FEDERAL REGISTER

Vol. 81 Friday,

No. 247 December 23, 2016

Book 1 of 2 Books

Pages 94211–94494

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Presidential Determination No. 2017–04 of December 2, 2016

Presidential Determination Pursuant to Section 570(a) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1997

Memorandum for the Secretary of State

By the authority vested in me as President by the Constitution and the laws of the United States, including section 570(a) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1997 (Public Law 104–208) (the ''Act''), I hereby determine and certify, pursuant to section 570(a) of the Act, that Burma has made measurable and substantial progress in improving human rights practices and implementing democratic government.

You are authorized and directed to provide this determination and the accompanying Memorandum of Justification to the Congress and to publish the determination in the *Federal Register.*

Memorandum of December 5, 2016

Steps for Increased Legal and Policy Transparency Concerning the United States Use of Military Force and Related National Security Operations

Memorandum for the Heads of Executive Departments and Agencies

Since my earliest days in office, I have emphasized the importance of transparency and my commitment to making as much information as possible available to the Congress and the public about the United States use of military force and related national security operations. Doing so, I believe, not only supports the process of democratic decision making, but also demonstrates the legitimacy and strengthens the sustainability of our operations while promoting mutual understanding with our allies and partners.

The United States has used military force and conducted related national security operations within legal and policy frameworks that are designed to ensure that such operations are lawful and effective and that they serve our interests and values. Consistent with my commitment to transparency, my Administration has provided to the public an unprecedented amount of information regarding these frameworks through speeches, public statements, reports, and other materials. We have attempted to explain, consistent with our national security and the proper functioning of the executive branch, when and why the United States conducts such operations, the legal basis and policy parameters for such operations, and how such operations have unfolded, so that the American people can better understand them.

In addition to the efforts we have made to date, there is still more work that can be done to inform the public. Thus, consistent with my Administration's previous efforts, by this memorandum I am directing national security departments and agencies to take additional steps to share with the public further information relating to the legal and policy frameworks within which the United States uses military force and conducts related national security operations. Accordingly, I hereby direct as follows:

Section 1. *Report.* National security departments and agencies shall prepare for the President a formal report that describes key legal and policy frameworks that currently guide the United States use of military force and related national security operations, with a view toward the report being released to the public.

Sec. 2. *Keeping the Public Informed.* On no less than an annual basis, the National Security Council staff shall be asked to, as appropriate, coordinate a review and update of the report described in section 1 of this memorandum, provide any updated report to the President, and arrange for the report to be released to the public.

Sec. 3. *Definitions.* For the purposes of this memorandum:

''National security departments and agencies'' include the Departments of State, the Treasury, Defense, Justice, and Homeland Security, the Office of the Director of National Intelligence, the Central Intelligence Agency, and such other agencies as the President may designate.

''Related national security operations'' include operations deemed relevant and appropriate by national security departments and agencies for inclusion in the report described in section 1 of this memorandum, such as detention, transfer, and interrogation operations.

Sec. 4. *Publication.* The Secretary of State is hereby authorized and directed to publish this memorandum in the *Federal Register.*

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2604

RIN 3209–AA39

Freedom of Information Act Regulation

AGENCY: Office of Government Ethics (OGE).

ACTION: Interim final rule.

SUMMARY: The U.S. Office of Government Ethics (OGE) is updating its Freedom of Information Act (FOIA) regulation to implement changes in accordance with the FOIA Improvement Act of 2016.

DATES: This interim final rule is effective December 23, 2016. Written comments are invited and must be received on or before January 23, 2017.

ADDRESSES: You may submit written comments to OGE on the interim final rule by any of the following methods:

- *Email: usoge@oge.gov.* Include the appropriate Regulation Identifier Number in the subject line of the message.
- *Fax:* (202) 482–9237.
- *Mail/Hand Delivery/Courier:* U.S. Office of Government Ethics, Suite 500, 1201 New York Avenue NW., Washington, DC 20005–3917, Attention: Jennifer Matis, Assistant Counsel.

Instructions: All submissions must include OGE's agency name and the appropriate Regulation Identifier Number (RIN) 3209–AA39 for this proposed rulemaking. OGE will post all comments on its Web site (*www.oge.gov*). All comments received will be posted without change; OGE generally does not edit a commenter's personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Jennifer Matis, Assistant Counsel, Office of Government Ethics, Suite 500, 1201 New York Avenue NW., Washington, DC 20005–3917; Telephone: 202–482–9216; TTY: 800–877–8339; FAX: 202–482–9237.

SUPPLEMENTARY INFORMATION:

I. Substantive Discussion

On June 30, 2016, the FOIA Improvement Act of 2016, Public Law 114–185, 130 Stat. 538 (the Act) was enacted. The Act specifically requires all agencies to review and update their Freedom of Information Act (FOIA) regulations in accordance with its provisions. OGE is making changes to its regulations accordingly, including correcting citations, highlighting the electronic availability of records, implementing the ''rule of three'' for frequently requested records, notifying requesters of their right to seek assistance from the FOIA Public Liaison and the Office of Government Information Services, changing the time limit for appeals, implementing the foreseeable harm standard, describing limitations on assessing search fees if the response time is delayed, and adding new annual reporting requirements.

II. Matters of Regulatory Procedure

Administrative Procedure Act

Pursuant to 5 U.S.C. 553(b), I find that good cause exists for waiving the general notice of proposed rulemaking and public comment procedures as to these technical amendments. The notice and comment procedures are being waived because these amendments, which concern matters of agency organization, procedure and practice, are being adopted in accordance with mandates required by the FOIA Improvement Act of 2016, which requires that agencies amend their FOIA regulations not later than 180 days after the date of enactment. It is also in the public interest in order to provide notice to requestors of the additional time to file appeals.

Regulatory Flexibility Act

As the Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this interim final rule would not have a significant economic impact on a substantial number of small entities because it primarily affects individuals requesting records under the FOIA.

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does not apply because this regulation does not contain information collection requirements that require approval of the Office of Management and Budget.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 5, subchapter II), this rule would not significantly or uniquely affect small governments and will not result in increased expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (as adjusted for inflation) in any one year.

Executive Order 13563 and Executive Order 12866

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select the regulatory approaches that maximize net benefits (including economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. In promulgating this rulemaking, OGE has adhered to the regulatory philosophy and the applicable principles of regulation set forth in Executive Orders 12866 and 13563. The rule has not been reviewed by the Office of Management and Budget because it is not a significant regulatory action for the purposes of Executive Order 12866.

Executive Order 12988

As Director of the Office of Government Ethics, I have reviewed this rule in light of section 3 of Executive Order 12988, Civil Justice Reform, and certify that it meets the applicable standards provided therein.

List of Subjects in 5 CFR Part 2604

Administrative practice and procedure, Archives and records, Confidential business information, Freedom of information, Reporting and recordkeeping requirements.

Approved: December 20, 2016.

Walter M. Shaub, Jr.,

Director, Office of Government Ethics.

For the reasons set out above, OGE amends 5 CFR part 2604 as follows:

PART 2604—FREEDOM OF INFORMATION ACT RULES AND SCHEDULE OF FEES FOR THE PRODUCTION OF PUBLIC FINANCIAL DISCLOSURE REPORTS

■ 1. The authority citation for part 2604 continues to read as follows:

Authority: 5 U.S.C. 552; 5 U.S.C. App. 101–505; E.O. 12600, 52 FR 23781, 3 CFR, 1987 Comp., p. 235; E.O. 13392, 70 FR 75373, 3 CFR, 2005 Comp., p. 216.

■ 2. Amend § 2604.103 by revising the definition of ''Chief FOIA Officer'' to read as follows:

§ 2604.103 Definitions.

* * * * *

Chief FOIA Officer means the OGE official designated in 5 U.S.C. 552(j)(1) to provide oversight of all of OGE's FOIA program operations.

* * * * *

■ 3. Amend § 2604.201 by revising paragraphs (b) introductory text and (b)(4), removing paragraph (c), and redesignating paragraph (d) as paragraph (c) to read as follows:

§ 2604.201 Public reading room facility and Web site.

* * * * *

(b) *Records available.* The OGE Web site contains OGE records which are required by 5 U.S.C. 552(a)(2) to be made available for public inspection in an electronic format, including:

* * * * *

(4) Copies of records created by OGE that have been released to any person under subpart C of this part and that, because of the nature of their subject matter, OGE determines have become or are likely to become the subject of subsequent requests for substantially the same records or that have been requested three or more times; and

* * * * *

■ 4. Amend § 2604.202 by revising paragraph (a) to read as follows:

§ 2604.202 Index identifying information for the public.

(a) OGE will maintain and make available for public inspection in an electronic format a current index of the materials available on its Web site that are required to be indexed under 5 U.S.C. 552(a)(2).

* * * * *

■ 5. Amend § 2604.303 by revising paragraphs (a) and (b)(4), and adding paragraph (b)(5) to read as follows:

§ 2604.303 Form and content of responses.

(a) *Form of notice granting a request.* After the FOIA Officer has made a determination to grant a request in whole or in part, the requester will be notified in writing. The notice will describe the manner in which the record will be disclosed, whether by providing a copy of the record with the response or at a later date, or by making a copy of the record available to the requester for inspection at a reasonable time and place. The procedure for such an inspection may not unreasonably disrupt OGE operations. The response letter will inform the requester of the right of the requester to seek assistance from the FOIA Public Liaison. The response letter will also inform the requester in the response of any fees to be charged in accordance with the provisions of subpart E of this part.

(b) * * *

(4) A statement that the denial may be appealed under § 2604.304, and a description of the requirements of that section; and

(5) A statement of the right of the requester to seek dispute resolution services from the FOIA Public Liaison or the Office of Government Information Services (OGIS).

■ 6. Amend § 2604.304 by revising paragraph (b) to read as follows:

§ 2604.304 Appeal of denials.

* * * * *

(b) *Letter of appeal.* The appeal must be in writing and must be sent within 90 calendar days of receipt of the denial letter. An appeal should include a copy of the initial request, a copy of the letter denying the request in whole or in part, and a statement of the circumstances, reasons or arguments advanced in support of disclosure of the record.

* * * * *

■ 7. Amend § 2604.305 by revising paragraph (c) to read as follows:

§ 2604.305 Time limits.

* * * * *

(c) *Extension of time limits.* When additional time is required for one of the reasons stated in paragraph (d) of this section, OGE will, within the statutory 20-working day period, issue written notice to the requester setting forth the reasons for the extension and the date on which a determination is expected to be made. If more than 10 additional working days are needed, the requester will be notified and provided an opportunity to limit the scope of the request or to arrange for an alternative time frame for processing the request or a modified request. To aid the requester, OGE will make available its FOIA Public Liaison to assist in the resolution of any disputes. Additionally, OGE will notify the requester of the right of the requester to seek dispute resolution services from OGIS.

* * * * *

■ 8. Amend § 2604.401 by revising paragraph (a) to read as follows:

§ 2604.401 Application of exemptions.

(a) *Foreseeable harm standard.* A requested record will not be withheld from inspection or copying unless it comes within one of the classes of records exempted by 5 U.S.C. 552 and OGE reasonably foresees that disclosure would harm an interest protected by an exemption described in 5 U.S.C. 552(b) or is prohibited by law. Nothing in this paragraph requires disclosure of information that is otherwise prohibited from disclosure by law, or otherwise exempted from disclosure under 5 U.S.C. 552(b)(3).

* * * * *

■ 9. Amend § 2604.503 by revising paragraph (d) to read as follows:

§ 2604.503 Limitations on charging fees.

* * * * *

(d) If OGE does not comply with one of the time limits under § 2604.305, it will not assess search fees (or in the case of a requester described under § 2604.502(c), duplication fees), except as provided in paragraphs (d)(1) through (d)(3) of this section.

(1) If OGE has determined that unusual circumstances apply, as defined in 5 U.S.C. 552(a)(6)(B), and OGE provided timely written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B), a failure to comply with the time limit is excused for an additional 10 days.

(2) If OGE has determined that unusual circumstances apply, as defined in 5 U.S.C. 552(a)(6)(B), and more than 5,000 pages are necessary to respond to the request, OGE may charge search fees (or in the case of requesters described under § 2604.502(c), duplication fees) if OGE has provided timely written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B) and OGE has discussed with the requester via written mail, email, or telephone (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5. U.S.C. 552(a)(6)(B)(ii).

(3) If a court has determined that exceptional circumstances exist, as

defined in 5 U.S.C. 552(a)(6)(B), a failure to comply with the time limits shall be excused for the length of time provided by the court order.

■ 10. Revise § 2604.601 to read as follows:

§ 2604.601 Electronic posting and submission of annual OGE FOIA report.

On or before February 1 of each year, OGE will submit to the Office of Information Policy at the United States Department of Justice and to the Director of OGIS an Annual FOIA Report. The report will include the information required by 5 U.S.C. 552(e). OGE will electronically post on its Web site the report and the raw statistical data used in each report, in accordance with 5 U.S.C. 552(e)(3).

RIN 0579–AE17

Importation of Lemons From Northwest Argentina

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the fruits and vegetables regulations to allow the importation of lemons from northwest Argentina into the continental United States. As a condition of entry, lemons from northwest Argentina would have to be produced in accordance with a systems approach that includes requirements for importation in commercial consignments; registration and monitoring of places of production and packinghouses; pest-free places of production; grove sanitation, monitoring, and pest control practices; treatment with a surface disinfectant; lot identification; and inspection for quarantine pests by the Argentine national plant protection organization. Additionally, lemons from northwest Argentina will have to be harvested green and within a certain time period, or treated for Mediterranean fruit fly in accordance with an approved treatment schedule. Lemons from northwest Argentina will also be required to be accompanied by a phytosanitary certificate with an additional declaration stating that the lemons have been inspected and found to be free of quarantine pests and were produced in accordance with the requirements. This action allows for the importation of lemons from northwest Argentina into the United States while continuing to provide protection against the introduction of quarantine pests.

DATES: Effective January 23, 2017.

FOR FURTHER INFORMATION CONTACT: Mr. Juan A. (Tony) Román, Senior Regulatory Policy Specialist, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236; (301) 851–2242.

SUPPLEMENTARY INFORMATION:

Background

The regulations in ''Subpart-Fruits and Vegetables'' (7 CFR 319.56–1 through 319.56–75, referred to below as the regulations) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests within the United States.

On May 10, 2016, we published in the **Federal Register** (81 FR 28758, Docket No. APHIS–2014–0092) a proposal [1] to amend the regulations to allow the importation of commercial consignments of fresh lemons from northwest Argentina into the continental United States, subject to a systems approach.

We solicited comments concerning our proposal for 60 days ending July 11, 2016. We extended the deadline for comments until August 10, 2016, in a document published in the **Federal Register** on July 11, 2016 (81 FR 44801, Docket No. APHIS–2014–0092). We received 414 comments by that date. They were from domestic and foreign citrus producers, State and national organizations representing citrus producers, State departments of agriculture, an organization of State plant pest regulatory agencies, Argentina's national plant protection organization, the Argentine embassy, lemon importers and wholesalers, longshoremen, U.S. ports of entry, Senators, Representatives, an Argentine organization devoted to citrus research, and private citizens. Forty-seven commenters supported the rule as proposed. Seventy-six commenters generally opposed the proposed rule but did not address any specific provisions. The remaining commenters raised a number of issues and concerns about the proposed rule. These comments are discussed below by topic.

[1] To view the proposed rule and the comments we received, go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0092.*

One commenter stated that the proposed rule failed to comply with the requirements of the National Environmental Policy Act (NEPA). Specifically, the commenter stated that the proposed rule is a major Federal action that significantly affects the human environment, as set forth in 40 CFR 1508.18 and 1508.27, respectively, and that the Animal and Plant Health Inspection Service (APHIS) should have prepared an environmental impact statement or environmental assessment (EA). The commenter further stated that none of the APHIS categorical exclusions set forth in 7 CFR 1b.3 apply, therefore at a minimum, APHIS is obligated to prepare an EA.

APHIS notes that the APHIS NEPA implementing regulations in 7 CFR part 372 specify that additional routine measures used by APHIS are categorically exempt from NEPA, in addition to those measures set forth in 7 CFR 1b.3. The measures in this rule that will occur within the United States fall within the scope of these additional routine measures. Accordingly, a categorical exclusion was prepared.

We do not agree that the rule meets Council on Environmental Quality requirements for a ''significant'' Federal action, and thus, by definition, cannot be a ''major'' Federal action (a type of significant action). The rule is not contextually significant from a policy standpoint because it does not substantially alter existing policy regarding market access requests, and has severity/intensity only if one concedes that the mitigations specified in the rule are ineffective in precluding the introduction of quarantine pests. We consider them effective, for reasons discussed below.

One commenter stated that APHIS must take all available measures to preclude introduction of invasive species into the United States.

APHIS agrees. Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), we are responsible for regulating exports, imports, and interstate commerce in agricultural products and other commodities that pose a risk of harboring plant pests or noxious weeds in ways that are based on sound science and that will reduce the risk of dissemination of plant pests or noxious weeds. For this reason we prepared a pest risk assessment (PRA) and assigned mitigations with a proven track record in the risk management document (RMD).

One commenter noted that APHIS has also recently published proposed rules to allow for the importation of citrus from South Africa (79 FR 51273, Docket No. APHIS–2014–0015) and Chile (81

FR 19063, Docket No. APHIS–2015–0051). The commenter stated that because both of those proposals deal with a disease or pest of concern which is also of concern in the Argentine proposal, APHIS should not finalize this rulemaking until we have responded to the comments on the other proposed rules.

We disagree with the commenter that the other rules must be finalized before we can proceed with this rule. APHIS considers each of its rulemakings as a distinct regulatory action. This is consistent both with the language of the Administrative Procedure Act (5 U.S.C. 551–559) and with case history regarding its implementation.

Site Visits

Many commenters stated that APHIS should conduct an additional site visit before the rule is implemented. Many of those commenters also stated that representatives of State governments and subject matter experts should be involved in the site visit.

APHIS conducted an additional site visit to review the details of the draft operational workplan in September of 2016. In addition to APHIS personnel, a representative from the California Department of Food and Agriculture and a former plant pathologist from the United States Department of Agriculture, Agricultural Research Service (ARS) participated in the site visit as observers. The site visit revealed nothing that would require a revision of the PRA.

Some commenters stated that the site visit should include a holistic review of Argentina's production system. Other commenters stated that Argentina's traceability system provides holistic records of their production system.

APHIS conducted a thorough review of Argentina's traceability system. We looked at the requirements for growers signing up, initial site visits of production sites, ongoing oversight during the growing season, field and packinghouse inspection, approval for movement and the final inspection for phytosanitary certificates. We also reviewed the computer system they use, how users are added, who controls movement and harvest approvals, and who issues phytosanitary certificates. Based on that review, we consider Argentina's traceability system to be robust, and we will use it for traceback as necessary. However, as specified in the proposed rule, we also consider it necessary to be able to identify lots of lemons through the export process, from the place of production to arrival at the port of entry. This establishes traceability beyond the scope of the Argentine domestic traceability system.

One commenter stated that Argentina's traceability system will not be able to trace detections of quarantine pests in U.S. orchards or urban areas back to places of production.

APHIS is confident that if the mitigations in the rule are adhered to, quarantine pests will not be introduced into United States orchards or urban areas.

One commenter stated that Argentina's traceability system has limited utility for citrus black spot (CBS), given its prolonged latency period.

As we explained in the PRA, fruit is not a pathway for CBS.

One commenter stated that the site visit should specifically focus on the infrastructure of the national plant protection organization (NPPO) of Argentina. Another commenter stated that the site visit should specifically focus on NPPO oversight of places of production.

The NPPO of Argentina is the Servicio Nacional de Sanidad y Calidad Agroalimentaria (SENASA). During the September 2016 site visit, we looked at SENASA's infrastructure and asked questions to address their capacity to provide oversight. We remain confident that SENASA will be able to adhere to the requirements of the systems approach.

Some commenters stated that the site visit should specifically focus on identifying pest populations in or near production sites.

During the site visit, we asked questions about pest populations, and we looked ourselves at fruit fly traps and at the citrus for signs of pests. We did not discover anything that requires revisions to the PRA.

One commenter stated that the site visit should specifically focus on organic production sites.

APHIS did specifically ask about organic production. Argentina may in the future ship organic fruit, but currently they do not. Current packinghouse practices include chemical treatments that are not organic, so any fruit that arrived from an organic production site would lose its organic status during packinghouse processing.

We will ask SENASA about organic production in northwest Argentina, as well as pest control guidelines they have developed for organic producers. We note that there are provisions in the systems approach that preclude the commingling of organic lemons and lemons for export to the United States later in the production chain.

One commenter stated that the site visit should be conducted during the summer months in Argentina.

The 2015 site visit occurred in June, during harvest season in Argentina. For this reason, APHIS considered a second site visit during the September/October timeframe to be sufficient.

One commenter stated that two additional site visits are needed. Specifically, the commenter stated that after the September site visit, a second fact-finding trip should be made to review the harvesting and packing operations in Argentina. The commenter stated that a trip at that time is needed since so many steps in the systems approach take place during the harvesting and packing operations.

APHIS disagrees. As we explained above, the 2015 site visit occurred in June, which is during the harvest season in Argentina. For this reason, we do not consider two additional site visits to be necessary.

Two commenters stated that industry stakeholders should be allowed to consult with trip members on their findings.

APHIS prepared a site visit report outlining the findings of the visit. The site visit report is available on the APHIS Web site at *https://www.aphis.usda.gov/aphis/ourfocus/planthealth/import-information/proposal-import-lemons-argentina.*

Many commenters expressed concern that the findings of the 2007 site visit are outdated.

The trip in 2007 was conducted by APHIS risk assessors to evaluate pest complexes in Argentina in order to prepare the PRA. Information from this trip served as a baseline primarily for the pest list in the PRA. The PRA, as other commenters noted, has been continually updated since this trip through means that APHIS routinely uses to update PRAs, such as literature review and ongoing consultation with the NPPO of Argentina. More specifically, the PRA was updated in 2014 after publication of new research results on seed transmission of citrus variegated chlorosis (CVC) in citrus. The PRA was also updated in 2014 in response to a new finding of citrus greening, also known as Huanglongbing (HLB), in Argentina. The PRA was reviewed by APHIS personnel at the same time to address comments from Argentina regarding the pest list. Furthermore, APHIS conducted a site visit just last year, in June of 2015, and the information gathered during that visit was used to update the PRA before the proposed rule was published.

Two commenters stated that the 2015 site visit was not a technical review of Argentina's program.

The commenters are mistaken. The 2015 site visit was a technical review of Argentina's program.

Three commenters stated that APHIS did not provide enough information to the public regarding the 2015 site visit to evaluate its adequacy. Two commenters stated that APHIS' slow response to a Freedom of Information Act (FOIA) request for documents regarding the 2015 site visit is an indication of the inadequacy of the trip.

APHIS has received the FOIA request and is in the process of responding to it. The time taken to respond to the FOIA request is consistent with normal timeframes for such requests and not a reflection of the adequacy of the trip.

One commenter stated that APHIS' willingness to conduct another site visit is an indication of the inadequacy of the 2015 site visit.

Usually, APHIS conducts one site visit as close to the implementation of a new systems approach as possible in order to aid in development of the operational workplan. It was therefore entirely in keeping with APHIS policy to conduct the September 2016 site visit prior to implementing this final rule, and is not indicative of flaws in the 2015 visit.

The 2015 site visit team included several APHIS risk managers who have extensive experience in evaluating foreign production systems to determine the ability of those systems to meet requisite mitigation measures.

Pest Risk Assessment

One commenter stated that updated information appears to have been incorporated into the PRA in a piecemeal fashion, without checking whether any conclusions or assumptions were affected.

APHIS notes that we have updated the PRA several times. Appendix 1 of the PRA summarizes updates to the draft PRA in response to public and peer review comments; Appendix 2 summarizes updates to the PRA made between 2008 and 2015 in response to new scientific information. Any time we incorporated new material into the PRA we reviewed the PRA to check the conclusions.

One commenter stated that information provided by SENASA is unreliable.

We disagree with the commenter. We have conducted two site visits during which we have verified the information provided by SENASA. They have also answered all the questions we have asked and provided all information we have requested.

Two commenters stated that stakeholder comments on the PRA appear to have been ignored.

APHIS posts PRAs and other documents for stakeholder review. As noted on the Web site on which the documents are posted, while stakeholder comments may result in changes to the PRA, as well as the RMD and the rule, it is not APHIS policy to compile or post responses to the comments received. This is because these documents are also made available for review and comment along with the rules and notices that propose to grant market access. Any comments that we receive on the documents during that comment period are addressed in a final regulatory action.

APHIS reviewed all of the comments that we received on the PRA and RMD. Certain comments, such as statements agreeing that *Brevipalpus chilensis* should be listed as a pest of lemons that is known to exist in Argentina, or that green lemons should not be required to be treated for Mediterranean fruit fly (Medfly), required no changes to the PRA or RMD because the commenters' requests were already reflected in the PRA or RMD. Other comments, such as a request to indicate whether the mites *B. californicus, B. obovatus,* and *B. phoenicis* (*Brevipalpus* spp.) were surface feeders, were incorporated into the PRA and RMD.

Other suggested revisions, such as revising the RMD to prohibit the importation of lemons with leaves attached, would have made the rule more stringent that our domestic requirements for the interstate movement of citrus fruit from areas quarantined for pests and diseases of citrus, and were not incorporated for that reason. Similarly, other revisions would have made the PRA or RMD inconsistent with how other APHIS documents discuss the same pest of concern or mitigation structure.

Finally, certain comments, such as that the NPPO of Argentina could not be trusted to abide by the systems approach, were reiterated during the comment period and dismissed for reasons discussed below under the heading ''Risk Management Document.''

One commenter stated that a footnote in the Executive Summary to the PRA seems to define the term ''commercially produced,'' but in fact only describes conditions of the fruit after harvest and processing. The commenter stated that the term ''commercially produced'' should be limited to conditions at places of production.

The term ''commercially produced'' is equivalent to ''commercial consignments.'' It includes all aspects of the production system: The manner in which the fruit was grown and harvested, the quality of the fruit, the manner in which it is packaged, the quantities packaged, and the requisite accompanying documentation.

One commenter stated that the PRA and proposed rule did not identify pests of concern for Argentine lemons.

The pest list in the PRA identifies pests of lemons that are known to exist in Argentina.

One commenter stated that four pathogens—*Elsinoë australis, Phyllosticta citricarpa, Xanthomonas citri* subsp. *citri* (Xcc), and citrus leprosis virus—can all infect fruit and stay viable while on the fruit, even though capacity for transmission from infected fruit may be low. The commenter stated that the answer to the question ''Can it follow the pathway?'' for all four pathogens should be changed to ''yes.''

APHIS notes that, while these could follow the pathway, the capacity for introduction or transmission of disease is so epidemiologically insignificant that further analysis was not warranted.

One commenter stated that citrus leprosis virus should have been selected for further analysis in the PRA as it is a quarantine pest likely to follow the pathway.

Citrus leprosis virus is not systemic and cannot be transmitted apart from viruliferous *Brevipalpus* spp. mites. It can follow the pathway only if it is vectored by the mites. For this reason we do not consider the virus to be a quarantine pest likely to follow the pathway.

One commenter stated that the citation in the PRA to the APHIS domestic fruit fly quarantine and regulations, which address Medfly was outdated and have been replaced with 7 CFR 301.32. The commenter noted that in the current regulations, only yellow lemons are regulated articles for Medfly.

The commenter is correct; the citations were outdated. However, this does not affect the conclusions of the PRA that green lemons are a poor host for Medfly.

Several commenters stated that the pest risk associated with importation of lemons is too high, and that the domestic citrus industry would suffer as a result of pest introductions.

If the mitigations in the rule are adhered to, this pest risk will be mitigated. Furthermore, some of these commenters appear to have overestimated the likelihood of introduction associated with certain of

the pests. For example, *Cryptoblabes gnidiella* and *Gymnandrosoma aurantianum* have never been intercepted in commercial shipments of citrus from South America. Both are associated with poorly managed or non-commercial citrus, like backyard fruit.

One commenter stated that *B. chilensis* should have been rated as high risk in the PRA.

APHIS notes that *B. chilensis* was in fact rated as high risk in the PRA.

One commenter stated that *Brevipalpus* spp. mites should all have been rated ''High Risk.'' The commenter cited a scientific article on *Brevipalpus* mites and the diseases they transmit [2] in support of this statement.

In that article, Childers and Rodrigues state that the only confirmed vector of citrus leprosis in the Western Hemisphere is *B. phoenicis.* The other mites are suspected to be vectors, but are not known vectors. Given that we consider *B. californicus, B. obovatus,* and *B. phoenicis* to be quarantine pests only insofar as they may vector citrus leprosis virus, and there is some uncertainty regarding the ability of *B. californicus* and *B. obovatus* to vector this disease, we consider a medium risk rating to be appropriate. It is also consistent with how we have rated these pests in other PRAs.

More importantly, a high risk rating would not have changed our mitigations for the pests. Under APHIS policy, both medium risk and high-risk pests are subject to pest-specific mitigations beyond port of entry inspection, and the mitigations we prescribed to address *Brevipalpus* spp. are based on the possibility that they may vector citrus leprosis virus, rather than the risk rating ascribed to the pests.

One commenter stated that the overall risk rating should have been higher.

As we explained above, a higher overall risk rating would not have changed the mitigation structure.

One commenter asked why, if ''not be detected at the port of entry'' did not impact risk ratings, port of entry inspection is a component of the systems approach.

''Not be detected at the port of entry'' was removed as a criterion in the PRA because APHIS does not have enough information about relative likelihood of detection at the port of entry to be able to weight this criterion relative to other elements. As a result, this criterion could not substantially impact the risk ratings.

This does not imply that port of entry inspections are an ineffective component of a systems approach. Port of entry inspections by U.S. Customs and Border Protection (CBP) are, in fact, capable of detecting quarantine pests and are a significant mitigation against pests entering the United States. For example, in December 2015, CBP detections of Medfly larvae on Spanish tomatoes and Moroccan citrus led us to suspend market access for those commodities, pending investigations.

One commenter asked why, if fruit is not an ''epidemiologically significant'' pathway for *E. australis, P. citricarpa,* and Xcc, the PRA says ''additional specified risk management options may be required.''

While we do not consider fruit to be an epidemiologically significant pathway for these pests, the pests are subject to domestic quarantines within the United States. For the sake of consistency with domestic regulations regarding the interstate movement of fruit from areas quarantined for CBS, sweet orange scab, and Xcc, we would require fruit to be washed, brushed, waxed, and surface disinfected. It is worth noting that such washing, brushing, waxing, and disinfecting are standard packinghouse procedures both domestically and internationally.

Likelihood and Consequences of Establishment

Several commenters stated that citrus-producing areas are particularly at risk for establishment of quarantine pests that could follow the pathway.

Incorporating information regarding likelihood of establishment would not have affected the pest risk ratings or the risk mitigation structure. As we explained above, both medium and high-risk pests are subject to pest-specific mitigations beyond standard port-of-entry inspection.

One commenter stated that the PRA does not acknowledge that backyard citrus in California is in proximity to ports of entry. Other commenters stated that the PRA does not recognize that most quarantine pest introductions first occur in urban areas, and are undetected. Three commenters stated that urban areas in Texas and California abut production areas and expressed concern that pests could become established in urban areas with backyard citrus and then spread into production areas.

As we noted above, incorporating this information into the PRA would not have affected either the pest risk ratings or the risk mitigation structure.

One commenter stated that Climate-Host interaction for *Brevipalpus* spp. should have been rated ''high.'' The commenter cited a 2012 reference in the Ninth Report of the International Committee of Taxonomy of Viruses [3] that said that citrus leprosis virus was transmitted to several other experimental hosts from other genera including *Phaseolus vulgaris* in support of this statement.

There is no mention in the report of whether the conditions under which transmission to *P. vulgaris* occurred could be reduplicated outside of laboratory conditions. The sentence the commenter is referring to is immediately preceded by a sentence referring to mechanically administering inoculum to induce symptoms in articles previously considered non-hosts. This, coupled with the use of ''experimental'' to describe inoculation of *P. vulgaris,* suggests the study was not intended to reduplicate actual ''field'' conditions.

In the PRA, we identified the dispersal potential of *B. chilensis* as ''medium'' and of *Brevipalpus* spp. as ''high.'' One commenter stated that the dispersal potential for both *B. chilensis* and *Brevipalpus* spp. should be high.

The commenter is correct that the dispersal potential for both *B. chilensis* and *Brevipalpus* spp. should be the same; however, we disagree that the rating for both should be high. Based on the work of Childers and Rodrigues, the dispersal potential for both should be medium. Both *B. chilensis* and *Brevipalpus* spp. are very unlikely to move from one orchard tree to another. They both tend to aggregate, they move downwind slowly, and they do not balloon—that is, they do not produce streamers of silk and travel with wind currents for longer distances.

One commenter stated that the environmental impact potential for *Brevipalpus* spp. is low, but the introduction of this pest infected with citrus leprosis virus would stimulate the use of chemical control. The commenter stated that the risk rating should therefore be changed to medium. The same commenter also stated that consequences of introduction for *Brevipalpus* spp. should have been considered high.

We consider the ratings given to *Brevipalpus* spp. to be accurate. Under standard commercial packinghouse procedures, the mites would be washed or brushed off, even in the absence of required mitigations. Furthermore, citrus leprosis virus is not a systemic

[2] Childers, C.C. and J.C.V. Rodrigues. 2011. An overview of *Brevipalpus* mites (Acari: Tenuipalpidae) and the plant viruses they transmit. *Zoosymposia* 6:180–192.

[3] ''Virus taxonomy: classification and nomenclature of viruses: Ninth Report of the International Committee on Taxonomy of Viruses.'' (2012) Ed: King, A.M.Q., Adams, M.J., Carstens, E.B. and Lefkowitz, E.J. San Diego: Elsevier Academic Press.

infection, and mites do not feed on harvested fruit unless doing so is absolutely necessary for survival.

Accordingly, for a non-viruliferous *Brevipalpus* mite in the United States to become a vector of citrus leprosis virus, the infected portions of the fruit would have to have abnormally high levels of inoculum, the mite would have to be on infested fruit, and the mite would have to specifically consume the infected portions of the fruit, climb up a tree, and infect the tree.

Since citrus leprosis virus inoculum is not shed to offspring, this would also have to occur during the infected mite's lifetime. We consider the probability of this occurring to be extremely remote.

One commenter stated that the likelihood of introduction for Medfly should have considered lemons a conditional host, rather than a conditional non-host.

The designation of lemons as a conditional non-host of Medfly was based on research published by ARS scientists [4] that examined the host status of immature lemons.

One commenter stated that the PRA did not consider introduction via smuggling or diversion. The commenter expressed concern that the fruit could be carried to a home while vectoring a pest or disease.

The PRA addressed the plant pest risk associated with the importation of commercially produced and commercially packed fresh lemon fruit from northwest Argentina into the United States. Fruit that is not commercially grown or packed are outside the scope of the risk assessment.

Risk Management Document

One commenter stated that the RMD requirements are inadequate to eliminate the risk of introduction of the quarantine pests identified in the PRA, but did not provide the basis for their concern.

Some commenters stated that the RMD and rule contain safeguards to address plant pest risk, and one commenter stated that similar systems approaches for citrus from other countries have proven effective. One commenter, however, stated that there are no similar systems approaches because no other growing area harbors this combination of pests and diseases of citrus, but is still asking to market fresh fruit.

APHIS notes that the PRA for citrus from Uruguay had a very similar quarantine pest list—they did not have *B. chilensis* or *Brevipalpus* spp., but had all other quarantine pests identified in the Argentine citrus PRA. Accordingly, many provisions of the Argentine lemons systems approach were modeled on the Uruguay citrus systems approach, which has been in place for 3½ years now without incident. Furthermore, the *Brevipalpus*-specific provisions are not new, and have been tested for several different commodities in other countries.

Five commenters expressed concern that Argentina cannot be trusted to abide by mitigations in the RMD and rule. Some of these commenters cited incidents that they believed showed Argentina handling sanitary or phytosanitary issues in deceptive ways. One commenter stated that, as a result of the history of SENASA, APHIS needs to exercise continual monitoring and oversight over the program.

Argentina is a World Trade Organization member country and signatory on the Agreement on the Application of Sanitary and Phytosanitary Measures (SPS agreement). As such, it has agreed to respect the phytosanitary measures the United States imposes on the importation of plants and plant products from Argentina when the United States demonstrates the need to impose these measures in order to protect plant health within the United States. The PRA that accompanied the proposed rule provided evidence of such a need. Argentina has demonstrated the ability to comply with U.S. regulations with respect to other export programs.

We disagree with several of the examples cited as recent prevarication by SENASA. APHIS became aware of the presence of *A. fraterculus* in blueberries in Argentina because of a scientific paper published by Argentina. The disagreement between APHIS and SENASA regarding the presence of *B. chilensis* in Argentina was based on differing opinions regarding whether the pest detected had been identified properly. As such, it indicated a difference of scientific opinion, rather than an act of deception.

That said, the 2015 site visit specifically evaluated SENASA's oversight of the Argentine production system for lemons to determine whether the provisions of the systems approach could be implemented and maintained.

Finally, as provided in paragraph (a) of the proposed rule, APHIS would be directly involved in monitoring and auditing implementation of the systems approach in Argentina. A determination that the systems approach had not been fully implemented or maintained would result in remedial actions, including possible suspension of the export program for Argentine lemons.

One commenter expressed concern that the United States Department of Agriculture (USDA) cannot be trusted to abide by mitigations in the RMD and rule. The commenter referred to a scandal at Hunts Point Terminal Produce Market in the Bronx, NY, as an example of USDA personnel accepting bribes and kickbacks. The commenter stated that even if such events are not commonplace, they still must be factored into the risk assessment.

The bribery and kickback scheme referenced by the commenter was revealed in 1999 after a 3-year investigation by the USDA Inspector General and involved Agriculture Marketing Service personnel, who have no role in the implementation of this rule.

One commenter asked why, if the mitigations in the RMD are effective, the PRA discusses likelihood and consequences of introduction.

The PRA follows our guidelines for PRAs. As such, it discusses the likelihood and consequences of quarantine pests that could follow the pathway on lemons from northwest Argentina to the United States, in the absence of any mitigations. This assessment is a necessary aspect of our evaluation of the risk rating for the pests.

The RMD lists the mitigations that will be applied to prevent pests from following the pathway and being introduced.

Three commenters stated that European Union (EU) detections of CBS on fruit from Argentina indicate the inability of Argentina to follow a systems approach.

We disagree with the EU regarding the transmissibility of CBS via commercially produced fruit. The point of these statements in the PRA and RMD was to point out that Argentina has been able to implement and abide by a systems approach for lemons that rests on SENASA having the wherewithal to meet phytosanitary requirements. We note that the RMD stated that Argentina proposed the EU systems approach to us in its entirety as a mitigation structure, and that we rejected adopting it outright. Furthermore, the systems approach for Argentine citrus to the EU is the same systems approach applicable to U.S. citrus to the EU, indicating they consider us equivalent in terms of ability to adhere to phytosanitary requirements.

[4] Spitler, G.H., J.W. Amstrong, and H.M. Couey. 1984. Mediterranean fruit fly (Diptera: Tephritidae) host status of commercial lemon. *Journal of Economic Entomology* 77(6):1441–1444.

It is also worth noting that the EU audit [5] attributed the detections to a lack of traceability of individual lots of fruit to the production units in places of production, to some packinghouses commingling lemons destined for export with other fruit, and to some producers not applying pest controls for CBS. These mitigations, which were added to the EU directive following the detections, are all aspects of our systems approach. Our systems approach is, in short, more stringent than the EU directive was prior to the CBS detections.

One commenter stated that there is no evidence the EU systems approach for lemons from Argentina is equivalent to the systems approach proposed by APHIS.

The two systems approaches are not equivalent, and we did not suggest they were. Rather, we made reference to the EU systems approach to illustrate that Argentina has the capacity to adhere to a stringent systems approach, so that it is plausible that they could adhere to our systems approach as well. We state in the RMD that Argentina proposed that we simply adopt the EU systems approach, and we rejected that proposal.

One commenter stated that, because of proximity of ports of entry to urban areas, and urban areas to citrus production in the United States, any lapses from systems approach will have dire consequences.

The commenter seems to be assuming that, if infested or infected fruit is shipped to the United States, it will not be detected at a port of entry inspection, and will necessarily result in the introduction of quarantine pests into the United States. This assumption is, in essence, that port of entry inspections are ineffective at detecting plant pests. We disagree with this assumption; port of entry inspections are an effective mitigation and have precluded two potential introductions of Medfly in the last year alone.

One commenter stated that there is no definition or list of criteria for pests of ''quarantine significance'' in either the PRA or RMD. The commenter asked what the criteria are for determining what pests are of quarantine significance.

The PRA, RMD, and rule use the terms ''quarantine significance'' and ''quarantine pest'' interchangeably. In § 319.56–2 of the regulations, we define a quarantine pest as ''[a] pest of potential economic significance to the area endangered by it and not yet present there, or present but not widely distributed there and being officially controlled.''

One commenter noted that the RMD says 9 pests of quarantine significance were identified, but the PRA lists 10. The commenter asked for an explanation of this apparent discrepancy.

The PRA acknowledges that CBS could follow the pathway, and is a quarantine pest, but then cites the 2010 PRA, which determined that, even in the absence of packinghouse procedures, fruit is an ''epidemiologically insignificant'' pathway for CBS, and the conditions that would allow for transmission from fruit are nearly impossible to occur, even in the absence of standard packinghouse procedures. The RMD looked at commercially produced fruit, that is, fruit subject to packinghouse procedures and standard industry practices. This led us to drop CBS from the list of quarantine pests.

One commenter noted that in section 1 of the RMD, guidelines for growers participating in the program are mentioned as needing to be followed. The commenter asked what these guidelines are.

In the RMD, we explain that these are pest control guidelines that a place of production may need to meet in order to qualify for registration with SENASA.

One commenter asked if the operational workplan will contain only SENASA's requirements.

Generally, the operational workplan pertains to APHIS, the NPPO of the exporting region, and growers, packinghouses, and persons commercially involved in chain of production. It contains details that are necessary for day-to-day operations needed to carry out provisions of the rule and RMD. This one will be no different.

One commenter asked what SENASA's requirements are under the operational workplan.

SENASA's requirements include everything specified within the RMD: Registration; regular inspections; pest control guidelines; and inspections to determine that treatment guidelines are being adhered to.

Additionally, Argentina has place of production requirements apart from APHIS' requirements that pertain to all citrus groves in the country. These include sanitary guidelines that are developed in consultation with Argentine subject matter experts and address regulated nonquarantine pest populations that could affect marketability of the citrus.

One commenter noted that the RMD specifies that SENASA must ensure that growers are following the ''export protocols.'' The commenter asked what those protocols are, and stated that they should be made available for public review and comment.

The protocols are conditions for export established by APHIS in the operational workplan. The RMD and the regulatory requirements derived from it include a general description of all the phytosanitary measures necessary to mitigate pest risk. The operational workplan specifies details that are necessary for day-to-day operations needed to carry out provisions of the rule and RMD. Operational workplans are available to the public upon request only after a rule has been finalized and the operational workplan has been signed by APHIS and the NPPO of the exporting country. With respect to consulting with stakeholders, APHIS typically conducts outreach and consultation during the risk assessment and management phases.

One commenter stated that section 16 of the RMD should specify that fruit fly detections must fall below a threshold before a registered place of production can resume shipping.

Immature lemons are a poor host of Medfly. Because of this, prevalence levels at a place of production are not germane to whether Medfly are more likely to follow the pathway on immature Argentine lemons, and it would be incommensurate with risk to cut off a place of production based on Medfly detections.

This policy is consistent with our existing importation requirements for lemons from other countries that have Medfly. We have no reason to believe these existing requirements have been ineffective.

One commenter stated that places of production should be suspended if *B. chilensis* is found on the lemons during NPPO inspections.

In the RMD, we said place of production ''may be suspended'' and are ''subject to suspension'' out of recognition that the investigation could determine that the fruit was clean when it left the orchard, and the pest was introduced later in the production chain.

Two commenters noted that the rule doesn't contain mitigations for CVC and its vectors. The commenters expressed concern that potential vectors could transmit CVC if they were allowed to hitchhike on exports.

Glassy-winged sharpshooters are the vector of concern for CVC. They are the subject of consistent surveys and are not in northwest Argentina. Were they to

[5] The audit is available online at *ec.europa.eu/food/audits-analysis/act_getPDF.cfm?PDF_ID=12522.*

spread into northwest Argentina, the sharpshooters would be removed by washing and brushing and standard packinghouse procedures. Additionally, as external feeders, they are easy to detect during phytosanitary inspections and/or port of entry inspections. Finally, CVC cannot follow the pathway of lemons in the absence of a vector.

One commenter noted that the RMD concludes that seeds are unable to transmit CVC directly. The commenter stated that this directly contradicts the regulations in 7 CFR 319.37–2, which consider CVC to be seed-transmitted.

A Federal Order published on May 19, 2016, relieved restrictions on citrus seed for CVC. The Federal Order is available on the APHIS Web site at *https://www.aphis.usda.gov/import_export/plants/plant_imports/federal_order/downloads/2016/2016-31.pdf.* A rule codifying this Federal Order is in development. The citrus seed pest list prepared in November 2015 is referenced in this Federal Order. The pest list contains our current thinking about the transmissibility of CVC and other citrus diseases via seed.

Four commenters expressed concern that the rule does not contain mitigations for HLB.

APHIS has examined whether fruit is a pathway for HLB, and determined that HLB is not transmitted via fruit. Therefore, mitigations for HLB are not necessary.

One commenter stated that APHIS should not trust SENASA on the scope of the HLB outbreak in Argentina.

Neither the severity of the HLB outbreak in Argentina, nor its distribution, affect whether HLB-specific mitigations need to be included in the rule. As we explained above, HLB is not transmitted via fruit.

The same commenter stated that APHIS should not trust SENASA on distribution of Asian citrus psyllid (ACP), a vector of HLB, in Argentina.

The distribution of ACP in Argentina is not necessary for us to evaluate the risk of it following the pathway via the importation of lemons. As documented in the PRA, standard packinghouse procedures will remove ACP from the fruit. Only commercially produced fruit, which is subject to such procedures and will therefore be free of ACP, can be exported to the United States.

One commenter stated that the PRA should include information about distribution of HLB in Argentina.

APHIS does not consider this information to be necessary, given that HLB is not transmitted via fruit.

One commenter expressed several concerns about CBS. The commenter stated that CBS is impossible to eradicate once introduced, that it can have a lengthy latency period, and that trees infected with CBS are unmarketable.

APHIS notes that we never questioned the quarantine significance of CBS, just its ability to become established via fruit.

One commenter stated that justifications in the PRA for why CBS will not follow the pathway are not accurate. The commenter stated that the PRA assumes farmers in Argentina all farm in the same intensive manner.

The commenter is mistaken. In the systems approach for Argentina lemons, we have incorporated the same mitigations for CBS for that we are using for Florida citrus. These mitigations are based on a separate scientific review, which can be viewed on the APHIS Web site at *https://www.aphis.usda.gov/plant_health/plant_pest_info/citrus/downloads/black_spot/cbs-risk-assessment.pdf.*

Several commenters stated that APHIS erred in determining that CBS cannot follow the pathway on fruit. Another commenter expressed concern that CBS could become established in Southern California if infected fruit arrived at and were distributed through the Port of Long Beach.

Both Paul et al.[6] and Magarey and Holtz [7] ran infection models which found California's climate, including that of Southern California, unsuitable for establishment of CBS. While isolated microclimates in Southern California could result in small pockets of CBS infection, the overall climatic conditions are unsuitable to establishment and spread.

One commenter stated that APHIS did not take into account either the reality of the residential yards in Southern California, or the numerous interceptions of Argentine citrus for CBS symptoms in shipments to the EU in the years since 2010.

These two facts do not affect the conclusion on the 2010 PRA that the establishment of the disease via the movement of fruit requires a combination of biological and climatic conditions that are unlikely to occur.

One commenter stated that the spread of CBS in Florida could be indicative of errors in the 2010 PRA.

The PRA found Florida's environment to be conducive to the spread of CBS, and examined only transmission via fruit. The spread of CBS within Florida could have occurred through a pathway other than fruit, and is not in itself indicative of errors in the 2010 PRA.

One commenter stated that the EU Food Safety Commission in 2014 issued a scientific opinion which deemed the risk of entry of the causal agent of CBS as moderately likely for citrus fruit without leaves.

APHIS notes that the proposed conditions for importation of lemons from northwest Argentina are the same as the conditions we apply to export citrus from the United States. We also note that the causal organism of CBS has two life cycle stages: A sexual stage represented by the ascospores of *Guignardia citricarpa* Kiely and an asexual stage represented by the pycnidiospores of *P. citricarpa* (McAlpine). These two stages are produced at different times, under different environmental conditions, at different locations on the plant and result in different epidemiological dynamics. The sexual stage of the disease may be found in plants and leaves; the asexual stage of the disease is found on fruit. The correlation between ascospore discharge and infection onset showed that pycnidiospores, the asexual stage, do not play a significant role in the disease cycle. For this reason fruit is not considered to be a pathway for CBS.

Several commenters asked how, if we do not know how CBS got into Florida, we know it cannot follow the pathway on fruit.

The PRA examined the biological and climatic conditions necessary for establishment of CBS through infected fruit, and determined that ''the establishment of the disease via this pathway [the movement of fruit] requires a combination of biological and climatic conditions that are unlikely to occur.'' It is important to acknowledge, as the EU scientific opinion did, that there are many possible pathways for the introduction of CBS, with some (such as smuggling of nursery stock) significantly more likely to result in establishment.

One commenter asked what circumstances would compel APHIS to require further mitigations for CBS in Argentina's packinghouses, and what mitigation steps it would be willing to institute in those circumstances.

We have considered the risk of CBS and how to mitigate it. Standard packinghouse procedures, including washing, brushing, disinfecting, treating, and waxing, address that risk

[6] Paul, I., van Jaarsveld, A.S., Korsten, L., & Hattingh, V. (2005). The potential global geographical distribution of citrus black spot caused by *Guignardia citricarpa* Kiely: likelihood of disease establishment in the European Union. *Crop Protection,* 24, 297–308.

[7] Magarey, R., Chanelli, S., & Holtz T. (2011). *Validation study and risk assessment: Guignardia citricarpa, (citrus black spot).* USDA–APHIS–PPQ–CPHST–PERAL/NCSU.

effectively. Under the circumstances, we do not believe further mitigations are needed.

One commenter stated that the rule should restrict exports to areas of northwest Argentina that are free of CBS.

For the reasons discussed above, we do not consider this necessary.

Comments on Specific Provisions of the Proposed Rule

One commenter asked why the Provinces of Catamarca and Jujuy were included in the rule when they are not major lemon-producing regions.

As we explained in the proposed rule, SENASA asked for market access for these provinces. We therefore included them in the PRA and found that lemons could be safely exported from these provinces subject to the conditions described in the proposed rule.

One commenter stated that *Brevipalpus* spp. should not be listed as quarantine pests, but that citrus leprosis virus should be listed as a quarantine pest.

Citrus leprosis virus is not systemic. It could not be introduced into the United States, unless vectored by *Brevipalpus* spp. mites. For this reason we consider the mites to be quarantine pests.

One commenter stated that the details of the operational workplan need to be included in the regulations or otherwise made publicly available.

As we explained above, the mitigations in the operational workplan are the same as in the RMD and the rule. The operational workplan specifies details for day-to-day operations that are needed to carry out provisions of the rule and the RMD. As a result, operational workplans are living documents that change periodically to reflect new technologies and operational realities in the field.

One commenter asked what constitutes ''direct involvement'' in implementation and monitoring of the operational workplan.

The operational workplan provides APHIS with the standard operating procedures that the NPPO, places of production, packinghouses, and others involved in the production of the fruit will follow as part of the export program. Our oversight will include routine reviews and inspections of the program, but not continual oversight. That would be tantamount to mandatory preclearance program, which we do not consider necessary. The frequency with which we conduct site visits and review export program records will increase if any pest concerns are identified.

One commenter stated that a trust fund agreement to pay for APHIS personnel may be necessary.

A trust fund agreement is associated with preclearance programs in which there is continual APHIS oversight, which we do not consider warranted here.

One commenter stated that registration requirements should extend to contiguous orchards to mitigate the chance of contamination of the place of production during harvest after the initial freedom certification.

APHIS does not consider this to be necessary. As discussed above, the *Brevipalpus* spp. mites that exist in Argentina do not balloon—that is they do not produce streamers of silk and travel with wind currents for longer distances—and have limited mobility. It is unlikely that they could infest contiguous orchards after the initial freedom certification.

One commenter stated that registering small places of production may increase pest risk.

We disagree that small places of production may represent a higher pest risk than large ones. In order to be registered with the NPPO and participate in the export program, the NPPO (and, as warranted, APHIS) must determine that the place of production or packinghouse is able to adhere to the systems approach. This is true regardless of the size of the place of production or packinghouse. Routine inspections by the NPPO, and the possibility of monitoring by APHIS, will corroborate ongoing maintenance of systems approach provisions at registered places of production and packinghouses.

We proposed to require lemons from Argentina to be harvested green and within the time period of April 1 and August 31. If the lemons are harvested yellow or harvested outside of that time period, they would have to be treated for Medfly in accordance with 7 CFR part 305 and the operational workplan. Two commenters asked how we would determine whether a lemon was green or not.

In the ARS study that determined that lemons are a conditional non-host of Medfly, the term ''yellow'' was used interchangeably with ''mature.'' Immature lemons were considered to be a poor host. For purposes of the systems approach, we consider any lemon that is not green as ripe enough to require cold treatment. We are using additional ARS research [8] and a market standard on lemon color to determine if lemons are green.

Two commenters asked who will determine whether a lemon is green or yellow. One commenter asked where this determination will be made. That commenter also stated that APHIS employees should make the determination.

In Argentina, lemons are evaluated for color and graded as part of packinghouse procedures. The determination for color and grade is made by graders employed by SENASA.

One commenter stated that the finding that green fruit is harvested from March to May in Argentina appears to be based on 2007 information, which is outdated.

When green fruit is harvested in Argentina is irrelevant to the conclusions of the PRA. As we explained in the proposed rule, lemons that are harvested yellow would have to be treated for Medfly, regardless of the time of year in which they are harvested.

One commenter stated that the RMD and rule should be consistent with regard to when lemons do not need treatment.

The commenter seems to believe that there is a discrepancy between the RMD and the proposed rule because the requirement is phrased slightly differently, but this is not the case. Both the proposed rule and the RMD specify that a lemon must be green and shipped within the April-August window in order to avoid treatment.

One commenter expressed concern that the use of the term ''safeguarded'' in § 319.56–76(a)(8) is too vague. The commenter stated that the words ''and protected from fruit fly infestation'' should be inserted after the word ''safeguarded'' in that paragraph.

APHIS disagrees that this addition is necessary. We use the term ''safeguarded'' throughout the regulations to mean that fruit must be protected from infestation, or, in the case of treated fruit, reinfestation, by quarantine pests.

One commenter asked whether trucks and workers would be sanitized in between uses for U.S. exports and other uses, and if not, why not.

Packinghouse workers are required to wash their hands and wear clean protective clothing every time they enter the packinghouse. The fruit never touches the trucks; it is harvested and brought to the packinghouse in bins that are disinfected after each use. Fruit for

[8] Jang, E.B., R.L. Mangan, D.M. Obenland, M.L. Arpaia, and R. Rice. (undated). Defining Host Status of California Grown Lemons to Fruit Fly Infestation (PowerPoint Presentation). USDA-Agricultural Research Service and University of California. 8 pp.

export is shipped in clean new boxes. Old shipping boxes are never reused.

Several commenters asked how APHIS will determine pest-free places of production for *B. chilensis,* given that Argentine production for fresh consumption and processing is intermixed.

While *B. chilensis* exists in Argentina, there is no evidence that it exists in northwest Argentina. This is based on extensive and ongoing documentation SENASA has provided to APHIS. Due to the absence of *B. chilensis* in northwest Argentina, the intermixing of fresh and processed production sites in that area does not have a bearing on whether a site is pest-free for *B. chilensis.*

It is worth noting that we have no evidence that Argentine producers designate specific sites for fresh or processed production and use different production practices based on the intended use of the lemons. Rather, as a result of grading during packinghouse inspections, highly graded lots are designated for the fresh market, while the rest of the fruit goes to processing and other uses.

That being said, the rule specifies that APHIS will monitor implementation of the systems approach. This includes monitoring the distribution of *B. chilensis* in Argentina. If the distribution changes, we note that there are still several safeguards that would address the commenter's concern. First, the place of production must be inspected regularly by the NPPO of Argentina; these inspections would include inspections for *B. chilensis.* Second, the place of production must adhere to any pest control or management practices specified by APHIS and/or SENASA. An orchard that was in an area in which *B. chilensis* is known to occur, and in proximity to an orchard not participating in the export program, would be subject to management practices to address this risk. Finally, registration of places of production allows for traceback and quick remediation if infested fruit is discovered later in the production chain.

One commenter stated that APHIS should ask SENASA to prepare a grid-type schematic that shows the location of processed orchards as compared with orchards where fruit is grown for the fresh export market. The commenter stated that this analysis is essential, and that if SENASA will not prepare it, then APHIS should prepare it.

The grid suggested by the commenter is not possible. Orchards in Argentina are not designated for a particular type of production. Rather, as we explained above, lots are designated based on grading conducted in packinghouses.

Two commenters stated that the biometric sampling protocol for *B. chilensis* is insufficient.

APHIS disagrees. Mites have limited mobility. The commenters are referring to the fact that some species of mites are known to travel longer distances by ballooning, where the mites produce streamers of silk and travel with wind currents for longer distances. According to Childers and Rodrigues (2011), *Brevipalpus* mites do not produce silk and therefore are not capable of ballooning. Childers and Rodrigues indicate there is some evidence that these mites can blow from heavily infested plants downwind to nearby plants. They do not present evidence of long distance movement of *Brevipalpus* mites by the wind.

B. chilensis mites in Argentina are associated with the wine grape industry in the state of Mendoza (approximately 1,000 miles south of the region where lemons are produced). They are not present in Tucumán where most of the export lemons in Argentina are grown, nor, again, is there any evidence of their presence in the whole northwestern region.

The systems approach for *B. chilensis* is based on the pest's limited mobility. This systems approach has similarly been used in Chile for citrus for many years without interceptions of this mite in commercial shipments. In addition to the place of production inspection, every shipment of lemons to be exported will also be inspected for mites with the same wash technique. If mites are found on any shipment, that place of production will be removed for the rest of the export season.

One commenter stated that APHIS only described the *B. chilensis* protocol, without providing evidence of its adequacy. The commenter further stated that the lack of interceptions of the mite on fruit that has entered the United States from Chile is not sufficient evidence for the effectiveness of the protocol. Another commenter stated that there is no literature of evidence that suggests the protocol is effective.

APHIS disagrees. Mites and other small organisms have been studied by collecting them from their habitat through sieves that concentrate them. Southwood and Henderson in their classic textbook *Ecological Methods* [9] devote chapters to this method of sampling.

This method of sampling has been used since the 18th century; use of Berlese funnels and sieves is ubiquitous in sampling mites and other small organisms in various habitats. The agricultural quarantine and inspection data that APHIS collects routinely suggests that this method, which has been used for almost 20 years by APHIS as a mitigation measure, has been very effective in detecting *B. chilensis* mites on fruit from Chile.

One commenter stated that it is impossible to know whether 100 samples is sufficient without knowing the size of places of production.

Regardless of the size of the orchard, 100 samples provides 95 percent confidence of a 3 percent infestation rate. This confidence level is sufficient given that *B. chilensis* is not known to exist within 1,000 miles of northwest Argentina and, biologically, tends to aggregate once established. APHIS believes that the overlapping protections of routine visual inspections, NPPO surveying for *B. chilensis* spread, and the biometric protocol provide a sufficient degree of phytosanitary protection.

One commenter stated that the *B. chilensis* biometric sampling protocol is not based on the biology of *B. chilensis.* The commenter stated that other species of *Brevipalpus* are known to have particular habitat preferences within a tree, such as the most shaded, humid areas (Childers & Rodrigues 2011). The commenter stated that if something like this is the case for *B. chilensis,* then a targeted survey, rather than biometric survey of the place of production, is needed to determine prevalence.

APHIS disagrees. Mites, including *B. chilensis,* reproduce and build up populations in a small area because of their limited dispersal capability. The sampling distribution is based on the premise that if one mite is found, there is a high probability that another mite is nearby. This is called an aggregated distribution. This probability distribution (or variation), is called hypergeometric, or negative binomial, and can be used to model the distribution of most insects and mites.

Very few insects and mites do not have aggregated distributions, and there is no evidence that *B. chilensis* does not have aggregated distributions. The production site survey is a targeted survey; the samples are taken from the leaves which is where the mite populations are highest. We note, moreover, that this survey is presently strictly precautionary. There is no evidence of *B. chilensis* in northwest Argentina.

Two commenters stated that biometric sampling may miss immature *B. chilensis* mites.

[9] Southwood, T.R.E., & Henderson, P.A. (2009). *Ecological Methods.* John Wiley & Sons.

The mite exists in populations that contain eggs, immature stages, and adults. Only the adults can be identified reliably through microscopic examination of the filtrate from the sieve. The sieve will collect adult mites. The likelihood of only eggs or nymphs being present is very low, so APHIS can use the sieve sampling method to reliably detect populations of mites at production sites. APHIS will be requiring a number of samples and the probability that only eggs and larvae of the target mite would be present in all of the samples is very low. Moreover, if one sample detects adult *B. chilensis* mites, the production site will not be certified *B. chilensis* free.

One commenter asked how APHIS determined the efficacy of Chilean citrus protocol.

As we state in the RMD, our determination was based on the absence of detections of infested fruit in the export pathway over almost 20 years.

One commenter questioned whether it is appropriate to compare the citrus-growing area that exists in Chile to the growing areas in Northwest Argentina for purposes of dealing with *Brevipalpus* spp. mites. The commenter noted that the growing area in Argentina is much larger than the growing area in Chile, and stated that the growing area in Argentina has high rainfall and high humidity, while the growing area in Chile typically has low rainfall and low humidity. The commenter stated that the difference in climate makes the growing area in Argentina hospitable to certain pathogens, but did not specify which ones.

The commenter is mistaken about the climate in northwest Argentina. The scientists at the Obispo Columbres Agroindustrial Station, SENASA, and the lemon growers in Tucumán told us that northwest Argentina does not have high rainfall. On the contrary, rainfall is low and the lemon groves are often irrigated. Therefore, the mite populations should face similar climates in the citrus growing portions of Chile and the lemon growing parts of northwest Argentina. During the September 2016 site visit, we asked the scientists at the Obispo Columbres Agroindustrial station about the mites. They said that they had found two of the three *Brevipalpus* mite species (not *B. chilensis*) in the lemon production areas in northwest Argentina, but that they were not common. Further, the hot dry conditions favor mites more than rainy humid conditions. The mitigations for *Brevipalpus* mites should not be affected by any climate differences, which appear to be minimal.

One commenter stated that the protocol for citrus from Chile includes species of citrus that may be less hospitable to *B. chilensis.*

APHIS notes that the protocol for mites from Chile also includes fruit that are better hosts than lemons. The sampling method for determining low prevalence works regardless of mite populations on the host fruit.

Two commenters stated that surveying for *B. chilensis* around production sites is necessary because if there are high populations in the vicinity, or if wind is a strong factor in dispersal, mites are likely to be constantly moving into the orchard.

As noted above, *B. chilensis* are a generalist pest, and tend to aggregate. The likelihood of *B. chilensis* in a neighboring orchard, without spillover into the registered production site, is low. Accordingly, if mites are in the vicinity, they should be detected through routine place of production inspections and the biometric sampling protocol.

One commenter stated that the *B. chilensis*-specific protocol should be extended to all *Brevipalpus* spp. mites.

Currently Argentina is sampling for *B. chilensis* and the three *Brevipalpus* spp. mites that are potential vectors for citrus leprosis virus. We are only requiring pest free place of production for *B. chilensis,* because *B. chilensis* is itself a quarantine pest. We are requiring consignment freedom (by inspection of harvested fruit) for all of the mites. *Brevipalpus* species other than *B. chilensis* are only considered quarantine pests if they are carrying the citrus leprosis virus. The probability of movement of the citrus leprosis pathogen from an infected tree in Argentina to a suitable host in the United States via a *Brevipalpus* mite traveling on a lemon fruit is extremely low, and require several additional steps to acquire and spread the pathogen so we are not requiring production site freedom.

One commenter stated that the *B. chilensis* protocol should be extended to surrounding areas of production.

As we explained above, *B. chilensis* is not found within 1,000 miles of northwest Argentina, has low powers of mobility, and tends to aggregate. If it is not found in a registered place of production during routine surveys conducted by the NPPO to evaluate pest spread, as well as routine harvest inspections and two separate biometric samples associated with the systems approach, we are confident that it will not be on fruit for export.

One commenter stated that production sites should be inspected for *B. chilensis* throughout the harvest season.

If mites were found in a consignment at a packinghouse, the originating production site would lose its free status. For this reason it is not necessary to inspect production sites throughout the harvest season.

One commenter stated that the *B. chilensis* protocol should include surveying for citrus leprosis virus.

Symptoms of citrus leprosis virus are easy to detect, and fruit with such symptoms will be detected during standard packinghouse culling and phytosanitary inspections.

One commenter stated that fallen fruit should be cut and inspected for Medfly.

This effectively calls for place of production freedom for Medfly. APHIS notes that in the RMD, fallen fruit are specifically forbidden from being included in harvested fruit going to the packinghouse for fresh market. For this reason, we do not consider it necessary to sample fallen fruit for fruit flies or any other pest.

One commenter stated that trapping requirements for Medfly need to be delineated in the rule itself.

Historically, we have put trapping requirements in operational workplans, rather than rules, to allow flexibility in trapping protocols in order to respond to variations in population densities from season to season, as well as the development of new lure and bait technologies.

One commenter stated that trapping should be at least 50 percent with trimedlure and the other 50 percent should be baited with either 3-component or protein bait.

APHIS notes that both the 3-component bait and the protein bait are far less powerful lures for fruit flies than trimedlure, a pheromone. The trimedlure will draw flies in from farther away and is a more sensitive detection system. Trimedlure will also attract males and unmated females, which will make up a significant portion of any fruit fly population. The only thing that the protein or 3-component baits will attract is mated females, and if they are present then males and unmated females should also be present and will have already been detected by the more powerful trimedlure.

One commenter asked for greater detail about the requirements for packinghouses. The commenter specifically asked whether an entire facility would be included as a packinghouse, how many facilities would pack lemons for the U.S. market and what volume could a dedicated packinghouse expect to process.

A packinghouse has to be an entire facility. APHIS is aware of a few packinghouses that would serve as primary packinghouses; however, all packinghouses would be registered with the NPPO. Both the NPPO and APHIS will monitor packinghouses during routine inspections.

One commenter asked how large a consignment of lemons could be, and if there will be a limit on the size of consignments.

Consignments can vary in size. However, regardless of the size of the consignment, the sampling protocol is aimed at detecting a 3 percent infestation rate with at least 95 percent confidence.

One commenter asked how a biometric sample was defined.

The term 'biometric sampling' simply means that the sample size that is smaller than a straight 2 percent sample can be used to detect pests on large consignments of the commodity. Taking a biometric sample is more efficient than taking a straight percentage sample.

One commenter stated that the number of samples inspected should be 600. The commenter stated that this is consistent with what other countries require from U.S. growers.

APHIS disagrees that the number of samples inspected should be 600. One hundred samples is consistent with the Chilean protocol, which has been effective at precluding infested fruit from being shipped. Inspecting an additional 500 fruit per sample does not substantially impact the probability of finding an infestation, and would be significantly more resource-intensive.

One commenter asked if the same method will be used to inspect for *B. chilensis* as is used for the production site protocol.

Yes, the same method will be used for both production sites and packinghouses.

One commenter asked about the efficacy data for post-harvest inspections.

Post-harvest inspections by the NPPO of an exporting country are a long-standing phytosanitary measure that APHIS employs as part of market access requirements. The safe importation of thousands of foreign commodities into the United States over a prolonged period of time is an indication of its efficacy as a phytosanitary measure.

One commenter stated that fruit that is infested with Medfly larvae should be prohibited from being shipped.

APHIS disagrees. In the event that a single immature Medfly is found in or with the lemons, then the lemons must be treated in accordance with part 305 of the regulations and the operational workplan using a cold treatment. This cold treatment has been shown to be effective at mitigating the risk of Medfly in lemons. Additionally, the registered place of production that produced the lemons in the consignment may be suspended from the export program, pending an investigation.

One commenter stated that remedial actions should be identical, regardless of quarantine pest detected.

The remedial action when quarantine pests are detected is that the fruit cannot be exported. Some findings of quarantine pests also disqualify production sites because the mitigation requires the production site to be a pest-free place of production.

One commenter noted that the rule referred to CBP inspectors, but the supporting documents refer to APHIS inspectors. The commenter asked for clarification as to who will conduct port of entry inspections.

CBP conducts inspections at ports of entries pursuant to authority delegated to APHIS. The use of CBP employees to carry out functions specifically delegated to APHIS is authorized by the Homeland Security Act of 2002. Because CBP is effectively acting as agents of APHIS for the purposes of these inspections, we use the term ''APHIS.'' These inspections sample imported commodities for evidence of pests. If pests are detected, APHIS identifiers will be used to positively identify the pests.

One commenter asked whether port of entry inspections would include biometric sampling for *Brevipalpus* mites. The commenter also asked how CBP would be able to detect the mites.

The *B. chilensis* protocol is used to establish place of production freedom, and is also used as part of the phytosanitary inspection by the NPPO. Port of entry inspection for *B. chilensis* and other *Brevipalpus* mites will look for the pests, as well as signs and symptoms of infestation, such as bronzing.

One commenter asked why, if information from port of entry inspections is ''unreliable,'' they can be stated to be effective.

''Not be detected at the port of entry'' was removed as a criterion in the PRA because we do not have enough information about relative likelihood of detection at the port of entry to be able to weight this criterion relative to other elements. As a result, this criterion could not substantially impact the risk ratings. This does not imply that port of entry inspections are an ineffective component of a systems approach.

One commenter stated that the rule should specify how APHIS will monitor and enforce the systems approach. The commenter expressed concern that APHIS would have to commit substantial resources to ensure compliance with the operational workplan.

This request is predicated on the stated assumptions that SENASA lacks the ability and intent to abide by systems approach requirements. For reasons discussed above, we disagree with those assumptions.

One commenter stated that APHIS should require cold treatment of lemons from northwest Argentina.

This approach would not impose the least restrictive science-based actions needed to address plant pest risk, and thus would be inconsistent with our obligations under the SPS agreement.

One commenter stated that the rule should prohibit the importation of lemons from northwest Argentina into Florida. The commenter also stated that the rule should limit importation of lemons to areas north of the 38th parallel.

We have determined, for the reasons described in the RMD that accompanied the proposed rule, that the measures specified in the RMD will effectively mitigate the risk associated with the importation of lemons from northwest Argentina. The commenter did not provide any evidence suggesting that the mitigations are not effective. Therefore, we are not taking the action requested by the commenter.

Two commenters expressed concern that Argentine producers may use pesticides or practices that are not authorized in the United States.

We note that the Food and Drug Administration (FDA) of the Department of Health and Human Services regulates the pesticide, herbicide, and fertilizer residues that may be present on imported fruits and vegetables intended for human consumption. If illegal pesticides are detected, FDA will take action to remove them from the marketplace. Additionally, we note that the packinghouse disinfectants and treatments for pathogens that we are proposing for Argentina are the same used domestically.

One commenter stated that importing lemons from Argentina will involve carbon dioxide emissions that should be available to the consumer as they purchase the lemons. The commenter stated that the lemons should be labeled with the pounds of carbon dioxide emitted per pound of lemons.

This request is outside the scope of APHIS' statutory authority.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with minor editorial changes.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with 5 U.S.C. 604, we have performed a final regulatory flexibility analysis, which is summarized below, regarding the economic effects of this rule on small entities. Copies of the full analysis are available on the *Regulations.gov* Web site (see footnote 1 in this document for a link to *Regulations.gov*) or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

This analysis examines potential economic impacts of a rule that will allow the importation of fresh lemons from a region in Northwest Argentina into the continental United States. A systems approach to pest risk mitigation will provide phytosanitary protection against pests of quarantine concern. Both U.S. producers and consumers will be affected by the rule. While producers' welfare will be negatively affected, welfare gains for consumers will outweigh producer losses, resulting in a net benefit to the U.S. economy.

Commercial lemon production takes place in California and Arizona. For the 2014/15 season, lemon-bearing acres totaled 55,300 (California 47,000, Arizona 8,300). In the same season, the value of U.S. production of lemons was $694 million. Over the production seasons 2008/09 to 2014/15, U.S. fresh lemon production averaged 535,244 metric tons (MT) per year. Over the same period, annual imports averaged 49,995 MT and exports averaged 101,849 MT. Because lemons imported from Argentina that are harvested green between April 1 and August 31 will not require treatment for Medfly, we expect that most will be imported during this period, which coincides roughly with the months in which U.S. lemon exports are declining and imports are increasing.

Effects of the rule are estimated using a partial equilibrium model of the U.S. lemon sector. Annual imports of fresh lemon from Argentina are expected to range between 15,000 and 20,000 MT, with volumes averaging 18,000 MT. Quantity, price and welfare changes are estimated for these three import scenarios.

If the United States imports 18,000 MT of fresh lemon from Argentina and there is no displacement of lemon imports from other countries, we estimate that the price (custom import value) of fresh lemon will decrease by about 4 percent. Consumer welfare gains of $22.4 million will outweigh producer welfare losses of $19.9 million, resulting in a net welfare gain of $2.5 million. The 15,000 MT and 20,000 MT scenarios show similar effects.

More reasonably, partial import displacement will occur, and price and welfare effects will be proportional to the net increase in U.S. lemon imports. Assuming as an upper-bound that one-half of the quantity of fresh lemons imported from Argentina displaces U.S. fresh lemon imports from elsewhere, we estimate for the 18,000 MT scenario that the price decline will be about 2 percent; consumer welfare gains and producer welfare losses will be $11.1 million and $10.0 million, respectively, yielding a net welfare benefit of $1.1 million.

The majority of businesses that may be affected by the final rule are small entities, including lemon producers, packers, wholesalers, and related establishments.

Executive Order 12988

This final rule allows lemons to be imported into the continental United States from Argentina. State and local laws and regulations regarding lemons imported under this rule will be preempted while the fruit is in foreign commerce. Fresh lemons are generally imported for immediate distribution and sale to the consuming public, and remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. No retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this final rule, which were filed under 0579–0448, have been submitted for approval to the Office of Management and Budget (OMB). When OMB notifies us of its decision, if approval is denied, we will publish a document in the **Federal Register** providing notice of what action we plan to take.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

List of Subjects for 7 CFR Part 319

Coffee, Cotton, Fruits, Imports, Logs, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, we are amending 7 CFR part 319 as follows:

PART 319—FOREIGN QUARANTINE NOTICES

■ 1. The authority citation for part 319 continues to read as follows:

Authority: 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

■ 2. Section 319.28 is amended as follows:

■ a. In paragraph (a)(1), by removing the words ''(except for the States of Catamarca, Jujuy, Salta, and Tucuman, which are considered free of citrus canker)''.

■ b. In paragraph (a)(2), by removing the word ''Argentina,''.

■ c. By redesignating paragraphs (e) through (i) as paragraphs (f) through (j), respectively, and adding a new paragraph (e).

■ d. In newly redesignated paragraph (h), the words ''paragraphs (b) through (e)'' are removed and the words ''paragraphs (b) through (f)'' are added in their place.

The addition reads as follows:

§ 319.28 Notice of quarantine.

* * * * *

(e) The prohibition does not apply to lemons (*Citrus limon* (L.) Burm. f.) from northwest Argentina that meet the requirements of § 319.56–76.

* * * * *

■ 3. Section 319.56–76 is added to read as follows:

§ 319.56–76 Lemons from northwest Argentina.

Fresh lemons (*Citrus limon* (L.) Burm. f.) may be imported into the continental United States from northwest Argentina (the Provinces of Catamarca, Jujuy, Salta, and Tucumán) only under the conditions described in this section. These conditions are designed to prevent the introduction of the

following quarantine pests: *Brevipalpus chilensis,* the Chilean false red mite; *B. californicus,* the citrus flat mite, *B. obovatus,* the scarlet tea mite, and *B. phoenicis,* the false spider mite (referred to in this section as ''*Brevipalpus* spp. mites''); *Ceratitis capitata,* the Mediterranean fruit fly; *Cryptoblabes gnidiella,* the honeydew moth; *Elsinoë australis,* the causal agent of sweet orange scab disease; *Gymnandrosoma aurantianum* (Lima), the citrus borer; and *Xanthomonas citri* subsp. *citri* (ex Hasse) Gabriel et al., the causal agent of citrus canker disease.

(a) *General requirements*—(1) *Operational workplan.* The national plant protection organization (NPPO) of Argentina must provide an operational workplan to APHIS that details the activities that the NPPO of Argentina and places of production and packinghouses registered with the NPPO of Argentina will, subject to APHIS' approval of the workplan, carry out to meet the requirements of this section. The operational workplan must include and describe the specific requirements as set forth in this section. APHIS will be directly involved with the NPPO of Argentina in monitoring and auditing implementation of the systems approach.

(2) *Registered places of production.* The fresh lemons considered for export to the continental United States must be grown by places of production that are registered with the NPPO of Argentina and that have been determined to be free from *B. chilensis* in accordance with this section.

(3) *Registered packinghouses.* The lemons must be packed for export to the continental United States in pest-exclusionary packinghouses that are registered with the NPPO of Argentina.

(4) *Recordkeeping.* The NPPO of Argentina must maintain all forms and documents pertaining to registered places of production and packinghouses for at least 1 year and, as requested, provide them to APHIS for review. Based on APHIS' review of records, APHIS may monitor places of production and packinghouses, as APHIS deems warranted.

(5) *Commercial consignments.* Lemons from Argentina can be imported to the continental United States in commercial consignments only. For purposes of this section, fruit in a commercial consignment must be practically free of leaves, twigs, and other plant parts, except for stems less than 1 inch long and attached to the fruit.

(6) *Identification.* The identity of the each lot of lemons from Argentina must be maintained throughout the export process, from the place of production to the arrival of the lemons at the port of entry into the continental United States. The means of identification that allows the lot to be traced back to its place of production must be authorized by the operational workplan.

(7) *Harvesting restrictions or treatment for fruit flies.* Lemons from Argentina must be harvested green and within the time period of April 1 and August 31. If they are harvested yellow or harvested outside of this time period, they must be treated for *C. capitata* in accordance with part 305 of this chapter and the operational workplan.

(8) *Safeguarding.* Lots of lemons destined for export to the continental United States must be safeguarded during movement from registered places of production to registered packinghouses as specified by the operational workplan.

(9) *Phytosanitary certificate.* Each consignment of lemons imported from Argentina into the continental United States must be accompanied by a phytosanitary certificate issued by the NPPO of Argentina with an additional declaration stating that the requirements of this section have been met and that the consignments have been inspected and found free of *Brevipalpus* spp. mites, *B. chilensis, C. capitata, C. gnidiella,* and *G. aurantianum.*

(b) *Place of production requirements.* (1) Prior to each harvest season, registered places of production of lemons destined for export to the continental United States must be determined by APHIS and the NPPO of Argentina to be free from *B. chilensis* based on biometric sampling conducted in accordance with the operational workplan. If a single live *B. chilensis* mite is discovered as a result of such sampling, the place of production will not be considered free from *B. chilensis* and will not be able to export lemons to the United States. Each place of production will have only one opportunity per harvest season to be considered free of *B. chilensis,* and certification of *B. chilensis* freedom will only last one harvest season.

(2) Places of production must remove plant litter and fallen debris from groves in accordance with the operational workplan. Fallen fruit may not be included in field containers of fruit brought to the packinghouse to be packed for export.

(3) Places of production must trap for *C. capitata* in accordance with the operational workplan. The NPPO must keep records regarding the placement and monitoring of all traps, as well as records of all pest detections in these traps, and provide the records to APHIS, as requested.

(4) Places of production must carry out any additional grove sanitation and phytosanitary measures specified for the place of production by the operational workplan.

(5) The NPPO of Argentina must visit and inspect registered places of production regularly throughout the exporting season for signs of infestations. These inspections must start no more than 30 days before harvest and continue until the end of the export season. The NPPO of Argentina must allow APHIS to monitor these inspections. The NPPO of Argentina must also provide records of pest detections and pest detection practices to APHIS. Before any place of production may export lemons to the continental United States pursuant to this section, APHIS must review and approve of these practices.

(6) If APHIS or the NPPO of Argentina determines that a registered place of production has failed to follow the requirements in this paragraph (b), the place of production will be excluded from the export program until APHIS and the NPPO of Argentina jointly agree that the place of production has taken appropriate remedial measures to address the plant pest risk.

(c) *Packinghouse requirements.* (1) During the time registered packinghouses are in use for packing lemons for export to the continental United States, the packinghouses may only accept lemons that are from registered places of production and that have been produced in accordance with the requirements of this section.

(2) Lemons destined for export to the continental United States must be packed within 24 hours of harvest in a registered pest-exclusionary packinghouse or stored in a degreening chamber in the registered pest-exclusionary packinghouse. Lemons must be packed for shipment to the continental United States in insect-proof cartons or containers, or covered with insect-proof mesh or plastic tarpaulin. These safeguards must remain intact until the lemons arrive in the United States, or the consignment will not be allowed to enter the United States.

(3) Prior to packing, the lemons must be washed, brushed, and surface disinfected for *E. australis* and *X. citri* and in accordance with the operational workplan, treated with an APHIS-approved fungicide, and waxed.

(4) After treatment, the NPPO of Argentina or officials authorized by the NPPO of Argentina must visually inspect a biometric sample of each consignment for quarantine pests, wash

the lemons in this sample, and inspect the filtrate for *B. chilensis* in accordance with the operational workplan. A portion of the lemons must then be cut open and inspected for evidence of quarantine pests.

(i) If a single *C. gnidiella* or *G. aurantianum* in any stage of development is found on the lemons, the entire consignment is prohibited from export to the United States, and the registered place of production that produced the lemons is suspended from the export program until APHIS and the NPPO of Argentina jointly agree that the place of production has taken appropriate remedial measures to address plant pest risk.

(ii) If a single *B. chilensis* or *Brevipalpus* spp. mite in any stage of development is found on the lemons, the entire consignment is prohibited from export, and the registered place of production that produced the lemons may be suspended from the export program, pending an investigation.

(iii) If a single immature Medfly is found in or with the lemons, the lemons must be treated in accordance with part 305 of this chapter and the operational workplan. Additionally, the registered place of production that produced the lemons in the consignment may be suspended from the export program, pending an investigation.

(5) If APHIS or the NPPO of Argentina determines that a registered packinghouse has failed to follow the requirements in this paragraph (c), the packinghouse will be excluded from the export program until APHIS and the NPPO of Argentina jointly agree that the packinghouse has taken appropriate remedial measures to address the plant pest risk.

(d) *Port of entry requirements.* Consignments of lemons from Argentina will be inspected at the port of entry into the United States. If any quarantine pests are discovered on the lemons during inspection, the entire lot in which the quarantine pest was discovered will be subject to appropriate remedial measures to address this risk.

(Approved by the Office of Management and Budget under control number 0579–0448)

Done in Washington, DC, this 20th day of December 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Office of Inspector General

7 CFR Part 2620

Availability of Information to the Public

AGENCY: Office of Inspector General, USDA.

ACTION: Final rule.

SUMMARY: The U.S. Department of Agriculture (USDA), Office of Inspector General (OIG) amends its regulation relating to the availability of its information to the public. The amendments are necessary to update its regulation in order to reflect reorganizations within OIG.

DATES: Effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Christy Slamowitz, Counsel to the Inspector General, U.S. Department of Agriculture, 1400 Independence Avenue SW., Room 441–E, Washington, DC 20250–2308, Telephone: (202) 720–9110.

SUPPLEMENTARY INFORMATION: The regulations regarding USDA OIG's processing of requests for information under the Freedom of Information Act (FOIA), 5 U.S.C. 552, were last published in 1995 (60 FR 52842). Since that time, OIG has had several internal reorganizations. As part of those reorganizations, OIG's FOIA program was transferred from OIG's defunct Office of Policy Development and Resources Management to OIG's Office of Counsel. In order to provide the public with current information regarding which OIG office processes FOIA requests, OIG is amending these regulations, which supplement USDA's FOIA regulations at subpart A of part 1 of this title, including the appendix.

Administrative Procedure Act

This rule relates to agency organization and internal agency management. Pursuant to 5 U.S.C. 553(A), such rules are not subject to the requirement to provide public notice of proposed rulemaking and opportunity for public comment. Therefore, notice and comment before the effective date are being waived.

Executive Orders 12866 and 13563

OIG has reviewed this rule to ensure its consistency with the regulatory philosophy and principles set forth in Executive Orders 12866 and 13563. OIG has determined that this rule is non-significant within the meaning of Executive Order 12866. Therefore, this rule is not required to be and has not been reviewed by the Office of Management and Budget (OMB).

Regulatory Flexibility Act

These regulations will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis as provided by the Regulatory Flexibility Act, as amended, is not required.

Executive Order 12291

This rule relates to internal agency organization and management. Therefore, it is exempt from the provisions of Executive Order 12291.

Paperwork Reduction Act

These proposed regulations impose no additional reporting and recordkeeping requirements. Therefore, clearance by OMB is not required.

Federalism (Executive Order 13132)

This rule does not have Federalism implications, as set forth in Executive Order 13132. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Congressional Review Act

OIG has determined that this rule is not a major rule as defined by the Congressional Review Act, 5 U.S.C. 804.

List of Subjects in 7 CFR Part 2620

Freedom of information.

■ For the reasons set forth in the preamble, OIG amends 7 CFR chapter XXVI by revising part 2620 to read as follows:

PART 2620—AVAILABILITY OF INFORMATION TO THE PUBLIC

Sec.

Authority: 5 U.S.C. 301, 552; Inspector General Act of 1978, as amended, 5 U.S.C. app. 3.

§ 2620.1 General statement.

This part supplements the regulations of the Secretary of Agriculture implementing the Freedom of Information Act, 5 U.S.C. 552 (FOIA) (subpart A of part 1 of this title, including the appendix), and governs the availability of records of the Office of Inspector General (OIG) to the public upon request.

§ 2620.2 Public inspection.

The FOIA requires that certain materials be made available for public inspection in an electronic format. OIG records are available for public inspection on OIG's public Web site, *https://www.usda.gov/oig/foia.htm.*

§ 2620.3 Requests.

Requests for OIG records shall be submitted to OIG's Office of Counsel and will be processed in accordance with subpart A of part 1 of this title. Specific guidance on how to submit requests (including current contact methods) is available through OIG's Web site, *https://www.usda.gov/oig/foiareq.htm,* and USDA's public FOIA Web site.

§ 2620.4 Denials.

If it is determined that a requested record is exempt from mandatory disclosure and that discretionary release would be improper, the Counsel to the Inspector General or the Counsel's designee shall give written notice of denial in accordance with subpart A of part 1 of this title.

§ 2620.5 Appeals.

The denial of a requested record may be appealed in accordance with subpart A of part 1 of this title. Appeals shall be addressed to the Inspector General, U.S. Department of Agriculture, 1400 Independence Avenue SW., Whitten Building, Suite 441–E, Washington, DC 20250–2308. The Inspector General will give notice of the determination concerning an appeal in accordance with subpart A of part 1 of this title.

Dated: December 15, 2016.

Phyllis K. Fong,

Inspector General.

[FR Doc. 2016–30803 Filed 12–22–16; 8:45 am]

BILLING CODE 3410–23–P

DEPARTMENT OF HOMELAND SECURITY

8 CFR Parts 214 and 264

Removal of Regulations Relating to Special Registration Process for Certain Nonimmigrants

AGENCY: Department of Homeland Security.

ACTION: Final rule.

SUMMARY: The Department of Homeland Security (DHS) is removing outdated regulations relating to an obsolete special registration program for certain nonimmigrants. DHS ceased use of the National Security Entry-Exit Registration System (NSEERS) program in 2011 after finding that the program was redundant, captured data manually that was already captured through automated systems, and no longer provided an increase in security in light of DHS's evolving assessment of the threat posed to the United States by international terrorism. The regulatory structure pertaining to NSEERS no longer provides a discernable public benefit as the program has been rendered obsolete. Accordingly, DHS is removing the special registration program regulations.

DATES: This rule is effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Kekoa Koehler, Office of Policy, U.S. Department of Homeland Security. Phone: 202–447–4125. Email: *Russell.koehler@hq.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

History of the Special Registration Program

In 1991, the legacy Immigration and Naturalization Service (INS), then part of the Department of Justice (DOJ), published a final rule requiring the registration and fingerprinting of certain nonimmigrants bearing Iraqi and Kuwaiti travel documents, due to various factors, including concerns about misuse of Kuwaiti passports.[1] In 1993, INS removed the regulations specific to such nonimmigrants, but added to the regulations at 8 CFR 264.1(f) a provision that allowed the Attorney General to require certain nonimmigrants of specific countries to be registered and fingerprinted upon arrival to the United States, pursuant to section 263(a) of the Immigration and Nationality Act (INA), 8 U.S.C. 1303(a).[2] Pursuant to the amendment, the Attorney General could designate countries by **Federal Register** notice.[3]

In June 2002, after the September 11, 2001 terrorist attacks, INS proposed to expand the existing registration and fingerprinting program at 8 CFR 264.1(f) to require certain nonimmigrants to report to INS upon arrival, approximately 30 days after arrival, every 12 months after arrival, upon certain events such as a change of address, and at the time of departure from the United States.[4] The proposed rule provided that the program would apply to nonimmigrants from countries that INS would designate in **Federal Register** notices and to individual nonimmigrants designated by either a U.S. consular officer or immigration officer at a U.S. port-of-entry as indicating a need for closer monitoring. Under the proposed rule, designated nonimmigrants would be required to be fingerprinted and photographed and to provide additional biographical information. The proposed rule also authorized INS to designate certain ports of departure for nonimmigrants subject to the program. In addition, INS proposed to amend 8 CFR 214.1 to require nonimmigrants selected for special registration to comply with 8 CFR 264.1(f) as a condition of maintaining nonimmigrant status.

The INS received 14 comments on the proposed rule, some in support of the proposed program and others opposed to it. In August 2002, INS finalized the proposed program, which became known as the National Security Entry-Exit Registration System (NSEERS), without substantial change.[5] In September 2002, INS announced by **Federal Register** notice that the new program would be applied to those who were subject to the earlier registration program—nonimmigrants from Iraq, Iran, Libya, and Sudan—and added nonimmigrants from Syria.[6] INS announced in November 2002 that only males 16 years of age and older from designated countries would be required to register under the program.[7] Between November 2002 and January 2003, INS added another 20 countries to the compliance list, bringing the total to 25 countries.[8] The responsibility for administering NSEERS was transferred to the Department of Homeland Security (DHS) in 2003 as part of the Homeland Security Act of 2002.[9]

In December 2003, DHS amended the NSEERS regulations by interim final rule to suspend the 30-day post-arrival

[1] 56 FR 1566 (Jan. 16, 1991). Those regulations were at 8 CFR 264.3.

[2] 58 FR 68024 (Dec. 23, 1993).

[3] The Attorney General initially required nonimmigrants from Iraq and Sudan to be registered and fingerprinted under the new provision and later added Iran and Libya. *See* 58 FR 68157 (Dec. 23, 1993) (Iraq and Sudan) and 61 FR 46829 (Sept. 5, 1996) (Iran and Libya). The INS consolidated the two notices in 1998. 63 FR 39109 (July 21, 1998).

[4] 67 FR 40581 (June 13, 2002).

[5] 67 FR 52584 (Aug. 12, 2002).

[6] 67 FR 57032 (Sept. 6, 2002).

[7] 67 FR 67766 (Nov. 6, 2002).

[8] *See* 67 FR 70526 (Nov. 22, 2002); 67 FR 77642 (Dec. 18, 2002); and 68 FR 2363 (Jan. 16, 2003). The 25 countries ultimately included in the compliance list were: Afghanistan, Algeria, Bahrain, Bangladesh, Egypt, Eritrea, Indonesia, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, North Korea, Oman, Pakistan, Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, United Arab Emirates, and Yemen.

[9] *See* Homeland Security Act of 2002, Public Law 107–296, secs. 402, 441, 442, 451, 1512(d), 1517, 116 Stat. 2135 (6 U.S.C. 202, 251, 252, 271, 552(d), 557); Homeland Security Act of 2002 Amendments, Public Law 108–7, div. L, sec. 105 (2003); *see also* 6 U.S.C. 542 note; 8 U.S.C. 1103(a), 1551 note.

and annual re-registration requirements.[10] DHS determined that automatically requiring 30-day and annual re-registration for designated nonimmigrants was no longer necessary as DHS was implementing other systems to help ensure that all nonimmigrants remain in compliance with the terms of their visa and admission.[11] The interim final rule provided that DHS would utilize a more tailored system in which, as a matter of discretion and on a case-by-case basis, the Department would notify nonimmigrants subject to the program to appear for re-registration interviews where DHS deemed it necessary to determine whether they were complying with the conditions of their status and admission. The interim final rule did not affect the procedures at ports-of-entry for nonimmigrants subject to the program.

In 2011, DHS published a notice in the **Federal Register** indicating that DHS would no longer register nonimmigrants under NSEERS and removing all countries from the NSEERS compliance list.[12] DHS had added no new countries to the compliance list since 2003, and it had since implemented multiple new automated systems that capture information of nonimmigrant travelers to the United States and support individualized determinations of admissibility.[13] Among the new programs and practices that had been implemented by that time were the United States Visitor and Immigrant Status Indicator Technology Program (US–VISIT), which stores and manages the fingerprint scans and photographs required upon entry to the United States,[14] and the Advance Passenger Information System (APIS), which requires that commercial vessels and commercial and private aircraft arriving in or departing the United States submit advance passenger and crew manifest information to U.S. Customs and Border Protection (CBP).[15] In light of these and other improved programs and practices, as well as improved information sharing with foreign counterparts, DHS determined that the data captured by NSEERS, which DHS personnel entered manually, had become redundant and no longer provided any increase in security.[16] Although the 2011 notice announced that DHS would no longer use the program for any countries, the notice did not remove the regulatory framework for NSEERS from the DHS regulations.

2012 DHS Office of Inspector General Report

In 2012, the DHS Office of the Inspector General (OIG) issued a report on border security information sharing within DHS that, among other things, recommended DHS fully eliminate NSEERS by removing the regulatory structure for the program.[17] The OIG report found that processing NSEERS registrations constituted a significant portion of CBP's workload at ports-of-entry while the program was in operation, and that the NSEERS database often did not function properly. The report noted that CBP officers believed NSEERS reporting to be of little utility and that the time spent processing registrations constituted an inefficient use of resources. The OIG report found that DHS's newer automated targeting systems enabled more sophisticated data analysis and intelligence-driven targeting than under NSEERS, as the newer targeting systems consolidate passenger data from various systems, can search across those systems for certain trends or patterns, and can be updated quickly without the need for public notification in the **Federal Register**. The OIG report also found US–VISIT to be the more logical system for capturing biometric information at ports-of-entry due to US–VISIT's superior functionality. The OIG report concluded that advancements in information technology had rendered NSEERS obsolete and that leaving the program in place did not provide any discernable public benefit.[18] The OIG report thus recommended removing the regulatory structure of NSEERS from DHS regulations.

Removal of the NSEERS Framework Regulations

Although DHS retained the regulations that provide the NSEERS framework, subsequent experience has confirmed that NSEERS is obsolete, that deploying it would be inefficient and divert personnel and resources from alternative effective measures, and that the regulation authorizing NSEERS is unnecessary. Since the suspension of NSEERS in 2011, DHS has not found any need to revive or consider the use of the program. Indeed, during this period, DHS's other targeting, data collection, and data management systems have become even more sophisticated. DHS now engages in security and law enforcement efforts that were not possible when NSEERS was established in 2002, and the Department continues to make significant progress in its abilities to identify, screen, and vet all travelers arriving to the United States; to collect and analyze biometric and biographic data; to target high-risk travelers for additional examination; and to track nonimmigrants' entry, stay, and exit from the country.

The information that was previously captured through NSEERS is now generally captured from nonimmigrants through other, more comprehensive and efficient systems. Below we describe several of DHS's data collections, systems, and procedures relating to nonimmigrants and their relation to the NSEERS program.

• *Biometric Information.* At the time of NSEERS' implementation in 2002, most nonimmigrants were admitted to the United States without being either photographed or fingerprinted.[19] Today, in contrast, CBP fingerprints and photographs nearly all nonimmigrants, regardless of nationality, at the time of entry into the United States. Furthermore, systems such as the Automated Biometric Identification System (IDENT), which were initially implemented by US–VISIT, are now used throughout DHS.[20] IDENT is the central DHS-wide system for storage and processing of biometric and associated biographic information for a wide range of uses including national security, law enforcement, immigration and border management, intelligence, and background investigations. IDENT stores and processes biometric data—digital fingerprints, photographs, iris scans, and facial images—and links biometrics with biographic information to establish

[11] *Id.* at 67579.

[12] 76 FR 23830 (Apr. 28, 2011).

[13] *Id.* at 23831 (stating that since the establishment of NSEERS, ''DHS has developed substantial infrastructure and adopted more universally applicable means to verify the entry and exit of aliens into and out of the United States'').

[14] *See* 8 CFR 235.1(f)(1)(ii).

[15] *See* 19 CFR 4.7b, 4.64(b), 122.22, 122.26, 122.31, 122.49a, 122.49b, 122.75a, and 122.75b.

[16] The manual collection of information required by NSEERS had also become a significant resource drain for CBP, particularly at its busiest ports of entry.

[17] Department of Homeland Security, Office of Inspector General, *Information Sharing on Foreign Nationals: Border Security,* OIG–12–39 (Feb. 2012).

[18] *See id.* at p. 35 (''The availability of newer, more capable DHS data systems argues against ever utilizing the NSEERS data system again.'').

[19] *See* 67 FR at 40581–82 (June 13, 2002) (noting in 2002 that ''current procedures do not provide for the collection of fingerprints at the port of entry from many aliens''); 67 FR at 52586 (Aug. 12, 2002).

[20] The Consolidated and Further Continuing Appropriations Act of 2013, Public Law 113–6, enacted on March 26, 2013, made dramatic changes to US–VISIT's mission set and organization. The 2013 Act transferred activities such as entry-exit policy and operations and overstay analysis to operational components within DHS. Responsibility for the DHS's Automated Biometric Identification System was given to the newly-created Office of Biometric Identity Management, a subcomponent of the National Protection and Programs Directorate.

and verify identities. As noted above, these systems and procedures were not in place in 2002.

• *Arrival and Departure Information.* CBP receives arrival and departure data from commercial vessel and aircraft carriers, as well as private aircraft, through APIS. CBP tracks this information, which is vetted against various law enforcement databases, in its Arrival and Departure Information System. CBP confirms the accuracy of this data information as part of the interview process for travelers arriving in the United States. And the available biographic departure data are matched against arrival data to determine who has complied with the terms of admission and who has overstayed. These systems and procedures did not exist in their current form in 2002.

• *Visa Information.* Visa data is automatically vetted through various mechanisms through a joint coordination effort involving CBP, U.S. Immigration and Customs Enforcement, and the Department of State. This effort permits the relevant agency to take appropriate action, such as revoking visas or requiring additional scrutiny. These information sharing systems and procedures were not in place in 2002.

• *Nonimmigrant Students.* Data on nonimmigrant students is now entered into the Student and Exchange Visitor Information System (SEVIS) by designated school officials at certified institutions and responsible officials in the Exchange Visitor Program. CBP officers at ports-of-entry can interface with SEVIS in real time to determine whether a student or exchange visitor has a current and valid certificate of eligibility to enter the United States. SEVIS did not exist when NSEERS was created.

• *Visa Waiver Program.* The Electronic System for Travel Authorization (ESTA) now captures information used to determine the eligibility of visitors seeking to travel to the United States without a visa under the Visa Waiver Program (VWP). All travelers who intend to apply for entry under the VWP are now required to obtain an ESTA approval prior to boarding a carrier to travel by air or sea to the United States.[21] CBP continuously vets ESTA applications against law enforcement databases for new information throughout the validity period and takes additional action as needed, including revocation of an ESTA approval. In November 2014, February 2016 and June 2016, DHS strengthened the VWP's security by adding additional elements on the ESTA application and revising the eligibility questions.[22] The Visa Waiver Program Improvement and Terrorist Travel Prevention Act of 2015, enacted on December 18, 2015, prohibits certain travelers who have been present in or are nationals of certain countries to travel or be admitted to the United States under the VWP.[23] None of these measures related to the VWP were in place when NSEERS was promulgated.

• *Electronic Visa Update System:* The Electronic Visa Update System (EVUS), which became effective on October 20, 2016, is an online system that allows for the collection of biographic and other information from nonimmigrants who hold a passport issued by an identified country containing a U.S. nonimmigrant visa of a designated category.[24] Nonimmigrants subject to these regulations must periodically enroll in EVUS and obtain a notification of compliance with EVUS prior to travel to the United States. Though currently limited to nonimmigrants who hold a B1, B2, or B–1/B–2 visa issued without restriction for maximum validity contained in a passport issued by the People's Republic of China,[25] additional countries could be added to address emerging national security issues.

Due to such changes, DHS has determined that the NSEERS model for border vetting and security, which focused on designated nationalities for special processing, is outmoded. Since the implementation of NSEERS in 2002, DHS has increasingly moved away from the NSEERS model and instead focused on a targeted, intelligence-driven border security model that identifies current and emerging threats in real time. For these reasons, DHS has concluded that NSEERS is obsolete and inefficient; that its implementation would be counterproductive to the Department's comprehensive security measures; and that the regulatory authority for NSEERS should thus be rescinded. For these reasons, DHS is removing the special registration program regulations found in 8 CFR 264.1(f).

Conforming Amendment

DHS is making a conforming amendment to 8 CFR 214.1(f) to remove the specific reference to 8 CFR 264.1(f), which INS added when it implemented NSEERS in 2002. The amendment reinstates the text of 8 CFR 214.1(f) prior to the implementation of NSEERS, with a minor change to reflect the transfer of duties from INS to DHS.

Statutory and Regulatory Requirements

Administrative Procedure Act

The Administrative Procedure Act (APA) generally requires agencies to publish a notice of proposed rulemaking in the **Federal Register** and provide interested persons the opportunity to submit comments.[26] The APA provides an exception to this prior notice and comment requirement for ''rules of agency organization, procedure, or practice.'' [27] This final rule is a procedural rule promulgated for agency efficiency purposes. DHS is removing regulations related to an outdated, inefficient, and decommissioned program. Thus, removing these regulations, which have not been used since 2011, reflects the current practice and procedure of DHS and will not affect the substantive rights or interests of the public.

The APA also provides an exception from notice and comment procedures when an agency finds for good cause that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' [28] DHS finds good cause to issue this rule without prior notice or comment, as such procedures are unnecessary. The removal of these regulations will have no substantive effect on the public because the regulations relate to a program which has not been utilized since 2011 and which has been made obsolete by DHS's more advanced and efficient processes, programs, and systems.

Further, the APA generally requires that substantive rules incorporate a 30-day delayed effective date.[29] This rule, however, is merely procedural and does not impose substantive requirements;

[21] *See* 8 U.S.C. 1187(a)(11), (h)(3); 8 CFR 217.5.

[22] 79 FR 65414 (Nov. 4, 2014); 81 FR 8979 (Feb. 23, 2016); 81 FR 39681 (June 17, 2016).

[23] The Visa Waiver Program Improvement and Terrorist Travel Prevention Act of 2015, sec. 203, enacted as part of Division O, Title II of the Consolidated Appropriations Act of 2016, Public Law 114–113, applies to nationals of VWP countries who have been present in Iraq, Syria, countries listed under specified designation lists (currently Syria, Iran, and Sudan), or countries designated by the Secretary of Homeland Security (currently Libya, Somalia, and Yemen) at any time on or after March 1, 2011 (with limited government/military exceptions) and to nationals of VWP countries who are also nationals of Iran, Iraq, Sudan, or Syria. *See* 8 U.S.C. 1187(a)(12). CBP modified the ESTA application on February 23, 2016 to include questions pertaining to dual citizenship or nationality, and travel to restricted countries. 81 FR 8979 (Feb. 23, 2016). CBP updated the ESTA application again on June 17, 2016 with new questions pertaining to the applicant's participation in the Global Entry Program and travel on or after March 1, 2011 to Libya, Somalia or Yemen. 81 FR 39680 (June 17, 2016).

[24] 8 CFR 215.23–215.24; 81 FR 72481 (Oct. 20, 2016).

[25] *See* 81 FR 72600 (Oct. 20, 2016).

[26] *See* 5 U.S.C. 553(b) and (c).

[27] 5 U.S.C. 553(b)(A).

[28] 5 U.S.C. 553(b)(3)(B).

[29] 5 U.S.C. 553(d).

thus DHS finds that a delayed effective date is unnecessary.

Executive Orders 12866 and 13563

This regulation has been drafted and reviewed in accordance with Executive Orders 12866 and 13563. This rule is not a significant regulatory action under Executive Order 12866, and accordingly this rule has not been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

Because DHS is of the opinion that this rule is not subject to the notice and comment requirements of 5 U.S.C. 553, DHS does not consider this rule to be subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of the Act requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in a $100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector.

This rule does not include any unfunded mandates. The requirements of Title II of the Act, therefore, do not apply, and DHS has not prepared a statement under the Act.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Act of 1996. This rule will not result in an annual effect on the economy of $100 million or more, a major increase in costs or prices, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States companies to compete with foreign-based companies in domestic and export markets.

Executive Order 13132—Federalism

This rule would not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Executive Order 12988—Civil Justice Reform

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988.

Regulatory Amendments

List of Subjects

8 CFR Part 214

Administrative practice and procedure, Aliens, Cultural exchange programs, Employment, Foreign officials, Health professions, Reporting and recordkeeping requirements, Students.

8 CFR Part 264

Aliens, Reporting and recordkeeping requirements.

Amendments to the Regulations

For the reasons stated in the preamble, DHS amends chapter 1 of title 8 of the Code of Federal Regulations as set forth below.

8 CFR CHAPTER 1

PART 214—NONIMMIGRANT CLASSES

■ 1. The general authority for part 214 continues to read as follows:

Authority: 6 U.S.C. 202, 236; 8 U.S.C. 1101, 1102, 1103, 1182, 1184, 1186a, 1187, 1221, 1281, 1282, 1301–1305 and 1372; sec. 643, Public Law 104–208, 110 Stat. 3009–708; Public Law 106–386, 114 Stat. 1477–1480; section 141 of the Compacts of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands, and with the Government of Palau, 48 U.S.C. 1901 note, and 1931 note, respectively; 48 U.S.C. 1806; 8 CFR part 2.

■ 2. Amend § 214.1 by revising paragraph (f) to read as follows:

§ 214.1 Requirements for admission, extension, and maintenance of status.

* * * * *

(f) *False information.* A condition of a nonimmigrant's admission and continued stay in the United States is the full and truthful disclosure of all information requested by DHS. A nonimmigrant's willful failure to provide full and truthful information requested by DHS (regardless of whether or not the information requested was material) constitutes a failure to maintain nonimmigrant status under section 237(a)(1)(C)(i) of the Act.

* * * * *

PART 264—REGISTRATION AND FINGERPRINTING OF ALIENS IN THE UNITED STATES

■ 3. The general authority citation for part 264 continues to read as follows:

Authority: 8 U.S.C. 1103, 1201, 1303–1305; 8 CFR part 2.

* * * * *

§ 264.1 [Amended]

■ 4. In § 264.1, remove and reserve paragraph (f).

Jeh Charles Johnson,

Secretary.

[FR Doc. 2016–30885 Filed 12–22–16; 8:45 am]

DEPARTMENT OF ENERGY

10 CFR Part 431

[Docket Number EERE–2014–BT–STD–0042]

RIN 1904–AD34

Energy Conservation Standards for Commercial Water Heating Equipment: Availability of Updated Analysis Results

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of data availability (NODA).

SUMMARY: In this NODA, the U.S. Department of Energy (DOE) presents its updated analysis used to convert the potential energy conservation standard levels the Department has considered for residential-duty commercial gas-fired storage water heaters from thermal efficiency and standby loss metrics to the uniform energy factor (UEF) metric, as required by a recent change in law. In a notice of proposed rulemaking (NOPR) for energy conservation standards for commercial water heating equipment published on May 30, 2016 (''May 2016 CWH ECS NOPR''), DOE analyzed these potential standard levels for residential-duty commercial gas-fired storage waters in terms of thermal efficiency and standby loss, and converted the levels to UEF using conversion factors that were proposed in a separate NOPR published on April 15, 2015 (''April 2015 conversion factor NOPR''). However, DOE subsequently published a supplemental NOPR (''August 2016 conversion factor SNOPR'') in the conversion factor rulemaking in response to new data on August 30, 2016, and recently issued a conversion factor final rule (''December

6, 2016 conversion factor final rule'') based upon the August 2016 conversion factor SNOPR, which finalized updated conversion factor equations. (*See* Docket EERE–2015–BT–TP–0007). This NODA presents the thermal efficiency and standby loss levels analyzed in the May 2016 CWH ECS NOPR for residential-duty gas-fired storage water heaters in terms of UEF, using the recently updated conversion factors adopted in the December 6, 2016 conversion factor final rule.

DATES: DOE will accept comments, data, and information regarding this notice of data availability (NODA) no later than January 9, 2017.

ADDRESSES: Instructions: Any comments submitted must identify the NODA for commercial water heating equipment, and provide docket number EERE–2014–BT–STD–0042 and/or regulatory information number (RIN) number 1904–AD34. Comments may be submitted using any of the following methods:

(1) *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

(2) *Email: ComWaterHeating2014STD0042@ee.doe.gov.* Include the docket number and/or RIN in the subject line of the message.

(3) *Postal Mail:* Ms. Ashley Armstrong, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW., Washington, DC 20585–0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.

(4) *Hand Delivery/Courier:* Ms. Ashley Armstrong, U.S. Department of Energy, Building Technologies Office, 950 L'Enfant Plaza SW., Suite 600, Washington, DC 20024. Telephone: (202) 586–6590. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

For further information on how to submit a comment, review other public comments and the docket, contact the Appliance and Equipment Standards Program staff at (202) 586–6636 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

(5) *Docket:* The Docket Number EERE–2014–BT–STD–0042, is available for review at *www.regulations.gov,* including **Federal Register** notices, comments, and other supporting documents/materials. All documents in the docket are listed in the *www.regulations.gov* index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure.

A link to the docket Web page can be found at *https://www.regulations.gov/docket?D=EERE-2014-BT-STD-0042.* The *www.regulations.gov* Web page contains instructions on how to access all documents in the docket, including public comments.

FOR FURTHER INFORMATION CONTACT: Ms. Ashley Armstrong, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies, EE–2J, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–6590. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Ms. Jennifer Tiedeman, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 287–6111. Email: *Jennifer.Tiedeman@hq.doe.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Authority and Background

Title III Part C [1] of the Energy Policy and Conservation Act of 1975 (''EPCA'' or, ''the Act''), Public Law 94–163 (42 U.S.C. 6311–6317, as codified), added by Public Law 95–619, Title IV, Sec. 441(a), sets forth a variety of provisions designed to improve energy efficiency and established the Energy Conservation Program for Certain Industrial Equipment, which includes the commercial water heating equipment that is the subject of this rulemaking.[2] (42 U.S.C. 6311(1)(K))

Under EPCA, DOE's energy conservation program generally consists of four parts: (1) Testing; (2) labeling; (3) energy conservation standards; and (4) certification and enforcement procedures. The testing requirements consist of test procedures that manufacturers of covered products and equipment must use as the basis for certifying to DOE that their products and equipment comply with the applicable energy conservation standards adopted under EPCA, and for making other representations about the efficiency of those products. Similarly, DOE must use these test procedures to determine whether such products and certain equipment comply with any relevant standards promulgated under EPCA. (42 U.S.C. 6314) The initial Federal energy conservation standards and test procedures for commercial storage water heaters, instantaneous water heaters, and unfired hot water storage tanks (collectively referred to as ''commercial water heating equipment'' or ''CWH equipment'') were added to EPCA by the Energy Policy Act of 1992 (EPACT 1992), Public Law 102–486. (42 U.S.C. 6313(a)(5) and 42 U.S.C. 6314(a)(4)(A)) These initial CWH equipment standards corresponded to the efficiency levels and equipment classes contained in the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) Standard 90.1–1989, in effect on October 24, 1992. The statute provided that if the efficiency levels in ASHRAE Standard 90.1 were amended after October 24, 1992, the Secretary of Energy (Secretary) must establish an amended uniform national standard at new minimum levels for each equipment type specified in ASHRAE Standard 90.1, unless DOE determines, through a rulemaking supported by clear and convincing evidence, that national standards more stringent than the new minimum levels would result in significant additional energy savings and be technologically feasible and economically justified. (42 U.S.C. 6313(a)(6)(A)(ii)(I)–(II)) The statute was subsequently amended to require DOE to review its standards for commercial water heating equipment (and other ''ASHRAE equipment'') every six years. (42 U.S.C. 6313(a)(6)(C)) On January 12, 2001, DOE published a final rule for commercial water heating equipment that amended energy conservation standards by adopting the levels in ASHRAE Standard 90.1–1999 for all types of commercial water heating equipment, except for electric storage water heaters.[3] 66 FR 3336. Most recently, on July 17, 2015, DOE published a final rule for commercial water heating equipment, in which DOE adopted the thermal efficiency level for oil-fired storage water heaters that was included in ASHRAE 90.1–2013. 80 FR 42614.

On December 18, 2012, the American Energy Manufacturing Technical

[1] For editorial reasons, upon certification in the U.S. Code, Part C was re-designated Part A–1.

[2] All references to EPCA in this document refer to the statute as amended through the Energy Efficiency Improvement Act of 2015 (EEIA 2015), Public Law 114–11 (April 30, 2015).

[3] For electric storage water heaters, the standard in ASHRAE Standard 90.1–1999 was less stringent than the standard prescribed in EPCA and, consequently, would have increased energy consumption, so DOE maintained the standards for electric storage water heaters at the statutorily prescribed level.

Corrections Act (AEMTCA), Public Law 112–210, was signed into law. In relevant part, it amended EPCA to require that DOE publish a final rule establishing a uniform efficiency descriptor and accompanying test methods for consumer water heaters and certain commercial water heating equipment within one year of the enactment of AEMTCA. (42 U.S.C. 6295(e)(5)(B)) The final rule must replace the energy factor (EF), thermal efficiency, and standby loss metrics with a uniform efficiency descriptor. (42 U.S.C. 6295(e)(5)(C)) On July 11, 2014, DOE published a final rule that fulfilled these requirements, establishing a uniform energy factor (UEF) as the uniform energy descriptor (''July 2014 final rule'').[4] 79 FR 40542 (July 2014 final rule). AEMTCA requires that, beginning one year after the date of publication of DOE's final rule establishing the uniform descriptor (*i.e.,* July 13, 2015), the efficiency standards for the consumer water heaters and residential-duty commercial water heaters identified in the July 2014 final rule must be denominated according to the uniform efficiency descriptor established in that final rule (42 U.S.C. 6295(e)(5)(D)), and that DOE must develop a mathematical conversion for converting the measurement of efficiency from the test procedures and metrics in effect at that time to the uniform efficiency descriptor. (42 U.S.C. 6295(e)(5)(E)(i))

Pursuant to 42 U.S.C. 6295(e)(5)(E)(ii) and (iii), the conversion factor must not affect the minimum efficiency requirements for covered water heaters, including residential-duty commercial water heaters. Furthermore, such conversions must not lead to a change in measured energy efficiency for covered residential and residential-duty commercial water heaters manufactured and tested prior to the final rule establishing the uniform efficiency descriptor. *Id.* EPCA also contains what is known as an ''anti-backsliding'' provision, which prevents the Secretary from prescribing any amended standard that either increases the maximum allowable energy use or decreases the minimum required energy efficiency of a covered product. (42 U.S.C. 6295(o)(1); 6313(a)(6)(B)(iii)(I)) In the December 6, 2016 conversion factor final rule, DOE's methodology for translating the standards ensures equivalent stringency between the then-existing standards (in terms of EF, thermal efficiency and standby loss metrics) and the updated standards (in terms of UEF). (*See* Docket EERE–2015–BT–TP–0007)

DOE initially presented proposals for establishing mathematical conversion factors for residential-duty commercial water heaters in a NOPR published on April 14, 2015 (''April 2015 conversion factor NOPR'') to be used to convert thermal efficiency and standby loss represented values to UEF represented values for residential-duty commercial water heaters. 80 FR 20116, 20143. DOE also proposed amendments to the minimum energy conservation standards for consumer water heaters and residential-duty commercial water heaters to translate the existing standards to the UEF metric without altering the stringency of the existing energy conservation standards. *Id.* at 20120. In a May 31, 2016 NOPR, DOE analyzed amended thermal efficiency and standby loss standards for residential-duty gas-fired storage water heaters, and used the conversion factors proposed in the April 2015 conversion factor NOPR to convert the analyzed thermal efficiency and standby loss levels to UEF.[5] (''May 2016 CWH ECS NOPR'') DOE also used these conversion factors to develop UEF standard equations (dependent on rated volume) corresponding to the thermal efficiency and standby loss levels selected for each trial standard level (TSL) analyzed. 81 FR 34440, 34477.

Upon further analysis and review of the public comments received in response to the April 2015 conversion factor NOPR, DOE published a supplemental notice of proposed rulemaking on August 30, 2016 (''August 2016 conversion factor SNOPR''). In the SNOPR, DOE proposed revised mathematical conversion factors, as well as updates to the energy conservation standards for residential-duty commercial water heaters denominated in UEF. 81 FR 59736, 59793–59794, 59798. On December 6, 2016, DOE issued a final rule (''December 6, 2016 conversion factor final rule'') that adopted the mathematical conversion factors used to convert thermal efficiency and standby loss to UEF for residential-duty commercial water heaters that were proposed in the August 2016 conversion factor SNOPR. DOE also adopted the energy conservation standards for residential-duty commercial water heaters that were proposed in the August 2016 conversion factor SNOPR and that translate the existing thermal efficiency and standby loss standards to UEF standards. (*See* Docket EERE–2015–BT–TP–0007) In this NODA, DOE has used the updated conversion factors adopted in the December 6, 2016 conversion factor final rule to convert the thermal efficiency and standby loss levels analyzed in the May 2016 CWH ECS NOPR (*i.e.,* levels more stringent than the existing thermal efficiency and standby loss standards) to UEF levels.

II. Summary of the Updated Conversion Factor and Results

The purpose of this NODA is to present the thermal efficiency and standby loss levels that were considered for residential-duty gas-fired commercial water heaters in the May 2016 CWH ECS NOPR in terms of UEF using the recently updated conversion factors adopted in the December 6, 2016 conversion factor final rule. In response to the May 2016 CWH ECS NOPR, DOE received feedback on the efficiency levels analyzed and the efficiency levels included in each TSL for residential-duty commercial gas-fired storage water heaters. DOE is considering this feedback, and will address the comments received in detail, along with any resulting changes to the analysis and relevant conclusions, in the forthcoming final rule. The NODA, however, does not reflect any change in the efficiency levels or TSLs considered in the May 2016 CWH ECS NOPR.

The December 6, 2016 conversion factor final rule adopted conversion factors for residential-duty commercial water heaters for all four draw patterns: High, medium, low, and very small.[6] In the following equations, New UEF is the converted UEF value; E_t is the thermal

[4] The uniform efficiency descriptor and accompanying test procedure apply to commercial water heating equipment with residential applications defined in the July 2014 final rule as a ''residential-duty commercial water heater.'' Specifically, in the July 2014 final rule, DOE adopted a definition for ''residential-duty commercial water heater'' that included seven classes: Gas-fired storage, oil-fired storage, electric storage, heat pump with storage, gas-fired instantaneous, electric instantaneous, and oil-fired instantaneous. 79 FR 40542, 40586. In a subsequent CWH equipment test procedure final rule published on November 10, 2016, DOE revised the definition by removing four classes; therefore, the revised definition for ''residential-duty commercial water heater'' includes three classes: Gas-fired storage, oil-fired storage, and electric instantaneous. 81 FR 79261, 79289.

[5] DOE initiated this rulemaking pursuant to EPCA's requirement that every 6 years, DOE must conduct an evaluation of its standards for CWH equipment and publish either a notice of determination that such standards do not need to be amended or a notice of proposed rulemaking, including proposed amended standards. (42 U.S.C. 6313(a)(6)(C)(i))

[6] The term ''draw pattern'' refers to the duration, flow rate, and timing of hot water draws during the test. The July 2014 final rule adopted four different draw patterns—very small, low, medium, and high—based on the delivery capacity (*i.e.,* first hour rating or maximum gallons per hour rating) of the model under test. 79 FR 40542, 40550 (July 11, 2014). Because the UEF differs based on the draw pattern, separate conversion factors were established for each draw pattern.

efficiency in fractional form (*e.g.,* 0.80 instead of 80 percent); SL is the standby loss (Btu/h); P is input rate (Btu/h); F and G are coefficients as specified in Table 1 based on the applicable draw pattern; and UEF_{rd} is a parameter for residential-duty commercial storage water heaters developed by DOE based on the water heater analysis model (WHAM) equation.[7] The methodology and data used to develop these conversion factors are discussed in detail in the August 2016 conversion factor SNOPR. 81 FR 59750–59751, 59776–59778 (August 30, 2016).

$$UEF_{rd} = \left[\frac{1}{E_t} + F * SL\left(G - \frac{1}{P\,E_t}\right)\right]^{-1}$$

$$New\ UEF = -0.0022 + 1.0002 * \mathrm{UEF}_{rd}$$

TABLE 1—COEFFICIENTS FOR THE ANALYTICAL UEF CONVERSION FACTOR FOR RESIDENTIAL-DUTY COMMERCIAL STORAGE WATER HEATERS

Draw pattern	F	G
Very Small	0.821429	0.0043520
Low	0.821429	0.0011450
Medium	0.821429	0.0007914
High	0.821429	0.0005181

The thermal efficiency and standby loss levels analyzed in the May 2016 CWH ECS NOPR are shown in Table 2 (81 FR 34440, 34472 (May 31, 2016)), and the corresponding updated UEF levels are shown in Table 3. The standby loss and UEF levels correspond to the representative equipment capacities analyzed for residential-duty commercial gas-fired storage water heaters—75 gallon rated storage volume and 76,000 Btu/h rated input. In Table 3, the UEF values correspond to the high draw pattern—DOE believes most, if not all, residential-duty gas-fired storage water heater models will fall into the high draw pattern bin. In the May 2016 CWH ECS NOPR, DOE selected standby loss levels in Btu/h, and translated these values to modified standby loss standard equations using standby loss reduction factors. As proposed in the May 2016 CWH ECS NOPR and presented in this NODA, the standby loss reduction factor is a factor that is multiplied by the current standby loss equation. Because the standby loss reduction factor is a multiplicative factor that is applied to the existing standby loss equation (in lieu of independently changing the coefficients for the volume and input terms of the equation), the standby loss reduction factor preserves the dependence of the existing standby loss equation on rated input and storage volume. 81 FR 34440, 34476 (May 31, 2016).

TABLE 2—THERMAL EFFICIENCY AND STANDBY LOSS LEVELS FOR RESIDENTIAL-DUTY GAS-FIRED STORAGE WATER HEATERS ANALYZED IN THE MAY 2016 CWH ECS NOPR

[75 Gallon rated storage volume, 76,000 Btu/h rated input]

Thermal efficiency level	Thermal efficiency (%)	Standby loss (Btu/h)			
		SL EL0	SL EL1	SL EL2*	SL EL3*
E_t EL0	80	1048	836	811	707
E_t EL1	82	1022	816	791	690
E_t EL2	90	624	503	.....	.....
E_t EL3	95	624	503	.....	.....
E_t EL4	97	624	503	.....	.....

* Electromechanical flue dampers, which were analyzed in SL ELs 2–3, were not considered as a technology option for E_r ELs 2–4 because these thermal efficiency levels can only be met by condensing water heaters. Flue dampers are not used with condensing water heaters because condensing water heaters include mechanical draft systems.

Note: EL stands for efficiency level, E_t stands for thermal efficiency, and SL stands for standby loss.

TABLE 3—UPDATED UEF LEVELS CORRESPONDING TO THERMAL EFFICIENCY AND STANDBY LOSS LEVELS FOR RESIDENTIAL-DUTY GAS-FIRED STORAGE WATER HEATERS ANALYZED IN THE MAY 2016 CWH ECS NOPR

[75 gallon rated storage volume, 76,000 Btu/h rated input]

Thermal efficiency level	Thermal efficiency (%)	Uniform Energy Factor*			
		SL EL0	SL EL1	SL EL2**	SL EL3**
E_t EL0	80	0.59	0.63	0.63	0.65
E_t EL1	82	0.61	0.64	0.64	0.66
E_t EL2	90	0.73	0.76	.....	.....
E_t EL3	95	0.76	0.79	.....	.....
E_t EL4	97	0.77	0.80	.....	.....

* UEF values were determined using the conversion factors for the high draw pattern adopted in the December 6, 2016 conversion factor final rule. (*See* Docket EERE–2015–BT–TP–0007)

** Electromechanical flue dampers, which were analyzed in SL ELs 2–3, were not considered as a technology option for E_r ELs 2–4 because these thermal efficiency levels can only be met by condensing water heaters. Flue dampers are not used with condensing water heaters because condensing water heaters include mechanical draft systems.

[7] For more information *see: http://aceee.org/files/proceedings/1998/data/papers/0114.PDF.*

Note: EL stands for efficiency level, E_t stands for thermal efficiency, and SL stands for standby loss.

The energy conservation standards for residential-duty commercial water heaters adopted in the December 6, 2016 conversion factor final rule (*i.e.,* denominated in UEF and translated from the existing thermal efficiency and standby loss standards) are linear equations dependent on rated volume. Therefore, the converted UEF standard equations for residential-duty gas-fired storage water heaters presented in this NODA are consistent with this equation format. DOE based its methodology for developing UEF standard equations for more-stringent thermal efficiency and standby loss levels on the ''representative model'' method used for determining the converted standards equations in terms of UEF in the December 6, 2016 conversion factor final rule, as outlined below. (*See* Docket EERE–2015–BT–TP–0007)

DOE developed UEF standard equations corresponding to each combination of thermal efficiency and standby loss levels that DOE selected in the TSLs analyzed in the May 2016 CWH ECS NOPR. DOE converted the thermal efficiency level and standby loss value to UEF for each identified rated volume on the market and for each draw pattern using the conversion factors adopted in the December 6, 2016 conversion factor final rule. (*See* Docket EERE–2015–BT–TP–0007) To develop the UEF standard equation for each draw pattern and TSL, DOE used a linear regression between volume and UEF (*see* the December 6, 2016 conversion factor final rule for more details).

Table 4 shows the thermal efficiency and standby loss levels included in each TSL in the May 2016 CWH ECS NOPR for residential-duty commercial gas-fired storage water heaters. 81 FR 34440, 34504 (May 31, 2016). Table 5 shows the updated UEF standard equations, dependent on rated volume, that were developed for each TSL and draw pattern using the conversion factors adopted in the December 6, 2016 conversion factor final rule. (*See* Docket EERE–2015–BT–TP–0007)

TABLE 4—TRIAL STANDARD LEVELS FROM THE MAY 2016 CWH ECS NOPR FOR RESIDENTIAL-DUTY GAS-FIRED STORAGE WATER HEATERS BY EFFICIENCY LEVEL

	Trial standard level				
	0	1	2	3	4
Thermal Efficiency	80%	82%	90%	90%	97%
Standby Loss Reduction Factor	1.00	0.77	0.48	0.48	0.48

TABLE 5—UPDATED UEF EQUATIONS FOR TRIAL STANDARD LEVELS FROM THE MAY 2016 CWH ECS NOPR FOR RESIDENTIAL-DUTY GAS-FIRED STORAGE WATER HEATERS

Draw Pattern *	TSL 0	TSL 1	TSL 2	TSL 3	TSL 4
High	$0.6597 - (0.0009 \times Vr)$	$0.7205 - (0.0008 \times Vr)$	$0.8107 - (0.0008 \times Vr)$	$0.8107 - (0.0008 \times Vr)$	$0.8675 - (0.0009 \times Vr)$
Medium	$0.6002 - (0.0011 \times Vr)$	$0.6749 - (0.0010 \times Vr)$	$0.7686 - (0.0010 \times Vr)$	$0.7686 - (0.0010 \times Vr)$	$0.8192 - (0.0011 \times Vr)$
Low	$0.5362 - (0.0012 \times Vr)$	$0.6227 - (0.0012 \times Vr)$	$0.7192 - (0.0012 \times Vr)$	$0.7192 - (0.0012 \times Vr)$	$0.7631 - (0.0013 \times Vr)$
Very Small	$0.2674 - (0.0009 \times Vr)$	$0.3590 - (0.0012 \times Vr)$	$0.4459 - (0.0014 \times Vr)$	$0.4459 - (0.0014 \times Vr)$	$0.4622 - (0.0015 \times Vr)$

* Draw pattern is a classification of hot water use of a consumer water heater or residential-duty commercial water heater, based upon the first-hour rating. The draw pattern is determined using the Uniform Test Method for Measuring the Energy Consumption of Water Heaters in appendix E to subpart B of 10 CFR Part 430.

Note: TSL 0 represents the baseline, and Vr is rated volume in gallons. UEF values were determined using the conversion factors adopted in the December 6, 2016 conversion factor final rule. (*See* Docket EERE–2015–BT–TP–0007).

III. Issues on Which DOE Seeks Public Comment

DOE is interested in receiving comments on the conversion of the thermal efficiency and standby loss levels for residential-duty gas-fired storage water heaters that were considered in the May 2016 CWH ECS NOPR to UEF levels and UEF standard equations using the conversion factors adopted by DOE in its December 6, 2016 final rule.

Issued in Washington, DC, on December 7, 2016.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

BILLING CODE 6450–01–P

FEDERAL ELECTION COMMISSION

11 CFR Parts 4, 5, 100, 110, 112, 113, and 300

[Notice 2016–14]

Technical Amendments and Corrections

AGENCY: Federal Election Commission.

ACTION: Correcting amendments.

SUMMARY: The Commission is making technical corrections to various sections of its regulations. These are non-substantive amendments to correct typographical errors, update references, and remove provisions that no longer apply.

DATES: Effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Eugene Lynch, Paralegal, 999 E Street NW., Washington, DC 20463, (202) 694–1650 or (800) 424–9530.

SUPPLEMENTARY INFORMATION:

Background

The existing rules that are the subject of these corrections are part of the continuing series of regulations that the Commission has promulgated to implement the Presidential Election Campaign Fund Act, 26 U.S.C. 9001–13, and the Presidential Primary Matching Payment Account Act, 26 U.S.C. 9031–42 (collectively, the ''Funding Acts''), and the Federal Election Campaign Act, 52 U.S.C. 30101–46 (''FECA''). The Commission is promulgating these corrections without advance notice or an opportunity for comment because they fall under the ''good cause'' exemption of the Administrative Procedure Act. 5 U.S.C. 553(b)(B). The

Commission finds that notice and comment are unnecessary here because these corrections are merely typographical and technical; they effect no substantive changes to any rule. For the same reason, these corrections fall within the ''good cause'' exception to the delayed effective date provisions of the Administrative Procedure Act and the Congressional Review Act. 5 U.S.C. 553(d)(3), 808(2).

Moreover, because these corrections are exempt from the notice and comment procedure of the Administrative Procedure Act under 5 U.S.C. 553(b), the Commission is not required to conduct a regulatory flexibility analysis under 5 U.S.C. 603 or 604. *See* 5 U.S.C. 601(2), 604(a). Nor is the Commission required to submit these revisions for congressional review under FECA or the Funding Acts. *See* 52 U.S.C. 30111(d)(1), (4) (providing for congressional review when Commission ''prescribe[s]'' a ''rule of law''); 26 U.S.C. 9009(c)(1), (4), 9039(c)(1), (4) (same). Accordingly, these corrections are effective upon publication in the **Federal Register**.

Corrections to FECA and Funding Act Rules in Chapter I of Title 11 of the Code of Federal Regulations

A. Correction to 11 CFR Chapter I

The Commission has renamed a division within the agency. As a result, throughout 11 CFR chapter I, the Commission is replacing every instance of the phrase ''Public Disclosure Division'' with the phrase ''Public Disclosure and Media Relations Division.''

B. Correction to 11 CFR 100.94

The Commission is correcting a typographical error in paragraph (b) of this section by adding a comma after the word ''maintaining''. This comma was inadvertently omitted when the Commission promulgated this paragraph.

C. Correction to 11 CFR 100.155

The Commission is correcting a typographical error in paragraph (b) of this section by adding a comma after the word ''creating'' and a comma after the word ''maintaining''. These commas were inadvertently omitted when the Commission promulgated this paragraph.

D. Correction to 11 CFR 110.6

The Commission is revising paragraphs (c)(2)(i) and (c)(2)(ii)(C) of this section to correctly note the reporting requirements for candidates and authorized committees receiving earmarked contributions from conduits and intermediaries. These paragraphs currently state that candidates and authorized committees are required to report a conduit or intermediary forwarding earmarked contributions which, in the aggregate, exceed $200 in ''any calendar year.'' In 1999, however, Congress amended FECA to require that authorized committees aggregate and report all receipts and disbursements by election cycle, rather than by calendar year. Treasury and General Government Appropriations Act of 2000, Public Law 106–58, sec. 641, 113 Stat. 430, 477 (1999). In 2000, the Commission implemented this legislation by amending § 104.3(c) of its regulations, Election Cycle Reporting by Authorized Committees, 65 FR 42619–21 (July 11, 2000), but inadvertently failed to update paragraphs (c)(2)(i) and (c)(2)(ii)(C) of § 110.6 to conform to the statute and to revised § 104.3. To correct that oversight, the Commission is amending the relevant portions of the text in paragraphs (c)(2)(i) and (c)(2)(ii)(C).

E. Corrections to 11 CFR 113.2

The Commission is removing paragraph (f) of this section because it is no longer applicable. Paragraph (f) describes the ''personal use'' rules, which concern the permissible non-campaign uses of campaign funds, that applied to Members of Congress serving in the 102d or an earlier Congress. Because this paragraph does not apply to any Members serving in the 103d or a later Congress, which includes all current and future Members of Congress, the Commission is removing paragraph (f).

F. Corrections to 11 CFR 300.12

The Commission is removing and reserving this section because it contains transitional rules that no longer apply. When the Commission enacted rules concerning the use of non-federal funds in 2002, the Commission also promulgated § 300.12, which outlined how and by what date national committees of political parties were to disburse non-federal funds received before November 6, 2002. Prohibited and Excessive Contributions: Non-Federal Funds or Soft Money, 67 FR 49064, 49091–92 (July 29, 2002); *see also* Bipartisan Campaign Reform Act, Public Law 107–155, sec. 402, 116 Stat. 81, 112–13 (2002). Since the deadline for the disbursement of these funds has long passed, this section is no longer necessary. Therefore, the Commission is removing and reserving this section. The Commission is also making conforming amendments by removing from § 300.1 two references to § 300.12.

G. Correction to 11 CFR 300.13

For the reasons discussed above regarding the removal of § 300.12, the Commission is also removing paragraphs (b) and (c) of § 300.13. Paragraph (b) directs national party committees to file termination reports disclosing the disposition of funds in non-federal accounts and building fund accounts by January 31, 2003. Paragraph (c) refers to reporting requirements for receipts and disbursements from national party committee non-federal accounts and building fund accounts for activity occurring between November 6 and December 31, 2002.

List of Subjects

11 CFR Part 4

Freedom of information.

11 CFR Part 5

Archives and records.

11 CFR Part 100

Elections.

11 CFR Part 110

Campaign funds, Political committees and parties.

11 CFR Part 112

Administrative practice and procedure, Elections.

11 CFR Part 113

Campaign funds, Political candidates.

11 CFR Part 300

Campaign funds, Nonprofit organizations, Political committees and parties, Political candidates.

For the reasons set out in the preamble, the Federal Election Commission amends 11 CFR chapter I as follows:

PART 4—PUBLIC RECORDS AND THE FREEDOM OF INFORMATION ACT

■ 1. The authority citation for part 4 continues to read as follows:

Authority: 5 U.S.C. 552, as amended.

§ 4.1 [Amended]

■ 2. Amend paragraph (f) of § 4.1 to remove ''Public Disclosure Division'' and add, in its place, ''Public Disclosure and Media Relations Division''.

PART 5—ACCESS TO PUBLIC DISCLOSURE AND MEDIA RELATIONS DIVISION DOCUMENTS

■ 3. The authority citation for part 5 continues to read as follows:

Authority: 52 U.S.C. 30108(d), 30109(a)(4)(B)(ii), 30111(a); 31 U.S.C. 9701.

■ 4. Revise the heading of part 5 to read as set forth above.

§ 5.1 [Amended]

■ 5. Amend paragraph (f) of § 5.1 to remove ''Public Disclosure Division'' and add, in its place, ''Public Disclosure and Media Relations Division''.

§ 5.4 [Amended]

■ 6. Amend § 5.4 in paragraphs (a) introductory text and (c) by removing ''Public Disclosure Division'' and adding, in its place, ''Public Disclosure and Media Relations Division''.

§ 5.5 [Amended]

■ 7. Amend § 5.5 in paragraphs (a) and (c) by removing ''Public Disclosure Division'' and adding, in its place, ''Public Disclosure and Media Relations Division''.

PART 100—SCOPE AND DEFINITIONS (52 U.S.C. 30101)

■ 8. The authority citation for part 100 continues to read as follows:

Authority: 52 U.S.C. 30101, 30104, 30111(a)(8), and 30114(c).

§ 100.94 [Amended]

■ 9. Amend paragraph (b) of § 100.94 to add a comma after the word ''maintaining''.

§ 100.155 [Amended]

■ 10. Amend paragraph (b) of § 100.155 to add a comma after the word ''creating'' and a comma after the word ''maintaining''.

PART 110—CONTRIBUTION AND EXPENDITURE LIMITATIONS AND PROHIBITIONS

■ 11. The authority citation for part 110 continues to read as follows:

Authority: 52 U.S.C. 30101(8), 30101(9), 30102(c)(2), 30104(i)(3), 30111(a)(8), 30116, 30118, 30120, 30121, 30122, 30123, 30124, and 36 U.S.C. 510.

§ 110.6 [Amended]

■ 12. Amend § 110.6 in paragraphs (c)(2)(i) and (c)(2)(ii)(C) by removing ''calendar year'' and adding, in its place, ''election cycle''.

PART 112—ADVISORY OPINIONS (52 U.S.C. 30108)

■ 13. The authority citation for part 112 continues to read as follows:

Authority: 52 U.S.C. 30108, 30111(a)(8).

§ 112.2 [Amended]

■ 14. Amend paragraph (b) of § 112.2 to remove ''Public Disclosure Division'' and add, in its place, ''Public Disclosure and Media Relations Division''.

PART 113—PERMITTED AND PROHIBITED USES OF CAMPAIGN ACCOUNTS

■ 15. The authority citation for part 113 continues to read as follows:

Authority: 52 U.S.C. 30102(h), 30111(a)(8), 30114, and 30116.

§ 113.2 [Amended]

■ 16. Remove paragraph (f) of § 113.2 and redesignate paragraph (g) as paragraph (f).

PART 300—NON-FEDERAL FUNDS

■ 17. The authority citation for part 300 continues to read as follows:

Authority: 52 U.S.C. 30104(e), 30111(a)(8), 30116(a), 30125, and 30143.

§ 300.1 [Amended]

■ 18. Amend § 300.1 as follows:
■ a. In paragraph (b)(1), remove the last sentence.
■ b. In paragraph (c)(1), remove the phrase ''transition rules as BCRA takes effect,''.

§ 300.12 [Removed and Reserved]

■ 19. Remove and reserve § 300.12.

§ 300.13 [Amended]

■ 20. Amend § 300.13 as follows:
■ a. Remove paragraphs (b) and (c).
■ c. Redesignate paragraph (a) as an undesignated paragraph and remove the paragraph heading.

Dated: December 12, 2016.

On behalf of the Commission.

Matthew S. Petersen,

Chairman, Federal Election Commission.

[FR Doc. 2016–30699 Filed 12–22–16; 8:45 am]

BILLING CODE 6715–01–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 4

[Docket ID OCC–2016–0033]

RIN 1557–AE12

Availability of Information Under the Freedom of Information Act

AGENCY: Office of the Comptroller of the Currency

ACTION: Interim final rule.

SUMMARY: The Office of the Comptroller of the Currency (OCC) is amending its regulations governing the disclosure of information pursuant to requests made under the Freedom of Information Act (FOIA) to reflect changes to the FOIA made by the FOIA Improvement Act of 2016 and the OPEN FOIA Act of 2009 and to make other technical changes that update the OCC's FOIA regulations.

DATES: The interim final rule is effective on December 23, 2016. Comments on the rule must be received by February 21, 2017.

ADDRESSES: You may submit comments to the OCC by any of the methods set forth below. Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments through the Federal eRulemaking Portal or email, if possible. Please use the title ''Availability of Information Under the Freedom of Information Act'' to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal—''Regulations.gov'':* Go to *www.regulations.gov.* Enter ''Docket ID OCC–2016–0033'' in the Search Box and click ''Search.'' Click on ''Comment Now'' to submit public comments.
- Click on the ''Help'' tab on the *Regulations.gov* home page to get information on using *Regulations.gov*, including instructions for submitting public comments.
- *Email: regs.comments@occ.treas.gov.*
- *Mail:* Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, mail stop 9W–11, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street SW., Suite 3E–218, mail stop 9W–11, Washington, DC 20219.
- *Fax:* (571) 465–4326.

Instructions: You must include ''OCC'' as the agency name and ''Docket ID OCC–2016–0033'' in your comment. In general, the OCC will enter all comments received into the docket and publish them on the *Regulations.gov* Web site without change, including any business or personal information that you provide such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this rulemaking action by any of the following methods:

• *Viewing Comments Electronically:* Go to *www.regulations.gov.* Enter ''Docket ID OCC–2016–0033'' in the Search box and click ''Search.'' Click on ''Open Docket Folder'' on the right side of the screen. Comments and supporting materials can be viewed and filtered by clicking on ''View all documents and comments in this docket'' and then using the filtering tools on the left side of the screen.

• Click on the ''Help'' tab on the *Regulations.gov* home page to get information on using *Regulations.gov*. The docket may be viewed after the close of the comment period in the same manner as during the comment period.

• *Viewing Comments Personally:* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Melissa Lisenbee, Attorney, Legislative and Regulatory Activities Division, (202) 649–5490, or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597.

SUPPLEMENTARY INFORMATION:

I. Background

The Freedom of Information Act (FOIA) sets forth the process for obtaining federal agency records, unless the records (or any portion thereof) are protected from disclosure by one of the FOIA's nine exemptions or by one of its three special law enforcement record exclusions.[1] On June 30, 2016, the FOIA Improvement Act of 2016 (the FOIA Improvement Act or the Act) [2] amended the FOIA to, among other changes, require Federal agencies to make certain records electronically available, extend the time available for a requester to appeal an adverse determination, amend the circumstances under which an agency can assess search and duplication fees, establish FOIA dispute resolution procedures, and establish a new standard for the withholding of information pursuant to a FOIA exemption.

Additionally, under section 2222 of the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA),[3] the OCC is required to conduct a review at least once every 10 years to identify any outdated or otherwise unnecessary regulations. The OCC completed the last comprehensive review of its regulations under EGRPRA in 2006 and is concluding the current decennial review. As part of its current EGRPRA review, the OCC issued a notice of proposed rulemaking on March 14, 2016, that included proposed technical amendments to the OCC's part 4 FOIA regulations. The OCC did not receive any specific comments on the proposed FOIA amendments, and those changes will be reflected in this rulemaking to the extent they have not been superseded by the FOIA Improvement Act.[4]

Finally, the OPEN FOIA Act of 2009 (the OPEN FOIA Act),[5] limited Exemption 3, which applies to information specifically exempted by statute. To be exempt under Exemption 3 following the OPEN FOIA Act, information must be exempt pursuant to a statute that requires: (1) That the matters be withheld from the public in such a manner as to leave no discretion on the issue, or establishes particular criteria for withholding or refers to particular types of matters to be withheld and, (2) if enacted after the date of enactment of the OPEN FOIA Act, specifically cites to Exemption 3 of the FOIA. Previously, statutes did not need to specifically cite to Exemption 3 of the FOIA.

II. Description of the Interim Final Rule

Twelve CFR part 4, subpart B, sets forth OCC policies regarding the availability of information under the FOIA and establishes procedures for requesters to follow when seeking information. This interim final rule amends 12 CFR part 4, subpart B, to implement the FOIA Improvement Act and the OPEN FOIA Act and to make technical changes to the regulations as a result of the OCC's EGRPRA review.

Section 4.11 Purpose and Scope

As part of the EGRPRA proposed rule, the OCC proposed to remove § 4.11(b)(4), which stated that the OCC's FOIA rules did not apply to FOIA requests filed with the former Office of Thrift Supervision (OTS) before July 21, 2011, because the OTS's rules would apply to those requests instead. The OCC adopted this provision when it amended part 4 to reflect the transfer of certain powers, authorities, rights, and duties of the OTS to the OCC pursuant to Title III of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).[6] There are no remaining open FOIA requests that had been submitted to the OTS prior to its integration with the OCC. Therefore, § 4.11(b)(4) is no longer necessary and is removed by this interim final rule.

Section 4.12 Information Available Under the FOIA

Pursuant to the Act, the interim final rule amends 12 CFR 4.12 to revise the language about the availability of records in subsection (a), consistent with the FOIA Improvement Act; limit the deliberative process exemption; expand the information segregation provisions; update 12 CFR 4.12(b)(3) to be consistent with the OPEN FOIA Act; and implement proposed clarifications from the EGRPRA review.

Section 4.12(a) currently provides that OCC records are available to the public except for records that the FOIA exempts from disclosure. The FOIA Improvement Act adds new language to the statute that relates to an agency's decision to disclose information that is covered by an exemption. This language provides for the withholding of information pursuant to a FOIA exemption only if an agency ''reasonably foresees that disclosure would harm an interest protected by an exemption'' or if the disclosure is prohibited by law.[7]

These considerations will inform the OCC's future determinations about whether to disclose information covered by an exemption. Accordingly, the interim final rule removes the existing reference to ''exempt records'' in subsection (a) and replaces it with the phrase ''[e]xcept as otherwise provided by the FOIA.'' This language is broad enough to encompass the ''reasonable foreseeability'' and the ''prohibited by law'' language added by the FOIA Improvement Act, and it encompasses the former reference to coverage by an exemption as well. Based on legislative history, in which the sponsors of the Act expressed their intent to preserve the longstanding protections afforded by Exemption 8,[8] the OCC does not

[1] 5 U.S.C. 552 *et seq.*

[2] Public Law 114–185 (2016).

[3] Public Law 104–208, 110 Stat. 3009 (1996).

[4] 81 FR 13608 (March 14, 2016).

[5] Public Law 111–83, 123 Stat. 2142, 2184 (2009).

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 5 U.S.C. 552(a)(8)(A)(i).

[8] The Senate Judiciary Committee report on the FOIA Improvement Act states that:

Extreme care should be taken with respect to disclosure under Exemption 8 which protects matters that are 'contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions.' Currently, financial regulators rely on Exemption 8, and other relevant

Continued

anticipate that the Act or revised § 4.12(a) will alter the application of FOIA Exemption 8, which protects matters that are ''contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions.'' [9]

The interim final rule also amends the deliberative process exemption in § 4.12(b)(5) to reflect the Act's limitations on records created 25 years or more before the date of an information request. Previously, the deliberative process exemption protected all intra-agency and interagency memoranda and letters not routinely available by law to a private party in litigation, including memoranda, reports, and other documents prepared by OCC employees and records of deliberations and discussions at meetings of OCC employees. After the change, the deliberative process provision as amended by the interim final rule will exempt only those memoranda and letters created within 25 years of the date on which they were requested.

Additionally, although the OCC's rules already provide for the separation and provision of nonexempt information, the interim final rule clarifies that, in cases in which full disclosure is not possible, the OCC considers whether partial disclosure of information is possible and takes reasonable steps necessary to segregate and release nonexempt information. This provision is consistent with current OCC practice.

The interim final rule also amends § 4.12(b)(3) to reflect the OPEN FOIA Act provision that requires that statutes enacted after the date of the enactment of the OPEN FOIA Act must specifically cite to Exemption 3 of the FOIA in order to qualify under Exemption 3. The OPEN FOIA Act was enacted on October 28, 2009, so the requirement applies to statutes enacted after that date.

Finally, the interim final rule adopts the changes to § 4.12(a) and (b) that the OCC proposed as part of its EGRPRA review. Previously, § 4.12(b)(10) exempted from disclosure any OTS information similar to that listed in the exemptions in § 4.12(b)(1) to (b)(9) to the extent the information is in the possession of the OCC. For purposes of clarification, we are amending the § 4.12(a) disclosure standard so that it applies to OTS records, in addition to OCC records, and removing the resulting unnecessary exemption in paragraph (b)(10).

Section 4.14 Public Inspection in an Electronic Format

Section 4.14(a) lists the types of information the OCC makes available for public inspection. Consistent with the Act's amendments to 5 U.S.C. 552(a)(2), the interim final rule adds two categories of information to § 4.14(a). New § 4.14(a)(11) specifies that the OCC will make available for public inspection in an electronic format any records, regardless of form or format, that have been released to any person under 5 U.S.C. 552(a)(3) provided that: (1) The OCC determines that, because of the nature of their subject matter, the records are or are likely to become the subject of subsequent requests for substantially the same record; or (2) the records have been requested three or more times.

New § 4.14(a)(12) states that the OCC will provide reference materials or a guide for requesting records or information from the OCC, including an index of all major OCC information systems, a description of major information and record locator systems maintained by the OCC, and a handbook for obtaining various types and categories of public information from the OCC pursuant to FOIA and chapter 35 of title 44.

Finally, the interim final rule makes clarifying and conforming changes to § 4.14, including amending § 4.14(a) and (b) to specify that information will be made available for public inspection in an electronic format to implement section 2 of the Act.

Section 4.15 How To Request Records

Pursuant to the Act, the interim final rule amends § 4.15, which describes the process for requesting OCC records. Specifically, to implement section 2 of the Act, the interim final rule amends § 4.15(c)(4) to specify that if a request for information is denied, the OCC will notify the requester of the right to seek dispute resolution services from the OCC's FOIA Public Liaison or the Office of Government Information Services through the processes described in new § 4.15(h).

Pursuant to the Act's amendments to 5 U.S.C. 552(a)(6)(A)(i), the interim final rule also extends the time available for administrative appeal of a denial to release records from 35 days to 90 days. Under new § 4.15(d), requesters will have 90 days after the date of an initial denial determination to submit a written administrative appeal of denial of a request for records.

Additionally, the interim final rule expands § 4.15(f), which addresses the time limits for FOIA request responses and provides for extensions in certain situations, including a 10-day extension for unusual circumstances.[10] Pursuant to the Act's amendments to 5 U.S.C. 552(a)(6)(A)(i), the interim final rule adds a new § 4.15(f)(4) that provides additional information and alternatives for requesters when the OCC determines that a request will require more than a 10-day extension to process. Under this provision, if unusual circumstances apply to a request for records, and the OCC determines that it cannot respond to the request within the 10-day extension, the OCC will: (1) Notify the requester that the request cannot be processed within the 10-day extension; (2) provide the requester with an opportunity to limit the scope of the request so that it may be processed within the 10-day period or to arrange with the OCC an alternative time frame for processing the request or a modified request; (3) make available the FOIA Public Liaison, who shall assist in the resolution of any disputes between the requester and the OCC; and (4) notify the requester of the right of the requester to seek dispute resolution services from the Office of Government Information Services.

Finally, the interim final rule makes other clarifying and conforming changes to § 4.15, including amending § 4.15(d)(4) to specify that the OCC will provide notification of a denial of an appeal ''in writing,'' rather than ''by mail.'' The OCC expects this change will provide greater flexibility and efficiency

exemptions in Section 552(b), to protect sensitive information received from regulated entities, or prepared in connection with the regulation of such entities, in fulfilling their goals of ensuring safety and soundness of the financial system, compliance with federal consumer financial law, and promoting fair, orderly, and efficient financial markets.

Exemption 8 was intended by Congress, and has been interpreted by the courts, to be very broadly construed to ensure the security of financial institutions and to safeguard the relationship between the banks and their supervising agencies. The D.C. Circuit has gone so far as to state that in Exemption 8 Congress has provided ''absolute protection regardless of the circumstances underlying the regulatory agency's receipt or preparation of examination, operating or condition reports.'' Nothing in this legislation shall be interpreted to compromise the stability of any financial institution or the financial system, disrupt the operation of financial markets or undermine consumer protection efforts due to the release of confidential information about individuals or information that a financial institution may have, or encourage the release of confidential information about individuals. This legislation is not intended to lessen the protection under Exemption 8 created by Congress and traditionally afforded by the courts.

S. Rep. No 114–4 (February 23, 2015).

[10] 12 CFR 4.15(f)(3)(i).

by permitting other forms of communication, such as electronic mail. The interim final rule also amends § 4.15 to provide updated contact information for the Office of Management and Budget's (OMB) request portal, the OCC's Chief FOIA Officer, and the Federal Deposit Insurance Corporation.

Section 4.17 FOIA Request Fees

Section 4.17 provides information for the assessment and payment of FOIA request fees. As stated in § 4.17(b)(1), the OCC generally charges fees to fulfill FOIA requests. However, § 4.17(b)(6) provided that the OCC will not assess search or duplication fees, as applicable, if the OCC did not respond within the time limits set forth in § 4.15(f) and no unusual or exceptional circumstances applied. The FOIA Improvement Act provided additional information about the circumstances in which an agency may charge search or duplication fees if the agency does not meet the time limits provided by the FOIA. Thus, pursuant to the Act, the interim final rule amends § 4.17(b)(6) to update the circumstances in which the OCC is permitted to assess search or duplication fees, even if the OCC does not respond within the § 4.15(f) time limits.

For example, amended § 4.17(b)(6) permits the OCC to assess search or duplication fees if the OCC has determined ''unusual circumstances'' (as defined in § 4.15(f)(3)(i)) apply, has provided timely written notice to the requester, and complies with the extended time limit.[11] The interim final rule also permits the OCC to assess search or duplication fees if the OCC has determined that unusual circumstances apply and more than 5,000 pages are necessary to respond to the request. In such a situation, the OCC must provide a timely written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B) and discuss with the requester via written mail, electronic mail, or telephone (or make not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5 U.S.C. 552(a)(6)(B)(ii). Finally, if a court has determined that exceptional circumstances (as defined in 5 U.S.C. 552(a)(6)(C)) apply to the processing of a request, the OCC may assess search or duplication fees for the length of time provided by the court order.

The interim final rule also updates the payment of fees contact information listed in § 4.17(c).

Section 4.18 How To Track a FOIA Request

The interim final rule makes a technical amendment to § 4.18(b) to provide updated contact information for the OCC's Communications Division that requesters may use to track the progress of their requests.

III. Effective Date/Request for Comment

The OCC is issuing the interim final rule without prior notice and the opportunity for public comment and the 30-day delayed effective date ordinarily prescribed by the Administrative Procedure Act (APA).[12] Pursuant to section 553(b)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an ''agency for good cause finds (and incorporates the finding and a brief statement of the reasons therefor in the rule issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [13] The interim final rule's changes to 12 CFR part 4 are limited to technical changes and those that are necessary to implement the provisions of the FOIA Improvement Act and OPEN FOIA Act. Because the OCC is not exercising discretion with respect to the interim final rule's substantive revisions that implement the Act, the OCC believes the public interest is best served by implementing the interim final rule as soon as possible.

In addition, the OCC believes that providing a notice and comment period prior to issuance of the interim final rule is unnecessary because the OCC does not expect public objection to the regulations being promulgated, as this rule implements the substantive changes specified in the Act and technical, non-substantive updates and clarifications to part 4. Moreover, the OCC expects that the majority of the changes will provide additional services and critical updates that will assist FOIA requesters.

The APA also requires a 30-day delayed effective date, except for (1) substantive rules that grant or recognize an exemption or relieve a restriction; (2) interpretative rules and statements of policy; or (3) as otherwise provided by the agency for good cause.[14] The OCC concludes that, because the rules recognize an exemption, the interim final rule is exempt from the APA's delayed effective date requirement.[15] Additionally, the OCC finds good cause to publish the interim final rule with an immediate effective date for the same reasons set forth above under the discussion of section 553(b)(B) of the APA.

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act (RCDRIA),[16] in determining the effective date and administrative compliance requirements for a new regulation that imposes additional reporting, disclosure, or other requirements on insured depository institutions (IDIs), the OCC must consider any administrative burdens that such regulation would place on depository institutions and the benefits of such regulation. In addition, section 302(b) of the RCDRIA requires any such new regulation to take effect on the first day of a calendar quarter that begins on or after the date on which the regulation is published in final form, with certain exceptions, including for good cause. The OCC has considered the administrative burdens that such regulations would place on institutions and the benefits of such regulations in determining the effective date and compliance requirements. Due to the nature of the rule's changes to the OCC's existing FOIA regulations, the interim final rule does not impose additional reporting, disclosure, or other requirements on IDIs, and section 302 of the RCDRIA therefore does not apply. Therefore, for the same reasons set forth above under the discussion of section 553(b)(B) of the APA, the OCC finds good cause exists under section 302 of RCDRIA to publish the interim final rule with an immediate effective date.

While the OCC believes there is good cause to issue the rule without notice and comment and with an immediate effective date, the OCC is interested in the views of the public and requests comment on all aspects of the interim final rule.

[11] Section 4.15(f)(3)(i) states that the OCC may extend the time limits in unusual circumstances for a maximum of 10 business days. If the OCC extends the time limits, the OCC provides written notice to the person making the request or appeal, containing the reason for the extension and the date on which the OCC expects to make a determination. Unusual circumstances exist when the OCC requires additional time to: Search for and collect the requested records from field facilities or other buildings that are separate from the office processing the request or appeal; search for, collect, and appropriately examine a voluminous amount of requested records; consult with another agency that has a substantial interest in the determination of the request; or allow two or more components of the OCC that have substantial interest in the determination of the request to consult with each other. . . .''

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [17] applies only to rules for which an agency publishes a general notice of proposed rulemaking pursuant to 5 U.S.C. 553(b). As discussed above, consistent with section 553(b)(B) of the APA, the agencies have determined for good cause that general notice and opportunity for public comment is not necessary. Accordingly, the RFA's requirements relating to initial and final regulatory flexibility analysis do not apply.

V. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 [18] states that no agency may conduct or sponsor, nor is the respondent required to respond to, an information collection unless it displays a currently valid OMB control number. Because the interim final rule does not create a new, or revise an existing, collection of information, no information collection request submission needs to be made to the OMB.

VI. OCC Unfunded Mandates Reform Act of 1995 Determination

Consistent with section 202 of the Unfunded Mandates Reform Act of 1995,[19] before promulgating any final rule for which a general notice of proposed rulemaking was published, the OCC prepares an economic analysis of the final rule. As discussed above, the OCC has determined that the publication of a general notice of proposed rulemaking was unnecessary. Accordingly, the OCC has not prepared an economic analysis of the joint interim final rules.

PART 4—ORGANIZATION AND FUNCTIONS, AVAILABILITY AND RELEASE OF INFORMATION, CONTRACTING OUTREACH PROGRAM, POST-EMPLOYMENT RESTRICTIONS FOR SENIOR EXAMINERS

■ 1. The authority citation for part 4 continues to read as follows:

Authority: 5 U.S.C. 301, 552; 12 U.S.C. 1, 93a, 161, 481, 482, 484(a), 1442, 1462a, 1463, 1464, 1817(a), 1818, 1820, 1821, 1831m, 1831p–1, 1831o, 1833e, 1867, 1951 *et seq.,* 2601 *et seq.,* 2801 *et seq.,* 2901 *et seq.,* 3101 *et seq.,* 3401 *et seq.,* 5321, 5412, 5414; 15 U.S.C. 77uu(b), 78q(c)(3); 18 U.S.C. 641, 1905, 1906; 29 U.S.C. 1204; 31 U.S.C. 5318(g)(2), 9701; 42 U.S.C. 3601; 44 U.S.C. 3506, 3510; E.O. 12600 (3 CFR, 1987 Comp., p. 235).

§ 4.11 [Amended]

■ 2. Section 4.11 is amended by removing paragraph (b)(4).

■ 3. Section 4.12 is amended by:

■ a. Revising paragraphs (a), (b)(3), and (b)(5);

■ b. In paragraph (b)(8), adding ''and'' at the end;

■ c. In paragraph (b)(9), removing ''; and'' at the end and adding in its place a period;

■ d. Removing paragraph (b)(10); and

■ e. Revising the first sentence of paragraph (d).

The revisions read as set forth below.

§ 4.12 Information available under the FOIA.

(a) *General.* Except as otherwise provided by the FOIA, OCC and Office of Thrift Supervision (OTS) records are available to the public.

(b) * * *

(3) A record specifically exempted from disclosure by statute (other than 5 U.S.C. 552b), provided that the statute requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; establishes particular criteria for withholding, or refers to particular types of matters to be withheld; and, if enacted after the date of enactment of the OPEN FOIA Act of 2009, specifically cites to 5 U.S.C. 552(b)(3);

* * * * *

(5) An intra-agency or interagency memorandum or letter not routinely available by law to a private party in litigation, including memoranda, reports, and other documents prepared by OCC employees, and records of deliberations and discussions at meetings of OCC employees, provided that the deliberative process privilege shall not apply to records created 25 years or more before the date on which the records were requested;

* * * * *

(d) * * * If the OCC determines that full disclosure of a requested record is not possible, the OCC considers whether partial disclosure of information is possible and takes reasonable steps necessary to segregate and release nonexempt information. * * *

■ 4. Section 4.14 is amended by:

■ a. Revising the section heading and paragraphs (a) and (c); and

■ b. Amending paragraph (b) by removing the phrase ''and copying'', and adding in its place ''in an electronic format''.

The revisions read as set forth below.

§ 4.14 Public inspection in an electronic format.

(a) *Available information.* Subject to the exemptions listed in § 4.12(b), the OCC makes the following information available for public inspection in an electronic format:

(1) Any final order, agreement, or other enforceable document issued in the adjudication of an OCC enforcement case, including a final order published pursuant to 12 U.S.C. 1818(u);

(2) Any final opinion issued in the adjudication of an OCC enforcement case;

(3) Any statement of general policy or interpretation of general applicability not published in the **Federal Register**;

(4) Any administrative staff manual or instruction to staff that may affect a member of the public as such;

(5) A current index identifying the information referred to in paragraphs (a)(1) through (a)(4) of this section issued, adopted, or promulgated after July 4, 1967;

(6) A list of available OCC publications;

(7) A list of forms available from the OCC, and specific forms and instructions; [1]

(8) Any public Community Reinvestment Act performance evaluation;

(9) Any public securities-related filing required under parts 11, 16, 194 or 197 of this chapter;

(10) Any public comment letter regarding a proposed rule;

(11) Any records, regardless of form or format, that have been released to any person under 5 U.S.C. 552(a)(3) provided that:

(i) The OCC determines that, because of the nature of their subject matter, the

[1] Some forms and instructions that national banks and Federal savings associations use are not available from the OCC. The OCC will provide information on where persons may obtain these forms and instructions upon request.

records are or are likely to become the subject of subsequent requests for substantially the same records; or

(ii) The records have been requested three or more times;

(12) Reference materials or a guide for requesting records or information from the OCC, including an index of all major OCC information systems, a description of major information and record locator systems maintained by the OCC, and a handbook for obtaining various types and categories of public information from the OCC pursuant to FOIA and chapter 35 of title 44;

(13) The public file (as defined in 12 CFR 5.9) with respect to a pending application described in part 5 of this chapter; and

(14) Any OTS information similar to that listed in paragraphs (a)(1) through (a)(13) of this section, to the extent this information is in the possession of the OCC.

* * * * *

(c) *Addresses.* The information described in paragraphs (a)(1) through (14) of this section is available from the Chief FOIA Officer, Communications Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219. The information described in paragraph (a)(13) of this section in the case of both national banks and Federal savings associations is available from the Licensing Manager at the appropriate district office at the address listed in § 4.5(a), or in the case of national banks and Federal savings associations supervised by the Large Bank Supervision Department, from the Large Bank Licensing Expert, Licensing Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

■ 5. Section 4.15 is amended by:

■ a. Revising paragraph (b)(1), and revising paragraph (b)(2)(i) introductory text;

■ b. Revising paragraphs (c)(2), (c)(4), and (d)(1) and (4);

■ c. Removing ''Saturday'' in paragraph (f)(1) and adding it its place ''Saturdays'';

■ d. Adding paragraph (f)(4);

■ e. Republishing paragraph (g); and

■ f. Adding paragraph (h).

The additions and revisions read as set forth below.

§ 4.15 How to request records.

* * * * *

(b) * * * (1) *General.* Except as provided in paragraph (b)(2) of this section, a person requesting a record or filing an administrative appeal must submit the request or appeal:

(i) Through the OCC's FOIA Web portal at *https://foia-pal.occ.gov/palMain.aspx;*

(ii) Through the consolidated online request portal maintained by the Office of Management and Budget pursuant to 5 U.S.C. 552(m)(1); or

(iii) Under this section to the Chief FOIA Officer, Communications Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

(2) *Exceptions*—(i) *Records at the Federal Deposit Insurance Corporation.* A person requesting any of the following records, other than blank forms (see § 4.14(a)(7)), must submit the request to the FDIC, Legal Division, FOIA/PA Group, 550–17th Street NW., Washington, DC 20429, or fax to (703) 562–2797:

* * * * *

(c) * * *

(2) *Initial determination.* The Comptroller or the Comptroller's delegate initially determines whether to grant a request for OCC records and notifies the requester, in accordance with the time limits set forth in paragraph (f) of this section, of the determination and the reasons therefore and of the right to seek assistance from the OCC's FOIA Public Liaison.

* * * * *

(4) *If request is denied.* If the OCC denies a request for records, in whole or in part, the OCC will notify the requester in writing. The notification is dated and contains a brief statement of the reasons for the denial, sets forth the name and title or position of the official making the decision, advises the requester of the right to seek dispute resolution services from the OCC's FOIA Public Liaison or the Office of Government Information Services, and advises the requester of the right to appeal to the Comptroller of the Currency in accordance with paragraph (d) of this section.

(d) *Administrative appeal of a denial*—(1) *Procedure.* A requester must submit an administrative appeal of denial of a request for records in writing within 90 days after the date of the initial determination. The appeal must include the circumstances and arguments supporting disclosure of the requested records.

* * * * *

(4) *If appeal is denied.* If the OCC denies an appeal, in whole or in part, the OCC notifies the requester in writing. The notification contains a brief statement of the reasons for the denial, sets forth the name and title or position of the official making the decision, and advises the requester of the right to judicial review of the denial under 5 U.S.C. 552(a)(4)(B).

* * * * *

(f) * * *

(4) *Requests that require more than a 10-day extension to process.* If the OCC determines unusual circumstances apply to a request for records, and the OCC determines it cannot respond to the request within the 10-day extension set forth in paragraph (f)(3)(i) of this section, the OCC will:

(i) Notify the requester that the request cannot be processed within the time limit set forth in paragraph (f)(3)(i) of this section;

(ii) Provide the requester with an opportunity to limit the scope of the request so that it may be processed within that 10-day period or to arrange with the OCC an alternative time frame for processing the request or a modified request;

(iii) Make available the FOIA Public Liaison, who shall assist in the resolution of any disputes between the requester and the OCC; and

(iv) Notify the requester of the right of the requester to seek dispute resolution services from the Office of Government Information Services.

(g) *Date of receipt of request or appeal.* The date of receipt of a request for records or an appeal is the date that Disclosure Services, Communications Division receives a request that satisfies the requirements of paragraph (c)(1) or (d)(1) of this section, except as provided in § 4.17(d).

(h) *Dispute resolution services.* Requesters with concerns about the handling of their FOIA requests may contact the FOIA Public Liaison or the Office of Government Information Services for dispute resolution services.

(1) To apply for dispute resolution assistance from the FOIA Public Liaison, requesters should submit a written request to the FOIA Public Liaison, Communications Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

(2) For dispute resolution services through the Office of Government Services, requesters should contact the Office of Government Services as set forth at 36 CFR 1250.32.

■ 6. Section 4.17 is amended by:

■ a. Revising paragraph (b)(6); and

■ b. Amending paragraph (c)(1) by removing the phrase ''Communications Division'', and adding in its place the phrase ''Financial Management, Accounts Receivable''.

The revisions read as set forth below.

§ 4.17 FOIA request fees.

* * * * *

(b) * * *

(6) *No fee if the time limit passes and the OCC has not responded to the request.* The OCC will not assess search or duplication fees, as applicable, if it fails to respond to a requester's FOIA request within the time limits specified under 5 U.S.C. 552(a)(6) and 12 CFR 4.15(f), except as follows:

(i) *Unusual circumstances*—(A) *General.* If the OCC has determined that unusual circumstances (as defined in 5 U.S.C. 552(a)(6)(B) and § 4.15(f)(3)(i)) apply and the OCC provides timely written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B), the OCC may assess search or duplication fees, as applicable, for an additional 10 days. If the OCC fails to comply with the extended time limit, the OCC will not assess any search or duplication fees, as applicable.

(B) *Voluminous Requests.* Notwithstanding paragraph (b)(6)(i)(A) of this section, if the OCC has determined that unusual circumstances (as defined in 5 U.S.C. 552(a)(6)(B) and § 4.15(f)(3)(i)) apply and more than 5,000 pages are necessary to respond to the request, the OCC may assess search or duplication fees, as appropriate, if the OCC provides a timely written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B) and discusses with the requester via written mail, electronic mail, or telephone (or makes not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5 U.S.C. 552(a)(6)(B)(ii).

(ii) *In exceptional circumstances.* If a court has determined that exceptional circumstances (as defined in 5 U.S.C. 552(a)(6)(C)) apply to the processing of a request, the OCC may assess search or duplication fees, as applicable, for the length of time provided by the court order.

* * * * *

§ 4.18 [Amended]

■ 7. Section 4.18 is amended by:

■ a. In paragraph (a), removing the word ''Department'' and adding in its place the word ''Division'', wherever it appears; and

■ b. In paragraph (b), removing the phrase ''Disclosure Officer'', and adding in its place the phrase ''Chief FOIA Officer''.

BILLING CODE P

SMALL BUSINESS ADMINISTRATION

13 CFR Parts 121 and 125

RIN 3245–AG71

Credit for Lower Tier Small Business Subcontracting

AGENCY: U.S. Small Business Administration.

ACTION: Final rule.

SUMMARY: The U.S. Small Business Administration (SBA) is amending its regulations to implement section 1614 of the National Defense Authorization Act for Fiscal Year 2014 (NDAA 2014). Section 1614 amended the Small Business Act to provide that where a prime contractor has an individual subcontracting plan for a specific prime contract with an executive agency, the prime contractor shall receive credit towards its subcontracting plan goals for awards made to small business concerns at any tier under the contract. The changes authorized by this statute will allow an other than small prime contractor that has an individual subcontracting plan for a contract to receive credit towards its small business subcontracting goals for subcontract awards made to small business concerns at any tier, to the extent reported on the subcontracting plans of its lower tier subcontractors. The final rule also implements the statutory requirements related to the subcontracting plans of all subcontractors that are required to maintain such plans, including the requirement to monitor subcontractors' performance and compliance toward reaching the goals set out in those plans as well as their compliance with subcontracting reporting requirements. SBA is also clarifying that the size standard for a particular subcontract must appear in the solicitation for the subcontract.

DATES: This rule is effective on January 23, 2017.

FOR FURTHER INFORMATION CONTACT: Michael McLaughlin, Office of Policy, Planning and Liaison, 409 Third Street SW., Washington, DC 20416; (202) 205–5353; *michael.mclaughlin@sba.gov.*

SUPPLEMENTARY INFORMATION:

Introduction

The final rule implements Section 1614 of the National Defense Authorization Act for Fiscal Year 2014, Public Law 113–66, December 26, 2013 (hereinafter NDAA 2014). Section 1614 amended section 8(d)(6)(D) of the Small Business Act, 15 U.S.C. 637(d)(6)(d), to provide that where a prime contractor has a subcontracting plan for a specific prime contract with an executive agency, as required by Section 8(d) of the Small Business Act, the prime contractor will receive credit towards its subcontracting plan goals for awards made to small business concerns at any tier under the contract, to the extent reported under the subcontracting plan of a lower tier other than small subcontractor. When a prime contractor awards a subcontract to a firm, it is generally considered a first tier subcontract. That subcontractor may award a subcontract, which would be considered a second tier subcontract, and so on. Currently, with few exceptions, a prime contractor cannot receive credit towards its small business subcontracting plan goals for awards made below the first tier.

SBA is amending its regulations to require other than small business prime contractors to count lower tier small business subcontract awards towards their federal small business subcontracting goals on unrestricted federal contracts, to the extent the lower tier subcontractor are required to report the information. With limited exceptions, unrestricted federal procurements and subcontracts over $700,000 ($1.5 million for construction of any public facility) include Federal Acquisition Regulation (FAR) clause 52.219–9 (Small Business Subcontracting Plan), which requires other than small contractors and their lower tier subcontractors to make a good faith effort to meet or to exceed the small business subcontracting goals established in their respective subcontracting plans. Failure to make this effort could result in liquidated damages, default termination, and negative performance reviews. For a subcontracting plan for a specific prime contract, the contractor or subcontractor is required to submit an Individual Subcontract Report (ISR) and Summary Subcontracting Report (SSR). The ISR is submitted semiannually during contract performance and upon contract completion. The SSR is submitted annually to procuring agencies. Both forms are submitted through the Electronic Subcontracting Reporting System (eSRS). Until this final rule, a large prime contractor could not take credit for a subcontract award to a second-tier small business subcontractor. Lastly, large prime contractors are already required to identify the size standard that applies to a subcontract. 13 CFR 121.410, 121.411, 125.3(c)(1)(v). Subcontractor size representation is reviewed during compliance reviews (See 13 CFR 125.3(f)(2)(i)) and size representations at

the subcontract level may be protested (See 13 CFR 121.411). In addition, Section 868 of the National Defense Authorization Act of 2016, Public Law 114–92 (November 25, 2015), requires SBA, as part of the its scorecard on agency small business prime contracting and subcontracting performance, to compare ''The number of small business concerns, small business concerns owned and controlled by service-disabled veterans, qualified HUBZone small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals, and small business concerns owned and controlled by women awarded subcontracts in each North American Industry Classification System code during the fiscal year and a comparison to the number of awarded subcontracts during the prior fiscal year, if available.''

SBA published a proposed rule regarding these changes in the **Federal Register** on October 6, 2015. 80 FR 60300 (October 6, 2015). SBA received a total of 13 comments. Two of these comments were generally positive without offering any comments on specific provisions. SBA received three comments that were generally opposed to the rule without offering comment on specific provisions. These three commenters generally felt that the statute and the regulations were likely to hurt small business subcontractors rather than help them, and would likely result in large prime contractors attempting to exert more control over their subcontractors. SBA received one comment that was not relevant; this comment made no mention of the proposed regulation.

Two commenters did not think that SBA's regulatory impact analysis took into consideration the extra burden that large businesses would have under these changes. The commenters claimed that the costs and challenges of collecting the data are more than minimal, and that large businesses will incur more than minimal costs. Neither commenter provided data or analysis on what those costs would be, just a general statement that they would be more than minimal. SBA addressed this issue in its proposed rule. Any costs associated with the regulatory implementation of these provisions of the NDAA 2014 will be included in the proposed Federal Acquisition Regulation (FAR) changes. Thus, any Paperwork Reduction Act (PRA) costs associated with proposed rulemaking and implementation will occur during the FAR rulemaking process.

SBA received one comment seeking clarification that this rule and credit for lower tier subcontracting does not affect Agencies' prime contract goaling numbers. This rule only applies to subcontracting plans, not to agency prime contract goaling requirements. Generally, agencies do not count subcontracting dollars awarded to small business concerns towards their prime contract goaling requirements, except for the Department of Energy. This rule does not change reporting under the SSR, which is how agencies receive credit for subcontracting. Firms will continue to report only their first-tier subcontracts on the SSR.

SBA received one comment regarding enforcement of these regulations prior to FAR regulatory implementation and updates to eSRS. As noted in the proposed rule, it is SBA's position that this regulation will require changes to FAR prior to full implementation in eSRS.

Summary of Proposed Rule, Comments, and SBA's Responses

Part 121

SBA proposed amending § 121.411(b) allowing prime contractors to accept a subcontractor's size certification electronically. The list of enumerated methods is illustrative only, and is not exhaustive. SBA received several comments on this issue, and all believed the proposed change was positive, but that more clarity was needed about who may accept the certifications, and whether this applied to socioeconomic certifications. Thus, SBA is adopting the language as proposed, with minor additions for clarity. The final rule now makes clear that prime and subcontractors may rely on any form of electronic certification that they deem appropriate provided it is given in connection with an offer for specific subcontract and it includes the language in SBA's regulation which provides that in order to accept an electronic representation, the representation must be in connection with an offer for a subcontract and the solicitation and subcontract provides that the subcontractor verifies by submission of the offer that the size and socioeconomic representations and certifications are current accurate and complete as of the date of offer for the subcontract. See 13 CFR 121.411(b), 125.3(c)(1)(v).

Part 125

In proposed § 125.3(a)(1), SBA included the new statutory definition for a subcontract that was enacted by NDAA 2014. SBA received one comment that requested more specificity with regard to what will be considered a subcontract. Specifically, this commenter wanted lists of what would and would not be considered a subcontract, based in part on FAR definitions. The proposed definition is taken from the statute, which was added by NDAA 2014, and SBA is adopting the statutory definition in the final rule. See 15 U.S.C. 632(dd)(1).

In proposed § 125.3(a)(1)(i)(C), SBA provided guidance on when a prime contractor may receive credit for lower tier subcontracting. Specifically, the proposed rule stated that only individual subcontracting plans were entitled to receive the credit. SBA has revised this section based on the comments. Specifically, the final rule clearly states how commercial and individual plans differ, and what the prime contractor's and subcontractor's responsibilities and requirements are for individual subcontracting plans as required by the Small Business Act. SBA received several comments asking for clarification, and several comments asking SBA to also apply the new guidelines to commercial subcontracting plans. SBA addressed this issue in its proposed rule, ''Section 1614 applies only when determining whether or not a prime contractor has met its individual subcontracting plan goals. Thus, Section 1614 does not apply where the prime contractor has a commercial plan or comprehensive subcontracting plan.'' 80 FR 60300, 60301 (October 6, 2015). The Small Business Act specifically states that the prime contractor shall receive lower tier credit ''if the subcontracting goals pertain to a single contract with the executive agency.'' 15 U.S.C. 637(d)(16)(A)(i). A commercial plan, like a comprehensive subcontracting plan, applies to more than one government contract, and thus the lower tier credit provisions do not apply to those types of plans.

SBA received two comments on the issue of double counting and the incorporation of subcontracting plans from lower tier, other than small subcontractors. One commenter suggested that SBA amend the language of the regulation and add examples to provide clarity. One commenter requested that SBA remove the requirement that other than small subcontractors are required to have their own subcontracting plan, if their plan is incorporated into the prime contractor's plan. The requirement that subcontractors have their own plan is an independent statutory requirement that must be met. SBA has crafted the final rule to make it clear that incorporation

of lower tier goals does not change the requirements of the lower tier subcontractors to have its own subcontracting plans, meet their goals, and report on its first tier performance. Further, the prime contractor will continue to report on performance at the first tier level. The prime contractor's performance towards its lower tier small business subcontracting goals will be based on the reports of its other than small lower tier subcontractors with subcontracting plans to the extent that the lower tier subcontractor are required to report. The prime contractor remains responsible for ensuring accurate reporting to the government.

SBA received two comments on proposed § 125.3(c)(1)(i), which proposed to require that in order for a prime contractor to receive credit for awards made at lower tiers, the prime contractor would be required to have a complete subcontracting plan, including incorporation of its subcontractor's goals, prior to award. The Small Business Act requires that subcontracting plans be submitted, negotiated, and approved before contract award. 15 U.S.C. 637(d)(4)(B) and (C). The commenters contend that having all of the necessary steps done and completed prior to award, including the incorporation of lower tier subcontractor's plans, is not practicable on all contracts. The commenters state that often the prime will not be aware of which companies their subcontractors may be utilizing. The Small Business Act provides that prime contractors ''shall'' receive credit for subcontractors at any tier pursuant to a subcontracting plan required by section 15 U.S.C. 637(d)(6)(D), which is the statutory requirement to require other than small subcontractors to have subcontracting plans if the subcontract exceeds certain threshold amounts. 15 U.S.C. 637(d)(16)(A)(i). Thus, the prime contractor with an individual subcontracting plan will be obligated to consider and establish goals based on the subcontracting plans of its other than small subcontractors prior to award of the contract.

SBA proposed to amend § 125.3(c)(1)(v) to clarify which NAICS should apply to a subcontract and how primes should inform potential subcontractors which NAICS and corresponding size standard will be applied. SBA's regulations currently require that the prime contractor (or subcontractor that is subcontracting to another concern) must assign a NAICS code to the subcontract that best describes the work being performed or the product being purchased by that subcontract. The contractor may not simply pass down the NAICS assigned to the prime contract to all subcontracts. SBA received five negative comments on this requirement, and one comment that believed it would be in conflict with the FAR. However, this is not a new requirement. SBA's current regulations require that each subcontract have a NAICS assigned that describes the work being performed under the subcontract, with the corresponding size standard. While not a new requirement, SBA believes it is important to reiterate why this requirement is necessary to accurately reflect small business participation in subcontracting. Utilizing the prime contract's NAICS for subcontracts may not always accurately describe the work being done under that subcontract. SBA does not have a one-size-fits-all definition of what a small business is, because whether a firm is small depends largely on what type of work it performs, or what type of product it supplies. Utilizing one NAICS code for all subcontracts would distort the calculation of small business subcontracting performance.

Several comments requested clarification on whether, based on the wording of this rule, all subcontracts would require a solicitation. That was not the intention of the regulation, and SBA has added a sentence to the regulation to make this clear. However, it should also be clear that the prime contractor (or lower tier subcontractor that is subcontracting) assigning the NAICS to the subcontract is responsible for providing notice of the size standard to prospective subcontractors prior to acceptance and formation of a subcontract. This is necessary to ensure that small businesses can accurately certify to their size status. SBA also added parentheticals to make clear that this applies to prime contractors and subcontractors.

SBA proposed to add § 125.3(c)(1)(x) to implement 15 U.S.C. 637(d)(6)(D) of the Small Business Act, requiring prime contractors and subcontractors with subcontracting plans to do various tasks in connection with their subcontractors with subcontracting plans. SBA received one negative comment stating the requirements were too burdensome and one comment requesting clarification concerning whether these requirements pertain to commercial subcontracting plans. SBA also received a comment requesting that the requirements of this paragraph and paragraph (xi) be required only if the prime contractor incorporates its subcontractors' subcontracting plans. The requirements articulated in the proposed rule are required by statute for all subcontracting plans, and thus we are adopting the language as proposed in the final rule. Subcontractors of primes with commercial plans do not have to have subcontracting plans if the subcontract is for a commercial item. Consequently, the requirements of § 125.3(c)(1)(x) apply to a prime with a commercial plan to the extent its subcontractors have their own individual subcontracting plans, not commercial plans

SBA received one comment stating that the dollar value thresholds in SBA's rule are different than the recently updated FAR thresholds. The revised inflation adjusted subcontracting plan thresholds became effective after SBA issued the proposed rule, and SBA has updated the thresholds in this final rule.

SBA proposed to add § 125.3(c)(1)(xi) in order to incorporate new requirements from the statute concerning the records the prime contractor must maintain to demonstrate subcontractors at all tiers comply with the subcontracting plan requirements. Two commenters noted confusion as to what was meant by the phrase ''recite the types of records the prime will maintain.'' SBA is changing language to make clear that a written statement is required.

Finally, with respect to liquidated damages, the Small Business Act provides that each contract subject to the requirements for a subcontracting plan shall contain a clause for the payment of liquidated damages upon a finding that a prime contractor has failed to make a good faith effort to comply with the requirements imposed on such subcontractor by section 8(d)(4)(F) of the Small Business Act, 15 U.S.C. 637(d)(4)(F). Thus, a prime contractor could be subject to liquidated damages if it fails to make a good faith effort to review and approve subcontracting plans submitted by its subcontractors; monitor subcontractor compliance with its approved subcontracting plans; ensure that subcontracting reports are submitted by its subcontractors when required; acknowledge receipt of its subcontractors' reports; compare the performance of its subcontractors to subcontracting plans and goals; and discuss performance with subcontractors when necessary to ensure its subcontractors make a good faith effort to comply with their subcontracting plans.

Compliance With Executive Orders 12866, 13563, 12988, and 13132, the Paperwork Reduction Act (44 U.S.C. Ch. 35), and the Regulatory Flexibility Act (5 U.S.C. 601–612)

Executive Order 12866

The Office of Management and Budget (OMB) has determined that this final rule is a significant regulatory action for the purposes of Executive Order 12866. Accordingly, the next section contains SBA's Regulatory Impact Analysis. This is not a major rule, however, under the Congressional Review Act.

Regulatory Impact Analysis

1. Is there a need for the regulatory action?

The final regulations implement section 1614 of the National Defense Authorization Act for Fiscal Year 2014. Section 1614(c)(3) requires the Administrator to promulgate regulations necessary to implement the Act.

2. What are the potential benefits and costs of this regulatory action?

The benefits of the final regulations are minimal and the final costs cannot be determined until the FAR rules are proposed. Other than small business prime contractors and subcontractors already establish individual subcontracting plan goals and report on their achievements if the subcontracting plan thresholds are met. Under section 1614 of the NDAA 2014, a prime contractor with an individual subcontracting plan will receive credit towards its goals for small business performance at lower tiers. Thus, there will be some costs to the prime contractor to propose subcontracting plan goals that incorporate small business performance at lower tiers and to ensure that their subcontractors have plans and submit required reports, and there will also be costs to the Government to evaluate whether the prime contractor's goals adequately address maximum practicable small business subcontracting opportunity at all tiers. SBA estimates that there were approximately 34,000 individual subcontracting plans in fiscal year 2015, and that approximately 24,000 were at the prime contract level. Other than small firms may have multiple individual subcontracting plans at the prime and sub level, so the number of other than small firms affected by this rule will be less than the number of individual subcontracting plans, but we cannot say with any precision how many will be impacted. There may also be costs to the Government as eSRS may have to be modified to allow other than small prime contractors to receive small business credit at any tier towards their subcontracting plan goals. However, SBA is not able to estimate these costs because the system will be modified when this rule is implemented into the FAR and the process for capturing the lower tier reports is further defined. There should not be any costs imposed on small business concerns as this rule does not change any reporting or recordkeeping requirements for small business concerns.

3. What are the alternatives to this final rule?

Many of the final regulations are required to implement specific statutory provisions which require promulgation of implementing regulations. There are no other alternatives that would meet the statutory requirements.

Executive Order 13563

As part of its ongoing efforts to engage stakeholders in the development of its regulations, SBA has solicited comments and suggestions from the public and the procuring agencies on how to best implement section 1614 of NDAA 2014. For example, SBA received comments from the American Bar Association Section of Public Contract Law, the Associated General Contractors of America, the Council of Defense and Space Industry Associations, the U.S. Women's Chamber of Commerce, and Women Impacting Public Policy (WIPP).

SBA has incorporated those comments and suggestions to the extent feasible. SBA has considered the comments received in response to the proposed rule and incorporated public input into the final rule to the extent feasible.

Executive Order 12988

For purposes of Executive Order 12988, SBA has drafted this final rule, to the extent practicable, in accordance with the standards set forth in section 3(a) and 3(b)(2) of Executive Order 12988, to minimize litigation, eliminate ambiguity, and reduce burden. This rule has no preemptive or retroactive effect.

Executive Order 13132

For the purpose of Executive Order 13132, SBA has determined that this final rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various layers of government. Therefore, SBA has determined that this final rule has no federalism implications warranting preparation of a federalism assessment.

Paperwork Reduction Act, 44 U.S.C. Ch. 35

For purposes of the Paperwork Reduction Act (PRA), SBA has determined that this final rule, if adopted in final form, would not impose new government-wide reporting and recordkeeping requirements on other than small prime contractors and subcontractors. If any information collection procedures change or are amended during the subsequent FAR rulemaking of this SBA rule, they will be addressed in the FAR rulemaking process.

Regulatory Flexibility Act, 5 U.S.C. 601–612

According to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601, when an agency issues a rulemaking, it must prepare a regulatory flexibility analysis to address the impact of the rule on small entities. However, section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities. The RFA defines ''small entity'' to include ''small businesses,'' ''small organizations,'' and ''small governmental jurisdictions.'' This final rule concerns various aspects of SBA's contracting programs. As such, the rule relates to small business concerns, but would not affect ''small organizations'' or ''small governmental jurisdictions'' because those programs generally apply only to ''business concerns'' as defined by SBA regulations, in other words, to small businesses organized for profit. ''Small organizations'' or ''small governmental jurisdictions'' are non-profits or governmental entities and do not generally qualify as ''business concerns'' within the meaning of SBA's regulations.

This rule will impact other than small business concerns, as small business concerns are not required to have subcontracting plans. Other portions of the rule simply clarify existing regulations, and do not impose new requirements on small business concerns. As discussed previously, SBA's rules currently require firms to certify their size and socioeconomic status in connection with subcontracts. This rule simply clarifies that the requirement to certify applies to the solicitation for the subcontract. In sum, the final rule will not have a disparate impact on small businesses or impose any additional costs on small business concerns. For the reasons discussed, SBA certifies that this final rule will not have a significant economic impact on

a substantial number of small business concerns.

List of Subjects

13 CFR Part 121

Government contracts, Government procurement, Small businesses, Size standards.

13 CFR Part 125

Government contracts, Government procurement, Reporting and recordkeeping requirements, Small businesses, Small business subcontracting.

For the reasons stated in the preamble, SBA amends 13 CFR parts 121 and 125 as follows:

PART 121—SMALL BUSINESS SIZE REGULATIONS

■ 1. The authority citation for part 121 continues to read as follows:

Authority: 15 U.S.C. 632, 634(b)(6), 662, and 694a(9).

■ 2. Amend § 121.411 by removing the second sentence in paragraph (b) and adding two sentences in its place to read as follows:

§ 121.411 What are the size procedures for SBA's Section 8(d) Subcontracting Program?

* * * * *

(b) * * * Prime contractors (or subcontractors) may accept paper self-certifications as to size and socioeconomic status or a subcontractor's electronic self-certification as to size or socioeconomic status, if the solicitation for the subcontract contains a clause which provides that the subcontractor verifies by submission of the offer that the size or socioeconomic representations and certifications are accurate and complete. Electronic submission may include any method acceptable to the prime contractor (or subcontractor) including, but not limited to, size representations and certifications made in SAM (or any successor system) and electronic conveyance of subcontractor certifications in prime contractor systems in connection with an offer for a subcontract. * * *

* * * * *

PART 125—GOVERNMENT CONTRACTING PROGRAMS

■ 3. The authority citation for part 125 continues to read as follows:

Authority: 15 U.S.C. 632(p), (q); 634(b)(6), 637, 644, 657f, and 657q.

■ 4. Amend § 125.3 as follows:

■ a. Revise paragraph (a)(1) introductory text;

■ b. Add paragraph (a)(1)(i)(C);

■ c. Add paragraph (a)(1)(i)(D);

■ d. Revise the heading for paragraph (c);

■ e. Amend paragraph (c)(1) by removing ''$650,000'' and adding in its place ''$700,000'';

■ f. Revise the first sentence of paragraph (c)(1)(i);

■ g. Revise paragraph (c)(1)(v);

■ h. Remove the word ''and'' at the end of paragraph (c)(1)(viii);

■ i. Remove the period at the end of paragraph (c)(1)(ix) and add in its place a semi-colon and the word ''and''; and

■ j. Add new paragraphs (c)5(1)(x) and (xi).

The additions and revisions read as follows:

§ 125.3 What types of subcontracting assistance are available to small businesses?

(a) * * *

(1) Subcontract under this section means a legally binding agreement between a contractor that is already under contract to another party to perform work and a third party (other than one involving an employer-employee relationship), hereinafter referred to as the subcontractor, for the subcontractor to perform a part or all of the work that the contractor has undertaken.

(i) * * *

(C) Where the prime contractor has an individual subcontracting plan, the prime contractor shall establish two sets of small business subcontracting goals, one goal for the first tier and one goal for lower tier subcontracts awarded by other than small subcontractors with individual subcontracting plans. Under individual subcontracting plans the prime contractor shall receive credit for small business concerns performing as first tier subcontractors (first tier goal) and subcontractors at any tier pursuant to the subcontracting plans required under paragraph (c) of this section in an amount equal to the dollar value of work awarded to such small business concerns (lower tier goal). Other-than-small, lower tier subcontractors must have their own individual subcontracting plans if the subcontract is at or above the subcontracting plan threshold, and are required to make a good faith effort to meet their subcontracting plan goals. The prime contractor and any subcontractor with a subcontracting plan are responsible for reporting on subcontracting performance under their contracts or subcontracts at their first tier. The prime contractor's performance under its individual subcontracting plan will be calculated using its own reporting at the first tier for its first tier goal and its subcontractors' first tier reports under their plans for the lower tier subcontracting goals. The prime contractor's performance under the individual subcontracting plan must be evaluated based on its combined performance under the first tier and lower tier goal.

(D) Other-than-small prime contractors and subcontractors with subcontracting plans shall report on their subcontracting performance on the Summary Subcontracting report (SSR) at their first tier only.

* * * * *

(c) *Additional responsibilities of other than small contractors.* * * *

(1) * * *

(i) Submitting and negotiating before award an acceptable subcontracting plan that reflects maximum practicable opportunities for small businesses in the performance of the contract as subcontractors or suppliers at all tiers of performance. * * *

* * * * *

(v) The contractor must assign to each subcontract, and to each solicitation, if a solicitation is utilized, the NAICS code and corresponding size standard that best describes the principal purpose of the subcontract (see § 121.410 of this chapter). A formal solicitation is not required for each subcontract, but the contractor must provide some form of written notice of the NAICS code and size standard assigned to potential offerors prior to acceptance and award of the subcontract. The prime contractor (or subcontractor) may rely on a subcontractor's electronic representations and certifications, if the solicitation for the subcontract contains a clause which provides that the subcontractor verifies by submission of the offer that the size or socioeconomic representations and certifications are current, accurate and complete as of the date of the offer for the subcontract. Electronic submission may include any method acceptable to the prime contractor (or subcontractor) including, but not limited to, size or socioeconomic representations and certifications made in SAM (or any successor system). A prime contractor (or subcontractor) may not require the use of SAM (or any successor system) for purposes of representing size or socioeconomic status in connection with a subcontract;

* * * * *

(x) Except when subcontracting for commercial items, the prime contractor must require all subcontractors (except small business concerns) who receive subcontracts in excess of $1,500,000 in

the case of a subcontract for the construction of any public facility, or in excess of $700,000 in the case of all other subcontracts, and which offer further subcontracting possibilities, to adopt a subcontracting plan of their own consistent with this section, and must ensure at a minimum that all subcontractors required to maintain subcontracting plans pursuant to this paragraph will review and approve subcontracting plans submitted by their subcontractors; monitor their subcontractors' compliance with their approved subcontracting plans; ensure that subcontracting reports are submitted by their subcontractors when required; acknowledge receipt of their subcontractors' reports; compare the performance of their subcontractors to their subcontracting plans and goals; and discuss performance with their subcontractors when necessary to ensure their subcontractors make a good-faith effort to comply with their subcontracting plans; and

(xi) The prime contractor must provide a written statement of the types of records it will maintain to demonstrate procedures which have been adopted to ensure subcontractors at all tiers comply with the requirements and goals set forth in the subcontracting plan established in accordance with paragraph (c)(1)(x) of this section, including the establishment of source lists of small business concerns, small business concerns owned and controlled by veterans, small business concerns owned and controlled by service-disabled veterans, qualified HUBZone small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals, and small business concerns owned and controlled by women; the efforts to identify and award subcontracts to such small business concerns; and size or socioeconomic certifications or representations received in connection with each subcontract.

Dated: December 14, 2016.

Maria Contreras-Sweet,

Administrator.

[FR Doc. 2016–30874 Filed 12–22–16; 8:45 am]

BILLING CODE 8025–01–P

SECURITES AND EXCHANGE COMMISSION

17 CFR Part 242

[Release No. 34–79237A]

RIN 3235–AL99

Consolidated Audit Trail

ACTION: Notification regarding expired temporary rule.

SUMMARY: The Commission is providing notice regarding temporary Rule 608T under the Securities Exchange Act of 1934. The Commission designated 12:01 a.m. on November 16, 2016, as the expiration time for Rule 608T, because after that time the rule would no longer be necessary.

DATES: December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Rebekah Liu, Special Counsel, at (202) 551–5665; Jennifer Colihan, Special Counsel, at (202) 551–5642; Leigh Duffy, Special Counsel, at (202) 551–5928; John Lee, Special Counsel, at (202) 551–5689; or Ted Uliassi, Special Counsel, at (202) 551–6905, or Division of Trading and Markets, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–7010.

SUPPLEMENTARY INFORMATION: On November 3, 2016, the Securities and Exchange Commission adopted a temporary rule, Rule 608T, under the Securities Exchange Act of 1934 to extend to November 15, 2016, the date by which the Commission was required to act on the proposed National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan''). Rule 608T solely governed the timeframe for action on the proposed CAT NMS Plan. The Commission adopted the temporary rule as an interim final temporary rule in light of the impending November 10, 2016 date designated by the Commission under Rule 608 as the date by which the Commission would take action on the proposed CAT NMS Plan. The Commission designated 12:01 a.m. on November 16, 2016, as the expiration time for Rule 608T because after that time the temporary rule would no longer be necessary.

On November 3, 2016, the Commission published the temporary rule on its Web site. Due to a subsequent clerical error, the temporary rule was not published in the **Federal Register**. On November 8, 2016, the Commission provided public notice of its scheduled open meeting to consider the CAT NMS Plan, posting the notice on its Web site, and on November 15, 2016, the Commission approved the CAT NMS Plan at its open meeting. The expiration time of 12:01 a.m. on November 16, 2016 for the temporary rule has now passed.

Dated: December 19, 2016.

Brent J. Fields,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 882

[Docket No. FDA–2016–N–4165]

Medical Devices; Neurological Devices; Classification of the Neurovascular Mechanical Thrombectomy Device for Acute Ischemic Stroke Treatment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the neurovascular mechanical thrombectomy device for acute ischemic stroke treatment into class II (special controls). The special controls that will apply to the device are identified in this order and will be part of the codified language for the neurovascular mechanical thrombectomy device for acute ischemic stroke treatment's classification. The Agency is classifying the device into class II (special controls) in order to provide a reasonable assurance of safety and effectiveness of the device.

DATES: This order is effective December 23, 2016. The classification was applicable on September 2, 2016.

FOR FURTHER INFORMATION CONTACT: Leigh Anderson, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2656, Silver Spring, MD 20993–0002, 301–796–5613, *leigh.anderson@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 513(f)(1) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360c(f)(1)), devices that were not in commercial distribution before May 28, 1976 (the date of enactment of the Medical Device Amendments of 1976), generally referred to as postamendments devices, are classified automatically by statute into class III without any FDA

rulemaking process. These devices remain in class III and require premarket approval unless and until the device is classified or reclassified into class I or II, or FDA issues an order finding the device to be substantially equivalent, in accordance with section 513(i) of the FD&C Act, to a predicate device that does not require premarket approval. The Agency determines whether new devices are substantially equivalent to predicate devices by means of premarket notification procedures in section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807) of the regulations.

Section 513(f)(2) of the FD&C Act, as amended by section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144), provides two procedures by which a person may request FDA to classify a device under the criteria set forth in section 513(a)(1). Under the first procedure, the person submits a premarket notification under section 510(k) of the FD&C Act for a device that has not previously been classified and, within 30 days of receiving an order classifying the device into class III under section 513(f)(1) of the FD&C Act, the person requests a classification under section 513(f)(2). Under the second procedure, rather than first submitting a premarket notification under section 510(k) of the FD&C Act and then a request for classification under the first procedure, the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence and requests a classification under section 513(f)(2) of the FD&C Act. If the person submits a request to classify the device under this second procedure, FDA may decline to undertake the classification request if FDA identifies a legally marketed device that could provide a reasonable basis for review of substantial equivalence with the device or if FDA determines that the device submitted is not of ''low-moderate risk'' or that general controls would be inadequate to control the risks and special controls to mitigate the risks cannot be developed.

In response to a request to classify a device under either procedure provided by section 513(f)(2) of the FD&C Act, FDA shall classify the device by written order within 120 days. This classification will be the initial classification of the device.

On October 26, 2015, Concentric Medical, Inc., submitted a request for classification of the Trevo ProVue and XP ProVue Retrievers (Trevo Retrievers) under section 513(f)(2) of the FD&C Act.

In accordance with section 513(f)(2) of the FD&C Act, FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1). FDA classifies devices into class II if general controls by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide reasonable assurance of the safety and effectiveness of the device for its intended use. After review of the information submitted in the request, FDA determined that the device can be classified into class II with the establishment of special controls. FDA believes these special controls, in addition to general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on September 2, 2016, FDA issued an order to the requestor classifying the device into class II. FDA is codifying the classification of the device by adding 21 CFR 882.5600.

Following the effective date of this final classification order, any firm submitting a premarket notification (510(k)) for a neurovascular mechanical thrombectomy device for acute ischemic stroke treatment will need to comply with the special controls named in this final order.

The device is assigned the generic name neurovascular mechanical thrombectomy device for acute ischemic stroke treatment, and it is identified as a prescription device used in the treatment of acute ischemic stroke to improve clinical outcomes. The device is delivered into the neurovasculature with an endovascular approach, mechanically removes thrombus from the body, and restores blood flow in the neurovasculature.

FDA has identified the following risks to health associated specifically with this type of device, as well as the measures required to mitigate these risks in table 1.

TABLE 1—NEUROVASCULAR MECHANICAL THROMBECTOMY DEVICE FOR ACUTE ISCHEMIC STROKE TREATMENT RISKS AND MITIGATION MEASURES

Identified risk	Mitigation measure
Adverse Tissue Reaction	Biocompatibility Evaluation.
Infection	Sterility Testing, Shelf-Life Testing, Labeling.
Tissue or Vessel Damage:	
• Dissection	Non-clinical Performance Testing.
• Perforation	Clinical Performance Testing.
• Hemorrhage	Labeling.
Stroke Progression	Non-clinical Performance Testing, Clinical Performance Testing, Labeling.
Emboli	Non-clinical Performance Testing, Clinical Performance Testing, Labeling.

FDA believes that the special controls, in combination with the general controls, address these risks to health and provide reasonable assurance of the safety and effectiveness.

Neurovascular mechanical thrombectomy device for acute ischemic stroke treatment devices are not safe for use except under the supervision of a practitioner licensed by law to direct the use of the device. As such, the device is a prescription device and must satisfy prescription labeling requirements (see 21 CFR 801.109 *Prescription devices*).

Section 510(m) of the FD&C Act provides that FDA may exempt a class II device from the premarket notification requirements under section 510(k) if FDA determines that premarket notification is not necessary to provide reasonable assurance of the safety and effectiveness of the device. For this type of device, FDA has determined that premarket notification is necessary to provide reasonable assurance of the safety and effectiveness of the device. Therefore, this device type is not exempt from premarket notification requirements. Persons who intend to market this type of device must submit to FDA a premarket notification, prior to marketing the device, which contains information about the neurovascular mechanical thrombectomy device for acute ischemic stroke treatment they intend to market.

II. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

III. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 807, subpart E, regarding premarket notification submissions, have been approved under OMB control number 0910–0120, and the collections of information in 21 CFR part 801, regarding labeling, have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 882

Medical devices, Neurological devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 882 is amended as follows:

PART 882—NEUROLOGICAL DEVICES

■ 1. The authority citation for part 882 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Add § 882.5600 to subpart F to read as follows:

§ 882.5600 Neurovascular mechanical thrombectomy device for acute ischemic stroke treatment.

(a) *Identification.* A neurovascular mechanical thrombectomy device for acute ischemic stroke treatment is a prescription device used in the treatment of acute ischemic stroke to improve clinical outcomes. The device is delivered into the neurovasculature with an endovascular approach, mechanically removes thrombus from the body, and restores blood flow in the neurovasculature.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) The patient contacting components of the device must be demonstrated to be biocompatible.

(2) Non-clinical performance testing must demonstrate that the device performs as intended under anticipated conditions of use, including:

(i) Mechanical testing to demonstrate the device can withstand anticipated tensile, torsional, and compressive forces.

(ii) Mechanical testing to evaluate the radial forces exerted by the device.

(iii) Non-clinical testing to verify the dimensions of the device.

(iv) Non-clinical testing must demonstrate the device can be delivered to the target location in the neurovasculature and retrieve simulated thrombus under simulated use conditions.

(v) Non-clinical testing must demonstrate the device is radiopaque and can be visualized.

(vi) Non-clinical testing must evaluate the coating integrity and particulates under simulated use conditions.

(vii) Animal testing must evaluate the safety of the device, including damage to the vessels or tissue under anticipated use conditions.

(3) Performance data must support the sterility and pyrogenicity of the patient contacting components of the device.

(4) Performance data must support the shelf-life of the device by demonstrating continued sterility, package integrity, and device functionality over the specified shelf-life.

(5) Clinical performance testing of the device must demonstrate the device performs as intended for use in the treatment of acute ischemic stroke and must capture any adverse events associated with the device and procedure.

(6) The labeling must include:

(i) Information on the specific patient population for which the device is intended for use in the treatment of acute ischemic stroke, including but not limited to, specifying time from symptom onset, vessels or location of the neurovasculature that can be accessed for treatment, and limitations on core infarct size.

(ii) Detailed instructions on proper device preparation and use for thrombus retrieval from the neurovasculature.

(iii) A summary of the clinical testing results, including a detailed summary of the device- and procedure-related complications and adverse events.

(iv) A shelf life.

Dated: December 19, 2016.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Parts 500 and 553

[Docket No. BOP–1163]

RIN 1120–AB63

Contraband and Inmate Personal Property: Technical Change

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document, the Bureau of Prisons makes a minor technical change to its regulations on contraband and inmate personal property to maintain consistency in language which describes the purpose of the regulations as ensuring the safety, security, or good order of the facility or protection of the public.

DATES: This rule will be effective on January 23, 2017.

FOR FURTHER INFORMATION CONTACT: Sarah Qureshi, Office of General Counsel, Bureau of Prisons, phone (202) 307–2105.

SUPPLEMENTARY INFORMATION:

In this document, the Bureau of Prisons (Bureau) finalizes a minor technical change to its regulations on contraband and inmate personal property to maintain consistency in language which describes the purpose of the regulations as ensuring the ''safety, security, or good order of the facility or protection of the public.''

Variations on this phrase appear throughout the Bureau's regulations in 28 CFR Chapter V. *See* 28 CFR 500.1(h), 501.2(b), 501.3(b), 511.10(a), 511.11(a), 511.12(a), 511.15(b), 511.17(b), 540.12(a), 540.14(c) and (d), 540.15(d), 540.40, 540.44(c), 540.51(h), 540.70, 540.71(b) and (d), 540.100(a), 540.101(a), 541.12, 541.43(b), 541.63(c), 543.11(f), 543.14(a) and (c), 543.15(c), 543.16(b), 544.20, 544.21(b), 548.10, 548.16–548.18, 549.13(b), 549.50, 549.51(b), 551.1, 551.10, 551.12(d), 551.16(a), 551.31(b), 551.34(b), 551.35, 551.71(d), 551.110(a), 551.112(b), 551.113(a), 551.115(a), 552.13(b), 552.20, 552.21(a) and (d), 553.11(h), 553.12(b).

The Bureau has conformed the phrase in all revised regulations since approximately 2005. This rule likewise conforms this phrase in the Bureau's regulations on contraband. An interim rule on this subject was published on August 3, 2015 (80 FR 45883), and became effective on September 2, 2015, although public comments were accepted until October 2, 2015.

Prior to the September 2, 2015, effective date of the interim rule, the definition of contraband in § 500.1(h) read as follows: ''Contraband is material prohibited by law, or by regulation, or material which can reasonably be expected to cause physical injury or adversely affect the security, safety, or good order of the institution.'' The interim rule conformed the ''security, safety, or good order'' phrase to the language we have used in recent years, to read as follows: ''Contraband is material prohibited by law, regulation, or policy that can reasonably be expected to cause physical injury or adversely affect the safety, security, or good order of the facility or protection of the public.''

Likewise, to conform the phrase and underscore the importance of prohibiting contraband, we added the phrase to the end of the first sentence of § 553.10, regarding inmate personal property, to read as follows: ''It is the policy of the Bureau of Prisons that an inmate may possess ordinarily only that property which the inmate is authorized to retain upon admission to the institution, which is issued while the inmate is in custody, which the inmate purchases in the institution commissary, or which is approved by staff to be mailed to, or otherwise received by an inmate, *that does not threaten the safety, security, or good order of the facility or protection of the public.*'' [Emphasis added.] Further, § 543.12(b) contained another description/definition of contraband, categorizing it as either ''hard contraband'' or ''nuisance contraband.'' The interim rule added the ''safety, security'' phrase to this regulation as well.

It is important to note that neither the interim nor this final rule change the substantive requirements or obligations relating to petitions for commutation of sentence, nor do they seek to alter the Bureau's responsibilities in this regard.

Public Comments

We received two comments on the August 3, 2015 interim rule via the publicly-accessible *regulations.gov* Web site.

One commenter requested that the Bureau of Prisons ''plainly spell out the changes that are being put out for public notice,'' indicating confusion with regard to the interim rule changes.

The interim rule contained an explanation of the changes made by the interim rule. It is possible that the commenter may have read only the summary available on the *regulations.gov* Web site, rather than the entire interim rule document. However, for the benefit of any who may have been confused by the interim rule, we offer the following explanation.

The interim rule document made a minor technical change to the Bureau of Prisons regulations on contraband and inmate personal property: We added the phrase ''safety, security, or good order of the facility or protection of the public.'' We did this to show that this is the purpose of the contraband regulations—to ensure the ''safety, security, or good order of the facility or protection of the public.'' We also did this because this phrase appears, for the same purpose, throughout the Bureau's other regulations, and we have used this phrase in new regulations, when possible, since 2005. The addition of the phrase did not change the meaning or requirements of the regulations to which it was added, and did not alter the Bureau's responsibilities.

The second commenter stated as follows: ''So many times inmates come to facilities and mix with wrong crowds out of fear or intimidation. Leaving lockers unlocked due to [comfort] and many other reasons. These things should be [taken into account] if this happens three times in one year they should be further reviews on the inmates. This is not tolerated but common for Camps.'' This comment is not relevant to the current regulation change, which does not discuss inmate lockers or storage of personal property. The Bureau will take this comment into consideration when developing new policy with regard to inmates in federal prison camps.

For the aforementioned reasons, the Bureau now finalizes the interim rule published on August 2, 2015, without change.

Executive Order 12866. This regulation falls within a category of actions that the Office of Management and Budget (OMB) has determined not to constitute ''significant regulatory actions'' under section 3(f) of Executive Order 12866 and, accordingly, it was not reviewed by OMB.

Executive Order 13132. This regulation will not have substantial direct effect on the States, on the relationship between the national government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, under Executive Order 13132, we determine that this regulation does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Act. The Director of the Bureau of Prisons, under the Regulatory Flexibility Act (5 U.S.C. 605(b)), reviewed this regulation and by approving it certifies that it will not have a significant economic impact upon a substantial number of small entities for the following reasons: This regulation pertains to the correctional management of offenders committed to the custody of the Attorney General or the Director of the Bureau of Prisons, and its economic impact is limited to the Bureau's appropriated funds.

Unfunded Mandates Reform Act of 1995. This regulation will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996. This regulation is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This regulation will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects in 28 CFR Parts 500 and 553

Prisoners.

Kathleen M. Kenney,

Assistant Director/General, Counsel, Federal Bureau of Prisons.

■ Under rulemaking authority vested in the Attorney General in 5 U.S.C. 301; 28 U.S.C. 509, 510 and delegated to the Director, Bureau of Prisons in 28 CFR 0.96, the interim rule amending 28 CFR parts 500 and 553, which was published at 80 FR 45883, on August 3, 2015, is adopted as a final rule without change.

[FR Doc. 2016–30998 Filed 12–22–16; 8:45 am]

BILLING CODE 4410–05–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 560

Iranian Transactions and Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final rule.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is adopting a final rule amending the Iranian Transactions and Sanctions Regulations (ITSR) to reflect OFAC's licensing policies and address inquiries from the regulated public. This final rule makes changes relating to authorized sales of agricultural commodities, medicine, and medical devices to Iran pursuant to the Trade Sanctions Reform and Export Enhancement Act of 2000 (TSRA), as amended, and clarifies the definition of the terms *goods of Iranian origin* and *Iranian-origin goods.*

DATES: *Effective:* December 23, 2016.

FOR FURTHER INFORMATION CONTACT: The Department of the Treasury's Office of Foreign Assets Control: Assistant Director for Licensing, tel.: 202–622–2480, Assistant Director for Regulatory Affairs, tel.: 202–622–4855, Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; or the Department of the Treasury's Office of the Chief Counsel (Foreign Assets Control), Office of the General Counsel, tel.: 202–622–2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

This document and additional information concerning OFAC are available from OFAC's Web site (*www.treasury.gov/ofac*).

Background

TSRA Amendments

OFAC first issued regulations to implement TSRA (22 U.S.C. 7201 *et seq.*) on July 12, 2001 (66 FR 36683). Since then, OFAC has amended the licensing provisions of the ITSR (and its predecessor, the Iranian Transactions Regulations), 31 CFR part 560, as they relate to the exportation and reexportation of agricultural commodities, medicine, or medical devices to Iran on a number of occasions. As set forth in more detail below, OFAC is adopting a final rule to amend the licensing provisions of the ITSR to expand the scope of medical devices and agricultural commodities generally authorized for export or reexport to Iran and, in response to feedback from the regulated public regarding improving patient safety, provide new or expanded authorizations relating to training, replacement parts, software and services related to the operation, maintenance, and repair of medical devices, and items that are broken or connected to product recalls or other safety concerns.

Statutory Background

TSRA provides that, with certain exceptions, the President may not impose a unilateral agricultural sanction or unilateral medical sanction against a foreign country or foreign entity unless, at least 60 days before imposing such a sanction, the President submits a report to Congress describing the proposed sanction and the reasons for it and Congress enacts a joint resolution approving the report. *See* 22 U.S.C. 7202. Section 906 of TSRA, however, requires in pertinent part that the export of agricultural commodities, medicine, or medical devices to the government of a country that has been determined by the Secretary of State, pursuant to, *inter alia,* Section 6(j) of the Export Administration Act of 1979 (50 U.S.C. App. 2405(j)), to have repeatedly provided support for acts of international terrorism,[1] or to any entity in such a country, shall be made pursuant to one-year licenses issued by the United States Government, except that the requirements of such one-year licenses shall be no more restrictive than general licenses administered by the Department of the Treasury. *See* 22 U.S.C. 7205(a)(1). Section 906 also specifies that procedures shall be in place to deny licenses for exports of agricultural commodities, medicine, or medical devices to any entity within such country promoting international terrorism.

As provided in Section 221 of the USA PATRIOT Act (Pub. L. 107–56) (codified at 22 U.S.C. 7210), nothing in TSRA shall limit the application or scope of any law, including any Executive order or regulation promulgated pursuant to such law, establishing criminal or civil penalties for the unlawful export of any agricultural commodity, medicine, or medical device to: A Foreign Terrorist Organization; a foreign organization, group, or person designated pursuant to Executive Orders 12947 or 13224 (sanctions on terrorists and certain supporters of terrorism); weapons of mass destruction or missile proliferators; or designated narcotics trafficking entities. In addition, TSRA provides in Section 904(2) that the restrictions on the imposition of unilateral agricultural sanctions or unilateral medical sanctions shall not affect any authority or requirement to impose a sanction to the extent such sanction applies to any agricultural commodity, medicine, or medical device that is controlled on the United States Munitions List (USML), controlled on any control list established under the Export Administration Act of 1979 or any successor statute, or used to facilitate the design, development, or production of chemical or biological weapons, missiles, or weapons of mass destruction. *See* 22 U.S.C. 7203(2).

Specific TSRA-Related Regulatory Amendments

On October 22, 2012, OFAC adopted a final rule that, among other things, added a general license in § 560.530(a)(3) of the ITSR that authorized the exportation or reexportation of medicine and basic medical supplies to the Government of Iran, to individuals or entities in Iran, or to persons in third countries purchasing specifically for resale to any of the foregoing, and the conduct of related transactions (*see* 77 FR 64664). The term ''basic medical supplies'' was defined to mean those medical devices, as defined in the ITSR, that were included on the List of Basic Medical Supplies made available on OFAC's Web site and published in the **Federal Register**, but did not include replacement parts. On April 17, 2014, OFAC adopted a final rule that, among other things, updated the definition of ''basic medical supplies'' to exclude the word ''basic'' and make related conforming changes, including renaming the list on OFAC's Web site as the ''List of Medical Supplies'' (*see* 79 FR 18990). On November 2, 2015 and April 12, 2016, OFAC updated the List of Medical Supplies to add additional medical devices to the list.

Also on April 17, 2014, OFAC expanded an existing general license in § 560.530(a)(2) that authorized the exportation and reexportation of food to authorize the exportation or reexportation of the broader category of agricultural commodities, with certain specified exceptions, to the Government of Iran, to individuals or entities in Iran, or to persons in third countries purchasing specifically for resale to any of the foregoing, and the conduct of related transactions (*see* 79 FR 18980). OFAC also added a general license in § 560.530(a)(4) authorizing the exportation or reexportation of replacement parts for certain medical devices, provided that the replacement parts are designated as EAR99 or, in the case of replacement parts that are not subject to the EAR, would be designated as EAR99 if they were located in the United States, and further provided that the replacement parts are limited to a one-for-one basis of exchange (*i.e.,* only one replacement part can be exported or

[1] The Secretary of State made such a determination with respect to Iran on January 19, 1984.

reexported to replace a broken or non-operational component).

Since these amendments, in consultation with the Department of State, OFAC has routinely issued specific licenses authorizing the exportation or reexportation of certain additional medical devices and agricultural commodities to the Government of Iran, to individuals or entities in Iran, or to persons in third countries purchasing such goods specifically for resale to any of the foregoing. In addition, OFAC has continued to receive feedback from the regulated public and review its TSRA licensing procedures, particularly the procedures for licensing exports and reexports of medical devices and agricultural commodities.

As a result of this review, OFAC today is amending the general license relating to authorized sales of certain medical devices in § 560.530(a)(3) to expand the scope of medical devices that may be exported or reexported to Iran without specific authorization. OFAC is also narrowing the list of agricultural commodities excluded from the general license relating to authorized sales of agricultural commodities in § 560.530(a)(2). In addition, in response to feedback from the regulated public regarding improving patient safety, OFAC is making the following changes: Expanding existing general licenses to authorize the provision of training for the safe and effective use or operation of agricultural commodities, medicine, and medical devices; expanding an existing general license authorizing the exportation or reexportation to Iran of replacement parts to permit certain additional replacement parts to be exported or reexported and stored for future use; adding a new general license to authorize the exportation and reexportation to Iran of software and services related to the operation, maintenance, and repair of medical devices previously exported pursuant to an OFAC authorization; and adding a new general license to authorize the importation into the United States of items previously exported pursuant to an OFAC authorization in connection with product recalls, adverse events, or other safety concerns, as set forth in more detail below.

Additional medical devices. OFAC is amending the existing general license in § 560.530(a)(3) relating to authorized exports or reexports of certain medical devices specified on the List of Medical Supplies. As amended, the general license has been expanded to authorize the exportation or reexportation to Iran of all items meeting the definition of the term ''medical device'' as set forth in § 560.530(e)(3), except for certain medical devices that are explicitly excluded from the authorization as specified in a new List of Medical Devices Requiring Specific Authorization, which is maintained on OFAC's Web site on the Iran Sanctions page, as set forth in revised § 560.530(a)(3)(ii). The List of Medical Devices Requiring Specific Authorization will also be published in the **Federal Register**, as will any changes to this list. The exportation and reexportation of the specified excluded medical devices requires specific authorization from OFAC, as reflected in amended § 560.530(a)(1)(ii)(C). Medical devices other than those specified on the new List of Medical Devices Requiring Specific Authorization may be exported or reexported to Iran without separate authorization from OFAC. In light of these changes, this rule also eliminates reference to the List of Medical Supplies.

Excluded agricultural commodities. OFAC is also narrowing the list of excluded agricultural commodities set forth in § 560.530(a)(2)(ii). Pursuant to this amendment, the general license in § 560.530(a)(2) now authorizes the exportation or reexportation to Iran of shrimp and shrimp eggs.

Training. OFAC is adding a new provision in § 560.530(a)(2)(iv) to generally authorize the provision of training necessary and ordinarily incident to the safe and effective use of agricultural commodities exported or reexported pursuant to the general license in § 560.530(a)(2). OFAC similarly is adding a new provision in § 560.530(a)(3)(v) to authorize the provision of training necessary and ordinarily incident to the safe and effective use or operation of medicine and medical devices exported or reexported pursuant to the general license in § 560.530(a)(3).

Additional replacement parts. OFAC is amending the existing general license in § 560.530(a)(4) authorizing exports or reexports of and related transactions for replacement parts for certain medical devices that are designated as EAR99 or, in the case of replacement parts that are not subject to the EAR, would be designated as EAR99 if they were located in the United States, on a one-for-one export or reexport basis of exchange. As amended, the general license removes the requirement for a one-for-one basis of exchange and allows the exportation and reexportation of such replacement parts provided that they are intended to replace a broken or nonoperational component of a medical device previously exported or reexported to Iran pursuant to an OFAC authorization or that the exportation or reexportation of the replacement part is ordinarily incident and necessary to the proper preventative maintenance of such a medical device, and further provided that the number of replacement parts that are exported or reexported to and stored in Iran does not exceed the number of corresponding parts in use in relevant medical devices in Iran.

Software and services related to the operation, maintenance, and repair of medical devices. OFAC is adding a new general license in § 560.530(a)(5) to authorize the exportation or reexportation to Iran of software and services related to the operation, maintenance, and repair of medical devices that previously were exported or reexported to Iran pursuant to an OFAC authorization, provided that, among other things, such software is designated as EAR99, or in the case of software that is not subject to the EAR, would be designated as EAR99 if it were located in the United States. In § 560.530(a)(5)(i), OFAC is adding an authorization for the exportation or reexportation to Iran of software necessary for the installation and operation of medical devices authorized for export or reexport by OFAC. In § 560.530(a)(5)(ii), OFAC is adding an authorization to allow the exportation or reexportation of software updates for those devices. In § 560.530(a)(5)(iii), OFAC is adding an authorization for repair services for medical devices authorized for export or reexport to Iran by OFAC, including inspection, testing, calibration, and diagnostic services to ensure patient safety or effective operation of such medical devices.

Importation of items that are broken, defective, or non-operational or in connection with product recalls, adverse events, or other safety concerns. OFAC also is adding a new general license in § 560.530(a)(6) to authorize the importation into the United States of certain U.S.-origin agricultural commodities, medicine, and medical devices that previously were exported or reexported to Iran pursuant to the authorization in § 560.530 and that are broken, defective, or non-operational or connected to product recalls, adverse events, or other safety concerns.

Conforming change to section headings. In light of the addition of several new general licenses in § 560.530, OFAC is also making a conforming change to the section heading to reflect the additions. As the new general licenses require the payment and financing terms set forth in § 560.532, OFAC is making a similar

conforming change to that section heading to reflect the additions.

Amendment to Definition of ''Goods of Iranian Origin'' and ''Iranian-Origin Goods''

To address inquiries from the regulated public, including with regard to the status of goods on vessels and aircraft, OFAC also is amending the definition in § 560.306 of the terms *goods of Iranian origin* and *Iranian-origin goods* to clarify that this definition does not include certain categories of goods, provided that such goods were not grown, produced, manufactured, extracted, or processed in Iran. First, the amended definition excludes goods exported or reexported to Iran under an authorization issued pursuant to this part (*e.g.,* a medical device or a personal communications device exported or reexported to Iran pursuant to a general or specific license issued pursuant to this part) and that have subsequently been reexported from and are located outside of Iran. Second, the amended definition also clarifies that it does not include goods transported on a vessel or aircraft, as well as the underlying vessel or aircraft itself, that passed though Iranian territorial waters or stopped at a port or place in Iran en route to a destination outside of Iran and that have not otherwise come into contact with Iran. A note clarifies that, pursuant to this section, goods that are temporarily offloaded from a vessel in Iranian territorial waters or at a port in Iran and reloaded onto the same vessel or another vessel in the same location en route to a destination outside of Iran and that have not otherwise come into contact with Iran are not considered goods of Iranian origin. Similarly, goods that are offloaded from an aircraft at a place in Iran and reloaded onto the same aircraft or another aircraft in the same location en route to a destination outside of Iran and that have not otherwise come into contact with Iran are not considered goods of Iranian origin. This amended definition is relevant to the prohibitions in §§ 560.201 and 560.206 of the ITSR, which remain in place; it is not relevant to the prohibitions in §§ 560.204, 560.205, and 560.211 on exports of goods to Iran and on transactions in goods involving blocked persons, which also remain in place.

Public Participation

Because the amendment of the ITSR involves a foreign affairs function, the provisions of Executive Order 12866 and the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act (5 U.S.C. 601–612) does not apply.

Paperwork Reduction Act

The collections of information related to the ITSR are contained in 31 CFR part 501 (the Reporting, Procedures and Penalties Regulations). Pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), those collections of information have been approved by the Office of Management and Budget under control number 1505–0164. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

List of Subjects in 31 CFR Part 560

Administrative practice and procedure, Agricultural commodities, Banks, Banking, Iran, Medicine, Medical devices.

For the reasons set forth in the preamble, the Department of the Treasury's Office of Foreign Assets Control amends 31 CFR part 560 as follows:

PART 560—IRANIAN TRANSACTIONS AND SANCTIONS REGULATIONS

■ 1. The authority citation for part 560 continues to read as follows:

Authority: 3 U.S.C. 301; 18 U.S.C. 2339B, 2332d; 22 U.S.C. 2349aa–9; 22 U.S.C. 7201–7211; 31 U.S.C. 321(b); 50 U.S.C. 1601–1651, 1701–1706; Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note); Pub. L. 110–96, 121 Stat. 1011 (50 U.S.C. 1705 note); Pub. L. 111–195, 124 Stat. 1312 (22 U.S.C. 8501–8551); Pub. L. 112–81, 125 Stat. 1298 (22 U.S.C. 8513a); Pub. L. 112–158, 126 Stat. 1214 (22 U.S.C. 8701–8795); E.O. 12613, 52 FR 41940, 3 CFR, 1987 Comp., p. 256; E.O. 12957, 60 FR 14615, 3 CFR, 1995 Comp., p. 332; E.O. 12959, 60 FR 24757, 3 CFR, 1995 Comp., p. 356; E.O. 13059, 62 FR 44531, 3 CFR, 1997 Comp., p. 217; E.O. 13599, 77 FR 6659, 3 CFR, 2012 Comp., p. 215; E.O. 13628, 77 FR 62139, 3 CFR, 2012 Comp., p. 314.

Subpart C—General Definitions

■ 2. Amend § 560.306 by revising paragraph (a), redesignating paragraphs (b) through (d) as paragraphs (c) through (e), and adding new paragraph (b) to read as follows:

§ 560.306 Iranian-origin goods or services; goods or services owned or controlled by the Government of Iran.

(a) Except as provided in paragraph (b) of this section, the terms *goods of Iranian origin* and *Iranian-origin goods* include:

(1) Goods grown, produced, manufactured, extracted, or processed in Iran; and

(2) Goods that have entered into Iranian commerce.

(b) The terms *goods of Iranian origin* and *Iranian-origin goods* do not include the following categories of goods, provided that such goods were not grown, produced, manufactured, extracted, or processed in Iran:

(1) Goods exported or reexported to Iran under an authorization issued pursuant to this part and that have subsequently been reexported from and are located outside of Iran; or

(2) Goods transported on a vessel or aircraft, as well as the vessel or aircraft itself, that passed though Iranian territorial waters or stopped at a port or place in Iran en route to a destination outside of Iran and that have not otherwise come into contact with Iran.

Note to paragraph (b)(2) of § 560.306: Pursuant to this section, goods that are temporarily offloaded from a vessel in Iranian territorial waters or at a port or place in Iran and reloaded onto the same vessel or another vessel in the same location en route to a destination outside of Iran and that have not otherwise come into contact with Iran are not considered goods of Iranian origin. Similarly, goods that are offloaded from an aircraft at a place in Iran and reloaded onto the same aircraft or another aircraft in the same location en route to a destination outside of Iran and that have not otherwise come into contact with Iran are not considered goods of Iranian origin.

* * * * *

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

■ 3. Amend § 560.530 as follows:
■ a. Revise the section heading and paragraphs (a)(1)(ii)(C) and (D) and (a)(2)(ii) and (iii);
■ b. Add paragraph (a)(2)(iv);
■ c. Revise paragraphs (a)(3)(i), (ii), and (iv);
■ d. Add paragraph (a)(3)(v);
■ e. Revise paragraphs (a)(4)(i) and (ii);
■ f. Add paragraphs (a)(5) and (6); and
■ g. Revise paragraph (c)(5).

The revisions and additions read as follows:

§ 560.530 Commercial sales, exportation, and reexportation of agricultural commodities, medicine, medical devices, and certain related software and services.

(a)(1) * * *

(ii) * * *

(C) The excluded medical devices specified in paragraph (a)(3)(ii) of this section; and

(D) Agricultural commodities (as defined in paragraph (e)(1) of this

section), medicine (as defined in paragraph (e)(2) of this section), and medical devices (as defined in paragraph (e)(3) of this section) to military, intelligence, or law enforcement purchasers or importers.

(2) * * *

(ii) *Excluded agricultural commodities.* Paragraph (a)(2)(i) of this section does not authorize the exportation or reexportation of the following items: Castor beans, castor bean seeds, certified pathogen-free eggs (unfertilized or fertilized), dried egg albumin, live animals (excluding live cattle, shrimp, and shrimp eggs), embryos (excluding cattle embryos), Rosary/Jequirity peas, non-food-grade gelatin powder, peptones and their derivatives, super absorbent polymers, western red cedar, or all fertilizers.

(iii) *Excluded persons.* Paragraph (a)(2)(i) of this section does not authorize the exportation or reexportation of agricultural commodities to military, intelligence, or law enforcement purchasers or importers.

(iv) *General license for related training.* The provision by a covered person (as defined in paragraph (e)(4) of this section) of training necessary and ordinarily incident to the safe and effective use of agricultural commodities exported or reexported pursuant to paragraph (a)(2) of this section to the Government of Iran, to any individual or entity in Iran, or to persons in a third country purchasing such goods specifically for resale to any of the foregoing is authorized, provided that:

(A) Unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532;

(B) Any technology released pursuant to this authorization is designated as EAR99; and

(C) Such training is not provided to any military, intelligence, or law enforcement entity, or any official or agent thereof.

* * * * *

(3)(i) *General license for the exportation or reexportation of medicine and medical devices.* Except as provided in paragraphs (a)(3)(ii) through (iv) of this section, the exportation or reexportation by a covered person (as defined in paragraph (e)(4) of this section) of medicine (as defined in paragraph (e)(2) of this section) and medical devices (as defined in paragraph (e)(3) of this section) to the Government of Iran, to any individual or entity in Iran, or to persons in third countries purchasing specifically for resale to any of the foregoing, and the conduct of related transactions, including the making of shipping and cargo inspection arrangements, obtaining of insurance, arrangement of financing and payment, shipping of the goods, receipt of payment, and entry into contracts (including executory contracts), are hereby authorized, provided that, unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532; and further provided that all such exports or reexports are shipped within the 12-month period beginning on the date of the signing of the contract for export or reexport.

(ii) *Excluded medical devices.* Paragraph (a)(3)(i) of this section does not authorize the exportation or reexportation of medical devices on the List of Medical Devices Requiring Specific Authorization, which is maintained on OFAC's Web site (*www.treasury.gov/ofac*) on the Iran Sanctions page.

* * * * *

(iv) *Excluded persons.* Paragraph (a)(3)(i) of this section does not authorize the exportation or reexportation of medicine or medical devices to military, intelligence, or law enforcement purchasers or importers.

(v) *General license for related training.* The provision by a covered person (as defined in paragraph (e)(4) of this section) of training necessary and ordinarily incident to the safe and effective use of medicine and medical devices exported or reexported pursuant to paragraph (a)(3) of this section to the Government of Iran, to any individual or entity in Iran, or to persons in a third country purchasing such goods specifically for resale to any of the foregoing is authorized, provided that:

(A) Unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532;

(B) Any technology released pursuant to this authorization is designated as EAR99; and

(C) Such training is not provided to any military, intelligence, or law enforcement entity, or any official or agent thereof.

* * * * *

(4) * * *

(i) Except as provided in paragraph (a)(4)(ii) of this section, the exportation or reexportation by a covered person (as defined in paragraph (e)(4) of this section) of replacement parts to the Government of Iran, to any individual or entity in Iran, or to persons in third countries purchasing specifically for resale to any of the foregoing, for medical devices (as defined in paragraph (e)(3) of this section) exported or reexported pursuant to paragraph (a)(1) or (a)(3)(i) of this section, and the conduct of related transactions, including the making of shipping and cargo inspection arrangements, obtaining of insurance, arrangement of financing and payment, shipping of the goods, receipt of payment, and entry into contracts (including executory contracts), are hereby authorized, provided that, unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532; and further provided that:

(A) Such replacement parts are designated as EAR99, or, in the case of replacement parts that are not subject to the Export Administration Regulations, 15 CFR parts 730 *through 774* (EAR), would be designated as EAR99 if they were located in the United States;

(B) Such replacement parts are exported or reexported to replace a broken or nonoperational component of a medical device that previously was exported or reexported pursuant to paragraph (a)(3)(i) of this section, or the exportation or reexportation of such replacements parts is necessary and ordinarily incident to the proper preventative maintenance of such a medical device;

(C) The number of replacement parts that are exported or reexported and stored in Iran does not exceed the number of corresponding operational parts currently in use in relevant medical devices in Iran; and

(D) The broken or non-operational replacement parts that are being replaced are promptly exported, reexported, or otherwise provided to a non-Iranian entity located outside of Iran selected by the supplier of the replacement parts.

(ii) *Excluded persons.* Paragraph (a)(4)(i) of this section does not authorize the exportation or reexportation of replacement parts for medical devices to military, intelligence, or law enforcement purchasers or importers.

* * * * *

(5) *General license for services and software necessary for the operation, maintenance, and repair of medical devices*—(i) *Operational software.* Except as provided in paragraph

(a)(5)(iv) of this section, the exportation or reexportation by a covered person (as defined in paragraph (e)(4) of this section) to the Government of Iran, to any individual or entity in Iran, or to persons in a third country purchasing specifically for resale to any of the foregoing, of software necessary for the installation and operation of medical devices or replacement parts exported or reexported pursuant to this section, and the conduct of related transactions, are hereby authorized, provided that such software is designated as EAR99, or in the case of software that is not subject to the EAR, would be designated as EAR99 if it were located in the United States, and further provided that, unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532.

(ii) *Software updates.* Except as provided in paragraph (a)(5)(iv) of this section, the exportation or reexportation by a covered person (as defined in paragraph (e)(4) of this section) to the Government of Iran, to any individual or entity in Iran, or to persons in a third country purchasing specifically for resale to any of the foregoing, of software intended for and limited to the provision of safety and service updates and the correction of system or operational errors in medical devices, replacement parts, and associated software that previously were exported, reexported, or provided pursuant to this part, and the conduct of related transactions, are hereby authorized, provided that such software is designated as EAR99, or in the case of software that is not subject to the EAR, would be designated as EAR99 if it were located in the United States, and further provided that, unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532. Such software updates may be exported or reexported only to the same end user to whom the original software was exported or reexported.

(iii) *Maintenance and Repair Services.* Except as provided in paragraph (a)(5)(iv) of this section, the exportation or reexportation by a covered person (as defined in paragraph (e)(4) of this section) to the Government of Iran, to any individual or entity in Iran, or to persons in a third country purchasing specifically for resale to any of the foregoing, of services necessary to maintain and repair medical devices that previously were exported or reexported pursuant to this section, including inspection, testing, calibration, or repair services to ensure patient safety or effective operation, and the conduct of related transactions, are hereby authorized, provided that such services do not substantively alter the functional capacities of the medical device as originally authorized for export or reexport, and further provided that, unless otherwise authorized by specific license, payment terms and financing for sales pursuant to this general license are limited to, and consistent with, those authorized by § 560.532.

(iv) *Excluded persons.* Paragraphs (a)(5)(i) through (iii) of this section do not authorize the exportation or reexportation of software, software updates, or maintenance and repair services for medical devices to military, intelligence, or law enforcement purchasers or importers.

(6)(i) *General license for the importation of certain U.S.-origin agricultural commodities, medicine, and medical devices.* Except as provided in paragraph (a)(6)(ii) of this section, the importation into the United States of U.S.-origin agricultural commodities, medicine, and medical devices, including parts, components, or accessories thereof, that previously were exported or reexported pursuant to the authorizations in this section and that are broken, defective, or non-operational, or are connected to product recalls, adverse events, or other safety concerns, and the conduct of related transactions, are hereby authorized.

(ii) *Excluded persons.* Paragraph (a)(6)(i) of this section does not authorize the importation into the United States of U.S.-origin agricultural commodities, medicine, and medical devices that previously were exported or reexported pursuant to the authorizations in this section as broken, defective, or non-operational, or in connection with product recalls, adverse events, or other safety concerns, from military, intelligence, or law enforcement purchasers or importers.

* * * * *

(c) * * *

(5) For items subject to the EAR, an Official Commodity Classification of EAR99 issued by the Department of Commerce's Bureau of Industry and Security (BIS), certifying that the product is designated as EAR99, is required to be submitted to OFAC with the request for a license authorizing the exportation or reexportation of all fertilizers, live horses, western red cedar, or the excluded medical devices specified in paragraph (a)(3)(ii) of this section. *See* 15 CFR 748.3 for instructions for obtaining an Official Commodity Classification of EAR99 from BIS.

* * * * *

■ 4. Amend § 560.532 by revising the section heading to read as follows:

§ 560.532 Payment for and financing of exports and reexports of agricultural commodities, medicine, and medical devices, and certain related software and services.

* * * * *

John E. Smith,

Acting Director, Office of Foreign Assets Control.

[FR Doc. 2016–30968 Filed 12–22–16; 8:45 am]

BILLING CODE 4810–AL–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2016–0304; FRL–9957–20–Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Maryland; Control of Volatile Organic Compounds Emissions From Fiberglass Boat Manufacturing Materials

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a state implementation plan (SIP) revision submitted by the State of Maryland. This revision pertains to Maryland's adoption of the requirements in EPA's control technique guidelines (CTG) for fiberglass boat manufacturing materials. EPA is approving this Maryland SIP submittal as it is in accordance with the requirements of the Clean Air Act (CAA).

DATES: This final rule is effective on January 23, 2017.

ADDRESSES: EPA has established a docket for this action under Docket ID Number EPA–R03–OAR–2016–0304. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *http://www.regulations.gov,* or please contact

the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Gavin Huang, (215) 814–2042, or by email at *huang.gavin@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On August 1, 2016 (81 FR 50427 and 81 FR 50336), EPA simultaneously published a notice of proposed rulemaking (NPR) and a direct final rule (DFR) for the State of Maryland. On September 16, 2016 (81 FR 63701), EPA withdrew the DFR due to the receipt of a comment on the proposed rulemaking. In the NPR, EPA proposed to include in the Maryland SIP a Maryland regulation which adopted the requirements in EPA's CTG for fiberglass boat manufacturing materials. The formal SIP revision (#15–07) was submitted by Maryland on December 23, 2015.

As described in the DFR published on August 1, 2016 (81 FR 50336), section 172(c)(1) of the CAA provides that SIPs for nonattainment areas must include reasonably available control measures (RACM), including reasonably available control technology (RACT), for sources of emissions. Additionally, Maryland is in the Ozone Transport Region (OTR) established under section 184(a) of the CAA. Pursuant to section 184(b)(1)(B) of the CAA, all areas in the OTR must submit SIP revisions that include implementation of RACT with respect to all sources of volatile organic compounds (VOC) in the states covered by a CTG. *See* CAA section 184(b)(1).

In September 2008, EPA developed a CTG entitled Control Techniques Guidelines for Fiberglass Boat Manufacturing Materials (Publication No. EPA 453/R–08–004). The CTG for fiberglass boat manufacturing materials provides control recommendations for reducing VOC emissions from the use of gel coats, resins, and materials used to clean application equipment in fiberglass boat manufacturing operations. This CTG applies to facilities that manufacture hulls or decks of boats from fiberglass or build molds to make fiberglass boat hulls or decks.

II. Summary of SIP Revision

On December 23, 2015, the Maryland Department of the Environment (MDE) submitted on behalf of the State of Maryland to EPA SIP revision #15–07 concerning implementation of RACT requirements for the control of VOC emissions from fiberglass boat manufacturing materials. Maryland adopted EPA's CTG standards for fiberglass boat manufacturing materials through a regulation found at Code of Maryland Regulations (COMAR) 26.11.19 (relating to VOC from specific processes). This SIP revision adds COMAR 26.11.19.26–1 (control of VOC emissions from fiberglass boat manufacturing materials) to the Maryland SIP and also includes an amendment to COMAR 26.11.19.26 (control of VOC emissions from reinforced plastic manufacturing) which was previously approved into the Maryland SIP. In addition to adopting EPA's CTG standards, COMAR 26.11.19.26–1 includes numerous terms and definitions to support the interpretation of the measures, as well as work practices for cleaning, compliance and monitoring requirements, sampling and testing, and record keeping requirements. The amendment to COMAR 26.11.19.26 at COMAR 26.11.19.26A exempts fiberglass boat manufacturing from provisions within COMAR 26.11.19.26 to avoid duplicative or conflicting requirements. Prior to Maryland's new COMAR 26.11.19.26–1, fiberglass boat manufacturing materials were covered under COMAR 26.11.19.26 which did not address fully EPA's CTG requirements. Thus, with COMAR 26.11.19.26–1 now addressing fiberglass boat manufacturing materials, Maryland has revised COMAR 26.11.19.26A to clarify and exempt fiberglass boat manufacturing materials from COMAR 26.11.19.26A as these are now clearly addressed in COMAR 26.11.19.26–1. EPA finds the provisions in COMAR 26.11.19.26–1 identical to the CTG standards for fiberglass boat manufacturing materials and therefore approvable in accordance with sections 172(c)(1) and 184(b)(1)(B) of the CAA.

III. Public Comments and EPA's Responses

EPA received a comment from the Export Inspection Council of India within the Ministry of Commerce and Industry, Government of India (hereinafter referred to as ''Commenter'') on the August 1, 2016 NPR.

Comment: The Commenter sought clarification to determine if Maryland's adoption of EPA's CTG guidelines for fiberglass boat manufacturing materials applied to international manufacturing facilities that export fiberglass boats into the United States. Additionally, if the proposed guidelines are applicable to imported boats, the Commenter questioned how EPA will implement the guidelines and if they will add to the international import requirements of fiberglass boats into the United States.

Response: EPA thanks the Commenter for its submission seeking clarification of the Maryland regulation on fiberglass boat manufacturing. COMAR 26.11.19.26–1 applies to fiberglass manufacturing facilities that manufacture hulls or decks of fiberglass boats, assemble fiberglass boats from premanufactured hulls and decks, or build molds to make hulls or decks of fiberglass boats. *See* COMAR 26.11.19.26–1(B)(5). As such, the regulation applies only to manufacturing, assembling or building occurring within Maryland and does not apply to fiberglass boats imported into the State from other locations, including from locations overseas. In addition, under Annotated Code of Maryland § 2–103(b), Maryland and the Maryland Department of the Environment specifically only have jurisdiction over emissions into the air in the State and over ambient air quality in the State of Maryland. Because Maryland's regulatory authority therefore does not extend to regulating activities outside the State, EPA is clarifying that COMAR 26.11.19.26–1 does not regulate nor apply to fiberglass boat manufacturing done outside the State of Maryland. Because the regulation does not apply to fiberglass boat manufacturing outside the State of Maryland, EPA need not respond to the Commenter's inquiry as to how COMAR 26.11.19.26–1 would be implemented for imported fiberglass boats. Finally, EPA clarifies that COMAR 26.11.19.26–1 does not add to import requirements for fiberglass boats being imported into Maryland.

IV. Final Action

EPA is approving the December 23, 2015 Maryland SIP submittal, which revises the Maryland SIP by adding new regulation COMAR 26.11.19.26–1 and amending COMAR 26.11.19.26, because the SIP submittal meets the requirement to adopt RACT for sources covered by EPA's CTG standards for fiberglass boat manufacturing materials and is in accordance with requirements in CAA sections 172, 182 and 184.

V. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of COMAR 26.11.19.26–1 and an amendment to COMAR 26.11.19.26 addressing VOC content limits for fiberglass boat manufacturing into the Maryland SIP. Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into

that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.[1] EPA has made, and will continue to make, these materials generally available through *http://www.regulations.gov* and/or at the EPA Region III Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

A. General Requirements

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 21, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action approving the Maryland SIP revision adding new regulation COMAR 26.11.19.26–1 and amending COMAR 26.11.19.26 may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Ozone, Volatile organic compounds.

Dated: December 7, 2016.

Shawn M. Garvin,

Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart V—Maryland

■ 2. In § 52.1070, the table in paragraph (c) is amended by revising COMAR 26.11.19.26 and the entry for COMAR 26.11.19.26–1. The amended text reads as follows:

§ 52.1070 Identification of plan.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–1989–0009; FRL–9957–31-Region 3]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the North Penn Area 6 Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule; notice of partial deletion of the North Penn Area 6 Superfund Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA) Region III is publishing a direct final notice of partial deletion of a portion of the North Penn Area 6 Superfund Site (Site) located in Lansdale Borough, Montgomery County, Pennsylvania, from the National Priorities List (NPL). The deletion affects approximately 6.5 acres located at 135 East Hancock Street (the ''Administrative Parcel''). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is found at Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This direct final partial deletion is being published by EPA with the concurrence of the Commonwealth of Pennsylvania, through the Pennsylvania Department of Environmental Protection (PADEP), because EPA has determined that all appropriate response actions at the Administrative Parcel under CERCLA, other than five-year reviews, have been completed. However, this partial deletion does not preclude future actions at the Administrative Parcel under Superfund.

This partial deletion pertains to soils and groundwater of the Administrative Parcel portion of the Site. The other portions of the Site will remain on the NPL, and are not being considered for deletion as part of this action.

DATES: This direct final partial deletion is effective February 21, 2017 unless EPA receives adverse comments by January 23, 2017. If adverse comments are received, EPA will publish a timely withdrawal of the direct final partial deletion in the **Federal Register** informing the public that the partial deletion will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1989–0009, by one of the following methods:

- *http://www.regulations.gov*. Follow on-line instructions for submitting comments.
- *Email: ngo.huu@epa.gov.*
- *Mail:* U.S. Environmental Protection Agency, Region III, Attn: Huu Ngo (3HS21), 1650 Arch Street, Philadelphia, PA 19103–2029
- *Hand Delivery:* U.S. Environmental Protection Agency, Region III, Attn: Huu Ngo (3HS21), 1650 Arch Street, Philadelphia, PA 19103–2029, Phone: 215–814–3187, Business Hours: Mon. through Fri.—8:00 a.m. to 4:30 p.m. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1989–0009. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

- U.S. EPA Region III, Superfund Records Center, 6th Floor, 1650 Arch Street, Philadelphia, PA 19103–2029;

(215) 814–3157, Monday through Friday 8:00 a.m. to 5:00 p.m.

• The Lansdale Public Library, 301 Vine St, Lansdale, PA 19446; phone (215) 855–3228. Monday through Friday 10:00 a.m.–9:00 p.m.

FOR FURTHER INFORMATION CONTACT: Huu Ngo, Remedial Project Manager (3HS21), U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, PA 19103–2029; (215) 814–3187; email: *ngo.huu@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

EPA Region III is publishing this direct final Notice of Partial Deletion of a portion the North Penn Area 6 Superfund Site from the National Priorities List (NPL). This partial deletion pertains to the soils and groundwater of the Administrative Parcel portion of the Site. The NPL constitutes Appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). This partial deletion of the North Penn Area 6 Site is proposed in accordance with 40 CFR 300.425(e) and is consistent with the Notice of Policy Change: Partial Deletion of Sites Listed on the National Priorities List. 60 FR 55466 (Nov. 1, 1995). As described in 40 CFR 300.425(e)(3) of the NCP, a portion of a site deleted from the NPL remains eligible for Fund-financed remedial actions if future conditions warrant such actions.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses the procedures that EPA is using for this action. Section IV discusses the Administrative Parcel of the North Penn Area 6 Superfund Site and demonstrates how it meets the deletion criteria. Section V discusses EPA's action to delete the Administrative Parcel portion of the Site from the NPL unless adverse comments are received during the public comment period.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the Commonwealth, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates such action is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Partial Deletion Procedures

The following procedures apply to deletion of the Administrative Parcel portion of the Site:

(1) EPA consulted with the Commonwealth of Pennsylvania prior to developing this direct final Notice of Partial Deletion and the Notice of Intent for Partial Deletion co-published today in the ''Proposed Rules'' section of the **Federal Register**.

(2) EPA provided the Commonwealth 30 working days for review of this notice and the parallel Notice of Intent for Partial Deletion prior to their publication today, and the Commonwealth, through PADEP, concurred on the partial deletion of the Site from the NPL.

(3) Concurrently with the publication of this direct final Notice of Partial Deletion, a notice of the availability of the parallel Notice of Intent for Partial Deletion is being published in a major local newspaper, *The Reporter.* The newspaper notice announces the 30-day public comment period concerning the Notice of Intent for Partial Deletion of the Site from the NPL.

(4) The EPA placed copies of documents supporting the partial deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

(5) If adverse comments are received within the 30-day public comment period on this partial deletion action, EPA will publish a timely notice of withdrawal of this direct final Notice of Partial Deletion before its effective date, and will prepare a response to comments and continue with the deletion process, as appropriate, on the basis of the Notice of Intent for Partial Deletion and the comments already received.

Deletion of a portion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a portion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Partial Site Deletion

The following information provides EPA's rationale for deleting the Administrative Parcel portion of the Site from the NPL:

Site Background and History

The North Penn Area 6 Superfund Site (EPA Identification Number PAD980926976) is located primarily in Lansdale Borough, Montgomery County, Pennsylvania. The Site is comprised of multiple properties contaminated primarily with volatile organic compounds (VOCs) in the soil and associated groundwater contamination. One of the properties consists of approximately 10 acres of land located at 135 East Hancock Street in Lansdale Borough (the ''Property''). The Property was formerly occupied by the Tate Andale Company, and later by the Rogers Mechanical Company. The Administrative Parcel is comprised of approximately 6.5 acres located within the Property.

The current owner of the Property, including the Administrative Parcel, is

Andale Properties, LLC. Andale Properties, LLC plans to redevelop the Property for future residential purposes. Andale Properties, LLC has divided the Property into four Phases (1 through 4) for redevelopment. The Administrative Parcel is comprised of Phases 2 and 3.

The Property is currently occupied by three buildings, portions of two former structures, and footers and concrete pads from previous on-site buildings. A treatment system operated currently by EPA for treatment of groundwater and multiple monitoring wells are also present at the Property. The Property is bordered to the southwest by East Hancock Street, and to the west, northwest, and east by railroad lines. The ground surface elevation of the Property is approximately 370 feet above mean sea level. The Property consists of relatively flat terrain with a gradual slope towards the southwest. There are no surface water bodies located within the boundaries of the Property. The nearest body of water is the Towamencin Creek, which is located approximately 2,800 feet southwest of the Property. Surface water runoff following precipitation events either infiltrates the ground surface or drains towards the western portion of the Property prior to entering a swale adjacent to the neighboring railroad tracks. Surrounding land use includes commercial, industrial, and residential uses.

The Tate Andale Company formerly occupied the Property dating back to at least the 1920s, and historically used the Property to fabricate oil coolers, heaters, and strainers. Rogers Mechanical Company purchased the Property in 1985 and operated a plumbing and heating business. The former Tate Andale Company was one of twenty-six property owners/operators to be identified as a potentially responsible party (PRP) at the Site following the detection of groundwater contamination in the Lansdale area in 1979. North Penn Area 6 was proposed to the National Priorities List on January 22, 1987 (52 FR 27620), and became a Superfund Site when the listing became final on March 31, 1989 (54 FR 13296). EPA divided the Site into three operable units (OUs). Operable Unit One (OU1) consists of Fund-financed response actions to address the contaminated soils at certain of the properties that comprise the Site. Operable Unit Two (OU2) consists of PRP-financed response actions to address the contaminated soils at certain other properties that comprise the Site. Operable Unit Three (OU3) consists of Fund-financed and PRP-financed response actions to address the contaminated groundwater over the entire Site. All activities associated with investigation and remediation at the Property were performed by EPA and financed by the Fund, and are part of OU1 and OU3. The Administrative Parcel consists of soils and groundwater on the aforementioned approximately 6.5 acre portion of the Property.

Remedial Investigation and Feasibility Study (OU1)

Soils at the Property were investigated as part of the OU1 Remedial Investigation and Feasibility Study (RI/FS). The OU1 RI at the Property focused primarily on a coal ash and scrap metal pile located on the southwestern portion of the Property and another area on the eastern portion of the Property. Soil gas and soil samples were collected from these areas, and elevated levels of VOCs were found in the area on the eastern portion of the Property. Trichloroethylene (TCE) was detected at concentrations up to 4600 µg/kg, and contaminants associated with the breakdown of TCE were also found at elevated levels. The Risk Assessment determined that the contaminant levels would present a risk to groundwater, and a cleanup standard of 131 µg/kg for TCE in soil was determined to protect groundwater. An area comprising roughly 18,000 cubic feet of soil on the east side of the Property was determined to require treatment. The OU1 Feasibility Study considered alternatives for remediation of the VOC-contaminated soil including No Action, Containment with Cap, Vapor Extraction, Low Temperature Thermal Desorption, Soil Washing/Biotreatment, Excavation and Off-site Disposal, and In-Place Processing with Hot Air Injection.

Selected Remedy (OU1)

The Property was one of four properties addressed in the 1995 Record of Decision (ROD) for OU1. The OU1 Remedial Action Objective was to prevent further contamination of groundwater from contaminated soils. The selected alternative was in-place processing using hot air injection, with excavation and off-site disposal as a back-up. During the Remedial Design, it was determined that hot air injection would not achieve the performance standards of the OU1 ROD, and the backup remedy of excavation and off-site disposal was used to meet performance standards. Approximately 861 cubic yards of contaminated soil were removed from the Property as part of the OU1 remedial action and disposed of in a Resource Conservation and Recovery Act (RCRA) permitted landfill facility in Model City, New York. EPA approved the OU1 remedial action report for the Property in 2001.

Operable Unit 2 (OU2)

OU2 consists of soils investigations at certain enforcement-lead properties. The Property (including the Administrative Parcel to be deleted from the NPL) is not included in OU2.

Remedial Investigation and Feasibility Study (OU3)

Groundwater contamination was investigated as part of the RI/FS for OU3. Groundwater contamination at the Property is focused primarily in the southwestern portion of the Property. The OU3 RI/FS found contamination from VOCs at unacceptable levels in monitoring wells and a former production well (TA–1) on the Property. Contamination in well TA–1 was found at concentrations up to 7,740 µg/L of TCE, and the Property was included in the OU3 Feasibility Study to evaluate alternatives for treatment of the groundwater. The OU3 Feasibility Study considered several alternatives involving extraction of contaminated groundwater using differing treatment technologies and differing discharge points.

Selected Remedy (OU3)

The Property was included in the OU3 ROD in 2000, which called for construction of groundwater extraction and treatment systems at several properties, including the Property, included in the Site to remediate the contaminated groundwater. The goal of the groundwater extraction and treatment systems is to restore the aquifer to beneficial use as a potable use aquifer. The major components of the selected remedy in the OU3 ROD include the following:

- Completion of a groundwater remedial design study to determine the most efficient design of a groundwater extraction and treatment system.
- Installation, operation, and maintenance of on-site groundwater extraction wells to remove contaminated groundwater from beneath the Site and to prevent contaminants from migrating off-site.
- Installation, operation, and maintenance of air stripping treatment at on-site groundwater extraction wells to treat groundwater to required cleanup levels.
- Construction, operation, and maintenance of a pipeline from the on-site groundwater treatment systems to the nearest surface water body or storm drain leading to a surface water body.

• Periodic sampling of groundwater and treated water to ensure treatment components are effective and groundwater remediation is progressing towards the cleanup levels.

During the Remedial Design of the groundwater extraction and treatment system at the Property, EPA conducted a pump test on the extraction well at the Property. The well failed to produce an adequate yield of contaminated water to treat to significantly improve groundwater quality. As a result, EPA conducted additional testing to determine if adding a vapor extraction unit to the treatment system at the Property would increase contaminant removal and improve the performance of the OU3 selected remedy at the Property. Based on those results, EPA issued an Explanation of Significant Differences (ESD) on September 16, 2009, requiring implementation of a modified remedy at the Property which includes vapor extraction to enhance the performance of the remedy selected in the OU3 ROD. Testing also indicated that significant cost savings could be achieved by replacing the air stripper at the Property with a vessel containing granular activated carbon (GAC). Therefore, the ESD further allowed EPA to modify the OU3 remedy at the Property to allow for this form of treatment. The treatment system at the Property was built, and determined to be operational and functional in 2012. EPA plans on transferring the groundwater treatment system at the Property to PADEP for Operation and Maintenance (O&M) in 2022.

Response Actions

During the Remedial Design of the OU1 remedy to address contaminated soils at the Property, it was determined that the alternative selected in the OU1 ROD would not achieve the performance standards of the ROD; therefore, the backup remedy of excavation and off-site disposal was used to meet the performance standards. Approximately 861 cubic yards of contaminated soil were removed from the Property as part of the OU1 remedial action. EPA approved the OU1 remedial action report for the Property in 2001. No further actions to remediate the soil at the Property have been required.

During the Remedial Design of the OU3 remedy to address contaminated groundwater at the Property, it was determined that the alternative selected in the OU3 ROD would not treat enough contaminated water at the Property to significantly improve groundwater quality. As a result, EPA issued the ESD to require a modified remedy at the Property which includes vapor extraction and allows for the replacement of the air stripper with a vessel containing GAC to enhance the performance of the remedy selected in the OU3 ROD. EPA built the treatment system at the Property, and determined that it was operational and functional in 2012. EPA continues to operate and maintain the groundwater treatment system at the Property.

Cleanup Levels

In the OU1 ROD, EPA selected a soil cleanup level of 131 µg/kg of trichloroethylene (TCE) to be protective of groundwater. To expedite backfilling of excavated areas at the Property, EPA conducted Quality Control sampling prior to excavation to delineate the extent of contamination, and eliminate the need to keep excavation areas open while additional sampling and analysis were being performed to determine if the performance standard (cleanup level) for soil in the OU1 ROD had been met. Thirty samples were collected at the Property and sent for analysis. The performance standard was exceeded at one location; therefore, additional samples were collected further out. As a result of the sampling, the boundary of excavation was extended out five feet to comply with the OU1 performance standard. After the excavation and off-site disposal of soils was completed, EPA certified the OU1 Remedial Action at the Property to be complete.

The OU3 remedy to address contaminated groundwater called for restoration of the aquifer to beneficial use as a potable use aquifer. The OU3 ROD set the groundwater cleanup level as the EPA Maximum Contaminant Level (MCL). The MCL for TCE is 5 ug/L. There are currently ten monitoring wells on or near the Property: ROG–1S, ROG–1D, ROG–2S, ROG–2I, ROG–3S, ROG–3I, ROG–4S, ROG–4I, ROG–5, and ROG–6, in addition to the extraction well TA–1. Currently, only two of the monitoring wells at the Property, ROG–3S and ROG–4S, show contamination above the MCL. Most monitoring wells at the Property have shown downward trends in contamination since the OU3 remedy was implemented. The monitoring wells located in the Administrative Parcel (ROG–1S, ROG1D, ROG–2S, and ROG–2I) have never exhibited contaminant concentrations in excess of the performance standard (cleanup level) for groundwater in the OU3 ROD and are considered to be upgradient from the current contaminated groundwater plume.

Operation and Maintenance (O&M)

There are no O&M requirements and no institutional controls for OU1 at the Property. For OU3, EPA plans on transferring the groundwater treatment system at the Property to PADEP for O&M in 2022. There are no institutional controls for OU3 at the Property. The monitoring wells on the Administrative Parcel will continue to be sampled.

Five-Year Review

The selected remedial actions, upon completion, will not leave hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposure; however, the OU3 remedial action will require more than five years to complete. As a result, EPA will perform Five Year Reviews at the Site pursuant to Section 121(c) of CERCLA, 42 U.S.C. 9621(c), until the cleanup levels for groundwater in the OU3 ROD are achieved, allowing for unlimited use and unrestricted exposure. Five Year Reviews will be triggered by the date that construction is completed at the entire Site.

Additional Investigations

The owner of the Property performed additional investigations at the Property subsequent to EPA's investigations. In 2005, fifty soil borings were advanced throughout the Property. A soil sample was collected from each soil boring and analyzed for VOC contamination. No soil samples exceeded EPA's performance standards (cleanup levels) for soil in the OU1 ROD. Nine composite samples were also collected and analyzed for semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), pesticides, metals, and cyanide. SVOCs, PCBs, pesticides, and cyanide were not detected at elevated levels in these samples; however, arsenic was detected in three samples at levels that exceeded background and EPA Regional Screening Levels (RSLs). In 2006, the owner of the Property conducted additional sampling in the vicinity of the samples where the elevated levels of arsenic were found. Eighteen additional soil borings were advanced, and two soil samples were collected from each boring. Elevated levels of arsenic were detected in two soil borings. EPA conducted a more rigorous evaluation of the risks associated with the arsenic levels and determined that the risks associated with the concentrations are within EPA's acceptable risk range.

The owner of the Property also conducted sampling to evaluate the planned construction of a stormwater

basin on the Lansdale Borough electrical substation property located within the boundaries of the Property. Twelve test pits were excavated, two of which are located within the Administrative Parcel. The test pits were analyzed for VOCs, and a composite sample was analyzed for SVOCs, pesticides, PCBs, metals, and cyanide. No VOCs were detected at levels above EPA's performance standards (cleanup levels) for soil in the OU1 ROD. SVOCs, PCBs, metals, and cyanide were not detected at elevated levels.

The owner of the Property conducted additional sampling in 2016 on an approximately 3,000 cubic yard pile of top soil to be used as ground cover for the residential development. Twelve samples were collected from the pile and analyzed for metals. One sample was analyzed for hexavalent chromium. Metals concentrations were all found to be within EPA's acceptable risk range.

Community Involvement

Public participation activities have been satisfied as required in CERCLA section 113(k), 42 U.S.C. 9613(k), and CERCLA section 117, 42 U.S.C. 9617. Documents in the deletion docket on which EPA relied for recommendation of the deletion of the Administrative Parcel from the NPL are available to the public in the information repositories. The locations of the information repositories are set forth at the end of the Addresses section at the beginning of this notice.

Determination That the Criteria for Deletion Have Been Met

EPA has determined based on the investigations conducted that all appropriate response actions under CERCLA have been implemented at the Administrative Parcel. The remedial action for OU1 removed contaminated soil from the Administrative Parcel. The implemented OU1 remedy for soils has achieved performance standards specified in the OU1 ROD at the Administrative Parcel. The four monitoring wells (ROG1S, ROG1D, ROG2S, and ROG2I) that are located within the Administrative Parcel have not shown significant detections of contaminants. These wells are also considered upgradient from the current contaminated groundwater plume. The implemented OU3 remedy for groundwater has achieved performance standards specified in the OU3 ROD at the Administrative Parcel and will continue to extract and treat contaminated groundwater at other portions of the Property. The selected remedial action objectives and associated cleanup levels for OU1 and OU3 at the Administrative Parcel are consistent with agency policy and guidance and have been achieved at the Administrative Parcel. No further Superfund response action for the Administrative Parcel is needed to protect human health and the environment. Other procedures for deletion required by 40 CFR 300.425(e) are detailed in Section III of this direct Final Notice of Partial Deletion of a portion of the Site.

V. Partial Deletion Action

The EPA, with concurrence of the Commonwealth of Pennsylvania, through the PADEP, has determined that all appropriate response actions under CERCLA, other than five-year reviews and monitoring, have been completed for the Administrative Parcel. Therefore, EPA is deleting the Administrative Parcel portion of the North Penn Area 6 Superfund Site from the NPL.

Because EPA considers this action noncontroversial and routine, EPA is taking it without prior publication. This action will be effective February 21, 2017 unless EPA receives adverse comments by January 23, 2017. If adverse comments are received within the 30-day public comment period, EPA will publish a timely withdrawal of this direct final notice of partial deletion before the effective date of the partial deletion, and it will not take effect. EPA will prepare a response to comments and continue with the deletion process, as appropriate, on the basis of the notice of intent to partially delete and the comments already received. There will be no additional opportunity to comment.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: December 5, 2016.

Cecil Rodrigues,

Acting Regional Administrator, Region III.

For the reasons set out in this document, 40 CFR part 300 is amended as follows:

PART 300—NATIONAL OIL AND HAZARDOUS SUBSTANCES POLLUTION CONTINGENCY PLAN

■ 1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR 1987 Comp., p. 193.

■ 2. Table 1 of appendix B to part 300 is amended by revising the PA entry for ''North Penn-Area 6'', ''Lansdale'' to read as follows:

Appendix B to Part 300—[Amended]

TABLE 1—GENERAL SUPERFUND SECTION

State	Site name	City/County	Notes (a)
*	* * * * *	*	*
PA	North Penn-Area 6	Lansdale	P
*	* * * * *	*	*

(a) = Based on issuance of health advisory by Agency for Toxic Substances and Disease Registry (if scored, HRS score need not be greater than or equal to 28.50).
S = State top priority (included among the 100 top priority sites regardless of score).
P = Sites with partial deletion(s).

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances; Technical Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical correction.

SUMMARY: EPA issued a final rule in the **Federal Register** of November 17, 2016 for 57 chemical substances that were the subject of premanufacture notices (PMNs). For the chemical substance that was the subject of PMN P–15–614, EPA inadvertently listed an incorrect Chemical Abstract Service (CAS) Registry Number. In addition, for the chemical substance that was the subject of PMN P–16–52, EPA inadvertently used the incorrect name. The amendment in this document is being issued to correct these errors.

DATES: This technical correction is effective January 17, 2017.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPPT–2016–0207, is available at *http://www.regulations.gov* or at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Kenneth Moss, Chemical Control Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–9232; email address: *moss.kenneth@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

The Agency included in the November 17, 2016 final rule a list of those who may be potentially affected by this action.

II. What does this technical correction do?

EPA issued a final rule in the **Federal Register** of November 17, 2016 (81 FR 81250) (FRL–9953–41) for significant new uses for 57 chemical substances that were the subject of PMN notices. EPA included the wrong Chemical Abstracts Service (CAS) Registry Number for § 721.10949 and the wrong name for § 721.10958. This action corrects these errors.

III. Why is this correction issued as a final rule?

Section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(3)(B)) provides that, when an Agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the Agency may issue a final rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making this technical correction final without prior proposal and opportunity for comment. The SNUR at § 721.10949 contains the wrong CAS number associated with PMN P–15–614, and the SNUR at § 721.10958 contains the wrong name associated with PMN P–16–52 that was the basis for the SNUR. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(3)(B).

IV. Do any of the statutory and Executive Order reviews apply to this action?

No. For a detailed discussion concerning the statutory and executive order review, refer to Unit XII. of the November 17, 2016 final rule.

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and Recordkeeping requirements.

Dated: December 9, 2016.

Maria J. Doa,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR part 721 is corrected as follows:

PART 721—[AMENDED]

■ 1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

■ 2. In § 721.10949, revise paragraph (a)(1) to read as follows:

§ 721.10949 Neodymium sulfur yttrium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as neodymium sulfur yttrium oxide (PMN P–15–614; CAS No. 1651153–45–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

* * * * *

■ 3. In § 721.10958, revise the section heading and paragraph (a)(1) to read as follows:

§ 721.10958 Dialkylol amine, polymer with succinic anhydride and aromatic carboxylic acid (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as dialkylol amine, polymer with succinic anhydride and aromatic carboxylic acid (PMN P–16–52) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

[CMS–1651–CN]

Medicare Program; End-Stage Renal Disease Quality Incentive Program; Durable Medical Equipment, Prosthetics, Orthotics, and Supplies Competitive Bidding Program Bid Surety Bonds, State Licensure, and Appeals Process for Breach of Contract Actions; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects technical and typographical errors that appeared in the final rule published in the **Federal Register** on November 4, 2016, entitled ''Medicare Program; End-Stage Renal Disease Prospective Payment System, Coverage and Payment for Renal Dialysis Services Furnished to Individuals with Acute Kidney Injury, End-Stage Renal Disease Quality Incentive Program, Durable Medical Equipment, Prosthetics, Orthotics and Supplies Competitive Bidding Program Bid Surety Bonds, State Licensure and Appeals Process for Breach of Contract Actions, Durable Medical Equipment, Prosthetics, Orthotics and Supplies Competitive Bidding Program and Fee Schedule Adjustments, Access to Care Issues for Durable Medical Equipment; and the Comprehensive End-Stage Renal Disease Care Model.''

DATES: This correction is effective on January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Julia Howard, (410) 786–8645, for issues related to DMEPOS CBP and bid surety bonds, state licensure, and the appeals process for breach of DMEPOS CBP contract actions. Stephanie Frilling, (410) 786–4507, for issues related to the ESRD QIP.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2016–26152 of November 4, 2016 (81 FR 77834) (hereinafter referred to as the CY 2017 ESRD PPS final rule) there are technical and typographical errors that are discussed in the ''Summary of Errors,'' and further identified and corrected in the ''Correction of Errors'' section below. The provisions in this correction notice are effective as if they had been included in the CY 2017 ESRD PPS final rule published in the **Federal Register** on November 4, 2016.

II. Summary of Errors

On page 77874, we inadvertently made technical errors with respect to the calculation of the performance standard values in Table 2, ''Improvement of Performance Standards Over Time.''

On page 77886, we inadvertently made technical errors with respect to the calculation based on the most recently available data of the Achievement Threshold and Performance Standard values that apply to the Kt/V Composite, Standardized Transfusion Ratio and Hypercalcemia measures, and the calculation based on the most recently available data of the Achievement Threshold, Benchmark and Performance Standard values that apply to the ICH CAHPS measure in Table 6, ''Finalized Numerical Values for the Performance Standards for the PY 2019 ESRD QIP Clinical Measures Using the Most Recently Available Data.'' We also inadvertently included values for the Achievement Threshold, Benchmark and Performance Standard for the Standardized Hospitalization Ratio Clinical Measure, which is not a measure that we have adopted for the PY 2019 program.

On page 77897, we inadvertently included values for the Standardized Hospitalization Ratio Clinical Measure, which is not a finalized PY 2019 ESRD QIP measure, in Table 12, ''PY 2020 Clinical Measure Including Facilities With at Least 11 Eligible Patients Per Measure.''

On page 77932 we made a technical error in our response to the first comment under ''1. Bid Surety Bond Requirement''. In our response, we stated ''While we acknowledge that there will be a number of entities that are required to make large expenditures in order to obtain a bid surety bond for each CBA in which they are submitting a bid, we anticipate that this revision on the bid surety bond amount from $100,000 to $50,000 will reduce that overall burden on all suppliers.'' We inadvertently included the term ''suppliers'' at the end of the sentence but the term should read ''bidders.''

On page 77933 in our response to the comment on why the bid surety bond was only required until January 1, 2019, we inadvertently included a ''1'' in the reference to the round of competition in 2019 in which the bid surety bond requirement commences. The reference should read ''Round 2019'' and not ''Round 1 2019.''

At the top of page 77934 in our discussion on ''Appeals Process for a DMEPOS Competitive Bidding Breach of Contract Action'' we repeated a typographical error from the proposed rule (81 FR 42849) by stating that we proposed removing ''§ 414.423(g)(2)(i)'' from the regulation. The correct citation in this discussion should read ''§ 414.422(g)(2)(i)'', consistent with the proposal to remove corrective action plan from the list of actions for a breach of contract in the regulation, as described in the preamble and regulation text of the proposed and final rules (81 FR 42849, 42878, and 81 FR 77934, 77967).

III. Waiver of Proposed Rulemaking, 60-Day Comment Period, and Delay of Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rule in the **Federal Register** before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Act requires the Secretary to provide notice of the proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA, and section 1871(e)(1)(B)(i) of the Act mandate a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the notice and comment and delay in effective date. APA requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements as well. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment process are impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and an agency includes a statement of support.

In our view, this correcting document does not constitute rulemaking that would be subject to these requirements. This correcting document is simply correcting technical errors in the preamble and does not make substantive changes to the policies or payment methodologies that were adopted in the final rule, and therefore, it is unnecessary to follow the notice and comment procedure in this instance.

Even if this were a rulemaking to which the notice and comment and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the CY 2017 ESRD PPS final rule or delaying the effective date would be contrary to the public interest because it is in the public's interest for dialysis facilities to receive appropriate payments in as timely a manner as possible, and to ensure that the CY 2017 ESRD PPS final rule accurately reflects our policies as of the date they take effect and are applicable. Further, such procedures would be unnecessary, because we are not altering the payment methodologies or policies. For these reasons, we believe we have good cause to waive the notice and comment and effective date requirements.

IV. Correction of Errors

In FR Doc. 2016–26152 of November 4, 2016 (81 FR 77834), we make the following corrections:

1. On page 77874, Table 2 is corrected to read as follows:

TABLE 2—IMPROVEMENT OF PERFORMANCE STANDARDS OVER TIME

Measure	PY 2015	PY 2016	PY 2017	PY 2018	PY 2019
Hemoglobin >12 g/dL	1%	0%	.....	.....	.....
Vascular Access Type:					
% Fistula	60%	62.3%	64.46%	65.94%	65.93%

Rating of Nephrologist	3349	69.9	76.6	0.204	No	62.0	9.29	0.15	No.
Rating of dialysis facility staff	3349	70.9	77.4	0.215	No	62.0	9.92	0.16	No.
Rating of dialysis center	3349	73.8	80.6	0.221	No	64.8	10.18	0.16	No.

[1] Truncated mean for percentage is reversed (100 percent – truncated mean) for measures where lower score = better performance.

4. On page 77932, third column, line 17, the word ''suppliers'' is corrected to read as ''bidders''.

5. On page 77933, first column, line 30, remove the number ''1'' before ''2019''.

6. On page 77934, first column, line 3, the citation ''§ 414.423(g)(2)(i)'' is corrected to read ''§ 414.422(g)(2)(i)''.

Dated: December 19, 2016.

Madhura Valverde,

Executive Secretary to the Department, Department of Health and Human Services.

[FR Doc. 2016–31019 Filed 12–22–16; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 219

[Docket No. FRA–2001–11213, Notice No. 21]

Drug and Alcohol Testing: Determination of Minimum Random Testing Rates for 2017

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of determination.

SUMMARY: This notice of determination provides the FRA Administrator's minimum annual random drug and alcohol testing rates for calendar year 2017.

DATES: Effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Jerry Powers, FRA Drug and Alcohol Program Manager, W33–310, Federal Railroad Administration, 1200 New Jersey Avenue SE., Washington, DC 20590 (telephone 202–493–6313); or Sam Noe, FRA Drug and Alcohol Program Specialist (telephone 615–719–2951).

SUPPLEMENTARY INFORMATION: For the next calendar year, FRA determines the minimum annual random drug testing rate and the minimum annual random alcohol testing rate for railroad employees covered by hours of service laws and regulations (covered service employees) based on the railroad industry data available for the two previous calendar years (for this Notice, calendar years 2014 and 2015). Railroad industry data submitted to FRA's Management Information System (MIS) shows the rail industry's random drug testing positive rate for covered service employees has continued to be below 1.0 percent for the applicable two calendar years. FRA's Administrator has therefore determined the minimum annual random drug testing rate for the period January 1, 2017, through December 31, 2017, will remain at 25 percent of covered service employees under § 219.602 of FRA's drug and alcohol rule (49 CFR part 219). In addition, because the industry-wide random alcohol testing violation rate for covered service employees has continued to be below 0.5 percent for the applicable two calendar years, the Administrator has determined the minimum random alcohol testing rate will remain at 10 percent of covered service employees for the period January 1, 2017, through December 31, 2017, under § 219.608. Because these rates represent minimums, railroads may conduct FRA random testing at higher rates.

In a June 10, 2016, final rule, FRA expanded the scope of part 219 to cover maintenance-of-way (MOW) employees (81 FR 37894). MOW employees will become subject to FRA random drug and alcohol testing on June 12, 2017, when the final rule takes effect. In 1994, when FRA, in concert with the other DOT modes, established a drug MIS system (58 FR 68232, December 23, 1993), FRA set its initial minimum random drug testing rate at 50 percent for covered employees because of the lack of data to gauge the extent of the drug abuse problem at that time. FRA set its minimum random alcohol testing rate for covered employees at 25 percent for the same reason. As its MIS data continued to show consistently low industry-wide drug and alcohol positive rates among covered employees, FRA lowered its minimum annual random drug and alcohol testing rates to their current respective rates of 25 and 10 percent.

Similarly, because FRA has no MIS data for MOW employees yet, the Administrator has determined that for the period June 12, 2017, through December 31, 2017, the minimum annual random drug testing rate will be set at 50 percent of MOW employees, and the minimum annual random alcohol testing rate will be set at 25 percent of MOW employees. As with covered employees, because these rates represent minimums, railroads may conduct FRA random testing of MOW employees at higher rates.

Issued in Washington, DC, on December 20, 2016.

Sarah E. Feinberg,

Administrator.

[FR Doc. 2016–31009 Filed 12–22–16; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA–2008–0136, Notice No. 9]

RIN 2130–ZA14

Monetary Threshold for Reporting Rail Equipment Accidents/Incidents for Calendar Year 2017

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule increases the rail equipment accident/incident monetary reporting threshold (reporting threshold) from $10,500 to $10,700 for railroad accidents/incidents involving property damage that occur during calendar year (CY) 2017 that FRA's accident/incident reporting regulations require railroads to report to the agency. This action is needed to ensure FRA's reporting requirements reflect cost increases that have occurred since FRA last published the reporting threshold in December 2015.

DATES: This final rule is effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Kebo Chen, Staff Director, U.S. Department of Transportation, Federal Railroad Administration, Office of Safety Analysis, RRS–22, Mail Stop 25, West Building 3rd Floor, Room W33–314, 1200 New Jersey Ave. SE., Washington, DC 20590 (telephone 202–493–6079); or Gahan Christenson, Trial Attorney, U.S. Department of Transportation, Federal Railroad Administration, Office of Chief Counsel, RCC–10, Mail Stop 10, West Building 3rd Floor, Room W31–124, 1200 New Jersey Ave. SE., Washington, DC 20590 (telephone 202–493–1381).

SUPPLEMENTARY INFORMATION:

Background

A ''rail equipment accident/incident'' is a collision, derailment, fire, explosion, act of God, or other event involving the operation of railroad on-track equipment (standing or moving) that results in damages to railroad on-track equipment, signals, tracks, track structures, or roadbed, including labor costs and the costs for acquiring new equipment and material, greater than the reporting threshold for the year in which the event occurs. 49 CFR 225.19(c). A railroad must report each rail equipment accident/incident to FRA using the Rail Equipment Accident/Incident Report (Form FRA F 6180.54). *See* 49 CFR 225.19(b), (c) and 225.21(a). Paragraphs (c) and (e) of 49 CFR 225.19 further provide that FRA will adjust the dollar figure that constitutes the reporting threshold, if necessary, every year under the procedures in appendix B to 49 CFR part 225 (Appendix B) to reflect any cost increases or decreases.

In addition to periodically reviewing and adjusting the reporting threshold under Appendix B, FRA periodically amends its method for calculating the threshold. In 49 U.S.C. 20901(b), Congress requires that FRA base the reporting threshold on publicly available information obtained from the Bureau of Labor Statistics (BLS), other objective government source, or be subject to notice and comment. In 1996, FRA adopted a new method for calculating the reporting threshold for rail equipment accidents/incidents. *See* 61 FR 60632, Nov. 29, 1996. In 2005, FRA again amended its method for calculating the reporting threshold because the BLS ceased collecting and publishing the railroad wage data FRA used in the calculation. Consequently, FRA substituted railroad employee wage data the Surface Transportation Board (STB) collects for the data BLS ceased to collect. *See* 70 FR 75414, Dec. 20, 2005. In a separate rulemaking, FRA intends to evaluate and amend, if appropriate, its method for calculating the reporting threshold and, as a result, the formula used to calculate the reporting threshold may change. FRA intends to reexamine its method for calculating the reporting threshold because new methodologies for calculating the threshold are available. FRA believes updating its methodology to include these advances will ensure the reporting threshold reflects changes in equipment and labor costs as accurately as possible.

New Reporting Threshold

Approximately one year has passed since FRA reviewed the reporting threshold. *See* 80 FR 80683, Dec. 28, 2015. Consequently, FRA has recalculated the reporting threshold under 49 CFR 225.19(c), based on increased costs for labor and increased costs for equipment. FRA has determined that the current reporting threshold of $10,500, which applies to rail equipment accidents/incidents that occur during CY 2016, should increase by $200 to $10,700 for rail equipment accidents/incidents occurring during CY 2017. The specific inputs to the equation set forth in Appendix B (*i.e.,* $Tnew = Tprior * [1 + 0.4(Wnew - Wprior)/Wprior + 0.6(Enew - Eprior)/100]$) are:

Tprior	*Wnew*	*Wprior*	*Enew*	*Eprior*
$10,500	$29.99942	$29.80388	203.33333	200.63333

Where: *Tnew* = New threshold; *Tprior* = Prior threshold (with reference to the threshold, ''prior'' refers to the previous threshold rounded to the nearest $100, as reported in the **Federal Register**); *Wnew* = New average hourly wage rate, in dollars; *Wprior* = Prior average hourly wage rate, in dollars; *Enew* = New equipment average Producer Price Index (PPI) value; *Eprior* = Prior equipment average PPI value. Using the above figures, the calculated new threshold, (*Tnew*) is $10,697.669, which is rounded to the nearest $100 for a final new reporting threshold of $10,700 for CY 2017.[1]

[1] On June 12, 2013, Union Pacific Railroad Company filed a revised 2nd Quarterly Report of Wage A&B Data (Form A Wage Statistics Summary—0100) for 2012 with the Surface Transportation Board, following the publication of the 2013 threshold. Based upon the revised data, the 2013 threshold would have been $10,000 ($Tnew = 9500*(1+0.4*(26.10 - 24.93)/24.93+0.6*(191.5 - 186.37)/100.00) = 9970.76$). The current method for calculating the current threshold requires using the prior threshold as published in the **Federal Register**. Even though the corrected threshold for 2013 would have been higher at $10,000, leading to a higher *Tprior* in the calculation for 2014, the end result for 2014 is still $10,500 using the current formula.

Notice and Comment Procedures

In this rule, FRA has recalculated the reporting threshold based on the formula discussed in detail and adopted, after notice and comment, in the final rule published December 20, 2005. *See* 70 FR 75414, Dec. 20, 2005. FRA finds both the current cost data inserted into this pre-existing formula and the original cost data that they replace were obtained from reliable Federal government sources. FRA finds this rule imposes no additional burden on any person, but rather is intended to provide a benefit by permitting the valid comparison of accident data over time.

Accordingly, finding that notice and comment procedures are either impracticable, unnecessary, or contrary to the public interest, FRA is proceeding directly to a final rule.

FRA regularly reviews and recalculates the reporting threshold using the formula published in Appendix B near the end of each CY. Therefore, any person affected by this rule should anticipate the on-going adjustment of the reporting threshold and has reasonable time to make any minor changes necessary to come into compliance with the reporting requirements. FRA attempts to use the most recent data available to calculate the updated reporting threshold prior to the next CY. FRA has found that issuing the rule no later than December of each CY and making the rule effective on January 1, of the next year, allows FRA to use the most up-to-date data when calculating the reporting threshold and to compile data that accurately reflects rising wages and equipment costs. As such, FRA finds that it has good cause to make this final rule effective January 1, 2017.

Regulatory Evaluation

Executive Orders 12866 and 13563 and DOT Regulatory Policies and Procedures

FRA evaluated this final rule under existing policies and procedures and determined it is non-significant under both Executive Orders 12866 and 13563, and DOT policies and procedures. *See* 44 FR 11034, Feb. 26, 1979.

Regulatory Flexibility Act

FRA developed this rule under Executive Order 13272 (''Proper Consideration of Small Entities in Agency Rulemaking'') and DOT's procedures and policies to promote compliance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) to ensure potential impacts of rules on small entities are properly considered.

The Regulatory Flexibility Act requires an agency to review regulations to assess their impact on small entities, unless the Secretary certifies the rule will not have a significant economic impact on a substantial number of small entities. Under Section 312 of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), Federal agencies may adopt their own size standards for small entities in consultation with SBA and in consultation with public comment. Under that authority, FRA has published a final statement of agency policy formally establishing for FRA's regulatory purposes ''small entities'' as railroads, contractors, and hazardous materials shippers that meet the revenue requirements of a Class III railroad as set forth in 49 CFR 1201.1–1 ($20 million or less in inflation-adjusted annual revenues, and commuter railroads or small governmental jurisdictions that serve populations of 50,000 or less). *See* 49 CFR part 209, appendix C. FRA used this definition for this rulemaking.

About 743 of the approximately 792 railroads in the United States are considered small entities by FRA. FRA certifies that this final rule will have no significant economic impact on a substantial number of small entities. To the extent that this rule has any impact on small entities, the impact will be neutral or insignificant. The frequency of rail equipment accidents/incidents, and therefore also the frequency of required reporting, is generally proportional to the size of the railroad. A railroad employing thousands of employees and operating trains millions of miles is exposed to greater risks than one whose operation is substantially smaller. Small railroads may go for months at a time without having a reportable occurrence of any type, and even longer without having a rail equipment accident/incident. For example, FRA data indicate railroads reported 2,029 rail equipment accidents/incidents in 2011, with small railroads reporting 276 of them. Data for 2012 show railroads reported 1,765 rail equipment accidents/incidents, with small railroads reporting 254 of them. Data for 2013 show that 1,849 rail equipment accidents/incidents were reported, with small railroads reporting 271 of them. In 2014, 1,870 rail equipment accidents/incidents were reported, and small railroads reported 230 of them. In 2015, 1,912 rail equipment accidents/incidents were reported, with small railroads reporting 253 of them. On average over those five calendar years, small railroads reported about 14% (ranging from 12% to 15%) of the total number of rail equipment accidents/incidents. FRA notes that these data are accurate as of the date of issuance of this final rule, and are subject to minor changes due to additional reporting. Absent this rulemaking (*i.e.,* absent increasing the reporting threshold), the number of reportable accidents/incidents in CY 2017 would likely increase, as keeping the 2016 threshold in place would not allow it to keep pace with the increasing dollar amounts of wages and rail equipment repair costs. Therefore, this rule will be neutral in effect. Increasing the reporting threshold will slightly decrease the recordkeeping burden for railroads over time. Any recordkeeping burden will not be significant and will affect the large railroads more than the small railroads, due to the higher proportion of reportable rail equipment accidents/incidents experienced by large entities.

Furthermore, FRA has determined the RFA does not apply to this rulemaking. Given this rule merely updates the reporting threshold for CY 2017 using the formula developed through notice and comment rulemaking and published in Appendix B, FRA finds notice and public comment is unnecessary and would serve no public benefit. The Small Business Administration's *A Guide for Government Agencies: How to Comply with the Regulatory Flexibility Act* (2012, p.55), provides:

> If, under the APA or any rule of general applicability governing federal grants to state and local governments, the agency is required to publish a general notice of proposed rulemaking (NPRM), the RFA must be considered [citing 5 U.S.C. 604(a)] . . . . If an NPRM is not required, the RFA does not apply.

Because this rulemaking does not require a Notice of Proposed Rulemaking, the RFA does not apply.

Paperwork Reduction Act

There are no new or additional information collection requirements associated with this final rule. FRA's collection of accident/incident reporting and recordkeeping information is currently approved under OMB No. 2130–0500. Therefore, FRA is not required to provide an estimate of a public reporting burden in this document.

Federalism Implications

Executive Order 13132, ''Federalism'' (64 FR 43255, Aug. 10, 1999), requires FRA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' are defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Under Executive Order 13132, the agency may not issue a regulation with federalism implications that imposes substantial direct compliance costs and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or the agency consults

with State and local government officials early in the process of developing the regulation. Where a regulation has federalism implications and preempts State law, the agency seeks to consult with State and local officials in the process of developing the regulation.

FRA analyzed this final rule under the principles and criteria in Executive Order 13132. This rule will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and the responsibilities among the various levels of government, as specified in Executive Order 13132. In addition, FRA determined this rule does not impose substantial direct compliance costs on State and local governments. Accordingly, FRA concluded the consultation and funding requirements of Executive Order 13132 do not apply and preparation of a federalism assessment is not required.

Environmental Impact

FRA evaluated this final rule under its ''Procedures for Considering Environmental Impacts'' (FRA's Procedures) (64 FR 28545, May 26, 1999) as required by the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and related regulatory requirements. FRA has determined this final rule is not a major FRA action (requiring the preparation of an environmental impact statement or environmental assessment) because it is categorically excluded from detailed environmental review under section 4(c)(20) of FRA's Procedures. *See* 64 FR 28547, May 26, 1999. Section 4(c)(20) reads as follows:

(c) Actions categorically excluded. Certain classes of FRA actions have been determined to be categorically excluded from the requirements of these Procedures as they do not individually or cumulatively have a significant effect on the human environment. . . . The following classes of FRA actions are categorically excluded: . . . (20) Promulgation of railroad safety rules and policy statements that do not result in significantly increased emissions or air or water pollutants or noise or increased traffic congestion in any mode of transportation.

Consistent with section 4(c)(20) of FRA's Procedures, FRA concluded that no extraordinary circumstances exist with respect to this regulation that might trigger the need for a more detailed environmental review. As a result, FRA finds this rule is not a major Federal action significantly affecting the quality of the human environment.

Unfunded Mandates Reform Act of 1995

Under Section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1531), each Federal agency ''shall, unless otherwise prohibited by law, assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector (other than to the extent that such regulations incorporate requirements specifically set forth in law).'' Section 202 of the Act (2 U.S.C. 1532) further requires that before promulgating any general notice of proposed rulemaking that is likely to result in the promulgation of any rule that includes any Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any 1 year, and before promulgating any final rule for which a general notice of proposed rulemaking was published, the agency shall prepare a written statement detailing the effect on State, local, and tribal governments and the private sector. This final rule will not result in the expenditure of more than $156,000,000 by the public sector in any one year. Thus, preparation of such a statement is not required.

Energy Impact

Executive Order 13211 requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' 66 FR 28355, May 22, 2001. Under the Executive Order, a ''significant energy action'' is defined as any action by an agency (normally published in the **Federal Register**) that promulgates or is expected to lead to the promulgation of, a final rule or regulation (including a notice of inquiry, advance notice of proposed rulemaking, and notice of proposed rulemaking) that (1)(i) is a significant regulatory action under Executive Order 12866 or any successor order, and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. FRA has evaluated this rule under Executive Order 13211. FRA has determined this rule will not have a significant adverse effect on the supply, distribution, or use of energy, and, thus, is not a ''significant energy action'' under Executive Order 13211.

Executive Order 12898 (Environmental Justice)

Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, and DOT Order 5610.2(a) (91 FR 27534, May 10, 2012) require DOT agencies to achieve environmental justice as part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects, including interrelated social and economic effects, of their programs, policies, and activities on minority populations and low-income populations. The DOT Order instructs DOT agencies to address compliance with Executive Order 12898 and requirements within the DOT Order in rulemaking activities, as appropriate. FRA evaluated this final rule under Executive Order 12898 and the DOT Order and determined it would not cause disproportionately high and adverse human health and environmental effects on minority or low-income populations.

Executive Order 13175 (Tribal Consultation)

FRA evaluated this final rule under the principles and criteria in Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. This final rule will not have a substantial direct effect on one or more Indian tribes, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal laws. Therefore, the funding and consultation requirements of Executive Order 13175 do not apply, and a tribal summary impact statement is not required.

Trade Impact

The Trade Agreements Act of 1979 (19 U.S.C. 2501 *et seq.*) prohibits Federal agencies from engaging in any standards setting or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. FRA assessed the potential effect of this final rule on foreign commerce and concluded its requirements are consistent with the Trade Agreements Act.

Privacy Act

Interested parties should be aware that anyone can search the electronic form of all written comments received

into any agency docket by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** (65 FR 19477–19478, Apr. 11, 2000) or you may visit *http://www.transportation.gov/privacy.*

List of Subjects in 49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Rule

In consideration of the foregoing, FRA amends part 225 of chapter II, subtitle B of title 49, Code of Federal Regulations, as follows:

PART 225—[AMENDED]

■ 1. The authority citation for part 225 continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–02, 21301, 21302, 21311; 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 2. In § 225.19, revise the first sentence of paragraph (c), and paragraph (e) to read as follows:

§ 225.19 Primary groups of accidents/incidents.

* * * * *

(c) *Group II—Rail equipment.* Rail equipment accidents/incidents are collisions, derailments, fires, explosions, acts of God, and other events involving the operation of on-track equipment (standing or moving) that result in damages higher than the current reporting threshold (*i.e.,* $6,700 for calendar years 2002 through 2005, $7,700 for calendar year 2006, $8,200 for calendar year 2007, $8,500 for calendar year 2008, $8,900 for calendar year 2009, $9,200 for calendar year 2010, $9,400 for calendar year 2011, $9,500 for calendar year 2012, $9,900 for calendar year 2013, $10,500 for calendar year 2014, $10,500 for calendar year 2015, $10,500 for calendar year 2016, and $10,700 for calendar year 2017) to railroad on-track equipment, signals, tracks, track structures, or roadbed, including labor costs and the costs for acquiring new equipment and material. * * *

* * * * *

(e) The reporting threshold is $6,700 for calendar years 2002 through 2005, $7,700 for calendar year 2006, $8,200 for calendar year 2007, $8,500 for calendar year 2008, $8,900 for calendar year 2009, $9,200 for calendar year 2010, $9,400 for calendar year 2011, $9,500 for calendar year 2012, $9,900 for calendar year 2013, $10,500 for calendar year 2014, $10,500 for calendar year 2015, $10,500 for calendar year 2016, and $10,700 for calendar year 2017. The procedure for determining the reporting threshold for calendar years 2006 and beyond appears as paragraphs 1–8 of appendix B to part 225.

* * * * *

Sarah E. Feinberg,

Administrator.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 11

[Docket No. FWS–HQ–LE–2016–0045; FF09L00200–FX–LE18110900000]

RIN 1018–BB32

Civil Penalties; Inflation Adjustments for Civil Monetary Penalties

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Adoption of interim rule as final rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service or we) is adopting, as a final rule, without change, an interim rule that revised our civil procedure regulations and increased civil monetary penalties for inflation.

DATES: Effective on December 23, 2016.

FOR FURTHER INFORMATION CONTACT: Paul Beiriger, Special Agent in Charge, Branch of Investigations, U.S. Fish and Wildlife Service, Office of Law Enforcement, (703) 358–1949.

SUPPLEMENTARY INFORMATION:

Background

The regulations at 50 CFR part 11 provide uniform rules and procedures for the assessment of civil penalties resulting from violations of certain laws and regulations enforced by the Service.

On June 28, 2016, the Service published in the **Federal Register** an interim rule (81 FR 41862) that amended 50 CFR part 11, in accordance with the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Inflation Adjustment Act; sec. 701 of Pub. L. 114–74) and Office of Management and Budget guidance, to adjust for inflation the statutory civil monetary penalties that may be assessed for violations of Service-administered statutes and their implementing regulations. We are required to adjust civil monetary penalties as necessary for inflation according to a formula specified in the Inflation Adjustment Act.

The interim rule became effective on July 28, 2016. We accepted public comments for 60 days on the interim rule, ending August 29, 2016. By that date, we did not receive any comments on the interim rule. Therefore, we are affirming the interim rule as a final rule, without change.

The interim rule is available at *http://www.regulations.gov* under Docket No. FWS–HQ–LE–2016–0045.

List of Subjects in 50 CFR Part 11

Administrative practice and procedure, Exports, Fish, Imports, Penalties, Plants, Transportation, Wildlife.

PART 11—CIVIL PROCEDURES

■ Accordingly, we are adopting as a final rule, without change, the interim rule amending 50 CFR part 11 that was published at 81 FR 41862 on June 28, 2016.

Dated: December 12, 2016.

Michael J. Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

Proposed Rules

Federal Register
Vol. 81, No. 247
Friday, December 23, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[NRC–2016–0270]

Guidance for Implementation of 10 CFR 50.59, 'Changes, Tests, and Experiments'

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG–1334, ''Guidance for Implementation of 10 CFR 50.59, 'Changes, Tests, and Experiments.' '' This draft regulatory guide provides licensees and applicants with a method that the staff of the NRC considers acceptable for use in complying with the Commission's regulations on the process by which licensees may make changes to their facilities and procedures, as described in the safety analysis report, without prior NRC approval, under certain conditions.

DATES: Submit comments by February 21, 2017. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specified subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0270. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. For additional direction on accessing information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Brian Harris, Office of Nuclear Reactor Regulation, telephone: 301–415–2277; email: *Brian.Harris2@nrc.gov* and Mark Orr, Office of Nuclear Regulatory Research, telephone: 301–415–6003; email: *Mark.Orr@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0270 when contacting the NRC about the availability of information regarding this action. You may obtain publically-available information related to this action, by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0270.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The draft regulatory guide is electronically available in ADAMS under Accession No. ML16089A381. The regulatory analysis for DG–1334 is available in ADAMS under Accession number ML16089A379.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0270 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http://www.regulations.gov* as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a draft regulatory guide (DG–1334) in the NRC's ''Regulatory Guide'' series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled, ''Guidance for Implementation of 10 CFR 50.59, 'Changes, Tests, and Experiments.' '' is a proposed revision temporarily identified by its task number, DG–1334. DG–1334 is proposed revision 1 of RG 1.187, ''Guidance for Implementation of 10 CFR 50.59, 'Changes, Tests, and Experiments.' '' The draft regulatory guide provides licensees and applicants with a method that the NRC staff considers acceptable for use in complying with the Commission's regulations on the process by which licensees may make changes to their facilities and procedures as described in

the safety analysis report, without prior NRC approval, under certain conditions. The NRC has also prepared a regulatory analysis (ADAMS Accession number ML16089A379) in support of DG–1334.

This draft regulatory guide clarifies potentially unclear statements in Section 4.3.8 of Nuclear Energy Institute document 96–07, Revision 1, ''Guidelines for 10 CFR 50.59 Implementation,'' (ADAMS Accession number ML003771157) which was endorsed in RG 1.187, Rev 0, (ADAMS Accession number ML003759710) as acceptable guidance for how to comply with NRC regulations in section 50.59 of title 10 of the *Code of Federal Regulations* (10 CFR). Because of the potentially unclear statements in Section 4.3.8 of NEI 96–07, licensees may misinterpret the definition governing the ''. . . departure from a method of evaluation . . .'' described in the plant's final safety analysis report (as updated).

The draft regulatory guide also adds clarification to statements in Section 4.3.5 of NEI 96–07, Revision 1, whereby licensees may misinterpret the last sentence in the second paragraph in Section 4.3.5 if considered in isolation of the statements earlier discussed in the paragraph.

III. Backfitting and Issue Finality

Draft regulatory guide DG–1334, if finalized as Regulatory Guide 1.187, Revision 1, would provide guidance on acceptable ways of determining whether licensees may make changes to their facilities and procedures as described in the safety analysis report, without prior NRC approval, under the change process established in 10 CFR 50.59. The draft regulatory guide, if finalized, would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52, ''Licenses, Certifications and Approvals for Nuclear Power Plants.'' The subject of this draft regulatory guide, as described above, is an NRC-defined process which does not fall within the purview of subjects covered by either the Backfit Rule or the issue finality provision in 10 CFR part 52. Issuance of the draft regulatory guide, in final form, would not constitute backfitting, and no further consideration of backfitting is required in order to issue the draft or final regulatory guide in final form.

Dated at Rockville, Maryland, this 19th day of December, 2016.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2016–30921 Filed 12–22–16; 8:45 am]

BILLING CODE 7590–01–P

FEDERAL RESERVE SYSTEM

12 CFR Parts 217 and 225

[Docket No. R–1547; RIN 7100 AE–58

Risk-Based Capital and Other Regulatory Requirements for Activities of Financial Holding Companies Related to Physical Commodities and Risk-Based Capital Requirements for Merchant Banking Investments, Regulations Q and Y

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of proposed rulemaking; extension of comment period.

SUMMARY: On September 30, 2016, the Board published in the **Federal Register** a notice of proposed rulemaking (NPR) to adopt additional limitations on physical commodity trading activities conducted by financial holding companies under complementary authority granted pursuant to section 4(k) of the Bank Holding Company Act and clarify certain existing limitations on those activities; amend the Board's risk-based capital requirements to better reflect the risks associated with a financial holding company's physical commodity activities; rescind the findings underlying the Board orders authorizing certain financial holding companies to engage in energy management services and energy tolling; remove copper from the list of metals that bank holding companies are permitted to own and store as an activity closely related to banking; and increase transparency regarding physical commodity activities of financial holding companies through more comprehensive regulatory reporting.

Due to the range and complexity of the issues addressed in the NPR, the public comment period has been extended until February 20, 2017. This action will allow interested persons additional time to analyze the proposal and prepare their comments.

DATES: The comment period for the notice of proposed rulemaking published on September 23, 2016, (81 FR 67220) regarding risk-based capital and other regulatory requirements for activities of financial holding companies related to physical commodities and risk-based capital requirements for merchant banking investments is extended from December 22, 2016 to February 20, 2017.

ADDRESSES: You may submit comments by any of the methods identified in the NPR.[1] Please submit your comments using only one method.

FOR FURTHER INFORMATION CONTACT: Constance M. Horsley, Assistant Director, (202) 452–5239, Elizabeth MacDonald, Manager, (202) 475–6316, Kevin Tran, Supervisory Financial Analyst, (202) 452–2309, or Vanessa Davis, Supervisory Financial Analyst, (202) 475–6674, Division of Banking Supervision and Regulation; or Laurie Schaffer, Associate General Counsel, (202) 452–2277, Michael Waldron, Special Counsel, (202) 452–2798, Will Giles, Senior Counsel, (202) 452–3351, or Mary Watkins, Attorney, (202) 452–3722, Legal Division, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551. For the hearing impaired only, Telecommunication Device for the Deaf (TDD), (202) 263–4869.

SUPPLEMENTARY INFORMATION: On September 30, 2016, the Board published in the **Federal Register** the NPR. The Board originally set the end of comment period as December 22, 2016, which is 90 days after the date the proposal was published on the Board's Web site and 83 days after the date the proposal was published in the **Federal Register**.

The Board has received comment letters requesting that the Board extend the comment period for the NPR.[2] In support of this request, commenters assert that the December 22, 2016 deadline does not provide sufficient time to thoroughly analyze the full impact of this complex and wide-ranging proposal. The commenters note that a variety of types of participants in physical commodities markets, such as mining companies, other upstream producers and municipally-owned natural gas districts, may be impacted by the multiple proposals contained in the Commodities NPR and that additional time is needed to understand those impacts and develop meaningful, constructive comments.

Due to the range and complexity of the issues addressed in the NPR, the public comment period has been

[1] *See* 81 FR 67220 (September 30, 2016).

[2] The Board has received requests from Barrick Gold of North America, the National Mining Association, and Clarke Mobile Counties Gas District and its affiliate, the Black Belt Energy Gas District, to extend the end of the comment period.

extended until February 20, 2017. This action will allow interested persons additional time to analyze the proposal and prepare their comments.

By order of the Board of Governors of the Federal Reserve System, acting through the Secretary of the Board under delegated authority, December 20, 2016.

Robert deV. Frierson,

Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 91

[Docket No. FAA–2015–2147; Notice No. 15–05]

RIN 2120–AK51

Transponder Requirement for Gliders; Withdrawal

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM); withdrawal.

SUMMARY: The FAA is withdrawing a previously published advance notice of proposed rulemaking that sought public comment from interested persons involving glider operations in the National Airspace System. The action responded to recommendations from members of Congress and the National Transportation Safety Board and was intended to gather information to determine whether the current glider exception from transponder equipage and use provides the appropriate level of safety in the National Airspace System. The FAA is withdrawing that action because the limited safety benefit gained does not justify the high cost of equipage.

DATES: This action becomes effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this action, contact Patrick J. Moorman, Airspace Regulations Team, AJV–113, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8783; email: *patrick.moorman@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

On August 28, 2006, a Hawker 800XP aircraft [1] and a Schleicher ASW27–18 glider were involved in a non-fatal midair collision near Reno, Nevada. The collision occurred in flight about 42 nautical miles (NM) south-southeast of the Reno-Tahoe International Airport (RNO), at an altitude of about 16,000 feet (ft.) above mean sea level (MSL), and in an area where gliders are excepted from the transponder equipment requirements in Title 14, section 91.215(b), of the Code of Federal Regulations (14 CFR).[2] The glider was equipped with a transponder, but the transponder was not turned on at the time of the accident.

On March 31, 2008, the National Transportation Safety Board (NTSB) provided safety recommendations to the FAA resulting from an investigation of the accident.[3] The findings of the accident investigation address the limitations of the see-and-avoid concept in preventing midair collisions and, more specifically, the benefits of using transponders in gliders for collision avoidance. The NTSB recommended that the FAA remove the glider exceptions pertaining to the transponder equipment and use requirements, finding that ''transponders are critical to alerting pilots and controllers to the presence of nearby traffic so that collisions can be avoided.''

On June 16, 2015, the FAA published an Advance Notice of Proposed Rulemaking (ANPRM) to respond to recommendations from two members of Congress [4] and the NTSB. 80 FR 34346. The ANPRM requested comments on a proposed rulemaking that would require gliders operating in the National Airspace System (NAS) to be equipped with transponders. The FAA did not propose specific regulatory changes but rather sought public comment on the use of transponders in gliders operating within the excepted areas of § 91.215. The ANPRM also sought input on more recent alternatives to glider equipage including the use of Traffic Awareness Beacon System (TABS) [5] and Automatic Dependent Surveillance Broadcast (ADS–B) Out equipment.[6] The FAA asked for comments from the public and industry to aid in the development of a proposed rule and the analysis of its economic impact.

Overview of Withdrawal

Based on the information gathered from the ANPRM and a review of the current operating environment, the FAA finds that it does not have sufficient basis to move forward with rulemaking at this time. While the FAA has determined it is not warranted to move forward with a proposal to remove the glider exception in § 91.215, the FAA will continue to work with local glider communities to increase safety awareness. The FAA will also continue to consider surveillance system alternatives and to work with interested persons to mitigate the risk of aircraft collision with gliders. Further, the FAA recommends that all glider aircraft owners equip their gliders with a transponder meeting regulatory requirements, a rule-compliant ADS–B Out system, or a TABS device.

Comment Summary

The FAA received 231comments in response to its ANPRM. Of the 231 comments received, approximately 18 organizations and 213 individual or anonymous commenters responded. Approximately 161 comments were unfavorable (adverse), 52 comments were favorable, and 18 comments were

[1] The Hawker 800XP aircraft was equipped with a Traffic Alert and Collision Avoidance System (TCAS). TCAS is a family of airborne devices that function independently of the ground-based air traffic control (ATC) system, and provide collision avoidance protection for a broad spectrum of aircraft types. All TCAS systems provide some degree of collision threat alerting, and a traffic display.

[2] The exceptions to the rule allow aircraft that were originally certificated without an engine-driven electrical system, such as balloons and gliders, to be operated in the following areas without a transponder: within a 30 nautical mile radius (NMR) of the 36 listed airports listed in Appendix D to part 91 (Mode C veil), provided aircraft remain outside the Class A, B, or C airspace and are below the ceiling of the airspace designated for the Class B or C airport, or 10,000 feet MSL, whichever is lower; above 10,000 feet MSL; and in the airspace from the surface to 10,000 feet MSL within a 10 NMR of any airport listed in appendix D, excluding the airspace below 1,200 feet outside of the lateral boundaries of the surface area of the airspace designated for that airport.

[3] A–08–10 through 13, Safety Recommendations. National Transportation Safety Board, Washington, DC 20594, March 31, 2008. A copy of this letter has been placed in the docket. *www.regulations.gov* docket FAA–2005–2147. Note: while NTSB used the term ''exemption'' the correct term as it relates to this airspace is ''excepted.''

[4] The FAA received letters from Senator Harry Reid (D–NV) and Representative Mark E. Amodei (R–NV); Letters are posted to the docket at *www.regulations.gov,* docket no. FAA–2015–2147.

[5] TABS is a surveillance system derived from existing transponder and ADS–B requirements. It was developed to increase safety by providing a standard for a low cost surveillance solution for aircraft excepted from §§ 91.215 and 91.225. An aircraft equipped with TABS is visible to other aircraft equipped with collision avoidance systems such as Traffic Advisory System (TAS), Traffic Alert and Collision Avoidance System (TCAS) I, TCAS–II, and ADS–B In. However, a TABS-equipped aircraft is not displayed to controllers. The FAA published Technical Standard Order (TSO)–C199, the standard for TABS, on October 10, 2014.

[6] ADS–B is a satellite-based surveillance system that uses Global Positioning System (GPS) technology to determine an aircraft's location, airspeed, and other data, and broadcasts that information to a network of ground stations, which relays the data to air traffic control displays, and to nearby aircraft equipped to receive the data via ADS–B In.

neutral. Of the 18 organizations that commented, 14 responded unfavorably (adverse), 2 favorably, and 2 were neutral. Three comments received after the comment period closed were also considered.

The following organizations responded: Soaring Society of America (SSA), Aircraft Owners and Pilots Association (AOPA), Vintage Sailplane Association (VSA), Experimental Aircraft Association (EAA), Civil Air Patrol (CAP), National Transportation Safety Board (NTSB), American Association for Justice (AAJ), and approximately 11 local soaring clubs or groups. Individual and anonymous commenters were representative of all pilot types: glider, general aviation (GA), airline and military, many commenters holding multiple ratings, with glider and general aviation pilots representing the majority.

Individual and anonymous commenters in favor of removing the transponder exception were primarily concerned about safety, some relaying personal experiences not accompanied by supporting documentation, such as a near mid-air collision (NMAC) report.[7] Several commenters recommended the FAA consider alternatives to transponder equipage, including ADS–B,TABS, or FLARM.[8]

All comments are available for viewing in the rulemaking docket (FAA–2015–2147). To view comments, go to *http://www.regulations.gov* and insert the docket number.

Discussion of Comments

1. Safety Benefit of Transponders

Of the approximately 161 unfavorable (adverse) comments received, many addressed the high cost of transponder equipage and the limited safety benefit by requiring such equipage.

During the ANPRM process, the FAA also reviewed glider midair and NMAC reports at the local and national level. After further analysis of safety related statistics, the FAA found that nationally, from August 2005 through August 2015, the Aviation Safety Reporting System (ASRS) database reflects 1,841 reported NMAC for all airspace areas. Of these NMACs, 50 involve a glider and another aircraft type, or 2.72% of reported NMACs over a 10-year period for an average of 5NMACs per year. In 2008, the last year data was available for all aircraft categories, statistics show there were 236,519 active aircraft, including 1,914 gliders, or about 0.81% of the active fleet.

Nationally, the removal of the glider exception from § 91.215 would help to prevent those instances where a glider NMAC occurs with an aircraft equipped with a Traffic Alert and Collision Avoidance System (TCAS).[9] [10] However, instances where removal of the glider exception from § 91.215 help prevent a glider NMAC due to increased air traffic controller awareness are assumed negligible overall, because the operating areas for gliders are often in places with little or no radar coverage. Furthermore, because gliders can maneuver rapidly, glider flight paths are difficult for the Air Traffic Control (ATC) automation system to accurately project. Over the 10-year period reviewed, of the 50 reported NMACs involving a glider and another aircraft type, 7 involved a glider and part 121 or 135 air carriers required to have TCAS. Using this analysis, removal of the glider exception from § 91.215 has the potential to reduce the NMAC occurrences by about 0.70 occurrences per year, or about 2 NMACs every 3 years (0.38% of all reported NMACs per year over that period).

Assuming all of these NMACs would occur between gliders and air carrier aircraft,[11] this would represent an incremental NMAC hazard of approximately 3.8×10^{-8}/flight hour to the air carrier aircraft, based on air carrier flight hour data for years 2010–2014 published on the NTSB's Web site. This rate of occurrence is within the acceptable hazard level guidelines for a Hazardous failure condition (not greater than the order of 1×10^{-7}/flight hour) according to the FAA System Safety Handbook, Appendix B.[12]

Therefore, based on the nationwide rate of occurrence, safety risk data does not support a rule requiring glider operators to install a transponder device at this time. Furthermore, the number of gliders voluntarily equipping with collision avoidance systems has increased steadily. Per the General Aviation and Part 135 Activity Surveys, the number of gliders equipped with a transponder device has gone from 14% in 2006, to 24.3% in 2014, the last year this data was available.[13]

Locally in the airspace surrounding Reno, Nevada, the NTSB noted four TCAS Resolution Advisory (RA) events in the 30 days prior to the accident, each between a glider and a TCAS-equipped transport category aircraft operated under 14 CFR part 121.[14] For these RAs to occur, the glider involved in each RA would have to be flying with an operable transponder (turned on).

Although this data supports the value of transponders in avoiding collisions, since the accident, the FAA and local glider community have also taken several measures to mitigate the risk of midair collisions within and around Reno, NV. First, advisory information on the heavy glider activity unique to the local area was published in official FAA flight information publications including the Chart Supplement, Special Notices, and Standard Terminal Arrival Routes (STARs) for Reno/Tahoe International Airport after the event. Second, on October 29, 2010, a Letter of Agreement (LOA) was signed between representatives for the local glider

[7] An NMAC is an incident associated with the operation of an aircraft in which a possibility of a collision occurs as a result of proximity of less than 500 feet to another aircraft, or a report is received from flightcrew members stating that a collision hazard existed between two or more aircraft. A report does not necessarily involve the violation of regulations or error by the air traffic control system, nor does it necessarily represent an unsafe condition. The fact that flightcrew members initiate NMAC reports raises two important issues. First, to some degree the data likely will be subjective. This necessitates that considerable caution be exercised when evaluating individual NMAC reports. Second, it is most likely the number of NMAC reports filed will not represent the totality of such events.

[8] FLARM is an electronic system designed to alert pilots of potential collisions between aircraft. FLARM is approved by the European Aviation Safety Agency for fixed installation in certified aircraft. Aircraft equipped with FLARM (including a variant known as PowerFLARM that can receive transponder and ADS–B signals from other aircraft) are visible only to other FLARM-equipped aircraft. There is no FAA TSO for FLARM because FLARM uses proprietary technology rather than industry consensus standards.

[9] This assumes all gliders are equipped with a transponder.

[10] TCAS provides two types of advisories, a Traffic Advisory (TA) and a Resolution Advisory (RA). TCAS can provide both types of advisories using another aircraft's transponder signal. A TA provides an aural alert ''TRAFFIC, TRAFFIC'' to the flight crew and places the other aircraft on a cockpit display showing the other aircraft's position, altitude and movement relative to the TCAS-equipped aircraft. TCAS also computes the time to closest point of approach between the two aircraft. If this drops below a certain computed threshold, TCAS then provides a RA, which consists of aural commands and instrument cues to maneuver the aircraft vertically to avoid the threat.

[11] Air carrier aircraft are the fleet segment of greatest safety concern to the FAA for this contemplated rulemaking. These aircraft are required by regulation to be TCAS-equipped.

[12] Appendix B of the FAA System Safety Handbook defines a hazardous failure condition as one that reduces the capability of the system or the operator ability to cope with adverse conditions to the extent that there would be: Large reduction in safety margin or functional capability; Crew physical distress/excessive workload such that operators cannot be relied upon to perform required tasks accurately or completely; Serious or fatal injury to small number of occupants of aircraft (except operators); or Fatal injury to ground personnel and/or general public.

[13] Number of active gliders with transponders: 2014 GA Survey, Avionics Tables, Table AV.6. *https://www.faa.gov/data_research/aviation_data_statistics/general_aviation/.*

[14] A–08–10 through 13, Safety Recommendations. National Transportation Safety Board, Washington, DC 20594, March 31, 2008. A copy of this letter is in the docket at *www.regulations.gov,* docket no. FAA–2015–2147.

community and ATC facilities having control over the airspace. The LOA establishes an area and procedures for glider operations within positive controlled airspace in the Reno area. By establishing this area and these procedures, the LOA enhances airspace awareness and communication among the Oakland Air Route Traffic Control Center, Northern California Terminal Radar Approach Control, and the Pacific Soaring Council. Additionally, the LOA outlines entry and exit procedures into the operating areas and identifies pilot responsibilities to increase communication and situational awareness in the Reno area.[15]

Finally, the local glider community has undertaken a successful education campaign to prevent further accidents. According to the SSA, ''Since the 2006 accident, the local glider community that flies near RNO has undertaken successfully to educate pilots on collision avoidance and to encourage the voluntary use of either FLARM or transponders. As a result of these voluntary efforts, the official ASRS database includes no new incidents with gliders not equipped with transponders in the RNO or MEV [Minden-Tahoe Airport] areas in [excepted] airspace since the release some 7 years ago of the NTSB report on the 2006 incident.'' [16]

The SSA, EAA, and several individual commenters opposing transponder equipage, noted that the glider involved in the 2006 Reno accident was equipped with a transponder, but at the time of the accident, the pilot operated the glider with the transponder turned off.[17] The FAA acknowledges that in the 2006 accident, if the glider transponder were turned on, the Hawker aircraft would have received TCAS advisories.

2. Estimating Glider Transponder Cost From Removal of Glider Exception

Approximately 138 commenters discussed the cost of requiring gliders to equip with transponders.[18] Of those 138 commenters discussing cost, there were just 20 comments that could be characterized as in favor of requiring gliders to equip with transponders to some degree.

Three commenters stated that transponders were inexpensive, but as shown below these commenters underestimated the cost of glider transponders as ''in the few hundred dollar range'' or ''less than $2000'' and/or ignored the cost of installation or assumed installation was easy. They did not address the concern that about half the glider population does not have an electrical system, which significantly increases the cost of transponder installation. These commenters were contradicted by more than 30 commenters who provided specific cost estimates for glider transponders and installation costs. Another commenter, in favor of removing the glider exception because he believed that the safety benefits justified the costs, conceded that transponders ''are indeed costly.''

The FAA estimates the cost of requiring gliders to equip with transponders to be about $5,000 per glider and more than $7 million for the glider fleet. Owing to a lack of reliable data, the glider (and fleet) cost estimates do not take into account the possible significant cost of instrument panel modification. There may also be significant additional cost for older gliders that no longer have manufacturer support because they may require a FAA Form 337 (Major Repair and Alteration) approval if there is no prior approval (Supplemental Type Certificate (STC) or other previously approved installation).

The fleet estimate assumes that (1) all active glider operators will want to operate in the currently excepted airspace and (2) the 990 inactive gliders (total glider population of 2781—1791 active gliders) in the fleet will deregister upon rule implementation.[19] The $7 million fleet figure would be an underestimation to the extent these two assumptions are incorrect. Details of the estimates of cost per glider and glider fleet cost are shown in Table 1.

TABLE 1—GLIDER TRANSPONDER UNIT COSTS

Item	Cost	Sources/notes
Transponder	$2,339	Cost based on the Trig TT21 as it appears to be the most popular glider transponder.
Cabling	146	*Aircraftspruce.com:* Trig TT21 including custom harness—$2485.
Antenna	169	*Cumulus-Soaring.com:* RAMI AV–74–1 Blade Style Transponder or DME Antenna: ''. . . like the AV–74—but with longer mounting studs—which is nice when trying to mount it through a glider fuselage.''
Battery charger	25	
Total Nonrecurring hardware	2,679	
Installation	1,300	Average of 32 ANPRM commenter estimates.
Total Nonrecurring Cost	3,979	
Batteries (every 2.5 years)	600	Battery choice based on comment by Philadelphia Glider Council: ''. . . one [LiFePO4]18AH or two-three 9 Ahs generally sufficient for 10 hrs of operation.'' *CumulusSoaring.com:* Bioenno Power BLF–1209 LiFePo4 Battery 12V, 9AHr $100, charger $25. Or BLF–1220 20AHr $205, charger $30. Duration based on ANPRM comments.
Biannual inspection	800	$200 per inspection. Based on ANPRM comments.

[15] The LOA is posted in the docket at *www.regulations.gov,* docket no. FAA–2015–2147.

[16] SSA comment letter posted in the docket at *www.regulations.gov,* docket no. FAA–2015–2147.

[17] 14 CFR 91.215(c) states: While in the airspace as specified in paragraph (b) of this section or in all controlled airspace, each person operating an aircraft equipped with an operable ATC transponder maintained in accordance with § 91.413 of this part shall operate the transponder, including Mode C equipment if installed, and shall reply on the appropriate code or as assigned by ATC. This collision occurred at approximately 16,000 feet MSL in Class E airspace (which extends upward from 14,500 feet MSL to flight level 180 throughout the National Airspace System).

[18] Most comments addressed the cost of transponder equipage. A few comments addressed the cost to install other equipment such as ADS–B, TABS, and FLARM. The FAA sought comment on these technologies in the ANPRM. These alternatives and others are discussed later in this notice.

[19] Total number of gliders and number of active gliders: 2014 GA Survey, Table 2.1.

TABLE 1—GLIDER TRANSPONDER UNIT COSTS—Continued

Item	Cost	Sources/notes
Total Recurring Costs	1,400	

The nonrecurring and recurring unit costs required to estimate the cost of a rule change eliminating the glider transponder exception are shown in Table 1.

The FAA estimates the costs of such a rule change over a ten-year period for the existing U.S. glider fleet. This estimation is shown in Table 2.[20] The cost of a rule change for new production of existing glider models and new certifications is not estimated owing to a lack of the necessary forecasts.

TABLE 2—TEN-YEAR COST OF REMOVING GLIDER TRANSPONDER EXCEPTION

Year	Item costs	Description	Non-recurring costs	PV recurring costs @7%[21]
0	$3,979	Hardware & Installation	$3,979	
1				
2	200	Bi-annual Inspection		$175
2.5	200	Battery Replacement		169
3				
4	200	Bi-annual Inspection		153
5	200	Battery Replacement		143
6	200	Bi-annual Inspection		133
7				
7.5	200	Battery Replacement		120
8	200	Bi-annual Inspection		116
9				
10				
Totals			3,979	1,009

Total number of active gliders	1791	Cost/glider	Total cost
Gliders with electrical systems[22]	699		
Gliders with transponders[23]	461		
Gliders without electrical systems	1092	400	436,800
Gliders without transponders	1330	4,988	6,633,798
Cost of rule removing glider exception			7,070,598

Note: Due to rounding, details may not add up to totals or multiply to products.

Based on the risk reduction data discussed in the previous section and the estimated costs of equipage listed in this section, the FAA finds that the degree of risk reduction that could be expected by requiring transponder equipage for gliders does not justify the cost of requiring such equipage.

3. Alternatives to Transponders

Several commenters called for ''low cost'' and ''affordable'' transponders (such as a portable transponder) and ADS–B, TABS, or FLARM equipment. The NTSB noted the FAA published a final rule on May 28, 2010, that added requirements for ADS–B Out equipage that, if combined with transponder usage, would result in increased traffic awareness and collision avoidance. The NTSB also commented in response to this ANPRM that TABS may be an acceptable alternative as it is detectable by both TCAS and ADS–B-In equipped aircraft.

Since the 2006 accident, technologies have developed and alternatives are available that have the potential to mitigate risk, such as TABS, FLARM, ADS–B, local LOA with ATC facilities, and ongoing outreach and education. Of the technological solutions identified here, the ones that offer the best potential to avoid collision with TCAS-equipped aircraft (besides transponder equipage) are TABS or a rule-compliant ADS–B Out system, because those systems make the glider visible to TCAS-equipped aircraft, ATC or both.

The TABS standard provides for a reduction in the transmission rate and allows for a ''non-aviation grade'' GPS engine, in order to drive unit cost down while still maintaining an acceptable level of service to be considered a client in the NAS, where collision avoidance and ADS–B systems coexist. There are currently no TSO authorization holders for TABS equipment. However, we are aware that certain manufacturers currently have TABS systems in development.

Some commenters recommended that the FAA allow use of portable

[20] The estimation takes into account an additional nonrecurring cost not shown in Table 1 of $400 for gliders without an electrical system.

[21] A discount rate of 7 percent is recommended by Office of Management & Budget, Circular A–94, ''Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs,'' October 29, 1992, p. 8.

[22] Number of active gliders with electrical systems gliders: 2014 GA Survey, Avionics Tables, Table AV.1. *https://www.faa.gov/data_research/aviation_data_statistics/general_aviation/*.

[23] Number of active gliders with transponders: 2014 GA Survey, Avionics Tables, Table AV.6. *https://www.faa.gov/data_research/aviation_data_statistics/general_aviation/*.

transponders, stating they were lower cost than fixed transponder installations and relatively affordable. While portable transponders may meet the TSO performance requirements, they are not approved for use unless they are actually installed in the aircraft. A key reason for this is placement of the transponder antenna in the aircraft. If the transponder antenna is not placed correctly, the aircraft may not be electronically detectable to other aircraft or ATC.

Other commenters recommended that the FAA encourage equipage of FLARM systems. In this regard, the FAA notes that a variant of FLARM, known as PowerFLARM, will make a transponder or ADS–B Out equipped aircraft detectable to the PowerFLARM-equipped aircraft (such as a glider). However, a glider that is equipped with any version of FLARM will not be electronically detectable to the other aircraft unless both aircraft are FLARM equipped. In view of these factors, the FAA concludes that FLARM systems may provide a safety benefit (particularly for avoidance of collisions between gliders, and for PowerFLARM equipped gliders, some benefit for avoidance of collisions with powered aircraft). However, the FAA does not view FLARM (including PowerFLARM) as the most effective system to support collision avoidance with powered aircraft since a FLARM system may not make the glider detectable to the aircraft that must give way. Transponders, TABS, and ADS–B Out offer better protection against collisions with powered aircraft because those systems aid visual acquisition of the glider by the powered aircraft flightcrew, consistent with right of way rules.[24]

The FAA will continue to consider surveillance system alternatives for gliders for their feasibility and potential to improve safety.

4. Other Comments

Several commenters were in favor of removing the current glider exception for certain high-density airspace areas. One commenter, otherwise strongly in favor of removing the glider exception, suggested an exception for gliders involved in training below 5,000 feet above ground level (AGL). The FAA has determined not to propose any changes to the rules for specific airspace areas because the accident and incident history cited in the NTSB recommendation has occurred predominantly around one specific airspace area, Reno, NV. The FAA has determined that the post accident mitigations for the Reno area discussed previously in this notice mitigate the risk for that specific airspace.

Another commenter stated, ''the FAA should make clear that installing a transponder, encoder, antenna, an extra battery or batteries and possible solar panels are all considered 'minor modifications' which can be signed off by the installing technician based on his judgment.'' This commenter and several others, in opposition of the removal of the glider exception, also called for exceptions for older gliders. The FAA finds that rulemaking is not necessary at this time for any gliders, but points to current guidance available to assist in installation and approval of transponder systems in gliders and sailplanes for operators wishing to voluntarily equip.[25]

The AAJ listed glider color, construction materials, and slender profiles as contributing factors to lack of pilot visibility or radar detection and further identified Instrument Flight Rule congested areas as concerns of undeniable risk, especially the parameters of Class B airspace. These sentiments were largely shared amongst both adverse and favorable commenters, offering similar solutions or variations thereof. The FAA has discussed its determination regarding specific airspace areas above. With regard to the other comments identified here, the FAA's decision in this notice includes consideration of those comments.

Reason for Withdrawal

After consideration of all comments received, the FAA is withdrawing Notice No. 15–05. The FAA finds that the high cost of transponder equipage and the limited safety benefit that is likely to result from requiring such equipage do not support rulemaking at this time. Additionally, as discussed above, the FAA has determined that a proposal to require gliders to equip with ''low-cost'' alternatives to transponders is not supportable at this time.

NTSB safety recommendations, resulting from the 2006 midair collision with a glider, indicated that although the glider was equipped with a transponder, the transponder was turned off. After further analysis of safety-related statistics over a 10-year period (August 2005–August 2015) the ASRS database reflects 1841 reported NMAC for all airspace areas. The FAA found data that indicates that removal of the glider exception from § 91.215 would have the potential to reduce the NMAC occurrences by about 0.70 occurrences per year, or about 2 NMACs every 3 years (0.38% of all reported NMACs per year over that period).

Conclusion

When further testing, research, and conclusive data is available that reflect alternative mitigations, a broader, more harmonized proposal may better serve the public interest. Withdrawal of Notice No. 15–05 does not preclude the FAA from issuing another notice on the subject matter in the future or committing the agency to any future course of action. The agency will make any necessary changes to the regulations through a notice of proposed rulemaking (NPRM) with the opportunity for public comment.

Although the FAA has determined that a regulatory course of action is not warranted at this time, the FAA will continue to work with local glider communities, encourage the voluntary equipage of transponders in gliders and encourage the use of TABS. The FAA continues to recommend that all glider aircraft owners equip their gliders with a transponder meeting the requirements of § 91.215(a), a rule-compliant ADS–B Out system, or a TABS device. In consideration of the above factors, the FAA withdraws Notice No. 15–05, published in 80 FR 34346, on June 16, 2015.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a), and 40103 in Washington, DC, on December 16, 2016.

Gary A. Norek,

Deputy Director, Airspace Services.

[EPA–R03–OAR–2016–0373; FRL–9957–19–Region 3]

Air Plan Approval; WV; Infrastructure Requirements for the 2012 Fine Particulate Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a state implementation plan (SIP) revision submittal from the State of West Virginia pursuant to the Clean Air Act (CAA). Whenever new or revised

national ambient air quality standards (NAAQS) are promulgated, the CAA requires states to submit a plan for the implementation, maintenance, and enforcement of such NAAQS. The plan is required to address basic program elements, including, but not limited to, regulatory structure, monitoring, modeling, legal authority, and adequate resources necessary to assure attainment and maintenance of the standards. These elements are referred to as infrastructure requirements. West Virginia has made a submittal addressing the infrastructure requirements for the 2012 fine particulate matter ($PM_{2.5}$) NAAQS. This action proposes to approve portions of this submittal.

DATES: Written comments must be received on or before January 23, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2016–0373 at *http://www.regulations.gov,* or via email to *pino.maria@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Ellen Schmitt, (215) 814–5787, or by email at *schmitt.ellen@epa.gov.*

SUPPLEMENTARY INFORMATION: On November 17, 2015, the State of West Virginia through the West Virginia Department of Environmental Protection (WVDEP) submitted a revision to its SIP to satisfy the requirements of section 110(a)(2) of the CAA for the 2012 $PM_{2.5}$ NAAQS.

I. Background

On July 18, 1997, EPA promulgated a new 24-hour and a new annual NAAQS for $PM_{2.5}$ (62 FR 38652). On October 17, 2006, EPA revised the standards for $PM_{2.5}$, tightening the 24-hour $PM_{2.5}$ standard from 65 micrograms per cubic meter ($\mu g/m^3$) to 35 $\mu g/m^3$, and retaining the annual $PM_{2.5}$ standard at 15 $\mu g/m^3$ (71 FR 61144). Subsequently, on December 14, 2012, EPA revised the level of the health based (primary) annual $PM_{2.5}$ standard to 12 $\mu g/m^3$. *See* 78 FR 3086 (January 15, 2013).[1]

Pursuant to section 110(a)(1) of the CAA, states are required to submit SIP submissions meeting the applicable requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as EPA may prescribe. Section 110(a)(2) requires states to address basic SIP elements such as requirements for monitoring, basic program requirements, and legal authority that are designed to assure attainment and maintenance of the NAAQS. Section 110(a) imposes the obligation upon states to make a SIP submission to EPA for a new or revised NAAQS, but the contents of that submission may vary depending upon the facts and circumstances. In particular, the data and analytical tools available at the time the state develops and submits the SIP submission for a new or revised NAAQS affect the content of the submission. The content of such SIP submission may also vary depending upon what provisions the state's existing SIP already contains.

More specifically, section 110(a)(1) provides the procedural and timing requirements for SIP submissions. Section 110(a)(2) lists specific elements that states must meet for infrastructure SIP requirements related to a newly established or revised NAAQS. As mentioned earlier, these requirements include basic SIP elements such as requirements for monitoring, basic program requirements, and legal authority that are designed to assure attainment and maintenance of the NAAQS.

II. Summary of State Submittal

On November 17, 2015, West Virginia provided a submittal to satisfy section 110(a)(2) requirements of the CAA for the 2012 $PM_{2.5}$ NAAQS, which is the subject of this proposed rulemaking. This submittal addressed the following infrastructure elements or portions thereof, which EPA is proposing to approve: Section 110(a)(2)(A), (B), (C), (D)(i)(II) (prevention of significant deterioration), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M) of the CAA. A detailed summary of EPA's review and rationale for approving West Virginia's submittal may be found in the Technical Support Document (TSD) for this rulemaking action which is available on line at *www.regulations.gov,* Docket ID Number EPA–R03–OAR–2016–0373. This rulemaking action does not include any proposed action on section 110(a)(2)(I) of the CAA which pertains to the nonattainment requirements of part D, title I of the CAA, because this element is not required to be submitted by the 3-year submission deadline of section 110(a)(1) of the CAA, and will be addressed in a separate process.

At this time, EPA is not proposing action on section 110(a)(2)(D)(i)(I) regarding the interstate transport of emissions, nor is the Agency proposing action on section 110(a)(2)(D)(i)(II) relating to visibility protection. EPA intends to take later separate action on these portions of West Virginia's submittal.

III. Proposed Action

EPA is proposing to approve the following elements or portions thereof of West Virginia's November 17, 2015 SIP revision: Section 110(a)(2)(A), (B), (C), (D)(i)(II) (prevention of significant deterioration), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M) of the CAA. West Virginia's SIP revision provides the basic program elements specified in section 110(a)(2) of the CAA necessary to implement, maintain, and enforce the 2012 $PM_{2.5}$ NAAQS. This proposed rulemaking action does not include action on section 110(a)(2)(I) which pertains to the nonattainment planning requirements of part D, title I of the CAA, because this element is not required to be submitted by the 3-year submission deadline of section 110(a)(1) of the CAA, and will be addressed in a separate process.

EPA will take later separate action on section (D)(i)(I) (interstate transport of emissions) and on section (D)(i)(II) (visibility protection) for the 2012 $PM_{2.5}$ NAAQS. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the

[1] In EPA's 2012 $PM_{2.5}$ NAAQS revision, EPA left unchanged the existing welfare (secondary) standards for $PM_{2.5}$ to address PM related effects such as visibility impairment, ecological effects, damage to materials and climate impacts. This includes an annual secondary standard of 15 $\mu g/m^3$ and a 24-hour standard of 35 $\mu g/m^3$.

CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule, pertaining to West Virginia's section 110(a)(2) infrastructure requirements for the 2012 $PM_{2.5}$ NAAQS, does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Air Plan Approval; Air Plan Approval and Air Quality Designation; GA; Redesignation of the Atlanta, Georgia 2008 8-Hour Ozone Nonattainment Area to Attainment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On July 18, 2016, the State of Georgia, through the Georgia Environmental Protection Division (GA EPD) of the Department of Natural Resources, submitted a request for the Environmental Protection Agency (EPA) to redesignate the Atlanta, Georgia 2008 8-hour ozone nonattainment area (hereafter referred to as the ''Atlanta Area'' or ''Area'') to attainment for the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS) and to approve a State Implementation Plan (SIP) revision containing a maintenance plan for the Area. EPA is proposing to approve the State's plan for maintaining attainment of the 2008 8-hour ozone standard in the Area, including the motor vehicle emission budgets (MVEBs) for nitrogen oxides (NO_X) and volatile organic compounds (VOC) for the years 2014 and 2030 for the Area, and incorporate it into the SIP, and to redesignate the Area to attainment for the 2008 8-hour ozone NAAQS. EPA is also notifying the public of the status of EPA's adequacy determination for the MVEBs for the Area.

DATES: Comments must be received on or before January 23, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2016–0583 at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Jane Spann, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Ms. Spann can be reached by phone at (404) 562–9029 or via electronic mail at *spann.jane@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. What are the actions EPA is proposing to take?

EPA is proposing to take the following separate but related actions: (1) To approve Georgia's plan for maintaining the 2008 8-hour ozone NAAQS (maintenance plan), including the associated MVEBs for the Atlanta Area, and incorporate it into the SIP, and (2) to redesignate the Atlanta Area to attainment for the 2008 8-hour ozone NAAQS. EPA is also notifying the public of the status of EPA's adequacy

determination for the MVEBs for the Atlanta Area. The Atlanta Area consists of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding and Rockdale Counties in Georgia. These proposed actions are summarized below and described in greater detail throughout this notice of proposed rulemaking.

EPA is proposing to approve Georgia's maintenance plan for the Atlanta Area as meeting the requirements of section 175A (such approval being one of the CAA criteria for redesignation to attainment status) and incorporate it into the SIP. The maintenance plan is designed to keep the Atlanta Area in attainment of the 2008 8-hour ozone NAAQS through 2030. The maintenance plan includes 2014 and 2030 MVEBs for NO_X and VOC for the Atlanta Area for transportation conformity purposes. EPA is proposing to approve these MVEBs and incorporate them into the SIP.

EPA also proposes to determine that the Atlanta Area has met the requirements for redesignation under section 107(d)(3)(E) of the CAA. Accordingly, in this action, EPA is proposing to approve a request to change the legal designation of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding and Rockdale Counties in Georgia, as found at 40 CFR part 81, from nonattainment to attainment for the 2008 8-hour ozone NAAQS.

EPA is also notifying the public of the status of EPA's adequacy process MVEBs for the Atlanta Area. The Adequacy comment period began on September 2, 2016, with EPA's posting of the availability of Georgia's submissions on EPA's Adequacy Web site (*https://www.epa.gov/state-and-local-transportation/state-implementation-plans-sip-submissions-currently-under-epa*). The Adequacy comment period for these MVEBs closed on October 3, 2016. No comments, adverse or otherwise, were received during the Adequacy comment period. Please see section VII of this proposed rulemaking for further explanation of this process and for more details on the MVEBs.

In summary, this notice of proposed rulemaking is in response to Georgia's July 18, 2016, redesignation request and associated SIP submission that address the specific issues summarized above and the necessary elements described in section 107(d)(3)(E) of the CAA for redesignation of the Atlanta Area to attainment for the 2008 8-hour ozone NAAQS.

II. What is the background for EPA's proposed actions?

On March 12, 2008, EPA revised both the primary and secondary NAAQS for ozone to a level of 0.075 parts per million (ppm) to provide increased protection of public health and the environment. *See* 73 FR 16436 (March 27, 2008). The 2008 ozone NAAQS retains the same general form and averaging time as the 0.08 ppm NAAQS set in 1997, but is set at a more protective level. Under EPA's regulations at 40 CFR part 50, the 2008 8-hour ozone NAAQS is attained when the 3-year average of the annual fourth highest daily maximum 8-hour average ambient air quality ozone concentrations is less than or equal to 0.075 ppm. *See* 40 CFR 50.15.

Effective July 20, 2012, EPA designated any area that was violating the 2008 8-hour ozone NAAQS based on the three most recent years (2008–2010) of air monitoring data as a nonattainment area. *See* 77 FR 30088 (May 21, 2012). The Atlanta Area was designated as a marginal ozone nonattainment area. *See* 40 CFR 81.311. Areas that were designated as marginal ozone nonattainment areas were required to attain the 2008 8-hour ozone NAAQS no later than July 20, 2015, based on 2012–2014 monitoring data. The Atlanta Area did not attain the 2008 8-hour ozone NAAQS by July 20, 2015, and therefore on May 4, 2016, EPA published a final rule reclassifying the Atlanta Area from a marginal nonattainment area to a moderate nonattainment area for the 2008 8-hour ozone standard. *See* 81 FR 26697 (May 4, 2016). Moderate areas are required to attain the 2008 8-hour ozone NAAQS no later than July 20, 2018, six years after the effective date of the initial nonattainment designations. *See* 40 CFR 51.1103.

On July 14, 2016, EPA determined that the Atlanta Area attained the 2008 8-hour ozone NAAQS based on complete, quality-assured, and certified ozone monitoring data from monitoring stations in the Atlanta Area for the 2008 8-hour ozone NAAQS for 2013 through 2015. *See* 81 FR 45419. Under the provisions of EPA's ozone implementation rule for the 2008 8-hour ozone NAAQS (40 CFR part 51, subpart AA), if EPA issues a determination that an area is attaining the relevant standard, also known as a Clean Data Determination, the area's obligations to submit an attainment demonstration and associated reasonably available control measures (RACM), reasonable further progress plan (RFP), contingency measures, and other planning SIPs related to attainment of the 2008 8-hour ozone NAAQS are suspended until EPA: (i) Redesignates the area to attainment for the standard or approves a redesignation substitute, at which time those requirements no longer apply; or (ii) EPA determines that the area has violated the standard, at which time the area is again required to submit such plans. *See* 40 CFR 51.1118. While these requirements are suspended, EPA is not precluded from acting upon these elements at any time if submitted to EPA for review and approval.

An attainment determination is not equivalent to a redesignation under section 107(d)(3) of the CAA. Additionally, the determination of attainment is separate from, and does not influence or otherwise affect, any future designation determination or requirements for the Atlanta Area based on any new or revised ozone NAAQS, and the determination of attainment remains in effect regardless of whether EPA designates this Area as a nonattainment area for purposes of any new or revised ozone NAAQS.

III. What are the criteria for redesignation?

The CAA provides the requirements for redesignating a nonattainment area to attainment. Specifically, section 107(d)(3)(E) of the CAA allows for redesignation providing that: (1) The Administrator determines that the area has attained the applicable NAAQS; (2) the Administrator has fully approved the applicable implementation plan for the area under section 110(k); (3) the Administrator determines that the improvement in air quality is due to permanent and enforceable reductions in emissions resulting from implementation of the applicable SIP and applicable federal air pollutant control regulations and other permanent and enforceable reductions; (4) the Administrator has fully approved a maintenance plan for the area as meeting the requirements of section 175A; and (5) the state containing such area has met all requirements applicable to the area for purposes of redesignation under section 110 and part D of the CAA.

On April 16, 1992, EPA provided guidance on redesignation in the General Preamble for the Implementation of title I of the CAA Amendments of 1990 (57 FR 13498), and supplemented this guidance on April 28, 1992 (57 FR 18070). EPA has provided further guidance on processing redesignation requests in the following documents:

1. ''Ozone and Carbon Monoxide Design Value Calculations,'' Memorandum from Bill

Laxton, Director, Technical Support Division, June 18, 1990;

2. ''Maintenance Plans for Redesignation of Ozone and Carbon Monoxide Nonattainment Areas,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, April 30, 1992;

3. ''Contingency Measures for Ozone and Carbon Monoxide (CO) Redesignations,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, June 1, 1992;

4. ''Procedures for Processing Requests to Redesignate Areas to Attainment,'' Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992 (hereinafter referred to as the ''Calcagni Memorandum'');

5. ''State Implementation Plan (SIP) Actions Submitted in Response to Clean Air Act (CAA) Deadlines,'' Memorandum from John Calcagni, Director, Air Quality Management Division, October 28, 1992;

6. ''Technical Support Documents (TSDs) for Redesignation of Ozone and Carbon Monoxide (CO) Nonattainment Areas,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, August 17, 1993;

7. ''State Implementation Plan (SIP) Requirements for Areas Submitting Requests for Redesignation to Attainment of the Ozone and Carbon Monoxide (CO) National Ambient Air Quality Standards (NAAQS) On or After November 15, 1992,'' Memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation, September 17, 1993 (hereinafter referred to as the ''Shapiro Memorandum'');

8. ''Use of Actual Emissions in Maintenance Demonstrations for Ozone and CO Nonattainment Areas,'' Memorandum from D. Kent Berry, Acting Director, Air Quality Management Division, November 30, 1993;

9. ''Part D New Source Review (Part D NSR) Requirements for Areas Requesting Redesignation to Attainment,'' Memorandum from Mary D. Nichols, Assistant Administrator for Air and Radiation, October 14, 1994 (hereinafter referred to as the ''Nichols Memorandum''); and

10. ''Reasonable Further Progress, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the Ozone National Ambient Air Quality Standard,'' Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, May 10, 1995.

IV. Why is EPA proposing these actions?

On July 18, 2016, Georgia requested that EPA redesignate the Atlanta Area to attainment for the 2008 8-hour ozone NAAQS and approve the associated SIP revision submitted on the same date containing a maintenance plan for the Area. EPA's evaluation indicates that the Atlanta Area meets the requirements for redesignation as set forth in CAA section 107(d)(3)(E), including the maintenance plan requirements under CAA section 175A and associated MVEBs. As a result of these proposed findings, EPA is proposing to take the actions summarized in section I of this notice.

V. What is EPA's analysis of the redesignation request and July 18, 2016, SIP submission?

As stated above, in accordance with the CAA, EPA proposes to approve the 2008 8-hour ozone NAAQS maintenance plan, including the associated MVEBs, and incorporate it into the Georgia SIP; and redesignate the Atlanta Area to attainment for the 2008 8-hour ozone NAAQS. The five redesignation criteria provided under CAA section 107(d)(3)(E) are discussed in greater detail for the Area in the following paragraphs of this section.

Criteria (1)—The Atlanta GA Area Has Attained the 2008 8-Hour Ozone NAAQS

For redesignating a nonattainment area to attainment, the CAA requires EPA to determine that the area has attained the applicable NAAQS. *See* CAA section 107(d)(3)(E)(i). For ozone, an area may be considered to be attaining the 2008 8-hour ozone NAAQS if it meets the 2008 8-hour ozone NAAQS, as determined in accordance with 40 CFR 50.15 and Appendix P of part 50, based on three complete, consecutive calendar years of quality-assured air quality monitoring data. To attain the NAAQS, the 3-year average of the fourth-highest daily maximum 8-hour average ozone concentrations measured at each monitor within an area over each year must not exceed 0.075 ppm. Based on the data handling and reporting convention described in 40 CFR part 50, Appendix P, the NAAQS are attained if the design value is 0.075 ppm or below. The data must be collected and quality-assured in accordance with 40 CFR part 58 and recorded in EPA's Air Quality System (AQS). The monitors generally should have remained at the same location for the duration of the monitoring period required for demonstrating attainment.

On July 14, 2016, EPA determined that the Atlanta Area attained the 2008 8-hour ozone NAAQS. *See* 81 FR 45419. In that action, EPA reviewed complete, quality-assured, and certified ozone monitoring data from monitoring stations in the Atlanta Area for the 2008 8-hour ozone NAAQS for 2013 through 2015 and determined that the design values for each monitor in the Area are less than the standard of 0.075 ppm for that time period. The fourth-highest 8-hour ozone values at each monitor for 2013, 2014, and 2015 and the 3-year averages of these values (*i.e.,* design values), are summarized in Table 2, below.

TABLE 2—2013–2015 DESIGN VALUE CONCENTRATIONS FOR THE ATLANTA AREA

[ppm]

Location (county)	Monitoring station	4th Highest 8-hour ozone value			3-Year design values
		2013	2014	2015	2013–2015
Cobb	GA National Guard, McCollum Pkwy (13–067–0003)	0.067	0.063	0.066	0.066
Coweta	University of W. Georgia at Newnan (13–077–0002)	0.053	0.067	0.066	0.062
DeKalb	2390–B Wildcat Road Decatur (13–089–0002)	0.062	0.070	0.071	0.067
Douglas	Douglas Co. Water Auth. W. Strickland St. (13–097–0004)	0.063	0.065	0.070	0.066
Gwinnett	Gwinnett Tech, 5150 Sugarloaf Pkwy. (13–135–0002)	0.069	0.068	0.071	0.069
Henry	Henry County Extension Office (13–151–0002)	0.070	0.075	0.070	0.071
Paulding	Yorkville, King Farm (13–223–0003)	0.062	0.059	0.065	0.062
Rockdale	Conyers Monastery, 2625 GA Hwy. 212 (13–247–0001)	0.071	0.079	0.068	0.072
Fulton	Confederate Ave., Atlanta (13–121–0055)	0.069	0.073	0.077	0.073

The 3-year design value for 2013–2015 for the Atlanta Area is 0.073 ppm,[1] which meets the NAAQS.

For this proposed action, EPA has reviewed 2016 preliminary monitoring data for the Area and proposes to find that the preliminary data does not indicate a violation of the NAAQS.[2] EPA will not take final action to approve the redesignation if the 3-year design value exceeds the NAAQS prior to EPA finalizing the redesignation. As discussed in more detail below, Georgia has committed to continue monitoring in this Area in accordance with 40 CFR part 58.

Criteria (2)—Georgia Has a Fully Approved SIP Under Section 110(k) for the Atlanta Area; and Criteria (5)—Georgia Has Met All Applicable Requirements Under Section 110 and Part D of Title I of the CAA

For redesignating a nonattainment area to attainment, the CAA requires EPA to determine that the state has met all applicable requirements under section 110 and part D of title I of the CAA (CAA section 107(d)(3)(E)(v)) and that the state has a fully approved SIP under section 110(k) for the area (CAA section 107(d)(3)(E)(ii)). EPA proposes to find that Georgia has met all applicable SIP requirements for the Atlanta Area under section 110 of the CAA (general SIP requirements) for purposes of redesignation. Additionally, EPA proposes to find that Georgia has met all applicable SIP requirements for purposes of redesignation under part D of title I of the CAA in accordance with section 107(d)(3)(E)(v) and proposes to determine that the SIP is fully approved with respect to all requirements applicable for purposes of redesignation in accordance with section 107(d)(3)(E)(ii). In making these proposed determinations, EPA ascertained which requirements are applicable to the Area and, if applicable, that they are fully approved under section 110(k). SIPs must be fully approved only with respect to requirements that were due prior to submittal of the complete redesignation request.

a. The Atlanta Area Has Met All Applicable Requirements Under Section 110 and Part D of the CAA

General SIP requirements. General SIP elements and requirements are delineated in section 110(a)(2) of title I, part A of the CAA. These requirements include, but are not limited to, the following: Submittal of a SIP that has been adopted by the state after reasonable public notice and hearing; provisions for establishment and operation of appropriate procedures needed to monitor ambient air quality; implementation of a source permit program; provisions for the implementation of part C requirements (Prevention of Significant Deterioration (PSD)) and provisions for the implementation of part D requirements (NSR permit programs); provisions for air pollution modeling; and provisions for public and local agency participation in planning and emission control rule development.

Section 110(a)(2)(D) requires that SIPs contain certain measures to prevent sources in a state from significantly contributing to air quality problems in another state. To implement this provision, EPA has required certain states to establish programs to address the interstate transport of air pollutants. The section 110(a)(2)(D) requirements for a state are not linked with a particular nonattainment area's designation and classification in that state. EPA believes that the requirements linked with a particular nonattainment area's designation and classifications are the relevant measures to evaluate in reviewing a redesignation request. The transport SIP submittal requirements, where applicable, continue to apply to a state regardless of the designation of any one particular area in the state. Thus, EPA does not believe that the CAA's interstate transport requirements should be construed to be applicable requirements for purposes of redesignation.

In addition, EPA believes other section 110 elements that are neither connected with nonattainment plan submissions nor linked with an area's attainment status are not applicable requirements for purposes of redesignation. The area will still be subject to these requirements after the area is redesignated. The section 110 and part D requirements which are linked with a particular area's designation and classification are the relevant measures to evaluate in reviewing a redesignation request. This approach is consistent with EPA's existing policy on applicability (*i.e.,* for redesignations) of conformity and oxygenated fuels requirements, as well as with section 184 ozone transport requirements. *See* Reading, Pennsylvania, proposed and final rulemakings (61 FR 53174–53176, October 10, 1996), (62 FR 24826, May 7, 2008); Cleveland-Akron-Loraine, Ohio, final rulemaking (61 FR 20458, May 7, 1996); and Tampa, Florida, final rulemaking at (60 FR 62748, December 7, 1995). *See also* the discussion on this issue in the Cincinnati, Ohio, redesignation (65 FR 37890, June 19, 2000), and in the Pittsburgh, Pennsylvania, redesignation (66 FR 50399, October 19, 2001).

Title I, Part D, applicable SIP requirements. Section 172(c) of the CAA sets forth the basic requirements of attainment plans for nonattainment areas that are required to submit them pursuant to section 172(b). Subpart 2 of part D, which includes section 182 of the CAA, establishes specific requirements for ozone nonattainment areas depending on the area's nonattainment classification. As provided in Subpart 2, a marginal ozone nonattainment area must submit an emissions inventory that complies with section 172(c)(3), but the specific requirements of section 182(a) apply in lieu of the demonstration of attainment (and contingency measures) required by section 172(c). *See* 42 U.S.C. 7511a(a). A moderate area must meet the marginal area requirements of section 182(a) and additional requirements specific to moderate (and higher) areas under section 182(b). A thorough discussion of the requirements contained in sections 172(c) and 182 can be found in the General Preamble for Implementation of Title I (57 FR 13498).

Under its longstanding interpretation of the CAA, EPA has interpreted section 107(d)(3)(E) to mean, as a threshold matter, that the part D provisions which are ''applicable'' and which must be approved in order for EPA to redesignate an area include only those which came due prior to a state's submittal of a complete redesignation request. *See* Calcagni Memorandum. *See also* Shapiro Memorandum; Final Redesignation of Detroit-Ann Arbor, (60 FR 12459, 12465–66, March 7, 1995); Final Redesignation of St. Louis, Missouri, (68 FR 25418, 25424–27, May 12, 2003); *Sierra Club* v. *EPA,* 375 F.3d 537, 541 (7th Cir. 2004) (upholding EPA's redesignation rulemaking applying this interpretation and expressly rejecting Sierra Club's view that the meaning of ''applicable'' under the statute is '''whatever should have been in the plan at the time of attainment' rather than whatever actually was in the plan and already implemented or due at the time of attainment''').[3] For the Atlanta Area, no

[1] The design value for an area is the highest 3-year average of the annual fourth-highest daily maximum 8-hour concentration recorded at any monitor in the area.

[2] This preliminary data is available at EPA's air data Web site: *http://aqsdr1.epa.gov/aqsweb/aqstmp/airdata/.*

[3] Applicable requirements of the CAA that come due subsequent to the area's submittal of a complete redesignation request remain applicable until a

section 182(b) Part D moderate nonattainment area requirements for the 2008 8-hour ozone standard were due at the time that Georgia submitted its redesignation request on July 18, 2016; therefore these requirements are not applicable for the purposes of redesignation.[4] In addition, as discussed below, several of the Part D requirements under 182(a) and 182(b) are otherwise not applicable for the purposes of redesignation and several of the requirements have already been satisfied by the State.

Section 182(a) Requirements. Section 182(a)(1) requires states to submit a comprehensive, accurate, and current inventory of actual emissions from sources of VOC and NO_X emitted within the boundaries of the ozone nonattainment area. This inventory submission was due on July 20, 2015, for the Atlanta Area. Georgia provided an emissions inventory for the Area to EPA in a February 6, 2015, SIP submission, and EPA approved the emissions inventory in an action published on August 11, 2015. *See* 80 FR 48036.

Under section 182(a)(2)(A), states with ozone nonattainment areas that were designated prior to the enactment of the 1990 CAA amendments were required to submit, within six months of classification, all rules and corrections to existing VOC reasonably available control technology (RACT) rules that were required under section 172(b)(3) of the CAA (and related guidance) prior to the 1990 CAA amendments. The Area is not subject to the section 182(a)(2) RACT ''fix up'' requirement for the 2008 ozone NAAQS because it was designated as nonattainment for this standard after the enactment of the 1990 CAA amendments. Furthermore, the State complied with this requirement under the 1-hour ozone NAAQS. *See* 57 FR 46780 (October 13, 1992).

Section 182(a)(2)(B) requires each state with a marginal or higher ozone nonattainment area classification that implemented, or was required to implement, an inspection and maintenance (I/M) program prior to the 1990 CAA amendments to submit a SIP revision providing for an I/M program no less stringent than that required prior to the 1990 amendments or already in the SIP at the time of the amendments, whichever is more stringent. The Atlanta Area is not subject to the section 182(a)(2)(B) requirement because the Area was designated as nonattainment for the 2008 8-hour ozone standard after the enactment of the 1990 CAA amendments. As discussed below in the section addressing section 182(b) requirements, Georgia has an I/M program that meets its past I/M obligations under section 182(c)(3) for its severe classification under the 1990 1-hour ozone NAAQS.

Regarding the permitting and offset requirements of section 182(a)(2)(C) and section 182(a)(4), Georgia currently has a fully approved part D NSR program in place. However, EPA has determined that areas being redesignated need not comply with the requirement that a NSR program be approved prior to redesignation, provided that the area demonstrates maintenance of the NAAQS without part D NSR, because PSD requirements will apply after redesignation. A more detailed rationale for this view is described in the Nichols Memorandum. Georgia's PSD program will become applicable in the Atlanta Area upon redesignation to attainment.

Section 182(a)(3) requires states to submit periodic inventories and emissions statements. Section 182(a)(3)(A) requires states to submit a periodic inventory every three years. As discussed below in the section of this notice titled *Verification of Continued Attainment,* the State will continue to update its emissions inventory at least once every three years. Under section 182(a)(3)(B), each state with an ozone nonattainment area must submit a SIP revision requiring emissions statements to be submitted to the state by certain sources within that nonattainment area. Georgia provided a SIP revision to EPA on February 6, 2015, addressing the section 182(a)(3)(B) emissions statements requirement, and on August 11, 2015, EPA published a direct final rule approving this SIP revision. *See* 80 FR 48036 (August 11, 2015).

Section 182(b) Requirements. Section 182(b) of the CAA, found in subpart 2 of part D, establishes additional requirements for moderate (and higher) ozone nonattainment areas. As noted above, no section 182(b) Part D moderate nonattainment area requirements for the 2008 8-hour ozone standard were due at the time that Georgia submitted its redesignation request on July 18, 2016; therefore, these requirements are not applicable for the purposes of redesignation.

The RFP plan requirements under section 182(b)(1) are defined as progress that must be made toward attainment for the 2008 8-hour ozone NAAQS. These requirements are not relevant for purposes of redesignation because EPA has determined that the Atlanta Area attained of the 2008 8-hour ozone NAAQS. *See* 57 FR 13564.

Section 182(b)(2) of the CAA requires states with areas designated as moderate (or higher) nonattainment areas for the ozone NAAQS to submit a SIP revision to require RACT for all major VOC and NO_X sources and for each category of VOC sources in the Area covered by a Control Techniques Guidelines (CTG) document. The CTGs established by EPA are guidance to the states and provide recommendations only. A state can develop its own strategy for what constitutes RACT for the various CTG categories, and EPA will review that strategy in the context of the SIP process and determine whether it meets the RACT requirements of the CAA and its implementing regulations. If no major sources of VOC or NO_X emissions (which should be considered separately) or no sources in a particular source category exist in an applicable nonattainment area, a state may submit a negative declaration for that category. In the past, Georgia has met previous RACT requirements. EPA approved Georgia's RACT submittals, for the 1997 ozone NAAQS, on September 28, 2012. *See* 77 FR 59554.

The section 182(b)(3) gasoline vapor recovery requirements once applied in all moderate (and higher) ozone nonattainment areas. However, under section 202(a)(6) of the CAA the requirements of section 182(b)(3) no longer apply in moderate ozone nonattainment areas because EPA promulgated onboard refueling vapor recovery standards on April 6, 1994. *See* 59 FR 16262; 40 CFR parts 86, 88, and 600.

Section 182(b)(4) of the CAA requires states with areas designated as moderate (or higher) nonattainment for the ozone NAAQS to submit SIPs requiring inspection and maintenance of vehicles (I/M). In 1991, EPA classified a 13-county area in and around the Atlanta, Georgia, metropolitan area as a serious ozone nonattainment area for the 1990 1-hour ozone NAAQS, triggering the requirement for the State to establish an enhanced I/M program for this 13-county area.[5] EPA fully approved this program into the SIP in January 2000. *See* 65 FR 4133 (January 26, 2000).

Section 182(b)(5) of the CAA requires that for purposes of satisfying the general emission offset requirement, the ratio of total emission reductions to total increase emissions shall be at least 1.15 to 1. Georgia currently requires these

redesignation is approved, but are not required as a prerequisite to redesignation. *See* Calcagni Memorandum; CAA section 175A(c).

[5] On November 6, 1991, EPA designated and classified the following counties in and around the Atlanta, Georgia, metropolitan area as a serious ozone nonattainment area for the 1-hour ozone NAAQS: Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale. *See* 56 FR 56694.

offsets in its SIP-approved state regulations, Georgia Rule 391–3–1–.03(8)(c)(13) and (14).

Section 176 Conformity Requirements. Section 176(c) of the CAA requires states to establish criteria and procedures to ensure that federally supported or funded projects conform to the air quality planning goals in the applicable SIP. The requirement to determine conformity applies to transportation plans, programs, and projects that are developed, funded, or approved under title 23 of the United States Code (U.S.C.) and the Federal Transit Act (transportation conformity) as well as to all other federally supported or funded projects (general conformity). State transportation conformity SIP revisions must be consistent with federal conformity regulations relating to consultation, enforcement, and enforceability that EPA promulgated pursuant to its authority under the CAA.

EPA interprets the conformity SIP requirements [6] as not applying for purposes of evaluating a redesignation request under section 107(d) because state conformity rules are still required after redesignation and federal conformity rules apply where state rules have not been approved. *See Wall* v. *EPA,* 265 F.3d 426 (6th Cir. 2001) (upholding this interpretation); *see also* 60 FR 62748 (December 7, 1995) (redesignation of Tampa, Florida). Nonetheless, Georgia has an approved conformity SIP for the Atlanta Area. *See* 77 FR 35866 (June 15, 2012).

Thus, for the reasons discussed above, EPA proposes that the Atlanta Area has satisfied all applicable requirements for purposes of redesignation under section 110 and part D of title I of the CAA.

b. The Atlanta Area Has a Fully Approved Applicable SIP Under Section 110(k) of the CAA

EPA has fully approved the applicable Georgia SIP for the Atlanta Area under section 110(k) of the CAA for all requirements applicable for purposes of redesignation. EPA may rely on prior SIP approvals in approving a redesignation request (*see* Calcagni Memorandum at p. 3; *Southwestern Pennsylvania Growth Alliance* v. *Browner,* 144 F.3d 984, 989–90 (6th Cir. 1998); *Wall,* 265 F.3d 426) plus any additional measures it may approve in conjunction with a redesignation action (*see* 68 FR 25426 (May 12, 2003) and citations therein). Georgia has adopted and submitted, and EPA has fully approved at various times, provisions addressing various SIP elements applicable for the ozone NAAQS. *See* 80 FR 61109 (October 9, 2015) and 81 FR 65899 (September 26, 2016).

As discussed above, EPA believes that the section 110 elements that are neither connected with nonattainment plan submissions, nor linked to an area's nonattainment status, are not applicable requirements for purposes of redesignation and believes that Georgia has met all part D requirements applicable for purposes of this redesignation.

Criteria (3)—The Air Quality Improvement in the Atlanta Area Is Due to Permanent and Enforceable Reductions in Emissions Resulting From Implementation of the SIP and Applicable Federal Air Pollution Control Regulations and Other Permanent and Enforceable Reductions

For redesignating a nonattainment area to attainment, the CAA requires EPA to determine that the air quality improvement in the area is due to permanent and enforceable reductions in emissions resulting from implementation of the SIP, applicable federal air pollution control regulations, and other permanent and enforceable reductions. *See* CAA section 107(d)(3)(E)(iii). EPA has preliminarily determined that Georgia has demonstrated that the observed air quality improvement in the Atlanta Area is due to permanent and enforceable reductions in emissions resulting from federal measures and from state measures adopted into the SIP and is not the result of unusually favorable weather conditions.[7]

State measures adopted into the SIP and federal measures enacted in recent years have resulted in permanent emission reductions. The SIP-approved state measures, some of which implement federal requirements, that have been implemented to date and identified by Georgia include: Georgia Rule 391–3–1–.02(2)(yy)—Emissions of Nitrogen Oxides; Georgia Rule 391–3–1–.02(2)(jjj)—NO_X from EGUs; Georgia Rule 391–3–1–.02(2)(lll)—NO_X from Fuel Burning Equipment; Georgia Rule 391–3–1–.02(2)(nnn)—NO_X from Stationary Gas Turbines; Georgia Rule 391–3–1–.02(2)(rrr)—NO_X from Small Fuel Burning Equipment; and Georgia Rule Chapter 391–3–20—Enhanced Inspection and Maintenance.

Georgia Rule 391–3–1–.02(2) contains provisions that target emission reductions necessary for ozone reduction. Those provisions that are approved into the federally-approved SIP and are therefore federally enforceable include:

Rule 391–3–1–.02(2)(yy)—this rule requires a case-by-case RACT determination for sources of NO_X emissions with the potential to emit more than 25 tons of NO_X per year in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties and for sources that have the potential to emit more than 100 tons of NO_X per year in Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton counties.

Rule 391–3–1–.02(2)(jjj)—this rule regulates NO_X emissions from coal-fired external combustion devices that generate steam for electricity generation. This rule established a NO_X emission standard of 0.13 pounds per million British Thermal Unit (lb/MMBtu) from May 1 through September 30 (starting in 2003) averaged across affected sources in Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gwinnett, Heard, Henry, Paulding, and Rockdale counties.

Rule 391–3–1–.02(2)(lll)—this rule applies to fuel-burning equipment with maximum design heat input capacities greater than or equal to 10 million British Thermal Units per hour (MMBtu/hr) and less than or equal to 250 MMBtu/hr in 45 counties, including the counties in the Atlanta Area. It established a compliance date for the ozone standard beginning on May 1, 2000, and it affects all fuel burning equipment installed from that date forward. This rule also affects future possible emissions for new or modified sources by requiring the operation of equipment during the control season to meet emission limits based on the use of natural gas.

Rule 391–3–1–.02(2)(nnn)—this rule establishes ozone season NO_X emissions limits for stationary gas turbines greater than 25 MW in 45 counties in and around the Atlanta Area. This rule requires combustion turbines permitted on or after April 1, 2000, to emit no more than 6 ppm NO_X at 15 percent oxygen during the period of May 1 through September 30 of each year. This

[6] CAA section 176(c)(4)(E) requires states to submit revisions to their SIPs to reflect certain federal criteria and procedures for determining transportation conformity. Transportation conformity SIPs are different from the MVEBs that are established in control strategy SIPs and maintenance plans.

[7] Georgia provided average temperature and precipitation data for May through September in Atlanta, Georgia, from 1930 through 2015. Based on this information, the average temperature and precipitation in 2013 fluctuates around the average meteorological conditions; the years 2014 and 2015 were hotter than the 1930–2000 average temperature; and precipitation in 2014 was less than the the 1930–2000 average. See section 2.3 of the State's redesignation request and SIP revision for further meteorological information.

period falls within the broader ozone season.

Rule 391–3–1–.02(2)(rrr)—this is a RACT rule for small fuel-burning equipment. It requires that, in order to reduce NO_X, an annual tune-up and the burning of natural gas, liquefied petroleum gas, or propane be conducted on individual fuel burning equipment in the Atlanta Area that is not subject to Rule 391–3–1–.02(2)(jjj) or 391–3–1–.02(2)(lll), during ozone season. This includes individual fuel-burning equipment located at facilities in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale County with NO_X emissions exceeding 25 tons per year and at facilities in Barrow, Bartow, Carroll, Hall, Newton, Spalding or Walton County with NO_X emissions exceeding 100 tons per year; the individual fuel-burning equipment has potential emissions of NO_X equal to or exceeding 1 ton per year; and the individual fuel-burning equipment either has a maximum design heat input capacity of less than 100 million BTU per hour or less than 10 million BTU per hour, depending on when it was installed.

Rule Chapter 391–3–20—Enhanced Inspection and Maintenance (Vehicle Emissions I/M Program)—As discussed above, EPA fully approved the State's enhanced I/M program and adopted it into the SIP in January 2000. *See* 65 FR 4133 (January 26, 2000). The program applies to Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties, all of which are located in the Atlanta Area.

Federal measures enacted in recent years have also resulted in permanent emission reductions in the Atlanta Area. The federal measures that have been implemented include the following:

Clean Air Interstate Rule (CAIR)/ Cross-State Air Pollution Rule (CSAPR). CAIR created regional cap-and-trade programs to reduce SO_2 and NO_X emissions in 28 eastern states, including Georgia, that contributed to downwind nonattainment and maintenance of the 1997 8-hour ozone NAAQS and the 1997 $PM_{2.5}$ NAAQS. *See* 70 FR 25162 (May 12, 2005). In 2008, the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit) initially vacated CAIR in *North Carolina* v. *EPA,* 531 F.3d 896 (D.C. Cir. 2008), but ultimately remanded the rule to EPA without vacatur in *North Carolina* v. *EPA,* 550 F.3d 1176, 1178 (D.C. Cir. 2008) to preserve the environmental benefits provided by CAIR. On August 8, 2011 (76 FR 48208), acting on the D.C. Circuit's remand, EPA promulgated CSAPR to replace CAIR and thus to address the interstate transport of emissions contributing to nonattainment and interfering with maintenance of the two air quality standards covered by CAIR as well as the 2006 $PM_{2.5}$ NAAQS. CSAPR requires substantial reductions of SO_2 and NO_X emissions from electric generating units (EGUs) in 28 states in the Eastern United States.

Numerous parties filed petitions for review of CSAPR, and on August 21, 2012, the D.C. Circuit vacated and remanded CSAPR to EPA. *EME Homer City Generation, L.P.* v. *EPA,* 696 F.3d 7, 38 (D.C. Cir. 2012). The United States Supreme Court reversed the D.C. Circuit's decision on April 29, 2014, and remanded the case to the D.C. Circuit to resolve remaining issues in accordance with the high court's ruling. *EPA* v. *EME Homer City Generation, L.P.,* 134 S. Ct. 1584 (2014). On remand, the D.C. Circuit affirmed CSAPR in most respects, but invalidated without vacating some of the Phase 2 SO_2 and ozone-season NO_X CSAPR budgets as to a number of states. *EME Homer City Generation, L.P.* v. *EPA,* 795 F.3d 118 (D.C. Cir. 2015).[8] This litigation ultimately delayed implementation of CSAPR for three years, from January 1, 2012, when CSAPR's cap-and-trade programs were originally scheduled to replace the CAIR cap-and-trade programs, to January 1, 2015. Thus, the rule's Phase 2 budgets were originally promulgated to begin on January 1, 2014, and are now scheduled to begin on January 1, 2017.

On September 17, 2016, EPA finalized an update to the CSAPR ozone season program. *See* 81 FR 74504 (October 26, 2016). The update addresses summertime transport of ozone pollution in the eastern United States that crosses state lines to help downwind states and communities meet and maintain the 2008 8-hour ozone NAAQS and addresses the remanded Phase 2 ozone season NO_X budgets. The update withdraws these remanded NO_X budgets, sets new Phase 2 CSAPR ozone season NO_X emissions budgets for eight of the eleven states with remanded budgets, and removes the other three states from the CSAPR ozone season NO_X trading program.[9]

Tier 2 vehicle and fuel standards. Implementation began in 2004 and as newer, cleaner cars enter the national fleet, these standards continue to significantly reduce NO_X emissions.[10] The standards require all passenger vehicles in any manufacturer's fleet to meet an average standard of 0.07 grams of NO_X per mile. Additionally, in January 2006, the sulfur content of gasoline was required to be on average 30 ppm which assists in lowering the NO_X emissions. EPA expects that these standards will reduce NO_X emissions from vehicles by approximately 74 percent by 2030, translating to nearly 3 million tons annually by 2030.[11]

Large non-road diesel engines rule. This rule was promulgated in 2004 and was phased in between 2008 through 2014. This rule reduces the sulfur content in the nonroad diesel fuel and reduces NO_X, VOC, particulate matter, and carbon monoxide emissions. This rule applies to diesel engines and fuel used in industries such as construction, agriculture, and mining. It is estimated that compliance with this rule will cut NO_X emissions from non-road diesel engines by up to 90 percent nationwide.

Medium and Heavy-Duty Vehicle Fuel Consumption and GHG Standards. These standards have and will continue to reduce greenhouse gas emissions and increase fuel efficiency for model year 2014 through 2018 semi-trucks, heavy-duty pickup trucks and vans, and vocational vehicles. These standards require on-road vehicles to achieve a 7 percent to 20 percent reduction in CO_2 emissions and fuel consumption by

[8] The remanded budgets include the Phase 2 sulfur dioxide (SO_2) budgets for Georgia. On May 26, 2016, Georgia submitted a commitment letter to provide a SIP revision that adopts provisions for participation in the CSAPR annual NO_X and annual SO_2 trading programs, including annual NO_X and annual SO_2 budgets that are at least as stringent as the budgets codified for Georgia at 40 CFR 97.710(a) (SO_2 Group 2 trading budgets) and 40 CFR 97.410(a) (NO_X Annual trading budgets). This commitment letter formed the basis for EPA's conditional approval of the visibility transport element of several infrastructure SIP submittals from the State. *See* 81 FR 65899 (September 26, 2016). SO_2 is not an ozone precursor; therefore, SO_2 reductions under CSAPR do not impact ozone air quality.

[9] *See* 81 FR 74504 for further discussion. Georgia has an ongoing original CSAPR NO_X ozone season FIP requirement with respect to the 1997 ozone NAAQS, but EPA has found that is does not contribute to interstate transport with respect to the 2008 ozone NAAQS. EPA did not reopen comment on Georgia's interstate transport obligation with respect to the 1997 ozone NAAQS in the rulemaking for the CSAPR update rule, so Georgia's original CSAPR NO_X ozone season requirements (including its emission budget) continue unchanged. *See* 81 FR 74506. The air quality modeling for the CSAPR update rule did not identify the Atlanta Area as an attainment or maintenance receptor for the 2008 8-hour ozone NAAQS. *See https://www3.epa.gov/airmarkets/CSAPRU/AQ%20Modeling%20TSD%20Final%20CSAPR%20Update.pdf.*

[10] Georgia also identified Tier 3 Motor Vehicle Emissions and Fuel Standards as a federal measure. EPA issued this rule in April 28, 2014, which applies to light duty passenger cars and trucks. EPA promulgated this rule to reduce air pollution from new passenger cars and trucks beginning in 2017. Tier 3 emission standards will lower sulfur content of gasoline and lower the emissions standards.

[11] EPA, Regulatory Announcement, EPA420–F–99–051 (December 1999), available at: *http://www.epa.gov/tier2/documents/f99051.pdf.*

2018. The decrease in fuel consumption will result in a 7 percent to 20 percent decrease in NO_X emissions.

Heavy-duty gasoline and diesel highway vehicle standards. EPA issued this rule in January 2001 (66 FR 5002). This rule includes standards limiting the sulfur content of diesel fuel, which went into effect in 2004. A second phase took effect in 2007, which further reduced the highway diesel fuel sulfur content to 15 ppm, leading to additional reductions in combustion NO_X and VOC emissions. EPA expects that this rule will achieve a 95 percent reduction in NO_X emissions from diesel trucks and buses and will reduce NO_X emissions by 2.6 million tons by 2030 when the heavy-duty vehicle fleet is completely replaced with newer heavy-duty vehicles that comply with these emission standards.[12]

Nonroad spark-ignition engines and recreational engines standards. The nonroad spark-ignition and recreational engine standards, effective in July 2003, regulate NO_X, hydrocarbons, and carbon monoxide from groups of previously unregulated nonroad engines. These engine standards apply to large spark-ignition engines (*e.g.,* forklifts and airport ground service equipment), recreational vehicles (*e.g.,* off-highway motorcycles and all-terrain-vehicles), and recreational marine diesel engines sold in the United States and imported after the effective date of these standards. When all of the nonroad spark-ignition and recreational engine standards are fully implemented, an overall 72 percent reduction in hydrocarbons, 80 percent reduction in NO_X, and 56 percent reduction in carbon monoxide emissions are expected by 2020. These controls reduce ambient concentrations of ozone, carbon monoxide, and fine particulate matter.

National program for greenhouse gas (GHG) emissions and fuel economy standards. The federal GHG and fuel economy standards apply to light-duty cars and trucks in model years 2012–2016 (phase 1) and 2017–2025 (phase 2). The final standards are projected to result in an average industry fleet-wide level of 163 grams/mile of carbon dioxide which is equivalent to 54.5 miles per gallon if achieved exclusively through fuel economy improvements. The fuel economy standards result in less fuel being consumed, and therefore less NO_X emissions released.

Boiler and Reciprocating Internal Combustion Engine (RICE) National Emissions Standards for Hazardous Air Pollutants (NESHAP). The NESHAP for industrial, commercial, and institutional boilers and the NESHAP for RICE are projected to reduce VOC emissions. The former applies to boiler and process heaters located at major sources of hazardous air pollutants (HAPs) that burn natural gas, fuel oil, coal, biomass, refinery gas, or other gas and had a compliance deadline of January 31, 2016. The latter applies to existing, new, or reconstructed stationary RICE located at major or area sources of HAPs, excluding stationary RICE being tested at a stationary RICE test cell, and has various compliance dates from August 16, 2004, to October 19, 2013, depending on the type of source.

Utility Mercury Air Toxics Standards (MATS) and New Source Performance Standards (NSPS). The MATS for coal and oil-fired electric generation units (EGU) and the NSPS for fossil-fuel-fired electric utility steam generating units were published on February 16, 2012 (77 FR 9304). The purpose is to reduce mercury and other toxic air pollutant emissions from coal and oil-fired EGUs, 25 megawatts or more, that generate electricity for sale and distribution through the national electric grid to the public. The NSPS has revised emission standards for NO_X, SO_2, and particulate matter (PM) that apply to new coal and oil-fired power plants. The MATS compliance date for existing sources was April 16, 2015. However, all coal fired EGUs in Georgia received a one-year compliance extension. MATS rule is expected to reduce NO_X and SO_2 emissions as well as emissions of mercury and other air toxics.

EPA proposes to find that the improvements in air quality in the Atlanta Area are due to real, permanent and enforceable reductions in NO_X and VOC emissions resulting from the federal and SIP-approved state measures discussed above.

Criteria (4)—The Atlanta Area Has a Fully Approved Maintenance Plan Pursuant to Section 175A of the CAA

For redesignating a nonattainment area to attainment, the CAA requires EPA to determine that the area has a fully approved maintenance plan pursuant to section 175A of the CAA (CAA section 107(d)(3)(E)(iv)). In conjunction with its request to redesignate the Atlanta Area to attainment for the 2008 8-hour ozone NAAQS, Georgia submitted a SIP revision to provide for the maintenance of the 2008 8-hour ozone NAAQS for at least 10 years after the effective date of redesignation to attainment. EPA has made the preliminary determination that this maintenance plan meets the requirements for approval under section 175A of the CAA.

a. What is required in a maintenance plan?

Section 175A of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. Under section 175A, the plan must demonstrate continued attainment of the applicable NAAQS for at least 10 years after the Administrator approves a redesignation to attainment. Eight years after the redesignation, the state must submit a revised maintenance plan which demonstrates that attainment will continue to be maintained for the remainder of the 20-year period following the initial 10-year period. To address the possibility of future NAAQS violations, the maintenance plan must contain contingency measures as EPA deems necessary to assure prompt correction of any future 2008 8-hour ozone violations. The Calcagni Memorandum provides further guidance on the content of a maintenance plan, explaining that a maintenance plan should address five requirements: The attainment emissions inventory, maintenance demonstration, monitoring, verification of continued attainment, and a contingency plan. As is discussed more fully below, EPA has preliminarily determined that Georgia's maintenance plan includes all the necessary components and is thus proposing to approve it as a revision to the Georgia SIP.

b. Attainment Emissions Inventory

As discussed above, EPA has determined that the Atlanta Area attained the 2008 8-hour ozone NAAQS based on quality-assured monitoring data for the 3-year period from 2013–2015. *See* 81 FR 45419. Georgia selected 2014 as the base year (*i.e.,* attainment emissions inventory year) for developing a comprehensive emissions inventory for NO_X and VOC, for which projected emissions could be developed for 2018, 2022, and 2026. The attainment inventory identifies a level of emissions in the Area that is sufficient to attain the 2008 8-hour ozone NAAQS. Georgia began development of the attainment inventory by first generating a baseline emissions inventory for the Area. The 2014 base year emissions were projected to 2030 for EGU point sources, non-EGU point sources, area sources, fires (both agricultural burning and land clearing, and wildfire and prescribed burning), non-road mobile sources, and on-road mobile sources. The State projected summer day emission inventories using projected rates of growth in population, traffic, economic activity, and other

[12] 66 FR 5002, 5012 (January 18, 2001).

parameters. In addition to comparing the final year of the plan (2030) to the base year (2014), Georgia compared interim years to the baseline to demonstrate that these years are also expected to show continued maintenance of the 2008 8-hour ozone standard.

The emissions inventory is composed of four major types of sources: Point, non-point, on-road mobile, and non-road mobile. Complete descriptions of how the State developed these inventories are located in Appendix A of the July 18, 2016, SIP submittal.

Point Sources

Georgia provided point source emissions for EGU and non-EGU stationary sources with emissions equal to or exceeding 25 tons per year of VOC or NO_X in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties, and equal to or exceeding 100 tons per year of VOC or NO_X in Bartow and Newton counties.

EGU point source emissions for the three power plants in the Area (Plant Bowen, Plant McDonough/Atkinson, and Plant Yates) are tabulated from data collected from Georgia Power during the 2014 emission data collection process.[13] Georgia projected 2030 NO_X and VOC emissions for two of the EGUs, Plant Bowen and Plant McDonough/Atkinson, from 2014 emissions using growth factors based on fuel consumption. At Plant Yates, five units were retired in 2015 and two units were converted from coal to natural gas boilers in 2015, and in the future, this facility is planned to be run as a peaking unit with a capacity factor of approximately 25 percent. Therefore, Georgia projected 2030 NO_X emissions using the plant's projected usage, a nominal heat rate of 12 MMBtu/MWh, and the measured NO_X emission rates after it was converted to natural gas. Georgia projected 2030 VOC emissions at the plant using maximum measured emission rates for May and June of 2015.

For non-EGU emissions, Georgia calculated summer day emissions for the 2014 and 2030 inventories using 2014 NO_X and VOC emissions submitted by facilities during the 2014 GA EPD emission data collection process. The basis for Georgia's no-growth assumption for non-EGU point source emissions from 2014–2030 is discussed in the SIP submittal.

Non-Point Sources

GA EPD based its 2014 area source emissions on its 2014 Air Emissions Reporting Requirements (AERR) submittal.[14] [15] For certain area source sectors, GA EPD used EPA draft 2014 emission estimates [16] and for other source sectors for which EPA does not have draft 2014 estimates, GA EPD estimated 2014 area emissions using the average of 2011 and 2017 emissions from EPA's 2011 emissions modeling platform v6.2.[17] GA EPD multiplied 2014 area source emissions with growth factors to estimate 2030 area source emissions. These growth factors were calculated using 2011, 2017, and 2025 emissions in EPA's 2011 modeling platform v6.2.

GA EPD developed 2014 agricultural burning and land clearing emissions using 2014 burning records from the Georgia Forestry Commission (GFC) and EPA agricultural burning emission factors.[18] GA EPD used 2014 burning records from GFC and military bases to determine 2014 wildfire and prescribed burning emissions. GA EPD assumed that emissions from agricultural burning, land clearing, wildfire, and prescribed burning remained constant from 2014–2030.

On-Road Sources

The Atlanta Regional Commission developed 2014 and 2030 on-road mobile source emissions using EPA's MOVES2014a mobile source emissions model. GA EPD used best available local data for model inputs such as vehicle population, vehicle miles traveled (VMT), road type distribution, average speed distribution, starts, ramp fractions, age distributions, I/M inputs, and fuel properties. The model was run separately for two different groups of nonattainment counties because of differences in I/M program and Stage II refueling requirements. The first group consisted of the following 13 counties with Stage II refueling in place through 2015 [19] and I/M programs: Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale. The second group consisted of the following counties without I/M programs or Stage II refueling: Bartow and Newton.

Non-Road Sources

Some non-road mobile emissions in the U.S. are from the non-road equipment segment (*i.e.,* agricultural equipment, construction equipment, lawn and garden equipment, and recreational vehicles, such as boats and jet-skis). Georgia calculated 2014 and 2030 emissions from non-road sources other than marine, aircraft, and locomotives using the NONROAD portion of EPA's MOVES2014a model.[20] MOVES2014a defaults were used with 2014 meteorological data based on Atlanta Hartsfield Jackson International Airport meteorological data. Fuel properties reflected the current Georgia gasoline.[21]

For 2014 locomotive emissions, Georgia used 2011 emissions obtained from 2011 emissions modeling platform v6.2 [22] because locomotive fuel consumption changed little from 2011 to 2014. Georgia projected 2030 locomotive emissions from 2014 emissions using growth and control factors. Summer day and annual emissions for 2014 and 2030 from aircraft at Atlanta Hartsfield Jackson International Airport were provided by

[13] Georgia's emission data collection process is discussed at *http://epd.georgia.gov/air/emissions-inventory-system-eis.*

[14] The area source inventory was developed with the February 16, 2016, draft National Emissions Inventory for 2014 (2014 NEI) for all available source categories. Georgia EPD provided estimates for remaining area source categories not yet included in the draft 2014 NEI, which served as the basis for Georgia's required submittal for NEI development. The 2014 NEI is discussed further at *https://www.epa.gov/air-emissions-inventories/2014-national-emissions-inventory-nei-documentation.*

[15] EPA's AERR, set forth at Subpart A to 40 CFR part 51, specifies that a state must submit triennial reports of annual (12-month) emissions for all sources and every-year reports of annual emissions of criteria air pollutants and their precursors for all major sources as well as annual emissions reporting from certain larger sources, as outlined in Appendix A to Subpart A. These submittals serve to help develop the national emissions inventory that EPA compiles and publishes triennially. The AERR includes specific reporting thresholds for point sources in attainment and nonattainment areas allows for general estimates for non-point sources.

[16] *https://www.epa.gov/air-emissions-inventories/2014-national-emissions-inventory-nei-documentation.*

[17] Information regarding the 2011 emissions modeling platform v6.2 is located at *https://www.epa.gov/air-emissions-modeling/2011-version-6-air-emissions-modeling-platforms.*

[18] These emissions factors are available at *https://www.epa.gov/air-emissions-inventories/2014-national-emissions-inventory-nei-documentation.*

[19] As discussed above, Stage II controls are no longer required because EPA promulgated onboard refueling vapor recovery standards on April 6, 1994. See 59 FR 16262; 40 CFR parts 86, 88, and 600. On January 22, 2015, Georgia submitted a SIP revision to remove Stage II requirements from their SIP, and EPA approved this revision on September 25, 2015. *See* 80 FR 57729.

[20] Georgia used the version of MOVES2014a released by EPA on November 4, 2015. More information on the MOVES2014a model is available at *https://www.epa.gov/moves/moves2014a-latest-version-motor-vehicle-emission-simulator-moves.*

[21] Many of the counties in the Atlanta Area must use gasoline with a reduced Reid Vapor Pressure (RVP) of 7.8 pounds per square inch during some of the summer months. This reduced RVP reduces VOC emissions. For further information on RVP, see *https://www.epa.gov/gasoline-standards/gasoline-reid-vapor-pressure.*

[22] *https://www.epa.gov/air-emissions-modeling/2011-version-6-air-emissions-modeling-platforms.*

KB Environmental Sciences on behalf of the City of Atlanta Department of Aviation and included in Appendix A–9 of the SIP submittal. Other aircraft emissions were projected from the 2011 emissions modeling platform v6.2 for 2014 and were projected for 2030 using growth factors. These growth factors were based on landing and take-off operation projections available from the Federal Aviation Administration's Terminal Area Forecasts. Growth rates for military aircraft stayed at 2011 levels. Georgia did not include marine emissions in the inventory because no commercial marine vessels operate in the Atlanta Area.

The 2014 base year inventory for the Area, as well as the projected inventories for other years, were developed consistent with EPA guidance and are summarized in Tables 2 through 6 of the following subsection discussing the maintenance demonstration.

c. Maintenance Demonstration

The maintenance plan associated with the redesignation request includes a maintenance demonstration that:

(i) Shows compliance with and maintenance of the 2008 8-hour ozone NAAQS by providing information to support the demonstration that current and future emissions of NO_X and VOC remain at or below 2014 emissions levels.

(ii) Uses 2014 as the attainment year and includes future emissions inventory projections for 2018, 2022, 2026, and 2030. The 2022 emissions were calculated by linear interpolation between 2014 and 2030; 2018 emissions were calculated by linear interpolation between 2014 and 2022; and 2026 emissions were calculated by linear interpolation between 2022 and 2030.

(iii) Identifies an ''out year'' at least 10 years after the time necessary for EPA to review and approve the maintenance plan. Per 40 CFR part 93, NO_X and VOC MVEBs were established for the last year (2030) of the maintenance plan as well as for an interim year 2014 (see section VI below).

(iv) Provides actual (2014) and projected emissions inventories, in tons per summer day (tpsd), for the Atlanta Area, as shown in Tables 3 and 4, below.

TABLE 3—ACTUAL AND PROJECTED AVERAGE SUMMER DAY NO_X EMISSIONS FOR THE ATLANTA AREA

[Tons per summer day (tpsd)]

Sector	2014	2018	2022	2026	2030
Point	31.36	31.11	30.85	30.60	30.34
Non-point	4.88	4.93	4.97	5.02	5.06
Non-road	76.69	69.99	63.29	56.59	49.89
On-road	170.15	137.01	103.86	70.72	37.57
Total	283.09	243.03	202.98	162.92	122.86

TABLE 4—ACTUAL AND PROJECTED AVERAGE SUMMER DAY VOC EMISSIONS FOR THE ATLANTA AREA

[tpsd]

Sector	2014	2018	2022	2026	2030
Point	11.24	11.25	11.26	11.27	11.28
Non-point	119.89	118.52	117.16	115.79	114.42
Non-road	53.38	53.11	52.83	52.56	52.28
On-road	81.76	69.49	57.22	44.94	32.67
Total	266.25	252.35	238.45	224.54	210.64

Tables 3 and 4 summarize the 2014 and future projected emissions of NO_X and VOC in the Atlanta Area. In situations where local emissions are the primary contributor to nonattainment, such as the Atlanta Area, if the future projected emissions in the nonattainment area remain at or below the baseline emissions in the nonattainment area, then the related ambient air quality standard should not be exceeded in the future. Georgia has projected emissions as described previously and determined that emissions in the Atlanta Area will remain below those in the attainment year inventory for the duration of the maintenance plan.

As discussed in section VI of this proposed rulemaking, below, a safety margin is the difference between the attainment level of emissions (from all sources) and the projected level of emissions (from all sources) in the maintenance plan. The attainment level of emissions is the level of emissions during one of the years in which the area met the NAAQS. Georgia selected 2014 as the attainment emissions inventory year for the Atlanta Area and calculated safety margins for 2030 as shown in Table 5, below.

TABLE 5—SAFETY MARGINS FOR THE ATLANTA AREA

Year	VOC (tpd)	NO_X (tpd)
2030	55.61	160.23

The State has decided to allocate a portion of the available safety margin to the 2030 MVEBs to allow for, among other things, unanticipated growth in VMT and changes and uncertainty in vehicle mix assumptions that will influence the emission estimations. Georgia has allocated 20.43 tpd (34.76 percent) of the available NO_X safety margin to the 2030 NO_X MVEB and 19.33 tpd (12.75 percent) of the available VOC safety margin to the 2030 VOC MVEB. After allocation of the available safety margin, the remaining safety margin is 139.80 tpd for NO_X and 36.28 tpd for VOC. This allocation and the resulting available safety margin for the Atlanta Area are discussed further in section VI of this proposed rulemaking along with the MVEBs to be used for transportation conformity proposes.

d. Monitoring Network

There currently are nine monitors measuring ozone in the Atlanta Area. Georgia will continue to operate the monitors in the Atlanta Area in compliance with 40 CFR part 58 and has

thus addressed the requirement for monitoring. EPA approved Georgia's monitoring plan on October 13, 2015.

e. Verification of Continued Attainment

Georgia, through the GA EPD, has the legal authority to enforce and implement the maintenance plan for the Area. This includes the authority to adopt, implement, and enforce any subsequent emissions control contingency measures determined to be necessary to correct future ozone attainment problems.

Additionally, under the AERR, GA EPD is required to develop a comprehensive, annual, statewide emissions inventory every three years that is due twelve to eighteen months after the completion of the inventory year. EPD will update the AERR inventory every three years and will use the updated emissions inventory to track progress of the maintenance plan.

f. Contingency Measures in the Maintenance Plan

Section 175A of the CAA requires that a maintenance plan include such contingency measures as EPA deems necessary to assure that the state will promptly correct a violation of the NAAQS that occurs after redesignation. The maintenance plan should identify the contingency measures to be adopted, a schedule and procedure for adoption and implementation, and a time limit for action by the state. A state should also identify specific indicators to be used to determine when the contingency measures need to be implemented. The maintenance plan must include a requirement that a state will implement all measures with respect to control of the pollutant that were contained in the SIP before redesignation of the area to attainment in accordance with section 175A(d).

In the July 18, 2016, submittal, Georgia commits to continuing existing programs and commits to use emission inventory and air quality monitoring data as indicators to determine whether contingency measures will be implemented. The contingency plan included in the maintenance plan includes a two-tiered triggering mechanism to determine when contingency measures are needed and a process of developing and implementing appropriate control measures.

A Tier 1 trigger will apply where a violation of the 2008 8-hour standard has not occurred, but where the State finds monitored ozone concentrations indicating that a violation may be imminent. The Tier 1 trigger date will be 60 days after the State observes a 4th highest value of 0.076 ppm or greater at a single monitor for which the previous ozone season had a 4th highest value of 0.076 ppm or greater. If Tier 1 is triggered, Georgia will develop a plan identifying additional voluntary measures to be implemented to remedy the situation that may include the following measures or any other measure deemed appropriate and effective at the time the selection is made: Clean Air Force Campaign Strategies; additional Georgia Department of Transportation marketing campaigns; implementation of diesel retrofit programs, including incentives for performing retrofits for fleet vehicle operations; alternative fuel programs for fleet vehicle operations; gas can and lawnmower replacement programs; or voluntary engine idling reduction programs.[23] If the 4th highest exceedance occurs early in the ozone season, GA EPD will work with entities identified in the plan to determine if measures can be implemented during the current season, otherwise, GA EPD will implement the plan for the following ozone season. No later than May 1 of the year following the trigger, GA EPD will complete analyses to begin adoption of necessary rules for ensuring attainment and maintenance of the 2008 8-hour ozone NAAQS that would become state effective by the following year.

A Tier II trigger occurs when the periodic emissions inventory updates (AERR) reveal excessive or unanticipated growth greater than 10 percent in NO_X or VOC emissions over the attainment or intermediate emissions inventories for the Area or when there is a quality assured design value equal to or greater than 0.076 ppm at a monitor in the Area, which is a violation of the 2008 Ozone NAAQS. The trigger date will be 60 days from the date that Georgia observes a 4th highest value that, when averaged with the two previous ozone seasons' 4th highest values, results in a three-year average equal to or greater than 0.076 ppm. If a Tier II trigger occurs, Georgia will conduct a comprehensive analysis and, as expeditiously as practicable but no later than 24 months of the trigger, will implement at least one contingency measure. In order for more time to be allowed, Georgia must submit to EPA a demonstration that more time is needed and EPA must approve such demonstration.

If the comprehensive analysis determines that emissions from the Area are contributing to the trigger condition, GA EPD will evaluate those measures as specified in CAA section 172 for control options as well as other available measures. If a new measure/control is already promulgated and scheduled to be implemented at the federal or state level, and that measure/control is determined to be adequate, the State may conclude that additional local controls may be unnecessary. Under Section 175A(d), the minimum requirement for contingency measures is the implementation of all measures that were contained in the SIP before the redesignation. Currently all such measures are in effect for the Atlanta Area; however, an evaluation of those measures, such as RACT, can be performed to determine if those measures are adequate or up-to-date. In addition to these measures, contingency measure(s) will be selected from the following types of measures or from any other measure deemed appropriate and effective at the time the selection is made:

- RACM for sources of VOC and NO_X;
- RACT for point sources of VOC and NO_X, specifically the adoption of new and revised RACT rules based on Groups II, III, and IV CTGs;
- Expansion of RACM/RACT to area(s) of transport within the State;
- Other measures deemed appropriate at the time as a result of advances in control technologies; and
- Additional NO_X reduction measures yet to be identified.

EPA preliminarily concludes that the maintenance plan adequately addresses the five basic components of a maintenance plan: The attainment emissions inventory, maintenance demonstration, monitoring, verification of continued attainment, and a contingency plan. Therefore, EPA proposes to find that the maintenance plan SIP revision submitted by Georgia for the Area meets the requirements of section 175A of the CAA and is approvable.

VI. What is EPA's analysis of Georgia's proposed NO_X and VOC MVEBs for the area?

Under section 176(c) of the CAA, new transportation plans, programs, and projects, such as the construction of new highways, must ''conform'' to (*i.e.,*

[23] If the State adopts a voluntary emission reduction measure as a contingency measure necessary to attain or maintain the NAAQS, EPA will evaluate approvability in accordance with relevant Agency guidance regarding the incorporation of voluntary measures into SIPs. *See, e.g.,* Memorandum from Richard D. Wilson, Acting Administrator for Air and Radiation, to EPA Regional Administrators re: Guidance on Incorporating Voluntary Mobile Source Emission Reduction Programs in State Implementation Plans (SIPs) (October 24, 1997); EPA, Office of Air and Radiation, Incorporating Emerging and Voluntary Measures in a State Implementation Plan (SIP) (September 2004).

be consistent with) the part of the state's air quality plan that addresses pollution from cars and trucks. Conformity to the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS or any interim milestones. If a transportation plan does not conform, most new projects that would expand the capacity of roadways cannot go forward. Regulations at 40 CFR part 93 set forth EPA policy, criteria, and procedures for demonstrating and assuring conformity of such transportation activities to a SIP. The regional emissions analysis is one, but not the only, requirement for implementing transportation conformity. Transportation conformity is a requirement for nonattainment and maintenance areas. Maintenance areas are areas that were previously nonattainment for a particular NAAQS but have since been redesignated to attainment with an approved maintenance plan for that NAAQS.

Under the CAA, states are required to submit, at various times, control strategy SIPs and maintenance plans for nonattainment areas. These control strategy SIPs (including RFP and attainment demonstration requirements) and maintenance plans create MVEBs for criteria pollutants and/or their precursors to address pollution from cars and trucks. Per 40 CFR part 93, a MVEB must be established for the last year of the maintenance plan. A state may adopt MVEBs for other years as well. The MVEB is the portion of the total allowable emissions in the maintenance demonstration that is allocated to highway and transit vehicle use and emissions. *See* 40 CFR 93.101. The MVEB serves as a ceiling on emissions from an area's planned transportation system. The MVEB concept is further explained in the preamble to the November 24, 1993, Transportation Conformity Rule (58 FR 62188). The preamble also describes how to establish the MVEB in the SIP and how to revise the MVEB.

After interagency consultation with the transportation partners for the Atlanta Area, Georgia has developed MVEBs for NO_X and VOC for the Area. Georgia developed these MVEBs for the last year of its maintenance plan (2030) and for the interim year of 2014. Because the interim MVEB year of 2014 is also the base year for the maintenance plan inventory, there is no safety margin; therefore, no adjustments were made to the MVEBs for 2014. The 2030 MVEBs reflect the total projected on-road emissions for 2030, plus an allocation from the available NO_X and VOC safety margins. Under 40 CFR 93.101, the term ''safety margin'' is the difference between the attainment level (from all sources) and the projected level of emissions (from all sources) in the maintenance plan. The safety margin can be allocated to the transportation sector; however, the total emissions must remain below the attainment level. The NO_X and VOC MVEBs and allocation from the safety margin were developed in consultation with the transportation partners and were added to account for uncertainties in population growth, changes in model vehicle miles traveled, and new emission factor models. The NO_X and VOC MVEBs for the Area are identified in Table 6, below.

TABLE 6—ATLANTA AREA NO_X AND VOC MVEBS

[tpd]

	2014	2030
NO_X On-Road Emissions	170.15	37.57
NO_X Safety Margin Allocated to MVEB	.....	20.43
NO_X MVEB	170.15	58
VOC On-Road Emissions	81.76	32.67
VOC Safety Margin Allocated to MVEB	.....	19.33
VOC MVEB	81.76	52

Georgia has chosen to allocate a portion of the available safety margin to the 2030 NO_X and VOC MVEBs for the Area based on the worst-case 2030 daily motor vehicle emissions projection. The worst-case projection for NO_X is 54 percent (20.43 tpd) above the projected 2030 NO_X on-road emissions and the worst-case projection for VOC is 59 percent (19.33 tpd) above the 2030 VOC on-road emissions. Georgia therefore allocated 20.43 tpd of the NO_X safety margin to the 2030 NO_X MVEB and 19.33 tpd of the VOC safety margin to the 2030 VOC MVEB. The remaining safety margins for 2030 are 139.80 tpd and 36.28 tpd NO_X and VOC, respectively.

Through this rulemaking, EPA is proposing to approve the MVEBs for NO_X and VOC for years 2014 and 2030 for the Area because EPA has preliminarily determined that the Area maintains the 2008 8-hour ozone NAAQS with the emissions at the levels of the budgets. If the MVEBs for the Area are approved or found adequate (whichever is completed first), they must be used for future conformity determinations.

VII. What is the status of EPA's adequacy determination for the proposed NO_X and VOC MVEBs the Atlanta area?

When reviewing submitted ''control strategy'' SIPs or maintenance plans containing MVEBs, EPA may affirmatively find the MVEB contained therein adequate for use in determining transportation conformity. Once EPA affirmatively finds the submitted MVEB is adequate for transportation conformity purposes, that MVEB must be used by state and federal agencies in determining whether proposed transportation projects conform to the SIP as required by section 176(c) of the CAA.

EPA's substantive criteria for determining adequacy of a MVEB are set out in 40 CFR 93.118(e)(4). The process for determining adequacy consists of three basic steps: public notification of a SIP submission, a public comment period, and EPA's adequacy determination. This process for determining the adequacy of submitted MVEBs for transportation conformity purposes was initially outlined in EPA's May 14, 1999, guidance, ''Conformity Guidance on Implementation of March 2, 1999, Conformity Court Decision.'' EPA adopted regulations to codify the adequacy process in the Transportation Conformity Rule Amendments for the ''New 8-Hour Ozone and $PM_{2.5}$ National Ambient Air Quality Standards and Miscellaneous Revisions for Existing Areas; Transportation Conformity Rule Amendments—Response to Court Decision and Additional Rule Change,'' on July 1, 2004 (69 FR 40004). Additional information on the adequacy process for transportation conformity purposes is available in the proposed rule entitled, ''Transportation Conformity Rule Amendments: Response to Court Decision and Additional Rule Changes,'' 68 FR 38974, 38984 (June 30, 2003).

As discussed earlier, Georgia's maintenance plan includes NO_X and VOC MVEBs for the Atlanta Area for interim year 2014 and 2030, the last year of the maintenance plan. EPA reviewed the NO_X and VOC MVEBs through the adequacy process described in Section I.

EPA intends to make its determination on the adequacy of the 2014 and 2030 MVEBs for the Area for transportation conformity purposes in the near future by completing the adequacy process that was started on September 2, 2016. If EPA finds the 2014 and 2030 MVEBs adequate or approves them, the new MVEBs for NO_X and VOC must be used for future

transportation conformity determinations. For required regional emissions analysis years that involve 2014 through 2029, the 2014 MVEBs will be used, and for years 2030 and beyond, the applicable budgets will be the new 2030 MVEBs established in the maintenance plan.

VIII. What is the effect of EPA's proposed actions?

EPA's proposed actions establish the basis upon which EPA may take final action on the issues being proposed for approval. Approval of Georgia's redesignation request would change the legal designation of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding and Rockdale Counties, in the Atlanta Area, found at 40 CFR part 81, from nonattainment to attainment for the 2008 8-hour ozone NAAQS. Approval of Georgia's associated SIP revision would also incorporate a plan for maintaining the 2008 8-hour ozone NAAQS in the Area through 2030 into the Georgia SIP. The maintenance plan establishes NO_X and VOC MVEBs for 2014 and 2030 for the Area and includes contingency measures to remedy any future violations of the 2008 8-hour ozone NAAQS and procedures for evaluating potential violations.

IX. Proposed Actions

EPA is proposing to: (1) Approve the maintenance plan for the Atlanta Area, including the NO_X and VOC MVEBs for 2014 and 2030, and incorporate it into the Georgia SIP, and (2) approve Georgia's redesignation request for the 2008 8-hour ozone NAAQS for the Area. Further, as part of this proposed action, EPA is also describing the status of its adequacy determination for the NO_X and VOC MVEBs for 2014 and 2030 in accordance with 40 CFR 93.118(f)(1). Within 24 months from the effective date of EPA's adequacy determination for the MVEBs or the effective date for the final rule for this action, whichever is earlier, the transportation partners will need to demonstrate conformity to the new NO_X and VOC MVEBs pursuant to 40 CFR 93.104(e)(3).

If finalized, approval of the redesignation request would change the official designation of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding and Rockdale Counties, in Georgia for the 2008 8-hour ozone NAAQS from nonattainment to attainment, as found at 40 CFR part 81.

X. Statutory and Executive Order Reviews

Under the CAA, redesignation of an area to attainment and the accompanying approval of a maintenance plan under section 107(d)(3)(E) are actions that affect the status of a geographical area and do not impose any additional regulatory requirements on sources beyond those imposed by state law. A redesignation to attainment does not in and of itself create any new requirements, but rather results in the applicability of requirements contained in the CAA for areas that have been redesignated to attainment. Moreover, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, these proposed actions merely propose to approve state law as meeting Federal requirements and do not impose additional requirements beyond those imposed by state law. For these reasons, these proposed actions:

- Are not significant regulatory actions subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- do not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- are certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- do not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- do not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- are not economically significant regulatory actions based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- are not significant regulatory actions subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- are not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- will not have disproportionate human health or environmental effects under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

40 CFR Part 300

[EPA–HQ–SFUND–1989–0009; FRL–9957–30–Region 3]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the North Penn Area 6 Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; Notice of intent for partial deletion of the North Penn Area 6 Superfund Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA) Region III is issuing a Notice of Intent to Delete a portion of the North Penn Area 6 Superfund Site (Site) located in Lansdale Borough, Montgomery County, Pennsylvania, from the National Priorities List (NPL). The proposed deletion affects approximately 6.5 acres at 135 East Hancock Street (the ''Administrative

Parcel''), and EPA requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is found at Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the Commonwealth of Pennsylvania, through the Pennsylvania Department of Environmental Protection (PADEP), have determined that all appropriate response actions under CERCLA, other than five-year reviews, have been completed at the Administrative Parcel. However, this partial deletion does not preclude future actions at the Administrative Parcel under Superfund.

This partial deletion pertains only to the soils and groundwater of the approximately 6.5 acre Administrative Parcel portion of the Site. The other portions of the Site will remain on the NPL, and are not being considered for deletion as part of this action.

DATES: Comments must be received by January 23, 2017.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1989–0009, by mail to Huu Ngo (3HS21), U.S. Environmental Protection Agency, 1650 Arch Street, Philadelphia, PA 19103–2029. Comments may also be submitted electronically or through hand delivery/courier by following the detailed instructions in the **ADDRESSES** section of the direct final rule located in the ''Rules and Regulations'' section of this **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Huu Ngo, Remedial Project Manager (3HS21), U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, PA 19103–2029; (215) 814–3187; email: *ngo.huu@epa.gov.*

SUPPLEMENTARY INFORMATION:

In the ''Rules and Regulations'' Section of today's **Federal Register**, we are publishing a direct final Notice of Partial Deletion of the Administrative Parcel of the North Penn Area 6 Superfund Site without prior Notice of Intent for Partial Deletion because EPA views this as a noncontroversial revision and anticipates no adverse comment. We have explained our reasons for this partial deletion in the preamble to the direct final Notice of Partial Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this partial deletion action, we will not take further action on this Notice of Intent for Partial Deletion. If we receive adverse comment(s), we will withdraw the direct final Notice of Partial Deletion and it will not take effect. We will, as appropriate, address all public comments in a subsequent final Notice of Partial Deletion based on this Notice of Intent for Partial Deletion. We will not institute a second comment period on this Notice of Intent for Partial Deletion. Any parties interested in commenting must do so at this time.

For additional information, see the direct final Notice of Partial Deletion, which is located in the ''Rules'' section of this **Federal Register**.

Endangered and Threatened Wildlife and Plants; Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service or USFWS), with the support of the State of Oregon Parks and Recreation Department (OPRD), propose to establish a nonessential experimental population (NEP) of the Oregon silverspot butterfly (*Speyeria zerene hippolyta*), a threatened species, under the authority of section 10(j) of the Endangered Species Act of 1973, as amended (Act). This proposed rule provides a plan for reintroducing the Oregon silverspot butterfly into portions of the subspecies' historical range at two sites in northwestern Oregon: Saddle Mountain State Natural Area (SNA) in Clatsop County, and Nestucca Bay National Wildlife Refuge (NWR) in Tillamook County. It would also provide for

allowable legal incidental taking of the Oregon silverspot butterfly within the defined NEP areas. The best available data indicate that reintroduction of the Oregon silverspot butterfly to Saddle Mountain SNA and Nestucca Bay NWR is biologically feasible and would promote the conservation of the subspecies.

DATES: We will accept comments received or postmarked on or before February 21, 2017. Please note that if you are using the Federal eRulemaking Portal (see **ADDRESSES**), the deadline for submitting an electronic comment is 11:59 p.m. Eastern Time on this date. We must receive requests for public hearings, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by February 6, 2017.

ADDRESSES: *Written comments:* You may submit comments by one of the following methods:

- *Electronically:* Go to the Federal eRulemaking Portal: *http://www.regulations.gov.* In the Search box, enter Docket No. FWS–R1–ES–2016–0102, which is the docket number for this rulemaking. Then, click the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, click on the box next to Proposed Rules to locate this document. You may submit a comment by clicking on ''Comment Now!''
- *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS–R1–ES–2016–0102, Division of Policy, Performance, and Management Programs, U.S. Fish and Wildlife Service, MS; BPHC; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

We will post all comments on *http://www.regulations.gov.* This generally means that we will post any personal information you provide us (see Public Comments, below, for more information).

Copies of documents: This proposed rule is available on *http://www.regulations.gov* under Docket No. FWS–R1–ES–2016–0102. In addition, the supporting file for this proposed rule will be available for public inspection, by appointment, during normal business hours, at the Newport Field Office, 2127 SE Marine Science Drive, Newport, OR 97365; telephone 541–867–4558. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339.

FOR FURTHER INFORMATION CONTACT: Laura Todd, Field Supervisor, 541–867–4558. Persons who use a TDD may call the Federal Relay Service (FRS) at 1–800–877–8339. Direct all questions or requests for additional information to: OREGON SILVERSPOT BUTTERFLY QUESTIONS, U.S. Fish and Wildlife Service, Newport Field Office, 2127 SE Marine Science Drive, Newport, OR 97365.

SUPPLEMENTARY INFORMATION:

Public Comments

We want any final rule resulting from this proposal to be as effective as possible. Therefore, we invite Tribal and governmental agencies, the scientific community, industry, and other interested parties to submit comments or recommendations concerning any aspect of this proposed rule. Comments should be as specific as possible.

To issue a final rule to implement this proposed action, we will take into consideration all comments and any additional information we receive. Such communications may lead to a final rule that differs from this proposal. All comments, including commenters' names and addresses, if provided to us, will become part of the supporting record.

You may submit your comments and materials concerning the proposed rule by one of the methods listed in **ADDRESSES**. Comments must be submitted to *http://www.regulations.gov* before 11:59 p.m. (Eastern Time) on the date specified in **DATES**. We will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in **DATES**.

We will post your entire comment—including your personal identifying information—on *http://www.regulations.gov.* If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as some of the supporting documentation we used in preparing this proposed rule, will be available for public inspection on *http://www.regulations.gov.* All comments and materials we receive, as well as all supporting documentation, will be available by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Newport Field Office (see **FOR FURTHER INFORMATION CONTACT**).

We particularly seek comments regarding:

- Any possible adverse effects on Oregon silverspot butterfly populations as a result of removal of individuals for the purposes of captive rearing and reintroduction of their offspring elsewhere;
- The likelihood that the proposed NEP will become established and survive in the foreseeable future;
- The relative effects that establishment of the NEP will have on the recovery of the subspecies; and
- The extent to which the reintroduced population may be affected by existing or anticipated Federal or State actions or private activities within or adjacent to the proposed NEP areas.

Peer Review

In accordance with our Interagency Cooperative Policy for Peer Review in Endangered Species Act Activities, which was published on July 1, 1994 (59 FR 34270), and a recent internal memorandum clarifying the Service's interpretation and implementation of that policy (USFWS 2016), we will seek the expert opinion of at least three appropriate independent specialists regarding scientific data and interpretations contained in this proposed rule. We will send copies of this proposed rule to the peer reviewers immediately following publication in the **Federal Register**. The purpose of such review is to ensure that our decisions are based on scientifically sound data, assumptions, and analysis. Accordingly, the final decision may differ from this proposal.

Background

Statutory and Regulatory Framework

We listed the Oregon silverspot butterfly as a threatened species under the Act (16 U.S.C. 1531 *et seq.*) on October 15, 1980 (45 FR 44935; July 2, 1980). We designated critical habitat for the subspecies at the time of listing (45 FR 44935; July 2, 1980).

Species listed as endangered or threatened are afforded protection primarily through the prohibitions of section 9 of the Act and the requirements of section 7 of the Act. Section 9 of the Act, among other things, prohibits the take of endangered wildlife. ''Take'' is defined by the Act as harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct. Our regulations (50 CFR 17.31) generally extend the prohibition of take to threatened wildlife species. Section 7 of the Act outlines the procedures for Federal interagency cooperation to conserve federally listed species and protect designated critical habitat. It mandates that all Federal agencies use their existing authorities to further the

purposes of the Act by carrying out programs for the conservation of listed species. It also states that Federal agencies must, in consultation with the Service, ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of designated critical habitat. Section 7 of the Act does not affect activities undertaken on private land unless they are authorized, funded, or carried out by a Federal agency.

The 1982 amendments to the Act (16 U.S.C. 1531 *et seq.*) included the addition of section 10(j), which allows for the designation of reintroduced populations of listed species as ''experimental populations.'' The provisions of section 10(j) were enacted to ameliorate concerns that reintroduced populations would negatively impact landowners and other private parties, by giving the Secretary greater regulatory flexibility and discretion in managing the reintroduction of listed species to encourage recovery in collaboration with partners, especially private landowners. Under section 10(j) of the Act and our regulations at 50 CFR 17.81, the Service may designate as an experimental population an endangered or threatened species that has been or will be released into suitable natural habitat outside the species' current natural range (but within its probable historical range, absent a finding by the Director of the Service in the extreme case that the primary habitat of the species has been unsuitably and irreversibly altered or destroyed).

As discussed below (see Relationship of the NEP to Recovery Efforts), we are considering the reintroduction of the Oregon silverspot butterfly into areas of suitable habitat within its historical range for the purpose of restoring populations to meet recovery goals. Oregon silverspot butterfly populations have been reduced from at least 20 formerly known locations to only 5, thus reintroductions are important to achieve biological redundancy in populations and to broaden the distribution of populations within the geographic range of the subspecies. The restoration of multiple populations of Oregon silverspot butterfly distributed across its range is one of the recovery criteria identified for the subspecies (USFWS 2001, pp. 39–41).

When we establish experimental populations under section 10(j) of the Act, we must determine whether such a population is essential or nonessential to the continued existence of the species. This determination is based solely on the best scientific and commercial data available. Our regulations (50 CFR 17.80(b)) state that an experimental population is considered essential if its loss would be likely to appreciably reduce the likelihood of survival of that species in the wild. All other populations are considered nonessential. We find the proposed experimental population to be nonessential for the following reasons: (1) Oregon silverspot butterflies are currently found at five locations, from the central Oregon coast to northern California (see Biological Information, below); (2) There are ongoing management efforts, including captive rearing and release, to maintain or expand Oregon silverspot butterfly populations at these five locations (VanBuskirk 2010, entire; USFWS 2012, entire); (3) The experimental population will not provide demographic support to the wild populations (see Location and Boundaries of the NEP, below); (4) The experimental population will not possess any unique genetic or adaptive traits that differ from those in the wild populations because it will be established using donor stock from extant wild populations of Oregon silverspot butterflies (see Donor Stock Assessment and Effects on Donor Populations, below); and (5) loss of the experimental population will not preclude other recovery options, including future efforts to reestablish Oregon silverspot butterfly populations elsewhere. Therefore, we are proposing to designate a nonessential experimental population (NEP) of Oregon silverspot butterfly at two sites in northwest Oregon.

With the NEP designation, the relevant population is treated as if it were listed as a threatened species for the purposes of establishing protective regulations, regardless of the species' designation elsewhere in its range. This approach allows us to develop tailored take prohibitions that are necessary and advisable to provide for the conservation of the species. In these situations, the general regulations that extend most section 9 prohibitions to threatened species do not apply to that species. The protective regulations adopted for an experimental population in a section 10(j) rule contain the applicable prohibitions and exceptions for that population. These section 9 prohibitions and exceptions apply on all lands within the NEP.

For the purposes of section 7 of the Act, which addresses Federal cooperation, we treat an NEP as a threatened species when the NEP is located within a National Wildlife Refuge or unit of the National Park Service, and Federal agency conservation requirements under section 7(a)(1) and the Federal agency consultation requirements of section 7(a)(2) of the Act apply. Section 7(a)(1) of the Act requires all Federal agencies to use their authorities to carry out programs for the conservation of listed species. Section 7(a)(2) requires that Federal agencies, in consultation with the Service, ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of a listed species or adversely modify its critical habitat. When NEPs are located outside a National Wildlife Refuge or National Park Service unit, then, for the purposes of section 7, we treat the population as proposed for listing and only section 7(a)(1) and section 7(a)(4) of the Act apply. In these instances, NEPs provide additional flexibility because Federal agencies are not required to consult with us under section 7(a)(2). Section 7(a)(4) requires Federal agencies to confer (rather than consult) with the Service on actions that are likely to jeopardize the continued existence of a species proposed to be listed. The results of a conference are in the form of conservation recommendations that are optional to the agencies carrying out, funding, or authorizing activities. If finalized, the NEP area within Nestucca Bay NWR will still be subject to the provisions of section 7(a)(2), and intra-agency consultation would be required on the refuge. Section 7(a)(2) consultation would not be required outside of the refuge.

Before authorizing the release as an experimental population (including eggs, propagules, or individuals) of an endangered or threatened species, and before authorizing any necessary transportation to conduct the release, the Service must find, by regulation, that such release will further the conservation of the species. In making such a finding, the Service uses the best scientific and commercial data available to consider the following factors (see 49 FR 33893; August 27, 1984): (1) Any possible adverse effects on extant populations of a species as a result of removal of individuals, eggs, or propagules for introduction elsewhere (see *Donor Stock Assessment and Effects on Donor Populations,* below); (2) the likelihood that any such experimental population will become established and survive in the foreseeable future (see *Likelihood of Population Establishment and Survival,* below); (3) the relative effects that establishment of an experimental population will have on the recovery of the species (see *Relationship of the NEP*

to Recovery Efforts, below); and (4) the extent to which the introduced population may be affected by existing or anticipated Federal or State actions or private activities within or adjacent to the experimental population area (see *Extent to Which the Reintroduced Population May Be Affected by Land Management Within the Proposed NEP,* below).

Furthermore, as set forth at 50 CFR 17.81(c), all regulations designating experimental populations under section 10(j) must provide: (1) Appropriate means to identify the experimental population, including, but not limited to, its actual or proposed location, actual or anticipated migration, number of specimens released or to be released, and other criteria appropriate to identify the experimental population(s) (see *Location and Boundaries of the NEP,* below); (2) a finding, based solely on the best scientific and commercial data available, and the supporting factual basis, on whether the experimental population is, or is not, essential to the continued existence of the species in the wild (see discussion in this section, above); (3) management restrictions, protective measures, or other special management concerns of that population, which may include but are not limited to, measures to isolate and/or contain the experimental population designated in the regulation from natural populations (see *Extent to Which the Reintroduced Population May Be Affected by Land Management Within the Proposed NEP,* below); and (4) a process for periodic review and evaluation of the success or failure of the release and the effect of the release on the conservation and recovery of the species (see *Reintroduction Effectiveness Monitoring and Donor Population Monitoring,* below).

Under 50 CFR 17.81(d), the Service must consult with appropriate State fish and wildlife agencies, local governmental entities, affected Federal agencies, and affected private landowners in developing and implementing experimental population rules. To the maximum extent practicable, section 10(j) rules represent an agreement between the Service, the affected State and Federal agencies, and persons holding any interest in land which may be affected by the establishment of an experimental population.

Section 10(j)(2)(C)(ii) of the Act states that critical habitat shall not be designated for any experimental population that is determined to be nonessential. Accordingly, we cannot designate critical habitat in areas where we establish an NEP.

Biological Information

The Oregon silverspot butterfly is a small, darkly marked coastal subspecies of the Zerene fritillary, a widespread butterfly species in montane western North America (USFWS 2001, p. 1). Historically, the Oregon silverspot butterfly was documented at 20 locations, from the border of northern California to the southern coast of Washington (McCorkle *et al.* 1980, p. 7). Its current distribution is limited to five locations, one near Lake Earl, along the coast of Del Norte County, California; two on the central Oregon coast in Lane County, Oregon; and two in Tillamook County, Oregon. With the exception of the two populations on the central Oregon coast that are only about 5 miles (mi) (8 kilometers (km)) apart, all remaining populations are geographically isolated from one another (USFWS 2001, pp. 8–10).

The Oregon silverspot butterfly has a 1-year life cycle which begins when female adults lay eggs on or near early blue violets (*Viola adunca*) during their flight period from mid-August through September. The eggs hatch within 10 days. The tiny first-instar caterpillars eat their eggshells and then go into diapause, a hibernation-like state, until late spring the following year when violets begin growing. Caterpillars are cryptic in habits and feed on early blue violets and a few other *Viola* species until pupation in the summer. Adult emergence starts in July and extends into September.

The Oregon silverspot butterfly occupies three types of grassland habitat: marine terrace and coastal headland meadows, stabilized dunes, and montane grasslands. Key resources needed by the Oregon silverspot butterfly in all of these habitats include: (1) The early blue violet, which is the primary host plant for Oregon silverspot caterpillars; (2) a variety of nectar plants that bloom during the butterfly flight period, including, but not limited to, yarrow (*Achillea millefolium*), pearly everlasting (*Anaphalis margaritacea*), Pacific aster (*Symphyotrichum chilense*), Canada goldenrod (*Solidago canadensis*), tansy ragwort (*Senecio jacobaea*), and edible thistle (*Cirsium edule*); (3) grasses and forbs in which the larvae find shelter; and (4) trees surrounding occupied meadows, which provide shelter for adult butterflies (45 FR 44935, July 2, 1980, p. 44939; USFWS 2001, p. 12). Historically, habitats with these key resources were likely widely distributed along the Oregon and Washington coasts (Hammond and McCorkle 1983, p. 222). Loss of habitat and key resources occurred as a result of human development and due to ecological succession and invasion of shrubs, trees, and tall introduced grasses which crowd-out the subspecies' host plants and nectar resources (Hammond and McCorkle 1983, p. 222). Loss of habitat was the primary threat to the subspecies identified in our 2001 Revised Recovery Plan for the Oregon Silverspot Butterfly (USFWS 2001, entire). More recently, during a periodic review of the subspecies' status, we identified the reduced size, number, and isolation of Oregon silverspot butterfly populations as additional severe and imminent threats to the subspecies (USFWS 2012, pp. 24–25).

Additional information on the biology, habitat, and life history of the butterfly can be found in our Revised Recovery Plan for the Oregon Silverspot Butterfly *(Speyeria zerene hippolyta*) (USFWS 2001, pp. 11–19), which is available online at *http://www.regulations.gov* under Docket No. FWS–R1–ES–2016–0102 or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**, above.

Relationship of the NEP to Recovery Efforts

We are proposing to establish an NEP to promote the conservation and recovery of the Oregon silverspot butterfly. The recovery strategy for the Oregon silverspot butterfly, as detailed in our 2001 revised recovery plan, is to protect and manage habitat, and to augment and restore populations (USFWS 2001, pp. 39–41). Recovery criteria for the Oregon silverspot butterfly are (USFWS 2001, p. 42):

1. At least two viable Oregon silverspot butterfly populations exist in protected habitat in each of the following areas: Coastal Mountains, Cascade Head, and Central coast in Oregon; and Del Norte County in California; and at least one viable Oregon silverspot butterfly population exists in protected habitat in each of the following areas: Long Beach Peninsula, Washington, and Clatsop Plains, Oregon. This includes the development of comprehensive management plans.

2. Habitats are managed long term to maintain native, early successional grassland communities. Habitat management maintains and enhances early blue violet abundance, provides a minimum of five native nectar species dispersed abundantly throughout the habitat and flowering throughout the entire flight-period, and reduces the abundance of invasive, nonnative plant species.

3. Managed habitat at each population site supports a minimum viable

population of 200 to 500 butterflies for at least 10 years.

The reintroduction of Oregon silverspot butterflies within the proposed NEP would help address the limited number of populations and the subspecies' diminished geographic range. In addition, it is likely to contribute to meeting recovery criteria, as both proposed NEP areas have the biological attributes to support a viable butterfly population of butterflies and will be managed consistent with the subspecies' biological needs.

Location and Boundaries of the NEP

Section 10(j) of the Act requires that an experimental population be geographically separate from other populations of the same species. We identified the boundary of the proposed NEP as those Public Land Survey System sections intersecting with a 4.25-mi (6.8-km) radius around the proposed release locations. This boundary was selected to encompass all likely movements of Oregon silverspot butterflies away from the release areas while maintaining geographic separation from existing populations. This 4.25-mi (6.8-km) radius is greater than the longest known flight distance of the Oregon silverspot butterfly (4.1 mi (6.6 km)) (VanBuskirk and Pickering 1999, pp. 3–4, Appendix 1). Although this flight distance had previously been reported as ''5 miles'' (VanBuskirk and Pickering 1999, p. 4; USFWS 2010, p. 10), a more precise measurement using the locations where the individual butterfly in question was marked and recaptured (rather than the general distance between the populations) resulted in a distance of 4.1 mi (6.8 km). The proposed NEP areas are geographically isolated from existing Oregon silverspot butterfly populations by a sufficient distance to preclude significant contact between populations. There is an extremely small potential that butterflies dispersing 4.1 mi (6.8 km) from the proposed release site on Nestucca Bay NWR may interact with butterflies dispersing 4.1 mi (6.8 km) from Cascade Head, because these locations are 8 mi (13 km) apart. Nevertheless, the likelihood of butterflies from these two sites interbreeding is remote because of the distance between the sites and the fact that there is little or no suitable habitat with appropriate larval host plants and adult nectar sources between Nestucca Bay NWR and Cascade Head. Even if butterflies dispersed and were present within the same area, we do not believe the occasional presence of a few individual butterflies meets a minimal biological definition of a population. Based on definitions of ''population'' used in other experimental population rules (*e.g.,* 59 FR 60252, November 22, 1994; 71 FR 42298, July 26, 2006), we believe that a determination that a population is not geographically separate from the proposed NEP area would require the presence of sufficient suitable habitat in the intervening area to support successfully reproducing Oregon silverspot butterflies over multiple years. Because there is little to no suitable habitat between Nestucca Bay NWR and Cascade Head, we conclude this is unlikely to happen. Biologically, the term ''population'' is not normally applied to dispersing individuals, and any individual butterflies would be considered emigrants from the Cascade Head population. Finally, a few butterflies would not be considered a self-sustaining population. Self-sustaining populations need a sufficient number of individuals to avoid inbreeding depression and occurrences of chance local extinction; a general rule of thumb is that the effective population size needs to be at least 50 to reduce the likelihood of extinction in the short term because of harmful effects of inbreeding depression on demographic rates, and at least 500 to retain sufficient genetic variation to allow for future adaptive change (Jamieson and Allendorf 2014, p. 578).

Saddle Mountain State Natural Area

Saddle Mountain SNA, managed by OPRD, is located in central Clatsop County, in northwest Oregon. Saddle Mountain was historically occupied by the Oregon silverspot butterfly, which was last documented at this site in 1973 (McCorkle *et al.* 1980, p. 8). Butterfly surveys in 1980 and more recent surveys during the butterfly flight period—in 2003, 2006, and 2010—did not document the species at Saddle Mountain (Mike Patterson, pers. comm. 2016), and the population there is presumed to be extirpated (VanBuskirk 2010, p. 27). The nearest extant Oregon silverspot butterfly population is 50 miles (80 km) south at Mount Hebo.

Saddle Mountain SNA is a 3,225-acre (ac) (1,305-hectare (ha)) park known for its unique botanical community, which thrives on the thin rocky soils, with few invasive weeds. Habitat suitable for the Oregon silverspot butterfly consists of approximately 60 ac (24 ha) of meadows on the slopes of Saddle Mountain near its upper peaks at 3,288 feet (ft) (1,002 meters (m)) above sea-level. Based on recent plant surveys (OPRD 2012, p. 2), the proposed release site contains high-quality butterfly habitat with sufficient densities of the requisite species (*Viola adunca* and native nectar plants) to support an Oregon silverspot butterfly population (USFWS 2001, pp. 13–14). Habitat quality has been maintained through natural processes including vertical drainage patterns associated with steep ridges, thin rocky soils, elevation, and winter snow cover within the forb rich Roemer fescue (*Festuca roemeri*) montane grassland community (ONHIC 2004, p. 2). In a letter to the Service dated October 15, 2011, and a follow-up letter dated February 12, 2016, OPRD expressed their desire to have an NEP of Oregon silverspot butterfly and to return this native pollinator to the ecosystem (OPRD *in litt.,* 2011; OPRD *in litt.,* 2016).

The Saddle Mountain NEP area is centered on the coastal prairie habitat on top of Saddle Mountain, where we are proposing to reintroduce the Oregon silverspot butterfly. The proposed NEP encompasses all the Public Land Survey System sections that intersect with a 4.25-mi (6.8-km) radius around the proposed release area. The subspecies is territorial within habitat areas, and the reintroduced butterflies are expected to stay in or near meadows on top of Saddle Mountain, which have an abundance of the plant species they need to survive. The proposed Saddle Mountain butterfly population will be released into permanently protected suitable habitat. We are proposing to reintroduce the Oregon silverspot butterfly as an NEP in this area to address OPRD's concerns regarding potential impacts to park management activities, such as trail maintenance, and potential opposition from surrounding landowners to the reintroduction of a federally listed species without an NEP. Surrounding land cover is primarily forest (OPRD 2014, pers. comm.) and is not suitable Oregon silverspot butterfly habitat; therefore, we do not expect butterflies to use areas outside of Saddle Mountain SNA.

Nestucca Bay National Wildlife Refuge

The Nestucca Bay NWR, managed by the Service, is located in the southwest corner of Tillamook County, along the northern Oregon coast. Although the Oregon silverspot butterfly was never documented at this site, it is within the historical range of the subspecies along the coast, and a small amount of remnant coastal prairie occurred on the site prior to commencement of restoration efforts in 2011. Therefore, it is reasonable to assume that the Oregon silverspot butterfly once inhabited the area, but no surveys were conducted to document its presence. Currently occupied Oregon silverspot butterfly

sites nearest to the proposed NEP area are 10 mi (16 km) to the east at Mount Hebo and 8 mi (13 km) south at Cascade Head, with little or no suitable habitat in between. There are currently no known extant Oregon silverspot butterfly populations to the north of the proposed release site, but the subspecies was historically documented near Cape Meares, 20 mi (32 km) to the north of Nestucca Bay NWR, where it was last observed in 1968 (McCorkle *et al.* 1980, p. 7).

The Nestucca Bay National Wildlife Refuge Comprehensive Conservation Plan includes a goal to promote the recovery of the Oregon silverspot butterfly by establishing an NEP on the refuge (USFWS 2013, p. 2–4). The approximately 1,203-ac (487-ha) refuge has 25 to 30 ac (10 to 12 ha) of coastal prairie habitat in varying stages of restoration, including the conversion of degraded grasslands on the Cannery Hill Unit from nonnative pasture grasses to native coastal grasses and forbs with an emphasis on the plant species and structure required to support the Oregon silverspot butterfly. Since 2011, invasive weed abundance has been minimized, and thousands of violet and nectar plants have been planted to enhance and restore the coastal prairie ecosystem. Funding acquired by the refuge in 2015 is now being used to complete habitat restoration on the remaining acreage prior to the release of Oregon silverspot butterflies.

The NEP area is centered on coastal prairie habitat on the Cannery Hill Unit of the refuge, where we are proposing to release Oregon silverspot butterflies. The proposed NEP encompasses all Public Land Survey System sections that intersect with a 4.25-mi (6.8-km) radius around the proposed release area. We propose to release Oregon silverspot butterflies into permanently protected suitable habitat at Nestucca Bay NWR, which will be managed to provide the plant community needed for the butterfly to become established and to support a population. We are proposing to reintroduce the Oregon silverspot butterfly as an NEP in this area to address adjacent landowner concerns regarding the impact a federally listed species might have on the sale or development of their property. As little or no suitable habitat is currently available on adjacent properties, and Oregon silverspot butterflies are territorial and non-migratory, we consider the likelihood of butterflies moving on to these adjacent lands to be low. Despite a few adjacent properties that Oregon silverspot butterflies might occasionally move through, the primary surrounding land cover is agriculture and forest (USFWS 2013, p. 4–3), which are not suitable habitat for the subspecies; therefore, occurrence of Oregon silverspot butterflies in surrounding areas, if any, is expected to be limited.

Likelihood of Population Establishment and Survival

The best available scientific data indicate that the reintroduction of Oregon silverspot butterflies into suitable habitat is biologically feasible and would promote the conservation of the species. Oregon silverspot butterfly population augmentations have been conducted on the central Oregon coast from 2000 through 2015 (USFWS 2012, p. 10; Engelmeyer 2015, p. 4). Based on the knowledge gained from these efforts, we anticipate the proposed NEP areas would become successfully established. Butterflies would be released into high-quality habitat in sufficient amounts to support large butterfly populations, and no unaddressed threats to the species are known to exist at these sites.

The coastal headland meadows of the Nestucca Bay NWR are being restored with the specific intent of providing high densities of the plant species needed by the Oregon silverspot butterfly. Ongoing habitat enhancement and management will maintain suitable habitat and minimize the abundance and distribution of invasive, nonnative plant species, which degrade habitat quality. The Nestucca Bay NWR has committed to the management required to restore and maintain suitable habitat specifically for a population of the Oregon silverspot butterfly. The upper meadows of the Saddle Mountain SNA have an abundance of the key resources, including an intact plant community with an abundance of plants needed to support the Oregon silverspot butterfly. Habitat quality has been maintained through natural processes, including vertical drainage patterns associated with steep ridges, thin rocky soils, elevation, and winter snow cover within the forb rich Roemer fescue montane grassland community (ONHIC 2004, p. 2). The habitat at Saddle Mountain is self-sustaining, does not require active management (see Addressing Causes of Extirpation, below), and is adequately protected. Additionally, within both proposed NEP areas, large trees surrounding the meadows would provide needed cover for sheltering Oregon silverspot butterflies.

Based on all of these considerations, we anticipate that reintroduced Oregon silverspot butterflies are likely to become established and persist at Nestucca Bay NWR and Saddle Mountain SNA.

Addressing Causes of Extirpation

The largest threat to Oregon silverspot butterfly populations is a lack of suitable habitat. Without regular disturbance, coastal prairie habitat is vulnerable to plant community succession, resulting in loss of prairie habitat to brush and tree invasion. Invasive, nonnative plants also play a significant role in the degradation of habitat quality and quantity for this butterfly.

The reasons for the extirpation of the original population of Oregon silverspot butterflies on Saddle Mountain between 1973 and 1980 are unknown. The habitat on top of Saddle Mountain is currently suitable for supporting a population of the butterfly. The grassland habitat at this location has been self-sustaining likely due to the 3,000-ft (914-m) elevation, thin rocky soil type, steep slopes, primarily native composition of the plant community, and lack of human disturbance to the ecosystem. The Saddle Mountain SNA, protected as a special botanical area, has an annual day-use rate of 68,928 visitors per year. OPRD maintains a trail, accessible only by foot, which leads to the top of the mountain. The extremely steep grade on either side of the trail discourages visitors from straying off trail and into the adjacent meadow areas. Park rules do not allow collection of plants or animals (OPRD 2010). Continuance of this management regime is expected to protect the reintroduced population and contribute to its successful establishment. We acknowledge there is some uncertainty regarding population establishment and long-term viability at this site given that we have not identified the original cause of local extirpation. Nevertheless, this site has been identified as one of the most promising for a reintroduction effort given the lack of identifiable threats, density of host plants, and overall quality of habitat (VanBuskirk 2010, p. 27).

The Nestucca Bay NWR will address habitat threats by monitoring and maintaining habitat quality for the benefit of the Oregon silverspot butterfly, in accordance with the Nestucca Bay National Wildlife Refuge Comprehensive Conservation Plan, which sets specific targets for abundance of violet and nectar species. All management actions taken in the vicinity of the reintroduced population will defer to the habitat needs of the butterfly (USFWS 2013, pp. 4–37–4–43). As described above, the Nestucca Bay NWR is actively working to restore habitat specifically for the benefit of the Oregon silverspot butterfly in

anticipation of a potential reintroduction. Restoration efforts have proven successful in establishing high-quality habitat that is likely to support all life stages of the subspecies. Nestucca Bay NWR's demonstrated commitment to reestablishing and maintaining high-quality habitat suitable for the Oregon silverspot butterfly is expected to contribute to the successful establishment of the proposed NEP at this site.

Release Procedures

We propose to use captive-reared butterflies to populate the NEP areas using proven release methods developed by the Oregon silverspot butterfly population augmentation program from 2000 to 2015 (USFWS 2012, p. 10; Engelmeyer 2015, p. 2). We will release captive-reared caterpillars or pupae of wild female butterflies into suitable habitat within the proposed NEP areas, following the guidance in the Captive Propagation and Reintroduction Plan for the Oregon Silverspot Butterfly (VanBuskirk 2010, entire). We will determine the number of individuals to release based on the number of available healthy offspring and the amount of suitable habitat available, with violet densities as the primary measure of habitat suitability. The ultimate goal is the establishment of self-sustaining populations of between 200 to 500 butterflies for 10 years at each proposed NEP area, similar to the recovery criteria for the other habitat conservation areas.

Based on guidance from the Captive Propagation and Reintroduction Plan for the Oregon Silverspot Butterfly (VanBuskirk 2010, entire), we propose to establish populations in each NEP area from offspring of at least 50 mated females. Because the number of female butterflies available for collection for the captive-rearing program is limited to 5 percent of the donor population per year, it may be necessary to release caterpillars or pupae incrementally over a period of a few years. We will use annual butterfly counts during the flight period to monitor population establishment success. Butterfly survey methods used at the occupied sites (Pollard 1977, p. 116; Pickering 1992, p. 3) will also be used to assess population establishment success in the proposed NEP areas.

Donor Stock Assessment and Effects on Donor Populations

Individual Oregon silverspot butterflies used to establish populations at both proposed NEP areas will most likely come from the offspring of the Mount Hebo population. Additional genetic research on the subspecies is in progress and may suggest that butterflies from other populations should be included in the captive-rearing program to enhance genetic diversity. If populations other than the Mount Hebo population are used as donor stock, we will evaluate the impact of taking females from those populations on the survival and recovery of the subspecies prior to issuing a recovery permit for such take.

The Mount Hebo Oregon silverspot butterfly population has historically been the largest and most stable population, averaging an annual index count of 1,457 butterflies per year between 2000 to 2014 (USFWS 2012, p. 10; Patterson 2014, p. 11); therefore, it is the least likely to be impacted by the removal of up to 5 percent of the population. Demographic modeling indicates that the optimal strategy for captive rearing of Oregon silverspot butterflies to increase the probability of persistence is to take females from larger donor populations (Crone *et al.* 2007, p. 108). Regional persistence can be increased with captive rearing, with negligible effects on the donor population (Crone *et al.* 2007, pp. 107–108). Measurable increases in regional persistence are predicted when one assumes each donor female produces four adult butterflies for release to the wild (*i.e.,* four adults/female). In reality, the number of adult butterflies produced per female captured from the donor population has been much higher in recent years. For example, during 2007–2009, between 24 and 29 females were captured, producing between 875 and 2,391 adults for release (31–83 adults/female) (VanBuskirk 2010, p. 12). In 2015, 14 females produced 815 adults for release (58 adults/female) (Engelmeyer 2015, p. 5). These rates of production far exceed what is needed to have a positive impact on regional persistence, even if all the females were removed from small donor populations (see Crone *et al.* 2007, p. 109). As an additional protective measure, we will release some caterpillars and pupae from the captive-rearing program back into the donor population each year, concurrent with the reintroductions to the proposed NEP areas. This will further minimize any potential effects from the removal of a small number of adult females in the prior year.

The Mount Hebo population occurs in an environment similar to the proposed Saddle Mountain NEP area (*i.e.,* similar elevation, native plant community, and distance from the coast). Therefore, offspring of butterflies from Mount Hebo will likely be well-adapted to the environment in the meadows on top of Saddle Mountain. The Mount Hebo population may also serve as the best donor population for the proposed Nestucca Bay NEP area because it is genetically most similar to the existing population closest to the refuge (*i.e.,* the Cascade Head population) (VanBuskirk 2000, p. 27; McHugh *et al.* 2013, p. 8). We will consider all new scientific information when making annual decisions on an appropriate donor population; therefore, it is possible that we will use donor populations other than Mount Hebo.

The Captive Propagation and Reintroduction Plan for the Oregon Silverspot Butterfly (VanBuskirk 2010, entire) contains further information on the captive rearing program, release procedures, genetic considerations, population dynamics, effects of releases on population viability of the Oregon silverspot butterfly, and the potential for reintroduction to Saddle Mountain SNA and Nestucca Bay NWR (copies of this document are available online at *http://www.regulations.gov* under Docket No. FWS–R1–ES–2016–0102 or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**, above).

Legal Status of Reintroduced Populations

Based on the current legal and biological status of the subspecies and the need for management flexibility, and in accordance with section 10(j) of the Act, we propose to designate all Oregon silverspot butterflies released within the boundaries of the NEP areas as members of the NEP. Such designation allows us to establish special protective regulations for management of Oregon silverspot butterflies.

With the experimental population designation, the relevant population is treated as threatened for purposes of section 9 of the Act, regardless of the species' designation elsewhere in its range. Treating the experimental population as threatened allows us the discretion to devise management programs and specific regulations for such a population. Section 4(d) of the Act allows us to adopt any regulations that are necessary and advisable to provide for the conservation of a threatened species. When designating an experimental population, the general regulations that extend most section 9 prohibitions to threatened species do not apply to that species, and the section 10(j) rule contains the prohibitions and exemptions necessary and advisable to conserve that species.

The 10(j) rule would further the conservation of the subspecies by facilitating its reintroduction into two areas of suitable habitat within its historical range. The rule would provide

assurances to landowners and development interests that the reintroduction of Oregon silverspot butterflies will not interfere with natural resource developments or with human activities (although the Act's section 7(a)(2) consultation requirements would still apply on Nestucca Bay NWR). Without such assurances, some landowners and developers, as well as the State, would object to the reintroduction of Oregon silverspot butterflies to these two areas. Except as provided for under sections 10(a)(1)(A) and 10(e) of the Act, or as described in this proposed NEP rule, take of any member of the Oregon silverspot butterfly NEP will be prohibited under the Act.

Extent to Which the Reintroduced Population May Be Affected by Land Management Within the Proposed NEP

We conclude that the effects of Federal, State, or private actions and activities will not pose a threat to Oregon silverspot butterfly establishment and persistence at Saddle Mountain SNA or the Nestucca Bay NWR because the best information, including activities currently occurring in Oregon silverspot butterfly populations range wide, indicates that activities currently occurring, or likely to occur, at prospective reintroduction sites within proposed NEP areas are compatible with the species' recovery. The reintroduced Oregon silverspot butterfly populations would be managed by OPRD and the Service, and would be protected from major development activities through the following mechanisms:

(1) Development activities and timber harvests are not expected to occur in the Saddle Mountain SNA, which is protected as a special botanical area. Trail maintenance and other park maintenance activities would continue to occur within the proposed NEP area, but are expected to have minimal impact on the butterfly meadow habitat areas due to the terrain and steepness of the slopes. Because of the rugged nature of the area, and also to protect the important botanical resources at this site, maintenance activities in this area are generally limited to trail maintenance by hand crews, with minimal impacts on the meadow areas. Additionally, the proposed Oregon silverspot butterfly NEP area at Saddle Mountain SNA would be protected by the Oregon State regulations prohibiting collection of animals on State lands (Oregon Administrative Rule (OAR) 736–010–0055(2)(d)). Private timberlands surrounding the SNA do not contain suitable butterfly habitat, and therefore activities on adjacent lands are not expected to impact the butterfly.

(2) In accordance with the Nestucca Bay NWR Comprehensive Conservation Plan, all refuge management actions taken in the vicinity of the reintroduced population will defer to the habitat needs of the butterfly (USFWS 2013, pp. 4–37–4–43). In addition, the refuge must complete section 7(a)(2) consultation on all actions that may affect the butterfly. Oregon silverspot butterflies may occasionally visit or fly within adjacent properties near the proposed NEP area, which may be subject to future development. However, given the lack of suitable habitat for this subspecies on adjacent properties, as well as the butterfly's territorial and non-migratory nature, we consider negative impacts to the Oregon silverspot butterfly from development on adjacent sites to be unlikely, as there is little likelihood of individuals moving to these sites.

Management issues related to the proposed Oregon silverspot butterfly NEP that have been considered include:

(a) *Incidental Take:* The regulations implementing the Act define ''incidental take'' as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity (50 CFR 17.3), such as agricultural activities and other rural development, and other activities that are in accordance with Federal, Tribal, State, and local laws and regulations. Experimental population rules contain specific prohibitions and exceptions regarding the taking of individual animals. If we adopt this 10(j) rule as proposed, take of the Oregon silverspot butterfly anywhere within the NEP areas would not be prohibited, provided that the take is unintentional, not due to negligent conduct, and is in accordance with this 10(j) rule; however, the section 7(a)(2) consultation requirement still applies on refuge lands. We expect levels of incidental take to be low because the reintroduction is compatible with ongoing activities and anticipated future actions in the proposed NEP areas.

(b) *Special handling:* In accordance with 50 CFR 17.32, any person with a valid permit issued by the Service may take the Oregon silverspot butterfly for educational purposes, scientific purposes, the enhancement of propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Act. Additionally, any employee or agent of the Service, any other Federal land management agency, or a State conservation agency, who is designated by the agency for such purposes, may, when acting in the course of official duties, take an Oregon silverspot butterfly in the wild in the NEP area without a permit if such action is necessary for scientific purposes, to aid a law enforcement investigation, to euthanize an injured individual, to dispose of or salvage a dead individual for scientific purposes, or to relocate an Oregon silverspot butterfly to avoid conflict with human activities, to improve Oregon silverspot butterfly survival and recovery prospects or for genetic purposes, to move individuals into captivity or from one population in the NEP to the other, or to retrieve an Oregon silverspot butterfly that has moved outside the NEP area. Non-Service or other non-authorized personnel would need a permit from the Service for these activities.

(c) *Coordination with landowners and land managers:* We have coordinated with landowners likely to be affected by the proposed reintroduction. During this coordination we identified issues and concerns associated with reintroducing Oregon silverspot butterflies in the absence of an NEP designation. We also discussed the possibility of NEP designation. Affected State agencies, landowners, and land managers have either indicated support for, or no opposition to, the proposed NEP if a 10(j) rule is promulgated to allow incidental take of Oregon silverspot butterflies.

(d) *Public awareness and cooperation:* The proposed NEP designation is necessary to secure needed cooperation of the States, landowners, agencies, and other interests in the affected area. If this proposed rule is adopted, we will work with our partners to continue public outreach on our effort to restore Oregon silverspot butterflies to parts of their historical range and the importance of these restoration efforts to the overall recovery of the subspecies.

(e) *Potential impacts to other federally listed species:* No federally listed species occur in the proposed NEP areas that would be affected by the reintroductions.

(f) *Monitoring and evaluation:* Annual monitoring would be performed by qualified personnel with the cooperation of the OPRD Saddle Mountain SNA and Nestucca Bay NWR. Oregon silverspot butterflies would be counted on designated survey transects or public trails. We do not anticipate that surveys would disrupt or hamper public use and would likely be perceived by the public as normal activities in the context of a natural area.

Reintroduction Effectiveness Monitoring

Oregon silverspot butterfly surveys would be conducted annually within Oregon silverspot butterfly habitat at Nestucca Bay NWR and Saddle Mountain SNA using a modified Pollard walk methodology (Pickering *et al.* 1992, p. 7). This survey method is currently used at all occupied Oregon silverspot butterfly sites. The surveys would be conducted weekly during the butterfly flight period, July through September, on designated survey transects or public trails. The surveys produce an index of Oregon silverspot butterfly relative abundance that would be used to assess annual population trends to provide information on reintroduction effectiveness. We would prepare annual progress reports. Reintroduction efforts would be fully evaluated after 5 years to determine whether to continue or terminate the reintroduction efforts.

Donor Population Monitoring

We would conduct annual Oregon silverspot butterfly surveys within the populations where donor stock is obtained using a modified Pollard walk methodology (Pickering *et al.* 1992, p. 7). Our annual monitoring would be used to adaptively manage the captive rearing program to insure that the removal of donor stock would not jeopardize the continued existence of the population or the species as a whole.

Monitoring Impacts to Other Listed Species

We do not anticipate impacts to other listed species by the proposed reintroduction of the Oregon silverspot butterfly.

Findings

Based on the above information, and using the best scientific and commercial data available (in accordance with 50 CFR 17.81), we find that reintroducing the Oregon silverspot butterfly into the Saddle Mountain SNA and the Nestucca Bay NWR and the associated protective measures and management practices under this proposed rulemaking would further the conservation of the subspecies. The nonessential experimental population status is appropriate for the reintroduction areas because we have determined that these populations are not essential to the continued existence of the subspecies in the wild.

Required Determinations

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will review all significant rules. OIRA has determined that this proposed rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996; 5 U.S.C. 60 *et seq.*), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare, and make available for public comment, a regulatory flexibility analysis that describes the effect of the rule on small entities (small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities. We are certifying that this rule will not have a significant economic effect on a substantial number of small entities. The following discussion explains our rationale.

The area that would be affected if this proposed rule is adopted includes the release areas at Saddle Mountain SNA and Nestucca Bay NWR and adjacent areas into which individual Oregon silverspot butterflies may disperse. Because of the regulatory flexibility for Federal agency actions provided by the proposed NEP designation and the exemption for incidental take in the rule, we do not expect this rule to have significant effects on any activities within Federal, State, or private lands within the proposed NEP. In regard to section 7(a)(2) of the Act, the population would be treated as proposed for listing, and Federal action agencies are not required to consult on their activities, except on National Wildlife Refuge and National Park land where the subspecies is managed as a threatened species. Section 7(a)(4) of the Act requires Federal agencies to confer (rather than consult) with the Service on actions that are likely to jeopardize the continued existence of a proposed species. However, because the proposed NEP is, by definition, not essential to the survival of the species, conferring will likely never be required for the Oregon silverspot butterfly populations within the NEP areas. Furthermore, the results of a conference are advisory in nature and do not restrict agencies from carrying out, funding, or authorizing activities. In addition, section 7(a)(1) of the Act requires Federal agencies to use their authorities to carry out programs to further the conservation of listed species, which would apply on any lands within the NEP areas. Within the boundaries of the Nestucca Bay NWR, the subspecies would be treated as a threatened species for the purposes of section 7(a)(2) of the Act. As a result, and in accordance with these regulations, some modifications to proposed Federal actions within Nestucca Bay NWR may occur to benefit the Oregon silverspot butterfly, but we do not expect projects to be substantially modified because these lands are already being administered in a manner that is compatible with Oregon silverspot butterfly recovery.

If adopted, this proposal would broadly authorize incidental take of the Oregon silverspot butterfly within the NEP areas. The regulations implementing the Act define ''incidental take'' as take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity such as, agricultural activities and other rural development, camping, hiking, hunting, vehicle use of roads and highways, and other activities in the NEP areas that are in accordance with Federal, Tribal, State, and local laws and regulations. Intentional take for purposes other than authorized data collection or recovery purposes would not be authorized. Intentional take for

research or recovery purposes would require a section 10(a)(1)(A) recovery permit under the Act.

The principal activities on private property near the proposed NEP areas are timber production, agriculture, and activities associated with private residences. We believe the presence of the Oregon silverspot butterfly would not affect the use of lands for these purposes because there would be no new or additional economic or regulatory restrictions imposed upon States, non-Federal entities, or private landowners due to the presence of the Oregon silverspot butterfly, and Federal agencies would only have to comply with sections 7(a)(1) and 7(a)(4) of the Act in these areas, except on Nestucca Bay NWR lands where section 7(a)(2) of the Act would apply. Therefore, this rulemaking is not expected to have any significant adverse impacts to activities on private lands within the proposed NEP areas.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*):

(1) If adopted, this proposal would not ''significantly or uniquely'' affect small governments. We have determined and certify under the Unfunded Mandates Reform Act, 2 U.S.C. 1502 *et seq.,* that this proposed rulemaking would not impose a cost of $100 million or more in any given year on local or State governments or private entities. A Small Government Agency Plan is not required. As explained above, small governments would not be affected because the proposed NEP designation would not place additional requirements on any city, county, or other local municipalities.

(2) This proposed rule would not produce a Federal mandate of $100 million or greater in any year (*i.e.,* it is not a ''significant regulatory action'' under the Unfunded Mandates Reform Act). The proposed NEP area designations for the Oregon silverspot butterfly would not impose any additional management or protection requirements on the States or other entities.

Takings (E.O. 12630)

In accordance with Executive Order 12630, the proposed rule does not have significant takings implications. This rule would allow for the take of reintroduced Oregon silverspot butterflies when such take is incidental to an otherwise legal activity, such as recreation (*e.g.,* hiking, birdwatching), forestry, agriculture, and other activities that are in accordance with Federal, State, and local laws and regulations. Therefore, we do not believe that the proposed NEP would conflict with existing or proposed human activities.

A takings implication assessment is not required because this rule (1) will not effectively compel a property owner to suffer a physical invasion of property, and (2) will not deny all economically beneficial or productive use of the land or aquatic resources. This rule would substantially advance a legitimate government interest (conservation and recovery of a listed species) and would not present a barrier to all reasonable and expected beneficial use of private property.

Federalism (E.O. 13132)

In accordance with Executive Order 13132, we have considered whether this proposed rule has significant Federalism effects and have determined that a federalism summary impact statement is not required. This proposed rule would not have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. In keeping with Department of the Interior policy, we requested information from and coordinated development of this proposed rule with the affected resource agencies in Oregon. Achieving the recovery goals for this subspecies would contribute to its eventual delisting and its return to State management. No intrusion on State policy or administration is expected; roles or responsibilities of Federal or State governments would not change; and fiscal capacity would not be substantially directly affected. The proposed rule would maintain the existing relationship between the State and the Federal Government, and is being undertaken in coordination with the State of Oregon. Therefore, this rule does not have significant Federalism effects or implications to warrant the preparation of a federalism summary impact statement under the provisions of Executive Order 13132.

Civil Justice Reform (E.O. 12988)

In accordance with Executive Order 12988, the Office of the Solicitor has determined that this rule would not unduly burden the judicial system and would meet the requirements of sections (3)(a) and (3)(b)(2) of the Order.

Paperwork Reduction Act

Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), require that Federal agencies obtain approval from OMB before collecting information from the public. This proposed rule does not contain any new information collections that require approval. We may not collect or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act

The reintroduction of native species into suitable habitat within their historical or established range is categorically excluded from NEPA documentation requirements consistent with the Department of Interior's Department Manual (516 DM 8.5B(6)).

Government-to-Government Relationship With Tribes

In accordance with the presidential memorandum of April 29, 1994, ''Government-to-Government Relations with Native American Tribal Governments'' (59 FR 22951; May 4, 1994), Executive Order 13175 (65 FR 67249; November 9, 2000), and the Department of the Interior Manual Chapter 512 DM 2, we have considered possible effects on federally recognized Indian tribes and have determined that there are no tribal lands affected by this proposed rule.

Energy Supply, Distribution, or Use (E.O. 13211)

Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This rule is not expected to significantly affect energy supplies, distribution, or use. Because this action is not a significant energy action, no Statement of Energy Effects is required.

Clarity of This Rule (E.O. 12866)

We are required by E.O. 12866, E.O. 12988, and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;

(4) Be divided into short sections and sentences; and

(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comment should be as specific as possible. For example, you should tell

us the numbers of the sections and paragraphs that are unclearly written, which sections or sentences are too long, or the sections where you feel lists and tables would be useful.

Endangered and threatened species, Exports, Imports, Reporting and record keeping requirements, Transportation.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11(h) by revising the entry for ''Butterfly, Oregon silverspot'' under INSECTS in the List of Endangered and Threatened Wildlife to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Common name	Scientific name	Where listed	Status	Listing citations and applicable rules
* *	*	*	*	* *
INSECTS				
* *	*	*	*	* *
Butterfly, Oregon silverspot	*Speyeria zerene hippolyta*	Wherever found, except where listed as an experimental population.	T	45 FR 44935; 7/2/1980, 50 CFR 17.95(i) CH.
Butterfly, Oregon silverspot	*Speyeria zerene hippolyta*	U.S.A. (OR—specified portions of Clatsop and Tillamook Counties; see § 17.85(d)).	XN	[**Federal Register** citation of the final rule]
* *	*	*	*	* *

■ 3. Amend § 17.85 by adding paragraph (d) to read as follows:

§ 17.85 Special rules—invertebrates.

* * * * *

(d) Oregon Silverspot Butterfly (*Speyeria zerene hippolyta*).

(1) *Where is the Oregon silverspot butterfly designated as a nonessential experimental population (NEP)?* (i) The NEP areas for the Oregon silverspot butterfly are within the subspecies' historical range in Tillamook and Clatsop Counties, Oregon. The boundary of the NEP includes those Public Land Survey System sections intersecting with a 4.25-mile (6.8-kilometer) radius around the release locations. This boundary was selected to encompass all likely movements of Oregon silverspot butterflies away from the release areas while maintaining geographic separation from existing populations.

(A) The Nestucca Bay NEP area, centered on the coastal prairie habitat on the Cannery Hill Unit of the Nestucca Bay National Wildlife Refuge (Nestucca Bay NEP area), includes Township 4 South, Range 10 West, Sections 15 through 36; Township 4 South, Range 11 West, Sections 13, 24, 25, and 36; Township 5 South, Range 10 West, Sections 2 through 11, 14 through 23, 27 through 30; and Township 5 South, Range 11 West, Sections 12, 13, 24, and 25.

(B) The Saddle Mountain NEP area, centered on the coastal prairie habitat on top of Saddle Mountain State Natural Area (Saddle Mountain NEP area), includes Township 6 North, Range 7 West, Sections 7, 17 through 20, 29 through 32; Township 6 North, Range 8 West, Sections 1 through 36; Township 6 North, Range 9 West, Sections 1, 11 through 14, 23 through 26, 35, and 36; Township 5 North, Range 7 West, Sections 5 through 8, 17, 18, and 19; Township 5 North, Range 8 West, Sections 1 through 24; and Township 5 North, Range 9 West, Sections 1, 2, 3, 11, 12, 13, and 14.

(ii) The nearest known extant population to the Nestucca Bay NEP area is 8 miles (13 kilometers) to the south, beyond the longest known flight distance of the butterfly (4.1 miles (6.6 kilometers)) and with little or no suitable habitat between them. The nearest known extant population to the Saddle Mountain NEP area is 50 miles (80 kilometers) to the south, well beyond the longest known flight distance of the butterfly (4.1 miles (6.6 kilometers)). Given its habitat requirements, movement patterns, and distance from extant populations, the NEP is wholly separate from extant populations and we do not expect the reintroduced Oregon silverspot butterflies to become established outside the NEP areas. Oregon silverspot butterflies outside of the NEP boundaries will assume the status of Oregon silverspot butterflies within the geographic area in which they are found.

(iii) We will not change the NEP designations to ''essential experimental,'' ''threatened,'' or ''endangered'' within the NEP areas without engaging in notice-and-comment rulemaking. Additionally, we will not designate critical habitat for this NEP, as provided by 16 U.S.C. 1539(j)(2)(C)(ii).

(2) *What take of the Oregon silverspot butterfly is allowed in the NEP areas?*

(i) Oregon silverspot butterflies may be taken within the NEP area, provided that such take is not willful, knowing, or due to negligence, and is incidental to carrying out an otherwise lawful activity, such as agriculture, forestry and wildlife management, land development, recreation, and other activities that are in accordance with Federal, State, Tribal, and local laws and regulations.

(ii) Any person with a valid permit issued by the Service under 50 CFR 17.32 may take the Oregon silverspot butterfly for educational purposes, scientific purposes, the enhancement of propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Act. Additionally, any employee or agent of the Service, any other Federal land management agency, or a State conservation agency, who is designated by the agency for such purposes, may, when acting in the course of official duties, may take an Oregon silverspot butterfly in the wild in the NEP area if such action is necessary:

(A) For scientific purposes;

(B) To relocate Oregon silverspot butterflies to avoid conflict with human activities;

(C) To relocate Oregon silverspot butterflies within the NEP area to improve Oregon silverspot butterfly survival and recovery prospects or for genetic purposes;

(D) To relocate Oregon silverspot butterflies from one population in the NEP into another in the NEP, or into captivity;

(E) To euthanize an injured Oregon silverspot butterfly;

(F) To dispose of a dead Oregon silverspot butterfly, or salvage a dead Oregon silverspot butterfly for scientific purposes;

(G) To relocate an Oregon silverspot butterfly that has moved outside the NEP area back into the NEP area; or

(H) To aid in law enforcement investigations involving the Oregon silverspot butterfly.

(3) *What take of Oregon silverspot butterfly is not allowed in the NEP area?*

(i) Except as expressly allowed in paragraph (d)(2) of this section, all of the provisions of 50 CFR 17.31(a) and (b) apply to the Oregon silverspot butterfly in areas identified in paragraph (d)(1) of this section.

(ii) A person may not possess, sell, deliver, carry, transport, ship, import, or export by any means, Oregon silverspot butterflies, or parts thereof, that are taken or possessed in a manner not expressly allowed in paragraph (d)(2) of this section or in violation of applicable State fish and wildlife laws or regulations or the Act.

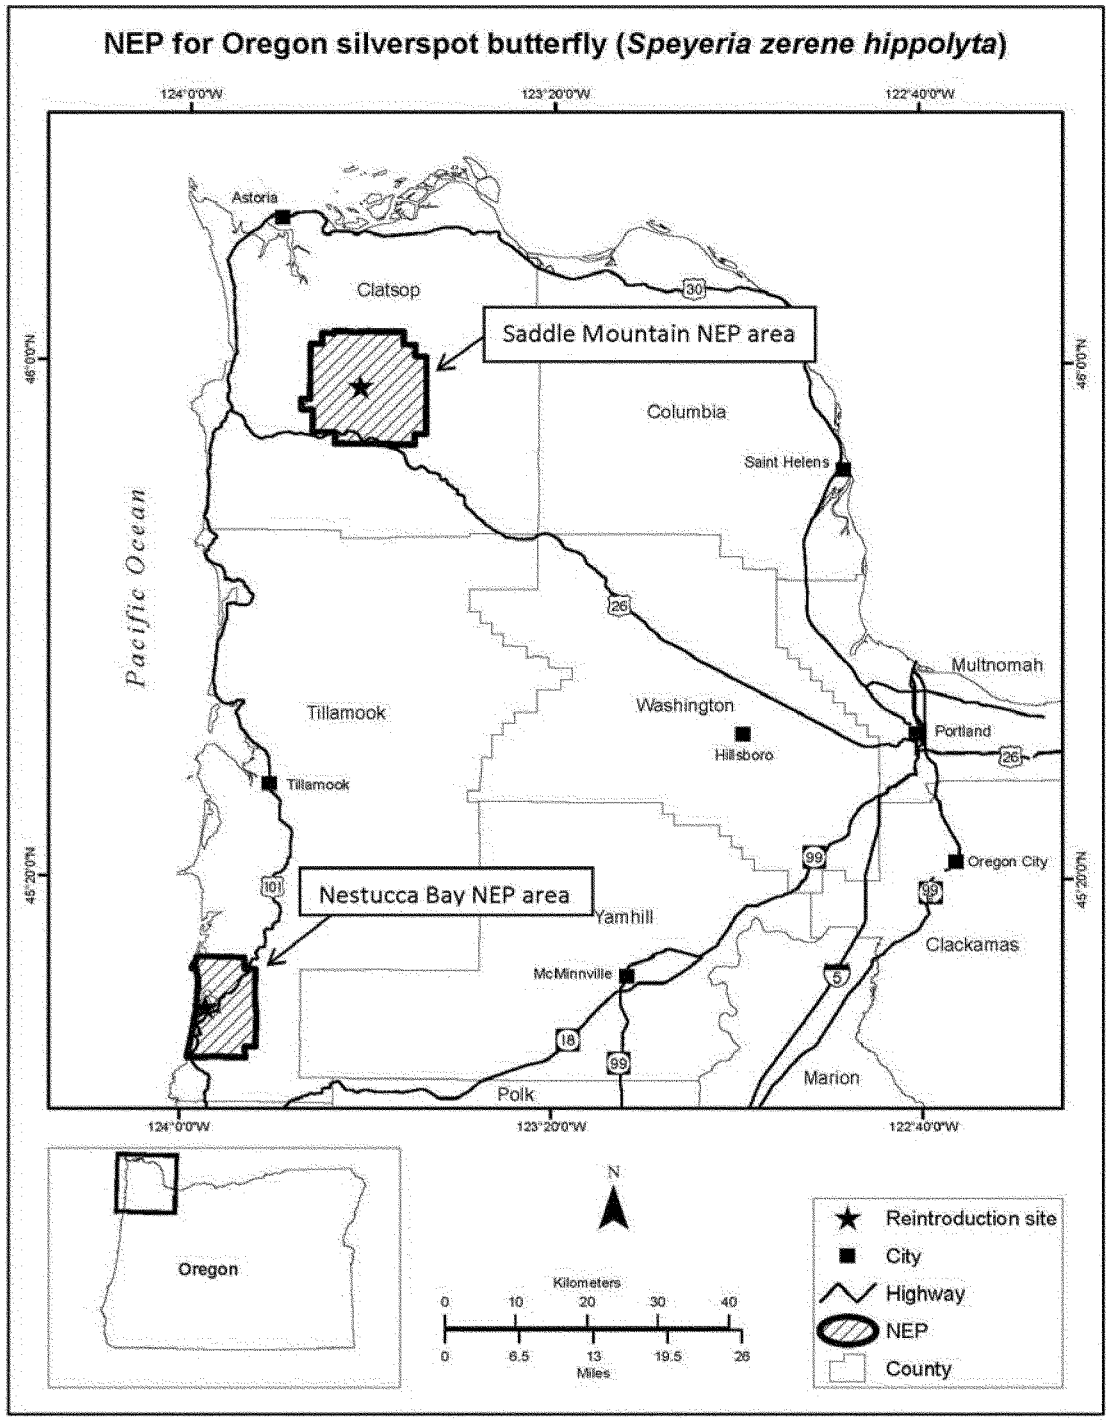
(iii) Any manner of take not described under paragraph (d)(2) of this section is prohibited in the NEP areas.

(iv) A person may not attempt to commit, solicit another to commit, or cause to be committed any take of the Oregon silverspot butterfly, except as expressly allowed in paragraph (d)(2) of this section.

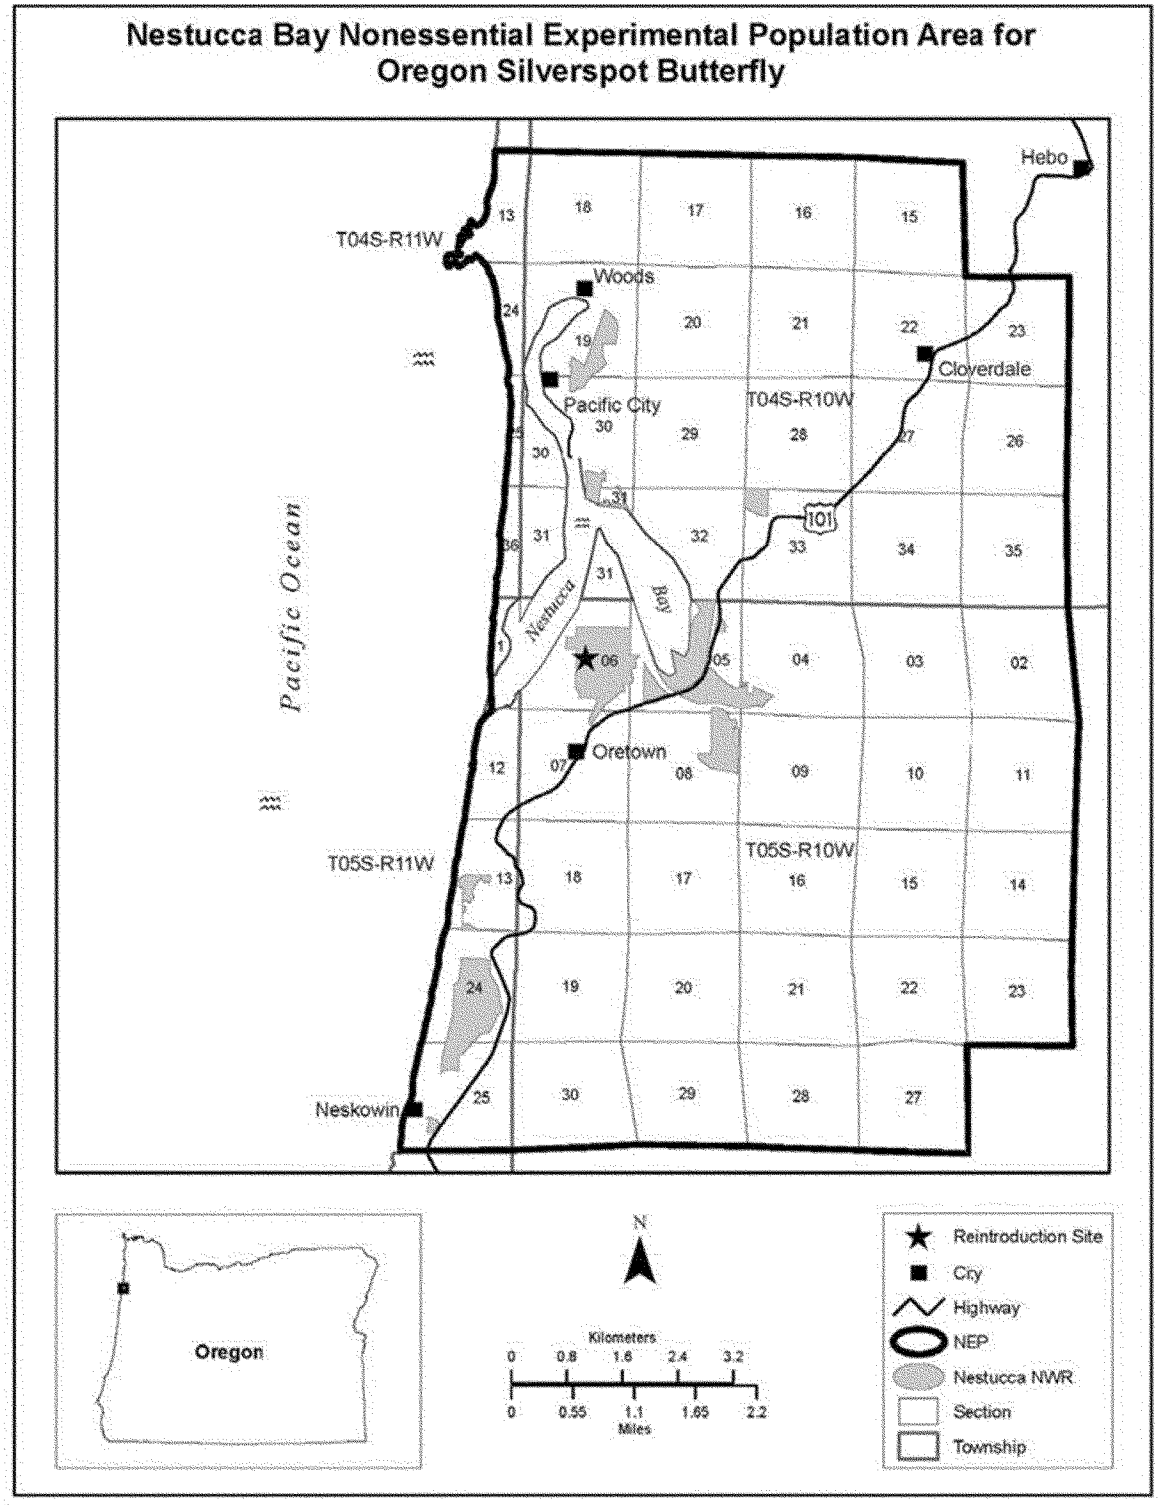
(4) *How will the effectiveness of these reintroductions be monitored?* We will monitor populations annually for trends in abundance in cooperation with partners and prepare annual progress reports. We will fully evaluate reintroduction efforts after 5 years to determine whether to continue or terminate the reintroduction efforts.

(5) *Maps of the NEP areas for the Oregon silverspot butterfly in Northwest Oregon.*

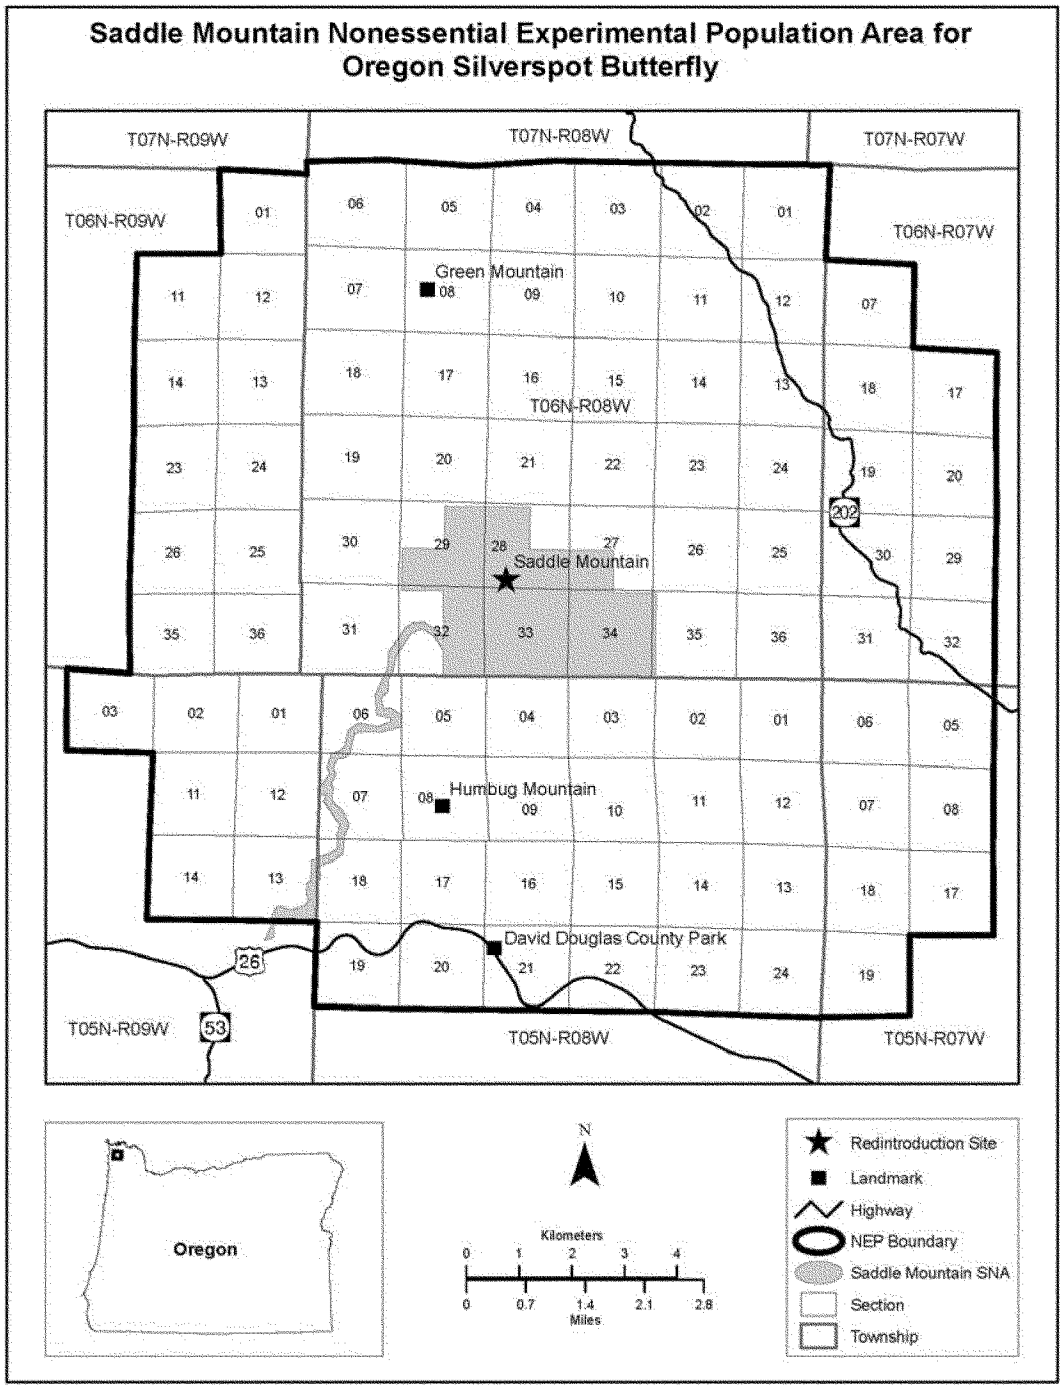
(i) *Note:* Map of the Oregon silverspot butterfly NEP follows:



(ii) *Note:* Map of Nestucca Bay NEP area for the Oregon silverspot butterfly follows:



(iii) *Note:* Map of Saddle Mountain NEP area for the Oregon silverspot butterfly follows:



* * * * *

Dated: December 19, 2016.

Michael J. Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4333–15–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

RIN 0648–XF093

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its *Herring* Advisory Panel on Tuesday, January 10, 2017, to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, January 10, 2017, at 10 a.m., to view the agenda see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held at the Four Points by Sheraton, 1 Audubon Road, Wakefield, MA 01880: (781) 245–9300.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Advisory Panel will review alternatives and analyses prepared for Framework Adjustment 5 to the Atlantic *Herring* Fishery Management Plan (FMP), an action considering modification of accountability measures (AMs) that trigger if the sub-ACL of Georges Bank *haddock* is exceeded by the midwater trawl *herring* fishery. The panel may recommend preferred alternatives for the Committee to consider for final action. The panel will also review preliminary outcomes from the recent workshop held in December, on Management Strategy Evaluation of Atlantic *Herring* Acceptable Biological Catch control rules being considered in Amendment 8 to the Atlantic *Herring* FMP. The panel may recommend a range of alternatives for the Committee to consider including in Amendment 8 related to harvest control rule alternatives. The panel will review public comments on the *herring* related measures being considered in the Omnibus Industry Funded Monitoring (IFM) Amendment. The panel may recommend preferred alternatives for the Committee to consider. Address other business, as necessary.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at 978–465–0492, at least 5 days prior to the meeting.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 19, 2016.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Adoption of Recommendations

AGENCY: Administrative Conference of the United States.

ACTION: Notice.

SUMMARY: The Administrative Conference of the United States adopted four recommendations at its Sixty-sixth Plenary Session. The appended recommendations address: Special Procedural Rules for Social Security Litigation; Evidentiary Hearings Not Required by the Administrative Procedure Act; The Use of Ombuds in Federal Agencies; and Self-Represented Parties in Administrative Proceedings.

FOR FURTHER INFORMATION CONTACT: For Recommendation 2016–3, Daniel Sheffner; for Recommendation 2016–4, Amber Williams; for Recommendation 2016–5, David Pritzker; and for Recommendation 2016–6, Connie Vogelmann. For all of these actions the address and telephone number are: Administrative Conference of the United States, Suite 706 South, 1120 20th Street NW., Washington, DC 20036; Telephone 202–480–2080.

SUPPLEMENTARY INFORMATION: The Administrative Conference Act, 5 U.S.C. 591–596, established the Administrative Conference of the United States. The Conference studies the efficiency, adequacy, and fairness of the administrative procedures used by Federal agencies and makes recommendations to agencies, the President, Congress, and the Judicial Conference of the United States for procedural improvements (5 U.S.C. 594(1)). For further information about the Conference and its activities, see *www.acus.gov.* At its Sixty-sixth Plenary Session, held December 13 and 14, 2016, the Assembly of the Conference adopted four recommendations.

Recommendation 2016–3, *Special Procedural Rules for Social Security Litigation in District Court.* This recommendation encourages the Judicial Conference of the United States to develop a uniform set of procedural rules for cases under the Social Security Act in which an individual seeks district court review of a final administrative decision of the Commissioner of Social Security pursuant to 42 U.S.C. 405(g). It also highlights areas in which such rules should be adopted and sets forth criteria for the promulgation of additional rules.

Recommendation 2016–4, *Evidentiary Hearings Not Required by the Administrative Procedure Act.* This recommendation offers best practices to agencies for structuring evidentiary hearings that are not required by the Administrative Procedure Act. It suggests ways to ensure the integrity of the decisionmaking process; sets forth recommended pre-hearing, hearing, and post-hearing practices; and urges agencies to describe their practices in a publicly accessible document and seek periodic feedback on those practices.

Recommendation 2016–5, *The Use of Ombuds in Federal Agencies.* This recommendation takes account of the broad array of federal agency ombuds offices that have been established since the Administrative Conference's adoption in 1990 of Recommendation 90–2 on the same subject, *https://www.acus.gov/recommendation/ombudsman-federal-agencies.* The new recommendation continues to urge both agencies and Congress to consider creating additional ombuds offices that provide an opportunity for individuals to raise issues confidentially and receive assistance in resolving them without fear of retribution. The recommendation emphasizes the importance of adherence to the three core standards of independence, confidentiality, and impartiality, and identifies best practices for the operation, staffing, and evaluation of federal agency ombuds offices.

Recommendation 2016–6, *Self-Represented Parties in Administrative Proceedings.* This recommendation offers best practices for agencies dealing with self-represented parties in administrative proceedings. Recommendations include the use of triage and diagnostic tools, development of a continuum of services to aid parties, and re-evaluation and simplification of existing administrative proceedings, where possible. The project builds on the activity of a working group on Self-Represented Parties in Administrative Hearings that is co-led by the Administrative Conference and the Department of Justice's Office for Access to Justice.

The Appendix below sets forth the full texts of these four recommendations. The Conference will transmit them to affected agencies, Congress, and the Judicial Conference of the United States. The recommendations are not binding, so the entities to which they are addressed will make decisions on their implementation.

The Conference based these recommendations on research reports that are posted at: *https://www.acus.gov/66thPlenary.*

Dated: December 20, 2016.

Shawne C. McGibbon,

General Counsel.

APPENDIX—RECOMMENDATIONS OF THE ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Administrative Conference Recommendation 2016–3

Special Procedural Rules for Social Security Litigation in District Court

Adopted December 13, 2016

The Administrative Conference recommends that the Judicial Conference of the United States develop special procedural rules for cases under the Social Security Act [1] in which an individual seeks district court review of a final administrative decision of the Commissioner of Social Security pursuant to 42 U.S.C. 405(g). The Rules Enabling Act delegates authority to the United States Supreme Court (acting initially through the Judicial Conference) to prescribe procedural rules for the lower federal courts.[2] The Act does not require that procedural rules be trans-substantive (that is, be the same for all types of cases), although the Federal Rules of Civil Procedure (Federal Rules) have generally been so drafted. Rule 81 of the Federal Rules excepts certain specialized proceedings from the Rules' general procedural governing scheme.[3] In the case of social security litigation in the federal courts, several factors warrant an additional set of exceptions. These factors include the extraordinary volume of social security litigation, the Federal Rules' failure to account for numerous procedural issues that

[1] 42 U.S.C. 301 *et seq.* (2012).

[2] *See* 28 U.S.C. 2072(a) (2012).

[3] **Fed. R. Civ. P.** 81(a); *see also* Fed. R. Civ. P. 71.1–73 (''Special Proceedings'').

arise due to the appellate nature of the litigation, and the costs imposed on parties by the various local rules fashioned to fill those procedural gaps.[4]

* * *

The Social Security Administration (SSA) administers the Social Security Disability Insurance program and the Supplemental Security Income program, two of the largest disability programs in the United States. An individual who fails to obtain disability benefits under either of these programs, after proceeding through SSA's extensive administrative adjudication system, may appeal the agency's decision to a federal district court.[5] In reviewing SSA's decision, the district court's inquiry is typically based on the administrative record developed by the agency.

District courts face exceptional challenges in social security litigation. Although institutionally oriented towards resolving cases in which they serve as the initial adjudicators, the federal district courts act as appellate tribunals in their review of disability decisions. That fact alone does not make these cases unique; appeals of agency actions generally go to district courts unless a statute expressly provides for direct review of an agency's actions by a court of appeals.[6] However, social security appeals comprise approximately seven percent of district courts' dockets, generating substantially more litigation for district courts than any other type of appeal from a federal administrative agency. The high volume of social security cases in the federal courts is in no small part a result of the enormous magnitude of the social security disability program. The program, which is administered nationally, annually receives millions of applications for benefits. The magnitude of this judicial caseload suggests that a specialized approach in this area could bring about economies of scale that probably could not be achieved in other subject areas.

The Federal Rules were designed for cases litigated in the first instance, not for those reviewing, on an appellate basis, agency adjudicative decisions. Consequently, the Federal Rules fail to account for a variety of procedural issues that arise when a disability case is appealed to district court. For example, the Rules require the parties to file a complaint and an answer. Because a social security case is in substance an appellate proceeding, the case could more sensibly be initiated through a simple document akin to a notice of appeal or a petition for review. Moreover, although 42 U.S.C. 405(g) provides that the certified record should be filed as ''part of'' the government's answer, there is no functional need at that stage for the government to file anything more than the record. In addition, the lack of congruence between the structure of the Rules and the nature of the proceeding has led to uncertainty about the type of motions that litigants should file in order to get their cases resolved on the merits. In some districts, for instance, the agency files the certified transcript of administrative proceedings instead of an answer, whereas other districts require the agency to file an answer. In still other districts, claimants must file motions for summary judgment to have their case adjudicated on the merits,[7] whereas such motions are considered ''not appropriate'' in others.[8]

Social security disability litigation is not the only type of specialized litigation district courts regularly review in an appellate capacity. District courts entertain an equivalent number of habeas corpus petitions,[9] as well as numerous appeals from bankruptcy courts. But habeas and bankruptcy appeals are governed by specially crafted, national rules that address those cases' specific issues.[10] No particularized set of rules, however, accounts for the procedural gaps left by the Federal Rules in social security appeals.

When specialized litigation with unique procedural needs lacks a tailored set of national procedural rules for its governance, districts and even individual judges have to craft their own. This is precisely what has happened with social security litigation. The Federal Rules do exempt disability cases from the initial disclosure requirements of Rule 26, and limit electronic access of nonparties to filings in social security cases,[11] but, otherwise, they include no specialized procedures. As a result, numerous local rules, district-wide orders, and individual case management orders, addressing a multitude of issues at every stage in a social security case, have proliferated. Whether the agency must answer a complaint, what sort of merits briefs the parties are required to file, whether oral arguments are held, and the answers to a host of other questions differ considerably from district to district and, sometimes, judge to judge. Such local variations have not burgeoned in other subject areas in which district courts serve as appellate tribunals; this fact reflects the district courts' own recognition that social security cases pose distinctive challenges.

Many of the local rules and orders fashioned to fill the procedural gaps left by the Federal Rules generate inefficiencies and impose costs on claimants and SSA. For example, simultaneous briefing—the practice in some districts that requires both parties to file cross motions for resolution of the merits and to respond to each other's briefs in simultaneously filed responses—effectively doubles the number of briefs the parties must file. Some judges employ a related practice whereby the *agency* is required to file the opening brief.[12] Because social security complaints are generally form complaints containing little specificity, courts that employ this practice (known as ''affirmative briefing'') essentially reverse the positions of the parties, leaving to the agency the task of defining the issues on appeal. The questionable nature of some of these local variations may be attributable in part to the fact that they can be imposed without observance of procedures that would assure sufficient deliberation and opportunities for public feedback. Proposed amendments to the Federal Rules must go through several steps, each of which requires public input. So-called ''general orders'' and judge-specific orders, on the other hand, can be issued by a district or individual judge with very little process.

The disability program is a national program that is intended to be administered in a uniform fashion, yet procedural localism raises the possibility that like cases will not be treated alike. Burdensome procedures adopted by some districts or judges, such as simultaneous briefing schedules, can increase delays and litigation costs for some claimants, while leaving other similarly situated claimants free from bearing those costs. Further, many of the attorneys who litigate social security cases—agency lawyers and claimants' representatives alike—maintain regional or even national practices. Localism, however, makes it difficult for those lawyers to economize their resources by, for instance, forcing them to refashion even successful arguments in order to fit several different courts' unique page-limits or formatting requirements.

Procedural variation can thus impose a substantial burden on SSA as it attempts to administer a national program and can result in arbitrary delays and uneven costs for disability claimants appealing benefit denials. SSA and claimants would benefit from a set of uniform rules that recognize the appellate nature of disability cases. Indeed, several districts already treat disability cases as appeals.[13] Many of these districts provide, for example, for the use of merits briefs instead of motions or for the filing of the certified administrative record in lieu of an answer.

The Supreme Court has recognized that the exercise of rulemaking power to craft

[4] This recommendation is based on a portion of the extensive report prepared for the Administrative Conference by its independent consultants, Jonah Gelbach of the University of Pennsylvania Law School and David Marcus of the University of Arizona Rogers College of Law. *See* Jonah Gelbach & David Marcus, A Study of Social Security Litigation in the Federal Courts 127–42, 148–59 (July 28, 2016) (report to the Admin. Conf. of the U.S.).

specialized procedural rules for particular areas of litigation can be appropriate under the Rules Enabling Act.[14] Yet, in recommending the creation of special procedural rules for social security disability and related litigation, the Administrative Conference is cognizant that the Judicial Conference has in the past been hesitant about amending the Federal Rules to incorporate provisions pertaining to particular substantive areas of the law. That hesitation has been driven, at least in part, by reluctance to recommend changes that would give rise to the appearance, or even the reality, of using the Federal Rules to advance substantive ends, such as heightened pleading standards that would disfavor litigants in particular subject areas. The proposals offered herein have very different purposes. Indeed, the Administrative Conference believes that rules promulgated pursuant to this recommendation should not favor one class of litigants over another or otherwise bear on substantive rights. Instead, this recommendation endorses the adoption of rules that would promote efficiency and uniformity in the procedural management of social security disability and related litigation, to the benefit of both claimants and the agency.[15] Such a commitment to neutrality would also serve to dampen any apprehensions that the proposed rules would violate the Rules Enabling Act's proscription of rules that would ''abridge, enlarge, or modify any substantive right.'' [16] Rules consistent with these criteria could potentially address a variety of topics, including setting appropriate deadlines for filing petitions for attorneys' fees, or establishing judicial extension practices, or perhaps authorizing the use of telephone, videoconference, or other telecommunication technologies. In developing such rules, the Judicial Conference may wish to consult existing appellate procedural schemes, such as the Federal Rules of Appellate Procedure and the Rules of Practice and Procedure of the United States Court of Appeals for Veterans Claims.

The Administrative Conference believes that a special set of procedural rules could bring much needed uniformity to social security disability and related litigation. In routine cases, page limits, deadlines, briefing schedules, and other procedural requirements should be uniform to ensure effective procedural management. At the same time, the new rules should be drafted to displace the Federal Rules *only* to the extent that the distinctive nature of social security litigation justifies such separate treatment.[17] In this way, the drafters can avoid the promulgation of a special procedural regime that sacrifices flexibility and efficiency for uniformity in certain cases.

The research that served as the foundation for this report focused on social security disability litigation commenced under 42 U.S.C. 405(g). Section 405(g) also authorizes district court review of SSA old age and survivors benefits decisions, as well as other actions related to benefits. Because such non-disability appeals do not differ procedurally from disability cases in any meaningful way,[18] it is the Conference's belief that this recommendation should apply, subject to the exceptions discussed below, to all cases under the Social Security Act in which an individual seeks district court review of a final administrative decision of the Commissioner of Social Security pursuant to 42 U.S.C. 405(g).

The Conference recognizes that some cases might be brought under § 405(g) that would fall outside the rationale for the proposed new rules. This could include class actions and other broad challenges to program administration, such as challenges to the constitutionality or validity of statutory and regulatory requirements, or similar broad challenges to agency policies and procedures. In these cases, the usual deadlines and page limits could be too confining. By citing these examples, the Conference does not intend to preclude other exclusions. The task of precisely defining the cases covered by any new rules would be worked out by the committee that drafts the rules, after additional research and more of an opportunity for public comment on the scope of the rules than has been possible for the Conference. It may also be necessary to include specific rules explaining the procedure for the exclusion of appropriate cases.

Recommendation

1. The Judicial Conference, in consultation with Congress as appropriate, should develop for the Supreme Court's consideration a uniform set of procedural rules for cases under the Social Security Act in which an individual seeks district court review of a final administrative decision of the Commissioner of Social Security pursuant to 42 U.S.C. 405(g). These rules would not apply to class actions or to other cases that are outside the scope of the rationale for the proposal.

2. Examples of rules that should be promulgated include:

a. A rule providing that a claimant's complaint filed under 42 U.S.C. 405(g) be substantially equivalent to a notice of appeal;

b. A rule requiring the agency to file a certified copy of the administrative record as the main component of its answer;

c. A rule or rules requiring the claimant to file an opening merits brief to which the agency would respond, and providing for appropriate subsequent proceedings and the filing of appropriate responses consistent with 42 U.S.C. 405(g) and the appellate nature of the proceedings;

d. A rule or rules setting deadlines and page limits as appropriate; and

e. Other rules that may promote efficiency and uniformity in social security disability and related litigation, without favoring one class of litigants over another or impacting substantive rights.

Administrative Conference Recommendation 2016–4

Evidentiary Hearings Not Required by the Administrative Procedure Act

Adopted December 13, 2016

Federal administrative adjudication can be divided into three categories:

(a) Adjudication that is regulated by the procedural provisions of the Administrative Procedure Act (APA) and usually presided over by an administrative law judge (referred to as Type A in the report that underlies this recommendation and throughout the preamble) [1];

(b) Adjudication that consists of legally required evidentiary hearings that are not regulated by the APA's adjudication provisions in 5 U.S.C. 554 and 556–557 and that is presided over by adjudicators who are often called administrative judges, though they are known by many other titles (referred to as Type B in the report that underlies this recommendation and throughout the preamble) [2]; and

(c) Adjudication that is not subject to a legally required (*i.e.,* required by statute, executive order, or regulation) evidentiary hearing (referred to as Type C in the report that underlies this recommendation and throughout the preamble).[3]

This recommendation concerns best practices for the second category of adjudication, that is, Type B adjudication.[4] In

[14] *See* Harris v. Nelson, 394 U.S. 286, 300 n.7 (1969) (inviting the Advisory Committee on Civil Rules to draft procedural rules for habeas corpus litigation).

[15] This recommendation is the latest in a line of Conference recommendations focused on improving the procedures used in social security cases. *See, e.g.,* Recommendation 90–4, Social Security Disability Program Appeals Process: Supplementary Recommendation, 55 FR 34,213 (June 8, 1990); Recommendation 87–7, A New Role for the Social Security Appeals Council, 52 FR 49,143 (Dec. 30, 1987); Recommendation 78–2, Procedures for Determining Social Security Disability Claims, 43 FR 27,508 (June 26, 1978).

[16] 28 U.S.C. 2072(b) (2012).

[17] *See* Fed. R. Civ. P. 81(a)(6) (''[The Federal Rules], to the extent applicable, govern proceedings under [certain designated] laws, except as those laws provide other procedures.'').

[18] Further, they only constitute about four percent of total social security cases appealed to district courts annually. *See* Table C–2A, U.S. District Courts–Civil Cases Commenced, by Nature of the Suit, During the 12-Month Periods Ending September 30, 2009 Through 2014, at 4.

[1] *See* Administrative Procedure Act, 5 U.S.C. 554–559 (2012). In a few kinds of cases, the ''presiding employees'' in APA hearings are not administrative law judges. Congress may provide for a presiding employee who is not an ALJ. *See id.* § 556(b).

[2] This type of adjudication is subject to 5 U.S.C. 555 (requiring various procedural protections in all adjudication) and 5 U.S.C. 558 (relating to licensing), as well as the APA's judicial review provisions.

[3] *See generally* Michael Asimow, Evidentiary Hearings Outside the Administrative Procedure Act (Nov. 10, 2016) [hereinafter Asimow], *available at https://www.acus.gov/report/evidentiary-hearings-outside-administrative-procedure-act-final-report.*

[4] Traditionally, Type A adjudication has been referred to as ''formal adjudication'' and Type B and Type C adjudication have been treated in an undifferentiated way as ''informal adjudication.'' This recommendation does not use that terminology for several reasons. First, the nature of Type B adjudication as involving a legally required hearing sharply distinguishes it from Type C adjudication and makes it feasible to prescribe best practices. Second, the term ''informal adjudication'' can be a misnomer when applied to Type B adjudication; in fact, Type B adjudication is often as ''formal'' or even more ''formal'' than Type A adjudication.

these adjudications, although there is no statutory mandate to hold an ''on the record'' hearing,[5] a statute, regulation, or other source of law does require the agency to conduct an evidentiary hearing. Because the APA's adjudication provisions in 5 U.S.C. 554 and 556–557 are not applicable to these adjudications, the procedures that an agency is required to follow are set forth elsewhere, most commonly in its own procedural regulations.

Type B adjudications are extremely diverse.[6] They involve types of matters spanning many substantive areas, including immigration, veterans' benefits, environmental issues, government contracts, and intellectual property. Some involve disputes between the federal government and private parties; others involve disputes between two private parties. Some involve trial-type proceedings that are at least as formal as Type A adjudication. Others are quite informal and can be decided based only on written submissions. Some proceedings are highly adversarial; others are inquisitorial.[7] Caseloads vary. Some have huge backlogs and long delays; others seem relatively current. The structures for internal appeal also vary.

The purpose of this recommendation is to set forth best practices that agencies should incorporate into regulations governing hearing procedures in Type B adjudications. The procedures suggested below are highlighted as best practices because they achieve a favorable balance of the criteria of accuracy (meaning that the procedure produces a correct and consistent outcome), efficiency (meaning that the procedure minimizes cost and delay), and acceptability to the parties (meaning that the procedure meets appropriate standards of procedural fairness).

Some of the best practices set forth in this recommendation may not be applicable or desirable for every Type B adjudicatory program. Accordingly, the recommendation does not attempt to prescribe the exact language that the agency should employ in its procedural regulations.[8] This recommendation should be particularly useful to agencies that are either fashioning procedural regulations for new adjudicatory programs or seeking to revise their existing procedural regulations.

Recommendation

Integrity of the Decisionmaking Process

1. *Exclusive Record.* Procedural regulations should require a decision to be based on an exclusive record. That is, decisionmakers should be limited to considering factual information presented in testimony or documents they received before, at, or after the hearing to which all parties had access, and to matters officially noticed.

2. *Ex Parte Communications.* Procedural regulations should prohibit ex parte communications relevant to the merits of the case between persons outside the agency and agency decisionmakers or staff who are advising or assisting the decisionmaker. Communications between persons outside the agency and agency decisionmakers or staff who advise or assist decisionmakers should occur only on the record. If oral, written, or electronic ex parte communications occur, they should be placed immediately on the record.

3. *Separation of Functions.* In agencies that have combined functions of investigation, prosecution, and adjudication, procedural regulations should require internal separation of decisional and adversarial personnel. The regulations should prohibit staff who took an active part in investigating, prosecuting, or advocating in a case from serving as a decisionmaker or staff advising or assisting the decisionmaker in that same case. Adversary personnel should also be prohibited from furnishing ex parte advice or factual materials to a decisionmaker or staff who advise or assist decisionmakers.

4. *Staff Who Advise or Assist Decisionmakers.* Procedural regulations should explain whether the agency permits ex parte advice or assistance to decisionmakers by staff. The staff may not have taken an active part in investigating, prosecuting, mediating, or advocating in the same case (see paragraph 3). The advice should not violate the exclusive record principle (see paragraph 1) by introducing new factual materials. The term ''factual materials'' does not include expert, technical, or other advice on the meaning or significance of ''factual materials.''

5. *Bias.* Procedural regulations should prohibit decisionmaker bias in adjudicatory proceedings by stating that an adjudicator can be disqualified if any of the following types of bias is shown:

a. Improper financial or other personal interest in the decision;

b. Personal animus against a party or group to which that party belongs; or

c. Prejudgment of the adjudicative facts at issue in the proceeding.

Procedural regulations and manuals should explain when and how parties should raise claims of bias, and how agencies resolve them.

Pre-Hearing Practices

6. *Notice of Hearing.* Procedural regulations should require notice to parties by appropriate means and sufficiently far in advance so that they may prepare for hearings. The notice should contain a statement of issues of fact and law to be decided. In addition, the notice should be in plain language and, when appropriate, contain the following basic information about the agency's adjudicatory process:

a. Procedures for requesting a hearing;

b. Discovery options, if any (see paragraph 10);

c. Information about representation, including self-representation and non-lawyer or limited representation, if permitted (see paragraphs 13–16), and any legal assistance options;

d. Available procedural alternatives (*e.g.,* in-person, video, or telephonic hearings (see paragraph 20); written and oral hearings (see paragraph 21); and alternative dispute resolution (ADR) opportunities (see paragraph 12));

e. Deadlines for filing pleadings and documents;

f. Procedures for subpoenaing documents and witnesses, if allowed (see paragraph 11);

g. Opportunity for review of the initial decision at a higher agency level (see paragraph 26);

h. Availability of judicial review; and

i. Web site address for and/or citation to the procedural regulations and any practice manuals.

7. *Confidentiality.* Procedural regulations should provide a process by which the parties may seek to keep certain information confidential or made subject to a protective order in order to protect privacy, confidential business information, or national security.

8. *Pre-Hearing Conferences.* Procedural regulations should allow the decisionmaker discretion to require parties to participate in a pretrial conference if the decisionmaker believes the conference would simplify the hearing or promote settlement. The decisionmaker should require that (a) parties exchange witness lists and expert reports before the pretrial conference and (b) both sides be represented at the pretrial conference by persons with authority to agree to a settlement.

9. *Inspection of Materials.* Procedural regulations should permit parties to inspect unprivileged materials in agency files that are not otherwise protected.

10. *Discovery.* Agencies should empower their decisionmakers to order discovery through depositions, interrogatories, and other methods of discovery used in civil trials, upon a showing of need and cost justification.

11. *Subpoena Power.* Agencies with subpoena power should explain their subpoena practice in detail. Agencies that do not have subpoena power should seek congressional approval for subpoena power, when appropriate.

12. *Alternative Dispute Resolution.* Agencies should encourage and facilitate ADR, and ensure confidentiality of communications occurring during the ADR process.

Finally, Type C adjudication—which can properly be referred to as ''informal adjudication''—is an enormous category, consisting of many millions of adjudications each year. This type of adjudication is highly diverse and does not easily lend itself to an overarching set of best practices.

[5] *See id.* at 7–9 (discussing the boundary between Type A and Type B adjudication).

[6] *See generally id.* (describing the vast variety of evidentiary hearings that are not required by the APA). *See also* Federal Administrative Adjudication, *available at https://www.acus.gov/research-projects/federal-administrative-adjudication* (providing an extensive database that maps the contours of administrative adjudication across the federal government).

[7] *See* Asimow, *supra* note 3 at 11–12, 84–88 (providing examples of inquisitorial adjudications).

[8] Drafters of procedural regulations implementing these best practices may want to consult the Conference-prepared 1993 Model Adjudication Rules for guidance on language, though those rules are directed to adjudication governed by the APA. *See* Michael Cox, *The Model Adjudication Rules (MARS),* 11 T.M. Cooley L. Rev. 75 (1994). The Conference has initiated a new Model Adjudication Rules Working Group to revise the model rules. See Admin. Conf. of the U.S., Office of the Chairman Model Adjudication Rules Working Group, available at *https://www.acus.gov/research-projects/office-chairman-model-adjudication-rules-working-group* for more information.

Hearing Practices

13. *Lawyer Representation.* Agencies should permit lawyer representation.

14. *Non-Lawyer Representation.* Agencies should permit non-lawyer representation. Agencies should have the discretion to (a) establish criteria for appearances before the agency by non-lawyer representatives or (b) require approval on a case-by-case basis.[9]

15. *Limited Representation.* Agencies should permit limited representation by lawyers or non-lawyers, when appropriate (*i.e.,* representation of a party with respect to some issues or during some phases of the adjudication).

16. *Self-Representation.* Agencies should make hearings as accessible as possible to self-represented parties by providing plain language resources, legal information, and other assistance, as allowed by statute and regulations.[10]

17. *Sanctions.* Agencies with the requisite statutory power should authorize decisionmakers to sanction attorneys and parties for misconduct. Sanctions can include admonitions, monetary fines, and preclusion from appearing before the agency. Agencies should have a mechanism for administrative review of any sanctions.

18. *Open Hearings.* Agencies should adopt the presumption that their hearings are open to the public, while retaining the ability to close the hearings in particular cases, including when the public interest in open proceedings is outweighed by the need to protect:

a. National security;

b. Law enforcement;

c. Confidentiality of business documents; and

d. Privacy of the parties to the hearing.

19. *Adjudicators.* Agencies that decide a significant number of cases should use adjudicators—rather than agency heads, boards, or panels—to conduct hearings and provide initial decisions, subject to higher-level review (see paragraph 26).

20. *Video Teleconferencing and Telephone Hearings.* Agencies should consult the Administrative Conference's recommendations [11] in determining whether and when to conduct hearings or parts of hearings by video conferencing or telephone.

21. *Written-Only Hearings.* Procedural regulations should allow agencies to make use of written-only hearings in appropriate cases. Particularly good candidates for written-only hearings include those that solely involve disputes concerning:

a. Interpretation of statutes or regulations; or

b. Legislative facts as to which experts offer conflicting views.

Agencies should also consider the adoption of procedures for summary judgment in cases in which there are no disputed issues of material fact.

22. *Oral Argument.* Agencies generally should permit oral argument in connection with a written-only hearing if a party requests it, while retaining the discretion to dispense with oral argument if it appears to be of little value in a given case or parts of a case.

23. *Evidentiary Rules.* Procedural regulations should prescribe the evidentiary rules the decisionmaker will apply in order to avoid confusion and time-consuming evidentiary disputes.[12]

24. *Opportunity for Rebuttal.* Agencies should allow an opportunity for rebuttal, which can take the form of cross-examination of an adverse witness as well as additional written or oral evidence. Agencies should have the discretion to limit or preclude cross-examination or have it be conducted in camera in appropriate cases, such as when:

a. The dispute concerns a question of legislative fact where the evidence consists of expert testimony;

b. Credibility is not at issue;

c. The only issue is how a decisionmaker should exercise discretion;

d. National security could be jeopardized; or

e. The identity of confidential informants might be revealed.

Post-Hearing Practices

25. *Decisions.* Procedural regulations should require the decisionmaker to provide a written or transcribable decision and specify the contents of the decision. The decision should include:

a. Findings of fact, including an explanation of how the decisionmaker made credibility determinations; and

b. Conclusions of law, including an explanation of the decisionmaker's interpretation of statutes and regulations.

26. *Higher-Level Review.* Apart from any opportunity for reconsideration by the initial decisionmaker, procedural regulations should provide for a higher-level review of initial adjudicatory decisions. Agencies should give parties an opportunity to file exceptions and make arguments to the reviewing authority. The reviewing authority should be entitled to summarily affirm the initial decision without being required to write a new decision.

27. *Precedential Decisions.* Procedural regulations should allow and encourage agencies to designate decisions as precedential in order to improve decisional consistency. These decisions should be published on the agency's Web site to meet the requirements of 5 U.S.C. 552.

Management of Procedures

28. *Complete Statement of Important Procedures.* Agencies should set forth all important procedures and practices that affect persons outside the agency in procedural regulations that are published in the **Federal Register** and the Code of Federal Regulations and posted on the agency Web site.

29. *Manuals and Guides.* Agencies should provide practice manuals and guides for decisionmakers, staff, parties, and representatives in which they spell out the details of the proceeding and illustrate the principles that are set forth in regulations. These manuals and guides should be written in simple, non-technical language and contain examples, model forms, and checklists, and they should be posted on the agency Web site.

30. *Review of Procedures.* Agencies should periodically re-examine and update their procedural regulations, practice manuals, and guides.

31. *Feedback.* Agencies should seek feedback from decisionmakers, staff, parties, representatives, and other participants in order to evaluate and improve their adjudicatory programs.

Administrative Conference Recommendation 2016–5

The Use of Ombuds in Federal Agencies

Adopted December 14, 2016

This recommendation updates and expands on the Administrative Conference's earlier Recommendation 90–2, *The Ombudsman in Federal Agencies,* adopted on June 7, 1990. That document concentrated on ''external ombudsmen,'' those who primarily receive and address inquiries and complaints from the public, and was formulated before ''use of ombuds'' was added to the definition of ''means of alternative dispute resolution'' in the Administrative Dispute Resolution Act (ADRA) [1] in 1996. In 90–2, the Conference urged ''the President and Congress to support federal agency initiatives to create and fund an effective ombudsman in those agencies with significant interaction with the public,'' believing that those agencies would benefit from establishing either agency-wide or program-specific ombudsman offices.

The present recommendation is based on a study of the far broader array of federal ombuds [2] that have been established since

[9] Agencies should refer to Recommendation 86–1, Nonlawyer Assistance and Representation, 51 FR 25,641 (June 16, 1986), available at *https://www.acus.gov/recommendation/nonlawyer-assistance-and-representation,* when establishing or improving their procedures related to non-lawyer representation.

[10] Agencies should refer to Recommendation 2016–6, Self-Represented Parties in Administrative Hearings, __FR __(Dec. __, 2016), available at *https://www.acus.gov/recommendation/self-represented-parties-administrative-proceedings-final-recommendation,* when establishing or improving their procedures related to self-represented parties.

[11] Agencies should refer to Recommendation 2011–4, Agency Use of Video Hearings: Best Practices and Possibilities for Expansion, 76 FR 48,795 (Aug. 9, 2011), available at *https://www.acus.gov/recommendation/agency-use-video-hearings-best-practices-and-possibilities-expansion;* Recommendation 2014–7, Best Practices for Using Video Teleconferencing for Hearings, 79 FR 75,119 (Dec. 17, 2014), available at *https://www.acus.gov/recommendation/best-practices-using-video-teleconferencing-hearings;* and the Conference's Handbook on Best Practices for Using Video Teleconferencing in Adjudicatory Hearings, available at *https://www.acus.gov/report/handbook-best-practices-using-video-teleconferencing-adjudicatory-hearings* , when establishing or improving their video teleconferencing hearings.

[12] Agencies should refer to Recommendation 86–2, Use of Federal Rules of Evidence in Federal Agency Adjudications, 51 FR 25,642 (June 16, 1986), available at *https://www.acus.gov/recommendation/use-federal-rules-vidence-federal-agency-adjudications,* when considering whether or how to use the Federal Rules of Evidence.

[1] 5 U.S.C. 571–84 (2012); *see id.* § 571(3) (2012).

[2] The term *ombudsman* is Scandinavian and means representative or proxy. Variations on the term exist in the field (ombudsmen, ombudsperson,

the Conference's earlier recommendation on this subject. Federal ombuds now include multiple variations of both primarily externally-focused and primarily internally-focused ombuds (*i.e.,* those who receive inquiries and complaints from persons within the agency). These individuals and offices can and do make a distinct and beneficial contribution to government effectiveness. While all forms of alternative dispute resolution expressly embraced by the ADRA have the capacity to reduce litigation costs and foster better relationships, the ombuds alone affords the constituent and the agency the opportunity to learn about and address issues before, in effect, they have been joined. Constituents and the agency are served by the ombuds' skilled, impartial assistance in resolution, and the agency is served by the opportunity for critical early warning of specific and systemic issues.

The research conducted to support this recommendation, including quantitative and qualitative surveys, interviews, case studies and profiles, revealed that federal ombuds can add value to their agencies in a variety of ways.[3] Ombuds (1) identify significant new issues and patterns of concerns that are not well known or being ignored; (2) support significant procedural changes; (3) contribute to significant cost savings by dealing with identified issues, often at the earliest or pre-complaint stages, thereby reducing litigation and settling serious disputes; (4) prevent problems through training and briefings; (5) serve as an important liaison between colleagues, units, or agencies; and (6) provide a fair process for constituents.

Externally-facing ombuds were more likely to report supporting the agency with specific mission-related initiatives; helping the agency to improve specific policies, procedures, or structures; making administrative decisions to resolve specific issues; helping within the agency to keep its organizational processes coordinated; and advocating on behalf of individuals. Internally-facing ombuds were more likely to report helping constituents by providing a safe way to discuss perceptions of unsafe or illegal behavior; promoting the use of fair and helpful options; helping to prevent problems by coaching one-on-one; and providing group training and briefings to constituents. Whistleblower ombuds and procurement ombuds—consonant with their particular focus on more narrowly defined responsibilities—described their accomplishments as providing specific information and education, and guidance about very specific matters of concern to their constituents.

Since the Conference last considered ombuds in the federal government, the milieu in which government operates has, by all accounts, become more polarized, with government itself often the target of suspicion and hostility. In a challenging environment in which many federal agencies struggle to maintain the trust of the public they serve and even of their own employees, the ombuds is uniquely situated to provide both pertinent information and assistance in resolving issues to constituents and the agency alike. The ability of the ombuds to provide a place perceived as safe—which can offer a ready, responsive, and respectful hearing and credible options—in itself builds trust. And trust is a commodity without which government in a democratic society cannot function effectively.

Accordingly, the Conference continues to urge Congress and the President to create, fund, and otherwise support ombuds offices across the government consistent with the recommendation articulated below. Further, the Conference urges those agencies that already have ombuds, and those that are contemplating creating ombuds offices, to align their office standards and practices with those included in this recommendation. In general, the Conference recommends these practices to the extent applicable in particular situations, regardless of whether an ombuds office or program is created by Congress or by an agency.

Although functionally the federal ombuds landscape is quite diverse, most federal ombuds share three *core standards of practice*—independence, confidentiality, and impartiality—and share common characteristics. The core standards are set forth in the standards adopted by the American Bar Association (ABA),[4] the International Ombudsman Association (IOA),[5] and the United States Ombudsman Association (USOA),[6] though with some variations, particularly with respect to confidentiality. These organizations' standards are generally followed, as applicable, and considered essential by the ombuds profession, both within and outside government. The further an ombuds office and the agency in which it resides deviate from the three core standards in practice, the more difficult it will be to defend whatever confidentiality the office does offer should it be subjected to legal challenge.

Most federal ombuds also share the following common characteristics: (1) Ombuds do not make decisions binding on the agency or provide formal rights-based processes for redress; (2) they have a commitment to fairness; and (3) they provide credible processes for receiving, reviewing, and assisting in the resolution of issues. The three core standards and these common characteristics, taken together, are central to the ombuds profession.

Agencies have the authority to establish ombuds offices or programs. Although legislation establishing a generally applicable template and standards for federal ombuds has not been enacted, the 1996 addition of the words ''use of ombuds'' to the definition of ''means of alternative dispute resolution'' in ADRA clarifies that, when the ombuds office is assisting in the resolution of issues that are raised to it under its mandate, it is covered by the Act's provisions.[7] The Act's coverage attaches to communications that take place when the constituent first approaches the ombuds office with an issue and continues to cover communications that occur until the case is, in effect, closed.[8] While ADRA's definition of ''alternative means of dispute resolution'' includes use of ombuds, federal agency ombuds programs would benefit from certain targeted amendments to ADRA to clarify certain definitions (*e.g.,* ''issue in controversy,'' ''neutral,'' ''party'') and other provisions as they apply to the work of ombuds, to expressly align them with current practice.

The research for this recommendation also identified three areas of potential conflict between (a) the requirements of ADRA § 574 and the scope of confidentiality that ombuds offer to constituents and (b) other legal requirements that may be applicable in certain situations. Federal ombuds should be aware of these matters and how they may affect particular ombuds programs:

(a) The relationships among their statutory duties to report information, the requirements of ADRA § 574(a)(3) on confidentiality, their agency's mission, and the professional standards to which they adhere. Any latitude they may have under ADRA § 574(d)(1) should be considered in reaching an understanding within the agency and with constituents of the breadth and limits of confidentiality consistent with statutory requirements.

ombuds, etc.). In this recommendation, the term ''ombuds'' will be used as the predominant term to be as inclusive as possible. For historical background on the use of ombuds in other countries and their potential value in the United States, see Walter Gellhorn, Ombudsmen and Others: Citizen Protectors in Nine Countries (1966); Walter Gellhorn, When Americans Complain: Governmental Grievance Procedures (1966).

[4] ABA Standards for the Establishment and Operation of Ombuds Offices (2004) (hereinafter ''**ABA Standards**''), *available at https://www.americanbar.org/content/dam/aba/migrated/leadership/2004/dj/115. authcheckdam.pdf.*

[5] IOA Standards of Practice (2009), *available at https://www.ombudsassociation.org/IOA_Main/media/SiteFiles/IOA_Standards_of_Practice_Oct09.pdf.*

[6] USOA Governmental Ombudsman Standards (2003), *available at https://www.usombudsman.org/site-usoa/wp-content/uploads/USOA-STANDARDS1.pdf.*

[7] Further, ombuds are ''neutrals'' within the meaning of the Act including those ombuds who, after impartial review, advocate for specific processes or outcomes. *See* ABA Standards, *supra* note 4, at 14.

[8] The Act's coverage is generally understood to begin at intake in alternative dispute resolution offices and continue until closure even when the constituent's interaction with the office ends without a session process involving both parties. For example, guidance concerning ADRA confidentiality issued by the Federal Alternative Dispute Resolution Council in 2000 concluded that ADRA confidentiality applies to the intake and convening stages of ADR. *See* Confidentiality in Federal Alternative Dispute Resolution Programs, 65 FR 83,085, 83,090 (Dep't of Justice Dec. 29, 2000). Further, the Interagency ADR Working Group Steering Committee in its Guide states that ADR program administrators are ''neutrals when they are helping the parties resolve their controversy by, for example, discussing ADR options with the parties, coaching, and preparing them to negotiate . . . .'' *See* Interagency ADR Working Group Steering Comm., Protecting the Confidentiality of Dispute Resolution Proceedings 8 (2006). While ADRA covers dispute resolution communications occurring through the duration of the case, the neutral's obligation to maintain this confidentiality does not end with the closure of the case.

(b) The requirements and interrelationship of the Federal Records Act,[9] the Freedom of Information Act,[10] and the Privacy Act,[11] with regard to agency records and other documentation.

(c) The effect on confidentiality of the Federal Service Labor-Management Relations Statute,[12] pursuant to which the union may be entitled to notice and an opportunity to be present at meetings with bargaining unit employees (for those ombuds that have employees with a collective bargaining representative among their constituents, or who may have cause, in the course of resolving issues that have been brought to them, to engage with represented employees as well as management on issues affecting the terms and conditions of bargaining unit employees).

In addition, this recommendation addresses standards applicable to federal agency ombuds offices and related issues involved in creating such offices. The practices included in this recommendation are intended to highlight some overarching beneficial practices observed among federal ombuds and to supplement the recommended practices and guidance available from various ombuds professional organizations.

To foster continual improvement and accountability of individual ombuds offices, the recommendation advises that each ombuds office arrange for periodic evaluation of its management and program effectiveness. Evaluation of ombuds by colleagues within the office can be useful if the office is of sufficient size to make this feasible. Otherwise, any external evaluation should be conducted by individuals knowledgeable about the roles, functions, and standards of practice of federal ombuds. For example, peer evaluation using the expertise of similar types of ombuds in other offices or agencies, or by outside ombuds professionals, may be suitable.

Finally, the recommendation urges the designation of an entity to serve as a government-wide resource to address certain issues of common concern among agency ombuds that transcend organizational boundaries.

Recommendation

1. *Establishment and Standards.*

a. Agencies should consider creating additional ombuds offices to provide places perceived as safe for designated constituents to raise issues confidentially and receive assistance in resolving them without fear of retribution. They should ensure that the office is able to, and does, adhere to the three core standards of independence, confidentiality, and impartiality, as these standards are described in generally recognized sets of professional standards, which include those adopted by the American Bar Association, the International Ombudsman Association, and the United States Ombudsman Association, and they should follow, to the extent applicable, the procedural recommendations below. Existing offices with the ombuds title that do not adhere to these standards should consider modifying their title, where permitted, to avoid any confusion.

b. Ombuds offices created by executive action should be established or governed by a charter or other agency-wide directive specifying the office's mandate, standards, and operational requirements, so that others in the agency and the public are aware of the office's responsibilities.

2. *Legislative Considerations.*

a. Congress should consider creating additional ombuds offices. When Congress creates a new ombuds program, it should observe the procedural principles contained in this recommendation, to the extent applicable.

b. Any action by Congress creating or affecting the operations of agency ombuds offices, whether through amendment of the Administrative Dispute Resolution Act (ADRA), 5 U.S.C. 571–84, or other legislative action, should reinforce the core standards of independence, confidentiality, and impartiality. Any such actions should maintain clarity and uniformity of definitions and purpose for federal agency ombuds, while allowing for differences in constituencies (whether primarily internal or external), type of office (advocate, analytic, organizational, etc.), and agency missions.

3. *Leadership Support.*

a. Agency leadership should provide visible support, renewed as leadership changes, for the role of ombuds offices in the agency and their standards, including independence, confidentiality, and impartiality.

b. Agency leadership should consider carefully any specific recommendations for improved agency performance that are provided by agency ombuds.

4. *Independence.*

a. To promote the effectiveness and independence of ombuds offices, agencies should consider structuring ombuds offices so that they are perceived to have the necessary independence and are separate from other units of the agency. To ensure adequate support from agency leadership, ombuds offices should report to an agency official at the highest level of senior leadership. Ombuds offices should not have duties within the agency that might create a conflict with their responsibilities as a neutral, and their budgets should be publicly disclosed.

b. The agency should ensure that the ombuds has direct access to the agency head and to other senior agency officials, as appropriate. Whether by statute, regulation, or charter, ombuds should expressly be given access to agency information and records pertinent to the ombuds' responsibilities as permitted by law.

c. Ombuds and the agencies in which they are located should clearly articulate in all communications about the ombuds that the ombuds office is independent and specifically not a conduit for notice to the agency.

d. Federal ombuds should not be subject to retaliation, up to and including removal from the ombuds office, based on their looking into and assisting with the resolution of any issues within the ombuds' area of jurisdiction.

5. *Confidentiality.*

a. Consistent with the generally accepted interpretation of ADRA § 574, as applied to alternative dispute resolution offices, agencies should understand and support that the Act's requirements for confidentiality attach to communications that occur at intake and continue until the issue has been resolved or is otherwise no longer being handled by the ombuds, whether or not the constituent ever engages in mediation facilitated by the ombuds office. Restrictions on disclosure of such communications, however, should not cease with issue resolution or other indicia of closure within the ombuds office.

b. Agencies (or other authorizers) should articulate the scope and limits of the confidentiality offered by ombuds offices in their enabling documents (whether statute, regulation, charter or other memoranda), as well as on the agency Web site, in brochures, and in any other descriptions or public communications about the office utilized by the office or the agency.

c. Agency leadership and management should not ask for information falling within the scope of confidentiality offered by the ombuds office.

d. If information is requested from an ombuds during discovery in litigation, or in the context of an internal administrative proceeding in connection with a grievance or complaint, then the ombuds should seek to protect confidentiality to the fullest extent possible under the provisions of ADRA § 574, unless otherwise provided by law. Agencies should vigorously defend the confidentiality offered by ombuds offices.

6. *Impartiality.* Ombuds should conduct inquiries and investigations in an impartial manner, free from conflicts of interest. After impartial review, ombuds may appropriately advocate with regard to process. An ombuds established with advocacy responsibilities may also advocate for specific outcomes.

7. *Legal Issues.* Federal ombuds should consider potential conflicts in the following areas:

a. The relationships among their statutory duties to report information, the requirements of ADRA § 574(a)(3) on confidentiality, their agency's mission, and the professional standards to which they adhere.

b. The requirements and interrelationship of the Federal Records Act, the Freedom of Information Act, and the Privacy Act, with regard to agency records and other documentation.

c. The effect on confidentiality of the provision in the Federal Service Labor-Management Relations Statute, 5 U.S.C. 7114, where applicable, pursuant to which the union may be entitled to notice and an opportunity to be present at meetings with bargaining unit employees.

8. *Staffing.*

a. Agencies should reinforce the credibility of federal ombuds by appointment of ombuds with sufficient professional stature, who also possess the requisite knowledge, skills, and abilities. This should include, at a minimum,

[9] 44 U.S.C. Chaps. 21, 22, 29, 31, and 33.

[10] 5 U.S.C. 552 (2012).

[11] *Id.* § 552a.

[12] *Id.* §§ 7101–35; *see id.* § 7114.

knowledge of informal dispute resolution practices as well as, depending on the office mandate, familiarity with process design, training, data analysis, and facilitation and group work with diverse populations. Agency ombuds offices should also seek to achieve the necessary diversity of ombuds skills and backgrounds on their staffs to credibly handle all matters presented to the office.

b. While the spectrum of federal ombuds is too diverse to recommend a single federal position classification, job grade, and set of qualifications, agencies and the Office of Personnel Management should consider working collaboratively, in consultation with the relevant ombuds professional associations, to craft and propose appropriate job descriptions, classifications, and qualifications, as set forth in the preceding subsection, covering the major categories of federal ombuds.

9. *Training and Skills.*

a. To promote accountability and professionalism, agencies should provide training to ombuds with regard to standards and practice, whether offered by one of the ombuds professional organizations or working groups, or from within the government.

b. Ombuds should identify steps to build general competency and confidence within the office and to provide specific support to ombuds when cases become highly emotional or complex. More generally, as a regular practice to support and improve their skills, federal ombuds should participate in relevant professional working groups or ombuds association training programs.

c. Ombuds offices should consider the use of developmental assignments via details to other agencies or offices, as appropriate, supplemented by mentoring, which can be helpful as part of their training program.

10. *Access to Counsel.* To protect the independence and confidentiality of federal ombuds, agencies should ensure, consistent with available resources, that ombuds have access to legal counsel for matters within the purview of the ombuds, whether provided within the agency with appropriate safeguards for confidentiality, by direct hiring of attorneys by the ombuds office, or under an arrangement enabling the sharing across agencies of counsel for this purpose. Such counsel should be free of conflicts of interest.

11. *Physical Facilities.* To reinforce confidentiality and the perception of independence, to the fullest extent possible and consistent with agency resources, the agency should ensure that the physical ombuds office and telephonic and online communications systems and documentation enable discreet meetings and conversations.

12. *Evaluation.* Each ombuds office should, as a regular professional practice, ensure the periodic evaluation of both office management and program effectiveness for the purposes of continual improvement and accountability.

13. *Providing Information.*

a. Ombuds offices should provide information about relevant options to visitors to the ombuds office, including formal processes for resolving issues, and their requirements, so that visitors do not unintentionally waive these options by virtue of seeking assistance in the ombuds office. Correspondingly, ombuds offices should not engage in behavior that could mislead employees or other visitors about the respective roles of the ombuds and those entities that provide formal complaint processes.

b. Agencies should disclose publicly on their Web sites the identity, contact information, statutory or other basis, and scope of responsibility for their ombuds offices, to the extent permitted by law.

c. Agency ombuds offices should explore ways to document for agency senior leadership, without breaching confidentiality, the value of the use of ombuds, including identification of systemic problems within the agency and, where available, relevant data on cost savings and avoidance of litigation.

14. *Records Management.* Federal ombuds offices should work with agency records officials to ensure appropriate confidentiality protections for the records created in the course of the office's work and to ensure that ombuds records are included in appropriate records schedules.

15. *Agency-wide Considerations.*

a. Ombuds offices should undertake outreach and education to build effective relationships with those affected by their work. Outreach efforts should foster awareness of the services that ombuds offer, to promote understanding of ombuds (and agency) processes and to ensure that constituents understand the role of the ombuds and applicable standards.

b. To ensure that there is a mutual understanding of respective roles and responsibilities within the agency, ombuds offices should work proactively with other offices and stakeholders within their agencies to establish protocols for referrals and overlap, to build cooperative relationships and partnerships that will enable resolutions, and to develop internal champions. Such initiatives also help the ombuds to identify issues new to the agency, as well as patterns and systemic issues, and to understand how the ombuds can use the resources available to add the most value. Outreach should be ongoing to keep up with the turnover of agency officials and constituents and should utilize as many communications media as appropriate and feasible.

16. *Interagency Coordination.* An entity should be designated to serve as a central resource for agency ombuds to address matters of common concern.

Administrative Conference Recommendation 2016–6

Self-Represented Parties in Administrative Proceedings

Adopted December 14, 2016

Federal agencies conduct millions of proceedings each year, making decisions that affect such important matters as disability or veterans' benefits, immigration status, and home or property loans. In many of these adjudications, claimants appear unrepresented for part or all of the proceeding and must learn to navigate hearing procedures, which can be quite complex, without expert assistance. The presence of self-represented parties [1] in administrative proceedings can create challenges for both administrative agencies and for the parties seeking agency assistance. Further, the presence of self-represented parties raises a number of concerns relating to the consistency of outcomes and the efficiency of processing cases.

Because of these concerns, in the spring of 2015 the Department of Justice's Access to Justice Initiative asked the Administrative Conference to co-lead a working group on self-represented parties in administrative proceedings, and the Conference agreed. The working group, which operates under the umbrella of the Legal Aid Interagency Roundtable (LAIR), has been meeting since that time.[2] During working group meetings, representatives from a number of agencies, including the Social Security Administration (SSA), Executive Office for Immigration Review (EOIR), Board of Veterans' Appeals (BVA), Internal Revenue Service (IRS), Department of Health and Human Services (HHS), Department of Agriculture (USDA), and Department of Housing and Urban Development (HUD) participated and shared information about their practices and procedures relating to self-represented parties. In working group meetings, agency representatives agreed that proceedings involving self-represented parties are challenging, and expressed interest both in learning more about how other agencies and courts handle self-represented parties and in improving their own practices. This recommendation, and its accompanying report,[3] arose in response to those concerns.[4]

[1] The term ''self-represented'' is used to denote parties who do not have professional representation, provided by either a lawyer or an experienced nonlawyer. Representation by a non-expert family member or friend is included in this recommendation's use of the term ''self-represented.'' Administrative agencies generally use the term ''self-represented,'' in contrast to courts' use of the term *pro se.* Because this recommendation focuses on agency adjudication, it uses the term ''self-represented,'' while acknowledging that the two terms are effectively synonymous.

[2] LAIR was established in 2012 by the White House Domestic Policy Council and the Department of Justice. *See White House Legal Aid Interagency Roundtable,* U.S. Dep't of Just., *https://www.justice.gov/lair* (last visited Aug. 16, 2016). It was formalized by presidential memorandum in the fall of 2015. *See* Memorandum from the President to the Heads of Exec. Dep'ts and Agencies (Sept. 14, 2015), *https://www.whitehouse.gov/the-press-office/2015/09/24/presidential-memorandum-establishment-white-house-legal-aid-interagency.*

[3] Connie Vogelmann, Self-Represented Parties in Administrative Hearings (Sept. 7, 2016), *https://www.acus.gov/sites/default/files/documents/Self-Represented-Parties-Administrative-Hearings-Draft-Report.pdf.*

[4] This recommendation primarily targets the subset of administrative agencies that conduct their own administrative hearings. Components of a number of federal agencies—including HUD, HHS, and USDA—do not conduct hearings directly, and instead delegate adjudication responsibilities to state or local entities. Because the challenges facing these components are quite distinct, they are not addressed in this recommendation.

While civil courts have long recognized and worked to address the challenges introduced by the presence of self-represented parties, agencies have increasingly begun to focus on issues relating to self-representation only in recent years. Agencies are undertaking numerous efforts to accommodate self-represented parties in their adjudication processes.[5] Yet quantitative information on self-representation in the administrative context is comparatively scarce, and there is much insight to be gained from the civil courts in identifying problems and solutions pertaining to self-representation. Although there are important differences between procedures in administrative proceedings and those in civil courts, available information indicates that the two contexts share many of the same problems—and solutions—when dealing with self-represented parties.

Challenges related to self-represented parties in administrative proceedings can be broken down into two main categories: Those pertaining to the efficiency of the administrative proceeding and those relating to the outcome of the procedure.

From an efficiency standpoint, self-represented parties' lack of familiarity with agency procedures and administrative processes can cause delay both in individual cases and on a systemic level. Delays in individual cases may arise when self-represented parties fail to appear for scheduled hearings, file paperwork incorrectly or incompletely, do not provide all relevant evidence, or make incoherent or legally irrelevant arguments before an adjudicator. In the aggregate, self-represented parties also may require significant assistance from agency staff in filing their claims and appeals, which can be challenging given agencies' significant resource constraints. Finally, self-represented parties may create challenges for adjudicators, who may struggle to provide appropriate assistance to them while maintaining impartiality and the appearance of impartiality. These problems are exacerbated by the fact that many agencies hear significant numbers of cases by self-represented parties each year.

Self-represented parties also may face suboptimal outcomes in administrative proceedings compared to their represented counterparts, raising issues of fairness. Even administrative procedures that are designed to be handled without trained representation can be challenging for inexperienced parties to navigate, particularly in the face of disability or language or literacy barriers. Furthermore, missed deadlines or hearings may result in a self-represented party's case being dismissed, despite its merits. Self-represented parties often struggle to effectively present their cases and, despite adjudicators' best efforts, may receive worse results than parties with representation.

Civil courts face many of these same efficiency and consistency concerns, and in response have implemented wide-ranging innovations to assist self-represented parties. These new approaches have included in-person self-service centers; workshops explaining the process or helping parties complete paperwork; and virtual services such as helplines accessible via phone, email, text, and chat. Courts have also invested in efforts to make processes more accessible to self-represented parties from the outset, through the development of web resources, e-filing and document assembly programs, and plain language and translation services for forms and other documents. Finally, courts have also used judicial resources and training to support judges and court personnel in their efforts to effectively and impartially support self-represented parties.

These innovations have received extremely positive feedback from parties, and early reports indicate that they improve court efficiency and can yield significant cost savings for the judiciary.[6] Administrative agencies have also implemented, or are in the process of implementing, many similar innovations.[7] For instance, some agencies make use of pre-hearing conferences to reduce both the necessity and the complexity of subsequent hearings.[8]

This recommendation builds on the successes of both civil courts and administrative agencies in dealing with self-represented parties and makes suggestions for further improvement. In making this recommendation, the Conference makes no normative judgment on the presence of self-represented parties in administrative proceedings. This recommendation assumes that there will be circumstances in which parties will choose to represent themselves, and seeks to improve the resources available to those parties and the fairness and efficiency of the overall administrative process.

The recommendation is not intended to be one-size-fits-all, and not every recommendation will be appropriate for every administrative agency. To the extent that this recommendation requires additional expenditure of resources by agencies, innovations are likely to pay dividends in increased efficiency and consistency of outcome in the long term.[9] The goals of this recommendation are to improve both the ease with which cases involving self-represented parties are processed and the consistency of the outcomes reached in those cases.

Recommendation

Agency Resources

1. Agencies should consider investigating and implementing triage and diagnostic tools to direct self-represented parties to appropriate resources based on both the complexity of their case and their individual level of need. These tools can be used by self-represented parties themselves for self-diagnosis or can be used by agency staff to improve the consistency and accuracy of information provided.

2. Agencies should strive to develop a continuum of services for self-represented parties, from self-help to one-on-one guidance, that will allow parties to obtain assistance by different methods depending on need. In particular, and depending on the availability of resources, agencies should:

a. Use Web sites to make relevant information available to the public, including self-represented parties and entities that assist them, to access and expand e-filing opportunities;

b. Continue efforts to make forms and other important materials accessible to self-represented parties by providing them at the earliest possible stage in the proceeding in plain language, in both English and in other languages as needed, and by providing effective assistance for persons with special needs; and

c. Provide a method for self-represented parties to communicate in ''real-time'' with agency staff or agency partners, as appropriate.

3. Subject to the availability of resources and as permitted by agency statutes and regulations, agencies should provide training for adjudicators for dealing with self-represented parties, including providing guidance for how they should interact with self-represented parties during administrative proceedings. Specifically, training should address interacting with self-represented parties in situations of limited literacy or English proficiency or mental or physical disability.

Data Collection and Agency Coordination

4. Agencies should strive to collect the following information, subject to the availability of resources, and keeping in mind relevant statutes including the Paperwork Reduction Act, where applicable. Agencies should use the information collected to continually evaluate and revise their services for self-represented parties. In particular, agencies should:

a. Seek to collect data on the number of self-represented parties in agency proceedings. In addition, agencies should collect data on their services for self-represented parties and request program feedback from agency personnel.

b. Seek to collect data from self-represented parties about their experiences during the proceeding and on their use of self-help resources.

c. Strive to keep open lines of communication with other agencies and with civil courts, recognizing that in spite of differences in procedures, other adjudicators have important and transferable insights in working with self-represented parties.

Considerations for the Future

5. In the long term, agencies should strive to re-evaluate procedures with an eye toward accommodating self-represented parties. Proceedings are often designed to accommodate attorneys and other trained professionals. Agencies should evaluate the feasibility of navigating their system for an outsider, and make changes—as allowed by their organic statutes and regulations—to simplify their processes accordingly. Although creation of simplified procedures

BILLING CODE 6110–01–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

December 19, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by January 23, 2017 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Economic Research Service

Title: Risk Preferences and Demand for Crop Insurance and Cover Crop Program.

OMB Control Number: 0536–NEW.

Summary of Collection: Federal crop insurance programs and soil conservation programs, including those that promote use of cover crops, can significantly alter the farm revenue risk profile for the farmers who adopt them. The Economic Research Service (ERS) currently models the demand for federal crop insurance and cover crop promotion programs as part of multiple research objectives. These economic models rely on traditional theories of farmer decision-making under risk, and over-predict participation rates for all crop insurance and cover crop programs. This data collection will use an experiment with university students to test alternate theories of decision-making under risk. ERS will be using a laboratory experiment to (1) characterize the relationship between cover crop usage and crop insurance purchase, and (2) explore how this relationship depends on individuals risk preferences and demographic characteristics. Data collection for this project is authorized by the 7 U.S.C. 2204(a).

Need and Use of the Information: The information to be collected under this proposed study is needed to provide evidence as to which theories best predict joint adoption of cover crop and crop insurance programs. This research will be exploratory in nature, and will be used to gain insights into specific economic behaviors regarding decision-making under risk. This research will not be used to generate population estimates, and the results from the proposed study design are not intended to be generalizable outside of the study participants. Results from this experiment will be used to inform future experimental research studies for risk management decision-making with more representative samples.

Description of Respondents: Individuals or households.

Number of Respondents: 2,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 861.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–18–P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Request for Comments; Revision of the Confidentiality Pledge Under Title 13 United States Code, Section 9

AGENCY: Census Bureau, U.S. Department of Commerce.

ACTION: Notice.

SUMMARY: Under 44 U.S.C. 3506(e) and 13 U.S.C. Section 9, the U.S. Census Bureau is seeking comments on revisions to the confidentiality pledge it provides to its respondents under Title 13, United States Code, Section 9. These revisions are required by the passage and implementation of provisions of the Federal Cybersecurity Enhancement Act of 2015 (H.R. 2029, Division N, Title II, Subtitle B, Sec. 223), which permit and require the Secretary of Homeland Security to provide Federal civilian agencies' information technology systems with cybersecurity protection for their Internet traffic. More details on this announcement are presented in the **SUPPLEMENTARY INFORMATION** section below.

DATES: To ensure consideration, written comments must be submitted on or before February 21, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *jjessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Robin J. Bachman, Policy Coordination Office, Census Bureau, HQ–8H028, Washington, DC 20233; 301–763–6440 (or via email at *pco.policy.office@census.gov*). Due to delays in the receipt of regular mail related to security screening, respondents are encouraged to use electronic communications.

SUPPLEMENTARY INFORMATION:

I. Abstract

Federal statistics provide key information that the Nation uses to measure its performance and make informed choices about budgets, employment, health, investments, taxes, and a host of other significant topics. The overwhelming majority of Federal surveys are conducted on a voluntary basis. Respondents, ranging from businesses to households to institutions, may choose whether or not to provide the requested information. Many of the

most valuable Federal statistics come from surveys that ask for highly sensitive information such as proprietary business data from companies or particularly personal information or practices from individuals. Strong and trusted confidentiality and exclusively statistical use pledges under Title 13, U.S.C. and similar statistical confidentiality pledges are effective and necessary in honoring the trust that businesses, individuals, and institutions, by their responses, place in statistical agencies.

Under the authority of Title 13, U.S.C. and similar statistical confidentiality protection statutes, many Federal statistical agencies make statutory pledges that the information respondents provide will be seen only by statistical agency personnel or their sworn agents, and will be used only for statistical purposes. Title 13, U.S.C. and similar statutes protect the confidentiality of information that agencies collect solely for statistical purposes and under a pledge of confidentiality. These acts protect such statistical information from administrative, law enforcement, taxation, regulatory, or any other non-statistical use and immunize the information submitted to statistical agencies from legal process. Moreover, many of these statutes carry criminal penalties of a Class E felony (fines up to $250,000, or up to five years in prison, or both) for conviction of a knowing and willful unauthorized disclosure of covered information.

As part of the Consolidated Appropriations Act for Fiscal Year 2016 signed on December 17, 2015, the Congress included the Federal Cybersecurity Enhancement Act of 2015 (H.R. 2029, Division N, Title II, Subtitle B, Sec. 223). This Act, among other provisions, permits and requires the Secretary of Homeland Security to provide Federal civilian agencies' information technology systems with cybersecurity protection for their Internet traffic. The technology currently used to provide this protection against cyber malware is known as Einstein 3A; it electronically searches Internet traffic in and out of Federal civilian agencies in real time for malware signatures.

When such a signature is found, Department of Homeland Security (DHS) personnel shunt the Internet packets that contain the malware signature aside for further inspection. Since it is possible that such packets entering or leaving a statistical agency's information technology system may contain a small portion of confidential statistical data, statistical agencies can no longer promise their respondents that their responses will be seen only by statistical agency personnel or their sworn agents. However, they can promise, in accordance with provisions of the Federal Cybersecurity Enhancement Act of 2015, that such monitoring can be used only to protect information and information systems from cybersecurity risks, thereby, in effect, providing stronger protection to the integrity of the respondents' submissions.

Consequently, with the passage of the Federal Cybersecurity Enhancement Act of 2015, the Federal statistical community has an opportunity to welcome the further protection of its confidential data offered by DHS' Einstein 3A cybersecurity protection program. The DHS cybersecurity program's objective is to protect Federal civilian information systems from malicious malware attacks. The Federal statistical system's objective is to ensure that the DHS Secretary performs those essential duties in a manner that honors the Government's statutory promises to the public to protect their confidential data. Given that the Department of Homeland Security is not a Federal statistical agency, both DHS and the Federal statistical system have been successfully engaged in finding a way to balance both objectives and achieve these mutually reinforcing objectives.

Accordingly, DHS and Federal statistical agencies, in cooperation with their parent departments, have developed a Memorandum of Agreement for the installation of Einstein 3A cybersecurity protection technology to monitor their Internet traffic and have incorporated an associated Addendum on Highly Sensitive Agency Information that provides additional protection and enhanced security handling of confidential statistical data. However, many current Title 13, U.S.C. and similar statistical confidentiality pledges promise that respondents' data will be seen only by statistical agency personnel or their sworn agents. Since it is possible that DHS personnel could see some portion of those confidential data in the course of examining the suspicious Internet packets identified by Einstein 3A sensors, statistical agencies need to revise their confidentiality pledges to reflect this process change.

Therefore, the U.S. Census Bureau is providing this notice to alert the public to the confidentiality pledge revisions in an efficient and coordinated fashion and to request public comments on the revisions. The following section contains the revised confidentiality pledge and a listing of the U.S. Census Bureau's current PRA OMB numbers and information collection titles for the Information Collections whose confidentiality pledges will change to reflect the statutory implementation of DHS' Einstein 3A monitoring for cybersecurity protection purposes.

II. Method of Collection

The following is the revised statistical confidentiality pledge for the Census Bureau's data collections:

The U.S. Census Bureau is required by law to protect your information. The Census Bureau is not permitted to publicly release your responses in a way that could identify you. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

The following listing includes Census Bureau information collections which are confidential under 13 U.S.C. Section 9, as well as information collections that the Census Bureau conducts on behalf of other agencies which are confidential under 13 U.S.C. Section 9 and for which the confidentiality pledge will also be revised.

OMB No.	Title of information collection
0607–0008	Manufacturers' Shipments, Inventories, and Orders Survey.
0607–0013	Annual Retail Trade Report.
0607–0049	Current Population Survey (CPS) Basic Demographics.
0607–0104	Advance Monthly Retail Trade Survey (MARTS).
0607–0110	Survey of Housing Starts, Sales, and Completions.
0607–0117	U.S. Census-Age Search.
0607–0151	The Boundary and Annexation Survey (BAS) & Boundary Validation Program (BVP).
0607–0153	Construction Progress Reporting Surveys.
0607–0175	Quarterly Survey of Plant Capacity Utilization.
0607–0179	Housing Vacancy Survey (HVS).

OMB No.	Title of information collection
0607–0189	Business and Professional Classification Report.
0607–0190	Monthly Wholesale Trade Survey.
0607–0195	Annual Wholesale Trade Survey (AWTS).
0607–0354	Annual Social and Economic Supplement to the Current Population Survey.
0607–0368	Special Census Program.
0607–0422	Service Annual Survey.
0607–0432	Quarterly Financial Report (QFR).
0607–0444	2014–2016 Company Organization Survey.
0607–0449	Annual Survey of Manufactures.
0607–0464	October School Enrollment Supplement to the Current Population Survey.
0607–0466	Current Population Survey, Voting and Registration Supplement.
0607–0561	Manufacturers' Unfilled Orders Survey.
0607–0610	Current Population Survey June Fertility Supplement.
0607–0717	Monthly Retail Trade Survey.
0607–0725	Generic Clearance for Questionnaire Pretesting Research.
0607–0757	2017 New York City Housing and Vacancy Survey.
0607–0782	Annual Capital Expenditures Survey.
0607–0795	Generic Clearance for Geographic Partnership Programs.
0607–0809	Generic Clearance for MAF and TIGER Update Activities.
0607–0810	The American Community Survey.
0607–0907	Quarterly Services Survey.
0607–0909	Information and Communication Technology Survey.
0607–0912	Business R&D and Innovation Survey.
0607–0921	2017 Economic Census—Commodity Flow Survey (CFS)—Advance Questionnaire.
0607–0932	2017 Economic Census—Commodity Flow Survey.
0607–0936	American Community Survey Methods Panel Tests.
0607–0963	2015 Management and Organizational Practices Survey.
0607–0969	Federal Statistical System Public Opinion Survey.
0607–0971	Generic Clearance for 2020 Census Tests to Research the Use of Automation in Field Data Collection Activities.
0607–0977	2014 Survey of Income and Program Participation (SIPP) Panel.
0607–0978	Generic Clearance for Internet Nonprobability Panel Pretesting.
0607–0983	Comparing Health Insurance Measurement Error (CHIME).
0607–0986	Annual Survey of Entrepreneurs.
0607–0987	The School District Review Program (SDRP).
0607–0988	The Redistricting Data Program.
0607–0989	2016 Census Test.
0607–0990	National Survey of Children's Health.
0607–0991	2017 Economic Census Industry Classification Report.
0607–0992	Address Canvassing Testing.
0607–XXXX	2017 Census Test—*currently submitted for clearance.*
0607–0760	Economic Census Round 3 Focus Group Discussion—*currently submitted for clearance.*
0607–XXXX	Collection of State Administrative Records Data—*currently submitted for clearance.*
0607–XXXX	2020 Census Local Update of Census Addresses Operation (LUCA)—*currently submitted for clearance.*
2528–0017	2015 American Housing Survey.
1220–0175	American Time Use Survey (ATUS).
1220–0050	Consumer Expenditure Quarterly and Diary Surveys (CEQ/CED).
1220–0100	Current Population Survey (CPS)—Basic Labor Force.
1121–0317	Identify Theft Supplement to the NCVS.
1121–0111	National Crime Victimization Survey 2015–2018.
3145–0141	National Survey of College Graduates (NSCG).
1018–0088	National Survey of Fishing, Hunting, and Wildlife-Associated Recreation.
1121–0260	2015 Police Public Contact Supplement.
1121–0184	2017 School Crime Supplement to the NCVS.
1121–0302	Supplemental Victimization Survey.
2528–0013	Survey of Market Absorption (SOMA).
2528–0276	Rental Housing Finance Survey (RHFS).
1905–0169	Manufacturing Energy Consumption Survey (MECSA).
2528–0029	Manufactured Housing Survey (MHS).
0935–0110	Medical Expenditure Panel Survey (MEPS).
1220–0187	ATUS-Eating and Health Supplement.
0536–0043	Food Security Supplement to the Current Population Survey.
1220–0153	Contingent Worker Supplement to the Current Population Survey—(Currently in **Federal Register** Notice Stage—has not been fully approved).
1220–0102	Veterans Supplement to the Current Population Survey.
0970–0416	Child Support Supplement to the Current Population Survey.
3064–0167	National Survey of Unbanked and Underbanked Households.
1220–0102	Volunteers Supplement.
1220–0104	Displaced Workers Supplement.
3135–0136	Survey of Public Participation in the Arts.
0660–0221	Computer and Internet Use.

III. Data

OMB Control Number: 0607–0993.

Form Number(s): None.

Affected Public: All survey respondents to Census Bureau data collections.

Legal Authority: 44 U.S.C. 3506(e) and 13 U.S.C. Section 9.

IV. Request for Comments

Comments are invited on the necessity and efficacy of the Census Bureau's revised confidentiality pledge above. Comments submitted in response to this notice will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Applications for four new scientific research permits, two permit modifications, and four permit renewals.

SUMMARY: Notice is hereby given that NMFS has received ten scientific research permit application requests relating to Pacific salmon, steelhead, eulachon, and green sturgeon. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts. The applications may be viewed online at: *https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.*

DATES: Comments or requests for a public hearing on the applications must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on January 23, 2017.

ADDRESSES: Written comments on the applications should be sent to the Protected Resources Division, NMFS, 1201 NE., Lloyd Blvd., Suite 1100, Portland, OR 97232–1274. Comments may also be sent by email to *nmfs.swr.apps@noaa.gov* (include the permit number in the subject line of email).

FOR FURTHER INFORMATION CONTACT: Shivonne Nesbit, Portland, OR (ph.: 503–231–6741), email: *Shivonne.Nesbit@noaa.gov*). Permit application instructions are available from the address above, or online at *https://apps.nmfs.noaa.gov.*

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): threatened California Coastal (CC); endangered Sacramento River winter-run (SRWR); threatened Central Valley spring-run (CVSR).

Coho salmon (*O. kisutch*): threatened Southern Oregon/Northern California Coast (SONCC); endangered Central California Coast (CCC).

Steelhead (*O. mykiss*): threatened Northern California (NC); threatened Central California Coast (CCC); threatened California Central Valley (CCV); threatened South-Central California Coast (S–CCC); endangered Southern California (SC).

North American green sturgeon (*Acipenser medirostris*): threatened southern distinct population segment (sDPS).

Eulachon (*Thaleichthys pacificus*): threatened sDPS.

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR parts 222–226). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see ADDRESSES). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Applications Received

Permit 19820

Dr. James Hobbs, Professor at the University of California in Davis, CA is seeking a five-year research permit to annually take juvenile SRWR and CVSR Chinook, CCC and CCV steelhead, and sDPS green sturgeon in the San Francisco Bay Area and tributaries. The purpose of this research is to determine the degree to which Longfin Smelt use tributaries of San Pablo and San Francisco bays as spawning and rearing habitat. This information would improve the understanding of how bay tributaries contribute to the overall population of Longfin Smelt. Although this study principally targets longfin smelt, SRWR and CVSR Chinook, CCC and CCV steelhead and sDPS green sturgeon may be encountered during sampling. Fish would be captured with beach seines, fyke nets, and trawls (otter and Kodiak). Captured fish would be identified by species, enumerated, and released. A sub-sample of 30 individuals per species would be measured. The researchers do not propose to kill any fish but a small number may die as an unintended result of research activities. This research will enhance the knowledge of the distribution of the species in bay tributaries that have not been previously monitored.

Permit 17292

NMFS' Southwest Fisheries Science Center (SWFSC) is seeking a five-year research permit to annually take adult and juvenile CC Chinook, CCC and SONCC coho, NC, S–CCC, SC and CCC steelhead. Sampling would be conducted in California on a variety of coastal salmonid populations. The purposes of this study are to: (1) Estimate population abundance and dynamics; (2) evaluate factors affecting growth, survival, reproduction and life-history patterns; (3) assess life-stage specific habitat use and movement; (4) evaluate physiological performance and tolerance; (5) determine the genetic structure of populations; (6) evaluate the effects of water management and habitat restoration; and (7) develop improved sampling and monitoring methods. The SWFSC proposes to capture fish using backpack electrofishing, hook and line angling, hand and/or dipnets, beach seines, fyke nets, panel, pipe or screw traps, and weirs. The SWFSC also proposes to observe adult and juvenile salmonids during spawning ground surveys and snorkel surveys. Some fish would anesthetized, measured, weighed, tagged (coded wire, elastomer, radio, acoustic, passive integrated transponder (PIT) or sonic), and tissue sampled for genetics identification. Intentional lethal take is proposed to support laboratory experiments using hatchery-origin fish whenever possible to examine fish physiology, environmental tolerance, and as part of

field-based research to assess performance, maternal origin (resident v. anadromous) and/or life-history and habitat use (freshwater, estuarine and marine). The research would benefit the affected species by providing critical information in support of the conservation, management, and recovery of Coastal California salmon stocks.

Permit 20524

The United States Geological Survey (USGS) is seeking a one-year permit to take juvenile CC, SRWR and CVSR Chinook, CCC coho, CCC, CCV, S–CCC, SC steelhead, and sDPS green sturgeon. The goal of the California Stream Quality Assessment (CSQA) is to assess the quality of streams in California by characterizing multiple water-quality factors that are stressors to aquatic life and evaluating the relation between these stressors and biological communities. Approximately ninety sites would be sampled for up to nine weeks for contaminants, nutrients, and sediment in water. Stream-bed sediment would be collected during the ecological survey for analysis of sediment chemistry and toxicity. Fish would be collected via backpack electrofishing. Captured fish would be held in aerated live wells and buckets and would be identified, enumerated and released. A subset of non-listed fish from each site will be sacrificed for mercury analysis. The researchers do not propose to kill any listed fish but a small number may die as an unintended result of research activities. This research will benefit listed species by providing information about the most critical factors affecting stream quality and thus generate insights about possible approaches to protecting the health of streams in the region.

Permit 20035

Stillwater Sciences is seeking a one-year permit to take juvenile SONCC coho in the Salmon and Scott River floodplains (California). Fish would be captured by beach seine or minnow traps. The study is part of a larger comprehensive planning effort that would lead to strategic restoration of floodplains and mine tailings in the Salmon and Scott rivers. The purpose of this research is to assess mercury contamination in fish and invertebrates. Non-listed fish would be collected and sacrificed for tissue testing of mercury contamination. The sampling has the potential to capture juvenile SONCC coho salmon. As part of this project, information would be collected on coho (*e.g.,* locations where individuals were observed and/or captured, habitat conditions) because this information will help determine the presence and distribution of coho—especially in the Salmon River where there is a paucity of such data. The researchers do not propose to kill any listed fish but a small number may die as an unintended result of research activities. The project would benefit listed species by providing data on mercury contamination, data that will be used to direct restoration efforts.

Permit 17428–2M

The U.S. Fish and Wildlife Service (FWS) is seeking to modify a five-year permit that allows them to annually take juvenile CCV steelhead, juvenile SRWR and CVSR Chinook salmon, and juvenile sDPS green sturgeon at rotary screw traps in the American River in Sacramento County, California. The purposes of this study are to: (1) Assess population-level abundance, production, condition, survival, and outmigration timing of juvenile salmonids; (2) evaluate the effectiveness of restoration actions; and (3) generate data that can be incorporated into life cycle models. Captured fish would be anesthetized, measured, weighed, tagged (acoustic or PIT), have a tissue sample taken, allowed to recover, and released. The modification is requested because the original permit application underestimated the number of CCV steelhead and SRWR and CVSR Chinook salmon that would be caught in the American River. The FWS is requesting a higher take limit and seeking to add green sturgeon because multiple years of trapping data suggest the authorized take limit needs to be adjusted. The researchers would avoid adult salmonids, but some may be encountered as an unintentional result of sampling. The researchers do not expect to kill any listed salmonids but a small number may die as an unintended result of the research activities. The project would benefit listed species by providing data that will be used to infer biological responses to ongoing habitat restoration activities, and direct future management activities to enhance the abundance, production, and survival of juvenile salmon and steelhead in the American River.

Permit 17299–3M

The SWFSC is seeking to modify a five-year permit that currently allows them to annually take juvenile CCV steelhead, juvenile SRWR and CVSR Chinook salmon. The sampling would take place in the Sacramento River and its tributaries. The purpose of this study is to document the survival, movement, habitat use and physiological capacity of Chinook salmon and steelhead and their predators in the Sacramento River basin. The SWFSC proposes to capture fish using hand and/or dipnets, beach seines, hook and line angling, and both backpack and boat-operated electrofishing. Captured fish would be anesthetized, tagged (sonic, acoustic, or PIT) and released. A subsample would have tissue samples taken. The SWFSC proposes to intentionally kill 50 CVSR juvenile chinook. From these, the researchers would collect otoliths for age/growth analysis, organ tissue for isotope, biochemical, and genomic expression assays and parasite infections. They would also collect stomach contents for diet analysis and tag effects/retention studies. Any CVSR fish that are unintentionally killed would be used in place of the intentional mortalities.

The permit would be modified to include (1) boat electroshocking, (2) PIT-tagging at screw trap locations in lieu of and/or in addition to acoustic tagging, (3) tissue and otolith sampling, and (4) the intentional directed mortality discussed above. The research would benefit the affected species by providing information to support the conservation, restoration, and management of Central Valley salmon stocks.

Permit 16531–2R

FISHBIO Environmental is seeking to renew a five-year research permit to take juvenile and adult CCV steelhead and CVSR Chinook in the Merced River (California). The purpose of this study is to obtain data on the habitat needs of fall-run Chinook and to assess the status of steelhead/rainbow trout in the Merced River. Fish would be captured at rotary screw traps and passively observed at a resistance board weir equipped with an infrared camera and during snorkel surveys. Fish captured at the screw traps would be anesthetized, identified by species, measured, weighed and released. A sub-sample of juvenile fall-run Chinook would be marked with a photonic dye to determine trap efficiency. Scale samples would be collected from up to 50 juvenile fall-run Chinook each week and from a small number of juvenile and adult O. mykiss during the season. Although fall-run Chinook are the researchers' primary target, they would also collect data rainbow trout/steelhead. This research would benefit listed salmon by identifying factors that limit fish production in the Merced River.

Permit 15542–2R

Normandeau Associates is seeking to renew a five-year research permit to take juvenile and adult CCV steelhead in Lower Putah Creek in the lower Sacramento Basin (California). The purpose of this study is to monitor the distribution and relative abundance of fish populations in lower Putah Creek downstream of the Putah Diversion Dam. Fish would be captured by backpack and boat electrofishing. Captured fish would be identified by species, measured, weighed, allowed to recover, and released. The researchers do not expect to kill any listed salmonids but a small number may die as an unintended result of the research activities. This research would benefit listed steelhead by providing information on fish response to river flows and on the distribution and diversity of rainbow trout/steelhead in Putah Creek.

Permit 16318–2R

Hagar Environmental Services is seeking to renew a five-year research permit to take juvenile CCC coho, CCC and S–CCC steelhead in the San Lorenzo-Soquel and Salinas subbasins. The purpose of this study is to assess salmonid habitat, presence, and abundance in order to inform watershed management and establish baseline population abundances before habitat conservation measures are implemented. The researchers would use backpack electrofishing and beach seines to capture the fish and would observe them during snorkel surveys. Captured fish would be enumerated, measured, and examined. Scale samples would be taken from a limited subset of individuals. Some salmonids would be PIT-tagged for a mark-recapture abundance estimation and to assess movement patterns. Snorkel surveys would be used in place of capture whenever possible. The researchers do not expect to kill any listed salmonids but a small number may die as an unintended result of the research activities. This research would benefit listed species by providing population, distribution and habitat data that will be used to draft a Habitat Conservation Plan for the City of Santa Cruz.

Permit 10093–2R

The California Department of Fish and Wildlife (CDFW) is seeking to renew a five-year permit to take adult and juvenile CC Chinook, CCC and SONCC coho, and NC, S–CCC, SC and CCC steelhead. The project goal is to restore salmon and steelhead productivity in coastal California streams through a comprehensive restoration program. The specific goals of this research project are to assess fish abundance and distribution in coastal streams. Fish would be captured by backpack electrofishing, beach seine, minnow traps, and weirs, and they would be observed during snorkel and spawning ground surveys. Some fish would be anesthetized, measured, weighed, tagged, and tissue sampled for genetic information. The researchers do not expect to kill any listed salmonids but a small number may die as an unintended result of the research activities. This research would benefit listed species by providing data to assess restoration projects and direct future habitat restoration needs.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of section 10(a) of the ESA and Federal regulations.

The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: December 19, 2016.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; St. George Reef Lighthouse Restoration, Maintenance, and Tour Operations at Northwest Seal Rock, Del Norte County, California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization; request for comments.

SUMMARY: NMFS has received an application from the St. George Reef Lighthouse Preservation Society (Society), for an Incidental Harassment Authorization (IHA) to take marine mammals, by harassment incidental to conducting aircraft operations, lighthouse renovation, light maintenance activities, and tour operations on the St. George Reef Lighthouse Station on Northwest Seal Rock (NWSR) in the northeast Pacific Ocean. The proposed dates for this action would be February 19, 2017 through February 18, 2018. Pursuant to the Marine Mammal Protection Act, NMFS is requesting comments on its proposal to issue an IHA to the Society to incidentally take, by Level B harassment only, marine mammals during the specified activity.

DATES: NMFS must receive comments and information on or before January 23, 2017.

ADDRESSES: Comments on the application should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. The mailbox address for providing email comments is *ITP.McCue@noaa.gov.* Comments sent via email to *ITP.McCue@noaa.gov,* including all attachments, must not exceed a 25-megabyte file size.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other to addresses or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will post them for public viewing to *http://www.nmfs.noaa.gov/pr/permits/incidental/research.htm* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter is publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

An electronic copy of the application may be obtained by writing to the address specified above, telephoning the contact listed below (see **FOR FURTHER INFORMATION CONTACT**), or visiting the Internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental/research.htm.*

The Environmental Assessment (EA) specific to conducting aircraft operations, restoration, and maintenance work on the lighthouse is also available at the same internet address. Information in the EA and this notice collectively provide the environmental information related to the proposed issuance of the IHA for public review and comment. The public may also view documents cited in this notice, by appointment, during regular business hours, at the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Laura McCue, NMFS, Office of Protected Resources, NMFS (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals of a species or population stock, by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined ''negligible impact'' in 50 CFR 216.103 as ''an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.''

Summary of Request

On October 14, 2016, NMFS received an application from the Society for the taking of marine mammals incidental to restoration, maintenance, and tour operations at St. George Reef Lighthouse (Station) located on Northwest Seal Rock offshore of Crescent City, California in the northeast Pacific Ocean. NMFS determined the application complete and adequate on December 12, 2016.

The Society proposes to conduct aircraft operations, lighthouse renovation, and periodic maintenance on the Station's optical light system on a monthly basis. The proposed activity would occur on a monthly basis over one weekend, November through April. The Society currently has an IHA that is valid through February 18, 2017. This IHA would start on February 19, 2017, to avoid a lapse in authorization, and would be valid for one year. The following specific aspects of the proposed activities would likely to result in the take of marine mammals: Acoustic and visual stimuli from (1) helicopter landings/takeoffs; (2) noise generated during restoration activities (*e.g.,* painting, plastering, welding, and glazing); (3) maintenance activities (*e.g.,* bulb replacement and automation of the light system); and (4) human presence. Thus, NMFS anticipates that take, by Level B harassment only, of California sea lions (*Zalophus californianus*); Pacific harbor seals (*Phoca vitulina*); Steller sea lions (*Eumetopias jubatus*) of the eastern U.S. Stock; and northern fur seals (*Callorhinus ursinus*) could result from the specified activity.

Description of the Specified Activity

Overview

To date, NMFS has issued five IHAs to the Society for the conduct of the same activities from 2010 to 2016 (75 FR 4774, January 29, 2010; 76 FR 10564, February 25, 2011; 77 FR 8811, February 15, 2012; 79 FR 6179, February 3, 2014; and 81 FR 9440, February 23, 2016). This is the Society's sixth request for an annual IHA as their current IHA will expire on February 18, 2017.

The Station, listed in the National Park Service's National Register of Historic Places, is located on NWSR offshore of Crescent City, California in the northeast Pacific Ocean. The Station, built in 1892, rises 45.7 meters (m) (150 feet (ft)) above sea level. The structure consists of hundreds of granite blocks topped with a cast iron lantern room and covers much of the surface of the islet. The purpose of the project is to restore the lighthouse, to conduct tours, and to conduct annual and emergency maintenance on the Station's optical light system.

Dates and Duration

The Society proposes to conduct the activities (aircraft operations, lighthouse restoration, and maintenance activities) at a maximum frequency of one session per month. The proposed duration for each session would last no more than three days (*e.g.,* Friday, Saturday, and Sunday). The proposed IHA, if issued, would be effective from February 19, 2017 through February 18, 2018 with restrictions on the Society conducting activities from May 1, 2017 to October 31, 2017. NMFS refers the reader to the *Detailed Description of Activities* section later in this notice for more information on the scope of the proposed activities.

Specified Geographic Region

The Station is located on a small, rocky islet (41°50′24″ N., 124°22′06″ W.) approximately 9 kilometers (km) (6.0 miles (mi)) in the northeast Pacific Ocean, offshore of Crescent City, California (41°46′48″ N.; 124°14′11″ W.). NWSR is approximately 91.4 meters (m) (300 feet (ft)) in diameter that peaks at 5.18 m (17 ft) above mean sea level.

Detailed Description of Activities

Aircraft Operations

Because NWSR has no safe landing area for boats, the proposed restoration activities would require the Society to transport personnel and equipment from the California mainland to NWSR by a small helicopter. Helicopter landings take place on top of the engine room (caisson) which is approximately 15 m (48 ft) above the surface of the rocks on NWSR. The landing zone has been relocated nearer the edge of the caisson, increasing the distance of the rotor from the lighthouse tower by the required footage. The Society plans to charter a Raven R44 helicopter, owned and operated by Air Shasta Rotor and Wing, LLC. The Raven R44, which seats three passengers and one pilot, is a compact-sized (1134 kilograms (kg), 2500 pounds (lbs)) helicopter with two-bladed main and tail rotors. Both sets of rotors are fitted with noise-attenuating blade tip caps that would decrease flyover noise.

The Society proposes to transport no more than 15 work crew members and equipment to NWSR for each session and estimates that each session would require no more than 34 helicopter landings/takeoffs per month (see below for number per day). During landing, the helicopter would land on the caisson to allow the work crew members to disembark and retrieve their equipment located in a basket attached to the underside of the helicopter. The helicopter would then return to the mainland to pick up additional personnel and equipment.

Proposed schedule: The Society would conduct a maximum of 16 flights (8 arrivals and eight departures) for the first day. The first flight would depart from Crescent City Airport at approximately 9 a.m. for a 6-minute flight to NWSR. The helicopter would land and takeoff immediately after offloading personnel and equipment every 20 minutes (min). The total duration of the first day's aerial operations could last for approximately three hours (hrs) and 26 min and would end at approximately 12:34 p.m. Crew members would remain overnight at the Station and would not return to the mainland on the first day.

For the second day, the Society would conduct a maximum of 10 flights (five arrivals and five departures) to transport additional materials on and off the islet,

if needed. The first flight would depart from Crescent City Airport at 9 a.m. for a 6-min flight to NWSR. The total duration of the second day's aerial operations could last up to three hrs. Second-day operations are only conducted if needed; flights on the second day do not normally occur.

For the final day of operations, the Society could conduct a maximum of eight helicopter flights (four arrivals and four departures) to transport the remaining crew members and equipment/material back to the Crescent City Airport. The total duration of the third day's helicopter operations in support of restoration could last up to two hrs and 14 min.

Lighthouse Restoration Activities

Restoration and maintenance activities would involve the removal of peeling paint and plaster, restoration of interior plaster and paint, refurbishing structural and decorative metal, reworking original metal support beams throughout the lantern room and elsewhere, replacing glass as necessary, upgrading the present electrical system; and annual light beacon maintenance.

Emergency Light Maintenance

If the beacon light fails, the Society proposes to send a crew of two to three people to the Station by helicopter to repair the beacon light. For each emergency repair event, the Society proposes to conduct a maximum of four flights (two arrivals and two departures) to transport equipment and supplies. The helicopter may remain on site or transit back to shore and make a second landing to pick up the repair personnel.

In the case of an emergency repair between May 1, 2016, and October 31, 2016, the Society would consult with the NMFS' Westcoast Regional Office (WRO) biologists to best determine the timing of the trips to the lighthouse, on a case-by-case basis, based upon the existing environmental conditions and the abundance and distribution of any marine mammals present on NWSR. The regional biologists would have real-time knowledge regarding the animal use and abundance of the NWSR at the time of the repair request and would make a decision regarding when the Society could conduct trips to the lighthouse during the emergency repair time window that would have the least practicable adverse impact to marine mammals. The WRO biologists would also ensure that the Society's request for incidental take during emergency repairs would not exceed the number of incidental take authorized in the proposed IHA.

Sound Sources and Sound Characteristics

NMFS expects that acoustic stimuli resulting from the proposed helicopter operations; noise from maintenance and restoration activities; and human presence have the potential to harass marine mammals, incidental to the conduct of the proposed activities.

This section includes a brief explanation of the sound measurements frequently used in the discussions of acoustic effects in this notice. Sound pressure is the sound force per unit area, and is usually measured in micropascals (μPa), where 1 pascal (Pa) is the pressure resulting from a force of one newton exerted over an area of one square meter. Sound pressure level (SPL) is the ratio of a measured sound pressure and a reference level. The commonly used reference pressure is 1 μPa for under water, and the units for SPLs are dB re: 1 μPa. The commonly used reference pressure is 20 μPa for in air, and the units for SPLs are dB re: 20 μPa.

SPL (in decibels (dB)) = 20 log (pressure/reference pressure).

SPL is an instantaneous measurement expressed as the peak, the peak-peak, or the root mean square (rms). Root mean square is the square root of the arithmetic average of the squared instantaneous pressure values. All references to SPL in this document refer to the rms unless otherwise noted. SPL does not take into account the duration of a sound.

R44 Helicopter Sound Characteristics

Noise testing performed on the R44 Raven Helicopter, as required for Federal Aviation Administration approval, required an overflight at 150 m (492 ft) above ground level, 109 knots and a maximum gross weight of 1,134 kg (2,500 lbs). The noise levels measured on the ground at this distance and speed were 81.9 dB re: 20 μPa (A-weighted) for the model R44 Raven I, or 81.0 dB re: 20 μPa (A-weighted) for the model R44 Raven II (NMFS, 2007).

Based on this information, we expect that the received sound levels at the landing area on the Station's caisson would increase above 81–81.9 dB re: 20 μPa (A-weighted).

Restoration and Maintenance Sound Characteristics

Any noise associated with these activities is likely to be from light construction (*e.g.,* sanding, hammering, or use of hand drills). The Society proposes to confine all restoration activities to the existing structure which would occur on the upper levels of the Station. Pinnipeds hauled out on NWSR do not have access to the upper levels of the Station.

Description of Marine Mammals in the Area of the Specified Activity

Table 1 provides the following information: All marine mammal species with possible or confirmed occurrence in the proposed activity area; information on those species' regulatory status under the MMPA and the Endangered Species Act (ESA) of 1973 (16 U.S.C. 1531 *et seq.*); abundance; occurrence and seasonality in the activity area. NMFS refers the public the draft 2016 NMFS Marine Mammal Stock Assessment Report available online at: *http://www.nmfs.noaa.gov/pr/sars/* for further information on the biology and distribution of these species.

TABLE 1—GENERAL INFORMATION ON MARINE MAMMALS THAT COULD POTENTIALLY HAUL OUT ON NORTHWEST SEAL ROCK, NOVEMBER 2015 THROUGH NOVEMBER 2016

Species	Stock	Regulatory status [1 2]	Stock abundance (CV, N_{min}, most recent abundance survey) [3]	PBR	Occurrence and seasonality
California sea lion (*Zalophus californianus*).	U.S.	MMPA—NC ESA—NL.	296,750 (n/a; 153,337; 2011) ...	9,200	Year-round presence.
Steller sea lion (*Eumetopias jubatus*).	Eastern Distinct Population Segment.	MMPA—D ESA—DL	60,131–74,448 (n/a; 36,551; 2013).	1,645	Year-round presence.
Pacific harbor seal (*Phoca vitulina*).	California	MMPA—NC ESA—NL.	30,968 (n/a; 27,348; 2012)	1,641	Occasional, spring.

[3] 2016 draft NMFS Stock Assessment Reports: Carretta *et al.* (2015) and Muto *et al.* (2015).

Eastern Distinct Population Segment of Steller Sea Lions

Steller sea lions consist of two distinct population segments: The western and eastern distinct population segments (eDPS and wDPS, respectively) divided at 144° West longitude (Cape Suckling, Alaska). The western segment of Steller sea lions inhabit central and western Gulf of Alaska, Aleutian Islands, as well as coastal waters and breed in Asia (*e.g.,* Japan and Russia). The eastern segment includes sea lions living in southeast Alaska, British Columbia, California, and Oregon. The eDPS includes animals born east of Cape Suckling, AK (144° W) and the latest abundance estimate for the stock is 60,131 to 74,448 animals, with PBR at 1,645 animals (Muto *et al.,* 2015).

Steller sea lions range along the North Pacific Rim from northern Japan to California (Loughlin *et al.,* 1984), with centers of abundance and distribution in the Gulf of Alaska and Aleutian Islands, respectively. The species is not known to migrate, but individuals disperse widely outside of the breeding season (late May through early July), thus potentially intermixing with animals from other areas.

The eDPS of Steller sea lions breeds on rookeries located in southeast Alaska, British Columbia, Oregon, and California. There are no rookeries located in Washington State. Steller sea lions give birth in May through July and breeding commences a couple of weeks after birth. Pups are weaned during the winter and spring of the following year.

Despite the wide-ranging movements of juveniles and adult males in particular, exchange between rookeries by breeding adult females and males (other than between adjoining rookeries) appears low, although males have a higher tendency to disperse than females (Trujillo *et al.,* 2004; Hoffman *et al.,* 2006). A northward shift in the overall breeding distribution has occurred, with a contraction of the range in southern California and new rookeries established in southeastern Alaska (Pitcher *et al.,* 2007). Overall, counts of non-pups at trend sites in California and Oregon have been relatively stable or increasing slowly since the 1980s (Allen and Angliss 2012).

Steller sea lion numbers at NWSR ranged from 20 to 355 animals (CCR 2001). Counts of Steller sea lions during the spring (April–May), summer (June–August), and fall (September–October), averaged 68, 110, and 56, respectively (CCR 2001). A multi-year survey at NWSR between 2000 and 2004 showed Steller sea lion numbers ranging from 175 to 354 in July (M. Lowry, NMFS/SWFSC, unpubl. data). The Society presumes that winter use of NWSR by Steller sea lion to be minimal, due to inundation of the natural portion of the island by large swells.

For the 2010 season, the Society reported that no Steller sea lions were present in the vicinity of NWSR during restoration activities (SGRLPS 2010). Based on the monitoring report for the 2011 season, the maximum numbers of Steller sea lions present during the April and November 2011, work sessions was 2 and 150 animals, respectively (SGRLPS 2012). During the 2012 season, the Society did not observe any Steller sea lions present on NWSR during restoration activities. The Society did not conduct any operations for the 2013–2014, 2014–2015, and 2015–2016 seasons.

California Sea Lion

The estimated population of the U.S. stock of California sea lion is approximately 296,750 animals, with PBR at 9,200 individuals, and the current maximum population growth rate is 12 percent (Carretta *et al.,* 2015).

California sea lion breeding areas are on islands located in southern California, in western Baja California, Mexico, and the Gulf of California. During the breeding season, most California sea lions inhabit southern California and Mexico. Rookery sites in southern California are limited to the San Miguel Islands and the southerly Channel Islands of San Nicolas, Santa Barbara, and San Clemente (Carretta *et al.,* 2015). Males establish breeding territories during May through July on both land and in the water. Females come ashore in mid-May and June where they give birth to a single pup approximately four to five days after arrival and will nurse pups for about a week before going on their first feeding trip. Females will alternate feeding trips with nursing bouts until weaning between four and 10 months of age (Allen and Angliss 2010).

Adult and juvenile males will migrate as far north as British Columbia, Canada while females and pups remain in southern California waters in the non-breeding season. In warm water (El Niño) years, some females range as far north as Washington and Oregon, presumably following prey.

Crescent Coastal Research (CCR) conducted a three-year (1998–2000) survey of the wildlife species on NWSR for the Society. They reported that counts of California sea lions on NWSR varied greatly (from 6 to 541) during the observation period from April 1997 through July 2000. CCR reported that counts for California sea lions during the spring (April–May), summer (June–August), and fall (September–October), averaged 60, 154, and 235, respectively (CCR 2001).

The most current counts for the month of July by NMFS (2000 through 2004) have been relatively low as the total number of California sea lions recorded in 2000 and 2003 was three and 11, respectively (M. Lowry, NMFS, SWFSC, unpublished data). Based on the monitoring report for the 2011 season, the maximum numbers of California sea lions present during the April and November, 2011 work sessions was 2 and 160 animals, respectively (SGRLPS 2012). There were no California sea lions present during the March, 2012 work session (SGRLPS 2012).

Northern Fur Seal

Northern fur seals occur from southern California north to the Bering Sea and west to the Sea of Okhotsk and Honshu Island of Japan. NMFS

recognizes two separate stocks of northern fur seals within U.S. waters: An Eastern Pacific stock distributed among sites in Alaska, British Columbia; and a California stock (including San Miguel Island and the Farallon Islands). The estimated population of the California stock is 14,050 animals with PBR at 451 animals (Carretta *et al.,* 2015).

Northern fur seals breed in Alaska and migrate along the west coast during fall and winter. Due to their pelagic habitat, they are rarely seen from shore in the continental United States, but individuals occasionally come ashore on islands well offshore (*i.e.,* Farallon Islands and Channel Islands in California). During the breeding season, approximately 45 percent of the worldwide population inhabits the Pribilof Islands in the Southern Bering Sea, with the remaining animals spread throughout the North Pacific Ocean (Caretta *et al.,* 2015).

CCR observed one male northern fur seal on Northwest Seal Rock in October, 1998 (CCR 2001). It is possible that a few animals may use the island more often than indicated by the CCR surveys, if they were mistaken for other otariid species (*i.e.,* eared seals or fur seals and sea lions) (M. DeAngelis, NMFS, pers. comm., 2007).

For the 2010, 2011, and 2012 work seasons, the Society did not observe any Northern fur seals present on NWSR during restoration activities (SGRLPS 2010; 2011; 2012).

Pacific Harbor Seal

Harbor seals are widely distributed in the North Atlantic and North Pacific. Two subspecies exist in the Pacific: *Phoca vitulina stejnegeri* in the western North Pacific, near Japan, and *P. v. richardii* in the eastern North Pacific. The latter subspecies inhabits coastal and estuarine areas from Mexico to Alaska (Carretta *et al.,* 2014) and is the only stock present in the action area. Previous assessments of the status of harbor seals have recognized three stocks along the west coast of the continental U.S.: (1) California, (2) Oregon and Washington outer coast waters, and (3) inland waters of Washington; however, the exact placement of the boundary was arbitrary. The estimated population of the California stock of Pacific harbor seals is approximately 30,968 animals, with PBR at 1,641 animals (Carretta *et al.,* 2015).

In California, over 500 harbor seal haul out sites are widely distributed along the mainland and offshore islands, and include rocky shores, beaches and intertidal sandbars (Lowry *et al.,* 2005). Harbor seals mate at sea and females give birth during the spring and summer, although, the pupping season varies with latitude. Females nurse their pups for an average of 24 days and pups are ready to swim minutes after being born. Harbor seal pupping takes place at many locations and rookery size varies from a few pups to many hundreds of pups. The nearest harbor seal rookery relative to the proposed project site is at Castle Rock National Wildlife Refuge, located approximately located 965 m (0.6 mi) south of Point St. George, and 2.4 km (1.5 mi) north of the Crescent City Harbor in Del Norte County, California (USFWS, 2007).

CCR noted that harbor seal use of NWSR was minimal, with only one sighting of a group of 6 animals, during 20 observation surveys. They hypothesized that harbor seals may avoid the islet because of its distance from shore, relatively steep topography, and full exposure to rough and frequently turbulent sea swells. For the 2010 and 2011 seasons, the Society did not observe any Pacific harbor seals present on NWSR during restoration activities (SGRLPS 2010; 2011). During the 2012 season, the Society reported sighting a total of two harbor seals present on NWSR (SGRLPS 2012).

Other Marine Mammals in the Proposed Action Area

California (southern) sea otters (*Enhydra lutris nereis*), listed as threatened under the ESA and categorized as depleted under the MMPA, usually range in coastal waters within 2 km (1.2 mi) of the mainland shoreline. Neither CCR nor the Society has encountered California sea otters on NWSR during the course of the four-year wildlife study (CCR 2001; SGRLPS 2010; 2011; 2012) nor has the Society encountered this species during the course of the previous five IHAs. The U.S. Fish and Wildlife Service (USFWS) manages the sea otter and NMFS will not consider this species further in this notice.

Potential Effects of the Specified Activities on Marine Mammals and Their Habitat

This section includes a summary and discussion of the ways that components (*e.g.,* personnel presence) of the specified activity, including mitigation, may impact marine mammals and their habitat. The *Estimated Take by Incidental Harassment* section later in this document will include a quantitative analysis of the number of individuals that are expected to be taken during this activity. The *Negligible Impact Analysis* section will include the analysis of how this specific activity would impact marine mammals and will consider the content of this section, the *Estimated Take by Incidental Harassment* section, and the *Proposed Mitigation* section to draw conclusions regarding the likely impacts of this activity on the reproductive success or survivorship of individuals and from that consideration, the likely impacts of this activity on the affected marine mammal populations or stocks.

Acoustic and visual stimuli generated by: (1) Helicopter landings/takeoffs; (2) restoration activities (*e.g.,* painting, plastering, welding, and glazing); (3) maintenance activities (*e.g.,* bulb replacement and automation of the light system); and (4) human presence may have the potential to cause behavioral disturbance.

Aircraft Presence and Noise

Pinnipeds have the potential to be disturbed by airborne and underwater noise generated by the engine of the aircraft (Born *et al.,* 1999; Richardson *et al.,* 1995). Data on underwater TTS-onset in pinnipeds exposed to pulses are limited to a single study which exposed two California sea lions to single underwater pulses from an arc-gap transducer and found no measurable TTS following exposures up to 183 dB re: 1 µPa (peak-to-peak) (Finneran *et al.,* 2003).

Researchers have demonstrated temporary threshold shift (TTS) in certain captive odontocetes and pinnipeds exposed to strong sounds (reviewed in Southall *et al.,* 2007). In 2004, researchers measured auditory fatigue to airborne sound in harbor seals, California sea lions, and Northern elephant seals after exposure to non-pulse noise for 25 minutes (Kastak *et al.,* 2004). In the study, the harbor seal experienced approximately 6 dB of temporary threshold shift (TTS) at 99 dB re: 20 µPa. The authors identified onset of TTS in the California sea lion at 122 dB re: 20 µPa. The northern elephant seal experienced TTS-onset at 121 dB re: 20 µPa (Kastak *et al.,* 2004).

There is a dearth of information on acoustic effects of helicopter overflights on pinniped hearing and communication (Richardson *et al.,* 1995) and to NMFS' knowledge, there has been no specific documentation of TTS, let alone permanent threshold shift (PTS), in free-ranging pinnipeds exposed to helicopter operations during realistic field conditions (Baker *et al.,* 2012; Scheidat *et al.,* 2011).

In 2008, NMFS issued an IHA to the USFWS for the take of small numbers of Steller sea lions and Pacific harbor

seals, incidental to rodent eradication activities on an islet offshore of Rat Island, AK, conducted by helicopter. The 15-minute aerial treatment consisted of the helicopter slowly approaching the islet at an elevation of over 1,000 ft (304.8 m); gradually decreasing altitude in slow circles; and applying the rodenticide in a single pass and returning to Rat Island. The gradual and deliberate approach to the islet resulted in the sea lions present initially becoming aware of the helicopter and calmly moving into the water. Further, the USFWS reported that all responses fell well within the range of Level B harassment (*i.e.,* limited, short-term displacement resulting from aircraft noise due to helicopter overflights).

As a general statement from the available information, pinnipeds exposed to intense (approximately 110 to 120 dB re: 20 μPa) non-pulse sounds often leave haul out areas and seek refuge temporarily (minutes to a few hours) in the water (Southall *et al.,* 2007). Per Richardson *et al.* (1995), approaching aircraft generally flush animals into the water and noise from a helicopter is typically directed down in a ''cone'' underneath the aircraft.

It is likely that the initial helicopter approach to NWSR would cause a subset, or all of the marine mammals hauled out to depart the rock and flush into the water. The physical presence of aircraft could also lead to non-auditory effects on marine mammals involving visual or other cues. Airborne sound from a low-flying helicopter or airplane may be heard by marine mammals while at the surface or underwater. In general, helicopters tend to be noisier than fixed wing aircraft of similar size and underwater sounds from aircraft are strongest just below the surface and directly under the aircraft. Noise from aircraft would not be expected to cause direct physical effects, but have the potential to affect behavior. The primary factor that may influence abrupt movements of animals is engine noise, specifically changes in engine noise. Responses by mammals could include hasty dives or turns, change in course, or flushing and stampeding from a haul out site. There are few well documented studies of the impacts of aircraft overflight over pinniped haul out sites or rookeries, and many of those that exist, are specific to military activities (Efroymson *et al.,* 2001).

Several factors complicate the analysis of long- and short-term effects for aircraft overflights. Information on behavioral effects of overflights by military aircraft (or component stressors) on most wildlife species is sparse. Moreover, models that relate behavioral changes to abundance or reproduction, and those that relate behavioral or hearing effects thresholds from one population to another are generally not available. In addition, the aggregation of sound frequencies, durations, and the view of the aircraft into a single exposure metric is not always the best predictor of effects and it may also be difficult to calculate. Overall, there has been no indication that single or occasional aircraft flying above pinnipeds in water cause long term displacement of these animals (Richardson *et al.,* 1995). The Lowest Observed Adverse Effects Levels (LOAEL) are rather variable for pinnipeds on land, ranging from just over 150 m (492 ft) to about 2,000 m (6,562 ft) (Efroymson *et al.,* 2001). A conservative (90th percentile) distance effects level is 1,150 m (3,773 ft). Most thresholds represent movement away from the overflight. Bowles and Stewart (1980) estimated an LOAEL of 305 m (1,000 ft) for helicopters (low and landing) in California sea lions and harbor seals observed on San Miguel Island, CA; animals responded to some degree by moving within the haul out and entering into the water, stampeding into the water, or clearing the haul out completely. Both species always responded with the raising of their heads. California sea lions appeared to react more to the visual cue of the helicopter than the noise.

If pinnipeds are present on NWSR, it is likely that a helicopter landing at the Station would cause some number of the pinnipeds on NWSR to flush; however, when present, they appear to show rapid habituation to helicopter landing and departure (CCR, 2001; Guy Towers, SGRLPS, *pers.com.*). According to the CCR Report (2001), while up to 40 percent of the California and Steller sea lions present on NWSR have been observed to enter the water on the first of a series of helicopter landings, as few as zero percent have flushed on subsequent landings on the same date. In fact, the Society reported that during the November 2011 work session, Steller sea lions and California sea lions exhibited minimal ingress and egress from NWSR during helicopter approaches and departures (SGRLPS, 2011).

Human Presence

The appearance of Society personnel may have the potential to cause Level B harassment of marine mammals hauled out on the small island in the proposed action area. Disturbance includes a variety of effects, including subtle to conspicuous changes in behavior, movement, and displacement. Disturbance may result in reactions ranging from an animal simply becoming alert to the presence of the Society's restoration personnel (*e.g.,* turning the head, assuming a more upright posture) to flushing from the haul out site into the water. NMFS does not consider the lesser reactions to constitute behavioral harassment, or Level B harassment takes, but rather assumes that pinnipeds that move greater than two body lengths to longer retreats over the beach, or if already moving, a change of direction of greater than 90 degrees in response to the presence of surveyors, or pinnipeds that flush into the water, are behaviorally harassed, and thus subject to Level B taking. NMFS uses a 3-point scale (Table 2) to determine which disturbance reactions constitute take under the MMPA. Levels two and three (movement and flush) are considered take, whereas level one (alert) is not. Animals that respond to the presence of the Society's restoration personnel by becoming alert, but do not move or change the nature of locomotion as described, are not considered to have been subject to behavioral harassment.

TABLE 2—DISTURBANCE SCALE OF PINNIPED RESPONSES TO IN-AIR SOURCES TO DETERMINE TAKE

Level	Type of response	Definition
1	Alert	Seal head orientation or brief movement in response to disturbance, which may include turning head towards the disturbance, craning head and neck while holding the body rigid in a u-shaped position, changing from a lying to a sitting position, or brief movement of less than twice the animal's body length.
2*	Movement	Movements in response to the source of disturbance, ranging from short withdrawals at least twice the animal's body length to longer retreats over the beach, or if already moving a change of direction of greater than 90 degrees.

TABLE 2—DISTURBANCE SCALE OF PINNIPED RESPONSES TO IN-AIR SOURCES TO DETERMINE TAKE—Continued

Level	Type of response	Definition
3*	Flush	All retreats (flushes) to the water.

*Only Levels 2 and 3 are considered take, whereas Level 1 is not.

Reactions to human presence, if any, depend on species, state of maturity, experience, current activity, reproductive state, time of day, and many other factors (Richardson *et al.,* 1995; Southall *et al.,* 2007; Weilgart 2007). These behavioral reactions from marine mammals are often shown as: Changing durations of surfacing and dives, number of blows per surfacing, or moving direction and/or speed; reduced/increased vocal activities; changing/cessation of certain behavioral activities (such as socializing or feeding); visible startle response or aggressive behavior; avoidance of areas; and/or flight responses (*e.g.,* pinnipeds flushing into the water from haul outs or rookeries). If a marine mammal does react briefly to human presence by changing its behavior or moving a small distance, the impacts of the change are unlikely to be significant to the individual, let alone the stock or population. However, if visual stimuli from human presence displaces marine mammals from an important feeding or breeding area for a prolonged period, impacts on individuals and populations could be significant (*e.g.,* Lusseau and Bejder 2007; Weilgart, 2007).

Disturbances resulting from human activity can impact short- and long-term pinniped haul out behavior (Renouf *et al.,* 1981; Schneider and Payne, 1983; Terhune and Almon, 1983; Allen *et al.,* 1984; Stewart, 1984; Suryan and Harvey, 1999; and Kucey and Trites, 2006). Numerous studies have shown that human activity can flush harbor seals off haul out sites (Allen *et al.,* 1984; Calambokidis *et al.,* 1991; Suryan and Harvey 1999; and Mortenson *et al.,* 2000) or lead Hawaiian monk seals (*Neomonachus schauinslandi*) to avoid beaches (Kenyon 1972). In one case, human disturbance appeared to cause Steller sea lions to desert a breeding area at Northeast Point on St. Paul Island, Alaska (Kenyon 1962).

In cases where vessels actively approached marine mammals (*e.g.,* whale watching or dolphin watching boats), scientists have documented that animals exhibit altered behavior such as increased swimming speed, erratic movement, and active avoidance behavior (Acevedo, 1991; Trites and Bain, 2000; Williams *et al.,* 2002; Constantine *et al.,* 2003), reduced blow interval (Richter *et al.,* 2003), disruption of normal social behaviors (Lusseau 2003; 2006), and the shift of behavioral activities which may increase energetic costs (Constantine *et al.,* 2003; 2004).

In 1997, Henry and Hammil (2001) conducted a study to measure the impacts of small boats (*i.e.,* kayaks, canoes, motorboats and sailboats) on harbor seal haul out behavior in Metis Bay, Quebec, Canada. During that study, the authors noted that the most frequent disturbances (n=73) were caused by lower speed, lingering kayaks, and canoes (33.3 percent) as opposed to motorboats (27.8 percent) conducting high speed passes. The seal's flight reactions could be linked to a surprise factor by kayaks and canoes which approach slowly, quietly, and low on the water making them look like predators. However, the authors note that once the animals were disturbed, there did not appear to be any significant lingering effect on the recovery of numbers to their pre-disturbance levels. In conclusion, the study showed that boat traffic at current levels has only a temporary effect on the haul out behavior of harbor seals in the Metis Bay area.

In 2004, Acevedo-Gutierrez and Johnson (2007) evaluated the efficacy of buffer zones for watercraft around harbor seal haul out sites on Yellow Island, Washington. The authors estimated the minimum distance between the vessels and the haul out sites; categorized the vessel types; and evaluated seal responses to the disturbances. During the course of the seven-weekend study, the authors recorded 14 human-related disturbances which were associated with stopped powerboats and kayaks. During these events, hauled out seals became noticeably active and moved into the water. The flushing occurred when stopped kayaks and powerboats were at distances as far as 453 and 1,217 ft (138 and 371 m) respectively. The authors note that the seals were unaffected by passing powerboats, even those approaching as close as 128 ft (39 m), possibly indicating that the animals had become tolerant of the brief presence of the vessels and ignored them. The authors reported that on average, the seals quickly recovered from the disturbances and returned to the haul out site in less than or equal to 60 minutes. Seal numbers did not return to pre-disturbance levels within 180 minutes of the disturbance less than one quarter of the time observed. The study concluded that the return of seal numbers to pre-disturbance levels and the relatively regular seasonal cycle in abundance throughout the area counter the idea that disturbances from powerboats may result in site abandonment (Johnson and Acevedo-Gutierrez, 2007). As a general statement from the available information, pinnipeds exposed to intense (approximately 110 to 120 decibels re: 20 μPa) non-pulsed sounds often leave haul out areas and seek refuge temporarily (minutes to a few hours) in the water (Southall *et al.,* 2007).

Stampede

There are other ways in which disturbance, as described previously, could result in more than Level B harassment of marine mammals. They are most likely to be consequences of stampeding, a potentially dangerous occurrence in which large numbers of animals succumb to mass panic and rush away from a stimulus. These situations are: (1) Falling when entering the water at high-relief locations; (2) extended separation of mothers and pups; and (3) crushing of pups by large males during a stampede. However, NMFS does not expect any of these scenarios to occur at NWSR. There is the risk of injury if animals stampede towards shorelines with precipitous relief (*e.g.,* cliffs). However, there are no cliffs on NWSR. The haul out sites consist of ridges with unimpeded and non-obstructive access to the water. If disturbed, the small number of hauled-out adult animals may move toward the water without risk of encountering barriers or hazards that would otherwise prevent them from leaving the area. Moreover, the proposed area would not be crowded with large numbers of Steller sea lions, further eliminating the possibility of potentially injurious mass movements of animals attempting to vacate the haul out. Thus, in this case, NMFS considers the risk of injury, serious injury, or death to hauled-out animals as very low.

Anticipated Effects on Marine Mammal Habitat

The only habitat modification associated with the proposed activity is

the restoration of a light station which would occur on the upper levels of Northwest Seal Rock which are not used by marine mammals. Thus, NMFS does not expect that the proposed activity would have any effects on marine mammal habitat and NMFS expects that there will be no long- or short-term physical impacts to pinniped habitat on NWSR.

The Society would remove all waste, discarded materials and equipment from the island after each visit. The proposed activities will not result in any permanent impact on habitats used by marine mammals, including prey species and foraging habitat. The main impact associated with the proposed activity will be temporarily elevated noise levels and the associated direct effects on marine mammals (*i.e.,* the potential for temporary abandonment of the site), previously discussed in this notice.

NMFS does not anticipate that the proposed restoration activities would result in any permanent effects on the habitats used by the marine mammals in the proposed area, including the food sources they use (*i.e.,* fish and invertebrates). Based on the preceding discussion, NMFS does not anticipate that the proposed activity would have any habitat-related effects that could cause significant or long-term consequences for individual marine mammals or their populations.

Proposed Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, ''and other means of effecting the least practicable impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking'' for certain subsistence uses. NMFS regulations require applicants for incidental take authorizations to include information about the availability and feasibility (economic and technological) of equipment, methods, and manner of conducting such activity or other means of effecting the least practicable adverse impact upon the affected species or stocks, their habitat (50 CFR 216.104(a)(11)).

Time and Frequency: The Society would conduct restoration activities at maximum of once per month over the course of the year, with the exception of between May 1, 2017 through October 31, 2017. Each restoration session would last no more than three days. Maintenance of the light beacon would occur only in conjunction with restoration activities.

Helicopter Approach and Timing Techniques: The Society would ensure that its helicopter approach patterns to the Station and timing techniques would be conducted at times when marine mammals are less likely to be disturbed. To the extent possible, the helicopter should approach NWSR when the tide is too high for the marine mammals to haul out on NWSR. Additionally, since the most severe impacts (stampede) precede rapid and direct helicopter approaches, the Society's initial approach to the Station must be offshore from the island at a relatively high altitude (*e.g.,* 800–1,000 ft, or 244–305 m). Before the final approach, the helicopter shall circle lower, and approach from area with the lowest pinniped density. If for any safety reasons (*e.g.,* wind condition) the Society cannot conduct these types of helicopter approach and timing techniques, they must postpone the restoration and maintenance activities for that day.

Avoidance of Visual and Acoustic Contact with People on Island: The Society would instruct its members and restoration crews to avoid making unnecessary noise and not expose themselves visually to pinnipeds around the base of the Station. Although CCR reported no impacts from these activities in the 2001 CCR study, it is relatively simple for the Society to avoid this potential impact. The door to the lower platform shall remain closed and barricaded to all tourists and other personnel since the lower platform is used at times by pinnipeds.

Mitigation Conclusions

NMFS has carefully evaluated the Society's proposed mitigation measures in the context of ensuring that we prescribe the means of affecting the least practicable impact on the affected marine mammal species and stocks and their habitat. The evaluation of potential measures included consideration of the following factors in relation to one another:

- The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals;
- The proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and
- The practicability of the measure for applicant implementation.

Any mitigation measure(s) prescribed by NMFS should be able to accomplish, have a reasonable likelihood of accomplishing (based on current science), or contribute to the accomplishment of one or more of the general goals listed here:

1. Avoidance or minimization of injury or death of marine mammals wherever possible (goals 2, 3, and 4 may contribute to this goal).
2. A reduction in the numbers of marine mammals (total number or number at biologically important time or location) exposed to vessel or visual presence that NMFS expects to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).
3. A reduction in the number of times (total number or number at biologically important time or location) individuals exposed to vessel or visual presence that NMFS expects to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).
4. A reduction in the intensity of exposures (either total number or number at biologically important time or location) to vessel or visual presence that NMFS expects to result in the take of marine mammals (this goal may contribute to a, above, or to reducing the severity of harassment takes only).
5. Avoidance or minimization of adverse effects to marine mammal habitat, paying special attention to the food base, activities that block or limit passage to or from biologically important areas, permanent destruction of habitat, or temporary destruction/disturbance of habitat during a biologically important time.
6. For monitoring directly related to mitigation—an increase in the probability of detecting marine mammals, thus allowing for more effective implementation of the mitigation.

Based on the evaluation of the Society's proposed measures, NMFS has preliminarily determined that the proposed mitigation measures provide the means of effecting the least practicable impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Proposed Monitoring

In order to issue an incidental take authorization for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth ''requirements pertaining to the monitoring and reporting of such taking.'' The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for IHAs must include the suggested means of accomplishing the necessary monitoring and reporting that will result

in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that NMFS expects to be present in the proposed action area.

The Society submitted a marine mammal monitoring plan in Section 13 of their IHA application. NMFS or the Society may modify or supplement the plan based on comments or new information received from the public during the public comment period.

Monitoring measures prescribed by NMFS should accomplish one or more of the following general goals:

1. An increase in our understanding of the likely occurrence of marine mammal species in the vicinity of the action (*i.e.,* presence, abundance, distribution, and/or density of species).

2. An increase in our understanding of the nature, scope, or context of the likely exposure of marine mammal species to any of the potential stressor(s) associated with the action (*e.g.,* sound or visual stimuli), through better understanding of one or more of the following: The action itself and its environment (*e.g.,* sound source characterization, propagation, and ambient noise levels); the affected species (*e.g.,* life history or dive pattern); the likely co-occurrence of marine mammal species with the action (in whole or part) associated with specific adverse effects; and/or the likely biological or behavioral context of exposure to the stressor for the marine mammal (*e.g.,* age class of exposed animals or known pupping, calving or feeding areas).

3. An increase in our understanding of how individual marine mammals respond (behaviorally or physiologically) to the specific stressors associated with the action (in specific contexts, where possible, *e.g.,* at what distance or received level).

4. An increase in our understanding of how anticipated individual responses, to individual stressors or anticipated combinations of stressors, may impact either: The long-term fitness and survival of an individual; or the population, species, or stock (*e.g.,* through effects on annual rates of recruitment or survival).

5. An increase in our understanding of how the activity affects marine mammal habitat, such as through effects on prey sources or acoustic habitat (*e.g.,* through characterization of longer-term contributions of multiple sound sources to rising ambient noise levels and assessment of the potential chronic effects on marine mammals).

6. An increase in understanding of the impacts of the activity on marine mammals in combination with the impacts of other anthropogenic activities or natural factors occurring in the region.

7. An increase in our understanding of the effectiveness of mitigation and monitoring measures.

8. An increase in the probability of detecting marine mammals (through improved technology or methodology), both specifically within the safety zone (thus allowing for more effective implementation of the mitigation) and in general, to better achieve the above goals.

As part of its IHA application, the Society proposes to sponsor marine mammal monitoring, in order to implement the mitigation measures that require real-time monitoring, and to satisfy the monitoring requirements of the proposed IHA. These include:

A NMFS approved, experienced biologist will be present on the first flight of each day of activity. This observer will be able to identify all species of pinnipeds expected to use the island, and qualified to determine age and sex classes when viewing conditions allow. The observer would record data including species counts, numbers of observed disturbances, and descriptions of the disturbance behaviors during the activities, including location, date, and time of the event. In addition, the Society would record observations regarding the number and species of any marine mammals either observed in the water or hauled out.

Aerial photographic surveys may provide the most accurate means of documenting species composition, age and sex class of pinnipeds using the project site during human activity periods. The Society should complete aerial photo coverage of the island from the same helicopter used to transport the Society's personnel to the island during restoration trips. The Society would take photographs of all marine mammals hauled out on the island at an altitude greater than 300 m (984 ft) by a skilled photographer, on the first flight of each day of activities. These photographs will be forwarded to a biologist capable of discerning marine mammal species. Data shall be provided to us in the form of a report with a data table, any other significant observations related to marine mammals, and a report of restoration activities (see Reporting). The original photographs can be made available to us or other marine mammal experts for inspection and further analysis.

Proposed monitoring requirements in relation to the Society's proposed activities would include species counts, numbers of observed disturbances, and descriptions of the disturbance behaviors during the restoration activities, including location, date, and time of the event. In addition, the Society would record observations regarding the number and species of any marine mammals either observed in the water or hauled out.

The Society can add to the knowledge of pinnipeds in the proposed action area by noting observations of: (1) Unusual behaviors, numbers, or distributions of pinnipeds, such that any potential follow-up research can be conducted by the appropriate personnel; (2) tag-bearing carcasses of pinnipeds, allowing transmittal of the information to appropriate agencies and personnel; and (3) rare or unusual species of marine mammals for agency follow-up.

If at any time injury, serious injury, or mortality of the species for which take is authorized should occur, or if take of any kind of any other marine mammal occurs, and such action may be a result of the Society's activities, the Society would suspend survey activities and contact NMFS immediately to determine how best to proceed to ensure that another injury or death does not occur and to ensure that the applicant remains in compliance with the MMPA.

Summary of Previous Monitoring

The Society complied with the mitigation and monitoring required under the previous authorizations (2010–2012). They did not conduct any operations for the 2013–2016 seasons. However, in compliance with the 2012 Authorization, the Society submitted a final report on the activities at the Station, covering the period of February 15, 2012 through April 30, 2012. During the effective dates of the 2012 IHA, the Society conducted one work session in March, 2012. The Society's aircraft operations and restoration activities on NWSR did not exceed the activity levels analyzed under the 2012 authorization. During the March 2012 work session, the Society observed two harbor seals hauled out on NWSR. Both animals (a juvenile and an adult) departed the rock, entered the water, and did not return to the Station during the duration of the activities.

Proposed Reporting

The Society would submit a draft report to NMFS' Office of Protected Resources no later than 90 days after the expiration of the proposed IHA, if issued. The report will include a summary of the information gathered pursuant to the monitoring requirements set forth in the proposed IHA. The Society will submit a final report to the NMFS within 30 days after

receiving comments from NMFS on the draft report. If the Society receives no comments from NMFS on the report, NMFS will consider the draft report to be the final report.

The report will describe the operations conducted and sightings of marine mammals near the proposed project. The report will provide full documentation of methods, results, and interpretation pertaining to all monitoring. The report will provide:

1. A summary and table of the dates, times, and weather during all research activities.

2. Species, number, location, and behavior of any marine mammals observed throughout all monitoring activities.

3. An estimate of the number (by species) of marine mammals exposed to human presence associated with the Society's activities.

4. A description of the implementation and effectiveness of the monitoring and mitigation measures of the IHA and full documentation of methods, results, and interpretation pertaining to all monitoring.

In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner prohibited by the authorization, such as an injury (Level A harassment), serious injury, or mortality (*e.g.,* stampede), Society personnel shall immediately cease the specified activities and immediately report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, NMFS, and the Assistant Westcoast Regional Stranding Coordinator. The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Description and location of the incident (including water depth, if applicable);
- Environmental conditions (*e.g.,* wind speed and direction, Beaufort sea state, cloud cover, and visibility);
- Description of all marine mammal observations in the 24 hours preceding the incident;
- Species identification or description of the animal(s) involved;
- Fate of the animal(s); and
- Photographs or video footage of the animal(s) (if equipment is available).

The Society shall not resume its activities until NMFS is able to review the circumstances of the prohibited take. We will work with the Society to determine what is necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. The Society may not resume their activities until notified by us via letter, email, or telephone.

In the event that the Society discovers an injured or dead marine mammal, and the marine mammal observer determines that the cause of the injury or death is unknown and the death is relatively recent (*i.e.,* in less than a moderate state of decomposition as we describe in the next paragraph), the Society will immediately report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, NMFS, and the Assistant Westcoast Regional Stranding Coordinator. The report must include the same information identified in the paragraph above this section. Activities may continue while NMFS reviews the circumstances of the incident. NMFS would work with the Society to determine whether modifications in the activities are appropriate.

In the event that the Society discovers an injured or dead marine mammal, and the lead visual observer determines that the injury or death is not associated with or related to the authorized activities (*e.g.,* previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), the Society will report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, NMFS, and the Assistant Westcoast Regional Stranding Coordinator within 24 hours of the discovery. Society personnel will provide photographs or video footage (if available) or other documentation of the stranded animal sighting to us. The Society can continue their survey activities while NMFS reviews the circumstances of the incident.

Estimated Take by Incidental Harassment

Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as: Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

All anticipated takes would be by Level B harassment, involving temporary changes in behavior. NMFS expects that the proposed mitigation and monitoring measures would minimize the possibility of injurious or lethal takes. NMFS considers the potential for take by injury, serious injury, or mortality as remote. NMFS expects that the presence of Society personnel could disturb of animals hauled out on NWSR and that the animals may alter their behavior or attempt to move away from the Society's personnel.

As discussed earlier, NMFS assumes that pinnipeds that move greater than two body lengths to longer retreats over the beach, or if already moving, a change of direction of greater than 90 degrees in response to the presence of surveyors, or pinnipeds that flush into the water, are behaviorally harassed, and thus subject to Level B taking (Table 2).

Based on the Society's previous monitoring reports, NMFS estimates that approximately 2880 California sea lions (calculated by multiplying the maximum number California sea lions present on NWSR (160) by 18 days of the restoration and maintenance activities), 2700 Steller sea lions (NMFS' estimate of the maximum number of Steller sea lions that could be present on NWSR (150) by 18 days of activity), 108 Pacific harbor seals (calculated by multiplying the maximum number of harbor seals present on NWSR (6) by 18 days), and 18 Northern fur seals (calculated by multiplying the maximum number of northern fur seals present on NWSR (1) by 18 days) could be potentially affected by Level B behavioral harassment over the course of the IHA. NMFS bases these estimates of the numbers of marine mammals that might be affected on consideration of the number of marine mammals that could be disturbed appreciably by approximately 51 hours of aircraft operations during the course of the activity. These incidental harassment take numbers represent less than one percent of the affected stocks of California sea lions, Pacific harbor seals, and Northern fur seals, and less than five percent of the stock of Steller sea lions (Table 3). However, actual take may be slightly less if animals decide to haul out at a different location for the day or if animals are foraging at the time of the survey activities.

TABLE 3—THE PERCENTAGE OF STOCK AFFECTED BY THE NUMBER OF TAKES PER SPECIES

Species	Take number	Stock abundance	Percent of stock
California sea lion *(Zalophus californianus)*	2,880	296,750	0.975
Steller sea lion (*Eumetopias jubatus*)	2,790	60,131–74,448	4.64–3.75
Pacific harbor seal (*Phoca vitulina*)	36	30,968	0.35
Northern fur seal (*Callorhinus ursinus*)	18	14,050	.12

Because of the required mitigation measures and the likelihood that some pinnipeds will avoid the area, NMFS does not expect any injury or mortality to pinnipeds to occur and NMFS has not authorized take by Level A harassment for this proposed activity.

Encouraging and Coordinating Research

The Society would share observations and counts of marine mammals and all observed disturbances to the appropriate state and federal agencies at the conclusion of the survey.

Analysis and Preliminary Determinations

Negligible Impact

Negligible impact is ''an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival'' (50 CFR 216.103). The lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population level effects) forms the basis of a negligible impact finding. An estimate of the number of Level B harassment takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be ''taken'' through behavioral harassment, NMFS considers other factors, such as the likely nature of any responses (*e.g.,* intensity, duration), the context of any responses (*e.g.,* critical reproductive time or location, migration), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and effects on habitat.

Although the Society's survey activities may disturb a small number of marine mammals hauled out on NWSR, NMFS expects those impacts to occur to a small, localized group of animals for a limited duration (*e.g.,* six hours in one day). Marine mammals would likely become alert or, at most, flush into the water in reaction to the presence of the Society's personnel during the proposed activities. Disturbance will be limited to a short duration, allowing marine mammals to reoccupy NWSR within a short amount of time. Thus, the proposed action is unlikely to result in long-term impacts such as permanent abandonment of the area because of the availability of alternate areas for pinnipeds to avoid the resultant acoustic and visual disturbances from the restoration activities and helicopter operations. Results from previous monitoring reports also show that the pinnipeds returned to NWSR and did not permanently abandon haul out sites after the Society conducted their activities.

The Society's activities would occur during the least sensitive time (*e.g.,* November through April, outside of the pupping season) for hauled out pinnipeds on NWSR. Thus, pups or breeding adults would not be present during the proposed activity days.

Moreover, the Society's mitigation measures regarding helicopter approaches and restoration site ingress and egress would minimize the potential for stampedes and large-scale movements. Thus, the potential for large-scale movements and stampede leading to injury, serious injury, or mortality is low.

Any noise attributed to the Society's proposed helicopter operations on NWSR would be short-term (approximately six min per trip). We would expect the ambient noise levels to return to a baseline state when helicopter operations have ceased for the day. As the helicopter landings take place 15 m (48 ft) above the surface of the rocks on NWSR, NMFS presumes that the received sound levels would increase above 81–81.9 dB re: 20 μPa (A-weighted) at the landing pad. However, we do not expect that the increased received levels of sound from the helicopter would cause TTS or PTS because the pinnipeds would flush before the helicopter approached NWSR; thus increasing the distance between the pinnipeds and the received sound levels on NWSR during the proposed action.

If pinnipeds are present on NWSR, Level B behavioral harassment of pinnipeds may occur during helicopter landing and takeoff from NWSR due to the pinnipeds temporarily moving from the rocks and lower structure of the Station into the sea due to the noise and appearance of helicopter during approaches and departures. It is expected that all or a portion of the marine mammals hauled out on the island will depart the rock and slowly move into the water upon initial helicopter approaches. The movement to the water would be gradual due to the required controlled helicopter approaches (see *Proposed Mitigation* for more details), the small size of the aircraft, the use of noise-attenuating blade tip caps on the rotors, and behavioral habituation on the part of the animals as helicopter trips continue throughout the day. During the sessions of helicopter activity, if present on NWSR, some animals may be temporarily displaced from the island and either raft in the water or relocate to other haul outs.

Sea lions have shown habituation to helicopter flights within a day at the project site and most animals are expected to return soon after helicopter activities cease for that day. By clustering helicopter arrival/departures within a short time period, we expect animals present to show less response to subsequent landings. NMFS anticipates no impact on the population size or breeding stock of Steller sea lions, California sea lions, Pacific harbor seals, or Northern fur seals.

In summary, NMFS anticipates that impacts to hauled-out pinnipeds during the Society's proposed helicopter operations and restoration/maintenance activities would be behavioral harassment of limited duration (*i.e.,* less than three days a month) and limited intensity (*i.e.,* temporary flushing at most). NMFS does not expect stampeding, and therefore injury or mortality to occur (see *Proposed Mitigation* for more details). Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, NMFS preliminarily finds that the total marine mammal take from the Society's proposed survey activities will have a negligible impact on the affected marine mammal species or stocks.

Small Numbers

As mentioned previously, NMFS estimates that the Society's proposed activities could potentially affect, by Level B harassment only, four species of marine mammal under our jurisdiction. For each species, these estimates are small numbers (less than one percent of the affected stocks of California sea lions, Pacific harbor seals, and Northern fur seals, and less than five percent of the stock of Steller sea lions) relative to the population size (Table 3).

Based on the analysis contained in this notice of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, NMFS preliminarily finds that the Society's proposed activities would take small numbers of marine mammals relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act (ESA)

NMFS does not expect that the Society's proposed helicopter operations and restoration/maintenance activities would affect any species listed under the ESA. Therefore, NMFS has determined that a Section 7 consultation under the ESA is not required.

National Environmental Policy Act (NEPA)

To meet our NEPA requirements for the issuance of an IHA to the Society, NMFS has prepared an EA specific to conducting aircraft operations and restoration and maintenance work on the St. George Reef Light Station. The EA, titled ''Issuance of an Incidental Harassment Authorization to Take Marine Mammals by Harassment Incidental to Conducting Aircraft Operations, Lighthouse Restoration and Maintenance Activities, and Tour Operations on St. George Reef Lighthouse Station in Del Norte County, California,'' evaluated the impacts on the human environment of our authorization of incidental Level B harassment resulting from the specified activity in the specified geographic region. An electronic copy of the EA and the Finding of No Significant Impact (FONSI) for this activity is available on the Web site at: *http://www.nmfs.noaa.gov/pr/permits/incidental/research.html.*

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes issuing an IHA to the Society for conducting helicopter operations and maintenance and restoration activities on the St. George Lighthouse Station in the northeast Pacific Ocean, February 19, 2017 through February 18, 2018, provided they incorporate the previously mentioned mitigation, monitoring, and reporting requirements.

Draft Proposed Authorization

This section contains the draft text for the proposed IHA. NMFS proposes to include this language in the IHA, if issued.

Proposed Authorization Language

The St. George Reef Lighthouse Preservation Society (Society), P.O. Box 577, Crescent City, CA 95531, is hereby authorized under section 101(a)(5)(D) of the Marine Mammal Protection Act (16 U.S.C. 1371(a)(5)(D)) and 50 CFR 216.107, to harass marine mammals incidental to conducting helicopter operations and restoration and maintenance work on the St. George Reef Light Station (Station) on Northwest Seal Rock (NWSR) in the Northeast Pacific Ocean.

1. This Incidental Harassment Authorization (IHA) is valid from February 19, 2017 through February 18, 2018. The Society may not conduct operations from May 1, 2017 through October 31, 2017.

2. This IHA is valid only for activities associated with helicopter operations, lighthouse restoration and maintenance activities, and human presence (See items 2(a)–(d)) on the Station on NWSR (41°50′24″ N., 124°22′06″ W.) in the Northeast Pacific Ocean.

a. The use of a small, compact, 4-person helicopter with two-bladed main and tail rotors fitted with noise-attenuating blade tip caps to transit to and from NWSR;

b. Restoration activities (*e.g.,* painting, plastering, welding, and glazing) conducted on the Station;

c. Maintenance activities (*e.g.,* bulb replacement and automation of the light system) conducted on the Station; and

d. Emergency repair events (*e.g.,* the failure of the PATON beacon light) outside of the three-day work session.

e. Human presence.

3. General Conditions

a. A copy of this IHA must be in the possession of the Society, its designees, and work crew personnel operating under the authority of this IHA.

b. The species authorized for taking are the California sea lion (*Zalophus californianus*), Pacific Harbor seal (*Phoca vitulina*), the eastern Distinct Population Segment of Steller sea lion (*Eumetopias jubatus*), and the eastern Pacific stock of northern fur seal (*Callorhinus ursinus*).

c. The taking, by Level B harassment only, is limited to the species listed in condition 3(b). Authorized take: California sea lion (2880); Steller sea lion (2790); Pacific harbor seal (36); and northern fur seal (18).

d. The taking by Level A harassment, injury or death of any of the species listed in item 3(b) of the IHA or the taking by harassment, injury or death of any other species of marine mammal is prohibited and may result in the modification, suspension, or revocation of this IHA.

e. In the case of an emergency repair event (*i.e.,* failure of the PATON beacon light) between May 1, 2017 through October 31, 2017, the Society will consult with the ARA, Westcoast Region, NMFS, to best determine the timing of an emergency repair trip to the Station.

a. The Westcoast Region NMFS marine mammal biologist will make a decision regarding when the Society can schedule helicopter trips to the NWSR during the emergency repair time window and will ensure that such operations will have the least practicable adverse impact to marine mammals.

b. The ARA, Westcoast Region, NMFS will also ensure that the Society's request for incidental take during an emergency repair event would not exceed the number of incidental take authorized in this IHA.

4. Cooperation

The holder of this IHA is required to cooperate with the NMFS and any other Federal, state, or local agency authorized to monitor the impacts of the activity on marine mammals.

5. Mitigation Measures

In order to ensure the least practicable impact on the species listed in condition 3(b), the holder of this IHA is required to:

a. Conduct restoration and maintenance activities at the Station at a maximum of one session per month between February 19, 2017 and February 18, 2018. Each restoration session will be no more than three days in duration. Maintenance of the light beacon will occur only in conjunction with the monthly restoration activities.

b. Ensure that helicopter approach patterns to the NWSR will be such that the timing techniques are least disturbing to marine mammals. To the extent possible, the helicopter should approach NWSR when the tide is too high for the marine mammals to haul out on NWSR.

c. Avoid rapid and direct approaches by the helicopter to the station by approaching NWSR at a relatively high altitude (*e.g.,* 800–1,000 ft; 244–305 m). Before the final approach, the helicopter shall circle lower, and approach from area where the density of pinnipeds is the lowest. If for any safety reasons (*e.g.,* wind conditions or visibility) such helicopter approach and timing techniques cannot be achieved, the Society must abort the restoration and maintenance session for that day.

d. Provide instructions to the Society's members, the restoration crew, and if applicable, to tourists, on appropriate conduct when in the vicinity of hauled-out marine mammals. The Society's members, the restoration crew, and if applicable, tourists, will avoid making unnecessary noise while on NWSR and must not view pinnipeds around the base of the Station.

e. Ensure that the door to the Station's lower platform shall remain closed and barricaded at all times.

6. Monitoring

The holder of this IHA is required to:

a. Have a NMFS-approved experienced biologist will be present on the first flight of each day of activities.

b. Record the date, time, and location (or closest point of ingress) of each visit to the NWSR.

c. Collect the following information for each visit:

i. Information on the numbers (by species) of marine mammals observed during the activities;

ii. The estimated number of marine mammals (by species) that may have been harassed during the activities;

iii. Any behavioral responses or modifications of behaviors that may be attributed to the specific activities (*e.g.,* flushing into water, becoming alert and moving, rafting); and

iv. Information on the weather, including the tidal state and horizontal visibility.

d. Employ a skilled, aerial photographer to document marine mammals hauled out on NWSR.

i. The photographer will complete a photographic survey of NWSR using the same helicopter that will transport Society personnel to the island during restoration trips.

ii. Photographs of all marine mammals hauled-out on the island shall be taken at an altitude greater than 300 m (984 ft) during the first arrival flight to NWSR.

iii. The Society and/or its designees will forward the photographs to a biologist capable of discerning marine mammal species. The Society shall provide the data to us in the form of a report with a data table, any other significant observations related to marine mammals, and a report of restoration activities (see Reporting). The Society will make available the original photographs to NMFS or to other marine mammal experts for inspection and further analysis.

7. Reporting Requirements

Final Report: The holder of this IHA is required to submit a draft monitoring report to the Chief, Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, 13th Floor, Silver Spring, MD 20910, no later than 90 days after the project is completed. The report must contain the following information:

a. A summary of the dates, times, and weather during all helicopter operations, restoration, and maintenance activities.

b. Species, number, location, and behavior of any marine mammals, observed throughout all monitoring activities.

c. An estimate of the number (by species) of marine mammals that are known to have been exposed to visual and acoustic stimuli associated with the helicopter operations, restoration, and maintenance activities.

d. A description of the implementation and effectiveness of the monitoring and mitigation measures of the IHA and full documentation of methods, results, and interpretation pertaining to all monitoring.

8. Reporting Prohibited Take

In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner prohibited by the IHA (if issued), such as an injury (Level A harassment), serious injury, or mortality (*e.g.,* stampede, etc.), the Society shall immediately cease the specified activities and immediately report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, NMFS, and the Assistant Westcoast Regional Stranding Coordinator.

The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Name and type of vessel involved;
- Vessel's speed during and leading up to the incident;
- Description of the incident;
- Status of all sound source use in the 24 hours preceding the incident;
- Water depth;
- Environmental conditions (*e.g.,* wind speed and direction, Beaufort sea state, cloud cover, and visibility);
- Description of all marine mammal observations in the 24 hours preceding the incident;
- Species identification or description of the animal(s) involved;
- Fate of the animal(s); and
- Photographs or video footage of the animal(s) (if equipment is available).

The Society shall not resume its activities until we are able to review the circumstances of the prohibited take. We shall work with the Society to determine what is necessary to minimize the likelihood of further prohibited take and ensure Marine Mammal Protection Act compliance. The Society may not resume their activities until notified by us via letter, email, or telephone.

9. Reporting an Injured or Dead Marine Mammal With an Unknown Cause of Death

In the event that the Society discovers an injured or dead marine mammal, and the observer determines that the cause of the injury or death is unknown and the death is relatively recent (*i.e.,* in less than a moderate state of decomposition as we describe in the next paragraph), the Society will immediately report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, and the Assistant Westcoast Regional Stranding Coordinator. The report must include the same information identified in the paragraph above this section. Activities may continue while we review the circumstances of the incident. We will work with the Society to determine whether modifications in the activities are appropriate.

The report must include the same information identified in the paragraph above. Activities may continue while we review the circumstances of the incident. We will work with the Society to determine whether modifications in the activities are appropriate.

10. Reporting an Injured or Dead Marine Mammal Not Related to the Society's Activities

In the event that the Society discovers an injured or dead marine mammal, and the lead visual observer determines that the injury or death is not associated with or related to the authorized activities (*e.g.,* previously wounded

animal, carcass with moderate to advanced decomposition, or scavenger damage), the Society will report the incident to the Chief, Permits and Conservation Division, Office of Protected Resources, and the Assistant Westcoast Regional Stranding Coordinator, within 24 hours of the discovery.

The Society's staff will provide photographs or video footage (if available) or other documentation of the stranded animal sighting to us.

11. This IHA may be modified, suspended or withdrawn if the holder fails to abide by the conditions prescribed herein, or if the authorized taking is having a more than a negligible impact on the species or stock of affected marine mammals.

Request for Public Comments

NMFS requests comments on our analysis, the draft IHA, and any other aspect of this notice of proposed IHA for the proposed activities. Please include any supporting data or literature citations with your comments to help inform our final decision on the Society's request for an IHA.

Dated: December 16, 2016.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 2016–30785 Filed 12–22–16; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF099

Nominations to the Marine Fisheries Advisory Committee

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for nominations.

SUMMARY: Nominations are being sought for appointment by the Secretary of Commerce to fill vacancy openings on the Marine Fisheries Advisory Committee (MAFAC or Committee) that will be pending late April 2017. MAFAC is the only Federal advisory committee with the responsibility to advise the Secretary of Commerce (Secretary) on all matters concerning living marine resources that are the responsibility of the Department of Commerce. The Committee makes recommendations to the Secretary to assist in the development and implementation of Departmental regulations, policies, and programs critical to the mission and goals of NMFS. Nominations are encouraged from all interested parties involved with or representing interests affected by NMFS actions in managing living marine resources. Nominees should possess demonstrable expertise in a field related to the management of living marine resources and be able to fulfill the time commitments required for two annual meetings and year round subcommittee work. Individuals serve for a term of three years for no more than two consecutive terms if re-appointed. NMFS is seeking qualified nominees to fill upcoming vacancies being created by term limits.

DATES: Nominations must be postmarked or have an email date stamp on or before February 6, 2017.

ADDRESSES: Nominations should be sent to Heidi Lovett, MAFAC Assistant Director, NMFS Office of Policy, 14th Floor, 1315 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Heidi Lovett, MAFAC Assistant Director; (301) 427–8034; email: *heidi.lovett@noaa.gov.*

SUPPLEMENTARY INFORMATION: The MAFAC was approved by the Secretary on December 28, 1970, and subsequently chartered under the Federal Advisory Committee Act, 5 U.S.C. App. 2, on February 17, 1971. The Committee meets twice a year with supplementary subcommittee meetings as determined necessary by the Committee Chair and Subcommittee Chairs. No less than 15 and no more than 21 individuals may serve on the Committee. Membership is comprised of highly qualified, diverse individuals representing commercial, recreational, subsistence, and aquaculture fisheries interests; seafood industry; environmental organizations; academic institutions; tribal and consumer groups; and other living marine resource interest groups from a balance of U.S. geographical regions, including the Western Pacific and Caribbean.

A MAFAC member cannot be a Federal employee, member of a Regional Fishery Management Council, registered Federal lobbyist, State employee, or agent of a foreign principal. Selected candidates must pass a security check and submit a financial disclosure form. Membership is voluntary, and except for reimbursable travel and related expenses, service is without pay.

Each nomination submission should include the nominee's name, a cover letter describing the nominee's qualifications and interest in serving on the Committee, curriculum vitae or resume of the nominee, and no more than three supporting letters describing the nominee's qualifications and interest in serving on the Committee. Self-nominations are acceptable. The following contact information should accompany each nominee's submission: Name, address, telephone number, fax number, and email address (if available).

Nominations should be sent to Heidi Lovett (see **ADDRESSES**) and must be received by February 6, 2017. The full text of the Committee Charter and its current membership can be viewed at the NMFS' Web page at *www.nmfs.noaa.gov/mafac.htm.*

Dated: December 20, 2016.

Jennifer Lukens,

Director for the Office of Policy, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF095

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The North Pacific Fishery Management Council (Council) Groundfish Plan Team will hold a two day meeting.

DATES: The meeting will be begin at 9 a.m. on Wednesday January 11, 2017, and end at 5 p.m. on Thursday January 12, 2017, to view the agenda see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held at the Alaska Fishery Science Center Traynor Room 2076, 7600 Sand Point Way NE., Building 4, Seattle, WA 98115.

Council address: North Pacific Fishery Management Council, 605 W. 4th Ave., Suite 306, Anchorage, AK 99501–2252; telephone (907) 271–2809.

FOR FURTHER INFORMATION CONTACT: Diana Stram or Jim Armstrong, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION:

Agenda

Wednesday, January 11, 2017 Through Thursday January 12, 2017

The Joint *Groundfish* Plan Team will provide recommendations on NPFMC stock prioritization results specifically on the following: (a) Evaluate the results of the prioritization process applied to North Pacific g*roundfish,* (b) develop a proposal for how to use those results to support planning, (c) discuss any recommended changes from status quo and whether those changes are supported/justified, and (d) discuss the implications and where assessments may occur at lower frequency, discuss potential interim actions to support management.

The Agenda is subject to change, and the latest version will be posted, at *http://www.npfmc.org/fishery-management-plan-team/goa-bsai-groundfish-plan-team/.*

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 business days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 19, 2016.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add services to the Procurement List that will be provided by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products previously furnished by such agencies.

DATES: Comments must be received on or before—1/22/2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

The following services are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Services

Service Type: Sustainment, Restoration, and Modernization (SRM) Service
Mandatory for: US Army, DPW, Fort Riley, KS (excluding Residential Housing Areas and including Forbes Air Field, Topeka, KS), Fort Riley, KS
Mandatory Source(s) of Supply: Skookum Educational Programs, Bremerton, WA
Contracting Activity: US Army Corps of Engineers, Huntsville Engineering & Support Center, Huntsville, AL
Service Type: Janitorial Service and Grounds Maintenance Service
Mandatory for: Federal Aviation Administration, Flight Inspection Field Office, 4185 Martin Luther King Jr. Drive, Atlanta, GA
Mandatory Source(s) of Supply: Bobby Dodd Institute, Inc., Atlanta, GA
Contracting Activity: Dept of Transportation, Federal Aviation Administration
Service Type: Mail and Courier Service
Mandatory for: US Customs and Border Protection, New York Field Office Mail Room, One World Trade Center, 285 Fulton Street, New York, NY
Mandatory Source(s) of Supply: The Corporate Source, Inc., New York, NY
Contracting Activity: U.S. Customs and Border Protection, Border Enforcement Center Div
Service Type: Base Operations Support Service
Mandatory for: Naval Facilities Engineering Command Northwest, North Sound Facilities, 1101 Tautog Circle, Silverdale, WA
Mandatory Source(s) of Supply: Skookum Educational Programs, Bremerton, WA
Contracting Activity: Dept of the Navy, NAVFAC NORTHWEST

Deletions

The following products are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s): 2510–00–535–6797—Side Rack, Vehicle
2510–00–571–6968—Side Rack, Vehicle
2510–00–860–0517—Side Rack, Vehicle
2510–00–860–0523—Side Rack, Vehicle
2510–01–180–1099—Stake, Vehicle Body
Mandatory Source(s) of Supply: UNKNOWN
Contracting Activity: Defense Logistics Agency Land and Maritime
NSN(s)—Product Name(s): 7520–00–162–6153—Stand, Calendar Pad, for 3″ x 3–3/4″ refill, Gray
7520–00–139–4341—Stand, Calendar Pad, for 3″ x 3–3/4″ refill, Beige
NPA: LC Industries, Inc.,
Mandatory Source(s) of Supply: LC Industries, Inc., Durham, NC
Contracting Activity: General Services Administration, New York, NY
NSN(s)—Product Name(s): 7195–01–567–9523—Bulletin Board, Fabric, 36″ x 24″, Plastic Frame
Mandatory Source(s) of Supply: The Lighthouse for the Blind, Inc. (Seattle Lighthouse), Seattle, WA
Contracting Activities: Department of Veterans Affairs, Strategic Acquisition Center, General Services Administration, Philadelphia
NSN(s)—Product Name(s): 6515–00–NIB–0480—Glove Powdered, Perry Orthopaedic
Mandatory Source(s) of Supply: Bosma Industries for the Blind, Inc., Indianapolis, IN
Contracting Activity: Department of Veterans Affairs

Patricia Briscoe,

Deputy Director, Business Operations (Pricing and Information Management).

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from the Procurement List.

SUMMARY: This action adds services to the Procurement List that will be provided by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products and services from the Procurement List previously furnished by such agencies.

DATES: Effective Date—1/22/2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Additions

On 10/7/2016 (81 FR 69789–69790) and 11/10/2016 (81 FR 78996–78997), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will provide the services to the Government.

2. The action will result in authorizing small entities to provide the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services proposed for addition to the Procurement List.

End of Certification

Services

Service Type: Retail Operation Support Service
Mandatory for: GSA FAS, GSA Global Supply Store, 5250 Gibson Avenue, Joint Base Elmendorf Richardson, AK
Mandatory Source(s) of Supply: M.C. Resource Management, Anchorage, AK
Contracting Activity: General Services Administration, Federal Acquisition Service, Washington, DC
Service Type: Mailroom Support Service
Mandatory for: U.S. Air National Guard, Air National Guard Readiness, Center Receiving & Document Control Center, Joint Base Andrews, MD
Mandatory Source(s) of Supply: ServiceSource, Inc., Oakton, VA
Contracting Activity: Dept of the Army, W39L USA NG READINESS CENTER
Service Type: Document Control and Conversion Support Service
Mandatory for: Federal Communications Commission, FCC HQ, Washington, DC
Mandatory Source(s) of Supply: Linden Resources, Inc., Arlington, VA
Contracting Activity: U.S. Federal Communications Commission, Office of Managing Director, Enterprise Acquisition Center, Washington, DC

Deletions

On 11/10/2016 (81 FR 78996–78997) and 11/18/2016 (81 FR 81744–81745), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSN(s)—Product Name(s):
7510–01–545–3778—DAYMAX System, 2015, Calendar Pad, Type II
7510–01–545–3782—DAYMAX System, 2015, Calendar Pad, Type I
Mandatory Source(s) of Supply: Anthony Wayne Rehabilitation Center for Handicapped and Blind, Inc., Fort Wayne, IN
Contracting Activity: General Services Administration, New York, NY

Services

Service Type: Document Destruction Service
Mandatory Source(s) of Supply: Source America (Prime Contractor)
Contracting Activity: Dept. of the Treasury/Internal Revenue Service, Washington, DC
Mandatory for:
Internal Revenue Service Offices at the following locations:
Defiance: 208 Perry St, Defiance, OH
Lorain: 300 Broadway, Lorain, OH
Painesville: 8 North State Street, Painesville, OH
Steubenville: 500 Market Street, Steubenville, OH

BILLING CODE 6353–01–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection; Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (CNCS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, CNCS is soliciting comments concerning its Social Innovation Fund (SIF) Application Instructions. These instructions combine the previously approved SIF Application Instructions (OMB Control Number 3045–0155) and SIF Pay for Success Application Instructions (OMB Control Number 3045–0167) into one document. The application instructions will be used by organizations requesting funding for a SIF project.

Copies of the information collection request can be obtained by contacting the office listed in the Addresses section of this Notice.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by February 21, 2017.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) *By mail sent to:* Corporation for National and Community Service, Social Innovation Fund, Attention: Lois Nembhard, Director (Acting); 250 E St SW., Ste. 300, Washington, DC 20525.

(2) By hand delivery or by courier to the CNCS mailroom on the fourth floor at the mail address given in paragraph (1) above, between 9:00 a.m. and 4:00 p.m. Eastern Time, Monday through Friday, except Federal holidays.

(3) Electronically through *www.regulations.gov.*

Individuals who use a telecommunications device for the deaf (TTY–TDD) may call 1–800–833–3722 between 8:00 a.m. and 8:00 p.m. Eastern Time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Lois Nembhard, 202–606–3223, or by email at *innovation@cns.gov.*

SUPPLEMENTARY INFORMATION:

CNCS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submissions of responses).

Background

This collection will be used by organizations applying to become Social Innovation Fund intermediaries. Applications will be submitted primarily via eGrants.

Current Action

This is a new information collection request. These instructions combine the previously approved SIF Application Instructions (OMB Control Number 3045–0155) and SIF Pay for Success Application Instructions (OMB Control Number 3045–0167) into one document.

The information collection will otherwise be used in the same manner as the existing application. CNCS also seeks to continue using the current application until the revised application is approved by OMB. The current application is due to expire on January 31, 2017.

Type of Review: New.

Agency: Corporation for National and Community Service.

Title: Social Innovation Fund Application Instructions.

OMB Number: None.

Agency Number: None.

Affected Public: Organizations applying to be Social Innovation Fund intermediaries.

Total Respondents: 50.

Frequency: Annual.

Average Time per Response: Averages 24 hours.

Estimated Total Burden Hours: 1,200.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Authority: 44 U.S.C. Sec. 3506(c)(2)(A)

Dated: December 19, 2016.

Lois Nembhard,

Director (Acting), Social Innovation Fund.

BILLING CODE 6050–28–P

DEPARTMENT OF DEFENSE

Department of the Air Force

Notice of Intent To Grant an Exclusive Patent License

AGENCY: Air Force Materiel Command, Department of the Air Force, Department of Defense.

ACTION: Notice of intent.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant an exclusive patent license agreement to The University of North Carolina at Charlotte, a public university duly organized, validly existing, and in good standing in the State of North Carolina, having a place of business at 9201 University City Blvd., Charlotte, NC 28223.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to the Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Room 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; or Email: *afmclo.jaz.tech@us.af.mil.* Include Docket No. AFD–1436 in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Rm 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; Email: *afmclo.jaz.tech@us.af.mil.*

SUPPLEMENTARY INFORMATION: The Department of the Air Force intends to grant the exclusive patent license agreement for the invention described in: U.S. Patent No. 9,362,324, entitled, ''PHOTODETECTOR FOCAL PLANE ARRAY SYSTEMS AND METHODS,'' filed December 31, 2014, and issued June 7, 2016.

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Henry Williams,

Acting Air Force Federal Register Liaison Officer.

BILLING CODE 5001–10–P

DEPARTMENT OF DEFENSE

Department of the Army

Advisory Committee on Arlington National Cemetery, Honor Subcommittee and the Remember and Explore Subcommittee Meeting Notice

AGENCY: Department of the Army, DoD.

ACTION: Notice of open subcommittee meetings.

SUMMARY: The Department of the Army is publishing this notice to announce the following Federal advisory subcommittee meetings of the Honor Subcommittee and the Remember and Explore Subcommittee of the Advisory Committee on Arlington National Cemetery (ACANC). These meetings are open to the public. For more information about the Committee and the Subcommittees, please visit *http://www.arlingtoncemetery.mil/AboutUs/FocusAreas.aspx.*

DATES: The Honor Subcommittee will meet from 9:00 a.m. to 11:00 a.m. and the Remember and Explore Subcommittee will meet from 1:00 p.m. to 2:30 p.m. on Monday, January 23, 2017.

ADDRESSES: Arlington National Cemetery Welcome Center, Conference Room, Arlington National Cemetery, Arlington, VA 22211.

FOR FURTHER INFORMATION CONTACT: Mr. Timothy Keating; Designated Federal Officer (Alternate) for the Committee and the Subcommittees, in writing at Arlington National Cemetery, Arlington, VA 22211, or by email at *timothy.p.keating.civ@mail.mil,* or by phone at 1–877–907–8585.

SUPPLEMENTARY INFORMATION: This subcommittee meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Sunshine in the Government Act of 1976 (U.S.C. 552b, as amended) and 41 Code of the Federal Regulations (CFR 102–3.150).

Purpose of the Meetings: The Advisory Committee on Arlington National Cemetery is an independent Federal advisory committee chartered to provide the Secretary of the Army independent advice and

recommendations on Arlington National Cemetery, including, but not limited to, cemetery administration, the erection of memorials at the cemetery, and master planning for the cemetery. The Secretary of the Army may act on the committee's advice and recommendations. The primary purpose of the Honor Subcommittee is to provide independent recommendations of methods to address the long-term future of Arlington National Cemetery, including how best to extend the active burials and on what ANC should focus once all available space has been used, the placement of commemorative monuments and the manner in which to ensure the living history of the cemetery is preserved. The primary purpose of the Remember & Explore Subcommittee is improving the quality of visitors' experiences, now and for generations to come, to review and provide recommendations on preserving and caring for the marble components of the Tomb of the Unknown Soldier (TUS), and reviewing proposed commemorative monuments requested for placement in the cemetery.

Proposed Agenda: The Honor Subcommittee will receive an update on the ANC Administrative building renovation plan, continue discussions with VSO and MSO regarding preserving the life of active burials, and the Army's Report to Congress as required by Public Law 114–158. The Remember and Explore Subcommittee will receive information about VA procedures to capture data to measure family satisfaction with VA service, a presentation regarding ANC notable gravesites, and receive an update to ANC Amphitheater repairs.

Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis. The Arlington National Cemetery conference room is readily accessible to and usable by persons with disabilities. For additional information about public access procedures, contact Mr. Timothy Keating, the subcommittee's Alternate Designated Federal Officer, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the subcommittee, in response to the stated agenda of the open meeting or in regard to the subcommittee's mission in general. Written comments or statements should be submitted to Mr. Timothy Keating, the subcommittee's Alternate Designated Federal Officer, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the Designated Federal Officer at least seven business days prior to the meeting to be considered by the subcommittee. The Designated Federal Officer will review all timely submitted written comments or statements with the subcommittee Chairperson, and ensure the comments are provided to all members of the subcommittee before the meeting. Written comments or statements received after this date may not be provided to the subcommittee until its next meeting. Pursuant to 41 CFR 102–3.140d, the subcommittee is not obligated to allow the public to speak or otherwise address the subcommittee during the meeting. However, interested persons may submit a written statement or a request to speak for consideration by the subcommittee. After reviewing any written statements or requests submitted, the subcommittee Chairperson and the Designated Federal Officer may choose to invite certain submitters to present their comments verbally during the open portion of this meeting or at a future meeting. The Designated Federal Officer in consultation with the subcommittee Chairperson, may allot a specific amount of time for submitters to present their comments verbally.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 5001–03–P

DEPARTMENT OF DEFENSE

Department of the Army

Advisory Committee on Arlington National Cemetery Meeting Notice

AGENCY: Department of the Army, DoD.

ACTION: Notice of open committee meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the following Federal advisory committee meeting of the Advisory Committee on Arlington National Cemetery (ACANC). The meeting is open to the public. For more information about the Committee, please visit *http://www.arlingtoncemetery.mil/AboutUs/FocusAreas.aspx.*

DATES: The Committee will meet from 10:00 a.m. to 2:30 p.m. on Tuesday, January 24, 2017.

ADDRESSES: Arlington National Cemetery Welcome Center, Arlington National Cemetery, Arlington, VA 22211.

FOR FURTHER INFORMATION CONTACT: Mr. Timothy Keating; Designated Federal Officer (Alternate) for the Committee and the Subcommittees, in writing at Arlington National Cemetery, Arlington VA 22211, or by email at *timothy.p.keating.civ@mail.mil,* or by phone at 1–877–907–8585.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Sunshine in the Government Act of 1976 (U.S.C. 552b, as amended) and 41 Code of the Federal Regulations (CFR 102–3.150).

Purpose of the Meeting: The Advisory Committee on Arlington National Cemetery is an independent Federal advisory committee chartered to provide the Secretary of the Army independent advice and recommendations on Arlington National Cemetery, including, but not limited to, cemetery administration, the erection of memorials at the cemetery, and master planning for the cemetery. The Secretary of the Army may act on the Committee's advice and recommendations.

Proposed Agenda: The Committee will receive ANC leadership remarks regarding the current State of ANC, an update to the Tomb of Remembrance construction and policy, the status of the World War One Memorial display, and the status of Army's Report to Congress as required by Public Law 114–158.

Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis. The Arlington National Cemetery conference room is readily accessible to and usable by persons with disabilities. For additional information about public access procedures, contact Mr. Timothy Keating, the subcommittee's Alternate Designated Federal Officer, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and

102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Committee, in response to the stated agenda of the open meeting or in regard to the Committee's mission in general. Written comments or statements should be submitted to Mr. Timothy Keating, the subcommittee's Alternate Designated Federal Officer, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the Designated Federal Officer at least seven business days prior to the meeting to be considered by the Committee. The Designated Federal Officer will review all timely submitted written comments or statements with the Committee Chairperson, and ensure the comments are provided to all members of the Committee before the meeting. Written comments or statements received after this date may not be provided to the Committee until its next meeting. Pursuant to 41 CFR 102–3.140d, the Committee is not obligated to allow a member of the public to speak or otherwise address the Committee during the meeting. Members of the public will be permitted to make verbal comments during the Committee meeting only at the time and in the manner described below. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three (3) business days in advance to the Committee's Designated Federal Official, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section. The Designated Federal Official will log each request, in the order received, and in consultation with the Committee Chair determine whether the subject matter of each comment is relevant to the Committee's mission and/or the topics to be addressed in this public meeting. A 15-minute period near the end of meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the Designated Federal Official.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 5001–03–P

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket Number DARS–2016–0043; OMB Control Number 0704–0398]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement; Describing Agency Needs

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice and request for comments regarding a proposed extension of an approved information collection requirement.

SUMMARY: DoD announces the proposed extension of a public information collection requirement and seeks public comment on the provisions thereof. The Office of Management and Budget (OMB) has approved this information collection requirement for use through March 31, 2017. DoD proposes that OMB extend its approval for an additional three years.

DATES: DoD will consider all comments received by February 21, 2017.

ADDRESSES: You may submit comments, identified by OMB Control Number 0704–0398, using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Email: osd.dfars@mail.mil*. Include OMB Control Number 0704–0398 in the subject line of the message.
- *Fax:* 571–372–6094.
- *Mail:* Defense Acquisition Regulations System, Attn: Mr. Tom Ruckdaschel, OUSD(AT&L)DPAP/DARS, Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060.

Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal information provided. To confirm receipt of your comment(s), please check *www.regulations.gov* approximately two to three days after submission to verify posting. Please allow 30 days for posting of comments submitted by postal mail.

FOR FURTHER INFORMATION CONTACT: Mr. Tom Ruckdaschel, telephone 571–372–6088. The information collection requirements addressed in this notice are available at: *http://www.acq.osd.mil/dpap/dars/dfarspgi/current/index.html*. Paper copies are available from Mr. Tom Ruckdaschel, OUSD(AT&L)DPAP(DARS), Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060.

SUPPLEMENTARY INFORMATION: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), DoD invites comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of DoD, including whether the information will have practical utility; (b) the accuracy of the estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology.

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Part 211, Describing Agency Needs, and related clause at DFARS 252.211.

Needs and Uses:

a. The information collected under DFARS provision 252.211–7004, Alternate Preservation, Packaging, and Packing, is used by DoD contracting officers to evaluate and award contracts using commercial or industrial preservation, packaging, or packing if the offeror chooses to propose such alternates.

b. The information collected under DFARS provision 252.211–7005, Substitutions for Military or Federal Specifications and Standards, is used by DoD contracting officers to verify that a Single Process Initiative (SPI) process proposed by an offeror is a valid replacement for a military or Federal specification or standard.

c. The information collected under DFARS 252.211–7007, Reporting of Government-Furnished Property, strengthens the accountability and end-to-end traceability of Government-furnished property (GFP) within DoD. Through electronic notification of physical receipt, the contracting officer is made aware that GFP has arrived at the contractor's facility. The DoD logistics community uses the information as a data source of available DoD equipment. In addition, the DoD organization responsible for contract

administration uses the data to test the adequacy of the contractor's property management system.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Number of Respondents: 641.

Responses per Respondent: 102 (approximately).

Number of Responses: 65,573.

Hours per Response: 0.27 (approximately).

Estimated Hours: 17,836.

Frequency: On occasion.

Summary of Information Collection

a. DFARS 252.211–7004 allows potential offerors to propose alternatives to military preservation, packaging, or packing specifications. Specifically, the offeror may include in its offer two unit prices in the format specified in the clause: One price based on use of the military specifications, and another price based on commercial or industry preservation, packaging, or packing of equal or better protection that the military.

b. DFARS provision 252.211–7005 permits offerors to propose SPI processes as alternatives to military or Federal specifications and standards cited in DoD solicitations for previously developed items. As defined in the clause, ''SPI process'' means a management or manufacturing process that has been accepted previously by a DoD Management Council for use in lieu of a specific military or Federal specification or standard a specific facilities. When proposing SPI processes, offerors identify the proposed SPI process, specific facility to which it will apply, and the specific contract line items, which will be affected.

c. DFARS clause 252.211–7007 requires contractors to report to the Item Unique Identification (IUID) Registry all serially-managed Government-furnished property (GFP), as well as contractor receipt of non-serially managed items. ''Serially managed item'' means an item designated by DoD to be uniquely tracked, controlled, or managed in maintenance, repair, and/or supply systems by means of its serial number. The clause provides a list of specific data elements contractors are to report to the IUID registry, as well as procedures for updating the registry.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Advisory Committee on Investigation, Prosecution, and Defense of Sexual Assault in the Armed Forces (DAC–IPAD); Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense.

ACTION: Notice of meeting.

SUMMARY: The Department of Defense is publishing this notice to announce the following Federal Advisory Committee meeting of the Defense Advisory Committee on Investigation, Prosecution, and Defense of Sexual Assault in the Armed Forces (''the DAC–IPAD'' or ''the Committee''). The meeting is open to the public.

DATES: A meeting of the DAC–IPAD will be held on Thursday, January 19, 2017. The public session will begin at 10:00 a.m. and end at 4:45 p.m.

ADDRESSES: Holiday Inn Arlington at Ballston, Grand Ballroom, 4610 N. Fairfax Drive, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Ms. Julie Carson, DAC–IPAD, One Liberty Center, Suite 150, 875 N. Randolph Street, Arlington, Virginia 22203. Phone: (703) 693–3849.

SUPPLEMENTARY INFORMATION: This public meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.50(a).

Purpose of the Meeting: In section 546 of the National Defense Authorization Act for Fiscal Year 2015 (Pub. L. 113–291), as modified by section 537 of the National Defense Authorization Act for Fiscal Year 2016 (Pub. L. 114–92), Congress tasked the DAC–IPAD to advise the Secretary of Defense on the investigation, prosecution, and defense of allegations of rape, forcible sodomy, sexual assault, and other sexual misconduct involving members of the Armed Forces. This will be the first public meeting held by the DAC–IPAD. At this meeting, the Committee will receive presentations on the Federal Advisory Committee Act, the court-martial process, the history of sexual assault issues in the Armed Forces, and recent legislation on sexual assault. The Committee will also be briefed on the work of the two predecessor federal advisory committees tasked with reviewing military sexual assault issues—the Response Systems to Adult Sexual Assault Crimes Panel and the Judicial Proceedings Panel. The Committee will then conduct a planning session.

Agenda

8:30 a.m.–10:00 a.m. Administrative Work (41 CFR 102–3.160, not subject to notice & open meeting requirements)
10:00 a.m.–10:30 a.m. Welcome and Introduction
—Alternate Designated Federal Official Opens Meeting
—Remarks of the Chair
—Remarks by DoD Official
—Introduction of Members
10:30 a.m.—11:30 a.m. Federal Advisory Committee Act Brief
—Ms. Elaine Crowley, Office of the General Counsel, Department of Defense
11:30 a.m.—12:30 p.m. Overview of the Court-Martial Process
—Mr. Dwight Sullivan, Office of the General Counsel, Department of Defense
12:30 p.m.—1:15 p.m. Lunch
1:15 p.m.—2:15 p.m. Legislative Highlights and the History of Sexual Assault Issues in the Armed Forces Since 2012
—Captain Warren Record, JAGC, U.S. Navy, Chair, Joint Service Committee on Military Justice
2:15 p.m.—3:15 p.m. History of the Response Systems to Adult Sexual Assault Crimes Panel and the Judicial Proceedings Panel
—Ms. Maria Fried, Office of the General Counsel, Department of Defense
3:15 p.m.—4:30 p.m. Committee Planning Session
4:30 p.m.—4:45 p.m. Public Comment
4:45 p.m. Meeting Adjourned

Availability of Materials for the Meeting: A copy of the January 19, 2017 public meeting agenda and any updates or changes to the agenda, including the location and individual speakers not identified at the time of this notice, as well as other materials provided to Committee members for use at the public meeting, may be obtained at the meeting.

Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is limited and is on a first-come basis. In the event the Office of Personnel Management closes the government due to inclement weather or any other reason, please consult the Web site for any changes to public meeting dates or time.

Special Accommodations: Individuals requiring special accommodations to access the public meeting should contact the DAC–IPAD at

whs.pentagon.em.mbx.dacipad@mail.mil at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Procedures for Providing Public Comments: Pursuant to 41 CFR 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act of 1972, the public or interested organizations may submit written comments to the DAC–IPAD about its mission and topics pertaining to this public session. Written comments must be received by the Committee at least five (5) business days prior to the meeting date so that they may be made available to the Committee members for their consideration prior to the meeting. Written comments should be submitted via email to the DAC–IPAD at *whs.pentagon.em.mbx.dacipad@mail.mil* in the following formats: Adobe Acrobat or Microsoft Word. Please note that since the Committee operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection. If members of the public are interested in making an oral statement pertaining to the agenda for the public meeting, a written statement must be submitted as above along with a request to provide an oral statement. After reviewing the written comments and the oral statement, the Chairperson and the Designated Federal Official will determine who will be permitted to make an oral presentation of their issue during the public comment portion of this meeting. This determination is at the sole discretion of the Chairperson and Designated Federal Official, will depend on the time available and relevance to the Committee's activities for that meeting, and will be on a first-come basis. When approved in advance, oral presentations by members of the public will be permitted from 4:30 p.m. to 4:45 p.m. on January 19, 2017 in front of the Committee members.

Committee's Designated Federal Official: The DAC–IPAD's Designated Federal Official is Mr. Dwight Sullivan, Associate Deputy General Counsel for Military Justice, U.S. Department of Defense, Office of the General Counsel, 1600 Defense Pentagon, Room 3B747, Washington, DC 20301–1600.

Dated: December 20, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Charter Renewal of Department of Defense Federal Advisory Committee

AGENCY: Department of Defense.

ACTION: Renewal of Federal Advisory Committee.

SUMMARY: The Department of Defense (DoD) is publishing this notice to announce that it is renewing the charter for the Department of Defense Medicare-Eligible Retiree Health Care Board of Actuaries (''the Board'').

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703–692–5952.

SUPPLEMENTARY INFORMATION: The Board's charter is being renewed under the provisions of 10 U.S.C. 1114(a)(1) and in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102–3.50(a). The Board's charter and contact information for the Board's Designated Federal Officer (DFO) can be found at *http://www.facadatabase.gov/.*

The Board provides independent advice and recommendations related to actuarial matters associated with the Department of Defense Medicare-Eligible Retiree Health Care Fund (''the Fund'') and other related matters. The Board, pursuant to 10 U.S.C. 1115(c), shall report to the Secretary of Defense annually on the actuarial status of the Fund and shall furnish its advice and opinion on matters referred to it by the Secretary of Defense.

The Board consists of three members from among qualified professional actuaries who are members of the Society of Actuaries. All members of the Board are appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Special Government Employee members are entitled, pursuant to 10 U.S.C. 1114(a)(3), to receive pay at the daily equivalent of the annual rate of basic pay of the highest rate of basic pay under the General Schedule of subchapter III of chapter 53 of 5 U.S.C., for each day the member is engaged in the performance of duties vested in the Board. All members are entitled to reimbursement for official Board-related travel and per diem.

The public or interested organizations may submit written statements to the Board membership about the Board's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the Board. All written statements shall be submitted to the DFO for the Board, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: December 20, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DOD–2016–OS–0118]

Privacy Act of 1974; System of Records

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Notice to alter a System of Records.

SUMMARY: Pursuant to the Privacy Act of 1974, and Office of Management and Budget (OMB) Circular No. A–130, notice is hereby given that the Department of Defense proposes to change a system of records, WUSU 07, ''USUHS Grievance Records,'' last published at 79 FR 40076 on July 11, 2014. This system of records is used to administer and process grievances filed by Uniformed Services University of the Health Sciences (USUHS) employees. Department of Defense (DoD) employees, including USUHS employees, are entitled to present disputes under the DoD Administrative Grievance System and have them considered expeditiously, fairly, and impartially, and have them be resolved as quickly as possible. The data is also used to produce statistical and management reports for USUHS leadership.

Changes to the system of record notice include rewording of the system name and categories of individuals. The notification, record access, and contesting record procedures have been updated to ensure the information is accurate and current. To provide clarity to the public, the applicable routine uses are now delineated, and the purpose has been revised to state that this system of records covers all USUHS employees, not just those covered by a collective bargaining agreement. In addition, minor administrative corrections were made to the system location and safeguards.

DATES: Comments will be accepted on or before January 23, 2017. This proposed action will be effective the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

* *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate of Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mrs. Luz D. Ortiz, Chief, Records, Privacy and Declassification Division (RPD2), 1155 Defense Pentagon, Washington, DC 20301–1155, or by phone at (571) 372–0478.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy, Civil Liberties, and Transparency Division Web site at *http://dpcld.defense.gov/.*

The proposed system report, as required by U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was submitted on December 7, 2016, to the House Committee on Oversight and Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4 of Appendix I to OMB Circular No. A–130, ''Federal Agency Responsibilities for Maintaining Records About Individuals,'' revised November 28, 2000 (December 12, 2000 65 FR 77677).

Dated: December 20, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Delete entry and replace with ''Uniformed Services University of the Health Sciences Grievance Records (July 11, 2014, 79 FR 40076).''

SYSTEM LOCATION:

Delete entry and replace with ''Uniformed Services University of the Health Sciences (USUHS), Civilian Human Resources Directorate (CHR), 4301 Jones Bridge Road, Bethesda, MD 20814–4712.''

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with ''USUHS employees who have submitted grievances.''

* * * * *

PURPOSE(S):

Delete entry and replace with ''To track, analyze and mitigate grievances filed by USUHS employees. Utilizing this information allows USUHS civilian personnel employer relations officers to track grievances, to analyze findings from an investigation, and to research the success and/or failure of mitigation efforts.''

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with ''In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, the records contained herein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3).

LAW ENFORCEMENT ROUTINE USE:

If a system of records maintained by a DoD Component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the agency concerned, whether federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

DISCLOSURE WHEN REQUESTING INFORMATION ROUTINE USE:

A record from a system of records maintained by a DoD Component may be disclosed as a routine use to a federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a DoD Component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

DISCLOSURE OF REQUESTED INFORMATION ROUTINE USE:

A record from a system of records maintained by a DoD Component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

CONGRESSIONAL INQUIRIES DISCLOSURE ROUTINE USE:

Disclosure from a system of records maintained by a DoD Component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT ROUTINE USE:

A record from a system of records subject to the Privacy Act and maintained by a DoD Component may be disclosed to the Office of Personnel Management (OPM) concerning information on pay and leave, benefits, retirement deduction, and any other information necessary for the OPM to carry out its legally authorized government-wide personnel management functions and studies.

DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION ROUTINE USE:

A record from a system of records maintained by a DoD Component may be disclosed as a routine use to any component of the Department of Justice

for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

DISCLOSURE OF INFORMATION TO THE NATIONAL ARCHIVES AND RECORDS ADMINISTRATION ROUTINE USE:

A record from a system of records maintained by a DoD Component may be disclosed as a routine use to the National Archives and Records Administration for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

DISCLOSURE TO THE MERIT SYSTEMS PROTECTION BOARD ROUTINE USE:

A record from a system of records maintained by a DoD Component may be disclosed as a routine use to the Merit Systems Protection Board, including the Office of the Special Counsel for the purpose of litigation, including administrative proceedings, appeals, special studies of the civil service and other merit systems, review of OPM or component rules and regulations, investigation of alleged or possible prohibited personnel practices; including administrative proceedings involving any individual subject of a DoD investigation, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

DATA BREACH REMEDIATION PURPOSES ROUTINE USE:

A record from a system of records maintained by a Component may be disclosed to appropriate agencies, entities, and persons when (1) The Component suspects or has confirmed that the security or confidentiality of the information in the system of records has been compromised; (2) the Component has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Component or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Components efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.''

* * * * *

SAFEGUARDS:

Delete entry and replace with ''Records are maintained in locked file cabinets, with access restricted to authorized USUHS employees who have a demonstrated need-to-know.''

* * * * *

NOTIFICATION PROCEDURE:

Delete entry and replace with ''Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Chief, Workforce Relations Division, Civilian Human Resources Directorate, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, MD 20814–4712.

Signed, written requests should contain the full name, address and the signature of the subject individual, along with the name and number of this system of records notice.

In addition, the requester must provide a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: 'I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).'

If executed within the United States, its territories, possessions, or commonwealths: 'I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).' ''

RECORD ACCESS PROCEDURES:

Delete entry and replace with ''Individuals seeking access to information about themselves contained in this system should address written inquiries to the Office of the Secretary of Defense/Joint Staff, Freedom of Information Act Requester Service Center, Office of Freedom of Information, 1155 Defense Pentagon, Washington, DC 20301–1155.

Signed, written requests should contain the full name, address and the signature of the subject individual, along with the name and number of this system of records notice.

In addition, the requester must provide a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: 'I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).'

If executed within the United States, its territories, possessions, or commonwealths: 'I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).' ''

CONTESTING RECORD PROCEDURES:

Delete entry and replace with ''The Office of the Secretary of Defense (OSD) rules for accessing records, contesting contents and appealing initial agency determinations are contained in OSD Administrative Instruction 81; 32 CFR part 311; or may be obtained from the system manager.''

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army, U.S. Army Corps of Engineers

Public Scoping Meeting and Intent To Prepare an Environmental Impact Statement for Proposed Pascagoula River Drought Resiliency Project, George County and Jackson County, Mississippi

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers, Mobile District (USACE) has received an application (File Number SAM–2014–00653–MBM) for a Department of Army Permit from the Pat Harrison Waterway District and George County Board of Supervisors to construct two water supply lakes: A 1,715-acre upper lake on Little Cedar Creek and a 1,153-acre lower lake on Big Cedar Creek, in George and Jackson Counties, Mississippi. The applicant believes that the proposed water supply lakes are needed to supply water to the Pascagoula River during future extreme droughts resulting from the effects of climate change and to maintain flow regimes necessary to meet critical environmental, ecological, and economic needs. The applicant estimates that the proposed project would impact approximately 1,201.7 acres of wetlands, 41.6 miles of stream channels, and 24.8 acres of open water. Based on the potential impacts, both individually and cumulatively, the USACE intends to prepare an Environmental Impact Statement (EIS) in compliance with the National Environmental Policy Act to render a final decision on the permit application. The purpose of this Notice of Intent is to inform the public, agencies, and organizations of the time and location of the public scoping meeting and invite public participation in the

Environmental Impact Statement (EIS) process.

DATES: The scoping period will commence with the publication of this notice. This scoping period for providing comments on relevant issues and factors that should be considered for study in the EIS will end on February 6, 2017.

ADDRESSES: You may submit written comments by mail to the U.S. Army Corps of Engineers, ATTN: Regulatory Division, Post Office Box 2288, Mobile, AL 36628. You may submit written comments by email to *michael.b.moxey@usace.army.mil* or submit online at *http://www.georgecountylakesEIS.com*. Documents pertinent to the proposed project may be examined at the Web site located at *http://www.georgecountylakesEIS.com*.

FOR FURTHER INFORMATION CONTACT: Mr. Michael B. Moxey, Special Projects Manager, U.S. Army Corps of Engineers, at (251) 694–3771.

SUPPLEMENTARY INFORMATION: The USACE Mobile District intends to prepare an EIS on the proposed Pascagoula River Drought Resiliency Project. The Pat Harrison Waterway District and the George County Board of Supervisors propose this project and are co-applicants for the Department of the Army Permit (Application Number SAM–2014–00653–MBM). The primary Federal involvement associated with the proposed action is the discharge of dredge or fill material into waters of the United States, including jurisdictional wetlands and streams pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344).

1. *Background:* The applicant proposes to construct two water supply lakes located in south George County and north Jackson County, Mississippi as a drought resiliency project. The proposed upper dam is located on Little Cedar Creek, and the proposed lower dam is located on Big Cedar Creek; both tributaries to the Pascagoula River. The applicant's stated purpose for the two water storage lakes is to provide secondary water sources to sustain the Pascagoula River at a target minimum flow of 917 cubic feet per second (CFS) as measured at the U.S. Geological Survey (USGS) gage station 02479000 on the Pascagoula River at Merrill, Mississippi during extreme prolonged drought conditions through 2060. The applicant believes that the effects of climate change will increase drought severity, frequency and duration in the future. Severe prolonged droughts occurred in 1936 and in 2000. In 2007 the Pascagoula River fell below 917 CFS in mid-November, while in 2011 the Pascagoula River approached 917 CFS in mid-June and fell below 917 CFS for a brief time in early September. Water from the Okatibbee Reservoir, located in Lauderdale County, Mississippi, has been used to augment stream flows during low flow events prior to 2000. The applicant proposes to release water from the two connected lakes when insufficient flow occurs, to sustain the target 917 cubic feet per second (CFS) minimum flows in the Pascagoula River during prolonged severe droughts. The applicant would also strive to sustain recreational uses on both lakes to the greatest extent possible.

2. *Scoping and Public Involvement Process:* The purpose of the Environmental Impact Statement (EIS) scoping process is to identify relevant issues and factors that will affect the scope of the environmental analysis and alternatives in the EIS. All previous comments received by from Federal and state agencies, professional environmental organizations, and the public are being evaluated in this scoping procedure. Based on comments already received in response to the September 4, 2015 public notice, some areas of potential significant impact that may need to be studied in detail during the EIS process could include, but are not limited to the following:

(a) Proposed water storage and availability;

(b) Stream hydrologic and hydraulic regimes;

(c) Secondary and cumulative Impacts;

(d) Alternatives to the proposed action;

(e) Threatened and Endangered Species;

(f) Fish, wildlife, and critical habitats;

(g) Cultural resources/historic properties;

(h) Water quality;

(i) Impacts to wetlands and streams;

(j) Mitigation.

3. *Purpose and Need:* The applicant's stated purpose for the two connected lakes is to provide sufficient surface water storage to (1) restore the sub-surface water table levels and to (2) allow the stored water to be released as needed during extreme prolonged droughts to maintain the Pascagoula River flow above the established minimum of 917 CFS as measured at the USGS gage station 02479000 located on the Pascagoula River at Merrill, Mississippi through 2060, in light of projected more frequent, severe and longer droughts in the basin due to the effects of climate change. The applicant stated that maintaining the minimum 7Q10 flow (the lowest 7-day average flow that occurs on average once every 10 years) of 917 CFS is necessary for the river to meet critical environmental, ecological, and economic needs. In addition to its primary drought resiliency purpose, the Pat Harrison Waterway District proposes to operate and maintain the lakes for public recreational use.

4. *Alternatives:* An evaluation of alternatives to the applicant's preferred alternative initially being considered includes a No Action alternative, alternatives that would avoid, minimize and compensate for impacts to the aquatic environment, alternatives utilizing other best management practices, and other reasonable alternatives developed through the project scoping process that may also meet the identified purpose and need. Reasonable alternatives could include, but are not limited to, alternate site locations for the lake, alternate site layouts that may have less impact on the environment, alternate sources of water to supplement flow in the Pascagoula River, or alternate practices to mitigate low flow events in the Pascagoula River. The scoping and evaluation phase of the EIS process will help in the determination of reasonable alternatives to be studied in details for the project.

5. *Additional Resources to be Evaluated:* Resource areas to be evaluated that have been identified to date include the following: Potential direct effects to waters of the United States including aquatic species, environmental justice, socioeconomic environment, recreation and recreational resources, aesthetics, public health and safety, navigation, erosion and accretion, cumulative impacts, public benefit and needs of the people along with potential effects on the human environment.

6. *Public Scoping Meeting:* A public scoping meeting will be held on January 24, 2017, from 5:00–8:00 p.m. at the George County Senior Citizens Building, 7102 Highway 198 East, Lucedale, MS 39452. The scoping meeting will begin with an informal open house from 5:00 p.m. to 6:30 p.m. to allow review of project information presented as board displays and other materials. At 6:30 p.m., the U.S. Army Corps of Engineers (USACE) will provide an informal presentation on the proposed project, and discuss the Environmental Impact Statement (EIS) process. The USACE is soliciting comments from all interested parties on issues and factors that should be considered for the scope and content of the EIS. The USACE will announce the public scoping meeting through local news media and the Web page at

http://www.georgecountylakesEIS.com at least 15 days prior to the meeting. Comments are encouraged from the public as well as Federal, state, and local agencies and officials, Indian tribes, and other interested parties so that the scope of the EIS may be properly identified.

7. *Coordination:* The proposed action is being coordinated with a number of Federal and State agencies, including the U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service, Mississippi Department of Environmental Quality, and Mississippi Department of Marine Resources. These agencies were requested by the USACE to be cooperating agencies for the EIS per Council on Environmental Quality regulations at 40 CFR 1501.6. Collaboration with other agencies, including state resource protection agencies, is anticipated during the EIS process.

8. *Availability of the Draft EIS:* The U.S. Army Corps of Engineers will advertise the availability of a Draft Environmental Impact Statement when it becomes available for the public review.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare an Integrated Feasibility Study/Environmental Impact Statement for the San Francisquito Creek Flood Risk Management Study, San Mateo and Santa Clara Counties, CA

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The Department of the Army and the San Francisquito Creek Joint Powers Authority (SFCJPA) hereby give notice of intent to prepare an integrated Feasibility Study/Environmental Impact Statement (FS/EIS) for the San Francisquito Creek Flood Risk Management Project in San Mateo and Santa Clara Counties, CA to consider opportunities to reduce fluvial flooding, to reduce the risk to public safety due to flooding consistent with protecting the Nation's environment, in accordance with national environmental statutes, applicable executive orders, and other Federal planning requirements. The U.S. Army Corps of Engineers (USACE) is the lead agency for this project under NEPA. The SFCJPA is the lead agency for this project under the California Environmental Quality Act (CEQA) and will be preparing a separate Environmental Impact Report (EIR).

DATES: Written comments from all interested parties are encouraged and must be received on or before 5:00 p.m. on February 17, 2017.

ADDRESSES: Written comments and requests for information should be sent to Eric Jolliffe, U.S. Army Corps of Engineers, San Francisco District, 1455 Market St., 17th floor, San Francisco, CA 94103, *eric.f.jolliffe@usace.army.mil*.

FOR FURTHER INFORMATION CONTACT: Mr. Eric Jolliffe, (415) 503–6869.

SUPPLEMENTARY INFORMATION: The San Francisquito Creek watershed encompasses an area of approximately 45 square miles, extending from the ridge of the Santa Cruz Mountains to San Francisco Bay in California. The majority of the watershed lies in the Santa Cruz Mountains and Bay Foothills northwest of Palo Alto; the remaining 7.5 square miles lie on the San Francisquito alluvial fan near San Francisco Bay.

The San Francisquito Creek watershed contains mainstem San Francisquito Creek and the main tributary streams of West Union Creek, Corte Madera Creek, Bear Creek and Los Trancos Creek. Los Trancos Creek and lower San Francisquito Creek form the boundary between San Mateo and Santa Clara counties. The reaches are divided up as follows: Reach 1 extends from San Francisco Bay to the upstream face of Highway 101; Reach 2 extends from Highway 101 to El Camino Real; Reach 3 continues from El Camino Real to Sand Hill Road; and Reach 4 continues from Sand Hill Road to the ridge of the Santa Cruz Mountains. This FS/EIS will investigate flood risk management solutions related to breakout flow in Reach 2 only. The entire watershed will be considered when developing solutions to address flooding in Reach 2.

The non-Federal sponsor for the Feasibility phase of the study is the SFCJPA. The SFCJPA is comprised of the following member agencies: the City of Palo Alto; the City of Menlo Park; the City of East Palo Alto; the Santa Clara Valley Water District; and the San Mateo County Flood Control District.

1. Background. The carrying capacity of San Francisquito Creek is affected by the presence of development, vegetation, sedimentation, land subsidence, levee settlement, erosion, and culverts and bridges in the project area. Erosion has caused the undermining of roads and structures in many places throughout the watershed. Flooding on San Francisquito Creek affects the cities of Menlo Park and East Palo Alto in San Mateo County, and the city of Palo Alto in Santa Clara County.

Flooding from San Francisquito Creek has been a common occurrence. The most recent flood event occurred in December 2012, and the flood of record occurred in February 1998, when the Creek overtopped its banks in several areas, affecting approximately 1,700 residential and commercial structures and causing more than $26.6 million in property damages. After these floods, the SFCJPA was formed to pursue flood control and restoration opportunities in the area.

The current USACE Feasibility Study is a continuation of the authority passed on May 22, 2002 by the Committee on Transportation and Infrastructure of the United States House of Representatives, which is in accordance with Section 4 of the Flood Control Act of 1941. The resolution reads as follows:

''*Resolved by the Committee on Transportation and Infrastructure of the United States House of Representatives, That, the Secretary of the Army, in accordance with Section 4 of the Flood Control Act of 1941, is hereby requested to conduct a study of the Guadalupe River and Tributaries, California, to determine whether flood damage reduction, environmental restoration and protection, storm water retention, water conservation and supply, recreation and other allied purposes are advisable in the interest of the San Francisquito Creek Watershed, including San Francisquito Creek, Santa Clara and San Mateo Counties, California.*''

2. Proposed Action. The integrated FS/EIS will consider the environmental impact of potential flood risk management projects with the end goal of reducing flood damage in the San Francisquito Creek Watershed.

3. Project Alternatives. The integrated FS/EIS will include four alternatives.

a. *No Action:* Alternative 1 is the No Action Plan. With the No Action Plan (which is the ''Future Without-Project Condition''), it is assumed that no long-term actions would be taken to reduce flood damage along San Francisquito Creek; flood control improvements would consist of emergency fixes to damage areas, consistent with available funding.

b. Alternative 2 includes replacing bridges and widening channel constriction points to provide additional channel capacity in Reach 2 between Highway 101 and El Camino Real. Under this alternative, bridges and channel constrictions or ''bottlenecks''

that cause creek flows to back up and rise would be widened to increase channel conveyance and thus reduce water surface elevation. Included in this widening is a proposed project element to align the channel with a CalTrans project to increase flow capacity at Highway 101 and adjacent frontage roads. Impacts from these activities will be evaluated in the FS/EIS.

c. Alternative 3 includes constructing floodwalls along the channel. This Alternative would consider the addition of floodwalls in Reach 2 as a stand-alone measure and in combination with the bridge replacement and channel widening in Alternative 2.

d. Alternative 4 would consider the addition of a bypass culvert as a stand-alone measure and in combination with the bridge replacement and channel widening in Alternative 2. This alternative may include floodwalls, though at a reduced scale compared to Alternative 3. This alternative includes a new bypass inlet located a few hundred feet upstream from University Avenue that would divert high flows to a culvert beneath Woodland Avenue or a street in Palo Alto. A box culvert would follow a roadway in the downstream direction for approximately 1.0 to 1.5 miles to an outlet structure where high flows would be returned to the creek.

4. Environmental Considerations. In all cases, environmental considerations will include riparian habitat, aquatic habitat, sediment budget, fish passage, recreation, public access, aesthetics, cultural resources, and environmental justice as well as other potential environmental issues of concern.

5. Scoping Process. The USACE and SFCJPA are seeking input from interested federal, state, and local agencies, Native American representatives, and other interested private organizations and parties through provision of this notice and holding of a scoping meeting. The purpose of this meeting is to solicit input regarding the environmental issues of concern and the alternatives that should be discussed in the integrated FS/EIS. The public scoping meeting will be held on January 18, 2017 at 6:30 p.m. at the Laurel School Upper Campus, 275 Elliott Drive in Menlo Park, CA.

6. Availability of integrated FS/EIS. The public will have an additional opportunity in the NEPA process to comment on the proposed alternatives after the draft integrated FS/EIS is released to the public in 2017. It is being issued pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500–1508).

John C. Morrow,

Lieutenant Colonel, Corps of Engineers District Engineer.

[FR Doc. 2016–30985 Filed 12–22–16; 8:45 am]

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for the Matagorda Ship Channel, TX, Feasibility Study

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent.

SUMMARY: The U.S. Army Corps of Engineers (USACE) intends to prepare a Draft Integrated Feasibility Report and Environmental Impact Statement (DIFR–EIS) to assess the social, economic and environmental effects of widening and deepening the Matagorda Ship Channel (MSC) in Calhoun and Matagorda counties, Texas. The DIFR–EIS will evaluate potential impacts of a range of alternatives, including the No Action alternative, structural and non-structural alternatives which address proposed navigation improvements in the study area. The DIFR–EIS will also present an assessment of impacts associated with the placement of dredged material, including potential new upland, confined placement areas, beneficial use of dredged material sites, and at Ocean Dredged Material Disposal Sites (ODMDS). The U.S. Environmental Protection Agency, as the lead Federal agency for designation of an ODMDS under Section 102 of the Marine Protection, Research and Sanctuaries Act of 1972, will utilize this assessment and public comments on the DIFR–EIS to evaluate the potential designation of a new ODMDS. The non-Federal sponsor for the study is the Calhoun Port Authority.

DATES: Comments on the scope of the DIFR–EIS will be accepted through February 13, 2017.

ADDRESSES: Scoping comments may be sent to: *MSC-Feasibility@usace.army.mil* or to USACE, Galveston District, (Attn: RPEC Coastal Section), P.O. Box 1229, Galveston, TX 77553–1229.

FOR FURTHER INFORMATION CONTACT: Galveston District Public Affairs Office at 409–766–3004 or *swgpao@usace.army.mil.*

SUPPLEMENTARY INFORMATION:

1. *Authority.* The study is authorized under Section 216 of the 1970 Rivers and Harbor Act, Public Law 91–611, 91st Congress, H.R. 19877, dated 31 December 1970.

2. *Proposed Action.* The study will evaluate a range of alternatives for deepening and widening the MSC from offshore in the Gulf of Mexico (Gulf) through the Point Comfort turning basin. Modifications to the existing 26-mile long navigation channel are needed to reduce transportation costs and increase operational efficiencies of maritime commerce movement through the channel. The existing MSC is comprised of an entrance channel about 4 miles long from the Gulf through a man-made cut across Matagorda Peninsula. The bayside channel is about 22 miles long across Matagorda and Lavaca Bays to Point Comfort with a turning basin at Point Comfort. Offshore and through the Matagorda Peninsula, the channel has a 300-foot bottom width and is maintained at a depth of 40 feet mean lower low water (MLLW). Generally, in Matagorda and Lavaca Bays, the channel has a 200-foot wide bottom width and is authorized to a project depth of 38 feet MLLW. In addition to No Action, specific alternatives to be evaluated are expected to include nonstructural measures, structural alternatives to modify the bayside channels of the MSC at depths ranging from –38 feet to –50 feet MLLW and at widths ranging from 200 feet to 400 feet, and alternatives to modify and extend the Entrance Channel to depths ranging from –40 feet to –55 fee MLLW and at widths ranging from 300 feet to 600 feet. The DIFR–EIS will also evaluate the impacts and potential benefits of a dredged material management plan (DMMP) for the material that would generated by construction and operation of the modified channel.

3. *Scoping.* A scoping meeting will be held on January 24, 2017 at the Bauer Civic Center, 2300 Highway 35 North, Port Lavaca, TX 77979, from 5:30 to 7:30 p.m. USACE requests public scoping comments to: (a) Identify the affected public and agency concerns; (b) identify the scope of significant issues to be addressed in the DIFR–EIS; (c) identify the critical problems, needs, and significant resources that should be considered in the DIFR–EIS; and (d) identify reasonable measures and alternatives that should be considered in the DIFR–EIS. Scoping comments are requested to be postmarked by February 13, 2017.

4. *Coordination.* Further coordination with environmental agencies will be conducted under the National

Environmental Policy Act, the Fish and Wildlife Coordination Act, the Clean Water Act, the Clean Air Act, the National Historic and Preservation Act, the Magnuson-Stevens Fishery Conservation and Management Act, the Marine Protection, Research and Sanctuaries Act and the Coastal Zone Management Act under the Texas Coastal Management Program, among others.

5. *Availability of DIFR–EIS.* The DIFR–EIS is currently scheduled for release for public review and comment in April 2018.

Dated: December 14, 2016.

Lars N. Zetterstrom,

Colonel, U.S. Army, Commanding.

BILLING CODE 3720–58–P

DEPARTMENT OF EDUCATION

[Docket ID ED–2016–OM–0108]

Privacy Act of 1974; System of Records

AGENCY: Office of Management, Department of Education.

ACTION: Notice of an altered system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (Privacy Act), the Department of Education (the Department or ED) publishes this notice of an altered system of records entitled ''Student Loan Repayment Benefits Case Files'' (18–05–15). The system contains records and related correspondence on employees who are being considered for student loan repayment benefits under the Department's Personnel Manual Instruction 537–1 entitled ''Repayment of Federal Student Loans,'' as well as individuals who have been approved for and are receiving such benefits. The information maintained in the system of records entitled ''Student Loan Repayment Benefits Case Files'' consists of one or more of the following: Request letters from selecting officials or supervisors with supporting documentation; employees' (or potential employees') names, home and work addresses, Social Security numbers, student loan account numbers, loan balances, repayment schedules, repayment histories, and repayment status; and the loan holders' names, addresses, and telephone numbers. The information that will be maintained in the altered system of records will be collected through various sources, including directly from the individual to whom the information applies, lending institutions holding student loans for the individual to whom the information applies, officials of the Department, and official Department documents.

DATES: Submit your comments on this altered system of records notice on or before January 23, 2017.

The Department filed a report describing the altered system of records covered by this notice with the Chair of the Senate Committee on Homeland Security and Governmental Affairs, the Chair of the House Committee on Oversight and Government Reform, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), on December 15, 2016. This altered system of records will become effective on the later of: (1) The expiration of the 40-day period for OMB review on January 24, 2017 unless OMB waives 10 days of the 40-day review period for compelling reasons shown by the Department; or (2) January 23, 2017, unless the altered system of records notice needs to be changed as a result of public comment or OMB review. The Department will publish any changes resulting from public comment or OMB review.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the ''help'' tab.
- *Postal Mail, Commercial Delivery, or Hand Delivery:* If you mail or deliver your comments about this altered system of records, address them to: Cassandra Cufee-Graves, Director, Office of Human Resources, Learning and Development Division, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202–4573.

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record: On request, we will supply an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for this notice. If you want to schedule an appointment for this type of aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Cassandra Cufee-Graves, Director, Office of Human Resources, Learning and Development Division. Telephone: (202) 453–5588.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), you may call the Federal Relay Service (FRS) at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Introduction: The Privacy Act (5 U.S.C. 552a) requires the Department to publish in the **Federal Register** this notice of an altered system of records maintained by the Department. The Department's regulations implementing the Privacy Act are contained in the Code of Federal Regulations (CFR) in 34 CFR part 5b. The Privacy Act applies to information about an individual that contains individually identifiable information that is retrieved by a unique identifier associated with each individual, such as a name or Social Security number. The information about each individual is called a ''record,'' and the system, whether manual or computer-based, is called a ''system of records.'' The Privacy Act requires each agency to publish notices of systems of records in the **Federal Register** and to prepare reports for OMB whenever the agency publishes a new system of records or makes a significant change to an established system of records. Each agency is also required to send copies to the Chair of the Senate Committee on Governmental Affairs and the Chair of the House Committee on Government Reform. These reports are intended to permit an evaluation of the probable or potential effect of the proposal on the privacy or other rights of individuals.

The Student Loan Repayment Benefits Case Files (18–05–15) system of records was last published in the **Federal Register** on May 29, 2002 (67 FR 37411). The system is being altered to add a routine use to permit the Department to make a disclosure in the case of a breach of personally identifiable information in the system as well as a routine use to

permit the Department to make a disclosure to labor organizations when relevant and necessary to their duties of exclusive representation. We are also making changes to how the information is stored, noting that hard copy files are stored in locked file cabinets and electronic files are stored on the SharePoint platform on the Department's network. There are also updates in retrievability as records can be retrieved by name or the ED organization that the individual is employed by, as well as added references to SharePoint in the explanation of the system of record's safeguarding of information.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: December 19, 2016.

Andrew Jackson,

Assistant Secretary for Management.

18–05–15

SYSTEM NAME:

Student Loan Repayment Benefits Case Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Office of Human Resources, Learning and Development Division, Office of Management, U.S. Department of Education (Department), 400 Maryland Avenue SW., Washington, DC 20202–4573.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system contains records and related correspondence on employees who are being considered for student loan repayment benefits under the Department's Personnel Manual Instruction 537–1 entitled ''Repayment of Federal Student Loans,'' as well as individuals who have been approved for and are receiving such benefits.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains correspondence and other documents related to requests made by selecting officials or supervisors to offer student loan repayment benefits to recruit or retain highly qualified employees. This system contains: (1) Request letters from selecting officials or supervisors with supporting documentation; (2) employees' (or potential employees') names, home and work addresses, Social Security numbers, student loan account numbers, loan balances, repayment schedules, repayment histories, and repayment status; and (3) the loan holders' names, addresses, and telephone numbers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Floyd D. Spence National Defense Authorization Act of Fiscal Year 2001 (Pub. L. 106–398); 5 U.S.C. 5379, as amended, and implementing regulations at 5 CFR part 537.

PURPOSE(S):

These records are maintained to determine eligibility and benefits and to process requests to offer student loan repayment benefits to employees under authority set forth at 5 U.S.C. 5379. The Department uses these records to prepare its reports for the Office of Personnel Management (OPM) as is required by 5 CFR 537.110. The Department will also refer information from this system to loan holders for collection activities in the case of any student loan default or delinquency that becomes known to the Department in the course of determining an employee's (or potential employee's) eligibility for student loan repayment benefits because of the Department's mission responsibilities for Federal student loan programs and its role in promoting their responsible use by student borrowers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Department may disclose information contained in a record in this system of records under the routine uses listed in this system of records without the consent of the individual if the disclosure is compatible with the purposes for which the record was collected. These disclosures may be made on a case-by-case basis or, if the Department has complied with the computer matching requirements of the Privacy Act of 1974, as amended (Privacy Act), under a computer matching agreement.

(1) *Personnel Management Disclosure.* The Department may disclose as a routine use to OPM any records or information in this system of records that OPM requests or requires pursuant to OPM's oversight and regulatory functions.

(2) *Salary Offset or Debt Collection Disclosures.* The Department may disclose records in this system to other Federal agencies, hearing or court officials, and present employers of an employee in order for the Department to obtain repayment, if an employee fails to complete the period of employment under a service agreement and fails to reimburse the Department the amount of any student loan repayment benefits the employee received from the Department.

(3) *Disclosure to Other Federal Agencies.* The Department may disclose records in this system to its payroll processing provider in order to calculate tax withholdings and disburse payments of student loan repayment benefits to loan holders on behalf of employees approved to receive this benefit.

(4) *Disclosure to Student Lending Institutions or Loan Holders.* The Department may disclose to student lending institutions or loan holders records from this system as a routine use disclosure in order to obtain information (such as the borrower's account number, original and current loan balance, repayment schedule, repayment history, and current repayment status) to allow the Department to determine an employee's or potential employee's initial and continuing eligibility for this benefit, to facilitate accurate payments to student loan holders on behalf of eligible employees, and to ensure the Department discontinues making student loan repayments to individuals who do not remain eligible for them during the period of the service agreement. The Department also may disclose to loan holders records from this system of records as a routine use disclosure in the event it becomes known to the Department during the course of its program eligibility determinations that an individual is past due, delinquent, or in default of a federally insured student loan so that the Department can facilitate the loan holder's collection of any past due, delinquent, or defaulted student loans,

because of the Department's mission responsibilities for Federal student loan programs and its role in promoting their responsible use by student borrowers.

(5) *Disclosure for Use by Other Law Enforcement Agencies.* The Department may disclose information to any Federal, State, local, or foreign agency, or other public authority responsible for enforcing, investigating, or prosecuting violations of administrative, civil, or criminal law or regulation, if that information is relevant to any enforcement, regulatory, investigative, or prosecutorial responsibility within the receiving entity's jurisdiction.

(6) *Enforcement Disclosure.* In the event that information in this system of records indicates, either on its face or in connection with other information, a violation or potential violation of any applicable statute, regulation, or order of a competent authority, the Department may disclose the relevant records to the appropriate agency, whether foreign, Federal, State, tribal, or local, charged with the responsibility of investigating or prosecuting that violation or charged with enforcing or implementing the statute, executive order, rule, regulation, or order issued pursuant thereto.

(7) *Litigation and Alternative Dispute Resolution (ADR) Disclosures.*

(a) *Introduction.* In the event that one of the parties listed below is involved in litigation or ADR, or has an interest in litigation or ADR, the Department may disclose certain records to the parties described in paragraphs (b), (c) and (d) of this routine use under the conditions specified in those paragraphs:

(i) The Department, or any component of the Department; or

(ii) Any Department employee in his or her official capacity; or

(iii) Any Department employee in his or her individual capacity if the Department of Justice (DOJ) has agreed or has been requested to provide or arrange for representation for the employee;

(iv) Any Department employee in his or her individual capacity where the Department requests representation for or has agreed to represent the employee; or

(v) The United States where the Department determines that the litigation is likely to affect the Department or any of its components.

(b) *Disclosure to the DOJ.* If the Department determines that disclosure of certain records to the DOJ is relevant and necessary to litigation or ADR, the Department may disclose those records as a routine use to the DOJ.

(c) *Adjudicative Disclosures.* If the Department determines that disclosure of certain records to an adjudicative body before which the Department is authorized to appear, or an individual or entity designated by the Department or otherwise empowered to resolve or mediate disputes, is relevant and necessary to litigation or ADR, the Department may disclose those records as a routine use to the adjudicative body, individual, or entity.

(d) *Parties, Counsels, Representatives, and Witnesses.* If the Department determines that disclosure of certain records to a party, counsel, representative, or witness is relevant and necessary to litigation or ADR, the Department may disclose those records as a routine use to the party, counsel, representative, or witness.

(8) *Employment, Benefit, and Contracting Disclosure.*

(a) *For Decisions by the Department.* The Department may disclose a record to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent records, or to another public authority or professional organization, if necessary to obtain information relevant to a Department decision concerning the hiring or retention of an employee or other personnel action, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

(b) *For Decisions by Other Public Agencies and Professional Organizations.* The Department may disclose a record to a Federal, State, local, or foreign agency or other public authority or professional organization, in connection with the hiring or retention of an employee or other personnel action, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit, to the extent that the record is relevant and necessary to the receiving entity's decision on the matter.

(9) *Employee Grievance, Complaint, or Conduct Disclosure.* The Department may disclose a record in this system of records to another agency of the Federal Government if the record is relevant to one of the following proceedings regarding a present or former employee of the Department: A complaint, a grievance, or a disciplinary or competency determination proceeding. The disclosure may only be made during the course of the proceeding.

(10) *Freedom of Information Act (FOIA) and Privacy Act Advice Disclosure.* The Department may disclose records to DOJ or the Office of Management and Budget (OMB) if the Department concludes that disclosure is desirable or necessary in determining whether particular records are required to be disclosed under the FOIA or the Privacy Act.

(11) *Disclosure to the Department of Justice.* The Department may disclose records to the DOJ to the extent necessary for obtaining DOJ advice on any matter relevant to an audit, inspection, or other inquiry related to the program covered by this system.

(12) *Congressional Member Disclosure.* The Department may disclose records to a member of Congress from the record of an individual in response to an inquiry from the member made at the written request of that individual. The member's right to the information is no greater than the right of the individual who requested it.

(13) *Contract Disclosure.* If the Department contracts with an entity for the purposes of performing any function that requires disclosure of records in this system to employees of a contractor, the Department may disclose the records to those employees. Before entering into such a contract, the Department shall require the contractor to maintain Privacy Act safeguards as required under 5 U.S.C. 552a(m) with respect to the records in the system.

(14) *Disclosure in the Course of Responding to a Breach of Data.* The Department may disclose records from this system to appropriate agencies, entities, and persons when: (a) The Department suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (b) the Department has determined that as a result of the suspected or confirmed compromise, there is a risk of harm to economic or property interests, identity theft, fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

(15) *Labor Organization Disclosure.* The Department may disclose records from this system of records to an arbitrator to resolve disputes under a negotiated grievance procedure or to officials of labor organizations recognized under 5 U.S.C. chapter 71 when relevant and necessary to their duties of exclusive representation.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): The Department may disclose to a consumer reporting agency information regarding a claim by the Department that is determined to be valid and overdue as follows: (1) The name, address, taxpayer identification number, and other information necessary to establish the identity of the individual responsible for the claim; (2) the amount, status, and history of the claim; and (3) the program under which the claim arose. The Department may disclose the information specified in this paragraph under 5 U.S.C. 552a(b)(12) and the procedures contained in subsection 31 U.S.C. 3711(e). A consumer reporting agency to which these disclosures may be made is defined at 31 U.S.C. 3701(a)(3).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in hard copy in locked file cabinets and electronically on the SharePoint platform, which runs on the Department's network (EDUCATE).

RETRIEVABILITY:

Records are retrievable by the name of the individual or by the organization within the Department where the individual works.

SAFEGUARDS:

All physical access to the building where this system of records is maintained is controlled and monitored by security personnel who check each individual entering the building for an employee or visitor badge. Hard copy records are stored in locked metal filing cabinets, with access limited to personnel whose duties require access. Electronic records are stored on the SharePoint network, which runs on the Department's network (EDUCATE). The network complies with the security controls and procedures described in the Federal Information Security Management Act (FISMA), National Institute of Standards and Technology (NIST) Special Publications, and Federal Information Processing Standards (FIPS). Some specific security controls in place include:

Operating systems and infrastructure devices are hardened in accordance with NIST and Department guidance.

Intrusion Detection Systems are deployed at the Intranet and Internet edges and are actively monitored by the Security Operations Center (SOC).

Vulnerability scans are conducted periodically to ensure supporting systems and all applications are at the highest state of security and are patched accordingly.

This security system limits data access to Department and contract staff on a ''need to know'' basis, and controls individual users' ability to access and alter records within the system. Personal computers used to access the electronic records are password protected and passwords are changed periodically throughout the year.

RETENTION AND DISPOSAL:

Service agreements between the Department and an employee and related supporting documents resulting in approval for program benefits will be retained for a period of three years after the employee satisfies the terms and conditions of the agreement. All other documents will be retained in accordance with the National Archives and Records Administration (NARA) General Records Schedules (GRS) 1.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Human Resources, Learning and Development Division, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202–4573.

NOTIFICATION PROCEDURE:

If you wish to inquire whether a record exists regarding you in this system, you should contact the system manager at the address listed above. You must provide your name, name of organization, and subject matter. Your request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.5, including proof of identity.

RECORD ACCESS PROCEDURES:

If you wish to request access to your records, you should contact the system manager at the address listed above. You must comply with the Department's Privacy Act regulations at 34 CFR 5b.5, including proof of identity.

CONTESTING RECORD PROCEDURES:

If you wish to request an amendment to your records, you should contact the system manager at the address listed above. Your request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.7.

RECORD SOURCE CATEGORIES:

Information in this system of records is obtained from the individual to whom the information applies, lending institutions holding student loans for the individual to whom the information applies, officials of the Department, and official Department documents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Revision of a Currently Approved Information Collection for the State Energy Program

AGENCY: U.S. Department of Energy.

ACTION: Submission for Office of Management and Budget (OMB) review; public comment request.

SUMMARY: The Department of Energy (DOE) invites public comment on a revision of a currently approved collection of information that DOE is developing for submission to the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995. The information collection requests a revision and three-year extension of its State Energy Program, OMB Control Number 1910–5126.

The proposed action will continue the collection of information on the status of grantee activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively and expeditiously.

Comments are invited on: (a) Whether the revision of the currently approved collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden pertaining to the approved collection of information, including the validity of the methodology and assumptions used; (c) ways to further enhance the quality, utility, and clarity of the information being collected; and (d) ways to further minimize the burden regarding the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Comments regarding this revision to an approved information collection must be received on or before February 21, 2017. If you anticipate difficulty in submitting comments within that period, contact the person listed in **ADDRESSES** as soon as possible.

ADDRESSES: Written comments may be sent to

Sallie Glaize, EE–5W, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585, *Email: Sallie.Glaize@ee.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or

copies of the information collection instrument and instructions should be directed to:

Gregory Davoren, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585, Phone: (202) 287–1706, Fax: (412) 386–5835, *Email: Gregory.Davoren@ee.doe.gov.*

Additional information and reporting guidance concerning the State Energy Program (SEP) is available for review at the following Web site: *http://www1.eere.energy.gov/wip/sep.html.*

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No. 1910–5126; (2) Information Collection Request Title: State Energy Program; (3) Type of Review: Revision of a Currently Approved Information Collection; (4) Purpose: To collect information on the status of grantee activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively and expeditiously; (5) Annual Estimated Number of Respondents: 56; (6) Annual Estimated Number of Total Responses: 224; (7) Annual Estimated Number of Burden Hours: 7,600; (8) Annual Estimated Reporting and Recordkeeping Cost Burden: $304,000.

Statutory Authority: Title V, Subtitle E of the Energy Independence and Security Act (EISA), Public Law 110–140 as amended (42 U.S.C. 17151 *et seq.*).

Issued in Washington, DC, December 14, 2016.

Gregory Davoren,

Lead Energy Project Specialist, Weatherization and Intergovernmental Program, Office of Energy Efficiency and Renewable Energy.

[FR Doc. 2016–30997 Filed 12–22–16; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Proposed Subsequent Arrangement

AGENCY: Office of Nonproliferation and Arms Control, Department of Energy.

ACTION: Proposed subsequent arrangement.

SUMMARY: This document is being issued under the authority of the Atomic Energy Act of 1954, as amended. The Department is providing notice of a subsequent arrangement under the Agreement for Cooperation Between the Government of the United States of America and the Government of the Republic of Korea Concerning Peaceful Uses of Nuclear Energy and the Agreement for Cooperation Between the Government of the United States of America and the Government of the United Arab Emirates Concerning Peaceful Uses of Nuclear Energy.

DATES: This subsequent arrangement will take effect no sooner than January 9, 2017.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Goorevich, Office of Nonproliferation and Arms Control, National Nuclear Security Administration, Department of Energy. Telephone: 202–586–0589 or email: *Richard.Goorevich@nnsa.doe.gov.*

SUPPLEMENTARY INFORMATION: This subsequent arrangement concerns the retransfer of 9,003,960g of U.S.-origin enriched uranium oxide (UO2), containing 158,122g of the isotope U–235 (less than five percent enrichment) in the form of 302 low-enriched fuel assemblies, from the Korea Electric Power Corporation Nuclear Fuel Co., Ltd. in Daejeon, Republic of Korea, to the Emirates Nuclear Energy Corporation in Abu Dhabi, United Arab Emirates. The fuel assemblies will be used for nuclear power generation at the Barakah Nuclear Power Plant. In accordance with section 131a. of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement concerning the retransfer of nuclear material of United States origin will not be inimical to the common defense and security of the United States of America.

Dated: December 13, 2016.

For the Department of Energy.

Anne M. Harrington,

Deputy Administrator, Defense Nuclear Nonproliferation.

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER16–2514–001.

Applicants: Public Service Company of Colorado.

Description: Compliance filing: OATT Schedules 4 & 9 Compliance to be effective 1/1/2017.

Filed Date: 12/15/16.

Accession Number: 20161215–5098.

Comments Due: 5 p.m. ET 1/5/17.

Docket Numbers: ER17–318–000.

Applicants: Three Peaks Power, LLC.

Description: Supplement to November 8, 2016 Three Peaks Power, LLC tariff filing.

Filed Date: 12/14/16.

Accession Number: 20161214–5200.

Comments Due: 5 p.m. ET 12/28/16.

Docket Numbers: ER17–360–001.

Applicants: Rio Bravo Solar I, LLC.

Description: Tariff Amendment: Supplement to MBR Application to be effective 11/17/2016.

Filed Date: 12/14/16.

Accession Number: 20161214–5229.

Comments Due: 5 p.m. ET 1/4/17.

Docket Numbers: ER17–361–001.

Applicants: Pumpjack Solar I, LLC.

Description: Tariff Amendment: Supplement to MBR Application to be effective 11/17/2016.

Filed Date: 12/14/16.

Accession Number: 20161214–5233.

Comments Due: 5 p.m. ET 1/4/17.

Docket Numbers: ER17–362–001.

Applicants: Rio Bravo Solar II, LLC.

Description: Tariff Amendment: Supplement to MBR Application to be effective 11/17/2016.

Filed Date: 12/14/16.

Accession Number: 20161214–5239.

Comments Due: 5 p.m. ET 1/4/17.

Docket Numbers: ER17–550–000.

Applicants: Entergy Mississippi, Inc.

Description: § 205(d) Rate Filing: EMI–SMEPA Revised Restated Interconnection Agreement to be effective 1/1/2017.

Filed Date: 12/14/16.

Accession Number: 20161214–5262.

Comments Due: 5 p.m. ET 1/4/17.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: December 15, 2016.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–539–000]

Wildwood Solar I, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Wildwood Solar I, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is January 4, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: December 15, 2016.

[Docket No. NJ17–5–000]

City of Riverside, California; Notice of Filing

Take notice that on December 7, 2016, the City of Riverside, California submitted its tariff filing: City of Riverside, California 2017 Transmission Revenue Balancing Account Adjustment/Existing Transmission Contracts Update to be effective 1/1/2017.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all the parties in this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on December 28, 2016.

Dated: December 19, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–8–000]

Florida Gas Transmission Company, LLC; Notice of Intent To Prepare an Environmental Assessment for the Proposed East-West Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the East-West Project involving construction and operation of facilities by Florida Gas Transmission Company, LLC (FGT) in Acadia and Calcasieu parishes, Louisiana, and Wharton, Matagorda, Orange, and Jefferson counties, Texas. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. You can make a difference by providing us with your specific comments or concerns about the project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EA. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before January 18, 2017.

If you sent comments on this project to the Commission before the opening of this docket on October 31, 2016, you will need to file those comments in Docket No. CP17–8–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

FGT provided landowners with a fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (*www.ferc.gov*).

Public Participation

For your convenience, there are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.*'' If you are filing a comment on a particular project, please select ''Comment on a Filing'' as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (CP17–8–000) with your submission:

Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Summary of the Proposed Project

FGT proposes to construct and operate approximately 24.7 miles of new lateral and connection pipeline and four new meter stations and auxiliary and appurtenant facilities in Texas and Louisiana. The East-West Project would

provide new capacity of 275,000 MMBtu/d on FGT's pipeline system in the western division to meet the demand for additional transportation and delivery of natural gas to the Port Arthur—Motiva Meter and Regulator (M&R) Station and the Wilson—Coastal Bend M&R Station in Jefferson and Wharton Counties, Texas respectively.

The Project would consist of the following facilities:

- 13.2 miles of 12-inch-diameter delivery lateral pipe in Matagorda and Wharton Counties, Texas;
- 11.0 miles of 16-inch-diameter delivery lateral pipe in Jefferson County, Texas;
- two new M&R stations in Wharton and Jefferson Counties, Texas;
- modifications to station piping and installation of automated valves at Compressor Station 6 in Orange County, Texas;
- 0.5 mile of 16-inch-diameter connection piping and M&R facilities in Acadia Parish, Louisiana; and
- 0.02 mile of 12-inch-diameter connection piping and M&R facilities in Calcasieu Parish, Louisiana.

The general location of the project facilities is shown in appendix 1.[1]

Land Requirements for Construction

Construction of the proposed facilities would disturb about 317 acres of land for the pipelines and aboveground facilities. Following construction, FGT would maintain about 155 acres for permanent operation of the project's facilities; the remaining acreage would be restored and revert to former uses.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us [2] to discover and address concerns the public may have about proposals. This process is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EA. We will consider all filed comments during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- land use;
- water resources, fisheries, and wetlands;
- cultural resources;
- vegetation and wildlife;
- air quality and noise;
- endangered and threatened species;
- public safety; and
- cumulative impacts

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

The EA will present our independent analysis of the issues. The EA will be available in the public record through eLibrary. Depending on the comments received during the scoping process, we may also publish and distribute the EA to the public for an allotted comment period. We will consider all comments on the EA before making our recommendations to the Commission. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section, beginning on page 2.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate with us in the preparation of the EA.[3] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, we are using this notice to initiate consultation with the applicable State Historic Preservation Offices (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.[4] We will define the project-specific Area of Potential Effects (APE) in consultation with the SHPOs as the project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EA for this project will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If we publish and distribute the EA, copies of the EA will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an ''intervenor'' which is an official party to the Commission's proceeding. Intervenors play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission's final ruling. An intervenor formally participates in the proceeding by filing a request to

[1] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary'' or from the Commission's Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502–8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

[2] ''We,'' ''us,'' and ''our'' refer to the environmental staff of the Commission's Office of Energy Projects.

[3] The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Part 1501.6.

[4] The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

intervene. Instructions for becoming an intervenor are in the ''Document-less Intervention Guide'' under the ''e-filing'' link on the Commission's Web site. Motions to intervene are more fully described at *http://www.ferc.gov/resources/guides/how-to/intervene.asp.*

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site at *www.ferc.gov* using the ''eLibrary'' link. Click on the eLibrary link, click on ''General Search'' and enter the docket number, excluding the last three digits in the Docket Number field (*i.e.,* CP17–8). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

Finally, public sessions or site visits will be posted on the Commission's calendar located at *www.ferc.gov/EventCalendar/EventsList.aspx* along with other related information.

Eagle Ford Midstream, LP; Notice of Staff Protest to Petition for Rate Approval

1. Commission staff hereby protests, pursuant to section 284.123(g)(4)(i) of the Commission's regulations, the Petition for Rate Approval filed by Eagle Ford Midstream, LP (Eagle Ford) on October 11, 2016, in the above referenced docket. Pursuant to the Stipulation and Agreement approved by the Commission in Docket Nos. PR12–

3–000 and PR12–3–001, Eagle Ford filed a new petition for rate approval, pursuant to 18 CFR 284.123(b)(2), proposing a new rate applicable to its Natural Gas Policy Act (NGPA) section 311 service. Eagle Ford elected to use the Commission's optional notice procedures set forth in section 284.123(g) of the Commission's regulations. Eagle Ford proposes to increase its rates for firm, enhanced, and interruptible transportation services, authorized overrun service, and park and loan service. Eagle Ford also proposes to revise its Statement of Operating Conditions (SOC) applicable to its transportation services performed pursuant to NGPA section 311, which it states is updated solely to reflect the new proposed rates. Eagle Ford states it has not proposed any changes to the operating terms and conditions of its SOC.

2. Commission staff notes that Eagle Ford has not adequately supported its filing and shown that the proposed rates are fair and equitable. Eagle Ford provided a series of summary schedules but did not provide supporting workpapers or any descriptive justification to support its petition for rate approval. For instance, Eagle Ford has not provided support for the discount adjustment used in calculating the billing determinants. In addition, Eagle Ford has not provided an explanation or support for its proposed cost of service and cost of capital, among other issues.

3. Commission staff's specific concerns include Eagle Ford's development of its discount adjustment in designing rates. Eagle Ford requests a 47.3 percent overall discount adjustment to its billing units. However, Eagle Ford has not provided support for the actual calculations of the adjustments and the rationale for them.

4. In addition, Eagle Ford requested a weighted average cost of capital of 10.34 percent. This figure appears to be based upon a hypothetical capital structure of 40 percent debt and 60 percent equity, a 5.23 percent cost of debt and 13.75 percent cost of equity. However, Eagle Ford has not provided support for either the proposed capital structure or the individual capital cost components.

5. Furthermore, Eagle Ford requested a test year adjustment to operating and maintenance expenses without support for the amount of the adjustment or for the level base year expenses. Eagle Ford did not provide support for the inclusion of administrative and general expenses that were excluded in its prior case, in Docket No. PR12–3–000. Similarly, Eagle Ford did not provide support or explanation of its fivefold increase in plant or the effect of such increase on its cost of service.

6. Finally, Commission staff has concerns regarding certain provisions in Eagle Ford's SOC. For example, it is unclear how Eagle Ford bills Firm Transportation customers and how Eagle Ford allocates capacity for new Firm Transportation customers during periods of constraint.

Dated: December 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #2

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–3285–001; ER10–3177–001; ER10–3181–001.

Applicants: UGI Development Company, UGI Energy Services, LLC, UGI Utilities, Inc.

Description: Updated Triennial Market Power Analysis for Northeast region of the UGI MBR Companies.

Filed Date: 12/19/16.

Accession Number: 20161219–5294.

Comments Due: 5 p.m. ET 2/17/17.

Docket Numbers: ER13–897–006.

Applicants: Louisville Gas and Electric Company.

Description: Compliance filing: Compliance Filing Attach K Correct eTariff Record Metadata to be effective 1/24/2015.

Filed Date: 12/19/16.

Accession Number: 20161219–5214.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER13–1928–010.

Applicants: Duke Energy Progress, LLC, Duke Energy Carolinas, LLC.

Description: Compliance filing: Correct Order No. 1000 Dates to be effective 1/1/2016.

Filed Date: 12/19/16.

Accession Number: 20161219–5123.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER13–1930–009.

Applicants: Louisville Gas and Electric Company.

Description: Compliance filing: Att. K Appendices Compliance Filing to Correct eTariff Record Metadata to be effective 1/24/2015.

Filed Date: 12/19/16.

Accession Number: 20161219–5186.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER13–1940–011.

Applicants: Ohio Valley Electric Corporation.

Description: Compliance filing: Compliance filing to correct effective date to be effective 1/1/2016.

Filed Date: 12/19/16.

Accession Number: 20161219–5184.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER13–1941–009.

Applicants: Alabama Power Company.

Description: Compliance filing: Compliance Filing to Correct Certain eTariff Recod Metadata to be effective 1/1/2016.

Filed Date: 12/19/16.

Accession Number: 20161219–5133.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER15–2239–006.

Applicants: NextEra Energy Transmission West, LLC.

Description: Compliance filing: NextEra Energy Transmission West, LLC Compliance Filing to be effective 10/20/2015.

Filed Date: 12/19/16.

Accession Number: 20161219–5263.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER16–2541–001.

Applicants: Pioneer Wind Park I, LLC.

Description: Compliance filing: Pioneer Wind Park I, LLC MBR Tariff to be effective 9/3/2016.

Filed Date: 12/19/16.

Accession Number: 20161219–5228.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER17–201–000.

Applicants: Shell Energy North America (US), L.P.

Description: Supplement to October 27, 2016 Shell Energy North America (US), L.P. tariff filing (Category 1 Seller Notice).

Filed Date: 12/12/16.

Accession Number: 20161212–5281.

Comments Due: 5 p.m. ET 1/3/17.

Docket Numbers: ER17–576–000.

Applicants: ISO New England Inc.

Description: § 205(d) Rate Filing: Part 1 of Two-Part Filing to Update Effective Date to be effective 3/1/2017.

Filed Date: 12/19/16.

Accession Number: 20161219–5169.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER17–576–001.

Applicants: ISO New England Inc.

Description: Tariff Amendment: Part 2 of Two-Part Filing to Update Effective Date to be effective 3/31/2017.

Filed Date: 12/19/16.

Accession Number: 20161219–5232.

Filed Date: 12/19/16.

Accession Number: 20161219–5270.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER17–578–000.

Applicants: Direct Energy Small Business, LLC.

Description: Tariff Cancellation: Cancellation filing to be effective 2/17/2017.

Filed Date: 12/19/16.

Accession Number: 20161219–5313.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER17–579–000.

Applicants: Bounce Energy PA, LLC.

Description: Tariff Cancellation: Cancellation filing to be effective 2/17/2017.

Filed Date: 12/19/16.

Accession Number: 20161219–5323.

Comments Due: 5 p.m. ET 1/9/17.

Docket Numbers: ER17–580–000.

Applicants: RET Modesto Solar LLC.

Description: Compliance filing: Market-Based Rate Notice of Change in Status to be effective 12/20/2016.

Filed Date: 12/19/16.

Accession Number: 20161219–5332.

Comments Due: 5 p.m. ET 1/9/17.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: December 19, 2016.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–544–000]

Beacon Solar 1, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Beacon Solar 1, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is January 4, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CD17–1–000]

Greybull Valley Irrigation District; Notice of Preliminary Determination of a Qualifying Conduit Hydropower Facility and Soliciting Comments and Motions To Intervene

On December 7, 2016, the Greybull Valley Irrigation District filed a notice of intent to construct a qualifying conduit hydropower facility, pursuant to section 30 of the Federal Power Act (FPA), as amended by section 4 of the Hydropower Regulatory Efficiency Act of 2013 (HREA). The proposed Greybull Valley Hydroelectric Project would have an installed capacity of 4,500 kilowatts (kW) and would be located at the end of the Roach Gulch Discharge Canal. The project would be located near the Town of Meeteetse in Park County, Wyoming.

Applicant Contact: Ted Sorenson, Wyoming Water Power, LLC, 1032 Grandview Drive, Ivins, UT 84738, Phone No. (208) 589–6908.

FERC Contact: Robert Bell, Phone No. (202) 502–6062, email: *robert.bell@ferc.gov.*

Qualifying Conduit Hydropower Facility Description: The proposed project would consist of: (1) A proposed 200-foot long, 60-inch-diameter intake pipe connected to the existing 60-inch Roach Gulch Discharge Canal; (2) a proposed 32' wide by 35' long powerhouse containing one generating unit with an installed capacity of 4,500-kW; (3) a proposed tailrace discharging directly into the Roach Gulch Discharge Canal; and (4) appurtenant facilities. The proposed project would have an estimated annual generating capacity of 11,221 megawatt-hours.

A qualifying conduit hydropower facility is one that is determined or deemed to meet all of the criteria shown in the table below.

TABLE 1—CRITERIA FOR QUALIFYING CONDUIT HYDROPOWER FACILITY

Statutory provision	Description	Satisfies (Y/N)
FPA 30(a)(3)(A), as amended by HREA	The conduit is a tunnel, canal, pipeline, aqueduct, flume, ditch, or similar man-made water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.	Y
FPA 30(a)(3)(C)(i), as amended by HREA	The facility is constructed, operated, or maintained for the generation of electric power and uses for such generation only the hydroelectric potential of a non-federally owned conduit.	Y
FPA 30(a)(3)(C)(ii), as amended by HREA	The facility has an installed capacity that does not exceed 5 megawatts	Y
FPA 30(a)(3)(C)(iii), as amended by HREA	On or before August 9, 2013, the facility is not licensed, or exempted from the licensing requirements of Part I of the FPA.	Y

Preliminary Determination: Based upon the above criteria, Commission staff has preliminarily determined that the proposal satisfies the requirements for a qualifying conduit hydropower facility under 16 U.S.C. 823a, and is exempted from the licensing requirements of the FPA.

Comments and Motions to Intervene: The deadline for filing comments contesting whether the facility meets the qualifying criteria is 45 days from the issuance date of this notice.

The deadline for filing motions to intervene is 30 days from the issuance date of this notice.

Anyone may submit comments or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210 and 385.214. Any motions to intervene must be received on or before the specified deadline date for the particular proceeding.

Filing and Service of Responsive Documents: All filings must (1) bear in all capital letters the ''COMMENTS CONTESTING QUALIFICATION FOR A CONDUIT HYDROPOWER FACILITY'' or ''MOTION TO INTERVENE,'' as applicable; (2) state in the heading the name of the applicant and the project number of the application to which the filing responds; (3) state the name, address, and telephone number of the person filing; and (4) otherwise comply with the requirements of sections 385.2001 through 385.2005 of the Commission's regulations.[1] All comments contesting Commission staff's preliminary determination that the facility meets the qualifying criteria must set forth their evidentiary basis.

The Commission strongly encourages electronic filing. Please file motions to intervene and comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Locations of Notice of Intent: Copies of the notice of intent can be obtained directly from the applicant or such

[1] 18 CFR 385.2001–2005 (2015).

copies can be viewed and reproduced at the Commission in its Public Reference Room, Room 2A, 888 First Street NE., Washington, DC 20426. The filing may also be viewed on the web at *http://www.ferc.gov/docs-filing/elibrary.asp* using the ''eLibrary'' link. Enter the docket number (*e.g.,* CD17–1–000) in the docket number field to access the document. For assistance, call toll-free 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov.* For TTY, call (202) 502–8659.

Dated: December 15, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PL17–1–000]

Inquiry Regarding the Commission's Policy for Recovery of Income Tax Costs

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of Inquiry.

SUMMARY: Following the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *United Airlines, Inc., et al.* v. *Federal Energy Regulatory Commission,* 827 F.3d 122 (D.C. Cir. 2016), the Commission seeks comment regarding how to address any double recovery resulting from the Commission's current income tax allowance and rate of return policies.

DATES: Initial Comments are due February 6, 2017, and Reply Comments are due February 27, 2017.

ADDRESSES: Comments, identified by docket number, may be filed in the following ways:

- Electronic Filing through *http://www.ferc.gov.* Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format.
- Mail/Hand Delivery: Those unable to file electronically may mail or hand-deliver comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.
- *Instructions:* For detailed instructions on submitting comments, see the Comment Procedures Section of this document.

FOR FURTHER INFORMATION CONTACT:

Glenna Riley (Legal Information), Office of the General Counsel, 888 First Street NE., Washington, DC 20426, (202) 502–8620, *Glenna.Riley@ferc.gov*.

Andrew Knudsen (Legal Information), Office of the General Counsel, 888 First Street NE., Washington, DC 20426, (202) 502–6527, *Andrew.Knudsen@ferc.gov*.

James Sarikas (Technical Information), Office of Energy Markets Regulation, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, (202) 502–6831, *James.Sarikas@ferc.gov*.

Scott Everngam (Technical Information), Office of Energy Markets Regulation, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, (202) 502–6614, *Scott.Everngam@ferc.gov*.

SUPPLEMENTARY INFORMATION:

1. The Commission seeks comments regarding how to address any double recovery resulting from the Commission's current income tax allowance and rate of return policies. This Notice of Inquiry (NOI) follows the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit) holding in *United Airlines, Inc., et al.* v. *Federal Energy Regulatory Commission* that the Commission failed to demonstrate that there is no double recovery of taxes for a partnership pipeline as a result of the income tax allowance and return on equity (ROE) determined pursuant to the discounted cash flow (DCF) methodology.[1] Accordingly, the Court remanded the decisions to the Commission to develop a mechanism ''for which the Commission can demonstrate that there is no double recovery'' of partnership income tax costs.[2]

2. The Commission recognizes the potentially significant and widespread effect of this holding upon the oil pipelines, natural gas pipelines, and electric utilities subject to the Commission's regulation. The importance of the income tax policy for partnership entities extends well-beyond the particular interests of the parties to the *United Airlines* proceeding. The Commission also recognizes that additional industry comment may provide further insight into the relationship between a partnership's income tax allowance and the Commission's DCF methodology. Accordingly, this NOI seeks further information as the Commission re-evaluates its policies following the *United Airlines* decision. Initial Comments are due February 6, 2017, and Reply Comments are due February 27, 2017.

I. Background

3. This proceeding involves the relationship between the Commission's income tax allowance and ROE policies. Both have evolved in the past two decades to address the emergence of partnership entities in FERC-regulated industries, particularly Master Limited Partnerships (MLPs) that own oil and natural gas pipeline assets.[3]

A. The MLP Business Model

4. An MLP is a publicly traded partnership.[4] In order to be treated as an MLP for Federal income tax purposes, an MLP must receive at least 90 percent of its income from certain qualifying sources, including natural gas and oil pipelines.[5]

5. MLPs consist of a general partner, that manages the partnership, and limited partners, that provide capital and receive cash distributions. MLP limited partner units are traded on public exchanges, just like corporate stock shares.[6] Based upon the MLP's partnership agreement, MLPs generally (a) distribute most ''available cash flow'' to the general and limited partners in the form of quarterly distributions, and, in a separate calculation, (b) allocate to the general and limited partners net partnership income for income tax purposes.[7]

[3] *See Composition of Proxy Groups for Determining Gas and Oil Pipeline Return on Equity,* 123 FERC ¶ 61,048 (2008) (*Proxy Group Policy Statement*); *Inquiry Regarding on Income Tax Allowances,* 111 FERC ¶ 61,139 (2005) (*Income Tax Policy Statement*).

[4] The Internal Revenue Service defines a ''publicly traded partnership'' as any partnership if its interests are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof. 26 U.S.C. 7704; 26 CFR 1.7704–1.

[5] 26 U.S.C. 7704. Qualifying sources include natural resource activities such as exploration, development, mining or production, processing, refining, transportation, storage and marketing of any mineral or natural resource, including gas and oil. *Id.*

[6] *Proxy Group Policy Statement,* 123 FERC ¶61,048 at P 10.

[7] *Id.* at P 11; Master Limited Partnership Association (MLPA), *MLP–101, Basic Tax Principles, https://www.mlpassociation.org/mlp-101/basic-tax-principles/* (last visited Nov. 29, 2016) (*MLPA Basic Tax Principles*). Most MLP agreements define ''available cash flow'' as (1) net income (gross revenues minus operating expenses) plus (2) depreciation and amortization, minus (3) capital investments the partnership must make to maintain its current asset base and cash flow stream. Depreciation and amortization may be considered a part of ''available cash flow,'' because depreciation is an accounting charge against current income, rather than an actual cash expense. Thus,

6. Quarterly cash distributions received by a partner are not equivalent to the partner's share of the MLP's taxable income. MLPs are pass-through entities and each partner is personally responsible for paying income taxes on the partnership's net taxable income.[8] For tax purposes, the partnership agreement allocates to each partner a share of the partnership's taxable income.[9] Deductions, including depreciation, losses, and credits, may substantially offset the taxable income. As a result, a partner may have no net taxable income in a given year.[10]

7. In contrast, the partner may receive a quarterly distribution whether or not it is allocated a positive net income tax liability for that period. The quarterly distributions are considered to be a return of capital, which reduces the partner's basis in the MLP units and is only taxed at the time of distribution if the partner's adjusted basis falls to zero.[11] The investor's original basis (the price paid for the units) is adjusted downwards by cash distributions and allocations of deductions, and is adjusted upwards by allocations of income. When the units are sold, the taxable gain is the sales price minus the adjusted basis.[12] The portion of the gain attributable to basis reductions for prior depreciation deductions is ''recaptured'' and taxed as ordinary income rather than capital gain.[13]

B. Return on Equity Policies

8. In *Hope*,[14] the Supreme Court stated that ''the return to the equity owner should be commensurate with the return on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and to attract capital.'' [15] Since the 1980s, the Commission has used the DCF model to develop a range of returns earned on investments in companies with corresponding risks for purposes of determining the ROE for regulated entities.

9. Under the Commission's cost-of-service ratemaking methodology, the DCF model is used to determine a reasonable ROE that a regulated entity may recover in rates in addition to its costs. The purpose of the DCF methodology is to estimate the return required by investors in order to invest in the pipeline or utility whose rates are at issue.[16] To do this, the DCF model considers the range of returns that the market provides investors in a proxy group of publicly-traded entities with similar risk profiles.[17]

10. The DCF model was originally developed as a method for investors to estimate the value of securities, including common stocks. It is based on the premise that ''a stock's price is equal to the present value of the infinite stream of expected dividends discounted at a market rate commensurate with the stock's risk.'' [18] With simplifying assumptions, the DCF model results in the investor using the following formula to determine share price:

$$P = D/(k-g)$$

where P is the price of the stock at the relevant time, D is the current dividend, k is the discount rate (or investors' required rate of return), and g is the expected growth rate in dividends. For ratemaking purposes, the Commission rearranges the DCF formula to solve for ''k'', the discount rate, which represents the rate of return that investors require to invest in the firm.[19] Under the resulting DCF formula, the required rate of return is estimated to equal current dividend yield (dividends divided by share price) plus the projected future growth rate of dividends:

$$k = D/P + g$$

11. The Commission compares the returns of proxy group entities on an after-entity-level-tax basis, rather than before-tax basis, because most comparable securities trade on the basis of an entity's after-tax return on its public utility income.[20] Based typically upon the median of the range of returns in the proxy group, the Commission determines the regulated entity's allowed ROE,[21] although the ROE may sometimes be adjusted upwards or downwards within the zone of reasonableness.[22]

12. The Commission's proxy group criteria is based on the principle that entities included in the proxy group must be of comparable risk to the firm whose ROE is being determined in a particular rate proceeding.[23] As entities narrowly focused on providing oil and natural gas pipeline transportation have increasingly adopted the MLP business form, the Commission has included MLPs in the proxy group for natural gas and oil pipelines because those MLPs are likely more representative of predominantly pipeline firms than the diversified corporations otherwise available for inclusion in a proxy group.[24] The Commission uses the same DCF analysis for MLPs as for corporations, except that the Commission uses a lower long-term growth projection for MLPs than for corporations.[25] The Commission concluded that an MLP's quarterly distributions could be used to measure cash flows from the investment without any adjustment to remove return of

depreciation does not reduce the MLP's current cash on hand. *Proxy Group Policy Statement,* 123 FERC ¶61,048 at P 11.

capital.[26] The Commission explained that ''since the DCF model uses the total unadjusted cash flows to determine the stock's value, it is theoretically inconsistent [with the DCF model] to use lower adjusted cash flows when using the DCF model to determine the return required by investors purchasing the stock.'' [27]

C. Income Tax Policy

13. In May 2005, the Commission issued an Income Tax Policy Statement [28] permitting an income tax allowance for all regulated entities (including corporations and partnerships), provided that the owners can show an actual or potential income tax liability to be paid on income from the regulated assets. The Commission continued its longstanding policy of permitting corporations to recover an income tax allowance because corporations themselves incur a corporate income tax liability. The Commission reasoned that while a partnership or other pass-through entity does not pay taxes, the partners incur an income tax liability on the partnership income. Accordingly, those income tax costs are appropriately included in rates.[29] The D.C. Circuit upheld this policy, in *ExxonMobil*,[30] explaining that the income tax liability of partners is attributable to the regulated entity and may be recovered in pipeline rates, provided that the partners have an actual or potential income tax liability.[31]

14. In July 2016, in *United Airlines,*[32] the D.C. Circuit, reviewing a series of orders involving SFPP, L.P.,[33] held that the Commission failed to demonstrate that there is no double recovery of taxes for a partnership pipeline as a result of awarding that pipeline both an income tax allowance and a pre-investor-tax ROE pursuant to the DCF methodology.[34] The Court upheld *ExxonMobil's* finding that a pipeline may recover partnership income tax costs so long as the partners have an actual or potential income tax liability,[35] but concluded that allowing partnerships to double recover those tax costs would be inconsistent with the Supreme Court's mandate in *Hope*.[36]

15. The Court remanded the decisions to the Commission to develop a mechanism ''for which the Commission can demonstrate that there is no double recovery'' of partnership income tax costs.[37] The Court noted that the Commission may consider the options of removing any duplicative tax recovery for partnerships directly from the DCF ROE, or eliminating all income tax allowances and setting rates based on pre-tax returns.[38]

16. The Court also directed the Commission to ensure parity between equity owners in partnership and corporate pipelines.[39] The Court did not find persuasive the Commission's argument that ''any disparate treatment between partners in partnership pipelines and shareholders in corporate pipelines is the result of the Internal Revenue Code, not FERC's tax allowance policy.'' [40]

II. Commission Questions

17. The Commission seeks comment regarding methods to allow regulated entities to earn an adequate return consistent with *Hope* [41] that do not result in a double recovery of investor-level taxes for partnerships or similar pass-through entities.

18. Comments should consider the fundamental concerns presented by *United Airlines* and shipper litigants that permitting a partnership entity to have an income tax allowance results in a double recovery of investor-level tax costs because:

- The DCF methodology estimates the rate of return that an investor requires in order to invest in the regulated entity.[42]
- As a general matter, potential investors evaluate whether to invest in an entity based on the returns they expect to receive after paying any applicable taxes on the investment income,[43] and thus, to attract capital, entities in the market must provide investors a return that covers investor-level taxes and leaves sufficient remaining income to earn their required after-tax return.[44]
- Because the return estimated by the DCF methodology includes the cash flow necessary to cover investors' income tax liabilities and earn a sufficient after-tax return, the Commission's policy of allowing partnership entities to recover a separate income tax allowance may result in a double recovery.[45]
- While allowing a partnership entity to recover the partner-investors' tax costs is reasonable,[46] allowing a partnership to double recover those tax costs is not.[47]

[26] *See Id.* PP 57–63.

[27] *See Id.* P 58.

[28] *See Income Tax Policy Statement,* 111 FERC ¶61,139. The Policy Statement was issued in response to *BP West Coast Products, LLC* v. *FERC,* 374 F.3d 1263 (DC Cir. 2004) (*BP West Coast*). That decision held that the Commission failed to justify its then existing policy of affording partnership entities an income tax allowance for income attributable to interests held by corporations, but not for income attributable to interests held by individuals.

[34] *United Airlines,* 827 F.3d at 134, 136.

[35] *Id.* at 135 (citing *ExxonMobil,* 487 F.3d at 954–955); *id.* at 137.

[36] *Id.* at 137 (citing *Hope,* 320 U.S. at 603).

[37] *Id.*

[38] *Id.* As noted by the Court, the Commission previously considered the option of setting rates based on pre-investor level and pre-entity level tax returns in its 2005 policy statement and concluded this approach would be impracticable. *See Income Tax Policy Statement,* 111 FERC ¶61,139 at P 40.

[39] *United Airlines,* 827 F.3d at 137.

[40] *Id.* at 136; *see also BP West Coast,* 374 F.3d at 1293 (''The mandate of Congress in the tax amendment was exhausted when the pipeline limited partnership was exempted from corporate taxation. It did not empower FERC to do anything, let alone to create an allowance for fictitious taxes.'').

[41] 320 U.S. at 603.

[42] *United Airlines,* 827 F.3d at 136; Opinion No. 531, 147 FERC ¶ 61,234 at P 14.

[43] *Kern River Gas Transmission Co.,* Opinion 486–B, 126 FERC ¶ 61,034, at P 114 (2009) (''investors invest on the basis of after-tax returns and price an instrument accordingly'').

[44] *United Airlines,* 827 F.3d at 136. In finding that ''the [DCF ROE] determines the pre-tax investor return required to attract investment, irrespective of whether the regulated entity is a partnership or a corporate pipeline,'' the Court relied on Opinion No. 511, 134 FERC ¶ 61,121 at PP 243, 244, which included the following example:

> The investor desires a 6 percent after-tax return and has a 25 percent marginal tax rate. Thus, the security must have an ROE of 8 percent to achieve an after-tax yield of 6 percent. Assume that the distribution or dividend is $8. The investor will price the security at $100. Conversely, if the security price is $100 and the yield is $8, the Commission determines that the required return is 8 percent. If the dollar distribution increases to $10, the investor will price the security at $125 because $10 is 8 percent of $125. The Commission would note that the security price is $125 and that the yield is $10, or a return of 8 percent. If the distribution is $6, the security price will drop to $75, a return of 8 percent. The Commission would observe a $75 dollar security price, a $6 yield, and a return of 8 percent. In all cases the ROE is 8 percent and the after-tax return is 6 percent based on the market-established return.

Although the concept may be more complex for an MLP, this proposition is also evidenced in the fact that the yields on bonds that pay taxable interest income are higher than the yields on bonds of state and local governments that pay tax-exempt income. Joint Initial Brief of Shipper Petitioners, at 20, Case No. 11–1479 (D.C. Cir., filed Feb. 5, 2016).

[45] *United Airlines,* 827 F.3d at 137 (remanding for the Commission to consider ''mechanisms for which the Commission can demonstrate that there is no double recovery'').

[46] *Id.* at 135, 137 (noting that the Commission had a reasoned basis for granting an income tax allowance to partnership pipelines); *ExxonMobil,* 487 F.3d at 951–953 (concluding that the Commission provided a reasonable justification for its policy of allowing partnership pipelines an income tax allowance to the extent that the partners incur actual or potential tax liability); *see also City of Charlottesville* v. *FERC,* 774 F.2d 1205, 1207 (D.C. Cir. 1985) (''cost-of-service ratemaking principles'' require ''rates yielding sufficient revenue to cover all proper costs, including federal income taxes, plus a specified return on invested capital''); *BP West Coast,* 374 F.3d 1263 at 1286 (''There is no question that as a general proposition a pipeline that pays income taxes is entitled to recover the costs of the taxes paid from its ratepayers''); *Pub. Serv. Comm'n of N.M.* v. *FERC,* 653 F.2d 681, 683 (D.C. Cir. 1981).

[47] *United Airlines,* 827 F.3d at 136 (finding that ''[b]ecause the Supreme Court has instructed that

• Changes in the share price do not resolve the double recovery issue. MLP investors will demand the same percentage return on the share price whether or not a pipeline receives an income tax allowance. If an MLP obtains a new revenue source that increases its distributions to investors (such as an income tax allowance that increases its rates), the share price will rise until, once again, the investor receives the cash flow necessary to cover investors' income tax liabilities and earn a sufficient after-tax return.[48]

• As opposed to an MLP pipeline, the double recovery issue does not arise for a corporation's income tax allowance. The corporation pays its corporate income taxes itself. Accordingly, although a return to investors must cover investor-level taxes and sufficient remaining income to earn their required after-tax return, the corporate income tax is not an investor level tax.[49] Thus, the corporate income tax cost recovered in the income tax allowance is not reflected in the return estimated by the DCF methodology.[50]

19. In light of the above, the Commission invites comments regarding any proposed methods to adjust the income tax allowance policy or current ROE policies to resolve any double recovery of investor-level tax costs for partnerships or similar pass-through entities. Comments should provide a detailed explanation of any proposal, including evidentiary support and how any adjustment to the Commission's tax allowance and/or ROE policies should be specifically implemented. Comments should explain how the proposed approach would (a) resolve any double recovery of investor-level income tax costs for partnership entities, and (b) allow regulated entities to earn a sufficient return consistent with the capital attraction standard in *Hope.*[51] Comments should support any proposed methods with data, theoretical analyses, empirical studies, or any other evidence relevant to demonstrating the level of partner-investor tax costs reflected in the ROE estimated by the DCF methodology. Comments should address how these proposals apply to publically traded pass-through entities, such as MLPs and real estate investment trusts (REITS), as well other pass through entities, including closely held partnerships and joint ventures.

20. Comments should also address the practical application of their proposals. For example, to the extent a commenter advocates eliminating the income tax allowance for partnerships and relying on the ROE awarded the pipeline for the recovery of investor-level tax costs, its comments should address whether any changes to the Commission's ROE policies are necessary to ensure that the ROE reflects appropriate tax costs for the particular entity whose rates are at issue.[52] Alternatively, commenters could propose reducing the DCF return to remove all investor-level tax costs and rely on an income tax allowance to recover the investor-level tax costs. Commenters advocating this latter approach should explain how an adjustment to the DCF return could be made to remove investor-level tax costs for each entity in the DCF proxy group.[53] In addition, those commenters should describe how to determine the level of the income tax allowance for partnership entities.[54] As stated above, commenters should ensure that their proposals do not result in a double recovery of investor level income tax costs for partnership entities as required by *United Airlines.*

III. Procedure for Comments

21. The Commission invites interested persons to submit written comments on the issue identified in this Notice of Inquiry as discussed above. Comments are due February 6, 2017 and reply comments are due February 27, 2017. Comments must refer to Docket No. PL17–1–000, and must include the commenter's name, the organization it represents, if applicable, and its address. To facilitate the Commission's review of the comments, commenters are requested to provide an executive summary of their position. Additional issues the commenters wish to raise should be identified separately. The commenters should double space their comments.

22. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's Web site at *http://www.ferc.gov.* The Commission accepts most standard word processing formats. Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format. Commenters filing electronically do not need to make a paper filing.

23. Commenters that are not able to file comments electronically must send an original of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

24. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below. Commenters on this proposal are not required to serve copies of their comments on other commenters.

IV. Document Availability

25. The Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through the Commission's Home Page (*http://www.ferc.gov*) and in the Commission's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE., Room 2A, Washington, DC 20426.

26. From the Commission's Home Page on the Internet, this information is available in the Commission's document management system, eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word

'the return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks,' FERC has not shown that the resulting rates under FERC's current policy are 'just and reasonable.' '') (quoting *Hope,* 320 U.S. at 603).

[48] Opinion No. 511, 134 FERC ¶ 61,121 at PP 243–44; Joint Initial Brief of Shipper Petitioners, at 34–35, 39–40, Case No. 11–1479 (D.C. Cir., Feb. 5, 2016); *id.* at Attachment 3 (SFP–98 and SFP–99); *Proxy Group Policy Statement,* 123 FERC ¶ 61,048 at P 58 (''under the DCF model, all cash flows, whatever their source, contribute to the value of stock''); *see also United Airlines,* 827 F.3d at 136–137. Although the Court did not directly address this particular aspect of the Shippers' argument, the Shippers have repeatedly raised it in their claims that this income results in a double recovery. *See* Opinion No. 511, 134 FERC ¶ 61,121 at PP 238–239. Further, citing to the same passage in Opinion No. 511 as the Shippers, the Court did acknowledge that ''the [DCF ROE] determines the pre-tax investor return required to attract investment, irrespective of whether the regulated entity is a partnership or a corporate pipeline.'' *United Airlines,* 827 F.3d at 136 (citing Opinion No. 511, 134 FERC ¶ 61,121 at PP 243–244).

[49] *Income Tax Policy Statement,* 111 FERC ¶ 61,139 at P 38.

[50] *United Airlines,* 827 F.3d at 136 (finding that ''unlike a corporate pipeline, a partnership pipeline incurs no taxes, except those imputed from its partners, at the entity level'' and that the facts ''support the conclusion that granting a tax allowance to partnership pipelines results in inequitable returns for partners in those pipelines as compared to shareholders in corporate pipelines.'').

[51] 320 U.S. at 603.

[52] For example, investors in an MLP incur different investor-level taxes than investors in a corporation. Commenters could propose adjustments to equalize the after-investor-level tax returns for each entity in the proxy group or explain why such adjustments are not necessary. Alternatively, commenters could propose a means for including only entities in the proxy group that incur similar investor-level tax costs. To the extent any commenter advocates the latter approach, that commenter should address how the composition of the proxy group and the availability of companies for the proxy group in a given rate case could be affected if the composition of the proxy group is changed to account for the different investor-level taxes of different business forms. *See Petal,* 496 F.3d 695 at 698–700; *Proxy Group Policy Statement,* 123 FERC ¶ 61,048 at P 9 (explaining that an insufficient number of pipelines using the corporate business form are available for the formation of a natural gas pipeline proxy group).

[53] *See* n.52.

[54] Currently, the Commission uses the weighted marginal tax rate of the MLP's partners. *Income Tax Policy Statement,* 111 FERC ¶ 61,139 at P 32; *SFPP, L.P.,* 121 FERC ¶ 61,240, at P 35 (2007).

format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number (excluding the last three digits) in the docket number field.

27. User assistance is available for eLibrary and the Commission's Web site during normal business hours. For assistance, please contact the Commission's Online Support at 1–866–208–3676 (toll free) or 202–502–6652 (email at *FERCOnlineSupport@ferc.gov*) or the Public Reference Room at 202–502–8371, TTY 202–502–8659 (email at *public.referenceroom@ferc.gov*).

By direction of the Commission.

Issued: December 15, 2016.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

Meetings of the Local Government Advisory Committee and the Small Communities Advisory Subcommittee (SCAS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Small Communities Advisory Subcommittee (SCAS) will meet via teleconference on Friday, January 13, 2017, at 11:30 a.m.–12:30 p.m. (ET). The Subcommittee will discuss the LGAC Biannual Report, and other environmental and public health issues affecting small communities. This is an open meeting and all interested persons are invited to participate. The Subcommittee will hear comments from the public between 11:40 a.m.–11:55 a.m. on January 13, 2017. Individuals or organizations wishing to address the Subcommittee will be allowed a maximum of five minutes to present their point of view. Also, written comments should be submitted electronically to *eargle.frances@epa.gov.* Please contact the Designated Federal Officer (DFO) at the number listed below to schedule a time on the agenda. Time will be allotted on a first-come first-serve basis, and the total period for comments may be extended if the number of requests for presentations requires it.

The Local Government Advisory Committee (LGAC) will meet via teleconference on Friday, January 13, 2017, 12:30 p.m.–1:30 p.m. (ET). The Committee will discuss recommendations of the subcommittee and LGAC workgroups including a draft LGAC Biannual Report; and environmental and public health issues. This is an open meeting and all interested persons are invited to participate. The Committee will hear comments from the public between 12:45 p.m.–1:00 p.m. (ET) on Friday, January 13, 2017. Individuals or organizations wishing to address the Committee will be allowed a maximum of five minutes to present their point of view. Also, written comments should be submitted electronically to *eargle.frances@epa.gov.* Please contact the Designated Federal Officer (DFO) at the number listed below to schedule a time on the agenda. Time will be allotted on a first-come first-serve basis, and the total period for comments may be extended if the number of requests for presentations requires it.

ADDRESSES: EPA's Local Government Advisory Committee meetings will be held via teleconference. Meeting summaries will be available after the meeting online at *www.epa.gov/ocir/scas_lgac/lgac_index.htm* and can be obtained by written request to the DFO.

FOR FURTHER INFORMATION CONTACT: Local Government Advisory Committee (LGAC) contact Frances Eargle at (202) 564–3115 or email at *eargle.frances@epa.gov.*

Information Services for Those with Disabilities: For information on access or services for individuals with disabilities, please contact Frances Eargle at (202) 564–3115 or *eargle.frances@epa.gov.* To request accommodation of a disability, please request it 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: December 16, 2016.

Jack Bowles,

Director, State and Local Relations, EPA's Office of Congressional and Intergovernmental Relations.

Draft Field-Based Methods for Developing Aquatic Life Criteria for Specific Conductivity

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of Draft Field-Based Methods for Developing Aquatic Life Criteria for Specific Conductivity for public comment. Elevated ionic concentration measured as specific conductivity has been shown to negatively impact aquatic life in a range of freshwater resources. Once finalized, states and authorized tribes located in any region of the country may use the methods to develop field-based conductivity criteria for flowing waters. This document does not impose binding water quality criteria on any state, but instead provides methods to assist states and tribes that seek to develop such criteria for adoption into their water quality standards. The draft document provides a scientific assessment of ecological effects and is not a regulation. Following closure of this 60-day public comment period, EPA will consider the comments, revise the document, as appropriate, and then publish a final document that will provide methods for states and authorized tribes that they may use to develop water quality standards.

DATES: Comments must be received on or before February 21, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OW–2016–0353, to the *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Colleen Flaherty, Health and Ecological Criteria Division (Mail Code 4304T), Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington,

DC 20460; telephone: (202) 564–5939; or email: *flaherty.colleen@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. How can I get copies of this document and other related information?

1. Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the Water Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Water Docket is (202) 566–2426. For additional information about EPA's public docket, visit EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

II. Information on the Draft Field-Based Methods for Developing Aquatic Life Criteria for Specific Conductivity

EPA has developed a set of draft methods that states and authorized tribes may use to derive field-based ecoregional ambient aquatic life criteria for ionic mixtures measured as specific conductivity, a measurement of ionic concentration, in flowing waters. Elevated ionic concentration measured as specific conductivity has been shown to impact aquatic life in a range of freshwater resources. Different mixtures of ions that increase specific conductivity are associated with natural and anthropogenic sources.

EPA's draft methods provide flexible approaches for developing science-based conductivity criteria for flowing waters that reflect ecoregional- or state-specific factors. Once final, states and authorized tribes located in any region of the country may use the methods to develop field-based conductivity criteria for flowing waters. The document does not impose binding water quality criteria on any state, but instead provides methods to assist states and tribes that seek to develop such criteria for adoption into their water quality standards. The draft document provides a scientific assessment of ecological effects and is not a regulation.

EPA's draft methods are based on effects observed in streams with different levels of specific conductivity and take into account natural variation in background specific conductivity and the aquatic species adapted to it. The draft document describes how to derive protective field-based aquatic life criteria for specific conductivity, including how to estimate a criterion continuous concentration for chronic exposures, how to estimate a maximum exposure concentration protective of acute toxicity, how to assess geographic applicability and potential confounding factors, and how to determine duration and frequency parameters.

EPA is also providing four case studies to illustrate how states and tribes may use the draft field-based methods to develop criteria in ecoregions with different background ionic concentrations measured as specific conductivity and demonstrate how to assess the applicability of criteria developed for one ecoregion to a different ecoregion. The case studies use field data to demonstrate how to apply the methods to derive example criteria for specific conductivity for flowing waters dominated by sulfate and bicarbonate salts but not for flowing waters dominated by chloride salts.

EPA typically relies on laboratory toxicity test data for surrogate species as defined in the Agency's *Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses* (1985) for aquatic life criteria development. The draft field-based methods for specific conductivity were adapted to be consistent with the Agency's traditional approach to derive aquatic life criteria. The draft field-based methods rely on geographically referenced, paired observations of specific conductivity and the presence and absence or abundance of freshwater benthic macroinvertebrate genera from wadeable perennial streams. An analysis of data for fish from a composite of case study ecoregions demonstrates that the example criteria based on macroinvertebrates are also protective of fish.

This document underwent an internal EPA review and two independent contractor-led external peer reviews.

III. Solicitation of Scientific Views

EPA is soliciting additional scientific views, data, and information regarding the science and technical approach used in the derivation of the draft field-based methods. EPA is also soliciting suggestions from the public for additional ecoregional case studies for future consideration.

Dated: December 16, 2016.

Joel Beauvais,

Deputy Assistant Administrator, Office of Water.

FEDERAL COMMUNICATIONS COMMISSION

[MB Docket No. 16–357; FCC 16–153]

Entercom License, LLC, Applications for Renewal of License for Station KDND(FM), Sacramento, California

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document commences a hearing to determine whether the applications (FCC File Nos. BRH–20050728AUU and BRH–20130730ANM) (Applications) of Entercom License, LLC (Entercom), for renewal of FM Station KDND, Sacramento, California (Station) should be granted. The hearing will include issues regarding whether Entercom operated the Station in the public interest during the relevant license term, in light of record evidence that Entercom formulated, promoted, conducted, and aired over the Station an inherently dangerous contest in which one listener-contestant died of water intoxication and others suffered serious physical distress.

DATES: Persons desiring to participate as parties in the hearing shall file a petition for leave to intervene not later than January 23, 2017.

ADDRESSES: Please file documents with the Office of the Secretary, Federal Communications Commission, 445 12th Street SW., Washington, DC 20554. Each document that is filed in this proceeding must display on the front page the document number of this hearing, ''MB Docket No. 16–357.''

FOR FURTHER INFORMATION CONTACT: Pamela Kane, Special Counsel, Enforcement Bureau, (202) 418–2393.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Hearing Designation Order (Order), FCC 16–153, adopted October 26, 2016, and released October 27, 2016. The full text of the Order is available for inspection and copying during regular business hours in the FCC Reference Center, 445 12th Street SW., Room CY–A257, Portals II, Washington, DC 20554, and may also be purchased from the Commission's copy contractor, Portals II, 445 12th Street SW., Room CY–B402, Washington, DC 20554. This document is available in alternative formats (computer diskette, large print, audio record, and Braille). Persons with disabilities who need documents in these formats may contact the FCC by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

Synopsis

1. This Order commences a hearing proceeding before an Administrative Law Judge to determine whether the Applications of Entercom for renewal of FM Station KDND, Sacramento, California, should be granted. During the relevant license term, on January 12, 2007, Entercom conducted and aired a contest (Contest) that resulted in the death of one of its listener-contestants, Jennifer Lea Strange (Ms. Strange), and endangered others. At a civil trial (Trial), Entercom was found liable for the wrongful death of Ms. Strange.[1]

2. Section 309(k) of the Communications Act of 1934, as amended, 47 U.S.C. 309(k), requires the Commission to determine whether the ''public interest, convenience, and necessity'' will be served by the granting of each renewal application. If the Commission, upon examination of such application and upon consideration of such other matters as the Commission may officially notice, shall find that public interest, convenience and convenience would be served by the granting thereof, it shall grant the application. If a substantial and material question of fact is presented or the Commission for any reason is unable to make the finding that the station has, *inter alia,* served the public interest, it shall formally designate the application for hearing. If the Commission determines, after notice and opportunity for a hearing, that a licensee has failed to meet the requirements for renewal and that no mitigating factors justify the imposition of lesser sanctions, the Commission shall issue an order denying the renewal application.

3. In this case, significant and material questions exist as to whether Entercom: (i) Designed and conducted a contest that was inherently dangerous; (ii) increased the danger to the contestants by changing the announced Contest terms; (iii) was aware of the potential dangers of the Contest and water intoxication; (iv) failed to protect the contestants from the potential dangers of the Contest; (v) failed to warn the contestants of the Contest's potential dangers; (vi) prioritized entertainment value over the welfare of the contestants; and (vii) failed to conduct adequate training and exercise appropriate supervision of Station KDND employees and the Contest to ensure the safety of the contestants. Because the Commission is unable to make a determination on the record currently before it that grant of the Applications would serve the public interest, convenience and necessity, it designates the Applications for hearing.

4. *Inherent dangers of the Contest.* Entercom's Station KDND held the Contest, called ''Hold Your Wee for a Wii,'' live on its January 12, 2007, 5:30–10:00 a.m. Morning Rave Show (Show). The premise of the Contest was that the contestant who was able to drink water at regular intervals for the longest time without urinating or vomiting would win a Nintendo Wii video game console. At the Trial, a medical expert testified that such over-consumption of water may cause pressure in the brain leading to confusion, disorientation, impaired judgment, and ultimately risk of death. In this case, Ms. Strange returned home after participating in the Contest, slipped into a coma, and died, leaving a husband and three children. The autopsy revealed that she had died of water intoxication. Accordingly, the Commission designates for hearing the issue of whether Entercom designed and conducted a contest that was inherently dangerous.

5. *Increased danger to participants by changing the Contest terms.* In a number of over-the-air announcements prior to the Contest, Entercom staff stated that contestants would be drinking water every fifteen minutes from eight- or 16-ounce glasses of water. These promotional announcements did not mention any risks associated with the Contest in general or with water intoxication (also known as hyponatremia) specifically. When the contestants arrived at the Station, they were informed for the first time by Entercom staff—acting throughout in the course of their employment for Entercom—that they would be drinking eight ounces of water every ten minutes rather than at the fifteen minute intervals previously announced on air, again without mention of any specific risk. No medical personnel were present at the Contest. About 90 minutes into the Contest, apparently concerned that the Contest would not be concluded before the end of the Show, the hosts increased the required water consumption to 16.9-ounce bottles of water every 10 minutes. A medical expert at the Trial testified that these modifications to the Contest heightened the risk of death for the contestants, including Ms. Strange. Accordingly, the Commission designates for hearing the issue of whether Entercom increased the danger to Contest participants by changing the Contest terms from those announced previously on air.

6. *Entercom's awareness of the potential dangers of the Contest and water intoxication.* The record suggests that, prior to and during the Contest, Entercom was aware that water intoxication could cause severe health consequences, and even death. Specifically, during at least two Shows broadcast before the Contest, Entercom staff had discussed on air the fraternity hazing death of a college student by water intoxication, and even attempted

[1] *William A. Strange et al.* v. *Entercom Sacramento LLC et al.,* Superior Court of California, County of Sacramento (Dept. 44), Case No. 07AS00377.

a humorous reenactment of that event, during which an Entercom employee drank a large quantity of water and suffered water intoxication symptoms. During the Contest, the hosts of the Show again referred on air to the possibility of ''water poisoning'' like ''that poor kid in college.'' In addition, during the Show, the producer and hosts received several phone calls from concerned listeners—including medical professionals—specifically warning that the Contest was dangerous and even potentially lethal. Entercom employees responded dismissively to these calls, simply telling callers that the contestants had signed releases. Finally, Entercom employees ignored or joked about the symptoms displayed by contestants, including Ms. Strange, who had a visibly extended abdomen, difficulty walking, and stated on air that her head hurt. Accordingly, the Commission designates for hearing the issue of whether Entercom was aware of the potential dangers to the contestants associated with the Contest.

7. *Failure to protect contestants.* At the Trial, a medical expert testified that Jennifer Strange could have been saved if she were provided with medical assistance at any time prior to her having a convulsion or losing consciousness. However, Entercom did not provide medical assistance even after contestants began to complain of extreme discomfort. Therefore, the Commission designates for hearing the issue of whether Entercom failed to take appropriate steps to ensure the contestants' safety and to protect them from the dangers of the Contest.

8. *Failure to warn contestants of the potential danger posed by the Contest.* The record reflects that, in promotional announcements and on the day of the Contest, Entercom did not inform participants of risks associated with the Contest in general or water intoxication specifically, even after Station staff were specifically notified of the danger by callers. Rather, the hosts of the Show made jocular statements to the contestants that dismissed or otherwise minimized the risks or the severity of the symptoms they were experiencing. Even after learning of Ms. Strange's death, Entercom did not contact the other participants to inform them of her death or suggest that they seek medical attention. Accordingly, the Commission designates for hearing the issue of whether Entercom failed to warn the Contest contestants about the possible dangers associated with water intoxication.

9. *Prioritization of entertainment value over welfare of contestants.* The record suggests that Entercom ran the Contest in a way to maximize its entertainment value to listeners at the expense of the dignity and well-being of the contestants. For example, Show staff induced themselves to vomit near the contestants to get them to do so, photographed the contestants in various states of physical distress, including emerging from the bathroom, and otherwise heckled contestants to create a theatrical atmosphere that may have fostered the discomfort and degradation of the contestants for entertainment value. Accordingly, the Commission designates for hearing the issue of whether Entercom may have prioritized the entertainment value of the Contest over the welfare of the contestants.

10. *Failure to train and supervise Station staff.* It appears from the record that Station staff largely conceived and ran the Contest without adequate supervision or guidance from Station management and Entercom's corporate parent, Entercom Corp. In apparent violation of corporate rules and procedures, the Contest was not presented to Entercom Corp.'s legal department for vetting. Nor did Station staff independently research or otherwise make an objective determination on the Contest's safety or compliance with corporate contest guidelines. The facts on record indicate that there may have been systemic problems with Entercom's training and contest review and oversight process. It appears that Station management had minimal involvement in the conception or conduct of the Contest, perhaps in light of the Show's high ratings and resulting contribution to the licensee's financial bottom line. No individual, at either the Station or corporate level, had clear responsibility for compliance with contest policy, and guidelines formulated at a corporate level were not necessarily communicated to the Station staff who would be actually conducting contests. For these reasons, among others, the record suggests that although the hosts of the Show may have exercised poor judgment during the course of the Contest, they were also not adequately trained or supervised by Entercom with respect to contests. Accordingly, the Commission designates for hearing the issue of whether Entercom conducted adequate training and exercised appropriate supervision over the contest-related activities of KDND personnel, including, in particular, the Contest.

11. *Accordingly, it is ordered* that, pursuant to section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e), the Applications, File Nos. BRH–20050728AUU and BRH–20130730ANM, *are designated for hearing* in a proceeding before an FCC Administrative Law Judge, at a time and place to be specified in a subsequent Order, upon the following issues: (a) To determine whether Entercom designed and conducted a contest that was inherently dangerous; (b) To determine whether Entercom increased the danger to the contestants in the ''Hold Your Wee for a Wii'' contest by changing the contest terms; (c) To determine whether Entercom was aware of the potential dangers of the ''Hold Your Wee for a Wii'' contest and water intoxication; (d) To determine whether Entercom failed to protect the contestants of the ''Hold Your Wee for a Wii'' contest from its potential dangers; (e) To determine whether Entercom failed to warn the contestants of the ''Hold Your Wee for a Wii'' contest of the contest's potential dangers; (f) To determine whether Entercom prioritized entertainment value over the welfare of contestants of the ''Hold Your Wee for a Wii'' contest; (g) To determine whether Entercom failed to properly train and exercise appropriate supervision of Station KDND(FM) staff and the ''Hold Your Wee for a Wii'' contest to ensure the safety of the contestants; (h) To determine, in light of the evidence adduced under the foregoing issues and the totality of circumstances, whether Entercom License, LLC operated Station KDND(FM) in the public interest during the most recent license term; and (i) To determine, in light of the evidence adduced under the foregoing issues and the totality of circumstances, whether Entercom's Applications for Renewal of License for KDND(FM), File Nos. BRH–20130730ANM and BRH–20050728AUU, should be granted.

12. *It is further ordered* that, irrespective of the resolution of the foregoing issues, the Petition to Deny filed by Irene M. Stolz, on November 1, 2005, *is dismissed as moot in part and denied in part.*

13. *It is further ordered* that the Petition to Deny filed by Media Action Center and Sue Wilson on October 31, 2013, and the Petition to Deny filed by Edward R. Stolz II on November 1, 2013, considered as an informal objection, are granted in part, to the extent that they seek designation for hearing of the subject Entercom license renewal applications on issues (a) through (g) above, *and are otherwise denied.*

14. *It is further ordered* that the Informal Objection filed by Roger D. Smith on October 22, 2013, *is granted.*

15. *It is further ordered* that the Chief, Enforcement Bureau, shall be made a party to this proceeding without the need to file a written appearance.

16. *It is further ordered* that Media Action Center and Sue Wilson shall be made parties to this hearing in their capacity as a petitioner to the captioned applications.

17. *It is further ordered* that pursuant to Section 309(e) of the Act and Section 1.221(c) of the Commission's Rules, to avail itself of the opportunity to be heard and to present evidence at a hearing in this proceeding, Entercom, in person or by its attorneys, *shall file* with the Commission, within 20 calendar days of the release of this Order, a written appearance stating that it will appear at the hearing and present evidence on the issues specified above.

18. *It is further ordered* that, pursuant to Section 1.221(c) of the Commission's Rules, if Entercom fails to file a timely written appearance, or has not filed prior to the expiration of that time a petition to dismiss the captioned Applications without prejudice, or a petition to accept, for good cause shown, such written appearance beyond expiration of said 20 calendar days, the Applications shall be dismissed with prejudice for failure to prosecute.

19. *It is further ordered* that to avail themselves of the opportunity to be heard and the right to present evidence at a hearing in these proceedings, pursuant to Section 1.221(e) of the Commission's Rules, Media Action Center and Sue Wilson, *shall file* within 20 calendar days of the release of this Order, a written appearance stating their intention to appear at the hearing and present evidence on the issues specified above. Any entity or person so named above who fails to file this written statement within the time specified, shall, unless good cause for such failure is shown, forfeit its hearing rights.

20. *It is further ordered,* in accordance with Section 309(e) of the Communications Act of 1934, as amended, the burden of proceeding with the introduction of evidence and the burden of proof, with respect to all issues designated herein, shall be upon Entercom.

21. *It is further ordered,* that Entercom herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594 of the Commission's Rules, *give notice* of the hearing within the time and in the manner prescribed in such Rule, and *shall advise* the Commission of the publication of such notice as required by Section 73.3594(g) of the Commission's Rules.

22. *It is further ordered* that copies of this document *shall be sent via* Certified Mail, Return Receipt Requested, and by regular first class mail to the following: Carrie A. Ward, Esq., Entercom License, LLC, 401 City Avenue, Suite 809, Bala Cynwyd, PA 65483; Dennis P. Corbett, Esq., Lerman Senter PLLC, 2000 K Street NW., Suite 600, Washington, DC 20006–1809; Media Action Center and Sue Wilson, 18125 Tyler Road, Fiddletown, CA 95629; Edward R. Stolz, II, c/o Dennis J. Kelly, Esq., Law Office of Dennis J. Kelly, P.O. Box 41177, Washington, DC 20018; Roger D. Smith, 6755 Wells Avenue, Loomis, CA 95650.

Federal Communications Commission.

Information Collections Being Submitted for Review and Approval to the Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communication Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 23, 2017. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Kimberly R. Keravuori, OMB, via email *Kimberly_R_Keravuori@omb.eop.gov;* and to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov*. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page *http://www.reginfo.gov/public/do/PRAMain*, (2) look for the section of the Web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0865.

Title: Wireless Telecommunications Bureau Universal Licensing System Recordkeeping and Third Party Disclosure Requirements.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Individuals or households, Not-for-profit institutions, and State, Local or Tribal Government.

Number of Respondents and Responses: 62,490 respondents; 168,908 responses.

Estimated Time per Response: .166 hours (10 minutes)–4 hours.

Frequency of Response: Recordkeeping and third-party disclosure requirements; on occasion reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154(i) and 309(j).

Total Annual Burden: 88,927 hours.

Annual Cost Burden: None.

Privacy Act Impact Assessment: Yes.

Nature and Extent of Confidentiality: This information collection contains personally identifiable information (PII). The FCC has a system of records notice (SORN), FCC/WTB–1, ''Wireless Services Licensing Records,'' to cover the collection, maintenance, use(s), and destruction of this PII, which respondents may provide to the FCC as part of the information collection requirement(s). This SORN was published in the **Federal Register** on April 5, 2006 (71 FR 17234, 17269).

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) as an extension after this 60 day comment period to obtain the full three-year clearance from them.

The purpose of this information collection is to continually streamline and simplify processes for wireless applicants and licensees, who previously used a myriad of forms for various wireless services and types of requests, in order to provide the Commission information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public, which has access to all publicly available wireless licensing information on-line, including maps depicting a licensee's geographic service area.

OMB Control Number: 3060–1094.

Title: Licensing, Operation, and Transition of the 2500–2690 MHz Band.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local, or tribal Government.

Number of Respondents: 10 respondents, 250 responses.

Estimated Time per Response: 0.50 hours.

Frequency of Response: Third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for the collection is contained in 47 U.S.C. 151, 154(i), 301, 303(f), 303(g), 303(r), 307, 308, 316.

Total Annual Burden: 125 hours.

Total Annual Cost: No cost.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this information collection.

Needs and Uses: The information collection requirements for this collection are contained under 47 CFR 27.1221(f) which states a Broadband Radio Service/Educational Broadband Service (BRS/EBS) licensee shall provide the geographic coordinates, the height above ground level of the center of radiation for each transmit and receive antenna, and the date transmissions commenced for each of the base stations in its GSA within 30 days of receipt of a request from a co-channel BRS/EBS licensee with an operational base station located in a proximate GSA. Information shared pursuant to this section shall not be disclosed to other parties except as required to ensure compliance with this section.

The third party disclosure coordination and information exchange requirements are necessary to ensure that licensees do not cause interference to each other.

OMB Control No.: 3060–1121.

Title: Sections 1.30002, 1.30003, 1.30004, 73.875, 73.1657 and 73.1690, Disturbance of AM Broadcast Station Antenna Patterns.

Form No.: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities and Not-for-profit Institutions.

Number of Respondents and Responses: 1,195 respondents and 1,195 responses.

Estimated Time per Response: 1–2 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in Section 154(i) of the Communications Act of 1934, as amended.

Total Annual Burden: 1,960 hours.

Total Annual Cost: $1,078,200.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: On August 14, 2013, the Commission adopted the Third Report and Order and Second Order on Reconsideration in the matter of An Inquiry Into the Commission's Policies and Rules Regarding AM Radio Service Directional Antenna Performance Verification, MM Docket No. 93–177, FCC 13–115. In the Third Report and Order in this proceeding, the Commission harmonized and streamlined the Commission's rules regarding tower construction near AM stations.

In AM radio, the tower itself functions as the antenna. Consequently, a nearby tower may become an unintended part of the AM antenna system, reradiating the AM signal and distorting the authorized AM radiation pattern. Our old rules contained several sections concerning tower construction near AM antennas that were intended to protect AM stations from the effects of such tower construction, specifically, Sections 73.1692, 22.371, and 27.63. These old rule sections imposed differing requirements on the broadcast and wireless entities, although the issue is the same regardless of the types of antennas mounted on a tower. Other rule parts, such as Part 90 and Part 24, entirely lacked provisions for protecting AM stations from possible effects of nearby tower construction. In the Third Report and Order the Commission adopted a uniform set of rules applicable to all services, thus establishing a single protection scheme regarding tower construction near AM tower arrays. The Third Report and Order also designates ''moment method'' computer modeling as the principal means of determining whether a nearby tower affects an AM radiation pattern. This serves to replace time-consuming direct measurement procedures with a more efficient computer modeling methodology that is reflective of current industry practice.

Information Collection Requirements Contained in this Collection Are as Follows:

47 CFR 1.30002(a) requires a proponent of construction or modification of a tower within a specified distance of a nondirectional AM station, and also exceeding a specified height, to notify the AM station at least 30 days in advance of the commencement of construction. If the tower construction or modification would distort the AM pattern, the

proponent shall be responsible for the installation and maintenance of detuning equipment.

47 CFR 1.30002(b) requires a proponent of construction or modification of a tower within a specified distance of a directional AM station, and also exceeding a specified height, to notify the AM station at least 30 days in advance of the commencement of construction. If the tower construction or modification would distort the AM pattern, the proponent shall be responsible for the installation and maintenance of detuning equipment.

47 CFR 1.30002(c) states that proponents of tower construction or alteration near an AM station shall use moment method modeling, described in § 73.151(c), to determine the effect of the construction or alteration on an AM radiation pattern.

47 CFR 1.30002(f) states that, with respect to an AM station that was authorized pursuant to a directional proof of performance based on field strength measurements, the proponent of the tower construction or modification may, in lieu of the study described in § 1.30002 (c), demonstrate through measurements taken before and after construction that field strength values at the monitoring points do not exceed the licensed values. In the event that the pre-construction monitoring point values exceed the licensed values, the proponent may demonstrate that post-construction monitoring point values do not exceed the pre-construction values. Alternatively, the AM station may file for authority to increase the relevant monitoring point value after performing a partial proof of performance in accordance with § 73.154 to establish that the licensed radiation limit on the applicable radial is not exceeded.

47 CFR 1.30002(g) states that tower construction or modification that falls outside the criteria described in paragraphs § 1.30002(a) and (b) is presumed to have no significant effect on an AM station. In some instances, however, an AM station may be affected by tower construction notwithstanding the criteria set forth in paragraphs § 1.30002(a) and (b). In such cases, an AM station may submit a showing that its operation has been affected by tower construction or alteration. Such showing shall consist of either a moment method analysis or field strength measurements. The showing shall be provided to (i) the tower proponent if the showing relates to a tower that has not yet been constructed or modified and otherwise to the current tower owner, and (ii) to the Commission, within two years after the date of completion of the tower construction or modification. If necessary, the Commission shall direct the tower proponent to install and maintain any detuning apparatus necessary to restore proper operation of the AM antenna.

47 CFR 1.30002(h) states that an AM station may submit a showing that its operation has been affected by tower construction or modification commenced or completed prior to or on the effective date of the rules adopted in this Part pursuant to MM Docket No. 93–177. Such a showing shall consist of either a moment method analysis or of field strength measurements. The showing shall be provided to the current owner and the Commission within one year of the effective date of the rules adopted in this Part. If necessary, the Commission shall direct the tower owner, if the tower owner holds a Commission authorization, to install and maintain any detuning apparatus necessary to restore proper operation of the AM antenna.

47 CFR 1.30002(i) states that a Commission applicant may not propose, and a Commission licensee or permittee may not locate, an antenna on any tower or support structure, whether constructed before or after the effective date of these rules, that is causing a disturbance to the radiation pattern of the AM station, as defined in paragraphs § 1.30002(a) and (b), unless the applicant, licensee, or tower owner completes the new study and notification process and takes appropriate ameliorative action to correct any disturbance, such as detuning the tower, either prior to construction or at any other time prior to the proposal or antenna location.

47 CFR 1.30003(a) states that when antennas are installed on a nondirectional AM tower the AM station shall determine operating power by the indirect method (see § 73.51). Upon the completion of the installation, antenna impedance measurements on the AM antenna shall be made. If the resistance of the AM antenna changes, an application on FCC Form 302–AM (including a tower sketch of the installation) shall be filed with the Commission for the AM station to return to direct power measurement. The Form 302–AM shall be filed before or simultaneously with any license application associated with the installation.

47 CFR 1.30003(b) requires that, before antennas are installed on a tower in a directional AM array, the proponent shall notify the AM station so that, if necessary, the AM station may determine operating power by the indirect method (see § 73.51) and request special temporary authority pursuant to § 73.1635 to operate with parameters at variance. For AM stations licensed via field strength measurements (see § 73.151(a)), a partial proof of performance (as defined by § 73.154) shall be conducted both before and after construction to establish that the AM array will not be and has not been adversely affected. For AM stations licensed via a moment method proof (see § 73.151(c)), the proof procedures set forth in § 73.151(c) shall be repeated. The results of either the partial proof of performance or the moment method proof shall be filed with the Commission on Form 302–AM before or simultaneously with any license application associated with the installation.

47 CFR 1.30004(a) requires proponents of proposed tower construction or modification to an existing tower near an AM station that are subject to the notification requirement in §§ 1.30002–1.30003 to provide notice of the proposed tower construction or modification to the AM station at least 30 days prior to commencement of the planned tower construction or modification. Notification to an AM station and any responses may be oral or written. If such notification and/or response is oral, the party providing such notification or response must supply written documentation of the communication and written documentation of the date of communication upon request of the other party to the communication or the Commission. Notification must include the relevant technical details of the proposed tower construction or modification, and, at a minimum, also include the following: proponent's name and address; coordinates of the tower to be constructed or modified; physical description of the planned structure; and results of the analysis showing the predicted effect on the AM pattern, if performed.

47 CFR 1.30004(b) requires that a response to a notification indicating a potential disturbance of the AM radiation pattern must specify the technical details and must be provided to the proponent within 30 days.

47 CFR 1.30004(d) states that if an expedited notification period (less than 30 days) is requested by the proponent, the notification shall be identified as ''expedited,'' and the requested response date shall be clearly indicated.

47 CFR 1.30004(e) states that in the event of an emergency situation, if the proponent erects a temporary new tower or makes a temporary significant

modification to an existing tower without prior notice, the proponent must provide written notice to potentially affected AM stations within five days of the construction or modification of the tower and cooperate with such AM stations to remedy any pattern distortions that arise as a consequence of such construction.

47 CFR 73.875(c) requires an LPFM applicant to submit an exhibit demonstrating compliance with § 1.30003 or § 1.30002, as applicable, with any modification of license application filed solely pursuant to paragraphs (c)(1) and (c)(2) of this section, where the installation is on or near an AM tower, as defined in § 1.30002.

47 CFR 73.1675(c)(1) states that where an FM, TV, or Class A TV licensee or permittee proposes to mount an auxiliary facility on an AM tower, it must also demonstrate compliance with § 1.30003 in the license application.

47 CFR 73.1690(c) requires FM, TV, or Class A TV station applicants to submit an exhibit demonstrating compliance with § 1.30003 or § 1.30002, as applicable, with a modification of license application, except for applications solely filed pursuant to paragraphs (c)(6) or (c)(9) of this section, where the installation is located on or near an AM tower, as defined in § 1.30002.

OMB Control No.: 3060–xxxx.

Title: Sections 80.233, Technical requirements for Automatic Identification System Search and Rescue Transmitter (AIS–SART) equipment, 80.1061 Special requirements for 406.0–406.1 MHz EPIRB stations, 95.1402 Special requirements for 406 MHz PLBs, 95.1403 Special Requirements for Maritime Survivor Locating Devices.

Form No.: N/A.

Type of Review: New collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 80 respondents and 80 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: Third party disclosure requirement and on occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in Sections 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303 unless otherwise noted.

Total Annual Burden: 80 hours.

Annual Cost Burden: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this information collection.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them.

The information collections contained in these rule sections require manufacturers of certain emergency radio beacons to include supplemental information with their equipment certification application which are due to the I formation collection requirements which were adopted by the Federal Communications Commission in FCC 16–119 on August 30, 2016. Manufacturers of Automatic Identification System Search and Rescue Transmitters (AIS–SARTS), 406 MHz Emergency Position Indicating RadioBeacons (EPRIBs) and Maritime Survivor Locating Device (MSLD) must provide a copy of letter from the U.S. Coast Guard stating their devices satisfies technical requirements specified in the IEC 61097–17 technical standard for AIS–SARTs, or Radio Technical Commission for Maritime Services (RTCM) Standard 11000 for 406 MHz EPIRBs, or that RTCM Standard 11901 for MSLDs. They must also provide a copy or the technical test data, and the instruction manual(s). For 406 MHz PLBs manufacturers must include documentation from COSPAS/SARSAT recognized test facility that the PLB satisfies the technical requirements specified in COSPAS–SARSAT Standard C/S T.001 and COSPAS–SARSAT Standard C/S T.007 standards and documentation from an independent test facility stating that the PLB complies RTCM Standard 11010.2. The information is used by Telecommunications Certification Bodies (TCBs) to determine if the devices meets the necessary international technical standards and insure compliance with applicable rules. If this information were not available, operation of marine safety equipment could be hindered threatening the ability of rescue personnel to locate vessels in distress.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 19, 2017.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Canada Bancshares, Inc., England, Arkansas;* to become a bank holding company by acquiring Bank of England, England, Arkansas.

2. *MHBC Investments Limited Partnership I, LLLP, England, Arkansas;* to acquire 63.77 percent of Canada Bancshares, Inc., and thereby indirectly retain control of Bank of England, both in England, Arkansas.

Board of Governors of the Federal Reserve System, December 20, 2016.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–1681–N]

Medicare Program; Renewal of the Advisory Panel on Hospital Outpatient Payment and Solicitation of Nominations to the Advisory Panel on Hospital Outpatient Payment

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the renewal of the Advisory Panel (the Panel) on Hospital Outpatient Payment (HOP) panel charter. The charter was approved on November 21, 2016 for a 2-year period effective through November 21, 2018. This notice also solicits nominations for up to two new members to the HOP Panel. There will be two vacancies on the Panel for 4-year terms that begin during Calendar Year (CY) 2017.

The purpose of the Panel is to advise the Secretary of the Department of Health and Human Services (DHHS) (the Secretary) and the Administrator of the Centers for Medicare & Medicaid Services (CMS) (the Administrator) on the clinical integrity of the Ambulatory Payment Classification (APC) groups and their associated weights, and supervision of hospital outpatient therapeutic services.

DATES: *Submission of Nominations:* We will consider nominations if they are received no later than 5 p.m. Eastern Standard Time (E.S.T) February 21, 2017.

ADDRESSES: Please submit nominations electronically to the following email address: *APCPanel@cms.hhs.gov.*

Web site: For additional information on the Panel and updates to the Panel's activities, we refer readers to our Web site at the following address: *http://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html.*

FOR FURTHER INFORMATION CONTACT: Persons wishing to nominate individuals to serve on the Panel or to obtain further information may submit an email to the following email address: *APCPanel@cms.hhs.gov.*

News Media: Representatives should contact the CMS Press Office at (202) 690–6145.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Department of Health and Human Services (DHHS) (the Secretary) is required by section 1833(t)(9)(A) of the Social Security Act (the Act), and allowed by section 222 of the Public Health Service Act (PHS Act) to consult with an expert outside panel, that is, the Advisory Panel on Hospital Outpatient Payment (the Panel) regarding the clinical integrity of the Ambulatory Payment Classification (APC) groups and relative payment weights that are components of the Medicare Hospital Outpatient Prospective Payment System (OPPS), and the appropriate supervision level for hospital outpatient therapeutic services. The Panel is governed by the provisions of the Federal Advisory Committee Act (FACA) (Pub. L. 92–463), as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory panels. The Panel may consider data collected or developed by entities and organizations (other than the DHHS) as part of their deliberations.

The Panel Charter provides that the Panel shall meet up to 3 times annually. As announced in the notice, published in the **Federal Register** on May 20, 2016, entitled ''Medicare Program; Announcement of the Advisory Panel on Hospital Outpatient Payment (the Panel) Meeting on August 22–23, 2016 and Announcement of Transition to One Meeting of the Panel Per Year'' (81 FR 31942), in Calendar Year (CY) 2017 and thereafter, (unless the Centers for Medicare & Medicaid (CMS) programmatic need suggests otherwise) there will be only one Panel meeting per year that will occur in the summer. We consider the technical advice provided by the Panel as we prepare the proposed and final rules to update the OPPS for the following CY.

II. Renewal of the Hospital Outpatient Payment (HOP) Panel

The Panel was originally chartered on November 21, 2000 and the Panel requires a recharter every 2 years. In the April 24, 2015 **Federal Register** notice, (80 FR 23009), we inadvertently stated that the charter renewal was approved on November 6, 2014 for a 2-year period ending November 6, 2016, the correct approval date was November 21, 2014 for a 2-year period effective through November 21, 2016.

This notice announces the renewal of the HOP Panel charter, which was approved on November 21, 2016 for a 2-year period effective through November 21, 2018. The charter will terminate on November 21, 2018, unless renewed by appropriate action. CMS intends to recharter the Panel for another 2-year period prior to the expiration of the current charter.

Pursuant to the renewed charter, the Panel will advise the Secretary and CMS concerning optimal strategies for the following:

- Addressing whether procedures within an APC group are similar both clinically and in terms of resource use.
- Reconfiguring APCs (for example, splitting of APCs, moving Healthcare Common Procedures Coding System (HCPCS) codes from one APC to another, and moving HCPCS codes from new technology APCs to clinical APCs).
- Evaluating APC group weights.
- Reviewing packaging the cost of items and services, including drugs and devices into procedures and services; including the methodology for packaging and the impact of packaging the cost of those items and services on APC group structure and payment.
- Removing procedures from the inpatient list for payment under the OPPS payment system.
- Using claims and cost report data for CMS' determination of APC group costs.
- Addressing other technical issues concerning APC group structure.
- Evaluating the required level of supervision for hospital outpatient services.

III. Solicitation of Nominations; Criteria for Nominees

The Panel shall consist of a chair and up to 15 members who are full-time employees of hospitals, hospital systems, or other Medicare providers that are subject to the OPPS. For supervision deliberations, the Panel shall also include members that represent the interests of Critical Access Hospitals (CAHs), who advise CMS only regarding the level of supervision for hospital outpatient therapeutic services. (For purposes of the Panel, consultants or independent contractors are not considered to be full-time employees in these organizations.)

The current Panel members are as follows:

(*Note:* The asterisk [*] indicates the Panel members whose terms end during CY 2017, along with the month that the term ends.)

- E.L. Hambrick, M.D., J.D., Chair, a CMS Medical Officer.
- Shelly Dunham, R.N.
- Kenneth M. Flowe, M.D., M.B.A.
- Dawn L. Francis, M.D., M.H.S.
- Erika Hardy, R.H.I.A.
- Karen Lambert
- Ruth Lande
- Scott Manaker, M.D., Ph.D.

- Agatha Nolen, Ph.D., D.Ph
- Rick Nordahl, M.B.A.
- Johnathan Pregler, M.D.
- Michael Rabovsky, M.D. *(January 2017)
- Wendy Resnick, F.H.F.M.A.
- Michael K. Schroyer, R.N.
- Norman Thomson, III, M.D.
- Kris Zimmer *(January 2017)

Panel members serve on a voluntary basis, without compensation, according to an advance written agreement; however, for the meetings, CMS reimburses travel, meals, lodging, and related expenses in accordance with standard Government travel regulations. CMS has a special interest in ensuring, while taking into account the nominee pool, that the Panel is diverse in all respects of the following: geography; rural or urban practice; race, ethnicity, sex, and disability; medical or technical specialty; and type of hospital, hospital health system, or other Medicare provider subject to the OPPS.

Based upon either self-nominations or nominations submitted by providers or interested organizations, the Secretary, or his or her designee, appoints new members to the Panel from among those candidates determined to have the required expertise. New appointments are made in a manner that ensures a balanced membership under the FACA guidelines. For 2017, we are soliciting for up to two new nominees. Our appointment schedule will assure that we have the full complement of members for each Panel meeting.

The Panel must be balanced in its membership in terms of the points of view represented and the functions to be performed. Each panel member must be employed full-time by a hospital, hospital system, or other Medicare provider subject to payment under the OPPS (except for the CAH members, since CAHs are not paid under the OPPS). All members must have technical expertise to enable them to participate fully in the Panel's work. Such expertise encompasses hospital payment systems; hospital medical care delivery systems; provider billing systems; APC groups; Current Procedural Terminology codes; and alpha-numeric Health Care Common Procedure Coding System codes; and the use of, and payment for, drugs, medical devices, and other services in the outpatient setting, as well as other forms of relevant expertise. For supervision deliberations, the Panel shall have members that represent the interests of CAHs, who advise CMS only regarding the level of supervision for hospital outpatient therapeutic services.

It is not necessary for a nominee to possess expertise in all of the areas listed, but each must have a minimum of 5 years of experience and currently have full-time employment in his or her area of expertise. Generally, members of the Panel serve overlapping terms up to 4 years, based on the needs of the Panel and contingent upon the rechartering of the Panel. A member may serve after the expiration of his or her term until a successor has been sworn in.

Any interested person or organization may nominate one or more qualified individuals. Self-nominations will also be accepted. Each nomination must include the following:

- Letter of Nomination stating the reasons why the nominee should be considered.
- Curriculum vitae or resume of the nominee that includes an email address where the nominee can be contacted.
- Written and signed statement from the nominee that the nominee is willing to serve on the Panel under the conditions described in this notice and further specified in the Charter.
- The hospital or hospital system name and address, or CAH name and address, as well as all Medicare hospital and or Medicare CAH billing numbers of the facility where the nominee is employed.

IV. Copies of the Charter

To obtain a copy of the Panel's Charter, we refer readers to our Web site at *http://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html.*

V. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: December 13, 2016.

Andrew M. Slavitt,

Acting Administrator, Centers for Medicare & Medicaid Services.

[FR Doc. 2016–31022 Filed 12–22–16; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10634]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *January 23, 2017.*

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *or*, Email: *OIRA_submission@omb.eop.gov*.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995*.

2. Email your request, including your address, phone number, OMB number,

and CMS document identifier, to *Paperwork@cms.hhs.gov*.

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* Evaluating a Pilot Mobile Health Program; *Use:* CMS is supporting a pilot mobile health (mHealth) program in California, Louisiana, Ohio, and Oklahoma. The three-year mHealth project is being conducted to complement existing CMCS measurement, data collection, and reporting activities to monitor, track, and assess state's maternal and infant health efforts in Medicaid and CHIP populations. This information collection request supports the evaluation of the pilot mHealth program and will be used to assist CMS in tracking maternal and infant health outcomes in the Medicaid population. The methods used for collection and analysis of the data may be useful to states and serve to increase reporting of perinatal core set measures and monitoring and interpretation of state-level maternal and infant health efforts. Results from the evaluation will help CMS understand the usefulness of mobile technology for conveying health information to pregnant women and new mothers enrolled in Medicaid/CHIP, as well as the influence this information has on health behaviors and outcomes. *Form Number:* CMS–10634 (OMB control number: 0938–New); *Frequency:* Once; *Affected Public:* Individuals and households, Business or other for-profits and Not-for-profits institutions, State, local, or Tribal Governments; *Number of Respondents:* 1,679; *Total Annual Responses:* 1,679; *Total Annual Hours:* 962. (For policy questions regarding this collection contact Lekisha Daniel-Robinson at 410–786–8618.)

Dated: December 20, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Privacy Act of 1974; Computer Matching Agreement

AGENCY: Office of Child Support Enforcement (OCSE), ACF, HHS.

ACTION: Notice.

SUMMARY: In accordance with the Privacy Act of 1974 (5 U.S.C. 522a), as amended, OCSE is publishing a notice of a computer matching program between OCSE and state agencies administering the Supplemental Nutrition Assistance Program (SNAP).

DATES: On December 13, 2016, HHS sent a report of the Computer Matching Program to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Oversight and Government Reform of the House of Representatives, and the Office of Information and Regulatory Affairs of the Office of Management and Budget (OMB), as required by 5 U.S.C. 552a(r) of the Privacy Act. HHS invites interested parties to review and submit written data, comments, or arguments to the agency about the matching program until January 23, 2017.

ADDRESSES: Interested parties may submit written comments on this notice to Linda Boyer, Director, Division of Federal Systems, Office of Child Support Enforcement, Administration for Children and Families, Mary E. Switzer Building, 330 C Street SW., 5th Floor, Washington, DC 20201. Comments received will be available for public inspection at this address from 9:00 a.m. to 5:00 p.m. ET, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Linda Boyer, Director, Division of Federal Systems, Office of Child Support Enforcement, Administration for Children and Families, Mary E. Switzer Building, 330 C Street SW., 5th Floor, Washington, DC 20201, 202–401–5410.

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552a), as amended, provides for certain protections for individuals applying for and receiving federal benefits. The law governs the use of computer matching by federal agencies when records in a system of records are matched with other federal, state, or local government records. The Privacy Act requires agencies involved in computer matching programs to:

1. Negotiate written agreements with the other agency or agencies participating in the matching programs.

2. Provide notification to applicants and beneficiaries that their records are subject to matching.

3. Verify information produced by such matching program before reducing, making a final denial of, suspending, or terminating an individual's benefits or payments.

4. Publish notice of the computer matching program in the **Federal Register**.

5. Furnish reports about the matching program to Congress and the OMB.

6. Obtain the approval of the matching agreement by the Data Integrity Board of any federal agency participating in a matching program.

This matching program meets these requirements.

Dated: December 13, 2016.

Donna Bonar,

Deputy Commissioner, Office of Child Support Enforcement.

Notice of New Computer Matching Program

A. Participating Agencies

The participating agencies are the Office of Child Support Enforcement (OCSE), which is the ''source agency,'' and state agencies administering the Supplemental Nutrition Assistance Program (SNAP), which are the ''non-federal agencies.''

B. Purpose of the Matching Program

The purpose of the matching program is to provide new hire, quarterly wage, and unemployment insurance information from OCSE's National Directory of New Hires (NDNH) to state agencies administering SNAP to assist in establishing or verifying the eligibility for assistance, reducing payment errors, and maintaining program integrity, including determining whether duplicate participation exists or if the client

resides in another state. The state agencies administering SNAP may also use the NDNH information for the secondary purpose of updating the recipients' reported participation in work activities and updating recipients' and their employers' contact information maintained by the state agencies.

C. Authority for Conducting the Match

The authority for conducting the matching program is contained in section 453(j)(10) of the Social Security Act (42 U.S.C. 653(j)(10)). The Agriculture Act of 2014, Public Law 113–079, amended section 11(e) of the Food and Nutrition Act of 2008 (7 U.S.C. 2020(e)(24)) by adding the requirement

that the State agency shall request wage data directly from the National Directory of New Hires established under section 453(i) of the Social Security Act (42 U.S.C. 653(i)) relevant to determining eligibility to receive supplemental nutrition assistance program benefits and determining the correct amount of those benefits at the time of certification;

D. Categories of Individuals Involved and Identification of Records Used in the Matching Program

The categories of individuals involved in the matching program are adult members of households that receive or have applied for SNAP benefits. The system of records maintained by OCSE from which records will be disclosed for the purpose of this matching program is the ''OCSE National Directory of New Hires'' (NDNH), No. 09–80–0381, last published in the **Federal Register** at 80 FR 17906 on April 2, 2015. The NDNH contains new hire, quarterly wage, and unemployment insurance information. The disclosure of NDNH information by OCSE to the state agencies administering SNAP is a ''routine use'' under this system of records. Records resulting from the matching program and that are disclosed to state agencies administering SNAP include names, Social Security numbers, home addresses, and employment information.

E. Inclusive Dates of the Matching Program

The computer matching agreement will be effective and matching activity may commence the later of the following:

(1) 30 days after this notice is published in the **Federal Register** or (2) 40 days after OCSE sends a report of the matching program to the Congressional committees of jurisdiction under 5 U.S.C. 552a(o)(2)(A), and to OMB, unless OMB disapproves the agreement within the 40-day review period or grants a waiver of 10 days of the 40-day review period. The matching agreement will remain in effect for 18 months from its effective date, unless one of the parties to the agreement advises the other by written request to terminate or modify the agreement. The agreement is subject to renewal by the HHS Data Integrity Board for 12 additional months if the matching program will be conducted without any change and OCSE and the state agency certify to the Data Integrity Board in writing that the program has been conducted in compliance with the agreement.

BILLING CODE 4184–42–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[CFDA Number: 93.676]

Announcement of an Award for a Single-Source Urgent and Compelling Grant Under the Unaccompanied Children's Services Program to BCFS Health and Human Services Emergency Management Division (BCFS EMD)

AGENCY: Office of Refugee Resettlement, ACF, HHS.

ACTION: Notice of Award of a single-source urgent and compelling grant to BCFS Health and Human Services (BCFS) in San Antonio, TX.

SUMMARY: The Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR), announces the award of a single-source urgent and compelling grant for $160,459,524 under the Unaccompanied Children's (UC) Program in response to Unsolicited Proposal UN–2016–01.

The proposal submitted by BCFS EMD was not solicited either formally, or informally, by any Federal Government Official. The proposed turnkey operations are outside of the scope of ACF funding opportunity announcements that have been or are expected to be issued. BCFS EMD has proposed to build temporary semi-permanent infrastructure and capacity to provide for operational requirements to support the housing and daily living activities of up to 5,000 UC, throughout their initial intake, assessment and reunification phase. These additional beds will allow for additional capacity until the end of the fiscal year to accommodate the anticipated level of UC referrals through FY 15 should HHS exceed the shelter capacity currently available.

ORR has been identifying additional capacity to provide shelter for potential increases in apprehensions of Unaccompanied Children at the U.S. Southern Border. Planning for increased shelter capacity is a prudent step to ensure that ORR is able to meet its responsibility, by law, to provide shelter for Unaccompanied Children referred to its care by the Department of Homeland Security (DHS).

BCFS has the infrastructure, licensing, experience and appropriate level of emergency staff to meet the service requirements and the urgent need for expansion of services. BCFS provides residential services to UC in the care and custody of ORR, as well as services to include counseling, case management, and additional support services to the family or to the UC and their sponsor when a UC is released from ORR's care and custody.

DATES: Single-source urgent and compelling award funds will support activities from September1, 2016 through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Jallyn Sualog, Director, Division of Children's Services, Office of Refugee Resettlement, 330 C Street SW., Washington, DC 20201. Email: *DCSProgram@acf.hhs.gov.*

SUPPLEMENTARY INFORMATION:

ORR is continuously monitoring its capacity to shelter the unaccompanied children referred to HHS, as well as the information received from interagency partners, to inform any future decisions or actions.

ORR has specific requirements for the provision of services. Award recipients must have the infrastructure, licensing, experience, and appropriate level of trained staff to meet the service requirements and the urgent need for expansion of services. The program's ability to avoid a buildup of children waiting, in Border Patrol stations, for placement in shelters, can only be accommodated through the expansion of the existing program and its services through the award.

Statutory Authority: This program is authorized by—

(A) Section 462 of the Homeland Security Act of 2002, which in March 2003, transferred responsibility for the care and custody of Unaccompanied Alien Children from the Commissioner of the former Immigration and Naturalization Service (INS) to the Director of ORR of the Department of Health and Human Services (HHS).

(B) The Flores Settlement Agreement, Case No. CV85–4544RJK (C. D. Cal.

1996), as well as the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (Pub. L. 110–457), which authorizes post release services under certain conditions to eligible children. All programs must comply with the Flores Settlement Agreement, Case No. CV85–4544–RJK (C.D. Cal. 1996), pertinent regulations and ORR policies and procedures.

Christopher Beach,

Office of Administration, Office of Financial Services, Division of Grants Policy.

BILLING CODE 4184–45–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects: Childcare.gov.

Title: CCDF Grantee Consumer Education Database Linkages with *Childcare.gov.*

OMB No.: New.

Description: The Child Care and Development Block Grant (CCDBG) Act of 2014 requires HHS to create a national Web site for consumer education. The National Web site will be hosted at *childcare.gov.* CCDBG grantees are also required to stand up child care consumer education Web sites that meet the requirements of the law. The CCDBG Final Rule aligns the National and State Web sites by requiring Lead Agencies to provide HHS with linkages to their databases that store consumer education information. The *Childcare.gov* Web site, maintained by Office of Child care will collect child care specific information from State and Territory databases and make that information available for parents using the *childcare.gov* Web site to search for child care that meets their needs. *Childcare.gov* will provide consumers, directly or through linkages to State and Territory data sources, with the following minimum information and services:

(1) A localized list of all eligible child care providers, differentiating between licensed and license-exempt providers;

(2) Child care provider-specific information from a quality rating and improvement system or information about other quality indicators, to the extent that such information is publicly available and practicable.

Respondents: CCDBG grantees in States and Territories.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Childcare.gov data collection: Establish and maintain Web-based data connection in subsequent years	56	260	.57	8,299

Estimated Total Annual Burden Hours: 8,299 hours.

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington, DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2012–N–1021]

Medical Device User Fee and Modernization Act; Notice to Public of Web Site Location of Fiscal Year 2017 Proposed Guidance Development

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the Web site location where the Agency will post two lists of guidance documents that the Center for Devices and Radiological Health (CDRH or the Center) intends to publish in fiscal year (FY) 2017. In addition, FDA has established a docket where interested persons may comment on the priority of topics for guidance, provide comments and/or propose draft language for those topics, suggest topics for new or different guidance documents, comment on the applicability of guidance documents that have issued previously, and provide any other comments that could benefit the CDRH guidance program and its engagement with stakeholders. This feedback is critical to the CDRH guidance program to ensure that we meet stakeholder needs.

DATES: Submit either electronic or written comments by February 21, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: *https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are

solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2012–N–1021 for ''Medical Device User Fee and Modernization Act; Notice to Public of Web Site Location of Fiscal Year 2017 Proposed Guidance Development.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Erica Takai, Center for Devices and Radiological Health, Food and Drug Administration,10903 New Hampshire Ave., Bldg. 66, rm. 5456, Silver Spring, MD 20993–0002, 301–796–6353.

SUPPLEMENTARY INFORMATION:

I. Background

During negotiations on the Medical Device User Fee Amendments of 2012 (MDUFA III), Title II, Food and Drug Administration Safety and Innovation Act (Pub. L. 112–114), FDA agreed to meet a variety of quantitative and qualitative goals intended to help get safe and effective medical devices to market more quickly. Among these commitments included:

• Annually posting a list of priority medical device guidance documents that the Agency intends to publish within 12 months of the date this list is published each fiscal year (the ''A-list'') and

• Annually posting a list of device guidance documents that the Agency intends to publish, as the Agency's guidance-development resources permit each fiscal year (the ''B-list'').

FDA welcomes comments on any or all of the guidance documents on the lists as explained in 21 CFR 10.115(f)(5). FDA has established Docket No. FDA–2012–N–1021 where comments on the FY 2017 lists, draft language for guidance documents on those topics, suggestions for new or different guidances, and relative priority of guidance documents may be submitted and shared with the public (see **ADDRESSES**). FDA believes this docket is a valuable tool for receiving information from interested persons and will update these lists after considering public comments, where appropriate. FDA anticipates that feedback from interested persons will allow CDRH to better prioritize and more efficiently draft guidances to meet the needs of the Agency and our stakeholders.

In addition to posting the lists of prioritized device guidance documents, FDA has committed to updating its Web site in a timely manner to reflect the Agency's review of previously published guidance documents, including the deletion of guidance documents that no longer represent the Agency's interpretation of or policy on a regulatory issue.

Fulfillment of these commitments will be reflected through the issuance of updated guidance on existing topics, removal of guidances that that no longer reflect FDA's current thinking on a particular topic, and annual updates to the A-list and B-list announced in this notice.

II. CDRH Guidance Development Initiatives

A. Finalization of Draft Guidance Documents

CDRH has identified as a priority, and has devoted resources to, finalization of draft guidance documents. To assure the timely completion or re-issuance of draft guidances, in FY 2015 CDRH committed to performance goals for current and future draft guidance documents. For draft guidance documents issued after October 1, 2014, CDRH committed to finalize, withdraw, re-open the comment period, or issue another draft guidance on the topic for 80 percent of the documents within 3 years of the close of the comment period and for the remaining 20 percent, within 5 years. In FY 2016, CDRH finalized 2 and withdrew 5 of 12 draft guidances issued prior to October 1, 2010, and has been continuing to work towards finalizing the remaining draft guidances. Looking forward, in FY 2017, CDRH will strive to finalize, withdraw, or re-open the comment period for 50 percent of existing draft guidances issued prior to October 1, 2011. CDRH expects to renew or modify, as appropriate, these performance goals in FY 2017 and subsequent years.

B. Earlier Stakeholder Involvement in Guidance Development

CDRH has received feedback that stakeholders desire earlier involvement in the guidance process and has taken steps to create a mechanism to address this request. In FY 2016, in anticipation of guidance documents expected to be developed, CDRH sought stakeholder input regarding electromagnetic compatibility of electrically powered medical devices and regarding utilizing animal studies to evaluate the safety of organ preservation devices and solutions. FDA appreciated the feedback received and considered it in the development of these guidances. Demonstrating commitment to incorporating stakeholder input, CDRH has included these guidances topics on the FY 2017 B-List as we progress toward issuance of draft policies reflecting early stakeholder input as appropriate.

We also welcome any additional feedback for improving the guidance program and the quality of CDRH guidance documents.

C. Applicability of Previously Issued Final Guidance

CDRH has issued over 500 final guidance documents to provide stakeholders with the Agency's thinking on numerous topics. Each guidance reflected the Agency's current position at the time that it was issued. However, the guidance program has issued these guidances over a period of 30 years, raising the question of how current previously issued final guidances remain. CDRH has resolved to address this concern through a staged review of previously issued final guidances in collaboration with stakeholders. At the Web site where CDRH has posted the ''A-list'' and ''B-list'' for FY 2017, CDRH has also posted a list of final guidance documents that issued in 2007, 1997, 1987, and 1977.[1] CDRH is interested in external feedback on whether any of these final guidances should be revised or withdrawn. In addition, for guidances that are recommended for revision, information explaining the need for revision, such as, the impact and risk to public health associated with not revising the guidance, would also be helpful as the Center considers potential action with respect to these guidances. CDRH intends to provide these lists of previously issued final guidances annually through FY 2025 so that by 2025, FDA and stakeholders will have assessed the applicability of all guidances older than 10 years. For instance, in the annual notice for FY 2018, CDRH expects to provide a list of the final guidance documents that issued in 2008, 1998, 1988, and 1978; the annual notice for FY 2019 is expected to provide a list of the final guidance documents that issued in 2009, 1999, 1989, and 1979, and so on. CDRH will consider the comments received from this retrospective review when determining priorities for updating guidance documents and will revise these as resources permit.

In FY 2016, CDRH received comments regarding guidances issued in 2006, 1996, and 1986, and has withdrawn 12 guidance documents in response to comments received and because these guidance documents were determined to no longer represent the Agency's current thinking. One guidance on this retrospective review list was revised, and revision of several guidance documents is also being considered as resources permit.

Consistent with Good Guidance Practices regulation at 21 CFR 10.115(f)(4), CDRH would appreciate suggestions that CDRH revise or withdraw an already existing guidance document. We request that the suggestion clearly explain why the guidance document should be revised or withdrawn and, if applicable, how it should be revised. While we are requesting feedback on the list of previously issued final guidances located in the annual agenda Web site, feedback on any guidance is appreciated and will be considered.

III. Web Site Location of Guidance Lists

This notice announces the Web site location of the document that provides the A and B lists of guidance documents, which CDRH is intending to publish during FY 2017. To access these two lists, visit FDA's Web site at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/ucm529396.htm.* We note that the topics on this and past guidance priority lists may be removed or modified based on current priorities, as well as comments received regarding these lists. Furthermore, FDA and CDRH priorities are subject to change at any time (*e.g.,* newly identified safety issues). Topics on this and past guidance priority lists may be removed or modified based on current priorities. The Agency is not required to publish every guidance on either list if the resources needed would be to the detriment of meeting quantitative review timelines and statutory obligations. In addition, the Agency is not precluded from issuing guidance documents that are not on either list.

Stakeholder feedback on guidance priorities is important to ensure that the CDRH guidance program meets the needs of stakeholders. The feedback received on the FY 2016 list was mostly in agreement, and CDRH continued to work toward issuing the guidances on this list. In FY 2016, CDRH issued 20 of 33 guidances on the FY 2016 list (14 from the A-list, 6 from the B-list). In addition, for the guidances that were on the FY 2016 A or B list but could not be published within FY 2016, and for which we received feedback that these guidances were of high priority, CDRH has recommitted to publish these guidances by placing them on the annual agenda for FY 2017, as appropriate.

Dated: December 19, 2016.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2016–31006 Filed 12–22–16; 8:45 am]

BILLING CODE 4164–01–P

[1] The retrospective list of final guidances does not include the following: (1) Documents that are not guidances but were inadvertently categorized as guidance such as scientific publications, advisory opinions, and interagency agreements; (2) guidances actively being revised by CDRH; and (3) special controls documents.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–4342]

Agency Information Collection Activities; Proposed Collection; Comment Request; Application for Participation in the Food and Drug Administration Regulatory Science Student Internship Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on the application for participation in FDA's Regulatory Science Student Internship Program (RSIP).

DATES: Submit either electronic or written comments on the collection of information by February 21, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–4342 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Application for Participation in the FDA Regulatory Science Student Internship Program.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North 10A63, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Application for Participation in the FDA Regulatory Science Student Internship Program—OMB Control Number 0910–New

Sections 1104, 1302, 3301, 3304, 3320, 3361, 3393, and 3394 of Title 5 of the United States Code, authorize Federal Agencies to rate applicants for Federal jobs. Collecting applications for the RSIP will allow FDA's Office of the Commissioner to easily and efficiently elicit and review information from students and health care professionals who are interested in becoming involved in FDA-wide activities. The process will reduce the time and cost of submitting written documentation to the Agency and lessen the likelihood of applications being misrouted within the Agency mail system. It will assist the Agency in promoting and protecting the public health by encouraging outside persons to share their expertise with FDA.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Application	600	1	600	1.33	798

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: December 19, 2016.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2016–30967 Filed 12–22–16; 8:45 am]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–4319]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Unique Device Identification System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by January 23, 2017.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to *oira_submission@omb.eop.gov.* All comments should be identified with the OMB control number 0910–0720. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Unique Device Identification System OMB Control Number 0910–0720—Extension

In accordance with the collection of information entitled ''Unique Device Identification System (UDI),'' medical device labelers, unless excepted, are required to design and use medical device labels and device packages that bear a UDI, present dates on labels in a particular format, and submit data concerning each version or model of a device to the Global Unique Device Identification Database (GUDID) no later than the date the label of the device must bear a UDI. Once a device becomes subject to UDI requirements, respondents will be required to update the information reported whenever the information changes.

The recordkeeping, reporting, and third-party disclosure requirements referenced in this document are imposed on any person who causes a label to be applied to a device, or who causes the label to be modified, with the intent that the device will be commercially distributed without any subsequent replacement or modification of the label. In most instances, the labeler would be the device manufacturer, but other types of labelers include a specification developer, a single-use device reprocessor, a convenience kit assembler, a repackager, or a relabeler. Respondents may also include any private organization that applies for accreditation by FDA as an issuing agency.

FDA has identified the following requirements as having burdens that must be accounted for under the PRA; the burdens associated with these requirements are summarized in the table that follows:

Section 801.18 requires that whenever a labeler of a medical device includes an expiration date, a date of manufacture, or any other date intended to be brought to the attention of the user of the device, the labeler must present the date on the label in a format that meets the requirements of this section.

Section 801.20 requires every medical device label and package to bear a UDI.

Under § 801.35, any labeler of a device that is not required to bear a UDI on its label may include a UDI on the label of that device and utilize the GUDID.

Under § 801.45, any device that has to be labeled with a UDI also has to bear a permanent marking providing the UDI on the device itself if the device is intended for more than one use and intended to be reprocessed before each use.

Section 801.50 requires stand-alone software to comply with specific labeling requirements that identify the software.

Section 801.55 authorizes additional, case-by-case, labeling exceptions and alternatives to standard UDI labeling requirements.

If a labeler relabels or modifies a label of a device that is required to bear a UDI, under § 830.60 it has to keep a record showing the relationship of the original device identifier to the new device identifier.

Section 830.110 requires an applicant seeking initial FDA accreditation as a UDI-issuing agency to furnish FDA an application containing certain information, materials, and supporting documentation.

Under § 830.120, an FDA-accredited issuing agency is required to disclose information concerning its system for the assignment of UDIs; maintain a list of labelers that use its system for the assignment of UDIs, and provide FDA a copy of such list; and upon request, provide FDA with information concerning a labeler that is employing the issuing agency's system for assignment of UDIs.

Sections 830.310 and 830.320 require the labeler to provide certain information to the GUDID concerning the labeler and each version or model of a device required to be labeled with a UDI, unless the labeler obtains a waiver.

Section 830.360 requires each labeler to retain records showing all UDIs used to identify devices that must be labeled with a UDI and the particular version or model associated with each device identifier, until 3 years after it ceases to market a version or model of a device.

Respondents who are required to submit data to the Agency under certain other approved information collections (listed below) are required to include UDI data elements for the device that is the subject of such information

collection. Addition of the UDI data elements is included in this burden estimate for the conforming amendments in the following 21 CFR parts:

- Part 803—Medical Device Reporting (OMB control number 0910–0437).
- Part 806—Medical Devices; Reports of Corrections and Removals (OMB control number 0910–0359).
- Part 814—Premarket Approval of Medical Devices (OMB control number 0910–0231).
- Part 820—Quality System Regulation (OMB control number 0910–0073).
- Part 821—Medical Device Tracking Requirements (OMB control number 0910–0442).
- Part 822—Postmarket Surveillance (OMB control number 0910–0449).

In the **Federal Register** of September 16, 2016 (81 FR 63768), FDA published a 60-day notice requesting public comment on the proposed collection of information. FDA received one letter in response to the notice, containing multiple comments.

(Comment 1) The commenter questioned the practical utility of certain data elements (''Kit'' and ''Unit of Use DI number'') in the GUDID and stated that they do not consider them necessary for the proper performance of FDA's functions.

(Response 1) Kit is an optional data element in the GUDID. The respondent may choose not to provide this information. Certain kits may include individual devices that may not be required to have a UDI. It is therefore useful to be able to identify whether a device reported in GUDID is an individual device or a kit. The Unit of Use data element is used when the base package contains multiple units of the same device. Although not included on the device label, the Unit of Use DI number can specifically identify device use on the patient by either pulling it from AccessGUDID or hospital systems and linking/populating the information to the patient electronic health record. The UDI stakeholder community, which includes clinicians, healthcare providers and labelers, have expressed to us that this is a valuable data element to be in included in GUDID.

(Comment 2) The commenter expressed concern that capital or operating and maintenance costs were excluded from the PRA burden analysis.

(Response 2) While we did include an estimate of costs in the economic analysis of the final rule, this information was not in the PRA section of the final rule or subsequently, the 60-day notice for comment on the extension of this information collection. We appreciate the comment and have included estimated costs of $85.7 million, based on the economic analysis of the final rule, in our analysis of the information collection burden. The estimate includes planning and administration and the costs to integrate the UDI into existing information systems; to install, test, and validate barcode printing software; and to train employees. Other significant components of one-time costs include costs to redesign labels of devices to incorporate the barcode and date format, and to purchase and install equipment needed to print and verify the UDI on labels. In addition, labelers will incur one-time costs for recordkeeping and reporting requirements, and the direct marking of certain devices. The largest annual cost components include labor, operating, and maintenance associated with equipment for printing operations, and labor related to software maintenance and training needed to maintain the UDI information system. The total cost, which includes both capital costs and operating and maintenance costs, has been annualized over 10 years. We have included the total under capital costs for purposes of this information collection request.

(Comment 3) The commenter suggested the following opportunities for FDA to enhance data quality, utility, and clarity of the information, including for FDA to:

- Provide data structure information for relevant conforming amendments;
- clarify how to address challenges of device systems;
- make more timely updates to related FDA databases and enhance interaction between systems; and
- increase GUDID performance to be more consistent and predictable.

Additionally, the commenter suggested additional ways that FDA could minimize the burden of collection of information if FDA were to identify PMA supplement numbers through the PMA database, rather than having the data provided again through GUDID by the labeler.

- More timely updates of Global Medical Device Nomenclature codes.
- Added transparency regarding logic and validation rule changes.
- Auto-populating data elements which already reside in another FDA system.

(Response 3) These comments continue to be evaluated, but FDA is making no change to the information collection at this time.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL BURDEN

	Number of respondents [1]	Number of responses per respondent [2]	Total annual responses [3]	Average burden per response (in hours) [4]	Total hours [5]	Total operating and maintenance costs
Reporting	6,199	51	316,149	0.023 (1 minute)	7,289	$425,000
Recordkeeping	5,987	51	305,337	0.989 (59 minutes)	302,121	14,733,333
Third-Party Disclosure	5,987	51	305,337	0.885 (53 minutes)	270,143	13,033,333

[1] Maximum No. of Respondents for any regulatory requirement within each category. Individual regulatory requirements within the category may involve fewer respondents.

[2] Maximum No. of Responses for any regulatory requirement within each category. Individual regulatory requirements within the category may involve fewer responses.

[3] Maximum Total Annual Responses for any regulatory requirement within each category. Individual regulatory requirements within the category may involve fewer total annual responses.

[4] Rounded to three decimals. Total Hours reflects a more precise, non-rounded Average Burden per Response. An approximate (non-rounded) conversion to minutes is shown in parentheses.

[5] Total Hours is based on a more precise Burden per Response than the rounded value shown in this table.

Dated: December 19, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2004–N–0451]

Food and Drug Administration Modernization Act of 1997: Modifications to the List of Recognized Standards, Recognition List Number: 046

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing a publication containing modifications the Agency is making to the list of standards FDA recognizes for use in premarket reviews (FDA Recognized Consensus Standards). This publication, entitled ''Modifications to the List of Recognized Standards, Recognition List Number: 046'' (Recognition List Number: 046), will assist manufacturers who elect to declare conformity with consensus standards to meet certain requirements for medical devices.

DATES: Submit electronic or written comments concerning this document at any time. These modifications to the list of recognized standards are effective December 23, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: *https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2004–N–0451 for ''Food and Drug Administration Modernization Act of 1997: Modifications to the List of Recognized Standards, Recognition List Number: 046.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday. FDA will consider any comments received in determining whether to amend the current listing of modifications to the list of recognized standards, Recognition List Number: 046.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

An electronic copy of Recognition List Number: 046 is available on the Internet at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Standards/ucm123792.htm.* See section VI of this document for electronic access to the searchable database for the current list of FDA recognized consensus standards, including Recognition List Number: 046 modifications and other standards related information. Submit written requests for a single hard copy of the document entitled ''Modifications to the List of Recognized Standards, Recognition List Number: 046'' to Scott Colburn, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5514, Silver Spring, MD 20993, 301–796–6287. Send one self-addressed adhesive label to assist that office in processing your request, or fax your request to 301–847–8144.

FOR FURTHER INFORMATION CONTACT: Scott Colburn, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5514, Silver Spring, MD 20993, 301–796–6287, *standards@cdrh.fda.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 204 of the Food and Drug Administration Modernization Act of 1997 (FDAMA) (Pub. L. 105–115) amended section 514 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360d). Amended section 514 allows FDA to recognize consensus standards developed by international and national organizations for use in satisfying portions of device

premarket review submissions or other requirements.

In a notice published in the **Federal Register** of February 25, 1998 (63 FR 9561), FDA announced the availability of a guidance entitled ''Recognition and Use of Consensus Standards.'' The notice described how FDA would implement its standard recognition program and provided the initial list of recognized standards.

Modifications to the initial list of recognized standards, as published in the **Federal Register**, can be accessed at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Standards/ucm123792.htm.*

These notices describe the addition, withdrawal, and revision of certain standards recognized by FDA. The Agency maintains hypertext markup language (HTML) and portable document format (PDF) versions of the list of FDA Recognized Consensus Standards. Both versions are publicly accessible at the Agency's Internet site. See section VI of this document for electronic access information. Interested persons should review the supplementary information sheet for the standard to understand fully the extent to which FDA recognizes the standard.

II. Modifications to the List of Recognized Standards, Recognition List Number: 046

FDA is announcing the addition, withdrawal, correction, and revision of certain consensus standards the Agency will recognize for use in premarket submissions and other requirements for devices. FDA will incorporate these modifications in the list of FDA Recognized Consensus Standards in the Agency's searchable database. FDA will use the term ''Recognition List Number: 046'' to identify these current modifications.

In table 1, FDA describes the following modifications: (1) The withdrawal of standards and their replacement by others, if applicable; (2) the correction of errors made by FDA in listing previously recognized standards; and (3) the changes to the supplementary information sheets of recognized standards that describe revisions to the applicability of the standards.

In section III, FDA lists modifications the Agency is making that involve the initial addition of standards not previously recognized by FDA.

TABLE 1—MODIFICATIONS TO THE LIST OF RECOGNIZED STANDARDS

Old recognition No.	Replacement recognition No.	Title of standard [1]	Change
A. Anesthesiology			
1–44	1–117	ISO 5366 First edition 2016–10–01 Anaesthetic and respiratory equipment—Tracheostomy tubes and connectors.	Withdrawn and replaced with newer version.
1–93	1–118	ISO 5361 Third edition 2016–09–01 Anaesthetic and respiratory equipment—Tracheal tubes and connectors.	Withdrawn and replaced with newer version.
B. Biocompatibility			
2–93		ASTM F763–04 (Reapproved 2016) Standard Practice for Short-Term Screening of Implant Materials.	Reaffirmation.
2–94		ASTM F981–04 (Reapproved 2016) Standard Practice for Assessment of Compatibility of Biomaterials for Surgical Implants with Respect to Effect of Materials on Muscle and Insertion into Bone.	Reaffirmation.
2–126	2–244	ASTM F748–16 Standard Practice for Selecting Generic Biological Test Methods for Materials and Devices.	Withdrawn and replaced with newer version, Extent of recognition.
2–134		ASTM F2065–00 (Reapproved 2010) Standard Practice for Testing for Alternative Pathway Complement Activation in Serum by Solid Materials.	Withdrawn.
2–189		ASTM F895–11 (Reapproved 2016) Standard Test Method for Agar Diffusion Cell Culture Screening for Cytotoxicity.	Reaffirmation.
2–225		ASTM F2567–06 (Reapproved 2010) Standard Practice for Testing for Classical Complement Activation in Serum by Solid Materials.	Withdrawn.
C. Cardiovascular			
3–58		ANSI/AAMI/ISO 5840:2005/(R)2010 Cardiovascular implants—Cardiac valve prostheses.	Withdrawn.
3–90	3–144	ISO 7198 Second edition 2016–08–01 Cardiovascular implants and extracorporeal systems—Vascular prostheses—Tubular vascular grafts and vascular patches.	Withdrawn and replaced with newer version.
3–91		ISO 5840 Fourth edition 2005–03–01 Cardiovascular implants—Cardiac valve prostheses.	Withdrawn.
D. Dental/Ear, Nose, and Throat (ENT)			
		No modifications at this time	
E. General I (Quality Systems/Risk Management) (QS/RM)			
5–79	5–113	ASTM D7386–16 Standard Practice for Performance Testing of Packages for Single Parcel Delivery Systems.	Withdrawn and replaced with newer version.
5–87		IEC 62366 Edition 1.1 2014–01 Consolidated Version Medical devices—Application of usability engineering to medical devices.	Transition.

TABLE 1—MODIFICATIONS TO THE LIST OF RECOGNIZED STANDARDS—Continued

Old recognition No.	Replacement recognition No.	Title of standard [1]	Change
5–95	5–114	IEC 62366–1 Edition 1.0 2015–02 Medical Devices—Part 1: Application of Usability Engineering to Medical Devices [Including CORRIGENDUM 1 (2016)].	Withdrawn and replaced with newer version including corrigendum.
F. General II (Electrical Safety/Electromagnetic Compatibility) (ES/EMC)			
		No modifications at this time	
G. General Hospital/General Plastic Surgery (GH/GPS)			
6–11		ISO 594–1 First edition 1986–06–15 Conical fittings with a 6% (Luer) taper for syringes, needles and certain other medical equipment—Part 1: General requirements.	Transition.
6–129		ISO 594–2 Second edition 1998–09–01 Conical fittings with a 6% (Luer) taper for syringes, needles and certain other medical equipment—Part 2: Lock fittings.	Transition.
6–165		ASTM D6977–04 (Reapproved 2016) Standard Specification for Polychloroprene Examination Gloves for Medical Application.	Reaffirmation.
6–282	6–383	ASTM D6499–16 Standard Test Method for The Immunological Measurement of Antigenic Protein in Natural Rubber and its Products.	Withdrawn and replaced with newer version.
H. In Vitro Diagnostics (IVD)			
7–149	7–267	CLSI C24 4th Edition Statistical Quality Control for Quantitative Measurement Procedures: Principles and Definitions.	Withdrawn and replaced with newer version.
7–174	7–268	CLSI EP21 2nd Edition Evaluation of Total Analytical Error for Quantitative Medical Laboratory Measurement Procedures.	Withdrawn and replaced with newer version, Extent of recognition.
I. Materials			
8–350	8–435	ISO 5832–1 Fifth edition 2016–07–15 Implants for surgery—Metallic materials—Part 1: Wrought stainless steel.	Withdrawn and replaced with newer version.
8–368		ASTM F2625–10 (Reapproved 2016) Standard Test Method for Measurement of Enthalpy of Fusion, Percent Crystallinity, and Melting Point of Ultra-High-Molecular Weight Polyethylene by Means of Differential Scanning Calorimetry.	Reaffirmation.
8–376		ASTM F2102–13 Standard Guide for Evaluating the Extent of Oxidation in Ultra-High-Molecular-Weight Polyethylene Fabricated Forms Intended for Surgical Implants.	Withdrawn. See 8–382.
8–384	8–436	ASTM F2026–16 Standard Specification for Polyetheretherketone (PEEK) Polymers for Surgical Implant Applications.	Withdrawn and replaced with newer version.
8–392	8–437	ASTM F2082/F2082M–16 Standard Test Method for Determination of Transformation Temperature of Nickel-Titanium Shape Memory Alloys by Bend and Free Recovery.	Withdrawn and replaced with newer version.
8–407	8–438	ISO/ASTM 52915 Second edition 2016–02–15 Specification for Additive Manufacturing File Format (AMF) Version 1.2.	Withdrawn and replaced with newer version.
J. Nanotechnology			
		No modifications at this time	
K. Neurology			
		No modifications at this time	
L. Obstetrics-Gynecology/Gastroenterology/Urology (OB-Gyn/G/Urology)			
		No modifications at this time	
M. Ophthalmic			
		No modifications at this time	
N. Orthopedic			
11–223	11–311	ISO 14243–2 Third edition 2016–09–01 Implants for surgery—Wear of total knee-joint prostheses—Part 2: Methods of measurement.	Withdrawn and replaced with newer version.

TABLE 1—MODIFICATIONS TO THE LIST OF RECOGNIZED STANDARDS—Continued

Old recognition No.	Replacement recognition No.	Title of standard [1]	Change
11–225	11–312	ISO 7206–4 Third edition 2010–06–15 Implants for surgery—Components for partial and total knee joint prostheses—Part 2: Articulating surfaces made of metal, ceramic and plastics materials [Including AMENDMENT 1 (2016)].	Withdrawn and replaced with newer version including amendment.
11–231	11–313	ISO 7207–2 Second edition 2011–07–01 Implants for surgery—Components for partial and total knee joint prostheses—Part 2: Articulating surfaces made of metal, ceramic and plastics materials [Including AMENDMENT 1 (2016)].	Withdrawn and replaced with newer version including amendment.
11–249	11–314	ISO 14242–2 Second edition 2016–09–15 Implants for surgery—Wear of total hip-joint prostheses—Part 2: Methods of measurement.	Withdrawn and replaced with newer version.
11–268	11–315	ASTM F1829–16 Standard Test Method for Static Evaluation of Anatomic Glenoid Locking Mechanism in Shear.	Withdrawn and replaced with newer version.
11–287		ASTM F382–14 Standard Specification and Test Method for Metallic Bone Plates.	Withdrawn. See 11–297.
11–298	11–316	ASTM F1264–16 Standard Specification and Test Methods for Intramedullary Fixation Devices.	Withdrawn and replaced with newer version.
		O. Physical Medicine	
		No modifications at this time	
		P. Radiology	
12–49	12–303	IEC 61303 Edition 1.0 1994–09 Medical electrical equipment—Radionuclide calibrators—Particular methods for describing performance [Including CORRIGENDUM 1 (2016)].	Withdrawn and replaced with new version including corrigendum.
12–235	12–304	IEC 60731 Edition 3.1 2016–04 Consolidated Version Medical electrical equipment—Dosimeters with ionization chambers as used in radiotherapy.	Withdrawn and replaced with newer version.
12–263	12–305	ISO 13694 Second edition 2015–11–15 Optics and Photonics—Lasers and laser-related equipment—Test methods for laser beam power (energy) density distribution.	Withdrawn and replaced with newer version.
		Q. Software/Informatics	
13–27	13–85	CLSI AUTO11–A2 October 2014 Information Technology Security of In Vitro Diagnostic Instruments and Software Systems; Approved Standard—Second Edition.	Withdrawn and replaced with newer version.
		R. Sterility	
14–169		ASTM F2391–05 (Reapproved 2016) Standard Test Method for Measuring Package and Seal Integrity Using Helium as the Tracer Gas.	Reaffirmation.
14–197	14–496	ASTM F1608–16 Standard Test Method for Microbial Ranking of Porous Packaging Materials (Exposure Chamber Method).	Withdrawn and replaced with newer version.
14–229	14–497	ASTM F1980–16 Standard Guide for Accelerated Aging of Sterile Barrier Systems for Medical Devices.	Withdrawn and replaced with newer version.
14–285		ANSI/AAMI/ISO 14161–2009/(R)2014 Sterilization of health care products—Biological indicators—Guidance for the selection, use and interpretation of results.	Reaffirmation.
14–311		ANSI/AAMI ST55:2010/(R)2014 Table-top steam sterilizers	Reaffirmation.
14–339		ANSI/AAMI/ISO 20857:2010/(R)2015 (Revision of ANSI/AAMI/ST63:2002) Sterilization of health care products—Dry heat—Requirements for the development, validation and routine control of a sterilization process for medical devices.	Reaffirmation.
14–349		ANSI/AAMI/ISO 13408–3:2006/(R)2015 Aseptic processing of health care products—Part 3: Lyophilization.	Reaffirmation.
14–360		ANSI/AAMI ST72:2011/(R)2016 Bacterial endotoxins—Test methods, routine monitoring, and alternatives to batch testing.	Reaffirmation.
14–453	14–498	ASTM F2097–16 Standard Guide for Design and Evaluation of Primary Flexible Packaging for Medical Products.	Withdrawn and replaced with newer version.
14–462	14–499	ASTM D4169–16 Standard Practice for Performance Testing of Shipping Containers and Systems.	Withdrawn and replaced with newer version.
14–479	14–500	ISO 14644–1 Second edition 2015–12–15 Cleanrooms and associated controlled environments—Part 1: Classification of air cleanliness by particle concentration.	Withdrawn and replaced with new recognition number.
14–489		USP 39–NF34:2016 Biological Indicator for Steam Sterilization—Self Contained.	Withdrawn.
14–490		USP 39–NF34:2016 Biological Indicator for Dry-Heat Sterilization, Paper Carrier.	Withdrawn.

TABLE 1—MODIFICATIONS TO THE LIST OF RECOGNIZED STANDARDS—Continued

Old recognition No.	Replacement recognition No.	Title of standard [1]	Change
14–491		USP 39–NF34:2016 Biological Indicator for Ethylene Oxide Sterilization, Paper Carrier.	Withdrawn.
14–492		USP 39–NF34:2016 Biological Indicator for Steam Sterilization, Paper Carrier.	Withdrawn.
S. Tissue Engineering			
15–34	15–48	ASTM F2605–16 Standard Test Method for Determining the Molar Mass of Sodium Alginate by Size Exclusion Chromatography with Multi-angle Light Scattering Detection (SEC–MALS).	Withdrawn and replaced with newer version.

[1] All standard titles in this table conform to the style requirements of the respective organizations.

III. Listing of New Entries

In table 2, FDA provides the listing of new entries and consensus standards added as modifications to the list of recognized standards under Recognition List Number: 046.

TABLE 2—NEW ENTRIES TO THE LIST OF RECOGNIZED STANDARDS

Recognition No.	Title of standard [1]	Reference No. and date
A. Anesthesiology		
1–119	Tracheal tubes designed for laser surgery—Requirements for marking and accompanying information.	ISO 14408 Third edition 2016–02–15.
1–120	Anaesthetic and respiratory equipment—General requirements for airways and related equipment.	ISO 18190 First edition 2016–11–01.
B. Biocompatibility		
2–245	Biological evaluation of medical devices—Part 5: Tests for *in vitro* cytotoxicity	ISO 10993–5 Third edition 2009–06–01.
C. Cardiovascular		
3–145	Cardiovascular implants—Cardiac valve prostheses—Part 1: General requirements.	ISO 5840–1:2015 First edition 2015–09–15.
3–146	Cardiovascular implants—Cardiac valve prostheses—Part 1: General requirements.	ANSI/AAMI/ISO 5840–1: 2015.
3–147	Cardiovascular implants—Cardiac valve prostheses—Part 2: Surgically implanted heart valve substitutes.	ISO 5840–2: 2015 First edition 2015–09–15.
3–148	Cardiovascular implants—Cardiac valve prostheses — Part 2: Surgically implanted heart valve substitutes.	ANSI/AAMI/ISO 5840–2: 2015.
D. Dental/Ear, Nose, and Throat (ENT)

IV. List of Recognized Standards

FDA maintains the Agency's current list of FDA Recognized Consensus Standards in a searchable database that may be accessed directly at FDA's Internet site at *http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfStandards/search.cfm.* FDA will incorporate the modifications and revisions described in this notice into the database and, upon publication in the **Federal Register**, this recognition of consensus standards will be effective. FDA will announce additional modifications and revisions to the list of recognized consensus standards, as needed, in the **Federal Register** once a year, or more often if necessary. Beginning with Recognition List 033, FDA no longer announces minor revisions to the list of recognized consensus standards such as technical contact person, devices affected, processes affected, Code of Federal Regulations citations, and product codes.

V. Recommendation of Standards for Recognition by FDA

Any person may recommend consensus standards as candidates for recognition under section 514 of the FD&C Act by submitting such recommendations, with reasons for the recommendation, to *standards@cdrh.fda.gov.* To be properly considered, such recommendations should contain, at a minimum, the following information: (1) Title of the standard, (2) any reference number and date, (3) name and address of the national or international standards development organization, (4) a proposed list of devices for which a declaration of conformity to this standard should routinely apply, and (5) a brief identification of the testing or performance or other characteristics of the device(s) that would be addressed by a declaration of conformity.

VI. Electronic Access

You may obtain a copy of ''Guidance on the Recognition and Use of Consensus Standards'' by using the Internet. The Center for Devices and Radiological Health (CDRH) maintains a site on the Internet for easy access to information including text, graphics, and files that you may download to a personal computer with access to the Internet. Updated on a regular basis, the CDRH home page, *http://www.fda.gov/MedicalDevices,* includes a link to standards-related documents including the guidance and the current list of recognized standards. After publication in the **Federal Register**, this notice announcing ''Modification to the List of Recognized Standards, Recognition List Number: 046'' will be available at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Standards/ucm123792.htm.* You may access ''Guidance on the Recognition and Use of Consensus Standards,'' and the searchable database for ''FDA Recognized Consensus Standards'' at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Standards.*

Dated: December 19, 2016.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2007–D–0369]

Product-Specific Bioequivalence Recommendations; Draft and Revised Draft Guidances for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of additional draft and revised draft product-specific bioequivalence (BE) recommendations. The recommendations provide product-specific guidance on the design of BE studies to support abbreviated new drug applications (ANDAs). In the **Federal Register** of June 11, 2010, FDA announced the availability of a guidance for industry entitled ''Bioequivalence Recommendations for Specific Products'' that explained the process that would be used to make product-specific BE recommendations available to the public on FDA's Web site. The BE recommendations identified in this notice were developed using the process described in that guidance.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by February 21, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2007–D–0369 for ''Product-Specific Bioequivalence Recommendations; Draft and Revised Draft Guidances for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the

information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov*. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Xiaoqiu Tang, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 4730, Silver Spring, MD 20993–0002, 301–796–5850.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled ''Bioequivalence Recommendations for Specific Products'' that explained the process that would be used to make product-specific BE recommendations available to the public on FDA's Web site at *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm*.

As described in that guidance, FDA adopted this process as a means to develop and disseminate product-specific BE recommendations and provide a meaningful opportunity for the public to consider and comment on those recommendations. Under that process, draft recommendations are posted on FDA's Web site and announced periodically in the **Federal Register**. The public is encouraged to submit comments on those recommendations within 60 days of their announcement in the **Federal Register**. FDA considers any comments received and either publishes final recommendations or publishes revised draft recommendations for comment. Recommendations were last announced in the **Federal Register** on October 5, 2016 (81 FR 69064). This notice announces draft product-specific BE recommendations, either new or revised, that are posted on FDA's Web site.

II. Drug Products for Which New Draft Product-Specific BE Recommendations Are Available

FDA is announcing the availability of a new draft guidance for industry on product-specific BE recommendations for drug products containing the following active ingredients:

TABLE 1—NEW DRAFT PRODUCT-SPECIFIC BE RECOMMENDATIONS FOR DRUG PRODUCTS

1. Adapalene; benzoyl peroxide.
2. Amphetamine.
3. Betamethasone valerate.
4. Budesonide.
5. Cephalexin.
6. Cetirizine hydrochloride.
7. Clozapine.
8. Colchicine.
9. Doxycycline hyclate.
10. Emtricitabine; Rilpivirine hydrochloride; Tenofovir alafenamide fumarate.
11. Emtricitabine; Tenofovir alafenamide fumarate.
12. Epinephrine.
13. Esomeprazole Magnesium.
14. Ethiodized oil.
15. Fenofibrate.
16. Fluocinonide.
17. Fluoxetine hydrochloride.
18. Halcinonide.
19. Ibuprofen; pseudoephedrine hydrochloride.
20. Lidocaine.
21. Morphine sulfate.
22. Nicotine polacrilex.
23. Nitisinone.
24. Omega-3-acid ethyl esters type A.
25. Oxycodone.
26. Panobinostat lactate.
27. Perampanel.
28. Pimavanserin tartrate.
29. Prazosin hydrochloride.
30. Simvastatin.
31. Tofacitinib citrate.

II. Drug Products for Which Revised Draft Product-Specific BE Recommendations Are Available

FDA is announcing the availability of a revised draft guidance for industry on product-specific BE recommendations for drug products containing the following active ingredients:

TABLE 2—REVISED DRAFT PRODUCT-SPECIFIC BE RECOMMENDATIONS FOR DRUG PRODUCTS

Acyclovir.
Albuterol sulfate.
Buprenorphine hydrochloride; Naloxone hydrochloride (multiple reference listed drugs).
Cobicistat; Darunavir ethanolate.
Divalproex sodium (multiple reference listed drugs).
Levomilnacipran hydrochloride.
Medroxyprogesterone acetate.
Nepafenac (multiple reference listed drugs).
Omega-3-acid ethyl esters.
Omega-3-carboxylic acids.
Ruxolitinib phosphate.
Tedizolid phosphate.
Venlafaxine hydrochloride.

For a complete history of previously published **Federal Register** notices related to product-specific BE recommendations, go to *https://www.regulations.gov* and enter Docket No. FDA–2007–D–0369.

These draft guidances are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). These draft guidances, when finalized, will represent the current thinking of FDA on the product-specific design of BE studies to support ANDAs. They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov*.

Dated: December 16, 2016.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: As stipulated by the Federal Advisory Committee Act, the Department of Health and Human Services (HHS) is hereby giving notice that a meeting is scheduled to be held for the Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria (Advisory Council). The meeting will be open to the public; a public comment session will be held during the meeting. Pre-registration is required for members of the public who wish to attend the meeting and who wish to participate in the public comment session. Individuals who wish to attend the meeting and/or send in their public comment via email should send an email to *CARB@hhs.gov.* Registration information is available on the Web site *http://www.hhs.gov/ash/carb/* and must be completed by January 20, 2017; all in-person attendees must pre-register by this date. Additional information about registering for the meeting and providing public comment can be obtained at *http://www.hhs.gov/ash/carb/* on the Meetings page.

DATES: The meeting is scheduled to be held on January 25, 2017, from 9:30 a.m. to 5:00 p.m. ET (times are tentative and subject to change). The confirmed times and agenda items for the meeting will be posted on the Web site for the Advisory Council at *http://www.hhs.gov/ash/carb/* when this information becomes available. Pre-registration for attending the meeting in person is required to be completed no later than January 20, 2017; public attendance at the meeting is limited to the available space.

ADDRESSES: U.S. Department of Health and Human Services, Hubert H. Humphrey Building, Great Hall, 200 Independence Avenue SW., Washington, DC 20201.

The meeting can also be accessed through a live webcast on the day of the meeting. For more information, visit *http://www.hhs.gov/ash/carb/.*

FOR FURTHER INFORMATION CONTACT: Bruce Gellin, Designated Federal Officer, Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria, Office of the Assistant Secretary for Health, U.S. Department of Health and Human Services, Room 715H, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201. Phone: (202) 260–6638; email: *CARB@hhs.gov.*

SUPPLEMENTARY INFORMATION: Under Executive Order 13676, dated September 18, 2014, authority was given to the Secretary of HHS to establish the Advisory Council, in consultation with the Secretaries of Defense and Agriculture. Activities of the Advisory Council are governed by the provisions of Public Law 92–463, as amended (5 U.S.C. App.), which sets forth standards for the formation and use of federal advisory committees.

The Advisory Council provides advice, information, and recommendations to the Secretary of HHS regarding programs and policies intended to support and evaluate the implementation of Executive Order 13676, including the National Strategy for Combating Antibiotic-Resistant Bacteria and the National Action Plan for Combating Antibiotic-Resistant Bacteria. The Advisory Council functions solely for advisory purposes.

In carrying out its mission, the Advisory Council provides advice, information, and recommendations to the Secretary regarding programs and policies intended to preserve the effectiveness of antibiotics by optimizing their use; advance research to develop improved methods for combating antibiotic resistance and conducting antibiotic stewardship; strengthen surveillance of antibiotic-resistant bacterial infections; prevent the transmission of antibiotic-resistant bacterial infections; advance the development of rapid point-of-care and agricultural diagnostics; further research on new treatments for bacterial infections; develop alternatives to antibiotics for agricultural purposes; maximize the dissemination of up-to-date information on the appropriate and proper use of antibiotics to the general public and human and animal healthcare providers; and improve international coordination of efforts to combat antibiotic resistance.

The January public meeting will be dedicated to presentations from federal and non-federal stakeholders surrounding the topic areas of infection prevention and control. The meeting agenda will be posted on the Advisory Council Web site at *http://www.hhs.gov/ash/carb/* when it has been finalized. All agenda items are tentative and subject to change.

Public attendance at the meeting is limited to the available space. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Advisory Council at the address/telephone number listed above at least one week prior to the meeting. For those unable to attend in person, a live webcast will be available. More information on registration and accessing the webcast can be found at *http://www.hhs.gov/ash/carb/.*

Members of the public will have the opportunity to provide comments prior to the Advisory Council meeting by emailing *CARB@hhs.gov.* Public comments should be sent in by midnight January 20, 2017, and should be limited to no more than one page. All public comments received prior to January 20, 2017, will be provided to Advisory Council members; comments are limited to two minutes per speaker.

Dated: December 16, 2016.

Bruce Gellin,

Designated Federal Officer, Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria, Deputy Assistant Secretary for Health.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR Panel: Global Infectious Diseases Research Training Program.

Date: January 5, 2017.

Time: 9:00 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Kenneth M Izumi, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3204, MSC 7808, Bethesda, MD 20892, 301–496–6980, *izumikm@csr.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR–15–276: Turkey-US Collaborative Program for Affordable Medical Technologies (R01).

Date: January 17, 2017.

Time: 1:00 p.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Careen K Tang-Toth, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6214, MSC 7804, Bethesda, MD 20892, (301)435–3504, *tothct@csr.nih.gov*.

Coast Guard

[Docket No. USCG–2016–1059]

Towing Safety Advisory Committee; January 2017 Teleconference

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Notice of teleconference meeting.

SUMMARY: The Towing Safety Advisory Committee will meet, via teleconference, to discuss the five current tasks of the Committee. The Committee is expected to receive the final report from the subcommittee on Electronic Charting Systems and an interim final report from the subcommittee on Implementation of Subchapter M. The subcommittee on Implementation of Subchapter M will also receive additional tasking to review a Towing Safety Management System Option Compliance Guidebook. The subcommittees on Towing of Liquefied Natural Gas Barges, Inland Firefighting Training, and Articulated Tug-Barge Operations are expected to provide progress reports. This meeting will be open to the public.

DATES: The full Committee will meet by teleconference on Wednesday, January 18, 2017, from 1 p.m. until 3 p.m. Eastern Standard Time. Please note that this meeting may close early if the Committee has completed its business.

ADDRESSES: To join the teleconference, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section no later than 1 p.m. on January 11, 2017, to obtain the needed information. The number of teleconference lines is limited and will be available on a first-come, first-served basis. If you prefer to join in person at U.S. Coast Guard Headquarters, it will be hosted in Room 3R14–01, 2703 Martin Luther King Jr Ave SE., Washington, DC 20593. Foreign national attendees will be required to preregister no later than 5 p.m. on January 5, 2017, to be admitted to the meeting. U.S. citizen attendees will be required to pre-register no later than 5 p.m. on January 11, 2017, to be admitted to the meeting. To pre-register, contact Mr. William J. Abernathy at *William.J.Abernathy@uscg.mil,* with TSAC in the subject line and provide your name, company and telephone number; if a foreign national, also provide your country of citizenship, and passport number and expiration date. All attendees will be required to provide a government-issued picture identification card in order to gain admittance to the building.

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** as soon as possible.

Instructions: To facilitate public participation, written comments on the issues to be considered by the Committee as listed in the ''Agenda'' section below must be submitted no later than January 11, 2017, if you want the Committee members to review your comments prior the meeting. You must include the words ''Department of Homeland Security'' and the docket number [USCG–2016–1059]. Written comments may be submitted using the Federal eRulemaking Portal at *http://www.regulations.gov.* If you encounter technical difficulties, contact the individual in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Comments received will be posted without alteration at *http://regulations.gov,* including any personal information provided. You may review a Privacy Act notice regarding the Federal Docket Management system in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Docket Search: For access to the docket to read documents or comments related to this notice, go to *http://www.regulations.gov,* type USCG–2016–1059 in the Search box, press Enter, and then click on the item you wish to view.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Abernathy, Alternate Designated Federal Officer of the Towing Safety Advisory Committee, 2703 Martin Luther King Jr Ave SE., Stop 7509, Washington, DC 20593–7509, telephone 202–372–1363, fax 202–372–8382 or *william.j.abernathy@uscg.mil.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is in compliance with the Federal Advisory Committee Act, (Title 5, U.S.C. Appendix). As stated in 33 U.S.C. 1231a, the Towing Safety Advisory Committee provides advice and recommendations to the Department of Homeland Security on matters related to shallow-draft inland and coastal waterway navigation and towing safety.

Agenda of Meeting

The agenda for the January 18, 2017, teleconference is as follows:

(1) Final report from the subcommittee on ''Recommendations on Electronic Charting Systems (ECS) Carriage on Towing Vessels (Task 15–03).''

(2) An interim final report and discussion of additional tasking for the subcommittee working on ''Recommendations on the Implementation of 46 Code of Federal Regulations Subchapter M—Inspection of Towing Vessels (Task 16–01).''

(3) Progress reports from the other three active subcommittees on ''Recommendations Regarding New and Updated Policy for Articulated Tug and Barge (ATB) Combinations Currently Contained in NVIC 2–81, Change 1 (Task No. 15–02)'', ''Recommendations Regarding Firefighting Training Requirements for Officer Endorsements for Master or Mate (Pilot) of Towing Vessels, Except Apprentice Mate (Steersman) of Towing Vessels in Inland Service (Task No. 16–02)'', and ''Recommendations Regarding Operational Risks Associated With Towing Liquefied Natural Gas Barges Astern (Task 16–03).''

(4) TSAC Member and Public Comment periods. A copy of the task statements, draft final reports, and the agenda will be available at *https://homeport.uscg.mil/tsac.*

Public comments or questions will be taken throughout the teleconference as the Committee discusses the issues and prior to deliberations and voting. There will also be a public comment period at the end of the teleconference. Speakers are requested to limit their comments to three minutes. Please note that this public comment period may start before 2:45 p.m. if all other agenda items have been covered and may end before 3 p.m. if all of those wishing to comment have done so. Please contact Mr. William Abernathy listed in the **FOR FURTHER INFORMATION CONTACT** section to register as a speaker.

Notice of Future 2017 Towing Safety Advisory Committee Meetings

To receive automatic email notices of future Towing Safety Advisory Committee meetings in 2017, go to the online docket, USCG–2016–1059 (*http://www.regulations.gov/#!docketDetail;D=USCG-2016-1059*), and select the sign-up-for-email-alerts option. We plan to use the same docket number for all Towing Safety Advisory Committee meeting notices in 2017, so when the next meeting notice is published you will receive an email alert from *http://www.regulations.gov* when the notice appears in this docket, in addition to notices of other items being added to the docket.

Dated: December 19, 2016

J.G. Lantz,

Director of Commercial Regulations and Standards.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5909–N–95]

30-Day Notice of Proposed Information Collection: FHA-Application for Insurance of Advance of Mortgage Proceeds

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* January 23, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on August 31, 2016 at 81 FR 60015.

A. Overview of Information Collection

Title of Information Collection: FHA-Application for Insurance of Advance of Mortgage Proceeds.

OMB Approval Number: 2502–0097.

Type of Request: Extension of currently approved collection.

Form Number: HUD–92403.

Description of the need for the information and proposed use: To indicate to the mortgagee amounts approved for advance and mortgage insurance.

Respondents: (*i.e.,* affected public): Business or other for profit.

Estimated Number of Respondents: 873.

Estimated Number of Responses: 26,190.

Frequency of Response: As needed.

Average Hours per Response: 2 hours.

Total Estimated Burden: 52,380.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond: including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 16, 2016.

Colette Pollard,

Department Reports Management Officer, Office of the Chief Information Officer.

30-Day Notice of Proposed Information Collection: 24 CFR Part 58, Environmental Review Procedures for Entities Assuming HUD Environmental Responsibilities

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date: January 23, 2017.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov*

FOR FURTHER INFORMATION CONTACT: Anna P. Guido, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Anna P. Guido at *Anna.P.Guido@hud.gov* or telephone 202–402–5535. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on October 24, 2016 at 81 FR 73132.

A. Overview of Information Collection

Title of Information Collection: 24 CFR part 58—Environmental Review Procedures for Entities Assuming HUD Environmental Review Responsibilities.

OMB Approval Number: 2506–0087.

Type of Request: Extension.

Form Number: HUD–7015.15.

Description of the need for the information and proposed use: The Request for Release of Funds and Certification is used to document compliance with the National Environmental Policy Act and the related environmental statutes, executive orders, and authorities in accordance with the procedures identified in 24 CFR part 58. Recipients certify compliance and make requests for release of funds.

Respondents (*i.e.* affected public): State, local, and tribal governments and nonprofit organizations.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Request for Release of Funds and Certification HUD–7015.15	18,785	1	18,785	.60	11,271.00	$30.00	$338,130.00
Total	18,785	1	18,785	.60	11,271.00	$30.00	$338,130.00

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Guido at *Anna.P.Guido@hud.gov* or telephone 202–402–5535. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for renewal of the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 2, 2016 at 81 FR 60719.

A. Overview of Information Collection

Title of Information Collection: Youth Homelessness Demonstration Program (YHDP).

OMB Control Number: 2506–0210.

Type of Request: Renewal of previously approved collection.

Form Number: Youth Homelessness Demonstration Application (all parts), SF 424, HUD–2991, HUD–2993, HUD–2880, and SF–LLL, HUD–50070.

Description of the need for the information and proposed use: The appropriation for the Youth Homelessness Demonstration Program (YHDP) was made available through the Consolidated Appropriations Act, 2016 (Pub. L. 114–113, approved December 18, 2015), ''the Act''. The Act appropriated $33,000,000 to HUD ''to implement projects to demonstrate how a comprehensive approach to serving homeless youth, age 24 and under, in up to 10 communities, including at least four rural communities, can dramatically reduce youth homelessness,'' $5 million to HUD ''to provide technical assistance on youth homelessness, and collection, analysis, and reporting of data and performance measures under the comprehensive approaches to serve homeless youth, in addition to and in coordination with other technical assistance funds provided under this title,'' and a further $2.5 million to HUD ''for homeless youth program evaluations conducted in partnership with the Department of Health and Human Services.'' Through this NOFA, HUD is holding a competition in order to identify those 10 communities that will make best use of the congressionally appropriated funds and provide HUD with the best opportunity to meet the YHDP objectives. Without asking for this information, HUD will be unable to meet the congressional mandate within the Act. Once communities have been selected, HUD must collect individual grant applications to meet the Act requirement that YHDP projects be renewable under the Continuum of Care (CoC) Program authorized by the McKinney-Vento Act, as amended by S. 896 The Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act of 2009 (42 U.S.C. 11371 *et seq.*) and the CoC Program Homeless Assistance Grant Application requirements (OMB 2506–0112). Finally, HUD must collect the Coordinated Community Plan to meet the appropriations requirement ''to demonstrate how a comprehensive approach to serving homeless youth . . . can dramatically reduce youth homelessness.'' In HUD's experience leading similar coordinated community efforts (*e.g.* LGBTQ Youth Homelessness Prevention Pilot, OMB 2506–0204), the planning process is a challenging and resource intensive endeavor, requiring systems analysis, values sharing, priority negotiating, the creation of leadership structure, the development of a logic model, and a plan for constant feedback and continuous process improvement, among other things. The submission of a coordinated community plan will allow HUD to assess the ability of the selected communities to appropriately use the funding made available by Congress.

Submission documents	Number of respondents	Responses per year	Total annual responses	Hours per response	Total hours	Hourly cost per response	Annual cost
Component 1. Community Selection							
YHDP Community Selection Application	200	1	200	25.00	5,000.00	*$25	$125,000.00

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5921–N–18]

Privacy Act of 1974; Notice of a Computer Matching Program Between the Department of Housing and Urban Development (HUD) and the Department of Treasury

AGENCY: Office of Administration, HUD.

ACTION: Notice of a computer matching program between HUD and the Department of the Treasury.

SUMMARY: HUD is issuing a public notice of its intent to conduct a recurring computer matching program with the U.S. Department of the Treasury (Treasury), Bureau of the Fiscal Service (Fiscal Service), Do Not Pay Business Center (DNP), for the purpose of providing information that will be used by HUD to detect suspected instances of programmatic fraud, waste, and abuse (FW&A).

DATES: *Effective Date:* The effective date of the matching program shall begin January 23, 2017, or at least 40 days from the date that copies of the Computer Matching Agreement, signed by both HUD and Treasury Data Integrity Boards (DIBs), are sent to OMB and Congress, whichever is later, provided that no comments that would result in a contrary determination are received.

Comments Due Date: January 23, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Room 10110, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 8:00 a.m. and 5:00 p.m. weekdays at the above address.

FOR FURTHER INFORMATION: Contact the ''Recipient Agency'' Helen Goff Foster, Departmental Privacy Officer, Department of Housing and Urban Development, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number (202) 402–6836 or the ''Source Agency'' Disclosure Officer, Bureau of the Fiscal Service, 401 14th Street SW., Washington, DC 20227. Email Address: *David.Ambrose@fiscal.treasury.gov.* A telecommunication device for hearing- and speech-impaired individuals (TTY) is available at (800) 877–8339 (Federal Relay Service).

SUPPLEMENTARY INFORMATION: (short synopsis of purpose).

CPD stated that the purpose of the match against the SAM-restricted databases is for use by the agency to determine a party's eligibility status to participate in Federal procurement and non-procurement programs and for use where the information is needed to decide on a Federal financial or non-financial assistance program or benefit. CPD also stated that the purpose of the match against the SAM-restricted and Debt Check databases database is to

verify the eligibility of an individual under a Federal benefit program.

PID stated that the purpose of the match against the SAM-restricted databases is for use by the agency to determine a party's eligibility status to participate in Federal procurement and non-procurement programs and for use where the information is needed to decide on a Federal financial or non-financial assistance program or benefit. PID also stated that the purpose of the match against the SAM-restricted and Debt Check databases database is to verify the eligibility of an individual under a Federal benefit program.

MHF stated the purpose of the match against SAM Exclusion-restricted is for use by the agency to determine a party's eligibility status to participate in Federal procurement and non-procurement programs; for use where the information is needed to decide on a Federal financial or non-financial assistance program or benefit; and for use in connection with letting a contract, or issuing a license, grant, or other benefit by the requesting agency where the information is needed to decide on a Federal financial or non-financial assistance program or benefit. MFH also stated that the purpose of the match against SAM-Exclusion restricted is to verify the eligibility of an individual under a Federal benefit program.

Reporting of Matching Program

In accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988 as amended, and OMB Bulletin 89–22, ''Instructions on Reporting Computer Matching Programs to the Office of Management and Budget (OMB), Congress and the Public,'' copies of this notice and report are being provided to the U.S. House Committee on Oversight Government Reform, the U.S. Senate Homeland Security and Governmental Affairs Committee, and OMB.

Authority

HUD has authority to collect and review mortgage data pursuant to the National Housing Act, as amended, 12 U.S.C. 1701 *et seq.,* and related laws. This computer matching will be conducted pursuant to Public Law 100–503, ''The Computer Matching and Privacy Protection Act of 1988,'' as amended, and OMB Circulars A–129 (Managing Federal Credit Programs). One of the purposes of all Executive departments and agencies is to implement efficient management practices for Federal Credit Programs. OMB Circular A–129 was issued under the authority of the Budget and Accounting Act of 1921, as amended; the Budget and Accounting Act of 1950, as amended; the Debt Collection Act of 1982, as amended by the Debt Collection Improvement Act of 1996; Section 2653 of Public Law 98–369; the Federal Credit Reform Act of 1990, as amended; the Federal Debt Collection Procedures Act of 1990, the Chief Financial Officers Act of 1990, as amended; Executive Order 8248; the Cash Management Improvement Act Amendments of 1992; and pre-existing common law authority to charge interest on debts and to offset payments to collect debts administratively.

Other authorities:

1. Improper Payments Elimination and Recovery Improvement Act of 2012 (IPERIA), 31 U.S.C. 3321 note, Public Law 112–248.

2. OMB Memorandum M–13–20, Protecting Privacy while Reducing Improper Payments with the Do Not Pay Initiative (August 16, 2013).

3. Presidential Memorandum on Enhancing Payment Accuracy through a ''Do Not Pay List'' (June 18, 2010).

4. Executive Order 13520, Reducing Improper Payments and Eliminating Waste in Federal Programs (November 20, 2009).

5. Improper Payment Elimination and Recovery Act of 2010, Public Law 111–204.

6. Improper Payments Information Act of 2002, 31 U.S.C. 3321 note, Public Law 107–300.

7. Federal Improper Coordination Act of 2015, Public Law 114–109.

Objectives To Be Met by the Matching Program

The objective of this matching program is that this data transfer will produce expedited eligibility determinations and will minimize administrative burdens for HUD. The benefit of this data match with respect to the HUD fraud and abuse program is the increased assurance that HUD achieves efficiencies and administrative cost savings to HUD payment, procurement, and benefit programs. This collaborative model, which offers service-based access to authoritative data, will lessen financial and administrative burdens by eliminating the need for individual HUD payment, procurement, and benefit programs to execute several CMAs with multiple Federal agencies. Description of the Match *(process procedures for the layperson, which systems will be used, what happens if there's a match, what happens if there's no match)* This agreement will match records from HUD's Office of Community Planning and Development (CPD) & Office of Public and Indian Housing (PIH) against SAM Entity Registry, SAM Exclusions and TOP Debt Check, and for HUD's Office of Housing, Multifamily Housing (MFH) to match against SAM Exclusions. A description of the data sources maintained by Treasury with their functions follow:

1. SAM Entity Registry Records—Verify that a vendor seeking to do business with the Federal Government has registered in accordance with the Federal Acquisition Regulation (FAR) by providing basic information relevant to procurement and financial transactions.

2. SAM Exclusion Records—Verify whether payments are to debarred individuals.

3. TOP Debt Check—Verify whether payee owes delinquent non-tax debts to Federal Government (and participating States).

Any matches between HUD records and SAM Entity Registry would indicate a vendor is registered to work with the government. Any matches between HUD records and SAM Exclusion Records and/TOP Debt Check would require further investigation by HUD before any action is taken pertaining to a beneficiary.

Records To Be Matched

HUD will use records from the PIH–01 Inventory Management System (IMS), HUD/EC–02, Departmental Tracking System, and HUD/H–11, Tenant Housing Assistance and Contract Verification Data. HUD's system of records notice repository may be found at: *http://portal.hud.gov/hudportal/HUD?src=/program_offices/officeofadministration/privacy_act/pia/fednotice/SORNs_LoB.*

Treasury will use records from the Department of the Treasury/Bureau of the Fiscal Service .023—Do Not Pay Payment Verification Records. Treasury's SORN repository for DNP may be found at: *http://www.donotpay.treas.gov/Privacy.htm.*

Notice Procedures

The Privacy Act requires Agreements to specify procedures for notifying applicants/recipients at time of registration and other periodic notice as directed by the Data Integrity Board of such agency to applicants for and recipients of financial assistance or payments under Federal benefit programs.

HUD and Treasury have both published system of records notices informing applicants/recipients that their information may be subject to

verification through matching programs per 5 U.S.C. 552a(o)(1)(D). As further required by the Privacy Act, HUD shall make a copy of the Computer Matching Agreement available to the public upon request. Treasury will make a copy of the effective CMA available on DNP's Web site in accordance with OMB M–13–20 Protecting Privacy while Reducing Improper Payments with the Do Not Pay Initiative.

There are no additional notice procedures.

Categories of Records/Individuals Involved

Data elements disclosed in computer matching governed by this Agreement are Personally Identifiable Information (PII) from the aforementioned system of records. The data elements supplied by HUD to Treasury (system) follow, but are not limited to

CPD

- Name
- Taxpayer Identification Number (TIN)
- Address
- DUNs
- Registration code

PIH

- Name
- TIN
- Address
- DUNs
- SAM number
- Delinquent agency

Multifamily Housing

- Name
- TIN
- Address
- SAM number
- Exclusion Type
- Exclusion Program
- Exclusion Agency

Period of the Match

Matching will begin at least 40 days from the date that copies of the Computer Matching Agreement, signed by HUD and Treasury DIBs, are sent to both Houses of Congress and OMB; or at least 30 days from the date this notice is published in the **Federal Register,** whichever is later, provided that no comments that would result in a contrary determination are received. The matching program will be in effect and continue for 18 months with an option to renew for 12 additional months unless one of the Parties to the Agreement advises the other in writing to terminate or modify the Agreement.

Dated: December 14, 2016.

Helen Goff Foster,

Chief Privacy Officer/Senior Agency Official for Privacy.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5909–N–97]

30-Day Notice of Proposed Information Collection: Assessing Public Housing Authorities (PHAs) Compliance With Insurance Requirements Under the Consolidated Annual Contributions Contract and Regulations

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date: January 23, 2017.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on August 2, 2016 at 81 FR 50721.

A. Overview of Information Collection

Title of Information Collection: Assessing Compliance with ACC and Regulatory Insurance Requirements Under the Consolidated Annual Contributions Contract and Regulations at 24 CFR 965 Subpart B.

OMB Approval Number: 2577–New.

Type of Request: New collection.

Form Number: None.

Description of the need for the information and proposed use: The information collected will be used to assess PHAs compliance with ACC and regulatory insurance requirements. PHAs are required to have appropriate property/casualty insurance coverage needed to protect Federal interest in PHA properties and operations.

Respondents (*i.e.,* affected public): Public Housing Authorities.

Estimated Number of Respondents: 300.

Estimated Number of Responses: 300.

Frequency of Response: Once (This is a one-time survey).

Average Hours per Response: The expected average response time for the survey is 20 minutes. (Some of the questions have only binary responses: _____Yes _____No).

Total Estimated Burdens: 99.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 15, 2016.

Colette Pollard,

Department Reports Management Officer, Office of the Chief Information Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5907–N–52]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to *title5@hud.gov*.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration,* No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for ''off-site use only'' recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 12–07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301)–443–2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 or send an email to *title5@hud.gov* for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*e.g.,* acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following address(es): AGRICULTURE: Ms. Debra Kerr, Department of Agriculture, OPPM, Property Management Division, Agriculture South Building, 300 7th Street SW., Washington, DC 20024, (202)–720–8873; AIR FORCE: Mr. Robert E. Moriarty, P.E., AFCEC/CI, 2261 Hughes Avenue, Ste. 155, JBSA Lackland TX 78236–9853, (315)–225–7384; GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040, Washington, DC 20405, (202)–501–0084; NAVY: Ms. Nikki Hunt, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374; (202)–685–9426 (These are not toll-free numbers).

Dated: December 15, 2016.

Brian P. Fitzmaurice,

Director, Division of Community Assistance Office of Special Needs Assistance Programs.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5909–N–96]

30-Day Notice of Proposed Information Collection: Recordkeeping for HUD's Continuum of Care Program

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* January 23, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov*

FOR FURTHER INFORMATION CONTACT: Anna P. Guido, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Anna P. Guido at *Anna .P. Guido@ hud.gov* or telephone 202–402–5535. This is not a toll-free number. Persons with hearing or speech impairments

may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 26, 2016 at 81 FR 66073.

A. Overview of Information Collection

Title of Information Collection: Recordkeeping for HUD's Continuum of Care Program.

OMB Approval Number: 2506–0199.

Type of Request: Extension.

Form Number: None.

Description of the need for the information and proposed use: This submission is to request an extension of an Existing Collection in use with an OMB Control Number for the Recordkeeping for HUD's Continuum of Care Program. Continuum of Care program recipients will be expected to implement and retain the information collection for the recordkeeping requirements. The statutory provisions and implementing interim regulations govern the Continuum of Care Program recordkeeping requirements for recipient and subrecipients and the standard operating procedures for ensuring that Continuum of Care Program funds are used in accordance with the program requirements. To see the regulations for the new CoC program and applicable supplementary documents, visit HUD's Homeless Resource Exchange at *https://www.onecpd.info/resource/2033/hearth-coc-program-interim-rule/*.

Respondents (*i.e.* affected public): Continuum of Care program recipients and subrecipients.

Estimated Number of Respondents: The CoC record keeping requirements include 45 distinct activities. Each activity requires a different number of respondents ranging from 10 to 350,000. There are 366,500 unique respondents.

Estimated Number of Responses: 3,968,075.

Frequency of Response: Each activity has a unique frequency of response, ranging from once to 200 times annually.

Average Hours per Response: Each activity also has a unique associated number of hours of response, ranging from 15 minutes to 180 hours.

Total Estimated Burdens: The total number of hours needed for all reporting is 1,921,711 hours.

EXHIBIT A–1—ESTIMATED ANNUAL BURDEN HOURS FOR RECORDKEEPING FOR HUD'S CONTINUUM OF CARE PROGRAM

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 16, 2016.

Anna P. Guido,

Department Reports Management Officer, Office of the Chief Information Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5909–N–91]

30-Day Notice of Proposed Information Collection: Section 202 Housing for the Elderly and Section 811 Housing for the Disabled

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The

purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date: January 23, 2017.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on October 12, 2016 at 81 FR 70436.

A. Overview of Information Collection

Title of Information Collection: Section 202 Housing for the Elderly and Section 811 Housing for the Disabled.

OMB Approval Number: 2502–0470.

Type of Request: Extension of a currently approved collection.

Form Number: HUD-: 2328;2453.1–CA; 2530; 2554; 2880; 935.2; 9832; 9839–A; 9839–B; 9839–C; 51994; 90163–CA; 90163.1–CA; 90164–CA; 90165–CA; 90166–CA; 90166a–CA; 90167–CA; 90169–CA; 90169.1–CA; 90170–CA; 90171–CA; 90172–A–CA; 90172–B–CA; 90173–A–CA; 90173–B–CA; 90173–C–CA; 90175–CA; 90175.1–CA; 90176–CA; 90177–CA; 90178–CA; 90179–CA; 91732–A–CA; 92013; 92013–SUPP; 92264; 92330; 92330–A; 92329; 92331; 92403.1; 92403–CA; 92408–M; 92412–CA,92433–CA; 92434–CA; 92435–CA; 92437; 92442–CA; 92442–A–CA; 92443–CA; 92448; 92450–CA; 92452; 92452a; 92452–CA; 92457; 92458; 92464; 92466–CA; 92466.1–CA; 92476–A; 92476–A–CA; 92485; 92580–CA; 93432–CA; 93479; 93480–CA; 93481; 93566–CA; 93566.1–CA; 27054; 50080–CAH,SF–425; SF–1199a; SF–LLL; and FM–1006.

Description of the need for the information and proposed use: This submission is to permit the continued processing of all Sections 202 and 811 capital advance projects that have not yet been finally closed. The submission includes processing of the application for firm commitment to final closing of the capital advance. It is needed to assist HUD in determining the Owner's eligibility and capacity to finalize the development of a housing project under the Section 202 and Section 811 Capital Advance Programs.

Respondents: (*i.e.,* affected public): Multifamily HUD-sponsored property owners.

Estimated Number of Respondents: 195.

Estimated Number of Responses: 7,809.75.

Frequency of Response: 40.05.

Average Hours per Response: 1.07.

Total Estimated Burden: 8,356.43.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond: including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 15, 2016.

City of San Diego Vernal Pool Habitat Conservation Plan and Draft Environmental Impact Report/Statement; San Diego County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of a draft environmental impact report/statement (EIS/EIR), which evaluates the impacts of, and alternatives to, the proposed City of San Diego Vernal Pool Habitat Conservation Plan (VPHCP). The VPHCP was submitted by the City of San Diego in support of an application under the Endangered Species Act of 1973, as amended, for a permit authorizing the incidental take of federally listed covered species resulting from covered activities. We request review and comment on the VPHCP and the draft EIS/EIR from local, State, and Federal agencies; Tribes; and the public.

DATES: To ensure consideration, please send your written comments by February 21, 2017.

ADDRESSES: *Obtaining Documents:*

- *Internet:* You may obtain copies of the draft EIR/EIS and draft VPHCP on the City's Web site at *https://www.sandiego.gov/planning/programs/mscp/vphcp.*
- *U.S. Mail:* A limited number of CD–ROM and printed copies of the draft EIR/EIS and draft VPHCP are available, by request, from the Field Supervisor, by mail at the Carlsbad Fish and Wildlife Office, 2177 Salk Avenue, Suite 250, Carlsbad, CA 92008; by phone at (760) 431–9440; or by fax at (760) 431–9624. Please note that your request is in reference to the City of San Diego VPHCP.
- *In-Person:* Copies of the draft EIR/EIS and draft VPHCP are also available for public inspection and review at the following locations, by appointment and written request only, 8 a.m. to 4:30 p.m.:
  - U.S. Fish and Wildlife Service, 2177 Salk Avenue, Suite 250, Carlsbad, CA 92008.
  - Department of the Interior, Natural Resources Library, 1849 C St. NW., Washington, DC 20240.

Submitting Comments: You may submit written comments by one of the following methods:

○ *U.S. Mail:* Field Supervisor, U.S. Fish and Wildlife Service, 2177 Salk Avenue, Suite 250, Carlsbad, CA 92008.

○ *Fax:* Field Supervisor, 760–431–9624.

○ *Email: fw8cfwocomments@fws.gov;* please include ''Vernal Pool HCP'' in the subject line.

FOR FURTHER INFORMATION CONTACT: G. Mendel Stewart, by mail at the U.S. Fish and Wildlife Service, 2177 Salk Avenue, Suite 250, Carlsbad, CA 92008; or by phone at (760) 431–9440.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a draft environmental impact report/statement (EIR/EIS), which evaluates the impacts of, and alternatives to, the proposed City of San Diego Vernal Pool Habitat Conservation Plan (VPHCP). The VPHCP was submitted by the City of San Diego (City) in support of an application under section 10 of the Endangered Species Act of 1973, as amended (ESA), for a permit authorizing the incidental take of federally listed covered species resulting from covered activities. The proposed VPHCP plan area encompasses 206,124 acres in the southwestern portion of San Diego County, within the State of California.

Introduction

Under the National Environmental Policy Act of 1969 (NEPA), this notice advises the public of the availability for public review of the VPHCP EIR/EIS, which evaluates the impacts of, and alternatives to, the proposed City of San Diego VPHCP for incidental take of federally listed covered species resulting from covered activities within the Plan area. This document has been prepared as a joint EIR/EIS due to the combined local, State, and Federal discretionary actions and permits associated with the VPHCP. Co-lead agencies are the City, pursuant to the California Environmental Quality Act (CEQA), and the Service, pursuant to NEPA, as further described in the draft EIR/EIS. The proposed Federal action is issuance of an incidental take permit (ITP) under section 10(a)(1)(B) of the ESA to the City of San Diego. With this notice, we continue the HCP process, which started through a notice in the **Federal Register** on December 20, 2011 (76 FR 78942), in which we announced the preparation of the HCP and NEPA document.

Background

Section 9 of the ESA prohibits ''take'' of fish and wildlife species listed as endangered under section 4 (16 U.S.C. 1538, 1533, respectively). The ESA implementing regulations extend, under certain circumstances, the prohibition of take to threatened species (50 CFR 17.31). Regulations governing permits for endangered and threatened species are at 50 CFR 17.22 and 17.32. For more about the HCP program, go to *http://www.fws.gov/endangered/esa-library/pdf/hcp.pdf.*

Under section 10(a) of the ESA, the Service may issue permits to authorize incidental take of listed fish and wildlife species. ''Incidental take'' is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Section 10(a)(1)(B) of the ESA contains provisions for issuing ITPs to non-Federal entities for the take of endangered and threatened species, provided the following criteria are met:

- The taking will be incidental;
- The applicant will, to the maximum extent practicable, minimize and mitigate the impact of such taking;
- The applicant will develop an HCP and ensure that adequate funding for the plan will be provided;
- The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and
- The applicant will carry out any other measures that the Secretary may require as being necessary or appropriate for the purposes of the HCP.

The purpose of issuing an ITP to the City would be to permit incidental take of the covered species resulting from local development authorized by the City and conditioned on the City's minimization and mitigation of the impacts of such take in accordance with an approved VPHCP. Implementation of the VPHCP is intended to maximize the benefits of conservation measures for covered species and eliminate expensive and time-consuming efforts associated with processing individual ITPs for each project within the City's proposed plan area.

The proposed VPHCP includes measures intended to minimize and mitigate the impacts of the taking to the maximum extent practicable from residential, commercial, and other development activities within the proposed plan area.

The proposed VPHCP is a conservation plan for seven threatened and endangered vernal pool species that do not currently have Federal coverage under the City of San Diego's Multiple Species Conservation Program Subarea Plan (MSCP SAP) and the species' associated vernal pool habitat. The VPHCP would complement the City's existing MSCP SAP by conserving additional lands. The VPHCP will conserve vernal pool resources within the existing City of San Diego's Multi-Habitat Planning Area (MHPA). The species covered include the San Diego fairy shrimp, Riverside fairy shrimp, San Diego button celery, spreading navarretia, San Diego mesa mint, California Orcutt grass, and Otay mesa mint. The VPHCP would provide a comprehensive approach to the protection and management of the vernal pool preserve areas within the 206,124-acre plan area.

Alternatives

We are considering three alternatives as part of this process:

No Action Alternative: No ESA section 10(a)(1)(B) permit would be issued to the City. Instead, activities involving take of the covered species would require individual permits or ESA section 7 consultations if a Federal nexus exists under the current ESA regulations; for non-Federal projects that lack a Federal nexus, take activities would require individual ITPs under section 10 of the ESA.

Proposed Action Alternative: This alternative is issuance of an ITP by the Service for covered species in the HCP plan area, with a duration of 30 years. Incidental take authorized by the requested ITP would result from covered activities. The covered activities under the VPHCP are expected to include residential, commercial, and industrial development; airport operation; road and utility maintenance and construction; trail use; and vernal pool restoration and enhancement. Once fully implemented, the VPHCP would expand the City's existing Multi-Habitat Planning Area (MHPA) by adding approximately 275 acres of lands with valuable vernal pool resources. The VPHCP would conserve an additional 8 vernal pool complexes and an additional 226 pools, totaling 2.8 acres of basin area or 9 percent more vernal pool habitat than what is currently conserved within the MHPA. Once adopted, vernal pool lands within the MHPA would be subject to the provisions of the VPHCP, in addition to the City's MSCP SAP and other existing land use and biological resource plans, policies, and regulations.

Expanded Conservation Alternative: Once fully implemented, the Expanded Conservation Alternative would expand the City's existing MHPA by adding approximately 508 acres of lands with valuable vernal pool resources. The Expanded Conservation Alternative would conserve an additional 9 vernal pool complexes within the Plan Area and conserve an additional 277 pools (11 percent more vernal pool habitat),

totaling 3.3 acres of basin area, beyond what is currently conserved within the MHPA. All other aspects of the Expanded Conservation Alternative would be the same as the Proposed Action Alternative.

Request for Comments

Consistent with section 10(c) of the ESA, we invite your submission of written data, views, or arguments with respect to the City's permit application, VPHCP, and permitting decision.

Public Availability of Comments

Written comments we receive become part of the public record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will not consider anonymous comments. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).

Dated: December 19, 2016.

Alexandra Pitts,

Deputy Regional Director, Pacific Southwest Region, Sacramento, California.

[FWS–HQ–MB–2016–N225; 91100–3740–GRNT 7C]

Announcement of Public Meetings via Teleconference: North American Wetlands Conservation Council

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meetings.

SUMMARY: The North American Wetlands Conservation Council will meet via teleconference to select North American Wetlands Conservation Act U.S. small grant proposals for reporting to the Migratory Bird Conservation Commission. This teleconference is open to the public, and interested persons may present oral or written statements.

DATES: *Teleconference:* The teleconference is scheduled for February 22, 2017, at 2 p.m. Eastern Standard Time.

Attendance: Because this is a teleconference, there is no meeting venue. Individuals wishing to participate in the teleconference should contact the Council Coordinator for the call-in information (see **FOR FURTHER INFORMATION CONTACT**) no later than February 17, 2017.

Presenting Information During the Teleconference: If you are interested in presenting information, contact the Council Coordinator no later than February 17, 2017.

Submitting Information: To submit written information or questions before the Council meeting for consideration during the meeting, contact the Council Coordinator no later than February 17, 2017.

FOR FURTHER INFORMATION CONTACT: Sarah Mott, Council Coordinator, by phone at 703–358–1784; by email at *dbhc@fws.gov*; or by U.S. mail at U.S. Fish and Wildlife Service, 5275 Leesburg Pike MS: MB, Falls Church, VA 22041. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 during normal business hours. Also, FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

About the Council

In accordance with the North American Wetlands Conservation Act (Pub. L. 101–233, 103 Stat. 1968, December 13, 1989, as amended; NAWCA), the State-private-Federal North American Wetlands Conservation Council (Council) meets to consider wetland acquisition, restoration, enhancement, and management projects for recommendation to, and final funding approval by, the Migratory Bird Conservation Commission (Commission). NAWCA provides matching grants to organizations and individuals who have developed partnerships to carry out wetlands conservation projects in the United States, Canada, and Mexico. These projects must involve long-term protection, restoration, and/or enhancement of wetlands and associated uplands habitats for the benefit of all wetlands-associated migratory birds. Project proposal due dates, application instructions, and eligibility requirements are available on the NAWCA Web site at *www.fws.gov/birds/grants/north-american-wetland-conservation-act.php*.

Public Input

Submitting Written Information or Questions

Interested members of the public may submit relevant information or questions to be considered during the public meetings. If you wish to submit a written statement so information may be made available to the Council for their consideration prior to the meetings, you must contact the Council Coordinator by the date in **DATES**. Written statements must be supplied to the Council Coordinator in both of the following formats: One hard copy with original signature, and one electronic copy via email (acceptable file formats are Adobe Acrobat PDF, MS Word, MS PowerPoint, or rich text file).

Giving an Oral Presentation

Individuals or groups requesting to make an oral presentation at the meetings will be limited to 2 minutes per speaker, with no more than a total of 30 minutes for all speakers. Interested parties should contact the Council Coordinator by the date in **DATES**, in writing (preferably via email; see **FOR FURTHER INFORMATION CONTACT**), to be placed on the public speaker list for either of these meetings. Nonregistered public speakers will not be considered during the Council meeting. Registered speakers who wish to expand upon their oral statements, or those who had wished to speak but could not be accommodated on the agenda, are invited to submit written statements to the Council within 30 days following the meeting.

Meeting Minutes

Summary minutes of the Council meeting will be maintained by the Council Coordinator at the address under **FOR FURTHER INFORMATION CONTACT**. Meeting notes will be available by contacting the Council Coordinator within 30 days following the meeting. Personal copies may be purchased for the cost of duplication.

Jerome Ford,

Assistant Director, Migratory Birds.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLMTC03200 L51100000.GA0000 LVEME15CE53015X; NDM–107039 MO#4500079552]

Notice of Availability of the Environmental Assessment for Federal Coal Lease Application NDM–107039, McLean County, ND, Notice of Public Hearing and Request for Comment on Environmental Assessment, Maximum Economic Recovery, and Fair Market Value

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with applicable regulations, the Bureau of Land Management (BLM), North Dakota Field Office (NDFO) is publishing this notice announcing the availability of an Environmental Assessment (EA) for the Falkirk Mining Company (Falkirk) Federal Coal Lease-By-Application (LBA) EA serial NDM–107039, for public review and comment. The BLM is also announcing that it will hold a public hearing to receive comments on the EA, Fair Market Value (FMV) for the LBA tract, and Maximum Economic Recovery (MER) of the coal resources contained in the proposed Falkirk LBA lease tract.

DATES: The public hearing will be held on January 10, 2017, from 5 p.m. to 7 p.m. Written comments must be received no later than January 26, 2017.

ADDRESSES: The public hearing will be held at the Underwood City Hall, 88 Lincoln Avenue, Underwood, ND 58576. Copies of the EA are available at the BLM North Dakota Field Office (NDFO) at the address below. The time, date, and location of the public hearing will also be announced in advance through local media outlets and through the North Dakota BLM Web site at: *http://bit.ly/2hz2FS9.*

You may submit written comments related to the Falkirk EA, FMV, and MER by any of the following methods:

- Email: *BLM_MT_North_Dakota_Falkirk_LBA@blm.gov;*
- Fax: 701–227–7701; or
- Mail: Bureau of Land Management, North Dakota Field Office, Falkirk LBA NDM–107039, Attention: Dorothy Van Oss, Geologist, 99 23rd Avenue West, Suite A, Dickinson, North Dakota 58601.

Please note ''Coal Lease by Application NDM–107039'' in the subject line for correspondence.

FOR FURTHER INFORMATION CONTACT: Dorothy Van Oss, Geologist; telephone (406) 233–3655 or at the address and email provided in the **ADDRESSES** section. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact the above individual during normal business hours. The Service is available 24 hours a day, seven days a week, to leave a message or question for Dorothy Van Oss. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On November 13, 2013, Falkirk submitted an application to lease an approximately 320-acre tract of Federal coal located in McLean County, North Dakota. The BLM's EA analyzes and discloses the potential direct, indirect, and cumulative impacts of leasing, and subsequent mining, the proposed 320-acre coal tract. The tract contains approximately 3.4 million tons of mineable coal (1.7 million of which is Federal Coal). The tract is located approximately 1.2 miles from the town of Underwood. It underlies private surface and is described as follows:

Fifth Principal Meridian North Dakota

T. 146 N., R. 82 W., sec 10, E1/2.

The area described contains approximately 320 acres.

Through this notice the BLM is inviting the public to provide comments regarding the potential environmental impacts of the proposed action, and also to submit comments on the FMV and MER for the Falkirk tract. All public comments, whether written or oral, will receive consideration prior to the BLM offering the lease for sale. Public comments on the EA should address the environmental impacts of the proposed action. Public comments on the FMV and MER for the proposed lease tract may address, but do not necessarily have to be limited to, the following:

1. The quality and quantity of the coal resource;
2. The mining method or methods that would achieve MER of the coal, including specifications of seams to be mined, timing and rate of production, restriction of mining, and the inclusion of the tracts in an existing mining operation;
3. The price that the mined coal would bring when sold;
4. Costs, including mining and reclamation costs, of producing the coal and the anticipated timing of production;
5. The percentage rate at which anticipated income streams should be discounted, either with inflation or in the absence of inflation, in which case the anticipated rate of inflation should be given;
6. Depreciation, depletion, amortization and other tax accounting factors;
7. The value of any surface estate where held privately;
8. Documentation of the terms and conditions of recent and similar coal land transactions in the lease sale area; and
9. Any comparable sales data for similar coal lands and coal quantities.

Proprietary data marked as confidential may be submitted to the BLM as part of any public comments. Data so marked will be treated in accordance with the applicable laws and regulations governing the confidentiality of such information. A copy of the comments submitted by the public on the EA, FMV, and MER for the tract, except those portions identified as proprietary that meet one of the exemptions in the Freedom of Information Act, will be available for public inspection at the BLM, NDFO, 99 23rd Avenue West, Suite A, Dickinson, North Dakota, during regular business hours (8 a.m.–4:30 p.m.), Monday through Friday.

The proposed action announced in the notice are consistent with Secretarial Order (S.O.) 3338, which allows preparatory work, including National Environmental Policy Act and other related analysis, on already-pending applications to continue, while the BLM's programmatic review of the Federal coal program is pending. Additionally, the BLM has also determined that the lease application is not subject to the S.O.'s leasing pause because it qualifies for an exclusion under Section 6(a) of the Order based on the emergency leasing provisions of 43 CFR 3425.1–4. Falkirk's application satisfies the emergency leasing criteria because the coal covered by the application: (1) Is needed within 3 years; (2) Constitutes less than 8 years of recoverable reserves; and (3) Is needed for coal supply contracts that were signed prior to 1979. It should also be noted that when the application was originally submitted in 2013, it was submitted as an emergency application. The determination that the application is eligible for an exclusion from the S.O. means that the coal covered by the application can be offered for sale prior to the conclusion of the BLM's programmatic review.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment

to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 43 CFR 3425.3, and 3425.4

Allen Ollila,

Acting Field Manager, North Dakota.

[LLORW00000.L16100000.DF0000.17XL1109AF.HAG17–0048]

Notice of Public Meeting for the Eastern Washington Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972, and the U.S. Department of the Interior, Bureau of Land Management (BLM), the Eastern Washington Resource Advisory Council (EWRAC) will meet as indicated below:

DATES: The EWRAC will hold a public meeting Wednesday, February 8th, 2017. The meeting will run from 9:30 a.m. to 3:30 p.m. The meeting will be held at the BLM Spokane District Office, 1103 N. Fancher, Spokane Valley, WA 99212. A public comment period will be available in the afternoon from noon until 1 p.m.

FOR FURTHER INFORMATION CONTACT: Jeff Clark, Spokane District Public Affairs Officer, 1103 N. Fancher, Spokane Valley, WA 99212, (509) 536–1297, or *jeffclark@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1(800) 877–8339 to contact the above individual during normal business hours. This service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The fifteen member EWRAC was chartered to provide information and advice regarding the use and development of the lands administered by the Spokane District in central and eastern Washington. Members represent an array of stakeholder interests in the land and resources from within the local area and statewide. All advisory council meetings are open to the public. At noon members of the public will have the opportunity to make comments to the EWRAC during a one hour public comment period. Persons wishing to make comments during the public comment period should register in person with the BLM by 11 a.m. on the meeting day, at the meeting location. Depending on the number of persons wishing to comment, the length of comments may be limited. The public may send written comments to the EWRAC at BLM Spokane District, Attn. EWRAC, 1103 N. Fancher, Spokane Valley, WA 99212. The BLM appreciates all comments.

Linda Clark,

Spokane District Manager.

Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; Application for Designation as National Recreation Trail or National Water Trail

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service, NPS) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. To comply with the Paperwork Reduction Act of 1995 and as a part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to comment on this IC. We may not conduct or sponsor and a person is not required to respond to a collection unless it displays a currently valid OMB control number.

DATES: You must submit comments on or before January 23, 2017.

ADDRESSES: Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–5806 (fax) or *OIRA_Submission@omb.eop.gov* (email). Please provide a copy of your comments to Madonna L. Baucum, Information Collection Clearance Officer, National Park Service, 12201 Sunrise Valley Drive, Mail Stop 242, Reston, VA 20192 (mail); or *madonna_baucum@nps.gov* (email). Please include ''1024-New NRT NWTS'' in the subject line of your comments. You may review the ICR online at *http://www.reginfo.gov.* Follow the instructions to review Department of the Interior collections under review by OMB.

FOR FURTHER INFORMATION CONTACT: For National Recreation Trails, contact Helen Scully, National Trails System Program Specialist/National Recreation Trails Coordinator for the Department of the Interior; 1849 C Street NW., Org Code 2220, Washington, DC 20240; *helen_scully@nps.gov* (email); (202) 354–6910 (phone); or (202) 371–5179 (fax). For National Water Trails, contact Corita Waters, NPS Rivers, Trails, and Conservation Assistance Program; 1849 C Street NW., Org Code 2220, Washington, DC 20240; *corita_waters@nps.gov* (email); (202) 354–6908 (phone); or (202) 371–5179 (fax).

SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this information collection is to assist the National Park Service (NPS) in submitting suitable trails or trail systems to the Secretary of the Interior for designation as National Recreation Trails (NRTs), and in recommending exemplary water trails to the Secretary of the Interior for designation as National Water Trails (NWTs) to be included in the National Water Trails System (NWTS). The NPS administers the NRT program by authority of section 4 of the National Trails System Act (16 U.S.C. 1243). Secretarial Order No. 3319 established National Water Trails as a class of National Recreation Trails and directed that such trails collectively be considered in a National Water Trails System.

National Recreation Trail designation provides national recognition to local and regional trails or trail systems, acknowledging local and state efforts to build and maintain viable trails and trail systems. This recognition function is shared by the Secretary of Agriculture (for trails on National Forest lands and waters) and the Secretary of the Interior (for all other trails).

The National Water Trails System is focused on building a national network of exceptional water trails that can be sustained by an ever growing and vibrant water trail community. The NWTS connects Americans to the nation's waterways and strengthens the conservation and restoration of those waterways. Best management practices provide high quality water-based outdoor recreational opportunities.

II. Data

OMB Control Number: None.

Title: Application for Designation as National Recreation Trail or National Water Trail.

Form(s): Web-based forms: 10–1002, ''Application for Designation as National Water Trail System'' and 10–1003 Application for Designation as National Recreation Trail''.

Type of Request: Existing collection in use without OMB approval.

Description of Respondents: Private individuals; businesses; educational institutions; nonprofit organizations; state, tribal, and local governments; and Federal agency land units.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency of Collection: On occasion.

	Annual respondents	Total annual responses	Avg. time per response (hours)	Total annual burden hours (rounded)
Application for Designation—National Recreation Trails				
Individual	1	1	8	8
Private Sector	5	5	8	40
State, Local, or Tribal Governments	6	8	8	64
Application for Designation—National Water Trails System				
Individual	1	1	11	11
Private Sector	2	2	11	22
State, Local, or Tribal Governments	3	3	11	33
Amendments/Updates—National Recreation Trails				
Individual	1	1	.5	1
Private Sector	1	1	.5	1
State, Local, or Tribal Governments	3	3	.5	2
Amendments/Updates—National Water Trails System				
Individual	1	1	.5	1
Private Sector	1	1	.5	1
State, Local, or Tribal Governments	1	1	.5	1
Total	23	28	.....	185

Estimated Annual Reporting and Recordkeeping ''Non-Hour Cost'': None.

III. Comments

On August 8 2016, we published in the **Federal Register** (81 FR 52459) a Notice of our intent to request that OMB approve this information collection. In that Notice, we solicited comments for 60 days, ending on October 7, 2016. We did not receive any comments in response to that Notice.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB and us in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: December 20, 2016.

Madonna L. Baucum,

Information Collection Clearance Officer, National Park Service.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0002; DS63610000 DR2000000.CH7000 178D0102R2]

States' Decisions on Participating in Accounting and Auditing Relief for Federal Oil and Gas Marginal Properties

AGENCY: Office of Natural Resources Revenue (ONRR), Interior.

ACTION: Notice.

SUMMARY: Final regulations that ONRR published on September 13, 2004 (69 FR 55076) provide two types of accounting and auditing relief for Federal onshore or Outer Continental Shelf lease production from marginal properties. As the regulations require, for each calendar year ONRR provides, by October 31 preceding the calendar year, a list of qualifying marginal Federal oil and gas properties to States that receive a portion of Federal royalties. Each State then decides whether to participate in one or both relief options. For calendar year 2017, we provide in this notice the affected States' decisions to allow one or both types of relief.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Lindsay Goldstein, Economic and Market Analysis Office, at (303) 231–3301; or email at *lindsay.goldstein@onrr.gov.*

SUPPLEMENTARY INFORMATION: The regulations, codified at 30 CFR part 1204, subpart C, implement certain provisions of section 7 of the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 (RSFA) (30 U.S.C. 1726), which allows States to relieve the lessees of marginal properties from certain reporting, accounting, and auditing requirements. States make an annual determination of whether or not to allow relief. Two options for relief are provided: (1) Notification-based relief

for annual reporting and (2) other requested relief, as industry proposed and ONRR and the affected State approved. The regulations require ONRR to publish by December 1 of each year a list of the States and their decisions regarding marginal property relief.

To qualify for the first relief option (notification-based relief) for calendar year 2016, properties must produce less than 1,000 barrels-of-oil-equivalent (BOE) per year for the base period (July 1, 2014, through June 30, 2015). Annual reporting relief will begin January 1, 2017, with the annual report and payment due February 28, 2018, or March 31, 2018, if you have an estimated payment on file. To qualify for the second relief option (other requested relief), the combined equivalent production of the marginal properties during the base period must equal an average daily well production of less than 15 BOE per well, per day calculated under 30 CFR 1204.4(c).

The following table shows the States that have qualifying marginal properties and the States' decisions to allow one or both forms of relief.

State	Notification-based relief (less than 1,000 BOE per year)	Request-based relief (less than 15 BOE per well per day)
Alabama	No	No.
Arkansas	Yes	Yes.
California	No	No.
Colorado	No	No.
Kansas	No	No.
Louisiana	Yes	Yes.
Michigan	Yes	Yes.
Mississippi	No	No.
Montana	No	No.
Nebraska	No	No.
Nevada	No	No.
New Mexico	No	Yes.
North Dakota	No	No.
Oklahoma	Yes	Yes.
South Dakota	No	No.
Utah	No	No.
Wyoming	Yes	No.

Federal oil and gas properties located in all other States where ONRR does not share a portion of Federal royalties with the State are eligible for relief if they qualify as marginal under the regulations (*see* section 117(c) of RSFA, 30 U.S.C. 1726(c)). For information on how to obtain relief, please refer to 30 CFR 1204.205 or to the published rule, which you may view at *http://www.onrr.gov/Laws_R_D/FRNotices/PDFDocs/55076.pdf.*

Unless the information that ONRR received is proprietary data, all correspondence, records, or information that we receive in response to this notice may be subject to disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552 *et seq.*). If applicable, please highlight the proprietary portions, including any supporting documentation, or mark the page(s) that contain proprietary data. We protect the proprietary information under the Trade Secrets Act (18 U.S.C. 1905), FOIA Exemption 4 (5 U.S.C. 552(b)(4)), and the Department of the Interior's FOIA regulations (43 CFR part 2).

Dated: December 13, 2016.

Gregory J. Gould,

Director, Office of Natural Resources Revenue.

Bureau of Ocean Energy Management

[Docket No. BOEM–2014–0001]

Final Environmental Impact Statement for the Cook Inlet Outer Continental Shelf Oil and Gas Lease Sale 244; MMAA104000

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of availability of a final environmental impact statement.

SUMMARY: BOEM is announcing the availability of the Final Environmental Impact Statement (Final EIS) for the Cook Inlet Outer Continental Shelf Oil and Gas Lease Sale 244 (Cook Inlet Lease Sale 244). The Final EIS offers a discussion of potential impacts of the proposed action, provides an analysis of reasonable alternatives to the proposed action, and identifies the Bureau's preferred alternative.

The Final EIS is available on the agency Web site at *http://www.boem.gov/Sale-244/.* BOEM will primarily distribute digital copies of the Final EIS on compact discs. You may request a paper copy or the location of a library with a digital copy of the Final EIS from BOEM, Alaska OCS Region, 3801 Centerpoint Drive, Suite 500, Anchorage, Alaska 99503–5823, (907) 334–5200.

FOR FURTHER INFORMATION CONTACT: For more information on the Cook Inlet Lease Sale 244 Final EIS, you may contact Sharon Randall, Bureau of Ocean Energy Management, Alaska OCS Region, 3801 Centerpoint Drive, Suite 500, Anchorage, Alaska 99503–5823; (907) 334–5200.

Authority: This Notice of Availability for the Final EIS is in compliance with the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4231 *et seq.*), and is published pursuant to 40 CFR 1502.19.

BILLING CODE P

INTERNATIONAL TRADE COMMISSION

[USITC SE–16–044]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: January 6, 2017 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205–2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: None
2. Minutes
3. Ratification List
4. Vote in Inv. Nos. 701–TA–566 and 731–TA–1342 (Preliminary) (Softwood Lumber Products from Canada). The Commission is currently scheduled to complete and file its determinations on January 9, 2017; views of the Commission are currently scheduled to be completed and filed on January 17, 2017.
5. Vote in Inv. Nos. 701–TA–560 and 731–TA–1319, 1326, and 1328 (Final) (Carbon and Alloy Steel Cut-to-Length Plate from Brazil, South Africa, and Turkey). The Commission is currently scheduled to complete and file its determinations and views of the Commission by January 18, 2017.
6. Outstanding action jackets: None

In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: December 20, 2016.

William R. Bishop,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1002]

Certain Carbon and Alloy Steel Products; Commission Determination To Review an Initial Determination Granting Respondents' Motion To Terminate Complainant's Antitrust Claim; Request for Written Submissions and Setting of Date for Possible Oral Argument

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review an initial determination (''ID'') (Order No. 38) of the presiding administrative law judge (''ALJ'') granting Respondents' motion to terminate Complainant's antitrust claim and sets the date of March 14, 2017, for possible oral argument.

FOR FURTHER INFORMATION CONTACT: Houda Morad, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–4716. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted Investigation No. 337–TA–1002 on June 2, 2016, based on a complaint filed by Complainant United States Steel Corporation of Pittsburgh, Pennsylvania (''U.S. Steel''), alleging a violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337. *See* 81 FR 35381 (June 2, 2016). The complaint alleges violations of Section 337 based upon the importation into the United States, or in the sale of certain carbon and alloy steel products by reason of: (1) A conspiracy to fix prices and control output and export volumes, the threat or effect of which is to restrain or monopolize trade and commerce in the United States; (2) misappropriation and use of trade secrets, the threat or effect of which is to destroy or substantially injure an industry in the United States; and (3) false designation of origin or manufacturer, the threat or effect of which is to destroy or substantially injure an industry in the United States. *Id.* The notice of investigation identified forty (40) respondents that are Chinese steel manufacturers or distributors, as well as some of their Hong Kong and United States affiliates. *Id.* In addition, the Office of Unfair Import Investigations is a party in this investigation. *Id.*

On July 6, 2016, the presiding ALJ issued, *sua sponte,* an initial determination (Order No. 19) suspending the investigation pursuant to Section 337(b)(3). On August 5, 2016, the Commission reversed and vacated the suspension. *See Certain Carbon and Alloy Steel Products,* USITC Inv. No. 337–TA–1002, Comm'n Notice (Aug. 5, 2016).

On August 26, 2016, Respondents filed a motion to terminate U.S. Steel's antitrust claim under 19 CFR 210.21. On September 6, 2016, U.S. Steel filed a response in opposition to Respondents' motion to terminate. On September 9, 2016, the Commission Investigative Attorney (''IA'') filed a response in opposition to Respondents' motion to terminate. On November 14, 2016, the ALJ issued the subject ID, granting Respondents' motion to terminate Complainant's antitrust claim under 19 CFR 210.21 and, in the alternative, under 19 CFR 210.18. On November 23, 2016, Complainant and the IA filed petitions for review of the ID. Complainant also requested oral argument before the Commission. On December 1, 2016, Respondents filed a response to the petitions for review. Also on December 1, 2016, Complainant filed a response to the IA's petition for review.

The Commission has determined to review the ID. In connection with its review, the Commission requests written responses regarding the following questions:

1. Please explain the policies that underlie the injury requirement under Section 337(a)(1)(A)(iii), including an analysis of any relevant statutory language, legislative history, Commission determinations, case law, or other authority. In discussing this question, please also explain how the injury requirement under Section 337(a)(1)(A)(iii) is different from, or relates to, the injury requirement that applies under Section 337(a)(1)(A)(i).

2. Please explain what Complainant must prove to satisfy the injury requirement under Section 337(a)(1)(A)(iii), where the alleged unfair act in violation of Section 337 is based on a claim alleging a conspiracy to fix prices and control output and export volumes (''antitrust claim''). Please include an analysis of any relevant statutory language, legislative history, Commission determinations, case law, or other authority.

3. Please explain how ''antitrust injury'' standing, as required for private litigants in federal district courts asserting antitrust claims, *see, e.g., Atl. Richfield Co.* v. *USA Petroleum Co.,* 495 U.S. 328, 335 (1990), compares to, or differs from, the injury requirement under Section 337(a)(1)(A). Please include an analysis of any relevant statutory language, legislative history, Commission determinations, case law, or other authority. In discussing this question, please explain the chronology of the adoption of the ''antitrust injury'' standing requirement in relation to the injury requirement under Section 337(a)(1)(A).

4. Please explain whether ''antitrust injury'' standing is, or should be,

required for establishing a Section 337 violation based on a claim alleging a conspiracy to fix prices and control output and export volumes as a matter of law and/or policy. Please include an analysis of any relevant statutory language, legislative history, Commission determinations, case law, or other authority.

5. Please explain whether good cause exists under Commission Rule 210.14 to amend the complaint, presuming the Complainant is required to plead ''antitrust injury'' in its complaint.

6. To the extent not specifically requested above, please further explain any other legal reasoning and/or argument (with citation to legal authority) advanced before the ALJ with respect to Order No. 38, and/or raised in a corresponding petition for review of the ID, and not otherwise waived, why Complainant's antitrust claim should or should not be terminated at the present stage of the investigation.

Written Submissions: The parties to the investigation, including the Office of Unfair Import Investigations, and interested government agencies are requested to file written submissions on the issues identified in this notice. Written submissions must be filed no later than close of business on January 17, 2017 and may not exceed 50 pages in length, exclusive of any exhibits. Responsive submissions must be filed no later than the close of business on February 1, 2017 and may not exceed 25 pages in length, exclusive of any exhibits. No further submissions on any of these issues will be permitted unless otherwise ordered by the Commission.

Oral Argument: Upon review of written submissions, the Commission will determine whether to conduct oral argument. Notice of the Commission's determination will be announced no later than February 24, 2017. Any oral argument, if granted, will be held on March 14, 2017. The oral argument would be expected to last two hours. Further details about the specifics of the oral argument will be forthcoming if one is granted.

The written submissions and any oral argument must be limited to explanation and analysis of the existing factual record in this investigation in view of governing legal authority as applied to the issues identified in this notice. The written submissions and the oral argument shall not include the submission of any factual evidence, such as testimony or documents, not already in the factual record of this investigation, absent the grant of specific permission to submit new evidence based upon good cause shown upon consideration of a specific request.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit eight (8) true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 337–TA–1002'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel [1], solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 19, 2016.

Lisa R. Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–567 (Advisory Opinion Proceeding)]

Certain Foam Footwear; Commission Determination To Adopt a Report Issued by the Office of Unfair Import Investigations as Its Advisory Opinion

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to adopt the report prepared by the Office of Unfair Import Investigations (''OUII'') as the Commission's advisory opinion in the above-captioned proceeding.

FOR FURTHER INFORMATION CONTACT: Clint Gerdine, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–2310. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *https://www.usitc.gov*. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov*. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on May 11, 2006, based on a complaint, as amended, filed by Crocs, Inc. (''Crocs'') of Niwot, Colorado. 71 FR 27514–15 (May 11, 2006). The complaint alleged, *inter alia,* violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain foam footwear, by reason of infringement of claims 1–2 of U.S. Patent No. 6,993,858 (''the '858 patent'') and U.S. Patent No. D517,789 (''the '789 patent''). The notice of investigation named several respondents including Double Diamond Distribution Ltd. (''Double Diamond'') of Saskatoon, Canada.

On July 25, 2008, the Commission issued its final determination finding no

violation of section 337 based on non-infringement and non-satisfaction of the technical prong of the domestic industry requirement with respect to the '789 patent, and invalidity of the '858 patent as obvious under 35 U.S.C. 103. 73 FR 45073–74 (Aug. 1, 2008). On July 15, 2011, after an appeal to the U.S. Court of Appeals for the Federal Circuit and subsequent remand vacating the Commission's previous finding of no violation, the Commission found a violation of section 337 based on infringement of the asserted claims of the patents and issued a general exclusion order and, *inter alia,* a cease and desist order directed against Double Diamond. 76 FR 43723–24 (July 21, 2011).

On July 12, 2016, Double Diamond and U.S.A. Dawgs, Inc. (''USA Dawgs'') of Las Vegas, Nevada (collectively, the ''requesters'') petitioned for institution of an advisory opinion proceeding as to whether their Fleece Dawgs footwear is covered by the general exclusion order or cease and desist order directed against Double Diamond. No responses were filed.

On August 11, 2016, the Commission determined that requesters' petition complied with the requirements for institution of an advisory opinion proceeding under Commission Rule 210.79. The Commission therefore determined to institute an advisory opinion proceeding and assigned the proceeding to OUII. 81 FR 54820 (Aug. 17, 2016). The Commission assigned OUII the task of investigating and preparing a report concerning requesters' Fleece Dawgs footwear, and it named Crocs, Double Diamond, and USA Dawgs as parties to the proceeding.

On November 7, 2016, OUII issued a report concluding that requesters' Mossy Oak Women's Fleece Dawgs footwear (''the Subject Articles'') is not covered by the general exclusion order and cease and desist order directed against Double Diamond issued in the underlying investigation. In so doing, OUII concluded, *inter alia,* that (1) requesters met their burden of showing non-infringement by the Subject Articles with respect to the claim term ''strap section'' for claims 1–2 of the '858 patent; and (2) the Subject Articles do not meet the ''ordinary observer'' test for infringement of the '789 patent. *See Crocs, Inc.* v. *ITC,* 598 F.3d 1294, 1302 (Fed. Cir. 2010). No party filed comments on the OUII report.

After reviewing the report, the Commission has determined to adopt the report issued by OUII as its advisory opinion in this proceeding.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 20, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Meeting of the Advisory Committee; Meeting

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The Executive Director of the Joint Board for the Enrollment of Actuaries gives notice of a meeting of the Advisory Committee on Actuarial Examinations (portions of which will be open to the public) in Arlington, VA, on January 9–10, 2017.

DATES: Monday, January 9, 2017, from 9:00 a.m. to 5:00 p.m., and Tuesday, January 10, 2017, from 8:30 a.m. to 5:00 p.m.

ADDRESSES: The meeting will be held at the Internal Revenue Service, 2345 Crystal Drive, Suite 400, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Patrick W. McDonough, Executive Director of the Joint Board for the Enrollment of Actuaries, at 703–414–2173.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet at the Internal Revenue Service, 2345 Crystal Drive, Suite 400, Arlington, VA 22202, on Monday, January 9, 2017, from 9:00 a.m. to 5:00 p.m., and Tuesday, January 10, 2017, from 8:30 a.m. to 5:00 p.m.

The purpose of the meeting is to discuss topics and questions that may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in 29 U.S.C. 1242(a)(1)(B) and to review the November 2016 Pension (EA–2F) Examination in order to make recommendations relative thereto, including the minimum acceptable pass score. Topics for inclusion on the syllabus for the Joint Board's examination program for the May 2017 Basic (EA–1) Examination and the May 2017 Pension (EA–2L) Examination also will be discussed.

A determination has been made as required by section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App., that the portions of the meeting dealing with the discussion of questions that may appear on the Joint Board's examinations and the review of the November 2016 Pension (EA–2F) Examination fall within the exceptions to the open meeting requirement set forth in 5 U.S.C. 552b(c)(9)(B), and that the public interest requires that such portions be closed to public participation.

The portion of the meeting dealing with the discussion of the other topics will commence at 1:00 p.m. on January 9, 2017, and will continue for as long as necessary to complete the discussion, but not beyond 3:00 p.m. Time permitting, after the close of this discussion by Committee members, interested persons may make statements germane to this subject. Persons wishing to make oral statements should notify the Executive Director in writing prior to the meeting in order to aid in scheduling the time available and should submit the written text, or at a minimum, an outline of comments they propose to make orally. Such comments will be limited to 10 minutes in length. All persons planning to attend the public session should notify the Executive Director in writing to obtain building entry. Notifications of intent to make an oral statement or to attend must be sent electronically, by no later than January 2, 2017, to *nhqjbea@irs.gov.* Any interested person also may file a written statement for consideration by the Joint Board and the Committee by mailing it to: Internal Revenue Service; Attn: Patrick W. McDonough, Executive Director; Joint Board for the Enrollment of Actuaries SE:RPO; Park 4, Floor 4; 1111 Constitution Avenue NW; Washington, DC 20224.

Dated: December 16, 2016.

Patrick W. McDonough,

Executive Director, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4830–01–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0356]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Reinstatement to a Previously Approved Collection: State and Local Justice Agencies Serving Tribal Lands (SLJASTL): Census of State and Local Law Enforcement Agencies Serving Tribal Lands (CSLLEASTL)

AGENCY: Bureau of Justice Statistics, Department of Justice.

ACTION: 60-day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until February 21, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Suzanne Strong, Statistician, Prosecution and Judicial Statistics, Bureau of Justice Statistics, 810 Seventh Street NW., Washington, DC 20531 (email: *Suzanne.M.Strong@usdoj.gov;* telephone: 202–616–3666).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* New collection.

(2) *The Title of the Form/Collection:* State and Local Justice Agencies Serving PL–280 Tribal Lands (SLJASTL): Survey of State and Local Law Enforcement Agencies Serving PL–280 Tribal Lands (SSLLEASTL).

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* No agency form number at this time. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will be general purpose state and local law enforcement agencies (LEAs) that are responsible for policing tribal lands in the sixteen Public Law 280 (PL–280) states, including state police departments, sheriff's offices, and general purpose local law enforcement agencies. *Abstract:* Among other responsibilities, the Bureau of Justice Statistics (BJS) is charged with collecting data regarding crimes occurring on tribal lands. The SLJASTL is the first effort by BJS to include state and local justice agencies responsible for policing and prosecuting crimes that occur on tribal lands in PL–280 states. Specifically, the SSLLEASTL will collect information that will help fill the gaps we have in our understanding of the nature of crime on tribal lands. There are two survey instruments: One for Alaska and one for the remaining fifteen PL–280 states. The data collection instruments are designed to capture administrative, operational and caseload data from respondents. Information requested includes the staffing and budgets of the state and local law enforcement agencies, the types of agreements state and local law enforcement agencies have with tribal governments, types of patrol services, traffic services, and detention services provided to tribal lands, information sharing between state and local law enforcement and tribal governments, training provided by state and local law enforcement to tribal law enforcement (including cross-deputization agreements), training received by state and local law enforcement agencies on tribal jurisdiction, tribal law and tribal culture, and the number and types of incidents policed by state and local law enforcement agencies. This survey is the first of its kind to describe the role that state and local law enforcement play in policing crime on tribal lands in PL–280 states.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An agency-level survey will be sent to approximately 1,600 agencies. The expected burden placed on these respondents is about 70 minutes per respondent, including follow-up time.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total respondent burden is approximately 1,773 burden hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: December 19, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On December 19, 2016, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Columbia in the lawsuit entitled *United States* v. *Anthony Spanos, Inc., et al.,* Civil Action No. 1:14–cv–01625–RJL.

The United States filed this lawsuit under the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''). The United States' complaint names George A. Spanos, in his capacity as the trustee of the George A. Spanos Living Trust, Anthony Spanos, Inc., and Gus Dinos as defendants. The United States' complaint asserts claims against George A. Spanos, in his capacity as trustee of the George A. Spanos Living Trust, for recovery of costs incurred and to be incurred by the Environmental Protection Agency in connection with the removal of hazardous substances at the Georgia Avenue PCE Site, Anthony Spanos, Inc. for recovery of costs incurred and to be incurred by the

Environmental Protection Agency in connection with the removal of hazardous substances at the Georgia Avenue PCE Site, as well as civil penalties for failure to respond to an information request issued by the Environmental Protection Agency, and Gus Dinos for civil penalties for failure to respond to an information request issued by the Environmental Protection Agency.

The United States previously lodged with the Court a proposed consent decree that, if entered by the Court, would resolve the United States' claims against George A. Spanos, in his capacity as the trustee of the George A. Spanos Living Trust. The presently proposed consent decree resolves the United States' remaining claims against Anthony Spanos, Inc. and Gus Dinos. Under the proposed consent decree, Anthony Spanos, Inc. agrees to assign its rights to proceeds under its insurance policies to the United States. In return, the United States agrees not to sue Anthony Spanos, Inc. under Sections 106 and 107 of CERCLA. In addition, under the proposed consent decree, Gus Dinos agrees to pay a $5,000 civil penalty.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Anthony Spanos, Inc., et al.,* D.J. Ref. No. 90–11–3–10721. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the consent decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to:

Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $6.25 (25 cents per page reproduction cost) payable to the United States Treasury.

Robert Brook,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

[OMB Number 1121–NEW]

Agency Information Collection Activities; Proposed eCollection eComments Requested; New Collection: State and Local Justice Agencies Serving Tribal Lands (SLJASTL): Census of Prosecutor Offices Serving Tribal Lands (CSLPOSTL)

AGENCY: Bureau of Justice Statistics, Department of Justice.

ACTION: 60-day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until February 21, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Suzanne Strong, Statistician, Prosecution and Judicial Statistics, Bureau of Justice Statistics, 810 Seventh Street NW., Washington, DC 20531 (email: *Suzanne.M.Strong@usdoj.gov;* telephone: 202–616–3666).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection:

(1) *Type of Information Collection:* New collection.

(2) *The Title of the Form/Collection:* State and Local Justice Agencies Serving PL–280 Tribal Lands (SLJASTL): Survey of State and Local Prosecutor Offices Serving PL–280 Tribal Lands (SSLPOSTL)

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* No agency form number at this time. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Respondents will be state and local prosecutor offices located in the sixteen Public Law 280 (PL–280) states. *Abstract:* Among other responsibilities, the Bureau of Justice Statistics is charged with collecting data regarding crimes occurring on tribal lands. The SLJASTL is the first effort by BJS to include state and local justice agencies responsible for policing and prosecuting crimes that occur on tribal lands. Specifically, the SSLPOSTL will collect information that will help fill the gaps we have in our understanding of the nature of crime on tribal lands. There are two survey instruments: One for Alaska and one for the remaining fifteen PL–280 states. The data collection instruments are designed to capture administrative, operational and caseload data from prosecutor offices that investigate and prosecute crimes that occur on tribal lands in PL–280 states. The information collected includes the staffing and budget of the prosecutor office, the types of agreements prosecutor offices have with tribal governments, where prosecutors try crimes occurring on tribal lands (*i.e.,* in tribal or state courts), non-prosecutorial services provided on tribal lands (such

as victim services and community outreach services), information sharing with tribal governments, training received by prosecutors about tribal lands, joint training opportunities with state prosecutors and tribes, and the number and types of referrals to and cases prosecuted by state prosecutors. This survey is the first of its kind to describe the role that state and local prosecutor offices play in charging and prosecuting crimes that occur on tribal lands in PL–280 states.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An agency-level survey will be sent to approximately 460 offices, including a full census of prosecutor offices in counties with tribal lands (approximately 210) and a sample of prosecutor offices in counties without tribal lands (approximately 250 of the remaining 520). The expected burden placed on these respondents is about 70 minutes per respondent, including follow-up time.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total respondent burden is approximately 510 burden hours.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: December 19, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employment and Training Administration

Labor Certification Process for the Temporary Employment of Aliens in Agriculture in the United States: Adverse Effect Wage Rate for Range Occupations in 2017

AGENCY: Employment and Training Administration, Department of Labor.

ACTION: Notice.

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor (Department) is issuing this notice to announce the 2017 Adverse Effect Wage Rate (AEWR) for the employment of temporary or seasonal nonimmigrant foreign workers (H–2A workers) to perform herding or production of livestock on the range.

AEWRs are the minimum wage rates the Department has determined must be offered and paid by employers to H–2A workers and workers in corresponding employment so that the wages of similarly employed U.S. workers will not be adversely affected. In this notice, the Department announces the annual update of the AEWR for workers engaged in the herding or production of livestock on the range, as required by the methodology established in the *Temporary Agricultural Employment of H–2A Foreign Workers in the Herding or Production of Livestock on the Range in the United States,* 80 FR 62958, 63067–63068 (Oct. 16, 2015); 20 CFR 655.211.

DATES: *Effective Date:* This notice is effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: William W. Thompson, II, Acting Administrator, Office of Foreign Labor Certification, U.S. Department of Labor, 200 Constitution Avenue NW., Room PPII–12–200, Washington, DC 20210. Telephone: 202–693–3010 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: The U.S. Citizenship and Immigration Services of the Department of Homeland Security will not approve an employer's petition for the admission of H–2A nonimmigrant temporary agricultural workers in the U.S. unless the petitioner has received from the Department an H–2A labor certification. The labor certification provides that: (1) There are not sufficient U.S. workers who are able, willing, and qualified and who will be available at the time and place needed to perform the labor or services involved in the petition; and (2) the employment of the foreign worker(s) in such labor or services will not adversely affect the wages and working conditions of workers in the U.S. similarly employed. 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c)(1), and 1188(a); 8 CFR 214.2(h)(5); 20 CFR 655.100.

Adverse Effect Wage Rate for 2017

The Department's H–2A regulations covering the herding or production of livestock on the range (H–2A Herder Rule) at 20 CFR 655.210(g) and 655.211(a)(1) provide that employers must offer, advertise in recruitment and pay each worker employed under 20 CFR 655.200–655.235 a wage that is at least the highest of: (i) The monthly AEWR, (ii) the agreed-upon collective bargaining wage, or (iii) the applicable minimum wage imposed by Federal or State law or judicial action. Further, when the monthly AEWR is adjusted during a work contract, and is higher than both the agreed-upon collective bargaining wage and the applicable minimum wage imposed by Federal or State law or judicial action in effect at the time the work is performed, the employer must pay that adjusted monthly AEWR upon publication by the Department in the **Federal Register**. 20 CFR 655.211(a)(2).

As provided in 20 CFR 655.211(c) of the H–2A Herder Rule, the methodology for establishing the monthly AEWR for range occupations in all states is based on the rate of $7.25/hour multiplied by 48 hours per week, and then multiplied by 4.333 weeks per month. Beginning for calendar year 2017, the monthly AEWR shall be adjusted annually based on the Employment Cost Index (ECI) for wages and salaries published by the Bureau of Labor Statistics for the preceding annual period. The 12-month change in the ECI for wages and salaries between September 2015 and September 2016 was 2.4 percent. ETA used that percentage to adjust the monthly AEWR.[1]

The H–2A Herder Rule applies a two-year transition to the full monthly AEWR. In applying the transition wage rate methodology set forth under 20 CFR 655.211(d)(2) for calendar year 2017, the Department is setting the national monthly AEWR at 90 percent of the full wage calculated using the H–2A Herder Rule methodology. Thus, the national monthly AEWR rate for all range occupations in the H–2A program is calculated at ($7.25 × 48 × 4.333 × 1.024 × .90 = 1,389.67) or $1,389.67.

Accordingly, any employer certified or seeking certification for range workers must pay each worker a wage that is at least the highest of the monthly AEWR of $1,389.67, the agreed-upon collective bargaining wage, or the applicable minimum wage imposed by Federal or State legislation or judicial action, at the time work is performed on or after the effective date of this notice.

[1] The regulation at 20 CFR 655.211(c)(2) states that the monthly AEWR is calculated based on the Employment Cost Index for wages and salaries for the preceding October—October period. This was intended to refer the October publication of data by BLS of wages and salaries for the September—September period. Accordingly, the most recent 12-month change in the Employment Cost Index published on October 28, 2016 by the Bureau of Labor Statistics was used for establishing the monthly AEWR for the second transition year under the regulations. See *http://www.bls.gov/news.release/eci.nr0.htm.*

BILLING CODE 4510–FP–P

DEPARTMENT OF LABOR

Employment and Training Administration

Labor Certification Process for the Temporary Employment of Aliens in Agriculture in the United States: 2017 Adverse Effect Wage Rates

AGENCY: Employment and Training Administration, Department of Labor.

ACTION: Notice.

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor (Department) is issuing this notice to announce the 2017 Adverse Effect Wage Rates (AEWRs) for the employment of temporary or seasonal nonimmigrant foreign workers (H–2A workers) to perform agricultural labor or services.

AEWRs are the minimum wage rates the Department has determined must be offered and paid by employers to H–2A workers and workers in corresponding employment for a particular occupation and area so that the wages of similarly employed U.S. workers will not be adversely affected. In this notice, the Department announces the annual update of the AEWRs.

DATES: *Effective Date:* This notice is effective December 23, 2016.

FOR FURTHER INFORMATION CONTACT: William W. Thompson, II, Acting Administrator, U.S. Department of Labor, Employment and Training Administration, Office of Foreign Labor Certification, 200 Constitution Avenue NW., Room PPII–12–200, Washington, DC 20210. Telephone: 202–513–7350 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: As a condition precedent to receiving an H–2A visa, employers must first obtain a labor certification from the Department of Labor. The labor certification provides that: (1) There are not sufficient U.S. workers who are able, willing, and qualified and who will be available at the time and place needed to perform the labor or services involved in the petition; and (2) the employment of the foreign worker(s) in such labor or services will not adversely affect the wages and working conditions of workers in the U.S. similarly employed. 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c)(1), and 1188(a); 8 CFR 214.2(h)(5); 20 CFR 655.100.

Adverse Effect Wage Rates for 2017

The Department's H–2A regulations at 20 CFR 655.120(l) provide that employers must pay their H–2A workers and workers in corresponding employment at least the highest of: (i) The AEWR; (ii) the prevailing hourly wage rate; (iii) the prevailing piece rate; (iv) the agreed-upon collective bargaining wage rate, if applicable; or (v) the Federal or State minimum wage rate, in effect at the time the work is performed.

Except as otherwise provided in 20 CFR part 655, subpart B, the region-wide AEWR for all agricultural employment (except those occupations characterized by other than a reasonably regular workday or workweek as described in 20 CFR 655.102) for which temporary H–2A certification is being sought is equal to the annual weighted average hourly wage rate for field and livestock workers (combined) in the State or region as published annually by the United States Department of Agriculture (USDA). 20 CFR 655.120(c) requires that the Administrator of the Office of Foreign Labor Certification publish the USDA field and livestock worker (combined) wage data as AEWRs in a **Federal Register** notice. Accordingly, the 2017 AEWRs to be paid for agricultural work performed by H–2A and U.S. workers on or after the effective date of this notice are set forth in the table below:

TABLE—2017 ADVERSE EFFECT WAGE RATES

State	2017 AEWRs
Alabama	$10.62
Arizona	10.95
Arkansas	10.38
California	12.57
Colorado	11.00
Connecticut	12.38
Delaware	12.19
Florida	11.12
Georgia	10.62
Hawaii	13.14
Idaho	11.66
Illinois	13.01
Indiana	13.01
Iowa	13.12
Kansas	13.79
Kentucky	10.92
Louisiana	10.38
Maine	12.38
Maryland	12.19
Massachusetts	12.38
Michigan	12.75
Minnesota	12.75
Mississippi	10.38
Missouri	13.12
Montana	11.66
Nebraska	13.79
Nevada	11.00
New Hampshire	12.38
New Jersey	12.19
New Mexico	10.95
New York	12.38
North Carolina	11.27
North Dakota	13.79
Ohio	13.01
Oklahoma	11.59
Oregon	13.38
Pennsylvania	12.19
Rhode Island	12.38
South Carolina	10.62
South Dakota	13.79
Tennessee	10.92
Texas	11.59
Utah	11.00
Vermont	12.38
Virginia	11.27
Washington	13.38
West Virginia	10.92
Wisconsin	12.75
Wyoming	11.66

Pursuant to the H–2A regulations at 20 CFR 655.173, the Department will publish a separate **Federal Register** notice in early 2017 to announce (1) the allowable charges for 2017 that employers seeking H–2A workers may charge their workers for providing them three meals a day; and (2) the maximum travel subsistence reimbursement which a worker with receipts may claim in 2017.

Signed in Washington, DC

Portia Wu,

Assistant Secretary, Employment and Training Administration.

BILLING CODE 4510–FP–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Workforce Innovation Fund Grants Reporting and Recordkeeping Requirements

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), Employment and Training Administration (ETA) is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, ''Workforce Innovation Fund Grants Reporting and Recordkeeping Requirements.'' This comment request is part of continuing Departmental

efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.*

DATES: Consideration will be given to all written comments received by February 21, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free by contacting Wendy Havenstrite by telephone at (202) 693–2618, TTY 1–877–889–5627, (these are not toll-free numbers or by email at *havenstrite.wendy@dol.gov.*

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Employment and Training Administration, 200 Constitution Avenue NW., Washington, DC 20210; by email: *havenstrite.wendy@dol.gov;* or by Fax 202–693–3817.

FOR FURTHER INFORMATION CONTACT: Contact Wendy Havenstrite by telephone at (202) 693–2618 (this is not a toll-free number) or by email at *havenstrite.wendy@dol.gov.*

SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The Workforce Innovation Fund (WIF) was created as a grant program by the Full-Year Continuing Appropriations Act, 2011 (in Sec. 1801, Title VIII, Div. B of Pub. L. 112–10), the Consolidated and Further Continuing Appropriations Act, 2013 (Pub. L. 113–6), and the Consolidated Funding Act, 2014 (Pub. L. 113–76). The first round of grants was awarded in June 2012, with service delivery beginning in 2013. (The first round of grants are ending by the current ICR end date). The second round of grants, awarded September 2014, were awarded to a combination of state workforce agencies and local workforce investment boards and began service delivery in 2015. The final round of grants, awarded in September 2015, went to five States and one tribal entity with service delivery beginning in 2016. According to these Acts, the WIF was established to ''carry out projects that demonstrate innovative strategies or replicate effective evidence-based strategies that align and strengthen the workforce investment system in order to improve program delivery and education and employment outcomes for program beneficiaries.'' One of the purposes of the WIF grants is to contribute to the documentation of evidence-based practice within the field of workforce development.

This document requests approval to continue to collect information to meet the reporting and recordkeeping requirements of the WIF grant program through the end of each grantee's reporting cycle. In applying for the WIF grant program, grantees agreed to submit quarterly reports—both narrative and performance reports—that describe project activities and outcomes that relate to the project and document the training or labor market information approaches used by the grantee. The quarterly performance narrative report will provide a format for a detailed account of program activities, accomplishments, and progress toward performance outcomes during the quarter. These reports will collect aggregate information on participants' grant progress and accomplishments, grant challenges, grant technical assistance needs and success stories and lessons learned through five questions—four programmatic questions and one performance question. Because WIF grants tackle a range of employment and training services and strategies, each grant will have a unique set of performance goals and outcome measures designed by the grantee for the specific innovation and project being pursued in the grant. The fifth of the five questions in the quarterly performance narrative report will ask for performance data based on the unique grant performance measures and key project milestones identified by each grantee.

The information from these reports will be used to evaluate the performance of the WIF projects; manage performance risk; and collect lessons learned in terms of processes, strategies, and performance from the projects. ETA will use the data to help inform policy about the workforce and possible changes in structures and policies that enable a closer alignment and integration of workforce development, education, human services, social insurance, and economic development programs. The data will also be used to determine what technical assistance needs the WIF grantees have so that ETA can provide such assistance to support improvement of grantee outcomes.

The information provided in the quarterly performance narrative reports, including the lessons learned through innovative projects, is necessary for increasing the body of knowledge about what works in workforce development. This information collection maintains a reporting and record-keeping system for a minimum level of information collection that is necessary to hold WIF grantees appropriately accountable for the Federal funds they receive and to allow the Department to fulfill its oversight and management responsibilities.

To reduce grantee burden, grantees will only report on performance measures they identify in their project that are specifically applicable to their grant. This approach minimizes the reporting burden on grantees and encourages grantees to identify and document a new set of achievements and performance measures that apply directly to the grant projects. The Full-Year Continuing Appropriations Act, 2011 (in Sec. 1801, Title VIII, Div. B of Pub. L. 112–10), the Consolidated and Further Continuing Appropriations Act, 2013 (Pub. L. 113–6), and the Consolidated Funding Act, 2014 (Pub. L. 113–76) authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention Workforce Innovation Fund Grants Reporting and Recordkeeping Requirements, OMB Control Number 1205–0515.

Submitted comments will also be a matter of public record for this ICR and posted on the Internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential

business data, or other sensitive statements/information in any comments.

The DOL is particularly interested in comments that:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Type of Review: Extension without changes.

Title of Collection: Workforce Innovation Fund Grants Reporting and Recordkeeping Requirements.

Form: Quarterly narrative and performance reports.

OMB Control Number: 1205–0515.

Affected Public: Workforce Innovation Fund grant recipients.

Estimated Number of Respondents: 17.

Frequency: Quarterly.

Total Estimated Annual Responses: 68.

Estimated Average Time per Response: 20 hours.

Estimated Total Annual Burden Hours: 1,360 hours.

Total Estimated Annual Other Cost Burden: $0.

Authority: 44 U.S.C. 3506(c)(2)(A).

Portia Wu,

Assistant Secretary for Employment and Training Administration, Department of Labor.

BILLING CODE 4510–FN–P

OFFICE OF MANAGEMENT AND BUDGET

Reissuance of OMB Circular No. A–108, ''Federal Agency Responsibilities for Review, Reporting, and Publication Under the Privacy Act''

AGENCY: Office of Management and Budget, Executive Office of the President.

ACTION: Notice of availability.

SUMMARY: The Office of Management and Budget (OMB) has reissued OMB Circular A–108, ''Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act.'' The reissued Circular revises and relocates the guidance that previously had been included in Circular A–130, ''Management of Federal Information Resources,'' Appendix I, ''Federal Agency Responsibilities for Maintaining Records About Individuals.'' The reissued Circular replaces the November 28, 2000 version of Appendix I to Circular A–130 and supplements and clarifies existing OMB guidance.

DATES: Effective upon publication as of December 23, 2016, OMB is making reissued Circular A–108 available to the public at *https://www.whitehouse.gov/omb/inforeg_infopoltech.*

FOR FURTHER INFORMATION CONTACT: Kevin Herms, Office of Management and Budget, Office of Information and Regulatory Affairs, at *privacy-oira@omb.eop.gov*

SUPPLEMENTARY INFORMATION:

Background

The Privacy Act of 1974, which has been in effect since September 27, 1975, sets forth a series of requirements governing Federal agency practices with respect to certain information about individuals. Although the Privacy Act places principal responsibility for compliance on agencies, the statute requires the Director of OMB to develop guidelines and provide continuing assistance to and oversight of implementation by agencies. *See* 5 U.S.C. 552a(v). The reissuance of Circular A–108 describes agency responsibilities for implementing the review, reporting, and publication requirements of the Privacy Act of 1974 and related OMB policies. It supplements and clarifies existing OMB guidance, including OMB Circular No. A–130, ''Managing Information as a Strategic Resource,'' ''Privacy Act Implementation: Guidelines and Responsibilities,'' ''Implementation of the Privacy Act of 1974: Supplementary Guidance,'' and ''Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988.'' All OMB guidance is available on the OMB Web site at *https://www.whitehouse.gov/omb/inforeg_infopoltech.*

Comments

On October 7, 2016, OMB requested public comment (81 FR 69871) and posted the proposed Circular A–108 on its Web site. Although some commenters were critical of specific aspects of the proposed policy, the commenters were generally supportive of the overall Circular and the approaches taken.

While OMB carefully considered all of the comments submitted, some of them were beyond the scope of the Circular. Several of the comments criticized agency compliance with Privacy Act legal and policy requirements, while others appeared to be inconsistent with certain statutory provisions or other OMB policy requirements, or would have the effect of modifying certain statutory provisions or prohibiting certain legally permissible agency actions. The reissuance of Circular A–108 and the supplementary guidance and clarification it provides are intended to assist agencies in their implementation of, and facilitate their compliance with, the Privacy Act's review, reporting, and publication requirements. The Circular is meant to establish general standards and it would be beyond the scope of the Circular to address specific agency practices or compliance efforts or to accept comments that may be inconsistent with other legal or policy requirements.

Several comments identified areas in which the guidance could be modified to improve the quality of notice provided to the public in agency system of records notices. Based on OMB's consideration and responses to the public comments, the revised Circular A–108:

• Revises the routine use section of the guidance to state that agency routine uses that only apply to certain records in a system of records should indicate their limited scope. In addition, a subheading in the section of the Circular describing the scope of a system of records was revised to better emphasize the need to consider routine uses when determining the scope of a system.

• Requires that the description of linkages between different systems be in the ''Policies and Practices for Retrieval of Records'' section of the notice, which is included in the Privacy Act Issuances. In addition, the language describing the requirement to describe linkages

between different systems was clarified so that agencies better understand the requirement and public notice will be improved.

• Includes a ''History'' section in the system of records notice templates for agencies to provide citations to the last full **Federal Register** notice, as well as any subsequent notices of revision. This will improve transparency and assist the public in learning about systems of records as they are established and revised over time.

Howard Shelanski,

Administrator, Office of Information and Regulatory Affairs.

Marc Groman,

Senior Advisor for Privacy, Office of the Director.

BILLING CODE P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 16–090]

Notice of Intent To Grant Exclusive Term License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of intent to grant exclusive patent license.

SUMMARY: NASA hereby gives notice of its intent to grant an exclusive patent license in the United States to practice the invention described and claimed in U.S. Patent Application entitled, ''System, Apparatus, and Method for Liquid Purification,'' LEW–18732–1, to SageGuard Solutions, LLC, having its principal place of business in Westlake, Ohio. The fields of use may be limited to anaerobic digestion of agricultural by-products and run-off, semiconductor manufacturing process water and wastewater treatment, and food and beverage manufacturing process water and wastewater treatment.

DATES: The prospective exclusive license may be granted unless, within fifteen (15) days from the date of this published notice, NASA receives written objections including evidence and argument that establish that the grant of the license would not be consistent with the requirements regarding the licensing of federally owned inventions as set forth in the Bayh-Dole Act and implementing regulations. Competing applications completed and received by NASA within fifteen (15) days of the date of this published notice will also be treated as objections to the grant of the contemplated exclusive license. Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act.

ADDRESSES: Objections relating to the prospective license may be submitted to Patent Counsel, Office of Chief Counsel, MS 142–7, NASA Glenn Research Center, 21000 Brookpark Rd, Cleveland, OH 44135. Phone (216) 433–3663. Facsimile (216) 433–6790.

FOR FURTHER INFORMATION CONTACT: Robert Earp, Patent Counsel, Office of Chief Counsel, MS 142–7, NASA Glenn Research Center, 21000 Brookpark Rd, Cleveland OH 44135. Phone (216) 433–3663. Facsimile (216) 433–6790.

SUPPLEMENTARY INFORMATION: This notice of intent to grant an exclusive patent license is issued in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i). The patent rights in these inventions have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The prospective exclusive license will comply with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Information about other NASA inventions available for licensing can be found online at http://technology.nasa.gov.

Mark P. Dvorscak,

Agency Counsel for Intellectual Property.

BILLING CODE 7510–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

[Notice (16–091)]

National Environmental Policy Act: Kennedy Space Center—Center Master Plan

AGENCY: National Aeronautics and Space Administration

ACTION: Notice of Availability (NOA)

SUMMARY: NASA has prepared and issued a Final Programmatic Environmental Impact Statement (FPEIS) for implementation of the Kennedy Space Center (KSC) Center Master Plan (CMP). The purpose of the CMP is to provide overall management guidance for KSC from 2016 to 2032. Implementation of the CMP will facilitate a two-decade transformation from a single, government-user launch complex to a multi-user spaceport. This multi-user spaceport will be developed in concert with NASA's programmatic missions and requirements to explore destinations outside of low Earth orbit. The need for the action is to update KSC's CMP in a manner that supports achievement of NASA's programmatic mission objectives, at the same time as maximizing the provision of excess capabilities and assets in support of non-NASA access to space.

DATES: NASA will issue a Record of Decision (ROD) for the FPEIS on the proposed KSC CMP either by December 19, 2016, or after 30 days from the date of publication of the NOA for the PFEIS in the **Federal Register** by the U.S. Environmental Protection Agency (EPA), whichever is later.

ADDRESSES: The FPEIS may be reviewed at the NASA Headquarters Library (Washington, DC), as well as public libraries in Florida including New Smyrna Beach, Cocoa Beach, Merritt Island, Port St. John, Cape Canaveral and Titusville. Limited hard copies of the PFEIS are available and may be requested by contacting Mr. Donald Dankert at the address, telephone number, or electronic mail address indicated below. The PFEIS is available electronically to download and read at *http://environmental.ksc.nasa.gov/projects/peis.htm.* NASA's ROD will also be placed on this Web site when it is issued. Anyone who desires a hard copy of NASA's ROD when it is issued should contact Mr. Dankert.

FOR FURTHER INFORMATION CONTACT: Mr. Donald Dankert, Environmental Management Branch, NASA Kennedy Space Center, Mail Code: TA–A4C, Kennedy Space Center, FL 32899, Email: *Donald.J.Dankert@nasa.gov,* Telephone: (321) 861–1196.

SUPPLEMENTARY INFORMATION: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as Amended (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), and NASA NEPA regulations (14 CFR part 1216 subpart 1216.3), NASA has prepared and issued a PFEIS for implementation of the CMP.

Overall, KSC is transitioning to a re-focused mission that redefines its relationship with industry and leverages the potential of partnerships. Amid the challenges of an aging and unsustainable asset base, as well as a highly constrained federal budget, NASA must adopt and implement strategies that preserve the institutional infrastructure needed to support its purpose and programs.

This FPEIS is a programmatic document. In keeping with guidance from CEQ, the FPEIS outlines and broadly describes actions associated with KSC's proposed programs in the

limited detail with which they are known at present. Three programmatic alternatives are described—No Action, Proposed Action, and Alternative 1—and their potential environmental effects are assessed in fairly general terms. At such time as a given specific project of detailed dimensions and scale is proposed at a specific location, and is in the process of being reviewed and approved, the FPEIS can serve as a master NEPA document to which future NEPA compliance documents may be ''tiered''. That is, having already been addressed at a programmatic level, the action or project can incorporate discussion from the broader FPEIS by reference and focus on the issues specific to the subsequent tiered proposal. Ideally, this will serve to expedite the environmental review process and facilitate project approval, funding, and implementation. The FPEIS provides an overview of the affected environment at and near the Kennedy Space Center and the potential environmental consequences associated with the Proposed Action and alternatives. There would be a number of direct and indirect adverse impacts but none that are considered to be significantly adverse. Beneficial impacts would also occur. Under each of the three alternatives evaluated, NASA would continue to work closely with its partners, including the U.S. Fish and Wildlife Service, National Park Service, Federal Aviation Administration, Space Florida, Cape Canaveral Air Force Station, U.S. Army Corps of Engineers, and state agencies.

Of the three alternatives considered in the FPEIS, NASA prefers Alternative 1. This alternative would allow for implementation of the CMP while at the same time protecting natural resources and the environment to a greater extent than the Proposed Action.

As a result of comments received during internal and external (public) scoping, NASA developed three alternatives that are assessed in this FPEIS. Under the first of these, the Proposed Action, KSC would transition to a multi-user spaceport. A number of new land uses are proposed, including two seaports and horizontal and vertical launch and landing facilities. There would be changes in the acreage of existing designated land use categories at KSC. Alternative 1 was crafted as a direct response to concerns expressed in comments received during the PEIS public scoping period in June 2014, as well as other observations and data acquired from stakeholders and other agencies during the scoping process. Alternative 1 is similar to the Proposed Action in many regards, but is differentiated in several key respects, primarily, differences in the siting and size of vertical and horizontal launch and landing facilities. Also, the two new seaports would not be constructed.

In the No Action Alternative, KSC management would continue its emphasis on dedicated NASA Programs and would not transition in the coming years towards a multi-user spaceport. Rather, each NASA Program would continue to be operated as an independent entity to a significant degree, to be funded separately, and to manage activities and buildings in support of its own program. There would continue to be a limited non-NASA presence at KSC. Under the three PEIS alternatives, there would be differences in the sizes of the areas of designated land uses at KSC. These varying acreages are a function of the different emphases, priorities, and projects of the three PEIS alternatives. Only in the recreation and water categories are the acreages identical in all three alternatives.

The PFEIS assesses potential environmental impacts for all three alternatives under the topics of soils and geology, water resources, hazardous materials and waste, air quality, climate change, noise, biological resources, cultural resources, land use, transportation, utilities, socioeconomics, recreation, environmental justice, and protection of children.

[NARA–2017–016]

State, Local, Tribal, and Private Sector Policy Advisory Committee Meeting

AGENCY: Information Security Oversight Office (ISOO). National Archives and Records Administration (NARA).

ACTION: Notice of Federal Advisory Committee Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, NARA announces an upcoming State, Local, Tribal, and Private Sector Policy Advisory Committee (SLTPS–PAC) meeting.

DATES: The meeting will be on January 25, 2017, from 10:00 a.m. to 12:00 p.m. EDT.

ADDRESSES: National Archives and Records Administration (NARA); 700 Pennsylvania Avenue NW., Jefferson Room; Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Robert J. Skwirot, Senior Program Analyst, ISOO, by mail at National Archives Building; 700 Pennsylvania Avenue NW., Washington, DC 20408, by telephone at 202.357.5398, or by email at *robert.skwirot@nara.gov.* Contact ISOO at *ISOO@nara.gov.*

SUPPLEMENTARY INFORMATION: The meeting's purpose is to discuss matters relating to the Classified National Security Information Program for State, Local, Tribal, and Private Sector entities. This meeting is open to the public. However, due to space limitations and access procedures, you must register in advance if you wish to attend the meeting. Submit your name and telephone number to ISOO at the contact information above no later than Wednesday, January 18, 2017. ISOO will provide additional instructions for gaining access to the Jefferson Room.

[NARA–2017–015]

Advisory Committee on the Presidential Library-Foundation Partnerships Meeting

AGENCY: National Archives and Records Administration (NARA)

ACTION: Notice of Federal Advisory Committee Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended, the National Archives and Records Administration announces an upcoming Advisory Committee on Presidential Library-Foundation Partnerships meeting.

ADDRESSES: The meeting will be Thursday, February 29, 2017, from 9:00 a.m. to 12:00 noon.

LOCATION: National Archives and Records Administration (NARA); 700 Pennsylvania Avenue NW., Room 105; Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Denise LeBeck, by telephone at 301–

837–3250, or by email at *denise.lebeck@nara.gov*.

SUPPLEMENTARY INFORMATION: The meeting's purpose is to discuss the Presidential Library program and topics related to public-private partnerships between Presidential Libraries and Presidential Foundations. The meeting is open to the public. Meeting attendees may enter from the Pennsylvania Avenue entrance, and must show photo identification to enter. No visitor parking is available at the Archives building; however, there are commercial parking lots and metered curb parking nearby.

Authority: 5 U.S.C. appendix 2.

Patrice Little Murray,

Committee Management Officer.

[FR Doc. 2016–30948 Filed 12–22–16; 8:45 am]

BILLING CODE 7515–01–P

NATIONAL CREDIT UNION ADMINISTRATION

Submission for OMB Review; Comment Request

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice.

SUMMARY: The National Credit Union Administration (NCUA) will be submitting the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before January 23, 2017 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for NCUA, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) NCUA PRA Clearance Officer, 1775 Duke Street, Alexandria, VA 22314, Suite 5067, or email at *PRAComments@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submission may be obtained by emailing *PRAComments@ncua.gov* or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0024.

Type of Review: Extension of a currently approved collection.

Title: Mergers of Federally-Insured Credit Unions; Voluntary Termination or Conversion of Insured Status, 12 CFR part 708b.

Abstract: Part 708b of NCUA's rules sets forth the procedural and disclosure requirements for mergers of federally-insured credit unions, conversions from federal share insurance to nonfederal insurance, and federal share insurance terminations. Part 708b is designed to ensure NCUA has sufficient information whether to approve a proposed merger, share insurance conversion, or share insurance termination. It further ensures that members of credit unions have sufficient and accurate information to exercise their vote properly concerning a proposed merger, insurance conversion, or insurance termination. The rule also protects the property interests of members who may lose their federal share insurance due to a merger, share insurance conversion, or share insurance termination.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 7,562.

OMB Number: 3133–0068.

Type of Review: Extension of a currently approved collection.

Title: Nondiscrimination Requirements in Real Estate-Related Lending—Appraisals, 12 CFR 701.31.

Abstract: Section 701.31 of NCUA's regulations implements requirements of the Fair Housing Act. It requires Federal credit unions (FCUs) to maintain a copy of the real estate appraisal used to support an applicant's real estate-related loan application and to make it available to that member/applicant for a period of 25 months (§ 701.31(c)(5)). The regulation also requires FCUs that use the collateral's location as a factor in evaluating real estate-related loan applications to disclose such fact on the appraisal, along with a statement justifying its use (§ 701.31 (c)(4)). NCUA and consumers use the information to ensure compliance with Fair Housing Act nondiscrimination requirements that prohibit consideration of race, color, religion, national origin, sex, handicap, or familial status in real estate appraisals.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 3,721.

By Gerard Poliquin, Secretary of the Board, the National Credit Union Administration, on December 20, 2016.

Dated: December 20, 2016.

Dawn D. Wolfgang,

NCUA PRA Clearance Officer.

[FR Doc. 2016–31042 Filed 12–22–16; 8:45 am]

BILLING CODE 7535–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register** at 81 FR 28107, requesting comments on the NSF Large Facilities Manual (LFM) and an accompanying Large Facilities Financial Data Collection Tool, and 205 comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: *http://www.reginfo.gov/public/do/PRAMain.*

DATES: Comments regarding this information collection are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

ADDRESSES: Comments on this information collection should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to *splimpto@nsf.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to *splimpto@nsf.gov.*

SUPPLEMENTARY INFORMATION:

Summary of Comments on the National Science Foundation's Large Facilities Manual

The draft Large Facilities Manual and Large Facilities Financial Data Collection Tool were made available for review by the public on the NSF Web site at *https://www.nsf.gov/bfa/lfo/lfo_documents.jsp.* In response to the **Federal Register** notice published May 9, 2016, at 81 FR 28107, NSF received 189 comments from 14 different institutions/individuals on the Large Facilities Manual and 16 comments on the Large Facilities Financial Data Collection Tool from 2 different institutions/individuals. A summary of the comments on the Large Facilities Manual follows:

- 54 requested further guidance on project management controls and NSF oversight processes and procedures;
- 47 requested clarification on the processes and requirements associated with cost and contingency through the various stage of the facility lifecycle;
- 25 requested clarifications of requirements during the operations and divestment stages of the facility lifecycle;
- 18 questioned the applicability to contracts versus cooperative agreements;
- 15 provided general observations; and
- 30 provided editing recommendations such as typos and sentence structure.

The full comments and NSF's response may be found via: *http://www.reginfo.gov/public/do/PRAMain* and *https://www.nsf.gov/bfa/lfo/lfo_documents.jsp.*

Title of Collection: ''Large Facilities Manual''.

OMB Approval Number: 3145–0239.

Type of Request: Intent to seek approval to renew with revisions an information collection for three years.

Proposed Project: The National Science Foundation Act of 1950 (Pub. L. 81–507) set forth NSF's mission and purpose:

''To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense. * * *''

The Act authorized and directed NSF to initiate and support:

- Basic scientific research and research fundamental to the engineering process;
- Programs to strengthen scientific and engineering research potential;
- Science and engineering education programs at all levels and in all the various fields of science and engineering;
- Programs that provide a source of information for policy formulation; and
- Other activities to promote these ends.

Among Federal agencies, NSF is a leader in providing the academic community with advanced instrumentation needed to conduct state-of-the-art research and to educate the next generation of scientists, engineers and technical workers. The knowledge generated by these tools sustains U.S. leadership in science and engineering (S&E) to drive the U.S. economy and secure the future. NSF's responsibility is to ensure that the research and education communities have access to these resources, and to provide the support needed to utilize them optimally, and implement timely upgrades.

The scale of advanced instrumentation ranges from small research instruments to shared resources or facilities that can be used by entire communities. The demand for such instrumentation is very high, and is growing rapidly, along with the pace of discovery. For large facilities and shared infrastructure, the need is particularly high. This trend is expected to accelerate in the future as increasing numbers of researchers and educators rely on such large facilities, instruments, and databases to provide the reach to make the next intellectual leaps.

NSF currently provides support for facility construction from two accounts: The Major Research Equipment and Facility Construction (MREFC) account, and the Research and Related Activities (R&RA) account. The MREFC account, established in FY 1995, is a separate budget line item that provides an agency-wide mechanism, permitting directorates to undertake large facility projects are roughly $70M or greater. Smaller projects continue to be supported from the R&RA Account.

Facilities are defined as shared-use infrastructure, instrumentation and equipment that are accessible to a broad community of researchers and/or educators. Facilities may be centralized or may consist of distributed installations. They may incorporate large-scale networking or computational infrastructure, multi-user instruments or networks of such instruments, or other infrastructure, instrumentation and equipment having a major impact on a broad segment of a scientific or engineering discipline. Historically, awards have been made for such diverse projects as accelerators, telescopes, research vessels and aircraft, and geographically distributed but networked sensors and instrumentation.

The growth and diversification of large facility projects require that NSF remain attentive to the ever-changing issues and challenges inherent in their planning, construction, operation, management and oversight. Most importantly, dedicated, competent NSF and awardee staff are needed to manage and oversee these projects; giving the attention and oversight that good practice dictates and that proper accountability to taxpayers and Congress demands. To this end, there is also a need for consistent, documented requirements and procedures to be understood and used by NSF program managers and awardees for all such large projects.

Use of the Information: Facilities are an essential part of the science and engineering enterprise, and supporting them is one major responsibility of the National Science Foundation (NSF). NSF makes awards to external entities—primarily universities, consortia of universities or non-profit organizations—to undertake construction, management and operation of facilities. Such awards frequently take the form of cooperative agreements. NSF does not directly construct or operate the facilities it supports. However, NSF retains responsibility for overseeing their development, management and successful performance. The Large Facilities Manual is intended to:

- Provide step-by-step guidance for NSF staff and awardees to carry out effective project planning, management and oversight of large facilities while considering the varying requirements of a diverse portfolio;
- Clearly state the policies, processes and procedures pertinent at each stage of a facility's life cycle from development through construction, operations, and termination; and
- Document and disseminate ''best practices'' identified over time so that NSF and awardees can carry out their responsibilities more effectively.

This version of the Large Facilities Manual reflects recent changes in terminology to be compatible with the Uniform Guidance 2 CRF 200 and Federal Acquisition Regulation definitions, project development, management of contingency, and fees and to improve the description of NSF oversight activities for Large Facilities. It also updates sections related to cost-estimating requirements to ensure alignment with the Government Accountability Office (GAO) guidelines. The Manual does not replace existing formal procedures required for all NSF awards, which are described in the *Proposal & Award Policies & Procedures*

Guide (PAPPG). Instead, it draws upon and supplements it for the purpose of providing detailed guidance on NSF policy and procedures related to the planning and management of Large Facilities. All facilities projects require merit and technical review, as well as approval of certain deliverables. The level of review and approval varies substantially from standard grants, as does the level of oversight needed to ensure appropriate and proper accountability for federal funds. The requirements, recommended procedures and best practices presented in the Manual apply to any facility significant enough to require close and substantial interaction with the Foundation and the National Science Board.

This Manual will be updated periodically to reflect changes in requirements, policies and/or procedures. Award Recipients are expected to monitor and adopt the requirements and best practices included in the Manual which are aimed at improving management and oversight of large facilities projects and at enabling the most efficient and cost-effective delivery of tools to the research and education communities.

The submission of proposals and subsequent project documentation to the Foundation related to the development, construction and operations of Large Facilities is part of the collection of information. This information is used to help NSF fulfill this responsibility in supporting merit-based research and education projects in all the scientific and engineering disciplines. The Foundation also has a continuing commitment to provide oversight on facilities development and construction which must be balanced against monitoring its information collection so as to identify and address any excessive reporting burdens.

NSF has approximately twenty-two (22) Large Facilities in various stages of development, construction, operations and termination. One to two (1 to 2) new awards are made approximately every five (5) years based on science community infrastructure needs and availability of funding. Of the twenty-two large facilities, there are approximately eight (8) facilities annually that are either in development or construction. These stages require the highest level of reporting and management documentation per the Large Facilities Manual.

Burden on the Public: The Foundation estimates that an average of three (3) Full Time Equivalents (FTEs) are necessary for each facility project in development or construction (Total Project Cost of $200–$500M) to respond to NSF routine reporting and project management documentation requirements on an annual basis; or 6240 hours per year. The Foundation estimates an average of one (1) FTE for a facility in operations; or 2080 hours per year. Assuming an average of eight (8) facilities in construction and the balance in operations, this equates to roughly 80,000 public burden hours annually.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Authority: Pub. L. 104–13 (44 U.S.C. 3501 *et seq.*).

Dated: December 19, 2016.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0132]

Information Collection: NRC Form 314, Certificate of Disposition of Materials

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, NRC Form 314, ''Certificate of Disposition of Materials.'' The NRC Form 314 is submitted by a materials licensee who wishes to terminate its license. The form provides information needed by the NRC to determine whether the licensee has radioactive materials on hand which must be transferred or otherwise disposed of prior to expiration or termination of the license.

DATES: Submit comments by January 23, 2017.

ADDRESSES: Submit comments directly to the OMB reviewer at: Vlad Dorjets, Desk Officer, Office of Information and Regulatory Affairs (Docket ID NRC–2016–0132), NEOB–10202, Office of Management and Budget, Washington, DC 20503; telephone: 202–395–7315, email: *oira_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID Docket ID NRC–2016–0132 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID Docket ID NRC–2016–0132.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* A copy of the collection of Information and related instructions may be obtained without charge by accessing ADAMS Accession No. ML16292A666. The supporting statement is available in ADAMS under Accession No. ML16292A668.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@NRC.GOV.*

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not

want to be publicly disclosed in your comment submission. All comment submissions are posted at *http://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''*NRC Form 314, Certification of Disposition of Material.*'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 19, 2016 (81 FR 46972).

1. *The title of the information collection: NRC Form 314 Certification of Disposition of Material.*

2. *OMB approval number:* 3150–0028.

3. *Type of submission:* Extension.

4. *The form number if applicable:* NRC Form 314.

5. *How often the collection is required or requested:* NRC Form 314 is submitted by materials licensee who wishes to terminate its license. The form provides information needed by the NRC to determine whether the licensee has radioactive materials on hand which must be transferred or otherwise disposed of prior to expiration or termination of the license.

6. *Who will be required or asked to respond:* Respondents are firms, institutions, and individual holding NRC licenses to possess and use radioactive materials who do not wish who do not wish to renew those licenses.

7. *The estimated number of annual responses:* 136 responses.

8. *The estimated number of annual respondents:* 136 respondents.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* Each form requires, on average, approximately 0.5 hours to prepare. 136 × 0.5 hour = a total annual burden for all respondents of 68 hours.

10. *Abstract:* The NRC Form 314 furnishes information to the NRC regarding transfer or other disposition of radioactive material by licensees who wish to terminate their licenses. The information is used by the NRC as part of the basis for its determination that the facility has been cleared of radioactive material before the facility is released for unrestricted use.

Dated at Rockville, Maryland, this 19th day of December 2016.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2016–30909 Filed 12–22–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2015–0198]

Design of Structures, Components, Equipment, and Systems, and Reactor Coolant System and Connected Systems Guidance

AGENCY: Nuclear Regulatory Commission.

ACTION: Standard review plan-final section revision; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a final revision to several sections in Chapter 3, ''Design of Structures, Components, Equipment, and Systems Reactor Coolant System and Connected Systems,'' and Chapter 5, ''Reactor Coolant System and Connected Systems,'' of NUREG–0800, ''Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants: LWR Edition.'' The revisions to these standard review plan (SRP) sections reflect no changes in staff position; rather they clarify the original intent of these SRP sections using plain language throughout in accordance with the NRC's Plain Writing Action Plan. Additionally, these revisions reflect operating experience, lessons learned, and the inclusion of updated guidance since the last revision, and address the applicability of regulatory treatment of non-safety systems where appropriate. The staff also deleted text in one of the Chapter 5 SRPs, as the text contained guidance that was included in other SRPs and, therefore, does not constitute removal of guidance and added several references to updated standards and guidance.

DATES: The effective date of this Standard Review Plan (SRP) update is January 23, 2017.

ADDRESSES: Please refer to Docket ID NRC–2015–0198 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2015–0198. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* For the convenience of the reader, the ADAMS accession numbers are provided in a table in the ''Availability of Documents'' section of this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Mark Notich, Office of New Reactors, telephone: 301–415–3053; email: *Mark.Notich@nrc.gov;* or Nishka Devaser, Office of New Reactors, telephone: 301–415–5196; email: *Nishka.Devaser@nrc.gov;* both staff at U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Background

A summary of the comments and the NRC staff's disposition of the comments are available in a separate document, ''Response to Public Comments on Draft Standard Review Plan Sections from Chapters 3 and 5: Design of Structures, Components, Equipment, and Systems, and Reactor Coolant System and

Connected Systems'' (ADAMS Accession No. ML16088A345).

The Office of New Reactors and the Office of Nuclear Reactor Regulation are revising these sections from their current revisions. Details of specific changes in the proposed revisions are included at the end of each of the proposed sections.

The changes to these SRP sections reflect current NRC staff review methods and practices based on lessons learned from the NRC's reviews of design certification and combined license applications completed since the last revision of this chapter.

II. Backfitting and Finality Provisions

Issuance of these revised SRP sections does not constitute backfitting as defined in § 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Backfitting,'' (the Backfit Rule) or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. The NRC's position is based upon the following considerations.

1. The SRP positions do not constitute backfitting, inasmuch as the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.

The SRP provides guidance to the staff on how to review an application for the NRC's regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which either nuclear power plant applicants or licensees are protected under either the Backfit Rule or the issue finality provisions of 10 CFR part 52.

2. The NRC staff has no intention to impose the SRP positions on current licensees and regulatory approvals either now or in the future.

The staff does not intend to impose or apply the positions described in the SRP to existing (already issued) licenses and regulatory approvals. Therefore, the issuance of a final SRP—even if considered guidance that is within the purview of the issue finality provisions in 10 CFR part 52—need not be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the staff seeks to impose a position in the SRP on holders of already issued licenses in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must make the showing as set forth in the Backfit Rule or address the criteria for avoiding issue finality as described in the applicable issue finality provision.

3. Backfitting and issue finality do not—with limited exceptions not applicable here—protect current or future applicants.

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or any issue finality provisions under 10 CFR part 52. This is because neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52—with certain exclusions discussed in the next paragraph—were intended to apply to every NRC action which substantially changes the expectations of current and future applicants.

The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (*e.g.,* an early site permit) and/or NRC regulatory approval (*e.g.,* a design certification rule) with specified issue finality provisions. The staff does not, at this time, intend to impose the positions represented in the SRP in a manner that is inconsistent with any issue finality provisions. If, in the future, the staff seeks to impose a position in the SRP in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

III. Congressional Review Act

This action is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Availability of Documents

The ADAMS accession numbers revised sections are available in ADAMS under the accession numbers in the table below.

Document	ADAMS accession No.*
Section 3.6.2, ''Determination of Rupture Locations and Dynamic Effects Associated with the Postulated Rupture of Piping,'' Revision 3	ML16088A041
Section 3.9.1, ''Special Topics for Mechanical Components,'' Revision 4	ML16088A068
Section 3.10, ''Seismic and Dynamic Qualification of Mechanical and Electrical Equipment,'' Revision 4	ML16088A101
Section 5.2.1.1, ''Compliance with the Codes and Standards Rule, 10 CFR 50.55a,'' Revision 4	ML16088A127
Section 5.2.1.2, ''Applicable Code Cases,'' Revision 4	ML16088A219
Branch Technical Position 3–4, ''Postulated Rupture Locations in Fluid System Piping Inside and Outside Containment,'' Revision 3	ML16085A315

* See documents in the package at ADAMS Accession Number ML16083A387 to see changes made since last revision.

Dated at Rockville, Maryland, this 19th day of December, 2016.

For the Nuclear Regulatory Commission.

Joseph Colaccino,

Chief, New Reactor Rulemaking and Guidance Branch, Division of Engineering, Infrastructure, and Advanced Reactors, Office of New Reactors.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0268]

Spent Fuel Heat Generation in an Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG–3050, ''Spent Fuel Heat Generation in an Independent Spent Fuel Storage Installation.'' This proposed revision (Revision 2) to RG 3.54 provides methods acceptable to the Nuclear Regulatory Commission (NRC) staff for calculating spent nuclear fuel heat generation rates for use for an independent spent fuel storage installation (ISFSI).

DATES: Submit comments by February 21, 2017. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given,

comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any of the following methods:

• *Federal rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0268. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on accessing information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0268 when contacting the NRC about the availability of information regarding this document. You may obtain publically-available information related to this document, by any of the following methods:

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0268.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if available in ADAMS) is provided the first time that a document is referenced. The DG is electronically available in ADAMS under Accession No. ML16139A215.

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0268 in your comment submission. The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http://www.regulations.gov* as well as entering the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's ''Regulatory Guide'' series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, ''Spent Fuel Heat Generation in an Independent Spent Fuel Storage Installation,'' is temporarily identified by its task number, DG–3050. Draft Guide–3050 is proposed Revision 2 to Regulatory Guide (RG) 3.54, dated January 1999.

This revision (Revision 2) presents an up-to-date methodology for determining heat generation rates for both PWR and BWR fuel and provides greater flexibility (less restrictions) than the previous revision. It allows loading of higher burnup fuel by using more accurate methods for decay heat calculations by covering a wider range of fuel characteristics, including operating history.

III. Backfitting and Issue Finality

This draft regulatory guide, if finalized, would provide guidance to general and specific NRC part 72 licensees with respect to determining heat generation rates for spent fuel. Issuance of this draft regulatory guide, if finalized, would not constitute backfitting as defined in in section 72.62(a) of title 10 of the *Code of Federal Regulations* (10 CFR), which is applicable to ISFSIs. Issuance of the draft regulatory guide, if finalized, would also not constitute backfitting under 10 CFR 50.109, or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. The staff's position is based upon the following considerations.

1. The draft regulatory guide positions, if finalized, describe a methodology acceptable to the NRC staff, and expressly states that current licensees may continue to use guidance the NRC found acceptable for complying with the identified regulations as long as the licensee does not initiate, as a voluntary matter, a change to its current licensing basis. Therefore, the guidance, if finalized, would not constitute backfitting as defined in 10 CFR 72.62(a).

2. The NRC has no intention of imposing the positions in the draft regulatory guide on existing ISFSI or nuclear power plant licenses either now or in the future (absent a voluntary request for change from the licensee).

3. The matters addressed in the regulatory guide apply equally to both specific licensees under part 72 as well as general licensees under who hold ISFSI licensees by virtue of their status as holders of part 50 operating licenses or as holders of part 52 combined licenses.

4. Backfitting and issue finality do not—with limited exceptions not applicable here—protect current or future applicants. Applicants and potential applicants are not, with certain exceptions, protected by the backfitting provisions in 10 CFR 72.62. This is because the backfitting provisions in Part 72 were not intended to apply to every NRC action which substantially changes the expectations of current and future applicants.

Dated at Rockville, Maryland, this 19th day of December, 2016.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0224]

Restart of a Nuclear Power Plant Shut Down by a Seismic Event

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; extension of comment period.

SUMMARY: On November 3, 2016, the U.S. Nuclear Regulatory Commission (NRC) issued for public comment draft regulatory guide (DG) DG–1337, ''Restart of a Nuclear Power Plant Shut Down by a Seismic Event,'' in the **Federal Register** for a 60-day public comment period which ends on January 3, 2017. The NRC is extending the public comment period to February 28, 2017, recognizing the potential for unavailability of people during the holiday period. The guide describes methods acceptable to the NRC staff that can be used to demonstrate that a nuclear power plant is safe for restarting after a shutdown caused by a seismic event.

DATES: Submit comments by February 28, 2017. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specified subject):

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID: NRC–2016–0224. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on accessing information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Thomas Weaver, telephone: 301–415–2383, email: *Thomas.Weaver@nrc.gov;* and Edward O'Donnell, telephone: 301–415–3317, email: *Edward.ODonnell@nrc.gov.* Both are staff of the Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID: NRC–2016–0224 when contacting the NRC about the availability of information regarding this action. You may obtain publically-available information related to this action, by any of the following methods:

• *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID: NRC–2016–0224.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The DG is electronically available in ADAMS under Accession No. ML16182A321.

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0224 in your comment submission. The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http://www.regulations.gov* as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's ''Regulatory Guide'' series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses. The DG, entitled ''Restart of a Nuclear Power Plant Shut Down by a Seismic Event,'' is a proposed revised guide temporarily identified by its task number, DG–1337. The proposed revision of RG 1.167 describes methods acceptable to the NRC staff that can be used to demonstrate that a nuclear power plant is safe for restarting after a shutdown caused by a seismic event. It incorporates lessons learned following the shutdown of nuclear power plants due to earthquake ground shaking and post-earthquake evaluations since Revision 0 was issued in 1997. They include experience gained through the shutdown and restart process of the North Anna nuclear power plant following the Mineral, Virginia earthquake in 2011. It endorses, with some exceptions, sections of ANS/ANSI–2.23–2016, ''Nuclear Power Plant Response to an Earthquake,'' that relate to post-shutdown inspections and tests, inspection criteria, documentation, and long-term evaluations. The guidance includes an action level matrix to direct actions based on the earthquake level and observed damage levels at a nuclear power plant.

II. Backfitting and Issue Finality

Draft Guide–1337 describes methods acceptable to the NRC staff that can be used to demonstrate that a nuclear power plant is safe for restarting after a shutdown caused by a seismic event. Issuance of this DG, if finalized, would not constitute backfitting as defined in § 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR) (the

Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR Part 52. As discussed in the ''Implementation'' section of this DG, the NRC has no current intention to impose this guide, if finalized, on holders of current operating licenses or combined licenses.

This DG may be applied to applications for operating licenses, combined licenses, early site permits, and certified design rules docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in the Backfit Rule or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Dated at Rockville, Maryland, this 19th day of December, 2016.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79590; File No. SR–C2–2016–024]

Self-Regulatory Organizations; C2 Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Debit/Credit Price Reasonability Check for Complex Orders

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2016, C2 Options Exchange, Incorporated (''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the debit/credit price reasonability check for complex orders. The text of the proposed rule change is provided below.

(additions are *italicized;* deletions are [bracketed])

* * * * *

C2 Options Exchange, Incorporated

Rules

* * * * *

Rule 6.13. Complex Order Execution

(a)–(c) No change.

. . . Interpretations and Policies:

.01–.03 No change.

.04 Price Check Parameters: On a class-by-class basis, the Exchange may determine (and announce via Regulatory Circular) which of the following price check parameters will apply to eligible complex orders. Paragraphs (b), (e) and (g) will not be applicable to stock-option orders.

For purposes of this Interpretation and Policy .04:

Vertical Spread. A ''vertical'' spread is a two-legged complex order with one leg to buy a number of calls (puts) and one leg to sell the same number of calls (puts) with the same expiration date but different exercise prices.

Butterfly Spread. A ''butterfly'' spread is a three-legged complex order with two legs to buy (sell) the same number of calls (puts) and one leg to sell (buy) twice as many calls (puts), all with the same expiration date but different exercise prices, and the exercise price of the middle leg is between the exercise prices of the other legs. If the exercise price of the middle leg is halfway between the exercise prices of the other legs, it is a ''true'' butterfly; otherwise, it is a ''skewed'' butterfly.

Box Spread. A ''box'' spread is a four-legged complex order with one leg to buy calls and one leg to sell puts with one strike price, and one leg to sell calls and one leg to buy puts with another strike price, all of which have the same expiration date and are for the same number of contracts.

To the extent a price check parameter is applicable, the Exchange will not automatically execute an eligible complex order that is:

(a)–(b) No change.

(c) Debit/Credit Price Reasonability Checks:

(1) No change.

(2) The System defines a complex order as a debit or credit as follows:

(A)–(B) No change.

(C) an order for which all pairs and loners are debits (credits) is a debit (credit). For purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and [both]*the* legs have the same expiration date but different exercise prices or, for all options except European-style index options, [the same exercise price but]different expiration dates *and the exercise price for the call (put) with the farther expiration date is the same as or lower (higher) than the exercise price for the nearer expiration date.* A ''loner'' is any leg in an order that the System cannot pair with another leg in the order (including legs in orders for European-style index options that have the same exercise price but different expiration dates). The System treats the stock leg of a stock-option order as a loner.

(i) No change.

(ii) The System then, for all options except European-style index options, pairs legs to the extent possible [with the same exercise prices]across expiration dates, pairing one [leg]*call (put)* with the [leg]*call (put)* that has the next nearest expiration date *and the same or next lower (higher) exercise price.*

(iii) A pair of calls is a credit (debit) if the exercise price of the buy (sell) leg is higher than the exercise price of the sell (buy) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the [pair has the same]exercise price *of the sell (buy) leg is the same as or lower than the exercise price of the buy (sell) leg*).

(iv) A pair of puts is a credit (debit) if the exercise price of the sell (buy) leg is higher than the exercise price of the buy (sell) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the [pair has the same]exercise price *of the sell (buy) leg is the same as or higher than the exercise price of the buy (sell) leg*).

(v) No change.

The System does not apply the check in subparagraph (1) to an order for which the System cannot define whether it is a debit or credit.

(3)–(5) No change.

(d)–(h) No change.

.05–.07 No change.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change amends the debit/credit price reasonability check for complex orders in Rule 6.13, Interpretation and Policy .04(c) to expand its applicability. Pursuant to the debit/credit price reasonability check, the System rejects back to the Trading Permit Holder any limit order for a debit strategy with a net credit price or any limit order for a credit strategy with a net debit price, and cancels any market order (or any remaining size after partial execution of the order) for a credit strategy that would be executed at a net debit price. The System defines a complex order as a debit (credit) if all pairs and loners are debits (credits).[3] For purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and both legs have the same expiration date but different exercise prices or, for all options except European-style index options, the same exercise price but different expiration dates. A ''loner'' is any leg in an order that the System cannot pair with another leg in the order (including legs in orders for European-style index options that have the same exercise price but different expiration dates).[4]

(1) The System first pairs legs to the extent possible within each expiration date, pairing one leg with the leg that has the next highest exercise price.

(2) The System then, for options except European-style index options, pairs legs to the extent possible with the same exercise prices across expiration dates, pairing one leg with the leg that has the next nearest expiration date.

(3) A pair of calls is a credit (debit) if the exercise price of the buy (sell) leg is higher than the exercise price of the sell (buy) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the pair has the same exercise price).

(4) A pair of puts is a credit (debit) if the exercise price of the sell (buy) leg is higher than the exercise price of the buy (sell) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the pair has the same exercise price).

(5) A loner to buy is a debit, and a loner to sell is a credit.

The System does not apply the check in subparagraph (1) to an order for which the System cannot define whether it is a debit or credit.

As discussed in the rule filing proposing the current check, the System determines whether an order is a debit or credit based on general options volatility and pricing principles, which the Exchange understands are used by market participants in their option pricing models.[5] With respect to options with the same underlying:

- If two calls have the same expiration date, the price of the call with the lower exercise price is more than the price of the call with the higher exercise price;
- if two puts have the same expiration date, the price of the put with the higher exercise price is more than the price of the put with the lower exercise price; and
- if two calls (puts) have the same exercise price, the price of the call (put) with the nearer expiration is less than the price of the call (put) with the farther expiration.

In other words, a call (put) with a lower (higher) exercise price is more expensive than a call (put) with a higher (lower) exercise price, because the ability to buy stock at a lower price is more valuable than the ability to buy stock at a higher price, and the ability to sell stock at a higher price is more valuable than the ability to sell stock at a lower price. A call (put) with a farther expiration is more expensive than the price of a call (put) with a nearer expiration, because locking in a price further into the future involves more risk for the buyer and seller and thus is more valuable, making an option (call or put) with a farther expiration more expensive than an option with a nearer expiration.

Under the current check, the System only pairs calls (puts) if they have the same expiration date but different exercise prices or the same exercise price but different expiration dates. With respect to pairs with different expiration dates but the same exercise price,[6] a pair of calls is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg)[sic], and a pair of puts is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg)[sic]. However, based on the principles described above, if the sell (buy) leg of a pair of calls has a farther expiration date (and thus is more expensive) than the expiration date of the buy (sell) leg as well as a lower exercise price (and thus is more expensive) than the exercise price of the sell (buy) leg, then the pair is a credit (debit) (as is the case if the exercise prices of each call were the same under the current rule). Similarly, if the sell (buy) leg of a pair of puts has a farther expiration date (and thus is more expensive) than the expiration date of the buy (sell) leg as well as a higher exercise price (and thus is more expensive) than the exercise price of the buy (sell) leg, then the pair of puts is a credit (as is the case if the exercise prices of each put were the same under the current rule).

Therefore, the proposed rule change expands this check to pair calls (puts) with different expiration dates if the exercise price for the call (put) with the farther expiration date is lower (higher) than the exercise price for the nearer expiration date in addition to those with different expiration dates and the same exercise price. Specifically, the proposed rule change amends subparagraph (c)(2)(C) to state, for purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and the legs have different expiration dates and the exercise price for the call (put) with

[3] Rule 6.13, Interpretation and Policy .04(c)(2)(C). The System also determines certain call and put butterfly spreads as debits and credits. *See* Rule 6.13, Interpretation and Policy .04(c)(2)(A) and (B).

[4] The System treats the stock leg of a stock-option order as a loner.

[5] Securities Exchange Act Release No. 34–76959 (January 21, 2016), 81 FR 4708 (January 27, 2016) (SR–C2–2015–033) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of Proposed Rule Change, as Modified by Amendment Nos. 1 and 2 Thereto, Relating to Price Protection Mechanisms for Quotes and Orders).

[6] A complex order consisting of a buy leg and a sell leg with different expiration dates are commonly referred to in the industry as ''calendar spreads.''

the farther expiration date is the same as or lower (higher) than the exercise price for the nearer expiration date. The proposed rule change also amends subparagraphs (c)(2)(C)(ii) through (iv) to incorporate these additional pairs of calls (puts). When pairing legs across expiration dates, the System will pair one call (put) with the call (put) that has the next nearest expiration date and the same or next lower (higher) exercise price. Based on the pricing principles described above, a pair of calls is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the exercise price of the sell (buy) leg is the same as or lower than the exercise price of the buy (sell) leg). A pair of puts is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the exercise price of the sell (buy) leg is the same as or higher than the exercise price of the buy (sell) leg).[7] Entering a calendar spread with a credit (debit) strategy at a debit (credit) price (or that would execute at a debit (credit) price), which price is inconsistent with the strategy, may result in executions at prices that are extreme and potentially erroneous.

Below are examples demonstrating how the System determines whether a complex order with two legs, which have different expiration dates and exercise prices, is a debit or credit, and whether the System will reject the order pursuant to the debit/credit price reasonability check.[8]

Example #1—Limit Call Spread

A Trading Permit Holder enters a spread to buy 10 Sept 30 XYZ calls and sell 10 Oct 20 XYZ calls at a net debit price of −$10.00. The System defines this order as a credit, because the buy leg is for the call with the nearer expiration date and higher exercise price (and is thus the less expensive leg). The System rejects the order back to the Trading Permit Holder because it is a limit order for a credit strategy that contains a net debit price.

Example #2—Limit Put Spread

A Trading Permit Holder enters a spread to buy 20 Oct 30 XYZ puts and sell 20 Sept 20 XYZ puts at a net credit price of $9.00. The System defines this order as a debit, because the buy leg is for the put with the farther expiration date and the higher exercise price (and thus the more expensive leg). The System rejects the order back to the Trading Permit Holder because it is a limit order for a debit strategy that contains a net credit price.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[9] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[10] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[11] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposed rule change expands the applicability of the current debit/credit price reasonability check to additional complex orders for which the Exchange can determine whether the order is a debit or credit. By expanding the orders to which these checks apply, the Exchange can further assist with the maintenance of a fair and orderly market by mitigating the potential risks associated with additional complex orders trading at prices that are inconsistent with their strategies (which may result in executions at prices that are extreme and potentially erroneous), which ultimately protects investors. This proposed expansion of the debit/credit price reasonability check promotes just and equitable principles of trade, as it is based on the same general option and volatility pricing principles the System currently uses to pair calls and puts, which principles the Exchange understands are used by market participants in their option pricing models.

B. Self-Regulatory Organization's Statement on Burden on Competition

C2 does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change will not impose any burden on intramarket competition, because the debit/credit price reasonability check will continue to apply to all incoming complex orders of all Trading Permit Holders in the same manner. The proposed rule change expands the applicability of the current check to additional complex orders for which the Exchange can determine whether the order is a debit or credit, which will help further prevent potentially erroneous executions and benefits all market participants. The proposed rule change does not impose any burden on intercompany competition, as it is intended to prevent potentially erroneously priced orders from entering C2's system and executing on C2's market. The Exchange believes the proposed rule change would ultimately provide all market participants with additional protection from anomalous or erroneous executions.

The individual firm benefits of enhanced risk protections flow downstream to counterparties both at the Exchange and at other options exchanges, which increases systemic protections as well. The Exchange believes enhancing risk protections will allow Trading Permit Holders to enter orders and quotes with further reduced fear of inadvertent exposure to excessive risk, which will benefit investors through increased liquidity for the execution of their orders. Without adequate risk management tools, such as the one proposed to be enhanced in this filing, Trading Permit Holders could reduce the amount of order flow and liquidity they provide. Such actions may undermine the quality of the markets available to customers and other market participants. Accordingly, the proposed rule change is designed to encourage Trading Permit Holders to submit additional order flow and liquidity to the Exchange, which may ultimately promote competition. In addition, providing Trading Permit Holders with more tools for managing risk will facilitate transactions in securities because, as noted above, Trading Permit Holders will have more confidence protections are in place that reduce the risks from potential system errors and market events.

[7] The proposed rule change makes no changes to this check with respect to pairs of orders with the same expiration date but different exercise prices. Therefore, the rule filing omits references to the portions of the current rule related to those pairs to focus on the changes made to pairs with different expiration dates.

[8] The same principles would apply to complex orders with more than two legs, which include two legs that can be paired in this way.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–C2-*2016–024 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–C2–2016–024. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–C2–2016–024 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Eduardo A. Aleman,

Assistant Secretary.

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

SECURITIES AND EXCHANGE COMMISSION

(Release No. 34–79599; File No. SR–NYSEMKT–2016–120]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending Rule 971.1NY and To Make Permanent the Aspects of Customer Best Execution Auction That Are Subject to a Pilot

December 19, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on December 16, 2016, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 971.1NY and to make permanent the aspects of Customer Best Execution Auction (''CUBE'') that are subject to a pilot, as amended. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 971.1NY to make permanent the aspects of Customer Best Execution Auction (''CUBE'') that are subject to a pilot. Currently, the provisions of Rule 971.1NY that govern execution of CUBE Orders of fewer than 50 contracts are operating on a pilot basis.[4] The Exchange proposes to make these provisions permanent and introduce an additional scenario when the Exchange would reject a CUBE Order for fewer than 50 contracts.

Background

Rule 971.1NY sets forth an electronic crossing mechanism for single-leg

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Commentary .01 to Rule 971.1NY and Rules 971.1NY(b)(1)(B) and (b)(8).

orders with a price improvement auction on the Exchange, referred to as the CUBE (or the ''CUBE Auction'').[5] The CUBE Auction, which was approved in April 2014, is designed to provide price improvement for paired orders of any size.[6] Two aspects of the CUBE were approved on a pilot basis—Rule 971.1NY(b)(1)(B), which establishes the permissible range of executions for CUBE Auctions for fewer than 50 contracts; and Rule 971.1NY(b)(8), which establishes that the minimum size for a CUBE Auction is one contract (together, the ''CUBE Pilot'').

To commence an Auction, an ATP Holder (''Initiating Participant'') may electronically submit for execution a limit order it represents as agent on behalf of a public customer, broker dealer, or any other entity (''CUBE Order''). The Initiating Participant would agree to guarantee the execution of the CUBE Order by submitting a contra-side order representing principal interest or interest it has solicited to trade with the CUBE Order at a specified price (the ''single stop price'') or by utilizing auto-match or auto-match limit.[7]

Rule 971.1NY(b)(1) sets forth the permissible range of executions for a CUBE Order.[8] Pursuant to the CUBE Pilot, a CUBE Order for fewer than 50 contracts is subject to tighter ranges of execution than larger CUBE Orders to maximize price improvement.[9] Specifically, if the CUBE Order is for fewer than 50 contracts, the range of permissible execution will be equal to or better than the National Best Bid/Offer (''NBBO''), provided that such price must be at least one cent better than any displayed interest in the Exchange's Consolidated Book.[10]

The CUBE Pilot was initially approved for a one-year pilot, and has since been extended for three subsequent years.[11] Pursuant to Commentary .01 to Rule 971.1NY, the CUBE Pilot would, if not amended or made permanent, end on January 18, 2017.[12]

Proposal To Make CUBE Pilot Permanent

The Exchange implemented the CUBE Auction to provide an electronic crossing mechanism for single-leg orders with a price improvement auction to create tighter markets and ensure that each order receives the best possible price. The Exchange believes that the CUBE Pilot attracts order flow and promotes competition and price improvement opportunities for CUBE Orders of fewer than 50 contracts. The Exchange therefore proposes to make permanent the CUBE Pilot before it expires on January 18, 2017.

In connection with the proposal to make the CUBE Pilot permanent, the Exchange proposes to modify Rule 971.1NY to introduce an additional scenario when a CUBE Order for fewer than 50 contracts would either be rejected or require price improvement. Currently, Rule 971.1NY(b)(6) provides that CUBE Orders for fewer than 50 contracts that are submitted when the BBO is $0.01 wide will be rejected. The Exchange proposes to amend this rule to provide that CUBE Orders for fewer than 50 contracts entered when the NBBO is $0.01 wide would be rejected unless they are guaranteed a penny of price improvement. To reflect this change, the Exchange proposes to amend Rule 971.NY(b)(6) to provide that CUBE Orders for fewer than 50 contracts would be rejected when (A) the BBO is $0.01 wide (*i.e.,* the current requirement); or (B) the NBBO is $0.01 wide, unless the Initiating Participant guarantees the execution of the CUBE Order to buy (sell) at a price that is equal to the NBO minus one cent (NBB plus one cent), utilizing a single stop price, auto-match, or auto-match limit as specified in paragraphs (c)(1)(A)–(C) of Rule 971.1NY. Accordingly, as proposed, the Exchange would reject a CUBE Order for fewer than 50 contracts when the NBBO is $0.01 wide unless the Initiating Participant guarantees a penny of price improvement.[13]

The Exchange believes this proposal would further the goal of the CUBE Auction, as the CUBE Order would be ''guaranteed an execution price of at least NBBO at the time the CUBE Auction commences and, moreover, would be given an opportunity for price improvement beyond the NBBO by being exposed to ATP Holders during the CUBE Auction.'' [14] The proposal would guarantee price improvement in penny-wide markets by requiring the Initiating Participant to guarantee to improve the contra-side NBBO when the spread is $0.01 wide at the time the CUBE Order for fewer than 50 contracts is submitted—such that the Initiating Participant would agree to buy at the bid or sell at the offer.

In connection with the proposal to make permanent the CUBE Pilot (*i.e.,* Rules 971.1NY(b)(1)(B) and 971.1NY(b)(8)), the Exchange proposes to delete Commentary .01 to Rule 971.1NY, which describes the CUBE Pilot and the Exchange's associated obligation to produce data, to hold this paragraph as ''Reserved.'' [15]

The Exchange has analyzed the data gathered during the CUBE Pilot (the ''CUBE Data'') and believes the CUBE Data indicates that there is meaningful competition in CUBE Auctions for all size orders, regardless of the size of the order or the bid/ask differential of the NBBO.[16] Specifically, between January and June 2015, a total of 4,493,429 contracts were executed in CUBE Auctions. Market Makers and other participants submitted competitive bids and offers during the CUBE Auction's Response Time Interval, indicating interest in participating in CUBE

[5] *See generally* Rule 971.1NY (Electronic Cross Transactions).

[6] *See* Securities Exchange Act Release No. 72025 (April 25, 2014), 79 FR 24779 (May 1, 2014) (NYSEMKT–2014–17) (the ''CUBE Approval Order'').

[7] *See* Rule 971.1NY(c)(1)(A)–(C). In addition, CUBE provides for the automatic execution, under certain conditions, of a crossing transaction where there is a public customer order in the same options series on each side.

[8] Subject to specified exceptions, a CUBE Order to buy (sell) may execute at prices equal to or between the initiating price as the upper (lower) bound and the National Best Bid (''NBB'') (National Best Offer (''NBO'')) as the lower (upper) bound. *See* Rule 971.1NY(b).

[9] *See* Rule 971.1NY(b)(1)(B). *See also* Rule 971.1NY(b)(8) (also part of the CUBE Pilot, providing that the minimum size for a CUBE Auction is one contract).

[10] *See* Rule 971.1NY(b)(1)(B).

[11] *See* CUBE Approval Order, *supra,* note 6. The CUBE Pilot was subsequently extended, most recently until January 18, 2017, to align the expiration of the pilot period with that of other competing options exchange that offer electronic price improvement auctions similar to the CUBE. *See* Securities Exchange Act Release Nos. 74695 (April 9, 2015), 80 FR 20274 (April 15, 2015) (SR–NYSEMKT–2015–28); 75460 (July 15, 2015), 80 FR 43141 (July 21, 2015) (SR–NYSEMKT–2015–48); 78324 (July 14, 2016), 81 FR 47196 (July 20, 2016) (SR–NYSEMKT–2016–69).

[12] In connection with the CUBE Pilot, the Exchange has provided specified data to the Commission to provide supporting evidence that, among other things, there is meaningful competition for all size orders and that there is an active and liquid market functioning on the Exchange outside of the CUBE Auction. *See* CUBE Approval Order, *supra* note 6, 79 FR at 24785–86, fn. 94–95; Commentary .01 to Rule 971.1NY. *See also* Securities Exchange Act Release No. 78324 (July 14, 2016), 81 FR 47196 (July 20, 2016) (SR–NYSEMKT–2016–69).

[13] The proposal would not alter the separate price improvement requirement set forth in Rule 971.1NY(b)(1)(B), which establishes the range of permissible execution prices for CUBE Orders of fewer than 50 contracts will be equal to or better than the NBBO and at least one cent better than any displayed interest in the Exchange's Consolidated Book. *See also* Rule 971.1NY(b)(2)–(9) (delineating reasons CUBE Orders would be rejected, none of which would be altered by this proposal).

[14] *See* CUBE Approval Order, *supra* note 6 at 79 FR 24779, at 24787.

[15] *See* proposed Commentary .01 to Rule 971.1NY. The Exchange notes that it would retain the text of Rules 971.1NY(b)(1)(B) and 971.1NY(b)(8).

[16] *See* Exhibit 3 (summary of the CUBE Data from January—June 2015).

Auction trades. In addition, the Exchange believes the allocation of orders executed in CUBE Auctions—either at a single price or multiple prices—supports competitive bidding and offering.

The Exchange also believes that the CUBE Data reveals that there is an active and liquid market functioning on the Exchange outside of the CUBE Auction,[17] Competitive bidding and offering occurs outside of CUBE Auction and participants can submit bids/offers at improved prices or join a bid or offer (thus improving liquidity at that price) regardless of the bid/ask differential of the NBBO.

Although the Exchange continues to believe that the CUBE Auction provides opportunities for price improvement of CUBE Orders (*i.e.,* the agency order) with a size of less than 50 contracts when the NBBO has a bid/ask differential of $0.01 (*e.g.*because the market conditions may change during the CUBE Auction), the data have not demonstrated significant price improvement in this narrow circumstance. Between January and June 2015, a total of 171,822 contracts were executed in CUBE Auctions for fewer than 50 contracts when the NBBO had a bid/ask differential of $0.01. Only 1,660 of those contracts received price improvement of $0.01. Thus, consistent with the Exchange's view that price improvement auctions should provide improvement, particularly for small orders, the Exchange is proposing to require that Initiating Participants guarantee price improvement for CUBE Orders for 50 or fewer contracts in such market conditions.

Further, the Exchange notes that CUBE Auctions for fewer than 50 contracts have served as a valuable tool in providing price improvement when the NBBO has a bid/ask differential of greater than $0.01. For example, for CUBE Auctions of this size, the CUBE Data indicates that when the NBBO has a bid/ask differential between $0.02 and $0.05, contracts executed in CUBE Auctions received on average a price improvement of $0.0114. In wider markets (*i.e.,* bid/ask differentials greater than $0.05), contracts executed in CUBE Auctions received, on average, price improvement of more than $0.0759.

In the CUBE Approval Order, the Commission stated that ''the Exchange's proposal [for the CUBE Pilot] should provide small customer orders with the opportunity for price improvement in a manner that is consistent with the Act.'' [18]

Based on a review of the CUBE Data, the Exchange believes that the CUBE Auction, as modified herein, would allow the Exchange to continue to provide meaningful competition for all size orders—including small orders—as well as to continue to offer an active and liquid market outside of the CUBE Auction. Thus, the Exchange believes it would be beneficial to customers and to the options market to make the CUBE Pilot permanent, as amended. Once permanent, the CUBE Auction would continue to accept orders of fewer than 50 contracts, provided such Orders comply with the modified CUBE rules, which should continue to attract small orders and promote competition and price improvement opportunities for such CUBE Orders.

Implementation

Because of the technology changes associated with the proposed amendment to Rule 971.1NY(b)(6), the Exchange proposes to announce the implementation of the proposed change to the CUBE rules as well as the change to make the CUBE Pilot permanent, via Trader Update. Pending approval of this proposal by the Commission, the changes would be implemented prior to the expiration of the CUBE Pilot (*i.e.,* before January 18, 2017).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [19] in general, and furthers the objectives of Section 6(b)(5) of the Act [20] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes the proposal to make permanent the CUBE Pilot would remove impediments to and perfect the mechanism of a free and open market and a national market system because the CUBE Pilot, together with the proposal to amend CUBE herein, are reasonably designed to create tighter markets and ensure that each order receives the best possible price, which benefits investors by increasing competition thereby maximizing opportunities for price improvement. In particular, the proposal to require that Initiating Participants guarantee improvement of $0.01 (by buying at the bid or selling at the offer) on CUBE Orders for fewer than 50 contracts that are submitted when the NBBO is $0.01 wide in order to participate in the CUBE promotes just and equitable principles of trade as it would ensure that small orders receive at least minimal price improvement, which may encourage the submission and execution of more orders of fewer than 50 contracts in CUBE, thus providing an increased probability of price improvement for smaller orders.

The proposal to make permanent the CUBE Pilot would also allow the applicable rules (Rules 971.1NY(b)(1)(B) and 971.1NY(b)(8) to remain in effect, which would add certainty to Exchange rules and avoid any potential investor confusion that could result from a suspension or temporary interruption in the CUBE Pilot. Because the CUBE Pilot is applicable to all CUBE Orders for fewer than 50 contracts, and the requirement that the minimum size of the CUBE Auction is one contract, the proposal to make the Pilot permanent merely acts to maintain status quo on the Exchange, which promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system.

The Exchange believes the proposed rule changes promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system because price improvement auctions are widely recognized by market participants as invaluable, both as a tool to access liquidity and a mechanism to help meet their best execution obligations. The Exchange believes the proposed rule changes would further the ability of market participants to carry out these strategies.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition. For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that making the

[17] From January 2015 through June 2015, the Exchange executed a total of 152,193,516 contracts outside of CUBE Auctions, which the Exchange believes is indicative of an active and liquid market functioning on the Exchange outside of the CUBE Auctions.

[18] *See* CUBE Approval Order, *supra* note 6, 79 FR at 24787.

[19] 15 U.S.C. 78f(b).

[20] 15 U.S.C. 78f(b)(5).

CUBE Pilot permanent would continue to foster competition among liquidity providers and maintain execution quality on the Exchange. The CUBE Auction for small orders, as modified herein, would continue to operate to create tighter markets and ensure that each order receives the best possible price, which benefits investors by increasing competition thereby maximizing opportunities for price improvement.

The Exchange notes that it operates in a highly competitive market in which market participants can easily direct their orders to competing venues. In such an environment, the Exchange must continually review, and consider adjusting the services it offers and the requirements it imposes to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–120 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–120. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–120 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79603; File No. SR–BatsBYX–2016–41]

Self-Regulatory Organizations; Bats BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 11.9, Orders and Modifiers, and Rule 11.13, Order Execution and Routing, To Enhance the Exchange's Midpoint Routing Functionality

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 16, 2016, Bats BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange filed a proposal to amend Rule 11.9, Orders and Modifiers, and Rule 11.13, Order Execution and Routing, to enhance the Exchange's midpoint routing functionality.

The text of the proposed rule change is available at the Exchange's Web site at *www.bats.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 11.9, Orders and Modifiers, and Rule 11.13, Order Execution and Routing, to enhance the Exchange's midpoint routing functionality. Specifically, the Exchange proposes to amend Rule 11.13(b)(3)(Q) to adopt a new midpoint routing strategy known as RMPL. The Exchange also proposes to amend Rule 11.9(c)(9) to expand the routing strategies that Mid-Point Peg Orders may be coupled with to include the Destination Specific routing strategy described under Rule 11.13(b)(3)(E) and the proposed RMPL routing strategy described below.

RMPL Routing Strategy

The Exchange proposes to amend Rule 11.13(b)(3)(Q) to adopt a new midpoint routing strategy known as RMPL. Currently, the Exchange offers the RMPT routing strategy, which is described under Rule 11.13(b)(3)(Q). RMPT is a routing strategy under which a Mid-Point Peg Order [5] checks the System [6] for available shares and any remaining shares are then sent to destinations on the System routing table [7] that support midpoint eligible orders. If any shares remain unexecuted after routing, they are posted on the BYX Book [8] as a Mid-Point Peg Order, unless otherwise instructed by the User.[9]

The Exchange now proposes RMPL as an alternative to the RMPT routing strategy for those seeking to route Mid-Point Peg Orders to destinations that support midpoint eligible executions that are not included under the current RMPT routing strategy. Like RMPT, RMPL would be a routing strategy under which a Mid-Point Peg Order checks the System for available shares and any remaining shares are then sent to destinations on the System routing table that support midpoint eligible orders. If any shares remain unexecuted after routing, they are posted on the BYX Book as a Mid-Point Peg Order, unless otherwise instructed by the User. As it does for RMPT, the Exchange would determine via the System routing table the specific trading venues that support midpoint eligible orders to which the System would route RMPL orders. While RMPL will operate in an identical manner as RMPT, the trading venues that each routing strategy would route to and the order in which it routes them will differ. As is the case for RMPT, the Exchange may alter the trading venues included under RMPL and the order in which they are routed to from time to time in accordance with its System routing table.[10]

The Exchange proposes to revise Rule 11.13(b)(3)(Q) to describe both the RMPT and proposed RMPL routing strategies. As a result of these revision, the construct of paragraph (b)(3)(Q) of Rule 11.13 would be similar to paragraph (b)(3)(G) of Rule 11.13, which also delineates routing strategies that include different sets of destinations as determined by the System routing table.

Mid-Point Peg Order Routing

The Exchange also proposes to amend Rule 11.9(c)(9) to expand the routing strategies that Mid-Point Peg Orders may be coupled with. Currently, Exchange Rule 11.9(c)(9) states that Mid-Point Peg Orders are not eligible for routing pursuant to Rule 11.13 unless routed utilizing the RMPT routing strategy.[11] The Exchange now proposes to amend Rule 11.9(c)(9) to expand the routing strategies that Mid-Point Peg Orders may be coupled with to include the Destination Specific routing strategy described under Rule 11.13(b)(3)(E) and the proposed RMPL routing strategy described above.

Destination Specific is a routing option under which an order checks the System for available shares and then is sent to an away trading center or centers specified by the User.[12] As proposed, a User entering a Mid-Point Peg Order may select the Destination Specific routing strategy to route such order to a specific trading center or center that supports midpoint executions after being exposed to the BYX Book. This differs from RMPT and the proposed RMPL routing strategies in that the destinations orders subject to the RMPT and RMPL routing strategies are selected by the Exchange via the System routing table and not the User itself.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [13] in general, and furthers the objectives of Section 6(b)(5) of the Act [14] in particular, in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1) [15] of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The proposed rule change promotes just and equitable principles of trade because it would enhance the Exchange's midpoint routing functionality and provide Users with greater flexibility in routing Mid-Point Peg Orders to trading venues that support midpoint executions. This would save such Users from developing complicated order routing strategies on their own. The Exchange believes that the proposed rule change will also accomplish those ends by providing market participants with an additional voluntary routing strategies and options that will enable

[5] In sum, a Mid-Point Peg Order is a limit order that after entry into the System, the price of the order is automatically adjusted by the System in response to changes in the NBBO to be pegged to the mid-point of the NBBO, or, alternatively, pegged to the less aggressive of the midpoint of the NBBO or one minimum price variation inside the same side of the NBBO as the order. *See* Exchange Rule 11.9(c)(9).

[6] The term ''System'' is defined as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(aa).

[7] The term ''System routing table'' refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. *See* Exchange Rule 11.13(b)(3). While the process for determining the specific trading venues to which orders are routed is proprietary, the Exchange publicly discloses the trading venues associated with each routing strategy via its Web site at *http://cdn.batstrading.com/resources/features/bats_exchange_routing-strategies.pdf*.

[8] The term ''BYX Book'' is defined as the ''System's electronic file of orders.'' *See* Exchange Rule 1.5(e).

[9] The term ''User'' is defined as ''any Member or Sponsored Participant who is authorized to obtain access to the System pursuant to Rule 11.3.'' *See* Exchange Rule 1.5(cc).

[10] The Exchange notes that the trading venues to which other of its routing strategies route orders to are also determined in accordance with the System routing table. *See e.g.,* Exchange Rule 11.13(b)(3)(G) (listing a series of routing options whose destinations are determined by the System routing table, like the proposed revisions to Exchange Rule 11.13(b)(3)(Q)). *See also* subparagraphs (A), (B), (C), (D) and (I) of Exchange Rule 11.9(b)(3) [sic] (describing routing strategies that route orders to destinations on the System routing table).

[11] The Exchange also proposes to amend the second to last sentence of Rule 11.9(c)(9) to correct an erroneous reference to Rule 11.13(a)(3)(Q) by replacing it with ''Rule 11.13(b)(3)''.

[12] *See* Rule 11.13(b)(3)(E).

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(5).

[15] 15 U.S.C. 78k–1(a)(1).

them to easily access midpoint liquidity available on the Exchange and other trading venues. The Exchange notes that routing through the Exchange is voluntary and those seeking to access midpoint liquidity on other trading venues may do so directly and without the involvement of the Exchange. Therefore, the Exchange believes the proposal removes impediments to and perfects the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The Exchange provides routing services in a highly competitive market in which participants may avail themselves of a wide variety of routing options offered by self-regulatory organizations, alternative trading systems, other broker-dealers, market participants' own proprietary routing systems, and service bureaus. System enhancements, such as the changes proposed in this rule filing, do not burden competition, but rather encourage competition because they are designed to attract additional order flow to the Exchange through enhanced midpoint routing functionality. Such changes are intended to offer investors higher quality and better value than services offered by others. Encouraging competitors to provide higher quality and better value is the essence of a well-functioning competitive marketplace. Therefore, the Exchange does not believe the proposed rule change will result in any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (A) Significantly affect the protection of investors or the public interest; (B) impose any significant burden on competition; and (C) by its terms, become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate it has become effective pursuant to Section 19(b)(3)(A) of the Act[16] and paragraph (f)(6) of Rule 19b–4 thereunder,[17] the Exchange has designated this rule filing as non-controversial. The Exchange has given the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsBYX–2016–41 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsBYX–2016–41. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBYX–2016–41, and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79595; File No. SR–BatsEDGX–2016–73]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Market Data Section of Its Fee Schedule To Adopt Fees for EDGX Summary Depth and Amend Fees for EDGX Depth

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on December 6, 2016, Bats EDGX Exchange, Inc. (''EDGX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the Market Data section of its fee schedule to: (i) Adopt fees for a new market data product called EDGX Summary Depth; and (ii) amend the fees for EDGX Depth.

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Market Data section of its fee schedule to: (i) Adopt fees for a new market data product called EDGX Summary Depth; and (ii) amend the fees for EDGX Depth.

EDGX Summary Depth

EDGX Summary Depth is a data feed that will provide aggregated two-sided quotations for all displayed orders entered into the System [5] for up to five (5) price levels for securities traded on the Exchange and for which the Exchange reports quotes under the Consolidated Tape Association (''CTA'') Plan or the Nasdaq/UTP Plan.[6] EDGX Summary Depth will also contain the individual last sale information, Market Status, Trading Status, and Trade Break messages. The individual last sale information will include the price, size, and time of execution. The last sale message will also include the cumulative number of shares executed on the Exchange for that trading day. The Exchange intends to begin to offer EDGX Summary Depth on January 3, 2017.[7]

The Exchange now proposes to amend its fee schedule to incorporate fees for distribution of EDGX Summary Depth to subscribers.[8] The proposed fees include the following, each of which are described in detail below: (i) Distribution Fees for both Internal and External Distributors; [9] (ii) Usage Fees for both Professional [10] and Non-Professional [11] Users; (iii) an Enterprise Fee; and (iv) a Digital Media Enterprise Fee.

Distribution Fees. As proposed, each Internal Distributor that receives EDGX Summary Depth shall pay a fee of $5,000 per month. The Exchange does not propose to charge any User fees for EDGX Summary Depth where the data is received and subsequently internally distributed to Professional or Non-Professional Users. In addition, the Exchange proposes to charge also External Distributors that receive EDGX Summary Depth a fee of $2,500 per month.

User Fees. The Exchange proposes to charge External Distributors that redistribute EDGX Summary Depth different fees for their Professional Users and Non-Professional Users. The Exchange will assess a monthly fee for Professional Users of $5.00 per User. Non-Professional Users will be assessed a monthly fee of $0.15 per User. The Exchange does not propose to charge per User fees to Internal Distributors.

External Distributors that receive EDGX Summary Depth will be required to count every Professional User and Non-Professional User to which they provide EDGX Summary Depth, the requirements for which are identical to that currently in place for other market data products offered by the Exchange.[12] Thus, the External Distributor's count will include every person and device that accesses the data regardless of the purpose for which the individual or device uses the data. External Distributors must report all Professional and Non-Professional Users in accordance with the following:

- In connection with an External Distributor's distribution of EDGX Summary Depth, the Distributor should count as one User each unique User that the Distributor has entitled to have access to EDGX Summary Depth. However, where a device is dedicated specifically to a single individual, the Distributor should count only the individual and need not count the device.
- The External Distributor should identify and report each unique User. If a User uses the same unique method to gain access to EDGX Summary Depth, the Distributor should count that as one User. However, if a unique User uses multiple methods to gain access to EDGX Summary Depth (*e.g.,* a single User has multiple passwords and user identifications), the External Distributor should report all of those methods as an individual User.

[5] ''System'' is defined as the ''the electronic communications and trading facility designated by the Board through which securities orders of Users Are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(cc).

[6] *See* Exchange Rule 13.8(f).

[7] *See Reminder: Bats Global Markets to Introduce Bats Summary Depth Feeds on January 3, 2017, http://cdn.batstrading.com/resources/release_notes/2017/Reminder-Bats-Global-Markets-to-Introduce-Bats-Summary-Depth-Feeds-on-Jan-3-2017.pdf.*

[8] The Exchange notes that its affiliated exchanges, Bats EDGA Exchange, Inc. (''EDGA''), Bats BZX Exchange, Inc. (''BZX'') and Bats BYX Exchange, Inc. (''BYX'', together with the Exchange, EDGA and BZX, the ''Bats Exchanges''), also intent to file proposed rule changes with Commission to adopt similar fees for their respective Summary Depth market data product.

[9] A ''Distributor'' is defined as ''any entity that receives the Exchange Market Data product directly from the Exchange or indirectly through another entity and then distributes it internally or externally to a third party.'' *See* the Exchange's fee schedule *available at http://www.bats.com/us/equities/membership/fee_schedule/edgx/.* An ''Internal Distributor'' is defined as ''a Distributor that receives the Exchange Market Data product and then distributes that data to one or more Users within the Distributor's own entity.'' *Id.* An ''External Distributor'' is defined as ''a Distributor that receives the Exchange Market Data product and then distributes that data to a third party or one or more Users outside the Distributor's own entity.'' *Id.*''

[10] A ''Professional User'' is defined as ''any User other than a Non-Professional User.'' *See* the Exchange's fee schedule *available at http://www.bats.com/us/equities/membership/fee_schedule/edgx/.*

[11] A ''Non-Professional User'' is defined as ''a natural person who is not: (i) Registered or qualified in any capacity with the Commission, the Commodity Futures Trading Commission, any state securities agency, any securities exchange or association, or any commodities or futures contract market or association; (ii) engaged as an ''investment adviser'' as that term is defined in Section 202(a)(11) of the Investment Advisers Act of 1940 (whether or not registered or qualified under that Act); or (iii) employed by a bank or other organization exempt from registration under federal or state securities laws to perform functions that would require registration or qualification if such functions were performed for an organization not so exempt.'' *Id.*

[12] *See* Securities Exchange Act Release Nos. 74282 (February 18, 2015); 80 FR 9487 (February 23, 2015) (SR–EDGX–2015–09) (proposing fees for the Bats One Feed); 75397 (July 8, 2015), 80 FR 41104 (July 14, 2015) (SR–EDGX–2015–28) (proposing user fees for the EDGX Top and Last Sale data feeds); *and* 75788 (August 28, 2015), 80 FR 53364 (September 3, 2015) (SR–EDGX–2015–38) (proposing fees for EDGX Book Viewer).

• External Distributors should report each unique individual person who receives access through multiple devices as one User so long as each device is dedicated specifically to that individual.

• If an External Distributor entitles one or more individuals to use the same device, the External Distributor should include only the individuals, and not the device, in the count.

Each External Distributor will receive a credit against its monthly Distribution Fee for EDGX Summary Depth equal to the amount of its monthly Usage Fees up to a maximum of the Distribution Fee for EDGX Summary Depth. For example, an External Distributor will be subject to a $2,500 monthly Distribution Fee where they receive EDGX Summary Depth. If that External Distributor reports User quantities totaling $2,500 or more of monthly usage of EDGX Summary Depth, it will pay no net Distribution Fee, whereas if that same External Distributor were to report User quantities totaling $1,500 of monthly usage, it will pay a net of $1,000 for the Distribution Fee. External Distributors will remain subject to the per User fees discussed above.

Enterprise Fee. The Exchange also proposes to establish a $30,000 per month Enterprise Fee that will permit a recipient firm who receives EDGX Summary Depth from an External Distributor to receive the data for an unlimited number of Professional and Non-Professional Users. For example, if a recipient firm had 15,000 Professional Users who each receive EDGX Summary Depth at $5.00 per month, then that recipient firm will pay $75,000 per month in Professional Users fees. Under the proposed Enterprise Fee, the recipient firm will pay a flat fee of $30,000 for an unlimited number of Professional and Non-Professional Users for EDGX Summary Depth. A recipient firm must pay a separate Enterprise Fee for each External Distributor that controls the display of EDGX Summary Depth if it wishes such User to be covered by an Enterprise Fee rather than by per User fees. A recipient firm that pays the Enterprise Fee will not have to report its number of such Users on a monthly basis. However, every six months, a recipient firm must provide the Exchange with a count of the total number of natural person users of each product, including both Professional and Non-Professional Users. Lastly, the proposed Enterprise Fee would be counted towards the Distribution Fee credit described above, under which an External Distributor receives a credit towards its Distribution Fee equal to the amount of its monthly EDGX Summary Depth User fees.

Digital Media Enterprise Fee. The Exchange proposes to adopt a Digital Media Enterprise Fee of $7,500 per month for EDGX Summary Depth. As an alternative to proposed User fees discussed above, a recipient firm may purchase a monthly Digital Media Enterprise license to receive EDGX Summary Depth from an External Distributor to distribute to an unlimited number of Professional and Non-Professional Users for viewing via television, Web sites, and mobile devices for informational and non-trading purposes only without having to account for the extent of access to the data or the report the number of Users to the Exchange. Lastly, the proposed Digital Media Enterprise Fee would be counted towards the Distribution Fee credit described above, under which an External Distributor receives a credit towards its Distribution Fee equal to the amount of its monthly EDGX Summary Depth User fees.

EDGX Depth

EDGX Depth is an uncompressed market data feed that provides depth-of-book quotations and execution information based on equity orders entered into the System.[13] Currently, the Exchange charges fees for both internal and external distribution of EDGX Depth. The cost of EDGX Depth for an Internal Distributor is currently $1,500 per month. The Exchange also separately charges an External Distributor of EDGX Depth a flat fee of $2,500 per month. The Exchange does not currently charge Internal and External Distributors separate display User fees. The Exchange also charges a fee for Non-Display Usage [14] by Trading Platforms [15] by which subscribers to EDGX Depth are charged a fee of $5,000 per month. This fee is assessed in addition to existing Distribution fees. The Exchange now proposes to amend its fee schedule to incorporate Usage Fees for both Professional and Non-Professional Users and an Enterprise Fee for EDGX Depth. Each of these changes are described in detail below.

User Fees. The Exchange proposes to charge Internal and External Distributors that redistribute EDGX Depth different fees for their Professional Users and Non-Professional Users.[16] The Exchange will assess a monthly fee for Professional Users of $40.00 per User. Non-Professional Users will be assessed a monthly fee of $5.00 per User. Distributors that receive EDGX Depth will be required to count every Professional User and Non-Professional User to which they provide EDGX Depth, the requirements for which are identical to that set forth above for EDGX Summary Depth and as currently in place for other market data products offered by the Exchange.[17]

Enterprise Fee. The Exchange also proposes to establish a $100,000 per month Enterprise Fee that will permit an Internal Distributor, External Distributor, or a recipient firm who receives EDGX Depth from an External Distributor to receive the data for an unlimited number of Professional and Non-Professional Users. For example, if a recipient firm had 15,000 Professional Users who each receive EDGX Depth at $40.00 per month, then that recipient firm will pay $600,000 per month in Professional Users fees. Under the proposed Enterprise Fee, the recipient firm will pay a flat fee of $100,000 for an unlimited number of Professional and Non-Professional Users for EDGX Depth. Like proposed above for EDGX Summary Depth, a recipient firm must pay a separate Enterprise Fee for each External Distributor that controls the display of EDGX Depth if it wishes such User to be covered by an Enterprise Fee rather than by per User fees. A recipient firm that pays the Enterprise Fee will not have to report its number of such Users on a monthly basis. However, every six months, a recipient firm must provide the Exchange with a count of the total number of natural person users of each product, including both Professional and Non-Professional Users.

Implementation Date

The Exchange intends to implement the proposed fee change on January 3, 2017.

[13] *See* Exchange Rule 13.8(a).

[14] The term ''Non-Display Usage'' is defined as ''any method of accessing a Market Data product that involves access or use by a machine or automated device without access or use of a display by a natural person or persons.'' *See* the Exchange's fee schedule *available at http://www.bats.com/us/equities/membership/fee_schedule/edgx/.*

[15] The term ''Trading Platform'' is defined as ''any execution platform operated as or by a registered National Securities Exchange (as defined in Section 3(a)(1) of the Exchange Act), an Alternative Trading System (as defined in Rule 300(a) of Regulation ATS), or an Electronic Communications Network (as defined in Rule 600(b)(23) of Regulation NMS).'' *See* the Exchange's fee schedule *available at http://www.bats.com/us/equities/membership/fee_schedule/edgx/.*

[16] The Exchange notes that, unlike as proposed for EDGX Summary Depth described above, both Internal and External Distributors of EDGX Depth would be charged the same User fee for their Professional and Non-Professional Users.

[17] *See supra* note 12 and accompanying text.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[18] in general, and furthers the objectives of Section 6(b)(4),[19] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its members and other recipients of Exchange data. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all recipients of Exchange data. The Exchange believes the proposed fees are competitive with those charged by other venues and, therefore, reasonable and equitably allocated to recipients. The Exchange also believes it is reasonable to charge different rates for EDGX Depth and EDGX Summary Depth as both products different levels of content (*e.g.,* EDGX Depth contains quotations for all individual orders while EDGX Summary Depth contains the aggregation quotation information for all orders up to five (5) price levels). Lastly, the Exchange also believes that the proposed fees are reasonable and non-discriminatory because they will apply uniformly to all recipients of Exchange data.

The Exchange also believes that the proposed rule change is consistent with Section 11(A) of the Act [20] in that it supports (i) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets and (ii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities. Furthermore, the proposed rule change is consistent with Rule 603 of Regulation NMS,[21] which provides that any national securities exchange that distributes information with respect to quotations for or transactions in an NMS stock do so on terms that are not unreasonably discriminatory. In adopting Regulation NMS, the Commission granted self-regulatory organizations and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data.

In addition, the proposed fees would not permit unfair discrimination because all of the Exchange's customers and market data vendors will be subject to the proposed fees on an equivalent basis. EDGX Summary Depth and EDGX Depth are distributed and purchased on a voluntary basis, in that neither the Exchange nor market data distributors are required by any rule or regulation to make this data available. Accordingly, Distributors and Users can discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Firms have a wide variety of alternative market data products from which to choose, such as similar proprietary data products offered by other exchanges and consolidated data. Moreover, the Exchange is not required to make any proprietary data products available or to offer any specific pricing alternatives to any customers.

In addition, the fees that are the subject of this rule filing are constrained by competition. As explained below in the Exchange's Statement on Burden on Competition, the existence of alternatives to EDGX Summary Depth and EDGX Depth further ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can elect such alternatives. That is, the Exchange competes with other exchanges (and their affiliates) that provide similar market data products. If another exchange (or its affiliate) were to charge less to distribute its similar product than the Exchange charges to consolidate and distribute EDGX Summary Depth and EDGX Depth, prospective Users likely would not subscribe to, or would cease subscribing to, EDGX Summary Depth and EDGX Depth.

The Exchange notes that the Commission is not required to undertake a cost-of-service or rate-making approach. The Exchange believes that, even if it were possible as a matter of economic theory, cost-based pricing for non-core market data would be so complicated that it could not be done practically.[22]

EDGX Summary Depth

Distribution Fee. The Exchange believes that the proposed Distribution Fees are also reasonable, equitably allocated, and not unreasonably discriminatory. The fees for Members and non-Members are uniform except with respect to reasonable distinctions with respect to internal and external distribution. The Exchange believes that the Distribution Fees for EDGX Summary Depth are reasonable and fair in light of alternatives offered by other market centers. For example, EDGX Summary Depth provides investors with alternative market data and competes with similar market data product currently offered by the New York Stock Exchange, Inc. (''NYSE'') and the Nasdaq Stock Market LLC (''Nasdaq'').[23] Specifically, the NYSE charges an access fee of $5,000 per month for NYSE OpenBook-Aggregated,[24] which is more than the External Distribution fee proposed herein for EDGX Summary Depth.

User Fees. The Exchange believes that implementing the Professional and Non-Professional User fees for EDGX Summary Depth are equitable and reasonable because they will result in greater availability to Professional and Non-Professional Users. Moreover, introducing a modest Non-Professional User fee for EDGX Summary Depth is reasonable because it provides an additional method for retail investors to

[18] 15 U.S.C. 78f.

[19] 15 U.S.C. 78f(b)(4).

[20] 15 U.S.C. 78k–1.

[21] 17 CFR 242.603.

[22] The Exchange believes that cost-based pricing would be impractical because it would create enormous administrative burdens for all parties, including the Commission, to cost-regulate a large number of participants and standardize and analyze extraordinary amounts of information, accounts, and reports. In addition, it is impossible to regulate market data prices in isolation from prices charged by markets for other services that are joint products. Cost-based rate regulation would also lead to litigation and may distort incentives, including those to minimize costs and to innovate, leading to further waste. Under cost-based pricing, the Commission would be burdened with determining a fair rate of return, and the industry could experience frequent rate increases based on escalating expense levels. Even in industries historically subject to utility regulation, cost-based ratemaking has been discredited. As such, the Exchange believes that cost-based ratemaking would be inappropriate for proprietary market data and inconsistent with Congress's direction that the Commission use its authority to foster the development of the national market system, and that market forces will continue to provide appropriate pricing discipline. *See* Appendix C to NYSE's comments to the Commission's 2000 Concept Release on the Regulation of Market Information Fees and Revenues, which can be found on the Commission's Web site at *http://www.sec.gov/rules/concept/s72899/buck1.htm. See also* Securities Exchange Act Release No. 73816 (December 11, 2014), 79 FR 75200 (December 17, 2014) (SR–NYSE–2014–64) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Establish an Access Fee for the NYSE Best Quote and Trades Data Feed, Operative December 1, 2014).

[23] *See* Nasdaq Rule 7023(a)(1)(C) (describing Nasdaq TotalView is a depth-of-book data feed that includes all orders and quotes from all Nasdaq members displayed in the Nasdaq Market Center as well as the aggregate size of such orders and quotes at each price level in the execution functionality of the Nasdaq Market Center). *See also* Nasdaq Book Viewer, a description of which is *available at https://data.nasdaq.com/Book* Viewer.aspx. *See* NYSE OpenBook *available at http://www.nyxdata.com/openbook* (providing real-time view of the NYSE limit order book).

[24] *See* NYSE Market Data Pricing dated November 2016 *available at http://www.nyxdata.com/.* Nasdaq charges distribution fees ranging from $375 for 1–39 subscribers to $75,000 for more than 250 subscribers. *See* Nasdaq Rule 7023(b)(4).

access EDGX Summary Depth data by providing the same data that is available to Professional Users. The Exchange believes that the proposed fees are equitable and not unfairly discriminatory because they will be charged uniformly to recipient firms and Users. The fee structure of differentiated Professional and Non-Professional fees is utilized by the Exchange for the Bats One Feed and has long been used by other exchanges for their proprietary data products, and by the Nasdaq UTP and the CTA and CQ Plans in order to reduce the price of data to retail investors and make it more broadly available.[25] Offering EDGX Summary Depth to Non-Professional Users with the same data available to Professional Users results in greater equity among data recipients.

In addition, the proposed fees are reasonable when compared to similar fees for comparable products offered by the NYSE and Nasdaq. Specifically, NYSE offers NYSE OpenBook for a monthly fee of $60.00 per professional subscriber and $15 per non-professional subscriber.[26] Nasdaq offers Nasdaq TotalView-Aggregated for a monthly fee of $70.00 per professional subscriber and $14 per non-professional subscriber.[27] The Exchange's proposed per User Fees for EDGX Summary Depth are less than the NYSE and Nasdaq fees.

Enterprise Fee. The proposed Enterprise Fee for EDGX Summary Depth is equitable and reasonable as the fees proposed are less than the enterprise fees currently charged for Nasdaq TotalView-Aggregated. Nasdaq charges an enterprise fee of $100,000 per month for Nasdaq TotalView-Aggregated,[28] which is far greater than the proposed Enterprise Fee of $30,000 per month for EDGX Summary Depth. In addition, the Enterprise Fee proposed by the Exchange could result in a fee reduction for recipient firms with a large number of Professional and Non-Professional Users. If a recipient firm has a smaller number of Professional Users of EDGX Summary Depth, then it may continue using the per User structure and benefit from the per User Fee reductions. By reducing prices for recipient firms with a large number of Professional and Non-Professional Users, the Exchange believes that more firms may choose to receive and to distribute EDGX Summary Depth, thereby expanding the distribution of this market data for the benefit of investors.

The Exchange further believes that the proposed Enterprise Fee is reasonable because it will simplify reporting for certain recipients that have large numbers of Professional and Non-Professional Users. Firms that pay the proposed Enterprise Fee will not have to report the number of Users on a monthly basis as they currently do, but rather will only have to count natural person users every six months, which is a significant reduction in administrative burden. Finally, the Exchange believes that it is equitable and not unfairly discriminatory to establish an Enterprise Fee because it reduces the Exchange's costs and the Distributor's administrative burdens in tracking and auditing large numbers of Users.

Digital Media Enterprise Fee. The Exchange believes that the proposed Digital Media Enterprise Fee for EDGX Summary Depth provides for an equitable allocation of reasonable fees among recipients of the data and is not designed to permit unfair discrimination among customers, brokers, or dealers. In establishing the Digital Media Enterprise Fee, the Exchange recognizes that there is demand for a more seamless and easier-to-administer data distribution model that takes into account the expanded variety of media and communication devices that investors utilize today. The Exchange believes the Digital Media Enterprise Fee will be easy to administer because data recipients that purchase it would not be required to differentiate between Professional and Non-Professional Users, account for the extent of access to the data, or report the number of Users. This is a significant reduction on a recipient firm's administrative burdens and is a significant value to investors. For example, a television broadcaster could display EDGX Summary Depth data during market-related programming and on its Web site or allow viewers to view the data via their mobile devices, creating a more seamless distribution model that will allow investors more choice in how they receive and view market data, all without having to account for and/or measure who accesses the data and how often they do so.

The proposed Digital Media Enterprise Fee is equitable and reasonable because it will also enable recipient firms to more widely distribute data from EDGX Summary Depth to investors for informational purposes at a lower cost than is available today. For example, a recipient firm may purchase an Enterprise license in the amount of $30,000 per month for to receive EDGX Summary Depth from an External Distributor for an unlimited number of Professional and Non-Professional Users, which is greater than the proposed Digital Media Enterprise Fee. The Exchange also believes the amount of the Digital Media Enterprise Fee is reasonable as compared to the existing enterprise fees discussed above because the distribution of EDGX Summary Depth data is limited to television, Web sites, and mobile devices for informational purposes only, while distribution of EDGX Summary Depth data pursuant to an Enterprise license contains no such limitation. The Exchange also believes that the proposed Digital Media Enterprise Fee is equitable and reasonable because it is less than similar fees charged by other exchanges.[29]

EDGX Depth

User Fees. The Exchange believes that implementing the Professional and Non-Professional User fees for EDGX Depth are equitable and reasonable because they will result in greater availability to Professional and Non-Professional Users. Moreover, introducing a modest Non-Professional User fee for EDGX Depth is reasonable because it provides an additional method for retail investors to access EDGX Depth data by providing the same data that is available to Professional Users. The Exchange believes that the proposed fees are equitable and not unfairly discriminatory because they will be charged uniformly to recipient firms and Users. The fee structure of differentiated Professional and Non-Professional fees is utilized by the

[27] *See* Nasdaq Rule 7023(b)(2).

[28] *See* Nasdaq Rule 7023(c)(2) (stating that a distributor that is also a broker-dealer pays a monthly fee of $100,000 for the right to provide Nasdaq TotalView and for display usage for internal distribution, or for external distribution to both professional and non-professional subscribers with whom the firm has a brokerage relationship.) Nasdaq also charges an enterprise fee of $25,000 to provide Nasdaq TotalView to an unlimited number of non-professional subscribers only. *See* Nasdaq Rule 7023(c)(1).

[29] Nasdaq offers proprietary data products for distribution over the internet and television under alternative fee schedules that are subject to maximum fee of $50,000 per month. *See* Nasdaq Rule 7039(b). The NYSE charges a Digit Media Enterprise fee of $40,000 per month for the NYSE Trade Digital Media product. *See* Securities Exchange Act Release No. 69272 (April 2, 2013), 78 FR 20983 (April 8, 2013) (SR–NYSE–2013–23).

Exchange and has long been used by other exchanges for their proprietary data products, and by the Nasdaq UTP and the CTA and CQ Plans in order to reduce the price of data to retail investors and make it more broadly available.[30] Offering EDGX Depth to Non-Professional Users with the same data available to Professional Users results in greater equity among data recipients. The Exchange also believes it is equitable, reasonable, and not unfairly discriminatory to charge User fees to Internal Distributors, as such fees are currently charged by NYSE and Nasdaq.[31]

In addition, the proposed fees are reasonable when compared to similar fees for comparable products offered by the NYSE and Nasdaq. Specifically, NYSE offers NYSE OpenBook Ultra for a monthly fee of $60.00 per professional subscriber and $15 per non-professional subscriber.[32] Nasdaq offers Nasdaq TotalView-ITCH for a monthly fee of $70.00 per professional subscriber and $14 per non-professional subscriber.[33] The Exchange's proposed per User Fees for EDGX Depth are less than the NYSE and Nasdaq fees.

Enterprise Fee. The proposed Enterprise Fee for EDGX Depth is equitable and reasonable as compared to the enterprise fees currently charged for Nasdaq TotalView-ITCH. Nasdaq charges an enterprise fee of $100,000 per month for Nasdaq TotalView-ITCH,[34] which is equal to the proposed Enterprise Fee of $100,000 per month for EDGX Depth. In addition, the Enterprise Fee proposed by the Exchange could result in a fee reduction for recipient firms with a large number of Professional and Non-Professional Users. If a recipient firm has a smaller number of Professional Users of EDGX Depth, then it may continue using the per User structure and benefit from the per User Fee reductions. By reducing prices for recipient firms with a large number of Professional and Non-Professional Users, the Exchange believes that more firms may choose to receive and to distribute EDGX Depth, thereby expanding the distribution of this market data for the benefit of investors.

The Exchange further believes that the proposed Enterprise Fee is reasonable because it will simplify reporting for certain recipients that have large numbers of Professional and Non-Professional Users. Firms that pay the proposed Enterprise Fee will not have to report the number of Users on a monthly basis as they currently do, but rather will only have to count natural person users every six months, which is a significant reduction in administrative burden. Finally, the Exchange believes that it is equitable and not unfairly discriminatory to establish an Enterprise Fee because it reduces the Exchange's costs and the Distributor's administrative burdens in tracking and auditing large numbers of Users.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The Exchange's ability to price EDGX Depth and EDGX Summary Depth is constrained by: (i) Competition among exchanges, other trading platforms, and Trade Reporting Facilities (''TRF'') that compete with each other in a variety of dimensions; (ii) the existence of inexpensive real-time consolidated data and market-specific data and free delayed data; and (iii) the inherent contestability of the market for proprietary data.

The Exchange and its market data products are subject to significant competitive forces and the proposed fees represent responses to that competition. To start, the Exchange competes intensely for order flow. It competes with the other national securities exchanges that currently trade equities, with electronic communication networks, with quotes posted in FINRA's Alternative Display Facility, with alternative trading systems, and with securities firms that primarily trade as principal with their customer order flow.

In addition, EDGX Summary Depth and EDGX Depth compete with a number of alternative products. For instance, EDGX Summary Depth and EDGX Depth do provide a complete picture of all trading activity in a security. Rather, the other national securities exchanges, the several TRFs of FINRA, and Electronic Communication Networks (''ECN'') that produce proprietary data all produce trades and trade reports. Each is currently permitted to produce last sale information products, and many currently do, including Nasdaq and NYSE. In addition, market participants can gain access to EDGX last sale and depth-of-book quotations, though integrated with the prices of other markets, on feeds made available through the SIPs.

In sum, the availability of a variety of alternative sources of information imposes significant competitive pressures on Exchange data products and the Exchange's compelling need to attract order flow imposes significant competitive pressure on the Exchange to act equitably, fairly, and reasonably in setting the proposed data product fees. The proposed data product fees are, in part, responses to that pressure. The Exchange believes that the proposed fees would reflect an equitable allocation of its overall costs to users of its facilities.

In addition, when establishing the proposed fees, the Exchange considered the competitiveness of the market for proprietary data and all of the implications of that competition. The Exchange believes that it has considered all relevant factors and has not considered irrelevant factors in order to establish fair, reasonable, and not unreasonably discriminatory fees and an equitable allocation of fees among all Users. The existence of alternatives to EDGX Depth and EDGX Summary Depth, including existing similar feeds by other exchanges, consolidated data, and proprietary data from other sources, ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can elect these alternatives or choose not to purchase a specific proprietary data product if its cost to purchase is not justified by the returns any particular vendor or subscriber would achieve through the purchase.

Lastly, the Exchange represents that the increase in pricing of EDGX Depth and the proposed pricing of the EDGX Summary Feed would continue to enable a competing vendor to create a competing product to the Exchange's Bats One Feed on the same price and latency basis as the Exchange. The Bats One Feed is a data feed that disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on each of the Bats Exchanges and for the Bats Exchanges report quotes under the CTA Plan or the Nasdaq/UTP Plan. The Bats One Feed also contains the individual last sale information for the Bats Exchanges (collectively with the aggregate BBO, the ''Bats One Summary Feed''). In addition, the Bats One Feed contains optional functionality which enables recipients to receive aggregated two-sided quotations from the Bats Exchanges for up to five (5) price levels

[30] *See supra* note 24.

[31] *See supra* notes 24 and 25 (not limiting the application of user fees to external distribution only).

[32] *See supra* note 25.

[33] *See supra* note 26.

[34] *See supra* note 27.

(''Bats One Premium Feed'').[35] The Exchange uses the following data feeds to create the Bats One Feed, each of which are available to vendors: EDGX Depth, EDGA Depth, BYX Depth, and the BZX Depth.

When adopting the Bats One Feed, the Exchange represented that a vendor could create a competing product based in the data feed used to construct the Bats One Feed on the same cost and latency basis as the Exchange.[36] Therefore, the Exchange designed the pricing of these products so that their aggregate cost is not greater than the Bats One Feed, thereby enabling a vendor to create a competing product to the Bats One Feed on the same cost basis as the Exchange. However, the Exchange now proposes to increase the cost of EDGX Depth, which when combined with the proposed increases by its affiliates for their depth products, would cause their aggregate cost to be higher than the Bats One Premium Feed.[37] However, to ensure that a vendor could continue to create a competing product to the Bats One Premium Feed at no greater cost, that vendor could now utilize EDGX Summary Depth, as well as the Summary Depth feeds of EDGA, BZX, and BYX to create a competing product to the Bats One Premium Feed for less cost and on the same latency basis as the Exchange.[38] The Exchange has designed the content and pricing of EDGX Summary Depth, and related products by its affiliates, so that a vendor could utilize those feeds, in lieu of the Bats Exchange's existing depth-of-book products, to construct a competing product on the same cost and latency basis as the Exchange. The pricing the Exchange and its affiliates propose to charge for Summary Depth feeds would be lower than the cost to obtain the Bats One Premium Feed.[39] Such pricing would continue to enable a vendor to receive each of the Bats Exchange's Summary Depth feeds and offer a similar product to the Bats One Premium Feed on a competitive basis and at no greater cost than the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[40] and paragraph (f) of Rule 19b–4 thereunder.[41] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGX–2016–73 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsEDGX–2016–73. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGX–2016–73, and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[40]

Eduardo A. Aleman,

Assistant Secretary.

[36] *Id.*

[37] The Exchange notes that a vendor seeking to create a product to compete with the Bats One Summary Feed may continue to utilize each of the Bats Exchange's Top and Last Sale data feeds, the aggregate cost of which is less than the Bats One Summary Feed.

[38] While the proposed EDGX Summary Depth feed does not contain the symbol summary or consolidated volume data included in the Bats One Feed, a vendor could include this information in a competing product as this information is easily derivable from the proposed feeds or can be obtained from the securities information processors on the same terms as the Exchange.

[39] While the aggregate cost of each of the Bats Exchange's Summary Depth Products equals the cost of the Bats One Premium Feed, the cost of the Bats One Feed continues to be greater because subscribers are required to pay an additional $1,000 aggregation fee. *See* the Exchange's fee schedule *available at http://www.bats.com/us/equities/membership/fee_schedule/edgx/.*

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79592; File No. SR–NSCC–2016–803]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of No Objection to Advance Notice Filing To Accelerate Its Trade Guaranty, Add New Clearing Fund Components, Enhance Its Intraday Risk Management, Provide for Loss Allocation of ''Off-the-Market Transactions,'' and Make Other Changes

December 19, 2016.

National Securities Clearing Corporation (''NSCC'') filed on October 25, 2016 with the Securities and Exchange Commission (''Commission'') advance notice SR–NSCC–2016–803 (''Advance Notice'') pursuant to Section

806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 (''Payment, Clearing and Settlement Supervision Act'') [1] and Rule 19b–4(n)(1)(i) [2] under the Securities Exchange Act of 1934 (''Exchange Act''). The Advance Notice was published for comment in the **Federal Register** on November 30, 2016.[3] The Commission did not receive any comments on the Advance Notice. This publication serves as notice of no objection to the Advance Notice.

I. Description of the Advance Notice

The Advance Notice, as described by NSCC, is a proposal to modify NSCC's Rules & Procedures (''Rules'') [4] to: (i) Accelerate NSCC's trade guaranty from midnight of one day after trade date (''T+1'') to the point of trade comparison and validation for bilateral submissions or to the point of trade validation for locked-in submissions; (ii) add three new components to NSCC's Clearing Fund formula, in the form of a a Margin Requirement Differential (''MRD''), a Coverage Component, and an Intraday Backtesting Charge); (iii) enhance NSCC's current intraday mark-to-market margin process; (iv) introduce a new loss allocation provision for any trades that fall within the proposed definition of ''Off-the-Market Transactions;'' and (v) make other related and technical changes, such as eliminating the current Specified Activity charge [5] from the Clearing Fund formula, no longer permitting NSCC to delay processing and reporting for certain index receipt transactions, clarifying the calculation of the Excess Capital Premium charge,[6] and removing certain references to ID Net Subscribers.[7] These proposed modifications are described in detail below.

(A) Accelerated Trade Guaranty

Pursuant to Addendum K of the Rules, NSCC currently guarantees the completion of trades that are cleared and settled through NSCC's Continuous Net Settlement, or ''CNS'' system [8] (''CNS trades''), and through its Balance Order Accounting Operation [9] (''Balance Order trades'') that have reached the later of midnight of T+1 or midnight of the day they are reported to NSCC members (''Members'').[10] NSCC proposes to shorten the time at which its trade guaranty applies to trades by amending its Rules to guarantee the completion of CNS trades and Balance Order trades upon comparison and validation for bilateral submissions to NSCC or upon validation for locked-in submissions to NSCC.[11]

NSCC has previously shortened the time at which its trade guaranty applied to trades in response to processing developments, risk management considerations, and to follow industry settlement cycles.[12] According to NSCC, the accelerated trade guaranty and related changes it now proposes would benefit the industry by mitigating counterparty risk and enhancing counterparties' ability to assess that risk by having NSCC become the central counterparty (''CCP'') to CNS trades and by applying the trade guaranty to Balance Order trades at an earlier point in the settlement cycle. The transfer of counterparty credit risk from Members to NSCC at an earlier point in the settlement cycle would facilitate a shortened holding period of bilateral credit risk for Members by transferring the obligation onto NSCC.

To implement this proposed change, NSCC would amend Addendum K of the Rules [13] to provide that CNS trades and Balance Order trades would be guaranteed by NSCC at the time of trade validation.[14] NSCC also proposes to clarify in Addendum K [15] that the guaranty of obligations arising out of the exercise or assignment of options that are settled at NSCC is not governed by Addendum K [16] but by a separate arrangement between NSCC and The Options Clearing Corporation, as referred to in Procedure III of the Rules.[17]

(B) Proposed Enhancements to NSCC's Clearing Fund Formula

In conjunction with the proposed accelerated trade guaranty, NSCC would enhance its Clearing Fund formula to address the risks posed by the expanded trade guaranty. Specifically, NSCC proposes to amend Procedure XV (Clearing Fund Formula and Other Matters) of the Rules [18] to include three new components: the MRD, the Coverage Component, and the Intraday Backtesting Charge.

1. Margin Requirement Differential

The MRD component is designed by NSCC to help mitigate the risks posed to NSCC by day-over-day fluctuations in a Member's portfolio. It would do this by forecasting future changes in a Member's portfolio based on a historical look-back at each Member's portfolio over a given time period. A Member's portfolio may fluctuate significantly from one trading day to the next as the Member executes trades throughout the

[1] 12 U.S.C. 5465(e)(1). The Financial Stability Oversight Council designated NSCC a systemically important financial market utility on July 18, 2012. *See* Financial Stability Oversight Council 2012 Annual Report, Appendix A, *http://www.treasury.gov/initiatives/fsoc/Documents/2012%20Annual%20Report.pdf.* Therefore, NSCC is required to comply with the Payment, Clearing and Settlement Supervision Act and file advance notices with the Commission. *See* 12 U.S.C. 5465(e).

[2] 17 CFR 240.19b–4(n)(1)(i).

[3] Securities Exchange Act Release No. 79391 (November 23, 2016), 81 FR 86348 (November 30, 2016) (SR–NSCC–2016–803) (''Notice''). NSCC also filed a related proposed rule change with the Commission pursuant to Section 19(b)(1) of the Exchange Act and Rule 19b–4 thereunder, seeking approval of changes to its rules necessary to implement the Advance Notice. 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4, respectively. The proposed rule change was published in the **Federal Register** on November 10, 2016. Securities Exchange Act Release No. 79245 (November 4, 2016), 81 FR 79071(November 10, 2016) (SR–NSCC–2016–005). The Commission did not receive any comments on that proposal.

[4] *Available at http://dtcc.com/~/media/Files/Downloads/legal/rules/nscc_rules.pdf.*

[5] The Specified Activity charge is a current component of the Clearing Fund formula that mitigates the risk of NSCC's trade guaranty attaching prior to NSCC collecting margin on the transactions, where there is a shortened settlement cycle for the transaction. Notice, *supra* note 3.

[6] The Excess Capital Premium is a charge imposed on a Member when the Member's Required Deposit exceeds its excess net capital, as described in Procedure XV of the Rules. Notice, *supra* note 3.

[7] The ID Net service allows subscribers to the service to net all eligible affirmed institutional transactions at the Depository Trust Company against their CNS transactions at NSCC. *See* Securities Exchange Act Release No. 57901 (June 2, 2008), 73 FR 32373 (June 6, 2008) (SR–NSCC–2007–14). NSCC's ID Net service is defined further in Rule 65. Rules, *supra* note 4.

[8] CNS and its operation are described in Rule 11 and Procedure VII. Rules, *supra* note 4.

[9] The Balance Order Accounting Operation is described in Rule 5 and Procedure V. Rules, *supra* note 4. NSCC does not become a counterparty to Balance Order trades, but it does provide a trade guaranty to the receive and deliver parties that remains effective through close of business on the originally scheduled settlement date.

[10] Today, shortened process trades, such as same-day and next-day settling trades, are already guaranteed upon comparison or trade recording processing.

[11] Validation refers to the process whereby NSCC validates a locked-in trade, or compares and validates a bilateral trade, to confirm such trade has sufficient and correct information for clearance and settlement processing. For purposes of this description in the proposed rule change, the process of comparing and validating bilateral submissions and the process for validating locked-in submissions are collectively referred to as ''trade validation.'' Notice, *supra* note 3.

[12] *See* Securities Exchange Act Release Nos. 44648 (August 2, 2001), 66 FR 42245 (August 10, 2001) (SR–NSCC–2001–11); 35442 (March 3, 1995), 60 FR 13197 (March 10, 1995) (SR–NSCC–95–02); 35807 (June 5, 1995), 60 FR 31177 (June 13, 1995) (SR–NSCC–95–03); and 27192 (August 29, 1989), 54 FR 37010 (approving SR–NSCC–87–04, SR–MCC–87–03, and SR–SCCP–87–03 until December 31, 1990).

[13] *Supra* note 4.

[14] The proposed accelerated trade guaranty would not apply to items not currently guaranteed today.

[15] *Supra* note 4.

[16] *Id.*

[17] *Id.*

[18] *Id.*

day. Currently, daily fluctuations in a Member's portfolio resulting from such trades do not pose any additional or different risk to NSCC because those trades are not guaranteed by NSCC until a margin in the form of a Required Deposit [19] reflecting such trades is collected by NSCC. However, under the accelerated trade guaranty proposal, NSCC's trade guaranty would attach to current-day trades immediately upon trade validation, before Required Deposits reflecting these trades have been collected (which NSCC refers to herein as the ''coverage gap'').[20] The MRD would increase Members' Required Deposits by an amount calculated to cover forecasted fluctuations in Members' portfolios, based upon historical activity.

The MRD would be calculated and charged on a daily basis, as a part of each Member's Required Deposit, and consists of two components: ''MRD VaR'' and ''MRD MTM.'' MRD VaR would look at historical day-over-day positive changes in the start of day (''SOD'') volatility component of a Member's Required Deposit [21] (the volatility component is referred to as the ''Volatility Charge'') over a 100-day look-back period and would be calculated to equal the exponentially weighted moving average (''EWMA'') of such changes to the Member's Volatility Charge during the look-back period. MRD MTM would look at historical day-over-day increases to the SOD mark-to-market component of a Member's Required Deposit [22] over a 100-day look-back period and would be calculated to equal the EWMA of such changes to the Member's SOD mark-to-market component during the look-back period. The MRD would be calculated to equal the sum of MRD VaR and MRD MTM times a multiplier calibrated based on backtesting results. NSCC has determined that a 100-day look-back period would provide a sufficient time series to reflect current market conditions.

By addressing the day-over-day changes to each Member's SOD Volatility Charge and SOD mark-to-market component, NSCC states that the MRD would help mitigate the risks posed to NSCC by un-margined day-over-day fluctuations to a Member's portfolio resulting from intraday trading activity that would be guaranteed during the coverage gap.

2. Coverage Component

The Coverage Component is designed by NSCC to mitigate the risks associated with a Member's Required Deposit being insufficient to cover projected liquidation losses to the Coverage Target by adjusting a Member's Required Deposit towards the Coverage Target. NSCC would face increased exposure to a Member's un-margined portfolio as a result of the proposed accelerated trade guaranty and would have an increased need to have each Member's Required Deposit meet the Coverage Target. The Coverage Component would supplement the MRD by preemptively increasing a Member's Required Deposit by an amount calculated to forecast potential deficiencies in the margin coverage of a Member's guaranteed portfolio. The preemptive nature of the Coverage Component differentiates it from NSCC's current Backtesting Charge [23] (to be renamed as the ''Regular Backtesting Charge'' pursuant to this proposal, as described below) and the Intraday Backtesting Charge, both of which are backwards looking increases to the Member's Required Deposit to above the Coverage Target.

The Coverage Component would be calculated and charged on a daily basis as a part of each Member's Required Deposit. To calculate the Coverage Component, NSCC would compare the simulated liquidation profit and loss of a Member's portfolio, using the actual positions in the Member's portfolio and the actual historical returns on the security positions in the portfolio, against the sum of each of the following components of the Clearing Fund formula: Volatility Charge, the MRD, Illiquid Charge, and Market Maker Domination Charge (collectively, ''Market Risk Components''). The results of that calculation would determine if there were any deficiencies between the amounts collected by these components and the simulated profit and loss of the Member's portfolio that would have been realized had it been liquidated during a 100-day look-back period. NSCC would then determine a daily ''peak deficiency'' amount for each Member equal to the maximum deficiency over a rolling 10 business day period for the preceding 100 days. The Coverage Component would be calculated to equal the EWMA of the peak deficiencies over the 100-day look-back period.

3. Intraday Backtesting Charge

NSCC currently employs daily backtesting to determine the adequacy of each Member's Required Deposit. NSCC compares the Required Deposit [24] for each Member with the simulated liquidation profit and loss using the actual positions in the Member's portfolio and the actual historical returns on the security positions in the portfolio. NSCC investigates the cause of any backtesting deficiencies. As a part of this investigation, NSCC pays particular attention to Members with backtesting deficiencies that bring the results for that Member below the Coverage Target to determine if there is an identifiable cause of repeat backtesting deficiencies. NSCC also evaluates whether multiple Members experience backtesting deficiencies for the same underlying reason. Upon implementation of the accelerated trade guaranty, NSCC would employ a similar backtesting process on an intraday basis to determine the adequacy of each Member's Required Deposit. However, instead of backtesting a Member's Required Deposit against the Member's SOD portfolio, NSCC would use portfolios from two intraday time slices.[25]

NSCC's objective with the Intraday Backtesting Charge is to increase Required Deposits for Members that are likely to experience intraday backtesting deficiencies on the basis described above by an amount sufficient to maintain such Member's intraday backtesting coverage above the Coverage

[19] NSCC collects Required Deposits from all Members as margin to protect NSCC against losses in the event of a Member's default. The objective of the Required Deposit is to mitigate potential losses to NSCC associated with liquidation of the Member's portfolio if NSCC ceases to act for a Member (*i.e.,* a ''default''). NSCC determines Members' Required Deposit amounts using a risk-based margin methodology that is intended to capture market price risk. The methodology uses historical market moves to project or forecast the potential gains or losses on the liquidation of a defaulting Member's portfolio, assuming that a portfolio would take three days to liquidate or hedge in normal market conditions. The projected liquidation gains or losses are used to determine the Member's Required Deposit, which is calculated to cover projected liquidation losses to be at or above a 99 percent confidence level (''Coverage Target''). Notice, *supra* note 3.

[20] The coverage gap is the period between the time that NSCC would guarantee a trade and the time that NSCC would collect additional margin to cover such trade.

[21] The Volatility Charge component of the Clearing Fund formula for CNS trades and Balance Order trades is described in Procedure XV, Sections I.(A)(1)(a) and I.(A)(2)(a), respectively.

[22] The SOD mark-to-market component of the Clearing Fund formula for CNS trades consists of Regular Mark-to-Market and ID Net Mark-to-Market, which are described in Procedure XV, Sections I(A)(1)(b) and I(A)(1)(c), respectively. The SOD mark-to-market component of the Clearing Fund formula for Balance Order trades is described in Procedure XV, Section I(A)(2)(b).

[23] Rules, Procedure XV, Section I(B)(3), *supra* note 4.

[24] For backtesting comparisons, NSCC uses the Required Deposit amount without regard to the actual collateral posted by the Member.

[25] Intraday time slices are subject to change based upon market conditions and would include the positions from SOD plus any additional positions up to that time.

Target. Members that maintain consistent end of day positions but have a high level of intraday trading activity pose risk to NSCC if they were to default intraday.

Because the intraday trading activity and size of the intraday backtesting deficiencies vary among impacted Members, NSCC would assess an Intraday Backtesting Charge that is specific to each impacted Member. To do so, NSCC would examine each impacted Member's historical intraday backtesting deficiencies observed over the prior 12-month period to identify the five largest intraday backtesting deficiencies that have occurred during that time. The presumptive Intraday Backtesting Charge amount would equal that Member's fifth largest historical intraday backtesting deficiency, subject to adjustment as further described below. NSCC believes that applying an additional margin charge equal to the fifth largest historical intraday backtesting deficiency to a Member's Required Deposit would have brought the Member's historically observed intraday backtesting coverage above the Coverage Target.[26]

Although the fifth largest historical backtesting deficiency for a Member would be used as the Intraday Backtesting Charge in most cases, NSCC would retain discretion to adjust the charge amount based on other circumstances that might be relevant for assessing whether an impacted Member is likely to experience future backtesting deficiencies and the estimated size of such deficiencies. According to NSCC, examples of relevant circumstances that could be considered by NSCC in calculating the final, applicable Intraday Backtesting Charge amount include material differences among the Member's five largest intraday backtesting deficiencies observed over the prior 12-month period, variability in the net settlement activity after the collection of the Member's Required Deposit, and observed market price volatility in excess of the Member's historical Volatility Charge. Based on NSCC's assessment of the impact of these circumstances on the likelihood, and estimated size, of future intraday backtesting deficiencies for a Member, NSCC could, in its discretion, adjust the Intraday Backtesting Charge for such Member in an amount that NSCC determines to be more appropriate for maintaining such Member's intraday backtesting results above the Coverage Target.

In order to differentiate the Backtesting Charge assessed on the start of the day portfolio from the Backtesting Charge assessed on an intraday basis, NSCC would amend the Rules by adding a defined term ''Regular Backtesting Charge'' to Procedure XV, Section I.(B)(3).[27]

If NSCC determines that an Intraday Backtesting Charge should apply to a Member who was not assessed an Intraday Backtesting Charge during the immediately preceding month or that the Intraday Backtesting Charge applied to a Member during the previous month should be increased, NSCC would notify the Member on or around the 25th calendar day of the month prior to the assessment of the Intraday Backtesting Charge or prior to the increase to the Intraday Backtesting Charge, as applicable, if not earlier.

NSCC would impose the Intraday Backtesting Charge as an additional charge applied to each impacted Member's Required Deposit on a daily basis for a one-month period and would review each applied Intraday Backtesting Charge each month. However, the Intraday Backtesting Charge would only be applicable to those Members whose overall 12-month trailing intraday backtesting coverage falls below the Coverage Target. If an impacted Member's trailing 12-month intraday backtesting coverage exceeds the Coverage Target (without taking into account historically imposed Intraday Backtesting Charges), the Intraday Backtesting Charge would be removed.

(C) Enhanced Intraday Mark-to-Market Margining

NSCC proposes to enhance its current intraday margining to further mitigate the intraday coverage gap risk that may be introduced to NSCC as a result of the proposed accelerated trade guaranty. As part of its Clearing Fund formula, NSCC currently collects a SOD mark-to-market margin, which is designed to mitigate the risk arising out of the value change between the contract/settlement value of a Member's open positions and the current market value. A Member's SOD mark-to-market margin is calculated and collected daily as part of a Member's daily Required Deposit based on the Member's prior end-of-day positions. The SOD mark-to-market component of the daily Required Deposit is calculated to cover a Member's exposure due to market moves and/or trading and settlement activity by bringing the portfolio of open positions up to the current market value.

Because the SOD mark-to-market component is calculated only once daily using the prior end-of-day positions and prices, it does not cover a Member's exposure arising out of any intraday changes to position and market value in a Member's portfolio. For such exposure, the Volatility Charge already collected from each Member as part of the Member's daily Required Deposit is calculated to cover projected changes in the contract/settlement value of a Member's portfolio, which should be sufficient to cover intraday changes to a Member's portfolio, and thus NSCC's risk of loss as a result of that Member's intraday activities. However, in certain instances, a Member could have intraday mark-to-market changes that are significant enough that NSCC is exposed to an increased risk of loss that would not be covered by the Member's Volatility Charge. To monitor and account for these instances, NSCC measures each Member's intraday mark-to-market exposure against the Volatility Charge twice daily and collects an intraday mark-to-market amount from any Member whose intraday mark-to-market exposure meets or exceeds 100 percent of the Member's Volatility Charge, although NSCC may lower that threshold and measure exposure more often during volatile market conditions. NSCC believes that such Members pose an increased risk of loss to NSCC because the coverage provided by the Volatility Charge, which is designed to cover estimated losses to a portfolio over a specified time period, would be exhausted by an intraday mark-to-market exposure so large that the Member's Required Deposit would potentially be unable to absorb further intraday losses to the Member's portfolio.

To further mitigate the risk posed to NSCC by the proposed accelerated trade guaranty, NSCC is proposing to enhance its collection of intraday mark-to-market margin by imposing the intraday mark-to-market margin amount at a lower threshold. With this proposal, instead of collecting intraday mark-to-market margin if a Member's intraday mark-to-market exposure meets or exceeds 100 percent of the Member's Volatility Charge, NSCC would make an intraday margin call if a Member's intraday mark-to-market exposure meets or exceeds 80 percent of the Member's Volatility Charge (while still retaining the ability to reduce the threshold during volatile market conditions). This proposed change would serve to collect

[26] Intraday backtesting would include 500 observations per year (twice per day over 250 observation days). Each occurrence of a backtesting deficiency would reduce a Member's overall backtesting coverage by 0.2 percent (1 exception/500 observations). Accordingly, an Intraday Backtesting Charge equal to the fifth largest backtesting deficiency would have brought backtesting coverage up to 99.2 percent.

[27] *Supra* note 4.

more intraday margin earlier and more proactively preserve the coverage provided by a Member's Volatility Charge and Required Deposit.

Finally, to ensure that Members are aware that NSCC regularly monitors and considers intraday mark-to-market as part of its regular Clearing Fund formula and understand the circumstances and criteria for the assessment of an intraday mark-to-market call, NSCC proposes to amend Procedure XV to include a comprehensive description of the enhanced intraday mark-to-market margin charge and the proposed new criteria NSCC would use to assess it.

(D) Loss Allocation Provision for Off-the-Market Transactions

NSCC proposes to introduce a new loss allocation provision for any trades that fall within the proposed definition of ''Off-the-Market Transactions.'' This loss allocation provision would be designed to limit NSCC's exposure to certain trades that have a price that differs significantly from the prevailing market price for the underlying security at the time the trade is executed. It would apply in the event that NSCC ceases to act for a Member that engaged in Off-the-Market Transactions and only to the extent that NSCC incurs a net loss in the liquidation of such Transactions.[28]

NSCC would define ''Off-the-Market Transaction'' as a single transaction (or a series of transactions settled within the same trade cycle) that is (i) greater than $1 million in gross proceeds, and (ii) at trade price that differs significantly (*i.e.,* either higher or lower) from the most recently observed market price, at the time the trade was submitted to NSCC, by a percentage amount determined by NSCC based upon market conditions and factors that impact trading behavior of the underlying security, including volatility, liquidity and other characteristics of such security.

In addition to defining Off-the-Market Transactions, the proposed change would establish the loss allocation for when they occur. Specifically, any net losses to NSCC resulting from the liquidation of a guaranteed, Off-the-Market Transaction of a defaulted Member would be allocated directly and entirely to the surviving counterparty to that transaction, or on whose behalf the Off-the-Market Transaction was submitted to NSCC. Losses would be allocated to counterparties in proportion to their specific Off-the-Market Transaction gain and would be allocated only to the extent of NSCC's loss; however, no allocation would be made if the defaulted Member has satisfied all requisite intraday mark-to-market margin assessed by NSCC with respect to the Off-the-Market Transaction.[29]

According to NSCC, this proposed change would allow NSCC to mitigate the risk of loss associated with guaranteeing these Off-the-Market Transactions. NSCC has recognized that applying the accelerated trade guaranty to transactions whose price significantly differs from the most recently observed market price could inappropriately increase the loss that NSCC may incur if a Member that has engaged in Off-the-Market Transactions defaults and its open, guaranteed positions are liquidated. Members not involved in Off-the-Market Transactions, or not involved in Off-the-Market Transactions that result in losses to NSCC, would not be included in this process. This exclusion would apply only to losses that are attributable to Off-the-Market Transactions and would not exclude Members from other obligations that may result from any loss or liabilities incurred by NSCC from a Member default.

To implement this proposed change, NSCC would amend Rule 4 [30] (Clearing Fund) to provide that, if a loss or liability of NSCC is determined by NSCC to arise in connection with the liquidation of any Off-the-Market Transactions, such loss or liability would be allocated directly to the surviving counterparty to the Off-the-Market Transaction that submitted the transaction to NSCC for clearing. NSCC also would amend Rule 1[31] (Definitions and Descriptions) to include a definition of Off-the-Market Transactions.

(E) Other Related and Technical Changes

1. Removing the Specified Activity Charge

Currently, NSCC collects a Specified Activity charge, which is designed to cover the risk posed to NSCC by transactions that settle on a T+2, T+1, or T timeframe.[32] Because such transactions may be guaranteed by NSCC prior to the collection of margin, they pose an increased risk to NSCC (a similar risk that posed to NSCC by the proposed accelerated trade guaranty). The Specified Activity charge currently mitigates this risk by increasing the Required Deposit for a Member in relation to the number of Specified Activity trades submitted to NSCC by the Member over a 100-day look-back period. However, according to NSCC, the addition of the proposed MRD and Coverage Components to the Clearing Fund formula would mitigate the risks posed by trades guaranteed by NSCC prior to the collection of margin on those trades, thereby obviating the need to collect a separate Specified Activity charge. Accordingly, because it would be duplicative of the MRD and Coverage Components that are being added to the Clearing Fund Formula, NSCC proposes to eliminate the Specified Activity charge.

2. Eliminating Delay in Processing and Reporting of Next Day Settling Index Receipts

Next day settling index receipts may be guaranteed prior to the collection of margin reflecting such trades and thus carry a risk similar to the risk posed by Specified Activity trades described above. More specifically, because these trades are settled on the day after they are received and validated by NSCC, NSCC currently attaches its guaranty to them at the time of validation, prior to the collection of a Required Deposit that reflects such trades. Unlike the risk from Specified Activity trades, which is mitigated by the Specified Activity charge, the risk for next day settling index receipts is currently mitigated by permitting NSCC to delay the processing and reporting of these trades if a Member's Required Deposit is not paid on time. However, as with the risk associated with Specified Activity, under the proposed change, this risk would generally be mitigated by the addition of the MRD and Coverage Component. Therefore, NSCC proposes to amend Procedure II of the Rules [33] (Trade Comparison and Recording Service) to remove the language that permits NSCC to delay the processing and reporting of next day settling index receipts until the applicable margin on these transactions is paid.

[28] A net loss on liquidation of the Off-the-Market Transaction means that the loss on liquidation of the Member's portfolio exceeds the collected Required Deposit of the Member and such loss is attributed to the Off-the-Market Transaction.

[29] A Member's Off-the-Market Transaction that has been marked to market is, by definition, no longer an Off-the-Market Transaction when the mark-to-market component of the Member's Required Deposit is satisfied.

[30] *Supra* note 4.

[31] *Id.*

[32] Examples of these trades can include next day settling trades, same day settling trades, cash trades, and sellers' options.

[33] *Supra* note 4.

3. Clarifying That the MRD and Coverage Component Should Not Be Included in the Calculation of a Member's Excess Capital Premium Charge

The Excess Capital Premium charge [34] is designed to address significant, temporary increases in a Member's Required Deposit based upon any one day of activity. It is not designed to provide additional Required Deposits over an extended period of time. Currently, the Excess Capital Premium charge for a Member is calculated based upon the Member's Required Deposit and the Member's excess net capital. The Premium is the amount by which a Member's Required Deposit exceeds its excess regulatory capital multiplied by the Member's ratio of Required Deposit to excess regulatory capital, expressed as a percent. Because they would be new components of a Member's Required Deposit under the current proposal, the MRD and Coverage Component would necessarily be included in the calculation of a Member's Excess Capital Premium. However, the MRD and Coverage Component each utilize a historical look-back period, which accounts for the risk of such activity well after the relevant trades have settled. Risks related to such trades would be reflected in increased amounts assessed for these components over the subsequent time periods. If these components are included in the calculation of the Excess Capital Premium, especially during periods following an increase in activity, the increased MRD and Coverage Component could lead to more frequent Excess Capital Premium charges over an extended period of time. According to NSCC, this is not the intended purpose of the Excess Capital Premium and could place an unnecessary burden on Members. Accordingly, NSCC proposes to exclude these charges from the calculation of the Excess Capital Premium.

4. Removing Reference to ID Net Subscribers

NSCC also proposes to change Procedure XV [35] to clarify how the ''Regular Mark-to-Market'' component of the Required Deposit for CNS transactions is calculated. The Mark-to-Market component of a Member's Required Deposit is designed to protect NSCC from risk of loss based on changes to the value of a Member's portfolio and therefore may result in a debit to a Member (*i.e.,* NSCC would collect more Required Deposit), but cannot result in a credit from NSCC to a Member. Accordingly, if a Member's mark-to-market calculation for a CNS or Balance Order trade results in a credit to the Member, NSCC's policy is to adjust the calculation to zero, thereby avoiding a credit from NSCC to the Member. When NSCC implemented the ID Net service,[36] it added a provision to Procedure XV [37] that explicitly stated this policy with respect to CNS transactions of subscribers to the ID Net service. According to NSCC, this change inadvertently created an implication that the calculation of Regular Mark-to-Market credit for Members who were not ID Net Subscribers would not be set to zero. NSCC proposes to revise the applicable provision of Procedure XV to remove the reference to ID Net Subscribers.

II. Discussion and Commission Findings

Although the Act does not specify a standard of review for an advance notice, its stated purpose is instructive: To mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.[38] Section 805(a)(2) of the Act authorizes the Commission to prescribe risk management standards for the payment, clearing, and settlement activities of designated clearing entities and financial institutions engaged in designated activities for which it is the Supervisory Agency or the appropriate financial regulator.[39] Section 805(b) of the Act states that the objectives and principles for the risk management standards prescribed under Section 805(a) shall be to:

- Promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.[40]

The Commission has adopted risk management standards under Section 805(a)(2) of the Act [41] and Section 17A of the Exchange Act [42] (''Clearing Agency Standards'').[43] The Clearing Agency Standards require registered clearing agencies to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.[44] It is therefore appropriate for the Commission to review proposed changes in advance notices against these Clearing Agency Standards and the objectives and principles of these risk management standards as described in Section 805(b) of the Act.[45]

The Commission believes the proposal in the Advance Notice is consistent with the objectives and principles described in Section 805(b) of the Act,[46] and the Clearing Agency Standards, in particular, Rule 17Ad–22(b)(1) [47] and Rule 17Ad–22(b)(2) [48] under the Exchange Act, as described in detail below.

A. Consistency With Section 805(b) of the Act

First, the Commission believes that the changes proposed in the Advance Notice, as described above, are consistent with promoting robust risk management. NSCC's proposal to add the three new components to its margin methodology (*i.e*, the MRD, Coverage Component, and Intraday Backtesting Charge) would enable NSCC to collect more margin, thereby promoting robust risk management practices at NSCC with respect to the potential default of a Member. By collecting more margin, NSCC would be in a better position to manage the counterparty credit risk presented by Members, particularly the additional counterparty credit risk from the proposed accelerated trade guaranty. Similarly, the proposal to lower the threshold for collection of intraday mark-to-margin by collecting intraday mark-to-market margin when NSCC's exposure to a Member meets or exceeds 80 percent of that Member's Volatility Charge, rather than 100 percent, would enhance NSCC's intraday mark-to-market margin practice by allowing NSCC to collect more intraday margin stemming from intraday price fluctuations more often. As such, the proposed threshold reduction would also promote robust risk management practices at NSCC. With respect to the

[34] As stated above, the Excess Capital Premium is a charge imposed on a Member when the Member's Required Deposit exceeds its excess net capital, as described in Procedure XV of the Rules. Rules, *supra* note 4.

[48] 17 CFR 240.17Ad–22(b)(2).

proposed change to introduce a new loss allocation provision for certain off-the-market transactions, it too would promote robust risk management at NSCC, as it would help protect NSCC from transactions of a defaulted Member that were made at prices that differed significantly from the prevailing market price at the time the trade is executed and resulted in a loss to NSCC in connection with NSCC's liquidation of the transaction.

Second, the Commission believes that the changes proposed in the Advance Notice are consistent with promoting safety and soundness. As described above, NSCC proposes to accelerate its trade guaranty for CNS trades and Balance Order trades from midnight of T+1 to the point of trade validation. This earlier guaranty would promote safety and soundness for Members because the counterparty credit risk that Members currently hold until NSCC's guaranty applies at midnight of T+1 would shift to NSCC almost immediately upon NSCC's receipt of the trade on T. Because NSCC risk manages its guaranteed transactions, NSCC is able to better ensure that trades settle if a counterparty defaults.

The above-described proposed changes to NSCC's margin methodology (*i.e.,* the addition of the MRD, Coverage Component, and Intraday Backtesting Charge), along with the proposed reduction of NSCC's intraday mark-to-margin threshold, also would promote safety and soundness at NSCC because they would improve NSCC's ability to collect margin. Likewise, the proposed loss allocation provision for off-the-market transactions would promote safety and soundness at NSCC by helping to protect NSCC from losses due to transactions of a defaulted Member that were made at prices significantly different from the prevailing market price at the time of the trade. Collectively, these proposed changes would enable NSCC to manage better the additional risk that would result from the proposed accelerated guaranty.

Third, the Commission believes that the Advance Notice is consistent with reducing systemic risks and promoting the stability of the broader financial system. As described above, by providing a trade guaranty at an earlier point in the settlement cycle, counterparty credit risk also would transfer from Members, which are not CCPs, to NSCC, which is a third-party CCP that risk-manages its guaranteed transactions, at an earlier point in the settlement cycle. Because NSCC risk manages its guaranteed transactions, NSCC is able to better ensure that trades settle if a counterparty defaults. Thus, the proposed accelerated process would help reduce systemic risks and promote the stability of the broader financial system by mitigating Members' exposure to a counterparty default earlier in the settlement cycle and by providing an earlier assurance that transactions will settle despite a Member default.

At the same time, the three proposed additions to NSCC's margin methodology, the proposed reduction of NSCC's intraday mark-to-margin threshold, and the proposed loss allocation provision for off-the-market transactions, as described above, would also help mitigate the systemic risks that NSCC presents as a CCP because they would improve NSCC's margining abilities and help protect NSCC against potential losses from a Member default. Accordingly, the changes would therefore promote the stability of the broader financial system.

B. Consistency With Rule 17Ad–22(b)(1)

Rule 17Ad–22(b)(1) under the Exchange Act requires a CCP, such as NSCC, to, among other things, ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . limit its exposures to potential losses from defaults by its participants under normal market conditions . . . .'' As described above, because the proposed change would transfer counterparty credit risk to NSCC at an earlier point in the settlement cycle, NSCC proposes to enhance its margin methodology by adding three new margin components and by lowering the threshold for the intraday mark-to-market margin collection. It also proposes to establish a loss allocation provision for off-the-market transactions. These proposed changes are designed to limit NSCC's exposure to potential losses from the default of a Member by enabling NSCC to collect more margin, better manage when it collects margin, and protect itself from certain losses of a defaulted Member. Therefore, the Commission believes that the proposal would be consistent with Rule 17Ad–22(b)(1).

C. Consistency With Rule 17Ad–22(b)(2)

Rule 17Ad–22(b)(2) under the Exchange Act requires a CCP, such as NSCC, to, among other things, ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . [u]se margin requirements to limit its credit exposures to participants under normal market conditions and use risk-based models and parameters to set margin requirements . . . .'' Again, the proposal would add three new components to NSCC's margin methodology (*i.e.*, the MRD, Coverage Component, and Intraday Backtesting Charge), which use risk based models and parameters to calculate charges, and would lower the threshold at which NSCC would make an intraday mark-to-market margin call. As such, the proposal would help NSCC better account for and cover its credit exposure to Members. In addition, by establishing the proposed margin components and the new intraday mark-to-market margin collection threshold, the proposal is consistent with using risk-based models and parameters to set margin requirements. Therefore, the Commission believes that the proposal would be consistent with Rule 17Ad–22(b)(2).

III. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Payment, Clearing and Settlement Supervision Act,[49] that the Commission *does not object* to Advance Notice (SR–NSCC–2016–803) and that NSCC is *authorized* to implement the proposed change as of the date of this notice or the date of an order by the Commission approving the proposed rule change (SR–NSCC–2016–005) that reflects rule changes that are consistent with this Advance Notice, whichever is later.

By the Commission.

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79596; File No. SR–BatsEDGA–2016–34]

Self-Regulatory Organizations; Bats EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 11.8, Order Types, and Rule 11.11, Routing to Away Trading Centers, To Enhance the Exchange's Midpoint Routing Functionality

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 16, 2016, Bats EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule

[49] 12 U.S.C. 5465(e)(1)(I).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend Rule 11.8, Order Types, and Rule 11.11, Routing to Away Trading Centers, to enhance the Exchange's midpoint routing functionality.

The text of the proposed rule change is available at the Exchange's Web site at *www.bats.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 11.8, Order Types, and Rule 11.11, Routing to Away Trading Centers, to enhance the Exchange's midpoint routing functionality. Specifically, the Exchange proposes to amend Rule 11.11(g)(13) to adopt a new midpoint routing strategy known as RMPL. The Exchange also proposes to amend Rule 11.8(d)(5) to expand the routing strategies that MidPoint Peg Orders may be coupled with to include the Destination Specific routing strategy described under Rule 11.11(g)(14) and the proposed RMPL routing strategy described below.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6)(iii).

RMPL Routing Strategy

The Exchange proposes to amend Rule 11.11(g)(13) to adopt a new midpoint routing strategy known as RMPL. Currently, the Exchange offers the RMPT routing strategy, which is described under Rule 11.11(g)(13). RMPT is a routing strategy under which a MidPoint Peg Order [5] checks the System [6] for available shares and any remaining shares are then sent to destinations on the System routing table [7] that support midpoint eligible orders. If any shares remain unexecuted after routing, they are posted on the EDGA Book [8] as a MidPoint Peg Order, unless otherwise instructed by the User.[9]

The Exchange now proposes RMPL as an alternative to the RMPT routing strategy for those seeking to route MidPoint Peg Orders to destinations that support midpoint eligible executions that are not included under the current RMPT routing strategy. Like RMPT, RMPL would be a routing strategy under which a MidPoint Peg Order checks the System for available shares and any remaining shares are then sent to destinations on the System routing table that support midpoint eligible orders. If any shares remain unexecuted after routing, they are posted on the EDGA Book as a MidPoint Peg Order, unless otherwise instructed by the User. As it does for RMPT, the Exchange would determine via the System routing table the specific trading venues that support midpoint eligible orders to which the System would route RMPL orders. While RMPL will operate in an identical manner as RMPT, the trading venues that each routing strategy would route to and the order in which it routes them will differ. As is the case for RMPT, the Exchange may alter the trading venues included under RMPL and the order in which they are routed to from time to time in accordance with its System routing table.[10]

The Exchange proposes to revise Rule 11.11(g)(13) to describe both the RMPT and proposed RMPL routing strategies. As a result of these revision, the construct of paragraph (g)(13) of Rule 11.11 would be similar to paragraph (g)(3) of Rule 11.11, which also delineates routing strategies that include different sets of destinations as determined by the System routing table.

MidPoint Peg Order Routing

The Exchange also proposes to amend Rule 11.8(d)(5) to expand the routing strategies that MidPoint Peg Orders may be coupled with. Currently, Exchange Rule 11.8(d)(5) states that MidPoint Peg Orders are not eligible for routing pursuant to Rule 11.11 unless routed utilizing the RMPT routing strategy. The Exchange now proposes to amend Rule 11.8(d)(5) to expand the routing strategies that MidPoint Peg Orders may be coupled with to include the Destination Specific routing strategy described under Rule 11.11(g)(14) and the proposed RMPL routing strategy described above.

Destination Specific is a routing option under which an order checks the System for available shares and then is sent to an away trading center or centers specified by the User.[11] As proposed, a User entering a MidPoint Peg Order may select the Destination Specific routing strategy to route such order to a specific trading center or center that supports midpoint executions after being exposed to the EDGA Book. This differs from RMPT and the proposed RMPL routing strategies in that the destinations orders subject to the RMPT and RMPL routing strategies are selected by the Exchange via the System routing table and not the User itself.

[5] In sum, a MidPoint Peg Order is a non-displayed Market Order or Limit Order with an instruction to execute at the midpoint of the NBBO, or, alternatively, pegged to the less aggressive of the midpoint of the NBBO or one minimum price variation inside the same side of the NBBO as the order. *See* Exchange Rule 11.8(d).

[6] The term ''System'' is defined as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(cc).

[7] The term ''System routing table'' refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. *See* Exchange Rule 11.11(g). While the process for determining the specific trading venues to which orders are routed is proprietary, the Exchange publicly discloses the trading venues associated with each routing strategy via its Web site at *http://cdn.batstrading.com/resources/features/bats_exchange_routing-strategies.pdf.*

[8] The term ''EDGA Book'' is defined as the ''System's electronic file of orders.'' *See* Exchange Rule 1.5(d). The Exchange also proposed to capitalize the word ''Book'' within Rule 11.11(g)(13) as the term EDGA Book is a defined term in the Exchange's Rules.

[9] The term ''User'' is defined as ''any Member or Sponsored Participant who is authorized to obtain access to the System pursuant to Rule 11.3.'' *See* Exchange Rule 1.5(ee).

[10] The Exchange notes that the trading venues to which other of its routing strategies route orders to are also determined in accordance with the System routing table. *See e.g.,* Exchange Rule 11.11(g)(3) (listing a series of routing options whose destinations are determined by the System routing table, like the proposed revisions to Exchange Rule 11.11(g)(13)). *See also* subparagraphs (1), (2), and (5) of Exchange Rule 11.11(b)(3) (describing routing strategies that route orders to destinations on the System routing table).

[11] *See* Rule 11.11(g)(14).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [12] in general, and furthers the objectives of Section 6(b)(5) of the Act [13] in particular, in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1) [14] of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The proposed rule change promotes just and equitable principles of trade because it would enhance the Exchange's midpoint routing functionality and provide Users with greater flexibility in routing MidPoint Peg Orders to trading venues that support midpoint executions. This would save such Users from developing complicated order routing strategies on their own. The Exchange believes that the proposed rule change will also accomplish those ends by providing market participants with an additional voluntary routing strategies and options that will enable them to easily access midpoint liquidity available on the Exchange and other trading venues. The Exchange notes that routing through the Exchange is voluntary and those seeking to access midpoint liquidity on other trading venues may do so directly and without the involvement of the Exchange. Therefore, the Exchange believes the proposal removes impediments to and perfects the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The Exchange provides routing services in a highly competitive market in which participants may avail themselves of a wide variety of routing options offered by self-regulatory organizations, alternative trading systems, other broker-dealers, market participants' own proprietary routing systems, and service bureaus. System enhancements, such as the changes proposed in this rule filing, do not burden competition, but rather encourage competition because they are designed to attract additional order flow to the Exchange through enhanced midpoint routing functionality. Such changes are intended to offer investors higher quality and better value than services offered by others. Encouraging competitors to provide higher quality and better value is the essence of a well-functioning competitive marketplace. Therefore, the Exchange does not believe the proposed rule change will result in any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (A) significantly affect the protection of investors or the public interest; (B) impose any significant burden on competition; and (C) by its terms, become operative for 30 days from the date on which it was filed or such shorter time as the Commission may designate it has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and paragraph (f)(6) of Rule 19b–4 thereunder,[16] the Exchange has designated this rule filing as non-controversial. The Exchange has given the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGA–2016–34 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BatsEDGA–2016–34. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGA–2016–34 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736.

Extension:

Regulations 13D and 13G; Schedules 13D and 13G, SEC File No. 270–137, OMB Control No. 3235–0145.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Schedules 13D and 13G (17 CFR 240.13d–101 and 240.13d–102) are filed pursuant to Sections 13(d) and 13(g) (15 U.S.C. 78m(d) and 78m(g)) of the Securities Exchange Act of 1934 (''Exchange Act'') and Regulations 13D and 13G (17 CFR 240.13d–1—240.13d–7) thereunder to report beneficial ownership of equity securities registered under Section 12 (15 U.S.C. 78*l*) of the Exchange Act. Regulations 13D and 13G provide investors, and the subject issuer with information about accumulations of equity securities that may have the potential to change or influence control of the issuer. Schedule 13D and Schedule 13G are filed by persons, including small entities, to report their ownership of more than 5% of a class of equity securities registered under Section 12. We estimate that Schedule 13D takes approximately 14.5 hours to prepare and is filed by approximately 1,508 filers. We estimate that 25% of the 14.5 hours (3.625 hours per response) is prepared by the filer for a total annual reporting burden of 5,467 hours (3.625 hours per response × 1,508 responses).

We estimate that Schedule 13G takes approximately 12.4 hours to prepare and is filed by approximately 7,079 filers. We estimate that 25% of the 12.4 hours (3.10 hours per response) is prepared by the filer for a total annual reporting burden of 21,945 hours (3.10 hours per response × 7,079 responses).

The information provided by respondents is mandatory. Schedule 13D or Schedule 13G is filed by a respondent only when necessary. All information provided to the Commission is public. However, Rules 0–6 and 24b–2 (17 CFR 240.0–6 and 240.24b–2) under the Exchange Act do permit reporting persons to request confidential treatment for certain sensitive information concerning national security, trade secrets, or privileged commercial or financial information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following Web site, *www.reginfo.gov*. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: *Shagufta_Ahmed@omb.eop.gov;* and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street, NE., Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*. Comments must be submitted to OMB within 30 days of this notice.

Dated: December 16, 2016.

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32395; File No. 812–14595]

Delaware Management Business Trust, et al.; Notice of Application

December 19, 2016.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act and rule 18f–2 under the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements''). The requested exemption would permit an investment adviser to hire and replace certain sub-advisers without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the sub-advisers.[1]

APPLICANTS: Delaware Management Business Trust (''DMBT''), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, Delaware Management Company, a series of DMBT, registered as an investment adviser under the Investment Advisers Act of 1940 (the ''Initial Adviser'' or ''DMC''), Optimum Fund Trust, Delaware Group Adviser Funds, Delaware Group Cash Reserve, Delaware Group Equity Funds I, Delaware Group Equity Funds II, Delaware Group Equity Funds IV, Delaware Group Equity Funds V, Delaware Group Foundation Funds, Delaware Group Global & International Funds, Delaware Group Government Fund, Delaware Group Income Funds, Delaware Group Limited-Term Government Funds, Delaware Group State Tax-Free Income Trust, Delaware Group Tax-Free Fund, Delaware Pooled Trust, Delaware VIP Trust, Voyageur Insured Funds, Voyageur Intermediate Tax Free Funds, Voyageur Mutual Funds, Voyageur Mutual Funds II, Voyageur Mutual Funds III, and Voyageur Tax Free Funds (each, a ''Trust'' and, collectively with DBMT and DMC, the ''Applicants'').

FILING DATES: The application was filed on December 23, 2015, and amended on June 8, 2016 and October 25, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on January 13, 2017, and should be accompanied by proof of service on the applicants, in the form of

[1] The requested order would supersede a previous order obtained by the Applicants granting relief solely with respect to Non-Affiliated Sub-Advisers (Delaware Management Business Trust, et al., Investment Company Act Rel. Nos. 27512 (Oct. 10, 2006) (notice) and 27547 (Nov. 7, 2006) (order) (''Prior Order''). If a Subadvised Series has obtained shareholder approval to operate as such with respect to Non-Affiliated Sub-Advisers only in the manner described in this Application and has met all other terms and conditions of the requested order, the Subadvised Series may rely on the order requested in this Application solely with respect to Non-Affiliated Sub-Advisers unless and until it obtains shareholder approval with respect to Wholly-Owned Sub-Advisers.

an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicants: One Commerce Square, 2005 Market Street, Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Jessica Shin, Attorney-Adviser, at (202) 551–5921, or David J. Marcinkus, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. The Adviser will serve as the investment adviser to the Subadvised Series pursuant to an investment advisory agreement with the relevant Trust (each an ''Investment Management Agreement'').[2] The Adviser will provide the Funds with continuous and comprehensive investment management services subject to the supervision of, and policies established by, the board of trustees of the Trust (''Board''). The Investment Management Agreement permits the Adviser, subject to the approval of the Board, to delegate to one or more sub-advisers (each, a ''Sub-Adviser'' and collectively, the ''Sub-Advisers'') the responsibility to provide the day-to-day portfolio investment management of each Subadvised Series, subject to the supervision and direction of the Adviser.[3] The primary responsibility for managing each Subadvised Series will remain vested in the Adviser. The Adviser will hire, evaluate, allocate assets to and oversee the Sub-Advisers, including determining whether a Sub-Adviser should be terminated, at all times subject to the authority of the Board.

2. Applicants request an exemption to permit the Adviser, subject to Board approval, to hire certain Sub-Advisers, pursuant to Sub-Advisory Agreements and materially amend existing Sub-Advisory Agreements without obtaining the shareholder approval required under section 15(a) of the Act and rule 18f-2 under the Act.[4] Applicants also seek an exemption from the Disclosure Requirements to permit a Subadvised Series to disclose (as both a dollar amount and a percentage of the Subadvised Series' net assets): (a) The aggregate fees paid to the Adviser and any Wholly-Owned Sub-Adviser; (b) the aggregate fees paid to Non-Affiliated Sub-Advisers; and (c) the fee paid to each Affiliated Sub-Adviser (collectively, Aggregate Fee Disclosure'').

3. Applicants agree that any order granting the requested relief will be subject to the terms and conditions stated in the Application. Such terms and conditions provide for, among other safeguards, appropriate disclosure to Subadvised Series shareholders and notification about sub-advisory changes and enhanced Board oversight to protect the interests of the Subadvised Series' shareholders.

4. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such relief is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act. Applicants believe that the requested relief meets this standard because, as further explained in the application, the Investment Management Agreements will remain subject to shareholder approval, while the role of the Sub-Advisers is substantially similar to that of individual portfolio managers, so that requiring shareholder approval of Sub-Advisory Agreements would impose unnecessary delays and expenses on the Subadvised Series. Applicants believe that the requested relief from the Disclosure Requirements meets this standard because it will improve the Adviser's ability to negotiate fees paid to the Sub-Advisers that are more advantageous for the Subadvised Series.

For the Commission, by the Division of Investment Management, under delegated authority.

Robert W. Errett,

Deputy Secretary.

[FR Doc. 2016–30936 Filed 12–22–16; 8:45 am]

BILLING CODE 8011–01–P

[2] Applicants request relief with respect to the named Applicants, as well as to any future series of the Trust and any other existing or future registered open-end management investment company or series thereof that: (a) Is advised by the Initial Adviser or any entity controlling, controlled by, or under common control with, the Initial Adviser or its successors (each, also an ''Adviser''); (b) uses the multi-manager structure described in the application; and (c) complies with the terms and conditions set forth in the application (each, a ''Subadvised Series''). For purposes of the requested order, ''successor'' is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization.

[3] A ''Sub-Adviser'' for a Subadvised Series is (1) an indirect or direct ''wholly owned subsidiary'' (as such term is defined in the Act) of the Adviser for that Subadvised Series, or (2) a sister company of the Adviser for that Subadvised Series that is an indirect or direct ''wholly-owned subsidiary'' of the same company that, indirectly or directly, wholly owns the Adviser (each of (1) and (2) a ''Wholly-Owned Sub-Adviser'' and collectively, the ''Wholly-Owned Sub-Advisers''), or (3) not an ''affiliated person'' (as such term is defined in section 2(a)(3) of the Act) of the Subadvised Series, except to the extent that an affiliation arises solely because the Sub-Adviser serves as a sub-adviser to a Subadvised Series (''Non-Affiliated Sub-Advisers'').

[4] The requested relief will not extend to any sub-adviser, other than a Wholly-Owned Sub-Adviser, who is an affiliated person, as defined in Section 2(a)(3) of the Act, of the Subadvised Series, the Trust or of the Adviser, other than by reason of serving as a sub-adviser to one or more of the Subadvised Series (''Affiliated Sub-Adviser'').

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79591; File Nos. SR–CBOE–2016–076; SR–C2–2016–022]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; C2 Options Exchange, Incorporated; Order Approving a Proposed Rule Change in Connection With a Proposed Corporate Transaction Involving CBOE Holdings, Inc. and Bats Global Markets, Inc.

December 19, 2016.

I. Introduction

On November 4, 2016, Chicago Board Options Exchange, Incorporated (''CBOE'') and C2 Options Exchange, Incorporated (''C2'' and, together with CBOE, the ''CBOE Exchanges'') each filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] proposed rule changes in connection with the proposed corporate transaction (the ''Transaction''), as described in more detail below, involving their ultimate parent company, CBOE Holdings, Inc. (''CBOE Holdings''), two wholly owned subsidiaries of CBOE Holdings, CBOE Corporation and CBOE V, LLC (''CBOE

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

V''), and Bats Global Markets, Inc. (''BGM''). BGM is the ultimate parent company of Bats BZX Exchange, Inc. (''Bats BZX''), Bats BYX Exchange, Inc. (''Bats BYX''), Bats EDGX Exchange, Inc. (''Bats EDGX''), and Bats EDGA Exchange, Inc. (''Bats EDGA'' and, together with Bats BZX, Bats BYX, and Bats EDGX, the ''Bats Exchanges''). Upon completion of the Transaction (the ''Closing''), CBOE Holdings will become the ultimate parent of the Bats Exchanges. The proposed rule changes were published for comment in the **Federal Register** on November 15, 2016.[4] The Commission received no comments on the proposals.

II. Description of the Proposed Rule Changes

A. Corporate Structure

1. Current Structure

The CBOE Exchanges are each Delaware corporations that are national securities exchanges registered with the Commission pursuant to Section 6(a) of the Act.[5] The CBOE Exchanges are each direct, wholly owned subsidiaries of CBOE Holdings, a publicly traded Delaware corporation. CBOE V is a Delaware limited liability company and a direct, wholly owned subsidiary of CBOE Holdings, which currently has no material assets and conducts no operations.

Each Bats Exchange is a Delaware corporation that is a national securities exchange registered with the Commission pursuant to Section 6(a) of the Act.[6] BGM is a publicly traded Delaware corporation and the ultimate parent of the Bats Exchanges.

2. The Transaction

On September 25, 2016, CBOE Holdings, CBOE Corporation, CBOE V, and BGM entered into an Agreement and Plan of Merger, as it may be amended from time to time (the ''Merger Agreement'').[7] Pursuant to and subject to the terms of the Merger Agreement, each share of BGM common stock (whether voting or non-voting) issued and outstanding (other than shares owned by CBOE Holdings, BGM, or any of their respective subsidiaries, and certain shares held by BGM stockholders that are entitled to and properly demand appraisal rights) will be converted into the right to receive a particular number of shares of CBOE Holdings common stock, an amount of cash, or a combination of both, at the election of the holder of such share of BGM common stock.[8] BGM will ultimately merge with and into CBOE Holdings' wholly owned subsidiary CBOE V, at which time the separate existence of BGM will cease and CBOE V will be the surviving company.[9]

As a result of the Transaction, CBOE Holdings will be the ultimate parent of the Bats Exchanges, each of which will continue to operate separately.[10] CBOE Holdings will continue to be a publicly owned company and the ultimate parent of the CBOE Exchanges, each of which will continue to operate separately.

B. Proposed Rule Change

Section 19(b) of the Act [11] and Rule 19b–4 [12] thereunder require a self-regulatory organization (''SRO'') to file proposed rule changes with the Commission. Although CBOE Holdings is not an SRO, certain provisions of its certificate of incorporation and bylaws, along with other corporate documents, are rules of the CBOE Exchanges, as defined in Rule 19b–4 under the Act, and must be filed with the Commission pursuant to Section 19(b) of the Act and Rule 19b–4 thereunder. Accordingly, each of the CBOE Exchanges filed with the Commission to seek approval of a provision in the Merger Agreement regarding the composition of the CBOE Holdings Board upon Closing.

The CBOE Exchanges represented that in connection with the Transaction, CBOE Holdings agreed in the Merger Agreement to take all requisite actions so, as of the Closing, the CBOE Holdings Board will include three individuals designated by BGM who (1) are serving as BGM directors immediately prior to the Closing and (2) comply with the policies (including clarifications of the policies provided to BGM) of the Nominating and Governance Committee of the CBOE Holdings Board as in effect on the date of the Merger Agreement and previously provided to BGM (each of whom will be appointed to the CBOE Holdings Board as of the Closing).[13] The CBOE Holdings Board currently consists of 14 directors.[14] The CBOE Exchanges expect three current CBOE Holdings directors to resign prior to the Closing, at which point the CBOE Holdings Board will fill those vacancies by appointing the three individuals designated by BGM that have complied with the policies of the Nominating and Governance Committee of the CBOE Holdings Board.[15]

III. Discussion and Commission Findings

The Commission has reviewed carefully the proposed rule changes and finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[16] In particular, the Commission finds that the proposed rule changes are consistent with Sections 6(b)(1) and (3) of the Act,[17] which, among other things, require a national securities exchange to be so organized and have the capacity to be able to carry out the purposes of the Act, and to enforce compliance by its members and persons associated with its members with the provisions of the Act, the rules and regulations thereunder, and the rules of the exchange, and assure the fair representation of its members in the selection of its directors and administration of its affairs, and provide that one or more directors shall be representative of issuers and investors and not be associated with a member of the exchange, broker, or dealer. The CBOE Exchanges represented that the proposal is consistent with CBOE Holdings' governing documents previously filed with the Commission and noted that they are not proposing any changes to existing rules or governing documents of CBOE Holdings or the CBOE Exchanges.[18] The CBOE Exchanges' proposed rule changes are limited to the provision in the Merger Agreement regarding the ability of BGM to designate three directors to the CBOE Holdings Board one time in connection with Closing. The Nominating and Governance Committee of the CBOE Holdings Board, consistent with the governing documents of CBOE

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79597; File No. SR–NYSEArca–2016–165]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending the NYSE Arca Equities Schedule of Fees and Charges for Exchange Services

December 19, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 13, 2016, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Equities Schedule of Fees and Charges for Exchange Services (''Fee Schedule''). The Exchange proposes to implement the fee change effective December 13, 2016.[4] The proposed change is available on the Exchange's Web site at *www.nyse.com*, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to amend the volume criteria for the Exchange's tiered-rebate structure applicable to Lead Market Makers (''LMMs'') [5] and to ETP Holders and Market Makers affiliated with the LMM that provide liquidity in Tape B securities to the NYSE Arca Book. The Exchange proposes to implement the fee change effective December 13, 2016.

The Exchange currently provides tier-based incremental credits for orders that provide displayed liquidity to the NYSE Arca Book in Tape B Securities.[6] Specifically, LMMs that are registered as the LMM in Tape B securities that have a consolidated average daily volume (''CADV'') in the previous month of less than 100,000 shares (''Less Active ETP Securities''), and the ETP Holders and Market Makers affiliated with such LMMs, currently receive an incremental credit for orders that provide displayed liquidity to the Book in any Tape B Securities that trade on the Exchange.[7] The current incremental credits and volume thresholds are as follows:

- An additional credit of $0.0004 per share if an LMM is registered as the LMM in at least 300 Less Active ETP Securities
- An additional credit of $0.0003 per share if an LMM is registered as the LMM in at least 200 but less than 300 Less Active ETP Securities
- An additional credit of $0.0002 per share if an LMM is registered as the LMM in at least 100 but less than 200 Less Active ETP Securities

The number of Less Active ETP Securities for the billing month is based on the number of Less Active ETP Securities in which an LMM is registered as the LMM on the last business day of the previous month.

The Exchange proposes to amend the volume criteria for Less Active ETP Securities. As proposed, a Less Active ETP Security would be a Tape B Security that has a CADV in the previous month of less than 100,000 shares, or 0.0070% of Consolidated Tape B ADV, whichever is greater. The Exchange is proposing to expand the manner by which LMMs that are registered as the LMM in Tape B Securities, and the ETP Holders and Market Makers affiliated with such LMMs, would qualify for the incremental credit.

The Exchange is not proposing any change to the level of the incremental credits and volume thresholds noted above that are payable to LMMs and to ETP Holders and Market Makers affiliated with the LMM.

The Exchange is proposing to amend the current criteria for securities to qualify as Less Active ETP Securities by expanding it to the greater of a numerical threshold or a percentage threshold based upon the average daily traded volume of the relevant security, for several reasons. The percentage threshold will adjust each calendar month based on the U.S. average daily consolidated share volume in Tape B Securities for that month, while the numerical threshold remains unchanged from month to month, thereby providing a consistent floor against which to measure volume in a Tape B Security. The Exchange believes that the proposed approach will provide a straightforward way to float volume tiers, while maintaining a minimum threshold. The Exchange notes that the combined approach will allow tiers to move in sync with consolidated volume during months with high volumes while maintaining a numerical threshold. The Exchange believes that this will continue to provide an incentive for LMMs to act as an LMM for less active issues during months with higher market volumes when the 100,000 share

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange originally filed to amend the Fee Schedule on December 2, 2016 (SR–NYSEArca–2016–162) and withdrew such filing on December 13, 2016.

[5] The term ''Lead Market Maker'' is defined in Rule 1.1(ccc) to mean a registered Market Maker that is the exclusive Designated Market Maker in listings for which the Exchange is the primary market.

[6] *See* Securities Exchange Act Release No. 76084 (October 6, 2015), 80 FR 61529 (October 13, 2015) (SR–NYSEArca–2015–87).

[7] The Exchange defines ''affiliate'' to ''mean any ETP Holder under 75% common ownership or control of that ETP Holder.'' *See* Fee Schedule, NYSE Arca Marketplace: General, Section II(c).

threshold would be harder to obtain. While the percentage threshold will result in lower maximum share volume requirement when consolidated volumes are lower, it will also result in higher maximum share volume requirement when consolidated volumes are higher. Such higher and lower consolidated volumes will have a similar impact on the maximum share requirements; however, the minimum share requirement will remain unchanged at 100,000 shares.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[9] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The proposed fee change is intended to encourage LMMs and ETP Holders and Market Makers affiliated with such LMMs to promote price discovery and market quality in Less Active ETP Securities for the benefit of all market participants.

The Exchange believes the proposed amendment to the volume criteria for Less Active ETP Securities is equitable and not unfairly discriminatory because it would continue to apply to all LMMs and ETP Holders and Market Makers affiliated with such LMM on an equal basis. The Exchange further believes that the proposed rule change is not unfairly discriminatory because it is consistent with the market quality and competitiveness benefits associated with the proposed fee program.

The Exchange further believes that the proposed amendment to the criteria to qualify for the incremental credits is reasonable, equitable and not unfairly discriminatory as it will result in more LMMs and ETP Holders and Market Makers affiliated with such LMMs to qualify for the increased credits and therefore reduce their overall transaction costs on the Exchange.

Further, the Exchange believes that the proposal is reasonable and would create an added incentive for these market participants to execute additional orders on the Exchange and thereby qualify for the incremental credits. The Exchange believes that the proposed change is equitable and not unfairly discriminatory because providing incentives for orders in exchange-listed securities that are executed on a registered national securities exchange (rather than relying on certain available off-exchange execution methods) would contribute to investors' confidence in the fairness of their transactions and would benefit all investors by deepening the Exchange's liquidity pool, supporting the quality of price discovery, promoting market transparency and improving investor protection.

Volume-based rebates such as the ones currently in place on the Exchange have been widely adopted in the cash equities markets and are equitable because they are open to all LMMs and ETP Holders and Market Makers affiliated with such LMMs on an equal basis and provides additional benefits that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition. For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[10] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, the Exchange believes that the proposed change would encourage increased participation by LMMs in the trading of ETP securities generally and Less Active ETP Securities, in particular. The proposed change would also encourage the submission of additional liquidity to a public exchange, thereby promoting price discovery and transparency and enhancing order execution opportunities for ETP Holders and Market Makers affiliated with LMMs.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that this proposal promotes a competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[11] of the Act and subparagraph (f)(2) of Rule 19b–4[12] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[13] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2016–165 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–165. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's

[8] 15 U.S.C. 78f(b).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79598; File No. SR–NSCC–2016–005]

Self-Regulatory Organizations; National Securities Clearing Corporation; Order Granting Approval of Proposed Rule Change To Accelerate Its Trade Guaranty, Add New Clearing Fund Components, Enhance Its Intraday Risk Management, Provide for Loss Allocation of ''Off-the-Market Transactions,'' and Make Other Changes

December 19, 2016.

National Securities Clearing Corporation (''NSCC'') filed on October 25, 2016 with the Securities and Exchange Commission (''Commission'') proposed rule change SR–NSCC–2016–005 (''Proposed Rule Change'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder.[2] The Proposed Rule Change was published for comment in the **Federal Register** on November 10, 2016.[3] The Commission did not receive any comments on the Proposed Rule Change. For the reasons discussed below, the Commission is granting approval of the Proposed Rule Change

I. Description of the Proposed Rule Change

The Proposed Rule Change, as described by NSCC, is a proposal to modify NSCC's Rules & Procedures (''Rules'')[4] to: (i) Accelerate NSCC's trade guaranty from midnight of one day after trade date (''T+1'') to the point of trade comparison and validation for bilateral submissions or to the point of trade validation for locked-in submissions; (ii) add three new components to NSCC's Clearing Fund formula, in the form of a a Margin Requirement Differential (''MRD''), a Coverage Component, and an Intraday Backtesting Charge); (iii) enhance NSCC's current intraday mark-to-market margin process; (iv) introduce a new loss allocation provision for any trades that fall within the proposed definition of ''Off-the-Market Transactions;'' and (v) make other related and technical changes, such as eliminating the current Specified Activity charge[5] from the Clearing Fund formula, no longer permitting NSCC to delay processing and reporting for certain index receipt transactions, clarifying the calculation of the Excess Capital Premium charge,[6] and removing certain references to ID Net Subscribers.[7] These proposed modifications are described in detail below.

(A) Accelerated Trade Guaranty

Pursuant to Addendum K of the Rules, NSCC currently guarantees the completion of trades that are cleared and settled through NSCC's Continuous Net Settlement, or ''CNS'' system[8] (''CNS trades''), and through its Balance Order Accounting Operation[9] (''Balance Order trades'') that have reached the later of midnight of T+1 or midnight of the day they are reported to NSCC members (''Members'').[10] NSCC proposes to shorten the time at which its trade guaranty applies to trades by amending its Rules to guarantee the completion of CNS trades and Balance Order trades upon comparison and validation for bilateral submissions to NSCC or upon validation for locked-in submissions to NSCC.[11]

NSCC has previously shortened the time at which its trade guaranty applied to trades in response to processing developments, risk management considerations, and to follow industry settlement cycles.[12] According to NSCC, the accelerated trade guaranty and related changes it now proposes would benefit the industry by mitigating counterparty risk and enhancing counterparties' ability to assess that risk by having NSCC become the central counterparty (''CCP'') to CNS trades and by applying the trade guaranty to Balance Order trades at an earlier point

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Securities Exchange Act Release No. 79245 (November 4, 2016), 81 FR 79071 (November 10, 2016) (SR–NSCC–2016–005) (''Notice''). NSCC also filed the Proposed Rule Change as an advance notice with the Commission, pursuant to Section 806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 and Rule 19b–4(n)(1) under the Act, seeking approval of changes to its Rules necessary to implement the Proposed Rule Change. 12 U.S.C. 5465(e) and 17 CFR 240.19b–4(n)(1), respectively. The advance notice was published in the **Federal Register** on November 30, 2016. Securities Exchange Act Release No. 79391 (November 23, 2016), 81 FR 86348 (November 30, 2016) (SR–NSCC–2016–803). The Commission did not receive any comments on the advance notice.

[4] *Available at http://dtcc.com/~/media/Files/Downloads/legal/rules/nscc_rules.pdf.*

[5] The Specified Activity charge is a current component of the Clearing Fund formula that mitigates the risk of NSCC's trade guaranty attaching prior to NSCC collecting margin on the transactions, where there is a shortened settlement cycle for the transaction. Notice, *supra* note 3.

[6] The Excess Capital Premium is a charge imposed on a Member when the Member's Required Deposit exceeds its excess net capital, as described in Procedure XV of the Rules. Notice, *supra* note 3.

[7] The ID Net service allows subscribers to the service to net all eligible affirmed institutional transactions at the Depository Trust Company against their CNS transactions at NSCC. *See* Securities Exchange Act Release No. 57901 (June 2, 2008), 73 FR 32373 (June 6, 2008) (SR–NSCC–2007–14). NSCC's ID Net service is defined further in Rule 65. Rules, *supra* note 4.

[8] CNS and its operation are described in Rule 11 and Procedure VII. Rules, *supra* note 4.

[9] The Balance Order Accounting Operation is described in Rule 5 and Procedure V. Rules, *supra* note 4. NSCC does not become a counterparty to Balance Order trades, but it does provide a trade guaranty to the receive and deliver parties that remains effective through close of business on the originally scheduled settlement date.

[10] Today, shortened process trades, such as same-day and next-day settling trades, are already guaranteed upon comparison or trade recording processing.

[11] Validation refers to the process whereby NSCC validates a locked-in trade, or compares and validates a bilateral trade, to confirm such trade has sufficient and correct information for clearance and settlement processing. For purposes of this description in the proposed rule change, the process of comparing and validating bilateral submissions and the process for validating locked-in submissions are collectively referred to as ''trade validation.'' Notice, *supra* note 3.

[12] *See* Securities Exchange Act Release Nos. 44648 (August 2, 2001), 66 FR 42245 (August 10, 2001) (SR–NSCC–2001–11); 35442 (March 3, 1995), 60 FR 13197 (March 10, 1995) (SR–NSCC–95–02); 35807 (June 5, 1995), 60 FR 31177 (June 13, 1995) (SR–NSCC–95–03); and 27192 (August 29, 1989), 54 FR 37010 (approving SR–NSCC–87–04, SR–MCC–87–03, and SR–SCCP–87–03 until December 31, 1990).

in the settlement cycle. The transfer of counterparty credit risk from Members to NSCC at an earlier point in the settlement cycle would facilitate a shortened holding period of bilateral credit risk for Members by transferring the obligation onto NSCC.

To implement this proposed change, NSCC would amend Addendum K of the Rules [13] to provide that CNS trades and Balance Order trades would be guaranteed by NSCC at the time of trade validation.[14] NSCC also proposes to clarify in Addendum K [15] that the guaranty of obligations arising out of the exercise or assignment of options that are settled at NSCC is not governed by Addendum K [16] but by a separate arrangement between NSCC and The Options Clearing Corporation, as referred to in Procedure III of the Rules.[17]

(B) Proposed Enhancements to NSCC's Clearing Fund Formula

In conjunction with the proposed accelerated trade guaranty, NSCC would enhance its Clearing Fund formula to address the risks posed by the expanded trade guaranty. Specifically, NSCC proposes to amend Procedure XV (Clearing Fund Formula and Other Matters) of the Rules [18] to include three new components: The MRD, the Coverage Component, and the Intraday Backtesting Charge.

1. Margin Requirement Differential

The MRD component is designed by NSCC to help mitigate the risks posed to NSCC by day-over-day fluctuations in a Member's portfolio. It would do this by forecasting future changes in a Member's portfolio based on a historical look-back at each Member's portfolio over a given time period. A Member's portfolio may fluctuate significantly from one trading day to the next as the Member executes trades throughout the day. Currently, daily fluctuations in a Member's portfolio resulting from such trades do not pose any additional or different risk to NSCC because those trades are not guaranteed by NSCC until a margin in the form of a Required Deposit [19] reflecting such trades is collected by NSCC. However, under the accelerated trade guaranty proposal, NSCC's trade guaranty would attach to current-day trades immediately upon trade validation, before Required Deposits reflecting these trades have been collected (which NSCC refers to herein as the ''coverage gap'').[20] The MRD would increase Members' Required Deposits by an amount calculated to cover forecasted fluctuations in Members' portfolios, based upon historical activity.

The MRD would be calculated and charged on a daily basis, as a part of each Member's Required Deposit, and consists of two components: ''MRD VaR'' and ''MRD MTM.'' MRD VaR would look at historical day-over-day positive changes in the start of day (''SOD'') volatility component of a Member's Required Deposit [21] (the volatility component is referred to as the ''Volatility Charge'') over a 100-day look-back period and would be calculated to equal the exponentially weighted moving average (''EWMA'') of such changes to the Member's Volatility Charge during the look-back period. MRD MTM would look at historical day-over-day increases to the SOD mark-to-market component of a Member's Required Deposit [22] over a 100-day look-back period and would be calculated to equal the EWMA of such changes to the Member's SOD mark-to-market component during the look-back period. The MRD would be calculated to equal the sum of MRD VaR and MRD MTM times a multiplier calibrated based on backtesting results. NSCC has determined that a 100-day look-back period would provide a sufficient time series to reflect current market conditions.

By addressing the day-over-day changes to each Member's SOD Volatility Charge and SOD mark-to-market component, NSCC states that the MRD would help mitigate the risks posed to NSCC by un-margined day-over-day fluctuations to a Member's portfolio resulting from intraday trading activity that would be guaranteed during the coverage gap.

2. Coverage Component

The Coverage Component is designed by NSCC to mitigate the risks associated with a Member's Required Deposit being insufficient to cover projected liquidation losses to the Coverage Target by adjusting a Member's Required Deposit towards the Coverage Target. NSCC would face increased exposure to a Member's un-margined portfolio as a result of the proposed accelerated trade guaranty and would have an increased need to have each Member's Required Deposit meet the Coverage Target. The Coverage Component would supplement the MRD by preemptively increasing a Member's Required Deposit by an amount calculated to forecast potential deficiencies in the margin coverage of a Member's guaranteed portfolio. The preemptive nature of the Coverage Component differentiates it from NSCC's current Backtesting Charge [23] (to be renamed as the ''Regular Backtesting Charge'' pursuant to this proposal, as described below) and the Intraday Backtesting Charge, both of which are backwards looking increases to the Member's Required Deposit to above the Coverage Target.

The Coverage Component would be calculated and charged on a daily basis as a part of each Member's Required Deposit. To calculate the Coverage Component, NSCC would compare the simulated liquidation profit and loss of a Member's portfolio, using the actual positions in the Member's portfolio and the actual historical returns on the security positions in the portfolio, against the sum of each of the following components of the Clearing Fund formula: Volatility Charge, the MRD, Illiquid Charge, and Market Maker Domination Charge (collectively, ''Market Risk Components''). The results of that calculation would determine if there were any deficiencies between the amounts collected by these components and the simulated profit and loss of the Member's portfolio that would have been realized had it been liquidated during a 100-day look-back period.

[13] *Supra* note 4.

[14] The proposed accelerated trade guaranty would not apply to items not currently guaranteed today.

[15] *Supra* note 4.

[16] *Id.*

[17] *Id.*

[18] *Id.*

[19] NSCC collects Required Deposits from all Members as margin to protect NSCC against losses in the event of a Member's default. The objective of the Required Deposit is to mitigate potential losses to NSCC associated with liquidation of the Member's portfolio if NSCC ceases to act for a Member (*i.e.,* a ''default''). NSCC determines Members' Required Deposit amounts using a risk-based margin methodology that is intended to capture market price risk. The methodology uses historical market moves to project or forecast the potential gains or losses on the liquidation of a defaulting Member's portfolio, assuming that a portfolio would take three days to liquidate or hedge in normal market conditions. The projected liquidation gains or losses are used to determine the Member's Required Deposit, which is calculated to cover projected liquidation losses to be at or above a 99 percent confidence level (''Coverage Target''). Notice, *supra* note 3.

[20] The coverage gap is the period between the time that NSCC would guarantee a trade and the time that NSCC would collect additional margin to cover such trade.

[21] The Volatility Charge component of the Clearing Fund formula for CNS trades and Balance Order trades is described in Procedure XV, Sections I.(A)(1)(a) and I.(A)(2)(a), respectively.

[22] The SOD mark-to-market component of the Clearing Fund formula for CNS trades consists of Regular Mark-to-Market and ID Net Mark-to-Market, which are described in Procedure XV, Sections I(A)(1)(b) and I(A)(1)(c), respectively. The SOD mark-to-market component of the Clearing Fund formula for Balance Order trades is described in Procedure XV, Section I(A)(2)(b).

[23] Rules, Procedure XV, Section I(B)(3), *supra* note 4.

NSCC would then determine a daily ''peak deficiency'' amount for each Member equal to the maximum deficiency over a rolling 10 business day period for the preceding 100 days. The Coverage Component would be calculated to equal the EWMA of the peak deficiencies over the 100-day look-back period.

3. Intraday Backtesting Charge

NSCC currently employs daily backtesting to determine the adequacy of each Member's Required Deposit. NSCC compares the Required Deposit [24] for each Member with the simulated liquidation profit and loss using the actual positions in the Member's portfolio and the actual historical returns on the security positions in the portfolio. NSCC investigates the cause of any backtesting deficiencies. As a part of this investigation, NSCC pays particular attention to Members with backtesting deficiencies that bring the results for that Member below the Coverage Target to determine if there is an identifiable cause of repeat backtesting deficiencies. NSCC also evaluates whether multiple Members experience backtesting deficiencies for the same underlying reason. Upon implementation of the accelerated trade guaranty, NSCC would employ a similar backtesting process on an intraday basis to determine the adequacy of each Member's Required Deposit. However, instead of backtesting a Member's Required Deposit against the Member's SOD portfolio, NSCC would use portfolios from two intraday time slices.[25]

NSCC's objective with the Intraday Backtesting Charge is to increase Required Deposits for Members that are likely to experience intraday backtesting deficiencies on the basis described above by an amount sufficient to maintain such Member's intraday backtesting coverage above the Coverage Target. Members that maintain consistent end of day positions but have a high level of intraday trading activity pose risk to NSCC if they were to default intraday.

Because the intraday trading activity and size of the intraday backtesting deficiencies vary among impacted Members, NSCC would assess an Intraday Backtesting Charge that is specific to each impacted Member. To do so, NSCC would examine each impacted Member's historical intraday backtesting deficiencies observed over the prior 12-month period to identify the five largest intraday backtesting deficiencies that have occurred during that time. The presumptive Intraday Backtesting Charge amount would equal that Member's fifth largest historical intraday backtesting deficiency, subject to adjustment as further described below. NSCC believes that applying an additional margin charge equal to the fifth largest historical intraday backtesting deficiency to a Member's Required Deposit would have brought the Member's historically observed intraday backtesting coverage above the Coverage Target.[26]

Although the fifth largest historical backtesting deficiency for a Member would be used as the Intraday Backtesting Charge in most cases, NSCC would retain discretion to adjust the charge amount based on other circumstances that might be relevant for assessing whether an impacted Member is likely to experience future backtesting deficiencies and the estimated size of such deficiencies. According to NSCC, examples of relevant circumstances that could be considered by NSCC in calculating the final, applicable Intraday Backtesting Charge amount include material differences among the Member's five largest intraday backtesting deficiencies observed over the prior 12-month period, variability in the net settlement activity after the collection of the Member's Required Deposit, and observed market price volatility in excess of the Member's historical Volatility Charge. Based on NSCC's assessment of the impact of these circumstances on the likelihood, and estimated size, of future intraday backtesting deficiencies for a Member, NSCC could, in its discretion, adjust the Intraday Backtesting Charge for such Member in an amount that NSCC determines to be more appropriate for maintaining such Member's intraday backtesting results above the Coverage Target.

In order to differentiate the Backtesting Charge assessed on the start of the day portfolio from the Backtesting Charge assessed on an intraday basis, NSCC would amend the Rules by adding a defined term ''Regular Backtesting Charge'' to Procedure XV, Section I.(B)(3).[27]

If NSCC determines that an Intraday Backtesting Charge should apply to a Member who was not assessed an Intraday Backtesting Charge during the immediately preceding month or that the Intraday Backtesting Charge applied to a Member during the previous month should be increased, NSCC would notify the Member on or around the 25th calendar day of the month prior to the assessment of the Intraday Backtesting Charge or prior to the increase to the Intraday Backtesting Charge, as applicable, if not earlier.

NSCC would impose the Intraday Backtesting Charge as an additional charge applied to each impacted Member's Required Deposit on a daily basis for a one-month period and would review each applied Intraday Backtesting Charge each month. However, the Intraday Backtesting Charge would only be applicable to those Members whose overall 12-month trailing intraday backtesting coverage falls below the Coverage Target. If an impacted Member's trailing 12-month intraday backtesting coverage exceeds the Coverage Target (without taking into account historically imposed Intraday Backtesting Charges), the Intraday Backtesting Charge would be removed.

(C) Enhanced Intraday Mark-to-Market Margining

NSCC proposes to enhance its current intraday margining to further mitigate the intraday coverage gap risk that may be introduced to NSCC as a result of the proposed accelerated trade guaranty. As part of its Clearing Fund formula, NSCC currently collects a SOD mark-to-market margin, which is designed to mitigate the risk arising out of the value change between the contract/settlement value of a Member's open positions and the current market value. A Member's SOD mark-to-market margin is calculated and collected daily as part of a Member's daily Required Deposit based on the Member's prior end-of-day positions. The SOD mark-to-market component of the daily Required Deposit is calculated to cover a Member's exposure due to market moves and/or trading and settlement activity by bringing the portfolio of open positions up to the current market value.

Because the SOD mark-to-market component is calculated only once daily using the prior end-of-day positions and prices, it does not cover a Member's exposure arising out of any intraday changes to position and market value in a Member's portfolio. For such

[24] For backtesting comparisons, NSCC uses the Required Deposit amount without regard to the actual collateral posted by the Member.

[25] Intraday time slices are subject to change based upon market conditions and would include the positions from SOD plus any additional positions up to that time.

[26] Intraday backtesting would include 500 observations per year (twice per day over 250 observation days). Each occurrence of a backtesting deficiency would reduce a Member's overall backtesting coverage by 0.2 percent (1 exception/500 observations). Accordingly, an Intraday Backtesting Charge equal to the fifth largest backtesting deficiency would have brought backtesting coverage up to 99.2 percent.

[27] *Supra* note 4.

exposure, the Volatility Charge already collected from each Member as part of the Member's daily Required Deposit is calculated to cover projected changes in the contract/settlement value of a Member's portfolio, which should be sufficient to cover intraday changes to a Member's portfolio, and thus NSCC's risk of loss as a result of that Member's intraday activities. However, in certain instances, a Member could have intraday mark-to-market changes that are significant enough that NSCC is exposed to an increased risk of loss that would not be covered by the Member's Volatility Charge. To monitor and account for these instances, NSCC measures each Member's intraday mark-to-market exposure against the Volatility Charge twice daily and collects an intraday mark-to-market amount from any Member whose intraday mark-to-market exposure meets or exceeds 100 percent of the Member's Volatility Charge, although NSCC may lower that threshold and measure exposure more often during volatile market conditions. NSCC believes that such Members pose an increased risk of loss to NSCC because the coverage provided by the Volatility Charge, which is designed to cover estimated losses to a portfolio over a specified time period, would be exhausted by an intraday mark-to-market exposure so large that the Member's Required Deposit would potentially be unable to absorb further intraday losses to the Member's portfolio.

To further mitigate the risk posed to NSCC by the proposed accelerated trade guaranty, NSCC is proposing to enhance its collection of intraday mark-to-market margin by imposing the intraday mark-to-market margin amount at a lower threshold. With this proposal, instead of collecting intraday mark-to-market margin if a Member's intraday mark-to-market exposure meets or exceeds 100 percent of the Member's Volatility Charge, NSCC would make an intraday margin call if a Member's intraday mark-to-market exposure meets or exceeds 80 percent of the Member's Volatility Charge (while still retaining the ability to reduce the threshold during volatile market conditions). This proposed change would serve to collect more intraday margin earlier and more proactively preserve the coverage provided by a Member's Volatility Charge and Required Deposit.

Finally, to ensure that Members are aware that NSCC regularly monitors and considers intraday mark-to-market as part of its regular Clearing Fund formula and understand the circumstances and criteria for the assessment of an intraday mark-to-market call, NSCC proposes to amend Procedure XV to include a comprehensive description of the enhanced intraday mark-to-market margin charge and the proposed new criteria NSCC would use to assess it.

(D) Loss Allocation Provision for Off-the-Market Transactions

NSCC proposes to introduce a new loss allocation provision for any trades that fall within the proposed definition of ''Off-the-Market Transactions.'' This loss allocation provision would be designed to limit NSCC's exposure to certain trades that have a price that differs significantly from the prevailing market price for the underlying security at the time the trade is executed. It would apply in the event that NSCC ceases to act for a Member that engaged in Off-the-Market Transactions and only to the extent that NSCC incurs a net loss in the liquidation of such Transactions.[28]

NSCC would define ''Off-the-Market Transaction'' as a single transaction (or a series of transactions settled within the same trade cycle) that is (i) greater than $1 million in gross proceeds, and (ii) at trade price that differs significantly (*i.e.,* either higher or lower) from the most recently observed market price, at the time the trade was submitted to NSCC, by a percentage amount determined by NSCC based upon market conditions and factors that impact trading behavior of the underlying security, including volatility, liquidity and other characteristics of such security.

In addition to defining Off-the-Market Transactions, the proposed change would establish the loss allocation for when they occur. Specifically, any net losses to NSCC resulting from the liquidation of a guaranteed, Off-the-Market Transaction of a defaulted Member would be allocated directly and entirely to the surviving counterparty to that transaction, or on whose behalf the Off-the-Market Transaction was submitted to NSCC. Losses would be allocated to counterparties in proportion to their specific Off-the-Market Transaction gain and would be allocated only to the extent of NSCC's loss; however, no allocation would be made if the defaulted Member has satisfied all requisite intraday mark-to-market margin assessed by NSCC with respect to the Off-the-Market Transaction.[29]

According to NSCC, this proposed change would allow NSCC to mitigate the risk of loss associated with guaranteeing these Off-the-Market Transactions. NSCC has recognized that applying the accelerated trade guaranty to transactions whose price significantly differs from the most recently observed market price could inappropriately increase the loss that NSCC may incur if a Member that has engaged in Off-the-Market Transactions defaults and its open, guaranteed positions are liquidated. Members not involved in Off-the-Market Transactions, or not involved in Off-the-Market Transactions that result in losses to NSCC, would not be included in this process. This exclusion would apply only to losses that are attributable to Off-the-Market Transactions and would not exclude Members from other obligations that may result from any loss or liabilities incurred by NSCC from a Member default.

To implement this proposed change, NSCC would amend Rule 4 [30] (Clearing Fund) to provide that, if a loss or liability of NSCC is determined by NSCC to arise in connection with the liquidation of any Off-the-Market Transactions, such loss or liability would be allocated directly to the surviving counterparty to the Off-the-Market Transaction that submitted the transaction to NSCC for clearing. NSCC also would amend Rule 1 [31] (Definitions and Descriptions) to include a definition of Off-the-Market Transactions.

(E) Other Related and Technical Changes

1. Removing the Specified Activity Charge

Currently, NSCC collects a Specified Activity charge, which is designed to cover the risk posed to NSCC by transactions that settle on a T+2, T+1, or T timeframe.[32] Because such transactions may be guaranteed by NSCC prior to the collection of margin, they pose an increased risk to NSCC (a similar risk that posed to NSCC by the proposed accelerated trade guaranty). The Specified Activity charge currently mitigates this risk by increasing the Required Deposit for a Member in relation to the number of Specified Activity trades submitted to NSCC by the Member over a 100-day look-back period. However, according to NSCC,

[28] A net loss on liquidation of the Off-the-Market Transaction means that the loss on liquidation of the Member's portfolio exceeds the collected Required Deposit of the Member and such loss is attributed to the Off-the-Market Transaction.

[29] A Member's Off-the-Market Transaction that has been marked to market is, by definition, no longer an Off-the-Market Transaction when the mark-to-market component of the Member's Required Deposit is satisfied.

[30] *Supra* note 4.

[31] *Id.*

[32] Examples of these trades can include next day settling trades, same day settling trades, cash trades, and sellers' options.

the addition of the proposed MRD and Coverage Components to the Clearing Fund formula would mitigate the risks posed by trades guaranteed by NSCC prior to the collection of margin on those trades, thereby obviating the need to collect a separate Specified Activity charge. Accordingly, because it would be duplicative of the MRD and Coverage Components that are being added to the Clearing Fund Formula, NSCC proposes to eliminate the Specified Activity charge.

2. Eliminating Delay in Processing and Reporting of Next Day Settling Index Receipts

Next day settling index receipts may be guaranteed prior to the collection of margin reflecting such trades and thus carry a risk similar to the risk posed by Specified Activity trades described above. More specifically, because these trades are settled on the day after they are received and validated by NSCC, NSCC currently attaches its guaranty to them at the time of validation, prior to the collection of a Required Deposit that reflects such trades. Unlike the risk from Specified Activity trades, which is mitigated by the Specified Activity charge, the risk for next day settling index receipts is currently mitigated by permitting NSCC to delay the processing and reporting of these trades if a Member's Required Deposit is not paid on time. However, as with the risk associated with Specified Activity, under the proposed change, this risk would generally be mitigated by the addition of the MRD and Coverage Component. Therefore, NSCC proposes to amend Procedure II of the Rules [33] (Trade Comparison and Recording Service) to remove the language that permits NSCC to delay the processing and reporting of next day settling index receipts until the applicable margin on these transactions is paid.

3. Clarifying That the MRD and Coverage Component Should not Be Included in the Calculation of a Member's Excess Capital Premium Charge

The Excess Capital Premium charge [34] is designed to address significant, temporary increases in a Member's Required Deposit based upon any one day of activity. It is not designed to provide additional Required Deposits over an extended period of time. Currently, the Excess Capital Premium charge for a Member is calculated based upon the Member's Required Deposit and the Member's excess net capital. The Premium is the amount by which a Member's Required Deposit exceeds its excess regulatory capital multiplied by the Member's ratio of Required Deposit to excess regulatory capital, expressed as a percent. Because they would be new components of a Member's Required Deposit under the current proposal, the MRD and Coverage Component would necessarily be included in the calculation of a Member's Excess Capital Premium. However, the MRD and Coverage Component each utilize a historical look-back period, which accounts for the risk of such activity well after the relevant trades have settled. Risks related to such trades would be reflected in increased amounts assessed for these components over the subsequent time periods. If these components are included in the calculation of the Excess Capital Premium, especially during periods following an increase in activity, the increased MRD and Coverage Component could lead to more frequent Excess Capital Premium charges over an extended period of time. According to NSCC, this is not the intended purpose of the Excess Capital Premium and could place an unnecessary burden on Members. Accordingly, NSCC proposes to exclude these charges from the calculation of the Excess Capital Premium.

4. Removing Reference to ID Net Subscribers

NSCC also proposes to change Procedure XV [35] to clarify how the ''Regular Mark-to-Market'' component of the Required Deposit for CNS transactions is calculated. The Mark-to-Market component of a Member's Required Deposit is designed to protect NSCC from risk of loss based on changes to the value of a Member's portfolio and therefore may result in a debit to a Member (*i.e.,* NSCC would collect more Required Deposit), but cannot result in a credit from NSCC to a Member. Accordingly, if a Member's mark-to-market calculation for a CNS or Balance Order trade results in a credit to the Member, NSCC's policy is to adjust the calculation to zero, thereby avoiding a credit from NSCC to the Member. When NSCC implemented the ID Net service,[36] it added a provision to Procedure XV [37] that explicitly stated this policy with respect to CNS transactions of subscribers to the ID Net service. According to NSCC, this change inadvertently created an implication that the calculation of Regular Mark-to-Market credit for Members who were not ID Net Subscribers would not be set to zero. NSCC proposes to revise the applicable provision of Procedure XV to remove the reference to ID Net Subscribers.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act [38] directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. The Commission believes the Proposed Rule Change is consistent with Section 17A(b)(3)(F) of the Act and Rules 17Ad–22(b)(1) and (b)(2) under the Act,[39] as described in detail below.

A. Consistency With Section 17A of the Act

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds which are in the custody and control of NSCC or for which it is responsible, and to protect investors and the public interest.[40] First, the Commission believes that the Proposed Rule Change is consistent with promoting prompt and accurate clearance and settlement. As described above, NSCC proposes to accelerate its trade guaranty for CNS trades and Balance Order trades from midnight of T+1 to the point of trade validation. This earlier guaranty would promote prompt and accurate clearance and settlement for Members because the counterparty credit risk that Members currently hold until NSCC's guaranty applies at midnight of T+1 would shift to NSCC almost immediately upon NSCC's receipt of the trade on T. Because NSCC risk manages its guaranteed transactions, NSCC is able to better ensure that trades settle if a counterparty defaults.

The above-described proposed changes to NSCC's margin methodology (*i.e.,* the addition of the MRD, Coverage Component, and Intraday Backtesting Charge), along with the proposed reduction of NSCC's intraday mark-to-

[33] *Supra* note 4.

[34] As stated above, the Excess Capital Premium is a charge imposed on a Member when the Member's Required Deposit exceeds its excess net capital, as described in Procedure XV of the Rules. Rules, *supra* note 4.

[36] *Supra* note 6.

[37] *Supra* note 4.

[38] 15 U.S.C. 78s(b)(2)(C).

[39] 15 U.S.C. 78q–1(b)(3)(F); 17 CFR 240.17Ad–22(b)(1); 17 CFR 240.17Ad–22(b)(2).

[40] 15 U.S.C. 78q–1(b)(3)(F).

margin threshold, also would promote prompt and accurate clearance and settlement at NSCC because they would improve NSCC's ability to collect margin. Likewise, the proposed loss allocation provision for off-the-market transactions would promote prompt and accurate clearance and settlement at NSCC by helping to protect NSCC from losses due to transactions of a defaulted Member that were made at prices significantly different from the prevailing market price at the time of the trade. Collectively, these proposed changes would enable NSCC to manage better the additional risk that would result from the proposed accelerated guaranty, ensuring that NSCC could continue prompt clearance and settlement in a stress environment.

Second, the Commission believes that the Proposed Rule Change, as described above, are consistent with safeguarding funds within NSCC's control. NSCC's proposal to add the three new components to its margin methodology (*i.e.*, the MRD, Coverage Component, and Intraday Backtesting Charge) would enable NSCC to collect more margin, thereby safeguarding existing margin funds within NSCC's control with respect to the potential default of a Member. By collecting more margin, NSCC would be in a better position to manage the counterparty credit risk presented by Members, particularly the additional counterparty credit risk from the proposed accelerated trade guaranty. Similarly, the proposal to lower the threshold for collection of intraday mark-to-margin by collecting intraday mark-to-market margin when NSCC's exposure to a Member meets or exceeds 80 percent of that Member's Volatility Charge, rather than 100 percent, would enhance NSCC's intraday mark-to-market margin practice by allowing NSCC to collect more intraday margin stemming from intraday price fluctuations more often. As such, the proposed threshold reduction would also promote safeguarding funds within NSCC's control. With respect to the proposed change to introduce a new loss allocation provision for certain off-the-market transactions, it too would promote safeguarding funds within NSCC's control, as it would help protect NSCC from transactions of a defaulted Member that were made at prices that differed significantly from the prevailing market price at the time the trade is executed and resulted in a loss to NSCC in connection with NSCC's liquidation of the transaction.

Third, the Commission believes that the Proposed Rule Change is consistent with protecting investors and the public interest. As described above, by providing a trade guaranty at an earlier point in the settlement cycle, counterparty credit risk also would transfer from Members, which are not CCPs, to NSCC, which is a third-party CCP that risk-manages its guaranteed transactions, at an earlier point in the settlement cycle. Because NSCC risk manages its guaranteed transactions, NSCC is able to better ensure that trades settle if a counterparty defaults. Thus, the proposed accelerated process would help reduce protect investors and the public interest by mitigating Members' exposure to a counterparty default earlier in the settlement cycle and by providing an earlier assurance that transactions will settle despite a Member default.

At the same time, the three proposed additions to NSCC's margin methodology, the proposed reduction of NSCC's intraday mark-to-margin threshold, and the proposed loss allocation provision for off-the-market transactions, as described above, would also help mitigate the systemic risks that NSCC presents as a CCP because they would improve NSCC's margining abilities and help protect NSCC against potential losses from a Member default. Accordingly, the proposed changes would therefore protect investors and the public interest by promoting the stability of the broader financial system.

B. Consistency With Rule 17Ad–22(b)(1)

Rule 17Ad–22(b)(1) under the Act requires a CCP, such as NSCC, to, among other things, ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . limit its exposures to potential losses from defaults by its participants under normal market conditions . . . '' As described above, because the proposed accelerated trade guaranty would transfer counterparty credit risk to NSCC at an earlier point in the settlement cycle, NSCC proposes to enhance its margin methodology by adding three new margin components and by lowering the threshold for the intraday mark-to-market margin collection. It also proposes to establish a loss allocation provision for off-the-market transactions. These proposed changes are designed to limit NSCC's exposure to potential losses from the default of a Member by enabling NSCC to collect more margin, better manage when it collects margin, and protect itself from certain losses of a defaulted Member. Therefore, the Commission believes that the Proposed Rule Change would be consistent with Rule 17Ad–22(b)(1).

C. Consistency With Rule 17Ad–22(b)(2)

Rule 17Ad–22(b)(2) under the Act requires a CCP, such as NSCC, to, among other things, ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . [u]se margin requirements to limit its credit exposures to participants under normal market conditions and use risk-based models and parameters to set margin requirements . . . '' Again, the proposal would add three new components to NSCC's margin methodology (*i.e.*, the MRD, Coverage Component, and Intraday Backtesting Charge), which use risk based models and parameters to calculate charges, and would lower the threshold at which NSCC would make an intraday mark-to-market margin call. As such, the proposal would help NSCC better account for and cover its credit exposure to Members. In addition, by establishing the proposed margin components and the new intraday mark-to-market margin collection threshold, the proposal is consistent with using risk-based models and parameters to set margin requirements. Therefore, the Commission believes that the Proposed Rule Change would be consistent with Rule 17Ad–22(b)(2).

III. Conclusion

On the basis of the foregoing, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act[41] and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that proposed rule change SR–NSCC–2016–005 be, and hereby is, *approved* as of the date of this order or the date of a notice by the Commission authorizing NSCC to implement NSCC's advance notice proposal that is consistent with this proposed rule change (SR–NSCC–2016–803), whichever is later.[42]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[43]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79600; File No. SR–BatsBZX–2016–91]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Participant Fee Applicable to Options Members of Its Equity Options Platform

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 15, 2016, Bats BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members [5] and non-members of the Exchange pursuant to BZX Rules 15.1(a) and (c) to adopt a Participant Fee applicable to Options Members [6] of its equity options platform (''BZX Options'').

The text of the proposed rule change is available at the Exchange's Web site at *www.bats.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

[6] The term ''Options Member'' is defined as ''a firm, or organization that is registered with the Exchange pursuant to Chapter XVII of these Rules for purposes of participating in options trading on BZX Options as an 'Options Order Entry Firm' or 'Options Market Maker.' '' *See* Exchange Rule 16.1(a)(38).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule for BZX Options to adopt a Participant Fee applicable to Options Members. The Exchange believes the Participant Fee with help recoup costs related to the administration of Options Members. As proposed, Options Members would pay a Participant Fee of $500 per month where they have an ADV [7] of less than 5,000 contracts traded or $1,000 per month where they have an ADV equal to or greater than 5,000 contract traded. New Options Members would not be charged a Participant Fee for their first three (3) month of membership on BZX Options. The Exchange proposes to implement the Participant Fee on January 3, 2017.[8]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[9] in general, and furthers the objectives of Section 6(b)(4),[10] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, for example, the Commission indicated that market forces should generally determine the price of non-core market data because national market system regulation ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [11] Likewise, in *NetCoalition* v. *NYSE Arca, Inc.*[12] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[13] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [14]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [15] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange believes the adoption of a Participant Fee for Options Members is equitable and reasonable because the Exchange is seeking to recoup costs related to membership administration. Depending on the Options Member's ADV, the proposed fee is either less than or equal to that charged by the Nasdaq Stock Market LLC (''Nasdaq'').[16] The Exchange also believes it is equitable and not unfairly discriminatory to charge a lower Participant Fee to those Options Members with an ADV less than 5,000

[7] As defined in the BZX Options fee schedule.

[8] The Exchange notes that the date of the fee schedule was amended to January 3, 2017 in SR–BatsBZX–2016–90 (December 14, 2016).

[9] 15 U.S.C. 78f.

[10] 15 U.S.C. 78f(b)(4).

[11] Securities Exchange Act Release No. 51808 at 37499 (June 9 [sic], 2005) (''Regulation NMS Adopting Release'').

[12] *NetCoalition* v. *NYSE Arca, Inc.,* 615 F.3d 525 (D.C. Cir. 2010).

[13] See *NetCoalition,* at 534.

[14] *Id.* at 537.

[15] *Id.* at 539 (quoting ArcaBook Order, 73 FR at 74782–74783).

[16] *See* Nasdaq Options Rules Chapter XV, Section 10, Participant Fee—Options (charging a Participant Fee of $1,000 to all Nasdaq options participants, regardless of volume). *See also* Securities Exchange Act Release Nos. 68502 (December 20, 2012), 77 FR 76572 (December 28, 2012) (SR–Nasdaq–2012–139); *and* 76760 (December 23, 2015), 80 FR 81562 (December 30, 2015) (SR–Nasdaq–2015–154).

contracts traded.[17] The lower fee, coupled with not charging new Options Members the Participant Fee during their first three (3) months of membership, is designed to encourage membership and to allow firms to grow their business on BZX Options. Therefore, the Exchange believes the proposed tiered Participant Fee if equitable, reasonable, and not unfairly discriminatory because it is designed to recoup costs related to membership administration while not serving as a deterrent to firms seeking to become new members of BZX Options.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed Participant Fee will not impose an undue burden on competition because the Exchange will uniformly assess the participant fee on all Member based on their ADV of contracts traded. The Exchange does not believe that the proposed changes represent a significant departure from pricing offered by the Exchange's competitors.[18] Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value or if they view the proposed fee as excessive. Further, excessive fees for participation would serve to impair an exchange's ability to compete for order flow and members rather than burdening competition.

[17] The fee is also less than similar fees charged by other exchanges, some of which also charged different rates based on the type of member or that member's participation on that exchange. *See e.g.,* The Chicago Board Options Exchange, Incorporated's Fees Schedule (charging per month a Market Maker Trading Permit is $5,500, an SPX Tier appointment is $3,000, a VIX Tier Appointment is $2,000, and an electronic Access Permit is $1,600); the International Securities Exchange LLC's Schedule of Fees (charging per month an Electronic Access Member is assessed $500.00 for membership and a market maker is assessed from $2,000 to $4,000 per membership depending on the type of market maker); C2 Options Exchange, Incorporated's Fees Schedule (charging per month, a market-maker is assessed a $5,000 permit fee, an Electronic Access Permit is assessed a $1,000 permit fee); *and* NYSE Arca, Inc.'s Fee Schedule (charging per month, a Clearing Firm is assessed a $1,000 per month fee for the first Options Trading Permit (''OTP'') and $250 thereafter, and a market maker is assessed a permit based on the maximum number of OTPs held by an OTP Firm or OTP Holder during a calendar month ranging from $1,000 to $6,000 a month).

[18] *Id.*

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [19] and paragraph (f) of Rule 19b–4 thereunder.[20] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsBZX–2016–91 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsBZX–2016–91. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBZX–2016–91 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79589; File No. SR–CBOE–2016–086]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Debit/Credit Price Reasonability Checks for Complex Orders

December 19, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2016, Chicago Board Options Exchange, Incorporated (''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the debit/credit price reasonability check for complex orders. The text of the proposed rule change is provided below.

(additions are *italicized;* deletions are [bracketed])

* * * * *

Chicago Board Options Exchange, Incorporated Rules

* * * * *

Rule 6.53C. Complex Orders on the Hybrid System

(a)–(d) No change.

. . . *Interpretations and Policies:*

.01–.07 No change.

.08 Price Check Parameters: On a class-by-class basis, the Exchange may determine (and announce to the Trading Permit Holders via Regulatory Circular) which of the following price check parameters will apply to eligible complex orders. Paragraphs (b) and (e) will not be applicable to stock-option orders.

For purposes of this Interpretation and Policy .08:

Vertical Spread. A ''vertical'' spread is a two-legged complex order with one leg to buy a number of calls (puts) and one leg to sell the same number of calls (puts) with the same expiration date but different exercise prices.

Butterfly Spread. A ''butterfly'' spread is a three-legged complex order with two legs to buy (sell) the same number of calls (puts) and one leg to sell (buy) twice as many calls (puts), all with the same expiration date but different exercise prices, and the exercise price of the middle leg is between the exercise prices of the other legs. If the exercise price of the middle leg is halfway between the exercise prices of the other legs, it is a ''true'' butterfly; otherwise, it is a ''skewed'' butterfly.

Box Spread. A ''box'' spread is a four-legged complex order with one leg to buy calls and one leg to sell puts with one strike price, and one leg to sell calls and one leg to buy puts with another strike price, all of which have the same expiration date and are for the same number of contracts.

To the extent a price check parameter is applicable, the Exchange will not automatically execute an eligible complex order that is:

(a)–(b) No change.

(c) Debit/Credit Price Reasonability Checks:

(1) No change.

(2) The System defines a complex order as a debit or credit as follows:

(A)–(B) No change.

(C) an order for which all pairs and loners are debits (credits) is a debit (credit). For purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and [both]*the* legs have the same expiration date but different exercise prices or, for all options except European-style index options, [the same exercise price but]different expiration dates *and the exercise price for the call (put) with the farther expiration date is the same as or lower (higher) than the exercise price for the nearer expiration date.* A ''loner'' is any leg in an order that the System cannot pair with another leg in the order (including legs in orders for European-style index options that have the same exercise price but different expiration dates). The System treats the stock leg of a stock-option order as a loner.

(i) No change.

(ii) The System then, for options except European-style index options, pairs legs to the extent possible [with the same exercise prices]across expiration dates, pairing one [leg]*call (put)* with the [leg]*call (put)* that has the next nearest expiration date *and the same or next lower (higher) exercise price.*

(iii) A pair of calls is a credit (debit) if the exercise price of the buy (sell) leg is higher than the exercise price of the sell (buy) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the [pair has the same]exercise price *of the sell (buy) leg is the same as or lower than the exercise price of the buy (sell) leg*).

(iv) A pair of puts is a credit (debit) if the exercise price of the sell (buy) leg is higher than the exercise price of the buy (sell) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the [pair has the same]exercise price *of the sell (buy) leg is the same as or higher than the exercise price of the buy (sell) leg*).

(v) No change.

The System does not apply the check in subparagraph (1) to an order for which the System cannot define whether it is a debit or credit.

(3)–(6) No change.

(d)–(g) No change.

.09–.12 No change.

* * * * *

The text of the proposed rule change is also available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change amends the debit/credit price reasonability check for complex orders in Rule 6.53C, Interpretation and Policy .08(c) to expand its applicability. Pursuant to the debit/credit price reasonability check, the System rejects back to the Trading Permit Holder any limit order for a debit strategy with a net credit price or any limit order for a credit strategy with a net debit price, and cancels any market order (or any remaining size after partial execution of the order) for a credit strategy that would be executed at a net debit price. The System defines a complex order as a debit (credit) if all pairs and loners are debits (credits).[3] For purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and both legs have the same expiration date but different exercise prices or, for all options except European-style index options, the same exercise price but different expiration dates. A ''loner'' is any leg in an order that the System cannot pair with another leg in the order (including legs in orders for European-style index options that have the same exercise price but different expiration dates).[4]

(1) The System first pairs legs to the extent possible within each expiration

[3] Rule 6.53C, Interpretation and Policy .08(c)(2)(C). The System also determines certain call and put butterfly spreads as debits and credits. *See* Rule 6.53C, Interpretation and Policy .08(c)(2)(A) and (B).

[4] The System treats the stock leg of a stock-option order as a loner.

date, pairing one leg with the leg that has the next highest exercise price.

(2) The System then, for options except European-style index options, pairs legs to the extent possible with the same exercise prices across expiration dates, pairing one leg with the leg that has the next nearest expiration date.

(3) A pair of calls is a credit (debit) if the exercise price of the buy (sell) leg is higher than the exercise price of the sell (buy) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the pair has the same exercise price).

(4) A pair of puts is a credit (debit) if the exercise price of the sell (buy) leg is higher than the exercise price of the buy (sell) leg (if the pair has the same expiration date) or if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the pair has the same exercise price).

(5) A loner to buy is a debit, and a loner to sell is a credit.

The System does not apply the check in subparagraph (1) to an order for which the System cannot define whether it is a debit or credit.

As discussed in the rule filing proposing the current check, the System determines whether an order is a debit or credit based on general options volatility and pricing principles, which the Exchange understands are used by market participants in their option pricing models.[5] With respect to options with the same underlying:

- If two calls have the same expiration date, the price of the call with the lower exercise price is more than the price of the call with the higher exercise price;
- if two puts have the same expiration date, the price of the put with the higher exercise price is more than the price of the put with the lower exercise price; and
- if two calls (puts) have the same exercise price, the price of the call (put) with the nearer expiration is less than the price of the call (put) with the farther expiration.

In other words, a call (put) with a lower (higher) exercise price is more expensive than a call (put) with a higher (lower) exercise price, because the ability to buy stock at a lower price is more valuable than the ability to buy stock at a higher price, and the ability to sell stock at a higher price is more valuable than the ability to sell stock at a lower price. A call (put) with a farther expiration is more expensive than the price of a call (put) with a nearer expiration, because locking in a price further into the future involves more risk for the buyer and seller and thus is more valuable, making an option (call or put) with a farther expiration more expensive than an option with a nearer expiration.

Under the current check, the System only pairs calls (puts) if they have the same expiration date but different exercise prices or the same exercise price but different expiration dates. With respect to pairs with different expiration dates but the same exercise price,[6] a pair of calls is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg)[sic], and a pair of puts is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg)[sic]. However, based on the principles described above, if the sell (buy) leg of a pair of calls has a farther expiration date (and thus is more expensive) than the expiration date of the buy (sell) leg as well as a lower exercise price (and thus is more expensive) than the exercise price of the sell (buy) leg, then the pair is a credit (debit) (as is the case if the exercise prices of each call were the same under the current rule). Similarly, if the sell (buy) leg of a pair of puts has a farther expiration date (and thus is more expensive) than the expiration date of the buy (sell) leg as well as a higher exercise price (and thus is more expensive) than the exercise price of the buy (sell) leg, then the pair of puts is a credit (as is the case if the exercise prices of each put were the same under the current rule).

Therefore, the proposed rule change expands this check to pair calls (puts) with different expiration dates if the exercise price for the call (put) with the farther expiration date is lower (higher) than the exercise price for the nearer expiration date in addition to those with different expiration dates and the same exercise price. Specifically, the proposed rule change amends subparagraph (c)(2)(C) to state, for purposes of this check, a ''pair'' is a pair of legs in an order for which both legs are calls or both legs are puts, one leg is a buy and one leg is a sell, and the legs have different expiration dates and the exercise price for the call (put) with the farther expiration date is the same as or lower (higher) than the exercise price for the nearer expiration date. The proposed rule change also amends subparagraphs (c)(2)(C)(ii) through (iv) to incorporate these additional pairs of calls (puts). When pairing legs across expiration dates, the System will pair one call (put) with the call (put) that has the next nearest expiration date and the same or next lower (higher) exercise price. Based on the pricing principles described above, a pair of calls is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the exercise price of the sell (buy) leg is the same as or lower than the exercise price of the buy (sell) leg). A pair of puts is a credit (debit) strategy if the expiration date of the sell (buy) leg is farther than the expiration date of the buy (sell) leg (if the exercise price of the sell (buy) leg is the same as or higher than the exercise price of the buy (sell) leg).[7] Entering a calendar spread with a credit (debit) strategy at a debit (credit) price (or that would execute at a debit (credit) price), which price is inconsistent with the strategy, may result in executions at prices that are extreme and potentially erroneous.

Below are examples demonstrating how the System determines whether a complex order with two legs, which have different expiration dates and exercise prices, is a debit or credit, and whether the System will reject the order pursuant to the debit/credit price reasonability check.[8]

Example #1—Limit Call Spread

A Trading Permit Holder enters a spread to buy 10 Sept 30 XYZ calls and sell 10 Oct 20 XYZ calls at a net debit price of -$10.00. The System defines this order as a credit, because the buy leg is for the call with the nearer expiration date and higher exercise price (and is thus the less expensive leg). The System rejects the order back to the Trading Permit Holder because it is a limit order for a credit strategy that contains a net debit price.

Example #2—Limit Put Spread

A Trading Permit Holder enters a spread to buy 20 Oct 30 XYZ puts and sell 20 Sept 20 XYZ puts at a net credit price of $9.00. The System defines this

[5] Securities Exchange Act Release No. 34–76960 (January 21, 2016), 81 FR 4728 (January 27, 2016) (SR–CBOE–2015–107) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of Proposed Rule Change, as Modified by Amendment Nos. 1 and 2 Thereto, Relating to Price Protection Mechanisms for Quotes and Orders).

[6] A complex order consisting of a buy leg and a sell leg with different expiration dates are commonly referred to in the industry as ''calendar spreads.''

[7] The proposed rule change makes no changes to this check with respect to pairs of orders with the same expiration date but different exercise prices. Therefore, the rule filing omits references to the portions of the current rule related to those pairs to focus on the changes made to pairs with different expiration dates.

[8] The same principles would apply to complex orders with more than two legs, which include two legs that can be paired in this way.

order as a debit, because the buy leg is for the put with the farther expiration date and the higher exercise price (and thus the more expensive leg). The System rejects the order back to the Trading Permit Holder because it is a limit order for a debit strategy that contains a net credit price.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[9] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [10] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [11] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposed rule change expands the applicability of the current debit/credit price reasonability check to additional complex orders for which the Exchange can determine whether the order is a debit or credit. By expanding the orders to which these checks apply, the Exchange can further assist with the maintenance of a fair and orderly market by mitigating the potential risks associated with additional complex orders trading at prices that are inconsistent with their strategies (which may result in executions at prices that are extreme and potentially erroneous), which ultimately protects investors. This proposed expansion of the debit/credit price reasonability check promotes just and equitable principles of trade, as it is based on the same general option and volatility pricing principles the System currently uses to pair calls and puts, which principles the Exchange understands are used by market participants in their option pricing models.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] *Id.*

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change will not impose any burden on intramarket competition, because the debit/credit price reasonability check will continue to apply to all incoming complex orders of all Trading Permit Holders in the same manner. The proposed rule change expands the applicability of the current check to additional complex orders for which the Exchange can determine whether the order is a debit or credit, which will help further prevent potentially erroneous executions and benefits all market participants. The proposed rule change does not impose any burden on intercompany competition, as it is intended to prevent potentially erroneously priced orders from entering CBOE's system and executing on CBOE's market. The Exchange believes the proposed rule change would ultimately provide all market participants with additional protection from anomalous or erroneous executions.

The individual firm benefits of enhanced risk protections flow downstream to counterparties both at the Exchange and at other options exchanges, which increases systemic protections as well. The Exchange believes enhancing risk protections will allow Trading Permit Holders to enter orders and quotes with further reduced fear of inadvertent exposure to excessive risk, which will benefit investors through increased liquidity for the execution of their orders. Without adequate risk management tools, such as the one proposed to be enhanced in this filing, Trading Permit Holders could reduce the amount of order flow and liquidity they provide. Such actions may undermine the quality of the markets available to customers and other market participants. Accordingly, the proposed rule change is designed to encourage Trading Permit Holders to submit additional order flow and liquidity to the Exchange, which may ultimately promote competition. In addition, providing Trading Permit Holders with more tools for managing risk will facilitate transactions in securities because, as noted above, Trading Permit Holders will have more confidence protections are in place that reduce the risks from potential system errors and market events.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (1) Necessary or appropriate in the public interest; (2) for the protection of investors; or (3) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2016–086 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

All submissions should refer to File Number SR–CBOE–2016–086. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2016–086 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2016–30937 Filed 12–22–16; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79594; File No. SR–NYSEArca–2016–164]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending NYSE Arca Rule 3.2 and NYSE Arca Equities Rules 1.1, 3.2, 10.3, 10.8, 10.13, and 14

December 19, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 8, 2016, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Arca Rule 3.2 and NYSE Arca Equities Rules 1.1, 3.2, 10.3, 10.8, 10.13, and 14 to delete outdated references. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the following rules to delete outdated references to the ''NYSE Arca Board of Governors'' in NYSE Arca Rule 3.2 and NYSE Arca Equities Rules 1.1, 3.2, 10.3, 10.8, 10.13, and 14.

In 2016, the Exchange amended, among other rules, Rule 10.8 in order to establish a Committee for Review (''CFR'') as a sub-committee of the Regulatory Oversight Committee (''ROC'').[4] When the Exchange's CFR was created, NYSE Arca Equities Rules 10.3 (Ex Parte Communications), 10.12 (Minor Rule Plan) and 10.13 (Hearing and Review of Decisions) were amended to replace outdated references to the ''NYSE Arca Board of Governors'' with the ''NYSE Arca Board of Directors.''[5] However, outdated references to the ''NYSE Arca Board of Governors'' in NYSE Arca Rule 3.2 and NYSE Arca Equities Rules 1.1, 3.2, 10.3, 10.8, 10.13, and 14 were inadvertently omitted. The Exchange accordingly proposes to replace references to ''Governors'' with ''Directors'' in these rules as follows:

- NYSE Arca Rule 3.2 (Options Committees) governs the organization, structure and membership of NYSE Arca Options committees. NYSE Arca Rule 3.2(b) sets forth the eligibility requirements for three [sic] specific Options Committees, including the Nominating Committee which is governed by Rule 3.2(b)(2). The Exchange proposes one replacement of ''Governors'' with ''Directors'' in subsection (C)(i) of Rule 3.2(b)(2).
- NYSE Arca Equities Rule 1.1(n) defines ETP Holder and describes ETP Holder's limited voting rights to, among other things, nominate directors to the Board of Directors of NYSE Arca. The Exchange proposes to replace ''Governor'' and ''Governors'' with ''Director'' and ''Directors,'' respectively, in NYSE Arca Equities Rule 1.1(n).
- NYSE Arca Equities Rule 3.2 (Equity Committees) governs the organization, structure and membership of NYSE Arca Equities committees. NYSE Arca Equities Rule 3.2(b) sets forth the eligibility requirements for three [sic] specific Options Committees [sic], including the Nominating Committee which is governed by Rule 3.2(b)(2). The Exchange proposes one replacement of ''Governors'' with ''Directors'' in subsection (C)(ii) of Rule 3.2(b)(2). The Exchange also proposes a non-substantive change to delete ''the'' before ''NYSE Arca, Inc.'' in the last section of subsection (C)(ii).
- Subsection (a) of NYSE Arca Equities Rule 10.3 (Ex Parte Communications) governs certain prohibited communications. The Exchange proposes to replace ''Governors'' with ''Directors'' in NYSE Arca Equities Rule 10.3(a)(2)(e) and in NYSE Arca Equities Rule 10.3(a)(3)(d).
- NYSE Arca Equities Rule 10.8 (Review) governs review of review [sic] of disciplinary decisions. The Exchange proposes three replacements of ''Governors'' with ''Directors'' in subsection (c) of NYSE Arca Equities

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 77898 (May 24, 2016), 81 FR 34404 (May 31, 2016) (SR–NYSEArca–2016–11). Specifically, the Exchange amended NYSE Arca Equities Rule 10.8(a) and (b) to replace references to the NYSE Arca Equities Board Appeals Committee with references to the ''Committee for Review'' or ''CFR'' and to replace references to the ''Appeals Panel'' with the ''CFR Appeals Panel.'' *See id.,* 81 FR at 34406. NYSE Arca Equities Rule 10.8(a) and (b) did not contain references to the ''NYSE Arca Board of Governors.''

[5] *See id.,* 81 FR at 34406.

Rule 10.8, and two replacements of ''Governors'' with ''Directors'' in subsection (d).

• NYSE Arca Equities Rule 10.13 (Hearings and Review of Decisions) sets forth procedures for persons aggrieved by certain Exchange actions to seek review of those actions. The Exchange proposes three replacements of ''Governors'' with ''Directors'' in subsection (k) of NYSE Arca Equities Rule 10.13.

• Finally, the Exchange proposes one replacement of ''Governors'' with ''Directors'' in NYSE Arca Equities Rule 14.1 (NYSE Arca, Inc.), which sets forth the plan of delegation of functions by NYSE Arca to NYSE Arca Equities.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Exchange Act [6] in general, and with Section 6(b)(5) [7] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, help to protect investors and the public interest. Specifically, the Exchange believes that replacing outdated references to ''Governors'' with ''Directors'' in the phrase ''NYSE Arca Board of Governors'' and one reference to a ''Governor'' with ''Director'' in the NYSE Arca and NYSE Arca Equities Rules removes impediments to and perfects the mechanism of a free and open market by removing confusion that may result from having obsolete references in the Exchange's rulebook. The Exchange further believes that the proposal removes impediments to and perfects the mechanism of a free and open market by ensuring that persons subject to the Exchange's jurisdiction, regulators, and the investing public can more easily navigate and understand the Exchange's rulebook. The Exchange believes that eliminating obsolete references would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased transparency, thereby reducing potential confusion. Removing such obsolete references will also further the goal of transparency and add clarity to the Exchange's rules.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The proposed rule change is not intended to address competitive issues but rather to delete obsolete references, thereby increasing transparency, reducing confusion, and making the Exchange's rules easier to understand and navigate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [10] normally does not become operative for 30 days after the date of the filing. However, Rule 19b–4(f)(6)(iii) [11] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange notes that the proposed rule change would delete obsolete references, which would reduce confusion and add clarity to its rulebook. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[12]

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[10] 17 CFR 240.19b–4(f)(6).

[11] 17 CFR 240.19b–4(f)(6)(iii).

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2016–164 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–164. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and

[12] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2016–164 and should be submitted on or before January 13, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736.

Extension:

Rule 6a–4, Form 1–N, SEC File No. 270–496, OMB Control No. 3235–0554.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for extension of the previously approved collection of information provided for in Rule 6a–4 and Form 1–N, as discussed below. The Code of Federal Regulation citation to this collection of information is 17 CFR 240.6a–4 and 17 CFR 249.10 under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (the ''Act'').

Section 6 of the Act[1] sets out a framework for the registration and regulation of national securities exchanges. Under the Commodity Futures Modernization Act of 2000, a futures market may trade security futures products by registering as a national securities exchange. Rule 6a–4[2] sets forth these registration procedures and directs futures markets to submit a notice registration on Form 1–N.[3] Form 1–N calls for information regarding how the futures market operates, its rules and procedures, corporate governance, its criteria for membership, its subsidiaries and affiliates, and the security futures products it intends to trade. Rule 6a–4 also requires entities that have submitted an initial Form 1–N to file: (1) Amendments to Form 1–N in the event of material changes to the information provided in the initial Form 1–N; (2) periodic updates of certain information provided in the initial Form 1–N; (3) certain information that is provided to the futures market's members; and (4) a monthly report summarizing the futures market's trading of security futures products. The information required to be filed with the Commission pursuant to Rule 6a–4 is designed to enable the Commission to carry out its statutorily mandated oversight functions and to ensure that registered and exempt exchanges continue to be in compliance with the Act.

The respondents to the collection of information are futures markets.

The Commission estimates that the total annual burden for all respondents to provide ad hoc amendments[4] to keep the Form 1–N accurate and up to date as required under Rule 6a–4 would be 60 hours (15 hours/respondent per year × 4 respondents[5]) and $400 of miscellaneous clerical expenses. The Commission estimates that the total annual burden for all respondents to provide annual and three-year amendments[6] under Rule 6a–4 would be 88 hours (22 hours/respondent per year × 4 respondents) and $576 ($144 per year × 4 respondents[7]). The Commission estimates that the total annual burden for the filing of the supplemental information[8] and the monthly reports required under Rule 6a–4 would be 24 hours (6 hours/respondent per year × 4 respondents[9]) and $240 of miscellaneous clerical expenses. Thus, the Commission estimates the total annual burden for complying with Rule 6a–4 is 172 hours and $1216 in miscellaneous clerical expenses.

Compliance with Rule 6a–4 is mandatory. Information received in response to Rule 6a–4 shall not be kept confidential; the information collected is public information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following Web site, *www.reginfo.gov*. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: *Shagufta_Ahmed@omb.eop.gov;* and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*. Comments must be submitted to OMB within 30 days of this notice.

Dated: December 13, 2016.

Robert W. Errett,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 9814]

Culturally Significant Objects Imported for Exhibition Determinations: ''The Mysterious Landscapes of Hercules Segers'' Exhibition

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), E.O. 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.;* 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236–3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257 of April 15, 2003), I hereby determine that the objects to be included in the exhibition ''The Mysterious Landscapes of Hercules Segers,'' imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at The Metropolitan Museum of Art, New York, New York, from on or about February 7, 2017, until on or

BILLING CODE 4710–05–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 290 (Sub-No. 391X)]

Norfolk Southern Railway Company—Discontinuance of Service Exemption—in Rockingham and Shenandoah Counties, VA

Norfolk Southern Railway Company (NSR) filed a verified notice of exemption under 49 CFR pt. 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 15.5-mile rail line (the Line) extending from milepost B–84.0 at Mt. Jackson, Va. to milepost B–99.5 at Broadway, Va. in Rockingham and Shenandoah Counties, Va. The Line traverses U.S. Postal Service Zip Codes 22815, 22842, 22844, 22847, and 22853.

NSR has certified that (1) no local traffic has moved over the Line for at least two years; (2) no overhead traffic has moved over the Line for at least two years; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line is pending either with the Surface Transportation Board or with any U.S. District Court or has been decided in favor of a complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication) and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance of service shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will become effective on January 22, 2017, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2) [1] must be filed by December 30, 2016.[2] Petitions to reopen must be filed by January 12, 2017, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to NSR's representative: Crystal M. Zorbaugh, Baker & Miller PLLC, 2401 Pennsylvania Avenue NW., Suite 300, Washington, DC 20037.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available on our Web site at *WWW.STB.GOV.*

Decided: December 20, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Raina S Contee,

Clearance Clerk.

BILLING CODE 4915–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Actions Taken at December 8, 2016, Meeting

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: As part of its regular business meeting held on December 8, 2016, in Annapolis, Maryland, the Commission took the following actions: (1) Approved the applications of certain water resources projects; (2) accepted settlements in lieu of penalties from Panda Hummel Station LLC, Panda Liberty LLC, Panda Patriot LLC, and Montage Mountain Resorts, LP; and (3) took additional actions, as set forth in the **SUPPLEMENTARY INFORMATION** below.

DATES: The business meeting was held on December 8, 2016. Comments on the proposed consumptive use mitigation policy may be submitted to the Commission on or before January 30, 2017.

ADDRESSES: Comments may be mailed to: Jason E. Oyler, Esq., General Counsel, Susquehanna River Basin Commission, 4423 N. Front Street, Harrisburg, PA 17110–1788, or submitted electronically at *http://mdw.srbc.net/ProposedRulemakingSeptember2016/.*

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel, telephone: (717) 238–0423, ext. 1312; fax: (717) 238–2436; email: *joyler@srbc.net.* Regular mail inquiries may be sent to the above address. See also Commission Web site at *www.srbc.net.*

SUPPLEMENTARY INFORMATION: In addition to the actions taken on projects identified in the summary above and the listings below, the following items were also presented or acted upon at the business meeting: (1) Adoption of a resolution urging President-elect Trump and the United States Congress to provide full funding for the Groundwater and Streamflow Information Program, thereby supporting the Susquehanna Flood Forecast & Warning System; (2) approval/ratification of a contract and two agreements; (3) approval to extend the comment deadline for the Consumptive Use Mitigation Policy to January 30, 2017; (4) a report on delegated settlements with the following project sponsors, pursuant to SRBC Resolution 2014–15: Lewistown Borough Municipal Authority, in the amount of $5,250; Columbia Water Company, in the amount of $7,500; Eagle Lake Community Association, in the amount of $7,500; and Fox Hills Country Club, in the amount of $5,000; and (5) approval to extend the term of an emergency certificate with Hazleton City Authority to December 8, 2017.

Compliance Matters

The Commission approved settlements in lieu of civil penalties for the following projects:

1. Panda Hummel Station LLC, Hummel Station, Shamokin Dam Borough and Monroe Township, Snyder County, Pa.—$22,750.

[1] Each OFA must be accompanied by the filing fee, which is currently set at $1,700. *See Regulations Governing Fees for Servs. Performed in Connection with Licensing & Related Servs.—2016 Update,* EP 542 (Sub-No. 24) (STB served Aug. 2, 2016).

[2] Because this is a discontinuance proceeding and not an abandonment, interim trail use/rail banking and public use conditions are not appropriate. Because there will be an environmental review during abandonment, this discontinuance does not require an environmental review.

2. Panda Liberty LLC, Liberty Station, Asylum Township, Bradford County, Pa.—$30,000.

3. Panda Patriot LLC, Clinton Township, Lycoming County, Pa.—$44,250.

4. Montage Mountain Resorts, LP, City of Scranton, Lackawanna County, Pa.—$72,000.

Project Applications Approved

The Commission approved the following project applications:

1. Project Sponsor and Facility: Cabot Oil & Gas Corporation (Bowman Creek), Eaton Township, Wyoming County, Pa. Renewal of surface water withdrawal of up to 0.290 mgd (peak day) (Docket No. 20121201).

2. Project Sponsor and Facility: Cabot Oil & Gas Corporation (Susquehanna River), Susquehanna Depot Borough, Susquehanna County, Pa. Renewal with modification of surface water withdrawal of up to 1.500 mgd (peak day) (Docket No. 20120903).

3. Project Sponsor and Facility: Chester Water Authority, East and West Nottingham Townships, Chester County, Pa. Interconnection with the Town of Rising Sun of up to 1.800 mgd (peak day).

4. Project Sponsor and Facility: Conyngham Borough Authority, Sugarloaf Township, Luzerne County, Pa. Groundwater withdrawal of up to 0.120 mgd (30-day average) from Well 6.

5. Project Sponsor: Exelon Generation Company, LLC. Project Facility: Muddy Run Pumped Storage Project, Drumore and Martic Townships, Lancaster County, Pa. Authorization for continued operation under Section 801.12 of an existing hydroelectric facility.

6. Project Sponsor: Future Power PA, LLC. Project Facility: Good Spring NGCC, Porter Township, Schuylkill County, Pa. Consumptive water use of up to 0.063 mgd (peak day).

7. Project Sponsor: Future Power PA, LLC. Project Facility: Good Spring NGCC, Porter Township, Schuylkill County, Pa. Groundwater withdrawal of up to 0.252 mgd (30-day average) from Well RW–1.

8. Project Sponsor: Future Power PA, LLC. Project Facility: Good Spring NGCC, Porter Township, Schuylkill County, Pa. Groundwater withdrawal of up to 0.252 mgd (30-day average) from Well RW–2.

9. Project Sponsor and Facility: Gilberton Power Company, West Mahanoy Township, Schuylkill County, Pa. Renewal of consumptive water use of up to 1.510 mgd (peak day) (Docket No. 19851202).

10. Project Sponsor and Facility: Gilberton Power Company, West Mahanoy Township, Schuylkill County, Pa. Groundwater withdrawal of up to 1.870 mgd (30-day average) from the Gilberton Mine Pool.

11. Project Sponsor and Facility: Keystone Clearwater Solutions, LLC (Moshannon Creek), Snow Shoe Township, Centre County, Pa. Renewal of surface water withdrawal of up to 0.999 mgd (peak day) (Docket No. 20120910).

12. Project Sponsor: Lycoming County Water and Sewer Authority. Project Facility: Halls Station System, Muncy Township, Lycoming County, Pa. Groundwater withdrawal of up to 0.158 mgd (30-day average) from Well PW–1.

13. Project Sponsor and Facility: Moxie Freedom LLC, Salem Township, Luzerne County, Pa. Minor modification to add a new source (Production Well 2) to existing consumptive use approval (no increase requested in consumptive use quantity) (Docket No. 20150907).

14. Project Sponsor and Facility: Moxie Freedom LLC, Salem Township, Luzerne County, Pa. Groundwater withdrawal of up to 0.062 mgd (30-day average) from Production Well 2.

15. Project Sponsor and Facility: Town of Nichols, Tioga County, N.Y. Groundwater withdrawal of up to 0.250 mgd (30-day average) from Well PW–1.

16. Project Sponsor and Facility: Town of Nichols, Tioga County, N.Y. Groundwater withdrawal of up to 0.250 mgd (30-day average) from Well PW–2.

17. Project Sponsor and Facility: Town of Rising Sun, Rising Sun District, Cecil County, Md. Interconnection with the Chester Water Authority of up to 1.800 mgd (peak day).

18. Project Sponsor and Facility: Sunoco Pipeline, L.P. (Conodoguinet Creek), North Middleton Township, Cumberland County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

19. Project Sponsor and Facility: Sunoco Pipeline, L.P. (Frankstown Branch Juniata River), Frankstown Township, Blair County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

20. Project Sponsor and Facility: Sunoco Pipeline, L.P. (Susquehanna River), Highspire Borough and Lower Swatara Township, Dauphin County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

21. Project Sponsor and Facility: Sunoco Pipeline, L.P. (Swatara Creek), Londonderry Township, Dauphin County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

22. Project Sponsor and Facility: Sunoco Pipeline, L.P. (Tuscarora Creek), Lack Township, Juniata County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

23. Project Sponsor and Facility: SWEPI LP (Cowanesque River), Deerfield Township, Tioga County, Pa. Surface water withdrawal of up to 2.000 mgd (peak day).

24. Project Sponsor and Facility: Transcontinental Gas Pipe Line Company, LLC. Project: Atlantic Sunrise (Fishing Creek), Hemlock Township, Columbia County, Pa. Surface water withdrawal of up to 2.880 mgd (peak day).

25. Project Sponsor and Facility: Transcontinental Gas Pipe Line Company, LLC. Project: Atlantic Sunrise (Fishing Creek), Hemlock Township, Columbia County, Pa. Consumptive water use of up to 0.100 mgd (peak day).

Project Applications Approved Involving a Diversion

The Commission approved the following project applications involving a diversion:

1. Project Sponsor and Facility: Gilberton Power Company, West Mahanoy Township, Schuylkill County, Pa. Into-basin diversion from the Delaware River Basin of up to 0.099 mgd (peak day) from Wells AN–P03 and AN–P04.

2. Project Sponsor and Facility: JKLM Energy, LLC, Roulette Township, Potter County, Pa. Into-basin diversion from the Ohio River Basin of up to 1.100 mgd (peak day) from the Goodwin and Son's Sand and Gravel Quarry.

Authority: Pub. L. 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806, 807, and 808.

Dated: December 20, 2016.

Stephanie L. Richardson,

Secretary to the Commission.

BILLING CODE 7040–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determination of Trade Surplus in Certain Sugar and Syrup Goods and Sugar-Containing Products of Chile, Morocco, Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, Peru, Colombia, and Panama

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: In accordance with relevant provisions of the Harmonized Tariff Schedule of the United States (HTS), the Office of the United States Trade Representative (USTR) is providing

notice of its determination of the trade surplus in certain sugar and syrup goods and sugar-containing products of Chile, Morocco, Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, Peru, Colombia and Panama. As described below, the level of a country's trade surplus in these goods relates to the quantity of sugar and syrup goods and sugar-containing products for which the United States grants preferential tariff treatment under (i) the United States-Chile Free Trade Agreement (Chile FTA); (ii) the United States-Morocco Free Trade Agreement (Morocco FTA); (iii) the Dominican Republic-Central America-United States Free Trade Agreement (CAFTA–DR); (iv) the United States-Peru Trade Promotion Agreement (Peru TPA); (v) the United States-Colombia Trade Promotion Agreement (Colombia TPA), and (vi) the United States-Panama Trade Promotion Agreement (Panama TPA).

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Ronald Baumgarten, Director of Agricultural Affairs, Office of Agricultural Affairs, Office of the United States Trade Representative, 600 17th Street NW., Washington, DC 20508; telephone: (202) 395–9582; facsimile: (202) 395–4579.

SUPPLEMENTARY INFORMATION:

Chile

Pursuant to section 201 of the United States-Chile Free Trade Agreement Implementation Act (Pub. L. 108–77; 19 U.S.C. 3805 note), Presidential Proclamation No. 7746 of December 30, 2003 (68 FR 75789) implemented the Chile FTA on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the Chile FTA.

Note 12(a) to subchapter XI of HTS chapter 99 requires USTR annually to publish in the **Federal Register** a determination of the amount of Chile's trade surplus, by volume, with all sources for goods in Harmonized System (HS) subheadings 1701.11, 1701.12, 1701.91, 1701.99, 1702.20, 1702.30, 1702.40, 1702.60, 1702.90, 1806.10, 2101.12, 2101.20, and 2106.90, except that Chile's imports of goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the Chile FTA are not included in the calculation of Chile's trade surplus. (HS subheading 1701.11 was reclassified as 1701.13 and 1701.14 by Proclamation 8771 of December 29, 2011, 77 FR 413.)

Note 12(b) to subchapter XI of HTS chapter 99 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of Chile entered under subheading 9911.17.05 in any calendar year (CY) (beginning in CY 2015) shall be the quantity of goods equal to the amount of Chile's trade surplus in subdivision (a) of the note.

During CY 2015, the most recent year for which data is available, Chile's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 559,466 metric tons according to data published by its customs authority, the Servicio Nacional de Aduana. Based on this data, USTR determines that Chile's trade surplus is negative. Therefore, in accordance with U.S. Note 12(b) to subchapter XI of HTS chapter 99, goods of Chile are not eligible to enter the United States duty-free under subheading 9911.17.05 in CY 2017.

Morrocco

Pursuant to section 201 of the United States-Morocco Free Trade Agreement Implementation Act (Pub. L. 108–302; 19 U.S.C. 3805 note), Presidential Proclamation No. 7971 of December 22, 2005 (70 FR 76651) implemented the Morocco FTA on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the Morocco FTA.

Note 12(a) to subchapter XII of HTS chapter 99 requires USTR annually to publish in the **Federal Register** a determination of the amount of Morocco's trade surplus, by volume, with all sources for goods in HS subheadings 1701.11, 1701.12, 1701.91, 1701.99, 1702.40, and 1702.60, except that Morocco's imports of U.S. goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the Morocco FTA are not included in the calculation of Morocco's trade surplus. (HS subheading 1701.11 was reclassified as 1701.13 and 1701.14 by Proclamation 8771 of December 29, 2011, 77 FR 413.)

Note 12(b) to subchapter XII of HTS chapter 99 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of Morocco entered under subheading 9912.17.05 in an amount equal to the lesser of Morocco's trade surplus or the specific quantity set out in that note for that calendar year.

Note 12(c) to subchapter XII of HTS chapter 99 provides preferential tariff treatment for certain sugar and syrup goods and sugar-containing products of Morocco entered under subheading 9912.17.10 through 9912.17.85 in an amount equal to the amount by which Morocco's trade surplus exceeds the specific quantity set out in that note for that calendar year.

During CY 2015, the most recent year for which data is available, Morocco's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 732,097 metric tons according to data published by its customs authority, the Office des Changes. Based on this data, USTR determines that Morocco's trade surplus is negative. Therefore, in accordance with U.S. Note 12(b) and U.S. Note 12(c) to subchapter XII of HTS chapter 99, goods of Morocco are not eligible to enter the United States duty-free under subheading 9912.17.05 or at preferential tariff rates under subheading 9912.17.10 through 9912.17.85 in CY 2017.

CAFTA–DR

Pursuant to section 201 of the Dominican Republic-Central America-United States Free Trade Agreement Implementation Act (Pub. L. 109–53; 19 U.S.C. 4031), Presidential Proclamation No. 7987 of February 28, 2006 (71 FR 10827), Presidential Proclamation No. 7991 of March 24, 2006 (71 FR 16009), Presidential Proclamation No. 7996 of March 31, 2006 (71 FR 16971), Presidential Proclamation No. 8034 of June 30, 2006 (71 FR 38509), Presidential Proclamation No. 8111 of February 28, 2007 (72 FR 10025), Presidential Proclamation No. 8331 of December 23, 2008 (73 FR 79585), and Presidential Proclamation No. 8536 of June 12, 2010 (75 FR 34311) implemented the CAFTA–DR on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the CAFTA–DR.

Note 25(b)(i) to subchapter XXII of HTS chapter 98 requires USTR annually to publish in the **Federal Register** a determination of the amount of each CAFTA–DR country's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40, and 1702.60, except that each CAFTA–DR country's exports to the United States of goods classified under HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, and 1701.99 and its imports of goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the CAFTA–DR are not included in the calculation of that country's trade surplus.

U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of each CAFTA–DR country entered under

subheading 9822.05.20 in an amount equal to the lesser of that country's trade surplus or the specific quantity set out in that note for that country and that calendar year.

Costa Rica

During CY 2015, the most recent year for which data is available, Costa Rica's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 98,076 metric tons according to data published by the Costa Rican Customs Department, Ministry of Finance. Based on this data, USTR determines that Costa Rica's trade surplus is 98,076 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 for Costa Rica for CY 2017 is 13,420 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Costa Rica that may be entered duty-free under subheading 9822.05.20 in CY 2017 is 13,420 metric tons (*i.e.,* the amount that is the lesser of Costa Rica's trade surplus and the specific quantity set out in that note for Costa Rica for CY 2017).

Dominican Republic

During CY 2015, the most recent year for which data is available, the Dominican Republic's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 137,407 metric tons according to data published by the National Direction of Customs (DGA). Based on this data, USTR determines that the Dominican Republic's trade surplus is negative. Therefore, in accordance with U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98, goods of the Dominican Republic are not eligible to enter the United States duty-free under subheading 9822.05.20 in CY 2017.

El Salvador

During CY 2015, the most recent year for which data is available, El Salvador's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 387,092 metric tons according to data published by the Salvadoran Sugar Council and the Central Bank of El Salvador. Based on this data, USTR determines that El Salvador's trade surplus is 387,092 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 for El Salvador for CY 2017 is 34,000 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of El Salvador that may be entered duty-free under subheading 9822.05.20 in CY 2017 is 34,000 metric tons (*i.e.,* the amount that is the lesser of El Salvador's trade surplus and the specific quantity set out in that note for El Salvador for CY 2017).

Guatemala

During CY 2015, the most recent year for which data is available, Guatemala's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 1,908,501 metric tons according to data published by the Asociación de Azucareros de Guatemala (ASAZGUA). Based on this data, USTR determines that Guatemala's trade surplus is 1,908,501 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 for Guatemala for CY 2017 is 47,000 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Guatemala that may be entered duty-free under subheading 9822.05.20 in CY 2017 is 47,000 metric tons (*i.e.,* the amount that is the lesser of Guatemala's trade surplus and the specific quantity set out in that note for Guatemala for CY 2017).

Honduras

During CY 2015, the most recent year for which data is available, Honduras' exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 106,414 metric tons according to data published by the Central Bank of Honduras. Based on this data, USTR determines that Honduras' trade surplus is 106,414 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 for Honduras for CY 2017 is 9,760 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Honduras that may be entered duty-free under subheading 9822.05.20 in CY 2017 is 9,760 metric tons (*i.e.,* the amount that is the lesser of Honduras' trade surplus and the specific quantity set out in that note for Honduras for CY 2017).

Nicaragua

During CY 2015, the most recent year for which data is available, Nicaragua's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 313,336 metric tons according to data published by the Direccion General de Servicios Aduaneros (DGA) Nicaragua. Based on this data, USTR determines that Nicaragua's trade surplus is 313,336 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTS chapter 98 for Nicaragua for CY 2017 is 26,840 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Nicaragua that may be entered duty-free under subheading 9822.05.20 in CY 2017 is 26,840 metric tons (*i.e.,* the amount that is the lesser of Nicaragua's trade surplus and the specific quantity set out in that note for Nicaragua for CY 2017).

Peru

Pursuant to section 201 of the United States-Peru Trade Promotion Agreement Implementation Act (Pub. L. 110–138; 19 U.S.C. 3805 note), Presidential Proclamation No. 8341 of January 16, 2009 (74 FR 4105) implemented the Peru TPA on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the Peru TPA.

Note 28(c) to subchapter XXII of HTS chapter 98 requires USTR annually to publish in the **Federal Register** a determination of the amount of Peru's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40, and 1702.60, except that Peru's imports of U.S. goods classified under HS subheadings 1702.40 and 1702.60 that are originating goods under the Peru TPA and Peru's exports to the United States of goods classified under HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, and 1701.99 are not included in the calculation of Peru's trade surplus.

Note 28(d) to subchapter XXII of HTS chapter 98 provides duty-free treatment for certain sugar goods of Peru entered under subheading 9822.06.10 in an amount equal to the lesser of Peru's trade surplus or the specific quantity set out in that note for that calendar year.

During CY 2015, the most recent year for which data is available, Peru's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 333,139 metric tons according to data published by the Superintendencia Nacional de Administracion Tributaria (SUNAT). Based on this data, USTR determines that Peru's trade surplus is negative. Therefore, in accordance with U.S. Note 28(d) to subchapter XXII of HTS chapter 98, goods of Peru are not eligible to enter the United States duty-free under subheading 9822.06.10 in CY 2017.

Colombia

Pursuant to section 201 of the United States-Colombia Trade Promotion Agreement Implementation Act (Pub. L.

112–42; 19 U.S.C. 3805 note), Presidential Proclamation No. 8818 of May 14, 2012 (77 FR 29519) implemented the Colombia TPA on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the Colombia TPA.

Note 32(b) to subchapter XXII of HTS chapter 98 requires USTR annually to publish in the **Federal Register** a determination of the amount of Colombia's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40 and 1702.60, except that Colombia's imports of U.S. goods classified under subheadings 1702.40 and 1702.60 that are originating goods under the Colombia TPA and Colombia's exports to the United States of goods classified under subheadings 1701.12, 1701.13, 1701.14, 1701.91 and 1701.99 are not included in the calculation of Colombia's trade surplus.

Note 32(c)(i) to subchapter XXII of HTS chapter 98 provides duty-free treatment for certain sugar goods of Colombia entered under subheading 9822.08.01 in an amount equal to the lesser of Colombia's trade surplus or the specific quantity set out in that note for that calendar year.

During CY 2015, the most recent year for which data is available, Colombia's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 660,255 metric tons according to data published by Global Trade Atlas. Based on this data, USTR determines that Colombia's trade surplus is 660,255 metric tons. The specific quantity set out in U.S. Note 32(c)(i) to subchapter XXII of HTS chapter 98 for Colombia for CY 2017 is 53,750 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Colombia that may be entered duty-free under subheading 9822.08.01 in CY 2017 is 53,750 metric tons (*i.e.,* the amount that is the lesser of Colombia's trade surplus and the specific quantity set out in that note for Colombia for CY 2017).

Panama

Pursuant to section 201 of the United States-Panama Trade Promotion Agreement Implementation Act (Pub. L. 112–43; 19 U.S.C. 3805 note), Presidential Proclamation No. 8894 of October 29, 2012 (77 FR 66505) implemented the Panama TPA on behalf of the United States and modified the HTS to reflect the tariff treatment provided for in the Panama TPA.

Note 35(a) to subchapter XXII of HTS chapter 98 requires USTR annually to publish in the **Federal Register** a determination of the amount of Panama's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40 and 1702.60, except that Panama's imports of U.S. goods classified under subheadings 1702.40 and 1702.60 that are originating goods under the Panama TPA and Panama's exports to the United States of goods classified under subheadings 1701.12, 1701.13, 1701.14, 1701.91 and 1701.99 are not included in the calculation of Panama's trade surplus.

Note 35(c) to subchapter XXII of HTS chapter 98 provides duty-free treatment for certain sugar goods of Panama entered under subheading 9822.09.17 in an amount equal to the lesser of Panama's trade surplus or the specific quantity set out in that note for that calendar year.

During CY 2015, the most recent year for which data is available, Panama's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 517 metric tons according to data published by the National Institute of Statistics and Census, Office of the General Comptroller of Panama. Based on this data, USTR determines that Panama's trade surplus is negative. Therefore, in accordance with U.S. Note 35(c) to subchapter XXII of HTS chapter 98, goods of Panama are not eligible to enter the United States duty-free under subheading 9822.09.17 in CY 2017.

Michael Froman,

United States Trade Representative, Office of the U.S. Trade Representative.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Twenty Fifth RTCA SC–222 AMS(R)S Systems New Air-Ground Data Link Technologies Related to SATCOM

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: Twenty Fifth RTCA SC–222 AMS(R)S Systems New Air-Ground Data Link Technologies related to SATCOM.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of Twenty Fifth RTCA SC–222 AMS(R)S Systems New Air-Ground Data Link Technologies related to SATCOM.

DATES: The meeting will be held January 23, 2017 09:00 a.m.–05:00 p.m. and January 24, 09:00 a.m.–12:00 p.m.

ADDRESSES: The meeting will be held virtually. Please contact Karan Hofman at *khofmann@rtca.org* or 202–330–0680 to register for the meeting and to receive information on attending.

FOR FURTHER INFORMATION CONTACT: Karan Hofmann at *khofmann@rtca.org* or 202–330–0680, or The RTCA Secretariat, 1150 18th Street NW., Suite 910, Washington, DC 20036, or by telephone at (202) 833–9339, fax at (202) 833–9434, or Web site at *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App.), notice is hereby given for a meeting of the Twenty Fifth RTCA SC–222 AMS(R)S Systems New Air-Ground Data Link Technologies related to SATCOM. The agenda will include the following:

Monday, January 23, 2017—9:00 a.m.–5:00 p.m. and Tuesday, January 24, 2017—09:00 a.m.–12:00 p.m. (if needed)

All times are Eastern Standard Time (UTC–5)

1. Welcome, Introductions, Administrative Remarks
2. Agenda Overview
3. Review/Approve prior Plenary Meeting Summary—(action item status)
4. Brief Status of Related Efforts (as necessary)
5. Additional Pre-publication Modifications to DO–262C MOPS (HONEYWELL)
6. Information related to the work of SC–228 regarding use of L-Band SATCOM in UAS application
7. Iridium NEXT/CERTUS Technical Details (IRIDIUM)
8. Potential Work/Impact related to new ATCt Proposal (LIGADO)
9. Other business related to AMS(R)S
10. Establish Agenda, Date and Place
11. Review of Action Items
12. Adjourn—Plenary meeting

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on December 20, 2016.

Mohannad Dawoud,

Management & Program Analyst, Partnership Contracts Branch, ANG–A17, NextGen, Procurement Services Division, Federal Aviation Administration.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0116]

Announcement of Household Goods Consumer Protection Working Group Members and First Public Meeting

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice.

SUMMARY: FMCSA announces the appointment of 15 members to the Household Goods (HHG) Consumer Protection Working Group (HHG Working Group). This group will meet for the first time on January 4–5, 2017. Congress mandated the establishment of the HHG Working Group in the Fixing America's Surface Transportation (FAST) Act. The group is charged with providing recommendations on how to better educate and protect HHG moving customers (consumers) during interstate HHG moves.

DATES: The first HHG Working Group meeting will be held on January 4, 2017 from 9:00 a.m. to 5:00 p.m. and January 5, 2017 from 9:00 a.m. to 12:00 p.m. at the USDOT Headquarters, 1200 New Jersey Avenue SE., Washington, DC 20590. Members of the Working Group and the public should arrive at 8:30 a.m. to facilitate clearance through DOT security. Copies of the agenda will be made available at *https://www.fmcsa.dot.gov/fastact/household-goods-consumer-protection-working-group.*

FOR FURTHER INFORMATION CONTACT: Kenneth Rodgers, Chief, Commercial Enforcement and Investigations Division, Federal Motor Carrier Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590. Phone (202) 366–0073; Email *Kenneth.Rodgers@dot.gov.*

SUPPLEMENTARY INFORMATION:

FAST Act

Section 5503 of the FAST Act (Pub. L. 114–94) (December 4, 2015) requires the HHG Working Group to provide recommendations to the Secretary of Transportation, through the FMCSA Administrator. The Working Group will operate in accordance with the Federal Advisory Committee Act (FACA). 5 U.S.C. App. 2.

As required by Section 5503 of the FAST Act, the Working Group will make recommendations in three areas relating to ''how to best convey to consumers relevant information with respect to the Federal laws concerning the interstate transportation of household goods by motor carrier.'' Those areas are:

1. How to condense the FMCSA ''Ready to Move ?'' tips published in April 2006 (FMCSA–ESA–03–005) into a more consumer friendly format;

2. How best to use state-of-the-art education techniques and technologies (including how to optimize use of the Internet as an educational tool); and

3. How to reduce and simplify the paperwork required of motor carriers and shippers in interstate transportation.

Section 5503 mandates that the Secretary of Transportation appoint a Working Group that is comprised of (i) individuals with expertise in consumer affairs; (ii) educators with expertise in how people learn most effectively; and (iii) representatives of the FMCSA regulated interstate HHG moving industry.

On April 20, 2016, FMCSA solicited applications and nominations of interested persons to serve on the HHG Working Group. Applications and nominations were due on or before May 20, 2016 [81 FR 23354].

The Working Group will terminate one year after the date its recommendations are submitted to the Secretary of Transportation.

Member Information

On October 7, 2016, the Secretary appointed consumer affairs experts Jennifer M. Gartlan (Federal Maritime Commission), Gabriel Meyer (Surface Transportation Board), and Kelsey M. Owen (Better Business Bureau). Representing educators with expertise in how people learn most effectively will be Margaret McQueen (FMCSA National Training Center). Representatives of the FMCSA regulated interstate HHG moving industry are Francisco Acuna (Household Goods Compliance Solutions, Inc.), Thomas A. Balzar (Ohio Trucking Association), Andrew Friedman (PACK RAT LLC), Heather Paraino (MoveRescue), Jonathan Todd (Benesch Friedlander Coplan & Aronoff LLP), Charles L. White (International Association of Movers), Chad W. Hall (All My Sons Moving and Storage), Dan Veoni (American Moving and Storage Association), Thomas J. Carney, (Carney McNicholas), John Esparza (Texas Trucking Association), and Richard Corona (Enterprise Database Corporation).

Meeting Information

Meetings will be open to the general public, except as provided under FACA. Notice of each meeting will be published in the **Federal Register** at least 15 calendar days prior to the date of the meeting.

For the January 4–5, 2017, meeting, oral comments from the public will be heard from 3:00 p.m.to 4:00 p.m. on January 4, 2017. Should all public comments be exhausted prior to the end of the specified oral comment period, the comment period will close.

Issued on: December 15, 2016.

T.F. Scott Darling, III,

Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

Controlled Substances and Alcohol Testing Responsibilities of Commercial Driver Staffing Agencies and Motor Carriers That Use Them

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of Enforcement Guidance.

SUMMARY: This notice addresses commercial driver staffing agencies that employ commercial drivers who are supplied to motor carriers to operate commercial motor vehicles (CMV). If these CMVs require a commercial driver's license (CDL), the drivers are subject to the U.S. Department of Transportation (DOT) controlled substances (drug) and alcohol testing regulations. Under the Federal Motor Carrier Safety Regulations (FMCSR), a driver staffing agency may qualify as an employer.

DATES: This enforcement guidance is effective immediately.

FOR FURTHER INFORMATION CONTACT: Mr. Juan Moya, Office of Enforcement and Compliance, Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. Telephone Number: (202) 366–4844; Email Address: *fmcsadrugandalcohol@dot.gov.* Office hours are from 8:00 a.m. to 5:00 p.m.,

E.T., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The term ''employer,'' as defined in 49 CFR 382.107, encompasses driver staffing agencies that employ persons who operate CMVs and are subject to CDL requirements. The term ''Employer,'' as defined in 49 CFR 382.107, encompasses a person or entity employing one or more employees who are subject to DOT agency regulations requiring compliance with the DOT drug and alcohol program requirements in parts 40 and 382, Service agents,[1] however, are not employers for the purposes of these regulations.

Commercial driver staffing agencies supply the motor carrier industry with intermittent, casual, or occasional drivers to help meet industry business demands. The staffing agency directly employs the driver, and pays the driver's wages and employment taxes. Therefore, FMCSA has jurisdiction over these companies as employers of persons under Part 382 of the Federal Motor Carrier Safety Regulations (FMCSRs). As employers, driver staffing agencies are required to make records available for inspection upon request by a special agent or authorized representative of the FMCSA.

Section 382.103(a) further clarifies that the drug and alcohol regulations apply to persons and to employers of such persons who operate a CMV in commerce and are subject to the CDL requirements under 49 CFR part 383. Accordingly, staffing agencies, if they choose, may be responsible for ensuring compliance with all of the DOT drug and alcohol testing program requirements for their commercial drivers subject to parts 382 and 383 of the FMCSRs and 49 CFR part 40. These requirements include, but are not limited to, drug and alcohol testing, driver education, record retention, providing agency access to records, and requesting drug and alcohol information from a driver's previous employers. If a driver staffing agency chooses not to establish its own DOT drug and alcohol testing program when it provides a CDL driver to a motor carrier, the motor carrier is solely responsible for complying with part 382 prior to allowing the driver to perform a safety-sensitive function.

This guidance addresses the use of ''casual, intermittent, and occasional'' drivers, who may be leased from a driver staffing agency. FMCSA recognizes that motor carriers needing a CDL driver on short notice may not have the time or ability to conduct pre-employment testing or to place the short-term driver into the motor carrier's random testing pool. Accordingly, FMCSA guidance provides for adoption of the DOT drug and alcohol testing program of another part 382 employer for purposes of regulatory compliance of the ''borrowed'' or leased driver. Section 382.301(c)(2), which addresses ''Pre-employment Testing,'' recognizes the situations where a motor carrier use, but does not employ, a driver more than once a year to operate a CMV. The regulation provides that employers, who use such drivers who must verify the driver's participation in a DOT drug and alcohol testing program every six months and maintain records of such verification pursuant to the record retention requirements in section 382.401 Regulatory guidance to section 382.301 explains that this provision was intended to apply to drivers who are ''temporarily leased'' or loaned to a motor carrier ''for one or more trips generally for a time period less than 30 days.'' See 49 CFR 382.301(c)(2) and (62 FR 16385) ''Guidance Question 1'').

Accordingly, FMCSA interprets a casual, intermittent, or occasional driver as one who works for another employer for any period of less than 30 consecutive days. If a leased driver operates or is expected to operate for a motor carrier employer for more than 30 consecutive days, the driver should be included in that motor carrier employer's random testing pool and that motor carrier employer should assume full responsibility for the driver under its own DOT drug and alcohol testing program. A driver staffing agency may remove the driver from its random testing pool or allow the driver to remain in its testing pool based on its reasonable expectation on whether the driver will or will not return to its employment as a temporary leased driver.

A motor carrier that leases one or more CDL drivers from a driver staffing agency is responsible for ensuring that each leased driver is participating in a compliant DOT drug and alcohol testing program. The motor carrier remains responsible at all times for ensuring compliance with all of the rules, including random testing, for all drivers which they use, regardless of any utilization of third parties to administer parts of the program. Therefore, to use another's program, an employer must make the other program, by contract, consortium agreement, or other arrangement, the employer's own program. This would entail, among other things, being held responsible for the other program's compliance, having records forwarded to the employer's principal place of business on 2 day-notice, and being notified of and acting upon positive test results. For purposes of the leased driver, the motor carrier must adopt the staffing agency's drug and alcohol testing program as its own program. Accordingly, the motor carrier remains responsible for any non-compliance by the driver staffing agency. This arrangement is consistent with FMCSA guidance on employer use of another employer's DOT drug and alcohol testing program for casual, intermittent, or occasional drivers. See (62 FR 16387 dated April 4, 1997. It is intended for short-term leased drivers.

If the staffing agency has not conducted the required testing, the motor carrier must treat the leased driver as a new employee and conduct all required part 382 drug and alcohol testing and program requirements before utilizing the driver to conduct a safety-sensitive function. These requirements include conducting the required background inquiries, providing a copy of the drug and alcohol policy and educational materials, conducting a pre-employment drug test, placing the driver in a random testing pool, and all other recordkeeping, testing, and programmatic requirements in parts 382 and 390.

By adopting the driver staffing agency's drug and alcohol testing program as its own, the motor carrier assumes responsibility for the driver staffing agency's regulatory compliance with respect to the leased driver. Accordingly, motor carriers should ensure that the driver staffing agency has a fully compliant program under DOT regulations and is able to provide within 48 hours the required driver qualification records.

Pursuant to 49 CFR 382.507, employers that violate the requirements of 49 CFR part 382 or part 40 may be subject to the civil and/or criminal penalty provisions of 49 U.S.C. 521(b).

Issued on: December 15, 2016.

T.F. Scott Darling, III,

Administrator.

BILLING CODE 4910–EX–P

[1] Service agent. Any person or entity, other than an employee of the employer, who provides services specified under this part to employers and/or employees in connection with DOT drug and alcohol testing requirements. This includes, but is not limited to, collectors, BATs and STTs, laboratories, MROs, substance abuse professionals, and C/TPAs. To act as service agents, persons and organizations must meet the qualifications set forth in applicable sections of this part. Service agents are not employers for purposes of this part.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 706

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 706, United States Estate (and Generation-Skipping Transfer) Tax Return.

DATES: Written comments should be received on or before February 21, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to LaNita Van Dyke at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or the Internet at *Lanita.VanDyke@irs.gov*.

SUPPLEMENTARY INFORMATION: *Title:* United States Estate (and Generation-Skipping Transfer) Tax Return.

OMB Number: 1545–0015.

Form Number: 706.

Abstract: Form 706 is used by executors to report and compute the Federal estate tax imposed by Internal Revenue Code section 2001 and the Federal generation-skipping transfer (GST) tax imposed by Code section 2601. The IRS uses the information on the form to enforce the estate and GST tax provisions of the Code and to verify that the taxes have been properly computed.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households and business or other for-profit organizations.

Estimated Number of Responses: 1,082,700.

Estimated Total Annual Burden Hours: 2,048,710.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: December 12, 2016.

Tuawana Pinkston,

Supervisory Tax Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

December 20, 2016.

The Department of the Treasury will submit the following information collection request(s) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before January 23, 2017 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimates, or any other aspect of the information collection(s), including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov*.

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained by emailing *PRA@treasury.gov,* calling (202) 622–0934, or viewing the entire information collection request at *www.reginfo.gov.*

Alcohol and Tobacco Tax and Trade Bureau (TTB)

OMB Control Number: 1513–0086.

Type of Review: Revision of a currently approved collection.

Title: Marks on Equipment and Structures (TTB REC 5130/3) and Marks and Labels on Containers of Beer (TTB REC 5130/4).

Abstract: Under the authority of chapter 51 of the Internal Revenue Code of 1986, as amended (26 U.S.C. chapter 51), the TTB regulations require marks, signs, and suitable measuring devices on brewery equipment and structures in order to identify the use and capacity of brewery equipment and structures, tank contents, and to identify taxpaid and nontaxpaid beer. To identify products for purposes of administering the IRC's excise tax provisions, the TTB regulations also require marks, brands, and labels on kegs, cans, bottles, and cases of beer. These marks, brands, and labels identify the name or trade name of the brewer, the place of production of the beer, the contents of the container, and the nature of the product (beer, ale, etc.).

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1.

Departmental Offices (DO)

OMB Control Number: 1505–0222.

Type of Review: Revision of a currently approved collection.

Title: Troubled Asset Relief Program (TARP)—Capital Purchase Program (CPP) Participants Use of Funds Survey.

Abstract: Authorized under the Emergency Economic Stabilization Act (EESA) of 2008 (Pub. L. 110–343), the Department of the Treasury has implemented several aspects of the Troubled Asset Relief Program (TARP). The TARP includes several components including a voluntary Capital Purchase Program (CPP) under which the Department has purchased qualifying capital in U.S. banking organizations. The CPP is an important part of the Department's efforts to restore confidence in our financial system and ensure that credit continues to be available to consumers and businesses. As an essential part of restoring confidence, the Treasury has committed to determining the effectiveness of the CPP. Additionally, American taxpayers are particularly interested in knowing how banks have used the money that Treasury has invested through the CPP. Consequently, the Treasury is seeking responses from banking institutions that have received CPP funds regarding: How the CPP investment has affected the banks' operations, how these institutions have used CPP funds, and how their usage of CPP funds has changed over time.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 960.

Bob Faber,

Acting Treasury PRA Clearance Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0376]

Agency Information Collection Activity Under OMB Review: (Agent Orange Registry Code Sheet; VA Form 10–9009)

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521), this notice announces that the Veterans Health Administration (VHA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment.

The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 23, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov,* or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0376'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0376.''

SUPPLEMENTARY INFORMATION:

Titles: Agent Orange Registry Code Sheet, VA Form 10–9009.

OMB Control Number: 2900–0376.

Type of Review: Reinstatement and Extension of a previously approved collection.

Abstract: VA employees obtain demographic data from existing records. The examining physician, Environmental Health (EH) Coordinator (formerly identified as the Agent Orange coordinator)/or other designated personnel obtain the remainder of the information during the Agent Orange registry physical examination process. The information obtained from the Veteran is entered directly onto an electronic VA Agent Orange Form 10–9009, Agent Orange Registry Worksheet (formerly identified as an Agent Orange Registry Code Sheet), via a secured Web site *http://vaww.registries.aac.va.gov* by VA personnel and transmitted directly to the Environmental Agents Service (EAS) Agent Orange Registry database located at the Austin Information Technology Center (AITC), Austin, TX. Edits are automatically accomplished at the time of entry. The EAS Registries Web site allows you to edit pretty much all the information that has been entered. Some VA facilities will enter the information into the EAS Registries Web site while the Veteran is sitting in front of them. Other facilities will have the Veteran and the examiner complete the Agent Orange Worksheet on paper form, and then later enter the worksheet data into the EAS Registries Web site. VHA Handbook 1302.01, dated 9/5/06 states: ''AOR worksheets and dated follow-up letters must be scanned, or made electronic, and attached to an appropriately titled CPRS progress note.''

The registry provides a mechanism to catalogue prominent symptoms, reproductive health, and diagnoses and to communicate with Agent Orange Veterans. VA keeps Veterans informed on research findings or new compensation policies through periodic newsletters. The voluntary, self-selected nature of this registry makes it valuable for health surveillance; however, it is not designed or intended to be a research tool and therefore, the results cannot be generalized to represent all Agent Orange Veterans. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on October 6, 2016, Vol. 81, pages 69571–69572.

Affected Public: Individuals or households.

Estimated Annual Burden: VA Form 10–9009—6,667 hours.

Estimated Average Burden per Respondent: 20 minutes.

Frequency of Response: Annually.

Estimated Annual Responses: 20,000.

By direction of the Secretary.

Cynthia Harvey-Pryor,

VA Clearance Officer, Office of Privacy and Records Management, Department of Veterans Affairs.

[FR Doc. 2016–30962 Filed 12–22–16; 8:45 am]

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0782]

Revision to a Previously Approved Information Collection (Veterans Benefits Administration (VBA) Voice of the Veteran (VOV) Customer Satisfaction Continuous Measurement Survey)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 23, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0782'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0782.''

SUPPLEMENTARY INFORMATION:

Title: Voice of the Veteran (VOV) Customer Satisfaction Continuous Measurement Survey.

OMB Control Number: 2900–0782.

Type of Review: Revision of a currently approved collection.

Abstract: In 2008, VBA recognized a need to develop and design an integrated, comprehensive Voice of the Veteran (VOV) Continuous Measurement (CM) program for its lines of business: Compensation Service (CS), Pension Service (PS), Education (EDU) Service, Loan Guaranty (LGY) Service and Vocational Rehabilitation and Employment (VR&E) Service. The VOV CM program provides insight regarding Veterans and beneficiaries interactions with the benefits and services provided by VBA. The VOV CM provides VBA leadership with actionable Veteran feedback on how VBA is performing. These insights help identify opportunities for improvement and measure the impact of improvement initiatives.

VBA conducted a benchmark study in Fiscal Year 2013 (October 2012 through January 2013) in order to validate the survey instruments, identify Key Performance Indicators, and establish performance benchmarks. Findings and recommendations were presented to VBA Leadership and stakeholders within each line of business in April 2013.

Based on interviews conducted, VBA has separated the Veterans experience with VBA into two categories:

1. *Access* to a Benefit. This measures the enrollment experience transaction with the beneficiary or Veteran.

2. *Servicing* of a Benefit. This measures the ongoing relationship experiences with the beneficiary or Veteran.

Each business line desired to understand the components of the overall customer experience. Each VBA business line wanted to engage their Veteran population with relevant questions regarding their experience. The following outlines how that is approached with each of the lines of business.

The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at Vol. 81, No. 187 on September 27, 2016, at pages 66328–66329.

Affected Public: Individuals or households.

Compensation and Pension Programs

During 2014 J.D. Power fielded three survey instruments for the Compensation and Pension programs. Discussions with stakeholders from both programs indicated that one survey instrument could be used for both Compensation and Pension *Enrollment* category claimants. In FY2015, Compensation and Pension identified the need to separate the *Enrollment* survey to better serve the business needs of each program.

The *Compensation Enrollment* survey pool for the VOV Continuous Measurement Study includes individuals who have received a decision on a compensation benefit claim within 30 days prior to the fielding period. This includes those who were found eligible on a new or subsequent claim and those who have been denied and lack a current appeal of the decision. The *Pension Enrollment* survey pool includes individuals who have received a decision on a pension benefit claim within the past 30 days. The *Compensation Servicing* survey pool includes individuals who received a decision and are receiving benefit payments. The *Pension Servicing* survey pool includes individuals who established and completed a claim in the previous fiscal year.

Education Program

J.D. Power fielded two survey instruments for Education Service. The *Education Enrollment* survey pool includes individuals who received a decision on their education benefit application within 90 days (*i.e.,* the original end-product was cleared within the past 90 days) prior to the fielding period. The *Education Servicing* survey pool includes beneficiaries who are currently receiving benefits. The definition of those receiving benefits varies based on the educational program. Chapter 33 beneficiaries who have received at least 2 payments for ''tuition'' in the past 9 months are included in the survey pool. Chapter 30, Chapter 1606, and Chapter 1607 beneficiaries who have received 5 monthly payments during the past 9 months are included.

Loan Guaranty and Specially Adapted Housing Programs

J.D. Power fielded two survey instruments for Loan Guaranty Service. The survey pool for the tracking study for the *LGY Enrollment* questionnaire includes individuals from a 30 day period who closed on a VA home loan in the 90 days prior to the fielding period. The sample is stratified as follows: (1) Those who closed on purchase loans, (2) those who received loans for interest rate reductions, and (3) those who obtained cash out or other refinancing. The survey pool for the tracking study for the *SAH Servicing* questionnaire includes individuals who are eligible for a specially adapted housing grant and in the past 12 months have: (1) Received an approval on their grant and are currently somewhere in post-approval, (2) have had all their funds dispersed and final accounting is not yet complete, and (3) have had all of their funds dispersed and final accounting is complete.

Vocational Rehabilitation and Employment Program

J.D. Power fielded three survey instruments for Vocational Rehabilitation & Employment Service (VR&E). The *VR&E Enrollment* survey pool includes individuals who applied within the last 12 months, entered Evaluation and Planning and (1) entered any of the following case statuses: Extended Evaluation, Independent Living (IL), Rehabilitation to Employment (RTE), or Job Ready Status (JRS) (excludes re-applicants), or (2) were found not entitled. The *VR&E Servicing* survey pool includes individuals who in the last 30 days were in a plan of services for more than 60 days, all rehabilitated participants, and MRGs. Participants who interrupted their plan are excluded. The VR&E Non-Participant survey explores why eligible individuals chose not to pursue the benefit entitlement. The *VR&E Non-Participant* questionnaire survey pool includes individuals who dropped out of the program prior to completing a rehabilitation plan. The sample is stratified as follows: (1) Applicants who never attended the initial meeting with a counselor, (2) applicants who were entitled to the program but did not pursue a plan of service, and (3) applicants who started, but did not complete a rehabilitation plan (*i.e.,* negative closures).

The complete survey methodology is available as a supplemental document to this information collection: Voice of the Veteran Methodology FY17.

The FY15 Non Response Bias Reports are also attached. The FY16 reporting and Non Response Bias Reports will be made available upon completion.

Estimated Annual Burden: 32,701 hours per year for the life of the collection.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: Once Annually (Respondents will not be surveyed more than once in a given year.

Estimated Number of Respondents: 130,800

By direction of the Secretary.

Cynthia Harvey-Pryor,

Department of Veterans Affairs, Program Specialist (005R1B), Office of Privacy and Records Management, Office of Information Technology.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Notice that Certain VA Homeless Providers Grants Will Be Terminated

AGENCY: VA Homeless Providers Grant and Per Diem (GPD) Program, Veterans Health Administration (VHA), Department of Veterans Affairs (VA).

ACTION: Notice that certain VA homeless providers grants will be terminated.

SUMMARY: VA is announcing that all per diem funding for grants awarded during fiscal year (FY) 1994 through FY 2016 under VA's Homeless Providers GPD will be terminated, in accordance with the grant award agreements. This does not apply to special need grants and Transition in Place (TIP) grants.

Prior to September 30, 2017, VA will offer the opportunity to compete for new grants through a Notice of Funding Availability (NOFA) to grantees whose transitional housing and service center grants will be terminated. This will allow the Department and grantees to refocus programs and resources to better serve the homeless Veteran population.

DATES: December 19, 2016.

ADDRESSES: VA Homeless Providers Grant and Per Diem Field Office, 10770 North 46th Street Suite C–200, Tampa, Florida 33617

FOR FURTHER INFORMATION CONTACT: Mr. Jeffery L. Quarles, Director, VA Homeless Providers Grant and Per Diem

Program, Department of Veterans Affairs, 10770 North 46th Street Suite C–200, Tampa, Florida 33617; (toll-free) (877) 332–0334.

SUPPLEMENTARY INFORMATION: This Notice announces that VA will terminate per diem payments to grantees for grants that were awarded under VA's Homeless Providers GPD Program from FY 1994 through FY 2016 in accordance with the grant award agreements (See End Date Adjustments). This does not apply to special need and TIP grants, as these grants were awarded with expiration dates. Additionally, VA will offer an opportunity to apply for new grants to these transitional housing and service center grantees under a new NOFA.

Rationale: Funding for the per diem component of the VA Homeless Providers Program is authorized by 38 U.S.C. 2013(7). Each FY the program's funding may be replenished up to a level authorized and appropriated by Congress. VHA must decide the level of funding to actually dedicate to this program from the available appropriated resources up to the 38 U.S.C. 2013(7) authorized amount. In the past, as funding was available, in order to facilitate a continued needed resource without possible interruption and encourage new applicants to serve homeless Veterans, VHA chose to authorize per diem for those operational grantees that met the requirements of 38 CFR 61.80 as verified by an annual inspection. Other benefits to VA and the community included defrayed costs and stability of housing resources by not subjecting the grantees to the GPD application process each fiscal year.

Many current grants were written when the homeless Veteran experience was far different than it is now (almost 20 years ago in some cases). These grants focused on services, length of stays, and end goals different from the current strategies in place to combat Veteran homelessness. Despite VA having allowed changes of scope to the grants, these changes were not able to keep pace with the rapidly changing homeless Veteran experience. VA now has at its disposal additional homeless programs that were not in existence previously and is working in conjunction with other Federal agencies to address homelessness among Veterans. While VA believes GPD will continue to have a significant presence in the cadre of homeless programs, the allocation of these grants needs to be updated to reflect the documented current need as well as to increase the flexibility to adapt to future needs.

Benefits of Termination: Through this termination and new application process, VA will be able to align awards and resources with the specific VA homeless goals, and Office of Management and Budget (OMB) requirements in 2 CFR part 200. This also provides the opportunity for current grantees to align their services, treatment approach, and housing stock, while taking into account currently available resources and needs within their communities. By making the awards performance-based, VA will increase accountability and flexibility for both VA and grantees to adapt to changing environments.

Effects of Termination: All grantees must submit a close-out Federal Financial Report (SF425) within 90 calendar days after the end date of the period of performance, pursuant to 2 CFR 200.343. Any per diem over payments discovered will be recovered per VA financial policy.

OMB has, pursuant to its authority under 2 CFR 200.102, approved VA's request to grant a class exception to the real property provisions of 2 CFR 200.311(c) to recipients that would be subject to those requirements based on the planned restructuring of the VA Homeless Providers GPD Program.

The exception is limited to current capital grantees that choose to reapply under the separate FY 2017 NOFA and are unsuccessful, and those current capital grantees that are successful, but do not receive subsequent option year funding. These grantees will not be subject to the requirements of 38 CFR 61.67 or the real property disposition requirements of 2 CFR 200.311(c).

Current capital grantees that choose not to reapply in response to this NOFA, or who apply and do not meet the threshold requirements for scoring as outlined in the NOFA and regulation, will be subject to the recapture requirements of 38 CFR 61.67 and, if applicable, the real property disposition requirements of 2 CFR 200.311(c).

Proposed Termination Dates for Grantees: If an existing grantee does not apply for a GPD grant under the new NOFA, VA would like to terminate the applicable grant agreement on September 30, 2017. If an existing grantee does apply and is successful, VA would like to terminate the applicable grant agreement on September 30, 2017. If your agency applies and is not selected, in the interest of transitioning Veterans remaining in those non-selected programs, VA would like to terminate the grant payments no later than December 31, 2017.

Authority: 38 U.S.C. 2011, 2012, 2013, 2061, and in regulation at 2 CFR 200.311(c), 2 CFR 200.343, 38 CFR part 61.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on December 19, 2016, for publication.

Dated: December 19, 2016.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Funding Availability: Homeless Providers Grant and Per Diem Program

AGENCY: Department of Veterans Affairs (VA), Veterans Health Administration (VHA), VA Homeless Providers Grant and Per Diem (GPD) Program.

ACTION: Notice of Funding Availability (NOFA).

SUMMARY: VA is announcing the availability of per diem funds to currently operational GPD grantees which have their current transitional housing grants under VA's Homeless Providers GPD Program whose grants are scheduled to be terminated as discussed in an accompanying **Federal Register** notice. VA expects to fund 24 existing service centers and 12,000 beds with this NOFA for applicants who will operate service centers or use one or a combination of the following housing models: Bridge Housing, Low Demand, Respite Care, Clinical Treatment, and Service-Intensive Transitional Housing.

DATES: An original signed and dated application for assistance (plus two completed collated copies) for VA's Homeless Providers GPD Program and associated documents must be received by the GPD Program Office by 4:00 p.m. Eastern Standard Time on Tuesday, April 4, 2017 (see application requirements below).

ADDRESSES: Grant applications must be submitted to the following address: VA Homeless Providers GPD Program Office, 10770 N. 46th Street, Suite C–200, Tampa, Florida 33617.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffery L. Quarles, Director, VA Homeless Providers GPD Program, Department of Veterans Affairs, 10770 N. 46th Street, Suite C–200, Tampa, FL 33617; (toll-free) 1–(877) 332–0334.

SUPPLEMENTARY INFORMATION:

Funding Opportunity Description

This NOFA announces the availability of per diem funding to currently operational GPD grantees that will have their current grants terminated as discussed in an accompanying **Federal Register** notice.

Under this NOFA, VA is only offering per diem for supportive transitional housing and service centers to applicants willing to use a model listed below. Applicants must apply for funding using one or more of these models, and a separate application is required for each model. Further, only currently operational VA GPD-funded service centers may apply under the service center model. Applicants agree to meet the applicable requirements of 38 CFR part 61. In addition, all applications using the service center and housing models need to have low barriers to access service as well as policies and procedures to work with Veterans who relapse. As such, admission criteria are strongly encouraged to not have any required sobriety period, income requirement, or employment requirement.

Housing Models/Service Center Descriptions

Bridge Housing

Targeted Population—Homeless Veterans that have been offered and accepted a permanent housing intervention (*e.g.,* Supportive Services for Veterans Families (SSVF), Department of Housing and Urban Development-VA Supportive Housing (HUD–VASH), Housing Coalition/ Continuum of Care (CoC)), but are not able to immediately enter the permanent housing.

Model Overview—Bridge housing is intended to be a short-term stay in transitional housing for Veterans with pre-identified permanent housing destinations.

Characteristics & Standards—Goals in the Individual Service Plan should be short-term with the focus on the move to permanent housing, rather than the completion of treatment goals.

Veterans are expected to receive case management and support, which should be coordinated with the HUD–VASH, SSVF, or other available community based programs. Grantees will assist Veterans with accessing services as needed/requested by the Veteran and must make available to participants a menu of available services.

Length of Stay (LOS) will be individually determined based on need, but in general, is not expected to exceed 90 days.

Admission Criteria—Veterans must have been offered and accepted a permanent housing intervention prior to admission or within the first 14 days of admission.

Required Minimum Performance Metrics/Targets—Discharge to permanent housing is 70 percent. Negative Exits target is less than 23 percent. Negative exits are defined as those exits from a GPD program for a violation of program rules, failure to comply with program requirements, or leaving the program without consulting staff.

Low Demand

Targeted Population—Chronically homeless Veterans who suffer from mental-health or substance-use problems, or who struggle with maintaining sobriety; and Veterans with multiple treatment failures that may have never received treatment services, or may have been unsuccessful in traditional housing programs. These Veterans may have not yet fully committed to sobriety and treatment.

Model Overview—Low-Demand housing is a program design using a low-demand/harm-reduction model to better accommodate chronically homeless Veterans, and Veterans who were unsuccessful in traditional treatment settings. Programming does not require sobriety or compliance with mental health treatment as a condition of admission or continued stay. Overall, demands are kept to a minimum; however, services are available as needed. The goal is to establish permanent housing in the community, while providing for the safety of staff and residents.

Characteristics & Standards—Project is small in size (typically, 20 beds or less);

Services must include case-management, substance-use, and mental-health treatment; and referrals for benefits are made available as Veterans engage;

Must provide the participant an orientation that sets the expectations of performance for the participant;

Must have 24/7, on-site staffing at the same location as the location of the program participant. (Use of resident managers is not allowed);

Must have a method to monitor participant and guests comings and goings;

Must have a system in place for the management of the introduction of contraband;

Must be willing to retain Veterans who commit minor infractions of rules and who cannot and/or will not stop drinking and/or using legal or illegal substances;

Must be committed to keeping the veterans housed and staying continuously engaged with each veteran and provide services as needed;

Must have procedures to ensure safety of staff and residents; and

The grantee agency must participate in bi-monthly calls and an annual fidelity assessment process as established by VA.

Required Minimum Performance Metrics/Targets—Discharge to permanent housing is 50 percent and negative exits less than 23 percent. Negative exits are defined as those exits from a GPD program for a violation of program rules, failure to comply with program requirements, or leaving the program without consulting staff.

Hospital to Housing (Respite Care)

Targeted Population—Homeless Veterans identified and evaluated in emergency departments and inpatient care settings for suitability for direct transfer to a designated GPD Program for transitional housing and supportive care.

Model Overview—Respite care is a medical model to address the housing and recuperative care needs of homeless Veterans who have been hospitalized.

Characteristics & Standards—Housing sites are expected to be in close proximity to the referring medical center, so that ongoing clinical care, including specialty care, can continue to be provided;

Have a post-discharge care plan as pre-requisite to program placement that addresses ongoing physical, mental health, substance use disorder, and social work needs as well as care-management plans to transition the Veteran to permanent housing upon clinical stabilization;

The VA Homeless Patient Aligned Care Team (H–PACT), or other appropriate care unit, will facilitate and coordinate the ongoing care needs upon transition;

A Memorandum of Understanding must be in place with the local medical center that details participation in the Hospital-to-Home (H2H) program. Included in this should be a detailing of acceptance criteria for Veterans being referred from local facility emergency departments and inpatient wards, a detailing of how follow-up care with the medical center is organized, and a

commitment to engaging enrolled veterans in permanent housing as part of program objectives;

Registration of the program with the national H–PACT program office and full participation in program elements, including Veteran tracking, quality improvement, and community of practice elements; and

Active participation, communication, and client tracking with the national H–PACT/H2H program office.

Admission Criteria—Individual must be functional, be able to perform independent Activities of Daily Living (ADL); not require acute detox, has no apparent psychosis; and has a post-discharge plan coordinating care with the medical center (*e.g.,* H–PACT Team, Mental Health, Substance Abuse, etc.).

Required Minimum Performance Metrics/Targets—Discharge to permanent housing is 65 percent and negative exits less than 23 percent. Negative exits are defined as those exits from a GPD program for a violation of program rules, failure to comply with program requirements, or leaving the program without consulting staff.

Clinical Treatment

Targeted Population—Homeless Veterans with a specific diagnosis related to a substance-use disorder and/or mental-health diagnosis; Veteran actively chooses to engage in clinical services.

Model Overview—Clinically focused treatment provided in conjunction with services effective in helping homeless Veterans secure permanent housing and increase income through benefits and/or employment.

Characteristics & Standards—Although the programming and services have a strong clinical focus, permanent housing and increased income are a required outcome of the program. Treatment programs must incorporate strategies to increase income and housing attainment services;

Individualized assessment, services, and treatment plan which are tailored to achieve optimal results in a time efficient manner and are consistent with sound clinical practice;

Program stays are to be individualized based upon the individual service plan for the veteran (not program driven);

Staff are to be licensed and/or credentialed for the substance-use disorder (SUD)/mental health (MH) services provided; and

Veterans are offered a variety of treatment service modalities (*e.g.,* individual and group counseling/therapy, family support groups/family therapy, and psychoeducation).

Required Minimum Performance Metrics/Targets—Discharge to permanent housing is 65 percent; employment of individuals at discharge is 50 percent; and negative exits less than 23 percent. Negative exits are defined as those exits from a GPD program for a violation of program rules, failure to comply with program requirements, or leaving the program without consulting staff.

Service-Intensive Transitional Housing

Targeted Population—Homeless Veterans who choose a supportive transitional housing environment providing services prior to entering permanent housing.

Model Overview—Provides transitional housing and a milieu of services that facilitate individual stabilization and movement to permanent housing as rapidly as clinically appropriate.

Characteristics & Standards—Scope of services should incorporate tactics to increase the Veteran's income through employment and/or benefits and obtaining permanent housing. Services provided and strategies used by the applicant will vary based on the individualized needs of the Veteran and resources available in the community. Applicant specifies the staffing levels and range of services to be provided.

Required Minimum Performance Metrics/Targets—Discharge to permanent housing is 65 percent; employment of individuals at discharge is 50 percent; and negative exits are less than 23 percent.

Service Centers

Targeted Population—Homeless Veterans who are seeking assistance with obtaining housing, employment, medical care, or benefits.

Model Overview—Provides services and information to engage and aid homeless Veterans obtain housing and services.

Characteristics & Standards—Scope of services should incorporate tactics to engage and aid the Veteran. Services provided and strategies used by the applicant will vary based on the individualized needs of the Veteran and resources available in the community. Applicant specifies the staffing levels and range of services to be provided.

Eligibility Information: In order to be eligible, an applicant must be a current operational VA GPD Transitional Housing or Service Center grant recipient (that is the grantee of record) as of the publication date of this NOFA whose grant is scheduled to be terminated as discussed in an accompanying **Federal Register** notice with the following exception: for those GPD grants previously funded as collaborative projects that consist of multiple eligible entities funded under one project number, VA will treat under this NOFA each eligible entity as a separate potential applicant, and each may apply for its portion of the previously funded collaborative project to include; but not limited to: The site, number of beds, and services to be provided.

Transition in Place (TIP) and Special Need grants do not need to respond to this NOFA as their awards have established time limits and will be addressed under separate NOFAs.

Authority: Funding applied for under this NOFA is authorized by 38 U.S.C. 2011, 2012.

Award Information

Overview: This NOFA announces the availability of per diem funds to currently operational GPD grantees that will have their current transitional housing grants under VA's Homeless Providers GPD Program terminated as discussed in an accompanying **Federal Register** notice. VA expects to fund approximately 24 service centers and 12,000 beds with this NOFA. (*See* additional budget information in this NOFA for calculation of bed days of care.)

Cost Sharing or Matching: None.

Funding Period: Funding awarded under this NOFA will be for a period of 1year, beginning on October 1, 2017, and ending on September 30, 2018, with options for VA to offer two additional renewal periods dependent upon: fund availability, the recipient meeting the performance goals established in the grant agreement, statutory and regulatory requirements, and the results of the VA inspection.

Payment: Per diem will be paid in a method that is in accordance with VA and other Federal fiscal requirements. The per diem payment calculation may be found at 38 CFR 61.33. Awardees will be subject to requirements of this NOFA, GPD regulations, 2 CFR 200, and other Federal grant requirements. A full copy of the regulations governing the GPD Program is available at the GPD Web site at: *http://www.va.gov/HOMELESS/GPD.asp.*

Funding Priorities: VA will prioritize for funding one application for each of the following models: Bridge Housing, Low Demand, Clinical Treatment and Respite Care (Hospital to Home) at each VA Medical Center (VAMC) that has a working relationship with a GPD project. The highest scoring application for each of the four selected models, at each VAMC that are legally fundable will be conditionally selected for

funding first. VA will then continue to conditionally select applications from the remaining applications in their ranked order until funding is no longer available or the number of beds has been reached, whichever comes first.

Application Review Information

A. *Criteria for Grants:* Rating criteria may be found at 38 CFR 61.13 & 61.32.

B. *Review and Selection Process:* Review and selection process may be found at 38 CFR 61.14.

Allocation of Funds: Funding will be awarded under this NOFA depending on funding availability and subject to program authorization. Funding will be for a period beginning on October 1, 2017, and ending on September 30, 2018, with an option for VA to offer two additional renewal periods.

Funding Actions: Conditionally selected applicants will be asked to submit additional information under 38 CFR 61.15, 61.32(c). Applicants will then be notified of the deadline to submit such information. If an applicant is unable to meet any conditions for the grant award within the specified time frame VA may non-select the applicant and uses the funding for another applicant. Should an applicant submitting multiple applications not have all of its applications funded, VA may negotiate bed numbers with the applicant at this time for those applications that were conditionally selected and incorporate that number into the grant agreement. Upon signature of the grant agreement by the Secretary or designated representative, final selection will be completed and the grant funds will be obligated for the funding period.

Grant Award Period: Applicants that are finally selected may expect the award to begin on October 1, 2017, and end on September 30, 2018, with two options to renew as stated in the funding period above. VA will make an initial award for the first year of operation. The application is submitted with a one-year budget. Continuation funding is not guaranteed. Factors to be considered in awarding continuation grants will include satisfactory performance, demonstrated capacity to manage the grant, compliance with grant requirements, agency priorities, and the availability of appropriated funds. VA reserves the right to adjust the amount of a grant or elect not to continue funding for subsequent years.

Funding Restrictions: No part of an award under this NOFA may be used to facilitate capital improvements or to purchase vans or real property. Questions regarding acceptability should be directed to VA's National GPD Program Office at the number listed in contact information. Applicants may not receive funding to replace funds provided by any Federal, state or local Government agency or program to assist homeless persons.

Applicants whose grants included capital grants must continue to use the same project site unless they receive prior written approval from the National GPD Program Office; this includes applicants who received a 2013 rehabilitation grant. Applicants will be limited in their request for beds to the number of combined beds authorized under your current relationship with a specific medical center under the GPD program. If applying for multiple models your agency may not request the total number of beds in each model application (See Examples 1–2).

Example 1: If your agency had two grant awards paid by the same medical center, and each had 15 beds, the total bed limit would be 30. If applying for multiple models, the 30 beds would have to be split between the different models and not exceed 30.

Example 2: If your agency had three grant awards, two paid by the same medical center, and one by a different medical center with each having 15 beds the total bed limit would be 30 beds for the medical center that paid the two awards, and the bed limit for the remaining medical center would be 15. If applying for multiple models, the total beds allowed for each medical center would have to be split.

Additional multiple models guidance may be found at Examples 3–6 under the Content and Form of Application section of this NOFA.

Flexibility of Beds: For those applicants that are successfully funded for multiple models under this NOFA, VA will allow without a change of scope, a flex of beds between the applicant's models at the same VAMC. This flex will be up to five (5) beds or 15 percent of the total awarded bed limit per medical center, whichever is greater. Successful applicants who seek a greater number of flex beds than what is allowed above must receive prior written approval from the National GPD Program Office.

Cost Sharing or Matching: None.

Application and Submission Information

Address to Obtain Grant Application: Download the standard forms directly from VA's Grant and Per Diem Program Web page at: *http://www.va.gov/homeless/GPD.asp.* The additional documents that must also be included with the application are listed below in the Content and Form of Application section of this NOFA. Questions should be referred to the GPD Program Office at (toll-free) 1 (877) 332–0334.

Content and Form of Application: The Department is seeking to refocus programs and resources to better serve the homeless veteran population. Therefore, applicants should note that a separate application for each housing model or service center will be required. Each will be scored separately.

Applicants may, when completing the application, combine or remove current project(s) resources to create a single project. There are some restrictions. Applicants whose grants included capital grants must continue to use the same project site unless they receive prior written approval from the National GPD Program Office; this includes applicants who received a 2013 rehabilitation grant. Applicants whose grants were per diem only may use a different site; however, the site/facility must be in the same catchment area and must provide a comparable or better living situation.

Applicants should review their relationships with VAMCs and group their projects by medical center. Review to see if you would like to remove or combine projects within that medical center. Next, complete the application(s) for the housing model(s) or service center for which you want to apply (*See* Examples 3–6).

Example 3: Applicant A has a service-intensive capital grant and a service-intensive per diem only grant facilitated by the same medical center. Per the NOFA, Applicant A cannot move the capital grant site, but may move the per diem only site. Applicant A could combine these projects at the capital grant site and submit one service-intensive application for the total number of beds.

Example 4: Applicant B provides both respite care and service-intensive housing at the same site and per diem is facilitated by the same medical center with a total of 30 beds between the two projects. Applicant B would submit two applications one for the respite care model and one for the service-intensive model designating specific number of beds and services for each not to exceed a total of 30 for the two models combined.

Example 5: Applicant C has a service-intensive capital grant and a service-intensive per diem only grant facilitated by different medical centers. Applicant C cannot combine these projects. Applicant C must submit one service-intensive application for each of the sites that fall in the different medical center catchment areas.

Example 6: Applicant D has a service-intensive grant and would now like to provide a service center. Applicant D cannot apply for the service center funding as Applicant D did not have operational service center funding under GPD.

If your agency is unclear on what application, or the number of applications, to submit, contact the GPD National Program Office for clarification prior to submission of any application to ensure it is submitting the correct format.

Applicants should ensure that they include all required documents in their application and carefully follow the format described below. Submission of an incorrect, incomplete, or incorrectly formatted application package will result in the application being rejected at threshold. Applicants should ensure that the items listed in the ''Application Requirements'' section of this NOFA are addressed in their application. Applicants should ensure the application is compiled in the order as outlined below and sections labeled accordingly.

Applicants are to complete the application in a normal business format on not more than fifty (50) single-spaced, typed, single sided pages, in Arial 12 font, and number the pages sequentially. The narrative must also be labeled with the same titles and order of this NOFA. Note: The Standard Forms will not count toward the page maximum. Applicants should simply binder clip the application; do not staple, spiral bind, or fasten the application. Do not include brochures or other information not requested.

The application consists of two parts. The first part will consist of Standard Forms and the second part of the application will be provided by applicants and consist of a supporting documentation and project narratives and tables/spreadsheets in a standard business format.

Applicants should ensure that they include all required documents in their application and carefully follow the format and provide the information requested and described below. Submission of an incorrect, incomplete, or incorrectly formatted application package will result in the application being rejected at the beginning of the process.

Application Documentation Required

1. *Standard Forms:*

First Submission: SF 424 Application for Federal Assistance.

Note: Second Submission: Conditional Selectees will be provided the following at a later date: SF 424A Budget Information, SF 424B Assurances and the GPD Per Diem Rate Request Worksheet and Instructions.

2. *Eligibility to Receive VA Assistance:*

Nonprofit Organizations must provide documentation of accounting system certification and evidence of private nonprofit status. This must be accomplished by the following:

(a) Providing certification on letterhead stationery from a Certified Public Accountant or Public Accountant that the organization has a functioning accounting system that is operated in accordance with generally accepted accounting principles, or that the organization has designated a qualified entity to maintain a functioning accounting system. If such an entity is used, then their name and address must be included in the certification letter; and

(b) Providing evidence of their status as a nonprofit organization by submitting a copy of their IRS ruling providing tax-exempt status under the IRS Code of 1986, as amended

3. *Reasonable Assurances:*

Copy on your agency's letterhead, the following statements (a–e) and then sign the letter.

(a) The applicant certifies that the following are true; the existing grant project of the applicant is being, and will continue to be, used principally to furnish Veterans the level of care for which VA awarded the applicant the original grant under the VA's Homeless Providers GPD Program; that not more than 25 percent of participants at any one time will be non-Veterans; and that such services will meet the requirements of 38 CFR part 61;

(b) The applicant will keep records and submit reports as VA may reasonably require, within the time frames required; and give VA, upon demand, access to the records upon which such information is based;

(c) The applicant agrees to comply with the applicable requirements of 38 CFR part 61 and other applicable laws and has demonstrated the capacity to do so;

(d) The applicant does not have an outstanding obligation to VA that is in arrears, and does not have an overdue or unsatisfactory response to an audit; and

(e) The applicant is not in default, by failing to meet requirements for any previous assistance from VA.

4. Documentation of being actively registered in the System for Award Management (SAM): Provide a printed copy of your agency's active registration in SAM to include the DUNS number which corresponds to the information provided on the Application for Federal assistance (SF424) and current CAGE code. Additionally, provide the complete legal business address that corresponds to the address registered with SAM to include the USPS five-digit zip code plus the four digit extension code.

5. State/Local Government Applicants: Applicants who are state or local governments must provide a copy of any comments or recommendations by approved State and (area wide) clearinghouses pursuant to Executive Order 12372.

6. Project Summary: On your agency's letterhead provide the following:

(a) The name of the VA facility providing the current per diem payment.

(b) Describe the number of beds your agency is requesting per diem for and the housing model to be provided at the VA facility identified in question 6(a).

Number of Beds: ___

Number of Visits (annually) if service center: ___

Housing Model: (*i.e.* Bridge Housing, Low Demand, Hospital to Home, Clinical Treatment, Service-Intensive Transitional Housing and Service Center).

(c) Is your agency submitting additional applications to provide other housing models at the facility referenced in question 6(a). (yes/no)

If yes, identify the model and the number of beds/visits to be provided under that model.

(d) Housing and services provided under this application will be located at:

Address: _____

City: _____

State: _____

Zip Code + 4 digit extension: _____

County the site is located in: _____

Additional Counties served by the project: _____

Congressional District: _____

(e) Under this application and model; describe how the facility participant living space will be configured? Include the square footage of the room or bay, the number of beds in that square footage, and if the beds will be bunked (*i.e.* Single Room Occupancy, 100 square feet, no bunk beds; Open Bay, 900 square feet, 12 beds, 4 sets of bunk beds; Apartment(s), 1500 square feet, 1,2, or 3 bedroom(s) no bunk beds).

(f) Describe any additional populations or types of housing being served/provided at this location? (*i.e.* children, women, permanent housing, contract care). If none so state.

(g) We are combining the following previous GPD project(s) __ under this application and model.

(h) *Contact Information:* Where correspondence can be sent to the

Executive Director/President/CEO.
Please provide the following:
Agency Name:
Physical Address of Administrative Office: (no P.O. Boxes)
City:
State:
Zip + 4 digit extension:
County:
Congressional District:
Telephone number:
Alternate Mailing Address: (If you would prefer regular mail be sent to a P.O. Box).
City:
State:
Zip:

(i) Name and title of Executive Director/President/CEO; phone, fax and email address:

(j) Name and title of another management level employee and title, phone, fax and email address, who can sign commitments for the agency:

(k) A complete listing of your agency's officers of the Board of Directors and their address, phone, fax, and email addresses.

7. *Project Abstract:* On not more than one page provide a brief abstract of the project to include: The project design, supportive services committed to the project, types of assistance provided, and any special program provisions.

8. *Detailed Project Plan:* This is the portion of the application that describes your program. VA Reviewers will focus on how the project plan addresses the areas of outreach, project plan, model specific questions, ability, need, and coordination *in relation to your selected model.* Please note there are some questions that only apply to specific models (Bridge, Clinical Treatment, Low Demand, Respite), Applicants applying for these models must include responses to these questions in their application.

VA expects applicants awarded under this NOFA will meet the VA performance metrics for the selected model. With those metrics in mind please include in your agency's responses to the following sections your agency strategies to meet or exceed VA's national metric targets.

(a) Outreach—

1. Outreach—describe in detail the process of how your agency will identify and serve your homeless Veteran population(s) in the selected model by responding to the following questions:

2. Outreach—describe your agency outreach plan and frequency for *your selected Veteran population(s)* living in places not ordinarily meant for human habitation (*e.g.* streets, parks abandon buildings, automobiles) and emergency shelters.

3. Outreach—identify where your organization will target its outreach efforts to identify appropriate Veterans for this program.

4. Outreach—Describe you involvement in the CoC's Coordinated Assessment/Entry efforts as it relates to your outreach plan.

(b) Project Plan—VA wishes to provide the most appropriate housing based on the needs of the individual Veteran.

1. Project Plan—Specifically list the supportive services, frequency of occurrence and who will provide them and how they will help Veteran participants achieve residential stability, increase skill levels and or income, and how they will increase Veterans' self-determination (*i.e.,* case management, frequency of individual/groups, employment services). Use a table or spreadsheet for this section (See Example 7).

Example 7:

Supportive service	Frequency of offering (daily, weekly, etc.)	Job title & credential required for the individual providing services	This service supports the achievement of residential stability, increase skill and income, or self-determination
Case management	Weekly	Case Manager—LCSW	Residential stability.
Financial Management Group	Bi-Weekly	Life Skills Educator—BA/BS	Increased Skills and Income.

2. Project Plan—VA places emphasis on lowering barriers to admissions; describe the specific process and admission criteria for deciding which Veterans are appropriate for admission.

3. Project Plan—Address if you plan on serving a mixed gender population or individuals with children.

4. Project Plan—Provide a listing and explanation of any gender-specific services.

5. Project Plan—How will the safety security and privacy of participants be ensured?

6. Project Plan—How, when, and by whom will the progress of participants toward meeting their individual goals be monitored, evaluated and documented?

7. Project Plan—Provide your agency's Individual Service Plan (ISP) methodology and the core items to be addressed in the plan.

8. Project Plan—How permanent affordable housing will be identified in the ISP and made known to participants to plan for leaving the supportive housing?

9. Project Plan—Will your agency provide follow-up services? If yes, describe those services, how often they will occur, and the duration of the follow-up.

10. Project Plan—Describe how Veteran participants will have a voice and aid in operating and maintaining the housing (*i.e.,* volunteer time, paid positions, community governance meetings, peer support).

11. Project Plan—Describe your agency's responsibilities, as well as, any sponsors, contractors' responsibilities in operating and maintaining the housing (*i.e.,* sub-recipients).

12. Project Plan—Describe program policies regarding a clean and sober environment. Include in the description how participant relapse will be handled and how these policies will affect the admission and discharge criteria.

13. Project Plan—Provide and describe the type and implementation of the medication control system that will be used in this project (*e.g.,* Medication Management, Medication Monitoring, or individual storage). For reference, applicants may review these requirements on pages 16 and 17 of their current GPD grant projects last annual inspection (VA Form 10–0361c).

14. Project Plan—Describe program polices regarding participant agreements, include any leases and sub-leases if used.

15. Project Plan—Describe program polices regarding extracurricular fees.

16. Project Plan—If co-located with other models, populations, or with other non-grant and per diem projects; how will differences in program rules and policies be handled (*See* example 8)?

Example 8:

Your agency has permanent housing, bridge housing, and low demand housing. These all serve different populations and require different levels of policy to properly function. How will this be accomplished?

17. Project Plan—Describe how in your chosen model you will provide assistance to Veterans who seek increased income or benefits.

18. Project Plan—Address how your agency will facilitate the provision of

nutritional meals for the Veterans. Be sure to describe how Veterans with little or no income will be assisted.

19. Project Plan—VA places great emphasis on placing Veterans in the most appropriate housing situation as rapidly as possible. In this section, provide a timetable and the specific services to include follow-up that supports housing stabilization. Include evidence of coordination of transition services with which your agency expects to have for Veterans.

20. Project Plan—Describe the availability of or how you will facilitate transportation of the Veteran participants with and without income to appointments, employment, and supportive services.

(c) *Model Specific Questions:* Applicants should only respond to the following questions as they apply for the model selected in this application.

1. Bridge Housing Model—Describe how your bridge housing is coordinated with permanent housing resources as part of a Housing First plan for homeless Veterans

2. Clinical Treatment Model—Describe how you will ensure homeless Veterans will be offered available permanent housing resources prior to entering treatment resources.

3. Clinical Treatment Model—Describe how you will ensure permanent housing and employment/income improvements will occur and lead to successful outcomes.

4. Low Demand Model—How will your agency manage a safe environment if a Veteran returns to the project impaired?

5. Low Demand Model—Will your safe environment include a sober lounge or safe room?

6. Low Demand Model—What approaches will be used to keep the Veterans engaged in services?

7. Respite Care—Describe the medical evaluation process for identifying potential candidates for the program and the Staff involved in that process, the evaluation criteria, and the roles of each individual.

(d) Ability—This is where you describe your agency's experience in regard to your selected population.

1. Ability—Provide a table or spreadsheet of the staffing plan for this project. Do not include resumes.

Example 9:

Job title	Brief (1–2 sentence) description of responsibilities	Educational level	Hours per week allocated to GPD project	Amount of annual salary allocated to the GPD project ($)

2. Ability—Describe your agency's previous experience assessing and providing for the housing needs of homeless Veterans under your chosen model.

3. Ability—Describe your agency's previous experience assessing and providing supportive services to homeless Veterans under your chosen model.

4. Describe your agency's previous experience in assessing supportive service resources and entitlement benefits.

5. Describe your agency's previous experience with evaluating the progress of both individual participants and overall program effectiveness through using quality and performance data to make changes. Provide documentation of meeting past performance goals.

(e) Need—Describe through the use of a gap analysis the substantial unmet needs particularly among your targeted Veteran population and those needs of the general homeless population. How does this project meet a need for the community and fit with the community's strategy to end homeless in the community? Support your descriptions with empirical statistical documentation of need.

(f) Coordination—This portion of the application places emphasis on evidence of your agency's involvement in the homeless Veteran continuum.

1. Coordination—Provide documented evidence your agency is part of an ongoing community-wide planning process.

2. Coordination—How is your process designed to share information on available resources and reduce duplication among programs that serve homeless Veterans (*i.e.,* letter of support from your local continuum of care)?

3. Coordination—How is your agency part of an ongoing community-wide planning process which is designed to share information on available resources and reduce duplication among programs that serve homeless Veterans?

4. Coordination—How has your agency coordinated GPD services with other programs offered in the Continuum(s) of Care (CoC) they currently serve?

5. Coordination—Provide documented evidence your agency consulted directly with the closest VAMC Director regarding coordination of services for project participants; and provide your plan to assure access to health care, case management, and other care services.

(g) Additional Application Requirements—

1. Memorandum of Understanding (MOU) Respite Care Documentation—A MOU between the local medical center and the applicant must be provided demonstrating the local medical center's detailed participation in the Hospital-to-Housing program. Included in this should be detailing of acceptance criteria for Veterans being referred from local facility emergency departments and inpatient wards, a detailing of how follow-up care with the medical center is organized, and a commitment to engaging enrolled Veterans in permanent housing as part of the program.

2. Awardees will be required to support their request for payments with adequate fiscal documentation as to project income and expenses. Awardee agencies that have a negotiated Indirect Cost Agreement (IDC) must provide a copy of the IDC with this application if they wish to charge indirect costs to the grant. Without this document only the de minimis rate would be allowed for indirect costs. All other costs will be considered only if they are direct costs.

Submission Dates and Times: An original signed, dated, completed, and application (plus two completed collated copies) and all required associated documents must be received in the GPD Program Office, VA Homeless Providers GPD Program Office, 10770 N. 46th Street Suite C–200, Tampa, FL 33617; by 4:00 p.m. Eastern Standard Time on Tuesday, April 4, 2017.

In the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat any application that is received after the deadline as ineligible for consideration. Applicants should take this firm deadline into account and make early submission of their material to avoid any risk of loss of eligibility as a result of unanticipated delays or other delivery-related problems. For applications physically delivered (*e.g.,* in person, or via United States Postal Service, FedEx, United Parcel Service, or any other type of courier), the VA GPD Program Office staff will accept the application and date stamp it immediately at the time of arrival. This is the date and time that will determine

if the deadline is met for those types of delivery.

Applications must be received by the application deadline. Applications must arrive as a complete package to include VA collaborative partner materials (see application requirements). Materials arriving separately *will not* be included in the application package for consideration and may result in the application being rejected or not funded.

DO NOT fax or email the application as applications received via these means will be ineligible for consideration.

Award Notice: Although subject to change, the GPD Program Office expects to announce grant awards in May 2017. The initial announcement will be made via news release which will be posted on VA's National GPD Program Web site at *www.va.gov/homeless/gpd.asp.* Following the initial announcement, the GPD Office will mail notification letters to the grant recipients. Applicants who are not selected will be mailed a declination letter within two weeks of the initial announcement. All notifications will indicate the applicant's status in regard to the Office of Management and Budget class exception to the real property provisions of Title 2 of the Code of Federal Regulations section 200.311(c) to FY 2017 NOFA awardees and non-awardees.

For capital grantees that choose not to reapply in response to this 2017 NOFA or who apply and do not meet the threshold requirements for scoring as outlined in [the accompanying **Federal Register** Notice regarding the plan to terminate certain grant agreements] and regulation, VA will initiate the recapture requirements of 38 CFR 61.67, and if applicable, the real property disposition requirements of 2 CFR 200.311(c).

Administrative and National Policy: It is important to be aware that VA places great emphasis on responsibility and accountability. VA has procedures in place to monitor services provided to homeless Veterans and outcomes associated with the services provided in grant and per diem-funded programs. Applicants should be aware of the following:

All awardees that are selected in response to *this NOFA* must meet the requirements of the current edition of the Life Safety Code of the National Fire Protection Association as it relates to their specific facility. Applicants should note that all facilities are to be protected throughout by an approved automatic sprinkler system unless a facility is specifically exempted under the Life Safety Code. Applicants should consider this when submitting their grant applications, as no additional funds will be made available for capital improvements under this NOFA.

Each program receiving funding will have a liaison appointed from a nearby VA medical facility to provide oversight and monitor services provided to homeless Veterans in the program.

Monitoring will include, at a minimum, a quarterly review of each per diem program's progress toward meeting VA's performance metrics, helping Veterans attain housing stability, adequate income support, and self-sufficiency as identified in each per diem application. Monitoring will also include a review of the agency's income and expenses as they relate to this project to ensure payment is accurate.

Each funded program will participate in VA's national program monitoring and evaluation as these procedures will be used to determine successful accomplishment of housing, employment, and self-sufficiency outcomes for each per diem-funded program.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on December 19, 2016, for publication.

Dated: December 19, 2016.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the SecretaryDepartment of Veterans Affairs.

Regulatory Information Service Center

Introduction to the Unified Agenda of Federal Regulatory and Deregulatory Actions—Fall 2016

REGULATORY INFORMATION SERVICE CENTER

Introduction to the Unified Agenda of Federal Regulatory and Deregulatory Actions—Fall 2016

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to the Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions.

SUMMARY: Publication of the Unified Agenda of Regulatory and Deregulatory Actions and the Regulatory Plan represent key components of the regulatory planning mechanism prescribed in Executive Order 12866, ''Regulatory Planning and Review'' (58 FR 51735) and incorporated in Executive Order 13563, ''Improving Regulation and Regulatory Review'' issued on January 18, 2011 (76 FR 3821). The fall editions of the Unified Agenda include the agency regulatory plans required by E.O. 12866, which identify regulatory priorities and provide additional detail about the most important significant regulatory actions that agencies expect to take in the coming year.

In addition, the Regulatory Flexibility Act requires that agencies publish semiannual ''regulatory flexibility agendas'' describing regulatory actions they are developing that will have significant effects on small businesses and other small entities (5 U.S.C. 602).

The Unified Agenda of Regulatory and Deregulatory Actions (Unified Agenda), published in the fall and spring, helps agencies fulfill all of these requirements. All federal regulatory agencies have chosen to publish their regulatory agendas as part of this publication. The complete Unified Agenda and Regulatory Plan can be found online at *http://www.reginfo.gov* and a reduced print version can be found in the **Federal Register**. Information regarding obtaining printed copies can also be found on the *Reginfo.gov* Web site (or below, VI. How can users get copies of the Plan and the Agenda?).

The fall 2016 Unified Agenda publication appearing in the **Federal Register** consists of The Regulatory Plan and agency regulatory flexibility agendas, in accordance with the publication requirements of the Regulatory Flexibility Act. Agency regulatory flexibility agendas contain only those Agenda entries for rules that are likely to have a significant economic impact on a substantial number of small entities and entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act.

The complete fall 2016 Unified Agenda contains the Regulatory Plans of 30 Federal agencies and 60 Federal agency regulatory agendas.

ADDRESSES: Regulatory Information Service Center (MVE), General Services Administration, 1800 F Street NW., 2219F, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the agency contact listed for each entry.

To provide comment on or to obtain further information about this publication, contact: John C. Thomas, Executive Director, Regulatory Information Service Center (MVE), U.S. General Services Administration, 1800 F Street NW., 2219F, Washington, DC 20405, (202) 482–7340. You may also send comments to us by email at: *risc@gsa.gov*.

SUPPLEMENTARY INFORMATION:

Table of Contents

INTRODUCTION TO THE REGULATORY PLAN AND THE UNIFIED AGENDA OF FEDERAL REGULATORY AND DEREGULATORY ACTIONS

I. What are the Regulatory Plan and the Unified Agenda?

The Regulatory Plan serves as a defining statement of the Administration's regulatory and deregulatory policies and priorities. The Plan is part of the fall edition of the Unified Agenda. Each participating agency's regulatory plan contains: (1) A narrative statement of the agency's regulatory and deregulatory priorities, and, for the most part, (2) a description of the most important significant regulatory and deregulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. This edition includes the regulatory plans of 30 agencies.

The Unified Agenda provides information about regulations that the

Government is considering or reviewing. The Unified Agenda has appeared in the **Federal Register** twice each year since 1983 and has been available online since 1995. The complete Unified Agenda is available to the public at *http://www.reginfo.gov*. The online Unified Agenda offers flexible search tools and access to the historic Unified Agenda database to 1995. The complete online edition of the Unified Agenda includes regulatory agendas from 62 Federal agencies. Agencies of the United States Congress are not included.

The fall 2016 Unified Agenda publication appearing in the **Federal Register** consists of The Regulatory Plan and agency regulatory flexibility agendas, in accordance with the publication requirements of the Regulatory Flexibility Act. Agency regulatory flexibility agendas contain only those Agenda entries for rules that are likely to have a significant economic impact on a substantial number of small entities and entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Printed entries display only the fields required by the Regulatory Flexibility Act. Complete agenda information for those entries appears, in a uniform format, in the online Unified Agenda at *http://www.reginfo.gov*.

The following agencies have no entries for inclusion in the printed regulatory flexibility agenda. An asterisk (*) indicates agencies that appear in The Regulatory Plan. The regulatory agendas of these agencies are available to the public at *http://reginfo.gov*.

Cabinet Departments

Department of State
Department of Veterans Affairs *

Other Executive Agencies

Agency for International Development
Commission on Civil Rights
Committee for Purchase From People Who Are Blind or Severely Disabled
Corporation for National and Community ServiceCourt Services and Offender Supervision Agency for the District of Columbia
Equal Employment Opportunity Commission *
National Archives and Records Administration *
National Endowment for the Arts
National Endowment for the Humanities
National Science Foundation
Office of Government Ethics
Office of Management and Budget
Office of Personnel Management *
Office of the United States Trade Representative
Peace Corps
Pension Benefit Guaranty Corporation *
Railroad Retirement Board
Social Security Administration *

Independent Agencies

Council of the Inspectors General on Integrity and Efficiency
Farm Credit Administration
Farm Credit System Insurance Corporation
Federal Deposit Insurance Corporation
Federal Energy Regulatory Commission
Federal Housing Finance Agency
Federal Maritime Commission
Federal Trade Commission *
Gulf Coast Ecosystem Restoration Council
National Credit Union Administration
National Indian Gaming Commission *
National Transportation Safety Board
Special Inspector General for Afghanistan Reconstruction
Surface Transportation Board

The Regulatory Information Service Center compiles the Unified Agenda for the Office of Information and Regulatory Affairs (OIRA), part of the Office of Management and Budget. OIRA is responsible for overseeing the Federal Government's regulatory, paperwork, and information resource management activities, including implementation of Executive Order 12866 (incorporated in Executive Order 13563). The Center also provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency officials, and the public.

The activities included in the Agenda are, in general, those that will have a regulatory action within the next 12 months. Agencies may choose to include activities that will have a longer timeframe than 12 months. Agency agendas also show actions or reviews completed or withdrawn since the last Unified Agenda. Executive Order 12866 does not require agencies to include regulations concerning military or foreign affairs functions or regulations related to agency organization, management, or personnel matters. Agencies prepared entries for this publication to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed. The Regulatory Plan and Unified Agenda do not create a legal obligation on agencies to adhere to schedules in this publication or to confine their regulatory activities to those regulations that appear within it.

II. Why are the Regulatory Plan and the Unified Agenda published?

The Regulatory Plan and the Unified Agenda helps agencies comply with their obligations under the Regulatory Flexibility Act and various Executive orders and other statutes.

Regulatory Flexibility Act

The Regulatory Flexibility Act requires agencies to identify those rules that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). Agencies meet that requirement by including the information in their submissions for the Unified Agenda. Agencies may also indicate those regulations that they are reviewing as part of their periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610). Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' signed August 13, 2002 (67 FR 53461), provides additional guidance on compliance with the Act.

Executive Order 12866

Executive Order 12866, ''Regulatory Planning and Review,'' signed September 30, 1993 (58 FR 51735), requires covered agencies to prepare an agenda of all regulations under development or review. The Order also requires that certain agencies prepare annually a regulatory plan of their ''most important significant regulatory actions,'' which appears as part of the fall Unified Agenda. Executive Order 13497, signed January 30, 2009 (74 FR 6113), revoked the amendments to Executive Order 12866 that were contained in Executive Order 13258 and Executive Order 13422.

Executive Order 13563

Executive Order 13563, ''Improving Regulation and Regulatory Review,'' issued on January 18, 2011, supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review that were established in Executive Order 12866, which includes the general principles of regulation and public participation, and orders integration and innovation in coordination across agencies; flexible approaches where relevant, feasible, and consistent with regulatory approaches; scientific integrity in any scientific or technological information and processes used to support the agencies' regulatory actions; and retrospective analysis of existing regulations.

Executive Order 13132

Executive Order 13132, ''Federalism,'' signed August 4, 1999 (64 FR 43255), directs agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have ''federalism implications'' as defined in the Order. Under the Order, an agency that is proposing a regulation with federalism implications, which either preempt State law or impose non-statutory unfunded substantial direct compliance costs on State and local governments, must consult with State and local officials early in the process of developing the regulation. In addition, the agency must provide to the Director of the Office of Management and Budget a federalism summary impact statement for such a regulation, which consists of a description of the extent of the agency's prior consultation with State and local officials, a summary of their concerns and the agency's position supporting the need to issue the regulation, and a statement of the extent to which those concerns have been met. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on the various levels of government and whether those actions have federalism implications.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, title II) requires agencies to prepare written assessments of the costs and benefits of significant regulatory actions ''that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more . . . in any 1 year. . . .'' The requirement does not apply to independent regulatory agencies, nor does it apply to certain subject areas excluded by section 4 of the Act. Affected agencies identify in the Unified Agenda those regulatory actions they believe are subject to title II of the Act.

Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' signed May 18, 2001 (66 FR 28355), directs agencies to provide, to the extent possible, information regarding the adverse effects that agency actions may have on the supply, distribution, and use of energy. Under the Order, the agency must prepare and submit a Statement of Energy Effects to the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, for ''those matters identified as significant energy actions.'' As part of this effort, agencies may optionally include in their submissions for the Unified Agenda information on whether they have prepared or plan to prepare a Statement of Energy Effects for their regulatory actions.

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (Pub. L. 104–121, title II) established a procedure for congressional review of rules (5 U.S.C. 801 *et seq.*), which defers, unless exempted, the effective date of a ''major'' rule for at least 60 days from the publication of the final rule in the **Federal Register**. The Act specifies that a rule is ''major'' if it has resulted, or is likely to result, in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. The Act provides that the Administrator of OIRA will make the final determination as to whether a rule is major.

III. How are the Regulatory Plan and the Unified Agenda organized?

The Regulatory Plan appears in part II in a daily edition of the **Federal Register**. The Plan is a single document beginning with an introduction, followed by a table of contents, followed by each agency's section of the Plan. Following the Plan in the **Federal Register**, as separate parts, are the regulatory flexibility agendas for each agency whose agenda includes entries for rules which are likely to have a significant economic impact on a substantial number of small entities or rules that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Each printed agenda appears as a separate part. The sections of the Plan and the parts of the Unified Agenda are organized alphabetically in four groups: Cabinet departments; other executive agencies; the Federal Acquisition Regulation, a joint authority (Agenda only); and independent regulatory agencies. Agencies may in turn be divided into subagencies. Each printed agency agenda has a table of contents listing the agency's printed entries that follow. Each agency's part of the Agenda contains a preamble providing information specific to that agency. Each printed agency agenda has a table of contents listing the agency's printed entries that follow.

Each agency's section of the Plan contains a narrative statement of regulatory priorities and, for most agencies, a description of the agency's most important significant regulatory and deregulatory actions. Each agency's part of the Agenda contains a preamble providing information specific to that agency plus descriptions of the agency's regulatory and deregulatory actions.

The online, complete Unified Agenda contains the preambles of all participating agencies. Unlike the printed edition, the online Agenda has no fixed ordering. In the online Agenda, users can select the particular agencies' agendas they want to see. Users have broad flexibility to specify the characteristics of the entries of interest to them by choosing the desired responses to individual data fields. To see a listing of all of an agency's entries, a user can select the agency without specifying any particular characteristics of entries.

Each entry in the Agenda is associated with one of five rulemaking stages. The rulemaking stages are:

1. *Prerule Stage*—actions agencies will undertake to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking (NPRM) and may include Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. *Proposed Rule Stage*—actions for which agencies plan to publish a Notice of Proposed Rulemaking as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. *Final Rule Stage*—actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step.

4. *Long-Term Actions*—items under development but for which the agency does not expect to have a regulatory action within the 12 months after publication of this edition of the Unified Agenda. Some of the entries in this section may contain abbreviated information.

5. *Completed Actions*—actions or reviews the agency has completed or withdrawn since publishing its last agenda. This section also includes items the agency began and completed between issues of the Agenda.

Long-Term Actions are rulemakings reported during the publication cycle that are outside of the required 12-month reporting period for which the Agenda was intended. Completed Actions in the publication cycle are rulemakings that are ending their lifecycle either by Withdrawal or completion of the rulemaking process. Therefore, the Long-Term and Completed RINs do not represent the ongoing, forward-looking nature

intended for reporting developing rulemakings in the Agenda pursuant to Executive Order 12866, section 4(b) and 4(c). To further differentiate these two stages of rulemaking in the Unified Agenda from active rulemakings, Long-Term and Completed Actions are reported separately from active rulemakings, which can be any of the first three stages of rulemaking listed above. A separate search function is provided on *http://reginfo.gov* to search for Completed and Long-Term Actions apart from each other and active RINs.

A bullet (•) preceding the title of an entry indicates that the entry is appearing in the Unified Agenda for the first time.

In the printed edition, all entries are numbered sequentially from the beginning to the end of the publication. The sequence number preceding the title of each entry identifies the location of the entry in this edition. The sequence number is used as the reference in the printed table of contents. Sequence numbers are not used in the online Unified Agenda because the unique Regulation Identifier Number (RIN) is able to provide this cross-reference capability.

Editions of the Unified Agenda prior to fall 2007 contained several indexes, which identified entries with various characteristics. These included regulatory actions for which agencies believe that the Regulatory Flexibility Act may require a Regulatory Flexibility Analysis, actions selected for periodic review under section 610(c) of the Regulatory Flexibility Act, and actions that may have federalism implications as defined in Executive Order 13132 or other effects on levels of government. These indexes are no longer compiled, because users of the online Unified Agenda have the flexibility to search for entries with any combination of desired characteristics. The online edition retains the Unified Agenda's subject index based on the **Federal Register** Thesaurus of Indexing Terms. In addition, online users have the option of searching Agenda text fields for words or phrases.

IV. What information appears for each entry?

All entries in the online Unified Agenda contain uniform data elements including, at a minimum, the following information:

Title of the Regulation—a brief description of the subject of the regulation. In the printed edition, the notation ''Section 610 Review'' following the title indicates that the agency has selected the rule for its periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610(c)). Some agencies have indicated completions of section 610 reviews or rulemaking actions resulting from completed section 610 reviews. In the online edition, these notations appear in a separate field.

Priority—an indication of the significance of the regulation. Agencies assign each entry to one of the following five categories of significance.

(1) Economically Significant

As defined in Executive Order 12866, a rulemaking action that will have an annual effect on the economy of $100 million or more or will adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The definition of an ''economically significant'' rule is similar but not identical to the definition of a ''major'' rule under 5 U.S.C. 801 (Pub. L. 104–121). (See below.)

(2) Other Significant

A rulemaking that is not Economically Significant but is considered Significant by the agency. This category includes rules that the agency anticipates will be reviewed under Executive Order 12866 or rules that are a priority of the agency head. These rules may or may not be included in the agency's regulatory plan.

(3) Substantive, Nonsignificant

A rulemaking that has substantive impacts, but is neither Significant, nor Routine and Frequent, nor Informational/Administrative/Other.

(4) Routine and Frequent

A rulemaking that is a specific case of a multiple recurring application of a regulatory program in the Code of Federal Regulations and that does not alter the body of the regulation.

(5) Informational/Administrative/Other

A rulemaking that is primarily informational or pertains to agency matters not central to accomplishing the agency's regulatory mandate but that the agency places in the Unified Agenda to inform the public of the activity.

Major—whether the rule is ''major'' under 5 U.S.C. 801 (Pub. L. 104–121) because it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. The Act provides that the Administrator of the Office of Information and Regulatory Affairs will make the final determination as to whether a rule is major.

Unfunded Mandates—whether the rule is covered by section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). The Act requires that, before issuing an NPRM likely to result in a mandate that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector of more than $100 million in 1 year, agencies, other than independent regulatory agencies, shall prepare a written statement containing an assessment of the anticipated costs and benefits of the Federal mandate.

Legal Authority—the section(s) of the United States Code (U.S.C.) or Public Law (Pub. L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.

CFR Citation—the section(s) of the Code of Federal Regulations that will be affected by the action.

Legal Deadline—whether the action is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some other action.

Abstract—a brief description of the problem the regulation will address; the need for a Federal solution; to the extent available, alternatives that the agency is considering to address the problem; and potential costs and benefits of the action.

Timetable—the dates and citations (if available) for all past steps and a projected date for at least the next step for the regulatory action. A date displayed in the form 12/00/14 means the agency is predicting the month and year the action will take place but not the day it will occur. In some instances, agencies may indicate what the next action will be, but the date of that action is ''To Be Determined.'' ''Next Action Undetermined'' indicates the agency does not know what action it will take next.

Regulatory Flexibility Analysis Required—whether an analysis is required by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because the rulemaking action is likely to have a significant economic impact on a substantial number of small entities as defined by the Act.

Small Entities Affected—the types of small entities (businesses, governmental jurisdictions, or organizations) on which the rulemaking action is likely to have an impact as defined by the Regulatory Flexibility Act. Some agencies have chosen to indicate likely effects on small entities even though they believe

that a Regulatory Flexibility Analysis will not be required.

Government Levels Affected—whether the action is expected to affect levels of government and, if so, whether the governments are State, local, tribal, or Federal.

International Impacts—whether the regulation is expected to have international trade and investment effects, or otherwise may be of interest to the Nation's international trading partners.

Federalism—whether the action has ''federalism implications'' as defined in Executive Order 13132. This term refers to actions ''that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Independent regulatory agencies are not required to supply this information.

Included in the Regulatory Plan—whether the rulemaking was included in the agency's current regulatory plan published in fall 2015.

Agency Contact—the name and phone number of at least one person in the agency who is knowledgeable about the rulemaking action. The agency may also provide the title, address, fax number, email address, and TDD for each agency contact.

Some agencies have provided the following optional information:

RIN Information URL—the Internet address of a site that provides more information about the entry.

Public Comment URL—the Internet address of a site that will accept public comments on the entry. Alternatively, timely public comments may be submitted at the Governmentwide e-rulemaking site, *http://www.regulations.gov*.

Additional Information—any information an agency wishes to include that does not have a specific corresponding data element.

Compliance Cost to the Public—the estimated gross compliance cost of the action.

Affected Sectors—the industrial sectors that the action may most affect, either directly or indirectly. Affected sectors are identified by North American Industry Classification System (NAICS) codes.

Energy Effects—an indication of whether the agency has prepared or plans to prepare a Statement of Energy Effects for the action, as required by Executive Order 13211 ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' signed May 18, 2001 (66 FR 28355).

Related RINs—one or more past or current RIN(s) associated with activity related to this action, such as merged RINs, split RINs, new activity for previously completed RINs, or duplicate RINs.

Statement of Need—a description of the need for the regulatory action.

Summary of the Legal Basis—a description of the legal basis for the action, including whether any aspect of the action is required by statute or court order.

Alternatives—a description of the alternatives the agency has considered or will consider as required by section 4(c)(1)(B) of Executive Order 12866.

Anticipated Costs and Benefits—a description of preliminary estimates of the anticipated costs and benefits of the action.

Risks—a description of the magnitude of the risk the action addresses, the amount by which the agency expects the action to reduce this risk, and the relation of the risk and this risk reduction effort to other risks and risk reduction efforts within the agency's jurisdiction.

V. Abbreviations

The following abbreviations appear throughout this publication:

ANPRM—An Advance Notice of Proposed Rulemaking is a preliminary notice, published in the **Federal Register**, announcing that an agency is considering a regulatory action. An agency may issue an ANPRM before it develops a detailed proposed rule. An ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR—The Code of Federal Regulations is an annual codification of the general and permanent regulations published in the **Federal Register** by the agencies of the Federal Government. The Code is divided into 50 titles, each title covering a broad area subject to Federal regulation. The CFR is keyed to and kept up to date by the daily issues of the **Federal Register**.

EO—An Executive order is a directive from the President to Executive agencies, issued under constitutional or statutory authority. Executive orders are published in the **Federal Register** and in title 3 of the Code of Federal Regulations.

FR—The **Federal Register** is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices of meetings, and other official documents issued by Federal agencies.

FY—The Federal fiscal year runs from October 1 to September 30.

- *NPRM*—A Notice of Proposed Rulemaking is the document an agency issues and publishes in the **Federal Register** that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum: A statement of the time, place, and nature of the public rulemaking proceeding;
- A reference to the legal authority under which the rule is proposed; and
- Either the terms or substance of the proposed rule or a description of the subjects and issues involved.

PL (or Pub. L.)— A public law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, unlike a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, PL 112–4 is the fourth public law of the 112th Congress.

RFA—A Regulatory Flexibility Analysis is a description and analysis of the impact of a rule on small entities, including small businesses, small governmental jurisdictions, and certain small not-for-profit organizations. The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires each agency to prepare an initial RFA for public comment when it is required to publish an NPRM and to make available a final RFA when the final rule is published, unless the agency head certifies that the rule would not have a significant economic impact on a substantial number of small entities.

RIN—The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in the Regulatory Plan and the Unified Agenda, as directed by Executive Order 12866 (section 4(b)). Additionally, OMB has asked agencies to include RINs in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**, to make it easier for the public and agency officials to track the publication history of regulatory actions throughout their development.

Seq. No.—The sequence number identifies the location of an entry in the printed edition of the Regulatory Plan and the Unified Agenda. Note that a specific regulatory action will have the same RIN throughout its development but will generally have different

sequence numbers if it appears in different printed editions of the Unified Agenda. Sequence numbers are not used in the online Unified Agenda.

U.S.C.—The United States Code is a consolidation and codification of all general and permanent laws of the United States. The U.S.C. is divided into 50 titles, each title covering a broad area of Federal law.

VI. How can users get copies of the Plan and the Agenda?

Copies of the **Federal Register** issue containing the printed edition of The Regulatory Plan and the Unified Agenda (agency regulatory flexibility agendas) are available from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250–7954. Telephone: (202) 512–1800 or 1–866–512–1800 (toll-free).

Copies of individual agency materials may be available directly from the agency or may be found on the agency's Web site. Please contact the particular agency for further information.

All editions of The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions since fall 1995 are available in electronic form at *http://reginfo.gov*, along with flexible search tools.

The Government Printing Office's GPO FDsys Web site contains copies of the Agendas and Regulatory Plans that have been printed in the **Federal Register**. These documents are available at *http://www.fdsys.gov*.

Dated: November 17, 2016.

John C. Thomas,

Executive Director.

INTRODUCTION TO THE 2016 REGULATORY PLAN

Executive Order 12866, issued in 1993, requires the production of a Unified Regulatory Agenda and Regulatory Plan. Executive Order 13563, issued in 2011, reaffirms the requirements of Executive Order 12866.

Consistent with these Executive Orders, the Office of Information and Regulatory Affairs (OIRA) is providing the 2016 Unified Regulatory Agenda (Agenda) and the Regulatory Plan (Plan) for public review. The Agenda and Plan are preliminary statements of regulatory and deregulatory policies and priorities under consideration. The Plan provides a list of important regulatory actions that agencies are considering for issuance in proposed or final form during the 2017 fiscal year. In contrast, the Agenda is a more inclusive list that includes numerous ministerial actions and routine rulemakings, as well as long-term initiatives that agencies do not plan to complete in the coming year but on which they are actively working. Changed circumstances, public comment, or applicable legal authorities could affect an agency's decision about whether to go forward with a listed regulatory action.

A central purpose of the Agenda is to involve the public, including State, local, and tribal officials, in Federal regulatory planning. The public examination of the Agenda and Plan will facilitate public participation in a regulatory system that, in the words of Executive Order 13563, protects ''public health, welfare, safety, and our environment while promoting economic growth, innovation, competitiveness, and job creation.'' We emphasize that rules listed on the Agenda must still undergo significant development and review before agencies can issue them. No regulatory action can become effective until it has gone through the legally required processes, which normally include public notice and comment. Any proposed or final action must also satisfy the requirements of relevant statutes, Executive Orders, and Presidential Memoranda.

Among other information, the Agenda provides an initial classification of whether a rulemaking is ''significant'' or ''economically significant'' under the terms of Executive Orders 12866 and 13563. The Agenda might list a rule as ''economically significant'' within the meaning of Executive Order 12866 (generally, having an annual effect on the economy of $100 million or more) because it imposes costs, confers large benefits, affects significant budget resources, or removes costly burdens.

Executive Orders 13563 and 13610: Regulatory Development, and the Retrospective Review of Regulation

Executive Order 13563 reaffirmed the principles, structures, and definitions in Executive Order 12866, which has long governed regulatory review. Executive Order 13563 explicitly points to the need for predictability and certainty in the regulatory system, as well as for use of the least burdensome means to achieving regulatory ends. These Executive Orders include the requirement that, to the extent permitted by law, agencies should not proceed with rulemaking in the absence of a reasoned determination that the benefits justify the costs. They also establish public participation, integration and innovation, flexible approaches, scientific integrity, and retrospective review as areas of emphasis in regulation. In particular, Executive Order 13563 explicitly draws attention to the need to measure and improve ''the actual results of regulatory requirements''—a clear reference to the importance of the retrospective review of regulations.

Executive Order 13563 addresses new regulations that are under development, as well as retrospective review of existing regulations that are already in place. With respect to agencies' review of existing regulations, the Executive Order calls for careful reassessment based on empirical analysis. The prospective analysis required by Executive Order 13563 may depend on a degree of prediction and speculation about a rule's likely impacts, and the actual costs and benefits of a regulation may be lower or higher than what was anticipated when the rule was originally developed.

Executive Order 13610, *Identifying and Reducing Regulatory Burdens,* issued in 2012, institutionalizes the retrospective—or ''lookback''—mechanism set out in Executive Order 13563 by requiring agencies to report to the Office of Management and Budget and to the public twice each year (January and July) on the status of their retrospective review efforts. In these reports, agencies are to ''describe progress, anticipated accomplishments, and proposed timelines for relevant actions.''

Executive Orders 13563 and 13610 recognize that circumstances may change in a way that requires agencies to reconsider regulatory requirements. The retrospective review process allows agencies to reevaluate existing rules and to streamline, modify, or eliminate those regulations that do not make sense in their current form. The agencies' lookback efforts so far during this Administration have yielded approximately $37 billion in savings for the American public over the next five years. Reflecting that focus, the current Agenda lists numerous actions that retroactively review existing regulatory programs. Since President Obama issued Executive Order 13610, this Administration has worked to institutionalize retrospective review in the federal agencies. In July 2016, agencies submitted to OIRA the latest updates of their retrospective review plans, which are publicly available at: *https://www.whitehouse.gov/omb/oira/regulation-reform*. Federal agencies will again update their retrospective review plans in January 2017. OIRA has asked agencies to continue to emphasize retrospective reviews in their latest Regulatory Plans.

As agencies advance the regulations detailed in this 2016 Regulatory Plan, OIRA will continue its efforts to ensure that our regulatory system emphasizes, public participation, scientific evidence, innovation, flexible regulatory approaches, and careful consideration of costs and benefits. These considerations are meant to produce a regulatory system that is driven by the best available knowledge and evidence, attentive to real-world impacts, and is suited to the evolving circumstances of the 21st Century.

DEPARTMENT OF AGRICULTURE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
1	National Organic Program—Organic Aquaculture Standards	0581–AD34	Proposed Rule Stage.
2	NOP; Organic Livestock and Poultry Practices;	0581–AD44	Final Rule Stage.
3	Importation, Interstate Movement, and Release Into the Environment of Certain Genetically Engineered Organisms.	0579–AE15	Proposed Rule Stage.

DEPARTMENT OF AGRICULTURE—Continued

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
4	Horse Protection; Licensing of Designated Qualified Persons and Other Amendments.	0579–AE19	Final Rule Stage.
5	Tournament Systems and Poultry Growing Arrangements	0580–AB26	Proposed Rule Stage.
6	Unfair Practices and Unreasonable Preference	0580–AB27	Proposed Rule Stage.
7	Clarification of Scope	0580–AB25	Final Rule Stage.
8	Eligibility, Certification, and Employment and Training Provisions	0584–AD87	Final Rule Stage.
9	National School Lunch and School Breakfast Programs: Nutrition Standards for All Foods Sold in School, as Required by the Healthy, Hunger-Free Kids Act of 2010.	0584–AE09	Final Rule Stage.
10	Enhancing Retailer Eligibility Standards in SNAP	0584–AE27	Final Rule Stage.
11	Supplemental Nutrition Assistance Program (SNAP) Photo Electronic Benefit Transfer (EBT) Card Implementation Requirements.	0584–AE45	Final Rule Stage.
12	Revision of the Nutrition Facts Panels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed.	0583–AD56	Proposed Rule Stage.
13	Modernization of Swine Slaughter Inspection	0583–AD62	Proposed Rule Stage.

DEPARTMENT OF COMMERCE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
14	Endangered and Threatened Species; Critical Habitat for the Threatened Caribbean Corals.	0648–BG20	Proposed Rule Stage.
15	Designation of Critical Habitat for Threatened Indo-Pacific Reef-building Corals	0648–BG26	Proposed Rule Stage.
16	Magnuson-Stevens Fisheries Conservation and Management Act; Seafood Import Monitoring Program.	0648–BF09	Final Rule Stage.
17	Designation of Critical Habitat for the Gulf of Maine, New York Bight, and Chesapeake Bay Distinct Population Segments of Atlantic Sturgeon.	0648–BF28	Final Rule Stage.
18	Designation of Critical Habitat for the Carolina and South Atlantic Distinct Population Segments of Atlantic Sturgeon.	0648–BF32	Final Rule Stage.

DEPARTMENT OF DEFENSE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
19	Sexual Assault Prevention and Response Program Procedures	0790–AI36	Final Rule Stage.
20	Identification (ID) Cards for Members of the Uniformed Services, Their Dependents, and Other Eligible Individuals (Adding Subpart D).	0790–AJ37	Final Rule Stage.
21	Sexual Assault Prevention and Response (SAPR) Program	0790–AJ40	Final Rule Stage.
22	TRICARE; Reimbursement of Long Term Care Hospitals and Inpatient Rehabilitation Facilities.	0720–AB47	Final Rule Stage.
23	TRICARE: Refills of Maintenance Medications Through Military Treatment Facility Pharmacies or National Mail Order Pharmacy Program.	0720–AB64	Final Rule Stage.

DEPARTMENT OF EDUCATION

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
24	Title I of the Elementary and Secondary Education Act of 1965—Accountability and State Plans.	1810–AB27	Final Rule Stage.
25	Elementary and Secondary Education Act of 1965, as Amended by the Every Student Succeeds Act—Supplement Not Supplant under Title I, Part A.	1810–AB33	Final Rule Stage.

DEPARTMENT OF ENERGY

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage.
26	Energy Conservation Standards for General Service Lamps	1904–AD09	Proposed Rule Stage.
27	Energy Conservation Standards for Residential Non-Weatherized Gas Furnaces and Mobile Home Gas Furnaces.	1904–AD20	Proposed Rule Stage.
28	Energy Conservation Standards for Walk-In Coolers and Walk-In Freezers	1904–AD59	Proposed Rule Stage.
29	Energy Conservation Standards for Manufactured Housing	1904–AC11	Final Rule Stage.
30	Energy Conservation Standards for Commercial Packaged Boilers	1904–AD01	Final Rule Stage.
31	Energy Conservation Standards for Commercial Water Heating Equipment	1904–AD34	Final Rule Stage.

DEPARTMENT OF ENERGY—Continued

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage.
32	Energy Conservation Standards for Dedicated-Purpose Pool Pumps	1904–AD52	Final Rule Stage.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage.
33	Confidentiality of Substance Use Disorder Patient Records	0930–AA21	Final Rule Stage.
34	Control of Communicable Diseases	0920–AA63	Final Rule Stage.
35	Mammography Quality Standards Act; Regulatory Amendments	0910–AH04	Proposed Rule Stage.
36	Patient Medication Information	0910–AH33	Proposed Rule Stage.
37	340(B) Civil Monetary Penalties for Manufacturers and Ceiling Price Regulations	0906–AA89	Final Rule Stage.
38	Definition of Human Organ Under Section 301 of the National Organ Transplant Act of 1984.	0906–AB02	Final Rule Stage.
39	340B Program Omnibus Guidelines	0906–AB08	Final Rule Stage.
40	Federal Policy for the Protection of Human Subjects; Final Rules	0937–AA02	Final Rule Stage.
41	Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid, and Other Provisions Related to Eligibility and Enrollment for Medicaid and CHIP (CMS–2334–P2).	0938–AS55	Proposed Rule Stage.
42	FY 2018 Prospective Payment System and Consolidated Billing for Skilled Nursing Facilities (SNFs) (CMS–1679–P).	0938–AS96	Proposed Rule Stage.
43	FY 2018 Inpatient Psychiatric Facilities Prospective Payment System—Rate Update (CMS–1673–P).	0938–AS97	Proposed Rule Stage.
44	FY 2018 Inpatient Rehabilitation Facility (IRF) Prospective Payment System (CMS–1671–P).	0938–AS99	Proposed Rule Stage.
45	FY 2018 Hospice Rate Update (CMS–1675–P)	0938–AT00	Proposed Rule Stage.
46	CY 2018 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates (CMS–1678–P).	0938–AT03	Proposed Rule Stage.
47	CY 2018 Changes to the End- Stage. Renal Disease (ESRD) Prospective Payment System, Quality Incentive Program, and Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) (CMS–1674–P).	0938–AT04	Proposed Rule Stage.
48	Eligibility Notices, Fair Hearing and Appeal Processes for Medicaid, and Other Provisions Related to Eligibility and Enrollment for Medicaid and CHIP (CMS–2334–F2).	0938–AS27	Final Rule Stage..
49	CY 2017 Inpatient Hospital Deductible and Hospital and Extended Care Services Coinsurance Amounts (CMS–8062–N).	0938–AS70	Final Rule Stage.
50	CY 2018 Inpatient Hospital Deductible and Hospital and Extended Care Services Coinsurance Amounts (CMS–8065–N).	0938–AT05	Final Rule Stage.
51	Adoption and Foster Care Analysis and Reporting System (AFCARS)	0970–AC47	Final Rule Stage.
52	Flexibility, Efficiency, and Modernization of Child Support Enforcement Programs	0970–AC50	Final Rule Stage.

DEPARTMENT OF HOMELAND SECURITY

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage.
53	Chemical Facility Anti-Terrorism Standards (CFATS)	1601–AA69	Proposed Rule Stage.
54	New Classification for Victims of Criminal Activity; Eligibility for the U Nonimmigrant Status.	1615–AA67	Proposed Rule Stage.
55	Requirements for Filing Motions and Administrative Appeals	1615–AB98	Proposed Rule Stage.
56	Improvement of the Employment Creation Immigrant Regulations	1615–AC07	Proposed Rule Stage.
57	Classification for Victims of Severe Forms of Trafficking in Persons; Eligibility for T Nonimmigrant Status.	1615–AA59	Final Rule Stage.
58	Special Immigrant Juvenile Petitions	1615–AB81	Final Rule Stage.
59	International Entrepreneur	1615–AC04	Final Rule Stage.
60	Retention of EB–1, EB–2, and EB–3 Immigrant Workers and Program Improvements Affecting Highly-Skilled H–1B Nonimmigrant Workers.	1615–AC05	Final Rule Stage.
61	Commercial Fishing Vessels—Implementation of 2010 and 2012 Legislation	1625–AB85	Proposed Rule Stage.
62	Seafarers' Access to Maritime Facilities	1625–AC15	Final Rule Stage.
63	Air Cargo Advance Screening (ACAS)	1651–AB04	Proposed Rule Stage.
64	Definition of Form I–94 to Include Electronic Format	1651–AA96	Final Rule Stage.
65	Surface Transportation Vulnerability Assessments and Security Plans	1652–AA56	Prerule Stage.
66	Security Training for Surface Transportation Employees	1652–AA55	Proposed Rule Stage.
67	Vetting of Certain Surface Transportation Employees	1652–AA69	Proposed Rule Stage.
68	Eligibility Checks of Nominated and Current Designated School Officials of Schools That Enroll F and M Nonimmigrant Students and of Exchange Visitor Program-Designated Sponsors of J Nonimmigrants.	1653–AA71	Proposed Rule Stage.

DEPARTMENT OF HOMELAND SECURITY—Continued

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage.
69	Updates to Floodplain Management and Protection of Wetlands Regulations to Implement Executive Order 13690 and the Federal Flood Risk Management Standard.	1660–AA85	Final Rule Stage.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
70	Floodplain Management and Protection of Wetlands; Minimum Property Standards for Flood Hazard Exposure; Building to the Federal Flood Risk Management Standard (FR–5717).	2501–AD62	Proposed Rule Stage.
71	Notification, Evaluation and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance; Response to Elevated Blood Lead Level (FR–5816).	2501–AD77	Final Rule Stage.

DEPARTMENT OF JUSTICE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
72	Nondiscrimination on the Basis of Disability: Accessibility of Web Information and Services of State and Local Governments.	1190–AA65	Proposed Rule Stage.
73	Nondiscrimination on the Basis of Disability; Movie Captioning and Audio Description.	1190–AA63	Final Rule Stage.
74	Revision of Standards and Procedures for the Enforcement of Section 274B of the Immigration and Nationality Act.	1190–AA71	Final Rule Stage.
75	Motions To Reopen Removal, Deportation, or Exclusion Proceedings Based Upon a Claim of Ineffective Assistance of Counsel.	1125–AA68	Final Rule Stage.
76	Recognition of Organizations and Accreditation of Non-Attorney Representatives	1125–AA72	Final Rule Stage.
77	Implementation of the ADA Amendments Act of 2008 Federally Assisted Programs (Section 504 of the Rehabilitation Act of 1973).	1105–AB50	Proposed Rule Stage.

DEPARTMENT OF LABOR

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
78	Employment of Workers With Disabilities Under Special Certificates	1235–AA14	Proposed Rule Stage.
79	Equal Employment Opportunity in Apprenticeship Amendment of Regulations	1205–AB59	Final Rule Stage.
80	Amendment to Claims Procedure Regulation	1210–AB39	Final Rule Stage.
81	Savings Arrangements Established by Political Subdivisions for Non-Governmental Employees.	1210–AB76	Final Rule Stage.
82	Respirable Crystalline Silica	1219–AB36	Proposed Rule Stage.
83	Proximity Detection Systems for Mobile Machines in Underground Mines	1219–AB78	Proposed Rule Stage.
84	Preventing Workplace Violence in Healthcare	1218–AD08	Prerule Stage.
85	Infectious Diseases	1218–AC46	Proposed Rule Stage.
86	Standards Improvement Project IV	1218–AC67	Proposed Rule Stage.
87	Occupational Exposure to Beryllium	1218–AB76	Final Rule Stage.

DEPARTMENT OF TRANSPORTATION

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
88	Airport Safety Management System	2120–AJ38	Proposed Rule Stage.
89	Pilot Professional Development	2120–AJ87	Proposed Rule Stage.
90	Revision of Airworthiness Standards for Normal, Utility, Acrobatic, and Commuter Category Airplanes (RRR).	2120–AK65	Final Rule Stage.
91	National Goals and Performance Management Measures 2 (MAP–21)	2125–AF53	Final Rule Stage.
92	National Goals and Performance Management Measures 3 (MAP–21)	2125–AF54	Final Rule Stage.
93	Entry-Level Driver Training	2126–AB66	Final Rule Stage.
94	Tire Fuel Efficiency Consumer Information—Part 2	2127–AK76	Proposed Rule Stage.
95	Heavy Vehicle Speed Limiters	2127–AK92	Proposed Rule Stage.
96	Federal Motor Vehicle Safety Standard (FMVSS) 150—Vehicle to Vehicle (V2V) Communication.	2127–AL55	Proposed Rule Stage.
97	Locomotive Recording Devices	2130–AC51	Proposed Rule Stage.
98	Risk Reduction Program	2130–AC11	Final Rule Stage.

DEPARTMENT OF TRANSPORTATION—Continued

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
99	Pipeline Safety: Safety of Hazardous Liquid Pipelines	2137–AE66	Final Rule Stage.
100	Hazardous Materials: Oil Spill Response Plans and Information Sharing for High-Hazard Flammable Trains.	2137–AF08	Final Rule Stage.

DEPARTMENT OF VETERANS AFFAIRS

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
101	Schedule for Rating Disabilities: The Genitourinary Diseases and Conditions	2900–AP16	Proposed Rule Stage.
102	Revise and Streamline VA Acquisition Regulation to Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V001, Parts 803, 814, 822).	2900–AP50	Proposed Rule Stage.
103	VA Homeless Providers Grant and Per Diem Program	2900–AP54	Proposed Rule Stage.
104	Revise and Streamline VA Acquisition Regulation to Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V005, Parts 812, 813).	2900–AP58	Proposed Rule Stage.
105	Diseases Associated With Exposure to Contaminants in the Water Supply at Camp Lejeune.	2900–AP66	Proposed Rule Stage.
106	Revise and Streamline VA Acquisition Regulation to Adhere to Federal Acquisition Regulation Principles VAAR Case 2014–V004 (Parts 811, 832).	2900–AP81	Proposed Rule Stage.
107	Revise and Streamline VA Acquisition Regulation to Adhere to Federal Acquisition Regulation Principles (VAAR Case 2014–V002, Parts 816, 828).	2900–AP82	Proposed Rule Stage.
108	Schedule for Rating Disabilities: The Hematologic and Lymphatic Systems	2900–AO19	Final Rule Stage.
109	Schedule for Rating Disabilities: The Endocrine System	2900–AO44	Final Rule Stage.
110	Fiduciary Activities	2900–AO53	Final Rule Stage.
111	Per Diem Paid to States for Care of Eligible Veterans in State Homes	2900–AO88	Final Rule Stage.
112	Schedule for Rating Disabilities; Dental and Oral Conditions	2900–AP08	Final Rule Stage.
113	Schedule for Rating Disabilities: Gynecological Conditions and Disorders of the Breast.	2900–AP13	Final Rule Stage.
114	Schedule for Rating Disabilities: The Organs of Special Sense and Schedule of Ratings—Eye.	2900–AP14	Final Rule Stage.
115	Schedule for Rating Disabilities: Skin Conditions	2900–AP27	Final Rule Stage.
116	Tiered Pharmacy Copayments for Medications	2900–AP35	Final Rule Stage.
117	Advanced Practice Registered Nurses	2900–AP44	Final Rule Stage.
118	Expanded Access to Non-VA Care Through the Veterans Choice Program	2900–AP60	Final Rule Stage.
119	Veterans Employment Pay for Success Grant Program	2900–AP72	Final Rule Stage.

ENVIRONMENTAL PROTECTION AGENCY

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
120	Federal Baseline Water Quality Standards for Indian Reservations	2040–AF62	Prerule Stage.
121	Renewables Enhancement and Growth Support Rule	2060–AS66	Proposed Rule Stage.
122	Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements.	2060–AS82	Proposed Rule Stage.
123	Renewable Fuel Volume Standards for 2018 and Biomass Based Diesel Volume (BBD) for 2019.	2060–AT04	Proposed Rule Stage.
124	Trichloroethylene (TCE); Rulemaking Under TSCA Section 6(a)	2070–AK03	Proposed Rule Stage.
125	N-Methylpyrrolidone (NMP) and Methylene Chloride; Rulemaking Under TSCA Section 6(a).	2070–AK07	Proposed Rule Stage.
126	Trichloroethylene (TCE); Rulemaking Under TSCA Section 6(a); Vapor Degreasing.	2070–AK11	Proposed Rule Stage.
127	Polychlorinated Biphenyls (PCBs); Reassessment of Use Authorizations for PCBs in Small Capacitors in Fluorescent Light Ballasts in Schools and Daycares.	2070–AK12	Proposed Rule Stage.
128	Procedures for Evaluating Existing Chemical Risks Under the Toxic Substances Control Act.	2070–AK20	Proposed Rule Stage.
129	Procedures for Prioritization of Chemicals for Risk Evaluation Under the Toxic Substances Control Act.	2070–AK23	Proposed Rule Stage.

BILLING CODE 6820–27–P

U.S. DEPARTMENT OF AGRICULTURE

Fall 2016 Statement of Regulatory Priorities

The U.S. Department of Agriculture (USDA) provides leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on sound public policy, the best available science, and efficient management. The Department touches the lives of almost every American, every day. Our regulatory plan reflects that reality and reinforces our commitment to achieve results for everyone we serve.

The regulatory plan reflects USDA's efforts to implement several important pieces of legislation. The 2014 Farm Bill provides authorization for services and programs that impact every American and millions of people around the world. Under the Farm Bill authorities, USDA will continue to build on historic economic gains in rural America. The Healthy, Hunger-Free Kids Act of 2010 (HHFKA) provided the authority for USDA to make genuine reforms to the school lunch and breakfast programs by improving the critical nutrition and hunger safety net for millions of children.

To assist the country in addressing today's challenges, USDA has developed a regulatory plan consistent with five strategic goals that articulate the Department's priorities.

1. Assist Rural Communities To Create Prosperity So They Are Self-Sustaining, Re-Populating, and Economically Thriving

Rural America is home to a vibrant economy supported by nearly 50 million Americans. These Americans come from diverse backgrounds and work in a variety of industries, including manufacturing, agriculture, services, government, and trade. Today, the country looks to rural America not only to provide food and fiber, but for crucial emerging economic opportunities such as renewable energy, broadband, and recreation. Many of the Nation's small businesses are located in rural communities and are the engine of job growth and an important source of innovation for the country. The economic vitality and quality of life in rural America depends on a healthy agricultural production system. Farmers and ranchers face a challenging global, technologically advanced, and competitive business environment. USDA works to ensure that producers are prosperous and competitive, have access to new markets, can manage their risks, and receive support in times of economic distress or weather-related disasters. Prosperous rural communities are those with adequate assets to fully support the well-being of community members. USDA helps to strengthen rural assets by building physical, human and social, financial, and natural capital.

Enhance rural prosperity, including leveraging capital markets to increase Government's investment in rural America.

USDA is committed to providing broadband to rural areas. Since 2009, USDA investments have delivered broadband service to over 6 million rural residents. These investments support the USDA goal to create thriving communities where people want to live and raise families. Consistent with these efforts, the Rural Utilities Service (RUS) published a final rule confirming the interim rule entitled ''Rural Broadband Access Loans and Loan Guarantees'' which published in the **Federal Register** on June 9, 2016. The final rule implements the statutory changes from the 2014 Farm Bill and facilitates greater deployment of and access to broadband services in rural communities by adjusting certain service area eligibility criteria, establishing new priority considerations, and introducing new reporting sections that require more detailed information gathering and publishing for both the Agency and awardees. For more information about this rule, see RIN 0572–AC34.

USDA also works to increase the effectiveness of the Government's investment in rural America. To this end, Rural Development is developing a rule that will establish program metrics to measure the economic activities created through grants and loans, including any technical assistance provided as a component of the grant or loan program, and to measure the short and long-term viability of award recipients, and any entities to whom recipients provide assistance using the awarded funds. The action is required by section 6209 of the 2014 Farm Bill, and will not change the underlying provisions of the included programs, such as eligibility, applications, scoring, and servicing provisions. For more information about this rule, see RIN 0570–AA95.

Increase agricultural opportunities by ensuring a robust safety net, creating new markets, and supporting a competitive agricultural system.

In another step to increase the effectiveness of the Government's investment in rural America, the Farm Service Agency (FSA) published a final rule on December 16, 2015, on behalf of the Commodity Credit Corporation (CCC) to specify the requirements for a person to be considered actively engaged in farming for the purpose of payment eligibility for certain FSA and CCC programs. These changes ensure that farm program payments are made to the farmers and farm families that they are intended to help. Specifically, as required by the 2014 Farm Bill, FSA revised the requirements for a significant contribution of active personnel management to a farming operation. These changes are required by the 2014 Farm Bill, and will not apply to persons or entities comprised solely of family members. For more information about this rule, see RIN 0560–AI31.

The Federal Crop Insurance Program mitigates production and revenue losses

from yield or price fluctuations and provides timely indemnity payments. The 2014 Farm Bill improved the Federal Crop Insurance Program by allowing producers to elect coverage for shallow losses, improved options for growers of organic commodities, and the ability for diversified operations to insure their whole-farm under a single policy. To strengthen further the farm financial safety net, the Risk Management Agency (RMA) published a final rule on June 30, 2016, that amended the general administrative regulations governing Catastrophic Risk Protection Endorsement, Area Risk Protection Insurance, and the basic provisions for Common Crop Insurance consistent with the changes mandated by the 2014 Farm Bill. For more information about this rule, see RIN 0563–AC43.

The Packers and Stockyards Program promotes fair business practices and competitive environments to market livestock, meat, and poultry. Accordingly, and consistent with its oversight activities under the Packers and Stockyards Act (P&S Act), the Grain Inspection, Packers and Stockyards Administration (GIPSA) proposes to establish criteria to be considered in determining whether an undue or unreasonable preference or advantage has occurred during contractual growing arrangements. For more information about this rule, see RIN 0580–AB27. Consistent with the P&S Act, GIPSA also proposes to establish certain requirements when using a ''tournament'' system for contract poultry growing. For more information about this rule, see RIN 0580–AB26. Finally, GIPSA proposes to issue interim clarifying language on the list of unfair practices between those that do not require a showing of harm to competition and those that violate the P&S Act only with a finding of harm to competition. For more information about this rule, see RIN 0580–AB25

2. Ensure Our National Forests and Private Working Lands Are Conserved, Restored, and Made More Resilient to Climate Change, While Enhancing Our Water Resources

National forests and private working lands provide clean air, clean and abundant water, and wildlife habitat. These lands sustain jobs and produce food, fiber, timber, and bio-based energy. Many of our landscapes are scenic and culturally important and provide Americans a chance to enjoy the outdoors. The 2014 Farm Bill delivered a strong conservation title that made robust investments to conserve and support America's working lands, and consolidated, and streamlined programs to improve efficiency and encourage participation. Farm Bill conservation programs provide America's farmers, ranchers and others with technical and financial assistance to enable conservation of natural resources, while protecting and improving agricultural operations. Seventy percent of the American landscape is privately owned, making private lands conservation critical to the health of our nation's environment and ability to ensure our working lands are productive. To sustain these many benefits, USDA has implemented the authorities provided by the 2014 Farm Bill to protect and enhance 1.3 billion acres of working lands. USDA also manages 193 million acres of national forests and grasslands. Our partners include Federal, Tribal, and State governments; industry; non-governmental organizations, community groups and producers. The Nation's lands face increasing threats that must be addressed. USDA's natural resource-focused regulatory strategies are designed to make substantial contributions in the areas of soil health, resiliency to climate change, and improved water quality.

Improve the health of the Nation's forests, grasslands and working lands by managing our natural resources.

The Natural Resources Conservation Service (NRCS) administers the Agricultural Conservation Easement Program (ACEP), which provides financial and technical assistance to help conserve agricultural lands and wetlands and their related benefits. The 2014 Farm Bill consolidated the Wetlands Reserve Program (WRP), the Farm and Ranch Lands Protection Program (FRPP), and the Grassland Reserve Program (GRP) into ACEP. In fiscal year 2015, an estimated 115,233 acres of farmland, grasslands, and wetlands were enrolled into ACEP. Through regulation, NRCS established a comprehensive framework to implement ACEP, and standardized criteria for implementing the program, provided program participants with predictability when they initiate an application and convey an easement. On February 27, 2015, NRCS published an interim rule to implement ACEP. NRCS is currently developing a final rule to implement changes to the administration of ACEP based on public comments received. For more information about this rule, see RIN 0578–AA61.

The Conservation Stewardship Program (CSP) also helps the Department ensure that our national forests and private working lands are conserved, restored, and made more resilient to climate change. Through CSP, NRCS provides financial and technical assistance to eligible producers to conserve and enhance soil, water, air, and related natural resources on their land. NRCS makes funding for CSP available nationwide on a continuous application basis. In fiscal year 2014, NRCS enrolled about 9.6 million acres and now CSP enrollment exceeds 60 million acres, about the size of Iowa and Indiana combined. On March 10, 2016, NRCS published a final rule to implement provisions of the 2014 Farm Bill that amended CSP. For more information about this rule, see RIN 0578–AA63.

The Environmental Quality Incentives Program (EQIP) is another voluntary conservation program that helps agricultural producers in a manner that promotes agricultural production and environmental quality as compatible goals. Through EQIP, agricultural producers receive financial and technical assistance to implement structural and management conservation practices that optimize environmental benefits on working agricultural land. Through EQIP, producers addressed their conservation needs on over 11 million acres in fiscal year 2014. EQIP has been instrumental in helping communities respond to drought. On June 3, 2016, NRCS published a final rule that implemented changes mandated by 2014 Farm Bill and addressed key discretionary provisions, including adding waiver authority to irrigation history requirements, incorporation of Tribal Conservation Advisory Councils where appropriate, and clarifying provisions related to Comprehensive Nutrient Management Plans (CNMP) associated with Animal Feeding Operations (AFO). For more information about this rule, see RIN 0578–AA62.

Contribute to clean and abundant water by protecting and enhancing water resources on national forests and working lands.

The 2014 Farm Bill relinked highly erodible land conservation and wetland conservation compliance with eligibility for premium support paid under the federal crop insurance program. The Farm Service Agency implemented these provisions through an interim rule published on April, 24, 2015. Since publication of the interim rule, more than 98.2 percent of producers met the requirement to certify conservation compliance to qualify for crop insurance premium support payments. Implementing these provisions for conservation compliance is expected to extend conservation provisions for an additional 1.5 million acres of highly

erodible lands and 1.1 million acres of wetlands, which will reduce soil erosion, enhance water quality, and create wildlife habitat. Through this action, NRCS modified the existing wetlands Mitigation Banking Program to remove the requirement that USDA hold easements in the mitigation program. This allows entities recognized by USDA to hold mitigation banking easements granted by a person who wishes to maintain payment eligibility under the wetland conservation provision. FSA is currently developing a final rule to implement changes to the interim rule based on public comments received. For more information about this rule, see RIN 0560–AI26.

3. Help America Promote Agricultural Production and Biotechnology Exports as America Works To Increase Food Security

Food security is important for sustainable economic growth of developing nations and the long-term economic prosperity and security of the United States. Unfortunately, global food insecurity is expected to rise in the next five years. Food security means having a reliable source of nutritious and safe food and sufficient resources to purchase it. USDA has a role in curbing this distressing trend through programs such as Food for Progress and President Obama's Feed the Future Initiative and through new technology-based solutions, such as the development of genetically engineered plants that improves yields and reduces post-harvest loss.

Ensure U.S. agricultural resources contribute to enhanced global food security.

The Foreign Agricultural Service (FAS) published a final rule for the Local and Regional procurement (LRP) Program on July 1, 2016 as authorized in section 3207 of the 2014 Farm Bill. USDA implemented a successful LRP pilot program under the authorities of the 2008 Farm Bill. LRP ties to the President's 2014 Trade Policy Agenda and works with developing nations to alleviate poverty and foster economic growth to provide better markets for U.S. exporters. LRP is expected to help alleviate hunger for millions of individuals in food insecure countries. LRP supports development activities that strengthen the capacity of food-insecure developing countries, and build resilience and address the causes of chronic food insecurity while also supporting USDA's other food assistance programs, including the McGovern Dole International Food for Education and Child Nutrition Program (McGovern-Dole). In addition, the program can be used to fill food availability gaps generated by unexpected emergencies. For more information about this rule, see RIN 0551–AA87.

Enhance America's ability to develop and trade agricultural products derived from new and emerging technologies.

USDA uses science-based regulatory systems to allow for the safe development, use, and trade of products derived from new agricultural technologies. USDA continues to regulate the importation, interstate movement, and field-testing of newly developed genetically engineered (GE) organisms that qualify as ''regulated articles'' to ensure they do not pose a threat to plant health before they can be commercialized. These science-based evaluations facilitate the safe introduction of new agricultural production options and enhance public and international confidence in these products. As a part of this effort, the Animal and Plant Health Inspection Service (APHIS) will publish a proposed rule to revise its regulations and align them with current authorizations by incorporating the noxious weed authority and regulate GE organisms that pose plant pest or weed risks in a manner that balances oversight and risk, and that is based on the best available science. The regulatory framework being developed will enable more focused, risk-based regulation of GE organisms that pose plant pest or noxious weed risks and will implement regulatory requirements only to the extent necessary to achieve the APHIS protection goal. For more information about this rule, see RIN 0579–AE15.

As part of an Act to reauthorize and amend the National Sea Grant College Program Act (Act), the President signed a bill to amend the Agricultural Marketing Act of 1946 to include subtitle E, the National Bioengineered Food Disclosure Standard (Pub. L. 114–216). The legislation requires that the Agricultural Marketing Service (AMS) establish a mandatory national bioengineered food disclosure standard and the procedures necessary to implement the national standard within two years of the enactment of the Act. Throughout the process, AMS will engage consumers and industry stakeholders to ensure that the final program is established effectively and with the utmost transparency. AMS is currently preparing an advance notice of proposed rulemaking to begin the rulemaking process for implementing the national bioengineered food disclosure standards. For more information about this action, see RIN 0581–AD54.

The AMS National Organic Program establishes national standards governing the marketing of organically produced agricultural products. These standards do not currently include organic farmed aquatic animals in the United States which means that seafood currently sold as organic in the United States is imported from other countries and certified to private standards or other countries' standards. Accordingly, and based on recommendations from the National Organic Standards Board, USDA is proposing to establish standards for organic farmed aquatic animals and their products. This would allow U.S. producers to compete in the organic seafood market and may expand trade partnerships. For more information about this rule, see RIN 0581–AD34.

4. Ensure That All of America's Children Have Access to Safe, Nutritious, and Balanced Meals

A plentiful supply of safe and nutritious food is essential to the well-being of every family and the healthy development of every child in America. Science has established strong links between diet, health, and productivity. Even small improvements in the average diet, fostered by USDA, may yield significant health and economic benefits. However, foodborne illness is still a common, costly-yet largely preventable-public health problem, even though the U.S. food supply system is one of the safest in the world. USDA is committed to ensuring that Americans have access to safe food through a farm-to-table approach to reduce and prevent foodborne illness. To help ensure a plentiful supply of food, the Department detects and quickly responds to new invasive species and emerging agricultural and public health situations.

Improve access to nutritious food.

USDA's domestic nutrition assistance programs serve one in four Americans annually. The Department is committed to making benefits available to every eligible person who wishes to participate in the major nutrition assistance programs, including the Supplemental Nutrition Assistance Program (SNAP), the cornerstone of the nutrition assistance safety net, which helped over 45 million Americans, more than half of whom were children, the elderly, or individuals with disabilities, put food on the table in 2015. The Food and Nutrition Service (FNS) plans to publish a final rule that works with States interested in implementing photos on SNAP Electronic Benefit Transfer (EBT) cards to ensure that the issuance of photo EBT cards does not

inhibit access to this critical nutrition assistance program. For more information about this rule, see RIN 0584–AE09.

Additionally, FNS plans to issue a final rule codifying 2008 Farm Bill changes addressing SNAP eligibility, certification, and employment and training provisions. While the ultimate objective is for economic opportunities to make nutrition assistance unnecessary for as many families as possible, we will ensure that these vital programs remain ready to serve all eligible people who need them. For more information about this rule, see RIN 0584–AD87.

Promote healthy diet and physical activity behaviors.

The Administration has set a goal to solve the problem of childhood obesity within a generation so that children born today will reach adulthood at a healthy weight. This objective represents FNS's efforts to ensure that program benefits meet appropriate standards to effectively improve nutrition for program participants, to improve the diets of its clients through nutrition education, and to support the national effort to reduce obesity by promoting healthy eating and physical activity. The Department will finalize changes to eligibility requirements for SNAP retail food stores to ensure access to nutritious foods for home preparation and consumption for the families most vulnerable to food insecurity. The final rule will consider the balance of ensuring participant access to retail food stores with enhanced stocking requirements. For more information about this rule, see RIN 0584–AE27.

FNS published a final rule on July 27, 2016, for Nutrition Standards for All Foods Sold in School, as required by HHFKA. Section 208 requires the Secretary to promulgate regulations to establish science-based nutrition standards for all foods sold in schools, outside the school meal programs, on the school campus, and at any time during the school day. For more information about this rule, see RIN 0584–AE09.

FNS published the final rule, Meal Pattern Revisions Related to the Healthy Hunger-Free Kids Act of 2010, on July 8, 2016, to implement section 221 of the HHFKA. This section requires USDA to review and update, no less frequently than once every 10 years, requirements for meals served under the Child and Adult Care Food Program (CACFP) to ensure that meals are consistent with the most recent Dietary Guidelines for Americans and relevant nutrition science. For more information about this rule, see RIN 0584–AE18.

FNS published a final rule, Local School Wellness Policy Implementation and School Nutrition Environment Information, on July 27, 2016, to implement section 204 of the HHFKA. As a result of meal pattern changes in the school meals programs, students are now eating 16 percent more vegetables and there was a 23 percent increase in the selection of fruit at lunch. This Act requires each local educational agency participating in Federal child nutrition programs to establish, for all schools under its jurisdiction, a local school wellness policy to maintain this momentum. The HHFKA requires that the wellness policy include goals for nutrition, nutrition education, physical activity, and other school-based activities that promote student wellness. In addition, the HHFKA requires that local educational agencies ensure stakeholder participation in development of local school wellness policies; periodically assess compliance with the policies; and disclose information about the policies to the public. For more information about this rule, see RIN 0584–AE25.

The Food Safety and Inspection Service (FSIS) continues to ensure that meat and poultry products are properly marked, labeled, and packaged, and prohibits the distribution in-commerce of meat or poultry products that are adulterated or misbranded. FSIS is planning to publish a proposed rule that would amend the nutrition labeling requirements for meat and poultry products to better reflect scientific research and dietary recommendations and to improve the presentation of nutrition information to assist consumers in maintaining healthy dietary practices. This rule will be consistent with the recent changes that the Food and Drug Administration (FDA) finalized for other food products. This rule will ensure that nutrition information is presented consistently across the food supply. For more information about this rule, see RIN 0583–AD56.

Protect agricultural health by minimizing major diseases and pests to ensure access to safe, plentiful, and nutritious food.

The Food Safety and Inspection Service (FSIS) continue to enforce and improve compliance with the Humane Methods of Slaughter Act. FSIS published a final rule on July 18, 2016, requiring non-ambulatory disabled veal calves that are offered for slaughter to be condemned and promptly euthanized. This rule will improve compliance with the Humane Methods of Slaughter Act by encouraging improved treatment of veal calves, as well as improve inspection efficiency by allowing FSIS inspection program personnel to devote more time to activities related to food safety. For more information about this rule, see RIN 0583–AD54.

FSIS is also proposing to amend the Federal meat inspection regulations to improve the effectiveness of swine slaughter inspection by establishing a new inspection system for swine slaughter establishments. The proposed New Swine Slaughter Inspection System would facilitate pathogen reduction in pork products by permitting FSIS to conduct more offline inspection activities that are more effective in ensuring food safety; improving animal welfare and compliance with the Humane Methods of Slaughter Act; and making better use of FSIS resources. For more information about this rule, see RIN 0583–AD62.

5. Create a USDA for the 21st Century That Is High Performing, Efficient, and Adaptable

USDA has been a leader in the Federal government at implementing innovative practices to rein in costs and increase efficiencies. By taking steps to find efficiencies and cut costs, USDA employees have achieved savings and cost avoidances of over $1.4 billion in recent years. Some of these results came from relatively smaller, common-sense initiatives such as the $1 million saved by streamlining the mail handling at one of the USDA mailrooms or the consolidation of the Department's cell phone contracts, which is saving taxpayers over $5 million per year. Other results have come from larger-scale activities, such as the focus on reducing non-essential travel that has yielded over $400 million in efficiencies. Overall, these results have allowed us to do more with less during a time when such stewardship of resources has been critical to meeting the needs of those that we serve.

While these proactive steps have given USDA the tools to carry out our mission-critical work, ensuring that USDA's millions of customers receive stronger service, they are matters relating to agency management, personnel, public property, and/or contracts, and as such they are not subject to the notice and comment requirements for rulemaking codified at 5 U.S.C. 553. Consequently, they are not included in the Department's regulatory agenda. For more information about the USDA efforts to cut costs and modernize operations via the Blueprint for Stronger Service Initiative, see *http://www.usda.gov/wps/portal/usda/usdahome?contentidonly=true&*

contentid=blueprint_for_stronger_service.html.

Retrospective Review of Existing Regulations

In accordance with Executive Order 13563, ''Improving Regulation and Regulatory Review,'' and Executive Order 13610, ''Identifying and Reducing Regulatory Burdens,'' USDA continues to review its existing regulations and information collections to evaluate the continued effectiveness in addressing the circumstances for which the regulations were implemented. As part of this ongoing review to maximize the cost-effectiveness of its regulatory programs, USDA will publish a **Federal Register** notice inviting public comment to assist in analyzing its existing significant regulations to determine whether any should be modified, streamlined, expanded, or repealed.

USDA has identified the following regulatory actions as associated with retrospective review and analysis. Some of the regulatory actions on the below list are completed actions, which do not appear in the Regulatory Agenda. You can find more information about these completed rulemakings in past publications of the Unified Agenda (search the Completed Actions sections) on *www.reginfo.gov*. Other entries on this list are still in development and have not yet appeared in the Regulatory Agenda. You can read more about these entries and the Department's strategy for regulation reform at *http://www.usda.gov/wps/portal/usda/usdahome?navid=USDA_OPEN*.

Agency	Title	RIN
Food Safety & Inspection Service (FSIS).	Requirements for the Disposition of Non-Ambulatory Disabled Veal Calves	0583–AD54.
Animal Plant Health & Inspection Service (APHIS).	Participation in the International Trade Data System (ITDS) via the Automated Commercial Environment (ACE).	TBD.
FSIS	Electronic Export Application and Certification Fee	0583–AD41.
Agricultural Marketing Service (AMS) ...	Input Export Form Numbers Into the Automated Export System	TBD.
AMS	Revisions to the Electronic Submission of the Import Request of Shell Eggs ...	0581–AD40.
APHIS	Forms for Declaration Mandated by 2008 Farm Bill (Lacey Act Amendments)	0579–AD99.
Farm Service Agency (FSA) and Risk Management Agency.	Acreage and Crop Reporting Streamlining Initiative	0563–0084.
FSA	Environmental Policies and Procedures; Compliance with the National Environmental Policy Act and Related Authorities.	0560–AH02.

Rural Housing Service	Community Facilities Loan and Grants	0575–AC91.
FNS	Simplified Cost Accounting and Other Actions to Reduce Paperwork in the Summer Food Service Program.	0584–AD84.
Rural Business Services (RBS)	Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance.	0570–AA73, 0570–0065.
RBS	Rural Energy for America Program	0570–AA76.

USDA—AGRICULTURAL MARKETING SERVICE (AMS)

Proposed Rule Stage

1. National Organic Program—Organic Aquaculture Standards

Priority: Other Significant.

Legal Authority: 7 U.S.C. 6501 to 6522

CFR Citation: 7 CFR 205.

Legal Deadline: None.

Abstract: This action proposes to establish standards for organic production and certification of farmed aquatic animals and their products in the USDA organic regulations. This action would also add aquatic animals as a scope of certification and accreditation under the National Organic Program (NOP).

Statement of Need: This action is necessary to establish standards for organic farmed aquatic animals and their products which would allow U.S. producers to compete in the organic seafood market. This action is also necessary to address multiple recommendations provided to USDA by the National Organic Standards Board (NOSB). From 2007 through 2009, the NOSB made five recommendations to establish standards for the certification of organic farmed aquatic animals and their products. Finally, the U.S. currently has organic standards equivalence arrangements with Canada and the European Union (EU). Both Canada and the EU established standards for organic aquaculture products. Because the U.S.does not have organic aquaculture standards, the U.S. is unable to include aquaculture in the scope of these arrangements. Establishing U.S. organic aquaculture may provide a basis for expanding those trade partnerships.

Summary of Legal Basis: AMS National Organic Program is authorized by the Organic Foods Production Act of 1990 (OFPA) to establish national standards governing the marketing of organically produced agricultural products (7 U.S.C. 6501–6522). The USDA organic regulations set the requirements for the organic certification of agricultural products (7 CFR part 205).

Alternatives: An alternative to providing organic aquatic animal standards would be to not publish such standards and allow aquatic animal products to continue to be sold as organic based on private standards or other countries' standards.

Anticipated Cost and Benefits: The cost for existing conventional aquaculture operations to convert and participate in this voluntary marketing program generally would be incurred in the cost of changing management practices, increased feed costs, and obtaining organic certification. There also would be some costs to certifying agents who would need to add aquaculture to their areas of accreditation under the USDA organic regulations. These costs include application fees and expanded audits to ensure certifying agents meet the accreditation requirements needed to provide certification services to aquaculture operations. By providing organic standards for organic aquatic animal products, producers will be able to sell certified organic aquatic animal products for a premium above the price of conventionally produced seafood. Organic consumers will be assured that organic aquatic animal products comply with the USDA organic regulations.

Risks: There are no known risks to providing these additional standards for certification of organic products.

USDA—AMS

Final Rule Stage

2. NOP; Organic Livestock and Poultry Practices

Priority: Other Significant.

Legal Authority: 7 U.S.C. 6501 to 6522

CFR Citation: 7 CFR 205.

Legal Deadline: None.

Abstract: This action would establish standards that support additional practice standards for organic livestock and poultry production. This action would add provisions to the USDA organic regulations to address and clarify livestock and poultry living conditions (for example, outdoor access, housing environment and stocking densities), health care practices (for example physical alterations, administering medical treatment, euthanasia), and animal handling and transport to and during slaughter.

Statement of Need: This action would establish standards that support additional practice standards for organic livestock and poultry production. This action would add provisions to the USDA organic regulations to address and clarify livestock and poultry living conditions (for example, outdoor access, housing environment and stocking densities), health care practices (for example physical alterations, administering medical treatment, euthanasia), and animal handling and transport to and during slaughter.

Summary of Legal Basis: This action is necessary to augment the USDA organic livestock and poultry production regulations with robust and clear provisions to fulfill an objective of the Organic Foods Production Act of 1990 (OFPA): To assure consumers that organically-produced products meet a consistent and uniform standard (7 U.S.C. 6501). OFPA mandates that detailed livestock and poultry regulations be developed through notice and comment rulemaking and intends for National Organic Standards Board (NOSB) involvement in that process (7 U.S.C. 6508(g)).

Alternatives: The alternative is that consumers will not have the assurance that organically-produced products meet a consistent and uniform standard as there will be continued inconsistency among organic livestock producers. Nor will certifying agents be able to make consistent certification decisions and facilitate fairness and transparency for the organic producers and consumers that participate in the market.

Anticipated Cost and Benefits: AMS expects this rule to maintain consumer confidence in the high standards represented by the USDA organic seal. This action would promote consistency among certifying agents to uniformly verify and enforce clear requirements for organic livestock. AMS estimates that annualized benefits for increased or sustained demand for organic products is $14.5 to $34 million per year. The cost of implementing the rule would fall primarily on organic poultry operations that may need to purchase and transition additional land to organic production and modify existing poultry structures to come into compliance with this rule. AMS estimates that the annualized cost to the organic industry for this rule is $13 to 15.6 million per year.

Risks: AMS expects that a few provisions among the numerous proposed will be contentious.

USDA—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (APHIS)

Proposed Rule Stage

3. Importation, Interstate Movement, and Release Into the Environment of Certain Genetically Engineered Organisms

Priority: Other Significant.

Legal Authority: 7 U.S.C. 7701 to 7772; 7 U.S.C. 7781 to 7786; 31 U.S.C. 9701

CFR Citation: 7 CFR 340.

Legal Deadline: None.

Abstract: USDA uses science-based regulatory systems to allow for the safe development, use, and trade of products derived from new agricultural technologies. USDA continues to regulate the importation, interstate movement, and field-testing of newly developed genetically engineered (GE) organisms that qualify as ''regulated articles'' to ensure they do not pose a threat to plant health before they can be commercialized. These science-based evaluations facilitate the safe introduction of new agricultural production options and enhance public and international confidence in these products. As a part of this effort, the Animal and Plant Health Inspection Service (APHIS) will publish a proposed rule to revise its regulations regarding the regulation of GE organisms.

Statement of Need: This rule is necessary in order to respond to advances in genetic engineering and APHIS' understanding of the pest risks posed by genetically engineered organisms, to evaluate genetically engineered plants for noxious weed risk (an evaluation that is not part of the current regulations), to respond to two Office of Inspector General audits regarding APHIS' regulation of genetically engineered organisms, and to respond to the requirements of the 2008 Farm Bill.

Summary of Legal Basis: The Plant Protection Act of 200, as amended (7 U.S.C. 7701 *et seq.*).

Alternatives: Alternatives that we considered were (1) to leave the regulations unchanged; (2) to regulate all GE organisms as presenting a possible plant pest or noxious weed risk, without exception, and with no means of granting nonregulated status; or (3) to withdraw APHIS regulations governing biotechnology and instead implement a voluntary program under which developers would present genetically engineered organisms to APHIS for an evaluation of their plant pest and noxious weed risk, and organisms determined to be plant pests and/or noxious weeds would be

regulated under other APHIS regulations.

Anticipated Cost and Benefits: Not yet determined.

Risks: Unless we issue this proposal, we may not be able to regulate a genetically engineered plant that does not pose a plant pest risk, but does pose a noxious weed risk. Additionally, as noted above, the current regulations do not incorporate recommendations of two OIG audits, and do not respond to the requirements of the 2008 Farm Bill, particularly regarding APHIS oversight of field trials and environmental releases of genetically engineered organisms.

RIN: 0579–AE15

USDA—APHIS

Final Rule Stage

4. Horse Protection; Licensing of Designated Qualified Persons and Other Amendments

Priority: Other Significant.

Legal Authority: 15 U.S.C. 1823 to 1825; 15 U.S.C. 1828

CFR Citation: 9 CFR 11.

Legal Deadline: None.

Abstract: This rulemaking will amend training and licensing requirements mandated by the horse protection regulations. We are also making several changes to the responsibilities of show management of horse shows, horse exhibitions, horse sales, and horse auctions, as well as changes to the list of devices, equipment, substances, and practices that can cause soring or are otherwise prohibited under the Horse Protection Act and regulations. Additionally, we are amending the inspection procedures. These actions are intended to strengthen existing requirements intended to eliminate soring and promote enforcement of Horse Protection Act and regulations.

Statement of Need: Soring, the act of deliberately inducing pain in a horse's feet to produce an exaggerated show gait, has been a persistent practice within the Tennessee Walking Horse industry despite regulations prohibiting it. Third party inspectors are currently trained and licensed by horse industry organizations and conduct inspections of horses at horse shows and exhibitions. In response to public concerns about the ability of the Horse Protection Program to prevent soring, the United States Department of Agriculture's (USDA's) Office of the Inspector General (OIG) initiated an audit of APHIS' oversight of the Horse Protection program and concluded that APHIS' inspection program for inspecting gaited horses is not adequate to ensure that horses are not being sored for the purposes of enhanced performance. OIG recommended that APHIS eliminate the horse inspection program in its current form and assume a direct involvement in the accreditation and monitoring of inspectors and inspection procedures. Under the proposed rule, all training and licensing of inspectors would be conducted only by APHIS, and devices used to cause soring would be further restricted or prohibited. APHIS is in agreement with these recommendations but needs to amend the regulations through rulemaking in order to adopt it.

Summary of Legal Basis: Section 4 of the Horse Protection Act, as amended (15 U.S.C. 1823), requires the Secretary of Agriculture to prescribe by regulation requirements for the appointment by the management of a horse show, exhibition, sale, or auction (referred to below as show management) of persons qualified to detect and diagnose a horse which is sore or to otherwise inspect horses for the purpose of enforcing the Act. Section 9 (15 U.S.C. 1828) authorizes the Secretary of Agriculture to issue such rules and regulations as deemed necessary to carry out the provisions of the Act.

Alternatives: In following the recommendations of the USDA OIG Audit, we believe the changes we proposed in this rulemaking represent the best alternative option that would accomplish the stated objectives and minimize impacts on small entities. In the proposed rule, we welcomed comments from the public on other options, in particular the viability of alternative approaches that would continue to rely on the horse industry organization concept, and what the governance of such an organization should be like.

Anticipated Cost and Benefits: The benefits of the proposed rule are expected to justify the costs. The proposed changes to the horse protection regulations would promote the humane treatment of walking and racking horses by more effectively ensuring that those horses that participate in exhibitions, sales, shows, or auctions are not sored. This benefit is an unquantifiable animal welfare enhancement. The proposed rule is not expected to adversely impact communities in which shows are held since walking and racking horse shows are expected to continue.

Risks: This rulemaking is intended to reduce the risk of horses suffering pain and injury from the practice of soring without restricting the activities of horse owners and organizations that have no history of soring and for which the USDA does not consider soring to be a concern.

RIN: 0579–AE19

USDA—GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION (GIPSA)

Proposed Rule Stage

5. Tournament Systems and Poultry Growing Arrangements

Priority: Other Significant.

Legal Authority: 7 U.S.C. 181 to 229c
CFR Citation: 9 CFR 201.
Legal Deadline: None.
Abstract: The U.S. Department of Agriculture's Grain Inspection, Packers and Stockyards Administration (GIPSA) plans to propose amending part 201 of the Regulations under the Packers and Stockyards Act (P&S Act) (7 U.S.C. 181–229c) to address the use of tournament systems as a method of payment and settlement grouping for poultry growers under contract in poultry growing arrangements with live poultry dealers. The proposed regulation would establish certain requirements to which a live poultry dealer must comply if a tournament system is going to be utilized to determine grower payment. A live poultry dealer's failure to comply would be deemed an unfair, unjustly discriminatory and deceptive practice according to factors outlined in the proposed rule.

Statement of Need: This proposed section 201.214 will establish criteria that the Secretary may consider when determining whether a live poultry dealer has used a poultry grower ranking system to compensate poultry grower in an unfair, unjustly discriminatory, or deceptive manner, or in a way that gives an undue or unreasonable prejudice or disadvantage. Proposed section 201.210(10) will link the criteria to an unfair practice in violation of section 202(a) of the P&S Act. These provisions are needed to protect poultry growers from unfair, unjustly discriminatory or deceptive practices and devices and from undue or unreasonable prejudice or disadvantage. SUMMARY OF LEGAL BASIS: Section 407 of the P&S Act provides that [t]he Secretary may make such rules, regulations, and orders as may be necessary to carry out the provisions of this Act. This rule is necessary to carry out the provisions of Section 202(a) and (b) of the P&S Act.

Summary of Legal Basis: GIPSA considered three regulatory alternatives: Maintain the status quo and not propose the regulation; propose a revised version of the proposed rule published in 2010; and propose a revised version that would be phased in as existing contracts expire, are replaced, or modified.

Alternatives:

Anticipated Cost and Benefits: GIPSA estimates the annualized costs of proposed regulation 201.211 to be less than $11 million. GIPSA estimates the costs to be greater than $100 million annually. GIPSA was unable to quantify the benefits of the regulations. However, the primary benefit of regulation 201.214 is the increased ability to protect poultry growers from unfair practices associated with the use of poultry grower ranking systems. GIPSA also expects that the regulation will improve efficiencies and reduce market failures, by increasing the amount of relevant information available to poultry growers and reducing information asymmetries. Potential poultry growers will make better informed business decisions regarding whether to enter the industry and established poultry growers will make better informed decisions regarding additional capital investments.

Risks: The risk addressed by this rulemaking is the present uncertainty that poultry growers face regarding treatment in a poultry grower ranking system and the inefficient allocation of resources due to incomplete information needed for business decisions.

RIN: 0580–AB26

USDA—GIPSA

6. Unfair Practices and Unreasonable Preference

Priority: Other Significant.
Legal Authority: Pub. L. 110–246; 7 U.S.C. 181–229c
CFR Citation: 9 CFR 201.
Legal Deadline: None.
Abstract: Title XI of the 2008 Farm Bill required the Secretary of Agriculture to issue a number of regulations under the P&S Act. Among these instructions, the 2008 Farm Bill directed the Secretary to identify criteria to be considered in determining whether an undue or unreasonable preference or advantage has occurred in violation of the P&S Act. In June of 2010, the Grain Inspection, Packers and Stockyards Administration (GIPSA) published a proposed rule addressing this statutory requirement along with several other rules required by the 2008 Farm Bill. Proposed 201.211 to the regulations under the P&S Act would have established criteria that the Secretary may consider in determining if conduct would violate section 202(b) of the P&S Act (undue or unreasonable preference or advantage). While many commenters provided examples of similarly situated poultry growers and livestock producers receiving different treatment, other commenters were concerned about the impacts of the provision on marketing arrangements and other beneficial contractual agreements. Beginning with the FY 2012 appropriations act, USDA was precluded from working on certain proposed regulatory provisions related to the P&S Act, including criteria in this proposal regarding undue or unreasonable preferences or advantages. Consequently, GIPSA did not finalize this rule in 2011. The prohibitions are not included in the Consolidated Appropriations Act, 2016. This rulemaking is necessary to fulfill statutory requirements. Section 201.210 will illustrate by way of examples types of conduct GIPSA would consider unfair, unjustly discriminatory, or deceptive.

Statement of Need: This proposed rulemaking will establish a list of practices that violate section 202(a) of the P&S Act without a showing of harm to completion and establish criteria that the Secretary will consider when determining whether a packer, swine contractor, or live poultry dealer has engaged in conduct or action that constitutes an undue or unreasonable preference or advantage in violation of section 202(b) of the P&S Act. These provisions are needed to protect livestock producers and poultry growers from unfair, unjustly discriminatory or deceptive practices and devices and from undue or unreasonable prejudice or disadvantage or undue or unreasonable preference or advantage. The 2008 Farm Bill directed the Secretary of Agriculture to establish criteria that the Secretary will consider in determining whether a live poultry dealer has provided reasonable notice to poultry growers of any suspension of the delivery of birds under a poultry growing arrangement; when a requirement of additional capital investments over the life of a poultry growing arrangement or swine production contract constitutes a violation of the P&S Act; and if a live poultry dealer or swine contractor has provided a reasonable period of time for a poultry grower or a swine production contract grower to remedy a breach of contract that could lead to termination of the poultry growing arrangement or swine production contract. GIPSA published final rules establishing the

required criteria in December 2011. These regulations will link the regulatory criteria to a violation of the P&S Act.

Summary of Legal Basis: Section 11006 of the Food, Conservation, and Energy Act of 2008 (Pub. L. 110–246) (2008 Farm Bill) required GIPSA to establish criteria regarding: Undue or unreasonable preference or advantage; suspension of delivery of birds under a poultry growing arrangement; additional capital investments for poultry or swine contracts; and reasonable period of time to remedy a breach of contract. GIPSA issued final regulations for three of the four required criteria on December 9, 2011. Section 201.210 of this rule, will link the criteria to a violation of the section 202(a) of the Packers and Stockyards Act. In addition, section 201.210 will identify other conduct that GIPSA considers to be unfair, unjustly discriminatory, or deceptive and a violation of section 202(a) of the P&S Act without a showing of harm to competition. Section 201.211 will establish criteria for the remaining area undue or unreasonable preference or advantage. Together, the regulations will complete the unfinished work from the 2008 Farm Bill. Section 407 of the P&S Act provides that [t]he Secretary may make such rules, regulations, and orders as may be necessary to carry out the provisions of this Act. This rule is necessary to carry out the provisions of section 202(a) and (b) of the P&S Act.

Alternatives: GIPSA considered three regulatory alternatives: Maintain the status quo and not issue the regulations; issuing revised versions of the proposed rule published in 2010 as proposed rules; and proposing regulations that would be phased in as existing contracts expire.

Anticipated Cost and Benefits: GIPSA estimates the cost to be greater than $100 million annually. GIPSA was unable to quantify the benefits of the regulations. However, the primary benefit of regulations 201.210 and 201.211 is the increased ability to protect producers and growers through enforcement of the P&S Act for violations of section 202(a) and/or (b) that do not result in harm or the likelihood of harm to competition.

Risks: The risk addressed by this rulemaking is the present uncertainty that limits enforcement of section 202(a) or (b) of the P&S Act. The clarification provided by this rulemaking will allow the linkage of the regulatory criteria to a violation of the P&S Act, which is a substantial portion of the GIPSA Packers and Stockyards Program's mission.
