands for development activities associated with both reserved and outstanding minerals rights with an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** on December 29, 2008. Comments from the public in response to the ANPRM conveyed a high level of concern about the broad scope of the rule, along with a high level of concern about effects of a broad rule on small businesses and local economies.

191. Designation of Biobased Product Categories for Federal Procurement, Round 12

Legal Authority: Pub. L. 113–79

Abstract: This proposed rule will designate, for preferred procurement under the Federal Biobased Products Preferred Procurement Program, approximately eight complex assembly product categories. A complex assembly is defined by the BioPreferred program as a system of distinct materials and components assembled to create a finished product with specific functional intent where some or all of the system inputs contain some amount of biobased material or feedstock. Typical complex assembly product categories will include products such as upholstered office chairs and other office furniture; mattresses; backpacks; boots; and other camping gear. The specific product categories to be included in this rulemaking are under investigation by the Office of Procurement and Property Management, but technical information is expected to be available to support the designation of about eight product categories.

Fall 2016 Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: Semiannual regulatory agenda.

SUMMARY: In compliance with Executive Order 12866, entitled ''Regulatory Planning and Review,'' and the Regulatory Flexibility Act, as amended, the Department of Commerce (Commerce), in the spring and fall of each year, publishes in the **Federal Register** an agenda of regulations under development or review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, long-term actions, and rulemaking actions completed since the spring 2016 agenda. The purpose of the agenda is to provide information to the public on regulations that are currently under review, being proposed, or issued by Commerce. The agenda is intended to facilitate comments and views by interested members of the public.

Commerce's fall 2016 regulatory agenda includes regulatory activities that are expected to be conducted during the period November 1, 2016, through October 31, 2017.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Asha Mathew, Chief Counsel for Regulation, Office of the Assistant General Counsel for Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230, telephone: 202–482–3151.

SUPPLEMENTARY INFORMATION: Commerce hereby publishes its fall 2016 Unified Agenda of Federal Regulatory and Deregulatory Actions pursuant to Executive Order 12866 and the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* Executive Order 12866 requires agencies to publish an agenda of those regulations that are under consideration pursuant to this order. By memorandum of July 27, 2016, the Office of Management and Budget issued guidelines and procedures for the preparation and publication of the fall 2016 Unified Agenda. The Regulatory Flexibility Act requires agencies to publish, in the spring and fall of each year, a regulatory flexibility agenda that contains a brief description of the subject of any rule likely to have a significant economic impact on a substantial number of small entities, and a list that identifies those entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act.

In this edition of Commerce's regulatory agenda, a list of the most important significant regulatory actions and a Statement of Regulatory Priorities are included in the Regulatory Plan, which appears in both the online Unified Agenda and in part II of the issue of the **Federal Register** that includes the Unified Agenda.

In addition, beginning with the fall 2007 edition, the Internet became the basic means for disseminating the Unified Agenda. The complete Unified Agenda is available online at *www.reginfo.gov,* in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act, Commerce's printed agenda entries include only:

(1) Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet. In addition, for fall editions of the Agenda, Commerce's entire Regulatory Plan will continue to be printed in the **Federal Register**.

Within Commerce, the Office of the Secretary and various operating units may issue regulations. Among these operating units, the National Oceanic and Atmospheric Administration (NOAA), the Bureau of Industry and Security, and the Patent and Trademark Office, issue the greatest share of Commerce's regulations.

A large number of regulatory actions reported in the Agenda deal with fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of NMFS' programs, an ''Explanation of Information Contained in NMFS Regulatory Entries'' is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (the Act) governs the management of fisheries within the Exclusive Economic Zone of the United States (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. For fisheries that require conservation and management measures, eight Regional Fishery Management Councils (Councils) prepare Fishery Management Plans (FMPs) for the fisheries within their respective areas. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing may be conducted in a fishery in which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. In the development of FMPs, or amendments to FMPs, and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the significance and timing of some regulatory actions under consideration by the Councils at the time the semiannual regulatory agenda is published.

Commerce's fall 2016 regulatory agenda follows.

Kelly R. Welsh,

General Counsel.

BUREAU OF THE CENSUS—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
192	Foreign Trade Regulations (15 CFR 30): Clarification on Filing Requirements	0607–AA55

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION—PROPOSED RULE STAGE

Sequence No.	Title	Regulation Identifier No.
193	Amendment 5b to the Highly Migratory Species Fishery Management Plan	0648–BD22
194	Implementation of a Program for Transshipments by Large Scale Fishing Vessels in the Eastern Pacific Ocean.	0648–BD59
195	Omnibus Acceptable Biological Catch Framework Adjustment	0648–BE65
196	Modification of the Temperature-Dependent Component of the Pacific Sardine Harvest Guideline Control Rule to Incorporate New Scientific Information.	0648–BE77
197	Amendment 18 to the Northeast Multispecies Fishery Management Plan **(Section 610 Review)**	0648–BF26
198	Omnibus Essential Fish Habitat Amendment 2	0648–BF82
199	Amendment 43 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico	0648–BG18
200	Amendment 45 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico	0648–BG19
201	Protected Species Hard Caps for the California/Oregon Large-Mesh Drift Gillnet Fishery	0648–BG23
202	Mallows Bay-Potomac National Marine Sanctuary Designation	0648–BG02

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
203	Amendment 39 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico	0648–BD25
204	Regulatory Amendment 16 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region.	0648–BD78
205	Pacific Coast Groundfish Fishing Capacity Reduction Loan Refinance **(Section 610 Review)**	0648–BE90
206	Magnuson-Stevens Fisheries Conservation and Management Act; Seafood Import Monitoring Program **(Reg Plan Seq No. 16)**.	0648–BF09
207	Pacific Coast Groundfish Trawl Rationalization Program; Widow Rockfish Reallocation in the Individual Fishing Quota Fishery.	0648–BF12
208	Allow the Use of Longline Pot Gear in the Gulf of Alaska Sablefish Individual Fishing Quota Fishery	0648–BF42
209	Atlantic Highly Migratory Species; Atlantic Blacknose Shark Commercial Retention Limit	0648–BF49
210	Amendment 113 to the FMP for Groundfish of the BSAI to Establish a Catcher Vessel Fishing Period and Shoreside Processing Delivery Requirements for Aleutian Islands Pacific Cod.	0648–BF54
211	Specification of Management Measures for Atlantic Herring for the 2016–2018 Fishing Years	0648–BF64
212	Amendment 19 to the Atlantic Sea Scallop Fishery Management Plan	0648–BF72
213	Observer Coverage Requirements for Catcher Vessels Using Trawl Gear in the Bering Sea and Aleutian Islands Management Area.	0648–BF80
214	Framework Amendment 1 to the Dolphin and Wahoo Fishery Management Plan of the Atlantic	0648–BF81
215	Amendment 103 to the Fishery Management Plan for Groundfish of the Gulf of Alaska to Reapportion Chinook Salmon Prohibited Catch in the Gulf of Alaska Trawl Fisheries.	0648–BF84
216	Framework Action to Adjust the Red Grouper Allowable Harvest in the Gulf of Mexico	0648–BG12
217	Reducing Disturbances to Hawaiian Spinner Dolphins From Human Interactions	0648–AU02
218	Designation of Critical Habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic Sturgeon **(Reg Plan Seq No. 17)**.	0648–BF28
219	Designation of Critical Habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic Sturgeon **(Reg Plan Seq No. 18)**.	0648–BF32

References in boldface appear in The Regulatory Plan in part II of this issue of the **Federal Register**.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION—LONG-TERM ACTIONS

Sequence No.	Title	Regulation Identifier No.

DEPARTMENT OF COMMERCE (DOC)

Bureau of the Census (CENSUS)

Final Rule Stage

192. Foreign Trade Regulations (15 CFR 30): Clarification on Filing Requirements

Legal Authority: 13 U.S.C. 301

Abstract: The Census Bureau is proposing to amend its regulations to reflect new export reporting requirements related to the implementation of the International Trade Data System (ITDS), in accordance with the Executive Order 13659, Streamlining the Export/Import Process for American Businesses. The ITDS was established by the Security and Accountability for Every (SAFE) Port Act of 2006. The proposed changes also include the addition of a new data element in the Automated Export System (AES), the original Internal Transaction Number (ITN) field. Lastly, the Census Bureau proposes to make changes to the Foreign Trade Regulations (FTR) to provide clarity on existing reporting requirements.

Proposed Rule Stage

National Marine Fisheries Service

193. Amendment 5B to the Highly Migratory Species Fishery Management Plan

Legal Authority: 16 U.S.C. 1801 *et seq.;* 16 U.S.C. 971 *et seq.*

Abstract: This rulemaking would propose management measures for dusky sharks based on the latest stock assessment, taking into consideration comments received on the proposed rule and Amendment 5 to the 2006 Consolidated Highly Migratory Species Fishery Management Plan. This rulemaking considers a range of commercial and recreational management measures in both directed and incidental shark fisheries including, among other things, gear modifications, time/area closures, permitting, shark identification requirements, and reporting requirements. The National Marine Fisheries Service determined dusky sharks are still overfished and still experiencing overfishing. The National Marine Fisheries Service originally proposed management measures to end overfishing and rebuild dusky sharks in a proposed rule for Draft Amendment 5 to the 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan. That proposed rule also contained management measures for scalloped hammerhead, sandbar, blacknose and Gulf of Mexico blacktip sharks. The National Marine Fisheries Service decided to move forward with Draft Amendment 5's management measures for scalloped hammerhead, sandbar, blacknose and Gulf of Mexico blacktip sharks in a final rule and final amendment that will now be referred to as ''Amendment 5a'' to the 2006 Consolidated Atlantic Highly Migratory

Species Fishery Management Plan. Dusky shark management measures will be addressed in this separate, but related, action and will be referred to as ''Amendment 5b.''

194. Implementation of a Program for Transshipments by Large Scale Fishing Vessels in the Eastern Pacific Ocean

Legal Authority: 16 U.S.C. 951 *et seq.*; 16 U.S.C. 971 *et seq.*

Abstract: This rule would implement the Inter-American Tropical Tuna Commission program to monitor transshipments by large-scale tuna fishing vessels, and would govern transshipments by U.S. large-scale tuna fishing vessels and carrier, or receiving, vessels. The rule would establish: Criteria for transshipping in port; criteria for transshipping at sea by longline vessels to an authorized carrier vessel with an Inter-American Tropical Tuna Commission observer onboard and an operational vessel monitoring system; and require the Pacific Transshipment Declaration Form, which must be used to report transshipments in the Inter-American Tropical Tuna Commission Convention Area. This rule is necessary for the United States to satisfy its international obligations under the 1949 Convention for the Establishment of an Inter-American Tropical Tuna, to which it is a Contracting Party.

RIN: 0648–BD59

195. Omnibus Acceptable Biological Catch Framework Adjustment

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This action would make two administrative adjustments to the Mid-Atlantic Fishery Management Council's (Council) Omnibus Annual Catch Limit Amendment: (1) Adjust the Council's risk policy so that the Scientific and Statistical Committee may apply an average probability of overfishing when recommending multi-year Acceptable Biological Catches; and (2) make all of the Council's fishery management plans consistent in allowing new status determination criteria (overfishing definitions, etc.) to be accepted as the best available scientific information.

RIN: 0648–BE65

196. Modification of the Temperature-Dependent Component of the Pacific Sardine Harvest Guideline Control Rule To Incorporate New Scientific Information

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Pursuant to a recommendation of the Pacific Fishery Management Council (Council) under the Magnuson-Stevens Act, the National Marine Fisheries Service is proposing to use a new temperature index to calculate the temperature parameter of the Pacific sardine harvest guideline control rule under the Fishery Management Plan. The harvest guideline control rule, in conjunction with the overfishing limit and acceptable biological catch control rules, is used to set annual harvest levels for Pacific sardine. The temperature parameter is calculated annually. The National Marine Fisheries Service determined that a new temperature index is more statistically sound and this action will adopt that index. This action also will revise the upper temperature limit to allow for additional sardine harvest where prior guidelines set catch unnecessarily low.

RIN: 0648–BE77

197. Amendment 18 to the Northeast Multispecies Fishery Management Plan (Section 610 Review)

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Amendment 18 to the Northeast Multispecies Fishery Management Plan would make necessary minor administrative adjustments to several groundfish sectors, as well as minor adjustments to fishing activity designed to protect fishery resources while maximizing flexibility and efficiency. Specifically, it would include the following management measures: Creating an accumulation limit for either the holdings of Potential Sector Contribution or of Northeast multispecies permits; creating a sub-annual catch limit that Handgear A permits could enroll in and other measures pertaining to fishing with Handgear A permits; adjusting what fishery data are considered confidential, specifically the price of annual catch entitlement transferred within a sector or leased between sectors; establishing an inshore/offshore boundary within the Gulf of Maine with associated measures, including creation of a Gulf of Maine cod sub-annual catch limit, adjusting the Gulf of Maine Gear Restricted Area boundary to align with the inshore/offshore boundary, and creating declaration time periods for fishing in the inshore or offshore areas; and establishing a Redfish Exemption Area, in which vessels could fish with a smaller mesh net than the standard mesh size, targeting redfish.

RIN: 0648–BF26

198. Omnibus Essential Fish Habitat Amendment 2

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The New England Fishery Management Council voted to issue this update rulemaking that would revise the essential fish habitat and habitat areas of particular concern designation based on recent groundfish data. This rule would update groundfish seasonal spawning closures and identify Habitat Research Areas. The proposed revisions include adding a habitat management area in the eastern Gulf of Maine and modifying the existing habitat management areas in the central and western Gulf of Maine, while maintaining additional protections for large-mesh groundfish, including cod. In addition, the amendment would allow for the potential for development of a scallop access area within Georges Bank. A habitat management area would be established on Georges Shoal, with allowances for the clam dredge fishery. In Southern New England, a habitat management area in the Great South Channel would replace the current habitat protections further west. These revisions are intended to comply with the Magnuson-Stevens Act requirement to minimize to the extent practicable the adverse effects of fishing on essential fish habitat.

199. • Amendment 43 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Based on a recent stock assessment and per the Magnuson-Stevens Fishery Conservation and Management Act, action is needed to adjust management measures for the Gulf of Mexico (Gulf) hogfish stock to prevent overfishing and achieve optimum yield. Consistent with the stock assessment, this action would redefine the geographic range of the Gulf hogfish stock, set the status determination criteria, and set the annual catch limits. This action would also revise the hogfish minimum size limit to reduce the likelihood of a season closure due to the annual catch limit being reached and remove the provision in the regulations that exempts hogfish from the prohibition on the use of powerheads to take Gulf reef fish in the Gulf stressed area.

200. • Amendment 45 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The Gulf of Mexico Fishery Management Council is working to develop and implement separate federal for-hire and private angling components for red snapper management measures to better prevent overfishing while achieving the optimum yield. Amendment 40 defined the components, allocated the recreational red snapper quota between the components, and established a three-year sunset provision for the components. The purpose of this action is to extend the sector separation sunset provision established in Amendment 40 for five additional years to allow completion of component-focused management strategies.

201. • Protected Species Hard Caps for the California/Oregon Large-Mesh Drift Gillnet Fishery

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The National Marine Fisheries Service intends to establish two-year rolling hard caps (*i.e.,* limits) on the numbers of certain marine mammals and sea turtles observed killed or injured in the California/Oregon large-mesh drift gillnet fishery. The caps would be established for five marine mammal species and four sea turtle species. When any of the caps are reached or exceeded, the fishery would close for the rest of the fishing season and possibly through the following season. This measure was recommended by the Pacific Fishery Management Council in September 2015.

202. • Mallows Bay-Potomac National Marine Sanctuary Designation

Legal Authority: 16 U.S.C. 1431 *et seq.*

Abstract: On September 16, 2014, pursuant to section 304 of the National Marine Sanctuaries Act (NMSA) and the Sanctuary Nomination Process (79 FR 33851), a coalition of community groups submitted a nomination asking NOAA to designate Mallows Bay-Potomac River as a national marine sanctuary. The Mallows Bay area of the tidal Potomac River being considered for designation as a national marine sanctuary is an area 40 miles south of Washington, DC, off the Nanjemoy Peninsula of Charles County, MD. The designation of a national marine sanctuary would focus on conserving the collection of maritime heritage resources (shipwrecks) in the area as well as expand the opportunities for public access, recreation, tourism, research, and education. NOAA

completed its review of the nomination in accordance with the Sanctuary Nomination Process and on January 12, 2015, added the area to the inventory of nominations that are eligible for designation. On October 7, 2015, NOAA issued a notice of intent to begin the designation process and asked for public comment on making this area a national marine sanctuary. Designation under the NMSA would allow NOAA to supplement and complement work by the State of Maryland and other federal agencies to protect this collection of nationally significant shipwrecks.

203. Amendment 39 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The purpose of this action is to facilitate management of the recreational red snapper component in the reef fish fishery by reorganizing the federal fishery management strategy to better account for biological, social, and economic differences among the regions of the Gulf of Mexico. Regional management would enable regions and their associated communities to specify the optimal management parameters that best meet the needs of their local constituents thereby addressing regional socio-economic concerns.

204. Regulatory Amendment 16 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Regulatory Amendment 16 contained an action to address the prohibition on the use of black sea bass pots annually from November 1 through April 30 that was implemented through Regulatory Amendment 19. The prohibition was a precautionary measure to prevent interactions between black sea bass pot gear and whales listed under the Endangered Species Act during large whale migrations and the right whale calving season off the southeastern coast. The South Atlantic Fishery Management Council, through Regulatory Amendment 16, removed the closure, changed the length of the closure, and changed the area of the closure. The goal was to minimize adverse socio-economic impacts to black sea bass pot endorsement holders while maintaining protection for Endangered Species Act-listed whales in the South Atlantic region.

RIN: 0648–BD78

205. Pacific Coast Groundfish Fishing Capacity Reduction Loan Refinance (Section 610 Review)

Legal Authority: 16 U.S.C. 1801 *et seq.;* 16 U.S.C. 1861 *et seq.;* 5 U.S.C. 561 *et seq.*

Abstract: The National Marine Fisheries Service issued proposed regulations to refinance the voluntary fishing capacity reduction loan program implemented in 2004 in the Pacific Coast groundfish Federal limited-entry trawl, Washington coastal Dungeness crab, and California pink shrimp fisheries (collectively known hereafter as the refinanced reduction fisheries). The refinance loan of up to $30 million could establish a new industry fee system for future landings of the refinanced reduction fisheries. Upon publishing a final rule and receipt of an appropriation, the National Marine Fisheries Service would conduct three referenda to refinance the existing debt obligation in each of the refinanced reduction fisheries. If a referendum in one, two, or all three of the fisheries is successful, that fishery's current loan will be repaid in full and a new loan in the amount of the principal and interest balance as of the date of funding will be issued. The terms were prescribed in the 2015 National Defense Authorization Act and include a 45-year term to maturity, interest charged at a current Treasury interest rate, and a maximum repayment fee of 3 percent of ex-vessel value.

207. Pacific Coast Groundfish Trawl Rationalization Program; Widow Rockfish Reallocation in the Individual Fishing Quota Fishery

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: In January 2011, the National Marine Fisheries Service implemented the groundfish trawl rationalization program (a catch share program) for the Pacific coast groundfish limited entry trawl fishery. The program was implemented through Amendments 20 and 21 to the Pacific Coast Groundfish Fishery Management Plan and the corresponding implementing regulations. Amendment 20 established the trawl rationalization program, which includes an Individual Fishing Quota program for limited entry

trawl participants, and Amendment 21 established fixed allocations for limited entry trawl participants. During implementation of the trawl individual fishing quota program, widow rockfish was overfished and the initial allocations were based on its overfished status and management as a non-target species. The National Marine Fisheries Service declared the widow rockfish rebuilt in 2011 and, accordingly, the Pacific Fishery Management Council has now recommended actions to manage the increased abundance of widow rockfish. The action would reallocate individual fishing quota widow rockfish quota share to facilitate directed harvest and would lift the moratorium on widow rockfish quota share trading.

RIN: 0648–BF12

208. Allow the Use of Longline Pot Gear in the Gulf of Alaska Sablefish Individual Fishing Quota Fishery

Legal Authority: 16 U.S.C. 1801 *et seq.;* 16 U.S.C. 773 *et seq.*

Abstract: This action would amend Federal regulations to allow fishermen to use longline pot gear to harvest sablefish in the Gulf of Alaska Individual Fishing Quota fishery. Hook-and-line gear is currently the only authorized gear type in the sablefish Individual Fishing Quota fishery. The action would authorize Individual Fishing Quota fishermen to use either longline pot gear or hook-and-line gear in the sablefish Individual Fishing Quota fishery. Some fishermen would like to use longline pot gear because it is less prone to whale interactions than hook-and-line gear. Whales can remove sablefish from hook-and-line gear, which reduces fishing efficiency and increases costs for sablefish Individual Fishing Quota fishermen because the whale interactions damage hook-and-line gear and reduce sablefish catch rates. However, whales cannot remove sablefish from longline pot gear, and the action to authorize longline pot gear in the sablefish Individual Fishing Quota fishery is intended to reduce fishery interactions with whales and reduce the negative impacts of whale interactions on the sablefish Individual Fishing Quota fleet. The action would establish management measures to minimize conflicts between hook-and-line and longline pot gear on the fishing grounds and to prevent significant consolidation of sablefish Individual Fishing Quota onto fewer vessels.

209. Atlantic Highly Migratory Species; Atlantic Blacknose Shark Commercial Retention Limit

Legal Authority: 16 U.S.C. 1801 *et seq.;* 16 U.S.C. 971 *et seq.*

Abstract: This rule would evaluate the management measures for blacknose sharks in the Atlantic region. It would consider, among other things, a range of commercial management measures in both directed and incidental shark fisheries including, but not limited to, retention limits. In addition, this action would address commercial retention limits to help prevent early closures of the non-blacknose small coastal shark management group and fully utilize the quota.

210. Amendment 113 to the FMP for Groundfish of the BSAI To Establish a Catcher Vessel Fishing Period and Shoreside Processing Delivery Requirements for Aleutian Islands Pacific Cod

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This rule would restrict participation in the Aleutian Islands Pacific cod fishery. This action is necessary to provide stability to catcher vessels that participate in the Aleutian Islands Pacific cod fishery and the shoreside processors to which they deliver, and to the communities in which these processors are located. Specifically, this rule would establish catch limits for Pacific cod in the Aleutian Islands and the Bering Sea. The revised allocation is intended to provide catcher vessels with a sufficient opportunity to harvest Pacific cod in an inshore fishery by restricting participation in the fisheries by catcher processors that can harvest significantly larger volumes of Pacific cod further offshore. This rule may include provisions to relieve the restrictions on catcher processor participation if catcher vessels would not be able to harvest the allocation or Aleutian Islands shoreside processors would not be able to process catcher vessel harvests of Pacific cod.

RIN: 0648–BF54

211. Specification of Management Measures for Atlantic Herring for the 2016–2018 Fishing Years

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The Atlantic herring fishery specifications are annual catch amounts

for the 2016–2018 fishing years, January–December. These specifications are required by regulation to be set for 3 years. If implemented, these specifications will change the current catch limit levels and will continue to prevent overfishing of the herring resource and achieve optimum yield. The catch limits established in these specifications set a constant catch amount available to the industry that provides a stable allowable catch for 3-year business planning purposes. In addition, the specifications add catch that was not caught under last year's catch limit for one management area and reduce catch that exceeded the catch limits set in other management areas. Finally, the specifications set annual gear-specific and area-specific catch caps for river herring and shad, consistent with Framework Adjustment 3 to the Atlantic Herring Fishery Management Plan.

212. Amendment 19 to the Atlantic Sea Scallop Fishery Management Plan

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Amendment 19 would incorporate a specifications process into the Atlantic Sea Scallop Fishery Management Plan and change the start of the fishing year. Developing specifications to set annual or biennial allocations will allow for a more efficient process for setting annual allocations than currently possible through framework adjustments. By adjusting the start of the scallop fishing year, the National Marine Fisheries Service would be able to implement simple specifications actions at the start of the fishing year on a more consistent basis.

RIN: 0648–BF72

213. Observer Coverage Requirements for Catcher Vessels Using Trawl Gear in the Bering Sea and Aleutian Islands Management Area

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This rule would allow the owner of a catcher vessel in the Bering Sea and Aleutian Islands Management Area trawl limited access fisheries to annually choose to have the vessel placed in the full observer coverage category for all fishing in the Bering Sea and Aleutian Islands Management Area in the upcoming year. Under current regulations for the North Pacific Groundfish and Halibut Observer Program, catcher vessels in the Bering Sea and Aleutian Islands Management Area trawl limited access fisheries are assigned to the partial observer coverage category. Vessels in the partial observer coverage category must carry an observer on selected fishing trips, whereas vessels in the full observer coverage category must carry an observer for all of their fishing activity. Owners of trawl catcher vessels have requested to be allowed to voluntarily choose full coverage to obtain observer data from all of their fishing trips to better manage their halibut prohibited species catch.

RIN: 0648–BF81

215. Amendment 103 to the Fishery Management Plan for Groundfish of the Gulf of Alaska to Reapportion Chinook Salmon Prohibited Catch in the Gulf Of Alaska Trawl Fisheries

Legal Authority: 16 U.S.C. 1801 *et seq.;* 16 U.S.C. 3631 *et seq.;* 16 U.S.C. 773 *et seq.;* Pub. L. 08–199

Abstract: This action would allow the National Marine Fisheries Service to reapportion unused Chinook salmon prohibited species catch within and between trawl sectors in the Gulf of Alaska groundfish fisheries to reduce the potential for early fishery closures. Amendments 93 and 97 to the Fishery Management Plan for Groundfish of the Gulf of Alaska and implementing regulations established Chinook salmon prohibited species catch limits for pollock and non-pollock trawl fisheries. If a sector reaches a prohibited species catch limit, the fishery is closed for the remainder of the fishing year—currently, the fishery management plan and regulations do not allow NMFS to reapportion unused Chinook salmon prohibited species catch among trawl sectors. Specifically, this action would: Allow the National Marine Fisheries Service to reapportion remaining Chinook salmon prohibited species catch among trawl catcher vessel sectors and from the trawl catcher/processor sector to trawl catcher vessel sectors

based on criteria established for inseason reapportionments and within specified limits; increase management flexibility without exceeding the current overall 32,500 Chinook salmon prohibited species catch limit or negating the current prohibited species catch limits under Amendments 93 and 97; and increase the likelihood that groundfish resources are more fully harvested, and minimize the adverse socioeconomic impacts of the fishery closures on harvesters, processors, and communities.

216. • Framework Action To Adjust the Red Grouper Allowable Harvest in the Gulf of Mexico

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This Framework Action would adjust the red grouper allowable harvest in the Gulf of Mexico, consistent with the results of a 2015 stock assessment. The commercial annual catch limit and annual catch target would be adjusted from 6.03 million pounds gutted weight and 5.72 million pounds gutted weight, to 8.19 million pounds gutted weight, and 7.78 million pounds gutted weight, respectively. The recreational annual catch limit and annual catch target would be adjusted from 1.9 million pounds gutted weight and 1.73 million pounds gutted weight, to 2.58 million pounds gutted weight, and 2.37 million pounds gutted weight, respectively. These increases in the annual catch limits and annual catch targets will provide more quota to the commercial fisherman and are expected to extend the recreational fishing season, which has been closed in-season in recent years, through the end of the year.

226. Requirements for Importation of Fish and Fish Products Under the U.S. Marine Mammal Protection Act

Legal Authority: 16 U.S.C. 1371 *et seq.*

Abstract: With this action, the National Marine Fisheries Service developed procedures to implement the provisions of section 101(a)(2) of the Marine Mammal Protection Act for imports of fish and fish products. Those provisions require the Secretary of the Treasury to ban imports of fish and fish products from fisheries with bycatch of marine mammals in excess of U.S. standards. The provisions further require the Secretary of Commerce to insist on reasonable proof from exporting nations of the effects on marine mammals of bycatch incidental to fisheries that harvest the fish and fish products to be imported.

228. Amendment 28 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The National Marine Fisheries Service implemented management measures as requested by the Gulf of Mexico Fishery Management Council in Amendment 28 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico. The Council voted to reallocate the Gulf of Mexico 2016 and 2017 red snapper stock annual catch limit between the commercial and recreational sectors from 51:49 percent to 48.5:51.5 percent, respectively. As a result of the revised sector allocations finalized in Amendment 28, this rule revised the red snapper commercial and recreational quotas (which are equivalent to the annual catch limits) and the recreational annual catch targets. This rule also set the Federal charter vessel/headboat and private angling component quotas and annual catch targets based on the revised recreational sector's annual catch limit and annual catch target.

229. Amendment 35 to the Fishery Management Plan for the Snapper Grouper Fishery of the South Atlantic Region

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Amendment 35 removed black snapper, dog snapper, mahogany snapper, and schoolmaster from the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region because these species have extremely low commercial landings in state and Federal waters. Almost all harvest (recreational and commercial) occurs in South Florida, and the Florida Fish and Wildlife Conservation Commission agreed that if the four species were removed from the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region they will extend state regulations for those species into Federal waters. Additionally, the South Atlantic Fishery Management Council (Council) desires consistent regulations for snapper-grouper species caught primarily in South Florida. Removing the four subject species established a consistent regulatory environment in Federal and state waters off southern Florida where they are most frequently encountered. Amendment 35 also clarified—in accordance with the Council's intent—regulations governing use of golden tilefish longline endorsements.

230. Amendment 109 to the Fishery Management Plan for Groundfish of the BSAI To Facilitate Development of Groundfish Fisheries for Small Vessels in the Western Alaska Community Development Quota Program

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This action amended the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area and revised regulations governing the groundfish and halibut fisheries managed under the Western Alaska Community Development Quota Program in order to support increased participation in the groundfish Community Development Quota fisheries (primarily Pacific cod) by catcher vessels less than or equal to 46 feet (14.0 m) length overall using hook-and-line gear. This action was necessary to promote the goals of the Community Development Quota Program, to increase participation by residents of Community Development Quota communities in the Bering Sea and Aleutian Islands Management Area groundfish and halibut fisheries, and to support economic development in western Alaska. This action benefited the six Community Development Quota groups and the operators of the small catcher vessels that the Community Development Quota groups authorize to fish on their behalf by reducing the costs of participating in the groundfish

and halibut Community Development Quota fisheries.

231. Process for Divestiture of Excess Quota Shares

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: In January 2011, the National Marine Fisheries Service implemented the groundfish trawl rationalization program (a catch share program) for the Pacific coast groundfish limited entry trawl fishery. The program was implemented through Amendments 20 and 21 to the Pacific Coast Groundfish Fishery Management Plan and the corresponding implementing regulations. Amendment 20 established the trawl rationalization program, which includes an Individual Fishing Quota program for limited entry trawl participants, and Amendment 21 established fixed allocations for limited entry trawl participants, with limits on how much quota each participant can accumulate. Under previous regulations, quota share owners had to divest quota shareholdings that exceeded individual accumulation limits by November 30, 2015. This action made minor procedural modifications to the program regulations to clarify how divestiture of excess quota share could occur.

232. Implementation of Salmon Bycatch Management Measures for the Bering Sea Pollock Fishery

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: Regulatory Amendment 110 made substantive changes to the management of salmon bycatch in the Bering Sea pollock fishery to minimize salmon bycatch in the pollock fishery to the extent practicable. Currently, Chinook and chum salmon bycatch are managed under two different programs, which have led to inefficiencies and do not allow the pollock fishery the flexibility to modify their harvest patterns and practices to effectively minimize both Chinook and chum salmon bycatch. This regulation made salmon bycatch management more effective, comprehensive, and efficient by increasing flexibility to respond to changing conditions and providing greater incentives to reduce bycatch of both salmon species. This regulation provided the flexibility to harvest pollock in times and places that best achieve salmon avoidance and to adapt to changing conditions quickly.

233. Cost Recovery Authorized Payment Methods

Legal Authority: 16 U.S.C. 1862; 16 U.S.C. 773 *et seq.;* Pub. L. 108–447; Pub. L. 109–241; Pub. L. 109–479; Pub. L. 111–281

Abstract: This rule amended authorized payment methods in existing cost recovery fee programs for the halibut, sablefish, and crab catch share programs. The Magnuson-Stevens Fishery Conservation and Management Act authorizes and requires the collection of cost recovery fees for fishery management programs that issue a permit allocating exclusive harvest privileges. Cost recovery fees recover the actual costs directly related to the management, data collection, and enforcement of the programs. Permit holders are required to submit cost recovery fee payments to the National Marine Fisheries Service annually. The National Marine Fisheries Service undertook a security review of the cost recovery fee payment process and developed the rule to improve security procedures for protecting sensitive financial information and to reduce costs associated with administering the cost recovery programs. The final rule eliminated manual processing of credit card information and required use of the Federal government's online payment system, pay.gov, for permit holders paying by credit card. The final rule also eliminated payments by paper check or money order and required the use of pay.gov beginning in 2020. The rule is expected to reduce the administrative costs of processing fee payments, and this reduction in costs would reduce the total amount of cost recovery fees collected from participants in the halibut, sablefish, and crab catch share programs.

234. Amendment 102 to the Fishery Management Plan for Groundfish of the Gulf of Alaska

Legal Authority: 16 U.S.C 1801 *et seq.*

Abstract: This rule modified the basis for the National Marine Fisheries Service to place small catcher/processors in partial coverage in the North Pacific Groundfish and Halibut Observer Program (Observer Program). Under this action, the National Marine Fisheries Service classified a catcher/

processor as small—and eligible for partial coverage—for one year based on whether the catcher/processor had an average weekly production less than a specified threshold. This action decreased the cost of observer coverage for catcher/processors that process small amounts of groundfish relative to the rest of the fleet. Approximately nine vessels could have been affected by this action and we expected all newly qualified vessels would choose to participate in partial coverage for the upcoming fishing year.

235. 2016–2018 Specifications and Management Measures for the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This action established catch levels and associated management measures for the 2016–2018 fishing years for species managed under the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan. The final rule: Lowered the Atlantic mackerel quota by 56 percent to 9,177 metric tons (mt) for the next three years; lowered the cap on river herring and shad catch in the mackerel fishery from 89 mt to 82 mt for the next three years; increased the trigger for when 3-inch mesh is required for longfin squid-butterfish moratorium permits holders from 2,500 lb to 5,000 lb; clarified that 5-inch (square or diamond) or greater strengtheners may be used outside the 3-inch mesh to avoid breaking nets during large hauls; and suspended the pre-trip notification system requirement for longfin squid-butterfish moratorium permit holders.

236. Framework Adjustment 27 to the Atlantic Sea Scallop Fishery Management Plan

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: The purpose of Framework 27 was to set management measures for the scallop fishery for the 2016 fishing year, including the annual catch limits and annual catch targets for the limited access and limited access general category fleets, as well as days-at-sea allocations and sea scallop access area trip allocations. Allocations were similar to or slightly higher than previous years. In addition, Framework 27 implemented additional measures to protect small scallops for future harvest.

237. Revisions to the Pacific Halibut Catch Sharing Plan, Codified Regulations, and Annual Management Measures for 2016 and Beyond

Legal Authority: 16 U.S.C. 773 *et seq.*

Abstract: This action was the National Marine Fisheries Service's annual rulemaking regarding halibut fishing on the U.S. West Coast, implementing the Pacific Halibut Catch Sharing Plan (Plan). The Plan governs the allocation of the annual halibut quota for the West Coast fisheries, which is set by the International Pacific Halibut Commission and approved by NOAA Fisheries. For 2016 and beyond, the Pacific Fishery Management Council recommended several minor changes to the portion of the Plan covering sport fishery seasons and retention rules; and modifications to the processes for implementing inseason actions and sport fishery closures.

238. Regulatory Amendment 25 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This rule finalized management changes recommended by the South Atlantic Fishery Management Council to blueline tilefish, yellowtail snapper, and black sea bass in the South Atlantic Region. This rule increased the annual catch limit and optimum yield for blueline tilefish based on a new acceptable biological catch recommendation from the South Atlantic Council's Scientific and Statistical Committee. This action also finalized an increase to the current commercial trip limit and changed the recreational bag limit for blueline tilefish. The fishing year for yellowtail snapper was previously based on the calendar year. This rule implemented a summer/early fall start date of the fishing year to protect the yellowtail snapper stock during the spawning season and provide economic benefits for commercial fishermen. Lastly, this rule implemented an increase to the black sea bass recreational bag limit to increase the chance the recreational annual catch limit will be landed and

ensure that optimum yield is being achieved.

239. Amendment 17A to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico, U.S. Waters

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This rule implemented the Gulf of Mexico Fishery Management Council's decision to extend the Council-imposed moratorium on new federal commercial shrimp permits for 10 years. The moratorium began in 2006 and would have expired in 2016 if no action was taken. This action was necessary to protect federally managed Gulf of Mexico shrimp stocks while promoting catch efficiency, economic efficiency and stability.

240. Framework Adjustment 3 to the Northeast Skate Complex Fishery Management Plan

Legal Authority: 16 U.S.C. 1801 *et seq.*

Abstract: This action, developed by the New England Fishery Management Council, includes skate fishery specifications for the 2016–2017 fishing years, and a new seasonal quota allocation in the skate wing fishery. In summary, the Council proposes: An annual catch limit for skate of 31,081 metric tons, an overall total allowable landings of 12,590 metric tons, status quo possession limits for the skate wing and bait fisheries, the addition of a seasonal quota allocation, and the National Marine Fisheries Service authority to close the fishery in-season if the seasonal quota is reached.

Semiannual Regulatory Agenda

DEPARTMENT OF DEFENSE

32 CFR Chs. I, V, VI, and VII

33 CFR Ch. II

36 CFR Ch. III

48 CFR Ch. II

Improving Government Regulations; Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Department of Defense (DoD).

ACTION: Semiannual regulatory agenda.

SUMMARY: The Department of Defense (DoD) is publishing this semiannual agenda of regulatory documents, including those that are procurement-related, for public information and comments under Executive Order 12866 ''Regulatory Planning and Review.'' This agenda incorporates the objective and criteria, when applicable, of the regulatory reform program under the Executive order and other regulatory guidance. It contains DoD regulations initiated by DoD components that may have economic and environmental impact on State, local, or tribal interests under the criteria of Executive Order 12866. Although most DoD regulations listed in the agenda are of limited public impact, their nature may be of public interest and, therefore, are published to provide notice of rulemaking and an opportunity for public participation in the internal DoD rulemaking process. Members of the public may submit comments on individual proposed and interim final rulemakings at *www.regulations.gov* during the comment period that follows publication in the **Federal Register**.

This agenda updates the report published on May 18, 2016, and includes regulations expected to be issued and under review over the next 12 months. The next agenda is scheduled to be published in the spring of 2017.

The complete Unified Agenda will be available online at *www.reginfo.gov.*

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), the Department of Defense's printed agenda entries include only:

(1) Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Any rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's agenda requirements. Additional information on these entries is in the Unified Agenda available online.

FOR FURTHER INFORMATION CONTACT: For information concerning the overall DoD regulatory improvement program and for general semiannual agenda information, contact Ms. Patricia Toppings, telephone 571–372–0485, or write to Office of the Deputy Chief Management Officer, Directorate for Oversight and Compliance, Regulatory and Advisory Committee Division, 9010 Defense Pentagon, Washington, DC 20301–9010, or email: *patricia.l.toppings.civ@mail.mil.*

For questions of a legal nature concerning the agenda and its statutory requirements or obligations, write to Office of the General Counsel, 1600 Defense Pentagon, Washington, DC 20301–1600, or call 703–697–2714.

For general information on Office of the Secretary regulations, other than those which are procurement-related, contact Ms. Morgan Park, telephone 571–372–0489, or write to Office of the Deputy Chief Management Officer, Directorate of Oversight and Compliance, Regulatory and Advisory Committee Division, 9010 Defense Pentagon, Washington, DC 20301–9010, or email: *morgan.e.park.civ@mail.mil.*

For general information on Office of the Secretary regulations which are procurement-related, contact Ms. Jennifer Hawes, telephone 571–372–6115, or write to Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, Defense Procurement and Acquisition Policy, Defense Acquisition Regulations System, Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060, or email: *jennifer.l.hawes2.civ@mail.mil.*

For general information on Department of the Army regulations, contact Ms. Brenda Bowen, telephone 703–428–6173, or write to the U.S. Army Records Management and Declassification Agency, ATTN: AAHS–RDR–C, Casey Building, Room 102, 7701 Telegraph Road, Alexandria, Virginia 22315–3860, or email: *brenda.s.bowen.civ@mail.mil.*

For general information on the U.S. Army Corps of Engineers regulations, contact Mr. Chip Smith, telephone 703–693–3644, or write to Office of the Deputy Assistant Secretary of the Army (Policy and Legislation), 108 Army Pentagon, Room 2E569, Washington, DC 20310–0108, or email: *charles.r.smith567.civ@mail.mil.*

For general information on Department of the Navy regulations, contact CDR Noreen Hagerty-Ford, telephone 703–614–7408, or write to Department of the Navy, Office of the Judge Advocate General, Administrative Law Division (Code 13), Washington Navy Yard, 1322 Patterson Avenue SE., Suite 3000, Washington, DC 20374–5066, or email: *noreen.hagerty-ford@navy.mil.*

For general information on Department of the Air Force regulations, contact Bao-Anh Trinh, telephone 703–614–8500, or write the Office of the Secretary of the Air Force, Chief, Information Dominance/Chief Information Officer (SAF CIO/A6), 1800 Air Force Pentagon, Washington, DC 20330–1800, or email: *usaf.pentagon.saf-cio-a6.mbx.af-foia@mail.mil.*

For specific agenda items, contact the appropriate individual indicated in each DoD component report.

SUPPLEMENTARY INFORMATION: This edition of the Unified Agenda of Federal Regulatory and Deregulatory Actions is composed of the regulatory status reports, including procurement-related regulatory status reports, from the Office of the Secretary of Defense (OSD) and the Departments of the Army and Navy. Included also is the regulatory status report from the U.S. Army Corps of Engineers, whose civil works functions fall under the reporting requirements of Executive Order 12866 and involve water resource projects and regulation of activities in waters of the United States.

In addition, this agenda, although published under the reporting requirements of Executive Order 12866, continues to be the DoD single-source reporting vehicle, which identifies regulations that are currently applicable under the various regulatory reform programs in progress. Therefore, DoD components will identify those rules which come under the criteria of the:

a. Regulatory Flexibility Act;

b. Paperwork Reduction Act of 1995;

c. Unfunded Mandates Reform Act of 1995.

Those DoD regulations, which are directly applicable under these statutes, will be identified in the agenda and their action status indicated. Generally, the regulatory status reports in this agenda will contain five sections: (1) Prerule stage; (2) proposed rule stage; (3) final rule stage; (4) completed actions; and (5) long-term actions. Where certain regulatory actions indicate that small entities are affected, the effect on these entities may not necessarily have significant economic impact on a

substantial number of these entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601(6)).

Although not a regulatory agency, DoD will continue to participate in regulatory initiatives designed to reduce economic costs and unnecessary burdens upon the public. Comments and recommendations are invited on the rules reported and should be addressed to the DoD component representatives identified in the regulatory status reports. Although sensitive to the needs of the public, as well as regulatory reform, DoD reserves the right to exercise the exemptions and flexibility permitted in its rulemaking process in order to proceed with its overall defense-oriented mission. The publishing of this agenda does not waive the applicability of the military affairs exemption in section 553 of title 5 U.S.C. and section 3 of Executive Order 12866. Executive Order 13563 recognizes the importance of maintaining a consistent culture of retrospective review and analysis throughout the executive branch. DoD's retrospective review plan is intended to identify certain significant rules that are obsolete, unnecessary, unjustified, excessively burdensome, or counterproductive and can be accessed at: *http://www.regulations.gov/#!docketDetail;D=DOD-2011-OS-0036.*

Dated: August 30, 2016.

David Tillotson III,

Assistant Deputy Chief Management Officer.

Department of Education

Office of the Secretary

Semiannual Regulatory Agenda

DEPARTMENT OF EDUCATION

Office of the Secretary

34 CFR Subtitles A and B

Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Office of the Secretary, Department of Education.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Secretary of Education publishes a semiannual agenda of Federal regulatory and deregulatory actions. The agenda is issued under the authority of section 4(b) of Executive Order 12866, ''Regulatory Planning and Review.'' The purpose of the agenda is to encourage more effective public participation in the regulatory process by providing the public with early information about the regulatory actions we plan to take.

FOR FURTHER INFORMATION CONTACT: Questions or comments related to specific regulations listed in this agenda should be directed to the agency contact listed for the regulations. Other questions or comments on this agenda should be directed to LaTanya Cannady, Program Specialist, Emily Fridman, Attorney, Rachel Disario, Attorney, or Hilary Malawer, Assistant General Counsel, Division of Regulatory Services, Department of Education, Room 6C128, 400 Maryland Avenue SW., Washington, DC 20202–2241; telephone: LaTanya Cannady (202) 401–9676, Emily Fridman (202) 453–7421, Rachel Disario (202) 401–0897, or Hilary Malawer (202) 401–6148. Individuals who use a telecommunications device for the deaf or a text telephone may call the Federal Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Section 4(b) of Executive Order 12866, dated September 30, 1993, requires the Department of Education (ED) to publish, at a time and in a manner specified by the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, an agenda of all regulations under development or review. The Regulatory Flexibility Act, 5 U.S.C. 602(a), requires ED to publish, in October and April of each year, a regulatory flexibility agenda.

The regulatory flexibility agenda may be combined with any other agenda that satisfies the statutory requirements (5 U.S.C. 605(a)). In compliance with the Executive order and the Regulatory Flexibility Act, the Secretary publishes this agenda.

For each set of regulations listed, the agenda provides the title of the document, the type of document, a citation to any rulemaking or other action taken since publication of the most recent agenda, and planned dates of future rulemaking. In addition, the agenda provides the following information:

- An abstract that includes a description of the problem to be addressed, any principal alternatives being considered, and potential costs and benefits of the action.
- An indication of whether the planned action is likely to have significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601(6)).
- A reference to where a reader can find the current regulations in the Code of Federal Regulations.
- A citation of legal authority.
- The name, address, and telephone number of the contact person at ED from whom a reader can obtain additional information regarding the planned action.

In accordance with ED's Principles for Regulating listed in its regulatory plan (78 FR 1361, published January 8, 2013), ED is committed to regulations that improve the quality and equality of services to its customers. ED will regulate only if absolutely necessary and then in the most flexible, most equitable, least burdensome way possible.

Interested members of the public are invited to comment on any of the items listed in this agenda that they believe are not consistent with the Principles for Regulating. Members of the public are also invited to comment on any uncompleted actions in this agenda that ED plans to review under section 610 of the Regulatory Flexibility Act (5 U.S.C. 610) to determine their economic impact on small entities.

This publication does not impose any binding obligation on ED with regard to any specific item in the agenda. ED may elect not to pursue any of the regulatory actions listed here, and regulatory action in addition to the items listed is not precluded. Dates of future regulatory actions are subject to revision in subsequent agendas.

Electronic Access to This Document

The entire Unified Agenda is published electronically and is available online at *www.reginfo.gov.*

Philip Rosenfelt,

Deputy General Counsel.

OFFICE OF POSTSECONDARY EDUCATION—COMPLETED ACTIONS

Sequence No.	Title	Regulation Identifier No.
244	Borrower Defense	1840–AD19

DEPARTMENT OF EDUCATION (ED)

Office of Postsecondary Education (OPE)

Completed Actions

244. Borrower Defense

Legal Authority: 20 U.S.C. 1001 *et seq.*

Abstract: The Department is establishing regulations for determining which acts or omissions of an institution of higher education a borrower may assert as a defense to repayment of a loan made under the William D. Ford Federal Direct Loan (Federal Direct Loan) Program and identifying the consequences of such borrower defenses for borrowers, institutions, and the Secretary.

Part VII

Department of Energy

Semiannual Regulatory Agenda

DEPARTMENT OF ENERGY

10 CFR Chs. II, III, and X

48 CFR Ch. 9

Semiannual Regulatory Agenda

AGENCY: Department of Energy.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Department of Energy (DOE) has prepared and is making available its portion of the semiannual Unified Agenda of Federal Regulatory and Deregulatory Actions (Agenda), including its Regulatory Plan (Plan), pursuant to Executive Order 12866, ''Regulatory Planning and Review,'' and the Regulatory Flexibility Act.

SUPPLEMENTARY INFORMATION: The Agenda is a government-wide compilation of upcoming and ongoing regulatory activity, including a brief description of each rulemaking and a timetable for action. The Agenda also includes a list of regulatory actions completed since publication of the last Agenda. The Department of Energy's portion of the Agenda includes regulatory actions called for by statute, including amendments contained in the Energy Independence and Security Act of 2007 and the American Energy Manufacturing Technical Corrections Act, and programmatic needs of DOE offices.

The Internet is the basic means for disseminating the Agenda and providing users the ability to obtain information from the Agenda database. DOE's entire Fall 2016 Agenda can be accessed online by going to *www.reginfo.gov.* Agenda entries reflect the status of activities as of approximately November 30, 2016.

Publication in the **Federal Register** is mandated by the Regulatory Flexibility Act (5 U.S.C. 602) only for Agenda entries that require either a regulatory flexibility analysis or periodic review under section 610 of that Act. DOE's regulatory flexibility agenda is made up of seven rulemakings that will set energy conservation standards for the following products:

- Walk-In Coolers and Walk-In Freezers (1904–AD59)
- Residential Non-Weatherized Gas Furnaces and Mobile Home Gas Furnaces (1904–AD20)
- Commercial Water Heaters (1904–AD34)
- Commercial Packaged Boilers (1904–AD01)
- General Service Fluorescent Lamps (1904–AD09)
- Dedicated Purpose Pool Pumps (1904–AD52)
- Manufactured Housing (1904–AC11)

The Plan appears in both the online Agenda and the **Federal Register** and includes the most important of DOE's significant regulatory actions and a Statement of Regulatory and Deregulatory Priorities.

Steven P. Croley,

General Counsel.

ENERGY EFFICIENCY AND RENEWABLE ENERGY—PROPOSED RULE STAGE

251. • Energy Conservation Program: Test Procedures for Walk-In Cooler and Freezer Refrigeration Systems

Legal Authority: 42 U.S.C. 6311 *et seq.*

Abstract: DOE established a Working Group to negotiate amended energy conservation standards for six classes of walk-in cooler and freezer (walk-in) refrigeration systems. After holding a series of meetings as part of a negotiated rulemaking, the Working Group developed a Term Sheet containing a series of recommendations regarding potential energy conservation standards for these refrigeration systems and the current test procedure for evaluating the energy efficiency of a walk-in refrigeration system. This rulemaking proposes several test procedure amendments to implement these recommendations. These proposed amendments include certain changes to improve test procedure clarity, updating related certification and enforcement provisions to address the performance-based energy conservation standards for walk-in cooler and freezer equipment, and establishing labeling requirements that will aid manufacturers in determining which components would be considered for compliance purposes as intended for walk-in cooler and freezer applications. The proposal would also add certain equipment-specific definitions, remove the test method for refrigeration systems with hot gas defrost, and include a method to accommodate refrigeration equipment that use adaptive defrost and on-cycle variable-speed evaporator fan control.

Completed Actions

253. Enforcement of Regional Standards for Residential Furnaces and Central Air Conditioners and Heat Pumps

Legal Authority: 42 U.S.C. 6295(o)(6)(G)(ii)(l)

Abstract: DOE has developed three separate possible approaches to enforcement of regional standards for residential furnaces and residential central air conditioners and heat pumps set forth by direct final rule published in the **Federal Register** on June 27, 2011. 76 FR 37549. Adoption of these regional standards was addressed on October 31, 2011. (76 FR 67037) DOE intends to select one of these three approaches, or a combination of elements in these approaches, as a framework for an enforcement plan for regional standards. DOE is also considering a possible waiver process for regional standards applicability. DOE is required to promulgate an enforcement final rule covering the enforcement of regional standards ''[n]ot later than 15 months after the date of the issuance of a final rule that establishes a regional standard'' (42 U.S.C. 6295(o)(6)(G)(ii)(III)). In a notice published in the **Federal Register** on June 13, 2014, 79 FR 33870, DOE announced that it was forming a working group under the Appliance Standards and Rulemaking Federal Advisory Committee (ASRAC) to develop proposed energy efficiency requirements for regional standards enforcement. On November 19, 2015, DOE published a notice of proposed rulemaking that included the recommendations of the working group (80 FR 72373). On July 14, 2016, DOE published a final rule. (81 FR 45387)

255. Energy Conservation Standards for Small, Large, and Very Large Commercial Package Air Conditioning and Heating Equipment

Legal Authority: 42 U.S.C. 6313(a)(6)(c)(i) and (vi); 42 U.S.C. 6316; 42 U.S.C. 6295(p)(4)

Abstract: The Energy Policy and Conservation Act of 1975, as amended, requires DOE to periodically review its standards for small, large, and very large commercial package air conditioners and heating equipment (which includes commercial unitary air conditioners and heat pumps—or CUACs). Under amendments to EPCA made by the American Energy Manufacturing Technical Corrections Act of 2012, Pub. L. 112–210 (Dec. 18, 2012), DOE must review its standards for this equipment every six years and determine whether they need amending. It also requires that, for those equipment types for which more than six years have elapsed since the most recent final rules establishing or amending a standard for that equipment, DOE must publish either a notice of determination not to amend standards or a proposal to amend the applicable standard by December 31, 2013. More than six years has elapsed since the standards for this equipment were last amended. On April 1, 2015, DOE published a notice announcing that a working group, under the Appliance Standards Federal Rulemaking Advisory Committee (ASRAC), was created to potentially develop negotiated standards (80 FR 17363). DOE is conducting this rulemaking to consider amended energy conservation standards for commercial unitary air conditioners and heat pumps as required by EPCA, as amended.

256. Energy Conservation Standards for Commercial Warm Air Furnaces

Legal Authority: 42 U.S.C. 6313(a)(6)(C)(i) and (vi); 42 U.S.C. 6316; 42 U.S.C. 6295(p)(4); 42 U.S.C. 6311 (11)(A)

Abstract: EPCA, as amended by the American Energy Manufacturing Technical Corrections Act (AEMTCA) of 2012, Pub. L. 112–210 (Dec. 18, 2012), requires the Secretary to review its standards for this equipment every six years and to determine whether updating the statutory energy conservation standards for commercial warm air furnaces is technically feasible and economically justified and would save a significant amount of energy. It also requires that, for those equipment types for which more than six years have elapsed since the most recent final rules establishing or amending a standard for that equipment, DOE must publish either a notice of determination not to amend standards or a proposal to amend the applicable standards by December 31, 2013. More than six years have elapsed since the standards for this equipment were last amended. On April 1, 2015, DOE published a notice announcing the creation of a working group under the Appliance Standards Federal Rulemaking Advisory Committee (ASRAC) to potentially develop negotiated standards (80 FR 17363). DOE is conducting this rulemaking to consider amended energy conservation standards for commercial warm air furnaces as required by EPCA, as amended.

257. Test Procedure for Commercial Water Heating Equipment

Legal Authority: 42 U.S.C. 6314(a)(1)(A); 42 U.S.C. 6314(a)(4)(B)

Abstract: EPCA, as amended by EISA 2007 and AEMTCA, requires the Secretary to update test procedures for commercial water heating equipment to be consistent with the amended industry test procedure so as to reflect any technological advances in this equipment and accurately represent the energy consumption of this equipment. The statute also requires DOE to consider any necessary amendments to its test procedures at least once every seven years. This rulemaking will satisfy both statutory provisions.

258. Workplace Substance Abuse Programs at DOE Sites

Legal Authority: 41 U.S.C. 701 *et seq.;* 41 U.S.C. 2012, 2013, 2051, 2061, 2165, 2201b, 2201i, and 2201(p); 42 U.S.C 5814 and 5815; 42 U.S.C. 7151, 7251, and 7256; 50 U.S.C. 2401 *et seq.*

Abstract: The Department of Energy is amending its regulation related to workplace substance abuse programs at DOE sites. The proposed amendments would address drug and alcohol abuse, testing workers in certain sensitive positions, development and approval of a workplace substance abuse program, employee assistance programs and training. The proposed amendments would improve and strengthen the substance abuse programs and enhance consistency with advances in similar rules and other Federal drug and alcohol programs that place similar requirements on the private sector.

Regulatory Agenda

AGENCY: Office of the Secretary, HHS.

ACTION: Semiannual Regulatory Agenda.

SUMMARY: The Regulatory Flexibility Act of 1980 and Executive Order (E.O.) 12866 require the semiannual issuance of an inventory of rulemaking actions under development throughout the Department, offering for public review summarized information about forthcoming regulatory actions.

FOR FURTHER INFORMATION CONTACT: Wilma Robinson, Deputy Executive Secretary, Department of Health and Human Services, 200 Independence Avenue SW., Washington, DC 20201; (202) 690–5627.

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) is the Federal government's lead agency for protecting the health of all Americans and providing essential human services, especially for those who are least able to help themselves. HHS enhances the health and well-being of Americans by promoting effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services.

This Agenda presents the rulemaking activities that the Department expects to undertake in the foreseeable future to advance this mission. The Agenda furthers several Departmental goals, including strengthening health care; advancing scientific knowledge and innovation; advancing the health, safety, and well-being of the American people; increasing efficiency, transparency, and accountability of HHS programs; and strengthening the nation's health and human services infrastructure and workforce.

HHS has an agency-wide effort to support the Agenda's purpose of encouraging more effective public participation in the regulatory process. For example, to encourage public participation, we regularly update our regulatory Web page (*http://www.HHS.gov/regulations*) which includes links to HHS rules currently open for public comment, and also provides a ''regulations toolkit'' with background information on regulations, the commenting process, how public comments influence the development of a rule, and how the public can provide effective comments. HHS also actively encourages meaningful public participation in its retrospective review of regulations, through a comment form on the HHS retrospective review Web page (*http://www.HHS.gov/RetrospectiveReview*).

The rulemaking abstracts included in this paper issue of the **Federal Register** cover, as required by the Regulatory Flexibility Act of 1980, those prospective HHS rulemakings likely to have a significant economic impact on a substantial number of small entities. The Department's complete Regulatory Agenda is accessible online at *http://www.RegInfo.gov.*

Madhura C. Valverde,

Executive Secretary to the Department.

OFFICE OF THE SECRETARY—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
261	Removal of 2 CFR Subsection 376.147 (Rulemaking Resulting From a Section 610 Review)	0991–AC08
262	Uniform Administrative Requirements, Costs Principles and Adult Requirements (45 CFR 75) (Rulemaking Resulting From a Section 610 Review).	0991–AC09

OFFICE FOR CIVIL RIGHTS—COMPLETED ACTIONS

Sequence No.	Title	Regulation Identifier No.
263	Nondiscrimination Under the Patient Protection and Affordable Care Act	0945–AA02

OFFICE OF THE NATIONAL COORDINATOR FOR HEALTH INFORMATION TECHNOLOGY—COMPLETED ACTIONS

Sequence No.	Title	Regulation Identifier No.
264	ONC Health IT Certification Program: Enhanced Oversight and Accountability	0955–AA00

FOOD AND DRUG ADMINISTRATION—PROPOSED RULE STAGE

Sequence No.	Title	Regulation Identifier No.
265	Over-the-Counter (OTC) Drug Review—Cough/Cold (Antihistamine) Products	0910–AF31
266	Updated Standards for Labeling of Pet Food	0910–AG09
267	Format and Content of Reports Intended To Demonstrate Substantial Equivalence	0910–AG96
268	Radiology Devices; Designation of Special Controls for the Computed Tomography X-Ray System	0910–AH03
269	Mammography Quality Standards Act; Regulatory Amendments **(Reg Plan Seq No. 35)**	0910–AH04
270	Investigational New Drug Application Annual Reporting	0910–AH07
271	Requirements for Tobacco Product Manufacturing Practice	0910–AH22
272	Use of Ozone Depleting Substances (Section 610 Review)	0910–AH36

References in boldface appear in The Regulatory Plan in part II of this issue of the **Federal Register**.

FOOD AND DRUG ADMINISTRATION—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
273	Postmarketing Safety Reporting Requirements for Human Drug and Biological Products	0910–AA97
274	Medical Gas Containers and Closures; Current Good Manufacturing Practice Requirements	0910–AC53
275	Human Subject Protection; Acceptance of Data From Clinical Investigations for Medical Devices	0910–AG48
276	Supplemental Applications Proposing Labeling Changes for Approved Drugs and Biological Products	0910–AG94
277	Food Labeling; Gluten-Free Labeling of Fermented, Hydrolyzed, or Distilled Foods	0910–AH00
278	General and Plastic Surgery Devices: Sunlamp Products	0910–AH14
279	Submission of Food and Drug Administration Import Data in the Automated Commercial Environment (Section 610 Review).	0910–AH41

FOOD AND DRUG ADMINISTRATION—LONG-TERM ACTIONS

Sequence No.	Title	Regulation Identifier No.
280	Laser Products; Amendment to Performance Standard	0910–AF87
281	Requirements for the Testing and Reporting of Tobacco Product Constituents, Ingredients, and Additives	0910–AG59
282	Regulations on Human Drug Compounding Under Sections 503A and 503B of the Federal Food, Drug, and Cosmetic Act.	0910–AH10
283	Topical Antimicrobial Drug Products for Over-the-Counter Human Use: Final Monograph for Consumer Antiseptic Wash Products.	0910–AH40

FOOD AND DRUG ADMINISTRATION—COMPLETED ACTIONS

Sequence No.	Title	Regulation Identifier No.
284	Requirements for Foreign and Domestic Establishment Registration and Listing for Human Drugs, Including Drugs That Are Regulated Under a Biologics License Application, and Animal Drugs.	0910–AA49
285	Food Labeling: Revision of the Nutrition and Supplement Facts Labels	0910–AF22
286	Food Labeling: Serving Sizes of Foods That Can Reasonably Be Consumed At One Eating Occasion; Dual-Column Labeling; Updating, Modifying, and Establishing Certain RACCs.	0910–AF23
287	Safety and Effectiveness of Consumer Antiseptics; Topical Antimicrobial Drug Products for Over-the-Counter Human Use.	0910–AF69
288	Abbreviated New Drug Applications and 505(b)(2) Applications	0910–AF97
289	''Tobacco Products'' Subject to the Federal Food, Drug, and Cosmetic Act, as Amended by the Family Smoking Prevention and Tobacco Control Act.	0910–AG38
290	Focused Mitigation Strategies To Protect Food Against Intentional Adulteration	0910–AG63

CENTERS FOR MEDICARE & MEDICAID SERVICES—PROPOSED RULE STAGE

Sequence No.	Title	Regulation Identifier No.
291	Hospital Inpatient Prospective Payment System for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and FY 2018 Rates (CMS–1677–P) (Section 610 Review).	0938–AS98
292	CY 2018 Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Medicare Part B (CMS–1676–P) (Section 610 Review).	0938–AT02
293	CY 2018 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates (CMS–1678–P) (Section 610 Review) **(Reg Plan Seq No. 46)**.	0938–AT03

References in boldface appear in The Regulatory Plan in part II of this issue of the **Federal Register**.

CENTERS FOR MEDICARE & MEDICAID SERVICES—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
294	Merit-Based Incentive Payment System (MIPS) and Alternative Payment Models (APMs) in Medicare Fee-for-Service (CMS–5517–FC) (Section 610 Review).	0938–AS69
295	CY 2017 Home Health Prospective Payment System Rate Update; Home Health Value-Based Purchasing Model; and Home Health Quality Reporting Requirements (CMS–1648–F) (Section 610 Review).	0938–AS80
296	CY 2017 Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Medicare Part B (CMS–1654–F) (Section 610 Review).	0938–AS81
297	CY 2017 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates (CMS–1656–FC) (Section 610 Review).	0938–AS82

CENTERS FOR MEDICARE & MEDICAID SERVICES—LONG-TERM ACTIONS

Sequence No.	Title	Regulation Identifier No.
298	Conditions of Participation for Home Health Agencies (CMS–3819–F) (Rulemaking Resulting From a Section 610 Review).	0938–AG81
299	Hospital and Critical Access Hospital (CAH) Changes to Promote Innovation, Flexibility, and Improvement in Patient Care (CMS–3295–F) (Rulemaking Resulting From a Section 610 Review).	0938–AS21
300	Imaging Accreditation (CMS–3309–P) (Section 610 Review)	0938–AS62
301	Part B Drug Payment Model (CMS–1670–F) (Section 610 Review)	0938–AS85

CENTERS FOR MEDICARE & MEDICAID SERVICES—COMPLETED ACTIONS

Sequence No.	Title	Regulation Identifier No.
302	Emergency Preparedness Requirements for Medicare and Medicaid Participating Providers and Suppliers (CMS–3178–F) (Section 610 Review).	0938–AO91
303	Reform of Requirements for Long-Term Care Facilities (CMS–3260–F) (Rulemaking Resulting From a Section 610 Review).	0938–AR61
304	Medicare Clinical Diagnostic Laboratory Test Payment System (CMS–1621–F) (Completion of a Section 610 Review).	0938–AS33
305	Medicare Shared Savings Program; Accountable Care Organizations (ACOs)—Revised Benchmark Rebasing Methodology (CMS–1644–F) (Completion of a Section 610 Review).	0938–AS67
306	Hospital Inpatient Prospective Payment System for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and FY 2017 Rates (CMS–1655–F) (Completion of a Section 610 Review).	0938–AS77

DEPARTMENT OF HEALTH AND HUMAN SERVICES (HHS)

Office of the Secretary (OS)

Final Rule Stage

261. • Removal of 2 CFR Subsection 376.147 (Rulemaking Resulting From a Section 610 Review)

Legal Authority: 5 U.S.C. 301; 31 U.S.C. 6101

Abstract: HHS is amending its adoption of the Office of the Management and Budget's Nonprocurement Common Rule, found at 2 CFR part 180. This will remove 2 CFR subsection 376.147, which provides information about the scope of HHS OIG exclusions under title XI of the Social Security Act.

263. Nondiscrimination Under the Patient Protection and Affordable Care Act

Legal Authority: 42 U.S.C. 18116

Abstract: This final rule implements prohibitions against discrimination on the basis of race, color, national origin, sex, age, and disability as provided in section 1557 of the Affordable Care Act. Section 1557 provides protection from discrimination in health programs and activities of covered entities. This section also identifies additional forms of Federal financial assistance to which the section will apply.

264. ONC Health IT Certification Program: Enhanced Oversight and Accountability

Legal Authority: Sec. 3001(c)(5) of the Public Health Service Act

Abstract: The rulemaking introduces modifications and new requirements under the ONC Health IT Certification Program (''Program''), including provisions related to the Office of the National Coordinator for Health Information Technology (ONC)'s role in the Program. The proposed rule proposes to establish processes for ONC to directly review health IT certified under the Program and take action when necessary, including requiring the correction of non-conformities found in health IT certified under the Program and suspending and terminating certifications issued to Complete EHRs and Health IT Modules. The proposed rule includes processes for ONC to authorize and oversee accredited testing laboratories under the Program. It also includes a provision for the increased transparency and availability of surveillance results.

Food and Drug Administration (FDA)

Proposed Rule Stage

265. Over-the-Counter (OTC) Drug Review—Cough/Cold (Antihistamine) Products

Legal Authority: 21 U.S.C. 321p; 21 U.S.C. 331; 21 U.S.C. 351 to 353; 21 U.S.C. 355; 21 U.S.C. 360; 21 U.S.C. 371

Abstract: FDA will be proposing a rule to add the common cold indication to certain over-the-counter (OTC) antihistamine active ingredients. This proposed rule is the result of collaboration under the U.S.-Canada Regulatory Cooperation Council (RCC) as part of efforts to reduce unnecessary duplication and differences. This pilot exercise will help determine the feasibility of developing an ongoing mechanism for alignment in review and adoption of OTC drug monograph elements.

266. Updated Standards for Labeling of Pet Food

Legal Authority: 21 U.S.C. 343; 21 U.S.C. 371; Pub. L. 110–85, sec. 1002(a)(3)

Abstract: FDA is proposing updated standards for the labeling of pet food that include nutritional and ingredient information, as well as style and formatting standards. FDA is taking this action to provide pet owners and animal health professionals more complete and consistent information about the nutrient content and ingredient composition of pet food products.

RIN: 0910–AG96

268. Radiology Devices; Designation of Special Controls for the Computed Tomography X-Ray System

Legal Authority: 21 U.S.C. 360c

Abstract: The proposed rule would establish special controls for the computed tomography (CT) X-ray system. A CT X-ray system is a diagnostic X-ray imaging system intended to produce cross-sectional images of the body through use of a computer to reconstruct an image from the same axial plane taken at different angles. High doses of ionizing radiation can cause acute (deterministic) effects such as burns, reddening of the skin, cataracts, hair loss, sterility, and, in extremely high doses, radiation

poisoning. The design of a CT X-ray system should balance the benefits of the device (*i.e.,* the ability of the device to produce a diagnostic quality image) with the known risks (*e.g.,* exposure to ionizing radiation). FDA is establishing proposed special controls, which are necessary to provide reasonable assurance of the safety and effectiveness of a class II CT X-ray system.

270. Investigational New Drug Application Annual Reporting

Legal Authority: 21 U.S.C. 321; 21 U.S.C. 331; 21 U.S.C. 351; 21 U.S.C. 352; 21 U.S.C. 353; 21 U.S.C. 355(i); 21 U.S.C. 371(a); 42 U.S.C. 262(a)

Abstract: This proposed rule would revise the requirements concerning annual reports submitted to investigational new drug applications (INDs) by replacing the current annual reporting requirement with a requirement that is generally consistent with the format, content, and timing of submission of the development safety update report devised by the International Conference on Harmonization of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH).

272. Use of Ozone Depleting Substances (Section 610 Review)

Legal Authority: 21 U.S.C. 321; 21 U.S.C. 331; 21 U.S.C. 335; 21 U.S.C. 342; 21 U.S.C. 346a; 21 U.S.C. 348; 21 U.S.C. 351; 21 U.S.C. 352; 21 U.S.C. 355; 21 U.S.C. 360b; 21 U.S.C. 361; 21 U.S.C. 371; 21 U.S.C. 372; 21 U.S.C. 374; 15 U.S.C. 402; 15 U.S.C. 409

Abstract: The Food and Drug Administration (FDA or the Agency) is proposing to amend its regulation (21 CFR 2.125) on uses of ozone-depleting substances (ODSs), including chlorofluorocarbons (CFCs), to remove designations for certain products as essential uses under the Clean Air Act. Essential-use products are exempt from FDA's ban on the use of CFC propellants in FDA-regulated products and the Environmental Protection Agency's (EPA's) ban on the use of CFCs and other ODSs in pressurized dispensers. This action, if finalized, will remove essential use exemptions for sterile aerosol talc administered intrapleurally by thoracoscopy for human use, metered-dose atropine sulfate aerosol human drugs administered by oral inhalation, and anesthetic drugs for topical use on accessible mucous membranes of humans where a cannula is used for application. FDA is proposing this action because alternative products that do not use ODSs are now available and because these products are no longer being marketed in approved versions that contain ODSs. On June 29, 2015, FDA published a notice and request for comment concerning its tentative conclusion that these products are no longer an essential use under the Clean Air Act (80 FR 36937). The Agency received no comments concerning removal of essential use designations for sterile aerosol talc and metered-dose atropine sulfate, and is proposing to remove these designations by direct final rule and a companion proposed rule in the event adverse comments are received. FDA received one comment concerning removal of anesthetic drugs for topical use in response to its 2015 notice and request for comment, and is proposing to remove this exemption through a separate notice. Because these products are not currently sold in the approved form, no significant economic impact is anticipated.

Food and Drug Administration (FDA)

Final Rule Stage

273. Postmarketing Safety Reporting Requirements for Human Drug and Biological Products

Legal Authority: 42 U.S.C. 216; 42 U.S.C. 241; 42 U.S.C. 242a; 42 U.S.C. 262 and 263; 42 U.S.C. 263a to 263n; 42 U.S.C. 264; 42 U.S.C. 300aa; 21 U.S.C. 321; 21 U.S.C. 331; 21 U.S.C. 351 to 353; 21 U.S.C. 355; 21 U.S.C. 360; 21 U.S.C. 360b to 360j; 21 U.S.C. 361a; 21 U.S.C. 371; 21 U.S.C. 374; 21 U.S.C. 375; 21 U.S.C. 379e; 21 U.S.C. 381

Abstract: The final rule would amend the postmarketing expedited and periodic safety reporting regulations for human drugs and biological products to revise certain definitions and reporting

formats as recommended by the International Council on Harmonisation and to define new terms; to add to or revise current reporting requirements; to revise certain reporting time frames; and to propose other revisions to these regulations to enhance the quality of safety reports received by FDA. These revisions were proposed as part of a single rulemaking (68 FR 12406) to clarify and revise both premarketing and postmarketing safety reporting requirements for human drug and biological products. Premarketing safety reporting requirements were finalized in a separate final rule published on September 29, 2010 (75 FR 59961). This final rule applies to postmarketing safety reporting requirements.

274. Medical Gas Containers and Closures; Current Good Manufacturing Practice Requirements

Legal Authority: 21 U.S.C. 321; 21 U.S.C. 351 to 21 U.S.C. 353

Abstract: The Food and Drug Administration is amending its current good manufacturing practice regulations and other regulations to clarify and strengthen requirements for the label, color, dedication, and design of medical gas containers and closures. Despite existing regulatory requirements and industry standards for medical gases, there have been repeated incidents in which cryogenic containers of harmful industrial gases have been connected to medical oxygen supply systems in hospitals and nursing homes and subsequently administered to patients. These incidents have resulted in death and serious injury. There have also been several incidents involving high-pressure medical gas cylinders that have resulted in death and injuries to patients. These amendments, together with existing regulations, are intended to ensure that the types of incidents that have occurred in the past, as well as other types of foreseeable and potentially deadly medical gas accidents, do not occur in the future. FDA has described a number of proposals in the proposed rule including requiring that gas use outlet connections on portable cryogenic medical gas containers be securely attached to the valve body.

278. General and Plastic Surgery Devices: Sunlamp Products

Legal Authority: 21 U.S.C. 360j(e)

Abstract: This rule would apply device restrictions to sunlamp products. The incidence of skin cancer, including melanoma, has been increasing, and a large number of skin cancer cases are attributable to the use of sunlamp products. The devices may cause about 400,000 cases of skin cancer per year, and 6,000 of which are melanoma. Beginning sunlamp product use at young ages, as well as frequently using sunlamp products, both increase the risk of developing skin cancers and other illnesses, and sustaining other injuries. Even infrequent use, particularly at younger ages, can significantly increase these risks.

Sunlamp products incorporate ultraviolet (UV) lamps and include devices such as UV tanning beds and booths. People who use sunlamp products are at increased risk of developing skin cancer and other illnesses, and sustaining injuries.

285. Food Labeling: Revision of the Nutrition and Supplement Facts Labels

Legal Authority: 21 U.S.C. 321; 21 U.S.C. 343; 21 U.S.C. 371

Abstract: FDA is amending the labeling regulations for conventional foods and dietary supplements to provide updated nutrition information on the label to assist consumers in maintaining healthy dietary practices. The rule will modernize the nutrition information found on the Nutrition Facts label, as well as the format and appearance of the label. On July 27, 2015, FDA issued a supplemental notice of proposed rulemaking accepting comments on limited additional provisions until October 13, 2015. Also on July 27, 2015, FDA reopened the comment period on the proposed rule as to specific documents until September 25, 2015. In addition, in response to requests for the raw data related to FDA's consumer studies on the nutrition label, FDA issued a notice on September 10, 2015 to make the raw data available for comment until October 13, 2015 and extended the comment period for the July 27, 2015 reopening as to specific documents to October 13, 2015. On October 20, 2015, FDA extended the comment period for the consumer studies and the supplemental proposal to October 23, 2015.

286. Food Labeling: Serving Sizes of Foods That Can Reasonably Be Consumed at One Eating Occasion; Dual-Column Labeling; Updating, Modifying, and Establishing Certain RACCS

Legal Authority: 21 U.S.C. 321; 21 U.S.C. 343; 21 U.S.C. 371; Pub. L. 101–535, sec. 2(b)(1)(A)

Abstract: FDA is amending its labeling regulations for foods to provide update, modify, and establish Reference Amounts Customarily Consumed (RACCs) for certain food categories. This rule would provide consumers with nutrition information based on the amount of food that is customarily consumed, which would assist consumers in maintaining healthy dietary practices. In addition to updating, modifying, and establishing certain RACCs, FDA is amending the definition of a single-serving containers; amending the label serving size for breath mints; and providing for dual-column labeling under certain circumstances, which would provide nutrition information per serving and per container or unit, as applicable; and making technical amendments to various aspects of the serving size regulations.

289. ''Tobacco Products'' Subject to the Federal Food, Drug, and Cosmetic Act, as Amended by the Family Smoking Prevention and Tobacco Control Act

Legal Authority: 21 U.S.C. 301 *et seq.;* The Federal Food, Drug, and Cosmetic Act; Pub. L. 111–31; The Family Smoking Prevention and Tobacco Control Act

Abstract: The Family Smoking Prevention and Tobacco Control Act (Tobacco Control Act) provides the Food and Drug Administration (FDA) authority to regulate cigarettes, cigarette tobacco, roll-your-own tobacco, and smokeless tobacco. The Federal Food, Drug, and Cosmetic Act (FD&C Act), as amended by the Tobacco Control Act, permits FDA to issue regulations deeming other tobacco products to be subject to the FD&C Act. This rule would deem additional products meeting the statutory definition of ''tobacco product'' to be subject to the FD&C Act, and would specify additional restrictions.

Final Rule Stage

294. Merit-Based Incentive Payment System (MIPS) and Alternative Payment Models (APMS) in Medicare Fee-for-Service (CMS–5517–FC) (Section 610 Review)

Legal Authority: Pub. L. 114–10, sec. 101

Abstract: This rule implements provisions of the Medicare Access and CHIP Reauthorization Act (MACRA) related to MIPS and APMs. Section 101 of MACRA authorizes a new MIPS, which repeals the Medicare sustainable growth rate and improves Medicare payments for physician services. MACRA consolidates the current programs of the Physician Quality Reporting System, the Value-Based Modifier, and the Electronic Health Records Incentive Program into one program, MIPS, that streamlines and improves on the three distinct incentive programs. Additionally, MACRA authorizes incentive payments for providers who participate in eligible APMs.

295. CY 2017 Home Health Prospective Payment System Rate Update; Home Health Value-Based Purchasing Model; and Home Health Quality Reporting Requirements (CMS–1648–F) (Section 610 Review)

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

Abstract: This annual rule updates the 60-day national episode rate, the national per-visit rates used to calculate low utilization payment adjustments (LUPAs), and outlier payments under the Medicare prospective payment system for home health agencies. The rule also updates the provisions of the Home Health Value-Based Purchasing (HHVBP) program.

297. CY 2017 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates (CMS–1656–FC) (Section 610 Review)

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh

Abstract: This annual rule revises the Medicare hospital outpatient prospective payment system to implement statutory requirements and changes arising from our continuing experience with this system. The rule describes changes to the amounts and factors used to determine payment rates for services. In addition, the rule changes the ambulatory surgical center payment system list of services and rates.

298. Conditions of Participation for Home Health Agencies (CMS–3819–F) (Rulemaking Resulting From a Section 610 Review)

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395x; 42 U.S.C. 1395cc(a); 42 U.S.C. 1395hh; 42 U.S.C. 1395bb

Abstract: This final rule revises the conditions of participation (CoPs) that home health agencies (HHAs) must meet in order to participate in the Medicare and Medicaid programs. The requirements focus on the care delivered to patients by HHAs, reflect an interdisciplinary view of patient care, allow HHAs greater flexibility in meeting quality care standards, and eliminate unnecessary procedural requirements. These changes are an integral part of our overall effort to achieve broad-based, measurable improvements in the quality of care furnished through the Medicare and Medicaid programs, while at the same time eliminating unnecessary procedural burdens on providers.

299. Hospital and Critical Access Hospital (CAH) Changes To Promote Innovation, Flexibility, and Improvement in Patient Care (CMS–3295–F) (Rulemaking Resulting From a Section 610 Review)

Legal Authority: 42 U.S.C. 1302; 42 U.S.C. 1395hh and 1395rr

Abstract: These proposed changes would modernize hospital and critical access hospital (CAH) requirements, improve quality of care, and support HHS and CMS priorities. Specifically, we proposed to revise the conditions of participation (CoPs) for hospitals and CAHs to address: Discriminatory behavior by healthcare providers that may create real or perceived barriers to care; Use of the term ''Licensed Independent Practioners'' (LIPs) that may inadvertently exacerbate workforce shortage concerns; Requirements that do not fully conform to current standards for infection control; Requirements for antibiotic stewardship programs to help reduce inappropriate antibiotic use and antimicrobial resistance; and the use of quality reporting program data by hospital Quality Assessment and Performance Improvement (QAPI) programs.

300. Imaging Accreditation (CMS–3309–P) (Section 610 Review)

Legal Authority: 42 U.S.C. 1395hh; 42 U.S.C. 1102

Abstract: This proposed rule would establish standards for Imaging Accreditation. These proposed standards would address qualifications for clinical personnel, standards to ensure that suppliers have established policies and procedures governing the use of equipment in furnishing the technical component of advanced diagnostic imaging, and the establishment and maintenance of a quality assurance and quality control program to ensure reliability, clarity, and accuracy of the diagnostic images.

Abstract: This final rule revises the requirements that long-term care facilities must meet to participate in the Medicare and Medicaid programs. These changes are necessary to reflect the substantial advances that have been made over the past several years in the theory and practice of service delivery and safety. The revisions are an integral part of our efforts to achieve broad-based improvements both in the quality of health care furnished through federal programs, and in patient safety, while at the same time reducing procedural burdens on providers.

305. Medicare Shared Savings Program; Accountable Care Organizations (ACOS)—Revised Benchmark Rebasing Methodology (CMS–1644–F) (Completion of a Section 610 Review)

Legal Authority: Pub. L. 111–148 sec. 3022

Abstract: Under the Medicare Shared Savings Program, providers of services and suppliers that participate in an ACO continue to receive traditional Medicare fee-for-service (FFS) payments under parts A and B, but the ACO may be eligible to receive a shared savings payment if it meets specified quality and savings requirements. This rule addresses changes to the Shared Savings Program that modify the program's benchmark rebasing methodology to encourage ACOs' continued investment in care coordination and quality improvement, and identifies publicly available data to support modeling and analysis of these changes. In addition, it streamlines the methodology used to adjust an ACO's historical benchmark for changes in its ACO participant composition, offers an alternative participation option to encourage ACOs to enter performance-based risk arrangements earlier in their participation under the program, and establishes policies for reopening of payment determinations to make corrections after financial calculations have been performed and ACO shared savings and shared losses for a performance year have been determined.

FEDERAL REGISTER

Vol. 81 Friday,
No. 247 December 23, 2016

Part IX

Department of Homeland Security

Office of the Secretary

Semiannual Regulatory Agenda

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

6 CFR Chs. I and II

[DHS Docket No. OGC–RP–04–001]

Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Office of the Secretary, DHS.

ACTION: Semiannual regulatory agenda.

SUMMARY: This regulatory agenda is a semiannual summary of current and projected rulemakings, existing regulations, and completed actions of the Department of Homeland Security (DHS) and its components. This agenda provides the public with information about DHS's regulatory activity. DHS expects that this information will enable the public to be more aware of, and effectively participate in, the Department's regulatory activity. DHS invites the public to submit comments on any aspect of this agenda.

FOR FURTHER INFORMATION CONTACT:

General

Please direct general comments and inquiries on the agenda to the Regulatory Affairs Law Division, Office of the General Counsel, U.S. Department of Homeland Security, 245 Murray Lane, Mail Stop 0485, Washington, DC 20528–0485.

Specific

Please direct specific comments and inquiries on individual regulatory actions identified in this agenda to the individual listed in the summary of the regulation as the point of contact for that regulation.

SUPPLEMENTARY INFORMATION: DHS provides this notice pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, Sept. 19, 1980) and Executive Order 12866 ''Regulatory Planning and Review'' (Sept. 30, 1993) as incorporated in Executive Order 13563 ''Improving Regulation and Regulatory Review'' (Jan. 18, 2011), which require the Department to publish a semiannual agenda of regulations. The regulatory agenda is a summary of current and projected rulemakings as well as actions completed since the publication of the last regulatory agenda for the Department. DHS last published its semiannual regulatory agenda on June 9, 2016 at 81 FR 37308.

Beginning in fall 2007, the Internet became the basic means for disseminating the Unified Agenda of Federal Regulatory and Deregulatory Actions (''Unified Agenda''). The complete Unified Agenda is available online at *www.reginfo.gov.* As required by law, however, DHS still prints various items in the **Federal Register**.

Executive Order 12866 requires Federal agencies to prepare a Regulatory Plan of the most important significant regulatory actions that the agency reasonably expects to issue in proposed or final form in that fiscal year or thereafter. As in past years, for fall editions of the semiannual regulatory agenda, Federal agencies print the entire Regulatory Plan in the **Federal Register**.

The Regulatory Flexibility Act (5 U.S.C. 602) requires Federal agencies to publish their regulatory flexibility agendas in the **Federal Register**. The law provides that a regulatory flexibility agenda shall contain, among other things, a brief description of the subject area of any rule that is likely to have a significant economic impact on a substantial number of small entities. In accordance with the publication requirements of the Regulatory Flexibility Act, DHS prints those regulatory actions that are part of DHS's regulatory flexibility agenda in the **Federal Register**.

DHS's semiannual agenda conforms to the Unified Agenda format developed by the Regulatory Information Service Center.

Dated: September 2, 2016.

Christina E. McDonald,

Associate General Counsel for Regulatory Affairs.

309. Ammonium Nitrate Security Program

Legal Authority: Pub. L. 110–161, 2008 Consolidated Appropriations Act, section 563

Abstract: This rulemaking will implement the December 2007 amendment to the Homeland Security Act entitled ''Secure Handling of Ammonium Nitrate.'' The amendment requires the Department of Homeland Security to ''regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility . . . to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.''

312. U.S. Citizenship and Immigration Services Fee Schedule

Legal Authority: 8 U.S.C. 1356(m)

Abstract: This rule will adjust the fee schedule for U.S. Citizenship and Immigration Services (USCIS) immigration and naturalization benefit applications and petitions, including nonimmigrant applications and visa petitions. These fees fund the cost of processing applications and petitions for immigration benefits and services, and USCIS' associated operating costs. USCIS is revising these fees because the current fee schedule does not adequately recover the full costs of services provided by USCIS. Without an adjustment of the fee schedule, USCIS cannot provide adequate capacity to process all applications and petitions in a timely and efficient manner. The fee review is undertaken pursuant to the requirements of the Chief Financial Officers Act of 1990 (CFO Act), 31 U.S.C. 901–03. The CFO Act requires each agency's chief financial officer (CFO) to ''review, on a biennial basis, the fees, royalties, rents, and other charges imposed by the agency for services and things of value it provides, and make recommendations on revising those charges to reflect costs incurred by it in providing those services and things of value.''

315. Numbering of Undocumented Barges

Legal Authority: 46 U.S.C. 12301

Abstract: Title 46 U.S.C. 12301, as amended by the Abandoned Barge Act of 1992, requires that all undocumented barges of more than 100 gross tons operating on the navigable waters of the United States be numbered. This rulemaking would establish a numbering system and user fees for an original or renewed Certificate of Number for these barges. The numbering of undocumented barges allows the Coast Guard to identify the owners of abandoned barges. This rulemaking supports the Coast Guard's broad role and responsibility of protecting natural resources.

316. Outer Continental Shelf Activities

Legal Authority: 43 U.S.C. 1333(d)(1); 43 U.S.C. 1348(c); 43 U.S.C. 1356; DHS Delegation No 0170.1

Abstract: The Coast Guard is the lead Federal agency for workplace safety and health on facilities and vessels engaged in the exploration for, or development, or production of, minerals on the Outer Continental Shelf (OCS), other than for matters generally related to drilling and production that are regulated by the Bureau of Safety and Environmental Enforcement (BSEE). This project would revise the regulations on OCS activities by: (1) Adding new requirements, for OCS units for lifesaving, fire protection, training, and helidecks; (2) providing for USCG acceptance and approval of specified classification society plan reviews, inspections, audits, and surveys; and (3) requiring foreign vessels engaged in OCS activities to comply with rules similar to those imposed on U.S. vessels similarly engaged. This project would affect the owners and operators of facilities and vessels engaged in offshore activities.

Abstract: The Coast Guard is establishing electronic card reader requirements for maritime facilities and vessels to be used in combination with TSA's Transportation Worker Identification Credential (TWIC). Congress enacted several statutory requirements within the Security and Accountability for Every (SAFE) Port Act of 2006 to guide regulations pertaining to TWIC readers, including the need to evaluate TSA's final pilot program report as part of the TWIC reader rulemaking. During the rulemaking process, we took into account the final pilot data and the various conditions in which TWIC readers may be employed. For example, we considered the types of vessels and facilities that will use TWIC readers, locations of secure and restricted areas, operational constraints, and need for accessibility. Recordkeeping requirements, amendments to security plans, and the requirement for data exchanges (*i.e.,* Canceled Card List) between TSA and vessel or facility owners/operators were also addressed in this rulemaking.

318. Updates to Maritime Security

Legal Authority: 33 U.S.C. 1226; 33 U.S.C. 1231; 46 U.S.C. 701; 50 U.S.C. 191 and 192; E.O. 12656; 33 CFR 1.05–1; 33 CFR 6.04–11; 33 CFR 6.14; 33 CFR 6.16; 33 CFR 6.19; DHS Delegation No. 0170.1

Abstract: The Coast Guard proposes certain additions, changes, and amendments to 33 CFR subchapter H. Subchapter H is comprised of parts 101 through 106. Subchapter H implements the major provisions of the Maritime Transportation Security Act of 2002 (MTSA). This rulemaking is the first major revision to subchapter H. The proposed changes would further the goals of domestic compliance and international cooperation by incorporating requirements from legislation implemented since the original publication of these regulations, such as the Security and Accountability for Every (SAFE) Port Act of 2006, and including international standards such as Standards of Training, Certification & Watchkeeping security training. This rulemaking has international interest because of the close relationship between subchapter H and the International Ship and Port Security Code (ISPS).

DEPARTMENT OF HOMELAND SECURITY (DHS)

U.S. Customs and Border Protection (USCBP)

Final Rule Stage

320. Implementation of the Guam-CNMI Visa Waiver Program (Section 610 Review)

Legal Authority: Pub. L. 110–229, sec. 702

Abstract: The interim final rule (or the final rule planned for the coming year) amends Department of Homeland Security (DHS) regulations to implement section 702 of the Consolidated Natural Resources Act of 2008 (CNRA). This law extends the immigration laws of the United States to the Commonwealth of the Northern Mariana Islands (CNMI) and provides for a joint visa waiver program for travel to Guam and the CNMI. This rule implements section 702 of the CNRA by amending the regulations to replace the current Guam Visa Waiver Program with a new Guam-CNMI Visa Waiver Program. The amended regulations set forth the requirements for nonimmigrant visitors who seek admission for business or pleasure and solely for entry into and stay on Guam or the CNMI without a visa. This rule also establishes six ports of entry in the CNMI for purposes of administering and enforcing the Guam-CNMI Visa Waiver Program. Section 702 of the Consolidated Natural Resources Act of 2008 (CNRA), subject to a transition period, extends the immigration laws of the United States to the Commonwealth of the Northern Mariana Islands (CNMI) and provides for a visa waiver program for travel to Guam and/or the CNMI. On January 16, 2009, the Department of Homeland Security (DHS), Customs and Border Protection (CBP), issued an interim final rule in the **Federal Register** replacing the then-existing Guam Visa Waiver Program with the Guam-CNMI Visa Waiver Program and setting forth the requirements for nonimmigrant visitors seeking admission into Guam and/or the CNMI under the Guam-CNMI Visa Waiver Program. As of November 28, 2009, the Guam-CNMI Visa Waiver Program is operational. This program allows nonimmigrant visitors from eligible countries to seek admission for business or pleasure for entry into Guam and/or the CNMI without a visa for a period of authorized stay not to exceed 45 days. This rulemaking would finalize the January 2009 interim final rule.

321. Waiver of Passport and Visa Requirements Due to an Unforeseen Emergency

Legal Authority: 212(a)(7)(B) INA 8 U.S.C. 1182(a)(7)

Abstract: This rule proposes to reinstate a 1996 amendment to 8 CFR 212.1(g) regarding a waiver of documentary requirements for nonimmigrants seeking admission to the United States. The 1996 amendment allowed the former Immigration and Naturalization Service (INS) to waive passport and visa requirements due to an unforeseen emergency while preserving its ability to fine carriers for unlawfully transporting aliens to the United States who do not have a valid passport or visa. On November 20, 2009, the United States Court of Appeals for the Second Circuit invalidated the 1996 amendment based on procedural grounds.

322. Importer Security Filing and Additional Carrier Requirements (Section 610 Review)

Legal Authority: Pub. L. 109–347, sec. 203; 5 U.S.C. 301; 19 U.S.C. 66; 19 U.S.C. 1431; 19 U.S.C. 1433 to 1434; 19 U.S.C. 1624; 19 U.S.C. 2071 (note); 46 U.S.C. 60105

Abstract: This final rule implements the provisions of section 203 of the Security and Accountability for Every Port Act of 2006. On November 25, 2008, Customs and Border Protection (CBP) published an interim final rule

(CBP Dec. 08–46) in the **Federal Register** (73 FR 71730), that finalized most of the provisions proposed in the NPRM. It requires carrier and importers to provide to CBP, via a CBP approved electronic data interchange system, certain advance information pertaining to cargo brought into the United States by vessel to enable CBP to identify high-risk shipments to prevent smuggling and ensure cargo safety and security. The interim final rule did not finalize six data elements that were identified as areas of potential concern for industry during the rulemaking process and, for which, CBP provided some type of flexibility for compliance with those data elements. CBP solicited public comment on these six data elements, is conducting a structured review, and also invited comments on the revised Regulatory Assessment and Final Regulatory Flexibility Analysis. (See 73 FR 71782–85 for regulatory text and 73 CFR 71733–34 for general discussion.) The remaining requirements of the rule were adopted as final. CBP plans to issue a final rule after CBP completes a structured review of the flexibilities and analyzes the comments.

Abstract: On October 30, 2008, the Transportation Security Administration (TSA) issued a notice of proposed rulemaking (NPRM), proposing to amend current aviation transportation security regulations to enhance the security of general aviation by expanding the scope of current requirements, and by adding new requirements for certain large aircraft operators and airports serving those aircraft. TSA also proposed that all aircraft operations, including corporate and private charter operations, with aircraft having a maximum certificated takeoff weight (MTOW) above 12,500 pounds (large aircraft) be required to adopt a large aircraft security program. TSA also proposed to require certain airports that serve large aircraft to adopt security programs. TSA is considering publishing a supplemental NPRM (SNPRM) in response to comments received on the NPRM.

325. Standardized Vetting, Adjudication, and Redress Services

Legal Authority: 49 U.S.C. 114, 5103A, 44903 and 44936; 46 U.S.C. 70105; 6 U.S.C. 469; Pub. L. 110–53, secs 1411, 1414, 1520, 1522 and 1531

Abstract: Aspects of this rulemaking will be incorporated into other agency rulemaking. Accordingly, TSA is withdrawing this rulemaking.

The Transportation Security Administration (TSA) intends to propose new regulations to revise and standardize the procedures, adjudication criteria, and fees for most of the security threat assessments (STA)

of individuals for which TSA is responsible. The scope of the rulemaking will include transportation workers who are required to undergo an STA, including surface, maritime, and aviation workers. TSA will comply with certain vetting-related requirements of the Implementing Recommendations of the 9/11 Commission Act, Pub. L. 110–53 (Aug. 3, 2007). TSA will propose fees to cover the cost of all STAs. TSA plans to improve the processing of STAs and streamline existing regulations by simplifying language and removing redundancies. TSA will propose revisions to the Alien Flight Student Program (AFSP) regulations. TSA published an interim final rule for AFSP on September 20, 2004. TSA regulations require aliens seeking to train at Federal Aviation Administration-regulated flight schools to complete an application and undergo an STA prior to beginning flight training. There are four categories under which students currently fall; the nature of the STA depends on the student's category. TSA is considering changes to the AFSP that would improve the equity among fee payers and enable the implementation of new technologies to support vetting.

U.S. Immigration and Customs Enforcement (USICE)

Proposed Rule Stage

326. Procedures and Standards for Declining Immigration Surety Bonds and Appeal Requirement for Breaches

Legal Authority: 8 U.S.C. 1103

Abstract: The U.S. Immigration and Customs Enforcement (ICE) proposes to set forth standards and procedures ICE will follow before making a determination to stop accepting immigration bonds posted by a surety company that has been certified to issue bonds by the Department of the Treasury. Treasury administers the Federal corporate surety program and, in its current regulations, allows agencies to prescribe ''for cause'' standards and procedures for declining to accept bonds from Treasury-certified sureties. ICE would also require surety companies seeking to overturn a breach determination to file an administrative appeal raising all legal and factual defenses in this appeal.

Department of Housing and Urban Development

Semiannual Regulatory Agenda

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Subtitles A and B

[Docket No. FR–5935–N–02]

Semiannual Regulatory Agenda

AGENCY: Department of Housing and Urban Development.

ACTION: Semiannual regulatory agenda.

SUMMARY: In accordance with section 4(b) of Executive Order 12866, ''Regulatory Planning and Review,'' as amended, HUD is publishing its agenda of regulations already issued or that are expected to be issued during the next several months. The agenda also includes rules currently in effect that are under review and describes those regulations that may affect small entities, as required by section 602 of the Regulatory Flexibility Act. The purpose of publication of the agenda is to encourage more effective public participation in the regulatory process by providing the public with advance information about pending regulatory activities.

FOR FURTHER INFORMATION CONTACT: Aaron Santa Anna, Assistant General Counsel for Regulations, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0500; telephone number 202–708–3055. (This is not a toll-free number.) A telecommunications device for hearing- and speech-impaired individuals (TTY) is available at 800–877–8339 (Federal Relay Service).

SUPPLEMENTARY INFORMATION: Executive Order 12866, ''Regulatory Planning and Review'' (58 FR 51735), as amended, requires each department or agency to prepare semiannually an agenda of: (1) Regulations that the department or agency has issued or expects to issue, and; (2) rules currently in effect that are under departmental or agency review. The Regulatory Flexibility Act (5 U.S.C. 601–612) requires each department or agency to publish semiannually a regulatory agenda of rules expected to be proposed or promulgated that are likely to have a significant economic impact on a substantial number of ''small entities,'' meaning small businesses, small organizations, or small governmental jurisdictions. Executive Order 12866 and the Regulatory Flexibility Act permit incorporation of the agenda required by these two authorities with any other prescribed agenda.

HUD's regulatory agenda combines the information required by Executive Order 12866 and the Regulatory Flexibility Act. As in the past, HUD's complete Unified Agenda will be available online at *www.reginfo.gov,* in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

The Department is subject to certain rulemaking requirements set forth in the Department of Housing and Urban Development Act (42 U.S.C. 3531 *et seq.*). Section 7(o) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)) requires that the Secretary transmit to the congressional committees having jurisdictional oversight of HUD (the Senate Committee on Banking, Housing, and Urban Affairs and the House Committee on Financial Services), a semiannual agenda of all rules or regulations that are under development or review by the Department. A rule appearing on the agenda cannot be published for comment before or during the first 15 calendar days after transmittal of the agenda. Section 7(o) provides that if, within that period, either committee notifies the Secretary that it intends to review any rule or regulation that appears on the agenda, the Secretary must submit to both committees a copy of the rule or regulation, in the form that it is intended to be proposed, at least 15 calendar days before it is to be published for comment. The semiannual agenda posted on *www.reginfo.gov* is the agenda transmitted to the committees in compliance with the above requirements.

HUD has attempted to list in this agenda all regulations and regulatory reviews pending at the time of publication, except for minor and routine or repetitive actions, but some may have been inadvertently omitted, or may have arisen too late to be included in the published agenda. There is no legal significance to the omission of an item from this agenda. Also, where a date is provided for the next rulemaking action, the date is an estimate and is not a commitment to act on or by the date shown.

In some cases, HUD has withdrawn rules that were placed on previous agendas for which there has been no publication activity. Withdrawal of a rule does not necessarily mean that HUD will not proceed with the rulemaking. Withdrawal allows HUD to assess the subject matter further and determine whether rulemaking in that area is appropriate. Following such an assessment, the Department may determine that certain rules listed as withdrawn under this agenda are appropriate. If that determination is made, such rules will be included in a succeeding semiannual agenda.

In addition, for a few rules that have been published as proposed or interim rules and which, therefore, require further rulemaking, HUD has identified the timing of the next action stage as ''undetermined.'' These are rules that are still under review by HUD for which a determination and timing of the next action stage have not yet been made.

Since the purpose of publication of the agenda is to encourage more effective public participation in the regulatory process by providing the public with early information about the Department's future regulatory actions, HUD invites all interested members of the public to comment on the rules listed in the agenda.

Dated: August 31, 2016.

Tonya Robinson,

Principal Deputy General Counsel.

OFFICE OF HOUSING—PROPOSED RULE STAGE

Sequence No.	Title	Regulation Identifier No.
329	24 CFR 3280 Manufactured Home Construction and Safety Standards (FR–5739)	2502–AJ34
330	24 CFR 3282 Manufactured Housing Program: Minimum Payments to the States (FR–5848)	2502–AJ37

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

Office of Housing (OH)

Proposed Rule Stage

329. Manufactured Home Construction and Safety Standards (FR–5739)

Legal Authority: 42 U.S.C. 5401 *et seq.;* 42 U.S.C. 3535(d)

Abstract: This proposed rule would amend the Federal Manufactured Home Construction and Safety Standards by adopting certain recommendations made to HUD by the Manufactured Housing Consensus Committee (MHCC). The National Manufactured Housing Construction and Safety Standards Act of 1974 (the Act) requires HUD to publish all proposed revised construction and safety standards submitted by the MHCC. This proposed rule is based on the third set of MHCC recommendations to update and improve various aspects of the Manufactured Housing Construction and Safety Standards. HUD has reviewed those proposals and has made several editorial revisions to the proposals which were reviewed and accepted by the MHCC. This rule proposes to add new standards that would establish requirements for carbon monoxide detection, stairways, fire safety considerations for attached garages, and for draftstops when there is a usable space above and below the concealed space of a floor/ceiling assembly and would establish requirements for venting systems to ensure that proper separation is maintained between the air intake and exhaust systems.

RIN: 2502–AJ34

330. • Manufactured Housing Program: Minimum Payments to the States (FR–5848)

Legal Authority: 42 U.S.C. 4501; 42 U.S.C. 5401 *et seq.;* 42 U.S.C. 35359(d)

Abstract: This proposed rule would revise the minimum payments to States approved as State Administrative Agencies (SAAs) under the National Manufactured Housing Construction and Safety Standards Act of 1974 in order to provide for a more equitable guarantee of minimum funding from HUD's appropriation for this program and to avoid the differing per unit payments to the States that have occurred under the present rule. This rule would base the minimum payments to States upon their participation in production or siting of new manufactured homes, including for new manufactured homes both produced and sited in the same State.

Semiannual Regulatory Agenda

AGENCY: Office of the Secretary, Interior.

ACTION: Semiannual regulatory agenda.

SUMMARY: This notice provides the unified agenda of rules scheduled for review or development between fall 2016 and fall 2017. The Regulatory Flexibility Act and Executive Order 12866 require publication of the agenda.

ADDRESSES: Unless otherwise indicated, all agency contacts are located at the Department of the Interior, 1849 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: You should direct all comments and inquiries to the about these rules to the appropriate agency contact. You should direct general comments relating to the agenda to the Office of Executive Secretariat and Regulatory Affairs, Department of the Interior, at the address above or at 202–208–3181.

SUPPLEMENTARY INFORMATION: With this publication, the Department satisfies the requirement of Executive Order 12866 that the Department publish an agenda of rules that we have issued or expect to issue and of currently effective rules that we have scheduled for review.

Simultaneously, the Department meets the requirement of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) to publish an agenda in April and October of each year identifying rules that will have significant economic effects on a substantial number of small entities. We have specifically identified in the agenda rules that will have such effects.

This edition of the Unified Agenda of Federal Regulatory and Deregulatory Actions includes The Regulatory Plan, which appears in both the online Unified Agenda and in part II of the **Federal Register** that includes the Unified Agenda. The Department's Statement of Regulatory Priorities is included in the Plan.

Mark Lawyer,

Federal Register Liaison Officer.

DEPARTMENT OF THE INTERIOR (DOI)

Bureau of Safety and Environmental Enforcement (BSEE)

Proposed Rule Stage

331. Cost Recovery Adjustment

Legal Authority: 31 U.S.C. 9701

Abstract: This rule would update 31 cost recovery fees to allow the Bureau of Safety and Environmental Enforcement to recover the full costs of the services it provides to the oil and gas industry. It complies with the Independent Office Appropriations Act of 1952 which established that government services should be self-sustaining to the extent possible. Rulemaking is the only method available to update these fees and comply with the intent of Congress to recover government costs when a special benefit is bestowed on an identifiable recipient. The practice of cost recovery is well-established and this rulemaking is not expected to be controversial.

332. Production Safety Systems and Lifecycle Analysis

Legal Authority: 31 U.S.C. 9701; 43 U.S.C. 1334

Abstract: The Bureau of Safety and Environmental Enforcement (BSEE) will amend and update the regulations regarding offshore oil and natural gas production. It will address issues such as production safety systems, subsurface safety devices, and safety device testing. BSEE has expanded the rule to differentiate the requirements for operating dry tree and wet tree production systems on the Outer Continental Shelf (OCS). This rule will also expand use of life cycle analysis of critical equipment.

Proposed Rule Stage

334. Migratory Bird Permits; Incidental Take of Migratory Birds

Legal Authority: 16 U.S.C. 703 to 712; 42 U.S.C. 4321 *et seq.*

Abstract: We are preparing a programmatic environmental impact statement (PEIS) pursuant to the National Environmental Policy Act of 1969 (NEPA) to evaluate the potential environmental impacts of a proposal to authorize incidental take of migratory birds under the Migratory Bird Treaty Act (16 U.S.C. 703 to 711). In drafting the PEIS, we invited input from other Federal and State agencies, tribes, nongovernmental organizations, and members of the public on the scope of the proposed NEPA analysis, the pertinent issues we should address, and alternatives to our proposed approach for authorizing incidental take. Based on this PEIS, we propose to establish regulations to govern the incidental take of migratory birds from activities under

which migratory birds are killed incidental to otherwise lawful activities. These proposed regulations will establish rules for individual permits and programmatic agreements with Federal agencies and will establish the basis for future rulemaking for general authorizations for incidental take of migratory birds.

335. • Migratory Bird Hunting; 2018–2019 Migratory Game Bird Hunting Regulations

Legal Authority: 16 U.S.C. 703 to 711; 16 U.S.C. 742a–j

Abstract: We propose to establish annual hunting regulations for certain migratory game birds for the 2018–2019 hunting season. We annually prescribe outside limits (frameworks), within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–2019 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2018 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.

Abstract: We anticipate publishing regulations that ensure that all operators conducting oil or gas operations within a National Wildlife Refuge System unit do so in a manner that prevents or minimizes damage to National Wildlife Refuge System resources, visitor values, and management objectives. These regulations will not result in a taking of a property interest, but rather to impose reasonable controls on operations that affect federally owned or controlled lands, and/or waters.

337. Non-Federal Oil and Gas Rights

Legal Authority: 54 U.S.C. 100101; 54 U.S.C. 100301; 54 U.S.C. 100302; 54 U.S.C. 100731; 54 U.S.C. 100732

Abstract: This rule would update National Park Service (NPS) regulations governing the exercise of non-Federal oil and gas rights within NPS unit boundaries outside of Alaska. It would accommodate new technology and industry practices, eliminate regulatory exemptions, update requirements, remove caps on bond amounts, and allow NPS to recover administrative costs. The changes make the regulations more effective and efficient and maintain the highest level of protection compatible with park resources and values.

339. Waste Prevention, Production Subject to Royalties, and Resource Conservation

Legal Authority: 25 U.S.C. 396d; 25 U.S.C. 2107; 30 U.S.C. 189; 30 U.S.C. 306; 30 U.S.C. 359; 30 U.S.C. 1751; 43 U.S.C. 1732(b); 43 U.S.C. 1733; 43 U.S.C. 1740

Abstract: The rule would update decades-old standards to reduce wasteful venting, flaring, and leaks of natural gas from onshore wells located on Federal and Indian oil and gas leases. The proposed standards would establish requirements and incentives to reduce waste of gas and clarify when royalties apply to lost gas. This action will enhance our energy security and economy by boosting America's natural gas supplies, ensuring that taxpayers receive the royalties due to them from development of public resources, and reducing emissions.

SUMMARY: The Department of Justice is publishing its fall 2016 regulatory agenda pursuant to Executive Order 12866, ''Regulatory Planning and Review,'' 58 FR 51735, and the Regulatory Flexibility Act, 5 U.S.C. 601 to 612 (1988).

FOR FURTHER INFORMATION CONTACT: Robert Hinchman, Senior Counsel, Office of Legal Policy, Department of Justice, Room 4252, 950 Pennsylvania Avenue NW., Washington, DC 20530, (202) 514–8059.

SUPPLEMENTARY INFORMATION: This edition of the Unified Agenda of Federal Regulatory and Deregulatory Actions includes The Regulatory Plan, which appears in both the online Unified Agenda and in part II of the **Federal Register** that includes the Unified Agenda. The Department of Justice's Statement of Regulatory Priorities is included in the Plan.

Beginning with the fall 2007 edition, the Internet has been the basic means for disseminating the Unified Agenda. The complete Unified Agenda will be available online at *www.reginfo.gov* in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), the Department of Justice's printed agenda entries include only:

Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and any rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet. In addition, for fall editions of the Agenda, the entire Regulatory Plan will continue to be printed in the **Federal Register**, as in past years, including the Department of Justice's regulatory plan.

Dated: September 6, 2016.

Jonathan J. Wroblewski,

Principal Deputy Assistant Attorney General, Office of Legal Policy.

29 CFR Subtitle A and Chs. II, IV, V, XVII, and XXV

30 CFR Ch. I

41 CFR Ch. 60

48 CFR Ch. 29

Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Labor.

ACTION: Semiannual Regulatory Agenda.

SUMMARY: The Internet has become the means for disseminating the entirety of the Department of Labor's semiannual regulatory agenda. However, the Regulatory Flexibility Act requires publication of a regulatory flexibility agenda in the **Federal Register**. This **Federal Register** Notice contains the regulatory flexibility agenda.

FOR FURTHER INFORMATION CONTACT: Stephanie Swirsky, Deputy Assistant Secretary, Office of Regulatory Policy, Office of the Assistant Secretary for Policy, U.S. Department of Labor, 200 Constitution Avenue NW., Room S–2312, Washington, DC 20210; (202) 693–5959.

Note: Information pertaining to a specific regulation can be obtained from the agency contact listed for that particular regulation.

SUPPLEMENTARY INFORMATION: Executive Order 12866 requires the semiannual publication of an agenda of regulations that contains a listing of all the regulations the Department of Labor expects to have under active consideration for promulgation, proposal, or review during the coming one-year period. The entirety of the Department's semiannual agenda is available online at *www.reginfo.gov.*

The Regulatory Flexibility Act (5 U.S.C. 602) requires DOL to publish in the **Federal Register** a regulatory flexibility agenda. The Department's Regulatory Flexibility Agenda published with this notice, includes only those rules on its semiannual agenda that are likely to have a significant economic impact on a substantial number of small entities; and those rules identified for periodic review in keeping with the requirements of section 610 of the Regulatory Flexibility Act. Thus, the regulatory flexibility agenda is a subset of the Department's semiannual regulatory agenda. There is only one section 610 item on the Department of Labor's Regulatory Flexibility Agenda:

Occupational Safety and Health Administration

Bloodborne Pathogens (RIN 1218–AC34)

In addition, the Department's Regulatory Plan, also a subset of the Department's regulatory agenda, is being published in the **Federal Register**. The Regulatory Plan contains a statement of the Department's regulatory priorities and the regulatory actions the Department wants to highlight as its most important and significant.

All interested members of the public are invited and encouraged to let departmental officials know how our regulatory efforts can be improved, and are invited to participate in and comment on the review or development of the regulations listed on the Department's agenda.

Thomas E. Perez,

Secretary of Labor.

343. Discrimination on the Basis of Sex

Legal Authority: Sec. 201, E.O. 11246, 30 FR 12319 and E.O. 11375, 32 FR 14303, as amended by E.O. 12086

Abstract: The Office of Federal Contract Compliance Programs (OFCCP) is charged with enforcing Executive Order 11246, as amended, which prohibits Federal Government contractors and subcontractors from discriminating against individuals in employment on the basis of race, color, sex, sexual orientation, gender identity, religion, or national origin, and requires them to take affirmative action. This order also prohibits discrimination based on an employee discussing his or her pay or the pay of a coworker. OFCCP regulations at 41 CFR part 60–20 set forth the interpretations and guidelines for implementing Executive Order 11246, as amended, in regard to promoting and ensuring equal opportunities for all persons employed or seeking employment with Government contractors and subcontractors without regard to sex. This nondiscrimination requirement also applies to contractors and subcontractors performing under federally assisted construction contracts. The guidance in part 60–20 is more than 30 years old, and warranted changes that align OFCCP's requirements with current law and better address the realities of today's workplaces. OFCCP published a Notice of Proposed Rulemaking on January 30, 2015 (80 FR 5245), to create sex discrimination regulations that reflect the current state of the law in this area. OFCCP published the Discrimination on the Basis of Sex Final Rule on June 14, 2016 (81 FR 39107). The Final Rule becomes effective August 15, 2016.

Completed Actions

344. Defining and Delimiting the Exemptions for Executive, Administrative, Professional, Outside Sales, and Computer Employees

Legal Authority: 29 U.S.C. 213(a)(1) (Fair Labor Standards Act)

Abstract: The Department proposes to update the regulations governing which executive, administrative, and professional employees (white collar workers) are entitled to the Fair Labor Standards Act's minimum wage and overtime pay protections. Key provisions of the proposed rule include: (1) Setting the standard salary level required for exemption for full-time salaried workers; (2) increasing the total annual compensation requirement needed to exempt highly compensated employees; and (3) establishing a

mechanism for automatically updating the salary and compensation levels going forward to ensure that they will continue to provide a useful and effective test for exemption. The Department last updated these regulations in 2004, which, among other items, set the standard salary level at not less than $455 per week.

345. Establishing Paid Sick Leave for Contractors, Executive Order 13706

Legal Authority: E.O. 13706

Abstract: Executive Order 13706, Establishing Paid Sick Leave for Federal Contractors (80 FR 54697) establishes paid sick leave for Federal contractors and subcontractors. The Executive order indicates that Executive Departments and agencies shall, to the extent permitted by law, ensure that new contracts, contract-like instruments, and solicitations as described in section 6 of the order, include a clause, which the contractor and any subcontractors shall incorporate into lower-tier subcontracts, specifying that all employees, in the performance of the contract or any subcontract thereunder, shall earn not less than one hour of paid sick leave for every 30 hours worked. Consistent with the Executive order, the Department of Labor will issue implementing regulations.

Proposed Rule Stage

346. Modernizing the Permanent Labor Certification Program (PERM)

Legal Authority: 8 U.S.C. 1182(a)(5)(A)

Abstract: The PERM regulations govern the labor certification process for employers seeking to employ foreign workers permanently in the United States. The Department of Labor (Department) has not comprehensively examined and modified the permanent labor certification requirements and process since 2004. Over the last ten years, much has changed in our country's economy, affecting employers' demand for workers and the availability of a qualified domestic labor force. Advances in technology and information dissemination have dramatically altered common industry recruitment practices, and the Department has received ongoing feedback that the existing regulatory requirements governing the PERM process frequently do not align with worker or industry needs and practices. Therefore, the Department is engaging in rulemaking that will consider options to modernize the PERM program to be more responsive to changes in the national workforce, to further align the program design with the objectives of the U.S. immigration system and needs of workers and employers, and to enhance the integrity of the labor certification process.

347. Workforce Innovation and Opportunity Act

Legal Authority: Sec. 503(f) of the Workforce Innovation and Opportunity Act (Pub. L. 113–128)

Abstract: On July 22, 2014, the President signed the Workforce Innovation and Opportunity Act (WIOA) (Pub. L. 113–128). WIOA repeals the Workforce Investment Act of 1998 (WIA) and amends the Wagner-Peyser Act. (29 U.S.C. 2801 *et seq.*) The Department of Labor issued a Notice of Proposed Rulemaking (NPRM) on April 16, 2015, that proposed to implement the changes WIOA makes to the public workforce system in regulations. Through the NPRM, the Department proposed ways to carry out the purposes of WIOA to provide workforce investment activities, through State and local workforce development systems, that increase employment, retention, and earnings of participants, meet the skill requirements of employers, and enhance the productivity and competitiveness of the Nation. The Department analyzed the comments received and developed a final rule.

348. Workforce Innovation and Opportunity Act; Joint Rule With U.S. Department of Education for Combined and Unified State Plans, Performance Accountability, and the One-Stop System Joint Provisions

Legal Authority: Sec. 503(f) of the Workforce Innovation and Opportunity Act (Pub. L. 113–128)

Abstract: On July 22, 2014, the President signed the Workforce Innovation and Opportunity Act (WIOA) (Pub. L. 113–128) which repeals the Workforce Investment Act of 1998 (WIA). (29 U.S.C. 2801 *et seq.*) As directed by WIOA, the Departments of Education and Labor issued a Notice of Proposed Rulemaking (NPRM) on April 16, 2015, to implement the changes in regulations that WIOA makes to the public workforce system regarding Combined and Unified State Plans, performance accountability for WIOA title I, title II, title III, and title IV programs, and the one-stop delivery system.

All of the other regulations implementing WIOA were published by the Departments of Labor and Education in separate NPRMs. The Departments analyzed the comments received and developed a final rule.

RIN: 1218–AC41

351. Preventing Backover Injuries and Fatalities

Legal Authority: 29 U.S.C. 655(b)

Abstract: Backing vehicles and equipment are common causes of struck-by injuries and can also cause caught-between injuries when backing vehicles and equipment pin a worker against an object. Struck-by injuries and caught-between injuries are two of the four leading causes of workplace fatalities. The Bureau of Labor Statistics reports that in 2013, 67 workers were fatally backed over while working. While many backing incidents can prove to be fatal, workers can suffer severe, non-fatal injuries as well. A review of OSHA's Integrated Management Information System (IMIS) database found that backing incidents can result in serious injury to the back and pelvis, fractured bones, concussions, amputations, and other injuries. Emerging technologies in the field of backing operations may prevent incidents. The technologies include cameras and proximity detection systems. The use of spotters and internal traffic control plans can also make backing operations safer. The Agency has held stakeholder meetings on backovers, and is conducting site visits to employers, and is developing a standard to address these hazards.

354. Injury and Illness Prevention Program

Legal Authority: 29 U.S.C. 653; 29 U.S.C. 655(b); 29 U.S.C. 657

Abstract: OSHA is developing a rule requiring employers to implement an Injury and Illness Prevention Program. It involves planning, implementing, evaluating, and improving processes and activities that protect employee safety and health. OSHA has substantial data on reductions in injuries and illnesses from employers who have implemented similar effective processes. The Agency currently has voluntary Safety and Health Program Management Guidelines (54 FR 3904 to 3916), published in 1989. An injury and illness prevention program rule would build on these guidelines as well as lessons learned from successful approaches and best practices under OSHA's Voluntary Protection Program, Safety and Health Achievement Recognition Program, and similar industry and international initiatives such as American National Standards Institute/American Industrial Hygiene Association Z10, and Occupational Health and Safety Assessment Series 18001.

[DOT–OST–1999–5129]

Department Regulatory Agenda; Semiannual Summary

AGENCY: Office of the Secretary, DOT.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Regulatory Agenda is a semiannual summary of all current and projected rulemakings, reviews of existing regulations, and completed actions of the Department. The intent of the Agenda is to provide the public with information about the Department of Transportation's regulatory activity planned for the next 12 months. It is expected that this information will enable the public to more effectively participate in the Department's regulatory process. The public is also invited to submit comments on any aspect of this Agenda.

FOR FURTHER INFORMATION CONTACT:

General

You should direct all comments and inquiries on the Agenda in general to Jonathan Moss, Assistant General Counsel for Regulation, Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590; (202) 366–4723.

Specific

You should direct all comments and inquiries on particular items in the Agenda to the individual listed for the regulation or the general rulemaking contact person for the operating administration in appendix B.

Table of Contents

SUPPLEMENTARY INFORMATION:

Background

Improvement of our regulations is a prime goal of the Department of Transportation (Department or DOT). Our regulations should be clear, simple, timely, fair, reasonable, and necessary. They should not be issued without appropriate involvement of the public; once issued, they should be periodically reviewed and revised, as needed, to ensure that they continue to meet the needs for which they originally were designed. To view additional information about the Department's regulatory activities online, go to *http://www.dot.gov/regulations.* Among other things, this Web site provides a report updated monthly on the status of the DOT significant rulemakings listed in the semiannual regulatory agenda.

To help the Department achieve its goals and in accordance with Executive Order (E.O.) 12866, ''Regulatory Planning and Review,'' (58 FR 51735; Oct. 4, 1993) and the Department's Regulatory Policies and Procedures (44 FR 11034; Feb. 26, 1979), the Department prepares a semiannual regulatory agenda. It summarizes all current and projected rulemakings, reviews of existing regulations, and completed actions of the Department. These are matters on which action has begun or is projected during the next 12 months or for which action has been completed since the last Agenda.

The Agendas are based on reports submitted by the offices initiating the rulemaking and are reviewed by OST.

The Internet is the basic means for disseminating the Unified Agenda. The complete Unified Agenda is available online at *www.reginfo.gov* in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), DOT's printed Agenda entries include only:

1. The agency's Agenda preamble;

2. Rules that are in the agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

3. Any rules that the agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. These elements are: Sequence Number; Title; Section 610 Review, if applicable; Legal Authority; Abstract; Timetable; Regulatory Flexibility Analysis Required; Agency Contact; and Regulation Identifier Number (RIN). Additional information (for detailed list, see section heading ''Explanation of Information on the Agenda'') on these entries is available in the Unified Agenda published on the Internet.

Significant Rulemakings

The Agenda covers all rules and regulations of the Department. We have classified rules as significant in the Agenda if they are, essentially, very beneficial, controversial, or of substantial public interest under our Regulatory Policies and Procedures. All DOT significant rulemaking documents are subject to review by the Secretary of Transportation. If the Office of Management and Budget (OMB) decided a rule is subject to its review under Executive Order 12866, we have also classified it as significant in the Agenda.

Explanation of Information on the Agenda

An Office of Management and Budget memorandum, dated July 27, 2016, requires the format for this Agenda.

First, the Agenda is divided by initiating offices. Then the Agenda is divided into five categories: (1) Prerule stage, (2) proposed rule stage, (3) final rule stage, (4) long-term actions, and (5) completed actions. For each entry, the Agenda provides the following information: (1) Its ''significance''; (2) a short, descriptive title; (3) its legal basis; (4) the related regulatory citation in the Code of Federal Regulations; (5) any legal deadline and, if so, for what action (*e.g.,* NPRM, final rule); (6) an abstract; (7) a timetable, including the earliest expected date for when a rulemaking document may publish; (8) whether the rulemaking will affect small entities and/or levels of Government and, if so, which categories; (9) whether a Regulatory Flexibility Act (RFA) analysis is required (for rules that would have a significant economic impact on a substantial number of small entities); (10) a listing of any analyses an office will prepare or has prepared for the action (with minor exceptions, DOT requires an economic analysis for all its rulemakings); (11) an agency contact office or official who can provide further information; (12) a Regulation

Identifier Number (RIN) assigned to identify an individual rulemaking in the Agenda and facilitate tracing further action on the issue; (13) whether the action is subject to the Unfunded Mandates Reform Act; (14) whether the action is subject to the Energy Act; and (15) whether the action is major under the congressional review provisions of the Small Business Regulatory Enforcement Fairness Act. If there is information that does not fit in the other categories, it will be included under a separate heading entitled ''Additional Information.'' One such example of this is the letters ''SB,'' ''IC,'' and ''SLT.'' These refer to information used as part of our required reports on Retrospective Review of DOT rulemakings. A ''Y'' or an ''N,'' for yes and no, respectively, follow the letters to indicate whether or not a particular rulemaking would have effects on: Small businesses (SB); information collections (IC); or State, local, or tribal (SLT) governments.

For nonsignificant regulations issued routinely and frequently as a part of an established body of technical requirements (such as the Federal Aviation Administration's Airspace Rules), to keep those requirements operationally current, we only include the general category of the regulations, the identity of a contact office or official, and an indication of the expected number of regulations; we do not list individual regulations.

In the ''Timetable'' column, we use abbreviations to indicate the particular documents being considered. ANPRM stands for Advance Notice of Proposed Rulemaking, SNPRM for Supplemental Notice of Proposed Rulemaking, and NPRM for Notice of Proposed Rulemaking. Listing a future date in this column does not mean we have made a decision to issue a document; it is the earliest date on which a rulemaking document may publish. In addition, these dates are based on current schedules. Information received after the issuance of this Agenda could result in a decision not to take regulatory action or in changes to proposed publication dates. For example, the need for further evaluation could result in a later publication date; evidence of a greater need for the regulation could result in an earlier publication date.

Finally, a dot (•) preceding an entry indicates that the entry appears in the Agenda for the first time.

Request for Comments

General

Our agenda is intended primarily for the use of the public. Since its inception, we have made modifications and refinements that we believe provide the public with more helpful information, as well as making the Agenda easier to use. We would like you, the public, to make suggestions or comments on how the Agenda could be further improved.

Reviews

We also seek your suggestions on which of our existing regulations you believe need to be reviewed to determine whether they should be revised or revoked. We particularly draw your attention to the Department's review plan in appendix D. In response to Executive Order 13563 ''Retrospective Review and Analysis of Existing Rules,'' in 2011 we prepared a retrospective review plan providing more detail on the process we use to conduct reviews of existing rules, including changes in response to Executive Order 13563. Any updates related to our retrospective plan and review results can be found at *http://www.dot.gov/regulations.*

Regulatory Flexibility Act

The Department is especially interested in obtaining information on requirements that have a ''significant economic impact on a substantial number of small entities'' and, therefore, must be reviewed under the Regulatory Flexibility Act. If you have any suggested regulations, please submit them to us, along with your explanation of why they should be reviewed.

In accordance with the Regulatory Flexibility Act, comments are specifically invited on regulations that we have targeted for review under section 610 of the Act. The phrase (sec. 610 Review) appears at the end of the title for these reviews. Please see appendix D for the Department's section 610 review plans.

Consultation With State, Local, and Tribal Governments

Executive Orders 13132 and 13175 require us to develop an accountable process to ensure ''meaningful and timely input'' by State, local, and tribal officials in the development of regulatory policies that have federalism or tribal implications. These policies are defined in the Executive orders to include regulations that have ''substantial direct effects'' on States or Indian tribes, on the relationship between the Federal Government and them, or on the distribution of power and responsibilities between the Federal Government and various levels of Government or Indian tribes. Therefore, we encourage State and local Governments or Indian tribes to provide us with information about how the Department's rulemakings impact them.

Purpose

The Department is publishing this regulatory Agenda in the **Federal Register** to share with interested members of the public the Department's preliminary expectations regarding its future regulatory actions. This should enable the public to be more aware of the Department's regulatory activity and should result in more effective public participation. This publication in the **Federal Register** does not impose any binding obligation on the Department or any of the offices within the Department with regard to any specific item on the Agenda. Regulatory action, in addition to the items listed, is not precluded.

Dated: October 19, 2016.

Anthony R. Foxx,

Secretary of Transportation.

Appendix A—Instructions for Obtaining Copies of Regulatory Documents

To obtain a copy of a specific regulatory document in the Agenda, you should communicate directly with the contact person listed with the regulation at the address below. We note that most, if not all, such documents, including the Semiannual Regulatory Agenda, are available through the Internet at *http://www.regulations.gov.* See appendix C for more information.

(Name of contact person), (Name of the DOT agency), 1200 New Jersey Avenue SE., Washington, DC 20590. (For the Federal Aviation Administration, substitute the following address: Office of Rulemaking, ARM–1, 800 Independence Avenue SW., Washington, DC 20591).

Appendix B—General Rulemaking Contact Persons

The following is a list of persons who can be contacted within the Department for general information concerning the rulemaking process within the various operating administrations.

FAA—Lirio Liu, Director, Office of Rulemaking, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–7833.

FHWA—Jennifer Outhouse, Office of Chief Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–0761.

FMCSA—Steven J. LaFreniere, Regulatory Ombudsman, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–0596.

NHTSA—Steve Wood, Office of Chief Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–2992.

FRA—Kathryn Gresham, Office of Chief Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 493–6063.
FTA—Chaya Koffman, Office of Chief Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–3101.
SLSDC—Carrie Mann Lavigne, Chief Counsel, 180 Andrews Street, Massena, NY 13662; telephone (315) 764–3200.
PHMSA—Stephen Gordon, Office of Chief Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–1101.
MARAD—Mitch Hudson, Office of Chief Counsel, Maritime Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–9373.
OST—Jonathan Moss, Assistant General Counsel for Regulation, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–4723.

Appendix C—Public Rulemaking Dockets

All comments via the Internet are submitted through the Federal Docket Management System (FDMS) at the following address: *http://www.regulations.gov.* The FDMS allows the public to search, view, download, and comment on all Federal agency rulemaking documents in one central online system. The above referenced Internet address also allows the public to sign up to receive notification when certain documents are placed in the dockets.

The public also may review regulatory dockets at or deliver comments on proposed rulemakings to the Dockets Office at 1200 New Jersey Avenue SE., Room W12–140, Washington, DC 20590, 1–800–647–5527. Working Hours: 9:00 a.m. to 5:00 p.m.

Appendix D—Review Plans for Section 610 and Other Requirements

Part I—The Plan

General

The Department of Transportation has long recognized the importance of regularly reviewing its existing regulations to determine whether they need to be revised or revoked. Our Regulatory Policies and Procedures require such reviews. We also have responsibilities under Executive Order 12866, ''Regulatory Planning and Review,'' and section 610 of the Regulatory Flexibility Act to conduct such reviews. This includes the use of plain language techniques in new rules and considering its use in existing rules when we have the opportunity and resources to permit its use. We are committed to continuing our reviews of existing rules and, if it is needed, will initiate rulemaking actions based on these reviews.

In accordance with Executive Order 13563, ''Improving Regulation and Regulatory Review,'' issued by the President on January 18, 2011, the Department has added other elements to its review plan. The Department has decided to improve its plan by adding special oversight processes within the Department, encouraging effective and timely reviews, including providing additional guidance on particular problems that warrant review, and expanding opportunities for public participation. These new actions are in addition to the other steps described in this appendix.

Section 610 Review Plan

Section 610 requires that we conduct reviews of rules that: (1) Have been published within the last 10 years, and (2) have a ''significant economic impact on a substantial number of small entities'' (SEIOSNOSE). It also requires that we publish in the **Federal Register** each year a list of any such rules that we will review during the next year. The Office of the Secretary and each of the Department's Operating Administrations have a 10-year review plan. These reviews comply with section 610 of the Regulatory Flexibility Act.

Changes to the Review Plan

Some reviews may be conducted earlier than scheduled. For example, to the extent resources permit, the plain language reviews will be conducted more quickly. Other events, such as accidents, may result in the need to conduct earlier reviews of some rules. Other factors may also result in the need to make changes; for example, we may make changes in response to public comment on this plan or in response to a presidentially mandated review. If there is any change to the review plan, we will note the change in the following Agenda. For any section 610 review, we will provide the required notice prior to the review.

Part II—The Review Process

The Analysis

Generally, the agencies have divided their rules into 10 different groups and plan to analyze one group each year. For purposes of these reviews, a year will coincide with the fall-to-fall schedule for publication of the Agenda. Thus, Year 1 (2008) begins in the fall of 2008 and ends in the fall of 2009; Year 2 (2009) begins in the fall of 2009 and ends in the fall of 2010, and so on. We request public comment on the timing of the reviews. For example, is there a reason for scheduling an analysis and review for a particular rule earlier than we have? Any comments concerning the plan or particular analyses should be submitted to the regulatory contacts listed in appendix B, General Rulemaking Contact Persons.

Section 610 Review

The agency will analyze each of the rules in a given year's group to determine whether any rule has a SEIOSNOSE and, thus, requires review in accordance with section 610 of the Regulatory Flexibility Act. The level of analysis will, of course, depend on the nature of the rule and its applicability. Publication of agencies' section 610 analyses listed each fall in this Agenda provides the public with notice and an opportunity to comment consistent with the requirements of the Regulatory Flexibility Act. We request that public comments be submitted to us early in the analysis year concerning the small entity impact of the rules to help us in making our determinations.

In each fall Agenda, the agency will publish the results of the analyses it has completed during the previous year. For rules that had a negative finding on SEIOSNOSE, we will give a short explanation (*e.g.,* ''these rules only establish petition processes that have no cost impact'' or ''these rules do not apply to any small entities''). For parts, subparts, or other discrete sections of rules that do have a SEIOSNOSE, we will announce that we will be conducting a formal section 610 review during the following 12 months. At this stage, we will add an entry to the Agenda in the prerulemaking section describing the review in more detail. We also will seek public comment on how best to lessen the impact of these rules and provide a name or docket to which public comments can be submitted. In some cases, the section 610 review may be part of another unrelated review of the rule. In such a case, we plan to clearly indicate which parts of the review are being conducted under section 610.

Other Reviews

The agency will also examine the specified rules to determine whether any other reasons exist for revising or revoking the rule or for rewriting the rule in plain language. In each fall Agenda, the agency will also publish information on the results of the examinations completed during the previous year.

Part III—List of Pending Section 610 Reviews

The Agenda identifies the pending DOT section 610 Reviews by inserting ''(Section 610 Review)'' after the title for the specific entry. For further information on the pending reviews, see the Agenda entries at *www.reginfo.gov.* For example, to obtain a list of all entries that are in section 610 Reviews under the Regulatory Flexibility Act, a user would select the desired responses on the search screen (by selecting ''advanced search'') and, in effect, generate the desired ''index'' of reviews.

Office of the Secretary

Section 610 and Other Reviews

Year	Regulations to be reviewed	Analysis year	Review year
1	49 CFR parts 91 through 99 and 14 CFR parts 200 through 212	2008	2009
2	48 CFR parts 1201 through 1253 and new parts and subparts	2009	2010
3	14 CFR parts 213 through 232	2010	2011
4	14 CFR parts 234 through 254	2011	2012
5	14 CFR parts 255 through 298 and 49 CFR part 40	2012	2013
6	14 CFR parts 300 through 373	2013	2014
7	14 CFR parts 374 through 398	2014	2015
8	14 CFR part 399 and 49 CFR parts 1 through 11	2015	2016
9	49 CFR parts 17 through 28	2016	2017
10	49 CFR parts 29 through 39 and parts 41 through 89	2017	2018

Year 9 (2016) List of Rules That Will Be Analyzed During the Next Year

49 CFR part 17—Intergovernmental review of Department of Transportation programs and activities
49 CFR part 20—New restrictions on lobbying
49 CFR part 21—Nondiscrimination In Federally-Assisted Programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act Of 1964
49 CFR part 22—Short-Term Lending Program (STLP)
49 CFR part 23—Participation of Disadvantaged Business Enterprise in Airport Concessions
49 CFR part 24—Uniform Relocation Assistance And Real Property Acquisition For Federal And Federally-Assisted Programs
49 CFR part 25—Nondiscrimination On The Basis Of Sex in Education Programs or Activities Receiving Federal Financial Assistance
49 CFR part 26—Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs
49 CFR part 27—Nondiscrimination On The Basis Of Disability in Programs or Activities Receiving Federal Financial Assistance
49 CFR part 28—Enforcement of Nondiscrimination On The Basis Of Handicap in Programs or Activities Conducted by the Department of Transportation

Year 8 (2015) List of Rules With Ongoing Analysis

14 CFR part 399—Fees and Charges for Special Services
49 CFR part 1—Organization and Delegation of Power and Duties
49 CFR part 3—Official Seal
49 CFR part 5—Rulemaking Procedures
49 CFR part 6—Implementation of Equal Access to Justice Act in Agency Proceedings
49 CFR part—Public Availability of Information
49 CFR part 8—Classified Information: Classification/Declassification/Access
49 CFR part 9—Testimony of Employees of the Department and Production of Records in Legal Proceedings
49 CFR part 10—Maintenance of and Access to Records Pertaining to Individuals
49 CFR part 11—Protection of Human Subjects

Year 7 (2014) List of Rules With Ongoing Analysis

14 CFR part 374—Implementation of the Consumer Credit Protection Act with Respect to Air Carriers and Foreign Air Carriers
14 CFR part 374a—Extension of Credit by Airlines to Federal Political Candidates
14 CFR part 375—Navigation of Foreign Civil Aircraft within the United States
14 CFR part 377—Continuance of Expired Authorizations by Operation of Law Pending Final Determination of Applications for Renewal Thereof
14 CFR part 380—Public Charters
14 CFR part 381—Special Event Tours
14 CFR part 382—Nondiscrimination On The Basis Of Disability in Air Travel
14 CFR part 383—Civil Penalties
14 CFR part 385—Staff Assignments and Review of Action under Assignments
14 CFR part 389—Fees and Charges for Special Services
14 CFR part 398—Guidelines for Individual Determinations of Basic Essential Air Service

Year 6 (2013) List of Rules With Ongoing Analysis

14 CFR part 300—Rules of Conduct in DOT Proceedings Under This Chapter
14 CFR part 302—Rules of Practice in Proceedings
14 CFR part 303—Review of Air Carrier Agreements
14 CFR part 305—Rules of Practice in Informal Nonpublic Investigations
14 CFR part 313—Implementation of the Energy Policy and Conservation Act
14 CFR part 323—Terminations, Suspensions, and Reductions of Service
14 CFR part 325—Essential Air Service Procedures
14 CFR part 330—Procedures For Compensation of Air Carriers
14 CFR part 372—Overseas Military Personnel Charters

Year 5 (Fall 2012) List of Rules With Ongoing Analysis

14 CFR part 255—Airline Computer Reservations Systems
14 CFR part 256—[Reserved]
14 CFR part 271—Guidelines for Subsidizing Air Carriers Providing Essential Air Transportation
14 CFR part 272—Essential Air Service to the Freely Associated States
14 CFR part 291—Cargo Operations in Interstate Air Transportation
14 CFR part 292—International Cargo Transportation
14 CFR part 293—International Passenger Transportation
14 CFR part 294—Canadian Charter Air Taxi Operators
14 CFR part 296—Indirect Air Transportation of Property
14 CFR part 297—Foreign Air Freight Forwarders and Foreign Cooperative Shippers Associations
14 CFR part 298—Exemptions for Air Taxi and Commuter Air Carrier Operations

Year 4 (Fall 2011) List of Rules With Ongoing Analysis

14 CFR part 240—Inspection of Accounts and Property

14 CFR part 241—Uniform System of Accounts and Reports for Large Certificated Air Carriers
14 CFR part 243—Passenger Manifest Information
14 CFR part 247—Direct Airport-to-Airport Mileage Records
14 CFR part 248—Submission of Audit Reports
14 CFR part 249—Preservation of Air Carrier Records

Year 3 (Fall 2010) List of Rules With Ongoing Analysis

14 CFR part 213—Terms, Conditions, and Limitations of Foreign Air Carrier Permits
14 CFR part 214—Terms, Conditions, and Limitations of Foreign Air Carrier Permits Authorizing Charter Transportation Only
14 CFR part 215—Use and Change of Names of Air Carriers, Foreign Air Carriers, and Commuter Air Carriers
14 CFR part 216—Commingling of Blind Sector Traffic by Foreign Air Carriers
14 CFR part 217—Reporting Traffic Statistics by Foreign Air Carriers in Civilian Scheduled, Charter, and Nonscheduled Services
14 CFR part 218—Lease by Foreign Air Carrier or Other Foreign Person of Aircraft With Crew
14 CFR part 221—Tariffs
14 CFR part 222—Intermodal Cargo Services by Foreign Air Carriers
14 CFR part 223—Free and Reduced-Rate Transportation
14 CFR part 232—Transportation of Mail, Review of Orders of Postmaster General
14 CFR part 234—Airline Service Quality Performance Reports

Year 1 (Fall 2008) List of Rules With Ongoing Analysis

49 CFR part 91—International Air Transportation Fair Competitive Practices
49 CFR part 92—Recovering Debts to the United States by Salary Offset
49 CFR part 98—Enforcement of Restrictions on Post-Employment Activities
49 CFR part 99—Employee Responsibilities and Conduct
14 CFR part 200—Definitions and Instructions
14 CFR part 201—Air Carrier Authority Under Subtitle VII of Title 49 of the United States Code [Amended]
14 CFR part 203—Waiver of Warsaw Convention Liability Limits and Defenses
14 CFR part 204—Data To Support Fitness Determinations
14 CFR part 205—Aircraft Accident Liability Insurance
14 CFR part 206—Certificates of Public Convenience and Necessity: Special Authorizations and Exemptions
14 CFR part 207—Charter Trips by U.S. Scheduled Air Carriers
14 CFR part 208—Charter Trips by U.S. Charter Air Carriers
14 CFR part 211—Applications for Permits to Foreign Air Carriers
14 CFR part 212—Charter Rules for U.S. and Foreign Direct Air Carriers

Federal Aviation Administration

Section 610 Review Plan

The Federal Aviation Administration (FAA) has elected to use the two-step, two-year process used by most Department of Transportation (DOT) modes in past plans. As such, the FAA has divided its rules into 10 groups as displayed in the table below. During the first year (the ''analysis year''), all rules published during the previous 10 years within a 10% block of the regulations will be analyzed to identify those with a significant economic impact on a substantial number of small entities (SEISNOSE). During the second year (the ''review year''), each rule identified in the analysis year as having a SEISNOSE will be reviewed in accordance with Section 610 (b) to determine if it should be continued without change or changed to minimize impact on small entities. Results of those reviews will be published in the DOT Semiannual Regulatory Agenda.

Year	Regulations to be reviewed	Analysis year	Review year
1	14 CFR parts 119 through 129 and parts 150 through 156	2008	2009
2	14 CFR parts 133 through 139 and parts 157 through 169	2009	2010
3	14 CFR parts 141 through 147 and parts 170 through 187	2010	2011
4	14 CFR parts 189 through 198 and parts 1 through 16	2011	2012
5	14 CFR parts 17 through 33	2012	2013
6	14 CFR parts 34 through 39 and parts 400 through 405	2013	2014
7	14 CFR parts 43 through 49 and parts 406 through 415	2014	2015
8	14 CFR parts 60 through 77	2015	2016
9	14 CFR parts 91 through 105	2016	2017
10	14 CFR parts 417 through 460	2017	2018

Background on the Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 as amended (RFA), (§§ 601 through 612 of Title 5, United States Code (5 U.S.C.)) requires Federal regulatory agencies to analyze all proposed and final rules to determine their economic impact on small entities, which includes small businesses, small organizations, and small governmental jurisdictions. The primary purpose of the RFA is to establish as a principle of regulatory issuance that Federal agencies endeavor, consistent with the objectives of the rule and applicable statutes, to fit regulatory and informational requirements to the scale of entities subject to the regulation. The FAA performed the required RFA analyses of each final rulemaking action and amendment it has initiated since enactment of the RFA in 1980.

Section 610 of 5 U.S.C. requires government agencies to periodically review all regulations that will have a SEISNOSE. The FAA must analyze each rule within 10 years of its publication date.

Defining SEISNOSE

The RFA does not define ''significant economic impact.'' Therefore, there is no clear rule or number to determine when a significant economic impact occurs. However, the Small Business Administration (SBA) states that significance should be determined by considering the size of the business, the size of the competitor's business, and the impact the same regulation has on larger competitors.

Likewise, the RFA does not define ''substantial number.'' However, the legislative history of the RFA suggests that a substantial number must be at least one but does not need to be an overwhelming percentage such as more than half. The SBA states that the substantiality of the number of small businesses affected should be determined on an industry-specific basis.

This analysis consisted of the following three steps:

• Review of the number of small entities affected by the amendments to parts 91 through 105.
• Identification and analysis of all amendments to parts 91 through 105 since 2006 to determine whether any still have or now have a SEISNOSE.
• Review of the FAA Office of Aviation Policy, and Plans regulatory flexibility assessment of each amendment performed as required by the RFA.

Year 10 (2017) List of Rules To Be Analyzed During the Next Year

14 CFR Part 417—Launch Safety
14 CFR Part 420—License to Operate a Launch Site
14 CFR Part 431—Launch and Reentry of a Reusable Launch Vehicle (RLV)
14 CFR Part 433—License to Operate a Reentry Site
14 CFR Part 43—Reentry of a Reentry Vehicle Other Than a Reusable Launch Vehicle (RLV)
14 CFR Part 437—Experimental Permits
14 CFR Part 440—Financial Responsibility
14 CFR Part 460—Human Space Flight Requirements

Year 9 (2016) List of Rules Analyzed and Summary of Results

14 CFR Part 9—General Operating and Flight Rules

• Section 610: The agency conducted a Section 610 review of this part and found Amendment 91–314, 75 FR 30193, May 28, 2010; Amendment 91–314, 75 FR 30193, May 28, 2010; and Amendment 91–330, 79 FR 9972, Feb. 21, 2014 trigger SEISNOSE within the meaning of the RFA.
• General: No changes are needed. The FAA has considered a number of alternatives in attempts to lower compliance costs for small entities, but could not go forward with the lower cost alternatives without compromising the safety for the industry.

14 CFR Part 93—Special Air Traffic Rules

• Section 610: The agency conducted a Section 610 review of this part and found no SEISNOSE.
• General: No changes are needed. These regulations are cost effective and impose the least burden.

14 CFR Part 95—IFR Altitudes

• Section 610: The agency conducted a Section 610 review of this part and found there were no amendments since 2016. Therefore, part 99 does not trigger SEISNOSE.
• General: No changes are needed.

14 CFR Part 97—Standard Instrument Procedures

• Section 610: The agency conducted a Section 610 review of this part and found no SEISNOSE.
• General: No changes are needed. These regulations are cost effective and impose the least burden.

14 CFR Part 99—Security Control of Air Traffic

• Section 610: The agency conducted a Section 610 review of this part and found there were no amendments since 2016. Therefore, part 99 does not trigger SEISNOSE.
• General: No changes are needed.

14 CFR Part 101—Moored Balloons, Kites, Amateur Rockets and Unmanned Free Balloons

• Section 610: The agency conducted a Section 610 review of this part and found no SEISNOSE.
• General: No changes are needed. These regulations are cost effective and impose the least burden.

14 CFR Part 103—Ultralight Vehicles

• Section 610: Section 610: The agency conducted a Section 610 review of this part and found there were no amendments since 2016. Therefore, part 99 does not trigger SEISNOSE.
• General: No changes are needed.

14 CFR Part 105—Parachute Operations

• Section 610: The agency conducted a Section 610 review of this part and found no SEISNOSE.
• General: No changes are needed. These regulations are cost effective and impose the least burden.

Federal Highway Administration

Section 610 and Other Reviews

Year	Regulations to be reviewed	Analysis year	Review year
1	None	2008	2009
2	23 CFR Parts 1 to 260	2009	2010
3	23 CFR Parts 420 to 470	2010	2011
4	23 CFR Part 500	2011	2012
5	23 CFR Parts 620 to 637	2012	2013
6	23 CFR Parts 645 to 669	2013	2014
7	23 CFR Parts 710 to 924	2014	2015
8	23 CFR Parts 940 to 973	2015	2016
9	23 CFR Parts 1200 to 1252	2016	2017
10	New parts and subparts	2017	2018

Federal-Aid Highway Program

The Federal Highway Administration (FHWA) has adopted regulations in title 23 of the CFR, chapter I, related to the Federal-Aid Highway Program. These regulations implement and carry out the provisions of Federal law relating to the administration of Federal aid for highways. The primary law authorizing Federal aid for highway is chapter I of title 23 of the U.S.C. 145 of title 23, expressly provides for a federally assisted State program. For this reason, the regulations adopted by the FHWA in title 23 of the CFR primarily relate to the requirements that States must meet to receive Federal funds for the construction and other work related to highways. Because the regulations in title 23 primarily relate to States, which are not defined as small entities under the Regulatory Flexibility Act, the FHWA believes that its regulations in title 23 do not have a significant economic impact on a substantial number of small entities. The FHWA solicits public comment on this preliminary conclusion.

Year 8 (Fall 2015) List of Rules Analyzed and a Summary of Results

23 CFR Part 940—Intelligent Transportation System Architecture and Standards

• Section 610: No SEIOSNOSE. No small entities are affected
• General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

23 CFR Part 950—Electronic Toll Collection

- Section 610: No SEIOSNOSE. No small entities are affected
- General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

23 FR Part 970—National Park Service Management Systems

- Section 610: No SEIOSNOSE. No small entities are affected
- General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

23 CFR Part 971—Forest Service Management Systems

- Section 610: No SEIOSNOSE. No small entities are affected
- General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

23 CFR Part 972—Fish and Wildlife Service Management Systems

- Section 610: No SEIOSNOSE. No small entities are affected
- General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

23 CFR Part 973—Management Systems Pertaining to the Bureau of Indian Affairs and the Indian Reservation Roads Program

- Section 610: No SEIOSNOSE. No small entities are affected
- General: No changes are needed. These regulations are cost effective and impose the least burden. FHWA's plain language review of these rules indicates no need for substantial revision.

Year 9 (Fall 2016) List of Rules That Will Be Analyzed During the Next Year

23 CFR Part 1200—Uniform Procedures for State Highway Safety Grant Programs

23 CFR Part 1208—National Minimum Drinking Age

23 CFR Part 1210—Operation of Motor Vehicles by Intoxicated Minors

23 CFR Part 1215—Use of Safety Belts—Compliance and Transfer-of-funds Procedures

23 CFR Part 1225—Operation of Motor Vehicles by Intoxicated Persons

23 CFR Part 1235—Uniform System for Parking for Persons with Disabilities

23 CFR Part 1240—Safety Incentive Grants for Use of Seat Belts—Allocations Based on Seat Belt Use Rates

Federal Motor Carrier Safety Administration

Section 610 and Other Reviews

Year	Regulations to be reviewed	Analysis year	Review year
1	49 CFR part 372, subpart A	2008	2009
2	49 CFR part 386	2009	2010
3	49 CFR parts 325 and 390 (General)	2010	2011
4	49 CFR parts 390 (Small Passenger-Carrying Vehicles), 391 to 393 and 396 to 399	2011	2012
5	49 CFR part 387	2012	2013
6	49 CFR parts 360, 365, 366, 368, 374, 377, and 378	2013	2014
7	49 CFR parts 356, 367, 369, 370, 371, 372 (subparts B and C)	2014	2015
8	49 CFR parts 373, 376, and 379	2015	2016
9	49 CFR part 375	2016	2017
10	49 CFR part 395	2017	2018

Year 7 (Fall 2014) List of Rules With Ongoing Analysis

49 CFR Part 356—Motor Carrier Routing Regulations

- Section 610: There is no SEIOSNOSE. FMCSA requires for-hire interstate carriers to pay a single $300 registration fee (49 CFR part 365); making the process of paying by the route obsolete.
- General: These regulations are cost effective and impose the least burden. The commercial routes discussed in this rule have been eclipsed by the advent of the Unified Carrier Registration (UCR) and the International Registration Plan (IRP). It is our opinion that 49 CFR part 356 is obsolete and should be removed in its entirety.

49 CFR Part 367—Standards for Registration With States

- Section 610: There is no SEIOSNOSE. This action is not economically significant. All costs associated with this rule are required pursuant to an explicit Congressional mandate in Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU). Also, a majority of the fees under the current rule replace fees that were paid under the Single State Registration System (SSRS). Much of the revenue collected by the new fees would have been collected under SSRS from the same entities.
- General: These regulations are cost effective and impose the least burden. FMCSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 369—Reports of Motor Carriers

- Section 610: There is no SEIOSNOSE. This rule requires the reporting of principally financial data and it impacts only a small percentage of larger motor carriers (class I and class II carriers).
- General: These regulations are cost effective and impose the least burden to carriers. It is our opinion that the rule is obsolete and should be removed in its entirety. However, Congressional action to modify the statute is required and has not been granted to eliminate this regulation.

49 CFR Part 370—Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage

- Section 610: There is no SEIOSNOSE, largely due to the fact that compliance with the rule is required by contract law and prudent commercial business practices.
- General: These regulations are cost effective and impose the least burden. This rule offers guidance on the business approach to deal with claims made against carriers for loss or damage of property. It is our opinion that the 49 CFR part 370 is obsolete in that it serves no discernible safety function. The requirement to follow and comply with the terms of Bills of Lading contracts are already captured by other laws.

49 CFR Part 371—Brokers of Property

- Section 610: There is no SEIOSNOSE. The potential costs identified in the Agency's worst case analysis are minimal, and represent

costs that the vast majority of Brokers should already be incurring.

• General: This rule prescribes rules for brokers of property. Comments received during the rulemaking process indicate that some level of regulation is appropriate and should be retained.

49 CFR Part 372 (Subparts B and C)—Exemptions, Commercial Zones and Terminal Areas

• Section 610: There is no SEIOSNOSE. FMCSA requires for-hire interstate carriers to pay a single $300 registration fee (49 CFR part 365). The process addressed under 49 CFR part 372 identifies exemptions and commercial zones for which registration fees may not be required.

• General: These regulations are cost effective and impose the least burden. FMCSA's plain language review of these rules indicates no need for substantial revision.

Year 8 (2015) List of Rules Will Ongoing Analysis

49 CFR part 373—Receipts and Bills
49 CFR part 376—Lease and Interchange of Vehicles
49 CFR part 379—Preservation of Records

Year 9 (2016) List of Rules That Will Be Analyzed During the Next Year

49 CFR part 375—Transportation of household goods in interstate commerce; consumer protection regulations

National Highway Traffic Safety Administration

Section 610 and Other Reviews

Year	Regulations to be reviewed	Analysis year	Review year
1	49 CFR parts 571.223 through 571.500, and parts 575 and 579	2008	2009
2	23 CFR parts 1200 through 1300	2009	2010
3	49 CFR parts 501 through 526 and 571.213	2010	2011
4	49 CFR parts 571.131, 571.217, 571.220, 571.221, and 571.222	2011	2012

Year 8 (Fall 2015) List of Rules Analyzed and a Summary of the Results

49 CFR Part 571.201—Occupant Protection in Interior Impact

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.202—Head Restraints; Applicable at the Manufacturers Option Until September 1, 2009

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.202a—Head Restraints; Mandatory Applicability Begins on September 1, 2009

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.203—Impact Protection for the Driver From the Steering Control System

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.204—Steering Control Rearward Displacement

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.205—Glazing Materials

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.205a—Glazing Equipment Manufactured Before September 1, 2006 and Glazing Materials Used in Vehicles Manufactured Before November 1, 2006

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.206—Door Locks and Door Retention Components

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.207—Seating Systems

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.208—Occupant Crash Protection

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.209—Seat Belt Assemblies

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.210—Seat Belt Assembly Anchorages

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

49 CFR Part 571.211—[Reserved]

49 CFR Part 571.212—Windshield Mounting

• Section 610: There is no SEIOSNOSE.

• General: No changes are needed. These regulations are cost effective and impose the least burden. NHTSA's plain language review of these rules indicates no need for substantial revision.

Year 9 (Fall 2016) List of Rules That Will Be Analyzed During the Next Year

49 CFR part 571.214—Side Impact Protection

49 CFR part 571.215—[Reserved]

49 CFR part 571.216—Roof Crush Resistance; Applicable Unless a Vehicle Is Certified to 571.216a

49 CFR part 571.216a—Roof Crush Resistance; Upgraded Standard

49 CFR part 571.218—Motorcycle Helmets

49 CFR part 571.219—Windshield Zone Intrusion

Year 8 (Fall 2015) List of Rules Analyzed and a Summary of Results

49 CFR Part 22—Reflectorization of Rail Freight Rolling Stock

• Section 610: There is no SEIOSNOSE.

• General: The regulation requires freight rolling stock owners and railroads to have all freight rolling properly equipped with retroreflective material within 10 years of the effective date of the final rule for the purpose of enhancing its detectability at highway-rail crossings. Freight rolling stock owners and railroads are also required to periodically inspect and maintain that material. The rule also established a 10-year implementation schedule to help facilitate the initial application of retoreflective material to non-reflectorized freight rolling stock. Further, the regulation prescribes standards for the application, inspection, and maintenance of retroreflective material on rail freight rolling. FRA's plain language review of this rule indicates no need for revision.

49 CFR Part 225—Railroad Accidents/Incidents: Reports Classification and Investigations

• Section 610: There is no SEIOSNOSE. Section 225.3 specifically states that certain Internal Control Plan and recordkeeping requirements are not applicable to railroads below a certain size. FRA makes available a free software package to all railroads that would allow for FRA recordkeeping and reporting. FRA also makes available the FRA Guide for Preparing Accident/Incident Reports, and model Internal Control Plans for small railroads.

• General: Since the FRA needs accurate information on the hazards and risks that exist on the nation's railroads to effectively carry out its regulatory responsibilities, to determine comparative trends of railroad safety, and to develop hazard elimination and risk reduction programs that focus on preventing railroad injuries and accidents, the requirements set forth in part 225 will improve railroad safety for industry employees and general public. FRA's plain language review of this rule indicates no need for substantial revision.

49 CFR Part 231—Railroad Safety Appliances Standards

• Section 610: There is no SEIOSNOSE. Small railroads generally purchase rail equipment that has already been used in transportation by Class I and Class II railroads. As a result, rail equipment used by small railroads is often in compliance with Part 231 standards at the time of acquisition. In addition, small railroads are not substantially affected by rail equipment maintenance costs that are associated with Part 231 requirements because most rail equipment repairs are performed by Class I and Class II railroads and/or billed to the car owner. Although Part 231 may have some impact on small railroads, FRA has deemed any such impact to be necessary to ensure uniform and consistent equipment design requirements, which contribute to the safety of railroad employees who work on or about the rail equipment.

• General: The rule provides for railroad safety standards which are necessary to ensure the protection and safety of railroad employees and general public, and to minimize the number of casualties. FRA's plain language review of this rule indicates no need for substantial revision.

49 CFR Part 234—Grade Crossing Safety

• Section 610: There is no SEIOSNOSE. This rule does not apply to railroads that exclusively operate freight trains only on track which is not part of the general railroad system of transportation, rapid transit operations within an urban area that are not connected to the general railroad system of transportation or railroads that operates passenger trains only on track inside insular installations. Since small railroads have proportionately smaller number of grade crossing warning systems to inspect, test and maintain, therefore, smaller railroads would have a smaller burden of cost per crossing. So far as the State Highway-Rail Grade Crossing Action Plans are concerned, the requirements would apply to States—none of which is small.

• General: Since the rule prescribes maintenance, inspection and testing

standards for highway-rail grade crossing warning systems, standards for the reporting of failures of such systems and minimum actions railroads must take when such warning systems malfunction. These regulations are necessary to ensure the protection and safety of railroad employees and general public, and to minimize the number of casualties. FRA's plain language review of this rule indicates no need for substantial revision.

Year 8 (Fall 2015) List of Rule(s) That Will Be Analyzed During Next Year

49 CFR part 222—Use of Locomotive Horns at Public Highway-Rail Grade Crossings
49 CFR part 227—Occupational Noise Exposure
49 CFR part 235—Instructions Governing Applications for Approval of a Discontinuance or Material Modification of a Signal System or Relief From the Requirements of Part 236
49 CFR part 236—Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and Train Control Systems, Devices, and Appliances
49 CFR part 250—Guarantee of Certificates of Trustees of Railroads in Reorganization
49 CFR part 260—Regulations Governing Loans and Loan Guarantees Under the Railroad Rehabilitation and Improvement Financing Program
49 CFR part 266—Assistance to States for Local Rail Service Under Section 5 of the Department of Transportation Act

Federal Transit Administration

Section 610 and Other Reviews

Year	Regulations to be reviewed	Analysis year	Review year
1	49 CFR parts 604, 605, and 633	2008	2009
2	49 CFR parts 661 and 665	2009	2010
3	49 CFR part 633	2010	2011

10	49 CFR part 665	2017	2018

Year 8 (Fall 2015) List of Rules Analyzed and Summary of Results

49 CFR Part 639—Capital Leases

• Section 610: The agency has determined that the rule continues to not have a significant effect on a substantial number of small entities. Provisions of the recently enacted Fixing America's Surface Transportation (FAST) Act removed the requirement for a recipient to conduct a cost-effectiveness analysis before entering any lease agreement using Federal capital assistance and removed the applicability of part 639 to rolling stock procurements through capital leases. However, other provisions of part 639 continue to apply. FTA is currently revising the Grant Management Requirements Circular 5010, to provide guidance to recipients for the capital lease program. FTA has evaluated the likely effects of the proposed rule on small entities and requested public comment on proposed revisions to Circular 5010. FTA has determined that the proposed revisions and the current regulation do not have a significant economic impact on a substantial number of small entities.

• General: The rule was promulgated to prescribe requirements and procedures to procure capital assets through lease agreements with the use of Federal capital assistance. Recently, Congress enacted the Fixing America's Surface Transportation Act (FAST), Public Law 114–357, (2015). The statue revised the definition of capital project so that a recipient is no longer required to conduct a cost-effectiveness analysis before leasing public transportation equipment or facilities with Federal funds. In addition, the statue exempts certain rolling stock procurements from the requirements of 49 CFR part 639. FTA has proposed revisions to Circular 5010 and requested public comment on its proposal to conform its capital lease requirements to the FAST Act provisions. Although, the FAST Act has revised some requirements of this part, other provisions of the rule continue to apply.

Year 9 (Fall 2016)—List of Rule(s) That Will Be Analyzed This Year

49 CFR Part 659—State Safety Oversight and 49 CFR Part 663—Pre-Award and Post-Deliver Audits of Rolling Stock Purchases

10	49 CFR parts 173 and 194	2017	2018

Year 8 (Fall 2016) List of Rules Analyzed and a Summary of Results

49 CFR Part 172—Hazardous Materials Table, Special Provisions, Hazardous Materials Communications, Emergency Response Information, Training Requirements, and Security Plans

• Section 610: There is no SEIOSNOSE. A substantial number of small entities may be affected by this rule, but the economic impact on those entities is not significant. Plain Language: PHMSA's plain language review of this rule indicates no need for substantial revision. Where confusing or wordy language has been identified, revisions have been and will be made to simplify.

• General: This rule prescribes minimum requirements for the communication of risks associated with materials classed as hazardous in accordance with the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). On June 2, 2016 PHMSA published a final rule entitled ''Hazardous Materials: Miscellaneous Amendments (RRR)'' 81 FR 35483. As this final rule clarifies provisions based on PHMSA's initiatives and correspondence with the regulated community, the impact that it will have on small entities is not expected to be significant. The changes are generally intended to provide relief and, as a result, marginal positive economic benefits to shippers, carriers, and packaging manufactures and testers, including small entities. These benefits are not at a level that can be considered economically significant. Consequently, this final rule will not have a significant economic impact on a substantial number of small entities. PHMSA's plain language review of this rule indicates no need for substantial revision.

49 CFR Part 178—Specifications for Packagings

• Section 610: There is no SEIOSNOSE. A substantial number of small entities, particularly those that use performance oriented packagings, may be affected by this rule, but the economic impact on those entities is not significant.

• General: This rule prescribes minimum Federal safety standards for the construction of DOT specification packagings, these requirements are necessary to protect transportation workers and the public and to ensure the survivability of DOT specification packagings during transportation incidents. PHMSA's plain language review of this rule indicates no need for substantial revision.

DEPARTMENT OF TRANSPORTATION (DOT)

Office of the Secretary (OST)

Final Rule Stage

355. +Enhancing Airline Passenger Protections III

Legal Authority: 49 U.S.C. 41712; 49 U.S.C. 40101; 49 U.S.C. 41702

Abstract: The rulemaking previously titled ''Airline Pricing Transparency and Other Consumer Protection Issues'' has been separated into three proceedings. This final rule would address the following topics from the notice of proposed rulemaking issued on May 23, 2014: The scope of carriers required to report service quality data, reporting of mainline carriers' domestic code-share partner operations; the statutory requirement that carriers and ticket agents disclose any code-share arrangements on their Web sites; undisclosed biasing by carriers and ticket agents in electronic displays of flight search results; and disclosure by ticket agents of the carriers whose tickets they sell in order to avoid having consumers mistakenly believe they are searching all possible flight options for a particular city-pair market when in fact there may be other options available. Additionally, the rulemaking would correct drafting errors and make a few clarifying changes to the Department's second Enhancing Airline Passenger Protections rule. Two other proceedings will address other provisions identified in the 2014 NPRM. See RIN 2105–AE56, Transparency of Airline Ancillary Service Fees; and RIN 2105–AE57, Enhancing Airline Passenger Protections IV. These rulemakings address unrelated matters and were separated into three proceedings to avoid the risk of any delay in finalizing one issue resulting in a delay in finalizing other issues.

358. +Drug and Alcohol Testing of Certain Maintenance Provider Employees Located Outside of the United States

Legal Authority: 14 CFR; 49 U.S.C. 106(g); 49 U.S.C. 40113; 49 U.S.C. 44701 to 44702; 49 U.S.C. 44707; 49 U.S.C. 44709; 49 U.S.C. 44717

Abstract: This rulemaking is required by the FAA Modernization and Reform 2012. It would require controlled substance testing of some employees working in repair stations located outside the United States. The intended effect is to increase participation by companies outside of the United States in testing of employees who perform safety critical functions and testing standards similar to those used in the repair stations located in the United States. This action is necessary to increase the level of safety of the flying public. This rulemaking is required by the FAA Modernization and Reform Act of 2012.

360. +Pilot Records Database (HR 5900)

Legal Authority: 49 U.S.C. 106(g); 49 U.S.C. 1155; 49 U.S.C. 40103; 49 U.S.C. 40113; 49 U.S.C. 40119 to 40120; 49 U.S.C. 41706; 49 U.S.C. 44101; 49 U.S.C. 44111; 49 U.S.C. 44701 to 44705; 49 U.S.C. 44709 to 44713; 49 U.S.C. 44715 to 44717; 49 U.S.C. 44722; 49 U.S.C. 45101 to 45105; 49 U.S.C. 46105; 49 U.S.C. 46306; 49 U.S.C. 46315 to 46316; 49 U.S.C. 46504; 49 U.S.C. 46507; 49 U.S.C. 47122; 49 U.S.C. 47508; 49 U.S.C. 47528 to 47531

Abstract: This rulemaking would implement a Pilot Records Database as required by Public Law 111–216 (Aug. 1, 2010). Section 203 amends the Pilot Records Improvement Act by requiring the FAA to create a pilot records database that contains various types of pilot records. These records would be provided by the FAA, air carriers, and other persons who employ pilots. The FAA must maintain these records until it receives notice that a pilot is deceased. Air carriers would use this database to perform a record check on a pilot prior to making a hiring decision.

361. +Aircraft Registration and Airmen Certification Fees

Legal Authority: 31 U.S.C. 9701; 4 U.S.T. 1830; 49 U.S.C. 106(f); 49 U.S.C. 106(g); 49 U.S.C. 106(l)(6); 49 U.S.C. 40104 to 40105; 49 U.S.C. 40109; 49 U.S.C. 40113 to 40114; 49 U.S.C. 44101 to 44108; 49 U.S.C. 44110 to 44113; 49 U.S.C. 44701 to 44704; 49 U.S.C. 44707; 49 U.S.C. 44709 to 44711; 49 U.S.C. 44713; 49 U.S.C. 45102 to 45103; 49 U.S.C. 45301 to 45302; 49 U.S.C. 45305; 49 U.S.C. 46104; 49 U.S.C. 46301; Pub. L. 108–297, 118 Stat. 1095

Abstract: This rulemaking would establish fees for airman certificates, medical certificates, and provision of legal opinions pertaining to aircraft registration or recordation. This rulemaking also would revise existing fees for aircraft registration, recording of security interests in aircraft or aircraft parts, and replacement of an airman certificate. This rulemaking addresses provisions of the FAA Modernization and Reform Act of 2012. This rulemaking is intended to recover the estimated costs of the various services and activities for which fees would be established or revised.

362. • Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers—Related Aircraft Amendment

Legal Authority: 49 U.S.C. 106(f); 49 U.S.C. 106(g); 49 U.S.C. 40103; 49 U.S.C. 40113; 49 U.S.C. 40119; 49 U.S.C. 41706; 49 U.S.C. 42301

Abstract: This rulemaking would allow air carriers to seek a deviation from the flight simulation training device (FSTD) requirements for related aircraft proficiency checks. In doing so, it corrects an inadvertent omission from the Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers final rule that allowed air carriers to modify training program requirements for flightcrew members operating multiple aircraft types with similar design and flight handling characteristics.

364. +Operation and Certification of Small Unmanned Aircraft Systems

Legal Authority: 49 U.S.C. 44701; Pub. L. 112–95

Abstract: This rulemaking would allow the commercial operation of small unmanned aircraft systems (small UAS) in the National Airspace System (NAS). These changes would address the operation of small unmanned aircraft systems, certification of their operators, registration of the small unmanned aircraft, and display of registration markings. This action would also find airworthiness certification is not required for small unmanned aircraft system operations subject to this rulemaking.

365. Changing the Collective Risk Limits for Launches and Reentries and Clarifying the Risk Limit Used To Establish Hazard Areas for Ships and Aircraft

Legal Authority: 51 U.S.C. 50901 to 50923

Abstract: This rulemaking would revise the requirements that: (1) Establish quantitative public risk acceptability criteria that treat launch and reentry separately; (2) define the scope of launch and reentry mission for the purposes of quantitative risk analyses (QRA); and (3) apply QRA requirements, including uncertainty analysis, equally to all types of launch and reentry vehicles. These revisions update the current regulations and are consistent with current practices at the Federal ranges.

366. Reciprocal Waivers of Claims for Licensed or Permitted Launch and Reentry Activities (RRR)

Legal Authority: 49 U.S.C. 322; 51 U.S.C. 50910 to 50923

Abstract: This rulemaking would ensure customers are waiving claims against all other customers involved in a launch or reentry; reduce the need for

operators to request a partial waiver of the reciprocal waiver of claims requirements and for the FAA to process those requests; and provide a reciprocal waiver template for permittees with no customers, reducing the need for the FAA to assist such a permittee in drafting its cross waivers.

367. • +Prohibition Against Certain Flights in the Simferopol (UKFV) and Dnipropetrovsk (UKDV) Flight Information Regions (FIRS) (Section 610 Review)

Legal Authority: 126 Stat. 11; 49 U.S.C. 106(f); 49 U.S.C. 106(g); 49 U.S.C. 1155; 49 U.S.C. 40101; 49 U.S.C. 40103; 49 U.S.C. 40120; 49 U.S.C. 44101; 49 U.S.C. 44101; 49 U.S.C. 44111; 49 U.S.C. 44701; 49 U.S.C. 44704; 49 U.S.C. 44709; 49 U.S.C. 44711; 49 U.S.C. 44712; 49 U.S.C. 44715 to 44717; 49 U.S.C. 44722; 49 U.S.C. 46306; 49 U.S.C. 46315; 49 U.S.C. 46316; 49 U.S.C. 46504; 49 U.S.C. 46506; 49 U.S.C. 46507; 49 U.S.C. 47122; 49 U.S.C. 47508; 49 U.S.C. 47528 to 47531; 49 U.S.C. 47534; 61 Stat. 1180

Abstract: This action extends the expiration date of the Prohibition Against Certain Flights in the Simferopol (UKFV) and Dnipropetrovsk (UKDV) Flight Information Regions (FIRs). This action is necessary to continue the prohibition on flight operations in the Simferopol (UKFV) and Dnipropetrovsk (UKDV) FIRs by all U.S. air carriers, U.S. commercial operators, persons exercising the privileges of a U.S. airman certificate, except when such persons are operating a U.S.-registered aircraft for a foreign air carrier, and operators of U.S.-registered civil aircraft, except when such operators are foreign air carriers. The FAA finds this action also necessary to address a continuing hazard to persons and aircraft engaged in such flight operations.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION (DOT)

Federal Motor Carrier Safety Administration (FMCSA)

Final Rule Stage

368. +Commercial Driver's License Drug and Alcohol Clearinghouse (MAP–21)

Legal Authority: 49 U.S.C. 31306

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver´s license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the Clearinghouse. Prospective employers, acting on an application for a CDL driver position with the applicant´s written consent to access the Clearinghouse, would query the Clearinghouse to determine if any specific information about the driver applicant is in the Clearinghouse before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT's return-to-duty process before driving CMVs in interstate or intrastate commerce. It is also intended to ensure that employers are meeting their drug and alcohol testing responsibilities. Additionally, provisions in this rulemaking would also be responsive to requirements of the Moving Ahead for Progress in the 21st Century (MAP–21) Act. MAP–21 required creation of the Clearinghouse by 10/1/14.

Federal Motor Carrier Safety Administration (FMCSA)

Long-Term Actions

370. +Carrier Safety Fitness Determination

Legal Authority: 49 U.S.C. 31144; Section 4009 of TEA–21

Abstract: FMCSA proposes to amend the Federal Motor Carrier Safety Regulations (FMCSRs) to adopt revised methodologies that would result in a safety fitness determination (SFD). The proposed methodologies would determine when a motor carrier is not fit to operate commercial motor vehicles (CMVs) in or affecting interstate commerce based on: (1) The carrier's on-road safety performance in relation to five of the Agency's seven Behavioral Analysis and Safety Improvement Categories (BASICs); (2) an investigation; or (3) a combination of on-road safety data and investigation information. The intended effect of this action is to more effectively use FMCSA data and resources to identify unfit motor carriers and to remove them from the Nation's roadways.

Federal Motor Carrier Safety Administration (FMCSA)

Completed Actions

371. • Parts and Accessories Necessary for Safe Operation; Windshield-Mounted Technologies, Final Rule (Section 610 Review)

Legal Authority: Pub. L. 114–94

Abstract: FMCSA amends the Federal Motor Carrier Safety Regulations (FMCSRs) to allow the voluntary mounting of certain devices on the interior of the windshields of commercial motor vehicles (CMVs), including placement within the area that is swept by the windshield wipers. The Fixing America's Surface Transportation (FAST) Act directs FMCSA to amend the FMCSRs to allow, on a permanent basis, devices/technologies the Agency previously determined are likely to achieve a level of safety equivalent to or greater than the level of safety that would be achieved without the devices—FMCSA previously granted limited two-year exemptions for these devices. And the statute provides a definition of ''vehicle safety technology'' which encompasses several technologies the Agency must allow to be installed in the windshield.

373. +Train Crew Staffing and Location

Legal Authority: 28 U.S.C. 2461, note; 49 CFR 1.89; 49 U.S.C. 20103; 49 U.S.C. 20107; 49 U.S.C. 21301 to 21302; 49 U.S.C. 21304

Abstract: This rulemaking would add minimum requirements for the size of different train crew staffs depending on the type of operation. The minimum crew staffing requirements would reflect the safety risks posed to railroad employees, the general public, and the environment. This rulemaking would also establish minimum requirements for the roles and responsibilities of the second train crew member on a moving train, and promote safe and effective teamwork. Additionally, this rulemaking would permit a railroad to submit information to FRA and seek approval if it wants to continue an existing operation with a one-person train crew or start up an operation with less than two crew members.

Proposed Rule Stage

375. +Pipeline Safety: Amendments to Parts 192 and 195 To Require Valve Installation and Minimum Rupture Detection Standards

Legal Authority: 49 U.S.C. 60101 *et seq.*

Abstract: This rule would propose installation of automatic shutoff valves, remote controlled valves, or equivalent technology and establish performance based meaningful metrics for rupture detection for gas and liquid transmission pipelines. The overall intent is that rupture detection metrics will be integrated with ASV and RCV placement with the objective of improving overall incident response. Rupture response metrics would focus on mitigating large, unsafe, uncontrolled release events that have a greater potential consequence. The areas proposed to be covered include High Consequence Areas (HCA) for hazardous liquids and HCA, Class 3 and 4 for natural gas (including could affect areas).

376. • +Hazardous Materials: Sampling and Testing Requirements for Unrefined Petroleum Products

Legal Authority: 49 U.S.C. 5101 *et seq.*

Abstract: This rulemaking proposes to revise the Hazardous Materials Regulations (HMR) to apply particular methods for conducting vapor pressure testing and sampling of unrefined petroleum-based products, such as petroleum crude oil. Specifically, this rulemaking proposes that persons who offer unrefined petroleum-based products for transportation, regardless of mode of transportation, apply particular methods for conducting vapor pressure testing when vapor pressure testing is a component of their written testing program. PHMSA encourages persons to participate in this rulemaking by submitting comments containing relevant information, data, or views.

378. Pipeline Safety: Issues Related to the Use of Plastic Pipe in Gas Pipeline Industry (RRR)

Legal Authority: 49 U.S.C. 60101 *et seq.*

Abstract: In this rule, PHMSA is amending the natural and other gas pipeline safety regulations (49 CFR part 192) to address regulatory requirements involving plastic piping systems used in gas services. These amendments are intended to correct errors, address inconsistencies, and respond to petitions for rulemaking. The requirements in several subject matter areas are affected, including incorporation of tracking and traceability provisions; design factor for polyethylene (PE) pipe; more stringent mechanical fitting requirements; updated and additional regulations for risers; expanded use of Polyamide-11 (PA-11) thermoplastic pipe; incorporation of newer Polyamide-12 (PA-12) thermoplastic pipe; and incorporation of updated and additional standards for fittings.

379. Pipeline Safety: Operator Qualification, Cost Recovery, Accident and Incident Notification, and Other Changes (RRR)

Legal Authority: 49 U.S.C. 60101 *et seq.*

Abstract: PHMSA is amending the pipeline safety regulations to address requirements of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (2011 Act), and to update and clarify certain regulatory requirements. Under the 2011 Act, PHMSA is adding a specific time frame for telephonic or electronic notifications of accidents and incidents and adding provisions for cost recovery for design reviews of certain new projects. Among other provisions, PHMSA is adding a procedure for renewal of expiring special permits, and for submitters of information requesting PHMSA to keep some information confidential. In addition, PHMSA is amending the operator qualification (OQ) requirements, drug and alcohol testing requirements, and incorporating consensus standards by reference for in-line inspection (ILI) and Stress Corrosion Cracking Direct Assessment (SCCDA).

Department of the Treasury

Semiannual Regulatory Agenda

DEPARTMENT OF THE TREASURY

31 CFR Subtitles A and B

Semiannual Agenda and Fiscal Year 2016 Regulatory Plan

AGENCY: Department of the Treasury.

ACTION: Semiannual regulatory agenda and annual regulatory plan.

SUMMARY: This notice is given pursuant to the requirements of the Regulatory Flexibility Act and Executive Order (E.O.) 12866 (''Regulatory Planning and Review''), which require the publication by the Department of a semiannual agenda of regulations. E.O. 12866 also requires the publication by the Department of a regulatory plan for the upcoming fiscal year.

FOR FURTHER INFORMATION CONTACT: The Agency Contact identified in the item relating to that regulation.

SUPPLEMENTARY INFORMATION: The semiannual regulatory agenda includes regulations that the Department has issued or expects to issue and rules currently in effect that are under departmental or bureau review. For this edition of the regulatory agenda, the most important significant regulatory actions and a Statement of Regulatory Priorities are included in the Regulatory Plan, which appears in both the online Unified Agenda and in part II of the **Federal Register** publication that includes the Unified Agenda.

Beginning with the fall 2007 edition, the Internet has been the primary medium for disseminating the Unified Agenda. The complete Unified Agenda will be available online at *www.reginfo.gov* and *www.regulations.gov,* in a format that offers users an enhanced ability to obtain information from the Agenda database. Because publication in the **Federal Register** is mandated for the regulatory flexibility agenda required by the Regulatory Flexibility Act (5 U.S.C. 602), Treasury's printed agenda entries include only:

(1) Rules that are in the regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules that have been identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet. In addition, for fall editions of the Agenda, the entire Regulatory Plan will continue to be printed in the **Federal Register**, as in past years.

Brian J. Sonfield,

Deputy Assistant General Counsel for General Law and Regulation.

Environmental Protection Agency

Semiannual Regulatory Agenda

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Ch. I

[Docket Number EPA–HQ–OA–2016–0203; FRL–9952–35–OP]

Fall 2016 Regulatory Agenda

AGENCY: Environmental Protection Agency.

ACTION: Semiannual regulatory flexibility agenda and semiannual regulatory agenda.

SUMMARY: The Environmental Protection Agency (EPA) publishes the semiannual regulatory agenda online (the e-Agenda) at *http://www.reginfo.gov* and at *www.regulations.gov* to update the public. This document contains information about:

- Regulations in the semiannual regulatory agenda that are under development, completed, or canceled since the last agenda;
- Retrospective reviews of existing regulations; and
- Reviews of regulations with small business impacts under Section 610 of the Regulatory Flexibility Act.

FOR FURTHER INFORMATION CONTACT: If you have questions or comments about a particular action, please get in touch with the agency contact listed in each agenda entry. If you have general questions about the semiannual regulatory agenda, please contact: Caryn Muellerleile (*muellerleile.caryn@epa.gov;* 202–564–2855).

Table of Contents

SUPPLEMENTARY INFORMATION:

I. Introduction

EPA is committed to a regulatory strategy that effectively achieves the Agency's mission of protecting the environment and the health, welfare, and safety of Americans while also supporting economic growth, job creation, competitiveness, and innovation. EPA publishes the Semiannual Regulatory Agenda to update the public about regulatory activity undertaken in support of this mission. Within the Semiannual Regulatory Agenda, EPA provides notice of our plans to review, propose, and issue regulations.

EPA's Semiannual Regulatory Agenda also includes information about rules that may have a significant economic impact on a substantial number of small entities, and review of those regulations under the Regulatory Flexibility Act, as amended.

Within this document, EPA explains in greater detail the types of actions and information available in the Semiannual Regulatory Agenda, the opportunity to suggest regulations that may be appropriate for retrospective review, and actions that are currently undergoing review specifically for impacts on small entities.

A. EPA's Regulatory Information

''E-Agenda,'' ''online regulatory agenda,'' and ''semiannual regulatory agenda'' all refer to the same comprehensive collection of information that, until 2007, was published in the **Federal Register** but now is only available through an online database, at both *www.reginfo.gov/* and *www.regulations.gov.*

''Regulatory Flexibility Agenda'' refers to a document that contains information about regulations that may have a significant impact on a substantial number of small entities. We continue to publish it in the **Federal Register** pursuant to the Regulatory Flexibility Act of 1980. This document is available at *http://www.gpo.gov/fdsys/search/home.action.*

''Unified Regulatory Agenda'' refers to the collection of all agencies' agendas with an introduction prepared by the Regulatory Information Service Center facilitated by the General Service Administration.

''Regulatory Agenda Preamble'' refers to the document you are reading now. It appears as part of the Regulatory Flexibility Agenda and introduces both the Regulatory Flexibility Agenda and the e-Agenda.

''Regulatory Development and Retrospective Review Tracker'' refers to an online portal to EPA's priority rules and retrospective reviews of existing regulations. This portal is available at *www.epa.gov/regdarrt/.*

''Retrospective Review Plan'' is EPA's plan under Executive Orders 13563 and 13610 to periodically review existing regulations to determine whether any may be modified, streamlined, expanded, or repealed in order to make the agency's regulatory program more effective or less burdensome in achieving the regulatory objectives. This Plan and subsequent progress updates are available at *https://www.epa.gov/laws-regulations/retrospective-review-history.*

''610 Review'' is an action EPA is committed to reviewing within ten years of promulgating a final rule that has or may have a significant economic impact on a substantial number of small entities. EPA maintains a list of these actions at *https://www.epa.gov/reg-flex/section-610-reviews.*

B. What key statutes and Executive Orders guide EPA's rule and policymaking process?

A number of environmental laws authorize EPA's actions, including but not limited to:

- Clean Air Act (CAA),
- Clean Water Act (CWA),
- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, or Superfund),
- Emergency Planning and Community Right-to-Know Act (EPCRA),
- Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA),
- Resource Conservation and Recovery Act (RCRA),
- Safe Drinking Water Act (SDWA), and
- Toxic Substances Control Act (TSCA).

Not only must EPA comply with environmental laws, but also administrative legal requirements that apply to the issuance of regulations, such as: The Administrative Procedure Act (APA), the Regulatory Flexibility Act (RFA) as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA), the Unfunded Mandates Reform Act (UMRA), the Paperwork Reduction Act (PRA), the National Technology Transfer and Advancement Act (NTTAA), and the Congressional Review Act (CRA).

EPA also meets a number of requirements contained in numerous Executive Orders: 12866, ''Regulatory Planning and Review'' (58 FR 51735, Oct. 4, 1993), as supplemented by Executive Order 13563, ''Improving Regulation and Regulatory Review'' (76

FR 3821, Jan. 21, 2011); 12898, ''Environmental Justice'' (59 FR 7629, Feb. 16, 1994); 13045, ''Children's Health Protection'' (62 FR 19885, Apr. 23, 1997); 13132, ''Federalism'' (64 FR 43255, Aug. 10, 1999); 13175, ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, Nov. 9, 2000); 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001).

In addition to meeting its mission goals and priorities, EPA reviews its existing regulations under Executive Order 13563, ''Improving Regulation and Regulatory Review'' and Executive Order 13610, ''Identifying and Reducing Regulatory Burdens.'' These Executive orders provide for periodic retrospective review of existing regulations and are intended to determine whether any such regulations should be modified, streamlined, expanded, or repealed, so as to make the Agency's regulatory program more effective or less burdensome in achieving its regulatory objectives.

C. How can you be involved in EPA's rule and policymaking process?

You can make your voice heard by getting in touch with the contact person provided in each agenda entry. EPA encourages you to participate as early in the process as possible. You may also participate by commenting on proposed rules published in the **Federal Register** (FR).

Instructions on how to submit your comments are provided in each Notice of Proposed Rulemaking (NPRM). To be most effective, comments should contain information and data that support your position and you also should explain why EPA should incorporate your suggestion in the rule or other type of action. You can be particularly helpful and persuasive if you provide examples to illustrate your concerns and offer specific alternatives.

EPA believes its actions will be more cost effective and protective if the development process includes stakeholders working with us to help identify the most practical and effective solutions to problems. EPA encourages you to become involved in its rule and policymaking process. For more information about public involvement in EPA activities, please visit *www.epa.gov/open.*

II. Semiannual Regulatory Agenda

A. What actions are included in the e-Agenda and the Regulatory Flexibility Agenda?

EPA includes regulations in the e-Agenda. However, there is no legal significance to the omission of an item from the agenda, and EPA generally does not include the following categories of actions:

- Administrative actions such as delegations of authority, changes of address, or phone numbers;
- Under the CAA: Revisions to state implementation plans; equivalent methods for ambient air quality monitoring; deletions from the new source performance standards source categories list; delegations of authority to states; area designations for air quality planning purposes;
- Under FIFRA: Registration-related decisions, actions affecting the status of currently registered pesticides, and data call-ins;
- Under the Federal Food, Drug, and Cosmetic Act: Actions regarding pesticide tolerances and food additive regulations;
- Under RCRA: Authorization of State solid waste management plans; hazardous waste delisting petitions;
- Under the CWA: State Water Quality Standards; deletions from the section 307(a) list of toxic pollutants; suspensions of toxic testing requirements under the National Pollutant Discharge Elimination System (NPDES); delegations of NPDES authority to States;
- Under SDWA: Actions on State underground injection control programs.

Meanwhile, the Regulatory Flexibility Agenda includes:

- Actions likely to have a significant economic impact on a substantial number of small entities.
- Rules the Agency has identified for periodic review under section 610 of the RFA.

EPA has one ongoing 610 review and is completing one 610 review at this time.

B. How is the e-Agenda organized?

You can choose how to organize the agenda entries online by specifying the characteristics of the entries of interest in the desired individual data fields for both the *www.reginfo.gov* and *www.regulations.gov* versions of the e-Agenda. You can sort based on the following characteristics: EPA subagency; stage of rulemaking, which is explained below; alphabetically by title; and by the Regulation Identifier Number (RIN), which is assigned sequentially when an action is added to the agenda.

Each entry in the Agenda is associated with one of five rulemaking stages. The rulemaking stages are:

1. Prerule Stage—This section includes EPA actions generally intended to determine whether the agency should initiate rulemaking. Prerulemakings may include anything that influences or leads to rulemaking, such as Advance Notices of Proposed Rulemaking (ANPRMs), studies or analyses of the possible need for regulatory action.
2. Proposed Rule Stage—This section includes EPA rulemaking actions that are within a year of proposal (publication of Notices of Proposed Rulemakings [NPRMs]).
3. Final Rule Stage—This section includes rules that will be issued as a final rule within a year.
4. Long-Term Actions—This section includes rulemakings for which the next scheduled regulatory action is after November 2017. We urge you to explore becoming involved even if an action is listed in the Long-Term category.
5. Completed Actions—This section contains actions that have been promulgated and published in the **Federal Register** since publication of the spring 2016 Agenda. It also includes actions that EPA is no longer considering and has elected to ''withdraw.'' EPA also announces the results of any RFA section 610 review in this section of the agenda.

C. What information is in the Regulatory Flexibility Agenda and the e-Agenda?

The Regulatory Flexibility Agenda entries include only the nine categories of information that are required by the Regulatory Flexibility Act of 1980 and by **Federal Register** Agenda printing requirements: Sequence Number, RIN, Title, Description, Statutory Authority, Section 610 Review, if applicable, Regulatory Flexibility Analysis Required, Schedule and Contact Person. Note that the electronic version of the Agenda (E-Agenda) has more extensive information on each of these actions.

E-Agenda entries include:

Title: A brief description of the subject of the regulation. The notation ''Section 610 Review'' follows the title if we are reviewing the rule as part of our periodic review of existing rules under section 610 of the RFA (5 U.S.C. 610).

Priority: Entries are placed into one of five categories described below.

a. Economically Significant: Under Executive Order 12866, a rulemaking that may have an annual effect on the economy of $100 million or more, or adversely affect in a material way the

economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

b. Other Significant: A rulemaking that is not economically significant but is considered significant for other reasons. This category includes rules that may:

1. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

2. Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients; or

3. Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles in Executive Order 12866.

c. Substantive, Nonsignificant: A rulemaking that has substantive impacts but is not Significant, Routine and Frequent, or Informational/Administrative/Other.

d. Routine and Frequent: A rulemaking that is a specific case of a recurring application of a regulatory program in the Code of Federal Regulations (*e.g.,* certain State Implementation Plans, National Priority List updates, Significant New Use Rules, State Hazardous Waste Management Program actions, and Tolerance Exemptions). If an action that would normally be classified Routine and Frequent is reviewed by the Office of Management and Budget under EO 12866, then we would classify the action as either ''Economically Significant'' or ''Other Significant.''

e. Informational/Administrative/Other: An action that is primarily informational or pertains to an action outside the scope of Executive Order 12866.

Major: A rule is ''major'' under 5 U.S.C. 801 (Pub. L. 104–121) if it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act.

Unfunded Mandates: Whether the rule is covered by section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). The Act requires that, before issuing an NPRM likely to result in a mandate that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector of more than $100 million in 1 year.

Legal Authority: The sections of the United States Code (U.S.C.), Public Law (Pub. L.), Executive Order (E.O.), or common name of the law that authorizes the regulatory action.

CFR Citation: The sections of the Code of Federal Regulations that would be affected by the action.

Legal Deadline: An indication of whether the rule is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to a Notice of Proposed Rulemaking, a Final Action, or some other action.

Abstract: A brief description of the problem the action will address.

Timetable: The dates and citations (if available) for all past steps and a projected date for at least the next step for the regulatory action. A date displayed in the form 10/00/16 means the agency is predicting the month and year the action will take place but not the day it will occur. For some entries, the timetable indicates that the date of the next action is ''to be determined.''

Regulatory Flexibility Analysis Required: Indicates whether EPA has prepared or anticipates that it will be preparing a regulatory flexibility analysis under section 603 or 604 of the RFA. Generally, such an analysis is required for proposed or final rules subject to the RFA that EPA believes may have a significant economic impact on a substantial number of small entities.

Small Entities Affected: Indicates whether the rule is anticipated to have any effect on small businesses, small governments or small nonprofit organizations.

Government Levels Affected: Indicates whether the rule may have any effect on levels of government and, if so, whether the governments are State, local, tribal, or Federal.

Federalism Implications: Indicates whether the action is expected to have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

Energy Impacts: Indicates whether the action is a significant energy action under Executive Order 13211.

Sectors Affected: Indicates the main economic sectors regulated by the action. The regulated parties are identified by their North American Industry Classification System (NAICS) codes. These codes were created by the Census Bureau for collecting, analyzing, and publishing statistical data on the U.S. economy. There are more than 1,000 NAICS codes for sectors in agriculture, mining, manufacturing, services, and public administration.

International Trade Impacts: Indicates whether the action is likely to have international trade or investment effects, or otherwise be of international interest.

Agency Contact: The name, address, phone number, and email address, if available, of a person who is knowledgeable about the regulation.

Additional Information: Other information about the action including docket information.

URLs: For some actions, the Internet addresses are included for reading copies of rulemaking documents, submitting comments on proposals, and getting more information about the rulemaking and the program of which it is a part. (Note: To submit comments on proposals, you can go to the associated electronic docket, which is housed at *www.regulations.gov.* Once there, follow the online instructions to access the docket in question and submit comments. A docket identification [ID] number will assist in the search for materials.)

RIN: The Regulation Identifier Number is used by OMB to identify and track rulemakings. The first four digits of the RIN identify the EPA office with lead responsibility for developing the action.

D. How can you find out about rulemakings that start up after the Regulatory Agenda is signed?

EPA posts monthly information of new rulemakings that the Agency's senior managers have decided to develop. This list is also distributed via email. You can find the current list, known as the Action Initiation List (AIL), at *http://www.epa.gov/laws-regulations/actions-initiated-month* where you will also find information about how to get an email notification when a new list is posted.

E. What tools are available for mining Regulatory Agenda data and for finding more about EPA rules and policies?

1. The *http://www.reginfo.gov/* Searchable Database

The Regulatory Information Service Center and Office of Information and Regulatory Affairs have a Federal regulatory dashboard that allows users to view the Regulatory Agenda database (*http://www.reginfo.gov/public/do/eAgendaMain*), which includes search, display, and data transmission options.

2. Subject Matter EPA Web sites

Some actions listed in the Agenda include a URL that provides additional information about the action.

3. Public Dockets

When EPA publishes either an Advance Notice of Proposed Rulemaking (ANPRM) or a Notice of

Proposed Rulemaking (NPRM) in the **Federal Register**, the Agency typically establishes a docket to accumulate materials throughout the development process for that rulemaking. The docket serves as the repository for the collection of documents or information related to a particular Agency action or activity. EPA most commonly uses dockets for rulemaking actions, but dockets may also be used for RFA section 610 reviews of rules with significant economic impacts on a substantial number of small entities and for various non-rulemaking activities, such as **Federal Register** documents seeking public comments on draft guidance, policy statements, information collection requests under the PRA, and other non-rule activities. Docket information should be in that action's agenda entry. All of EPA's public dockets can be located at *www.regulations.gov.*

4. EPA's Regulatory Development and Retrospective Review Tracker

EPA's Regulatory Development and Retrospective Review Tracker (*www.epa.gov/regdarrt/*) serves as a portal to EPA's priority rules, providing you with earlier and more frequently updated information about Agency regulations than is provided by the Regulatory Agenda. It also provides information about retrospective reviews of existing regulations. Not all of EPA's Regulatory Agenda entries appear on Reg DaRRT; only priority rulemakings can be found on this Web site.

III. Review of Regulations Under 610 of the Regulatory Flexibility Act

A. Reviews of Rules With Significant Impacts on a Substantial Number of Small Entities

Section 610 of the RFA requires that an agency review, within 10 years of promulgation, each rule that has or will have a significant economic impact on a substantial number of small entities. At this time, EPA has one ongoing 610 review and is completing one 610 review.

Review title	RIN	Docket ID No.	Status
610 Review of Control of Hazardous Air Pollutants From Mobile Sources	2060–AS88	EPA–HQ–OAR–2016–0175	Complete.
Section 610 Review of Lead-Based Paint Activities; Training and Certification for Renovation and Remodeling Section 402(c)(3).	2070–AK17	EPA–HQ–OPPT–2016–0126	Ongoing.

EPA established official public dockets for these 610 Reviews. EPA is no longer accepting comment on the reviews themselves, but comments received earlier in 2016 can be accessed at *https://www.regulations.gov/* with docket identification number EPA–HQ–OAR–2016–0175 or EPA–HQ–OPPT–2016–0126.

B. What other special attention does EPA give to the impacts of rules on small businesses, small governments, and small nonprofit organizations?

For each of EPA's rulemakings, consideration is given to whether there will be any adverse impact on any small entity. EPA attempts to fit the regulatory requirements, to the extent feasible, to the scale of the businesses, organizations, and governmental jurisdictions subject to the regulation.

Under RFA as amended by SBREFA, the Agency must prepare a formal analysis of the potential negative impacts on small entities, convene a Small Business Advocacy Review Panel (proposed rule stage), and prepare a Small Entity Compliance Guide (final rule stage) unless the Agency certifies a rule will not have a significant economic impact on a substantial number of small entities. For more detailed information about the Agency's policy and practice with respect to implementing RFA/SBREFA, please visit EPA's RFA/SBREFA Web site at *www.epa.gov/reg-flex.*

IV. Thank You for Collaborating With Us

Finally, we would like to thank those of you who choose to join with us in making progress on the complex issues involved in protecting human health and the environment. Collaborative efforts such as EPA's open rulemaking process are a valuable tool for addressing the problems we face, and the regulatory agenda is an important part of that process.

Dated: September 13, 2016.

Shannon Kenny,

Principal Deputy Associate Administrator, Office of Policy.

ENVIRONMENTAL PROTECTION AGENCY (EPA)

10

Prerule Stage

386. Section 610 Review of Control of Hazardous Air Pollutants From Mobile Sources (Completion of a Section 610 Review)

Legal Authority: 5 U.S.C. 610

Abstract: The rulemaking ''Control of Hazardous Air Pollutants From Mobile Sources'' was finalized by the EPA in February 2007 (72 FR 8428, February 26, 2007). This program established stringent new controls on gasoline, passenger vehicles, and gas cans to further reduce emissions of benzene and other mobile source air toxics. The EPA developed a Small Entity Compliance Guide, which provides descriptions of the regulations and small entity provisions, Q&As, and other helpful compliance information. This new entry in the regulatory agenda announces that EPA has reviewed this action pursuant to section 610 of the Regulatory Flexibility Act (5 U.S.C. 610) to determine if the provisions that could affect small entities should be continued without change, or should be rescinded or amended to minimize adverse economic impacts on small entities. As part of this review, EPA solicited comments on the following factors: (1) The continued need for the rule; (2) the nature of complaints or comments received from the public concerning the rule; (3) the complexity of the rule; (4) the extent to which the rule overlaps, duplicates, or conflicts with other Federal, State, or local government rules; and (5) the degree to which the technology, economic conditions or other factors have changed in the area affected by the rule. The EPA received one comment about the program unrelated to the impact of the rulemaking on small entities. The current mobile source air toxics standards program provided substantial flexibility for regulated entities, especially small entities, and does not warrant revision at this time. See EPA's report summarizing the results of this review in the docket EPA–HQ–OAR–2016–0175. This docket can be accessed at *www.regulations.gov.*

Completed Actions

388. Greenhouse Gas Emissions and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles—Phase 2

Legal Authority: 42 U.S.C. 7401 *et seq.* Clean Air Act

Abstract: The EPA and the Department of Transportation, in close coordination with the California Air Resources Board, developed a comprehensive National Program for Medium- and Heavy-Duty Vehicle Greenhouse Gas Emission and Fuel Efficiency Standards for model years beyond 2018. These standards will further reduce greenhouse gas emissions and fuel consumption from a wide range of on-road vehicles from semi-trucks to the largest pickup trucks and vans, and all types and sizes of work trucks and buses. This action is in continued response to the President's directive to take coordinated steps to produce a new generation of clean vehicles and follows the first ever Greenhouse Gas Emissions Standards and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles.

389. Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources

Legal Authority: 42 U.S.C. 7401 *et seq.* Clean Air Act

Abstract: Consistent with the White House Methane Strategy and the January 14, 2015, announcement of the EPA's approach to achieving GHG (in the form of methane) and volatile organic compounds (VOC) reductions from the oil and natural gas sector, this action finalized amendments to the new source performance standards (NSPS) at 40 CFR part 60, subpart OOOO and established new standards at 40 CFR part 60, subpart OOOOa. Amendments to subpart OOOO will improve implementation of the current NSPS. The new standards for the oil and natural gas source category at subpart OOOOa set standards for both greenhouse gases (GHGs) and volatile organic compounds (VOC). Except for the implementation improvements, and the new standards for GHGs, these requirements do not change the requirements for operations covered by the current standards at subpart OOOO. The proposed rule published September 18, 2015 and the final published June 3, 2016.

Prerule Stage

390. Section 610 Review of Lead-Based Paint Activities; Training and Certification for Renovation and Remodeling Section 402(C)(3) (Section 610 Review)

Legal Authority: 5 U.S.C. 610

Abstract: EPA is continuing a review of the 2008 Lead; Renovation, Repair, and Painting Program (RRP) (73 FR 21692) pursuant to section 610 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 610). The rule was amended in 2010 (75 FR 24802) and 2011 (76 FR 47918) to eliminate a provision for contractors to opt-out of prescribed work practices and to affirm the qualitative clearance of renovated or repaired spaces, respectively. Although the section 610 review only needs to address the 2008 RRP Rule, EPA will exercise its discretion to consider relevant comments to the 2010 and 2011 amendments. The RRP rule is intended to reduce exposure to lead hazard created by renovation, repair, and painting activities that disturb lead-based paint. The current rule establishes requirements for training renovators and dust sampling technicians; certifying renovators, dust sampling technicians, and renovation firms; accrediting providers of renovation and dust sampling technician training; and for renovation work practices. As part of this review, EPA is considering public comments on the following factors: (1) The continued need for the rule; (2) the nature of complaints or comments received concerning the rule; (3) the complexity of the rule; (4) the extent to which the rule overlaps, duplicates, or conflicts with other Federal, State, or local government rules; and (5) the length of time since the rule has been evaluated or the degree to which the technology, economic conditions or other factors have changed in the area affected by the rule. This review will also serve as an additional opportunity to provide comment on lead test kits, field testing alternatives and other broader RRP rule concerns as referenced in 80 FR 79335 and 80 FR 27621.

Final Rule Stage

393. Formaldehyde Emission Standards for Composite Wood Products

Legal Authority: 15 U.S.C. 2697 Toxic Substances Control Act

Abstract: The EPA is developing a final rule under the Formaldehyde Standards for Composite Wood Products Act that was enacted in 2010 as title VI of Toxic Substances Control Act (TSCA), 15 U.S.C. 2697. In 2013, EPA issued a proposed rule to establish a framework for a TSCA title VI Third-Party Certification Program whereby third-party certifiers (TPCs) are accredited by accreditation bodies (ABs) so that they may certify composite wood product panel producers under TSCA title VI. That proposed rule identified the roles and responsibilities of the groups involved in the TPC process (EPA, ABs, and TPCs), as well as the criteria for participation in the program. EPA also proposed general requirements for TPCs, such as conducting and verifying formaldehyde emission tests, inspecting and auditing panel producers, and ensuring that panel producers' quality assurance and quality control procedures comply with the regulations set forth in the proposed rule. A separate proposed rule issued in 2013 under RIN 2070–AJ92 covered the implementation of the statutory formaldehyde emission standards for hardwood plywood, medium-density fiberboard, and particleboard sold, supplied, offered for sale, or manufactured (including imported) in the United States. Pursuant to TSCA section 3(7), the definition of ''manufacture'' includes import. As required by title VI, these regulations apply to hardwood plywood, medium-density fiberboard, and particleboard. TSCA title VI also directs EPA to promulgate supplementary provisions to ensure compliance with the emissions standards, including provisions related to labeling; chain of custody requirements; sell-through provisions; ultra low-emitting formaldehyde resins; no-added formaldehyde-based resins; finished goods; third-party testing and certification; auditing and reporting of third-party certifiers; recordkeeping; enforcement; laminated products; and exceptions from the requirements of regulations promulgated pursuant to this subsection for products and components containing de minimis amounts of composite wood products. As noted in the previously published Regulatory Agenda entry for each rulemaking, EPA has decided to issue a single final rule that addresses both of these proposals. As such, EPA also combined the entries for the Regulatory Agenda.

General Services Administration

Semiannual Regulatory Agenda

GENERAL SERVICES ADMINISTRATION

41 CFR Chapters 101, 102, 105, 301, and 304

48 CFR Chapter 5

Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: General Services Administration (GSA).

ACTION: Semiannual Regulatory Agenda.

SUMMARY: This agenda announces the proposed regulatory actions that GSA plans for the next 12 months and those that were completed since the spring 2016 edition. This agenda was developed under the guidelines of Executive Order 12866 ''Regulatory Planning and Review.'' GSA's purpose in publishing this agenda is to allow interested persons an opportunity to participate in the rulemaking process. GSA also invites interested persons to recommend existing significant regulations for review to determine whether they should be modified or eliminated. Published proposed rules may be reviewed in their entirety at the Government's rulemaking Web site at *http://www.regulations.gov.*

Since the fall 2007 edition, the Internet has been the basic means for disseminating the Unified Agenda. The complete Unified Agenda will be available online at *www.reginfo.gov,* in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), GSA's printed agenda entries include only:

(1) Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Any rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet. In addition, for fall editions of the Agenda, the entire Regulatory Plan will continue to be printed in the **Federal Register**, as in past years, including GSA's regulatory plan.

FOR FURTHER INFORMATION CONTACT: Hada Flowers, Division Director, Regulatory Secretariat Division at 202–501–4755.

Dated: September 1, 2016.

Troy Cribb,

Associate Administrator, Office of Government-wide Policy.

Proposed Rule Stage

395. • General Services Administration Acquisition Regulation (GSAR); GSAR 2016–G506, Federal Supply Schedule, Order-Level Materials

Legal Authority: 40 U.S.C. 121(c)

Abstract: The General Services Administration (GSA) is proposing to amend the General Services Administration Acquisition Regulation (GSAR) to clarify the authority to acquire order-level materials when placing a task order or establishing a Blanket Purchase Agreement (BPA) against a Federal Supply Schedule (FSS) contract. This proposed rule seeks to provide clear and comprehensive implementation of the ability to acquire order-level materials through the FSS program to create parity between FSS contracts and commercial indefinite-delivery/indefinite-quantity (IDIQ) contracts, reduce the need to conduct less efficient procurement transactions, lower barriers of entry to the federal marketplace and make it easier to do business the federal government.

Final Rule Stage

396. General Services Administration Acquisition Regulation (GSAR); GSAR Case 2015–G512, Unenforceable Commercial Supplier Agreement Terms

Legal Authority: 40 U.S.C. 121(c)

Abstract: GSA is amending the General Services Administration Acquisition Regulation (GSAR) to streamline the evaluation process to award contracts containing commercial supplier agreements Government and industry often spend significant time negotiating elements common in almost every commercial supplier agreement where the terms conflict with federal law. Past negotiations would always lead to deleting the terms from the contract, but only after several rounds of legal review by both parties. This case would explore methods for automatically nullifying these common terms out of contracts.

Completed Actions

397. General Services Administration Acquisition Regulation (GSAR); GSAR Case 2010–G511, Purchasing by Non-Federal Entities

Legal Authority: 40 U.S.C. 121(c)

Abstract: The General Services Administration (GSA) amended the General Services Administration Acquisition Regulation (GSAR) to implement the Federal Supply Schedules Usage Act of 2010 (FSSUA), the Native American Housing Assistance and Self-Determination Reauthorization Act of 2008 (NAHASDA), the John Warner National Defense Authorization Act for Fiscal Year 2007 (NDAA), and the Local Preparedness Acquisition Act for Fiscal Year 2008 (LPAA), to provide increased access to GSA's Federal Supply Schedules (Schedules). GSA also amended the Federal Supply Schedule Contracting and Solicitation Provisions and Contract Clauses, in regard to this statutory implementation. This case is included in GSA's retrospective review of existing regulations under Executive Order 13563. Additional information is located in GSA's retrospective review (2016), available at: *www.gsa.gov/improvingregulations.*

RIN: 3090–AJ43

398. General Services Administration Acquisition Regulation (GSAR); GSAR Case 2013–G504, Transactional Data Reporting

Legal Authority: 40 U.S.C. 121(c)

Abstract: The General Services Administration (GSA) amended the General Services Administration Acquisition Regulation (GSAR) to include clauses that require vendors to report transactional data from orders placed against certain Federal Supply Schedule (FSS) contracts, Governmentwide Acquisition Contracts (GWACs), and Governmentwide Indefinite-Delivery, Indefinite-Quantity (IDIQ) contracts.

Transactional data refers to the information generated when the Government purchases goods or services from a vendor. It includes specific details such as descriptions, part numbers, quantities, and prices paid for the items purchased. GSA has experimented with collecting transactional data through some of its contracts and found it instrumental for improving competition, lowering pricing, and increasing transparency. Accordingly, GSA will now test these principles on a broader base of its contracting programs. This move supports the Government's shift towards category management by allowing it to centrally analyze what it buys and how much it pays, and thereby identify the most efficient solutions, channels, and sources to meet its mission critical needs.

GSA will introduce a new Transactional Data Reporting clause to its FSS contracts in phases, beginning with a pilot for select Schedules and Special Item Numbers. Participating vendors will no longer be subject to the existing requirements for Commercial Sales Practices (CSP) disclosures and Price Reductions clause (PRC) basis of award monitoring, resulting in a substantial burden reduction. Stakeholders have identified the CSP and PRC requirements as some of the most burdensome under the Schedules program. These actions represent the most significant change to the Schedules program in the past two decades. GSA has also created a Transactional Data Reporting clause for all new GWACs and Governmentwide IDIQ contracts and may apply the clause to any existing contracts in this class that do not contain other transactional data requirements.

In all, the Transactional Data Reporting rule will result in an estimated burden reduction of $29 million a year, which consists of a projected $15 million a year compliance burden minus the estimated $44 million a year burden for the CSP and PRC requirements being waived for vendors participating in the FSS pilot.

Semiannual Regulatory Agenda

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Ch. V

Regulatory Agenda

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Semiannual regulatory agenda.

SUMMARY: NASA's regulatory agenda describes those regulations being considered for development or amendment by NASA, the need and legal basis for the actions being considered, the name and telephone number of the knowledgeable official, whether a regulatory analysis is required, and the status of regulations previously reported.

ADDRESSES: Deputy Associate Administrator, Office Mission Support Directorate, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Cheryl E. Parker, (202) 358–0252.

SUPPLEMENTARY INFORMATION: OMB guidelines dated July 27, 2016, ''Fall 2016 Data Call for the Regulatory Plan and Unified Agenda of Federal Regulatory and Deregulatory Actions,'' require a regulatory agenda of those regulations under development and review to be published in the **Federal Register** each spring and fall.

Dated: September 2, 2016.

Daniel Tenney,

Deputy Associate Administrator, Office of the Mission Support Directorate.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—FINAL RULE STAGE

399	Processing of Monetary Claims (Section 610 Review)	2700–AD83

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

Final Rule Stage

399. Processing of Monetary Claims (Section 610 Review)

Legal Authority: 31 U.S.C. sec. 3711

Abstract: NASA is amending its regulations at 14 CFR 1261 to make non-substantive changes in the amount to collect installment payments from $20,000 to $100,000 to align with title 31 subchapter II Claims of the United States Government section 3711(a)(2) Collection and Compromise. Subpart 4 prescribes standards for the administrative collection compromise suspension or termination of collection and referral to the Government Accountability Office (GAO) and/or to the Department of Justice for litigation of civil claims as defined by 31 U.S.C. 3701(b) arising out of the activities of designated NASA officials authorized to effect actions and requires compliance with GAO/DOJ joint regulations at 4 CFR parts 101–105 and the Office of Personnel Management regulations at 5 CFR part 550 subpart K. There are also some statute citation and terminology updates. The revisions to this rule are part of NASA's retrospective plan under Executive Order 13563 completed in August 2011.

Small Business Administration

Semiannual Regulatory Agenda

SMALL BUSINESS ADMINISTRATION

13 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: U.S. Small Business Administration.

ACTION: Semiannual regulatory agenda.

SUMMARY: This Regulatory Agenda is a semiannual summary of all current and projected rulemakings and completed actions of the Small Business Administration (SBA). SBA expects that this summary information will enable the public to be more aware of, and effectively participate in, SBA's regulatory activity. SBA invites the public to submit comments on any aspect of this Agenda.

FOR FURTHER INFORMATION CONTACT:

General: Please direct general comments or inquiries to Imelda A. Kish, Law Librarian, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416, (202) 205–6849, *imelda.kish@sba.gov.*

Specific: Please direct specific comments and inquiries on individual regulatory activities identified in this Agenda to the individual listed in the summary of the regulation as the point of contact for that regulation.

SUPPLEMENTARY INFORMATION: SBA provides this notice under the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 to 612 and Executive Order 12866, ''Regulatory Planning and Review,'' which require each agency to publish a semiannual agenda of regulations. The Regulatory Agenda is a summary of all current and projected Agency rulemakings, as well as actions completed since the publication of the last Regulatory Agenda. SBA's last Semiannual Regulatory Agenda was published on June 9, 2016, at 81 FR 37392. The Semiannual Agenda of the SBA conforms to the Unified Agenda format developed by the Regulatory Information Service Center. The complete Unified Agenda will be available online at *www.reginfo.gov* in a format that greatly enhances a user's ability to obtain information about the rules in SBA's Agenda.

The Regulatory Flexibility Act requires federal agencies to publish those regulatory actions that are likely to have a significant economic impact on a substantial number of small entities in their regulatory flexibility agendas in the **Federal Register**. SBA's Regulatory Agenda includes regulatory actions that are in the SBA's regulatory flexibility agenda. Publication of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet.

Maria Contreras-Sweet,

Administrator.

401. Small Business HUBZone Program; Government Contracting Programs; Office of Hearings and Appeals

Legal Authority: 15 U.S.C. 657a

Abstract: SBA has been reviewing its processes and procedures for implementing the HUBZone program and has determined that several of the regulations governing the program should be amended in order to resolve certain issues that have arisen. As a result, the proposed rule would constitute a comprehensive revision of part 126 of SBA's regulations to clarify current HUBZone Program regulations, and implement various new procedures. The amendments will make it easier for participants to comply with the program requirements and enable them to maximize the benefits afforded by participation. In developing this proposed rule, SBA will focus on the principles of Executive Order 13563 to determine whether portions of regulations should be modified, streamlined, expanded or repealed to make the HUBZone program more effective and/or less burdensome on small business concerns. At the same time, SBA will maintain a framework that helps identify and reduce waste, fraud, and abuse in the program.

402. Record Disclosure and Privacy

Legal Authority: 5 U.S.C. 301, 552 and 552(a); 31 U.S.C. 9701; 44 U.S.C. 3501 *et seq.;* E.O. 12600; 52 FR 23781

Abstract: SBA proposes to amend its Record Disclosure and Privacy regulations to implement the Openness Promotes Effectiveness in our National Government Act and the FOIA Improvement Act of 2016. The amendments, among other things, will update the Agency's Freedom of Information Act regulations to adjust the time for the public to submit an appeal of SBA's decision regarding a request for information, correct an obsolete address and provide applicable Web site addresses, and clarify the definition of news media for purposes of assessing processing fees.

RIN: 3245–AG52

403. Small Business Timber Set-Aside Program

Legal Authority: 15 U.S.C. 631; 15 U.S.C. 644(a)

Abstract: The U.S. Small Business Administration (SBA or Agency) is proposing to amend its Small Business Timber Set-Aside Program (the Program) regulations. The Small Business Timber Set-Aside Program is rooted in the Small Business Act, which tasked SBA with ensuring that small businesses receive a fair proportion of the total sales of government property. Accordingly, the Program requires Timber sales to be set aside for small business when small business participation falls below a certain amount. SBA is considering comments received during the ANPRM process, including on issues such as, but not limited to, whether the saw timber volume purchased through stewardship timber contracts should be included in calculations, and whether the appraisal point used in set-aside sales should be the nearest small business mill. In addition, SBA is considering data from the timber industry to help evaluate the current program and economic impact of potential changes.

404. Women-Owned Small Business and Economically Disadvantaged Women-Owned Small Business—Certification

Legal Authority: Pub. L. 113–291, sec. 825; 15 U.S.C. 637(m)

Abstract: Section 825 of the National Defense Authorization Act for Fiscal Year 2015 (NDAA), Public Law 113–291, 128 Stat. 3292, Dec. 19, 2014, included language requiring that women-owned small business concerns and economically disadvantaged women-owned small business concerns are certified by a Federal agency, a State government, the Administrator, or national certifying entity approved by the Administrator as a small business concern owned and controlled by women. SBA is issuing this Advance Notice of Proposed Rulemaking to get public feedback on how best to implement this statutory provision. SBA

intends to request information on whether SBA should: Create its own certification program, rely on private certifiers, allow Federal agencies to create their own certification systems, or create a hybrid system. SBA also intends to request information from the public concerning State government certification programs.

405. Disaster Loan Programs; Federal Flood Risk Management Standard

Legal Authority: 15 U.S.C. 634(b)(6); E.O. 11988; E.O. 13690

Abstract: In accordance with Executive Order 11988, Floodplain Management, as amended by Executive Order 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input, SBA will propose a rule to describe which disaster loans are subject to the FFRMS. SBA will propose to apply the FFRMS and corresponding elevation component to disaster loans that meet one of the following conditions: (1) SBA funds will be used for total real estate reconstruction at the damaged site that is located in the Special Flood Hazard Area (SFHA); (2) SBA funds will be used for new real estate construction at a relocation site that is located in the SFHA; or (3) SBA funds will be used for code required elevation at the damaged site that is located in the SFHA.

SMALL BUSINESS ADMINISTRATION (SBA)

Final Rule Stage

406. Miscellaneous Amendments to Business Loan Programs and Surety Bond Guarantee Program

Legal Authority: 15 U.S.C. 636(a); 15 U.S.C. 694b

Abstract: Certain lenders have been delegated the authority to make loan decisions without prior approval from SBA under certain circumstances. SBA plans to formalize such delegated authorities in this proposed rule. Several minor modifications to the 504 Loan Program and governance rules for Certified Development Company (CDC) are also proposed in a follow-on to the Final Rule: 504 and 7(a) Loan Program Updates (March 21, 2014), along with alignment of terminology for 7(a) lenders that are federally regulated to synchronize with existing industry requirements. SBA plans to propose several other miscellaneous amendments to improve oversight and operations of its finance programs.

This rule proposes to make four changes to the Surety Bond Guarantee (SBG) Program. The first would change the threshold for notification to SBA of changes in the contract or bond amount. Second, the change would require sureties to submit quarterly contract completion reports. Third, SBA proposes to increase the eligible contract limit for the Quick Bond Application and Agreement from $250,000 to $400,000. Finally, SBA proposes to increase the guarantee percentage in the Preferred Surety Bond program to reflect the statutory change made by the National Defense Authorization Act of 2016. The guarantee percentage will increase from 70% to 80% or 90%, depending on contract size and socioeconomic factors currently in effect in the Prior Approval Program.

407. Agent Revocation and Suspension Procedures

Legal Authority: 15 U.S.C. 634; 15 U.S.C. 642

Abstract: This rule establishes detailed procedures for the suspension and revocation of an Agent's privilege to do business with the United States Small Business Administration (SBA) within a single Part of the Code of Federal Regulations; removes 8(a) program specific procedures for Agent suspension and revocation; clarifies existing and related regulations as to suspension, revocation, and debarment; and removes Office of Hearings and Appeals jurisdiction over Agent suspensions and revocations and government-wide debarment and suspension actions. This rule will also conform SBA suspension and revocation procedures for Agents with general government-wide nonprocurement suspension and debarment procedures.

409. Small Business Investment Companies; Passive Business Expansion & Technical Clarifications

Legal Authority: 15 U.S.C. 681 *et seq.*

Abstract: The SBA is revising the regulations for the Small Business Investment Company (SBIC) program to

further expand the use of Passive Businesses and provide needed protections for SBA with regard to such investments. SBICs are generally prohibited from investing in passive businesses under the Small Business Investment Act of 1958 as amended as well as by regulations. Current program regulations provided for two exceptions that allow an SBIC to structure an investment utilizing a passive small business as a pass-through. The first exception identified in 107.720(b)(2) provides that an SBIC may structure an investment utilizing two pass-through entities to make an investment into an active business. The second exception identified in 107.720(b)(3) allows partnership SBICs with SBA prior approval to invest in a wholly owned passive business that in turn provides financing to an active small business only if a direct financing would cause its investors to incur Unrelated Business Taxable Income (UBTI). The second exception is commonly known as a blocker corporation. The current rule creates unnecessary complications in defining two exceptions and does not provide SBA with sufficient protections. SBA is simplifying the rule to allow a more flexible two pass-through entity structure but provides SBA certain protections to offset risks associated with passive investment structures. As part of the rule, SBA will also make technical corrections and clarifications, including conforming the regulation to the new ''family of funds'' statutory provision.

410. Credit for Lower Tier Small Business Subcontracting

Legal Authority: Pub. L. 113–66, sec. 1614

Abstract: The U.S. Small Business Administration (SBA or Agency) is proposing to amend its regulations to implement section 1614 of the National Defense Authorization Act (NDAA) of 2014, Pub. L. 113–66, December 26, 2013. Under the statute, when an other than small prime contractor has an individual subcontracting plan for a contract, the large business may receive credit towards its small business subcontracting goals for subcontract awards made to small business concerns at any tier. Currently, other than small business prime contractors only report on their performance awarding subcontracts to small businesses at the first tier level.

SMALL BUSINESS ADMINISTRATION (SBA)

Long-Term Actions

411. Immediate, Expedited, and Private Disaster Assistance Loan Programs

Legal Authority: 15 U.S.C. 636(c); 15 U.S.C. 636j; 15 U.S.C. 657n

Abstract: Through this advanced notice of proposed rulemaking, SBA solicited comments from potential lenders and the public on three guaranteed disaster loan programs: (1) The expedited disaster assistance program (EDAP), under which the SBA would guarantee short-term loans of up to $150,000 made by private lenders to eligible small businesses located in a catastrophic disaster area; (2) the private disaster assistance program (PDAP), under which SBA would guarantee loans of up to $2 million made by private lenders to eligible small businesses and homeowners located in a catastrophic disaster area; and (3) the immediate disaster assistance program (IDAP), under which the SBA would guarantee interim loans of up to $25,000 made by private lenders to eligible small businesses, which would then be repaid with the proceeds of SBA direct disaster loans. SBA will seek input on what program features would be required for lenders to participate in these guaranteed disaster loan programs. SBA plans to use this feedback in drafting proposed rules for the EDAP and PDAP programs and in considering changes to the existing IDAP regulations.

412. Small Business Size Standards; Alternative Size Standard for 7(a), 504, and Disaster Loan Programs

Legal Authority: Pub. L. 111–240, sec. 1116

Abstract: SBA will amend its size eligibility criteria for Business Loans, certified development company (CDC) loans under title V of the Small Business Investment Act (504) and economic injury disaster loans (EIDL). For the SBA 7(a) Business Loan Program and the 504 program, the amendments will provide an alternative size standard for loan applicants that do not meet the small business size standards for their industries. The Small Business Jobs Act of 2010 (Jobs Act) established alternative size standards that apply to both of these programs until SBA's Administrator establishes other alternative size standards. For the disaster loan program, the amendments will provide an alternative size standard for loan applicants that do not meet the Small Business Size Standard for their industries. These alternative size standards do not affect other Federal Government programs, including Federal procurement.

413. Small Business Mentor-Protégé Programs

Legal Authority: Pub. L. 111–240; sec. 1347; 15 U.S.C. 657r

Abstract: The U.S. Small Business Administration (SBA or Agency) is amending its regulations to implement provisions of the Small Business Jobs Act of 2010 and the National Defense Authorization Act for Fiscal Year 2013. Based on authorities provided in these two statutes, the rule establishes a Government-wide mentor-protégé program for all small business concerns, consistent with SBA's mentor-protégé program for Participants in SBA's 8(a) Business Development (BD) program. The rule also makes minor changes to the mentor-protégé provisions for the 8(a) Business Development program in order to make the mentor-protégé rules for each of the programs as consistent as possible. The rule amends the current joint venture provisions to clarify the conditions for creating and operating joint venture partnerships, including the effect of such partnerships on any mentor-protégé relationships. Finally, the rule makes several additional changes to current size, 8(a) Office of Hearings and Appeals or HUBZone regulations, concerning among other things, ownership and control, changes in primary industry, standards of review and interested party status for some appeals.

414. Small Business Government Contracting and National Defense Authorization Act of 2013 Amendments

Legal Authority: 15 U.S.C. 631; Pub. L. 112–239

Abstract: The U.S. Small Business Administration (SBA or Agency) is amending its regulations to implement provisions of the National Defense Authorization Act of 2013, which pertain to performance requirements applicable to small business and socioeconomic program set aside contracts and small business subcontracting. SBA is making changes to its regulations concerning the nonmanufacturer rule and affiliation rules. Further, SBA is allowing a joint venture to qualify as small for any government procurement as long as each partner to the joint venture qualifies individually as small under the size standard corresponding to the NAICS code assigned in the solicitation.

415. Affiliation for Business Loan Programs and Surety Bond Guarantee Program

Legal Authority: 15 U.S.C. 634(b)(6)

Abstract: The U.S. Small Business Administration (SBA) has determined that changing conditions in the American economy and a constantly evolving small business community compel it to seek ways to improve program efficiency for its Surety Bond Guarantee (SBG) Program, and the business loan programs consisting of the 7(a) Loan Program, the Business Disaster Loan Programs (the Economic Injury Disaster Loans, Reservist Injury Disaster Loans, Physical Disaster Business Loans, Immediate Disaster Assistance Program loans), the Microloan Program, and the Development Company Program (the 504 Loan Program). As a result, SBA is simplifying guidelines for determining affiliation for eligibility based on size as it relates to these programs. This rule redefines affiliation for all five Programs, thereby simplifying eligibility determinations.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Ch. 1

Semiannual Regulatory Agenda

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of regulations being developed by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council in compliance with Executive Order 12866 ''Regulatory Planning and Review.'' This agenda is being published to allow interested persons an opportunity to participate in the rulemaking process. The Regulatory Secretariat Division has attempted to list all regulations pending at the time of publication, except for minor and routine or repetitive actions; however, unanticipated requirements may result in the issuance of regulations that are not included in this agenda. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the dates shown.

Published proposed rules may be reviewed in their entirety at the Government's rulemaking Web site at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Hada Flowers, Director, Regulatory Secretariat Division, 1800 F Street NW., 2nd Floor, Washington, DC 20405–0001, 202–501–4755.

SUPPLEMENTARY INFORMATION: DoD, GSA, and NASA, under their several statutory authorities, jointly issue and maintain the FAR through periodic issuance of changes published in the **Federal Register** and produced electronically as Federal Acquisition Circulars (FACs).

The electronic version of the FAR, including changes, can be accessed on the FAR Web site at *http://www.acquisition.gov/far.*

Dated: August 29, 2016.

William Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

DEPARTMENT OF DEFENSE/ GENERAL SERVICES ADMINISTRATION/NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (FAR)

Final Rule Stage

421. Federal Acquisition Regulation (FAR); FAR Case 2011–001; Organizational Conflicts of Interest and Unequal Access to Information

Legal Authority: 40 U.S.C. 121(c); 10 U.S.C. ch. 137; 51 U.S.C. 20113

Abstract: DoD, GSA, and NASA are issuing a final rule amending the Federal Acquisition Regulation (FAR) to provide revised regulatory coverage on organizational conflicts of interest (OCIs), and add related provisions and clauses. Coverage on contractor access to protected information has been moved to a new proposed rule, FAR Case 2012–029 now FAR Case 2014–021. Section 841 of the Duncan Hunter National Defense Authorization Act for fiscal year 2009 (Pub. L. 110–417) required a review of the FAR coverage on OCIs. The proposed rule was developed as a result of a review conducted in accordance with section 841 by the Civilian Agency Acquisition Council, the Defense Acquisition Regulations Council, and the Office of Federal Procurement Policy, in consultation with the Office of Government Ethics. The proposed rule was preceded by an Advance Notice of Proposed Rulemaking, under FAR Case 2007–018 (73 FR 15962), to gather comments from the public with regard to whether and how to improve the FAR coverage on OCIs. This case is included in the FAR retrospective review of existing regulations under Executive Order 13563. Additional information is located in the FAR final plan (2016), available at: *https://www.acquisition.gov/.*

423. Federal Acquisition Regulation (FAR); FAR Case 2012–025; Applicability of the Senior Executive Compensation Benchmark

Legal Authority: 40 U.S.C. 121(c); 10 U.S.C. ch. 137; 51 U.S.C. 20113

Abstract: DoD, GSA, and NASA are issuing a final rule to amend the Federal Acquisition Regulation (FAR) to continue the implementation of the requirements of section 803 of the National Defense Authorization Act for Fiscal Year 2012. The proposed rule seeks public comments on the retroactive application of section 803 to contracts that had been awarded by DoD, NASA, and the Coast Guard before the date of enactment of section 803 (which was December 31, 2011). In addition, also as part of the implementation in the FAR of section 803, DoD, GSA, and NASA are separately issuing an interim rule (FAR Case 2012–017) that addresses the prospective application of section 803 to contracts awarded on or after December 31, 2011.

Legal Authority: 40 U.S.C. 121(c); 10 U.S.C. ch. 137; 51 U.S.C. 20113

Abstract: DoD, GSA, and NASA issued a final rule to amend the Federal Acquisition Regulation (FAR) to implement regulatory changes made by the Small Business Administration (SBA) in its final rule, concerning small business subcontracting. Among other things, SBA's final rule implements the statutory requirements set forth at sections 1321 and 1322 of the Small Business Jobs Act of 2010. This case is included in the FAR retrospective review of existing regulations under Executive Order 13563. Additional information is located in the FAR final plan (2016), available at: *https://www.acquisition.gov/*.

438. Federal Acquisition Regulation (FAR); FAR Case 2011–020; Basic Safeguarding of Contractor Information Systems

Legal Authority: 40 U.S.C. 121(c); 10 U.S.C. ch. 137; 51 U.S.C. 20113

Abstract: DoD, GSA, and NASA issued a final rule that amended the Federal Acquisition Regulation (FAR) to add a new subpart and contract clause for the basic safeguarding of contractor information systems that process, store or transmit Federal contract information. The clause does not relieve the contractor of any other specific safeguarding requirement specified by Federal agencies and departments as it relates to covered contractor information systems generally or other Federal requirements for safeguarding oControlled Unclassified Information (CUI) as established by Executive Order (E.O.). Systems that contain classified information, or CUI such as personally identifiable information, require more than the basic level of protection.

Legal Authority: 40 U.S.C. 121(c); 10 U.S.C. ch. 137; 51 U.S.C. 20113

Abstract: DoD, GSA and NASA are issuing a final rule amending the Federal Acquisition Regulation to implement section 702 of the Bipartisan Budget Act of 2013. In accordance with section 702, the interim rule revises the allowable cost limit relative to the compensation of contractor and subcontractor employees. Also, in accordance with section 702, this interim rule implements the possible exception to this allowable cost limit for narrowly targeted scientists, engineers, or other specialists upon an agency determination that such exceptions are needed to ensure that the executive agency has continued access to needed skills and capabilities.

Commodity Futures Trading Commission

Semiannual Regulatory Agenda

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. I

Regulatory Flexibility Agenda

AGENCY: Commodity Futures Trading Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Commodity Futures Trading Commission (Commission), in accordance with the requirements of the Regulatory Flexibility Act, is publishing a semiannual agenda of rulemakings that the Commission expects to propose or promulgate over the next year. The Commission welcomes comments from small entities and others on the agenda.

FOR FURTHER INFORMATION CONTACT: Christopher J. Kirkpatrick, Secretary of the Commission, (202) 418–5964, *ckirkpatrick@cftc.gov,* Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (RFA), 5 U.S.C. 601, *et seq.,* includes a requirement that each agency publish semiannually in the **Federal Register** a regulatory flexibility agenda. Such agendas are to contain the following elements, as specified in 5 U.S.C. 602(a):

(1) A brief description of the subject area of any rule that the agency expects to propose or promulgate, which is likely to have a significant economic impact on a substantial number of small entities;

(2) A summary of the nature of any such rule under consideration for each subject area listed in the agenda, the objectives and legal basis for the issuance of the rule, and an approximate schedule for completing action on any rule for which the agency has issued a general notice of proposed rulemaking; and

(3) The name and telephone number of an agency official knowledgeable about the items listed in the agenda.

Accordingly, the Commission has prepared an agenda of rulemakings that it presently expects may be considered during the course of the next year. Subject to a determination for each rule, it is possible as a general matter that some of these rules may have some impact on small entities.[1] The Commission notes also that, under the RFA, it is not precluded from considering or acting on a matter not included in the regulatory flexibility agenda, nor is it required to consider or act on any matter that is listed in the agenda. See 5 U.S.C. 602(d).

The Commission's Fall 2016 regulatory flexibility agenda is included in the Unified Agenda of Federal Regulatory and Deregulatory Actions. The complete Unified Agenda will be available online at *www.reginfo.gov,* in a format that offers users enhanced ability to obtain information from the Agenda database.

Issued in Washington, DC, on September 28, 2016, by the Commission.

Christopher J. Kirkpatrick,

Secretary of the Commission.

Legal Authority: 7 U.S.C. 1a(23), 7 U.S.C. 6c(a); 7 U.S.C. 7(d); and 7 U.S.C. 12(a)(5)

Abstract: On December 17, 2015, the Commission published a notice of proposed rulemaking (''NPRM'') titled ''Regulation Automated Trading.'' Regulation Automated Trading proposes a series of risk controls, transparency measures and other safeguards to enhance the regulatory regime for automated trading on U.S. designated contract markets. The initial comment period was open through March 16, 2016, and was re-opened from June 10 through June 24, 2016. After evaluating all comments received, the Commission is now considering publishing a supplemental NPRM to incorporate comments and make certain amendments to its proposal.

455. • Indemnification Rulemaking

Legal Authority: CEA 8a(5) and 21

Abstract: The FAST Act repealed CEA 21(d)(2), added to the CEA by Dodd-Frank 728, which provided that domestic and foreign regulators that are

[1] The Commission published its definition of a ''small entity'' for purposes of rulemaking proceedings at 47 FR 18618 (April 30, 1982). Pursuant to that definition, the Commission is not required to list—but nonetheless does—many of the items contained in this regulatory flexibility agenda. *See also* 5 U.S.C. 602(a)(1). Moreover, for certain items listed in this agenda, the Commission has previously certified, under section 605 of the RFA, 5 U.S.C. 605, that those items will not have a significant economic impact on a substantial number of small entities. For these reasons, the listing of a rule in this regulatory flexibility agenda should not be taken as a determination that the rule, when proposed or promulgated, will in fact require a regulatory flexibility analysis. Rather, the Commission has chosen to publish an agenda that includes significant and other substantive rules, regardless of their potential impact on small entities, to provide the public with broader notice of new or revised regulations the Commission may consider and to enhance the public's opportunity to participate in the rulemaking process.

otherwise eligible to, and that do, request data from an SDR (collectively Regulators) agree to indemnify the SDR and the CFTC for expenses resulting from litigation relating to the information provided. When considered in light of the CFTC's current regulations addressing Regulators' access to SDR data, the removal of the indemnification requirement presents a number of issues, primarily related to the scope of Regulators' access to SDR data, and maintaining the confidentiality of such data consistent with CEA 8. The Commission plans to address these issues in a notice of proposed rulemaking (NPRM) that revises the current approach to Regulators' access to SDRs' swap data and set forth more information regarding the confidentiality agreement that is required by CEA 21(d).

Part XXIII

Bureau of Consumer Financial Protection

Semiannual Regulatory Agenda

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Ch. X

Semiannual Regulatory Agenda

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Bureau of Consumer Financial Protection (CFPB or Bureau) is publishing this agenda as part of the Fall 2016 Unified Agenda of Federal Regulatory and Deregulatory Actions. The CFPB reasonably anticipates having the regulatory matters identified below under consideration during the period from November 1, 2016 to October 31, 2017. The next agenda will be published in spring 2017 and will update this agenda through spring 2018. Publication of this agenda is in accordance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

DATES: This information is current as of October 19, 2016.

ADDRESSES: Bureau of Consumer Financial Protection, 1700 G Street NW., Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: A staff contact is included for each regulatory item listed herein.

SUPPLEMENTARY INFORMATION: The CFPB is publishing its fall 2016 agenda as part of the Fall 2016 Unified Agenda of Federal Regulatory and Deregulatory Actions, which is coordinated by the Office of Management and Budget under Executive Order 12866. The CFPB's participation in the Unified Agenda is voluntary. The complete Unified Agenda is available to the public at the following Web site: *http://www.reginfo.gov.*

Pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (Dodd-Frank Act), the CFPB has rulemaking, supervisory, enforcement, and other authorities relating to consumer financial products and services. These authorities include the ability to issue regulations under more than a dozen Federal consumer financial laws, which was transferred to the CFPB from seven Federal agencies on July 21, 2011. The CFPB is working on a wide range of initiatives to address issues in markets for consumer financial products and services that are not reflected in this notice because the Unified Agenda is limited to rulemaking activities.

The CFPB reasonably anticipates having the regulatory matters identified below under consideration during the period from November 1, 2016, to October 31, 2017.[1] Among the Bureau's more significant regulatory efforts are the following.

Bureau Regulatory Efforts in Various Consumer Markets

The Bureau is working on a number of rulemakings to address important consumer protection issues in a wide variety of markets for consumer financial products and services, including mortgages, debt collection, credit cards, and installment lending, among others.

For example, in May 2016, the Bureau issued a Notice of Proposed Rulemaking concerning the use of agreements between a covered person and a consumer for a consumer financial product or service providing for arbitration of any future disputes. The rulemaking follows on a report that the Bureau issued to Congress in March 2015, as required by the Dodd-Frank Act, as well as on preliminary results of arbitration research that were released by the Bureau in December 2013. The proposal would prohibit covered providers of certain consumer financial products and services from using an arbitration agreement to bar the consumer from filing or participating in a class action. Under the proposal, companies would still be able to include arbitration clauses in their contracts. However, for contracts subject to the proposal, the clauses would have to say explicitly that they cannot be used to stop consumers from being part of a class action in court. The proposal would also require a covered provider that has an arbitration agreement and that is involved in arbitration pursuant to a pre-dispute arbitration agreement to submit specified arbitral records to the Bureau. The deadline for comments on the Notice of Proposed Rulemaking was August 22, 2016. As the Bureau considers development of a final rule for spring 2017, it is reviewing and considering comments on the proposed rule.

The Bureau also released a Notice of Proposed Rulemaking in June 2016, to address consumer harms from practices related to payday loans, vehicle title loans, and other similar credit products, including failure to determine whether consumers have the ability to repay without default or re-borrowing and certain payment collection practices. The deadline for comments on the Notice of Proposed Rulemaking is October 7, 2016. Among other things, the proposal would require lenders to make a reasonable determination that the consumer has the ability to repay a covered loan before extending credit. It would also require lenders to make certain disclosures before attempting to collect payments from consumers' accounts and restrict lenders from making additional payment collection attempts after two consecutive attempts have failed.

The Bureau also expects to issue a final rule in early fall 2016, to create a comprehensive set of consumer protections for prepaid financial products, such as general purpose reloadable cards and other similar products, which are increasingly being used by consumers in place of traditional checking accounts or credit cards. The final rule will build off a proposal that the Bureau issued in November 2014, to bring prepaid products expressly within the ambit of Regulation E (which implements the Electronic Fund Transfer Act) as prepaid accounts and to create new provisions specific to such accounts. The proposal also included provisions to amend Regulation E and Regulation Z (which implements the Truth in Lending Act) to regulate prepaid accounts with overdraft services or certain other credit features.

The Bureau also expects to issue a final rule amending Regulation P, which implements the Gramm-Leach-Bliley Act (GLBA) in fall 2016. Congress recently amended the GLBA to provide an exception to the requirement for financial institutions to deliver annual privacy notices when certain conditions are met. On July 11, the Bureau published in the **Federal Register** proposed conforming amendments to Regulation P for consistency with the statutory amendment.

Building on Bureau research and other sources, the Bureau is also engaged in policy analysis and further research initiatives in preparation for a rulemaking on overdraft programs on checking accounts. The CFPB issued a white paper in June 2013, and a report in July 2014, based on supervisory data from several large banks that highlighted a number of possible consumer protection concerns, including how consumers opt in to overdraft coverage for ATM and one-time debit card transactions, overdraft coverage limits, transaction posting order practices, overdraft and insufficient funds fee structure, and involuntary account closures. The CFPB is continuing to engage in additional research, including qualitative

[1] The listing does not include certain routine, frequent, or administrative matters. Further, certain of the information fields for the listing are not applicable to independent regulatory agencies, including the CFPB, and, accordingly, the CFPB has indicated responses of ''no'' for such fields.

consumer testing initiatives relating to the opt-in process.

The Bureau is also engaged in rulemaking activities regarding debt collection practices. Debt collection continues to be the single largest source of complaints to the Federal Government of any industry. Building on the Bureau's November 2013, Advance Notice of Proposed Rulemaking, the Bureau released materials in July 2016, in advance of convening a panel under the Small Business Regulatory Enforcement Fairness Act (SBREFA) in conjunction with the Office of Management and Budget and the Small Business Administration's Chief Counsel for Advocacy to consult with small businesses that may be affected by the policy proposals under consideration. This SBREFA process focuses on companies that are considered ''debt collectors'' under the Fair Debt Collection Practices Act; the Bureau expects to convene a separate SBREFA proceeding focusing on companies that collect their own debts in 2017. The CFPB also continues to analyze the results of a survey to obtain information from consumers about their experiences with debt collection and plans to publish a report in the coming months.

The Bureau is also continuing rulemaking activities that will further establish the Bureau's nonbank supervisory authority by defining larger participants of certain markets for consumer financial products and services. Larger participants of such markets, as the Bureau defines by rule, are subject to the Bureau's supervisory authority. The Bureau expects that its next larger participant rulemaking will focus on the markets for consumer installment loans and vehicle title loans for purposes of supervision. The Bureau is also considering whether rules to require registration of these or other non-depository lenders would facilitate supervision, as has been suggested to the Bureau by both consumer advocates and industry groups.

The Bureau is also continuing to develop research on other critical markets to help implement statutory directives and to assess whether regulation of other consumer financial products and services may be warranted. For example, the Bureau is starting its work to implement section 1071 of the Dodd-Frank Act, which amends the Equal Credit Opportunity Act to require financial institutions to report information concerning credit applications made by women-owned, minority-owned, and small businesses. The Bureau is focusing on outreach and research to develop its understanding of the players, products, and practices in business lending markets and of the potential ways to implement section 1071. The CFPB then expects to begin developing proposed regulations concerning the data to be collected and determining the appropriate procedures and privacy protections needed for information-gathering and public disclosure under this section.

Implementing Dodd-Frank Act Mortgage Protections

The Bureau is also continuing efforts to implement critical consumer protections under the Dodd-Frank Act to guard against mortgage market practices that contributed to the nation's most significant financial crisis in several decades. Since 2013, the Bureau has issued regulations as directed by the Dodd-Frank Act to implement certain consumer protections for mortgage originations and servicing, integrate various federal mortgage disclosures, and amend mortgage reporting requirements for institutions covered under the Home Mortgage Disclosure Act. The Bureau engages in intensive implementation work for each new rule or rule change to facilitate understanding and implementation of rulemaking requirements, including follow-up rulemaking where warranted.

For example, the Bureau issued a Notice of Proposed Rulemaking in July 2016, to make clarifications and provide further regulatory guidance concerning its rule integrating several Federal mortgage disclosures that consumers receive in connection with applying for and closing on a mortgage loan under the Truth in Lending Act and the Real Estate Settlement Procedures Act. The integration and streamlining of the disclosures is mandated under the Dodd-Frank Act and the rule took effect in October 2015. The rule is the cornerstone of the Bureau's broader ''Know Before You Owe'' mortgage initiative.

In August 2016, the Bureau issued a final rule to amend various provisions of the mortgage servicing rules in Regulation X (which implements RESPA) and Regulation Z. Among other amendments, the final rule clarifies the applicability of certain provisions when a borrower is in bankruptcy or has invoked cease communication rights under the Fair Debt Collection Practices Act (FDCPA), enhances loss mitigation requirements, and extends the protections of the mortgage servicing rules to confirmed successors in interest. The Bureau conducted consumer testing of certain disclosures on sample forms provided in the final rule.

Concurrently with the final rule, the Bureau also issued an interpretive rule under the FDCPA, relating to servicers' compliance with certain mortgage servicing provisions as amended by the final rule. Most provisions of the final rule and interpretive rule take effect 12 months after publication in the **Federal Register**. The provisions relating to bankruptcy periodic statements and successors in interest take effect 18 months after publication in the **Federal Register**. The Bureau will work to conduct outreach with industry to monitor and facilitate implementation of the final rule.

The Bureau is also working intensely to conduct outreach with industry and coordinate with other agencies to monitor and facilitate implementation of its rule to implement Dodd-Frank amendments to HMDA. The Bureau has already released a small entity compliance guide in connection with the rule, which was finalized in October 2015. Certain elements of the rule take effect in January 2017, and most new data collection requirements begin in January 2018. The Bureau is working to streamline and modernize HMDA data collection and reporting processes in conjunction with implementation.

Further Planning

Finally, the Bureau is continuing to conduct outreach and research to assess issues in various other markets for consumer financial products and services beyond those discussed herein. As this work continues, the Bureau will evaluate possible policy responses, including possible rulemaking actions, taking into account the critical need for and effectiveness of various policy tools. The Bureau will update its regulatory agenda in spring 2017, to reflect the results of this further prioritization and planning.

Kelly Thompson Cochran,

Assistant Director for Regulations, Bureau of Consumer Financial Protection.

Prerule Stage

456. Business Lending Data (Regulation B)

Legal Authority: 15 U.S.C. 1691c–2

Abstract: Section 1071 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) amends the Equal Credit Opportunity Act (ECOA) to require financial institutions to report information concerning credit applications made by women-owned, minority-owned, and small businesses. The amendments to ECOA made by the Dodd-Frank Act require that certain data be collected and maintained, including the number of the application and date the application was received; the type and purpose of loan or credit applied for; the amount of credit applied for and approved; the type of action taken with regard to each application and the date of such action; the census tract of the principal place of business; the gross annual revenue of the business; and the race, sex, and ethnicity of the principal owners of the business. The Dodd-Frank Act also provides authority for the CFPB to require any additional data that the CFPB determines would aid in fulfilling the purposes of this section. The Bureau is focusing on outreach and research to develop its understanding of the players, products, and practices in business lending markets and of the potential ways to implement section 1071. The CFPB then expects to begin developing proposed regulations concerning the data to be collected and determining the appropriate procedures and privacy protections needed for information-gathering and public disclosure under this section.

Proposed Rule Stage

457. Payday Loans and Deposit Advance Products

Legal Authority: 12 U.S.C. 5531; 12 U.S.C. 5532; 12 U.S.C. 5512; 12 U.S.C. 5551

Abstract: The Bureau is conducting a rulemaking to address consumer harms from practices related to payday loans and other similar credit products, including failure to determine whether consumers have the ability to repay without default or reborrowing and certain payment collection practices. The proposal would cover two categories of loans. First, the proposal generally would cover loans with a term of 45 days or less. Second, the proposal generally would cover loans with a term greater than 45 days, provided that they: (1) Have an all-in annual percentage rate greater than 36 percent; and (2) either are repaid directly from the consumer's account or income or are secured by the consumer's vehicle. For both categories of covered loans, the proposal would identify it as an abusive and unfair practice for a lender to make a covered loan without reasonably determining that the consumer has the ability to repay the loan. Among other things, the proposal would require that, before making a covered loan, a lender must reasonably determine that the consumer has the ability to repay the loan. The Bureau released a Notice of Proposed Rulemaking in June 2016, and is accepting comments on the proposal through October 7, 2016.

CONSUMER FINANCIAL PROTECTION BUREAU (CFPB)

Final Rule Stage

458. The Expedited Funds Availability Act (Regulation CC)

Legal Authority: 12 U.S.C. 4001 *et seq.*

Abstract: The Expedited Funds Availability Act (EFA Act), implemented by Regulation CC, governs availability of funds after a check deposit and check collection and return processes. Section 1086 of the Dodd-Frank Wall Street Reform and Consumer Protection Act amended the EFA Act to provide the CFPB with joint rulemaking

authority with the Board of Governors of the Federal Reserve System (Board) over certain consumer-related EFA Act provisions. The Board proposed amendments to Regulation CC in March 2011, to facilitate the banking industry's ongoing transition to fully-electronic interbank check collection and return. The Board's proposal includes some provisions that are subject to the CFPB's joint rulemaking authority, including the period for funds availability and revising model form disclosures. In addition, in December 2013, the Board proposed revised amendments to certain Regulation CC provisions that are not subject to the CFPB's authority and extended the comment period to May 2014. The CFPB will work with the Board to issue jointly a final rule that includes provisions within the CFPB's authority.

Consumer Product Safety Commission

Semiannual Regulatory Agenda

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Ch. II

Semiannual Regulatory Agenda

AGENCY: U.S. Consumer Product Safety Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: In this document, the Commission publishes its semiannual regulatory flexibility agenda. In addition, this document includes an agenda of regulatory actions that the Commission expects to be under development or review by the agency during the next year. This document meets the requirements of the Regulatory Flexibility Act and Executive Order 12866. The Commission welcomes comments on the agenda and on the individual agenda entries.

DATES: Comments should be received in the Office of the Secretary on or before December 14, 2016.

ADDRESSES: Comments on the regulatory flexibility agenda should be captioned, ''Regulatory Flexibility Agenda,'' and be emailed to: *cpsc-os@cpsc.gov.* Comments may also be mailed or delivered to the Office of the Secretary, U.S. Consumer Product Safety Commission, Room 820, 4330 East-West Highway, Bethesda, MD 20814–4408.

FOR FURTHER INFORMATION CONTACT: For further information on the agenda in general, contact Eileen Williams, Office of the General Counsel, U.S. Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814–4408; *ewilliams@cpsc.gov.* For further information regarding a particular item on the agenda, consult the individual listed in the column headed, ''Contact,'' for that particular item.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 to 612) contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small businesses, small governmental organizations, and other small entities. Section 602 of the RFA (5 U.S.C. 602) requires each agency to publish, twice each year, a regulatory flexibility agenda containing a brief description of the subject area of any rule expected to be proposed or promulgated, which is likely to have a ''significant economic impact'' on a ''substantial number'' of small entities. The agency must also provide a summary of the nature of the rule and a schedule for acting on each rule for which the agency has issued a notice of proposed rulemaking.

The regulatory flexibility agenda is also required to contain the name and address of the agency official knowledgeable about the items listed. Furthermore, agencies are required to provide notice of their agendas to small entities and to solicit their comments by direct notification or by inclusion in publications likely to be obtained by such entities.

Additionally, Executive Order 12866 requires each agency to publish, twice each year, a regulatory agenda of regulations under development or review during the next year, and the Executive order states that such an agenda may be combined with the agenda published in accordance with the RFA. The regulatory flexibility agenda lists the regulatory activities expected to be under development or review during the next 12 months. It includes all such activities, whether or not they may have a significant economic impact on a substantial number of small entities. This agenda also includes regulatory activities that appeared in the spring 2016 agenda and have been completed by the Commission prior to publication of this agenda. Although CPSC, as an independent regulatory agency, is not required to comply with Executive orders, the Commission does follow Executive Order 12866 with respect to the publication of its regulatory agenda.

The agenda contains a brief description and summary of each regulatory activity, including the objectives and legal basis for each; an approximate schedule of target dates, subject to revision, for the development or completion of each activity; and the name and telephone number of a knowledgeable agency official concerning particular items on the agenda.

The Internet is the basic means through which the Unified Agenda is disseminated. The complete Unified Agenda will be available online at *www.reginfo.gov,* in a format that offers users the ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), the Commission's printed agenda entries include only:

(1) Rules that are in the agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules that the agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's agenda requirements. Additional information on these entries is available in the Unified Agenda published on the Internet.

The agenda reflects an assessment of the likelihood that the specified event will occur during the next year; the precise dates for each rulemaking are uncertain. New information, changes of circumstances, or changes in law may alter anticipated timing. In addition, no final determination by staff or the Commission regarding the need for, or the substance of, any rule or regulation should be inferred from this agenda.

Dated: September 1, 2016.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

Prerule Stage

459. Rule Review of: Standard for the Flammability (Open Flame) of Mattress Sets (Section 610 Review)

Legal Authority: 5 U.S.C. 1193, Flammable Fabrics Act; 5 U.S.C. 610, Regulatory Flexibility Act

Abstract: The Commission published the Standard for the Flammability (Open Flame) of Mattress Sets in March 2006. The Standard sets open flame performance measures on all mattress sets entered into commerce on or after the effective date in July 2007. The purpose of the rule review is to assess the impact of the rule on small entities and to determine whether the rule should be continued without change, or should be amended or rescinded to make the rule more effective or less burdensome while still maintaining safety objectives. CPSC staff solicited comments on the rule through a **Federal Register** Notice. Staff also conducted economic and fire loss data analyses to review the impact and effectiveness of the rule. A staff briefing package is being developed and will be submitted to the Commission.

RIN: 3041–AD47

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

Final Rule Stage

460. Recreational Off-Road Vehicles

Legal Authority: 15 U.S.C. 2056; 15 U.S.C. 2058

Abstract: The Commission is considering whether recreational off-road vehicles (ROVs) present an unreasonable risk of injury that should be regulated. ROVs are motorized vehicles having four or more low-pressure tires designed for off-road use and intended by the manufacturer primarily for recreational use by one or more persons. The salient characteristics of an ROV include a steering wheel for steering control, foot controls for throttle and braking, bench or bucket seats, a roll-over protective structure, and a maximum speed greater than 30 mph. On October 21, 2009, the Commission voted (4–0–1) to publish an advance notice of proposed rulemaking (ANPRM) in the **Federal Register**. The ANPRM was published in the **Federal Register** on October 28, 2009, and the comment period ended December 28, 2009. The Commission received two letters requesting an extension of the comment period. The Commission extended the comment period until March 15, 2010. Staff conducted testing and evaluation programs to develop performance requirements addressing vehicle stability, vehicle handling, and occupant protection. On October 29, 2014, the Commission voted (3–2) to publish an NPRM proposing standards addressing vehicle stability, vehicle handling, and occupant protection. The NPRM was published in the **Federal Register** on November 19, 2014. On January 23, 2015, the Commission published a notice of extension of the comment period for the NPRM, extending the comment period to April 8, 2015. The Omnibus Appropriations Bill provides that during fiscal year 2016, none of the amounts made available by the Appropriations Bill may be used to finalize or implement the Safety Standard for Recreational Off-Highway Vehicles published by the CPSC in the **Federal Register** on November 19, 2014 (79 FR 68964) (ROV NPRM) until after the National Academy of Sciences completes a study to determine specific information as set forth in the Appropriations Bill. Staff has ceased work on a Final Rule briefing package that would implement the ROV NPRM, but continues to engage in the development of voluntary standards associated with ROVs. In FY 2016, staff will prepare a briefing package assessing the voluntary standards for Commission consideration.

461. Standard for Sling Carriers

Legal Authority: Pub. L. 110–314, sec. 104

Abstract: Section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to issue consumer product safety standards for durable infant or toddler products. The Commission is directed to assess the effectiveness of applicable voluntary standards, and in accordance with the Administrative Procedure Act, promulgate consumer product safety standards that are substantially the same as the voluntary standard, or more stringent than the voluntary standard if the Commission determines that more stringent standards would further reduce the risk of injury associated with the product. The CPSIA requires that not later than August 14, 2009, the Commission begin rulemaking for at least two categories of durable infant or toddler products and promulgate two such standards every six months thereafter. The Commission proposed a consumer product safety standard for infant sling carriers as part of this series of standards for durable infant and toddler products. On June 13, 2014, staff sent an NPRM briefing package to the Commission. The Commission voted unanimously (3–0) to approve publication of the NPRM in the **Federal Register**. The NPRM was published in the **Federal Register** on July 23, 2014. Following review of the comments, staff will prepare a Final Rule briefing package for the Commission's consideration.

462. Determinations Regarding Third Party Testing of Phthalates in Four Specified Plastics

Legal Authority: Sec. 3, Pub. L. 110–314, 122 Stat. 3016; 15 U.S.C. 2063(d)(3)(B)

Abstract: Section 14(i)(3) of the Consumer Product Safety Act requires the Commission to seek opportunities to reduce the cost of third party testing requirements consistent with assuring compliance with any applicable children's product safety rule. Staff prepared for Commission consideration a briefing package with a draft notice of proposed rulemaking (NPRM) regarding third party testing of phthalates in four specified plastics. The Commission approved the NPRM on August 9, 2016. After reviewing any submitted comments, staff will prepare a final rule briefing package for Commission consideration.

Completed Actions

463. • Revisions to Safety Standard for Carriages and Strollers

Legal Authority: Pub. L. 110–314, Sec. 104

Abstract: ASTM notified the CPSC that a more recent version of the voluntary standard referenced in the Safety Standard for Carriages and Strollers at 16 CFR part 1227 was approved on November 1, 2015. In accordance with the process for updating CPSC's durable infant or toddler standards under section 104(b) of the CPSIA, the Commission published a direct final rule, revising the CPSC's Standard for Carriages and Strollers to incorporate by reference a more recent version of the voluntary standard, ASTM F833–15.

Federal Communications Commission

Semiannual Regulatory Agenda

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

Unified Agenda of Federal Regulatory and Deregulatory Actions—Fall 2016

AGENCY: Federal Communications Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: Twice a year, in spring and fall, the Commission publishes in the **Federal Register** a list in the Unified Agenda of those major items and other significant proceedings under development or review that pertain to the Regulatory Flexibility Act (U.S.C. 602). The Unified Agenda also provides the Code of Federal Regulations citations and legal authorities that govern these proceedings. The complete Unified Agenda will be published on the Internet in a searchable format at *www.reginfo.gov*.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Maura McGowan, Telecommunications Policy Specialist, Federal Communications Commission, 445 12th Street SW., Washington, DC 20554, (202) 418–0990.

SUPPLEMENTARY INFORMATION:

Unified Agenda of Major and Other Significant Proceedings

The Commission encourages public participation in its rulemaking process. To help keep the public informed of significant rulemaking proceedings, the Commission has prepared a list of important proceedings now in progress. The General Services Administration publishes the Unified Agenda in the **Federal Register** in the spring and fall of each year.

The following terms may be helpful in understanding the status of the proceedings included in this report:

Docket Number—assigned to a proceeding if the Commission has issued either a Notice of Proposed Rulemaking or a Notice of Inquiry concerning the matter under consideration. The Commission has used docket numbers since January 1, 1978. Docket numbers consist of the last two digits of the calendar year in which the docket was established plus a sequential number that begins at 1 with the first docket initiated during a calendar year (*e.g.,* Docket No. 96–1 or Docket No. 99–1). The abbreviation for the responsible bureau usually precedes the docket number, as in ''MB Docket No. 96–222,'' which indicates that the responsible bureau is the Media Bureau. A docket number consisting of only five digits (*e.g.,* Docket No. 29622) indicates that the docket was established before January 1, 1978.

Notice of Inquiry (NOI)—issued by the Commission when it is seeking information on a broad subject or trying to generate ideas on a given topic. A comment period is specified during which all interested parties may submit comments.

Notice of Proposed Rulemaking (NPRM)—issued by the Commission when it is proposing a specific change to Commission rules and regulations. Before any changes are actually made, interested parties may submit written comments on the proposed revisions.

Further Notice of Proposed Rulemaking (FNPRM)—issued by the Commission when additional comment in the proceeding is sought.

Memorandum Opinion and Order (MO&O)—issued by the Commission to deny a petition for rulemaking, conclude an inquiry, modify a decision, or address a petition for reconsideration of a decision.

Rulemaking (RM) Number—assigned to a proceeding after the appropriate bureau or office has reviewed a petition for rulemaking, but before the Commission has taken action on the petition.

Report and Order (R&O)—issued by the Commission to state a new or amended rule or state that the Commission rules and regulations will not be revised.

Marlene H. Dortch,

Secretary, Federal Communications Commission.

CONSUMER AND GOVERNMENTAL AFFAIRS BUREAU—FINAL RULE STAGE

Sequence No.	Title	Regulation Identifier No.
464	Rules and Regulations Implementing the Telephone Consumer Protection Act (TCPA) of 1991 (CG Docket No. 02–278).	3060–AI14

FEDERAL COMMUNICATIONS COMMISSION (FCC)

Consumer and Governmental Affairs Bureau

Final Rule Stage

464. Rules and Regulations Implementing the Telephone Consumer Protection Act (TCPA) of 1991 (CG Docket No. 02–278)

Legal Authority: 47 U.S.C. 227

Abstract: On July 3, 2003, the Commission released a Report and Order establishing, along with the FTC, a national do-not-call registry. The Commission's Report and Order also adopted rules on the use of predictive dialers, the transmission of caller ID information by telemarketers, and the sending of unsolicited fax advertisements. On September 21, 2004, the Commission released an Order amending existing safe harbor rules for telemarketers subject to the do-not-call registry to require such telemarketers to access the do-not-call list every 31 days, rather than every 3 months. On April 5, 2006, the Commission adopted a Report and Order and Third Order on Reconsideration amending its facsimile advertising rules to implement the Junk Fax Protection Act of 2005. On October 14, 2008, the Commission released an Order on Reconsideration addressing certain issues raised in petitions for reconsideration and/or clarification of the Report and Order and Third Order on Reconsideration. On January 4, 2008, the Commission released a Declaratory Ruling, clarifying that autodialed and prerecorded message calls to wireless numbers that are provided by the called party to a creditor in connection with an existing debt are permissible as calls made with the ''prior express consent'' of the called party. Following a December 4, 2007, NPRM, on June 17, 2008, the Commission released a Report and Order amending its rules to require sellers and/or telemarketers to honor registrations with the National Do-Not-Call Registry indefinitely, unless the registration is cancelled by the consumer or the number is removed by the database administrator. Following a January 22, 2010, NPRM, the Commission released a Report and Order (on February 15, 2012), requiring telemarketers to obtain prior express written consent, including by electronic means, before making an autodialed or prerecorded telemarketing call to a wireless number or before making a prerecorded telemarketing call to a residential line; eliminating the ''established business relationship'' exemption to the consent requirement for prerecorded telemarketing calls to residential lines; requiring telemarketers to provide an automated, interactive ''opt-out'' mechanism during autodialed or prerecorded telemarketing calls to wireless numbers and during prerecorded telemarketing calls to residential lines; and requiring that the abandoned call rate for telemarketing calls be calculated on a ''per-campaign'' basis. On November 29, 2012, the Commission released a Declaratory Ruling clarifying that sending a one-time text message confirming a consumer's request that no further text messages be sent does not violate the Telephone Consumer Protection Act (TCPA) or the Commission's rules as long as the confirmation text only confirms receipt of the consumer's opt-out request, and does not contain marketing, solicitations, or an attempt to convince the consumer to reconsider his or her opt-out decision. The ruling applies only when the sender of the text messages has obtained prior express consent, as required by the TCPA and Commission rules, from the consumer to

be sent text messages using an automatic telephone dialing system. On May 9, 2013, the Commission released a declaratory ruling clarifying that while a seller does not generally ''initiate'' calls made through a third-party telemarketer, within the meaning of the Telephone Consumer Protection Act (TCPA), it nonetheless may be held vicariously liable under Federal common law principles of agency for violations of either section 227(b) or section 227(c) that are committed by third-party telemarketers.

On July 10, 2015, the commission released a Declaratory Ruling and Order resolving 21 separate requests for clarification or other action regarding the TCPA. It clarified, among other things, that: Nothing in the Communications Act of the Commission's rules prohibits carriers or other service providers from implementing consumer-initiated call-blocking technologies; equipment meets the TCPA's definition of ''autodialer'' if it has the ''capacity'' to store or produce random sequential numbers, and to dial them, even if it is not presently used for that purpose; an ''app'' provider that plays a minimal role in making a call, such as just proving the app itself, is not the maker of the call for TCPA purposes; consumers who have previously consented to robocalls may revoke that consent at any time and through any reasonable means; the TCPA requires the consent of the party called—the subscriber to a phone number or the customary user of the number—not the intended recipient of the call; and callers who make calls without knowledge or reassignment of a wireless phone number and with a reasonable basis to believe that they have valid consent to make the call to the wireless number should be able to initiate one call after reassignment as an additional opportunity to gain actual or constructive knowledge of the reassignment and cease future calls to the new subscriber. The Commission also exempted certain financial and healthcare-related calls, when free to the consumer, from the TCPA's consumer-consent requirement.

466. Rules and Regulations Implementing Section 225 of the Communications Act (Telecommunications Relay Service) (CG Docket No. 03–123)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 225

Abstract: This proceeding established a new docket flowing from the previous telecommunications relay service (TRS) history, CC Docket No. 98–67. This proceeding continues the Commission's inquiry into improving the quality of TRS and furthering the goal of functional equivalency, consistent with Congress' mandate that TRS regulations encourage the use of existing technology and not discourage or impair the development of new technology. In this docket, the Commission explores ways to improve emergency preparedness for TRS facilities and services, new TRS technologies, public access to information and outreach, and issues related to payments from the Interstate TRS Fund.

467. Consumer Information, Disclosure, and Truth in Billing and Billing Format

Legal Authority: 47 U.S.C. 201; 47 U.S.C. 258

Abstract: In 1999, the Commission adopted truth-in-billing rules to address concerns that there is consumer confusion relating to billing for telecommunications services. On March 18, 2005, the Commission released an Order and Further Notice of Proposed Rulemaking (FNPRM) to further facilitate the ability of telephone consumers to make informed choices among competitive service offerings. On August 28, 2009, the Commission released a Notice of Inquiry that asks questions about information available to consumers at all stages of the purchasing process for all communications services, including: (1) Choosing a provider; (2) choosing a service plan; (3) managing use of the service plan; and (4) deciding whether and when to switch an existing provider or plan. On October 14, 2010, the Commission released a Notice of Proposed Rulemaking (NPRM) proposing rules that would require mobile service providers to provide usage alerts and information that will assist consumers in avoiding unexpected charges on their bills. On July 12, 2011, the Commission released an NPRM proposing rules that would assist consumers in detecting and preventing the placement of unauthorized charges on their telephone bills, an unlawful and fraudulent practice, commonly referred to as ''cramming.'' On April 27, 2012, the Commission adopted rules to address ''cramming'' on wireline telephone bills and released an FNPRM seeking comment on additional measures to protect wireline and wireless consumers from unauthorized charges.

468. Closed-Captioning of Video Programming; CG Docket Nos. 05–231 and 06–181 (Section 610 Review)

Legal Authority: 47 U.S.C. 613

Abstract: The Commission's closed-captioning rules are designed to make video programming more accessible to deaf and hard-of-hearing Americans. This proceeding resolves some issues regarding the Commission's closed-captioning rules that were raised for comment in 2005, and also seeks comment on how a certain exemption from the closed-captioning rules should be applied to digital multicast broadcast channels.

Legal Authority: 47 U.S.C. 201; 47 U.S.C. 301; 47 U.S.C. 303; 47 U.S.C. 332

Abstract: On July 12, 2011, the Commission released a Notice of Proposed Rulemaking proposing rules that would help consumers detect and prevent the placement of unauthorized charges on telephone bills, an unlawful and fraudulent practice commonly referred to as ''cramming.'' On April 27, 2012, the Commission adopted rules to address ''cramming'' on wireline telephone bills and released a Further Notice of Proposed Rulemaking seeking comment on additional measures to protect wireline and wireless consumers from unauthorized charges.

473. Implementation of the Middle Class Tax Relief and Job Creation Act of 2012/Establishment of a Public Safety Answering Point Do-Not-Call Registry

Legal Authority: Pub. L. 112–96, sec. 6507

Abstract: The Commission issued, on May 22, 2012, an NPRM to initiate a proceeding to create a Do-Not-Call registry for public safety answer points (PSAPs), as required by section 6507 of the Middle Class Tax Relief and Job Creation Act of 2012. The statute requires the Commission to establish a registry that allows PSAPs to register their telephone numbers on a do-not-call list; prohibit the use of automatic dialing equipment to contact registered numbers; and implement a range of monetary penalties for disclosure of registered numbers and for use of automatic dialing equipment to contact such numbers. On October 17, 2012, the Commission adopted final rules implementing the statutory requirements described above.

475. Misuse of Internet Protocol (IP) Captioned Telephone Service; Telecommunications Relay Services and Speech-to-Speech Services; CG Docket No. 13–24

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 225

Abstract: The FCC initiated this proceeding in its effort to ensure that IP CTS is available for eligible users only.

In doing so, the FCC released an Interim Order and Notice of Proposed Rulemaking (NPRM) to address certain practices related to the provision and marketing of Internet Protocol Captioned Telephone Service (IP CTS). IP CTS is a form of relay service designed to allow people with hearing loss to speak directly to another party on a telephone call and to simultaneously listen to the other party and read captions of what that party is saying over an IP-enabled device. To ensure that IP CTS is provided efficiently to persons who need to use this service, this new Order establishes several requirements on a temporary basis from March 7, 2013, to September 3, 2013.

RIN: 3060–AK01

FEDERAL COMMUNICATIONS COMMISSION (FCC)

Office of Engineering and Technology

Long-Term Actions

476. New Advanced Wireless Services (ET Docket No. 00–258)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 157(a); 47 U.S.C. 303(c); 47 U.S.C. 303(f); 47 U.S.C. 303(g); 47 U.S.C. 303(r)

Abstract: This proceeding explores the possible uses of frequency bands below 3 GHz to support the introduction of new advanced wireless services, including third generations as well as future generations of wireless systems. Advanced wireless systems could provide for a wide range of voice data and broadband services over a variety of mobile and fixed networks. The Third Notice of Proposed Rulemaking discusses the frequency bands that are still under consideration in this proceeding and invites additional comments on their disposition. Specifically, it addresses the Unlicensed Personal Communications Service (UPCS) band at 1910–1930 MHz, the Multipoint Distribution Service (MDS) spectrum at 2155–2160/62 MHz bands, the Emerging Technology spectrum, at 2160–2165 MHz, and the bands reallocated from MSS 91990–2000 MHz, 2020–2025 MHz, and 2165–2180 MHz. We seek comment on these bands with respect to using them for paired or unpaired Advance Wireless Service (AWS) operations or as relocation spectrum for existing services. The seventh Report and Order facilitates the introduction of Advanced Wireless Service (AWS) in the band 1710–1755 MHz—an integral part of a 90 MHz spectrum allocation recently reallocated to allow for such new and innovative wireless services. We largely adopt the proposals set forth in our recent AWS Fourth NPRM in this proceeding that are designed to clear the 1710–1755 MHz band of incumbent Federal Government operations that would otherwise impede the development of new nationwide AWS services. These actions are consistent with previous actions in this proceeding and with the United States Department of Commerce, National Telecommunications and Information Administration (NTIA) 2002 Viability Assessment, which addressed relocation and reaccommodation options for Federal Government operations in the band. The eighth Report and Order reallocated the 2155–2160 MHz band for fixed and mobile services and designates the 2155–2175 MHz band for Advanced Wireless Service (AWS) use. This proceeding continues the Commission's ongoing efforts to promote spectrum utilization and efficiency with regard to the provision of new services, including Advanced Wireless Services. The Order requires Broadband Radio Service (BRS) licensees in the 2150–2160/62 MHz band to provide information on the construction status and operational parameters of each incumbent BRS system that would be the subject of relocation. The Notice of Proposed Rule Making requested comments on the specific relocation procedures applicable to Broadband Radio Service (BRS) operations in the 2150–2160/62 MHz band, which the Commission recently decided will be relocated to the newly restructured 2495–2690 MHz band. The Commission also requested comments on the specific relocation procedures applicable to Fixed Microwave Service (FS) operations in the 2160–2175 MHz band. The Office of Engineering and Technology (OET) and the Wireless Telecommunications Bureau (WTB) set forth the specific data that Broadband Radio Service (BRS) licensees in the 2150–2160/62 MHz band must file along with the deadline date and procedures for filing this data on the Commission's Universal Licensing System (ULS). The data will assist in determining future AWS licensees' relocation obligations. The ninth Report and Order established procedures for the relocation of Broadband Radio Service (BRS) operations from the 2150–2160/62 MHz band, as well as for the relocation of Fixed Microwave Service (FS) operations from the 2160–2175 MHz band, and modified existing relocation procedures for the 2110–2150 MHz and 2175–2180 MHz bands. It also established cost-sharing rules to identify the reimbursement obligations for Advanced Wireless Service (AWS) and Mobile Satellite Service (MSS) entrants benefiting from the relocation of incumbent FS operations in the 2110–2150 MHz and 2160–2200 MHz bands and AWS entrants benefiting from the relocation of BRS incumbents in the 2150–2160/62 MHz band. The Commission continues its ongoing efforts to promote spectrum utilization and efficiency with regard to the provision of new services, including AWS. The Order dismisses a petition for reconsideration filed by the Wireless Communications Association International, Inc. (WCA) as moot. Two petitions for reconsideration were filed in response to the ninth Report and Order. The Report and Orders and Declaratory Ruling concludes the Commission's longstanding efforts to

relocate the Broadcast Auxiliary Service (BAS) from the 1990–2110 MHz band to the 2025–2110 MHz band, freeing up 35 megahertz of spectrum in order to foster the development of new and innovative services. This decision addresses the outstanding matter of Sprint Nextel Corporation's (Sprint Nextel) inability to agree with Mobile Satellite Service (MSS) operators in the band on the sharing of the costs to relocate the BAS incumbents. To resolve this controversy, the Commission applied its time-honored relocation principles for emerging technologies previously adopted for the BAS band to the instant relocation process, where delays and unanticipated developments have left ambiguities and misconceptions among the relocating parties. In the process, the Commission balances the responsibilities for and benefits of relocating incumbent BAS operations among all the new entrants in the different services that will operate in the band. The Commission proposed to modify its cost-sharing requirements for the 2 GHz BAS band because the circumstances surrounding the BAS transition are very different than what was expected when the cost-sharing requirements were adopted. The Commission believed that the best course of action was to propose new requirements that would address the ambiguity of applying the literal language of the current requirements to the changed circumstances, as well as balance the responsibilities for and benefits of relocating incumbent BAS operations among all new entrants in the band based on the Commission's relocation policies set forth in the Emerging Technologies proceeding. The Commission proposed to eliminate, as of January 1, 2009, the requirement that Broadcast Auxiliary Service (BAS) licensees in the 30 largest markets and fixed BAS links in all markets be transitioned before the Mobile Satellite Service (MSS) operators can begin offering service. The Commission also sought comments on how to mitigate interference between new MSS entrants and incumbent BAS licensees who had not completed relocation before the MSS entrants begin offering service. In addition, the Commission sought comments on allowing MSS operators to begin providing service in those markets where BAS incumbents have been transitioned. In the Further Notice of Proposed Rule Making the Commission proposed to modify its cost-sharing requirements for the 2 GHz BAS band because the circumstances surrounding the BAS transition are very different than what was expected when the cost-sharing requirements were adopted. The Commission believes that the best course of action is to propose new requirements that will address the ambiguity of applying the literal language of the current requirements to the changed circumstances, as well as balance the responsibilities for and benefits of relocating incumbent BAS operations among all new entrants in the band based on the Commission's relocation policies set forth in the Emerging Technologies proceeding.

477. Exposure to Radiofrequency Electromagnetic Fields (ET Docket No. 10–97)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 302 and 303; 47 U.S.C. 309(j); 47 U.S.C. 336

Abstract: In the Report and Order the Federal Communications Commission (Commission) resolved several issues regarding compliance with its regulations for conducting environmental reviews under the National Environmental Policy Act (NEPA) as they relate to the guidelines for human exposure to RF electromagnetic fields. More specifically, the Commission clarifies evaluation procedures and references to determine compliance with its limits, including specific absorption rate (SAR) as a primary metric for compliance, consideration of the pinna (outer ear) as an extremity, and measurement of medical implant exposure. The Commission also elaborates on mitigation procedures to ensure compliance with its limits, including labeling and other requirements for occupational exposure classification, clarification of compliance responsibility at multiple transmitter sites, and labeling of fixed consumer transmitters.

RIN: 3060–AI17

478. Unlicensed Operation in the TV Broadcast Bands (ET Docket No. 04–186)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 302; 47 U.S.C. 303(e) and 303(f); 47 U.S.C. 303(r); 47 U.S.C. 307

Abstract: The Commission adopted rules to allow unlicensed radio transmitters to operate in the broadcast television spectrum at locations where that spectrum is not being used by licensed services (this unused TV spectrum is often termed ''white spaces''). This action will make a significant amount of spectrum available for new and innovative products and services, including broadband data and other services for businesses and consumers. The actions taken are a conservative first step that includes many safeguards to prevent harmful interference to incumbent communications services. Moreover, the Commission will closely oversee the development and introduction of these devices to the market and will take

whatever actions may be necessary to avoid, and if necessary, correct any interference that may occur. The Second Memorandum Opinion and Order finalizes rules to make the unused spectrum in the TV bands available for unlicensed broadband wireless devices. This particular spectrum has excellent propagation characteristics that allow signals to reach farther and penetrate walls and other structures. Access to this spectrum could enable more powerful public Internet connections—super Wi-Fi hot spots—with extended range, fewer dead spots, and improved individual speeds as a result of reduced congestion on existing networks. This type of ''opportunistic use'' of spectrum has great potential for enabling access to other spectrum bands and improving spectrum efficiency. The Commission's actions here are expected to spur investment and innovation in applications and devices that will be used not only in the TV band, but eventually in other frequency bands as well. This Order addressed five petitions for reconsideration of the Commission's decisions in the Second Memorandum Opinion and Order (''Second MO&O'') in this proceeding and modified rules in certain respects. In particular, the Commission: (1) Increased the maximum height above average terrain (HAAT) for sites where fixed devices may operate; (2) modified the adjacent channel emission limits to specify fixed rather than relative levels; and (3) slightly increased the maximum permissible power spectral density (PSD) for each category of TV bands device. These changes will result in decreased operating costs for fixed TVBDs and allow them to provide greater coverage, thus increasing the availability of wireless broadband services in rural and underserved areas without increasing the risk of interference to incumbent services. The Commission also revised and amended several of its rules to better effectuate the Commission's earlier decisions in this docket and to remove ambiguities.

479. Fixed and Mobile Services in the Mobile Satellite Service (ET Docket No. 10–142)

Legal Authority: 47 U.S.C. 154(i) and 301; 47 U.S.C. 303(c) and 303(f); 47 U.S.C. 303(r) and 303(y); 47 U.S.C. 310

Abstract: The Notice of Proposed Rulemaking proposed to take a number of actions to further the provision of terrestrial broadband services in the MSS bands. In the 2 GHz MSS band, the Commission proposed to add co-primary Fixed and Mobile allocations to the existing Mobile-Satellite allocation. This would lay the groundwork for providing additional flexibility in use of the 2 GHz spectrum in the future. The Commission also proposed to apply the terrestrial secondary market spectrum leasing rules and procedures to transactions involving terrestrial use of the MSS spectrum in the 2 GHz, Big LEO, and L-bands in order to create greater certainty and regulatory parity with bands licensed for terrestrial broadband service. The Commission also asked, in a notice of inquiry, about approaches for creating opportunities for full use of the 2 GHz band for standalone terrestrial uses. The Commission requested comment on ways to promote innovation and investment throughout the MSS bands while also ensuring market-wide mobile satellite capability to serve important needs like disaster recovery and rural access.

In the Report and Order, the Commission amended its rules to make additional spectrum available for new investment in mobile broadband networks while also ensuring that the United States maintains robust mobile satellite service capabilities. First, the Commission adds co-primary Fixed and Mobile allocations to the Mobile Satellite Service (MSS) 2 GHz band, consistent with the International Table of Allocations, allowing more flexible use of the band, including for terrestrial broadband services, in the future. Second, to create greater predictability and regulatory parity with the bands licensed for terrestrial mobile broadband service, the Commission extends its existing secondary market spectrum manager spectrum leasing policies, procedures, and rules that currently apply to wireless terrestrial services to terrestrial services provided using the Ancillary Terrestrial Component (ATC) of an MSS system. Petitions for Reconsideration have been filed in the Commission's rulemaking proceeding concerning Fixed and Mobile Services in the Mobile Satellite Service Bands at 1525–1559 MHz and 1626.5–1660.5 MHz, 1610–1626.5 MHz and 2483.5–2500 MHz, and 2000–2020 MHz and 2180–2200 MHz, and published pursuant to 47 CFR 1.429(e). See 1.4(b)(1) of the Commission's rules.

480. Radio Experimentation and Market Trials Under Part 5 of the Commission's Rules and Streamlining Other Related Rules (ET Docket No. 10–236)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 301 and 303

Abstract: The Commission initiated this proceeding to promote innovation and efficiency in spectrum use in the Experimental Radio Service (ERS). For many years, the ERS has provided fertile ground for testing innovative ideas that have led to new services and new devices for all sectors of the economy. The Commission proposed to leverage the power of experimental radio licensing to accelerate the rate at which these ideas transform from prototypes to consumer devices and services. Its goal is to inspire researchers to dream, discover, and deliver the innovations that push the boundaries of the broadband ecosystem. The resulting advancements in devices and services available to the American public and

greater spectrum efficiency over the long term will promote economic growth, global competitiveness, and a better way of life for all Americans.

In the Report and Order (R&O), the Commission revised and streamlined its rules to modernize the Experimental Radio Service (ERS). The rules adopted in the R&O updated the ERS to a more flexible framework to keep pace with the speed of modern technological change while continuing to provide an environment where creativity can thrive. To accomplish this transition, the Commission created three new types of ERS licenses—the program license, the medical testing license, and the compliance testing license—to benefit the development of new technologies, expedite their introduction to the marketplace, and unleash the full power of innovators to keep the United States at the forefront of the communications industry. The Commission's actions also modified the market trial rules to eliminate confusion and more clearly articulate its policies with respect to marketing products prior to equipment certification. The Commission believes that these actions will remove regulatory barriers to experimentation, thereby permitting institutions to move from concept to experimentation to finished product more rapidly and to more quickly implement creative problem-solving methodologies.

The Memorandum Opinion and Order responds to three petitions for reconsideration seeking to modify certain rules adopted in the Report and Order in this proceeding. In response, the Commission modifies its rules, consistent with past practice, to permit conventional Experimental Radio Service (ERS) licensees and compliance testing licensees to use bands exclusively allocated to the passive services in some circumstances; clarifies that some cost recovery is permitted for the testing and operation of experimental medical devices that take place under its market trial rules; and adds a definition of emergency notification providers to its rules to clarify that all participants in the Emergency Alert System (EAS) are such providers. However, the Commission declines to expand the eligibility for medical testing licenses.

In the Further Notice of Proposed Rulemaking the Commission proposes to modify the rules for program experimental licenses to permit experimentation for radio frequency (RF)-based medical devices, if the device being tested is designed to comply with all applicable service rules in part 18, Industrial, Scientific, and Medical Equipment; part 95, Personal Radio Services subpart H Wireless Medical Telemetry Service; or part 95, subpart I Medical Device Radiocommunication Service. This proposal is designed to establish parity between all qualified medical device manufacturers for conducting basic research and clinical trials with RF-based medical devices as to permissible frequencies of operation.

This Memorandum Opinion and Order responds to three petitions for reconsideration seeking to modify certain rules adopted in the Report and Order in this proceeding. In response, the Commission modifies its rules, consistent with past practice, to permit conventional Experimental Radio Service (ERS) licensees and compliance testing licensees to use bands exclusively allocated to the passive services in some circumstances; clarifies that some cost recovery is permitted for the testing and operation of experimental medical devices that take place under its market trial rules; and adds a definition of emergency notification providers: To its rules to clarify that all participants in the Emergency Alert System (EAS) are such providers. However, the Commission declines to expand the eligibility for medical testing licenses.

RIN: 3060–AJ62

481. Operation of Radar Systems in the 76–77 GHz Band (ET Docket No. 11–90)

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 301 to 302; 47 U.S.C. 303(f)

Abstract: The Commission proposed to amend its rules to enable enhanced vehicular radar technologies in the 76–77 GHz band to improve collision avoidance and driver safety. Vehicular radars can determine the exact distance and relative speed of objects in front of, beside, or behind a car to improve the driver's ability to perceive objects under bad visibility conditions or objects that are in blind spots. These modifications to the rules will provide more efficient use of spectrum, and enable the automotive and fixed radar application industries to develop enhanced safety measures for drivers and the general public. The Commission takes this action in response to petitions for rulemaking filed by Toyota Motor Corporation (''TMC'') and Era Systems Corporation (''Era''). The Report and Order amends the Commission's rules to provide a more efficient use of the 76–77 GHz band, and to enable the automotive and aviation industries to develop enhanced safety measures for drivers and the general public. Specifically, the Commission eliminated the in-motion and not-in-motion distinction for vehicular radars, and instead adopted new uniform emission limits for forward, side, and rear-looking vehicular radars. This will facilitate enhanced vehicular radar technologies to improve collision avoidance and driver safety. The Commission also amended its rules to allow the operation of fixed radars at airport locations in the 76–77 GHz band for purposes of detecting foreign object debris on runways and monitoring aircraft and service vehicles on taxiways and other airport vehicle service areas that have no public vehicle access. The Commission took this action in response to petitions for rulemaking filed by Toyota Motor Corporation (''TMC'') and Era Systems Corporation (''Era''). Petitions for Reconsideration were filed by Navtech Radar, Ltd. and Honeywell International Inc.

Navtech Radar, Ltd. and Honeywell International, Inc., filed petitions for reconsideration in response to the *Vehicular Radar R&O* that modified the Commission's part 15 rules to permit vehicular radar technologies and airport-based fixed radar applications in the 76–77 GHz band.

The Commission denied Honeywell's petition. Section 1.429(b) of the Commission's rules provides three ways in which a petition for reconsideration can be granted, and none of these have been met. Honeywell has not shown that its petition relies on facts regarding fixed radar use which had not previously been presented to the Commission, nor does it show that its petition relies on facts that relate to events that changed since Honeywell had the last opportunity to present its facts regarding fixed radar use.

The Commission stated in the Vehicular Radar R&O, ''that no parties have come forward to support fixed

radar applications beyond airport locations in this band,'' and it decided not to adopt provisions for unlicensed fixed radar use other than those for FOD detection applications at airport locations. Because Navtech first participated in the proceeding when it filed its petition well after the decision was published, its petition fails to meet the timeliness standard of section 1.429(d).

In connection with the Commission's decision to deny the petitions for reconsideration discussed above, the Commission terminates ET Docket Nos. 10–28 and 11–90 (pertaining to vehicular radar).

482. WRC–07 Implementation (ET Docket No. 12–338)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 301; 47 U.S.C. 302(a); 47 U.S.C. 303

Abstract: In the Notice of Proposed Rulemaking (NPRM), the Commission proposed to amend parts 1, 2, 74, 78, 87, 90, and 97 of its rules to implement allocation decisions from the World Radiocommunication Conference (Geneva, 2007) (WRC–07) concerning portions of the radio frequency (RF) spectrum between 108 MHz and 20.2 GHz and to make certain updates to its rules in this frequency range. The NPRM follows the Commission's July 2010 WRC–07 Table Clean-up Order, 75 FR 62924, October 13, 2010, which made certain nonsubstantive, editorial revisions to the Table of Frequency Allocations (Allocation Table) and to other related rules. The Commission also addressed the recommendations for implementation of the WRC–07 Final Acts that the National Telecommunications and Information Administration (NTIA) submitted to the Commission in August 2009. As part of its comprehensive review of the Allocation Table, the Commission also proposed to make allocation changes that are not related to the WRC–07 Final Acts and update certain service rules, and requested comment on other allocation issues that concern portions of the RF spectrum between 137.5 kHz and 54.25 GHz.

In the Report and Order the Commission implemented allocation changes from the World Radiocommunication Conference (Geneva, 2007) (WRC–07) and updated related service rules. The Commission took this action in order to conform its rules, to the extent practical, to the decisions that the international community made at WRC–07. This action will promote the advancement of new and expanded services and provide significant benefits to the American people. In addition, the Commission revised the International Table of Frequency Allocations within its rules to generally reflect the allocation changes made at the World Radiocommunication Conference (Geneva, 2012) (WRC–12).

483. Federal Earth Stations—Non Federal Fixed Satellite Service Space Stations; Spectrum for Non-Federal Space Launch Operations; ET Docket No. 13–115

Legal Authority: 47 U.S.C. 154; 47 U.S.C. 302(a); 47 U.S.C. 303; 47 U.S.C. 336

Abstract: The Notice of Proposed Rulemaking proposes to make spectrum allocation proposals for three different space-related purposes. The Commission makes two alternative proposals to modify the Allocation Table to provide interference protection for Fixed-Satellite Service (FSS) and Mobile-Satellite Service (MSS) earth stations operated by Federal agencies under authorizations granted by the National Telecommunications and Information Administration (NTIA) in certain frequency bands. The Commission also proposes to amend a footnote to the Allocation Table to permit a Federal MSS system to operate in the 399.9 to 400.05 MHz band; it also makes alternative proposals to modify the Allocation Table to provide access to spectrum on an interference protected basis to Commission licensees for use during the launch of launch vehicles (*i.e.* rockets). The Commission also seeks comment broadly on the future spectrum needs of the commercial space sector. The Commission expects that, if adopted, these proposals would advance the commercial space industry and the important role it will play in our Nation's economy and technological innovation now and in the future.

484. Authorization of Radiofrequency Equipment; ET Docket No. 13–44

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 157(a); 47 U.S.C. 301; 47 U.S.C. 303(f); 47 U.S.C. 303(g); 47 U.S.C. 303(r); 47 U.S.C. 307(e); 47 U.S.C. 332

Abstract: The Commission is responsible for an equipment authorization program for radiofrequency (RF) devices under part 2 of its rules. This program is one of the primary means that the Commission uses to ensure that the multitude of RF devices used in the United States operate effectively without causing harmful interference and otherwise comply with the Commission rules. All RF devices subject to equipment authorization must comply with the Commission's technical requirement before they can be imported or marketed. The Commission or a Telecommunication Certification Body (TCB) must approve some of these devices before they can be imported or marketed, while others do not require such approval. The Commission last comprehensively reviewed its equipment authorization program more than 10 years ago. The rapid innovation

in equipment design since that time has led to ever-accelerating growth in the number of parties applying for equipment approval. The Commission therefore believes that the time is now right for us to comprehensively review our equipment authorization processes to ensure that they continue to enable this growth and innovation in the wireless equipment market. In May of 2012, the Commission began this reform process by issuing an Order to increase the supply of available grantee codes. With this Notice of Proposed Rulemaking (NPRM), the Commission continues its work to review and reform the equipment authorization processes and rules. This Notice of Proposed Rulemaking proposes certain changes to the Commission's part 2 equipment authorization processes to ensure that they continue to operate efficiently and effectively. In particular, it addresses the role of TCBs in certifying RF equipment and post-market surveillance, as well as the Commission's role in assessing TCB performance. The NPRM also addressed the role of test laboratories in the RF equipment approval process, including accreditation of test labs and the Commission's recognition of laboratory accreditation bodies, and measurement procedures used to determine RF equipment compliance. Finally, it proposes certain modifications to the rules regarding TCBs that approve terminal equipment under part 68 of the rules that are consistent with our proposed modifications to the rules for TCBs that approve RF equipment. Specifically, the Commission proposes to recognize the National Institute for Standards and Technology (NIST) as the organization that designates TCBs in the United States and to modify the rules to reference the current International Organization for Standardization and International Electrotechnical Commission (ISO/IEC) guides used to accredit TCBs.

This Report and Order updates the Commission's radiofrequency (RF) equipment authorization program to build on the success realized by its use of Commission-recognized Telecommunications Certification Bodies (TCBs). The rules the Commission is adopting will facilitate the continued rapid introduction of new and innovative products to the market while ensuring that these products do not cause harmful interference to each other or to other communications devices and services.

485. Operation of Radar Systems in the 76–77 GHz Band (ET Docket No. 15–26)

Legal Authority: 47 U.S.C. 1; 47 U.S.C. 4(i); 47 U.S.C. 154(i); 47 U.S.C. 302; 47 U.S.C. 303(f); 47 U.S.C. 303(r); 47 U.S.C. 332; 47 U.S.C. 337

Abstract: The Notice of Proposed Rulemaking proposes to authorize radar applications in the 76–81 GHz band. The Commission seeks to develop a flexible and streamlined regulatory framework that will encourage efficient, innovative uses of the spectrum and to allow various services to operate on an interference-protected basis. In doing so, it further seeks to adopt service rules that will allow for the deployment of the various radar applications in this band, both within and outside the U.S. The Commission takes this action in response to a petition for rulemaking filed by Robert Bosch, LLC (Bosch) and two petitions for reconsideration of the 2012 Vehicular Radar R&O.

486. Spectrum Access for Wireless Microphone Operations (GN Docket Nos. 14–166 and 12–268)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 157(a); 47 U.S.C. 301; 47 U.S.C. 303(f); 47 U.S.C. 303(g); 47 U.S.C. 303(r); 47 U.S.C. 307(e); 47 U.S.C. 332

Abstract: The Notice of Proposed Rule Making initiated a proceeding to address how to accommodate the long-term needs of wireless microphone users. Wireless microphones play an important role in enabling broadcasters and other video programming networks to serve consumers, including as they cover breaking news and broadcast live sports events. They enhance event productions in a variety of settings including theaters and music venues, film studios, conventions, corporate events, houses of worship, and internet webcasts. They also help create high quality content that consumers demand and value. Recent actions by the Commission, and in particular the repurposing of broadcast television band spectrum for wireless services set forth in the Incentive Auction R&O, will significantly alter the regulatory environment in which wireless microphones operate, which necessitates our addressing how to accommodate wireless microphone users in the future.

In the Report and Order, the Commission takes several steps to accommodate the long-term needs of wireless microphone users. Wireless microphones play an important role in enabling broadcasters and other video programming networks to serve consumers, including as they cover breaking news and live sports events. They enhance event productions in a variety of settings including theaters and music venues, film studios, conventions, corporate events, houses of worship, and internet webcasts. They also help create high quality content that consumers demand and value. In particular, the Commission provide additional opportunities for wireless microphone operations in the TV bands following the upcoming incentive auction, and the Commission provide new opportunities for wireless microphone operations to access spectrum in other frequency bands where they can share use of the bands without harming existing users.

RIN: 3060–AK30

FEDERAL COMMUNICATIONS COMMISSION (FCC)

International Bureau

Final Rule Stage

487. Space Station Licensing Reform (IB Docket No. 02–34)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 157; 47 U.S.C. 303(c); 47 U.S.C. 303(g)

Abstract: The Commission adopted a Notice of Proposed Rulemaking (NPRM) to streamline its procedures for reviewing satellite license applications. Before 2003, the Commission used processing rounds to review those applications. In a processing round, when an application is filed, the International Bureau (Bureau) issued a Public Notice establishing a cutoff date for other mutually exclusive satellite applications, and then considered all those applications together. In cases where sufficient spectrum to accommodate all the applications was not available, the Bureau directed the applicants to negotiate a mutually agreeable solution. Those negotiations took a long time, and delayed provision of satellite services to the public. The NPRM invited comment on two alternatives for expediting the satellite application process. One alternative was to replace the processing round procedure with a ''first-come, first-served'' procedure that would allow the Bureau to issue a satellite license to the first party filing a complete, acceptable application. The other alternative was to streamline the processing round procedure by adopting one or more of the following proposals: (1) Place a time limit on negotiations; (2) establish criteria to select among competing applicants; (3) divide the available spectrum evenly among the applicants. In the First Report and Order in this proceeding, the Commission determined that different procedures were better suited for different kinds of satellite applications. For most geostationary orbit (GSO) satellite applications, the Commission adopted a first-come, first-served approach. For most non-geostationary orbit (NGSO) satellite applications, the Commission adopted a procedure in which the available spectrum is divided evenly among the qualified applicants. The Commission also adopted measures to discourage applicants from filing speculative applications, including a bond requirement, payable if a licensee misses a milestone. The bond amounts originally were $5 million for each GSO satellite, and $7.5 million for each NGSO satellite system. These were interim amounts. Concurrently with the First Report and Order, the Commission adopted a Further Notice of Proposed Rulemaking (FNPRM) to determine whether to revise the bond amounts on a long-term basis. In the Second Report and Order, the Commission adopted a streamlined procedure for certain kinds of satellite license modification requests. In the Third Report and Order, the Commission adopted a standardized application form for satellite licenses, and adopted a mandatory electronic filing requirement for certain satellite applications. In the Fourth Report and Order, the Commission revised the bond amounts based on the record developed in response to FNPRM. The bond amounts were changed to $3 million for each GSO satellite, and $5 million for each NGSO satellite system.

FEDERAL COMMUNICATIONS COMMISSION (FCC)

International Bureau

Long-Term Actions

488. International Settlements Policy Reform (IB Docket No. 11–80)

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154; 47 U.S.C. 201 to 205; 47 U.S.C. 208; 47 U.S.C. 211; 47 U.S.C. 214; 47 U.S.C. 303(r); 47 U.S.C. 309; 47 U.S.C. 403

Abstract: The FCC is reviewing the International Settlements Policy (ISP). It governs how U.S. carriers negotiate with foreign carriers for the exchange of international traffic, and is the structure by which the Commission has sought to respond to concerns that foreign carriers with market power are able to take advantage of the presence of multiple U.S. carriers serving a particular market. In 2011, the FCC released an NPRM which proposed to further deregulate the international telephony market and enable U.S. consumers to enjoy competitive prices when they make calls to international destinations. First, it proposed to remove the ISP from all international routes, except Cuba. Second, the FCC sought comment on a proposal to enable the Commission to better protect U.S. consumers from the effects of anticompetitive conduct by foreign carriers in instances necessitating Commission intervention. In 2012, the FCC adopted a Report and Order which eliminated the ISP on all routes, but maintained the nondiscrimination requirement of the ISP on the U.S.-Cuba route and codified it at 47 CFR 63.22(f). In the Report and Order the FCC also adopted measures to protect U.S. consumers from anticompetitive conduct by foreign carriers. In 2016, the FCC released an FNPRM proposing to remove the nondiscrimination requirement on the U.S.-Cuba route.

489. Comprehensive Review of Licensing and Operating Rules for Satellite Services (IB Docket No. 12–267)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 157(a); 47 U.S.C. 161; 47 U.S.C. 303(c); 47 U.S.C. 303(g); 47 U.S.C. 303(r)

Abstract: The Commission adopted a Notice of Proposed Rulemaking (NPRM) to initiate a comprehensive review of Part 25 of the Commission's rules, which governs the licensing and operation of space stations and earth stations. The Commission proposed amendments to modernize the rules to better reflect evolving technology, to eliminate unnecessary technical and information filing requirements, and to reorganize and simplify existing requirements. In the ensuing Report and Order, the Commission adopted most of its proposed changes and revised over 150 rule provisions. Several proposals raised by commenters in the proceeding, however, were not within the scope of the original NPRM. To address these and other issues, the Commission released a Further Notice of Proposed Rulemaking (FNPRM). The FNPRM proposed additional rule changes to facilitate international coordination of proposed satellite networks, to revise system implementation milestones and the associated bond, and to expand the applicability of routine licensing standards. Following the FNPRM, the Commission issued a Second Report and Order adopting most of its proposals in the FNPNRM. Among other changes, the Commission established a two-step licensing procedure for most geostationary satellite applicants to facilitate international coordination, simplified the satellite development milestones, adopted an escalating bond requirement to discourage speculation, and refined the two-degree orbital spacing policy for most geostationary satellites to protect existing services.

490. Expanding Broadband and Innovation Through Air-Ground Mobile Broadband Secondary Service for Passengers Aboard Aircraft in the 14.0–14.5 GHz Band; GN Docket No. 13–114

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 301 to 303; 47 U.S.C. 324

Abstract: In this docket, the Commission establishes a secondary allocation for the Aeronautical Mobile Service in the 14.0–14.5 GHz band and establishes service, technical, and licensing rules for air-ground mobile broadband. The Notice of Proposed Rulemaking requests public comment on a secondary allocation and service, technical, and licensing rules for air-ground mobile broadband.

491. Terrestrial Use of the 2473–2495 MHz Band for Low-Power Mobile Broadband Networks; Amendments to Rules of Mobile Satellite Service System; IB Docket No. 13–213

Legal Authority: Not Yet Determined

Abstract: In this docket, the Commission proposes modified rules for the operation of the Ancillary Terrestrial Component of the single Mobile-Satellite Service system operating in the Big GEO S band. The changes would allow Globalstar, Inc. to deploy a low-power broadband network using its licensed spectrum at 2483.5–2495 MHz under certain limited technical criteria, and with the same equipment utilize spectrum in the adjacent 2473–2483.5 MHz band, pursuant to technical rules for unlicensed operations in that band.

492. Review of Foreign Ownership Policies for Broadcast, Common Carrier and Aeronautical Radio Licensees Under Section 310(b)(4) of the Communications Act of 1934, as Amended (Docket No. 15–236)

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 154(j); 47 U.S.C. 211; 47 U.S.C. 303(r); 47 U.S.C. 309 to 310; 47 U.S.C. 403

Abstract: The FCC proposes to extend its foreign ownership rules and procedures that apply to common carrier licensees to broadcast licensees, with certain modifications to tailor them to the broadcast context. The FCC also seeks comment on whether and how to revise the methodology a licensee should use to assess its compliance with the 25 percent foreign ownership benchmark in section 310(b)(4) of the Communications Act of 1934, as amended, in order to reduce regulatory burdens on applicants and licensees. Finally, the FCC makes several proposals to clarify and update existing foreign ownership policies and procedures for broadcast, common carrier and aeronautical licensees.

FEDERAL COMMUNICATIONS COMMISSION (FCC)

Media Bureau

Final Rule Stage

493. Broadcast Ownership Rules

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 152(a); 47 U.S.C. 154(i); 47 U.S.C. 303; 47 U.S.C. 307; 47 U.S.C. 309 and 310

Abstract: Section 202(h) of the Telecommunications Act of 1996 requires the Commission to review its ownership rules every four years and determine whether any such rules are necessary in the public interest as the result of competition. Accordingly, every four years, the Commission undertakes a comprehensive review of its broadcast multiple and cross-ownership limits examining: Cross-ownership of TV and radio stations; local TV ownership limits; national TV cap; and dual network rule. The last review undertaken was the 2014 review. The Commission incorporated the record of the 2010 review, and sought additional data on market conditions and competitive indicators. The Commission also sought comment on whether to eliminate restrictions on newspaper/radio combined ownership and whether to eliminate the radio/television cross-ownership rule in favor of reliance on the local radio rule and the local television rule. Ultimately, the Commission retained the existing rules with modifications to account for the digital television transition.

494. Promoting Diversification of Ownership in the Broadcast Services (MB Docket No. 07–294)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 152(a); 47 U.S.C. 154(i) and (j); 47 U.S.C. 257; 47 U.S.C. 303(r); 47 U.S.C. 307 to 310; 47 U.S.C. 336; 47 U.S.C. 534 and 535

Abstract: Diversity and competition are longstanding and important Commission goals. The measures proposed, as well as those adopted in this proceeding, are intended to promote diversity of ownership of media outlets. In the Report and Order and Third FNPRM, measures are enacted to increase participation in the broadcasting industry by new entrants and small businesses, including minority- and women-owned businesses. In the Report and Order and Fourth FNPRM, the Commission adopts improvements to its data collection in order to obtain an accurate and comprehensive assessment of minority and female broadcast ownership in the United States. The Memorandum Opinion & Order addressed petitions for reconsideration of the rules, and also sought comment on a proposal to expand the reporting requirements to non-attributable interests. In 2016, the Commission made improvements to the collection of data reported on Forms 323 and 323–E.

Pursuant to a remand from the Third Circuit, the measures adopted in the 2009 Diversity Order were put forth for comment in the NPRM for the 2010 review of the Commission's Broadcast Ownership rules. The Commission sought additional comment in 2014. The Commission addressed the remand in the 2016 Second Report and Order. In the 2014 quadrennial review, the Commission reinstated the revenue-based eligible entity standard.

495. Establishment of Rules for Digital Low-Power Television, Television Translator, and Television Booster Stations (MB Docket No. 03–185)

Legal Authority: 47 U.S.C. 309; 47 U.S.C. 336

Abstract: This proceeding initiated the digital television conversion for low-power television (LPTV) and television translator stations. The rules and policies adopted as a result of this proceeding provide the framework for these stations' conversion from analog to digital broadcasting.

The Report and Order adopts definitions and permissible use provisions for digital TV translator and LPTV stations. The Second Report and Order takes steps to resolve the remaining issues in order to complete the low-power television digital transition. The third Notice of Proposed Rulemaking seeks comment on a number of issues related to the potential impact of the incentive auction and the repacking process.

500. Preserving Vacant Channels in the UHF Television Band for Unlicensed Use; (MB Docket No. 15–68)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 157; 47 U.S.C. 301; 47 U.S.C. 303; 47 U.S.C. 307; 47 U.S.C. 308; 47 U.S.C. 309; 47 U.S.C. 310; 47 U.S.C. 316; 47 U.S.C. 319; 47 U.S.C. 332; 47 U.S.C. 336; 47 U.S.C. 403

Abstract: In this proceeding, the Commission considers proposals to preserve vacant television channels in the UHF television band for shared use by white space devices and wireless microphones following the repacking of the band after the conclusion of the Incentive Auction. In the NPRM, the Commission proposed preserving in each area of the country at least one vacant television channel. In the Public Notice, the Commission notes that a limited number of broadcast television stations may be reassigned during the incentive auction and repacking process to channels within the duplex gap established as part of the 600 MHz Band Plan, resulting in a restriction on the ability of white space devices and wireless microphone to use this spectrum. To address this concern, the Public Notice tentatively concluded that a second available television channel should be preserved in the remaining television band in such areas for shared use by white space devices and wireless microphones, in addition to the one such channel proposed in the NPRM.

505. New Part 4 of the Commission's Rules Concerning Disruptions to Communications; ET Docket No. 04–35

Legal Authority: 47 U.S.C. 154 to 155; 47 U.S.C. 201; 47 U.S.C. 251; 47 U.S.C. 307; 47 U.S.C. 316

Abstract: The proceeding creates a new part 4 in title 47, and amends part 63.100. The proceeding updates the Commission's communication disruptions reporting rules for wireline providers formerly found in 47 CFR 63.100, and extends these rules to other non-wireline providers. Through this proceeding, the Commission streamlines the reporting process through an electronic template. The Report and Order received several petitions for reconsideration, of which two were eventually withdrawn, and in 2015, seven are addressed in an Order on Reconsideration. Two petitions remain pending regarding NORS database sharing with states and communication disruptions at airports. The former is addressed in a separate proceeding, PS Docket 15–80. To the extent the communication disruption rules cover VoIP, the Commission studies and addresses these questions in a separate docket, PS Docket 11–82.

In May 2016, the Commission released a Report and Order, FNPRM, and Order on Reconsideration (see dockets 11–82 & 15–80). The Order on Reconsideration addressed outage reporting for events at airports, and the FNPRM sought comment on database sharing.

506. • Amendment of Part 90 of the Commission's Rules To Enable Railroad Police Officers To Access Public Safety Interoperability and Mutual Aid Channels

Legal Authority: 47 U.S.C, 151 to 152; 47 U.S.C. 154(j); 47 U.S.C. 301; 47 U.S.C. 303; 47 U.S.C. 316; 47 U.S.C. 337

Abstract: In this proceeding, we amend our rules to permit railroad police officers to use public safety interoperability channels to communicate with public safety entities already authorized to use to use those channels.

507. Revision of the Rules To Ensure Compatibility With Enhanced 911 Emergency Calling Systems (CC Docket No. 94–102; PS Docket No. 07–114)

Legal Authority: 47 U.S.C. 134(i); 47 U.S.C. 151; 47 U.S.C. 201; 47 U.S.C. 208; 47 U.S.C. 215; 47 U.S.C. 303; 47 U.S.C. 309

Abstract: In a series of orders in several related proceedings issued since 1996, the Federal Communications Commission has taken action to improve the quality and reliability of 911 emergency services for wireless phone users. Rules have been adopted governing the availability of basic 911 services and the implementation of enhanced 911 (E911) for wireless services.

508. Enhanced 911 Services for Wireline and Multi-Line Telephone Systems; PS Docket Nos. 10–255 and 07–114

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 201; 47 U.S.C. 222; 47 U.S.C. 251

Abstract: The policies set forth in the Report and Order will assist State governments in drafting legislation that will ensure that multi-line telephone systems are compatible with the enhanced 911 network. The Public Notice seeks comment on whether the Commission, rather than States, should regulate multiline telephone systems, and whether part 68 of the Commission's rules should be revised.

509. Implementation of 911 Act (CC Docket No. 92–105, WT Docket No. 00–110)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i) and 154(j); 47 U.S.C. 157; 47 U.S.C. 160; 47 U.S.C. 202; 47 U.S.C. 208; 47 U.S.C. 210; 47 U.S.C. 214; 47 U.S.C. 251(e); 47 U.S.C. 301; 47 U.S.C. 303; 47 U.S.C. 308 to 309(j); 47 U.S.C. 310

Abstract: This proceeding was separate from the Commission's proceeding on Enhanced 911 Emergency Systems (E911) in that it intended to implement provisions of the Wireless Communications and Public Safety Act of 1999 through the promotion of public safety by the deployment of a seamless, nationwide emergency communications infrastructure that includes wireless communications services. More specifically, the chief goal of the proceeding is to ensure that all emergency calls are routed to the appropriate local emergency authority to provide assistance. The E911 proceeding goes a step further and was aimed at improving the effectiveness and reliability of wireless 911 dispatchers with additional information on wireless 911 calls.

510. Commission Rules Concerning Disruptions to Communications (PS Docket No. 11–82)

Legal Authority: 47 U.S.C. 155; 47 U.S.C. 154; 47 U.S.C. 201; 47 U.S.C. 251

Abstract: The 2004 Report and Order extended the Commission's outage reporting requirements to non-wireline carriers and streamlined reporting through a new electronic template. A Further Notice of Proposed Rulemaking regarding the unique communications needs of airports also remains pending. The 2012 Report and Order extended the Commission's outage reporting requirements to interconnected Voice over Internet Protocol services where there is a complete loss of connectivity that has the potential to affect at least 900,000 user minutes. Interconnected VoIP services providers must now file outage reports through the same electronic mechanism as providers of other services. The Commission indicated that the technical issues involved in identifying and reporting significant outages of broadband Internet services require further study. In May 2016, the Commission released a Report and Order, FNPRM, and Order on Reconsideration (see also dockets 04–35 and 15–80). The FNPRM proposed rules to extend Part 4 outage reporting to broadband services. Comments and replies will be received by the Commission in August and September 2016.

512. Wireless E911 Location Accuracy Requirements; PS Docket No. 07–114

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 332

Abstract: This is related to the proceedings in which the FCC has previously acted to improve the quality of all emergency services. Wireless carriers must provide specific automatic location information in connection with 911 emergency calls to Public Safety Answering Points (PSAPs). Wireless licensees must satisfy Enhanced 911 location accuracy standards at either a county-based or a PSAP-based geographic level.

513. Improving Outage Reporting for Submarine Cables and Enhancing Submarine Cable Outage Data; GN Docket No. 15–206

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154; 47 U.S.C. 34 to 39; 47 U.S.C. 301

Abstract: This proceeding takes steps toward assuring the reliability and resiliency of submarine cables, a critical piece of the Nation's communications infrastructure, by proposing to require submarine cable licensees to report to the Commission when outages occur and communications are disrupted. The Commission's intent is to enhance national security and emergency preparedness by these actions.

514. Amendments to Part 4 of the Commission's Rules Concerning Disruptions to Communications; PS Docket No. 15–80

Legal Authority: 47 CFR 0; 47 CFR 4; 47 CFR 63

Abstract: The 2004 Report and Order extended the Commission's communication disruptions reporting rules to non-wireline carriers and streamlined reporting through a new electronic template, see docket ET Docket 04–35. In 2015, this proceeding, PS Docket 15–80, was opened to amend the original communications disruption reporting rules from 2004 in order to reflect technology transitions observed throughout the telecommunications sector. The Commission seeks to further study the possibility to share the reporting database information and access with state and other federal entities. In May 2016, the Commission released a Report and Order, FNPRM, and Order on Reconsideration (see also dockets 11–82 & 04–35). The R&O adopted rules to update the Part 4 requirements to reflect technology transitions. The FNPRM also seeks comment on sharing information in the reporting database.

Final Rule Stage

516. • Use of Spectrum Bands Above 24 GHz for Mobile Services—Spectrum Frontiers; WT Docket 10–112

Legal Authority: 47 U.S.C. 151 to 154; 47 U.S.C. 157; 47 U.S.C. 160; 47 U.S.C. 201; 47 U.S.C. 225; 47 U.S.C. 227; 47 U.S.C. 301 to 302; 47 U.S.C. 302(a); 47 U.S.C. 303 to 304; 47 U.S.C. 307; 47 U.S.C. 309 to 310; 47 U.S.C. 316; 47 U.S.C. 319; 47 U.S.C. 332; 47 U.S.C. 336; 47 U.S.C. 1302

Abstract: In this proceeding, the Commission adopted service rules for licensing of mobile and other uses for millimeter wave (mmW) bands. These high frequencies previously have been best suited for satellite or fixed microwave applications; however, recent technological breakthroughs have newly enabled advanced mobile services in these bands, notably including very high speed and low latency services. This action will help facilitate Fifth Generation mobile services and other mobile services. In developing service rules for mmW bands, the Commission will facilitate access to spectrum, develop a flexible spectrum policy, and encourage wireless innovation.

519. Implementation of the Commercial Spectrum Enhancement Act (CSEA) and Modernization of the Commission's Competitive Bidding Rules and Procedures (WT Docket No. 05–211)

Legal Authority: 15 U.S.C. 79; 47 U.S.C. 151; 47 U.S.C. 154(i) and (j); 47 U.S.C. 155; 47 U.S.C. 155(c); 47 U.S.C. 157; 47 U.S.C. 225; 47 U.S.C. 303(r); 47 U.S.C. 307; 47 U.S.C. 309; 47 U.S.C. 309(j); 47 U.S.C. 325(e); 47 U.S.C. 334; 47 U.S.C. 336; 47 U.S.C. 339; 47 U.S.C. 554

Abstract: This proceeding implements rules and procedures needed to comply with the Commercial Spectrum Enhancement Act (CSEA). It establishes a mechanism for reimbursing Federal agencies' out-of-spectrum auction proceeds for the cost of relocating their operations from certain ''eligible frequencies'' that have been reallocated from Federal to non-Federal use. It also seeks to improve the Commission's ability to achieve Congress' directives with regard to designated entities and to ensure that, in accordance with the intent of Congress, every recipient of its designated entity benefits is an entity that uses its licenses to directly provide facilities-based telecommunications services for the benefit of the public.

RIN: 3060–AI88

520. Facilitating the Provision of Fixed and Mobile Broadband Access, Educational, and Other Advanced Services in the 2150–2162 and 2500–2690 MHz Bands

Legal Authority: 47 U.S.C. 154; 47 U.S.C. 301 to 303; 47 U.S.C. 307; 47 U.S.C. 309; 47 U.S.C. 332; 47 U.S.C. 336 and 337

Abstract: The Commission seeks comment on whether to assign Educational Broadband Service (EBS) spectrum in the Gulf of Mexico. It also seeks comment on how to license unassigned and available EBS spectrum. Specifically, we seek comment on whether it would be in the public interest to develop a scheme for licensing unassigned EBS spectrum that avoids mutual exclusivity; we ask whether EBS eligible entities could participate fully in a spectrum auction; we seek comment on the use of small

business size standards and bidding credits for EBS if we adopt a licensing scheme that could result in mutually exclusive applications; we seek comment on the proper market size and size of spectrum blocks for new EBS licenses; and we seek comment on issuing one license to a State agency designated by the Governor to be the spectrum manager, using frequency coordinators to avoid mutually exclusive EBS applications, as well as other alternative licensing schemes. The Commission must develop a new licensing scheme for EBS in order to achieve the Commission's goal of facilitating the development of new and innovative wireless services for the benefit of students throughout the Nation. In addition, the Commission has sought comment on a proposal intended to make it possible to use wider channel bandwidths for the provision of broadband services in these spectrum bands. The proposed changes may permit operators to use spectrum more efficiently, and to provide higher data rates to consumers, thereby advancing key goals of the National Broadband Plan.

RIN: 3060–AJ12

521. Service Rules for Advanced Wireless Services in the 2155–2175 MHz Band; WT Docket No. 13–185

Legal Authority: 47 U.S.C. 151 and 152; 47 U.S.C. 154(i); 47 U.S.C. 157; 47 U.S.C. 160; 47 U.S.C. 201; 47 U.S.C. 214; 47 U.S.C. 301

Abstract: This proceeding explores the possible uses of the 2155 to 2175 MHz frequency band (AWS–3) to support the introduction of new advanced wireless services, including third generation and future generations of wireless systems. Advanced wireless systems could provide for a wide range of voice data and broadband services over a variety of mobile and fixed networks. The Notice of Proposed Rulemaking (NPRM) sought comment on what service rules should be adopted in the AWS–3 band. We requested comment on rules for licensing this spectrum in a manner that will permit it to be fully and promptly used to bring advanced wireless services to American consumers. Our objective is to allow for the most effective and efficient use of the spectrum in this band, while also encouraging development of robust wireless broadband services. We proposed to apply our flexible, market-oriented rules to the band to do so. Thereafter, the Commission released a Further Notice of Proposed Rulemaking (FNPRM), seeking comment on the Commission's proposed AWS–3 rules, which include adding 5 megahertz of spectrum (2175 to 80 MHz) to the AWS–3 band, and requiring licensees of that spectrum to provide—using up to 25 percent of its wireless network capacity—free, two-way broadband Internet service at engineered data rates of at least 768 kbps downstream.

527. Fixed and Mobile Services in the Mobile Satellite Service Bands at 1525–1559 MHz and 1626.5–1660.5 MHz, 1610–1626.5 MHz and 2483.5–2500 MHz, and 2000–2020 MHz and 2180–2200 MHz

Legal Authority: 47 U.S.C. 151 and 154; 47 U.S.C. 303 and 310

Abstract: The Commission proposes steps making additional spectrum available for new investment in mobile broadband networks while ensuring that the United States maintains robust mobile satellite service capabilities. Mobile broadband is emerging as one of America's most dynamic innovation and economic platforms. Yet tremendous demand growth soon will test the limits of spectrum availability. Some 90 megahertz of spectrum allocated to the Mobile Satellite Service (MSS)—in the 2 GHz band, Big LEO band, and L-band—are potentially available for terrestrial mobile broadband use. The Commission seeks to remove regulatory barriers to terrestrial use, and to promote additional investments, such as those recently made possible by a transaction between Harbinger Capital Partners and SkyTerra Communications, while retaining sufficient market-wide MSS capability. The Commission proposes to add co-primary Fixed and Mobile allocations to the 2 GHz band, consistent with the International Table of Allocations. This allocation modification is a precondition for more flexible licensing of terrestrial services within the band. Second, the Commission proposes to apply the Commission's secondary market policies and rules applicable to terrestrial services to all transactions involving the use of MSS bands for terrestrial services to create greater predictability and regulatory parity with bands licensed for terrestrial mobile broadband service. The Commission also requests comment on further steps we can take to increase the value, utilization, innovation, and investment in MSS spectrum generally.

529. Service Rules for Advanced Wireless Services in the 2000–2020 MHz and 2180–2200 MHz Bands

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 153; 47 U.S.C. 154(i); 47 U.S.C. 227; 47 U.S.C. 301 to 303; 47 U.S.C. 307 to 310; 47 U.S.C. 316; 47 U.S.C. 319; 47 U.S.C. 324; 47 U.S.C. 332 to 333

Abstract: In the Report and Order, the Commission increased the Nation's supply of spectrum for mobile broadband by removing unnecessary barriers to flexible use of spectrum currently assigned to the Mobile Satellite Service (MSS) in the 2 GHz band. This action carries out a recommendation in the National Broadband Plan that the Commission enable the provision of standalone terrestrial services in this spectrum. We do so by adopting service, technical, assignment, and licensing rules for this spectrum. These rules are designed to provide for flexible use of this spectrum, encourage innovation and investment in mobile broadband, and provide a stable regulatory environment in which broadband deployment could develop.

RIN: 3060–AJ73

530. Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions; (GN Docket No. 12–268)

Legal Authority: 47 U.S.C. 309(j)(8)(G); 47 U.S.C. 1452

Abstract: In February 2012, the Middle Class Tax Relief and Job Creation Act was enacted (Pub. L. 112–96, 126 Stat. 156 (2012)). Title VI of that statute, commonly known as the Spectrum Act, provides the Commission with the authority to conduct incentive auctions to meet the growing demand for wireless broadband. Pursuant to the Spectrum Act, the Commission may conduct incentive auctions that will offer new initial spectrum licenses subject to flexible-use service rules on spectrum made available by licensees that voluntarily relinquish some or all of their spectrum usage rights in exchange for a portion, based on the value of the relinquished rights as determined by an auction, of the proceeds of bidding for the new licenses. In addition to granting the Commission general authority to conduct incentive auctions, the Spectrum Act requires the Commission to conduct an incentive auction of broadcast TV spectrum and sets forth special requirements for such an auction.

The incentive auction will consist of a ''reverse auction'' to determine the amount of compensation that each broadcast television licensee would accept in return for voluntarily relinquishing some or all of its spectrum usage rights and a ''forward auction'' that will allow mobile broadband providers to bid for licenses in the reallocated spectrum. Broadcast television licensees who elect voluntarily to participate in the auction have three basic options: Voluntarily go off the air, share their spectrum, or move channels in exchange for receiving part of the proceeds from auctioning that spectrum to wireless providers.

In June 2014, the Commission adopted a Report and Order that laid out the broad rules for the incentive auction. Consistent with past practice, in December 2014, a public notice was issued asking for comment specific key components related to implementing the June 2014 Report and Order. Public Notices in August and October 2015 announced the specific procedures about how to participate in the incentive auction. The start of the Incentive Auction is planned for March 29, 2016, with the submission of initial commitments by eligible broadcast TV licensees.

531. Service Rules for Advanced Wireless Services of the Middle Class Tax Relief and Job Creation Act of 2012 Related to the 1915–1920 MHz and 1995–2000 MHz Bands (WT Docket No. 12–357)

Legal Authority: 47 U.S.C. 301; to 303; 47 U.S.C. 307 to 310

Abstract: The Commission proposes rules for the Advanced Wireless Services (AWS) H Block that would

make available 10 megahertz of flexible use. The proposal would extend the widely deployed Personal Communications Services (PCS) band, which is used by the four national providers as well as regional and rural providers to offer mobile service across the nation. The additional spectrum for mobile use will help ensure that the speed, capacity, and ubiquity of the Nation's wireless networks keeps pace with the skyrocketing demand for mobile services.

Today's action is a first step to implement the congressional directive in the Middle Class Tax Relief and Job Creation Act of 2012 (Spectrum Act) to grant new initial licenses for the 1915–1920 MHz and 1995–2000 MHz bands (the Lower H Block and Upper H Block, respectively) through a system of competitive bidding,Â– unless doing so would cause harmful interference to commercial mobile service licenses in the 1930–1985 MHz (PCS downlink) band. The potential for harmful interference to the PCS downlink band relates only to the Lower H Block transmissions, and may be addressed by appropriate technical rules, including reduced power limits on H Block devices. We, therefore, propose to pair and license the Lower H Block and the Upper H Block for flexible use, including mobile broadband, aiming to assign the licenses through competitive bidding in 2013. In the event that we conclude that the Lower H Block cannot be used without causing harmful interference to PCS, we propose to license the Upper H Block for full power, and seek comment on appropriate use for the Lower H Block, including Unlicensed PCS.

533. Amendment of the Commission's Rules Governing Certain Aviation Ground Station Equipment (Squitter) (WT Docket Nos. 10–61 and 09–42)

Legal Authority: 48 Stat 1066, 1082 as amended; 47 U.S.C. 154; 47 U.S.C. 303; 47 U.S.C. 307(e); 47 U.S.C. 151 to 156; 47 U.S.C. 301

Abstract: This action amends part 87 rules to authorize new ground station technologies to promote safety and allow use of frequency 1090 MHz by aeronautical utility mobile stations for airport surface detection equipment (commonly referred to as ''squitters'') to help reduce collisions between aircraft and airport ground vehicles.

534. Amendment of the Commission's Rules Concerning Commercial Radio Operators (WT Docket No. 10–177)

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 303(r); 47 U.S.C. 332(a)2

Abstract: This action amends parts 0, 1, 13, 80, and 87 of the Commission's rules concerning commercial radio operator licenses for maritime and aviation radio stations in order to reduce administrative burdens on the telecom industry.

RIN: 3060–AJ91

535. Amendment of Part 90 of the Commission's Rules To Permit Terrestrial Trunked Radio (TETRA) Technology; WT Docket No. 11–6

Legal Authority: 47 U.S.C. 154(i); 47 U.S.C. 161; 47 U.S.C. 303(g); 47 U.S.C. 303(r); 47 U.S.C. 332(c)(7)

Abstract: We modify our rules to permit the certification and use of Terrestrial Trunked Radio (TETRA) equipment under part 90 of our rules. TETRA is a spectrally efficient digital technology with the potential to provide valuable benefits to land mobile radio users, such as higher security and lower latency than comparable technologies. It does not, however, conform to all of our current part 90 technical rules. In the Notice of Proposed Rule Making and Order (NPRM) in this proceeding, the Commission proposed to amend part 90 to accommodate TETRA technology. We conclude that modifying the part 90 rules to permit the certification and use of TETRA equipment in two bands—the 450–470 MHz portion of the UHF band (421–512 MHz) and Business/Industrial Land Transportation 800 MHz band channels (809–824/854–869 MHz) that

are not in the National Public Safety Planning Advisory Committee (NPSPAC) portion of the band—will give private land mobile radio (PLMR) licensees additional equipment alternatives without increasing the potential for interference or other adverse effects on other licensees.

536. Promoting Technological Solutions To Combat Wireless Contraband Device Use in Correctional Facilities

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 154(j); 47 U.S.C. 301; 47 U.S.C. 303(a); 47 U.S.C. 303(b); 47 U.S.C. 307 to 310; 47 U.S.C. 332

Abstract: In this proceeding, the Commission proposes rules to encourage development of multiple technological solutions to combat the use of contraband wireless devices in correctional facilities nationwide. The Commission proposes to streamline rules governing lease agreement modifications between wireless providers and managed access system operators. It also proposes to require wireless providers to terminate service to a contraband wireless device.

RIN: 3060–AK06

537. Enabling Small Cell Use in the 3.5 GHz Band

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 154(j) ; 47 U.S.C. 302(a); 47 U.S.C. 303 to 304; 47 U.S.C. 307(e); 47 U.S.C. 316

Abstract: The NPRM proposed to create a Citizens Broadband Service, licensed-by-rule pursuant to section 307(e) of the Communications Act and classified as a Citizens Band Service under part 95 of the Commission's rules. Access to and use of the 3.5 GHz band would be managed by a spectrum access system (SAS), incorporating a geo-location enabled dynamic database (similar to TVWS).

The Further Notice of Proposed Rulemaking proposes to create a new Citizens Broadband Radio Service in the 3550 to 3650 MHz band to be governed by a new part 96 of the Commission's rules. Access to and use of the 3550 to 3650 MHz band would be managed by a spectrum access system, incorporating a geo-location enabled dynamic database.

The Report and Order and Second Further Notice of Proposed Rulemaking adopted by the Commission established a new Citizens Broadband Radio Service for shared wireless broadband use of the 3550 to 3700 MHz band. The Citizens Broadband Radio Service is governed by a three-tiered spectrum authorization framework to accommodate a variety of commercial uses on a shared basis with incumbent federal and non-federal users of the band. Access and operations will be managed by a dynamic spectrum access system. The three tiers are: Incumbent Access, Priority Access, and General Authorized Access. Rules governing the Citizens Broadband Radio Service are found in Part 96 of the Commission's rules.

538. 800 MHz Cellular Telecommunications Licensing Reform; Docket No. 12–40

Legal Authority: 47 U.S.C. 151 to 152; 47 U.S.C. 154(i); 47 U.S.C. 301 to 303; 47 U.S.C. 308; 47 U.S.C. 309(j); 47 U.S.C. 332

Abstract: The proceeding was launched to revisit and update various rules governing licensing for the 800 MHz cellular radiotelephone service. Most notably, the current site-based model for issuing licenses is under review, mindful of the evolution of this commercial wireless mobile service since its inception more than 30 years ago and the licensing models used for newer wireless telecommunications services.

On November 10, 2014, the FCC released a Report and Order (R&O) and a companion Further Notice of Proposed Rulemaking (FNPRM) to revise rules governing the 800 MHz Cellular Service. In the R&O, the FCC eliminated various regulatory requirements and streamlined requirements remaining in place, while retaining Cellular Service licensees' ability to expand into an area that is not yet licensed. In the FNPRM, the FCC proposes and seeks comment on additional Cellular Service reforms of licensing rules and the radiated power rules, to promote flexibility and help foster the deployment of newer technologies such as LTE.

539. Updating Part 1 Competitive Bidding Rules (WT Docket No. 14–170)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 303(r); 47 U.S.C. 309(j); 47 U.S.C. 316

Abstract: This proceeding was initiated to revise some of the Commission's general part 1 rules governing competitive bidding for spectrum licenses to reflect changes in the marketplace, including the challenges faced by new entrants, as well as to advance the statutory directive to ensure that small businesses, rural telephone companies, and businesses owned by members of minority groups and women are given the opportunity to participate in the provision of spectrum-based services. In July 2015, the Commission revised its competitive bidding rules, specifically adopting revised requirements for eligibility for bidding credits, a new rural service provider bidding credit, a prohibition on joint bidding agreements and other changes.

Final Rule Stage

540. Technology Transitions; GN Docket No. 13–5, WC Docket No. 05–25

Legal Authority: 47 U.S.C. 214; 47 U.S.C. 251

Abstract: This proceeding seeks to strengthen public safety, pro-consumer and pro-competition policies and protections in a manner appropriate for technology transitions that are underway and for networks and services that emerge from those transitions.The Notice of Proposed Rulemaking proposed new rules to ensure reliable backup power for consumers of IP-based voice and data services across networks that provide residential fixed service that substitutes for and improves upon the kind of traditional telephony used by people to dial 911. It also proposed new and revised rules to protect consumers by ensuring they are informed about their choices and the services provided to them when carriers retire legacy facilities (*e.g.,* copper networks) and seek to discontinue legacy services (*e.g.,* basic voice service). Finally, it proposed revised rules to protect competition where it exists today, so that the mere change of a network facility or discontinuance of a legacy service does not deprive small- and medium-size business, schools, libraries, and other enterprises of the ability to choose the kinds of innovative services that best suit their needs.

The Report and Order, Order on Reconsideration and Further Notice of Proposed Rulemaking: (i) Adopted rules updating the process by which incumbent LECs notify interconnecting entities of planned copper retirements; (ii) clarified that a carrier must obtain Commission approval before discontinuing, reducing, or impairing a service used as a wholesale input, but only when the carrier's actions will discontinue, reduce, or impair service to end users, including a carrier-customer's retail end users; (iii) adopted an interim rule requiring that to receive authority to discontinue, reduce, or impair a legacy TDM-based service special access service or commercial wholesale platform service that is used as a wholesale input by competitive providers, an incumbent LEC must as a condition to obtaining discontinuance authority commit to providing competitive carriers wholesale access on reasonably comparable rates, terms, and conditions; (iv) proposed specific criteria for the Commission to consider in determining whether to authorize carriers to discontinue a legacy retail service in favor of a retail service based on a newer technology; (v) sought comment on updating the rules governing the discontinuance process, including regarding the timing of notice to consumers, the method for providing that notice, and providing notice to Tribal governments; (vi) sought comment on extending the end point of the interim rule adopted in the Report and Order as it applies to the commercial wholesale platform service; and (vii) sought comment on whether to adopt objective criteria to measure an ILEC's good faith in responding to competitive LEC requests for additional information in connection with a copper retirement notice and whether a planned copper retirement should be postponed when an ILEC has failed to fulfill the new good faith communication requirement adopted in the Report and Order.

The Second Report and Order and Order on Reconsideration: (i) Adopted rules updating the process by which carriers seek Commission authorization for the discontinuance of legacy services in favor of services based on newer technologies; (ii) set forth consumer education requirements for carriers seeking to discontinue legacy services in favor of services based on newer technologies; (iii) revised rules to authorize carriers to provide notice to customers of discontinuance applications by email; (iv) revised rules to require carriers to provide notice of discontinuance applications to Tribal entities; (v) revised rules to provide new titles for copper retirement notices and certifications; (vi) revised rules to provide that if a competitive LEC files a Section 214(a) discontinuance application based on an incumbent LEC's copper retirement notice without an accompanying discontinuance of TDM-based service, the competitive LEC's application will be automatically granted on the effective date of the copper retirement as long as (1) the competitive LEC submits its discontinuance application to the Commission at least 40 days before the incumbent LEC's copper retirement effective date, and (2) the competitive LEC's discontinuance application contains a certification that the basis for the application is the incumbent LEC's planned copper retirement.

Long-Term Actions

541. Implementation of the Universal Service Portions of the 1996 Telecommunications Act

Legal Authority: 47 U.S.C. 151 *et seq.*

Abstract: The Telecommunications Act of 1996 expanded the traditional goal of universal service to include increased access to both telecommunications and advanced services such as high-speed Internet for all consumers at just, reasonable and affordable rates. The Act established principles for universal service that specifically focused on increasing access to evolving services for consumers living in rural and insular areas, and for consumers with low incomes. Additional principles called for increased access to high-speed Internet in the Nation's schools, libraries and rural health care facilities. The FCC established four programs within the Universal Service Fund to implement the statute. The four programs are: Connect America Fund (formally known as High-Cost Support) for rural areas; Lifeline (for low-income consumers), including initiatives to expand phone service for Native Americans; Schools and Libraries (E-rate); and Rural Health Care.

The Universal Service Fund is paid for by contributions from telecommunications carriers, including wireline and wireless companies, and interconnected Voice over Internet Protocol (VoIP) providers, including cable companies that provide voice service, based on an assessment on their interstate and international end-user revenues. The Universal Service Administrative Company, or USAC, administers the four programs and collects monies for the Universal Service Fund under the direction of the FCC.

On October 16, 2014, the Commission released a Public Notice seeking comments on proposed methodology for Connect America Fund recipients to measure and report speed and latency performance to fixed locations.

On December 18, 2014, the Commission released a Report and Order finalizing decisions necessary to proceed to Phase II of the Connect America Fund.

On December 19, 2014, the Commission released a Second E-rate Modernization Order adjusting program rules and support levels in order to meet long-term program goals for high-speed connectivity.

On January 30, 2015, the Commission released a Public Notice seeking comment on the Alliance of Rural Broadband applicants petition for limited waiver of certain RBE letter of credit requirements.

On February 4, 2015, the Commission released a Public Notice seeking comments on NTCA's emergency petition for limited waiver of RBE letter of credit bank eligibility requirements.

542. 2000 Biennial Regulatory Review—Telecommunications Service Quality Reporting Requirements

Legal Authority: 47 U.S.C. 154(i) and 154(j); 47 U.S.C. 201(b); 47 U.S.C. 303(r); 47 U.S.C. 403

Abstract: The notice of proposed rulemaking (NPRM) proposed to eliminate our current service quality reports (Automated Reporting Management Information System (ARMIS) Report 43–05 and 43–06) and replace them with a more consumer-oriented report. The NPRM proposed to reduce the reporting categories from more than 30 to 6, and addressed the needs of carriers, consumers, State public utility commissions, and other interested parties. On February 15, 2005, the Commission adopted an Order that extended the Federal-State Joint Conference on Accounting Issues until March 1, 2007. On September 6, 2008, the Commission adopted a Memorandum Opinion and Order granting conditional forbearance from the ARMIS 43–05 and 43–06 reporting requirements to all carriers that are required to file these reports.

543. National Exchange Carrier Association Petition

Legal Authority: 47 U.S.C. 151 and 152; 47 U.S.C. 201 and 202; . . .

Abstract: In a Notice of Proposed Rulemaking (NPRM) released on July 19, 2004, the Commission initiated a rulemaking proceeding to examine the proper number of end user common line charges (commonly referred to as subscriber line charges or SLCs) that carriers may assess upon customers that obtain derived channel T–1 service where the customer provides the terminating channelization equipment and upon customers that obtain Primary Rate Interface (PRI) Integrated Service Digital Network (ISDN) service.

544. IP-Enabled Services; WC Docket No. 04–36

Legal Authority: 47 U.S.C. 151 and 152; . . .

Abstract: The notice seeks comment on ways in which the Commission might categorize or regulate IP-enabled services. It poses questions regarding the proper allocation of jurisdiction over each category of IP-enabled service. The notice then requests comment on whether the services comprising each category constitute ''telecommunications services'' or ''information services'' under the

definitions set forth in the Act. Finally, noting the Commission's statutory forbearance authority and title I ancillary jurisdiction, the notice describes a number of central regulatory requirements (including, for example, those relating to access charges, universal service, E911, and disability accessibility), and asks which, if any, should apply to each category of IP-enabled services.

545. Jurisdictional Separations

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i) and 154(j); 47 U.S.C. 205; 47 U.S.C. 221(c); 47 U.S.C. 254; 47 U.S.C. 403; 47 U.S.C. 410

Abstract: Jurisdictional separations is the process, pursuant to part 36 of the Commission's rules, by which incumbent local exchange carriers apportion regulated costs between the intrastate and interstate jurisdictions. In 1997, the Commission initiated a proceeding seeking comment on the extent to which legislative changes, technological changes, and market changes warrant comprehensive reform of the separations process. In 2001, the Commission adopted the Federal-State Joint Board on Jurisdictional Separations' recommendation to impose an interim freeze on the part 36 category relationships and jurisdictional cost allocation factors for a period of five years, pending comprehensive reform of the part 36 separations rules. In 2006, the Commission adopted an Order and Further Notice of Proposed Rulemaking, which extended the separations freeze for a period of three years and sought comment on comprehensive reform. In 2009, the Commission adopted a Report and Order extending the separations freeze an additional year to June 2010. In 2010, the Commission adopted a Report and Order extending the separations freeze for an additional year to June 2011. In 2011, the Commission adopted a Report and Order extending the separations freeze for an additional year to June 2012. In 2012, the Commission adopted a Report and Order extending the separations freeze for an additional two years to June 2014. In 2014, the Commission adopted a Report and Order extending the separations freeze for an additional three years to June 2017.

546. Service Quality, Customer Satisfaction, Infrastructure and Operating Data Gathering (WC Docket Nos. 08–190, 07–139, 07–204, 07–273, 07–21)

Legal Authority: 47 U.S.C. 151 to 155; 47 U.S.C. 160 and 161; 47 U.S.C. 20 to 205; 47 U.S.C. 215; 47 U.S.C. 218 to 220; 47 U.S.C. 251 to 271; 47 U.S.C. 303(r) and 332; 47 U.S.C. 403; 47 U.S.C. 502 and 503

Abstract: This notice of proposed rulemaking (NPRM) tentatively proposes to collect infrastructure and operating data that is tailored in scope to be consistent with Commission objectives from all facilities-based providers of broadband and telecommunications. Similarly, the NPRM also tentatively proposes to collect data concerning service quality and customer satisfaction from all facilities-based providers of broadband and telecommunications. The NPRM seeks comment on the proposals, on the specific information to be collected, and on the mechanisms for collecting information. On June 27, 2013, the Commission adopted a Report and Order addressing collection of broadband deployment data from facilities-based providers.

548. Local Number Portability Porting Interval and Validation Requirements (WC Docket No. 07–244)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 154(j); 47 U.S.C. 251; 47 U.S.C. 303(r)

Abstract: In 2007, the Commission released a Notice of Proposed Rulemaking in WC Docket No. 07–244. The Notice sought comment on whether the Commission should adopt rules specifying the length of the porting intervals or other details of the porting process. It also tentatively concluded that the Commission should adopt rules reducing the porting interval for wireline-to-wireline and intermodal simple port requests, specifically, to a 48-hour porting interval.

In the Local Number Portability Porting Interval and Validation Requirements First Report and Order and Further Notice of Proposed Rulemaking, released on May 13, 2009, the Commission reduced the porting interval for simple wireline and simple intermodal port requests, requiring all entities subject to its local number portability (LNP) rules to complete simple wireline-to-wireline and simple intermodal port requests within one business day. In a related Further Notice of Proposed Rulemaking (FNPRM), the Commission sought comment on what further steps, if any, the Commission should take to improve the process of changing providers.

In the LNP Standard Fields Order, released on May 20, 2010, the Commission adopted standardized data fields for simple wireline and intermodal ports. The Order also adopts the NANC's recommendations for porting process provisioning flows and for counting a business day in the context of number porting.

549. Implementation of Section 224 of the ACT; a National Broadband Plan for Our Future (WC Docket No. 07–245, GN Docket No. 09–51)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 154(j); 47 U.S.C. 224

Abstract: In 2010, the Commission released an Order and Further Notice of Proposed Rulemaking that implemented certain pole attachment recommendations of the National Broadband Plan and sought comment regarding others. On April 7, 2011, the Commission adopted a Report and Order and Order on Reconsideration that sets forth a comprehensive regulatory scheme for access to poles, and modifies existing rules for pole attachment rates and enforcement. In 2015, the Commission issued an Order on Reconsideration that further harmonized the pole attachment rates paid by telecommunications and cable providers.

550. Rural Call Completion; WC Docket No. 13–39

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 201(b); 47 U.S.C. 202(a); 47 U.S.C. 218; 47 U.S.C. 220(a); 47 U.S.C. 257(a); 47 U.S.C. 403

Abstract: The recordkeeping, retention, and reporting requirements in the Report and Order improve the Commission's ability to monitor problems with completing calls to rural areas, and enforce restrictions against blocking, choking, reducing, or restricting calls. The Further Notice of Proposed Rulemaking sought comment on additional measures intended to further ensure reasonable and nondiscriminatory service to rural areas. The Report and Order applies new recordkeeping, retention, and reporting requirements to providers of long-distance voice service that make the initial long-distance call path choice for more than 100,000 domestic retail subscriber lines which, in most cases, is the calling party's long-distance provider. Covered providers are required to file quarterly reports and retain the call detail records for at least six calendar months. Qualifying providers may certify that they meet a Safe Harbor which reduces their reporting and retention obligations, or seek a waiver of these rules from the Wireline Competition Bureau, in consultation with the Enforcement Bureau. The Report and Order also adopts a rule prohibiting all originating and intermediate providers from causing audible ringing to be sent to the caller before the terminating provider has signaled that the called party is being alerted.

On February 13, 2015, the Wireline Competition Bureau provided additional guidance regarding how providers must categorize information. The Commission also adopted an Order on Reconsideration addressing petitions for reconsideration. Reports have been due quarterly beginning with the second quarter of 2015.

551. Rates for Inmate Calling Services; WC Docket No. 12–375

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i) to (j); 47 U.S.C. 225; 47 U.S.C. 276; 47 U.S.C. 303(r); 47 CFR 64

Abstract: In the Report and Order portion of this document, the Federal Communications Commission adopts rule changes to ensure that rates for both interstate and intrastate inmate calling services (ICS) are fair, just, and reasonable, as required by statute, and limits ancillary service charges imposed by ICS providers. In the Report and Order, the Commission sets caps on all interstate and intrastate calling rates for ICS, establishes a tiered rate structure based on the size and type of facility being served, limits the types of ancillary services that ICS providers may charge for and caps the charges for permitted fees, bans flat-rate calling, facilitates access to ICS by people with disabilities by requiring providers to offer free or steeply discounted rates for calls using TTY, and imposes reporting and certification requirements to facilitate continued oversight of the ICS market. In the Further Notice portion of the item, the Commission seeks comment on ways to promote competition for ICS, video visitation, rates for international calls, and considers an array of solutions to further address areas of concern in the ICS industry.

552. Comprehensive Review of the Part 32 Uniform System of Accounts (WC Docket No. 14–130)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i); 47 U.S.C. 201(b); 47 U.S.C. 219; 47 U.S.C. 220

Abstract: The Commission initiates a rulemaking proceeding to review the Uniform System of Accounts (USOA) to consider ways to minimize the compliance burdens on incumbent local exchange carriers while ensuring that the agency retains access to the information it needs to fulfill its regulatory duties. In light of the Commission's actions in areas of price cap regulation, universal service reform, and intercarrier compensation reform, the Commission stated that it is likely appropriate to streamline the existing rules even though those reforms may not have eliminated the need for accounting data for some purposes. The Commission's analysis and proposals are divided into three parts. First, the Commission proposes to streamline the USOA accounting rules while preserving their existing structure. Second, the Commission seeks more focused comment on the accounting requirements needed for price cap carriers to address our statutory and regulatory obligations. Third, the Commission seeks comment on several related issues, including state requirements, rate effects, implementation, continuing property records, and legal authority.

553. Protecting and Promoting the Open Internet (WC Docket No. 14–28)

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 154(i) to (j); 47 U.S.C. 201(b)

Abstract: In January of 2014, the D.C. Circuit in *Verizon* v. *FCC* struck down the no-blocking and no-unreasonable discrimination rules contained in the *2010 Open Internet Order,* invalidating the Commission's attempt to create legally enforceable standards to preserve the open Internet. In response to *Verizon,* in May 2014, the Commission released a Notice of Proposed Rulemaking (*2014 Open Internet NPRM*) that sought comment on a fundamental question: what is the right public policy to ensure that the Internet remains open? After careful review of the record generated by the *2014 Open Internet NPRM,* the Commission issued a combined Report and Order on Remand, Declaratory Ruling, and Order in this proceeding. The Report and Order established bright-line rules banning three specific practices that invariably harm the open Internet: Blocking, Throttling, and Paid Prioritization, and applied those rules to both fixed and mobile broadband Internet access service. In addition, the Report and Order put in place a general conduct standard to prevent a broadband service provider from unreasonably interfering with or disadvantaging the ability of end users to access content, applications, services or devices offered by edge providers. The Report and Order also strengthened the transparency rules that remained in place following *Verizon*.

In order to provide the best possible legal foundation for these rules, the Commission's Declaratory Ruling reclassified broadband Internet access service as a telecommunications service subject to title II of the Communications Act. Finally, in order to tailor title II to the 21st century broadband ecosystem, the Commission issued an Order

forbearing from the majority of title II provisions, leaving in place a light-touch regime that will support regulatory action while simultaneously encouraging broadband investment, innovation, and deployment.

554. Modernizing Common Carrier Rules, WC Docket No. 15–33

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 152(a); 47 U.S.C. 154(j); 47 U.S.C. 154(i); 47 U.S.C. 160 to 161; 47 U.S.C. 201 to 205; 47 U.S.C. 214; 47 U.S.C. 218 to 221; 47 U.S.C. 225 to 228; 47 U.S.C. 254; 47 U.S.C. 303; 47 U.S.C. 308; 47 U.S.C. 403; 47 U.S.C. 410; 47 U.S.C. 571; 47 U.S.C. 1302; 52 U.S.C. 30141

Abstract: The Notice of Proposed Rulemaking (Notice) seeks to update our rules to better reflect current requirements and technology by removing outmoded regulations from the Code of Federal Regulations (CFR). The Notice proposes to update the CFR by (1) eliminating certain rules from which the Commission has forborn, and (2) eliminating references to telegraph service in certain rules. We propose to eliminate several rules from which the Commission has granted unconditional forbearance for all carriers. These are: (1) Section 64.804(c)–(g), which governs a carrier's recordkeeping and other obligations when it extends to federal candidates unsecured credit for communications service; (2) sections 42.4, 42.5, and 42.7, which require carriers to preserve certain records; (3) section 64.301, which requires carriers to provide communications service to foreign governments for international communications; (4) section 64.501, governing telephone companies' obligations when recording telephone conversations; (5) section 64.5001(a)–(c)(2), and (c)(4), which imposes certain reporting and certification requirements for prepaid calling card providers; and (6) section 64.1, governing traffic damage claims for carriers engaged in radio-telegraph, wire-telegraph, or ocean-cable service. We also propose to remove references to telegraph from certain sections of the Commission's rules. This proposal is consistent with Recommendation 5.38 of the Process Reform Report. Specifically, we propose to remove telegraph from: (1) Section 36.126 (separations); (2) section 54.706(a)(13) (universal service contributions); and (3) sections 63.60(c), 63.61, 63.62, 63.65(a)(4), 63.500(g), 63.501(g), and 63.504(k) (discontinuance).

555. Numbering Policies for Modern Communications, WC Docket No. 13–97

Legal Authority: 47 U.S.C. 151; 47 U.S.C. 153 to 154; 47 U.S.C. 201 to 205; 47 U.S.C. 251; 47 U.S.C. 303(r)

Abstract: This Order establishes a process to authorize interconnected VoIP providers to obtain North American Numbering Plan (NANP) telephone numbers directly from the Numbering Administrators, rather than through intermediaries. Section 52.15(g)(2)(i) of the Commission's rules limits access to telephone numbers to entities that demonstrate they are authorized to provide service in the area for which the numbers are being requested. The Commission has interpreted this rule as requiring evidence of either a state certificate of public convenience and necessity (CPCN) or a Commission license. Neither authorization is typically available in practice to interconnected VoIP providers. Thus, as a practical matter, generally only telecommunications carriers are able to provide the proof of authorization required under our rules, and thus able to obtain numbers directly from the Numbering Administrators. This Order establishes an authorization process to enable interconnected VoIP providers that choose direct access to request numbers directly from the Numbering Administrators. Next, the Order sets forth several conditions designed to minimize number exhaust and preserve the integrity of the numbering system.

The Order requires interconnected VoIP providers obtaining numbers to comply with the same requirements applicable to carriers seeking to obtain numbers. These requirements include any state requirements pursuant to numbering authority delegated to the states by the Commission, as well as industry guidelines and practices, among others. The Order also requires interconnected VoIP providers to comply with facilities readiness requirements adapted to this context, and with numbering utilization and optimization requirements. As conditions to requesting and obtaining numbers directly from the Numbering Administrators, interconnected VoIP providers are also required to: (1) Provide the relevant state commissions with regulatory and numbering contacts when requesting numbers in those states, (2) request numbers from the Numbering Administrators under their own unique OCN, (3) file any requests for numbers with the relevant state commissions at least 30 days prior to requesting numbers from the Numbering Administrators, and (4) provide customers with the opportunity to access all abbreviated dialing codes (N11 numbers) in use in a geographic area.

Finally, the Order also modifies Commission's rules in order to permit VoIP Positioning Center (VPC) providers to obtain pseudo-Automatic Number Identification (p-ANI) codes directly from the Numbering Administrators for purposes of providing E911 services.

Federal Reserve System

Semiannual Regulatory Agenda

FEDERAL RESERVE SYSTEM

12 CFR Ch. II

Semiannual Regulatory Flexibility Agenda

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Board is issuing this agenda under the Regulatory Flexibility Act and the Board's Statement of Policy Regarding Expanded Rulemaking Procedures. The Board anticipates having under consideration regulatory matters as indicated below during the period November 1, 2016 through April 30, 2017. The next agenda will be published in spring 2017.

DATES: Comments about the form or content of the agenda may be submitted any time during the next 6 months.

ADDRESSES: Comments should be addressed to Robert deV. Frierson, Secretary of the Board, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FOR FURTHER INFORMATION CONTACT: A staff contact for each item is indicated with the regulatory description below.

SUPPLEMENTARY INFORMATION: The Board is publishing its fall 2016 agenda as part of the Fall 2016 Unified Agenda of Federal Regulatory and Deregulatory Actions, which is coordinated by the Office of Management and Budget under Executive Order 12866. The agenda also identifies rules the Board has selected for review under section 610(c) of the Regulatory Flexibility Act, and public comment is invited on those entries. The complete Unified Agenda will be available to the public at the following Web site: *www.reginfo.gov*. Participation by the Board in the Unified Agenda is on a voluntary basis.

The Board's agenda is divided into three sections. The first, Proposed Rule Stage, reports on matters the Board may consider for public comment during the next 6 months. The second section, Final Rule Stage, reports on matters that have been proposed and are under Board consideration. And a third section, Completed Actions, reports on regulatory matters the Board has completed or is not expected to consider further. A dot (•) preceding an entry indicates a new matter that was not a part of the Board's previous agenda.

Yao-Chin Chao,

Assistant Secretary of the Board.

FEDERAL RESERVE SYSTEM—PROPOSED RULE STAGE

Sequence No.	Title	Regulation Identifier No.
556	Regulation CC—Availability of Funds and Collection of Checks (Docket No: R–1409)	7100–AD68

FEDERAL RESERVE SYSTEM—FINAL RULE STAGE

557	Regulation LL—Savings and Loan Holding Companies and Regulation MM—Mutual Holding Companies (Docket No: R–1429).	7100–AD80

FEDERAL RESERVE SYSTEM (FRS)

Proposed Rule Stage

556. Regulation CC—Availability of Funds and Collection of Checks (Docket No: R–1409)

Legal Authority: 12 U.S.C. 4001 to 4010; 12 U.S.C. 5001 to 5018

Abstract: The Board of Governors of the Federal Reserve System (the Board) proposed amendments to Regulation CC to facilitate the banking industry's ongoing transition to fully electronic interbank check collection and return, including proposed amendments to subpart C to condition a depositary bank's right of expeditious return on the depositary bank agreeing to accept returned checks electronically, either directly or indirectly, from the paying bank. The Board also proposed amendments to subpart B, the funds availability schedule provisions to reflect the fact that there are no longer any non-local checks. The Board proposed to revise the model forms in appendix C that banks may use in disclosing their funds availability policies to their customers and to update the preemption determinations in appendix F. Finally, the Board requested comment on whether it should consider future changes to the regulation to improve the check collection system, such as decreasing the time afforded to a paying bank to decide whether to pay a check in order to reduce the risk to a depositary bank of needing to make funds available for withdrawal before learning whether a deposited check has been returned unpaid.

RIN: 7100–AD68

FEDERAL RESERVE SYSTEM (FRS)

Final Rule Stage

557. Regulation LL—Savings and Loan Holding Companies and Regulation MM—Mutual Holding Companies (Docket No: R–1429)

Legal Authority: 5 U.S.C. 552; 5 U.S.C. 559; 5 U.S.C. 1813; 5 U.S.C. 1817; 5 U.S.C. 1828

Abstract: The Dodd-Frank Act Wall Street Reform and Consumer Protection Act (the Act) transferred responsibility for supervision of Savings and Loan Holding Companies (SLHCs) and their non-depository subsidiaries from the Office of Thrift Supervision (OTS) to the Board of Governors of the Federal Reserve System (the Board), on July 21, 2011. The Act also transferred

supervisory functions related to Federal savings associations and State savings associations to the Office of the Comptroller of the Currency (OCC) and the Federal Deposit Insurance Corporation (FDIC), respectively. The Board on August 12, 2011, approved an interim final rule for SLHCs, including a request for public comment. The interim final rule transferred from the OTS to the Board the regulations necessary for the Board to supervise SLHCs, with certain technical and substantive modifications. The interim final rule has three components: (1) New Regulation LL (part 238), which sets forth regulations generally governing SLHCs; (2) new Regulation MM (part 239), which sets forth regulations governing SLHCs in mutual form; and (3) technical amendments to existing Board regulations necessary to accommodate the transfer of supervisory authority for SLHCs from the OTS to the Board. The structure of interim final Regulation LL closely follows that of the Board's Regulation Y, which governs bank holding companies, in order to provide an overall structure to rules that were previously found in disparate locations. In many instances, interim final Regulation LL incorporated OTS regulations with only technical modifications to account for the shift in supervisory responsibility from the OTS to the Board. Interim final Regulation LL also reflects statutory changes made by the Dodd-Frank Act with respect to SLHCs, and incorporates Board precedent and practices with respect to applications processing procedures and control issues, among other matters. Interim final Regulation MM organized existing OTS regulations governing SLHCs in mutual form (MHCs) and their subsidiary holding companies into a single part of the Board's regulations. In many instances, interim final Regulation MM incorporated OTS regulations with only technical modifications to account for the shift in supervisory responsibility from the OTS to the Board. Interim final Regulation MM also reflects statutory changes made by the Dodd-Frank Act with respect to MHCs. The interim final rule also made technical amendments to Board rules to facilitate supervision of SLHCs, including to rules implementing Community Reinvestment Act requirements and to Board procedural and administrative rules. In addition, the Board made technical amendments to implement section 312(b)(2)(A) of the Act, which transfers to the Board all rulemaking authority under section 11 of the Home Owner's Loan Act relating to transactions with affiliates and extensions of credit to executive officers, directors, and principal shareholders. These amendments include revisions to parts 215 (Insider Transactions) and part 223 (Transactions with Affiliates) of Board regulations.

Nuclear Regulatory Commission

Semiannual Regulatory Agenda

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0186]

10 CFR Chapter I

Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Nuclear Regulatory Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: We are publishing our semiannual regulatory agenda (the Agenda) in accordance with Public Law 96–354, ''The Regulatory Flexibility Act,'' and Executive Order 12866, ''Regulatory Planning and Review.'' The Agenda is a compilation of all rulemaking activities on which we have recently completed action or have proposed or are considering action. We have completed 13 rulemaking activities since publication of our last Agenda on June 9, 2016 (81 FR 37465). This issuance of our Agenda contains 26 active and 23 long-term rulemaking activities: 1 is Economically Significant; 7 represent Other Significant agency priorities; 39 are Substantive, Nonsignificant rulemaking activities; and 2 are Administrative rulemaking activities. Two of the NRC's rulemaking activities impact small entities. This issuance also contains our annual regulatory plan, which contains information on some of our most important regulatory actions that we are considering issuing in proposed or final form during Fiscal Year 2017. Our regulatory plan was submitted to OMB in June 2016; updates have been reflected in the Agenda abstract for each rulemaking. We are requesting comment on the rulemaking activities as identified in this Agenda.

DATES: Submit comments on rulemaking activities as identified in this Agenda by January 23, 2017.

ADDRESSES: Submit comments on any rulemaking activity in the Agenda by the date and methods specified in any **Federal Register** notice on the rulemaking activity. Comments received on rulemaking activities for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the **Federal Register** notice. You may submit comments on this Agenda through the Federal Rulemaking Web site by going to *http://www.regulations.gov* and searching for Docket ID NRC–2016–0186. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions on any rulemaking activity listed in the Agenda, contact the individual listed under the heading ''Agency Contact'' for that rulemaking activity.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Cindy Bladey, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, *telephone:* 301–415–3280; *email: Cindy.Bladey@nrc.gov.* Persons outside the Washington, DC, metropolitan area may call, toll-free: 1–800–368–5642. For further information on the substantive content of any rulemaking activity listed in the Agenda, contact the individual listed under the heading ''Agency Contact'' for that rulemaking activity.

SUPPLEMENTARY INFORMATION:

Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0186 when contacting the NRC about the availability of information for this document. You may obtain publically-available information related to this document by any of the following methods:

- *Reginfo.gov:*
  - For completed rulemaking activities go to *http://www.reginfo.gov/public/do/eAgendaHistory?showStage=completed,* select ''fall 2016 The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions'' from drop down menu, and select ''Nuclear Regulatory Commission'' from drop down menu.
  - For active rulemaking activities go to *http://www.reginfo.gov/public/do/eAgendaMain* and select ''Nuclear Regulatory Commission'' from drop down menu.
  - For long-term rulemaking activities go to *http://www.reginfo.gov/public/do/eAgendaMain,* select ''Current Long Term Actions'' link, and select ''Nuclear Regulatory Commission'' from drop down menu.
- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0186.
- *NRC's Public Web site:* Go to *http://www.nrc.gov/reading-rm/doc-collections/rulemaking-ruleforum/unified-agenda.html* and select fall 2016.
- *NRC's Public Document Room:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0186 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into the Agencywide Documents Access and Management System (ADAMS). The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

Introduction

The Agenda is a compilation of all rulemaking activities on which an agency has recently completed action or has proposed or is considering action. The Agenda reports rulemaking activities in three major categories: Completed, active, and long-term. Completed rulemaking activities are those that were completed since publication of an agency's last Agenda; active rulemaking activities are those that an agency currently plans to have an Advance Notice of Proposed Rulemaking, a Proposed Rule, or a Final Rule issued within the next 12 months; and long-term rulemaking activities are rulemaking activities under development but for which an agency does not expect to have a regulatory action within the 12 months after publication of the current edition of the Unified Agenda.

We assign a ''Regulation Identifier Number'' (RIN) to a rulemaking activity when our Commission initiates a rulemaking and approves a rulemaking plan, or when the NRC staff begins work on a Commission delegated

rulemaking [1] that does not require a rulemaking plan. The Office of Management and Budget uses this number to track all relevant documents throughout the entire ''lifecycle'' of a particular rulemaking activity. We report all rulemaking activities in the Agenda that have been assigned a RIN and meet the definition for a completed, an active, or a long-term rulemaking activity.

The information contained in this Agenda is updated to reflect any action that has occurred on a rulemaking activity since publication of our last Agenda on June 9, 2016 (81 FR 37465). Specifically, the information in this Agenda has been updated through September 2, 2016.

The date for the next scheduled action under the heading ''Timetable'' is the date the next regulatory action for the rulemaking activity is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The Agenda is intended to provide the public early notice and opportunity to participate in our rulemaking process. However, we may consider or act on any rulemaking activity even though it is not included in the Agenda.

Common Prioritization of Rulemaking

A key part of our regulatory program is an annual review of all ongoing and potential rulemaking activities. In conjunction with our budget and long-term planning process, we develop program budget estimates and determine the relative priority of rulemaking activities using our Common Prioritization of Rulemaking (CPR) methodology (ADAMS Accession No. ML15086A074). The results of the most current annual review is available on the NRC's Rulemaking Priorities Web page at *http://www.nrc.gov/reading-rm/doc-collections/rulemaking-ruleforum/rule-priorities.html.* The CPR methodology considers four factors and assigns a score to each factor. Factor A includes activities that support the NRC's Strategic Plan goals of ensuring the safe and secure use of radioactive materials. Factor B includes activities that support the Strategic Plan cross-cutting strategies of Regulatory Effectiveness and Openness. Specifically, this factor considers whether the rulemaking activity enhances regulatory effectiveness and/or openness in the way that the NRC conducts regulatory activities. Factor C is a governmental factor representing interest to the NRC, Congress, or other governmental bodies. Factor D is an external factor representing interest to members of the public, non-governmental organizations, the nuclear industry, vendors, and suppliers. The overall priority is determined by adding the factor scores together for each rulemaking activity.

Section 610 Periodic Reviews Under the Regulatory Flexibility Act

Section 610 of the Regulatory Flexibility Act (RFA) requires agencies to conduct a review within 10 years of promulgation of those regulations that have or will have a *significant* economic impact on a *substantial* number of small entities. We undertake these reviews to decide whether the rules should be unchanged, amended, or withdrawn. At this time, we do not have any rules that have a *significant* economic impact on a *substantial* number of small entities; therefore, we have not included any RFA Section 610 periodic reviews in this edition of the Agenda. A complete listing of our regulations that impact small entities and related Small Entity Compliance Guides are available from the NRC's Web site at *http://www.nrc.gov/about-nrc/regulatory/rulemaking/flexibility-act/small-entities.html.*

Public Comments Received on the NRC's Unified Agenda

The NRC did not receive any written public comments on its last Agenda that published on June 9, 2016 (81 FR 37465).

Dated at Rockville, Maryland, this 2nd day of September 2016.

For the Nuclear Regulatory Commission.

Cindy Bladey,

Chief, Rules, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration.

NUCLEAR REGULATORY COMMISSION—PROPOSED RULE STAGE

559	Controlling the Disposition of Solid Materials [NRC–1999–0002]	3150–AH18
560	Variable Annual Fee Structure for Small Modular Power Reactors [NRC–2008–0664]	3150–AI54
561	Revision of Fee Schedules: Fee Recovery for FY 2016 [NRC–2015–0223]	3150–AJ66

NUCLEAR REGULATORY COMMISSION (NRC)

Proposed Rule Stage

558. • Revision of Fee Schedules; Fee Recovery for FY 2017 [NRC–2016–0081]

Legal Authority: 31 U.S.C. 483; 42 U.S.C. 2201 ; 42 U.S.C. 2214; 42 U.S.C. 5841

Abstract: This rule would implement the Omnibus Budget Reconciliation Act of 1990 (OBRA–90), as amended, which requires the Nuclear Regulatory Commission to recover approximately 90 percent of its budget authority in a given fiscal year, less the amounts appropriated from the Waste Incidental to Reprocessing and generic homeland security activities, through fees assessed to licensees. This rulemaking would amend the Commission's fee schedules for licensing, inspection, and annual fees charged to its applicants and licensees. The licensing and inspection fees are established under 10 CFR part 170 and recover the Nuclear Regulatory Commission's cost of providing services to identifiable applicants and licensees. Examples of services provided by the

[1] For information on delegated rulemakings see ADAMS Accession No. ML16040A011.

Nuclear Regulatory Commission for which 10 CFR part 170 fees are assessed include license application reviews, license renewals, license amendment reviews, and inspections. The annual fees established under 10 CFR part 171 recover budgeted costs for generic (*e.g.,* research and rulemaking) and other regulatory activities not recovered under 10 CFR part 170 fees.

NUCLEAR REGULATORY COMMISSION (NRC)

Completed Actions

559. Controlling the Disposition of Solid Materials [NRC–1999–0002]

Legal Authority: 42 U.S.C. 2201; 42 U.S.C. 5841

Abstract: This rule would add radiological criteria for controlling the disposition of solid materials that have no, or very small amounts of, residual radioactivity resulting from licensed operations, and which originate in restricted or impacted areas of NRC-licensed facilities. The NRC staff provided a draft proposed rule package on Controlling the Disposition of Solid Materials to the Commission on March 31, 2005, which the Commission disapproved (ADAMS Accession No. ML051520285). The rulemaking package included a summary of stakeholder comments (NUREG/CR–6682), Supplement 1 (ADAMS Accession No. ML003754410). The Commission's decision was based on the fact that the Agency is currently faced with several high priority and complex tasks, that the current approach to review specific cases on an individual basis is fully protective of public health and safety, and that the immediate need for this rule has changed due to the shift in timing for reactor decommissioning. The Commission has discontinued action on this rulemaking.

561. Revision of Fee Schedules: Fee Recovery for FY 2016 [NRC–2015–0223]

Legal Authority: 31 U.S.C. 483; 42 U.S.C. 2201; 42 U.S.C. 2214; 42 U.S.C. 5841

Abstract: This rule amends the Nuclear Regulatory Commission licensing, inspection, special project, and annual fees charged to its applicants and licensees and, for the first time, the NRC is proposing to recover its costs when it responds to third-party demands for information in litigation where the United States is not a party (''Touhy requests''). These amendments are necessary to implement the Omnibus Budget Reconciliation Act of 1990 as amended (OBRA–90), which requires the NRC to recover approximately 90 percent of its annual budget through fees.

Regulatory Flexibility Agenda

AGENCY: Securities and Exchange Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Securities and Exchange Commission is publishing the Chair's agenda of rulemaking actions pursuant to the Regulatory Flexibility Act (RFA) (Pub. L. 96–354, 94 Stat. 1164) (Sep. 19, 1980). The items listed in the Regulatory Flexibility Agenda for autumn 2016 reflect only the priorities of the Chair of the U.S. Securities and Exchange Commission, and do not necessarily reflect the view and priorities of any individual Commissioner.

Information in the agenda was accurate on September 2, 2016, the date on which the Commission's staff completed compilation of the data. To the extent possible, rulemaking actions by the Commission since that date have been reflected in the agenda. The Commission invites questions and public comment on the agenda and on the individual agenda entries.

The Commission is now printing in the **Federal Register**, along with our preamble, only those agenda entries for which we have indicated that preparation of an RFA analysis is required.

The Commission's complete RFA agenda will be available online at *www.reginfo.gov.*

DATES: Comments should be received on or before January 23, 2017.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/other.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number S7–20–16 on the subject line; or
- Use the Federal eRulemaking Portal (*http://www.regulations.gov*). Follow the instructions for submitting comments.

Paper Comments

- Send paper comments to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. S7–20–16. This file number should be included on the subject line if email is used. To help us process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/other.shtml*). Comments are also available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Anne Sullivan, Office of the General Counsel, 202–551–5019.

SUPPLEMENTARY INFORMATION: The RFA requires each Federal agency, twice each year, to publish in the **Federal Register** an agenda identifying rules that the agency expects to consider in the next 12 months that are likely to have a significant economic impact on a substantial number of small entities (5 U.S.C. 602(a)). The RFA specifically provides that publication of the agenda does not preclude an agency from considering or acting on any matter not included in the agenda and that an agency is not required to consider or act on any matter that is included in the agenda (5 U.S.C. 602(d)). The Commission may consider or act on any matter earlier or later than the estimated date provided on the agenda. While the agenda reflects the current intent to complete a number of rulemakings in the next year, the precise dates for each rulemaking at this point are uncertain. Actions that do not have an estimated date are placed in the long-term category; the Commission may nevertheless act on items in that category within the next 12 months. The agenda includes new entries, entries carried over from prior publications, and rulemaking actions that have been completed (or withdrawn) since publication of the last agenda.

The following abbreviations for the acts administered by the Commission are used in the agenda:

''Securities Act''—Securities Act of 1933
''Exchange Act''—Securities Exchange Act of 1934
''Investment Company Act''—Investment Company Act of 1940
''Investment Advisers Act''—Investment Advisers Act of 1940
''Dodd Frank Act''—Dodd-Frank Wall Street Reform and Consumer Protection Act
''JOBS Act''—Jumpstart Our Business Startups Act'

The Commission invites public comment on the agenda and on the individual agenda entries.

By the Commission.

Dated: September 2, 2016.

Brent J. Fields,

Secretary.

572. Disclosure of Payments by Resource Extraction Issuers

Legal Authority: Pub. L. 111–203, 124 Stat 1376 (July 21, 2010); 15 U.S.C. 78c(b); 15 U.S.C. 78m; 15 U.S.C. 78w(a)

Abstract: The Commission adopted rules to implement section 1504 of the Dodd-Frank Act, which added section 13(q) to the Exchange Act. Section 13(q) requires the Commission to adopt rules requiring resource extraction issuers to disclose in an annual report of the resource extraction issuer payments made to foreign governments or the Federal Government for the purpose of commercial development of oil, natural gas or minerals. The Commission had previously adopted a rule implementing section 1504 of the Dodd-Frank Act that was vacated and remanded to the Commission by the District Court for the District of Columbia in July 2013.

AGENCY: Surface Transportation Board.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Surface Transportation Board (the Board), in accordance with the requirements of the Regulatory Flexibility Act (RFA), is publishing a semiannual agenda of: (1) Current and projected rulemakings; and (2) existing regulations being reviewed to determine whether to propose modifications through rulemaking. Listed below are the regulatory actions to be developed or reviewed during the next 12 months. Following each rule identified is a brief description of the rule, including its purpose and legal basis.

FOR FURTHER INFORMATION CONTACT: A contact person is identified for each of the rules listed below.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), sets forth a number of requirements for agency rulemaking. Among other things, the RFA requires that, semiannually, each agency shall publish in the **Federal Register** a regulatory flexibility agenda, which shall contain:

(1) A brief description of the subject area of any rule that the agency expects to propose or promulgate, which is likely to have a significant economic impact on a substantial number of small entities;

(2) A summary of the nature of any such rule under consideration for each subject area listed in the agenda pursuant to paragraph (1), the objectives and legal basis for the issuance of the rule, and an approximate schedule for completing action on any rule for which the agency has issued a general notice of proposed rulemaking; and

(3) The name and telephone number of an agency official knowledgeable about the items listed in paragraph (1).

Accordingly, a list of proceedings appears below containing information about subject areas in which the Board is currently conducting rulemaking proceedings or may institute such proceedings in the near future. It also contains information about existing regulations being reviewed to determine whether to propose modifications through rulemaking.

The agenda represents the Board's best estimate of rules that will be considered over the next 12 months. However, section 602(d) of the RFA, 5 U.S.C. 602(d), provides: ''Nothing in [section 602] precludes an agency from considering or acting on any matter not included in a regulatory flexibility agenda or requires an agency to consider or act on any matter listed in such agenda.''

The Board is publishing its fall 2016 regulatory flexibility agenda as part of the Unified Agenda of Federal Regulatory and Deregulatory Actions (Unified Agenda). The Unified Agenda is coordinated by the Office of Management and Budget (OMB), pursuant to Executive Orders 12866 and 13563. The Board is participating voluntarily in the program to assist OMB.

Dated: September 7, 2016.

By the Board, Chairman Elliott, Vice Chairman Miller, and Commissioner Begeman.

Andrea Pope-Matheson,

Clearance Clerk.

SURFACE TRANSPORTATION BOARD (STB)

Completed Actions

582. Review of Commodity, Boxcar, and TOFC/COFC Exemptions, Docket No. EP 704

Legal Authority: 49 U.S.C. 10502; 49 U.S.C. 13301

Abstract: The Board requested public comment and held a public hearing in February 2011 to explore the continued utility of, and the issues surrounding,

the commodity exemptions under 49 CFR 1039.10 and 1039.11, the boxcar exemption under 49 CFR 1039.14, and the trailer-on-flatcar/container-on-flatcar exemption under 49 CFR part 1090. The Board encouraged interested parties to address the effectiveness of the exemptions in the marketplace, whether the rationale behind any of these exemptions should be revisited, and whether the exemptions should be subject to periodic review. Comments and exhibits were received through February 24, 2011. The Board opened a new sub-docket to propose the revocation of certain exemptions.
